The Consortium for Computing Sciences in Colleges is a non-profit organization focused on promoting quality computer-oriented curricula as well as effective use of computing in institutions of higher learning which are typically teaching in orientation.

CONFERENCE PURPOSE

The CCSC:Southeastern Conference is a regional conference sponsored by the Consortium for Computing Sciences in Colleges and is designed to promote exchange of information among college personnel concerned with computer use in the academic environment. It is intended for faculty as well as administrators of academic computing facilities, and it is also intended to be welcoming to student participants in a variety of special activities. Because personnel at teaching-oriented colleges often have restricted travel budgets, the scheduling of regional conferences of the CCSC is done with consideration toward minimizing conference costs.

The conference is held in cooperation with SIGCSE. Submitted papers are refereed, with those that are accepted being published in the (ACM recognized) Journal of Computing Sciences in Colleges.
