Foreword

Foreword

This catalog is intended to detail the University's academic programs, policies and services for use by current undergraduate students, faculty, and administrators. We appreciate that applicants, prospective students, and many other people will read this material, as well, for some understanding of University programs and culture.

Information in the catalog is current as of August 2015; the next Catalog will be published in August 2016. In the interim, new courses will be announced in the course schedules which are usually available in November and April and on the Web (www.cmu.edu/hub).

The program requirements and academic policies set forth in this Catalog are subject to change. As a consequence, students are expected to consult with their individual college or department for the most up-to-date information about program requirements, and should consult the University's policy website for the most current statements of University policy.

Any changes or updated information from any member of the campus community should be directed to John Papinchak, University Registrar.

Michael C. Murphy
Vice President for Campus Affairs

Statement of Assurance

Carnegie Mellon University does not discriminate in admission, employment, or administration of its programs or activities on the basis of race, color, national origin, sex, handicap or disability, age, sexual orientation, gender identity, religion, creed, ancestry, belief, veteran status, or genetic information. Furthermore, Carnegie Mellon University does not discriminate and is required not to discriminate in violation of federal, state, or local laws or executive orders.

Inquiries concerning the application of and compliance with this statement should be directed to the Vice President for Campus Affairs, Carnegie Mellon University, 5000 Forbes Avenue, Pittsburgh, PA 15213, telephone 412-268-2056.

Obtain general information about Carnegie Mellon University by calling 412-268-2000.

Administration

SUBRA SURESH, President.

FARNHAM JAHANIAN, Provost.

ILKER BAYBARS, Dean, Carnegie Mellon-Qatar.

AMY L. BURKERT, Vice Provost for Education.

JAY S. CALHOUN, Treasurer.

GINA CASALEGNO, Dean, Student Affairs.

ROBERT M. DAMMON, Dean, David A. Tepper School of Business.

PAMELA L. EAGER, Interim Vice President of University Advancement.

MARY JO DIVELY, Vice President and General Counsel.

GARY K. FEDDER, Vice Provost for Research.

JAMES H. GARRETT JR., Dean, College of Engineering and Carnegie Mellon Silicon Valley.

FREDERICK J. GILMAN, Dean, Mellon College of Science.

JIMMY HSIA, Vice Provost for International Programs and Strategy.

STEVEN K. HUTH, Chief Information Officer.

STEVEN KLOEHN, Vice President for Marketing & Communications.

RAMAYYA KRISHNAN, Dean, H. John Heinz III College.

DAN J. MARTIN, Dean, College of Fine Arts.

ELIZABETH A. MILAVEC, Associate Vice President for Finance and Controller.

ANDREW MOORE, Dean, School of Computer Science.

MICHAEL C. MURPHY, Vice President for Campus Affairs.

PAUL D. NIELSEN, Chief Executive Officer and Director, Software Engineering Institute.

AMIR RAHNAMAY-AZAR, Vice President for Finance & Chief Financial Officer.

KATHRYN ROEDER, Vice Provost for Faculty.

RICHARD SCHEINES, Dean, Marianna Brown Dietrich College of Humanities and Social Sciences.

KEITH WEBSTER, Dean, University Libraries.

Officers of the Board of Trustees

JAMES E. ROHR, Chairman.

EDWARD H. FRANK, Vice Chairman.

TOD S. JOHNSON, Vice Chairman.

SUBRA SURESH, President, Carnegie Mellon University.

FARNHAM JAHANIAN, Provost.

JAY S. CALHOUN, Treasurer.

MARY JO DIVELY, Vice President and General Counsel.

PAMELA EAGER, Interim Vice President for University Advancement.

CHERYL M. HAYS, Secretary.

CHARLES A. KENNEDY, Chief Investment Officer.

KAREN T. KHAN, Assistant Secretary.

STEVEN KLOEHN, Vice President for Marketing and Media Relations.

ELIZABETH MILAVEC, Assistant Treasurer.

MICHAEL C. MURPHY, Vice President for Campus Affairs.

AMIR RAHNAMAY-AZAR, Vice President for Finance and Chief Financial Officer.

Life Trustees

JOEL ADAMS, General Partner, Adams Capital Management, Inc.

JOHN R. BERTUCCI, Chairman, MKS Instruments, Inc.
 FRANK BRUNCKHORST, Boar's Head Provisions Co., Inc.
 ERROLL B. DAVIS, JR., Interim Superintendent, Atlanta Public Schools.
 LINDA A. DICKERSON, Principal, 501(c)(3)².
 PHILIP L. DOWD, Sherick Enterprises, LLC.
 FRANCISCO D'SOUZA, President and CEO, Cognizant Technology Solutions.
 HOWARD ELLIN, Partner, Skadden Arps Slate Meagher and Flom.
 EDWARD H. FRANK, Founder and Sole Proprietor, Compass Vineyards; Co-founder and CEO, Cloud Parity, Inc.
 YOSHIKI FUJIMORI, President and CEO, LIXIL Group Corporation.
 IRA J. GUMBERG, President and CEO, J.J. Gumberg Co..
 TORRENCE M. HUNT, JR., .
 LARRY JENNINGS, JR., Senior Managing Director, ValStone Partners, LLC.
 TOD S. JOHNSON, Chief Executive Officer, The NPJ Group, Inc.
 RAYMOND J. LANE, Partner Emeritus, Kleiner Perkins Caulfield & Byers.
 BRUCE MCWILLIAMS, President and CEO, Intermolecular.
 AMBAR PAUL, Director, Caparo Group Limited.
 JAMES E. ROHR, Executive Chairman, The PNC Financial Services Group, Inc..
 JONATHAN ROTHBERG, Founder and Chairman, Butterfly Networks, LAM Therapeutics, Quantum-Si, Hyperfine Research, and 4 Combinator.
 DAVID S. SHAPIRA, Executive Chairman, Board of Directors, Giant Eagle, Inc.
 J. LEA HILLMAN SIMONDS, .
 MANOJ SINGH, Chief Operating Officer, Deloitte.
 DONALD E. STITZENBERG, Principal, CBA Associates.
 DAVID TEPPER, President and Founder, Appaloosa Management.
 MARY ANN ULISHNEY, Vice President and Wealth Specialist, Wells Fargo Bank, N.A.
 SUNIL WADHWANI, Chairman and Co-founder, iGATE Corporation.
 PAULA KAUFFMAN WAGNER, Producer/Owner, Chestnut Ridge Productions.

Ex-Officio Trustees

SUBRA SURESH, President, Carnegie Mellon University.
 REBECCA ALLISON, President, Carnegie Mellon Alumni Association.
 BRUCE KRAUS, President, Pittsburgh City Council.
 KRISTEN KURLAND, President, Andrew Carnegie Society; Teaching Professor, School of Architecture and H. John Heinz III College, Carnegie Mellon University.
 WILLIAM PEDUTO, Mayor, City of Pittsburgh.
 TOD PRZYBYCIEN, Chair, Faculty Senate, Carnegie Mellon University.

Term Trustees

JOHN ANDERSON, President, Illinois Institute of Technology.
 LUIS BALL, President, Allegheny Medical Systems LLC.
 RONALD BIANCHINI, JR., Co-founder, President and CEO, Avere Systems.
 KEITH BLOCK, President and Vice Chairman, Salesforce.com.
 ARISTIDES CANDRIS, President and CEO, Westinghouse Electric Company, Retired.
 ERIC COOPER, .
 DAVID COULTER, Special Limited Partner, Warburg Pincus LLC.
 RUSSELL CROCKETT, Senior Advisor, C14 Strategy LLC.
 JEANNE CUNICELLI, .
 DIRK GATES, Chief Executive Officer, Xirrus, Inc.
 JAMES GIANOPULOS, Chairman and CEO, Twentieth Century Fox Film.
 ERIC GILER, Executive Chairman, Scratch Wireless.

EDWARD GREFFENSTETTE, President and Chief Investment Officer, Dietrich Charitable Trusts.
 JEFFREY HOUSENBOLD, President and CEO, Shutterfly.
 MICHAEL MCQUADE, Senior Vice President for Science and Technology, United Technologies Corporation.
 WILLIAM L. MEANEY, CEO, Iron Mountain.
 ANNE M. MOLLOY, Executive Director, Posner Fine Arts Foundation.
 MANU NARAYAN, Performing Artist/Musician.
 DAVID PORGES, Chairman, President and CEO, EQT Corporation.
 AJIT SHETTY, Retired Chairman of the Board, Janssen Pharmaceutical.
 LUKE SKURMAN, CEO, Niche.
 LIP-BU TAN, Chairman, Walden International; CEO, Cadence Design Systems.
 THOMAS TULL, Founder, Chairman and CEO, Legendary Pictures.
 CAROL A. WILLIAMS, EVP, Manufacturing and Engineering, The Dow Chemical Company, Retired.

Life Emeritus Trustees

PAUL A. ALLAIRE, Former Chairman and CEO, Xerox Corporation.
 ARTHUR H. ARONSON, Retired Executive Vice President, Allegheny Teledyne.
 CAROL R. BROWN, Former President, Pittsburgh Cultural Trust.
 ROBERT M. BROWN, III, President, B-III Capital LLC.
 FRANK V. CAHOUE, Retired Chairman and CEO, BNY Mellon.
 W. LOGAN DICKERSON, President, Lindwood Farm, Inc. and Protos Foods, Inc..
 EDWARD DONLEY, Former Chairman, Air Products and Chemicals, Inc..
 DINA DUBLON, .
 WILLIAM B. ELLIS, Retired Chairman and CEO, Northeast Utilities.
 CYNTHIA FRIEDMAN, Co-owner, Union Real Estate Company of Pittsburgh.
 HENRY J. GAILLIOT, .
 CLAIRE W. GARGALLI, .
 WILLIAM GOLDSMITH, Chairman of the Board, Nucon Energy Group.
 RICHARD D. HAMILTON, Retired Director of Product Supply, Procter and Gamble.
 WILTON A. HAWKINS, .
 THERESA L. HEINZ, Chariman, Heinz Family Philanthropies.
 ORION HOCH, Chairman Emeritus, Litton Industries.
 T. JEROME HOLLERAN, Chairman, Precision Medical Products, Inc..
 W. LEE HOSKINS, Retired Chairman and Chief Executive Officer, The Huntington National Bank.
 JUSTIN M. JOHNSON, Retired Judge, Superior Court of Pennsylvania.
 PATRICIA ASKWITH KENNER, President, Campus Coach Lines.
 DAVID M. KIRR, Partner, Kirr, Marbach & Company.
 HANS W. LANGE, .
 EDWARD E. LUCENTE, .
 THOMAS A. MCCONOMY, Retired Chairman of the Board, Calgon Carbon Corporation.
 JACK E. MCGRATH, Retired Senior Vice President, Booz & Company.
 REGINA GOUGER MILLER, Owner/Artist, Ginger and Spice; Regina Gouger Miller Studio.
 LINDSAY J. MORGENTHALER, .
 ALESSANDRO OVI, Executive Vice President, Fondazione Popoli.
 NORMAN F. PARKER, Retired President, Varian Associates.
 CHARLES J. QUEENAN, JR., Retired Senior Counsel, K&L Gates LLP.
 JOHN G. RANGOS, John G. Rangos, Sr. Charitable Foundation.

DAVID M. RODERICK, Former Chairman and Chief Executive Officer, United States Steel Corporation.

VINCENT A. SARNI, Retired Chairman and Chief Executive Officer, PPG Industries, Inc..

JOYCE BOWIE SCOTT, J. Bowie Scott Studio.

RAYMOND W. SMITH, Chairman, Rothschild Continuation Investments.

WILLIAM P. SNYDER, III, President and Chairman, The Wilpen Group, Inc..

W. LOWELL STEINBRENNER, Retired Former Chairman, Contours, Ltd..

JAMES M. WALTON, President Emeritus, Carnegie Institute.

KONRAD M. WEIS, Former President and Chief Executive Officer, Bayer Corporation.

Frequently Asked Questions

Q: What is the Undergraduate Catalog?

A: The Undergraduate Catalog, published every year, contains information about and academic requirements for each course of study or program available to undergraduate students at Carnegie Mellon, as well as course descriptions and university policies.

Q: For whom is the Undergraduate Catalog relevant?

A: The Undergraduate Catalog is most relevant for students entering in the year of publication. However, returning students should also use the Undergraduate Catalog to look at new programs and courses of study that may interest them.

Q: How often is the Undergraduate Catalog updated?

A: The Undergraduate Catalog is published every year. The next Catalog will be published in August 2016.

Q: The requirements for my major are different here than when I entered Carnegie Mellon; will my classes still count the same towards graduation?

A: Yes. A student's requirements for graduation are determined by the year he or she enters Carnegie Mellon. If a program or major's requirements change in a later catalog, these changes will only affect students entering during that Catalog year.

Note: The only exception is for courses which stop being taught or change course number. You should confer with your academic advisor each semester in order to be sure you are on track for graduation. You can also use the Academic Audit (<https://enr-apps.as.cmu.edu/audit/audit>) tool to check on your progress.

Q: Does the Catalog include course times and locations?

A: No. Current information on course times and locations can be found on Student Information Online (<https://s3.as.cmu.edu/sio>), under the Course Schedule tab.

Look at Carnegie Mellon

Excellence in Practice and Learning for Life

Carnegie Mellon emphasizes a deep connection between theoretical knowledge and practice: the university's interdisciplinary approach to education stresses the practical application and analysis of knowledge in institutional, social and historical contexts. "On a campus of 110 acres, research and teaching are conducted in more than 30 different fields of the arts, humanities, engineering, the sciences, social sciences, management and public policy. Students and faculty in these areas are in daily contact with one another, pursuing interdisciplinary projects, redefining fields of knowledge, pushing their own visions of the possible and contributing to the world around them," writes Jared L. Cohon, the eighth president of Carnegie Mellon in "The Innovative University," a volume of writings that celebrated Carnegie Mellon's centennial in 2000. Carnegie Mellon graduates are excellent practitioners in their chosen fields. The university is in the process of enriching and complementing this education to ensure that our students also gain broader, well-informed perspectives that will help them grow and change with their professions; interact wisely with the natural environment; and be responsible and informed citizens in an increasingly technological world and complex global culture.

From Technical School to International University

In a letter written in 1900, industrialist and philanthropist Andrew Carnegie offered to give the city of Pittsburgh \$1 million in bonds to found a technical institute. The city provided 32 acres of land near Schenley Park, and the institution became known as the Carnegie Technical Schools. According to Carnegie's plans, the institution would train the sons and daughters of working-class families in five schools: Science and Technology, to train draftsmen and engineer's assistants; Fine and Applied Arts, for designers and art workers; Apprentices and Journeymen, for mechanics in manufacturing and construction; and Margaret Morrison Carnegie College, for home economists or secretaries. Within two decades, the Carnegie Technical Schools offered bachelor's, master's and doctor's programs, and fittingly changed its name to the Carnegie Institute of Technology.

In 1967, the trustees of the Mellon Institute and the Carnegie Institute of Technology merged the two institutions and adopted the name Carnegie Mellon University. In 1968, Margaret Morrison Carnegie College closed and the university organized a new College of Humanities and Social Sciences. New graduate-level colleges and schools also flourished, including the Graduate School of Industrial Administration (GSIA), the Heinz College of Public Policy and Management, and the School of Computer Science. As time progressed, new research centers and institutes developed on and off campus in specialties ranging from art conservation to sustainable computing. In 2004, GSIA was renamed the Tepper School of Business after alumnus David A. Tepper.

The Carnegie Institute of Technology has developed from a regional, technical college into Carnegie Mellon University, a selective, international research university that consistently ranks among the nation's best colleges in U.S. News & World Report, Newsweek and BusinessWeek magazines. The university is also a leader in environmental sustainability and energy efficiency, and is home to the nation's first Leadership in Energy and Environmental Design (LEED) certified dormitory. University Business magazine identified Carnegie Mellon as one of the nation's Higher Education Sustainability Stars.

Undergraduate students can pursue majors in six of the university's seven colleges: the Carnegie Institute of Technology (engineering), the College of Fine Arts, the Tepper School's business administration program, the College of Humanities and Social Sciences, the Mellon College of Science, and the School of Computer Science. Carnegie Mellon also has campuses in California and Qatar and is expanding its presence in Europe, Australia and Asia with master's programs and other educational partnerships.

A Unique Educational Experience

The university's diversity, focus on strong student-faculty ties and commitment to education outside the classroom combine to create a learning environment that is as uniquely Carnegie Mellon as the Tartan plaid on the kilts of its bagpipers.

Carnegie Mellon strives for a campus culture that reflects a fundamental respect for different ways of living, working, and learning so every student

has the opportunity to reach her or his potential. The university community is diverse, with roughly 12,000 students, nearly evenly split between undergraduates and graduates, and more than 1,400 faculty members. About 10% of undergraduate students are underrepresented minorities and 17% hail from countries outside the U.S. Faculty and graduate students also come from across the globe.

The university's small student-to-faculty ratio gives students the opportunity for close interaction with their teachers - an essential component of academic success. But while professors spend a great deal of time with students, they also expect them to develop initiative, to critically assess their own progress and to work as teams. Working together, students and faculty create real-world projects with immediate impact. A design professor might critique a student's sketches of a company logo, or a team of students will work with professors and researchers to design an autonomous robot for a race across the desert. Faculty at Carnegie Mellon take an interest in their students' questions and concerns beyond the classroom. Some serve as academic advisors, while others seek undergraduate assistance with research projects or oversee student-proposed projects.

Equally important to the Carnegie Mellon education is the meta-curriculum, the learning that occurs outside classes through community service, interacting and learning in the university's international community, or even just living in the residence halls.

Structure to Succeed, Freedom to Explore

A Carnegie Mellon education is marked by its strong focus on fundamental and versatile problem-solving skills in a specific discipline, but the university respects and values students' varied talents and interests that often span many specialties. At Carnegie Mellon, students can explore more than one field of study while developing the strong professional core that is the hallmark of a Carnegie Mellon education. The university encourages students to expand their thinking in new and exciting dimensions, whether by taking courses from disciplines across the university or pursuing a double major or minor - frequently in a different college. Students can even design their own majors. In a community rich with seven colleges, the academic options are as varied as the students who pursue them.

Though academic interests may differ, the university has structured its programs so students develop skills vital to all professions, with communication and reflective practice acting as the common threads connecting these skills. In order to excel in any field and lead a life of social responsibility and lifelong learning, students must be able to understand the theoretical basis and practical implications of knowledge and action, convey ideas and information effectively, and be reflective practitioners. Carnegie Mellon instills these qualities in students and gives them a wide array of perspective and opportunities by creating an environment of learning-by-doing, providing them with a strong analytical background, and encouraging them to do and make.

Strength in Research and Artistic Creation

At Carnegie Mellon, faculty members aren't just devoted teachers. They conduct groundbreaking research, create new and exciting art, and contribute to a growing global scholastic community. The university's faculty are continuously innovating, and the new knowledge they create and the methods they discover routinely benefit classroom learning. Each college and dozens of special centers focus on issues and developments that affect the world beyond Carnegie Mellon.

Researchers in the Mellon College of Science received a \$13.3 million grant to develop the National Center for Networks and Pathways, which will generate molecular bio-sensors that will change the way scientists look at living cells. A study by researchers in the College of Engineering found that cell phones and other portable electronic devices can interfere with the normal operation of critical electronics on airplanes. Meanwhile, in the university's Dietrich College of Humanities and Social Sciences, faculty have made critical strides toward understanding what causes autism and how it can be treated more effectively. The National Science Foundation funded a new Quality of Life Technology Engineering Research Center — a joint effort of Carnegie Mellon's School of Computer Science and the University of Pittsburgh — that will design and commercialize technology to help older adults and people with disabilities live independently and productively. New research from the Tepper School of Business showed small retailers that the best way to compete with mega-marts is to use their existing customer

data to develop new sales and marketing strategies. Students and faculty in the university's School of Design have collaborated with local foundations to create Explanatoids, cartoons designed to illustrate the importance of science, math and technology to the Pittsburgh region while stressing the role girls play in the careers of the future. Just down the road, faculty in the Heinz College are breaking new ground with studies on the different ways men and women negotiate.

Exploring Research and Creative Projects

Faculty aren't the only people busy with research on campus. Research is a vital component of undergraduate education at Carnegie Mellon. Students can initiate projects of their own or become involved with existing ones on campus. The Department of Biological Sciences, for example, has faculty mentors who help interested students find research opportunities that support their own intellectual curiosity. Drama students participate in every facet of productions, from set construction to acting. Students across campus are encouraged to work with faculty to pursue their own interests, and most departments offer courses for independent study that allow undergraduates to work on projects of their own design under the guidance of a faculty member.

Research projects often come with a financial cost, but Carnegie Mellon offers many sources of funding for students conducting independent research and creative projects. One popular source of funding is the university's Small Undergraduate Research Grant (SURG) program offered through the Undergraduate Research Office. (For more information, see the Undergraduate Research Office section in this catalog under "University Services.") These types of funding programs combined with the support and encouragement offered by faculty and staff on campus bring research - traditionally the mark of graduate education - into the undergraduate realm.

The World of Carnegie Mellon

Carnegie Mellon is often described as a competitive place - and it is. The university selects students from among the best in the world, so attending Carnegie Mellon means that you'll be with students who, like you, were at the top of their classes in high school. The university also stresses collaboration and teamwork, often across disciplines, where students share common goals and tasks while still bringing something unique to the interaction. Carnegie Mellon students are serious scholars who want to excel. The atmosphere is intense and demanding, but also encouraging and rewarding. Carnegie Mellon graduates enter society prepared to assume even greater challenges and equipped with an awareness of their own strengths and abilities.

But Carnegie Mellon students still have fun, and spend their free time engaged in many activities and forging some of the strongest friendships they've ever known. Students don't just develop a solid work ethic at Carnegie Mellon - they develop a strong sense of community. Through residence hall living, community service, group projects and numerous activities and clubs, students find they can belong to a range of communities. Carnegie Mellon also has the tradition of Spring Carnival, an annual three-day event whose buggy races and booths involve students and alumni from a multitude of academic and cultural backgrounds.

Carnegie Mellon Impacts the World

As a Carnegie Mellon graduate, you'll join a highly respected group of individuals who have changed the world as we know it. Whether pursuing further education or entering the work force, alumni consistently achieve the high goals they've set for themselves in a wide variety of academic and professional fields. One alumnus wrote the songs for "Godspell," while an alumna won the Tony Award for Best Performance by a Leading Actress in a Play for her performance in the Pulitzer Prize-winning "Doubt." Carnegie Mellon alumni created and starred in "Hill Street Blues," "L.A. Law," "NYPD Blue," "ER" and "Lost." More than 2,000 of our graduates are corporate chairs, presidents or vice presidents. Some 1,400 alumni are university professors and another 30 are deans. Most major symphonies around the country include Carnegie Mellon alumni. The university's graduates are also prominent in government, and include a former White House staff assistant, a U.N. delegate and a former first deputy chairman of the presidium of the USSR. An astronaut who walked on the moon holds a Carnegie Mellon degree, as does the project director of NASA's Pioneer Interplanetary Probe. Five Carnegie Mellon alumni have gone on to win the Nobel Prize (three in economics, two in physics), and the works of many former art students hang in the permanent collections of more than 50 international museums.

Our Vision

Carnegie Mellon will meet the changing needs of society by building on its traditions of innovation, problem solving, and interdisciplinarity.

Our Mission

To create and disseminate knowledge and art through research and creative inquiry, teaching, and learning, and to transfer our intellectual and artistic product to enhance society in meaningful and sustainable ways.

To serve our students by teaching them problem solving, leadership and teamwork skills, and the value of a commitment to quality, ethical behavior, and respect for others.

To achieve these ends by pursuing the advantages of a diverse and relatively small university community, open to the exchange of ideas, where discovery, creativity, and personal and professional development can flourish.

Our Values

- **Dedication**, as exemplified by our commitment to the critical issues of society and our uncompromizing work ethic.
- **Collaboration**, as exemplified by our interdisciplinarity, our external partnerships, and our capacity to create new fields of inquiry.
- **Measuring excellence by impact**, as exemplified by our focus on issues critical to regional development, national interest, and global welfare.
- **Entrepreneurship**, as exemplified by openness to new ideas, prudent use of resources, and readiness to act.
- **Depth driving breadth**, as exemplified by our issue-driven research, our context-based general education initiatives, and our focus on problem solving and creative production at all levels.
- **Compassion**, as exemplified by our focus on human welfare, on the betterment of society, and on the personal development of the members of our community.
- **Integrity and inclusion**, as exemplified by our attention to the highest ethical standards in all domains, and our commitment to being a community which welcomes talented minds from diverse backgrounds and challenges them individually and collectively to achieve their best.

Carnegie Mellon's undergraduate educational programs are designed to help students acquire the following:

- Depth of knowledge in their chosen areas of specialization and genuine intellectual breadth in other fields.
- Creativity and intellectual playfulness, moving beyond established knowledge and practice to create imaginative ideas and artifacts.
- Skilled thoughtfulness and critical judgment, which allow them to evaluate new ideas, identify and solve or explore problems, and appreciate a variety of different forms of analysis and thought.
- Skills of independent learning, which enable them to grow in wisdom and keep abreast of changing knowledge and problems in their profession and the world.
- A set of values, including commitment to personal excellence and intellectual adventure, concern for the freedoms and dignity of others, and sensitivity to the special professional and social responsibilities that come with advanced learning and positions of leadership.
- The self-confidence and resourcefulness necessary to take action and get things done.
- The ability to communicate with others on topics both within and outside their chosen field of specialization.

Most instruction at Carnegie Mellon is focused on fundamentals useful in later learning, rather than on particulars of knowledge and techniques that may soon become obsolete. Advanced courses provide students with the opportunity to refine their skills by applying and exercising the fundamentals they have acquired in earlier courses and by exploring new analytical and creative directions. In a world that has sometimes placed too little emphasis on skill, Carnegie Mellon takes pride in educating students who display excellence in application - students who can do useful things with their learning.

Values, including sensitivity to the feelings, needs and rights of others, are learned in part through example. To this end, the faculty and staff of Carnegie Mellon work to provide a supportive and caring environment that values and respects intellectual, philosophical, personal and cultural diversity. The faculty strive to identify and discuss with their students, both in formal classroom settings and in a variety of informal contexts, their responsibilities as professionals, citizens and human beings, and to teach through example.

The undergraduate programs at Carnegie Mellon are designed to help our students become accomplished professionals who are broadly educated, independent and humane leaders.

Degrees Offered

The following list shows all primary degrees offered for both undergraduate and graduate students at Carnegie Mellon University.

For a list of minors, please see Undergraduate Options (p. 66).

College of Engineering

Interdepartmental

- M.S. in Engineering and Technology Innovation Management
- M.S. in Energy Science, Technology and Policy

Biomedical Engineering

- B.S. in an engineering discipline and Biomedical Engineering (link) (p. 128)
- M.S. in Biomedical Engineering
- Ph.D. in Biomedical Engineering

Chemical Engineering

- B.S. in Chemical Engineering (link) (p. 134)
- M. Chemical Engineering
- M. Chemical Engineering and Colloids, Polymers and Surfaces
- M.S. in Chemical Engineering
- M.S. in Chemical Engineering and Colloids, Polymers and Surfaces
- M.S. in Colloids, Polymers and Surfaces
- Ph.D. in Chemical Engineering

Civil and Environmental Engineering

- B.S. in Civil Engineering (link) (p. 137)
- M.S. in Advanced Infrastructure Systems
- M.S. in Civil and Environmental Engineering
- M.S. in Civil Engineering
- M.S. in Civil and Environmental Engineering/M. of Business Administration (jointly with the Tepper School of Business)
- M.S. in Computational Mechanics
- M.S. in Environmental Engineering
- M.S. in Environmental Management and Science
- Ph.D. in Advanced Infrastructure Systems
- Ph.D. in Civil and Environmental Engineering
- Ph.D. in Civil and Environmental Engineering/Engineering and Public Policy (dual degree offered with Engineering and Public Policy)
- Ph.D. in Civil Engineering
- Ph.D. in Computational Mechanics
- Ph.D. in Environmental Engineering
- Ph.D. in Environmental Management and Science

Electrical and Computer Engineering

- B.S. in Electrical and Computer Engineering (link) (p. 140)
- B.S. in Music and Technology (jointly with the Department of Music and the School of Computer Science)
- M.S. in Electrical and Computer Engineering
- M.S. in Music and Technology (jointly with the Department of Music and the School of Computer Science)
- Ph.D. in Electrical and Computer Engineering

Engineering and Public Policy

- B.S. in an engineering discipline with an additional major in Engineering and Public Policy (link) (p. 147)
- B.A., B.S., etc. in DC, MCS, or SCS and an additional major in Science, Technology and Public Policy (link) (p. 148)
- M.S. in Engineering and Public Policy
- Ph.D. in Engineering and Public Policy
- Ph.D. in Engineering and Public Policy and an engineering discipline
- Ph.D. in Engineering and Public Policy and Statistics (jointly with the Department of Statistics)

Information Networking Institute

- M.S. in Information Networking
- M.S. in Information Security Technology and Management
- M.S. in Information Technology - Information Security
- M.S. in Information Technology - Mobility
- M.S. in Information Technology - Software Management

Mechanical Engineering

- B.S. in Mechanical Engineering (link) (p. 152)
- M.S. in Computational Design and Manufacturing
- M.S. in Mechanical Engineering
- Ph.D. in Mechanical Engineering

Materials Science and Engineering

- B.S. in Materials Science and Engineering (link) (p. 156)
- M.S. in Materials Science
- M.S. in Materials Science and Engineering
- Ph.D. in Materials Science and Engineering

Undergraduate Admission

Michael A. Steidel, Director of Admission
Office: Warner Hall, Admission Lobby, First Floor
<http://www.cmu.edu/admission>

Admission Philosophy

At Carnegie Mellon, we select our freshman class from a large group of very qualified candidates. We don't use a calculation to arrive at our admitted class. Calculations can't take into account all of the factors we like to consider when making admission decisions. We treat every application individually and take great care in making our admission practices fair, thorough and sensitive. We are interested in students who can be successful at Carnegie Mellon and take full advantage of all the university has to offer and enriching our campus community.

Admission Criteria

The majority of our applicants are admissible and could be successful at Carnegie Mellon. We use a variety of factors to select our first-year class from those admissible candidates. High school performance weighs most heavily in our admission decision because it is the most meaningful measure of a student's abilities. We pay close attention to the type of courses taken and to the grades received, and to the challenges you've given yourself in the classroom. If you are applying to programs in the arts, your artistic performance will be either the main factor or a significant factor (depending on the program) in our admission decision.

Standardized test scores add to our knowledge of a student's ability, but we cannot make decisions simply on the basis of test scores alone. The high school record and standardized test scores (SAT Reasoning Test or Act with Writing and SAT Subject Tests) work together to make up the academic portion of a student's evaluation.

Carnegie Mellon is an exciting campus because of the positive qualities and experiences our students bring with them. For this reason, we're interested in the kinds of things students do beyond the classroom, whether they participate in extracurricular activities, work part-time or pursue hobbies. Knowing what students like to do on their own time gives us a feeling for each student's personality, motivation and sense of responsibility. All of this is an important part of the admission process.

Expressing an interest in learning more about Carnegie Mellon can only enhance a student's application. We strongly recommend that students come to the Carnegie Mellon campus to interview with a member of our staff, although it's not required. This adds a personal touch to our evaluation and gives students a chance to ask questions. If you cannot make it to campus, consider talking with a local Carnegie Mellon alumni representative. There are a number of other ways to show interest and learn more about Carnegie Mellon. Students can come to one of our Turn Tartan Weekends, attend an information program in or near their town, interview in their hometown with one of our staff members or alumni, or enroll in one of our summer programs. Information about a number of these events is included at the end of this section.

Different Criteria for Different Colleges

Each college at Carnegie Mellon has special admission criteria specifically related to each course of study.

Admission to the Schools of Drama and Music is based primarily on an audition or portfolio review. Applicants to the Schools of Architecture, Art and Design will be evaluated not only on the basis of their portfolio but also on their academic performance.

Candidates for the College of Engineering, the Mellon College of Science, and the School of Computer Science will be evaluated on the basis of academic performance, and we will look additionally for strength in mathematics and science. Academic performance is also the main criteria we use to evaluate applicants to the Dietrich College of Humanities and Social Sciences, the Information Systems program and to the Tepper School of Business' undergraduate program. In these cases, we emphasize reading and comprehension abilities as well as mathematics courses.

No one single grade, factor or score will automatically grant or deny a student admission to Carnegie Mellon. Students should be aware of all the admission requirements-secondary school preparation, standardized test requirements, nonacademic information, counselor, teacher and interview recommendations-when submitting applications. We will use the sum total of these different factors when making our admission decisions. Because we want to have a sense of who the student is as a person, we look closely at the essay and personal statement the student is asked to write, the guidance counselor's evaluation and the teacher's recommendation.

Freshman Application Instructions

- Applicants must apply online by completing the Common Application and submitting the \$75 application fee. We require this fee of all applicants except in extenuating family financial circumstances. A College Entrance Examination Board Application Fee Waiver, an ACT Application Fee Waiver, or a letter from a secondary school counselor or principal requesting an application for a waiver must be submitted.
- Request that your secondary school counselor submit all high school transcripts, including senior year courses and mid-year grades, and a school profile to the Office of Admission, preferably online, as close to January 1 as possible.
- Apply for admission only to the specific college(s) or programs in which you're interested.
 - Rank your program and/or major preference.
 - You may apply to up to three colleges/programs.
 - If you're applying to more than one college/program, there's no need to submit multiple applications and there's no additional application fee.
 - Be sure to meet the admission requirements for each college/program.
 - Early Decision and transfer candidates will only be considered for their first choice college/program.
- If you're applying to the College of Engineering, Dietrich College of Humanities and Social Sciences, Information Systems, Mellon College of Science, School of Computer Science and Tepper School of Business, We strongly urge you to indicate a program and/or major preference at the time you apply. Although you might not declare a major until the end of your freshman or sophomore year, we do limit access to certain majors, such as electrical and computer engineering, computer science and business.
- If you're applying to the College of Fine Arts (CFA), you must apply specifically to one of the following schools: Architecture, Art, Design, Drama or Music. (See specific instructions to follow.)
- If you are applying to the School of Music, the additional audition fee is \$50 and if you are applying to the School of Drama the additional audition fee is \$85 and only payable online by VISA or MasterCard, at the time of reserving your audition online at <http://www.cmu.edu/admission/finearts>
- Take the SAT Reasoning Test or ACT with Writing and SAT Subject Tests preferably by November, but no later than December. If you are applying to art, design, drama or music, SAT Subject Tests are not required.
 - Scores must be official scores from the Educational Testing Service (ETS). Copies should not be sent. When registering for the tests, request that an official Score Report be sent directly to Carnegie Mellon. This request can also be made later by getting an Additional Report Request Form from your guidance office. The Carnegie Mellon code is 2074.
 - Register for your tests at least six weeks prior to the test date.
- The Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) should be taken if your native language is not English. Carnegie Mellon requires 102 or better on the IBT TOEFL, and an IELTS scores of 7.5 or above. Please arrange to have these scores sent no later than January 1.
- If you are applying to the College of Fine Arts' Schools of Architecture, Art, Design, Drama, or Music, you must complete portfolio review or audition requirements. Please go to <http://www.cmu.edu/admission/finearts> for further information. The Schools of Art, Architecture, Design, Drama and Music require that students apply to the university before registering for an audition or portfolio review. There is no Early Decision consideration given for the acting, directing, music theater, music and technology, or the BXA programs.
- You must sign the "Confidentiality Statement" on the Common Application School Report Form and give it to your secondary school counselor for completion. Your counselor should return this form, along with the school profile and your transcript.
- Choose a teacher to complete the Common Application Teacher Recommendation Form and make sure it is submitted to the Office of Admission by the application deadline.
- Our Regular Decision application deadline is January 1. The Schools of Drama and Music's Regular Decision deadline is December 1.
- If you are applying for financial aid, complete a Free Application for Federal Student Aid (FAFSA) at <http://www.fafsa.gov>. Carnegie Mellon's Title IV code is 003242. You must also complete the CSS PROFILE at <https://>

profileonline.collegeboard.com and submit signed copies of parent and student tax documents. See www.cmu.edu/admission for more details.

Application Notification

- Students applying under the Early Decision Plan will be notified of our decision by December 15.
- Students applying under the Regular Decision Plan will be notified of our decisions by April 15.
- Students who are applying for financial aid will also receive financial aid decisions by April 15 provided they submitted their financial aid forms by the preferred financial aid deadline of February 15.

If you are offered admission and wish to enroll at Carnegie Mellon, you are required to pay an \$800 non-refundable enrollment deposit by May 1 (Candidates General Reply Date), even if you are receiving financial aid, in order to reserve places in the freshman class and in university housing. This deposit will be credited to your first semester's charges. The admission staff assumes that a student's deposit to Carnegie Mellon is his or her only deposit. We reserve the right to cancel our offer of admission if a student posts a tuition deposit at another university. During the summer, information concerning registration, enrollment, insurance, orientation, housing and dining services, etc., will be sent to all students.

Deferred Admission

If you are admitted to Carnegie Mellon and wish to defer your admission for one year, you must submit a request in writing to the Office of Admission. If permission is granted, your enrollment deposit must be paid in order to confirm enrollment for the following year. You cannot enroll in a degree program at another institution in the interim.

Application Plans

Early Decision Plan

If Carnegie Mellon is your first choice, you may want to consider applying Early Decision. Under this plan, applicants are notified of our admission decision early in the senior year. If you are accepted Early Decision, we expect you to enroll in Carnegie Mellon. Under the Early Decision plan, we encourage you to submit applications to other schools. However, if you are accepted to Carnegie Mellon, we require you to withdraw your applications from other schools.

Early Decision is available to all programs, with the exception of acting, music theater, directing, music and technology or the BXA programs.

Early Decision Applications are due November 1 and students will be notified of an admission decision by December 15. If you are admitted under Early Decision, you are required to withdraw all admission applications to other colleges or universities and post a non-refundable enrollment deposit of \$800 within two weeks of your admission notification.

Regular Decision Plan

Regular Decision is our most popular application option. The deadline is January 1 (December 1 for drama and music applicants). You will be notified of our decision by April 15. Admitted students will have until May 1 (Candidate's General Reply Date) to accept our offer of admission.

Early Admission

Through the process of Early Admission, the university admits certain highly qualified applicants at the end of their junior year in high school. In general, Early Admission candidates are highly mature and responsible students who have usually exhausted the courses offered at their high schools without receiving a high school diploma. We expect students who apply for early admission to follow the same procedures as regular freshman applicants. We also strongly encourage applicants to have a personal interview with a member of the Office of Admission staff. It is important to note that the College of Fine Arts very rarely accepts Early Admission applicants.

Transfer Applicants

Transfer students are admitted to Carnegie Mellon under policies that vary from college to college. If there is space in the requested program, we will base our decision on your college grades, college recommendations, high school grades and test scores (SAT Reasoning Test or ACT with Writing and SAT Subject Tests, if available). In the College of Fine Arts, most transfer applicants compete with freshman applicants for a place in the entering class.

Transfer Application Instructions

1. Apply for admission to the specific college of interest, noting departmental preference. If interested in music or drama, student should specify the option. Transfer students will be considered only to their first-choice college. Please do not apply to more than one college.

Engineering, DC, IS, MCS, SCS or Tepper:

- Fall transfer possible if space is available
- Spring transfer extremely limited and unlikely
- No external transfers accepted into BHA/BSA/BCSA

CFA:

- Fall transfer possible
- No spring transfer opportunities (except for advanced students in the School of Music)
- If you are interested in the School of Music or Drama, specify the option
- No external transfers accepted into BHA/BSA/BCSA

2. Enclose a non-refundable fee of \$75 (and audition fees if applicable). This application fee is required, except in extenuating family financial circumstances.
3. Send all transcripts that reflect secondary school and college/university studies to the Office of Admission. We also require a copy of course descriptions from a college catalog from each college/university you attended. Course descriptions should be sent by email to <mailto:undergraduate-admission@andrew.cmu.edu> with the subject line "Transfer Course Descriptions." Course descriptions should be copied and pasted into a single .doc or .pdf document, and must have your name and address on the first page.

IMPORTANT: If you have applied to Carnegie Mellon within the past three years, you must resubmit an updated application with fee (and audition fee if appropriate) and all other materials required of transfer students. You do not have to submit high school records.
4. If you are applying to the Schools of Architecture, Art, Design, Drama or Music, you must complete any portfolio or audition requirements. You must complete and submit the application for admission by December 1.
5. Sign the "Confidentiality Statement" on the Secondary School Report. Give this form and your completed application for admission to a dean or an advisor at the college you attended (or are currently attending). Your dean or advisor should complete and return the form and application directly to the Office of Admission.

IMPORTANT: Carnegie Mellon prefers that all forms and documents be submitted at the same time. If they must be sent separately, make sure to print your full name and social security number at the top of each document.
6. Transfer application deadlines are as follows:
 - Spring transfer: October 15
 - Fall transfer: March 1 (December 1 for CFA applicants)
7. If you are applying for financial aid, complete a Free Application for Federal Student Aid (FAFSA) at <http://www.fafsa.gov>. Carnegie Mellon's Title IV code is 003242. You must also complete the CSS Profile at <https://profileonline.collegeboard.com> and submit signed copies of parent and student tax documents. See <http://www.cmu.edu/admission> for more details.

If planning on:	File FAFSA by this date:
Spring transfer	November 1
Fall transfer (CFA)	February 15
Fall transfer (all other colleges)	May 1

IMPORTANT: If you are applying for financial aid as a transfer student, you must send a Financial Aid transcript of aid applied for and/or received at all colleges previously attended. Even if you didn't receive any aid, federal regulations require that the college(s) attended complete the form.

Admission and financial aid award notification dates for transfer students:

Spring transfer:	December 15 or soon after
Fall transfer(CFA):	April 15
Fall transfer (all other colleges):	During month of June

Make arrangements to have a final copy of your college transcript(s) sent to Carnegie Mellon.

Deposit Information for Transfers

If you are offered admission for the spring semester, Carnegie Mellon does not require a tuition deposit (due to the short time interval between December 15 and the start of the second semester). If you are offered admission to the College of Fine Arts for the fall semester, you must pay a non-refundable deposit of \$800 by May 1, even if you are receiving financial aid. If you are offered admission to Engineering, DC, IS, MCS, SCS, or Tepper for the Fall semester, you must pay a non-refundable \$800 deposit by June 15, even if you are receiving financial aid. The enrollment deposit will reserve your place at the university and a place in university housing if available. It will be credited to the first semester charges.

IMPORTANT: If you accept our offer of admission, Carnegie Mellon assumes that the tuition deposit to Carnegie Mellon is your only tuition deposit. We reserve the right to cancel our offer of admission if you post a tuition deposit at more than one university. Enrollment deposits received after the deadline may be returned if space is no longer available.

University Housing for Transfers

Carnegie Mellon expects to accommodate most transfer students who request university housing, however, it is not guaranteed. The Off-campus Housing Advisory and Referral Service is available to help you locate housing accommodations in the local area.

Transfer Credit Evaluated on Individual Basis

Carnegie Mellon's departmental faculty will determine transfer credit for courses you've taken at other universities. Transfer credit is considered on an individual basis. We may award elective credit for courses with no Carnegie Mellon equivalent. In some instances, the College Council may recommend a special program of study for you to meet the university's graduation requirements.

Transfer credit for courses you are taking while we review your existing college record depends upon successful completion of each course. Grades are not transferred - only credit is. You may receive transfer credit for elective courses you've taken but will still have to take Carnegie Mellon courses to fulfill the elective space in your chosen degree program. Sometimes transfer students have to take specific courses and accumulate a larger total number of credits than the normal amount required for graduation. The time it takes for you to graduate will depend on the time you need to complete the full university degree requirements - not on class standing at a previous institution.

If you transfer into CIT, IS, MCS, SCS or Tepper in the Fall semester, you will receive an estimate of the additional academic work that you must complete in order to fulfill the university degree requirements. If you transfer into CIT, IS, MCS or SCS in the Spring semester, you will have the opportunity to meet with a dean or department head in order to outline the additional academic work that you must complete in order to meet the university degree requirements. If you transfer into DC in the fall or spring semester, you'll receive a credit and requirement review of the work you've completed at your previous institution(s). It is best for transfer students in CFA to assume freshman status. Occasionally advanced standing is awarded based on review of previous college courses.

Application as an International Student

International students should apply to Carnegie Mellon using the same procedures outlined for either freshmen or transfer students. Also note this additional information:

- Carnegie Mellon does not offer financial aid or installment plans to international students. International students are not eligible for application fee waivers.
- If your native language is not English, you are required to take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). Carnegie Mellon requires 102 or better on the IBT TOEFL or an IELTS score of 7.5 and above. Please arrange to have these scores sent no later than January 1.

Advanced Placement Consideration

Advanced Placement Program

Carnegie Mellon recognizes the Advanced Placement program and may grant advanced placement and credit for test scores of four or five. We encourage eligible students to take the AP examinations. We will receive the test scores in early summer for those students who have requested that their results be sent to Carnegie Mellon. The appropriate academic deans will evaluate your scores, and in late summer, you will be informed of the AP credit awarded.

College Level Course Work

The university may also award placement and credit for college work completed during high school. Applicants who have taken college courses should arrange to have their college transcripts along with course catalogs or descriptions sent to the Carnegie Mellon Office of Admission for transfer credit evaluation and advanced placement.

International Baccalaureate Program

Carnegie Mellon also recognizes the International Baccalaureate Examination and may grant advanced standing and/or credit in various fields if scores on the higher level examination range from six and seven. The results of the IB exams should be sent to Carnegie Mellon, where the appropriate dean will evaluate the scores. In late summer, you will be notified of the credit that has been awarded.

BXA Intercollege Degree Programs

Bachelor of Computer Science and Arts (BCSA)

The Bachelor of Computer Science and Arts (BCSA) Program is an intercollege degree-granting program. It is designed for students who would like to combine their interests in the fine arts and computer science rather than pursue a conventional major and degree in either the College of Fine Arts or the School of Computer Science. To be considered for the BCSA program, you must apply and be admitted to both CFA and SCS (you must check the CFA box and SCS box on the Common Application). This program is only open to directing and production technology and management for Drama and composition, music performance and music technology for Music. Not all students admitted to both colleges are selected for the BCSA program.

Bachelor of Humanities and Arts (BHA)

The Bachelor of Humanities and Arts (BHA) program is an intercollege degree-granting program. It is designed for students who would like to combine and blend their interests in fine arts and humanities/social sciences rather than pursue a conventional major and degree in either the College of Fine Arts (CFA) or the Dietrich College of Humanities and Social Sciences (DC). To be considered for the BHA program, a student must apply and be admitted to both CFA and DC (you must check the CFA box and DC box on the Common Application). This program is not open to music theatre or acting majors. Not all students admitted to both colleges are selected for the BHA program.

Bachelor of Science and Arts (BSA)

The Bachelor of Science and Arts (BSA) program is an intercollege degree-granting program. It is designed for students who would like to combine studies in both the fine arts and natural sciences/mathematics rather than pursue a conventional major and degree in either the College of Fine Arts (CFA) or the Mellon College of Science (MCS). To be considered for the BSA program, a student must apply and be admitted to both CFA and MCS (you must check both the CFA box and MCS box on the Common Application). This program is not open to music theatre or acting majors. Not all students admitted to both colleges are selected for the BSA program.

With the BXA programs, you must include with your application a statement of intent (essay) describing your interdisciplinary goals in both academic areas and how the BXA program would provide the opportunity and framework for you to accomplish these objectives. This essay is a central component in the selection process. The BXA statement of intent fulfills the essay requirement on the supplement. You do not need to complete another essay. If you are selected for this program, you will be notified in your admission decision letter. These programs are not available under Early Decision.

College of Fine Arts Requirements

Deadlines

- Early Decision applicants must submit a complete admission application, including any required artistic evaluation, by November 1 (Drama applicants must meet this deadline if they choose the November audition date).
- Regular Decision applicants must submit a complete admission application by January 1 (or December 1 if applying to drama or music) and all audition or portfolio review reservations should be made before this date.

Communication of Information and Admissions Decisions

- Once you have registered for the appropriate audition or portfolio review at admission.enrollment.cmu.edu/pages/college-of-fine-arts, you will receive further instructions from us via email.
- Final admission decisions are not made at the time of your audition or portfolio review. We will consider the artistic evaluation as part of your application along with your other credentials and notify you by April 15 (December 15 for Early Decision applicants).

Please visit admission.enrollment.cmu.edu/pages/college-of-fine-arts for details regarding the specific requirements for fine arts auditions and portfolio reviews.

Exploring Carnegie Mellon

Visiting a campus is one of the best ways for you to discover which school is right for you. We strongly recommend that you attend an information session or interview with a member of the admission staff while on campus. Admission interviews allow us the opportunity to get to know our applicants. Interviews are considered in the admission process and help the admission committee make better, more informed decisions with determining the freshman class. During the interview, you'll have the opportunity to ask questions about admission requirements, financial aid, student life, Pittsburgh - and much more!

On-campus auditions and portfolio reviews usually include an interview with a member of the Fine Arts faculty and a campus tour. Therefore, only one campus visit is necessary for fine arts students.

Campus Tours

Campus tours are conducted by Andrew Ambassadors and leave from the Office of Admission, 101 Warner Hall. On most weekdays during the academic year, we conduct four tours daily. Please visit the website (<http://admission.enrollment.cmu.edu/pages/tour-campus>) for exact dates and times campus tours are offered.

Hometown Interviews

Although we strongly recommend a campus visit, we realize that it is not always possible for you to come to campus. The Admission staff does travel to various parts of the country interviewing students in their hometowns. Information about making an appointment will be mailed to students prior to the time we arrive in your city. Students who interview on campus do not have to schedule another interview in their hometown. The specific dates and locations for Hometown Interviews are listed online at <http://admission.enrollment.cmu.edu/pages/interviews-with-the-office-of-admission>

Alumni Interviews

We encourage students to talk with a member of the Carnegie Mellon Admission Council (CMAC). CMAC, a select group of alumni, helps the Admission staff reach out to prospective students. Alumni interviews are as valuable when making admission decisions as interviews with the Admission staff. If you're interested in interviewing with a member of CMAC, please visit <http://admission.enrollment.cmu.edu/pages/interview-with-alumni>. (<http://admission.enrollment.cmu.edu/pages/interview-with-alumni>)

Turn Tartan Overnight Weekends

The more information you have, the better decisions about college you'll make! The Admission staff invites you to learn more about Carnegie Mellon by living like a university student for a day and a half in our Turn Tartan Overnight (<http://admission.enrollment.cmu.edu/pages/turn-tartan-overnight>) program. Visits begin on Sunday morning and last through Monday afternoon.

Information Sessions

The Office of Admission offers two different information sessions throughout the year, both on and off campus. Carnegie Mellon Preview Sessions, offered in the Spring, are meant for freshmen, sophomores and juniors in high school, who are looking for a general overview of the college search process. Carnegie Mellon's Information Sessions for High School Seniors, available in the Summer and early Fall, offer an in-depth look at the university. During the informational program, you'll have the opportunity to learn more about Carnegie Mellon's areas of study, the admission process and admission requirements, how to apply for financial aid and our campus and alumni through exciting video testimonials. Check out the schedule and register at <http://admission.enrollment.cmu.edu/pages/information-sessions>.

Call Carnegie Mellon for Assistance

If a student will need assistance while visiting the campus, due to a physical or learning disability, he/she should call us at 412-268-2082, and we will help meet the student's needs during his/her visit at Carnegie Mellon.

Directions to Campus

Directions to Carnegie Mellon's campus from the north, east, south, west and the airport are available at <http://admission.enrollment.cmu.edu/pages/maps-directions>. Please call (412) 268-8343 to listen to a recorded message of these directions to campus by phone. If you are using a GPS, the following address will take you to the East Campus Parking Garage: **5040 Forbes Avenue, Pittsburgh, PA 15213**.

Summer Opportunities

The campus is in full operation during the summer, populated by students and faculty from a variety of programs. The university continues to have outstanding, innovative educational programs extending beyond regular involvement with its degree candidates. Six such programs are offered during the summer for high school students: the Pre-College Programs in the Fine Arts (Architecture, Art & Design, Drama and Music), the Advanced Placement Early Action Program and the Summer Academy for Mathematics and Science. Three sessions of summer school are held for college students who wish to make up or advance their degree program studies. Every service and support organization is available to summer students: the Computer Center, the Health Center, the Counseling Center, the libraries, the Office of Admission, the Career Center, Student Activities, etc.

Summer Pre-College Programs for High School Students

Office of Admission, Warner Hall 2nd Floor

The Pre-College Programs are designed to preview an actual college experience. Our programs afford high school students many opportunities for personal growth and development within a university setting. A wide range of social, cultural, and recreational activities are planned by a staff of resident counselors to fully integrate the students' lives on campus and in Pittsburgh. Movies, dances, museum and gallery visits, field excursions or attendance at professional theater productions, concerts, and Pittsburgh Pirates games are just a few of the sponsored activities.

Summer Academy for Mathematics and Science

Students with diverse backgrounds who are entering their junior or senior year and considering careers in engineering, science and other math-based disciplines are eligible to participate in this rigorous program. Traditional classroom instruction, along with creative "hands-on" projects will allow students to apply concepts and principles.

Advanced Placement Early Admission Program

Overview

The main purpose of the Advanced Placement Early Admission (AP/EA) Program is to provide the opportunity to take university courses at Carnegie Mellon for talented, motivated high school students. Students earn college credit while working in an academic environment mirroring that which the student would encounter during the first year of college.

Students who complete two courses in the AP/EA Program and who can graduate early from high school have the unique opportunity to apply Early Admission. By attending the AP/EA program during the summer of 2013, students who will be high school juniors in the fall of 2013 will have a strong understanding of college life and academics. These rising juniors are eligible to apply Early Admission by January 1, 2014, and if accepted can start as full-time degree students here in the fall of 2014. Students admitted under Early Admission are not obligated to accept the offer of admission until May 1.

All AP/EA students may also apply to Carnegie Mellon during their senior year, through Early Decision (various deadlines in November and December depending on the college) or Regular Decision (January 1 deadline, or December 1 for the College of Fine Arts).

Regardless of whether students choose to apply to Carnegie Mellon, successful AP/EA students can leverage their experiences here as demonstration of their ability to succeed in college. AP/EA courses are college courses, not AP classes, and as such they count toward graduation requirements here and are widely accepted elsewhere. Students applying to another college or university can request an official Carnegie Mellon transcript be sent to that institution. Any use of AP/EA courses to satisfy high school requirements should be approved ahead of time by an appropriate high school official.

While most of the participants in the program will have just completed their junior or senior year of high school, suitably qualified students at early grade levels can participate. However, in order to stay in university housing, students must be at least 16 years old. This does not apply to commuters.

AP/EA Coursework

Our APEA courses are regular Carnegie Mellon classes, so you should anticipate intense, college-level work. Many of the APEA faculty members are the same faculty who teach during the regular school year. Upon admission to the program, students will select their courses from the Schedule of Classes. View the 2015 AP/EA Course List (<http://goo.gl/BYcePS>) for more information.

As an APEA student, you'll be required to take two courses during the summer. This two-course schedule completed in six weeks is comparable in demand to the typical five-course schedule completed in a semester.

The flexible APEA program allows you to take:

- Two math/science/engineering courses
- One math/science/engineering course and one humanities/social sciences course
- Two humanities/social sciences courses

Some features of the APEA classes include:

- meet daily
- small class size
- personal learning environment
- supplemental tutoring
- taught by faculty selected for their enthusiasm and experience teaching college-level material to younger students

Pre-requisites

High school preparation is necessary for some AP/EA classes. For more details, consult the course descriptions or contact the program director.

Calculus requires:

Algebra, trigonometry and geometry. Pre-calculus or an equivalent course is recommended.

Computer science requires:

Knowledge of computers or some computer experience in high school is helpful but not required. PSAT Math of 65 or higher, or SAT Math of 650.

Physics, chemistry and biology require:

Students enrolled in physics, chemistry, biology or engineering must have completed a physics, chemistry or biology high school course.

Students with special qualifications may apply for permission to enroll in a third course with an additional non-refundable charge. Carrying three courses in the AP/EA program is not generally recommended.

Pre-College Architecture Program

Overview

The study of architecture is an exciting multidisciplinary activity that combines design creativity, historical perspective, technical excellence, social responsibility, and global and environmental leadership. The Pre-College Architecture Program is structured to introduce you to each of these areas and for you to experience studying architecture in a university setting.

Primary Goals of Pre-College Architecture

Pre-College will provide you with a strong foundation and give you a clear idea of what to expect at a college level architectural program. The mix of seminars, workshops, drawing and digital media classes will introduce you to some of the theory, process and methodology of current design practice. The experience of working in the studio environment is quite different from the traditional classroom that you may be used to, giving you the opportunity to begin to develop your own design sensibility as you work iteratively through the creative process.

The Value of Attending Pre-College

Pre-college is a good opportunity to test the fit of architecture with your career goals and expand upon your creative and technical skills, providing a solid head start if you decide to enter this field of study. Project work is partnered with a focus on documentation and techniques to communicate your ideas visually. We run workshops to assist you in photographing your work and creating a strong portfolio, which is an essential part of a student's presentation package.

Coursework

The studio curriculum is designed to allow you to move freely between physical and virtual spatial investigations. Work alternates between theoretical projects represented through image and model, and installation projects created at full-scale. Installations are produced collaboratively and will immerse you in hands-on making, approaching the work in terms of material behavior, tectonic systems, and perceptual experience. These full-scale projects allow you to learn from physical engagement with the spaces you have designed; this experience and spirit of experimentation will inform and strengthen your individually created theoretical work.

No prior design, drawing or computer experience is necessary; if your skills in these areas are more advanced, our faculty and program will challenge you to develop them further. The ratio in the design studio is 1:12. At the conclusion of the summer program, you will have a private consultation with your design professor and receive a written letter of evaluation regarding your progress and aptitude in all courses. You will also receive 9 units of elective credit at Carnegie Mellon should you later enroll in the School of Architecture as an undergraduate student.

Pre-College Art and Design Program

Overview

The Pre-College Art and Design program motivates, stimulates and prepares you as emerging artists and designers. Exploring traditional tools and new technologies in a variety of media leads you to develop conceptual and technical skills as well as your portfolio – all excellent preparation for applying to and succeeding in college-level art and design programs. Challenging courses, stimulating workshops, museum and gallery field trips, and energetic interaction with dedicated faculty and talented peers introduce you to the spirit and substance of an art and design school culture and environment.

Coursework

During the Pre-College Program, you will attend morning and afternoon classes, Monday through Friday. You'll work in our beautiful, spacious studios in the historic College of Fine Arts building and Margaret Morrison Carnegie Hall.

The Pre-College faculty at Carnegie Mellon are accomplished artists, designers and educators who share their expertise inside and outside the classroom. With small class sizes, you'll benefit from their individual attention, intense instruction and substantial constructive feedback. Instructors provide written evaluations of your work upon completion of the program.

Your instructor to student ratio will be about 1:13, promoting opportunities for questions and discussion. Although the pre-college program has its own particular aspects, the underlying philosophy is similar to the first year of our regular undergraduate art and design curricula. At the end of the program, each student meets with a faculty member to discuss his/her performance in the program, and to address questions regarding documentation and presentation of work and portfolio preparation. The program concludes on a celebratory note, inviting parents and friends to see the unique work produced over the course of the three-week or six-week session.

Studio Environment

Students work together in a large studio with individual workspaces. Sessions include individual instruction, in-class work sessions, critiques, lectures and field trips.

There is an array of events and opportunities to enhance and supplement studio work, including:

- Weekly figure drawing
- Visits to local galleries such as the Carnegie Museum of Art
- Visits to Pittsburgh based design firms
- Evening presentations by faculty on their own art and design work
- Exhibitions of Carnegie Mellon student work
- Portfolio preparation and critique sessions

Pre-College Drama Program

Overview

The Pre-College Drama Program gives students the chance to participate in a professional training program with three options: acting, music theatre and design/technical production. The program focuses on the exploration of a conservatory training program with emphasis on creativity, craft and discipline.

Coursework

The Pre-College Drama curriculum focuses on process rather than results. Nevertheless, the culmination of the program is an audition or portfolio review. These events are mandatory for all students whether or not they plan to apply to Carnegie Mellon for admission.

The audition/portfolio reviews take place during the last two days of the program. Acting and music theatre students will perform two contrasting, two-minute monologues. In addition, music theatre students will participate in dance and vocal auditions. Design/Production students will experience portfolio reviews and interviews with faculty.

Every student will receive an evaluation of his or her coursework along with advice for future development in the profession.

Pre-College Music Program

Overview

Instruction is challenging, creativity is expected and the responsibility of making music and training musicians is taken very seriously. At Carnegie Mellon, we are proud of our history in which tradition and technology co-exist. The School of Music has graduated superb musicians who are known worldwide as performers, composers, conductors and educators.

The Program

The Pre-College Music Program offers a unique view of the life of a music student at Carnegie Mellon in a supportive environment of study and performance. It is an ideal opportunity to experience a world-class conservatory program and discover your potential for a career in music. Coupled with the rich cultural life of the city of Pittsburgh and varied campus activities, the Pre-College Music Program is an extraordinary way for young musicians to spend their summer.

The Pre-College Music Program will give you the opportunity to see what college is like. This is not high school and it is not camp. You get to live on campus, take classes with conservatory professors, play, rehearse, perform and enjoy the freedom of college life in a safe environment.

National High School Game Academy

Overview

The National High School Game Academy (NHSGA) explores the video game industry and the skills needed to be successful in it. The program includes an exciting blend of hands-on exercises combined with traditional lecture and discussion. Students are encouraged to expand their own creative possibilities in a unique blend of left- and right-brain college-level work.

Inspired by the Carnegie Mellon graduate program, Entertainment Technology, the NHSGA is structured to give students a taste of the current state of video game development and provide guidance toward embarking on their own career in the video game industry.

Video games are now a major force in the world of popular entertainment. Video game sales, in the U.S., have outgrown the film industries annual box office sales. Plus, this industry is still growing with the emergence of casual gaming, online gaming and serious gaming, so companies are continually looking for passionate, creative and talented individuals.

The program encourages all students to apply. No particular technical or artistic skills are needed. Regardless of your background, if you are interested in exploring the world of video game development, the National High School Game Academy is the program for you.

While creating a real college-level environment, students are encouraged to explore their interests, expand their technical knowledge and develop their interpersonal skills. They will learn about job opportunities in the industry and what is needed to be competitive in this job market. There is a misconception that if one is good at playing video games then they will be good at creating video games. Students in this program will discover just how much hard work and talent is needed to be successful.

Coursework

The six-week program consists of daily lectures on various topics concerning video game development and the industry itself, followed by four-hour studio sessions in the afternoon where various specific skills classes and workshops are held. All of these courses will be hosted at the Entertainment Technology Center which is located just off main campus. Students will be bussed the short distance to and from the main campus every day.

Upon applying for the National High School Game Academy, students will need to declare an Art Focus or a Programming Focus. While all students will take classes in all three areas of art, programming and game design, their declared focus will dictate the length of time they spend in each area. On the first day of class, each of these two focus areas will then be split into three additional groups (Beginner, Intermediate and Advanced) in order to aid us in providing a challenging level of study for all students. If a student is a beginner, or unsure of which focus to take, or is an accomplished programmer already then it is suggested that they choose the Art Focus so that they can explore a new area of study at the NHSGA.

While the emphasis of the National High School Game Academy is to acquaint the student with the process of video game development, that effort is focused through the building of playable game demos and game assets. Students will develop a portfolio of their completed work and will present them for play testing and critique. Parents are again encouraged to attend this final afternoon session and see firsthand what has been accomplished.

At the end of the program, every student will receive an evaluation of his or her coursework along with advice for future development in college studies that would help him or her best prepare for this profession.

Further Information

Requests for applications and further information should be addressed to:

Pre-College Programs
Office of Admission

FAX: (412) 268-7838

Division of Enrollment Services

Lisa Krieg, Director of Enrollment Services / Director of Risk Initiatives / Associate Vice President for Campus Affairs

Office: Warner Hall A19
http://www.cmu.edu/hub

The Division of Enrollment Services includes six administrative departments: The HUB, University Registrar's Office, Student Financial Aid, Student Accounts Office, Summer Studies, and Campus Affairs Systems. The division leads and delivers integrated administrative services that support students' academic goals from enrollment through graduation. At the same time, the staff strives to champion collaborative administrative services and counsel for all CMU campuses and programs in alignment with the university's strengths in technology and effectiveness.

2015-2016 Cost of Attendance

The budgets depicted below reference a typical Resident, Commuter or Off-Campus Student. The university reserves the right to change its charges without notice.

The academic year tuition charges are for all full-time undergraduate students. A full-time student is one registered in a degree program and carrying a schedule of at least 36 units per semester. A student enrolled for less than 36 units per semester will be charged tuition on a per-unit basis.

Note: All incoming freshmen are required to live on campus. Permission to live off-campus must be granted by Student Affairs.

Freshmen Entering Fall 2015

Per-unit tuition rate: \$690

	Resident	Commuter
Tuition	49,610	49,610
Orientation Fee (Fall semester only)	255	255
Activity Fee	250	250
Transportation Fee	150	150
Media Fee	10	10
Technology Fee	390	390
Room & Fees (2)	7,520	0
Dining (1)	5,310	2,570
Books/Supplies & Miscellaneous (3)	2,400	2,400
Transportation Allowance (3, 4)	0	680
Totals	\$65,895	\$56,315

Undergraduate Students Who Entered Fall 2014 & Fall 2013

Per-unit tuition rate: \$690

	Resident	Commuter	Off-Campus
Tuition	49,610	49,610	49,610
Activity Fee	250	250	250
Transportation Fee	150	150	150
Media Fee	10	10	10
Technology Fee	390	390	390
Room & Fees (2)	7,520	0	7,020
Dining (1)	5,310	2,570	5,000
Books/Supplies & Miscellaneous (3)	2,400	2,400	2,400
Transportation Allowance (3, 4)	0	680	0
Totals	\$65,640	\$56,060	\$64,830

Undergraduate Students Who Entered Fall 2012

Per-unit tuition rate: \$683

	Resident	Commuter	Off-Campus
Tuition	49,120	49,120	49,120
Activity Fee	250	250	250
Transportation Fee	150	150	150
Media Fee	10	10	10
Technology Fee	390	390	390
Room & Fees (2)	7,520	0	7,020
Dining (1)	5,310	2,570	5,000
Books/Supplies & Miscellaneous (3)	2,400	2,400	2,400
Transportation Allowance (3, 4)	0	680	0
Totals	\$65,150	\$55,570	\$64,340

Undergraduate Students Who Entered Fall 2011

Per-unit tuition rate: \$676

	Resident	Commuter	Off-Campus
Tuition	48,660	48,660	48,660
Activity Fee	250	250	250
Transportation Fee	150	150	150
Media Fee	10	10	10
Technology Fee	390	390	390
Room & Fees (2)	7,520	0	7,020
Dining (1)	5,310	2,570	5,000
Books/Supplies & Miscellaneous (3)	2,400	2,400	2,400
Transportation Allowance (3, 4)	0	680	0
Totals	\$64,690	\$55,110	\$63,880

Undergraduate Students Who Entered Fall 2010 and Earlier

Per-unit tuition rate: \$670

	Resident	Commuter	Off-Campus
Tuition	48,180	48,180	48,180
Activity Fee	250	250	250
Transportation Fee	150	150	150
Media Fee	10	10	10
Technology Fee	390	390	390
Room & Fees (2)	7,520	0	7,020
Dining (1)	5,310	2,570	5,000
Books/Supplies & Miscellaneous (3)	2,400	2,400	2,400
Transportation Allowance (3, 4)	0	680	0
Totals	\$64,210	\$54,630	\$63,400

Footnotes:

- The commuter dining amount is based upon 14 meals per two weeks.
- Off-campus room rate is estimated at resident room minus \$500 and off-campus board is resident board minus \$310. Non-freshmen resident board is freshmen resident board minus \$310.
- These expenses will not appear on your Student Account Invoice. *Design/Architecture/Art Students: No additional add-on for books.*
- Transportation for resident and off-campus students varies based on home state.

Health Insurance

In addition, minimal health insurance coverage is required at an estimated cost of \$1,144/year, unless a waiver is granted because you are covered under your family's health plan. Enhanced health insurance coverage is suggested for international students at an estimated cost of \$2,500/year. Complete information about the university's Health Insurance Policy and options, as well as the waiver requirements, is available at <http://www.cmu.edu/health-services/student-insurance/>.

Fax: (412) 268-8084
E-mail: thehub@andrew.cmu.edu

The HUB staff delivers comprehensive service and counsel to students and families regarding financial aid, billing and payment, registration, academic records, and ID Card services. In direct support of student enrollment and persistence, The HUB offers students and families highly integrated information through personal attention and technologically responsive tools in a professional, forward-thinking, and accessible environment.

The Assistant Directors in The HUB serve as contacts for specific colleges and assist enrolled students with key aspects of the enrollment process – financial aid, billing and registration. Contact information for assigned HUB Assistant Directors can be found on The HUB website (<http://www.cmu.edu/hub/hours.html>). Assistant Directors can be contacted for specialized enrollment questions.

For general questions and information, please e-mail thehub@andrew.cmu.edu or call (412) 268-8186 during regular office hours: Monday, Wednesday, and Friday between 8:30 a.m. and 4:30 p.m. or Tuesday and Thursday between 10:30 a.m. and 4:30 p.m.

ID Card Services

Office: The HUB, Warner Hall, 5000 Forbes Avenue Pittsburgh, PA 15213-3890
 Phone: (412) 268-5224
 Fax: (412) 268-8084
 E-mail: idplus@andrew.cmu.edu

One of the most important items you will need at Carnegie Mellon is your official identification card. Your ID Card identifies you as a member of the Carnegie Mellon community. Your ID Card will be part of your everyday life on campus and is used to access the following:

- University Housing Residence Halls
- Computing Services & Computer Clusters/Labs
- University Libraries
- Local Port Authority Transit (bus, incline, etc.)
- Dining Services Meal Plans
- Computer Store
- University Center Retail Shops
- Athletic Facilities

For a full list of services that can be accessed using the ID Card, visit www.cmu.edu/idplus/services.

Plaid Cash

One beneficial feature of your ID Card is Plaid Cash. Plaid Cash is a prepaid, stored-value/debit account that is accessible via your ID Card. It is a convenient, cashless way to pay on and off campus. You can use Plaid Cash for textbooks, school supplies and laundry tokens. Many of the area's most popular businesses accept Plaid Cash; it can be used to pay for restaurant meals, take-out, delivery and more. View a list of participating businesses at www.cmu.edu/idplus/plaidcash/locations.html.

Student Advantage

A four-year Student Advantage membership can be added to your ID Card. With Student Advantage, you can receive discounts of up to 50% off at more than 20,000 locations nationwide. Learn how to add Student Advantage at www.cmu.edu/idplus/sa.

University Registrar's Office

John Papinchak , University Registrar
 Fax: (412) 268-6651
 E-mail: university-registrars-office@andrew.cmu.edu

The University Registrar's Office (URO) performs the essential roles of administering the collection and maintenance of student records, ensuring their accuracy and integrity, and enforcing academic policies while providing the best possible services. The University Registrar's Office aspires to provide exceptional, environmentally-conscious services, while anticipating and meeting growing customer requirements with innovative processes, training and self service applications. The office strives to foster and promote an environment of professional development and appreciation.

The University Registrar's Office produces a complete calendar of important dates and deadlines for the academic year, which can be found on The HUB website (<http://www.cmu.edu>).

Undergraduate Enrollment

Enrollment is the process whereby eligible students notify Enrollment Services that they will be attending the university by registering for courses and settling their student accounts. Enrollment must be completed before students may begin classes and before they may utilize university facilities.

Complete information about the enrollment process, as well as registration and payment deadlines, are listed on the Official Academic Calendar, located on The HUB website (<http://www.cmu.edu>).

Registration

Registration is the process of selecting courses for the upcoming semester and discussing those selections with an academic advisor. We strongly encourage you to meet with your academic advisor before you finalize your selections and register for courses using Student Information Online (SIO) (<https://s3.as.cmu.edu/sio/#schedule-registration>).

For most entering freshmen, registration is accomplished during the summer, with the assistance of Associate Deans and department heads.

Academic placement and elective choice information is collected by mail questionnaires during June and July. Most freshmen receive their schedules and enrollment information prior to the first day of classes.

Currently enrolled students select their courses for the upcoming semester during Registration Week, prior to the end of each semester. The Schedule of Classes is available online prior to Registration Week, listing available courses along with general enrollment information. The university reserves the right to make changes to hours, units or instructional staff when such changes seem necessary or advisable. A link to the online Schedule of Classes is provided on The HUB website (<http://www.cmu.edu>). Although faculty advisors are provided, it is the responsibility of students to have clearly in mind what they intend to do, what elective courses they wish to pursue and what irregularities exist which may affect their present schedule.

Students are not permitted to register in courses for which the prerequisites have not been satisfied. Exceptions to the rule may be granted only upon the recommendation of the teaching department concerned. Unless the prerequisites are satisfied or special approval is obtained when the student enters the course, no credit can be allowed for the course.

PCHE Cross-Registration

Cross-College and University Registration Guidelines - PCHE (Pittsburgh Council on Higher Education)

Cross-registration provides opportunities for enriched educational programs by permitting full-time paying undergraduate and graduate students to cross register for one course at a Pittsburgh Council on Higher Education (PCHE) Institution. Students who are paying full-time Carnegie Mellon tuition (per the requirements of their home college) are eligible. The PCHE course may not count towards full-time status. There is no additional tuition charge, except for special course or laboratory fees. Carnegie Mellon students do not acquire status at the Host Institution, but are given library and bookstore privileges. Credit and grades are transferred directly to the home institution. Cross-registration is not applicable during the Summer Session(s) or during intersessions.

For more information, visit <http://www.cmu.edu/hub/registration/undergraduates/cross/>

Faculty Course Evaluations (FCEs)

Students play an integral role in the academic life of the university when they participate in the evaluation of the faculty through the Faculty Course Evaluation process. FCE data is important in the evaluation of teaching and learning, as an important piece of the promotion and tenure process and as part of the process of course design and improvement. Student participation in the FCE process is critical to the university's commitment to quality teaching and academic excellence. Students are strongly encouraged to participate in the process with constructive feedback that is relevant to teaching and course content. More information on the University Course Assessment process and results from previous years can be found at the FCE website (<http://www.cmu.edu/hub/fce>).

Student Financial Aid

Linda Anderson , Director of Student Financial Aid
<http://www.cmu.edu/finaid/>

In alignment with the university's enrollment goals, Student Financial Aid consistently optimizes the utilization of all financial aid resources in order to recruit and retain a high quality and diverse student population. Student Financial Aid strives to deliver superior services that exceed the expectations of students, parents, and internal and external constituencies. Student Financial Aid identifies, creates and delivers strategies that facilitate the integration of financial aid policies. These policies align with current and future university recruitment, retention and enrollment priorities.

How Aid Works

Our financial aid program is need-based, meaning that all aid eligibility is determined by a student's family's financial circumstances. While a student and his/her family have the primary responsibility for paying for college, financial aid can bridge the gap between the total costs and the family's ability to pay.

We use a standard method to carefully review a family's financial circumstances and establish an expected contribution from the student and family. If we determine that the family cannot meet the student budget

based on that calculated amount, we will award or recommend scholarships, grants or other resources.

For more information, visit <http://www.cmu.edu/finaid/basics/undergraduate/how.html>.

Applying for Financial Aid

Complete steps for applying for financial aid can be found at <http://www.cmu.edu/finaid/basics/undergraduate/applying.html>.

Types of Financial Assistance Available

There are several types of financial aid available to students, such as the following:

- Federal and Private Loans
- University Scholarships
- Outside Scholarships
- Federal and State Grants
- Student Employment

A full listing of these, as well as more information on each type, is available at <http://www.cmu.edu/finaid/basics/undergraduate/types.html>.

Carnegie Scholarship

Carnegie Mellon offers a Carnegie Scholarship to incoming freshmen. Carnegie Scholarships are awarded to academically and artistically talented middle income students who qualify for little to no need-based financial aid. Carnegie Scholarships are open to all qualified U.S. citizens and permanent residents, regardless of race or national origin. Students must apply for need-based financial aid to be considered.

Students must submit the 2014-2015 FAFSA in order to be considered for Carnegie Scholarships. Besides the FAFSA, if awarded a Carnegie Scholarship, students must complete the CSS PROFILE and submit all required tax documents before the scholarship will be credited toward the student's account. Scholarship winners will be notified in their notification of financial aid.

The Carnegie Scholarship is renewable for 8 semesters of undergraduate education (ten semesters for Architecture students), if satisfactory academic performance is maintained and you are assessed Carnegie Mellon tuition. The scholarship is only awarded to incoming freshmen during the admission process and renewed annually if the student meets the cumulative 2.0 QPA requirement.

Students with a parent who is an Carnegie Mellon employee who qualifies for tuition remission are not eligible for a Carnegie Scholarship.

Satisfactory Academic Progress

The Department of Education requires recipients of Federal Title IV Financial Assistance to meet academic progress standards each year. Federal Title IV Financial Assistance includes the Federal Pell Grant, Federal Supplemental Educational Opportunity Grant, Federal Perkins Loan, Federal Work-Study, Federal Direct Student Loan and Federal Direct PLUS Loan Programs. Each university determines its own policy regarding sufficient progress standards. Federal academic progress standards must include two elements: cumulative QPA and cumulative units. At Carnegie Mellon, we define this as follows: first-year freshman students must pass 80 percent of all cumulative units attempted at Carnegie Mellon and have a 1.75 cumulative QPA after the first year, all other students (excluding graduate students in the Tepper School of Business and Heinz) must pass 80 percent of all cumulative units attempted at Carnegie Mellon and have a 2.00 cumulative QPA.

Carnegie Mellon has established a maximum time-frame of twelve (12) semesters for students to finish a program and receive financial aid.

Outside Scholarships

If you receive outside scholarships, they will be used to meet your unmet financial need and where applicable, offset/reduce loans and workstudy.

Institutional grants and scholarships will not be reduced due to the receipt of outside scholarships unless one of the following conditions occur:

1. If you receive federal grants or loans, these funds, in combination with any outside scholarships, cannot exceed your financial need.
2. All outside scholarships, in combination with all aid received, cannot exceed your cost of attendance.

Outside scholarships are not from federal, state or institutional (school) sources, such as a Federal Pell Grant or FSEOG. Examples of outside scholarships are: Coca Cola, Rotary scholarships, etc.

Students Pursuing a Second Bachelor's Degree

If you are enrolling in a second bachelor's degree program, you are not eligible for grants/scholarships. However, you may be eligible to receive funds from student loan and student employment programs. Eligibility for student loan funds is contingent upon the student's prior loan indebtedness.

Study Abroad

There are three ways to pay for study abroad at Carnegie Mellon: exchange programs (departmental or university-wide), sponsored study abroad, and external programs. For more detailed information, visit the Office of International Education website (<http://www.studentaffairs.cmu.edu/oie>).

Undergraduate Tuition Exchange Programs

Carnegie Mellon University assesses the standard tuition charge for the undergraduate tuition exchange programs.

Since Carnegie Mellon assesses the tuition charge, the student can be considered for all forms of institutional, state, and federal aid for which the student may have eligibility with the exception of any student employment program.

Undergraduate Study Abroad Programs

Carnegie Mellon University does not assess the tuition charge for undergraduate Study Abroad Programs.

Since Carnegie Mellon does not assess the tuition charge, the student is not considered for any institutional grants and scholarships. However, Carnegie Mellon will consider any student participating in an approved Study Abroad Program for all state and federal student aid programs for which the student may have eligibility with the exception of any student employment program.

The U.S. Department of Education and Carnegie Mellon University define an approved Study Abroad Program as one which is part of a contractual agreement between Carnegie Mellon and the host institution. Additionally, courses taken in the Study Abroad Program must be accepted for transfer to Carnegie Mellon by the Dean of the student's college.

Undergraduate Sponsored Study Abroad Programs

Carnegie Mellon assesses full tuition charges and all applicable fees to students participating in an undergraduate sponsored study abroad program.

Undergraduate International Students

Documentation Eligibility (U.S. Citizenship or Eligible Noncitizen)

You must be a U.S. Citizen or Eligible Noncitizen to receive federal student aid. If you are a U.S. Citizen, but were not born in the United States, please send us documentation of your citizenship (e.g., a copy of your passport or naturalization certificate). If you are an Eligible Noncitizen or refugee, send us verification. Acceptable forms of verification include a photocopy of both sides of your I-551 or I-551C card.

Undergraduate international students are ineligible to receive any federal or state student financial aid. Additionally, Carnegie Mellon does not award any institutional financial aid funds to undergraduate international students.

Student Accounts Office

Brian Hill, Director of Student Accounts
E-mail: student-accounts@andrew.cmu.edu

The Student Accounts Office serves the university's various academic and administrative departments by processing and invoicing all student-related financial activity and managing the corresponding student financial obligations resulting from this activity. The office strives to serve students by accurately reflecting and communicating these financial obligations, providing timely and consistent responses to inquiries, and instilling financial responsibility and accountability with clear and concise guidance.

Billing Information

University Charges

All charges incurred at the university are reflected on your student account. Charges include tuition and fees and may include housing, dining, sorority or fraternity charges, health insurance, Plaid Cash, DineXtra and any miscellaneous charges incurred. Miscellaneous charges may include, but are not limited to, music lessons, library fines, parking fines, or emergency loans.

Student Account Invoices (E-Bills)

Student account invoices (E-Bills) are produced on the last day of each month. Invoices detail all transactions processed in the month, as well as any charges due in the future. Students receive an e-mail notification from the Student Accounts Office when a new E-Bill is ready for viewing on Student Information Online. Payments for amounts due from a monthly E-Bill must be received by the 15th of the next calendar month.

All student account invoices are available to view, print, or download through Student Information Online (SIO). Students can log onto Student Information Online (<https://s3.as.cmu.edu/sio/#home>) with their Andrew ID and password.

Billing Authorizations

Since paper student account invoices are not produced and mailed, students can authorize Carnegie Mellon to send a copy of their E-Bill to another individual (parent, spouse, etc.) or other individual bill payer's e-mail address. After completing the authorization process, designated recipients will receive an e-mail with a PDF attachment of the E-Bill and any related billing messages.

More information can be found at <http://www.cmu.edu/hub/ebill-mps-instructions>

Student Account Interest Charges

Any amounts not paid by the stated due date are subject to a 1.5% interest charge each month until the balance is paid in full.

Tuition Assessment

The tuition charged to each student will be automatically adjusted on the 10th regularly scheduled class day (refer to the specific date noted in the Official University Calendar (<http://www.cmu.edu/hub/calendar.html>) as the "last day to add courses") based upon each student's schedule at that time. The tuition charged will be increased whenever the number of units added justifies tuition charges greater than those paid by the student at the time of fee settlement. After that time, no tuition adjustments will be made, with the exception of second minis for that particular semester.

For additional information, see University Policies (p. 45).

Payment Options

Carnegie Mellon University is pleased to offer a wide variety of payment options to students and their families. A full listing of these, as well as more information on each type, is available at <http://www.cmu.edu/hub/billing/payment/index.html>.

Refunding

Refunds

If a student account has a negative balance resulting from an overpayment, financial aid, or a reduction of charges, the Student Accounts Office will review the account and issue a refund. If you have a negative balance and do not want a refund to be generated, please contact The HUB so they can update your account.

Electronic Refunds

The Student Accounts Office encourages all students to authorize electronic deposit of their student account refunds directly into their U.S. checking or savings accounts. Taking advantage of this opportunity eliminates the need to stand in line at The HUB to pick up a refund check and makes the funds available to the student within two business days. To enroll, students simply need to add a bank account on Student Information Online (<https://s3.as.cmu.edu/sio>).

Paper Checks

If you have not signed up to receive electronic refunds, your refund will be generated as a paper check that must be picked up in The HUB. Students who are issued a paper check for a student account refund have six months to cash the check. If the check is not cashed within six months, it will be voided and credited back to the student account and applied to any outstanding charges.

University Policies

<http://www.cmu.edu/policies>

Policy on Cheating and Plagiarism

Students at Carnegie Mellon are engaged in preparation for professional activity of the highest standards. Each profession constrains its members with both ethical responsibilities and disciplinary limits. To assure the validity of the learning experience a university establishes clear standards for student work.

In any presentation, creative, artistic, or research, it is the ethical responsibility of each student to identify the conceptual sources of the work submitted. Failure to do so is dishonest and is the basis for a charge of cheating or plagiarism, which is subject to disciplinary action.

Cheating includes but is not necessarily limited to:

1. Plagiarism, explained below.
2. Submission of work that is not the student's own for papers, assignments or exams.
3. Submission or use of falsified data.
4. Theft of or unauthorized access to an exam.
5. Use of an alternate, stand-in or proxy during an examination.
6. Use of unauthorized material including textbooks, notes or computer programs in the preparation of an assignment or during an examination.
7. Supplying or communicating in any way unauthorized information to another student for the preparation of an assignment or during an examination.
8. Collaboration in the preparation of an assignment. Unless specifically permitted or required by the instructor, collaboration will usually be viewed by the university as cheating. Each student, therefore, is responsible for understanding the policies of the department offering any course as they refer to the amount of help and collaboration permitted in preparation of assignments.
9. Submission of the same work for credit in two courses without obtaining the permission of the instructors beforehand.

Plagiarism includes, but is not limited to, failure to indicate the source with quotation marks or footnotes where appropriate if any of the following are reproduced in the work submitted by a student:

1. A phrase, written or musical.
2. A graphic element.
3. A proof.
4. Specific language.
5. An idea derived from the work, published or unpublished, of another person.

Computing and Information Resources Code of Ethics

The ethical principles which apply to everyday community life also apply to computing. Every member of Carnegie Mellon has two basic rights: privacy and a fair share of resources. It is unethical for any other person to violate these rights.

Privacy

- On shared computer systems every user is assigned an ID. Nobody else should use an ID without explicit permission from the owner.
- All files belong to somebody. They should be assumed to be private and confidential unless the owner has explicitly made them available to others.
- Messages sent to other users should always identify the sender.
- Network traffic should be considered private.
- Obscenities should not be sent by computer.
- Records relating to the use of computing and information resources are confidential.

Resources

- Nobody should deliberately attempt to degrade or disrupt system performance or to interfere with the work of others.

- Loopholes in computer systems or knowledge of a special password should not be used to alter computer systems, obtain extra resources, or take resources from another person.
- Computing equipment owned by departments or individuals should be used only with the owner's permission.
- University resources are provided for university purposes. Any use of computing for commercial purposes or personal financial gain must be authorized in advance. Many of the agreements that the university has specifically forbid this activity.
- Computing and information resources are community resources. Theft, mutilation, and abuse of these resources violate the nature and spirit of community and intellectual inquiry.

System Administration

- On rare occasions, computing staff may access others' files, but only when strictly necessary for the maintenance of a system.
- If a loophole is found in the security of any computer system, it should be reported to the system administrator and not used for personal gain or to disrupt the work of others.
- The distribution of programs and databases is controlled by the laws of copyright, licensing agreements, and trade secret laws. These must be observed.

This code of ethics lays down general guidelines for the use of computing and information resources. Failure to observe the code may lead to disciplinary action. Offenses that involve academic dishonesty will be considered particularly serious.

Policies on Examinations

Preamble

The Faculty Senate adopted the following policies on the administration of examinations for the undergraduate courses (defined as courses that are numbered 6xx or below). These policies represent an understanding between faculty and student concerning an important but often stressful period, especially at the conclusion of each academic semester and at mid-semester. There should be no expectation that the following points will cover every conceivable situation. The student should anticipate the demands of the exam schedule, plan accordingly and early, and be prepared. The faculty should recognize that the student is encumbered with many tightly orchestrated and intensive obligations during this period over which he or she has no control: expectations should be reasonably consistent with the number of course units and, of course, should be made known to the student well in advance of the final examination period, preferably as part of the course syllabus.

In order to help students plan their time and study optimally for examinations, this document lays out in some detail the policies regarding final and in-term examinations. Instructors are requested to provide notification of the major in-term examinations in the course syllabus. The final examination date is posted early in the semester. It is the responsibility of the student to give his or her instructor sufficient notice and to work with the instructor to reschedule examinations if this is needed.

Definitions

- Final examination period. The university's official final examination period begins on the Monday immediately following the last day of classes and continues through the last day of scheduled final examinations, with the exception of reading day(s).
- Scheduled final examinations. Scheduled final examinations are those scheduled by Enrollment Services.
- Self-scheduled examinations. An instructor may choose not to fix a schedule for the final examination, but instead allow each student to choose the examination time; such exams are called self-scheduled examinations.
- Final examinations. Final examinations can either be comprehensive, covering all course materials, or non-comprehensive, covering only a part of the course.
- In-term examinations. Major examinations during the semester are referred to here as in-term examinations.

I. In-Term Examinations

1. All in-term examinations should be given during the regularly scheduled class time. However, if the exam requires additional time to complete,

then examinations may be administered outside of regularly scheduled class time.

2. No examinations given outside of class time (excluding make ups and self-scheduled examinations) shall be administered on a Friday after 4:30 pm, or at any time Saturday or Sunday.
3. The instructor administering an exam (or another required class event) that falls outside class time must make any and all reasonable accommodations to provide an alternative time to students who have conflicts with the proposed time period, including those conflicts due to activities, meetings, other classes, etc. (provided that the instructor is notified of such conflict in a timely manner).
4. No student shall be required to take more than two full-period in-class or out-of-class examinations on the same day. It is the responsibility of the student to notify the instructor in a timely manner of his/her circumstance so that appropriate accommodations can be made.

II. Final Examinations

1. All scheduled final examinations are held at the end of the semester during the university's official final examination period. Comprehensive final examinations are not required for each course, but are given at the option of the department or instructor. The reading day and weekend preceding the examination days shall never be used for examination purposes of any kind, unless a student opts to take a self-scheduled examination during this time. Non-comprehensive final examinations or final projects (but not both) are allowed during this final examination period only in courses that do not give a final comprehensive examination.
2. Instructors are expected to return all work assigned no later than the last regular day of classes in courses for which there is a final examination. In cases when this is not possible, an answer key, solution sets or equivalent feedback should be provided unless the final examination will not cover material in work that has not been returned.
3. No other coursework, including laboratory or studio work, will be due during the final examination period unless it is assigned in advance and in lieu of the course's final examination. Regardless of whether there is a final examination in the course, no classes other than review sessions shall be held during the final examination period. Review sessions should be scheduled for optimal attendance, and a serious effort should be made to accommodate students who cannot attend. In appreciation of the time required to prepare for final examinations, no other examinations, portfolio reviews, critiques or juries shall be scheduled for the last class day of a course with a final examination.
4. Instructors shall never exert or submit to pressures to move an examination so that people can leave earlier nor pressure students to take an examination on a reading day or weekend preceding examinations.
5. No student is required to take more than two scheduled examinations that start within a 25-hour period. A student who has more than two examinations scheduled within a 25-hour period or has two examinations scheduled at the same time should first contact the instructors of the courses for assistance in resolving conflicts. If the problem cannot be resolved by that means, the student should contact the associate dean of his or her home college.
6. Take-home final examinations shall be given for any 24-hour period of the student's choosing during the final examination period.
7. Students are expected to present themselves at the place assigned at the start of the examination; late arrival will reduce the total time a student has to complete the examination, unless instructor's course policy indicates otherwise. Instructors reserve the right to require attendance within a specific time period. Students who miss an examination with a reasonable excuse and wish to petition for a make-up final examination should check with the instructor. Instructors are encouraged to include late arrival policy and make-up exam policy in the course syllabus.
8. Any student shall be permitted to review his or her corrected, graded final examination in the presence of an instructor or a teaching assistant. Any controversy arising from this review shall be dealt with in accordance with the university procedure for the appeal of grades and academic actions. A final examination that is not returned to a student will be kept available for a year for review. In the event that the instructor or teaching assistant is not available for the review, the responsibility shall rest with the department head of the instructor offering the course or his or her designee. Since instructors are expected to return all work assigned before the final examinations, they are not responsible for retaining unclaimed coursework.
9. Concerns related to final examination, complaints about violations of the final examination policy or alterations of the final examination schedule should be directed to the department head of the instructor offering the course or to the associate dean of the student's home college.

Contact

Questions concerning this policy or its content should be directed to the Vice Provost for Education, (412) 268-5865.

Final Examination Conflict Guidelines

Recognizing that students will, on occasion, encounter foreseeable or unforeseeable conflicts with scheduled final examinations, the following guidelines have been approved by the University Education Council (UEC), the Associate Deans' Council (ADC), and the Associate Deans for Graduate Programs (ADGP) to inform the actions of students and the decisions of instructors.

Foreseeable Conflicts:

Before negotiating any exam conflicts, students should recognize the following expectations. Students should carefully consider the dates of each semester's final exam period as reflected in the university's official academic calendar. Until the university publishes the detailed final examination schedule (usually by early October in the Fall semester and by late February in the Spring semester), students should plan according to the assumption that their final exams could be scheduled for any day/time during the final exam period. Therefore, students should avoid making any personal arrangements (such as travel) that could ultimately conflict with the final exam period.

In developing the final examination schedule, the University Registrar's Office deploys significant effort in consultation with associate deans to minimize direct and 25-hour conflicts for individual students. Once the final exam schedule is published for the semester, each student should immediately review the schedule to determine whether there are conflicts. If the student's schedule presents any final exams that directly conflict with each other, or if the student's schedule presents more than two final exams to begin in a twenty-five hour period, then the student is responsible for immediately initiating the following process so that the relevant instructors can reach a timely and effective resolution that is consistent with university policy (noting that no action is necessary if a student voluntarily elects to take the exams according to the published schedule):

1. The student should begin by discussing the conflict with all relevant instructors to determine if they can suggest a resolution. This discussion should be completed at least two weeks prior to the exams.
2. If one of the course instructors offers an alternate time for the exam, the student must agree to that resolution unless another exam conflicts with the alternate proposed time.
3. If a resolution cannot be found, the following hierarchy is recommended for compromise (Student's Home Department > Student's College > Smallest Course Size > Higher Course Level):
 - If one of the courses is offered in the student's home department, the home department should be the first to accommodate.
 - If the course is offered within the student's home college, then the student's college should accommodate a course that is not within the student's college.
 - An instructor teaching a smaller course size should accommodate before an instructor from a larger course size accommodates.
 - Finally, if a resolution still has not been reached, an instructor teaching a higher course level should accommodate before an instructor from a lower course level accommodates.

At any point during this process, the student's academic advisor or academic associate dean from the home academic college may be consulted to verify the existence of the conflict and assist in the negotiation and resolution.

Other foreseeable conflicts may be personal in nature, such as a religious holy day or observance, or a singular, significant obligation. As stated earlier, students are expected to review the final exam schedule as soon as it is published to identify such conflicts. A student faced with such a conflict should first exhaust all reasonable means to otherwise resolve it. If such efforts are unsuccessful, then the student should immediately contact the instructor and explain the circumstances, recognizing that the current Policy on Examinations (<http://www.cmu.edu/policies/documents/Exams.htm>) does not require the instructor to offer an alternate exam time in response to foreseeable, personal conflicts. The mutual respect and goodwill between instructor and student should guide their negotiation of such conflicts as they attempt to balance the student's needs with those of the academic enterprise. At any point in the process, the student's academic advisor, academic associate dean and/or student affairs liaison may be consulted to assist in identifying reasonable accommodations or solutions.

Students hoping to resolve cases involving foreseeable conflicts should expect that their instructors may require them to take a rescheduled final examination on the Make Up Final Exam Day (<http://www.cmu.edu/hub/courses/exams/makeup-faq.html>).

Unforeseeable Conflicts

In exceptional circumstances, a student may encounter a medical, personal or family emergency that unexpectedly interferes with his/her ability to participate in a scheduled final examination. When encountering such a situation, the student should contact the instructor as soon as is reasonably possible, and ideally before the final examination has been administered.

The student's academic advisor, academic associate dean and/or student affairs liaison may serve as both advocate for the student and point of verification for the instructor. After reviewing the matter, should an accommodation be granted by the instructor, the instructor may elect to institute one of several options, including: rescheduling the exam for later in the final examination period; assigning an "I" incomplete grade until a make-up exam can be administered in the following semester; or utilizing another method for resolving missed exams that has been outlined in the course syllabus.

Student Health Insurance Policy

Reason for Policy

The high cost of health care in the United States presents a potentially serious health and financial risk to students and their accompanying dependents. The absence of adequate insurance coverage can result in temporary or permanent interruption of a student's education. The university is committed to offering student health insurance that provides access to quality health care and achieves a balance between premium cost and adequate coverage without overburdening students' financial resources. This balance is best achieved through a mandatory/hard waiver insurance program that mitigates the effect of adverse selection.

Policy Statement General Requirements

All full-time students are required to carry health insurance and will be assessed a charge for the individual basic mandatory plan offered through the university student health insurance program. The charge will appear on the invoice of the first semester of attendance in the academic cycle. The student is required to take one of the following three actions:

1. Enroll in the basic plan as charged.
2. Upgrade the benefit plan by enrolling in the enhanced student health insurance options during the open enrollment period.
3. Apply for a waiver from the mandatory plan.

Requirements for Waiver

Application for a waiver from the university student health insurance plan must be made to Student Health Services by the last day of the open enrollment period. Students applying for waiver must provide documentation of continuing coverage verifying that they are enrolled as the dependent, partner/spouse or principal in an employer or government-sponsored insurance plan. Additionally, the plan must meet minimum standards for coverage as set forth below:

- It must offer at least 75% coverage for inpatient and outpatient medical services in the Pittsburgh area.
- It must include mental health benefits.
- The deductible must not exceed \$500 per accident or illness.
- It must offer medical benefits of at least \$50,000 per accident or illness.
- It must cover pre-existing conditions.

Carnegie Mellon Freedom of Expression Policy

Freedom of Expression Policy

Carnegie Mellon University values the freedoms of speech, thought, expression and assembly - in themselves and as part of our core educational and intellectual mission. If individuals are to cherish freedom, they must experience it. The very concept of freedom assumes that people usually choose wisely from a range of available ideas and that the range

and implications of ideas cannot be fully understood unless we hold vital our rights to know, to express, and to choose. The university must be a place where all ideas may be expressed freely and where no alternative is withheld from consideration. The only limits on these freedoms are those dictated by law and those necessary to protect the rights of other members of the University community and to ensure the normal functioning of the University.

Rights

On Carnegie Mellon's Campus, anyone may distribute printed material, offer petitions for signature, make speeches, and hold protests or demonstrations outside university buildings. All such activities must be peaceful, avoiding acts or credible threats of violence and preserving the normal operation of the university. No event shall infringe upon the rights or privileges of anyone not in sympathy with it, and no one will be permitted to harm others, damage or deface property, block access to university buildings or disrupt classes. The enforcement of these conditions will not depend in any way on the message or sponsorship of the act or event. When guests are invited by a recognized campus organization, they may express their ideas not because they have a right to do so, but because members of the campus community have a right to hear, see, and experience diverse intellectual and creative inquiry. Defending that right is a fundamental obligation of the university. Controversy cannot be permitted to abridge the freedoms of speech, thought, expression or assembly. They are not matters of convenience, but of necessity.

Responsibilities

Freedom of expression must be at once fiercely guarded and genuinely embraced. Those who exercise it serve the Carnegie Mellon community by accepting the responsibilities attendant to free expression. University organizations that sponsor invited guests to campus are expected to uphold Carnegie Mellon's educational mission by planning carefully to create safe and thoughtful experiences for those involved. Hosts are responsible for the behavior of their guests and should exercise due care to ensure that all participants abide by relevant university policies.

Considerations for Planning Campus Events

Consistent with the rights and responsibilities outlined in the university's policy on Freedom of Expression, university hosts must follow all applicable policies related to space reservation, use, safety and security, keeping in mind the responsibility to have campus police present for any event with 100 or more persons in attendance.

Hosts should consider the items below as guidance in planning campus events, recognizing that not all of the items will apply to all events:

1. A public declaration of the event, its purpose, the identification of sponsors and co-sponsors, and contact information for those seeking further information.
2. A plan for advertising the event, including advance notice to relevant members of the community who may wish to co-sponsor, protest, or host other events in response to the planned activity.
3. Where appropriate, a clear and detailed contract with outside speakers, artists, or suppliers of services to ensure continuity of purpose and the ability of the host to control the event reasonably, consistent with the host's intent.
4. A plan for access to the event, including notifying the community of reserved seats, ticketing, queuing protocol, or other relevant details or restrictions well in advance of the activity.
5. A provision for security before, during, and after events, managed in coordination with the University Police. Specifically, non-university security personnel must have their allowable duties clearly delineated, in partnership with the University Police, with their role generally limited to personal security and not to space management.
6. A plan for participant engagement at the event, such as through a question and answer session, if relevant, with a clear delineation of the planned ground rules for the event set out well in advance.
7. A strategy for hosting of additional events, discussions, or town meetings before or after a principal event to help provide a context in which the principal event may be best experienced.

The Office of Student Activities and the Office of the Dean of Student Affairs may assist in, or directly coordinate, some aspects of campus events, such as fostering discussions preceding or following an event, or accommodating an opposing view at an alternative event. It is assumed that the spirit of community, both among people with groups with opposing views, as well as between event sponsors and the Student Activities and Student Affairs staffs, will foster communication and cooperation in the planning of campus events. Wherever possible, Student Affairs will work in concert with

University Police to notify occupants of buildings in advance of any potential disruption caused by such events.

Security Personnel Statement

At times, members of the campus community or their invited guests may have a legitimate basis for being accompanied by independent security personnel. It is incumbent upon the host of such an individual to ensure that University Police approve in advance the presence and scope of involvement of any such security personnel.

Human Subjects in Research at Carnegie Mellon

The university is committed to the protection of the rights and welfare of human subjects in research investigations conducted under the jurisdiction of the university. The university believes that review independent of the investigator is necessary to safeguard the rights and welfare of human subjects of research investigations. All research involving human subjects is conducted in accordance with federal regulations, including Title 45 of the Code of Federal Regulations, Part 46 (45 CFR 46). Under federal regulations, human subjects are defined as: living individual(s) about whom an investigator conducting research obtains:

- data through intervention or interaction with the individual, or
- identifiable private information.

An Institutional Review Board (IRB) is established under the provost to ensure adequate safeguards. The provost is responsible for the composition of the IRB with respect to: (1) the qualifications of IRB members in terms of educational background and research or other relevant experience, and (2) broad representation of relevant university interests.

This IRB is responsible for reviewing investigational procedures involving human subjects prior to the initiation of the research procedure in reference to (1) the rights and welfare of the individuals involved, (2) the appropriateness of the methods used to obtain informed consent, and (3) the risks and potential benefits of the investigations. The IRB is responsible for determining when additional expertise is required for adequate review and for obtaining that additional expertise. The IRB is further responsible for maintaining records of its review activities and decisions and for ensuring that records of informed consent are developed and kept by investigators where appropriate.

It is the responsibility of investigators who plan to use human subjects in research to obtain written consent from the IRB prior to conducting an investigation involving human subjects. It is the investigator's further responsibility to take whatever steps are determined necessary for the protection of the subjects, and to meet the reporting requirements established by the IRB.

Student Immunization Policy

Reason for Policy

Vaccine-preventable diseases continue to occur on American campuses and pose a significant threat to the public health of the campus community. Outbreaks not only impose a significant cost to infected individuals in terms of mortality and morbidity but also can be costly to the university by disrupting university activities.

Policy Statement

The goal of the Student Health Services and the university is to provide adequate protection of the campus community against vaccine-preventable diseases by requiring students to be vaccinated against and/or screened for certain highly contagious diseases. This goal can best be achieved through a mandatory prematriculation immunization requirement. The following requirements are consistent with Pennsylvania State Law and with the recommendations of the American College Health Association, the Advisory Committee on Immunization Practices.

Requirements for All Full-Time Students

All entering full-time students born after 1956 must demonstrate proof of immunity against measles, mumps and rubella by either providing dates of inoculation of two doses of the measles vaccine and at least one dose of mumps and rubella or providing blood titers that demonstrate immunity to these infections or providing documentation from a physician of having had the infection.

Additional Requirements for Students Residing in University Housing

- All students residing in university housing must demonstrate immunity against Hepatitis B by either providing documentation of having initiated or completed the three dose vaccination series.
- The student is expected to complete the series within six months of initiation of the series.
- All students residing in university housing must provide documentation of having been vaccinated against meningococcal meningitis within three years prior to enrollment in the university.
- All full-time international students must provide documentation of having had a PPD skin test to screen for tuberculosis within one year prior to enrollment in the university regardless of prior BCG inoculation. If the results of the skin test are positive, a chest x-ray is required.

Request for Waiver

- A student may request a waiver from any vaccination for medical reasons or if vaccination conflicts with personal or religious beliefs. Application for waiver is to be made in writing to Student Health Services prior to the first day of classes in his/her first semester of attendance at the university. In the case of an outbreak of a contagious disease on campus for which the student has not been immunized, the university reserves the right to ask the student to leave campus until the outbreak is over.
- A student may request a waiver from tuberculin skin testing if the student is from a country that has been identified by the Centers for Disease Control as having low prevalence of tuberculosis.

Penalty for Noncompliance

- If the student fails to comply with the immunization policy, the Student Health Services will notify Enrollment Services who will place a hold on the student's registration until the requirements are met and assess a fee of no more than \$50 to the student's account.
- Additionally, if the student is a resident in university housing and fails to comply with the immunization requirements, he/she will be removed from housing.

Contact

Questions should be directed to Student Health Services, (412) 268-2157.

Related Policies and Procedures

The university complies with OSHA regulations regarding occupational exposure to blood-borne pathogens. Questions regarding these regulations should be directed to Environmental Health & Safety, (412) 268-8182.

Additional recommendations

A PPD skin test for tuberculosis is recommended for domestic students who have traveled to an area where tuberculosis is endemic. All students should have a booster dose of tetanus/diphtheria every ten years after completion of the primary series.

Intellectual Property Policy

1. Purpose

The policy reflects the following goals:

- To create a university environment that encourages the generation of new knowledge by faculty, staff, and students.
- To facilitate wide transfer of useful inventions and writings to society.
- To motivate the development and dissemination of intellectual property by providing appropriate financial rewards to creators and the university, and administrative assistance to creators.
- To ensure that the financial return from the development of intellectual property does not distort decisions and operations of the university in a manner contrary to the mission of the university.

The policy is based upon the following principles relating the university to society:

- The mission of the university remains the generation and dissemination of knowledge.

- Intellectual property will be generated within the university, and there exists an obligation to disseminate it. An interface is needed if better technology transfer is to be achieved, and the university will provide mechanisms for that function.¹

The policy is based upon the following principles relating faculty, staff and students to the university:

- Intellectual property is created by individuals, or by groups of individuals, who are entitled to choose the course of disclosure; academic freedom of individuals is a higher priority than possible financial rewards.
- There exists a historical tradition allowing authors to retain ownership of intellectual property rights from textbooks and works of art.
- The university is the support of the whole campus community, and is thereby entitled to share in financial rewards.
- There should be incentives for all parties to pursue financial rewards together, consistent with the expressed goals of the policy. The distribution of these rewards should reflect, insofar as possible, the creative contributions of the creator, and the resources contributed by and risks assumed by both the creator and the university in developing intellectual property.
- Since it is frequently difficult to assess risks meaningfully, resources and potential rewards, negotiated agreements are to be encouraged whenever possible.

2. Definitions

Certain terms are used in this document with specific meanings, as defined in this section. These definitions do not necessarily conform to customary usage.

Intellectual Property includes any patentable invention, any copy-rightable subject matter, or trade secret. It also includes works of art, and inventions or creations that might normally be developed on a proprietary basis.

University means Carnegie Mellon.

Student means any full-time or part-time graduate or undergraduate student, regardless of whether the student receives financial aid from the university or from outside sources. It is the responsibility of students who are also employees of other outside entities to resolve any conflicts between this policy and provisions of agreements with their employers prior to beginning any undertaking at the university that will involve the development of intellectual property.

Faculty means members of the university's Faculty Organization as defined in the Faculty Handbook, plus instructors and special faculty appointments (even in the first year), and part-time faculty.

Staff means any employee of the university other than students and faculty as defined above. If a student is also a part-time university employee, he is considered as staff with regard to intellectual property developed as a result of his employment, and as a student with regard to other intellectual property. A full-time non-faculty employee who is also taking one or more courses is considered to be staff. Visitors to the university who make substantial use of university resources are considered as staff with respect to any intellectual property arising from such use. (The distinction between faculty and staff does not affect intellectual property rights except for representation on the Intellectual Property Adjudication Committee [see Section 5].)

Creator means any person or persons who create an item of intellectual property.

Net proceeds to the university means all proceeds received by the university on intellectual property that it assigns, sells or licenses, minus any application, litigation, interference, or marketing costs directly attributable to the intellectual property being licensed. Deducted costs shall be reasonable and fair, and shall be properly disclosed; the sources and amounts of compensation shall also be properly disclosed.

Net proceeds to the creator means all proceeds received by the creator from intellectual property owned by him that he sells, assigns or licenses, less the costs of application, legal protection, or litigation, interference, travel and other marketing costs directly attributable to the intellectual property being exploited. Such net proceeds do not include compensation legitimately received by the creator for consulting services or interest or other return on invested labor or capital. Deducted costs shall be reasonable and fair, and shall be properly disclosed; the sources and amounts of compensation shall also be properly disclosed.

Substantial use of university facilities means extensive unreimbursed use of major university laboratory, studio or computational facilities, or human resources. The use of these facilities must be important to the creation of the intellectual property; merely incidental use of a facility

does not constitute substantial use, nor does extensive use of a facility commonly available to all faculty or professional staff (such as libraries and offices), nor does extensive use of a specialized facility for routine tasks. Use will be considered "extensive" and facilities will be considered "major" if similar use of similar facilities would cost the creator more than \$5000 (five thousand dollars) in constant 1984 dollars if purchased or leased in the public market. Creators wishing to directly reimburse the university for the use of its facilities must make arrangements to do so before the level of facilities usage for a particular intellectual property becomes substantial. (This provision is not intended to override any other department or university policy concerning reimbursement for facilities usage.)

In general:

In any given year the equivalent figure for a particular amount of money in constant 1984 dollars will be obtained by multiplying that amount of money by the ratio of the most recent quarterly Disposable Personal Income Deflator divided by the average monthly Disposable Personal Income Deflator for the year 1984.

As used in this policy, the masculine gender includes the feminine gender, singular or plural, wherever appropriate.

3. Policy Provisions

This section states the policies concerning ownership of intellectual property created at the university. In order of precedence, ownership of intellectual property shall be as follows:

3-1. Externally Sponsored Work

Ownership Provisions: Intellectual property created as a result of work conducted under an agreement between an external sponsor and the university that specifies the ownership of such intellectual property shall be owned as specified in said agreement. If the university declares itself to be a sponsor, but does not declare itself to be the owner of the intellectual property, ownership shall be determined in accordance with 3-6-4 below.

Procedural Provisions: It is the responsibility of the Office of Sponsored Research of the university to inform each person whose intellectual property rights are limited by an externally sponsored contract of the intellectual property provisions of that contract in advance of the beginning of work thereon. Such notice is to be in writing and the university may require written acknowledgment of such provisions by any person working on externally sponsored projects. A summary of external sponsorship agreements limiting the intellectual property rights of potential creators will be maintained by the Office of Sponsored Research and will be available to the general university community.

If the university fails to notify a creator, effectively and in advance, of limitations imposed on his intellectual property rights by external sponsorship agreements, the creator is entitled to receive from the university 50% (fifty percent) of the net proceeds to the university resulting from his intellectual property.

3-2. Internally Sponsored Work

Ownership Provisions: When the university provides funds or facilities for a particular project to the extent of substantial use, it may also choose to designate itself as sponsor of that work. The university may declare itself the owner of intellectual property resulting from said work. In such cases the university must specify in advance the disposition of any intellectual property rights arising from the project. If the university declares itself to be a sponsor, but does not declare itself the owner of the intellectual property, ownership shall be determined in accordance with 3-6-4 below.

Procedural Provisions: It is the responsibility of the Office of Sponsored Research of the university to inform each person whose intellectual property rights are limited by internally sponsored work of the intellectual property ownership rights specified by the university as to that work in advance of the beginning of work thereon. Such notice is to be in writing and the university may require written acknowledgment of such provisions by any person working on internally sponsored projects. A summary of work for which university sponsorship limits the intellectual property rights of potential creators will be maintained by the Office of Sponsored Research and will be available to the general university community.

If the university fails to notify a creator, effectively and in advance, of limitations imposed on his intellectual property rights by internal university sponsorship, the creator is entitled to receive from the university 50% (fifty percent) of the net proceeds to the university resulting from his intellectual property.

3-3. Individual Agreements

Ownership Provisions: Intellectual property which is the subject of a specific agreement between the university and the creator(s) thereof shall be owned

as provided in said agreement. Such agreements by the university and the faculty are encouraged.

Procedural Provisions: Except where limited by external sponsorship agreements, creators and the university may negotiate individual agreements to govern ownership of intellectual property regardless of the applicability of any other provision hereof.

3-4. Intellectual Property Created Within Scope of Employment

Ownership Provisions: Intellectual property created by university employees who were employed specifically to produce a particular intellectual property shall be owned by the university if said intellectual property was created within the normal scope of their employment. Faculty are presumed not to be hired to produce a particular intellectual property. On the other hand, computer programs written on the job by staff computer programmers would fall under this provision.

3-5. Public Dedication

Ownership Provisions: Except when limited by sub-parts 3-1, 3-2, 3-3 or 3-4 above, the creator of any intellectual property may choose to place his or her creation in the public domain. In such cases both the creator and the university waive all ownership rights to said property.

Procedural Provisions: Creators wishing to place their intellectual property in the public domain are responsible for ascertaining that the right to public dedication of that intellectual property is not limited by any external agreement, university sponsorship arrangement or terms of employment as described in Provisions 3-1, 3-2 or 3-3. The university provost will provide such a determination in writing upon request by the creator. It is also the creator's responsibility to ensure that disclosure does not include valuable intellectual property owned by others. (This provision does not release the university from its general obligation to notify creators of limitations to intellectual property rights specified in Provisions 3-1 and 3-2.)

To facilitate the actual transfer of knowledge of the intellectual property to the public at large, the creator shall provide the university with a complete description and documentation of the property placed in the public domain, specifically including a copy of the property in the case of printed material, and complete machine-readable source code in the case of software. All such material provided to the university will be placed in the University Library and made available to the public at large. The university will take appropriate action on a regular basis to publicize summary descriptions of intellectual property recently placed in the public domain. The university will also provide any member of the general public copies of such material on a cost-recovery basis.

The provisions of this section do not apply to the normal scholarly or creative publication processes unless the creator intends to waive all proprietary rights to the publication.

3-6. In General

Unless governed by sub-parts 3-1, 3-2, 3-3, 3-4 or 3-5 above, ownership of intellectual property created at the university shall be determined as follows:

3-6-1. Traditional Rights Retained

Ownership Provisions: In keeping with academic traditions at the university, the creator retains all rights to the following types of intellectual property, without limitation: books (including textbooks), educational course-ware, articles, non-fiction, novels, poems, musical works, dramatic works including any accompanying music, panto-mimes and choreographic works, pictorial, graphic and sculptural works, motion pictures and other similar audio-visual works, and sound recordings, regardless of the level of use of university facilities. This provision does not include computer software (other than educational course-ware) or data bases.

Procedural Provisions: The types of intellectual property listed in the preceding paragraph share the attribute that they display information or visual or auditory appearances which are fully revealed to the purchaser or consumer. Thus, for example, source code listings would also be considered within this category. On the other hand, most computer software and data bases do not share this attribute; they are characterized by their capacity to perform tasks. Because of their utilitarian nature, ownership rights with respect thereto are governed by 3-6-3 or 3-6-4. Educational course-ware is included in this provision in all cases because of its role in furthering the primary educational mission of the university.

This provision applies regardless of any university sponsorship of the work, and it may be modified only by a specific prior agreement between the creator and the university. The use of university-owned computers and other facilities in the preparation of books and similar works does not alter this provision, though other university policies may limit such use or require reimbursement to the university. Similarly, the use of externally sponsored

resources does not alter this provision, unless the creator is effectively notified in advance of such limitations to his rights in accordance with 3-1.

3-6-2. No Substantial Use of University

Facilities Ownership Provisions: The creator owns all intellectual property created without substantial use of university facilities, including intellectual property rights in computer software and data bases.

3-6-3. Substantial Use of University Facilities - No External or Internal Sponsorship

Ownership of intellectual property created with substantial use of university facilities, but not directly arising from externally sponsored work, or from work for which the university has declared itself as sponsor, shall be determined as set forth hereinafter depending on whether the creator or the university develops said property.

3-6-3-1. Development by Creator

Ownership Provisions: The creator originally owns intellectual property created with substantial use of university facilities but no external or internal sponsorship, and retains said ownership by commercial development of said property subject to the following:

(i) the university shall receive 15% (fifteen percent) of the net proceeds to the creator above \$25,000 (twenty-five thousand dollars) in constant 1984 dollars from all sources (in the case of patents and copyrights, this provision shall be limited to the life of the patent or copyright), and

(ii) the university shall receive a perpetual, non-exclusive, non-transferable, royalty free license to use said intellectual property. In the case of software, this license includes access by specified university personnel to the source listings, and the university shall require each person to whom a disclosure is made to execute in advance a binding confidentiality agreement in favor of and enforce-able by the creator. If the intellectual property is created solely by a student or students, the creator is exempt from the obligation to pay to the university a fraction of his net proceeds, but not from the provision of this paragraph for a non-exclusive license to the university.

Procedural Provisions: If the creator develops an intellectual property that is covered by this provision, he must make full and fair disclosure to the university of all such sources of compensation relating to that intellectual property.

3-6-3-2. Development by the University

Ownership Provisions: When intellectual property is created with substantial use of university facilities, but not directly arising from sponsored research, the creator will originally retain the rights to the property, provided that he desires to commercially develop the property himself or to make it available to the public. If, however, the creator elects not to commercially develop same or fails to show diligence in pursuing such development, then the ownership rights to that property may be acquired by the university. Intellectual property acquired by the university in this fashion will be treated as in 3-6-4-1 below.

Procedural Provisions: At the time the intellectual property is disclosed to the university's provost as required under Section 4-1, or at any time thereafter, the university may request that the creator decide whether he will develop the intellectual property or will grant the rights to the university, and execute documents to pass on the title. Such a decision must be made within one year of the request or the creator will automatically lose his rights in favor of the university.

3-6-4. Substantial Use of University Facilities - External or Internal Sponsorship

Ownership of intellectual property created with substantial use of university facilities and directly arising from work sponsored under an agreement between an external sponsor and the university, or from work for which the university has declared itself a sponsor, but for which neither the external sponsor nor the university have specified the ownership of resulting intellectual property shall be determined as set forth hereinafter depending on whether the creator or the university develops said property.

3-6-4-1. Development by University

Ownership Provisions: The university originally owns intellectual property created with substantial use of university facilities provided by an external agreement or internal university sponsorship and retains said ownership by commercial development of said property, subject to the following: in all cases, the creator shall receive 50% (fifty percent) of the net proceeds to the university.

Procedural Provisions: When an intellectual property is created with substantial use of university resources provided by an external research contract or a specific university sponsorship agreement, and when that

contract or agreement either does not specify the disposition of the intellectual property rights arising from that sponsorship, or it permits the university and/or creator to retain or acquire such intellectual property rights, the university will originally retain the rights to such intellectual property.

3-6-4-2. Development by Creator

Ownership Provisions: When intellectual property is created with substantial use of university facilities provided by external or internal sponsorship, the university will originally retain the rights to the property, provided that it desires to commercially develop the property or to make it available to the public. If, however, the university elects not to commercially develop same or fails to show diligence in such development, the ownership rights to that property may be acquired by the creator. Intellectual property acquired by the creator in this fashion will be treated as in 3-6-3-1 above. This assignment of rights to the creator may be prohibited by the terms of an external sponsorship agreement with the university or by an internal university sponsorship declaration, but in such cases the creator must be notified in advance, as in Provisions 3-1 and 3-2.

Procedural Provisions: At the time the intellectual property is disclosed to the university's provost as required by Section 4-1, or at any time thereafter, the creator may request that the university decide whether it will commercially develop the intellectual property or execute an assignment of the intellectual property rights to the creator. Such a decision must be made within 120 (one hundred twenty) days of the request or the university automatically waives its rights in favor of the creator, and it must execute an assignment of these rights to the creator.

3-6-5. Consulting Agreements

Ownership Provisions: Work done by individuals as consultants to outside firms is presumed not to involve unreimbursed substantial use of university facilities, and the rights to intellectual property created under consulting agreements are retained by the outside firms or the individual as specified by the terms of the consulting agreement and the terms of Provision 3-6-2 above.

Procedural Provisions: Under university policy consulting work must not make substantial unreimbursed use of university facilities except by explicit prior agreement. Any member of the university community who is engaged in consulting work or in business is responsible for ensuring that provisions in his agreements are not in conflict with this policy of the university or with the university's commitments. The university's Innovation Transfer Office will, upon request, provide assistance in this respect. The university's rights and the individual's obligations to the university are in no way abrogated or limited by the terms of such agreements. Each creator of intellectual property should make his obligations to the university clear to those with whom he makes such agreements and should ensure that they are provided with a current statement of the university's intellectual property policy. Appropriate sample contract wording to cover various possible external consulting arrangements shall be available from the university provost.

4. General Procedures

4-1.

The creator of any intellectual property that is or might be owned by the university under this policy is required to make reasonably prompt written disclosure of the work to the university's provost, and to execute any document deemed necessary to perfect legal rights in the university and enable the university to file patent applications and applications for copyright registration when appropriate. This disclosure to the provost should be made at the time when legal protection for the creation is contemplated, and it must be made before the intellectual property is sold, used for profit, or disclosed to the public. Whenever legal protection for intellectual property is anticipated all persons engaged in such creative activity are encouraged to keep regular notebooks and records.

4-2.

Whenever the university undertakes commercial development it shall do so, if possible, in a fashion that provides for the widest possible dissemination, avoiding suppression of inventions from which the public might otherwise benefit, providing for non-exclusive licensing at reasonable royalties, and giving consideration to more favorable or royalty-free licensing to non-profit charitable institutions, minority businesses or enterprises in developing countries.

4-3.

The university's share of any proceeds under this policy will be used to reimburse the university for its expenses for commercial development of intellectual property. Any additional return to the university will be used to further the academic purposes of all the disciplines of the entire university.

5. Resolution of Disputes

This policy constitutes an understanding which is binding on the university and on the faculty, staff, and students upon whom it is effective according to the terms of Section 6 below, as a condition for participating in research programs at the university or for the use of university funds or facilities.

Any question of interpretation or claim arising out of or relating to this policy, or dispute as to ownership rights of intellectual property under this policy, will be settled by the following procedure:

- The issue must first be submitted to the university's Intellectual Property Adjudication Committee in the form of a letter setting forth the grievance or issue to be resolved. The committee will review the matter and then advise the parties of its decision within 60 days of submission of the letter.
- If any of the parties to the dispute is not satisfied with the committee's decision, the party may seek binding arbitration in Pittsburgh, Pennsylvania and in accordance with the Rules of the American Arbitration Association then in effect. Judgment upon the award rendered by the arbitrator(s) may be entered in any court having jurisdiction thereof. The arbitrator(s) will give some weight to the decision of the Intellectual Property Adjudication Committee in reaching a decision. The losing party of the arbitration hearing will pay for all costs of the arbitration unless the arbitrator(s) specifies otherwise.

The Intellectual Property Adjudication Committee will consist of a chair who is a member of the tenured faculty, four other members of the faculty, and four other members representing, respectively, the university administration, the technical staff, and the graduate and undergraduate student bodies. Initially, half of the members of the committee (including the chair) will be appointed for two-year terms of office, and the remaining half will be appointed for a one-year term. After one year new members of the committee will be appointed for two-year terms of office. The chair will be appointed by the chair of the Faculty Senate, with the advice and consent of the Faculty Senate Executive Committee, and the remaining eight members of the committee will be appointed by the president of the university or his designee. At all times at least one of the faculty members will have had significant practical experience with intellectual property development and exploitation. The faculty members appointed by the president of the university will be selected from a list of nominees prepared by the Faculty Senate or its designated committee and nominees with experience in intellectual property development will be identified as such by the Faculty Senate. The staff representative will be selected from a list of nominees prepared by Staff Council, and the administration representative will be named directly by the president of the university or his designee. The graduate student representative will be selected from a list of nominees prepared by the Graduate Student Organization. The undergraduate representative will be chosen from a list of nominees prepared by the Student Senate. The committee will use the guidelines set forth in this policy to decide upon a fair resolution of any dispute.

If possible, the committee will also provide on request informal advisory opinions to creators and the university indicating how it is likely to interpret the provisions of this policy as it applies to special cases.

6. Effective Date of Policy

This policy will become effective August 27, 1985. Once effective this policy will be binding on new faculty, administration, and staff when hired, and on graduate and undergraduate students when admitted. Current faculty and staff will also become bound by this policy when they sign new employment contracts as the result of the renewal of limited-term appointments or promotion. Other university personnel, including tenured faculty, and current staff and students may choose to become bound by this policy for future and pending intellectual property by voluntary written consent. Unless the creator and the university agree to a different arrangement, intellectual property that is already partially developed at the time this policy becomes effective will be treated according to the provisions of the patent policy by which the University creator is currently bound. Similarly, members of the university working under contracts signed before the effective date of this policy who do not choose to accept this policy will remain bound by the patent policies that already apply to them. With respect to intellectual property developed during the course of employment at the university, this policy shall continue to be binding on any person whose relationship with the university becomes terminated. The university should take all administrative steps necessary to ensure that employees and students sign, upon initial employment, registration or at other appropriate times, forms that indicate their acceptance of this policy.

7. Amendments of the Policy

Amendments of this policy may be proposed by the Faculty Senate, Staff Council or university administration. Proposed amendments must be approved by a two-thirds majority of votes in the Faculty Senate and subsequently approved by a simple majority of votes cast in a referendum

administered by the Faculty Senate that is open to all members of the faculty as defined by this policy and to the exempt staff, provided that this majority constitutes at least 25% (twenty-five percent) of those eligible to vote. This referendum must be preceded by an opportunity for public discussion open to all interested faculty, administration, staff and students. Amendments that are supported by the faculty and staff must then be approved by the president of the university and adopted by the university trustees. Once adopted, amendments will become binding on new faculty, administration, and staff when hired, on existing faculty and staff when they sign new employment contracts, and on graduate and undergraduate students when admitted. Other university personnel, including tenured faculty, and current staff and students may choose to become bound by this policy for future and pending intellectual property by voluntary written consent. Intellectual property that is already developed or under development at the time that an amendment to the policy is ratified will not be bound by the terms of the amendment without the voluntary written consent of both the creator and the university.

Footnote:

1. This document presumes the existence of a university office to facilitate technology transfer. Such an office would serve as a clearinghouse for contacts with outside partners, would perform patent and copyright tasks, and would develop an effective marketing capability.

Policy on Student Privacy Rights

Policy Statement

Under the Family Educational Rights and Privacy Act (FERPA), you have the right to:

- Inspect and review your education records;
- Request an amendment to your education records if you believe they are inaccurate or misleading;
- Request a hearing if your request for an amendment is not resolved to your satisfaction;
- Consent to disclosure of personally identifiable information from your education records, except to the extent that FERPA authorizes disclosure without your consent;
- File a complaint with the U.S. Department of Education Family Policy Compliance Office if you believe your rights under FERPA have been violated.

1. Inspection

What are education records?

Education records are records maintained by the university that are directly related to students. These include biographic and demographic data, application materials, course schedules, grades and work-study records. The term does not include:

- Information contained in the private files of instructors and administrators, used only as a personal memory aid and not accessible or revealed to any other person except a temporary substitute for the maker of the record;
- Campus Police records;
- Employment records other than work-study records;
- Medical and psychological records used solely for treatment purposes;
- Records that only contain information about individuals after they have left the university;
- Any other records that do not meet the above definition of education records.

How do I inspect my education records?

- Complete an Education Inspection and Review Request Form (available online as a PDF document or from The HUB, 12C Warner Hall) and return it to The HUB.
- The custodian of the education record you wish to inspect will contact you to arrange a mutually convenient time for inspection, not more than 45 days after your request. The custodian or designee will be present during your inspection.
- You will not be permitted to review financial information, including your parents' financial information; or confidential letters of recommendation, if you have waived your right to inspect such letters.

- You can get copies of your education records from the office where they are kept for 25 cents per page, prepaid.

2. Amendment

How do I amend my educational records?

- Send a written, signed request for amendment to the Vice President for Campus Affairs, Carnegie Mellon University, 610 Warner Hall, Pittsburgh, PA 15213. Your request should specify the record you want to have amended and the reason for amendment.
- The university will reply to you no later than 45 days after your request. If the university does not agree to amend the record, you have a right to a hearing on the issue.

3. Hearing

How do I request a hearing?

- Send a written, signed request for a hearing to the Vice President for Campus Affairs, Carnegie Mellon University, 610 Warner Hall, Pittsburgh, PA 15213. The university will schedule a hearing no later than 45 days after your request.
- A university officer appointed by the Vice President for Campus Affairs, who is not affiliated with your enrolled college will conduct the hearing.
- You may bring others, including an attorney, to the hearing to assist or represent you. If your attorney will be present, you must notify the university ten days in advance of the hearing so that the university can arrange to have an attorney present too, if desired.
- The university will inform you of its decision, in writing, including a summary of the evidence presented and the reasons for its decision, no later than 45 days after the hearing.
- If the university decides not to amend the record, you have a right to add a statement to the record that explains your side of the story.

4. Disclosure

Carnegie Mellon generally will not disclose personally identifiable information from your education records without your consent except for directory information and other exceptions specified by law.

What is directory information?

Directory information is personally identifiable information of a general nature that may be disclosed without your consent, unless you specifically request the university not to do so. It is used for purposes like compiling campus directories.

If you do not want your directory information to be disclosed, you must notify the University Registrar's Office in writing within the first 15 days of the semester.

Notifying the University Registrar's Office covers only the disclosure of centralized records. Members of individual organizations such as fraternities, sororities, athletics, etc. must also notify those organizations to restrict the disclosure of directory information.

Carnegie Mellon has defined directory information as the following:

- your full name,
- local/campus address and local/campus telephone number,
- email User ID (Andrew ID) and address,

(User IDs cannot be completely suppressed from our electronic systems. While it may be possible to suppress the association of an individual's name with their user id, doing so may adversely impact the delivery of electronic mail or other electronic services.)

- major, department, college,
- class status (freshman, sophomore, junior, senior, undergraduate or graduate)
- dates of attendance (semester begin and end dates),
- enrollment status (full, half, or part time)
- date(s) of graduation,
- degree(s) awarded,
- sorority or fraternity affiliation.

For students participating in intercollegiate athletics, directory information also includes:

- height, weight
- sport of participation.

What are the other exceptions?

Under FERPA, Carnegie Mellon may release personally identifiable information from your education records without your prior consent to:

- school officials with legitimate educational interests ("School officials" are Carnegie Mellon employees in administrative, supervisory, academic or support staff positions; Carnegie Mellon trustees; individuals and companies with whom the university has contracted, such as attorneys, auditors, or collection agencies; and individuals assisting school officials in performing their tasks. School officials have a "legitimate educational interest" if they need to review an education record in order to fulfill their professional responsibilities.);
- certain federal officials in connection with federal program requirements;
- organizations involved in awarding financial aid;
- state and local officials who are legally entitled to the information;
- testing agencies such as the Educational Testing Service, for the purpose of developing, validating, researching and administering tests;
- accrediting agencies, in connection with their accrediting functions;
- parents of dependent students (as defined in section 152 of the Internal Revenue Service Code);
- comply with a judicial order or subpoena (after making a reasonable effort to notify the student in advance of compliance so that the student can take protective action, except in cases where the university is legally required not to disclose the existence of the subpoena);
- appropriate parties in a health or safety emergency, if necessary to protect the health or safety of the student or other individuals;
- officials of another school in which the student seeks or intends to enroll;
- victims of violent crimes or non-forcible sexual offenses (the results of final student disciplinary proceedings);
- parents or legal guardians of students under 21 years of age (information regarding violations of university drug and alcohol policies);
- courts (records relevant to legal actions initiated by students, parents or the university).
- comply with federal laws concerning sex offenders and other individuals required to register under section 170101 of the Violent Crime Control and Law Enforcement Act of 1994.

5. Complaints

If you believe the university has not complied with FERPA, you can file a complaint with the:

Family Policy Compliance Office, Department of Education, 400 Maryland Avenue, S.W. Washington, DC 20202-4605

Policy on Restricted Research

Universities have two primary purposes: to create knowledge and to disseminate knowledge. Carnegie Mellon University recognizes the importance of open intellectual communication within a research group, within the university, and within the larger community outside. Ideally, all units of the university would disseminate the results of research as quickly and as widely as possible. Some members or units of the university, however, desire to do research that may be difficult or impossible without restrictions or without access to classified or proprietary materials.

There exists, therefore, a tension between the university's goal of disseminating knowledge freely and the desire on the part of some of its members to conduct restricted research on important problems. The university intends to guarantee the academic freedom of all faculty members to do research in their own manner on topics of their own choosing, provided that such research is consistent with the overall purposes of the university.

This policy seeks to resolve the tension between the desire to participate in restricted research and the desire to maintain the open atmosphere of the university by confining restricted research to semi-autonomous units, which are not associated with any academic departments. It thereby establishes the principle that restricted research is inappropriate at Carnegie Mellon University except in the semi-autonomous units.

This policy does not attempt to anticipate all possible concerns about restricted research. In some cases, decisions will need to be made about particular research projects to which the application of particular policy guidelines are not clear. In choosing to accept or decline such projects, the university will weigh the potential of a project for generating and disseminating new knowledge for the benefit of society, against the project's potential for adversely affecting the climate for research conducted in a free and open environment. While this policy sets no explicit limits on the extent of classified research permitted in the semi-autonomous units, it is not the intent of the policy to encourage any unit of the university to engage in classified research as a primary ongoing activity. Indeed, it is expected that classified projects will never represent more than a small fraction of the total research effort in any unit.

Definitions

Research: all projects and investigations involving the creation of new knowledge of a theoretical or practical nature. The term "research" as used here encompasses both "research" and "development" as they are commonly defined.

Classified research: research, the free dissemination of the results of which is deemed to jeopardize national security. The federal government controls access to the environment in which such research is performed, restricts discussions about the work in progress to individuals with clearance and a "need to know," and limits publication of research, results or access to data needed to verify results, for a specified period of time.

Proprietary research: research that results in intellectual property that is owned by entities other than Carnegie Mellon University. Such entities may wish to market products derived from inventions or ideas that are developed at the university. They might, therefore, desire to fund projects which restrict access to data and to discussions about work in progress to individuals with a "need to know," and to seek, for a specified period of time, a delay in publication of research results or data needed to verify results. Such entities may also provide access to proprietary material, which researchers must agree not to include in publications.

Publication: oral or written dissemination.

Restricted research: includes all classified research, and any proprietary or other research that requires more than a six month delay in publication of the research results.

Semi-autonomous units: units of the university specifically so designated by the president, after consultation with the URC and the Faculty Senate, currently the Mellon Institute and the Software Engineering Institute.

Non-autonomous units: all university entities other than semi-autonomous units.

Restricted Research in Non-Autonomous Units

It is the policy of Carnegie Mellon that restricted research is inappropriate and, therefore, not permitted within its non-autonomous units.

It is also the policy of Carnegie Mellon not to permit involvement of students in projects which carry restrictions that may impede their progress toward a degree. Therefore, students should not be involved in contracts that require the delay of a student's publication of research results when such results are intended for use in obtaining academic credit, except that a sponsor may require a delay of thirty days for review of publications for removal of proprietary information that was provided by the sponsor for the conduct of the research.

Proprietary research is allowed within non-autonomous units provided it is subject to limitations (excluding students' publications as noted above) no more stringent than the following:

- A sponsor may request a delay of up to six months in publication so that steps may be taken to secure intellectual property rights to inventions or ideas developed under the contract.
- A sponsor may require a delay of thirty days for review of publications for removal of proprietary information which was provided for the conduct of the research.

Considerations for faculty/researchers:

The university recognizes that problems arise in both restricted research and research that is not itself restricted but that involves access to classified or proprietary information or materials (hereinafter, restricted materials). Researchers may also have access to restricted materials when serving as consultants. Access to restricted materials gives rise to concerns about limitations on researchers' freedom to communicate. In such instances, researchers must exercise consider-able judgment to conduct their research in an open environment while protecting the restricted materials to which they have access. Researchers must also be aware that the university will judge their performance as researchers through their publications or

through other scholarly products that arise from their research. Research that is restricted in dissemination, or not available for public review, cannot be considered in promotion or reappointment decisions or in evaluations of academic performance of any kind.

Considerations for faculty/researchers:

There are important concerns about the involvement of students in restricted research. It is necessary for students to publish their work in order to obtain degrees, course credit and professional recognition. Students rely to a large degree on their faculty advisor's judgment for guidance and advice. Research that is restricted in dissemination, or not available for public review, cannot be used for academic credit. Thus, before working on such research, a student must be notified in writing that work on this research may not be used for academic credit.

Restricted Research in Semi-Autonomous Units

The semi-autonomous units associated with Carnegie Mellon may conduct restricted research.

Faculty members may conduct restricted research in or in cooperation with semi-autonomous units only on a consulting basis or by means of a formal, internal leave of absence from their non-autonomous units.

Work that is restricted in any way may not be used for academic evaluations until it is released for publication, and then only with respect to future academic actions.

Students may occasionally be employed by the semi-autonomous units, provided that such employment does not interfere substantially with progress toward a degree. However, they must be made aware that work that is restricted cannot be used for academic credit. Work that was restricted and is later released for dissemination and review can be applied toward future academic credit. Students should be discouraged from working on restricted research in which dissemination may be delayed indefinitely.

Guidelines for all Units

Work by students on restricted research projects shall not be made a condition for admission or financial aid.

The principal investigator is responsible for informing all members of a project (faculty, staff and students) of any restrictions imposed on the dissemination of information related to the research. This must be done prior to the start of the project or prior to an individual joining an existing project.

Restrictions on access to university facilities due to the conduct of restricted research must be kept to a minimum. Access to and movement through the facilities in which restricted research is conducted must be consistent with standard university procedures.

The Provost's Office is responsible for obtaining signed documents from principal investigators on restricted research projects attesting that they are aware of all restrictions imposed on the research and that they have informed all participants of these restrictions.

The Office of Sponsored Research shall review all proposals and contracts prior to approval for conformity with these guidelines. Any that do not meet these guidelines will be referred to the University Research Council (URC) for review and recommendation of appropriate action to the provost.

To maintain a balance with the university's goals of broad dissemination of knowledge, the URC will conduct an annual review of all restricted research being conducted at the university. This review will be made based on a listing of all contracts that involve restricted research. This listing shall include the title and sponsor(s) of the research, name(s) of principal investigator(s), and the amount of funding of each contract.

The university community will be informed annually, through the URC's written report to the Faculty Senate and Student Senate, of the nature and overall impact of restricted research at Carnegie Mellon.

Existing sponsored research projects shall be allowed to continue under the terms of their present contract. However, renewal contracts must conform with this policy.

Student Activities Fee

By action of the Board of Trustees, a required Student Activities Fee in addition to tuition is charged to all under-graduate students and graduate students who enroll for 19 units or more. Student Government is responsible for administering the fee and for using it only for the support of projects under the following guidelines:

1. Activities and facilities which can be described as meeting the reasonably predictable social, cultural, recreational, or welfare needs of college students.
2. Publications which can reasonably be presumed to serve the needs of the student community for communication, expressions of opinion, and the conduct of their business.
3. Such enterprises of an entrepreneurial nature undertaken by the student body as can reasonably be expected to serve as an instrument for meeting the needs described above.

All functions and services provided by the fees described above must be in accordance with Carnegie Mellon's policy of non-discrimination. In addition, no use of such fees may be intended to violate or circumvent the policies of the university or the laws of the land.

Final responsibility for establishing the amount of any required fee rests with the Board of Trustees, which will consider changes only upon requests of the Student Government and the officers of the university.

Note: Historically, the Student Government has dedicated a specific portion of graduate students' activities fees to the Graduate Student Assembly to be used at their discretion.

Policy on Temporary Emergency Closing of the University

Policy Statement

Carnegie Mellon University has an important commitment to students, parents, sponsors, benefactors and the community. Accordingly, the university will make every attempt to operate normally during severe weather or other emergencies. This includes holding classes, conducting research programs, and operating facilities and services. The university will attempt to operate normally unless such operation represents a clear danger to students, staff or faculty.

There may be occasions when the university community is served best by suspending normal operations. In that event, only the president (or the president's designated representative) has the authority to close the university and to specify those persons or group of persons who are free to leave or refrain from coming to campus. Staff members who provide primary services, including certain members of Physical Plant, Dining Services and Security, may be asked to work.

Standard Operations

Unless the president announces that the university is closed, everyone is expected to be at work as usual. When the university is in session, faculty members are expected to meet their scheduled classes and other obligations. If a faculty member is unable to meet a scheduled class, he or she should notify the department office and arrange either for a qualified substitute or for a future make-up session.

If the university is open but a staff member is unable to come to work because of severe weather or other emergency, he or she should notify the supervisor as soon as possible. Staff members will be expected to make up lost time or use Paid Time Off (PTO), consistent with regular operating protocols.

Announcement of Closing

As soon as the president or his/her designee determines that the university must be closed, University Relations will alert local radio and television stations. Also, announcements of closings will be posted on the Carnegie Mellon electronic bboard official.cmu-news.

Contact

Questions concerning this policy or its intent should be directed to the Office of the President, (412) 268-2200.

Student Leave Policy

www.cmu.edu/policies/documents/StLeave.html

Students must sometimes interrupt their studies for a variety of reasons (financial, academic or personal). Students choosing to take a leave of absence should first contact their department advisor to discuss their plans while on leave and to work out any conditions that may be necessary for a smooth return to Carnegie Mellon.

A student may leave Carnegie Mellon by either withdrawing from the university (leaving the university with no intention of returning) or by taking

a leave of absence (leaving the university temporarily, with the firm and stated intention of returning).

A Leave of Absence Form must be completed by all students requesting a leave. A Withdrawal Form must be filled out by all students who are withdrawing. Notifying instructors and no longer attending classes does not complete the process. Forms are available in the academic departments, deans' offices and on The HUB website. Not completing the form results in tuition being charged to the midpoint of the semester or the last date the student attended an academically-related activity such as an exam, tutorial or study group, or the last day a student turned in a class assignment.

Students are required to fill out all information on the form, including all comment sections relating to reasons for their leave. After completing the form, students must take it to their home department and dean's office for appropriate signatures. The process of taking a leave will not be complete until all necessary signatures are on the leave form. Under certain circumstances, students may also need the Dean of Student Affairs to sign the appropriate form. Nonresident alien students must consult the Office of International Education for information on possible visa implications prior to going on leave.

Students on leave are not permitted to live in university housing or attend classes or maintain employment as students at Carnegie Mellon while their leave is in effect.

Doctoral candidates under ABD status (All But Dissertation) who wish to take a leave of absence should refer to the ABD and In Absentia policy.

Leaves during the academic semester will take effect as of the date signed by the student's dean. After the Leave of Absence or Withdrawal Form is received by Enrollment Services, it will be reviewed for appropriate tuition refunds (see Enrollment Services: Tuition and Fees Adjustment Policy) and grade implications. The recording of student courses and grades for taking a leave in a semester follows the deadlines for semester or mini courses, as follows:

- All courses or grades are removed, on or before the university deadline to drop classes with W (withdrawal) grades.
- W (withdrawal) grades will be assigned to all classes (for undergraduate students, and to graduate students only in Tepper School of Business or the Mellon College of Science.), after the university deadline to drop classes but before the last day of classes:
- Permanent grades assigned by the instructor will be recorded, after the last day of classes.

Contact

Questions concerning this policy or its intent should be directed to: The HUB, (412) 268-8186.

Student Return Policy

<http://www.cmu.edu/policies/documents/StReturns.html>

Policy Statement

Students on leave wishing to return to Carnegie Mellon to resume their degree studies may do so under several conditions. In order to be considered for return from leave, a student must first obtain a Return from a Leave of Absence form from The HUB or their academic department. This application requires information from the student regarding the intended semester of return, current address information and information about their leave. This application must be submitted to their home department at least one month prior to the beginning of the semester.

Undergraduates may return within their same academic department within two years. After two years, students returning in the same academic department are subject to space constraints and academic performance review. Graduate students must negotiate their return with their home department and must follow their department policy.

The Return from Leave of Absence form requires approval of the student's academic department and Dean. If a student's department chooses to deny the student's Return from Leave of Absence form, the student may appeal to their Dean. Any constraints governing the student's eligibility to return will be specified directly on the application by the academic department and/or Dean's office or the Office of Student Affairs.

Students who have taken courses elsewhere must submit an official transcript and course descriptions with their Return from Leave of Absence form. Transfer credit approval is determined by the academic department based on course level, performance and appropriateness to the student's curriculum requirements. Credit transfer is subject to college-specific policy. Failure to submit the necessary documents at the time of return will result in denial of transfer credit.

The process of returning is not completed until all necessary signatures on the Return form are obtained by the student and until all outstanding bills are paid. Enrollment Services will then notify the appropriate university offices of the student's return.

Contact

Questions concerning this policy or its intent should be directed to: The HUB, (412) 268-8186.

Tuition Adjustment Policy

www.cmu.edu/policies/documents/TuitionRefund.html

Application

This policy applies to withdrawals and leaves of absence by all students (graduate, undergraduate, non-degree) for all semesters (Fall, Spring, Summer 1, Summer 2, Summer All).

Official Date of Withdrawal/Leave of Absence

For students who notify the university of their intent to withdraw or take a leave of absence, the official date of withdrawal or leave of absence is the earliest of:

- the date the student began the withdrawal or leave of absence process;
- the date the student notified his or her home department;
- the date the student notified the associate dean of his or her college; or
- the date the student notified the dean of students.

For students who do not notify the university of their intent to withdraw or take a leave of absence, the official date of withdrawal or leave of absence is:

- the midpoint of the semester;
- the last date the student attended an academically-related activity such as an exam, tutorial or study group, or the last day a student turned in a class assignment.

Tuition Adjustment

Students who withdraw or take a leave of absence before completing 60% of the semester will be charged tuition based on the number of days completed within the semester. This includes calendar days, class and non-class days, from the first day of classes to the last day of final exams. Breaks which last five days or longer, including the preceding and subsequent weekends, are not counted. Thanksgiving and Spring Break are not counted. There is no tuition adjustment after 60% of the semester is completed. No tuition is charged to a student who is administratively withdrawn. See The HUB website for the complete tuition assessment schedule for the current semester.

Housing, Dining Plan & Fee Adjustments

Housing charges are adjusted daily, beginning on check-in day and ending on the last day of final exams for the semester. Holiday breaks are included. The Winter Break period is not included.

Dining plan charges are adjusted per the bi-weekly period. DineXtra and PlaidCa\$h are assessed based upon actual use.

There is no adjustment of the Port Authority Fee, the Technology Fee or Student Activity fee.

Financial Aid Adjustment

Federal and institutional financial aid is adjusted on the same basis as tuition. A student earns 100% of his or her federal or institutional financial aid when 60% of the semester is completed.

State grants and non-federal outside scholarships are adjusted based upon the withdrawal policy of the agency awarding the funds.

Contact

Questions concerning this policy or its intent should be directed to: The HUB, (412) 268-8186.

Student Accounts Receivable Collection Policy and Procedures

The Student Accounts Receivable Collection Policy and Procedures is currently under review, with the expectation that the policy will be vacated. In the interim, the current Student Financial Obligation Statement is the appropriate reference point. That statement is provided to all students through Student Information Online (SIO), and may be accessed at <http://www.cmu.edu/hub/billing/sfo/>. Questions about this statement may be directed to Brian Hill, Director of Student Accounts.

Financial Aid Policy Statement

University Academic Scholarship Renewals

Carnegie Mellon University awards academic scholarships as part of the freshman financial aid process. Each of these scholarships is renewable for four academic years of study (five for architecture) based upon the maintenance of a specific cumulative quality point average. The academic scholarship renewal criteria are included in the scholarship notification letter which is mailed to the student prior to the May 1 matriculation deadline.

Each scholarship recipient's cumulative quality point average is reviewed at the end of each academic year. If the student achieves the scholarship renewal criteria, then the scholarship is automatically renewed for the next academic year.

If the student does not meet the cumulative quality point average requirement for renewal, then s/he is given the opportunity to appeal. A merit scholarship appeal form and instructions are automatically sent to the student at the end of each academic year.

The student's completed appeal form is reviewed by members of the Enrollment Services staff. Input from the Associate Dean of the student's college is also considered. The student is notified, in writing, of the decision. The decision may be to renew the scholarship for the entire academic year, renew the scholarship for one academic term, or to reject the appeal. If the appeal is rejected, a written explanation is provided to the student.

Undergraduate Tuition Exchange Programs

Carnegie Mellon University assesses the standard tuition charge for the undergraduate tuition exchange programs.

Since Carnegie Mellon assesses the tuition charge, the student can be considered for all forms of institutional, state, and federal aid for which the student may have eligibility with the exception of any student employment program.

Undergraduate Study Abroad Programs

Carnegie Mellon University does not assess the tuition charge for any of the Study Abroad Programs.

Since Carnegie Mellon does not assess the tuition charge, the student is not considered for any institutional grants and scholarships. However, Carnegie Mellon will consider any student participating in an approved Study Abroad Program for all state and federal student aid programs for which the student may have eligibility with the exception of any student employment program.

The U.S. Department of Education and Carnegie Mellon University define an approved Study Abroad Program as one which is part of a contractual agreement between Carnegie Mellon and the host institution. Additionally, courses taken in the Study Abroad Program must be accepted for transfer to Carnegie Mellon by the Dean of the student's college.

Undergraduate Sponsored Study Abroad Programs

Carnegie Mellon assesses full tuition charges and all applicable fees to students participating in an undergraduate sponsored study abroad program.

Undergraduate International Students

Documentation Eligibility (U.S. Citizenship or Eligible Noncitizen)

You must be a U.S. Citizen or permanent resident alien to receive federal student aid. If you are a U.S. Citizen, but were not born in the United States, valid documentation includes a copy of your passport or naturalization certificate.

If you are a U.S. permanent resident alien or refugee, acceptable forms of verification include a photocopy of both sides of your I-551 or I-551C card.

Undergraduate international students are ineligible to receive any federal or state student financial aid. Additionally, Carnegie Mellon does not award any institutional financial aid funds to undergraduate international students.

Undergraduate Course Meeting Policy

No undergraduate classes, exams, academic, or artistic activities (including: extra help session, rehearsals, ROTC drill, make-up exams, etc.) are scheduled on weekdays between 4:30 p.m. and 6:30 p.m. Extra class time beyond those regularly scheduled must take place either before 4:30 p.m. or after 6:30 p.m.

Undergraduate Course Meeting Procedure

This policy is not intended to reduce the rigor or vigor of the academic or artistic programs, but to ensure that students have a period in which they are free to carry on co-curricular activities and athletics. Scheduling classes, exams, or other academic and artistic activities makes it very difficult for the students to meet these commitments. Since we are all concerned about the quality of life at the university, this time must be held for the students.

In planning the academic course schedule, Enrollment Services will review all courses to ensure that no academic or artistic courses be scheduled in this period. In addition, any requests to schedule additional or makeup course meetings, review and/or study sessions, teaching assistant office hours, or other course-related meetings, must take place either before 4:30 p.m. or after 6:30 p.m. This includes meetings in all university spaces, not just within Enrollment Services controlled classrooms.

As with any policy, there must be a means of making exceptions. Any academic or artistic activities which you feel must be scheduled between 4:30 p.m. and 6:30 p.m. must be cleared with the Vice President for Enrollment. These requests must be in writing either as a memo or through e-mail (we16@andrew.cmu.edu). All requests must include the course relationship, intent for the requested meeting, and the reason why the meeting cannot be held either before 4:30 p.m. or after 6:30 p.m.

Any further clarification of this policy can be addressed to the Vice President for Campus Affairs.

Statement of Assurance

Carnegie Mellon University does not discriminate in admission, employment, or administration of its programs or activities on the basis of race, color, national origin, sex, handicap or disability, age, sexual orientation, gender identity, religion, creed, ancestry, belief, veteran status, or genetic information. Furthermore, Carnegie Mellon University does not discriminate and is required not to discriminate in violation of federal, state, or local laws or executive orders.

Inquiries concerning the application of and compliance with this statement should be directed to the Vice President for Campus Affairs, Carnegie Mellon University, 5000 Forbes Avenue, Pittsburgh, PA 15213, telephone 412-268-2056.

Obtain general information about Carnegie Mellon University by calling 412-268-2000.

Undergraduate Academic Regulations

Courses and Registration

Availability of Required Courses

In order to insure that students do not have to compete for access to their required courses, registration priority is given to students who are registering for courses in their primary major. Although the University encourages the exploration of other disciplines, access to courses outside a student's primary major (including those courses that fulfill requirements for an additional major, minor, etc.) is on a space-available basis and is not guaranteed.

Change in Schedule (Add/Drop)

Scheduling changes must be made within the period in the semester as established in the Official University Calendar. A student **cannot** drop a course by simply notifying the instructor(s) or by ceasing to attend class(es). A student dropping all of his/her courses (with the intent of leaving the university) must file an Application for Withdrawal or an Application for Leave of Absence (see the "Student Leave Policy" for more information).

Undergraduate students at Carnegie Mellon may drop a course by following the instructions for dropping a course in Student Information Online (SIO) on or before the appropriate deadline as published in the Official University Calendar. This applies to all courses with the exception of half-semester mini courses. When a course is dropped by these deadlines, the course is removed and does not appear on the academic record.

After the Add/Drop deadlines, or to drop below 36 units, students must see their advisor and submit a Course Withdrawal form.

The Late Add Form is used for adding a course or switching sections after the established add period and during the semester in which the course is offered. Students can check Student Information On-Line to see if the appropriate schedule changes have been made. Undergraduate students who add a course or switch a section after the established add period are required to obtain the permission of their home Dean's Office or the Head of their School. If adding a course would result in a schedule overload, the permission of the student's advisor is also required. Graduate students must have the permission of their department.

- If adding a course would result in a schedule overload, the signature of the student's advisor is also required if requested by Associate Dean/ Department Head.
- Graduate students must have the permission of their department.
- International students who wish to drop below full-time must consult the Office of International Education.

The deadline to add a mini course is the end of the first week of classes for that course. The deadline to drop a mini course is one week after the mid-point for that course.

Free Electives

A free elective is any Carnegie Mellon course that a student completes that is not being used to fulfill a college, school, major or minor requirement. A maximum of nine units of physical education and/or student-taught (StuCo) courses may be included in the tally of units required for graduation.

Overloads

The University is committed to insuring that each degree candidate has access to a normal course load before it permits other students to register for a greater than normal number of units. A normal course load has been established by each academic department. Students should check with their academic advisor, department head, or dean's office for the definition of a normal course load. Individual colleges may have overload policies that are more restrictive, therefore students should consult with their advisor when considering an overload. Students may register for an overload up to 12 units with the approval of their academic advisor if they have demonstrated their ability to successfully complete a normal course load. Successful completion of a normal course load is defined as having earned at least a 3.00 (3.50 for students in ECE) cumulative QPA through the preceding semester or at least a 3.00 (3.50 for students in ECE) semester QPA in the current semester (in which case all final grades must be recorded before the student can register for the overloaded class). Overloads greater than 12 units or other exceptions must have the approval of the student's Associate

Dean. Freshmen and transfer students are limited to a normal course load in their first semester of attendance.

Summer Classes

Per the Associate Deans' Council, undergraduate students are now limited to registering for 24 units in summer sessions without advisor approval.

If the advisor wishes to approve additional units, AFTER consulting with the student, advisors can increase the max units in S3 on the registration page.

Conduct of Classes

Students are expected to attend all scheduled classes unless the instructor explicitly informs the class that other ways of doing the work are acceptable. The action to be taken in regard to tardiness, absence from class or making up late work is the responsibility of the individual instructor; the instructor should consult with the department head and the student's dean if major action, such as dropping the student from the course, is being considered.

All classes will be held at their scheduled hour on days immediately before and after all holidays and recesses. Both faculty and students are expected to be present.

Members of athletic teams and other student organizations are permitted to be absent from classes to participate in authorized contests and presentations, either at home or out of town, provided the following conditions are met:

- All work missed must be made up to the satisfaction of the instructor(s) concerned;
- No trip shall involve an absence of more than two days, excluding days when classes are not scheduled;
- The total number of days of absence shall not exceed six per sport or per organization annually;
- Each student will obtain an absence authorization signed by the director or sponsor of the organization involved and by the Dean of Student Affairs. The student will present this authorization to the instructor. This is not an excuse for work missed.

Technology affords many students access to portable devices including cell phones, PDAs, and laptops. It is expected that students will respect the wishes of faculty with regard to the use of electronic devices within the academic environment.

Students who, because of religious beliefs, cannot attend class may arrange as individuals to be absent, provided the work missed is made up in a manner satisfactory to the instructor(s) of the class(es) missed.

No student shall leave a scheduled exercise because of the absence of the instructor until a reasonable time has passed. By tradition and as a matter of courtesy a student should wait 10 minutes before leaving.

Course Attendance and Enrollment

A student is responsible for the payment of charges incurred at the university by the stated payment deadline. The purpose of this policy statement is to detail the specific process and action steps to be used to resolve any outstanding student account balance.

Students will be held financially and academically accountable for course(s) which they attend or for which they are enrolled. Enrollment in a course which is not actively taken, or contrarily, the taking of a course for which enrollment has not been completed, will result in the assignment of a grade and responsibility for applicable tuition charges.

Students who fail to resolve their enrollment and balances will be prohibited from using university academic and administrative services. The services include, but are not limited to, computing facilities, library services, housing, dining, career center services, degree verification and the release of academic transcripts for the upcoming semester.

Undergraduate Course Meetings

Usually, no undergraduate classes, exams, academic, or artistic activities (including extra help sessions, rehearsals, ROTC drill, make-up exams, etc.) are scheduled on weekdays between 4:30 p.m. and 6:30 p.m. On occasion, some courses may be scheduled during these hours by Enrollment Services

when they also are offered at other times: students may elect to take such courses during the 4:30 to 6:30 p.m. period.

Grades

Grading Policies

Policy Statement

This policy offers details concerning university grading principles for students taking courses, whether those students are undergraduates, non-degree students or graduate students. This policy covers the specifics of Assigning and Changing Grades (including Final and Mid-Semester grades, In-completes and Conditional Failures), Grading Options (Audit and Pass/Fail), Drop/Withdrawals, Course Repeats, and defines the undergraduate and graduate Grading Standards.

Questions about grading for a specific course should be addressed to the instructor of the course in question. Graduate students with questions about Pass/Fail and Drop/Withdrawal should contact their individual programs. Appeals for an exception to any grading policy may be made by the dean's office of the student's home college.

1. Definitions

Certain terms are used in this document with specific meanings, as defined in this section.

Student means any full-time or part-time degree-seeking undergraduate or graduate student, or full-time or part-time non-degree student.

Non-degree student means a student who is not in a university degree program.

Faculty means members of the university's Faculty Organization as defined in the Faculty Handbook, plus instructors and special faculty appointments (even in the first year), and part-time faculty.

Instructor means a faculty member, teaching assistant, and/or lecturer who is the instructor of record, as recorded in the Student Information System (S3).

2. Policy Provisions

Assigning Grades

Final grades are awarded to each student, in each course scheduled, at the end of the semester, mini-semester or summer session. All students taking a course at Carnegie Mellon must be assigned grades.

The University Registrar's Office will query instructors who do not assign a grade to a student. Copies of the query regarding the lack of grade will be sent to the student, to the dean and to the department head. If the instructor does not assign a letter grade or an incomplete grade within one month of Enrollment Services query, the department head will be responsible for insuring that a grade is assigned.

Changing a Grade

A student who believes that an assigned grade is incorrect, may request that a final grade be changed. Final grades will be changed only in exceptional circumstances and only with the approval of the instructor and, for undergraduates, with the approval of the dean's office of the college/school offering the course; for graduate students, department approval is required. The intention of this policy is to insure that, under normal circumstances, all students in a class are treated equally and no student is unduly advantaged.

Mid-Semester Grades

Mid-semester grades provide valuable feedback to students as they assess their performance in courses. Furthermore, mid-semester grades and the QPA's they generate are used by Deans and advisors in identifying and dealing in a timely way with students in academic trouble. Therefore it is imperative that mid-semester grades accurately reflect student performance and are turned in on time.

Mid-semester grades are not permanent and are kept only until final grades are recorded. Because mid-semester grades are not permanent, changes of mid-semester grades as a rule will not be accepted.

Incomplete Grades

Carnegie Mellon students are expected to complete a course during the academic semester in which the course was taken. However, if the instructor agrees, a grade of I (incomplete) may be given when a student, for reasons beyond his or her control, has been unable to complete the work of a course, but the work completed to date is of passing quality and

the grade of incomplete provides no undue advantage to that student over other students.

In awarding an I grade, an instructor must specify the requirements for completing the work and designate a default letter grade where no further work is submitted. Students must complete the required course work no later than the end of the following academic semester, or sooner if required by prior agreement. The instructor must record the permanent grade by the last day of the examination period of that following semester, or Enrollment Services will administratively assign the default grade.

Conditional Failures

X grades are conditional failures. They are factored in the student grade point average as a failure in the semester they are awarded and can be replaced by nothing higher than a D. When awarding an X grade, the instructor specifies to the student the requirements necessary to achieve a grade of D. Requirements may be the completion of a prescribed course with a performance of C or better or may be specified work related to the course in which the student received the X. Students must complete the required course work no later than the end of the following academic semester, or sooner if required by prior agreement.

The instructor must record the permanent grade of D by the last day of the examination period of that following semester, or Enrollment Services will administratively assign the default grade of R.

Pass/No Pass Grades

Undergraduate students may elect to take a free-elective course pass/no-pass unless precluded by the course, the course's department or the student's home department/college. Policies for graduate students vary and students should be advised to check with their individual colleges/departments/programs for details.

A student must submit a Pass/No-Pass Form to the University Registrar's Office indicating the course they are electing as pass/no-pass before the end of the university's drop period. This decision is irreversible thereafter. No information regarding the student's decision will be passed on to the instructor. Instructors will submit letter grades, which will automatically be converted to pass/no-pass.

A through D work will receive credit for units passed and be recorded as P on the student's academic record; below D work will receive no credit and will be recorded as N on the student's academic record. No quality points will be assigned to P or N units; P or N units will not be factored into the student's QPA.

In exceptional circumstances, departments may ask to designate a course pass/no-pass or request that the course be evaluated only with letter grades. The College Council must approve designating a course as pass/no-pass only or as graded only. If such a decision will have an adverse effect on the requirements of any other college, Academic Council must review the decision. The decision to designate a course as graded or pass/no-pass must be made before the add period for the course and is irreversible thereafter.

Audit Grades

Auditing is presence in the classroom without receiving academic credit, a pass/fail or a letter grade. The extent of a student's participation must be arranged and approved by the course instructor. A student wishing to audit a course is required to register for the course, complete the Course Audit Approval Form, obtain permission of the course instructor and their advisor, and return the form to The HUB prior to the last day to add a course.

Any student enrolled full-time (36 units) may audit a course without additional charges. Part-time or non-degree students who choose to audit a course will be assessed tuition at the regular per-unit tuition rate.

Drop/Withdrawal Grades

Students at Carnegie Mellon may drop a course by accessing on-line registration on or before the drop deadline as published in the official university calendar. This applies to all courses with the exception of mini-semester courses. Policies for graduate students vary and students should be advised to check with their individual colleges/departments/programs for details. The deadline to drop a mini-semester course is the last day of the fourth week of the mini-semester course. When a course is dropped by these deadlines, the course is removed and does not appear on the academic record.

Undergraduate students who wish to withdraw from a course after the drop deadline must complete a Course Withdrawal form and **must** obtain their academic advisor's signature. The advisor will indicate whether they "recommend" or "not recommend" withdrawal from the course on the form, sign the petition, and assign the "W" (withdrawal) grade in S3. The "W" grade will appear on the academic record. Withdrawal grades do not apply to graduate students, except in CIT, HC, MCS, and TSB.

Undergraduates who are registered as full-time students as of the 10th day of classes are expected to remain full-time for the duration of the semester.

Full-time is defined as registered for a minimum of 36 units. Permission to drop below the 36-unit minimum can only be granted in extraordinary circumstances by the student's home Associate Dean. Undergraduates who are registered as part-time are also subject to the above deadlines to drop or withdraw from a course.

Course Repeats

When a course is repeated, all grades will be recorded on the official academic transcript and will be calculated in the student's QPA. This is the case regardless if the first grade for the course is a passing or failing grade, including Pass/Fail.

Undergraduate students who wish to repeat a course already passed must obtain approval from the student's Dean or Department Head. When a student takes a course s/he has already passed, only one set of units will count towards graduation requirements.

3. University Grading Standards

The undergraduate student Grading Standard is as follows:

Grade	Quality Points	Definition
A	4.0	Excellent
B	3.0	Good
C	2.0	Satisfactory
D	1.0	Passing
R	0.0	Failure
X	0.0	Conditional Failure
P	Non-Factorable	Passing
N	Non-Factorable	Not Passing
O	Non-Factorable	Audit
W	Non-Factorable	Withdrawal
I	Non-Factorable	Incomplete
AD	Non-Factorable	Credit granted for work completed at another institution or examination credit

This grading standard is for all students classified as seeking an undergraduate degree and special students taking undergraduate courses.

Any +/- grades received by undergraduate students when taking graduate-level courses will automatically convert to the corresponding letter grade as listed in the scale above.

The graduate student Grading Standard is as follows:

Grade	Quality Points	Definition
A+	4.33	(Not applicable to CIT or Dietrich College)
A	4.0	
A-	3.67	
B+	3.33	
B	3.00	
B-	2.67	
C+	2.33	
C	2.00	
C-	1.67	
D+	1.33	(Not applicable to Tepper School, Heinz College, or Dietrich College)
D	1.00	(Not applicable to Tepper School, Heinz College, or Dietrich College)
R	0.0	Failure
X	0.0	Conditional Failure
S	Non-Factorable	Satisfactory
P	Non-Factorable	Passing
N	Non-Factorable	Not Passing
O	Non-Factorable	Audit
W	Non-Factorable	Withdrawal
I	Non-Factorable	Incomplete
AD	Non-Factorable	Credit granted for work completed at another institution or examination credit

Grading standards are based upon a student's home academic program and is defined by their home college. The college's standards determine if certain grades are applicable and if undergraduate course are factored into their mid-semester and final semester quality point averages (QPA). Otherwise, the university policy is that only graduate courses (700 level and higher, unless a department specifies 600 level as graduate) are factored into the semester QPA.

Pass/Fail policies for graduate students vary and students should be advised to check with their individual college/department/program for details.

Minimum passing grades in graduate courses are determined by the department and college policy. Any course that a graduate student completes will be graded using this scale.* This includes undergraduate courses taken by graduate students, and non-degree students taking graduate courses.

Contact

Questions concerning this policy or its intent should be directed to the University Registrar's Office, (412) 268-7404.

Units and Quality Points

Carnegie Mellon has adopted the method of assigning a number of "units" for each course to represent the quantity of work required of students. For the average student, one unit represents one work-hour of time per week throughout the semester. The number of units in each course is fixed by the faculty member in consultation with the college offering the course. Three units are the equivalent of one traditional semester credit hour.

Hence, a 9 unit semester-long course should require 9 hours of student engagement, on average, including class time; if the instructor requires 3 hours of lecture and 1 hour of recitation, they can expect students to spend 5 hours outside of class engaging in class work. For mini courses that run for only seven weeks, the conversion from units to number of hours per week during the mini involves multiplying by 2. For example, a 6 unit mini course should on average involve 12 hours of student engagement; if the instructor requires 3 hours of lecture and 3 hours of lab, they can expect the students to spend 6 hours outside of class.

Final grades are given "Quality Point Values" as follows:

Grade	Meaning	Quality Point Value
A	Excellent	4
B	Good	3
C	(satisfactory)	2
D	Passing	1
R	Failure	0

Units earned for a course multiplied by the Quality Point Value of the grade given for that course equals the Quality Points for that course. For example, a 9-unit course assigned a "C" grade is awarded 18 quality points (9 units x 2 quality points = 18 quality points). Total Quality Points divided by Total Units Factorable equals the Quality Point Average.

For example, a student's record in one semester might be:

11 units x 4 quality points	=	44 quality points
10 units in Physics "R"		
10 units x 0 quality points	=	0 quality points
9 units in Chemistry "B"		
9 units x 3 quality points	=	27 quality points
9 units in History "C"		
9 units x 2 quality points	=	18 quality points
9 units in English "D"		
9 units x 1 quality point	=	9 quality points
Total Units = 48		
Total Quality Points = 98		
Quality Point Average (98 divided by 48) = 2.04		

"I" (incomplete), "P" (pass), and "W" (withdrawal) grades are not awarded quality points and are not considered as "factorable" units when calculating the QPA.

The same procedure is applied to all grades earned at the university to establish the Cumulative Quality Point Average.

Dean's List

Undergraduate students who meet specific academic requirements are added to their home college's Dean's List each semester. This is noted on the student's transcript for applicable semesters. Each college may have its own requirements for Dean's List qualification; these are described in the individual college sections of the Catalog.

Note: Only undergraduate *degree-seeking* students may earn a place on the Dean's List. Non-degree students are not eligible.

Transfer Credit Evaluation and Assignment Policy

The Policy on Grades for Transfer Courses, originally dated January 13, 1993, and approved by the Committee on Educational Programs and Student and Faculty Affairs states:

"Carnegie Mellon University offers students the opportunity to take courses for credit through a cross-registration program and through the receipt of transfer credit from other accredited institutions. The Carnegie Mellon University transcript will include information on such courses as follows:

Carnegie Mellon courses and courses taken through the university's cross-registration program will have grades recorded on the transcript and be factored into the QPA. All other courses will be recorded on this transcript indicating where the course was taken, but without grade. Such courses will not be taken into account for academic actions, honors or QPA calculations. (Note: Suspended students may take courses elsewhere; however, they may receive transfer credit only if their college's and department's policies allow this).

Definitions

A Carnegie Mellon course is one conducted under Carnegie Mellon University regulations regarding course content and grading and taught by faculty under the supervision of a Carnegie Mellon academic unit. Courses taught by Carnegie Mellon faculty on the Carnegie Mellon campus qualify. Courses that are part of the regular offerings of other universities do not qualify, unless faculty at the other universities receive appointments at Carnegie Mellon and handle Carnegie Mellon students under Carnegie Mellon academic regulations.

Courses offered for cross-registration are those taken under the PCHE (Pittsburgh Council on Higher Education) agreement during the regular academic year."

Only official and final college or university transcripts will be accepted for the awarding of transfer credit. Grade reports, letters and the like are not acceptable. It is the responsibility of the Office of Undergraduate Admission and the University Registrar's Office to verify official transcripts. Official transcripts for the awarding of transfer credit will reside in the student's permanent university academic folder in the University Registrar's Office.

It is the responsibility of each academic department to review and establish transfer course credit for their degree-seeking students.

Transfer Credit Evaluation Procedure

External Transfer Students

External applicants applying for transfer to Carnegie Mellon will arrange for submission of:

- official transcripts to the Office of Undergraduate Admission as part of the admission process.
- official, final transcripts to the Office of Undergraduate Admission once they are admitted and prior to their beginning coursework at Carnegie Mellon.

As part of the admission process, Admission will verify the official final transcripts, and then send them to the appropriate academic unit responsible for college/department acceptance decisions. Each unit will be responsible for student's review of transfer credit and the establishment of transfer course credit for each individual student.

Current Students

Current Carnegie Mellon students taking courses at other accredited institutions (colleges and universities), during either summer semesters or as part of exchange programs or other departmentally approved programs, or while on leave from Carnegie Mellon, must arrange for the submission of official final transcripts to the University Registrar's Office.

Upon receipt, Enrollment Services will verify these official transcripts and send a copy of the transcript to the appropriate academic unit responsible for that student's college/department transfer credit decisions. The official transcript will reside in the student's university academic folder in

Enrollment Services. Each unit will be responsible for its students' transfer credit review and the establishment of transfer course credit for each individual student. Should a unit receive the official transcript, it must be sent immediately to the University Registrar's Office.

Standard Course Equivalents for Advanced Placement/International Baccalaureate Units Policy

The university has standard units assigned to Advanced Placement (AP) and International Baccalaureate (IB) credits for all majors. Standard course equivalencies for each exam will be determined by "expert departments" in each college for each acceptable AP/IB score.

Under this procedure, students' AP or IB credit for a particular course will only go toward their degree requirements if allowed by the home department or college policies. Should a student decide to transfer to another major and/or academic unit within the university, AP/IB credits applicability to new degree requirements will depend upon the requirements of the new home department (or college). Students may only be granted credit for the Higher Level IB exams. This policy assumes no significant AP and/or IB exam changes. In the event of significant exam changes, students will be notified of any resulting policy changes no later than July 30 prior to their enrollment to take effect the fall of that year.

Rank in Class

Undergraduates at Carnegie Mellon pursue degrees in one or more of our ten schools or colleges. They may choose to pursue coursework, majors and minors within and between schools/colleges. In an institution where students' educational experiences are so varied, class rank is not a meaningful way to measure achievement.

Carnegie Mellon and Enrollment Services does not report nor record students' rank in class, rank in college and rank in department. For those graduate school and/or employment requests that request a students' rank, they will be completed with the statement "Carnegie Mellon does not report rank in class."

Official Transcripts and Verifications

Transcripts

The student's official transcript is to be considered the official record for all degree(s), major(s), minor(s), and honors. The official Carnegie Mellon transcript includes both the undergraduate and graduate record. All transcripts come in individually sealed envelopes, unless otherwise specified. Transcript requests are not processed if the student has an outstanding obligation, financial or otherwise. We cannot accept phone or e-mail requests. We will not fax a transcript under any circumstances.

Visit The HUB website, www.cmu.edu/hub, for complete information, including information on ordering official transcripts.

Verifications

Enrollment verifications are available only for currently enrolled Carnegie Mellon students and Carnegie Mellon Alumni.

An enrollment verification officially confirms information about you. Please note that we cannot fax your QPA or verifications that contain anything besides the following:

- Name
- Local address
- Local phone number
- E-mail address
- Class
- College
- Department
- Dates of attendance
- Date(s) of graduation
- Degree(s) awarded

The most common reasons for requesting a verification are:

- Student loan agencies and insurance companies wanting to know if a student is enrolled.

- Scholarship committees wanting to know if a student maintained a certain QPA.
- Potential employers wanting to know if a student graduated with a certain degree.

On-Line Verification Ordering

Currently enrolled Carnegie Mellon students may order enrollment verifications via Student Information On-Line (<https://s3.as.cmu.edu/sio>).

For additional information, visit The HUB website (<http://www.cmu.edu/hub>).

Full-Time Status

Undergraduates who are registered as full-time students as of the 10th day of classes are expected to remain full-time for the duration of the semester. Full-time is defined by a minimum of 36 units. Permission to drop below the 36 unit minimum must be granted by the student's Associate Dean. Undergraduates who are registered as part-time are also subject to the above deadlines to drop or withdraw from a course.

Students carrying a full-time course load as of the 10th regularly scheduled class day are not ordinarily permitted to drop below 36 units after that time. Exceptions must be authorized by the student's Associate Dean.

Status, Class Standing

Students should refer to the sections of the catalog pertaining to their college and/or department to determine the number of units required each academic year by their specific curriculum. Students must achieve passing grades in order to earn units; students do not earn units for incomplete or failed courses.

A freshman student becomes a sophomore after earning passing grades in three-fourths of the units required by his/her freshman curriculum.

A sophomore student becomes a junior after earning the number of units required by his/her curriculum for the freshman year plus three-fourths of the number of units for the sophomore year.

A junior student becomes a senior after earning the number of units required by his/her curriculum for the freshman and sophomore years plus three-fourths of the number of units for the junior year.

Classification of students is made only at the time of their first registration in any academic year and remains unchanged throughout the rest of that academic year.

Course Description Requests (for prior years)

Please note that University Archives does not have access to transcript and verification information. They maintain only the course description archives. If you call or e-mail this office, your request will not be processed. Please contact:

Archives/Art Inventory Specialist
Carnegie Mellon University Libraries
4909 Frew St.
Pittsburgh, PA 15213

(412)268-7148 (fax)

Graduation & Diplomas

Degree Requirements

Students are responsible for checking to ensure that the degree requirements (as listed in the appropriate catalog at the time of their matriculation) have been met. They may also refer to the university's on-line academic audit website: <https://enr-apps.as.cmu.edu/audit/audit>. If the degree requirements have been modified by College Council action, the student is responsible for checking to ensure that the modified requirements have been met.

To be eligible to graduate, undergraduate students must complete all residence and course requirements for their program with a cumulative Quality Point Average of at least 2.0 for all courses taken. For undergraduate students who enrolled at Carnegie Mellon as freshmen and whose freshman grades cause the cumulative QPA to fall below 2.0, this requirement is modified to be a cumulative QPA of at least 2.0 for all courses taken after the freshman year. Note, however, the cumulative QPA that appears on the student's final transcript will be calculated based on

all grades in all courses taken, including freshman year. Some programs may have additional QPA requirements in order to graduate. Students are encouraged to confirm all graduation requirements with their academic advisor.

No student may receive a diploma until all financial obligations to the university have been met.

Residency Requirement

A candidate for the bachelor's degree must complete at the university a minimum of four semesters of full-time study, or the equivalent of part-time study, comprising at least 180 units of coursework. Note that these are minimum residency requirements applicable to all university undergraduates. Some of the university's colleges and departments have developed more restrictive requirements in this area. Students should consult that section of the catalog in which their college or department's academic regulations are presented for the residency requirements applicable to them. Deviation from these policies requires action by the Dean of the student's home college.

Implications of Residency Requirements for transfer students seeking second undergraduate degree: Students who received degrees from other universities could have up to 2 years of credits earned elsewhere applied to their Carnegie Mellon degree requirements and would need to meet Carnegie Mellon's Residency Requirement and complete at the university a minimum of four semesters of full-time study, or the equivalent of part-time study, comprising at least 180 units of coursework. Deviation from these policies will require action by the Dean of the student's home college.

Diplomas

A Carnegie Mellon diploma is a student's certificate of accomplishment. The diploma is printed with the name the student approved within Graduation On-Line, along with the student's primary degree (i.e., Bachelor of Arts in Creative Writing). Minors are not listed on a diploma, although they do appear on an official transcript.

Diplomas are distributed to graduates during or immediately following the commencement ceremony. Certain circumstances will result in students receiving their diplomas at a later date, and such students will be informed of this well before the ceremony. If a student is unable to attend the ceremony, diplomas will be available for pick-up or mail-out in the weeks following commencement. Diplomas are not available prior to the stated date of graduation.

The diploma is 14x17 inches and is marked with a multi-colored and gold seal.

Graduation with University Honors

In recognition of exemplary academic achievement as undergraduates, some candidates for undergraduate degrees will be named to the University Honors List. Each of the undergraduate colleges will select students for honors on the basis of a cumulative grade point average (typically when cumulative QPA is greater than 3.5) and/or recommendation of the faculty.

Standard Degree Terminology

Carnegie Mellon University offers a wide variety of programs; the opportunities vary greatly between and among the colleges. For the purposes of clarification, this section defines:

- standard degree terminology;
- changes to the existing degree declaration process;
- the existing procedure for creating new degrees, majors and minors.

Degree

Examples: B.S. (Bachelor of Science); M.F.A. (Master of Fine Arts); Ph.D. (Doctor of Philosophy)

Major

Field studied in greatest depth by fulfilling a department-determined set of course requirements. The primary major is the field in which the degree is granted.

Example: Creative Writing; Physics; Marketing
Students may pursue an additional major(s) in a single degree program.

Minor

Field(s) studied for educational enrichment by fulfilling a department-determined set of course requirements. Graduate students may not pursue Minors. Minors are not listed on the diploma but appear, instead, on the

student's transcript. The type of degree sought is determined by the major (that of the home department), not the minor(s). Examples: Film Studies; History of Ideas

Option

(Now referred to variously as track, option, etc.)

A specific area of study associated with the major or additional major(s), which transforms the title of the major or additional major.

Examples: Civil Engineering (Biomedical Engineering Option) Physics (Computer Science Option)

Concentration

(Now referred to variously as track, option, etc.)

A specific area of study generally associated with a major or an additional major, which appears only on the transcript.

Home College

The college into which the student was originally admitted or into which the student formally transferred.

Home Department

The department into which the student was originally admitted or the department offering the major which the student has declared.

Concurrent College/Department

College/department other than the home college/department, granting the second of multiple degrees, or offering the additional major(s) of double or triple major, or minor.

Single Degree/Major

One diploma, stating the degree and the major field of study. Currently, the Statute of Limitations on earning an undergraduate degree is eight years.

Examples: B.A. in Psychology; M.S. in Industrial Administration

Requirements: Fulfillment of all requirements of the home college.

Declaration: At least by registration time (early November), first semester junior year.

Certification: Home college, home department

Major-Declaration Process

For undergraduates, depending on the student's college, the major is usually declared at the end of the freshman or sophomore year. Departments enter the appropriate majors upon declaration.

For graduates, the major is usually indicative of the department and is supplied by the department.

Joint Degree

Degree program offered between two or more colleges/departments or offered in conjunction with an outside University.

Examples: M.S. in Colloids, Polymers, and Surfaces (Chemistry and Chemical Engineering); B.H.A from College of Fine Arts and Humanities and Social Sciences.

Multiple Degrees

More than one degree granted by the university (whether simultaneous or sequential). One diploma for each degree. When awarded simultaneously, two degrees are referred to as dual degrees, three degrees as triple degrees. Multiple graduate degrees may be given in conjunction with (an) outside University(ies).

Examples of how such degrees appear on the respective diplomas:

- Bachelor of Fine Arts in the field of Art; Bachelor of Science in the field of History
- Bachelor of Science in the field of Physics; Bachelor of Science in the field of Computer Science

Requirements: Multiple bachelor's degrees

Declaration: Undergraduates: at least by registration time (early November), semester junior year

To receive multiple bachelor's degrees the student must:

- satisfy all requirements for each degree.
- complete an aggregate number of units that exceeds, by at least 90, the minimum unit requirement for the degree with the smallest such requirement (e.g., if the one of the degrees requires a minimum of 360 units and the other requires 380 units, a total of at least 450 units (90 plus 360, the smallest of the two) is required to obtain both degrees).

- comply, for each degree, with the statute of limitations regarding the time at which units are earned.
- while working towards more than one degree simultaneously, designate one of the departments (and if necessary colleges) as the home college/department.

Additional Major

One degree, stating the major in the home department first and the additional major second. The type of degree given (B.A., B.S.) is determined by the major of the home department.

For example, a student whose home department is Physics:

This degree is valid: B.S. in Physics with an additional major in History

This degree is not valid: B.S. in History with an additional major in Physics

The intent of a double major is an in-depth understanding of two major fields. Students may pursue a second major in a field where the primary degree is different from the degree associated with the additional major: e.g., B.S. in Economics with an additional major in History.

Requirements: If the double majors involve two different colleges OR the same college, the student must fulfill:

- all requirements (including core) for the first major degree as defined by the home college;
- all major requirements (including core prerequisites) for the additional major;
- any specific requirements for double majors imposed by the department(s)/college(s) involved.

Declaration: At least by registration time (early November), first semester junior year.

Certification: Home college, home department; concurrent college (if any), concurrent department (if any).

Additional Majors

One degree, stating the major of the home departments first, the second and the third major afterwards. The type of degree sought (B.A., B.S.) is determined by the major in the home department.

For example, a History student, this degree is valid: B.A. in History with additional majors in Professional Writing and in Hispanic Studies. This degree is not valid: B.A. in Professional Writing with additional majors in History and in Spanish.

Requirements: If the triple major involves two or three different colleges OR the same college, the student must fulfill all requirements listed for each additional major.

Declaration: At least by registration time (early November), first semester junior year.

Certification: department

Concurrent college (if any), concurrent department (if any)

Second concurrent college (if any), second concurrent department (if any)

Minor

One degree, stating the major first and the minor second (or third, if there is also (an) additional major(s) involved). The type of degree sought (B.A., B.S.) is determined by the major (that of the home department). Minors are not listed on the diploma, but appear on the transcript.

Examples: B.F.A. in Music Performance (Voice) with a minor in Theatre Arts; B.S. in Applied History with an additional major in Information Systems and a minor in Mathematics.

Requirements: The student would generally take 45 units pertaining to the minor, in addition to fulfilling all requirements for the major degree (as defined by the home college). The "minor" courses are negotiated between the student and the department certifying the minor.

Declaration: At least by registration time (early November), first semester junior year.

Certification: department

Options (Tracks, Specializations, Area Cores, etc.)

These concentrations will not be considered part of the student's degree title unless included are part of the major or (an) additional major(s) field title.

Additional Majors/Minors Declaration Process

For undergraduates, all variations on a student's sought degree and major field must be declared by the end of the first semester of the student's junior year. Having already declared a major, students should be well prepared by this time to choose additional majors and/or minors.

It is assumed that by these proposed deadlines, the student will have taken a majority of degree requirements and electives. The student can then, in conjunction with an advisor, review his/her course history and decide which options may or may not apply towards the desired degree and field(s).

A student who wishes to pursue additional majors and/or minors should consult with his/her advisor and receive a detailed curriculum for attaining the additional desired degree, major or minor. The student should then notify the college/department offering the additional program. Upon receipt of this notification, the college/department will update the Student Information System which will reflect this information to the Commencement System for graduation. This procedure ensures that when a student is expected to graduate, all degree/major information is immediately accessible, and certification of the degree is simplified.

Multiple Degrees Involving Graduate Degrees

Policies involving multiple graduate degrees or a graduate/undergraduate degree program or sequence are dictated by each college involved.

Examples: M.S. in Public Management and Policy and the degree of Juris Doctor (Heinz College/University of Pittsburgh School of Law).

Declaration: Undergraduates: at least by registration time (early November), first semester junior year.

Declaration: Graduates: upon admittance OR by the end of the semester preceding the expected graduation date.

Certification: Home college, home department and concurrent college (if any), concurrent department (if any).

Academic Actions

Each college may have its own regulations and procedures regarding academic actions, but in general, the following apply to all undergraduate students:

Student Suspension/Required Withdrawal Policy

Policy Statement

University Suspension is a forced, temporary leave from the university. There are three types of suspension for students that apply to both graduate and undergraduate students:

Academic Suspension is the result of poor academic performance or violation of academic regulations and is imposed by the student's college or academic department (see university and college academic policies).

Disciplinary Suspension is the result of serious personal misconduct and is imposed by the Office of Student Affairs (see The Word/Student Handbook).

Administrative Suspension is the result of failure to meet university financial obligations or failure to comply with federal, state or local health regulations and is imposed by Enrollment Services. (See Student Accounts Receivable Collection Policy and Procedures for financial obligations. Contact Student Health Services for information about health regulations.)

Suspended students may not:

- register for courses
- attend classes
- live in residence halls or Greek housing
- use campus facilities, including athletic facilities, library and computer clusters
- participate in student activities
- be members of student organizations
- have student jobs

(Note: students on academic suspension may have a summer campus job if they accepted the job before they were suspended.)

Employment

Although suspended students may not hold student jobs, students on academic suspension may, under certain circumstances, have a non-student

job with the university; students on disciplinary or administrative suspension may not.

To have a non-student job, students on academic suspension must receive approval from their associate dean (undergraduate students) or department head (graduate students) to ensure that the job will not violate their suspension terms. Students in violation of this will lose their degree student status, meaning they would have to reapply for admission to Carnegie Mellon through either Undergraduate Admission or the appropriate graduate department.

Transfer Credit

Suspended students may take courses elsewhere; however, they may receive transfer credit only if their college's and department's policies allow this.

Appeals

To appeal any action of this policy, the student may write to the following people:

Academic Suspension - associate dean (undergraduate students) or department head (graduate students);

Disciplinary Suspension - dean of student affairs;

Administrative Suspension - vice president for campus affairs, vice president for business and planning, and the dean of student affairs, in consultation with the student's associate dean.

Returning from Suspension

In order to return from a suspension, a student must have the following approval:

Academic Suspension - associate dean (undergraduate students) or department head (graduate students);

Disciplinary Suspension - dean of student affairs;

Administrative Suspension - vice president for campus affairs or his designate.

Contact

Questions concerning this policy or its intent should be directed to The HUB, x88186.

Procedure for the Appeal of Grades & Academic Actions

In the event a student believes an assigned grade or an imposed academic action is incorrect or not appropriate, the student may follow the processes outlined below to seek prompt and equitable resolution of the matter.

If a student believes a grade has been incorrectly assigned, the student should:

1. Present the case to the faculty member responsible for the course, providing all supporting data concerning the nature of the discrepancy.
2. If, after a decision is rendered, the student believes that his or her concerns have not been adequately resolved, the student may pursue a formal appeal with the department responsible for the course. To appeal to the department, a student must present a written statement detailing the grounds for the appeal with appropriate documentation to the head of the department responsible for the course. This appeal must be submitted within seven (7) days of receipt of the faculty member's decision. The department head will provide a written decision, including the basis for it, within thirty (30) days, or as soon thereafter as practical.
3. If the student is not satisfied with the department head's resolution, the student may pursue the appeal at the college level. To appeal at the college level, the student must present copies of all documents originally sent to the faculty member and department head, along with a formal letter of appeal, to the dean of the college responsible for the course. This appeal must be submitted within seven (7) days of receipt of the department head's decision. The dean, or the dean's designate, will review the appeal and will render a written decision, including the basis for it, within thirty (30) days, or as soon thereafter as practical.

If a student believes an academic action is inconsistent with the policies of the college or merits additional review, a student should:

1. Submit a formal written appeal, as specified in the initial academic action, to the associate dean of the college responsible for the decision, with a copy to the dean, requesting review of the action including

all relevant materials to substantiate their case and support their concerns.

- The dean of the college, or the dean's designate, will review the appeal and issue a decision and the basis for it within thirty (30) days.

If, after carrying out the steps of either process described above, the student believes that the matter has not been adequately resolved, or if no decision has been rendered by the appropriate date, the student may appeal at the university level. To appeal at the university level, the student must present copies of all previously submitted documents and a formal letter of appeal to the provost. The provost or another designated university officer will respond in writing with a final resolution, including the basis for it, within thirty (30) days, or as soon thereafter as practical.

Other Academic Regulations

Level of English Fluency Needed for Non-Native English Speakers

To be successful at Carnegie Mellon University, students who are nonnative speakers of English need to begin their undergraduate work with a strong foundation in academic English and a high level of proficiency with speaking, reading and writing in English. The importance of English language abilities cannot be overstated since there are no basic ESL language courses at Carnegie Mellon. All students will have sufficient English language proficiency to be able to participate fully in the academic work and to interact in daily life outside of the classroom.

Students' English fluency will enable them to handle the demands of academic work, including the ability to comprehend, process, and master complex material presented in English, both in written and spoken form. Students will possess the fluency to communicate their ideas and questions to faculty, classmates, and others, in a classroom environment that is often highly participatory. For example, many classes require group discussion, team projects, oral presentations, and/or independent research. In addition to fluent English skills, studying in a new culture requires openness and flexibility to adapt to a new, and often very different, academic system.

To assess the language of nonnative speaking applicants, a minimum TOEFL score of 600 (paper based, PBT), or 100 (internet based, iBT) has been established as the standard for admission. This minimum score indicates that an applicant has the fundamental building blocks of language needed for academic tasks and for continued language development. Since neither the PBT or CBT versions of TOEFL assess speaking, students who took these tests should additionally seek feedback on their speaking skills and work to improve conversational skills before beginning academic work.

Exchange Students

Each term, Carnegie Mellon welcomes exchange students from partner institutions around the world. Exchange students enrich the learning experience at Carnegie Mellon and are expected to be full participants in the curricular and metacurricular life. Therefore, their admission should adhere to the English language guidelines described above. Exchange students submit standardized English language testing scores (such as the TOEFL) as part of the Exchange application process, and present the same high level of English language abilities as degree-seeking students. With exchange students, high-level English abilities are particularly critical since academic, personal and extracurricular experiences must be maximized in a short period of time sometimes only four months in duration.

Withdrawal of a Degree

The university reserves the right to withdraw a degree even though it has been granted should there be discovery that the work upon which it was based or the academic records in support of it had been falsified. In such a case the degree will be withdrawn promptly upon discovery of the falsification.

Information for Graduates

Graduating students may wear one stole ONLY with their academic regalia. Students are certainly permitted to receive/purchase more than one stole if they are a member of multiple organizations that issue stoles and may chose to wear a particular stole to the main commencement ceremony and another to their diploma ceremony.

Graduating seniors that are a member of a club/organization that issues a pin to designate affiliation are permitted to wear more than one pin with the academic regalia in addition to one stole.

Retention of Student Work

The university reserves the right in all colleges to retain indefinitely any student work the faculty may select. All work not retained by the university must be claimed at the time specified on the bulletin boards (or other forms of communication) of the department concerned; otherwise, the work will be destroyed.

Statute of Limitations

All units required for an undergraduate degree, whether earned in residence, transferred from another institution or granted via advanced placement, must have been earned within eight years of the date on which the degree is granted. This statutory period can be extended by the Dean of the student's college under the following conditions:

- the courses taken prior to the statutory period still represent a reasonable part of the student's total academic program;
- the prior courses provide adequate preparation for courses which must still be taken to fulfill the degree requirements;
- there is a legitimate reason(s) for the student not completing the academic program within the statutory period.

A request for a waiver of the statute of limitations must be submitted to the Dean of the student's college. The request for a waiver should address all of the above conditions for an extension. For cases in which a waiver is granted, the waiver covers specific courses and is intended for a specific period during which the program must be completed.

Transitional Students

Transitional student status has been instituted by the university to assist students who have changed their minds about their original field of study or who have been judged unlikely to make satisfactory progress in their chosen field. Becoming a Transitional Student gives a student an opportunity to maintain a relationship with the home college while re-orienting academic plans and goals. It also gives a student time to explore his/her options and/or enhance admissibility to another college in the university, or to another institution. Ordinarily, a student will be permitted to register as a Transitional student for no more than one semester. Although, in exceptional circumstances, a student may be allowed to extend the status beyond one semester. A student must obtain the permission of his/her home college Associate Dean to initiate this option.

Transitional student status may be available to students upon the advice of their advisor, or upon their own request. Interested students must make an appointment with the Associate Dean of their home college to discuss this option.

Note: Students at Carnegie Mellon in good academic standing may transfer from one program to another as long as they meet curricular or artistic requirements and as long as there is space in the program into which they wish to transfer.

Process for Creation of New Degrees, Majors, or Minors

Departments proposing new degrees, majors, additional majors, and/or minors must complete a New Degree/Major/Minor Request Form. This should include any and all notations to the university diploma and/or transcript (new degrees, majors, minors, options). Departments proposing to offer a new degree, major, additional major and/or minor must follow university policies for approval as follows:

- Document the Program by completing the New Degree/Major/Minor Request Form. Departments proposing new degrees and majors must complete this form and attach course descriptions, curriculum proposal, list of present faculty who will support the Program, and verify the availability of other units' courses. This documentation must indicate the starting semester for the Program, and in the case of new majors, also indicate if it is available only as a major/additional major/minor, or in combination.
- Receive Department approval.
- Receive Dean and College Council approval.
- Submit all Program documentation complete with College Council approval to the Vice Provost for Education. New majors or degrees will not be processed without the approval of the Provost's Office.

- Submit all Program documentation complete with College Council approval to the Vice Provost for Education. New majors or degrees will not be processed without the approval of the Provost's Office.
- The Provost's Office will approve or deny, and inform the sponsoring Department and Enrollment Services.
- The Department may then publicize and offer the program for student enrollment.

University Services

Academic Advising

Carnegie Mellon recognizes the vital role of academic advising in undergraduate education. The university assigns an academic advisor to each student, and makes certain that all advisors have clear, timely, and accurate information concerning programs, policies, procedures, and resources. In addition to having assigned academic advisors, students often develop relationships with faculty and staff members who serve as academic mentors.

Institutional Statement on Advising

Academic advising is integral to the educational mission of Carnegie Mellon. Advising is an intentional process, grounded in teaching and learning, and provides each student with guidance for developing and achieving meaningful educational, professional, and personal goals. Successful advising at Carnegie Mellon depends upon a shared understanding of, and commitment to, the advising process, by students, advisors, and the university. Academic advisors engage students in learning, promote students' academic success, and foster students' personal, ethical, and intellectual growth, all of which will carry into their roles as citizens and lifelong learners.

The Student's Role in Academic Advising

Seeking advice is an important part of how students begin to make decisions about their academic and professional futures. Each major and department has an advising system which may be different from one another. It is important that students find out early from their first year advisor how the advising system for all their four years at Carnegie Mellon works.

Students are responsible for: understanding the importance of their relationships with advisors; seeking out advisors, contacts, and information on a regular basis; knowing the requirements of their individual degree programs; and taking final responsibility for making their own decisions based on the best information and advice available. The Carnegie Mellon Advising Resource Center (CMARC) is an additional place for students to obtain information and general advice.

The Advisor's Role

To achieve the goals of academic advising at Carnegie Mellon, advisors, along with their advising programs, are responsible for: being knowledgeable of, and communicating, the requirements of the academic programs in which they advise; monitoring students' progress towards degree completion; being available to meet with students on a regular basis; assisting students in finding the appropriate institutional and community resources; involving students in the academic and career planning process and the exploration of options and resources; and engaging in developmental activities to stay informed of issues that impact student success.

Assistance for Individuals with Disabilities

Equal Opportunity Services

Whitfield Hall, 143 N. Craig Street, Pittsburgh PA 15213

<http://www.cmu.edu/hr/eos/index.html>

Everett Tademy, Director 412-268-2012, et19@andrew.cmu.edu

Larry Powell, EOS Manager 412-268-2013, lpowell@andrew.cmu.edu

Courtney Bryant, EOS Administrative Coordinator 412-268-2012, cbryant@andrew.cmu.edu

Qualified individuals with disabilities are entitled to reasonable accommodations under the Americans with Disabilities Act (ADA regulations). Accommodations are determined on a case-by-case basis. Equal Opportunity Services provide links between individuals with disabilities and the campus community. Information released will provide documentation of a disability for faculty, staff, students and prospective students of Carnegie Mellon University. All information will be considered confidential and only released to appropriate personnel on a need to know basis. To access services, individuals must initiate a request in writing for specific services/accommodations (books on tape, enlargements, interpreters, etc.). Accommodations prescribed only apply to Carnegie Mellon University and may not be valid elsewhere. The individual takes full responsibility for ongoing assistance.

In order to receive services/accommodations verification of a disability according to Carnegie Mellon guidelines is required.

To establish that an individual is covered under the ADA, the documentation must indicate that the disability substantially limits some major life activity, including learning. The documentation requirements are provided in the interest of assuring that a disability demonstrates an impact on a major life activity, is appropriate to verify eligibility, assures the implementation of appropriate accommodations, and supports the request for accommodations, academic adjustments, and/or auxiliary aids.

For more information on disability resources and documentation guidelines please contact Larry Powell, EOS Manager (412) 268-2013 or lpowell@andrew.cmu.edu or visit our website (<http://hr.web.cmu.edu/eos.html>).

Carnegie Mellon Resource Advising Center (CMARC)

Ty Walton, Director
Cyert Hall A64, 412-268-2150

The Carnegie Mellon Advising Resource Center (CMARC) is an advising and information center that assists students and connects them to appropriate communities, services and opportunities by providing academic planning and one-on-one counsel. Founded as the Carnegie Mellon Action Project (CMAP), CMARC has an additional commitment to support underrepresented ethnic minority students in a setting where students' differences and talents are guided, appreciated, and reinforced.

Academic Advising

CMARC, working in cooperation with faculty and departmental advisors, strives to promote academic success. The professional program advisors serve as an additional resource when it is necessary to consult with more than one person or to obtain another perspective. Their primary objective is to assist students in developing and achieving meaningful educational plans that are compatible with their life goals. CMARC advisors can help students:

- Establish short and long term academic goals.
- Investigate alternative majors in other colleges.
- Obtain referrals to organizations such as Career Services, Academic Development, etc.
- Explore career and graduate school options.

Computing Services

Steve Huth, Vice Provost Computing Services
Cyert Hall 281, 412-268-1075

<http://www.cmu.edu/computing/>

Computing on Campus

Computing Services maintains and supports computing resources for the campus community, including the campus wired and wireless networks, public printing, computer labs (clusters), email and software licensing.

To get started with computing at Carnegie Mellon, visit our Services for Students (<http://www.cmu.edu/computing/students>) page. Here you will find steps for connecting your computer or mobile/gaming devices to the network; accessing software; managing your Andrew account, password or email; using public printing and computer facilities.

If you need help with computing on campus, please contact the Computing Services Help Center at 412-268-HELP (4357) or advisor@andrew.cmu.edu.

Division of Student Affairs

Gina Casalegno, Dean of Student Affairs
Warner Hall 301

As much of undergraduate education focuses on preparation for professional careers, the university is strongly convinced that the total development of the student is critical to preparation for professional practice. A great deal of time and effort by the Division of Student Affairs, faculty and the university staff focuses on providing students with the opportunities to expand experiences outside the classroom, to encounter new intellectual

and social experiences, to undertake projects for personal growth, and to prepare for life.

Our vision and mission for the student experience is founded upon the intellectual, occupational, emotional, spiritual, physical, and cultural growth and nurturing of students. The Division of Student Affairs, and our partners throughout the university, are here to support you in reaching your highest potential in the areas of artistic and intellectual curiosity, personal well being, professional competency, leadership development, and engagement in and contribution to the larger community.

Staff members throughout the division are here to support and foster your intellectual and personal growth and help you explore and experience the different aspects of college life. We care about you, your studies, your social growth, your well-being and your future and want to help you enjoy a great Carnegie Mellon experience. Offices within the Division of Student Affairs include:

- Office of the Dean of Student Affairs
- Career Center
- Counseling and Psychological Services
- Health Services
- Office of International Education
- Office of Orientation and First Year Programs
- Office of Student Activities
- Student Development Office
- Student Life Office

Office of the Dean of Student Affairs

Gina Casalegno, Dean of Student Affairs
Warner Hall 301, 412-268-2075,
<http://www.cmu.edu/student-affairs/dean/>

The Office of the Dean provides central guidance and direction of student services at Carnegie Mellon. The dean is responsible for leading the Division of Student Affairs in providing students with quality services, programs, and experiences that support and complement the academic mission of the university.

While students are encouraged to seek out any member of the division for assistance, you may also meet with the dean of student affairs directly by calling 412-268-2075 and scheduling an appointment at your convenience.

Career and Professional Development Center

Kevin Monahan, Associate Dean for Career and Professional Development
University Center Lower Level, 412-268-2064
<http://www.cmu.edu/career>

Career exploration and planning

Whether you are interested in exploring post graduation options, or are clear on the direction you plan to pursue, the Career and Professional Development Center offers a complete range of resources. Students wishing to explore how majors and minors relate to career choice, as well as gain information about particular fields, will work with a career consultant to examine their skills, interests, and values and how they relate to various career fields. Career consultants also coach students in writing resumes and cover letters, networking, locating internship and job opportunities, preparing for interviews, and pursuing graduate school opportunities. Career consultants are assigned to each college and provide individualized support, general career programming, and college-specific workshops. In addition to the workshops presented by the Career and Professional Development Center staff, consultants coordinate an annual professional development series presented by prominent alumni and recruiters in various industries and fields. Finally, the Center's library and web page provide extensive resources on job search strategies, internships, summer opportunities and other career-related interests.

Job search

Several thousand summer internships and professional full-time job opportunities are made available to Carnegie Mellon students through TartanTRAK, our on-line job listing resource. Students can access TartanTRAK through the Center's homepage. TartanTRAK also provides information on the hundreds of employers that visit our campus each year. These organizations interview students for internships and professional employment as well as hold informational sessions in the evenings that are open to the entire campus. Average starting salaries offered to Carnegie Mellon graduates, in most fields, consistently rank above the national norms.

Student employment/Campus jobs

The Student Employment program promotes experiential learning and professional development. All campus job postings include learning objectives that help employers and students recognize and understand the professional and personal opportunities for growth presented by each position. The Student Employment website includes an on-line training and orientation program on topics ranging from business etiquette to the essentials of getting paid on time.

Student employment opportunities are posted on-line through TartanTRAK and include federal, state, and community service work-study jobs as well as non-work-study jobs. While having a work-study award does not guarantee a job, searching for and applying to opportunities are easily navigated through TartanTrak.

Counseling and Psychological Services

Morewood Gardens E-Tower, 412-268-2922,
<http://www.studentaffairs.cmu.edu/counseling>

Counseling and Psychological Services (CAPS) at Carnegie Mellon offers students the opportunity to talk about personal or academic concerns in a safe, confidential setting. Students come to CAPS for many reasons, including but not limited to problems with family, friends, or school; concerns about the future; and feelings of stress, low self-esteem, anxiety, depression, or loneliness.

We're here to talk with students about issues that are significant for them. We also offer consultation to staff, faculty, and parents who have concerns about a student's well-being. Any discussion regarding a client of the center necessitates a written consent by the student permitting us to release information, including whether the student has been seen at CAPS.

Counseling Center services are provided at no cost. There are, however, limits on the number of sessions that we are able to provide. Follow-up psychiatric services and off-campus referrals for longer term therapy are at the client's expense. The Counseling and Psychological Services office is open weekdays, and there is a professional on call for emergencies during evenings and on weekends.

Health Services

Anita Barkin, Director
Morewood Gardens E-Tower, 412-268-2157
<http://www.cmu.edu/health-services/index.html>

Student Health Services is staffed by physicians, advanced practice clinicians and registered nurses who provide general medical care, allergy injections, first aid, gynecological care and contraception as well as on-site pharmaceuticals. Examinations by Health Services staff for illness/injury are free of charge; however, fees for prescription medications, laboratory tests, diagnostic procedures and referral to the emergency room or specialists are the student's responsibility. Health Services also has a registered dietician and health educator on staff to assist students in addressing nutrition, drug and alcohol and other healthy lifestyle issues.

Patients are seen by appointment. Walk-in urgent care is provided. Appointments can be made by calling the office. If you have a medical problem or accident that requires immediate attention at night or on the weekend, you should contact University Police at 412-268-2323 for transportation to the emergency room. If you have an urgent problem and would like to speak with the physician on-call, you can do so by calling the Health Services number.

Health Insurance

In addition to providing direct health care, Health Services administers the Student Health Insurance Program. The Student Health insurance plan offers a high level of coverage in a wide network of health care providers and hospitals. It also covers most of the fees for care at Student Health Services. All full-time students are required to carry health insurance and will be assessed a charge for the individual basic mandatory plan offered through the university student health insurance program. The charge will appear on the invoice of the first semester of attendance in the academic cycle. The student is required to take one of the following three actions: (1) enroll in the basic plan as charged; (2) upgrade the benefit plan by enrolling in the enhanced student health insurance options during the open enrollment period; (3) apply for a waiver from the mandatory plan. Questions can be addressed to shinsure@andrew.cmu.edu.

Office of International Education

Linda Gentile, Director
Warner Hall, Third Floor, 412-268-5231
<http://www.cmu.edu/oie>

The Office of International Education (OIE) is committed to supporting, promoting, and celebrating individuals in an intercultural environment. We advocate for and facilitate international and cross cultural experiences, perspectives, and initiatives. OIE is the primary contact for study abroad programs and non-immigrant matters for all students and scholars (foreign professors and researchers) who are not United States citizens or permanent residents. OIE encourages both U.S. and international students to participate in international programs and events on campus, and we also welcome volunteers to participate and assist with programs sponsored by the office.

Foreign Students and Scholars

Carnegie Mellon hosts 2800 international students and 600 international scholars who come from more than 90 countries. International students make up 47% of the full-time graduate student body and 11% of our full-time undergraduates. OIE is the liaison to the university for all non-immigrant students and scholars. The foreign student and scholar advisors provide many services including: advising on immigration, academic, social and acculturation issues; presenting programs of interest such as international career workshops, tax workshops, and cross-cultural and immigration workshops; supporting international and cultural student groups such as the International Student Union and the International Spouses and Partners Organization; maintaining a foreign student resource library that includes information on cultural adjustment, international education and statistics on foreign students in the United States; posting pertinent information to students through email and our website, and conducting orientation programs.

Study Abroad

Carnegie Mellon students in every major can spend a summer, semester, or year abroad. Over 400 students go to all corners of the globe each year and receive credit for pre-approved study abroad. There is a wide range of funding options. The study abroad office assists students in all stages of the process of going abroad. The advisors promote study abroad, advise students, work with the academic departments and conduct information sessions, pre-departure orientations and welcome back workshops. For more detailed information about Carnegie Mellon's study abroad program, see the Undergraduate Options section of this catalog.

Office of Orientation and First Year Programs

Anne R. Witchner, Assistant Dean of Student Affairs
Morewood Gardens 1B8, 412-268-4887
<http://www.studentaffairs.cmu.edu/first-year>

The Office of Orientation and First Year Programs is responsible for providing vision and leadership for a comprehensive approach to new student orientation and transition programs. The office provides programs, opportunities and services to help students and family members successfully transition to the Carnegie Mellon community.

The office is responsible for program development, marketing and implementation of orientation and transition programs. Areas of concentration include: new student orientation, Family Weekend and special event planning.

Office of Student Activities

Elizabeth Vaughan, Director
University Center 103, 412-268-8704
<http://www.studentaffairs.cmu.edu/StudentActivities/>

The Office of Student Activities complements students' academic experiences by providing services and resources that engage students in creating campus culture through social, cultural, intellectual, spiritual, athletic, recreational, artistic, political, and service opportunities. Our staff is committed to delivering quality advising, resource materials, leadership development opportunities, and administrative support services to impact students' growth and development and enhance the success of each student organization.

Our office partners with students to create a vibrant culture of student life on the Carnegie Mellon campus. Our community is home to nearly 250 recognized student organizations that are supported by the Student Activities staff team. In addition to serving as individual advisors to many

organizations and providing resources, support, and ad hoc advising to all student organizations, our office also coordinates a slate of opportunities to help Carnegie Mellon students get involved in campus life.

To learn more about getting involved on campus, please visit our website where you can find information about recognized student organizations and about upcoming events on campus. If you are interested in forming a new organization, visit our office to learn more about how to get started. We look forward to helping you make your mark on the campus experience at Carnegie Mellon.

Student Life Office

John Hannon, Associate Dean of Student Affairs
Morewood Gardens A-Tower, 412-268-2142
<http://www.studentaffairs.cmu.edu/student-life/>

The Student Life Office provides opportunities that emphasize community engagement, leadership and social responsibility while actively supporting the personal and professional development of students. To this end, we coordinate residence life for first-year, upperclass and Greek students through our house model. Our professional staff, called Housefellows, advance a broad-based vision for student development by utilizing the residential house community as a focal point for the student experience on campus. The Housefellow's role involves serving as students' primary metacurricular advocate at the university while enhancing their social, academic, intellectual, artistic and personal development. Students lead the development and implementation of a vibrant, engaging experience in these houses through their work as Resident Assistants, Community Advisors or house council members, all of whom are advised by the Housefellow.

Additionally, the Student Life Office coordinates a number of developmental programs, initiatives and services for the broader campus community. We coordinate educational initiatives and accountability processes related to community standards; provide resources and facilitate programs related to gender and gay/lesbian/bisexual identity including GenderTalk and OUTSpoken, the MOSAIC conference, SafeZone training and Pride Month events; advise student safety initiatives such as Sexual Assault Advisors, 1 in 4, and Safewalk; advise and support the twenty-four social, Greek-letter organizations and associated governing bodies that comprise the fraternity and sorority community; offer leadership programs such as the First-Year Leader Retreat and Emerging Leaders; coordinate spirituality and meaning-making programs such as the Big Questions series; and advise the Student Dormitory Council.

Housing and Dining Services

Morewood E-Tower, 412-268-2139
www.cmu.edu/housing-dining/

Housing and Dining Services provides a variety of accommodations for Carnegie Mellon students. Living arrangements include traditional single-gender residence halls, coeducational residence halls, suites, apartments, houses and Greek living areas. All first year students, 17 years of age or older, are required to reside in University housing. The Dean of Student Affairs must approve first-year students who wish to be exempt from this requirement and would like to commute from home. Students who will not be 17 before the start of their first semester are asked to contact the Dean of Student Affairs. Transfer student housing is subject to availability and therefore, transfer students are also asked to contact Housing and Dining Services.

University housing is available on campus and in our Oakland Community Apartments. All on-campus residential areas are located in close proximity to academic buildings. The Oakland Community Apartments are located very near the campus and are an approximate 5-10 minute walk to campus. The university's shuttle bus services these areas on a regularly scheduled basis.

Furnishings and Amenities

Housing and Dining Services provides each resident with a bed, a desk and chair, a bookshelf, a dresser and a closet or wardrobe. Each room is also equipped with window coverings and cable TV, and all of our buildings have Ethernet or broadband service for fast data connectivity. Items such as pillows, linens, area rugs, cellular telephones (if desired), etc., are the student's responsibility. Oakland Community apartments have a broadband service modem with one outlet per apartment. Residents are responsible for any routers or switches needed to connect multiple computers to the modem.

Room Rates

Room rates include utilities, maintenance, a cable TV jack and Ethernet/broadband connection in each room, apartment, or house. Students pay separately for room and public area damages. Long distance phone access can be obtained by use of personal cell phones or calling cards purchased by the student and used at the courtesy phones.

Room Types

Residence hall rooms, apartments and houses are available through Housing and Dining Services and are priced according to these broad categories:

Residence hall rooms

- Grouped and priced by occupancy (# of students per room by design) and a classification (standard, prime, suite)
- Singles, doubles, triples, and quads are available
- No in-room cooking facilities
- Classification is primarily based on bathroom privacy, although other criteria may also be involved
- Standard rooms share a large, central bathroom facility
- Prime rooms generally share a private or semi-private bathroom with no more than five students
- Suite-style rooms share a semi-private bathroom, as well as a common living area

Apartments

- Efficiency, one-bedroom and two-bedroom apartments are available
- Grouped and priced by occupancy, location, and number of bedrooms
- In-room cooking facilities

Houses

- Grouped and priced by occupancy and location
- Includes bedrooms, a kitchen, a dining room, a living room, private bath and laundry facilities

Housing Reservations

Returning Student Room Selection

Each spring returning resident students will have an opportunity to reserve spaces in university housing through the Room Selection process that takes place in February and March. Returning students most often select apartments and residence hall rooms that offer more flexibility and privacy, features typically created by a kitchen and/or semi-private bathroom facilities.

First-Year Student Room Assignments

Most first-year students are assigned to traditional residence hall rooms where each floor shares a community bathroom. Because these traditional residence hall rooms (standard rooms) support the development of strong community, they provide excellent opportunities for first-year students to develop many friendships on their floor and throughout the building. While every effort is made for first-year students to share a room with other first-year students, a small number of first-year students will sometimes share a room with a returning student. If two first-year students request each other as roommates, their request will usually be honored as long as both applications are received before the May 31 deadline. Room assignments for first-year students are made in the order in which their original university deposits were processed by the Office of Admission. The Office of Admission provides Housing and Dining Services with the information concerning the date on which each incoming student deposit was processed.

Building and Room Preferences

We give our best effort in fulfilling each student's individual housing preferences, but it is often difficult to accommodate everyone's top choice due to the high demand for housing at Carnegie Mellon. The cost of attendance used in the calculation of a student's eligibility for financial aid includes a housing allowance that is based on a standard double room rate. Students are still responsible for the full cost of their room rate even if it is higher than the standard double rate.

Roommate Matching Procedures

A number of factors are taken into account when we make roommate assignments: a preference for a special residential program, specific hall or room type, smoking status, and college and major. Also factored into the equation is personal information about how you intend to utilize your room (social or study purposes), how clean you intend to maintain your room and

whether you consider yourself to be a "night" person or a "morning" person. Housing and Dining Services does not, and will not, discriminate in any way in regards to roommate matching. It is important for students to be honest when filling out the housing application as it will eliminate the potential for roommate conflicts.

Housing License Agreement

The Housing License Agreement is a binding document that states the terms and conditions of occupancy by which the student and the university intend to be legally bound including the dates of residence. The agreement is for two full terms, beginning with the fall semester. Housing and Dining Services advises students, parents and guardians to read the agreement thoroughly (a copy is available on our website, www.cmu.edu/housing/). The submission of the Housing License Agreement is an on-line process for both first year and upperclass students. The Housing License Agreement is signed by electronic signature and authenticated by Andrew ID through the WebISO process.

Important Information About Temporary Housing

Because housing is in high demand at Carnegie Mellon, occupancy pressures may dictate that a limited number of first-year students spend anywhere from a few days to a few weeks in temporary housing. Once it is time to relocate to a permanent assignment, Housing and Dining Services will orchestrate and assist in the move.

Housing Charges

The housing room charge is billed in three separate amounts. After charging and crediting the housing reservation fee, the University bills students for the balance of their academic year housing charges in two separate amounts, one each semester.

Cancellations

Only under very limited circumstances can Housing License Agreements be cancelled. These reasons include marriage, verified departure from the university, study abroad, or moves to Greek housing as defined by Greek leases and approved by Housing and Dining Services staff. The only contract cancellation requests that will be considered, other than those mentioned, are those based on verifiable medical or psychological hardship. Students interested in pursuing a contract cancellation based on one of these hardships may obtain the appropriate form at the Housing and Dining Services office.

Refunds

During the academic year, if a housing room payment should become refundable, the refund shall be recorded as a credit to the student's account with the University. Refund amounts are calculated on a pro-rated basis for the days remaining in the contractual term after the student completes the entire withdrawal procedure, which includes completion of the Request for Cancellation form and returning the room key to the Office of Housing and Dining Services.

Other Living Arrangements

Students moving into a fraternity or sorority house or leaving university housing (except to participate in an academic program away from the Pittsburgh area) should be aware that their opportunities to move into Carnegie Mellon University housing in the future may be very limited. Students wishing to return to university housing join a wait list for spaces remaining after all returning residents, incoming first-year students and transfer students have been housed.

Community Housing

Housing and Dining Services provides an off-campus housing registry service. This on-line service maintains up-to-date information on available apartments, houses and rooms in private homes for rent, as well as on students who are looking for roommates. Additional information about moving to Pittsburgh, utility companies, etc. is included on the site. Since accommodations in university housing are not available to graduate students, Community Housing Services is a good resource for graduate students seeking accommodations in the local area. For more information on our services, please visit our website at <http://www.cmu.edu/housing/community-housing/>.

Additional housing information can be found in "The Word (<http://www.cmu.edu/student-affairs/theword/>)", "From the Ground Floor Up, the undergraduate guide to Housing and Dining Services" or at www.cmu.edu/housing/

Dining Services

At Carnegie Mellon Dining, our priorities are to give students healthy options, a convenient dining experience and, most importantly, good tasting, quality food. We currently feature over twenty eating locations in the University Center and in residential and academic buildings. Our cuisine ranges from Asian to Indian to American, from an All-you-care-to-eat location to breakfast served all day to a quick sandwich and drink on the go. We have established hours to meet the needs and requirements of the campus community, from early morning coffee to late night snacks. We are able to accommodate special dining needs and have a registered dietician and other food service professionals on campus that can work with individual students on nutrition and diet choices.

Dining Plans

We have designed our dining plans so that you can choose when, where and what you want to eat to best fit your needs. Your dining plan is encoded on your Carnegie Mellon ID card so that you have easy access to your account wherever you go.

There are several different ways to use your dining plan on campus. Our traditional dining plans and community dining plans consist of value meals combined with a declining balance account called flexible dollars. Students are also able to select a DineXtra only plan, which acts as a declining balance account for the entire semester.

Students who have purchased a traditional or community dining plan are able to use meal passes at any dining location. There are four meal periods per day - breakfast, lunch, dinner and late night. You can use one pass during each of these meal periods. The traditional plans also include two guest meals per semester which allow your guests to enjoy campus food with you, or you can use these meals if you would like to purchase two meals during one pass period. These guest meals can be redeemed at any time during the semester.

Flexible dollars and DineXtra are dollars that can be used at any point during the semester. They can be used to upgrade your meal passes with special options like Premium Entrees or to purchase items a la carte at any of our Dining locations. Flexible dollars and DineXtra can also be used at Entropy+, the campus convenience store, to purchase grocery items to supplement your daily meals. In addition to dining locations on campus, they are also accepted at Eat n' Park (Murray Ave), Vocelli's Pizza (Baum Blvd) and Subway (S. Craig St) off campus. Unused flexible dollars do not roll over to the next semester. DineXtra balances do roll over from the fall to the spring semester, but your account expires at the end of the spring semester.

Vending Services

Vending machines are located in a number of locations throughout campus. From this 24-hours service, students may choose entrees, "Healthy choice" lunch meats, soup, coffee, assorted beverages, and snacks. Many of the machines in the residence halls are enabled to accept DineXtra transactions, and most vending machines around campus also accept Plaid Ca\$h. Purchases are made by swiping your Carnegie Mellon ID Card through the card reader on each machine, which will access and deduct the cost of the purchase from your DineXtra or Plaid Ca\$h accounts.

Academic Support Services

Academic Development
Cyert Hall, Suite B5
412-268-6878
www.cmu.edu/academic-development

Academic Development provides a variety of support services geared towards helping students develop the skills, strategies, and behaviors needed to perform as confident, independent, and active learners. These services range from study skills instruction in areas such as textbook reading and lecture note taking to tutoring and review sessions in selected courses. These services are free of charge and available to all Carnegie Mellon students - those who are having difficulties and those who just want to improve their skills.

Following are the services that Academic Development offers:

Peer Tutoring

Peer Tutoring is geared primarily, but not exclusively, toward large introductory courses. It is available from 8:30-11:00pm. Sunday-Thursday in various residence halls and on selected weekday afternoons in Cyert B5. This is a walk-in service, and no appointment is necessary. Standing Tutoring appointments are also available upon request.

Study Skills Instruction

Group workshops are held several times each semester, covering topics such as time management, stress management, test taking, and procrastination. Register for workshops or make individual appointments by contacting Academic Development.

Supplemental Instruction (SI)

Supplemental Instruction (SI) is an academic enrichment program that is offered in traditionally difficult courses. SI discussion and review sessions are facilitated by trained student SI Leaders who have already completed the course and received an A in it.

Designed to supplement - not replace - class lectures and recitations, SI sessions are interactive and collaborative. Students who attend sessions learn to integrate how to learn with what to learn.

SI sessions are usually held twice weekly for one hour; additional sessions are held prior to exams. Attendance at sessions is voluntary.

Study Groups

Organized Study Groups are available in selected courses each term. The Study Groups are limited to six students and are facilitated by a student leader. Come in to the Academic Development office in Cyert Hall, Suite B5 and fill out a Request Form to join a Study Group.

Fast Facts

These pamphlets, which offer tips on a variety of academic success issues, can be picked up from the Academic Development office or can be viewed on the website under "Publications".

Freshmen Fast Facts

This set of five brochures is geared primarily toward freshmen. They cover topics such as working with faculty, optimizing your time, managing coursework and readings, understanding grades, academic integrity, and getting help when you need it.

Teacher Certification

Carnegie Mellon students interested in earning teacher certification can participate in a 5-year program that will allow them to earn their undergraduate degree at Carnegie Mellon and spend one year in an intensive Master of Arts in Teaching (MAT) program at Chatham University to earn the MAT and Pennsylvania Teacher Certification. To make this program possible, interested undergraduate students should plan to cross register at Chatham for 63 units of required courses, using elective spaces in their schedule. Students who will graduate after December 2012 will have slightly different requirements because of changes being made to more adequately meet the requirements of the No Child Left Behind law (mainly related to preparation to work with special education populations and students who speak English as a second language).

Criteria for admission to the MAT program includes: An overall GPA of 3.0, and completion of three pre-professional Praxis exams in Reading, Writing and Mathematics. All candidates for initial certification in Pennsylvania must have earned at least a baccalaureate degree, completed an approved program of teacher education, and passed The Praxis content tests for their certification area. NOTE: Pennsylvania has signed interstate agreements with more than 42 other states, so you are not restricted to teaching in Pennsylvania. Check with the Department of Education in the state where you will live to determine if PA certification will be accepted. To plan early, contact Judith Hallinen, Assistant Vice Provost for Educational Outreach, 8-1498.

Intercultural Communication Center

Peggy Allen Heidish, Director
Warner Hall 308, 412-268-4979
<http://www.cmu.edu/icc>
eslhelp@andrew.cmu.edu

The Intercultural Communication Center (ICC) is a support service offering both credit and non-credit classes, workshops, and individual appointments designed to equip nonnative English speakers (international students as well as students who attended high school in the U.S.) with the skills needed to succeed in academic programs at Carnegie Mellon. In addition to developing academic literacy skills such as speaking, reading and writing, students can learn more about the culture and customs of the U.S. classroom. The center offers:

- Writing Clinic: individual appointments to help students with their academic writing assignments
- Credit class for undergraduates: Building Fluency for Presentations (7 week mini, 99-451); register through ICC, interview required
- Non-credit Seminars and workshops: such as Citing Sources, Writing Academic Summaries and Revising for Clarity
- Tutoring: individual appointments address specific areas such as speaking, listening, grammar, and academic fluency
- Placement interviews: evaluate spoken language so that we can suggest appropriate ICC work and give students useful feedback on the strengths and weaknesses of their communication skills.
- The ITA Test: a mandatory screening test for any non-native speaker of English (graduate or undergraduate) who plans to work as a teaching assistant.

Level of English fluency needed for non-Native English speakers - Please see Academic Regulations. (p. 54)

Fellowships

Fellowships and Scholarships Office (FSO)

Stephanie Wallach, Director
412-268-9987
<http://www.cmu.edu/fso>

Students at Carnegie Mellon are encouraged to apply for a wide variety of national and international fellowships available throughout their undergraduate years and post graduation. These opportunities — some more competitive than others — open up a diverse range of experiences, exposing students to new scholarly communities, to different kinds of research, and/or to service in the public sector. Participation in scholarships, fellowships, and other award opportunities is often an important springboard to future career directions. Many people have heard about the Rhodes Scholarships, the Fulbright Grant and The Harry S. Truman Scholarship, yet there are hundreds of opportunities that may be less well-known but are excellent funding sources.

The Fellowships and Scholarships Office plays an important role in helping students learn about scholarships that are a good match for their interests. The FSO staff also work closely with students on their applications to make sure that they are as competitive as possible.

Please visit the FSO website to learn about the many scholarships and fellowships open to Carnegie Mellon students. The website also contains useful links to other resources for additional information on external educational opportunities.

Honor Societies

Phi Beta Kappa Society

Carnegie Mellon shelters a chapter of the Phi Beta Kappa Society, sponsored by the three colleges (Dietrich College of Humanities and Social Sciences, Mellon College of Science, and the School of Computer Science) that comprise the University's "arts and sciences" equivalent. The chapter's name is "Upsilon of Pennsylvania," and was formally installed in April of 1995.

Founded in 1776 at the College of William and Mary in Williamsburg, Va., Phi Beta Kappa is the nation's oldest honorary society, with chapters at 276 of the foremost institutions of higher education across the country. Almost all members are elected by the chapters from among candidates for degrees in liberal arts and sciences, usually from the top 10% of the graduating class.

Many notable figures in American History have earned the coveted Phi Beta Kappa key including leaders of the American Revolution, delegates to the Constitutional Convention of 1788, and members of the Continental Congress and the U.S. Congress. Six United States presidents earned the honor as undergraduates and another 10 presidents were elected as alumni or honorary members.

Membership in Phi Beta Kappa key has become a universally recognized mark of academic achievement in the liberal arts and sciences. The key's venerable pointing finger proclaims for all to see the wearer's commitment to Phi Beta Kappa's ancient principles (represented in the three stars) — friendship, morality and learning.

The society's name is formed by the first letters of the phrase *Philosophia Biou Kybernetes*, Philosophy (wisdom) is the Guide of Life. In line with the conviction that the test of education lies not in what people know but in what they are, the objectives of humane learning encouraged by Phi Beta

Kappa include not merely knowledge but also intellectual honesty and tolerance, a broad range of intellectual interests and understanding.

The Carnegie Mellon chapter is active in sponsoring visiting speakers, on-campus roundtables that focus on current issues, community service activities, scholarship opportunities, student research involvement, and the like.

The Honor Society of Phi Kappa Phi

The Honor Society of Phi Kappa Phi has been an important presence on campus since 1933. Phi Kappa Phi, a national honor society that began in 1897 at the University of Maine, takes its name from the initial letters of its adopted motto, *Philosophia Kratoito Photon*, "Let the love of wisdom rule humanity." Phi Kappa Phi recognizes and honors persons of good character who have excelled in scholarship, in all fields of study. Members are nominated by their department or their school or college and then invited to join the society. To be eligible, seniors must be in the top ten (10) percent of their class and juniors in the upper seven and one-half (7.5) percent of their class at the time of invitation. Graduate students, alumni, faculty and staff are also eligible for nomination. The chapter inducts new members once a year, each spring, and provides information to its members on all sorts of opportunities, including study abroad, internships, and graduate fellowships, recognition and awards.

Undergraduate Research Office

Stephanie Wallach, Assistant Vice Provost for Education
www.cmu.edu/uro

What is the Undergraduate Research Office (URO) at Carnegie Mellon?

Conducting research as an undergraduate is a terrific way to get to know faculty members, explore an area of interest in depth, turn classroom theory into practical hands-on experience, get a feel for graduate school, and have some fun at the same time! The Undergraduate Research Office supports students conducting independent research and creative projects in every field at the university.

All undergraduates at Carnegie Mellon are eligible to participate in Undergraduate Research Office programs. The term "research" is defined broadly as "research, scholarly, or artistic activities that lead to the production of new knowledge; to increased problem solving capabilities, including design and analysis; to original critical or historical theory and interpretation; or to the production of art or artistic performance." Students from all fields and at all levels are encouraged to participate in the research process at least once, and hopefully many times, in their undergraduate careers. Our website, www.cmu.edu/uro contains detailed information on all of our programs and on the application processes.

Advising and Information Services

The Director and Assistant Director of the Undergraduate Research Office are available to discuss project ideas; suggest possible faculty mentors (required); read and comment on proposal drafts; and generally facilitate the research process. In addition, the URO typically runs two proposal writing workshops each semester to assist students in preparing their proposals. Support from the URO is a competitive process and requires the students to submit strong proposals

Small Undergraduate Research Grants (SURG)

Undergraduates in good academic standing are eligible to apply for a Small Undergraduate Research Grant (SURG). Awards are made twice each year based on submitted project proposals. A panel of faculty and administrators from each of the colleges serves on the selection committee and will generally consider requests up to \$500 for individual student projects or \$1000 for a group project. Grants may be used to purchase supplies and materials, rent time on laboratory equipment, pay subjects in an experiment, or even travel to another city to collect data. Budgets are required as part of the SURG proposals. Deadlines are October for the Spring grant period and in March for the Summer and Fall grant periods.

Summer Undergraduate Research Fellowship (SURF)

These fellowships are designed to allow students a 8-10 week summer of supported research at Carnegie Mellon in close collaboration with a faculty advisor. Students receive a fellowship of \$3,500 as a stipend to cover any of their expenses. The deadline for submission of proposals coincides with the regular SURG deadline in March.

Undergraduate Research Symposium: Meeting of the Minds

The undergraduate research symposium, known as "Meeting of the Minds," is an annual event that brings our campus together to celebrate the diverse, creative, and ground-breaking research that takes place among undergraduates. Students share their research findings through poster, oral, and artistic presentations. Many participate in award competitions sponsored by various corporations, individuals, and organizations. All students funded through the URO are required to attend, but it is also open to other students, including senior thesis presenters. Approximately 450 students participate each year. Meeting of the Minds takes place during early May at the University Center.

Presentation Awards

Students whose work has been accepted for presentation at an academic conference are eligible to apply for a Presentation Award. These awards, up to \$250, help defray costs of conference registration, transportation, and accommodation.

SRC-URO Program

Second-year students in semiconductor research and information technology fields are eligible to join faculty labs — depending on the needs of the faculty and qualifications of the student — to get an early taste of the excitement and benefits of undergraduate research. The Semiconductor Research Corporation funds this program. Students can earn up to \$2,000 per semester for the second semester of their sophomore year and for both semesters of their junior year; they are strongly encouraged to apply for SURF (\$3500) for the summer between their sophomore and junior years. SRC-URO is open to students in the following fields: Electrical and Computer Engineering; Chemical Engineering; Mechanical Engineering; Materials Science and Engineering; Computer Science; and Physics. This is a competitive opportunity and the number of participants is very limited. A special application process is required and is available on the URO website.

University Center

Carnegie Mellon's University Center is the first building of its kind on our campus. A central gathering place for all members of the university community, the University Center is the hub of Carnegie Mellon's social, athletic, recreational and religious life.

- Play basketball, volleyball and badminton
- Play racquetball or squash on one of five courts
- Swim in the eight-lane lap pool or dive into the diving well
- Work out on new weight machines, rowers, stair climbers, ellipticals, and treadmills
- Take a group exercise class including yoga, indoor cycling, Pilates, and Zumba. Check the website www.cmu.edu/athletics/facilities/university-center.html for further information.

The locker rooms include showers, whirlpools, and steam rooms.

Eating at the University Center

We've brought in several outside vendors to offer a variety of dining options:

- City Grill
- Creperie
- Downtown Deli
- El Gallo de Oro
- entropy+
- Evgefstos
- Pasta Villagio
- Quik Piks
- Schatz Dining Room
- Skibo Coffeehouse
- Spinning Salads
- Take Comfort Too
- The Pomegranate

Shopping at the University Center

Carnegie Mellon's retail stores are in the University Center. These include the Art Supply Store and the University Shoppe, a multi-level retail facility for art/engineering supplies and tools, books, textbooks, clothing, memorabilia and the computer store.

The building houses student organization offices, activity space and the Scotland Yard Game Room. The game room includes pool tables, foosball,

ping pong and shuffle board. The building also includes the Student Activities staff offices, webstations and printer, a multi-denominational chapel, a prayer room, the University Post Office, a recycling room, FedEx Office, ATMs, PNC bank branch, the Career and Professional Development Center and an alumni lounge, which is open to all members of the university community.

University Police

Thomas Ogden, Chief
300 South Craig Street, Room 199
Public entrance on Filmore Place
www.cmu.edu/police

The University Police Department consists of 24 sworn Police Officers, 37 Security Guards, and five Communications Dispatchers. University Police provides campus buildings and grounds patrol, emergency medical transport, personal escorts, and other services to increase the safety and well being of persons and property in the university community. Officers patrol the campus continuously 24 hours a day, seven days a week on foot, on bicycle and in vehicles and remain in constant radio contact so that they can respond rapidly in the event of an emergency. Direct line emergency telephones to the University Police communications center are located both inside and outside of buildings at 53 locations around the campus.

All crimes that occur on campus should be reported immediately to University Police to ensure that appropriate action is taken. Crime occurring on campus can be reported in person, or by calling the University Police emergency number, (412) 268-2323 or x8-2323, any time of the day or night. All other non-emergency inquiries should be made by calling the non-emergency number (412) 268-6232 or x86232.

University Police operates an Operation Campus Watch program to increase the awareness of the entire community at Carnegie Mellon. The concept of Operation Campus Watch includes two simple aims:

1. The sharing of crime information by University Police.
2. The involvement of the entire community in reporting suspicious activity or actual crime.

Additional information on Operation Campus Watch is available at the University Police Office located in Room 199, 300 South Craig Street or by calling the non-emergency number, (412) 268-6232.

All emergencies on campus, including fire and medical, should be reported immediately to University Police.

Students are responsible for their personal property as well as the property of groups to which they belong. Insurance against loss, theft, or damage to such property occurring in the residence hall or elsewhere on campus must be arranged for by students or their parents through an insurance agent.

University Police makes available on the world wide web a wide range of information about the university's security practices. Descriptions of crime prevention programs, alcohol and drug, sexual assault policies, and statistics about the number and type of crimes committed on campus during the preceding three years can be found at www.cmu.edu/police, click on "Annual Reports."

University Libraries

Keith Webster, Dean of University Libraries
Hunt Library
412-268-2447
kwebster@andrew.cmu.edu
www.library.cmu.edu

Facilities and Services

The University Libraries' collections support teaching and research at Carnegie Mellon University (CMU). The collections for various disciplines are housed in three libraries: the Engineering and Science Library (engineering, mathematics, physics, computer science and robotics), Hunt Library (humanities, fine arts, social sciences and business) and the Mellon Institute Library (chemistry and biology). An off-site storage facility holds low-circulating materials, which are available at your request via the library catalog. Interactive access to library resources is supported by the University Libraries' home page at <http://search.library.cmu.edu>.

Reference services help you to select resources and find the information you need. If you need materials that we do not own, interlibrary loan will help you to obtain them. Circulation services help you to borrow and renew materials, and use course reserves. Most course reserves are online, but some reserves are hard copies that faculty set aside in the library for their classes to use.

The University Libraries also house several unique collections (Architecture Archives, Fine and Rare Books, and the University Archives) in addition to a number of special collections that we have digitized and make available online. Digital collections include the H. John Heinz III Archives, the Allen Newell Collection, the Clifford Shull Collection, the Herbert Simon Collection, the Joseph Traub Collection, and the Posner Family Collection of fine and rare books. Student-created exhibits of fine and rare books from the Posner Collection are a regular feature in Posner Center, located between the College of Fine Arts and the Tepper School of Business.

Online Access

From the Libraries' home page, search.library.cmu.edu:

- CAMEO library catalog - Use CAMEO to find out where materials are located in libraries on campus. See whether items are checked out, on reserve, or available to be borrowed.
- My Library Account - Renew books, put books on hold, see a list of what you have checked out, see fines.
- Course Reserves - Find required materials that your professors have reserved for classes to use.
- Research Help - Learn about key resources in your subject area, including the CMU librarian who is a subject specialist for your school or college.
- Ask Andy - Interactive reference service staffed by CMU librarians (chat, IM, email, phone, or in-person)
- AND MUCH MORE: Library Collections - Articles & Databases - E-Journals A-Z - Library Catalogs - Library Services ...

"Library Catalogs" links to online catalogs for the University of Pittsburgh Library System, The Carnegie Library of Pittsburgh, and other local libraries. We are partners with Pitt and The Carnegie; you can get library cards and borrow directly from these nearby libraries.

Instruction and Help - Live!

Get acquainted with the collections and services that support your school and subject area. Take advantage of library orientations and other library instruction classes that will help you become adept at using information resources. Being able to select good sources, access information efficiently, and evaluate results are skills that you will use throughout your academic and professional career.

Reference desks at the Engineering and Science Library, Hunt Library, Mellon Institute Library and in Arts and Special Collections (at Hunt Library) are staffed weekdays, evenings, and on weekends. Besides helping you in the library, reference staff also can answer your questions about remote access (using library resources such as databases and e-journals from any internet location).

If you need specialized reference help, contact the librarian for your subject area. Librarians work directly with faculty and students in each school, department and institute at CMU to help shape library collections, teach library research skills, and assist efficient research.

Undergraduate Jobs

The University Libraries hire many undergraduate students each year, primarily through state and federal work/study programs. Working part-time in the library gives you the unique opportunity to learn and practice skills that will contribute to academic success while you earn some spending money. If this sounds interesting to you, check out [About Us > Employment> Student Assistants at \[search.library.cmu.edu\]\(http://search.library.cmu.edu\)](#) and apply.

Undergraduate Options

This page describes some of the many options of study students can choose during their undergraduate career at Carnegie Mellon.

Additional Majors/Dual Degrees

Students interested in pursuing more than one area of study are encouraged to consider an additional major or dual degree. Students who complete an additional major will earn a single degree in two areas. Generally, it is possible to fulfill the requirements of both majors in four years by taking the course requirements of the second major in the elective spaces allowed by the first major. Students in Carnegie Institute of Technology may elect to double major in Engineering and Public Policy or Biomedical and Health Engineering, which are offered only as an additional major. Human Computer Interaction is also offered only as an additional major.

Dual Degree programs allow students to earn two degrees. Students who are interested in an additional major or dual degree are encouraged to review the specific possibilities with the relevant academic advisor.

Five-Year Bachelor's/Master's Programs

Qualified undergraduates may apply to one of several programs to earn their bachelor's and master's degrees in five years. For further details about these programs, please refer to the appropriate college or departmental section(s).

Carnegie Institute of Technology

The five-year Integrated Master's/Bachelor's programs offered by the Departments of Electrical and Computer Engineering and Civil and Environmental Engineering offers students superior technical preparation for careers in industry. The Departments of Chemical Engineering and Mechanical Engineering also offer fifth year/Accelerated Masters programs. The Department of Materials Science and Engineering offers a cooperative Industrial Internship Option in which students alternate coursework with practical experience in industry. Admission is highly competitive and leads to a Master of Science degree.

Dietrich College of Humanities and Social Sciences

The Department of Philosophy offers a bachelor's/master's degree option: the Bachelor's/Master's degree in Logic and Computation. The M.A. in Teaching English to Speakers of Other Languages (TOESL) is a fifth year master's option for Modern Language students who are concentrating in English as a Second Language. Also, the department of English offers an accelerated program for undergraduates to obtain a Master of Arts in Professional Writing.

H. John Heinz III College

The Heinz College's Accelerated Masters program allows qualified undergraduate students to earn a prestigious Master of Science degree in Public Policy and Management. For students in the College of Fine Arts or the Bachelor of Humanities and Arts degree program who are interested in careers in arts management, the program leads to a Master of Arts Management degree.

Mellon College of Science

The Honors Programs in the Departments of Chemistry and Mathematics are demanding, accelerated programs that give highly qualified students the opportunity to earn their bachelor's and master's degrees in just four years. Admission is by invitation only.

Tepper School of Business 3-2 Program

Students who are interested in business management may wish to consider the Tepper School of Business 3-2 program. Qualified undergraduate students may earn their Master of Business Administration in addition to their bachelor's degree.

Health Professions Program

Director: Jason D'Antonio
Office: Doherty Hall 1319

The Health Professions Program (HPP) at Carnegie Mellon University is an advising and resource center for all university students and alumni who are interested in one or more aspects of the health professions. This program complements a student's curricular advising and is meant to help students explore their interests, prepare for graduate programs in the health professions, and facilitate their application process. Students can enroll in the program at any time during their academic career, but the importance of early planning is communicated to interested first-year students. Once enrolled, students meet regularly with the director to discuss course requirements, medical exposure opportunities, and other aspects of preparing to be a competitive candidate.

Students in the HPP span all colleges of the university and have many diverse career interests including medicine, dentistry, optometry, biomedical research, medical physics, rehabilitation engineering, medical informatics, and health policy. Although the majority pursue a primary major in the Mellon College of Science, other highly represented disciplines include engineering and the social sciences.

Regardless of a student's major, the basic course requirements outlined below must be completed prior to medical school matriculation, and most should be taken before the student takes the Medical College Admissions Test (MCAT) that is normally taken in spring of the junior year:

1. One year of general biology with lab.

This is typically fulfilled by the following Carnegie Mellon courses:

03-121	Modern Biology	9
03-230	Intro to Mammalian Physiology	9
or 42-202	Physiology	
03-124	Modern Biology Laboratory	9-12
or 03-343	Experimental Techniques in Molecular Biology	
or 03-206	Biomedical Engineering Laboratory	

2. One year of general chemistry with lab.

This is typically fulfilled by the following Carnegie Mellon courses:

09-105	Introduction to Modern Chemistry I	10
09-106	Modern Chemistry II	10
09-221	Laboratory I: Introduction to Chemical Analysis	12

3. One year of organic chemistry with lab.

This is typically fulfilled by the following Carnegie Mellon courses:

09-217	Organic Chemistry I	9
09-218	Organic Chemistry II	9
09-222	Laboratory II: Organic Synthesis and Analysis	12

4. One year of physics with lab.

This is typically fulfilled by the following Carnegie Mellon courses:

33-106/111	Physics I for Engineering Students (for science or engineering students)	12
33-112	Physics II for Science Students	12
33-100	Basic Experimental Physics	6

5. One year of English.

This is typically fulfilled by the following Carnegie Mellon courses:

76-101	Interpretation and Argument	9
76-xxx	English course of the student's choice, typically 200-level or higher	

In addition to these general course requirements, recommended coursework includes calculus, biochemistry, statistics, behavioral sciences, ethics, and languages. Interdisciplinary studies are also strongly encouraged, and many students design an undergraduate curriculum that incorporates

majors and/or minors in both the natural and social sciences. One interesting interdisciplinary minor offered is the Minor in Health Care Policy and Management, which broadens awareness of the health care field from social, economic, historical, and policy perspectives. See <http://coursecatalog.web.cmu.edu/melloncollegeofscience/melloncollegeofscienceminors/> for the details of this minor.

Undergraduate research is a hallmark of the educational experience at Carnegie Mellon in many disciplines. Whether in the psychology lab studying the impact of breast cancer diagnosis on family social dynamics, in the NMR lab imaging metabolic function in the heart or brain, or in the surgery suite testing robotic devices, our students have made significant achievements in research, well beyond the more traditional guided experiments.

Our university policy is to train students to be first class scientists, engineers, artists, writers, managers, or whatever their passion may be. We do not train students to be “pre-med,” but if they choose to use their talents in a health profession, we offer many services to help them obtain their life goals. Regular advising, application workshops, health issue seminars and symposium, community outreach activities, and preceptorship/ internship experiences are all part of our programming. The student pre-health organizations on campus, the Doctors of Carnegie (DOCs) and the Minority Association of Premedical Students (MAPS), together with the Health Professions Program, provide students with many opportunities to learn, explore, and prepare for their chosen area of professional interest.

The Health Professions Program has been successful in helping students to define, prepare for, and obtain their professional goals. Our students are regularly accepted at top-level medical and graduate programs, and our alumni continue to serve as outstanding ambassadors of Carnegie Mellon and the training and experience they received here.

Minors

In addition to a student's primary degree, he or she can choose a minor, a secondary focus to the student's area of study, which can enhance a student's breadth of study and overall experience while not requiring the same amount of coursework as a second major or degree. The following list shows available minors. Unless otherwise indicated, minors are generally open to all university undergraduate students.

Intercollege:

- Arts in Society (sponsored by the Center for Arts in Society)
- Health Care Policy and Management (sponsored by the College of Humanities and Social Sciences, the H. John Heinz III College, and Mellon College of Science)
- Music Technology
- Neural Computation

College of Engineering:

The following Engineering minors are open to all Carnegie Mellon students::

- Biomedical Engineering
- Engineering Studies
- Technology and Policy
- Robotics

Designated Minors (open only to Engineering students):

- Audio Engineering
- Automation and Controls
- Colloids, Polymers and Surfaces
- Data Storage Systems and Technology
- Electronic Materials
- Environmental Engineering and Sustainability
- Global Engineering
- Materials Science and Engineering
- Mechanical Behavior of Materials

College of Fine Arts:

- Accompanying (available only to Piano majors in the School of Music)
- Architectural Representation and Visualization (available also to B. Arch candidates)
- Architectural Technology
- Architecture
- Architecture History (available also to B. Arch candidates)
- Art

- Building Science (available only to B. Arch candidates)
- Communication Design
- Conducting (available only to students in the School of Music)
- Drama
- History of the Arts
- Industrial Design
- Music
- Music (Composition) (available only to students in the School of Music)
- Music Education (available only to students in the School of Music)
- Music Performance (available only to students in the School of Music)
- Musicology
- Music Technology
- Music Theory
- Photography
- Sound Design

Dietrich College of Humanities and Social Sciences:

- African and African American Studies
- Anthropology
- Chinese Studies
- Cognitive Neuroscience
- Creative Writing
- Economics
- English
- Environmental Studies
- Ethics
- Film and Media Studies
- French and Francophone Studies
- Gender Studies
- German Studies
- Global Systems and Management
- Health Care Policy and Management
- Hispanic Studies
- International Relations and Politics
- Japanese Studies
- Linguistics
- Logic and Computation
- Philosophy
- Policy and Management
- Politics and Public Policy
- Professional Writing
- Psychology
- Religious Studies
- Russian Studies
- Science, Technology and Society
- Social & Political History
- Sociology
- Statistics
- Technical Writing

Mellon College of Science:

- Biological Sciences
- Chemistry
- Computational Finance
- Discrete Mathematics and Logic
- Environmental Science
- Mathematical Sciences
- Neuroscience
- Physics
- Scientific Computing

School of Computer Science:

- Computational Biology
- Computer Science
- Human-Computer Interaction
- Language Technologies
- Machine Learning
- Robotics

- Software Engineering

Tepper School of Business:

- Business Administration
- Innovation and Entrepreneurship

IDeATe

The Integrative Design, Arts and Technology (IDeATe) network offers students the opportunity to become immersed in a collaborative community of faculty and peers who share expertise, experience, and passions at the intersection of arts and technology. Students will engage in active “learning by doing” in state-of-the-art maker spaces. The program addresses current and emerging real-world challenges that require disciplinary expertise coupled with multidisciplinary perspectives and collaborative integrative approaches.

The IDeATe undergraduate curriculum consists of eight interrelated concentration areas, all of which can also be taken as minors. The themes of these areas integrate knowledge in technology and arts:

- **Game Design:** Enhance your knowledge of key component areas of games such as dramatic narrative and character development, programming and engine development, game assessment and redesign. Create games for varied platforms from mobile devices to home entertainment systems and theme parks.
- **Animation & Special Effects:** Explore the technical and artistic aspects of 3D and 2D animation in an integrated manner and within different application contexts (from film animation and special effects to interactive displays).
- **Media Design:** Learn to design digitally mediated experiences across different platforms, from mobile apps to large-scale installations, and for varied applications (from media for daily living to mediated performances).
- **Learning Media:** Design effective new media systems for learning using new technologies, learning science principles and media arts knowledge. Produce engaging and effective experiences from games to tangible learning tool kits and remote systems.
- **Sound Design:** Create experimental music or explore new, technology-enabled applications and markets for sound design, music creation, and performance.
- **Entrepreneurship for Creative Industries:** Lead and innovate in creative industries through coursework that emphasizes the conceptualization of innovative products and the structuring of innovation processes.
- **Intelligent Environments:** Develop spaces and devices that support efficiency and high quality of experience, in contexts like daily activity, built environment, making process (from laying plaster to robot development), and arts performance.
- **Physical Computing:** Build interfaces and circuitry to embed in physical contexts, such as mobile environments and new creative practice instruments.

Individuals who make significant contributions, academically and professionally, in these areas are solidly prepared in a related discipline. Their preparation is combined with the ability to work in multidisciplinary teams that span technology and the arts. IDeATe serves as a multidisciplinary collaborative learning addition to the education (and learning outcomes) that students receive through their disciplinary major rather than a standalone learning experience.

Innovation and advancement in the eight IDeATe concentration themes, as in many complex areas of inquiry, is the result of collective inquiry and requires deep expertise in all contributing areas of knowledge (i.e. expert technologists and artists). Carnegie Mellon University is the only University in the United States with top ten ranked units in all key technological and arts domains involved in the eight IDeATe concentrations. With these resources, CMU is uniquely positioned to create faculty and student teams that contain all necessary, high-level expertise in tech-arts areas of inquiry.

Students who participate in IDeATe will be able to combine the unique experience of a “deep dive” in their chosen discipline while connecting to the diverse areas of knowledge and skill across the university. To help facilitate this experience, the educational objectives of the IDeATe concentrations and minors are:

- Students from any undergraduate major can integrate a tech-arts area of study into their curricular plan and professional exploration through the IDeATe concentrations/minors, which enhance and synthesize the tech-arts ecosystem at CMU.
- Students in IDeATe have the opportunity to:
 - Immerse themselves in a collaborative community of faculty and peers who share expertise, experience, and passions at the intersection of arts and technology
 - Engage in active “learning by doing” in state-of-the-art maker spaces
 - Address current and emerging real-world challenges that require disciplinary expertise coupled with multidisciplinary perspectives and integrative approaches.

A student can choose to enroll in an IDeATe concentration (or minor) either in their sophomore or in their junior year. To complete a concentration the student will take 4 courses (five for a minor): one cross-training course, two courses in their chosen concentration theme (three for a minor), one course from a different concentration theme. To complete a minor, at least three of the courses taken cannot be double counted for the major degree (all courses of a concentration can count towards the major degree).

Across the eight concentration themes there are over 50 multi-disciplinary technology-arts courses that a student can choose from to customize their paths. Students are assisted in their choice of theme area and in the structuring of their path by a dedicated IDeATe advisor who works in tandem with the advisor in their home unit.

The *cross-training courses (portal courses)* introduce students to the concepts and practices of knowledge areas beyond their discipline that contribute to the subject of each minor/concentration. After completing the portal courses, students should be able to (1) interpret cross-disciplinary communication from their collaborators (and use that interpretation productively in the collaborative work), (2) translate their own disciplinary expertise to describe ideas and outcomes in a way their cross-disciplinary collaborators can understand, and (3) develop interdisciplinary tech-arts prototypes (that include perspectives from multiple disciplines and enable further interdisciplinary communication and collaboration).

The remaining courses of IDeATe are *Collaborative studios*. Each studio is focused on a key aspect of the minor/concentration that it’s categorized under. By taking three studios in the minor/concentration the student can become familiar with many of the technical and creative issues in the area of the minor and the collaborative processes they entail. The student can also explore the interrelations of these studios. These courses are branded as collaborative studios because a) they promote hands on learning through making, critique and iterative design, b) they promote learning from both the instructor and the interdisciplinary peer cohort. At the conclusion of each studio a student should be in a position to a) collaboratively plan and implement an established outcome in the area of the studio within a limited amount of time and b) apply skills from both technology and arts disciplines to prototype ideas and leverage the diversity of perspectives to produce innovation in the field.

A completion of a concentration should provide multidisciplinary training in the area of the concentration and furthermore *enhance collaborative learning experience and skills of students*: diversify the cohorts of the student, enhance collaboration skills, promote cognitive versatility, facilitate skill transfer across technology and the arts, and produce graduates that can innovate in 21st century creative industries.

Students completing an undergraduate degree with an IDeATe concentration have the opportunity to apply for enrollment in the cross-University Emerging Media Masters degree and complete the degree in one year (4+1 Media Master’s option).

For more information, please visit the IDeATe website (<http://www.cmu.edu/ideate>).

Pre-Law Advising Program

Director: Joseph Devine, Associate Dean for Undergraduate Studies, Dietrich College

Office: Dietrich College Dean's Office, Baker Hall 154
www.cmu.edu/pre-law

"Law School" is an objective that students frequently mention when asked about post-baccalaureate plans. It seems in its brevity to be a simple enough answer, but in reality it masks a host of complex and momentous personal decisions and strategic tasks.

First and foremost, seeking entry into law school implies an informed decision about the rigors of law school and the realities of professional life as an attorney, as well as a strong and mature commitment to achieving these objectives at significant cost and investment (financial, personal, and intellectual). Second, it implies an understanding of the prolonged sequence of steps involved in the process of selecting law schools to which to apply, actually applying, ultimately selecting a school to attend, financing a law school education, and succeeding in law school. Finally, it implies an understanding of this as one of many options that should be carefully considered before a choice is made that will so significantly influence the course of one's personal and professional life.

To address these needs, the university offers a pre-law advising program for students and alumni/ae who are contemplating or actively seeking to enter law school. The program consists of a range of support services, coordinated centrally, designed to assist these groups in engaging the complex questions associated with decisions about law school, and in successfully negotiating the sequence of tasks associated with selecting, applying and gaining admission to the best law schools possible.

The emphases of this program are:

- early identification of pre-law candidates;
- stimulation at early stages and throughout this process to consider the essential questions of personal suitability for law school and professional life as an attorney;
- engagement with meaningful substantive issues rooted in the law that illustrate the intellectual complexities of our legal system and the corresponding intellectual acumen needed to enter and thrive in this profession;
- timely direction in designing and executing a well-planned law school research, selection and application strategy;
- gathering and using accurate data on university alumni entering law school and the legal profession.

The program proper consists of several components, organized and made available as an ongoing service to all students and graduates of the university. These components include periodic workshops and seminars, a pre-law web site, a pre-law newsletter, and linkage with law school admissions offices, the Law School Admissions Council, and associations (both regional and national) of pre-law advisors. The program also works closely with the student Pre-law Society.

Two early admission options are available to Carnegie Mellon undergraduates interested in either of Pittsburgh's two law schools: the Duquesne University School of Law, and the University of Pittsburgh School of Law. Requirements and procedures vary for each option. Interested students should meet with the university pre-law advisor before the end of their junior year.

Department of Athletics & Physical Education

Please see Department of Athletics & Physical Education (p. 71).

Reserve Officers' Training Corps (ROTC)

Please see Reserve Officers' Training Corps (ROTC) (p. 73).

Study Abroad

Carnegie Mellon students from every major may be able to study in any part of the world for a semester, year or summer. Short-term programs during spring and winter break are also possible. A well planned study abroad program, in coordination with one's academic advisor, will allow a student to receive credit for study abroad and graduate on time. Most students study

abroad during their junior year; however, a growing number of students are studying abroad during their sophomore and senior years.

The study abroad advising staff offers general information sessions as well as individual advising appointments to assist students in all stages of the study abroad process. The Office of International Education (OIE) has a large in-house library as well as useful web links to help students find the most appropriate study abroad program. In addition, OIE offers orientations to help with personal, academic and acculturation issues, before and after a study abroad experience.

Carnegie Mellon offers students a variety of payment options for study abroad to allow students to study abroad regardless of financial need. There are three categories of programs: Exchange Programs, Sponsored Programs, and External Programs. A description of each program follows. More detailed information can be found at www.cmu.edu/studyabroad.

Exchange Programs

Students who participate in exchange programs pay Carnegie Mellon tuition and receive their regular financial aid package. Students are responsible for room, board, travel and miscellaneous expenses.

University Exchanges

Carnegie Mellon University has university-wide exchange programs with institutions located in Australia, Chile, Hong Kong, Israel, Japan, Mexico, Qatar, Singapore, and Switzerland.

Departmental Exchanges

Architecture, Art, Chemical Engineering, Design, Drama, Electrical and Computer Engineering, English, Heinz College, Information Systems, Materials Science and Engineering, Modern Languages, Computer Science and Business offer departmental exchange programs. Students should contact their department or the study abroad website for additional information.

Sponsored Programs

The university has designated a few study abroad programs administered by other organizations or universities as sponsored programs. To participate in these programs students pay a university fee equivalent to current tuition, room and board, and retain their eligibility for all financial aid. Carnegie Mellon in turn pays the program costs to the study abroad sponsor. Where applicable, funds are distributed to the student for room, board, travel, and personal expenses.

Currently Carnegie Mellon has 38 sponsored programs available around the world. A full list can be found at www.cmu.edu/studyabroad or in consultation with a study abroad advisor.

External Programs

Students may also participate in a program sponsored by another university or study abroad organization if the student's home department approves the program and its course offerings. Students will pay the other organization or institution directly. Students who receive institutional aid from Carnegie Mellon will not be eligible for this aid while they are abroad. However, students with state and federal aid will still qualify. Students can learn more about external program options during study abroad advising appointments and by exploring the study abroad website and library.

University Student-Defined Major

Carnegie Mellon offers the opportunity for undergraduate students to pursue a University Student-Defined Major. (There are also opportunities to pursue a Student-Defined Major in some of the colleges [see relevant college section of the catalog]). For information and advice, interested students are encouraged to speak to the Associate Dean (sic) of their current home college or the college most relevant to the proposed course of study.

The requirements for successful completion of a University Student-Defined Major include a student proposal approved by an advisor, relevant college(s), and the Provost, and successful completion of the approved course of study. In brief:

- A student interested in pursuing a university student-defined major must develop a proposal which outlines an intellectually coherent area of study (with degree title) and a plan of study (courses to be taken, pedagogical rationale, proposed schedule). The proposal should include an explanation of why it is not appropriate or possible to pursue such a program through the curriculum of any one of the colleges. It should outline a program of study for both general education (for example, the

core requirements of one of the most relevant colleges or equivalent general education plan) and major requirements. The proposal should designate one of the participating colleges as defacto "home college" for tracking and verification purposes.

- The student's proposal must be approved by a faculty advisor within a college who takes pedagogical responsibility for the program, by the de facto "home college" and by any other colleges involved in granting the degree. The signed proposal will be submitted to the Provost's office for a final review and approval.
- Once approved by the faculty advisor, colleges, and the Provost's office, the student's major will be administered by the advisor and his/her progress tracked by the Dean's office of the "home college." The "home college" will be responsible for monitoring the student's progress and reminding any collateral colleges of the approval of the student-defined major so that these colleges may insure the student's ability to enroll in the necessary courses. Upon successful completion of the course of study, the "home college" will be responsible for contacting all the relevant colleges and verifying the completion of the degree. Unless there are sufficient numbers of university student-defined majors in any graduation year, upon consultation with the "home college," students may chose to receive the diploma in the most relevant department's ceremony.

Department of Athletics and Physical Education

Susan Bassett, Director of Athletics
Office: 204 Gymnasium
<http://www.cmu.edu/athletics/physed/>

Intercollegiate Athletics

Carnegie Mellon emphasizes excellence in its intercollegiate athletic programs as well as in its classrooms. The University strongly believes that academic and athletic excellence can successfully coexist. It also believes that intercollegiate athletics are important in student life and can become a key part of the educational experience. Professional and social endeavors after graduation also benefit from university experiences as a student-athlete.

Carnegie Mellon sports teams have competed intercollegiately since the early 1900s. In the past 15 years, the program has experienced extensive success. The Tartans have won 81 conference championships and competed in over 108 national championships since 1976. This success has been achieved while meeting all of the academic requirements of demanding programs and without athletic scholarships.

In 1986, Carnegie Mellon became a charter member of the University Athletic Association (UAA), a nine-team league of similar institutions with regard to academic and athletic programs. The UAA, a national association which geographically reaches as far north as Massachusetts, as far south as Atlanta and as far west as St. Louis and Chicago, sponsors intercollegiate competition in 24 sports including 12 for men and 12 for women. UAA members include Brandeis University, Case Western Reserve University, Carnegie Mellon University, Emory University, New York University, the University of Chicago, the University of Rochester and Washington University in St. Louis.

Carnegie Mellon, like the other seven UAA members, is a member of the National Collegiate Athletic Association (NCAA). Its intercollegiate teams compete on the Division III level, which prohibits athletic scholarships and operates under the true meaning of amateurism. Student-athletes who play at the varsity level are students first and athletes second. All students, both athletes and non-athletes, are treated equally with regard to admission and financial aid policies. Carnegie Mellon fully supports a policy of equity in resources and opportunities for women and men.

The university fields competitive teams in 17 sports. The Tartans compete in football, men's and women's soccer, men's and women's cross-country, men's and women's tennis, women's volleyball, men's and women's basketball, men's and women's swimming, men's and women's indoor and outdoor track and field, and golf.

Carnegie Mellon's intercollegiate program has consistently produced winners. The Tartans' football team has won 15 conference championships, has a string of 33 consecutive winning seasons, and has appeared in the NCAA Division III Championship playoffs six times. In 1979, Carnegie Mellon was awarded the Lambert Trophy as the best small college team in the northeast. The men's cross country won the conference championship in 2005 going on and placing 8th at nationals that same season. The team also has had a 12th and 9th place finish at nationals. The women's cross country won the 1998 conference and went on to place 4th nationally.

A freshman computer science major on the men's tennis team won the NCAA National singles title in 2000 and Carnegie Mellon's top doubles team also was selected to play in the nationals. The men's program garnered their highest team ranking ever in 2006 at 11th nationally. The women's tennis team has recently produced national ranked players in the NCAA competition and in 2005 had a sophomore claim the ITA National Small College Championship while earning the James O' Hara Sargent Sportsmanship Award. Both men's and women's swimming and track and field teams annually qualify a number of athletes for the national championships. Swimming recently has produced a national champion and the men's track and field team has won back-to-back conference championships.

To provide excellence in the athletic program, the department employs full-time coaches in all varsity sports. Intercollegiate competition begins with the first football and soccer games in early September and ends with the UAA track and field, golf and tennis championships in late April. Students with athletic skills in any of the above mentioned sports are welcome to become members of the team. Participation is open to all students. Inquiries may be directed to the appropriate coach at the:

Department of Athletics, Skibo Gymnasium
Carnegie Mellon University
Pittsburgh, PA 15213
(412) 268-8551

Recreation

In addition to providing for its more formal programs and teams, Carnegie Mellon's athletic facilities are available for use by individual students on an extensive seven-day per week schedule.

The Skibo Gymnasium, has facilities for basketball, volleyball, badminton, weight lifting, and cardio equipment. Located within the University Center are facilities for squash, basketball, racquetball, volleyball, badminton, a diving pool and a large swimming pool for lap swim, cardio machines like treadmills, Espresso Bike EFX, steppers, Cybex machines, dumbbells, a sauna and a whirlpool. Gesling Stadium provides soccer, football and track facilities. Tennis courts, located between the University Center and Margaret Morrison, are lighted for night play. During the school year they are open for use by students, faculty and staff.

These facilities are available to any student, faculty or staff person with a valid Carnegie Mellon ID. For hours, please contact the Athletic Office at (412) 268-1236, or visit our website.

Physical Education

The Department of Physical Education provides an elective program with an emphasis on personal fitness and lifetime recreation, thus preparing students for physical activity after the college years. Most classes are offered on a mini-course system with each class running seven weeks in length.

This program of more than 30 courses is designed for all students, from the beginner to those students who have already developed some skill. Courses include personal fitness, racquetball, tennis, golf, weight training, karate, aerobic fitness, and yoga. Instruction is also provided in several team sports. Carnegie Mellon also provides courses for American Red Cross certification in the four levels of swimming (beginners, intermediate, swimmers, and life guarding), and First Aid and Cardiopulmonary Resuscitation (CPR).

Intramural Sports

For those who seek another level of competition or just like to participate and have fun, the Intramural Program provides recreation and relaxation for all students, faculty and staff, regardless of the degree of their natural athletic skills. The university prides itself on an intramural program which annually involves 6,000 students. Men and women, both graduate and undergraduate, compete in more than 20 different activities. Major sports include flag football, soccer, volleyball, floor hockey, basketball, and softball. A few of our popular tournaments are ultimate frisbee, dodgeball, tennis, and badminton.

Through participation in this program, students are able to keep physically fit, put to good use various learned skills, and develop leadership, team play and sportsmanship. Intramural activities, like all sports endeavors, contribute to physical development, good health, and a sound state of mind, while providing keen competition and team spirit. In addition, intramurals possess an inherent flexibility that allows for a limited commitment of time in light of academic priorities. The intramural program permits students from all departments to meet and socialize on an informal basis.

Fitness and Wellness

The university is well aware that fitness is a vital contributor to an individual's well-being and productivity. For this reason the department is committed to providing the entire campus community with the opportunity and resources to keep fit for the new century.

The Fitness and Wellness program provides educational services, programs, workshops and seminars. Programs include cardio-respiratory fitness, muscular strength, blood pressure and stress reduction. Workshops include the topics of nutrition, weight control, stress management and lower back care and prevention. The Group X program provides over 30 exercise classes per week ranging from yoga and pilates to zumba and spinning.

Faculty

SHANNON AGNEW, Assistant Women's Soccer Coach - Bachelor of Arts, University of Tampa; Carnegie Mellon, 2012-.

SUSAN BASSETT, Director of Athletics - M.S., Indiana University, Carnegie Mellon, 2005-.

GARY ALDRICH, Associate Head Track & Field Coach/Instructor - M.S., Slippery Rock University, Carnegie Mellon, 2006-.

MICHAEL BELMONTE, Assistant Men/Women Tennis - History, Duquesne; Carnegie Mellon, 2010-.

TERRY BODNAR, Assistant Football Coach/Instructor - M.S., Indiana University of PA, Carnegie Mellon, 1984-.

JOSH CENTOR, Assistant Director of Athletics - B.A., Brandeis University, Carnegie Mellon, 2008-.

ALAN DEGENNARO, Strength and Conditioning Coach Carnegie Mellon, 2011-.

DARIO DONATELLI, Head Men's Cross-Country & Track Coach - M.S., Indiana University of PA, Carnegie Mellon, 1984-.

RICHARD ERDELYI, Assistant Football Coach and Head Golf Coach/Instructor - B.A., University of Pittsburgh, Carnegie Mellon, 1987-.

ANDREW GARCIA, Assistant Men's Basketball Coach - History, Tulane University; Carnegie Mellon, 2011-.

SARA GAUNTNER, Assistant Director of Athletics for Instructional Programs & Recreation & Aquatics Director/Instructor - M.S., Duquesne University, Carnegie Mellon, 2005-.

ANDREW GIRARD, Head Men's and Women's Tennis Coach/Instructor - B.S., Michigan Tech University, Carnegie Mellon, 2003-.

SARAH HAYES, Assistant Women's Basketball Coach Carnegie Mellon, 2011-.

JACQUIE HULLAH, Head Women's Basketball Coach Carnegie Mellon, 2011-.

KIM KELLY, Head Women's Volleyball Coach/Instructor - MBA, Mt. St. Mary's University, Carnegie Mellon, 2005-.

MATTHEW KINNEY, Head Swimming and Diving Coach/Instructor - M.S., Western Illinois, Carnegie Mellon, 2007-.

RICHARD LACKNER, Head Football Coach/Instructor - B.A., Carnegie Mellon, Carnegie Mellon, 1979-.

ARRON LUJAN, Head Men's Soccer Coach - M.S., Virginia Commonwealth University, Carnegie Mellon, 2008-.

DONNA MOROSKY, Director of Fitness and Health/Instructor - Post-Graduate Education, University of Pittsburgh; Carnegie Mellon, 1975-.

MICHAEL PIRANIAN, Assistant Men's Soccer Coach/Instructor - B.S., Virginia Polytechnic Institute & State University, Carnegie Mellon, 2008-.

JEFF SIMMONS, Assistant Football Coach/Instructor - B.A., Geneva College; Carnegie Mellon, 2010-.

PATTYE STRAGAR, Operations Manager for Fitness and Aquatics/Instructor - B.S., Northwestern University; Carnegie Mellon, 2003-.

YON STRUBLE, Head Men's Soccer Coach/Instructor - M.S., Georgia State; Carnegie Mellon, 2010-.

TONY WINGEN, Head Men's Basketball Coach/Associate Athletic Director/Instructor - M.Ed., Springfield College; Carnegie Mellon, 1990-.

Reserve Officers' Training Corps (ROTC)

Department of Aerospace Studies (Air Force ROTC)

Steven Hernandez, Lt. Colonel, U.S. Air Force
Office: 2917 Cathedral of Learning, University of Pittsburgh

In the four-year commissioning program, a student takes the general military course (GMC) during the freshman and sophomore years, attends a four-week summer training program, and then takes the professional officer course (POC) in the junior and senior years. In the two-year commissioning program, a student attends a five-week summer training program following his or her junior year and then enters the POC. A student is under no contractual obligation to the Air Force until entering the POC or accepting an Air Force scholarship. In addition to the academic portion of the curriculum, each student attends two hours of leadership lab each week. This lab utilizes a student organization designed for the practice of leadership and management techniques. Two to three and a half year scholarships are available on a competitive basis to qualified students. Many AFROTC scholarships cover a portion of tuition costs, incidentals and lab fees, \$600 for books, plus pay each recipient \$250-\$400 per month.

General Military Course (GMC)

The subject matter for the freshman and sophomore years is developed from an historical perspective and focuses on the scope, structure, and history of military power with emphasis on the development of air power. The freshman courses explore the role of U.S. military forces, and the Air Force in particular, through a study of the total force structure, strategic offensive and defensive forces, general-purpose forces, and support forces.

The sophomore courses include an introduction to the history of air power with emphasis on the development of concepts and doctrine governing the employment of U.S. air power.

Professional Officer Course (POC)

The Professional Officer Course, taken during the cadet's junior and senior years, concentrates on three main themes: the concepts and practices of management, leadership, and national defense policy. During the first term of the junior year, the course concentrates on a study of the management functions: planning, organizing, coordinating, directing and controlling.

Basic and advanced management techniques, as found in the military and industrial environment, are explored. The second term deals with the application of general concepts of leadership to Air Force situations. As a basic study of human behavior, human relationships, and professional ethics, the course emphasizes the similarities between the problems encountered in the military and civilian environment. The first term of the senior course concentrates on selected elements of the U.S. government and national security process engaged in producing national strategy as well as various elements of U.S. military forces, doctrine, and employment capabilities. During the second term, the course concentrates on the strategic options available to the U.S. and on the manner in which policy choices are made. The course also includes a review of the military justice system.

For details about the two programs as well as information on the courses, scholarships and flying programs, interested students are encouraged to contact the Air Force ROTC detachment, or write to the Professor of Aerospace Studies, Air Force ROTC, 2917 Cathedral of Learning, University of Pittsburgh, Pittsburgh, PA 15260.

Department of Military Science (Army ROTC)

Andrew Loeb, Lieutenant Colonel, U.S. Army
Office: Bellefield Hall, Room 409, University of Pittsburgh

The Army Reserve Officers' Training Corps (ROTC) program support-ing Carnegie Mellon University is located at the University of Pitts-burgh. It exists to train the future officer leadership of the United States Army and offers opportunities and challenges that can put college students on the fast track to success in life. ROTC provides a combination of academics and important hands-on training, in addition to physical and mental challenges that will help students succeed in college and beyond. Through the training in ROTC, students will develop the confidence, self-esteem, motivation and leadership skills they will need regardless of their career plans.

The Four-Year Program

The traditional Four-Year program is divided into two parts. The Basic Course is taken in the freshman and sophomore years. There is no commitment for non-scholarship students at this level. Upon successful

completion of the Basic Course, students are eligible for the Advanced Course, taken in the junior and senior years. At the beginning of the Advanced Course, students will decide whether or not they wish to become officers in the Army and enter into a formal contract. During the summer between the junior and senior years, students are required to attend the the Leader Development and Assessment Course (LDAC). Upon successful completion of a University degree and the Army ROTC program, students are commissioned into the United States Army as a Second Lieutenant.

The Two-Year Program

If the first two years of ROTC are not taken, students can attend the Leader's Training Course (LTC) during the summer between the sophomore and junior year. This camp will qualify students to begin the Advanced Course in their junior year or in the first year of a two-year graduate program. Or, if students have served in the active duty military, attended a military academy for one year, participated in JROTC for three years or belong to a Army National Guard or Army Reserve unit, they already qualify for entrance into the Advanced Course.

The Alternative Entry Program

The Alternative Entry Program is designed for academic junior students with no prior qualifying military training but are otherwise qualified. This option allows students to contract into the Advanced Course without receiving placement credit for the basic course. Students accepted into this program must complete the Leader's Training Course and the Leader Development and Assessment Course during the summer months.

Curriculum

Freshman Year		Units
30-101	Introduction to Military Leadership - Fall	5
30-102	Foundations of Leadership- Spring	5
Sophomore Year		Units
30-201	Leadership Dynamics and Application- Fall	5
30-202	Applications in Leadership and Combat Power- Spring	5
Junior Year		Units
30-301	Basic Leader Planning and Combat Operations- Fall	5
30-302	Advanced Leader Planning and Combat Operations- Spring	5
Leadership Development & Assessment Course (six-week required summer camp)		
Senior Year		Units
30-401	Progressive Leadership Theory and Applications- Fall	5
30-402	Transition to the Profession of Arms- Spring	5

Army ROTC Scholarships

Army ROTC offers four, three and two year full scholarships with additional annual allowances of \$900 for books and a monthly stipend. High school, undergraduate and incoming two-year graduate students are eligible to apply. For application and information call ROTC at the University of Pittsburgh at (412) 624-6254/6197.

The Simultaneous Membership Program (SMP)

This program allows students to become members of the Army National Guard or the Army Reserves while enrolled in Army ROTC. Students in the Advanced Course who are SMP are paid for their Guard/Reserve training. The benefit of this program is that students in the Advanced Course are able to act as Army officers in their National Guard or Reserve unit, receiving valuable leadership experience.

Summer Programs

Leadership Development & Assessment Course

This 35-day camp is a requirement for all contracted students. Students attend the summer between their junior and senior year. Students are placed in various leadership positions throughout Camp and their skills and abilities will be tested and evaluated in preparation of a commission in the United States Army. All expenses are paid by the Army. Students are paid while attending.

Leader's Training Course

This 35-day camp is taken as a prerequisite for entry into the Advanced Course if the Basic Course cannot be fulfilled. It is taken the summer before the junior year. All expenses are paid by the Army. Students are paid while attending.

Army Adventure Training

ROTC students may participate in Airborne School, Air Assault School, Northern Warfare School and Mountain Warfare School the summer before the sophomore and junior year. These courses range from two to four weeks and students must arrive in top physical condition. All expenses are paid by the Army.

Extracurricular Activities**Rangers**

Army ROTC students are eligible to participate in the Cadet Ranger Club.

The Club conducts physically and mentally challenging extracurricular training to promote fitness, teamwork, self-confidence and fellowship. Training includes physical fitness, rappelling, rope bridging, tactics, hiking, climbing, weapons training and orienteering.

Scabbard & Blade

National Honor Society consisting of cadets/midshipmen from Army, Air Force and Naval ROTC.

Rho Tau Chi

Military fraternity established for the members of the various branches of ROTC. Purpose is to draw together cadets to increase communication and feelings of goodwill between the Cadet Corps and the community. Cadets participate in a variety of community service projects.

Color Guard

Dedicated group of Army ROTC cadets who train and perform to present the American flag and Army colors at football and basketball games and various community events.

Department of Naval Science (Naval ROTC)

Thomas M. Calabrese, Captain, U.S. Navy
Office: 4615 Forbes Avenue

The Department of Naval Science was established 16 December 1987. Its mission is to prepare young men and women mentally, morally, and physically, and to instill in them the highest qualities of duty, honor, and loyalty, in preparation for leadership positions in the naval service.

Carnegie Mellon's Naval Reserve Officers Training Corps (NROTC) is designed for young men and women who are seeking a challenging academic experience and who desire to serve their country as officers in the Navy or Marine Corps after graduation.

NROTC midshipmen lead the same campus life as other Carnegie Mellon students. They make their own arrangements for room and board, choose a preferred area of study and participate in extracurricular activities. Midshipmen wear civilian clothes to classes but wear uniforms one day of the week. NROTC students are active in all facets of university life; many are in positions of leadership in student government, on varsity and intramural sports teams, in campus clubs, and other student organizations. The NROTC program seeks students who are bright, ambitious, enthusiastic leaders whose lives are enriched by their education at Carnegie Mellon and by their involvement in NROTC.

Four-Year Scholarship Program

The four-year scholarship program provides full tuition and university fees, \$750 for textbooks per year, uniforms, and a \$250 per month tax-free subsistence allowance to students during their freshman year. This stipend then increases to \$300 during their sophomore year, \$350 for their junior year and \$400 for their senior year. Midshipmen must complete the university-approved curriculum of their choice, including courses in calculus and calculus-based physics (Navy Option Only), and specified courses in naval science subjects. Paid summer training periods are also provided. Scholarships are awarded on the basis of a nationwide competition before the start of the freshman year. Midshipmen commissioned through the scholarship programs become officers in the Navy or Marine Corps and incur a four-year active duty obligation in a selected area of the naval service.

Tweedale Scholarship Program

This scholarship program provides the same benefits as the four-year program, but is targeted toward currently enrolled students who have completed at least one, but not more than four semesters, and who are pursuing technical majors. This program allows a highly-qualified engineering, physics, chemistry, or mathematics student who has never applied for a NROTC scholarship in the past to be considered for this scholarship. Solid academic standing within his or her field of study is required, including a ranking within the top half of students pursuing his or her chosen course of study. If nominated by the Professor of Naval Science for this scholarship, the student will generally receive a scholarship decision within 5 working days from submission. Midshipmen commissioned through

the scholarship programs become officers and incur a four-year active duty obligation in a selected area of the naval service.

College (Non-Scholarship) Programs in NROTC

Qualified students may participate in NROTC as college program (non-scholarship) midshipmen and earn commissions in the Navy or Marine Corps Reserve upon graduation. The active duty obligation for this program is three years. Students receive all naval science textbooks and uniforms. Additionally, if awarded advanced standing during their junior and senior years, they receive a tax-free subsistence monthly allowance of \$350 and \$400 respectively. A paid summer training period is provided between the junior and senior year. College program students may compete for three- and two-year scholarships described in the following paragraph.

College Program Three- and Two-Year Scholarships

Three-year scholarships are available on a competitive basis to those qualifying college program (non-scholarship) NROTC students who have demonstrated leadership and academic excellence during their freshman or sophomore year and are nominated for the scholarship by the Professor of Naval Science. Scholarship benefits are identical to those provided by the four-year scholarship program. Active duty obligation is four years upon commissioning in a selected area of the naval service.

Two-Year National Scholarship Program

Sophomores who have not participated in the NROTC program may apply for a nationally competitive two-year scholarship. The two-year scholarship program provides the same benefits as the four-year program for a period of 20 months. Students must apply for this program no later than February of their sophomore year. Students selected for this program attend the Naval Science Institute during the summer before their junior year to complete required naval science course material. A paid summer training period is provided between the junior and senior years. Commissionees incur a four-year active duty obligation upon graduation in a selected area of the naval service.

Curriculum

The sequence of naval science courses is the same for all officer candidates for the first three semesters. Midshipmen accepted into the Marine Corps option program will have curriculum variations starting with their third year.

Additionally, some candidates may be required to complete courses in American military affairs, national security policy, English, mathematics, and/or the physical sciences. Descriptions of the course requirements for each candidate classification (scholarship/college program) may be obtained from the Department of Naval Science office.

All scholarship and college program students are required to attend a weekly 1.5 hour Naval Laboratory (32-100) where professional orientation, military drill, physical fitness, and leadership are emphasized. Guest speakers from the Fleet are frequent participants in these laboratories. Naval Science courses are open to all students. Since these are required courses for NROTC students, they will be given priority in enrollment. Remaining spaces will be filled through the normal university registration process.

(Naval Science Courses)Naval Professional Academic Courses

Freshman Year		Units
32-100	Naval Laboratory	3
32-101	Introduction to Naval Science	6
32-102	Seapower and Maritime Affairs	6
Sophomore Year		Units
32-200	Naval Laboratory	3
32-201	Leadership & Management	9
32-212	Navigation *	9
Junior Year		Units
32-300	Naval Laboratory	3
32-310	Evolution Of Warfare **	9
32-311	Naval Ship Systems I-Engineering *	9
32-312	Naval Ship Systems II-Weapons *	9
Senior Year		Units
32-400	Naval Laboratory	3
32-402	Leadership and Ethics	9
32-410	Amphibious Warfare **	9
32-411	Naval Operations and Seamanship *	9

Footnotes:

* Required of students in the Navy Option

** Required of students in the Marine Option

All other courses are required of all students in the program.

Naval ROTC Faculty

JEFF CORAN, Captain, USN - M.S., Rensselaer Polytechnic Institute; Carnegie Mellon, 2014-

Intercollege Programs

Carnegie Mellon University offers several degree programs and courses of study which are coordinated by multiple colleges, reflecting the interdisciplinary nature of the university. These are detailed below.

BXA Intercollege Degree Programs

The BXA Intercollege Degree Programs enable students the freedom to individualize their educational experience by promoting integration, balance and innovation. There are three degree programs from which to choose:

- Bachelor of Humanities and Arts
- Bachelor of Science and Arts
- Bachelor of Computer Science and Arts

For detailed information on the BXA Intercollege Degree Programs, go to BXA Intercollege Degree Programs (p. 88).

Bachelor of Science in Computational Biology

Computational Biology is concerned with solving biological and biomedical problems using mathematical and computational methods. It is recognized as an essential element in modern biological and biomedical research. There have been fundamental changes in biology and medicine over the past decade due to spectacular advances in biomedical imaging, genomics, and proteomics. The nature of these changes demands the application of novel theories and advanced computational tools to decipher the implications of these data, and to devise methods of controlling or modifying biological function. Consequently, Computational Biologists must be well trained and grounded in biology, mathematics, and computer science.

The School of Computer Science and Mellon College of Science have joined forces to establish an exciting interdisciplinary program leading to a B.S. in Computational Biology. The goal of this degree program is to provide an intensive interdisciplinary education to enable outstanding students to become leaders in identifying and solving tomorrow's biological problems using computational methods. The program's curriculum is truly interdisciplinary and is designed for students interested in the intersection of Biology and Computer Science.

Applications to the program are invited from current sophomores. Applicants must have completed, or be currently enrolled in 03-231/232 and 15-210 or 15-251. Applicants must submit an essay describing their interest in the program. Completed applications should be submitted to Dr. Maggie Braun at mabraun@andrew.cmu.edu in Doherty Hall 1320, Dr. Karen Thickman at krthickman@cmu.edu in Gates-Hillman Center 7403, or Dr. Tom Cortina at tcortina@cs.cmu.edu in Gates-Hillman Center 4117 no later than one week after midsemester grades are released in a given semester.

Degree Requirements

47 units Math/Stats Core

21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
21-127	Concepts of Mathematics	10
21-xxx	Math Elective (21-241, 21-260, 21-341)	9
36-xxx	Statistics Elective (36-217, 36-225, 36-247, 36-625)	9

41 units General Science Core

09-105	Introduction to Modern Chemistry I	10
09-106	Modern Chemistry II	10
09-217	Organic Chemistry I	9
33-111	Physics I for Science Students	12

51 units Biological Sciences Core

03-121	Modern Biology	9
03-231	Biochemistry I	9
or 03-232	Biochemistry I	
03-240	Cell Biology	9
03-330	Genetics	9
03-342	Introduction to Biological Laboratory Practices *	1

03-343	Experimental Techniques in Molecular Biology *	12
03-201	Undergraduate Colloquium for Sophomores	1
or 15-128	Freshman Immigration Course	
03-411	Topics in Research	1

* these two courses are co-requisites and must be taken together.

56 units Computer Science Core

15-122	Principles of Imperative Computation	10
15-150	Principles of Functional Programming	10
15-210	Parallel and Sequential Data Structures and Algorithms	12
15-251	Great Theoretical Ideas in Computer Science	12
15-451	Algorithm Design and Analysis	12

45-54 units Major Electives

03-511	Computational Molecular Biology and Genomics	9
03-xxx, 05-xxx, or 02-xxx	Computational Biology Electives	18-24
03-3xx	Advanced Biology Elective	9
15-xxx	Advanced Computer Science Elective (15-211 or higher)	9

75 units General Education

99-10x	Computing @ Carnegie Mellon	3
76-101	Interpretation and Argument	9
	Elective Cognition, Choice and Behavior	9
	Elective Economics, Political and Social Institutions	9
	Elective Cultural Analysis	9
	Non-technical Elective	9
	Non-technical Elective	9
	Non-technical Elective	9
	Non-technical Elective	9

40-49 units Free Electives

360 Minimum number of units required for degree:

Bachelor of Science in Computational Finance

The Mellon College of Science, the Heinz College of Public Policy and Management and the Tepper School of Business jointly offer a degree uniquely designed to meet the quantitative needs of the finance industry. Modeled after the highly successful Carnegie Mellon Master of Science in Computational Finance, this degree allows students to develop a deep knowledge of mathematics, probability, statistics, and the applications of these disciplines to finance. Students who complete this degree may directly enter the finance industry, enter other industries where an applied mathematics training is appropriate, or pursue advanced degrees in economics, finance or the mathematical sciences. Students entering the work force upon completion of this degree may wish to later complement their undergraduate degree with a Master's degree in Business Administration or other professional degree. Students who might eventually pursue doctoral degrees in economics, finance, statistics or mathematics should seek advising on how to use their electives in order to prepare for graduate work in their chosen disciplines. Students apply for admission to the B.S. program in Computational Finance in the second semester of the sophomore year. Later application is also possible.

The Bachelor of Science in Computational Finance is an Intercollegiate Program. Students who pursue Computational Finance as their primary major may elect to have either the Mellon College of Science (MCS) or the Tepper School of Business (Tepper) as their home college. The coursework required for the major is the same in either case, with one minor exception outlined below. The general education requirements for the degree depend on the student's home college. MCS students must complete the same Humanities, Social Sciences, and Fine Arts requirements as other MCS students. In addition, MCS students are required to take two science courses, one fewer than other MCS majors. Tepper students must complete the Breadth Requirements of the Undergraduate Business Administration Program. Additionally, they must take several courses from the Functional Business Core of that program.

Majors in Computational Finance can tailor their degree program by selecting Depth Electives aligned with their interests and ambitions. MCS students are required to take three depth electives. Tepper students must take two depth electives and 70-391 Finance (MCS students may select 70-391 as one of their three depth electives).

MCS Science Requirements

Students intending to apply to the B.S. program in Computational Finance should take two semesters of calculus, 21-120 Differential and Integral Calculus and 21-122 Integration and Approximation, and 15-110 Principles of Computing.

In addition, in the freshman year students should complete two of the following three courses:

03-121	Modern Biology	9
09-105	Introduction to Modern Chemistry I	10
33-111	Physics I for Science Students	12

MCS Humanities, Social Sciences & Fine Arts Requirements

Candidates for the B. S. in Computational Finance must complete 72 units offered by Dietrich College of Humanities and Social Science and/or the College of Fine Arts. Of these 72 units, 36 are specified by the detailed curriculum in below. These are:

76-101	Interpretation and Argument	9
73-100	Principles of Economics	9
73-230	Intermediate Microeconomics	9
73-240	Intermediate Macroeconomics	9

Two more nine unit courses must be in specific categories as listed in the section on general requirements for a Bachelor's degree in the Mellon College of Science. One in Category 1: Cognition, Choice and Behavior, and one in Category 3: Cultural Analysis. The remaining 18 units may be filled by courses from any of the departments in DC, CFA or Tepper, subject to the list of exclusions and additions maintained by MCS.

Tepper Functional Business Core

The Functional Business Core of the Undergraduate Business Administration Program includes 70-122 Introduction to Accounting, which is required by all Computational Finance majors. It also includes 70-391, which Tepper students majoring in Computational Finance must select as one of their Depth Electives. In addition, Tepper students pursuing the B.S. in Computational Finance must complete six other courses from the Functional Business Core.

These courses are:

70-100	Global Business	9
70-311	Organizational Behavior	9
70-332	Business, Society and Ethics	9
70-371	Operations Management	9
70-381	Marketing I	9
70-401	Management Game	12

Tepper Breadth Requirements

Candidates for the B.S. in Computational Finance must complete the breadth requirements outlined in the section describing the Undergraduate Business Administration Program.

Depth Electives

The detailed curricula below include three or four depth electives. These may be chosen from among the following:

21-355	Principles of Real Analysis I	9
21-365	Projects in Applied Mathematics	9
21-372	Partial Differential Equations and Fourier Analysis	9
36-401	Modern Regression	9
36-402	Advanced Methods for Data Analysis	9
70-391	Finance	9
70-398	International Finance	9
70-492	Investment Analysis	9
70-495	Corporate Finance	9
70-497	Derivative Securities	9
73-372	International Money and Finance	9

MCS Detailed Curriculum

What follows is the detailed curriculum for the degree Bachelor of Science in Computational Finance in the Mellon College of Science. The courses listed are required. The semesters in which the courses are to be taken are suggested.

Freshman Year

Fall		Units
15-110	Principles of Computing	10
21-120	Differential and Integral Calculus	10
76-101	Interpretation and Argument	9
99-101	Computing @ Carnegie Mellon	3
xx-xxx	Science Requirement	9-12
		32

Spring		Units
15-112	Fundamentals of Programming and Computer Science	12
21-122	Integration and Approximation	10
70-122	Introduction to Accounting	9
xx-xxx	Science Requirement (9-12 units)	12
xx-xxx	Elective	9
		52

Sophomore Year

Fall		Units
21-127	Concepts of Mathematics	10
21-259	Calculus in Three Dimensions	9
21-260	Differential Equations	9
73-100	Principles of Economics	9
xx-xxx	Humanities, Social Science or Fine Arts Elective	9
		46

Spring		Units

		48

Minor in Computational Finance

Students do not need to apply for the minor in Computational Finance, however in order to declare the minor in Computational Finance, a student must satisfy one of the following two requirements:

1. Completion of 21-270 Introduction to Mathematical Finance with a grade of A and an overall QPA of at least 3.20.
- or
2. Completion of 21-270 Introduction to Mathematical Finance and 21-370 Discrete Time Finance with an average grade of B and an overall QPA of at least 3.00.

When a student has met the necessary requirements, he or she may declare the minor by contacting the Associate Director of the Undergraduate Computational Finance program.

21-241	Matrices and Linear Transformations	9-10
or 21-242	Matrix Theory	
or 21-341	Linear Algebra	
21-259	Calculus in Three Dimensions	9
or 21-256	Multivariate Analysis	
21-260	Differential Equations	9
21-270	Introduction to Mathematical Finance	9
21-370	Discrete Time Finance *	9
21-420	Continuous-Time Finance **	9

To avoid excessive double counting, Computational Finance minors may not count 21-270 Introduction to Mathematical Finance, 21-370 Discrete Time Finance or 21-420 Continuous-Time Finance toward any other requirement.

*The prerequisites for 21-370 are 21-270 and either 21-256 or 21-259, and the co-requisite is 70-207, 21-325, 36-225 or 36-217. Note that 70-207 is not accepted as a prerequisite for 21-420.

** The prerequisites for 21-420 are 21-260, 21-370 and one of the following three calculus based probability courses: 21-325, 36-225 or 36-217. Note that 70-207 is not a sufficient preparation in probability. Also note that 21-122 is a prerequisite for 21-260 and that 21-127 is a prerequisite for 21-341 and is recommended for 21-241.

Students minoring in Computational Finance are strongly encouraged to take one or two economics course, e.g., 73-100, 73-230, or 73-240.

Game Design Minor - IDEATe

The Game Design minor is offered by the Entertainment Technology Center as part of the Integrative Design, Arts and Technology (IDEATe) network. IDEATe offers students the opportunity to become immersed in a collaborative community of faculty and peers who share expertise, experience, and passions at the intersection of arts and technology. Students will engage in active "learning by doing" in state-of-the-art maker spaces. The program addresses current and emerging real-world

challenges that require disciplinary expertise coupled with multidisciplinary perspectives and collaborative integrative approaches.

The IDeATe undergraduate curriculum consists of eight interrelated concentration areas, all of which can also be taken as minors. The themes of these areas integrate knowledge in technology and arts: Game Design, Animation & Special Effects, Media Design, Learning Media, Sound Design, Innovation and Entrepreneurship, Intelligent Environments, and Physical Computing. For more information about the IDeATe network, please visit <http://coursecatalog.web.cmu.edu/servicesandoptions/undergraduateoptions/#ideate>

In the Game Design minor, students are able to enhance their knowledge of key component areas of games such as dramatic narrative and character development, programming and engine development, game assessment and redesign. They will have the opportunity to create games for varied platforms from mobile devices to home entertainment systems and theme parks.

Curriculum

Required Courses

One Portal Course

15-104 Introduction to Computing for Creative Practice for students in Dietrich College, the College of Fine Arts, and the Tepper School of Business. (DC, CFA, and TSB students may take 15-112 Fundamentals of Programming and Computer Science as a substitute for 15-104.)

62-150 Introduction to Media Synthesis and Analysis for students in the College of Engineering, Mellon College of Science, and School of Computer Science.

Four Collaborative or Supportive Courses

16-465 Game Engine Programming
53-471 Game Design, Prototyping, and Production
53-230 Programming for Game Designers
53-451 Research Issues in Game Development
05-418 Design of Educational Games
15-466 Computer Game Programming
53-371 Role Playing Games Writing Workshop
60-419 Experimental Game Design

Electives

Students may take a collaborative or supportive course from one of the other IDeATe areas as one of their four collaborative or supportive courses toward the Game Design minor.

Double-Counting Restriction

Students may double-count two of their Game Design minor courses for other requirements.

Minor in Health Care Policy and Management

Sponsored by:

H. John Heinz III College
Dietrich College of Humanities and Social Sciences
Mellon College of Science

Faculty Advisors:

Jason D'Antonio, Mellon College of Science
James F. Jordan, H. John Heinz III College

The face of health care is changing. The practice of medicine is being fundamentally altered by the forces of change in public policy, health care organizations and in the industry as a whole. The role of individual professionals in this industry is changing as rapidly as the industry itself. Traditional career paths have disappeared overnight to be replaced by new opportunities that require new skills. New organizations are placing new demands on their professional and medical staffs. The criteria of efficiency and financial stability are entering the domains of diagnosis and treatment.

This minor is designed to provide students considering a career in the health professions with an understanding of how these changes are likely to affect their careers. Students will become familiar with the critical policy and management issues and will begin to learn to operate effectively in the emerging health care environment. The curriculum combines economic, organizational, managerial, historical and psychological perspectives on these issues to provide a foundation for a deepened understanding of the changing structure of health care organizations and policy.

Curriculum

60 units minimum

Seven courses (a minimum of 60 units) are required to complete this minor. Entry into the minor requires completion of 73-100 Principles of Economics or 88-220 Policy Analysis I or the equivalent by approval.

Required Courses

39 units

Students are required to take the following courses.

79-330	Medicine and Society	9
90-836	Health Systems	6
90-861	Health Policy	6
94-705	Health Economics	12

Elective Courses

27 units

Complete a minimum of 27 units.

Heinz College Courses

90-708	Healthcare Ethics	6
90-721	Healthcare Management	6
90-818	Health Care Quality & Performance Improvement	6
90-830	Introduction to Financial Management of Health Care	6
90-831	Advanced Financial Management of Health Care	6
90-832	Health Law	6
90-863	Health Policy II	6
94-706	Healthcare Information Systems	12

Humanities and Social Sciences Courses (9 units each)

76-494	Healthcare Communications	9
79-383	Epidemics, Disease, and Public Health	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
85-241	Social Psychology	9
85-442	Health Psychology	9
85-446	Psychology of Gender	9

Please note that some of these courses have prerequisites that will not count toward the completion of the requirements for this minor.

Additional Major in Human-Computer Interaction

Robert Kraut, Undergraduate Advisor

Office: Newell Simon Hall (NSH) 3515

For up to date information, see: <http://www.hcii.cmu.edu/applying-undergraduate-major>

Overview

Human-Computer Interaction (HCI) is a fast growing field devoted to the design, implementation, and evaluation of interactive computer-based technology. Examples of HCI products include intelligent computer tutors, wearable computers, social networking sites, and internet connected personal digital assistants (PDAs). Constructing an HCI product is a cyclic, iterative process that has at least three stages: Design, Implementation, and Evaluation.

The Design stage involves principles of design and human behavior, the Implementation stage principles of computer science, and the Evaluation stage empirical research methods common to several disciplines. There are thus four topical areas to cover in this major: Human Behavior, Design, Implementation, and Evaluation. In slightly more detail, the major involves the following sorts of knowledge and skill:

Design

- Eliciting from the client, formulating, and articulating functional specifications
- Knowing how human factors and cognitive models should inform design
- Knowing the principles of, and having experience with, communication design
- Understanding how implementation constraints should inform design
- Incorporating evaluation results into iterated designs

Implementation Programming Skills

- Standard programming languages - e.g., C++, Java

- Rapid prototyping skill (e.g., Visual Basic, Flash)
- Computational literacy, i.e., knowledge sufficient for effective communication and decision making about:
 - interface construction tools and languages
 - multimedia authoring tools
 - data structures and algorithms
 - Operating systems, platforms, etc.

Evaluation

- Experimental design
- Focus Groups
- Surveys
- Usability Testing (Cognitive walkthroughs, user models, heuristic evaluation, GOMS)
- Statistical Analysis

There are over 45 courses relevant to these areas that are now offered by eight different departments in four different colleges at Carnegie Mellon (the School of Computer Science, the College of Humanities and Social Sciences, and the College of Fine Arts, and the Tepper School of Business).

Curriculum

Required Courses

Cognitive Psychology:		Units
85-211	Cognitive Psychology	9
or 85-213	Human Information Processing and Artificial Intelligence	
Communication Design Fundamentals:		
51-261	Communication Design Fundamentals: Design for Interactions for Communications ^b	9
Statistics (one of the following):		
36-201	Statistical Reasoning and Practice	9
36-207	Probability and Statistics for Business Applications	9
36-220	Engineering Statistics and Quality Control	9
36-225-36-226	Introduction to Probability Theory - Introduction to Statistical Inference	18
36-247	Statistics for Lab Sciences	9
70-207	Probability and Statistics for Business Applications	9
Introduction to Programming:		
15-110	Principles of Computing	10
or 15-112	Fundamentals of Programming and Computer Science	
or 15-121	Introduction to Data Structures	
Basic Interaction Design:		
51-421	Basic Interaction Design ^c	9
or 51-422	Interaction Design Studio	
Evaluation (one of the following):		
36-202	Statistical Methods ^a	9
36-208	Regression Analysis	9
36-303	Sampling, Survey and Society	9
36-309	Experimental Design for Behavioral and Social Sciences	9
85-310	Research Methods in Cognitive Psychology	9
85-340	Research Methods in Social Psychology	9
88-251	Empirical Research Methods	9
70-208	Regression Analysis	9
70-481	Marketing Research	9
Human-Computer Interaction Methods		
05-410	User-Centered Research and Evaluation	12
Interface Programming:		
05-430	Programming Usable Interfaces	15
or 05-431	Software Structures for User Interfaces	
05-433	Programming Usable Interfaces OR Software Structures for Usable Interfaces	6
Project Course:		
05-571	Undergraduate Project in HCI	12

Notes

^a The evaluation and statistics courses are required so that majors will be able to understand and conduct empirical research in HCI. Therefore a mathematically-oriented probability course, such as 36-217 Probability Theory and Random Processes does not fulfill either requirement.

^b Design majors do not need to take 51-261 Communication Design Fundamentals: Design for Interactions for Communications as a prerequisite, since they learn similar material in other courses for their major. HCI undergraduates taking Communication Design Fundamentals must go to the School of Design office, MM 110, to register for the course on their assigned day. ID will be required.

^c HCI double majors are guaranteed a place in 51-422 Interaction Design Studio, offered every spring by the School of Design for HCI double majors. Students intending to take 51-422 must visit the School of Design office in MM 110 during registration week to fill out an instructor-permission request form. The content of this course is comparable to 51-421 (Fall).

Electives (18 Units)

Electives are intended to provide HCI double majors advanced concepts and skills relevant to HCI or breadth of experience not available from their primary major. Given these goals, most electives will be 300-level courses or higher. Courses at the 100-level and 200-level in one's primary major will not count as electives, although the same course taken by a non-major may count (approval is still required).

Students can take electives in the HCII or courses relevant to HCI from many other departments on campus. All electives are approved on a case-by-case basis. Undergraduate majors request approval of an elective using The HCI Institute's EASy requirements' management system (<http://easy.hcii.cs.cmu.edu/easy>). The director of the undergraduate program will approve the request, ask for more information or reject it. The EASy system then keeps a record of the electives approved for a particular student.

The following courses have been approved as electives in the past, organized by the offering department:

Human-Computer Interaction		Units
05-320	Social Web	12
05-395	Applications of Cognitive Science	9
05-413	Human Factors	9
05-431	Software Structures for User Interfaces	15
05-540	Rapid Prototyping of Computer Systems	12
05-589	Independent Study in HCI-UG	Var.
Machine Learning		
10-601	Introduction to Machine Learning	12
Computer Science		
15-390	Entrepreneurship for Computer Science	9
15-421	Information Security and Privacy	12
15-437	Web Application Development	12
15-462	Computer Graphics	12
15-466	Computer Game Programming	12
Statistics		
36-201	Statistical Reasoning and Practice	9
36-309	Experimental Design for Behavioral and Social Sciences	9
Architecture		
48-739	Making Things Interactive (Graduate)	10
Design		
51-241	How People Work	9
51-274	Design and Social Change	9
51-324	Basic 3D Prototyping	4.5
51-383	Topics: Conceptual Models	9
51-385	Design for Service	9
51-424	Web Portfolio	4.5
Art		
60-418	ETB Studio: The Interactive Image	10
Business Administration		
70-414	Entrepreneurship for Engineers	9

Double Counting

All prerequisites can be double counted with any requirements in your primary major. At most three non-prerequisite courses can be double counted with the primary major and the HCI second major. For example, if you are majoring in Cognitive Psychology, then you might want to take 85-211 (Intro to Cognitive Psychology) as one of your three double counts. If more than three of the requirements are already in your primary major, then you must add electives until you have eight HCI courses not required as part of your primary major.

Accelerated Master's Programs

The HCI Institute currently offers a three semester (12-month), 15 course Masters in HCI. Undergraduates who have taken the core courses, and an elective on the 400 level or above will be considered eligible for the Accelerated Masters program. These students, which include all undergraduate HCI majors, can apply for the Accelerated Masters program by November 1st of their Senior year, and can begin the Masters program in the Spring of their Senior year. They can finish the Masters degree after the Summer and Fall.

Admission to the Major

The HCI undergraduate major is currently available only as a second major. Because space is limited in the major's required courses, enrollment in the HCI undergraduate major is currently limited to 25 students in each graduating class. 6 with a primary major in Design, 6 in H&SS, 6 in SCS, and 7 anywhere. Applications are processed once a year, during Spring Break. For more detail, see the website: <http://hcii.cs.cmu.edu/academics/hci-undergraduate/major/applying>.

B.S. in Mathematical and Statistical Sciences

This degree program is administered under the joint Science & Humanities Scholars Program between the Mellon College of Science and the College of Humanities & Social Sciences. To qualify, a student must be acceptable for admission to both colleges.

85 Units Mathematical Sciences:

21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
21-127	Concepts of Mathematics	10
21-241	Matrices and Linear Transformations	10
21-259	Calculus in Three Dimensions	9
21-201	Undergraduate Colloquium	1
21-292	Operations Research I	9
21-355	Principles of Real Analysis I	9
or		
21-369	Numerical Methods	9
21-xxx	Mathematical Science Elective	
21-xxx	Mathematical Science Elective	

36 Units Probability and Statistics:

21-325	Probability	9
or 36-225	Introduction to Probability Theory	
Note: 21-325 Probability is preferred.		
36-226	Introduction to Statistical Inference	9
36-410	Introduction to Probability Modeling	9
36-461	Special Topics: Statistical Methods in Epidemiology	9

27 Units Data Analysis:

36-247	Statistics for Lab Sciences	9
36-309	Experimental Design for Behavioral and Social Sciences	9
or		
36-303	Sampling, Survey and Society	9
36-401	Modern Regression	9

18 Units Statistics and Data Analysis Electives:

Complete two courses from the following:

21-393	Operations Research II	9
36-402	Advanced Methods for Data Analysis	9
36-462	Special Topics: Data Mining	9

In consultation with his/her advisor, the student may also arrange to take Statistics graduate courses (36-7xx) to satisfy part of this requirement.

Joint MCS/H&SS Core other than Mathematical Science 103-107 Units or Statistics courses:

Free Electives:
Enough to reach 360 Units

Sample Course Sequence: Math & Statistical Sciences**Freshman Year**

Fall		
21-120	Differential and Integral Calculus	10
21-127	Concepts of Mathematics	10
76-101	Interpretation and Argument	9
33-111	Physics I for Science Students	12
99-10x	Computing @ Carnegie Mellon	
Spring		
21-122	Integration and Approximation	10
36-247	Statistics for Lab Sciences	9
79-104	Global Histories	9
xx-xxx	Science	
xx-xxx	Freshman Seminar	

Sophomore Year

Fall		
21-201	Undergraduate Colloquium	1
21-241	Matrices and Linear Transformations	10
36-309	Experimental Design for Behavioral and Social Sciences	9
xx-xxx	Economic, Political and Social Institutions	
xx-xxx	Science	
xx-xxx	Elective	
Spring		
21-201	Undergraduate Colloquium	1
21-259	Calculus in Three Dimensions	9
21-292	Operations Research I	9
xx-xxx	Cultural Analysis

Spring		
21-xxx	Mathematical Science Elective	

36-402	Advanced Methods for Data Analysis	9
36-xxx	Senior Research Elective	
xx-xxx	Electives	

Bachelor of Science in Music and Technology

The Bachelor of Science in Music and Technology is offered jointly by the School of Music, the School of Computer Science (SCS), and the Carnegie Institute of Technology (CIT).

This program consists of a set of courses that span both music and technology, as well as a capstone composition/design/performance project. Courses in all three areas of study are stipulated in the music and technology undergraduate curriculum and provide for students coming from any of the three areas. In other words, regardless of a student's entry point — an interest in computer science, electrical engineering, or music — the coursework prescribed will allow the student to gain the requisite knowledge and experience in all three areas. Students will work closely with advisors and will be guided in both course selection and capstone projects.

General Requirements 85 units

Seminar

57-570	Music and Technology Seminar (8 semesters for a total of 8 units)	8
--------	---	---

University

99-10x	Computing @ Carnegie Mellon	3
76-101	Interpretation and Argument	9
79-104	Global Histories	9

Humanities

xx-xxx	Cognition, Choice and Behavior course	9
xx-xxx	English, History, Modern Languages, Philosophy, or Psychology course	9

Mathematics

21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10

Science

33-114	Physics of Musical Sound	9
33-106	Physics I for Engineering Students	12

Electives 33 units

Music Core 87 units

57-152	Harmony I	9
57-153	Harmony II	9
57-408	Form and Analysis	6
57-151	Counterpoint in Theory and Application	6
57-258	20th-21st Century Techniques	6
57-257	Orchestration I	6
57-xxx	Music Support Course	6
57-189	Introduction to Repertoire and Listening for Musicians	3
57-190	Repertoire and Listening for Musicians I	3
57-289	Repertoire and Listening for Musicians II	3
57-290	Repertoire and Listening for Musicians III	3
57-181	Solfege I	3
57-182	Solfege II	3
57-183	Solfege III	3
57-184	Solfege IV	3
57-161	Eurhythmics I	3
57-162	Eurhythmics II	3
57-173	Survey of Western Music History	9

Music and Technology Core 120 units

15-112	Fundamentals of Programming and Computer Science	12
15-122	Principles of Imperative Computation	10

15-322	Introduction to Computer Music	9
18-100	Introduction to Electrical and Computer Engineering	12
18-202	Mathematical Foundations of Electrical Engineering	12
18-290	Signals and Systems	12
57-101	Introduction to Music Technology	6
57-347	Electronic and Computer Music	6
57-337	Sound Recording	6
57-338	Sound Editing and Mastering	6
57-438	Multitrack Recording	9
57-571	Music and Technology Project	12
57-572	Music and Technology Project	12

Concentration

Students complete either the Music Concentration or the Technical Concentration:

Music Concentration 60 units

57-5xx	Studio (4 semesters)	36
57-4xx	Major Ensemble (4 semesters)	24

Technical Concentration 57 or 55 units

21-127	Concepts of Mathematics	10
15/18-213	Introduction to Computer Systems	12

AND EITHER:

18-220	Electronic Devices and Analog Circuits	12
18-240	Structure and Design of Digital Systems	12
15-2xx/18-3xx	Electives in ECE or CS	12

or above

OR:

15-128	Freshman Immigration Course	1
15-210	Parallel and Sequential Data Structures and Algorithms	12
15-323	Computer Music Systems and Information Processing	9

15-2xx/18-3xx	Electives in ECE or CS	12
---------------	------------------------	----

or above

Total number of units required for major 380

Bachelor of Science in Neuroscience

Aaron P. Mitchell, Interim Department Head, Biological Sciences

Michael Tarr, Department Head, Psychology

www.cmu.edu/neuro

Neuroscience is an interdisciplinary field in which scientists from many backgrounds apply the tools of biology, cognitive science, psychology, chemistry, mathematics, statistics, computer science, and engineering to develop a comprehensive understanding of brain function at the level of molecules, neurons, brain circuits, cognitive brain modules, and behavior. Research in neuroscience across these disciplines has grown substantially in the past two decades, and a solid understanding of the physiological basis of many aspects of brain function both in health and disease has come along with this growth in research. Along with this comes an increasing need for students to begin careers in neuroscience and to be prepared to work on the problems in neuroscience and to bring new answers to the public and to patients. In order to be successful in developing new treatments and answering outstanding questions in the field, neuroscientists need to be conversant in many different levels of inquiry from neurobiology to cognitive neuroscience to computational neuroscience.

The Dietrich College of Humanities & Social Sciences and the Mellon College of Science have joined forces to establish an exciting interdisciplinary program leading to a Bachelor of Science in Neuroscience. The goal of this degree program is to provide an intensive interdisciplinary education to enable outstanding students to become leaders in identifying and solving tomorrow's Neuroscience problems using a variety of methods. The program's interdisciplinary curriculum is designed for students to gain a fundamental understanding of brain function on many different levels and to begin to specialize within the broad field of Neuroscience. Students in Mellon College of

Science, Dietrich College, or Science and Humanities Scholars Program may have a primary major in Neuroscience in any of the three concentrations. Students from other colleges may have a second major in Neuroscience in any of the three concentrations, subject to double-counting restrictions.

A degree in neuroscience provides excellent preparation for medical school or other graduate programs in the health professions. These students are aided by the Carnegie Mellon Health Professions Program (HPP), an advisory and resource service for all Carnegie Mellon students who are considering careers in the health care field. (See the HPP (<http://coursecatalog.web.cmu.edu/servicesandoptions/undergraduateoptions/#healthprofessionsprogram>) section in this catalog or www.cmu.edu/hpp for more information.)

Students wishing to pursue the Neuroscience major through Dietrich College should contact Dr. Lori Holt (loriholt@cmu.edu). Students wishing to pursue the Neuroscience major through the Mellon College of Science should contact Dr. Maggie Braun (mabraun@andrew.cmu.edu). Students wishing to pursue an additional major in either the Neurobiology or Computational Neuroscience concentrations should contact Dr. Maggie Braun (mabraun@andrew.cmu.edu). Students wishing to pursue an additional major in the Cognitive Neuroscience concentration should contact Dr. Lori Holt (loriholt@cmu.edu).

Students who pursue this major will:

- Gain a broad understanding of Neuroscience at many different levels of analysis, including: cellular biology of the brain, brain systems, cognitive brain function, and computational brain modeling
- Gain an understanding of the sciences underlying Neuroscience, including: Biology, Chemistry, Computer Science, Cognition and Psychology, and other emerging areas
- Develop a comprehensive understanding of brain function in health and disease
- Be familiar with neuroanatomy & neurophysiology and their implications for nervous system function
- Be prepared for advanced study in neurobiology, cognitive neuroscience, and/or neural computation
- Be able to collaborate with Neuroscientists across a wide range of systems and levels of analysis
- Prepare for careers in Neuroscience related companies, Neuroscience research, and/or medicine
- Be prepared for specialization within subfields of Neuroscience given their concentration selection

Requirements for a B.S. in Neuroscience

All students must complete the following:

1. General Science Requirements (see section A)
2. Core Neuroscience Courses (see section B)
3. Requirements for one concentration (see sections C, D, or E)*
4. 18 additional relevant course hours in their home concentration or other neuroscience areas (some examples listed in sections C, D, E, & F). At least 9 of these hours must be at the 300-level or above.
5. Their home college's General Education requirements
6. Free elective hours to come to a total of 360 total course hours

* Students may NOT do two concentrations, but may minor in a related area subject to double-counting restrictions

A. General Science Requirements

	Units
21-120 Differential and Integral Calculus	10
21-122 Integration and Approximation	10
or 21-124 Calculus II for Biologists and Chemists	
03-121 Modern Biology	9
03-330 Genetics	9
09-105 Introduction to Modern Chemistry I	10
09-106 Modern Chemistry II	10
33-111 Physics I for Science Students	12
09-217 Organic Chemistry I**	9
or 33-112 Physics II for Science Students	
or 33-122 Physics II for Biological Sciences and Chemistry Students	
09-221 Laboratory I: Introduction to Chemical Analysis**	12
or 03-124 Modern Biology Laboratory	
15-112 Fundamentals of Programming and Computer Science	12
or 15-110 Principles of Computing	

36-201 Statistical Reasoning and Practice*	9
or 36-217 Probability Theory and Random Processes	
or 36-247 Statistics for Lab Sciences	
or 36-225 Introduction to Probability Theory	

112

* Computational Neuroscience concentration students are required to complete 21-122, 15-112, & 36-217

** Neurobiology concentration students are required to complete 09-217 & 09-221

B. Core Neuroscience Courses

	Units
85-219 Biological Foundations of Behavior	9
or 03-161 Molecules to Mind	
85-211 Cognitive Psychology	9
or 85-213 Human Information Processing and Artificial Intelligence	
03-362 Cellular Neuroscience	9
03-363 Systems Neuroscience*	9
15-386 Neural Computation*	9
or 85-419 Introduction to Parallel Distributed Processing	
or 86-375 Computational Perception	

45

* Computational Neuroscience concentration students are required to complete 15-386.

C. Neurobiology concentration

Didactic Core: Students must complete all of the following*	Units
03-231 Biochemistry I	9
03-240 Cell Biology	9
03-260 Neurobiology of Disease	9
or 03-365 Neural Correlates of Learning and Memory	

27

* Neurobiology concentration students must complete 09-217 and 09-221 in their General Science Requirements (section A, above)

Required laboratory, data analysis, & methodological courses	Units
03-343 Experimental Techniques in Molecular Biology	12
03-346 Experimental Neuroscience Experimental Neuroscience	12
or 03-345 Experimental Cell and Developmental Biology	

24

Electives in Neurobiology (minimum of 9 additional hours)	Units
03-250 Introduction to Computational Biology	12
03-251 Introduction to Computational Molecular Biology	6
03-252 Introduction to Computational Cell Biology	6
03-260 Neurobiology of Disease	9
03-350 Developmental Biology	9
03-364 Developmental Neuroscience	9
03-365 Neural Correlates of Learning and Memory	9
03-439 Introduction to Biophysics	9
09-218 Organic Chemistry II	9
09-222 Laboratory II: Organic Synthesis and Analysis	12
42-202 Physiology	9
42-203 Biomedical Engineering Laboratory NOTE: VERY Limited Seating Available for 42-203	9

D. Cognitive Neuroscience concentration

Didactic Core: Students must complete all of the following:	Units
85-102 Introduction to Psychology	9
36-309 Experimental Design for Behavioral and Social Sciences	9

18

Required laboratory, data analysis, & methodological courses	Units
85-310 Research Methods in Cognitive Psychology	9

85-314	Cognitive Neuroscience Research Methods	9
		18
Electives in Cognitive Neuroscience (minimum of 27 additional hours)**		Units
85-221	Principles of Child Development	9
85-241	Social Psychology	9
85-261	Abnormal Psychology	9
85-356	Music and Mind: The Cognitive Neuroscience of Sound	9
85-370	Perception	9
85-390	Human Memory	9
85-406	Autism: Psychological and Neuroscience Perspectives	9
85-408	Visual Cognition	9
85-412	Cognitive Modeling	9
85-414	Cognitive Neuropsychology	9
85-419	Introduction to Parallel Distributed Processing *	9
85-424	Hemispheric Specialization: Why, How and What?	9
85-426	Learning in Humans and Machines	9
85-429	Cognitive Brain Imaging	9
85-442	Health Psychology	9
85-501	Stress, Coping and Well-Being	9

* If not used as a core course

** At least 18 of these hours must be 300 level or above

E. Computational Neuroscience concentration

Didactic Core. Students must complete all of the following*:		Units
21-127	Concepts of Mathematics	10
15-122	Principles of Imperative Computation	10
or 15-150	Principles of Functional Programming	
21-241	Matrices and Linear Transformations	10
or 21-240	Matrix Algebra with Applications	
		30

* Computational Neuroscience concentration students must complete 21-122, 15-112, and 36-217 in their General Science Requirements (section A, above) and 15-386 in their Core Neuroscience Courses (section B, above). Students must complete a minimum of 60 units in this concentration. Students should select their required laboratory and elective courses to complete a minimum of 31 units (Four 9 unit courses or a lesser number of 9 and 12 unit courses could be combined to complete this requirement).

Required laboratory, data analysis, and methodological courses (18-24 total units)		Units
42-631	Neural Data Analysis	9
or 86-631	Neural Data Analysis	
42-632	Neural Signal Processing	12
15-486	Artificial Neural Networks	12
15-494	Special Topic: Cognitive Robotics	12
15-883	Computational Models of Neural Systems	12
Electives in Cognitive Neuroscience (minimum of 9 units) *		Units
03-512	Computational Methods for Biological Modeling and Simulation	9
or 02-512	Computational Methods for Biological Modeling and Simulation	
10-601	Introduction to Machine Learning	12
15-381	Artificial Intelligence: Representation and Problem Solving	9
15-387	Computational Perception	9
15-451	Algorithm Design and Analysis	12
15-453	Formal Languages, Automata, and Computability	9
15-486	Artificial Neural Networks	12
15-494	Special Topic: Cognitive Robotics	12
15-883	Computational Models of Neural Systems	12
16-299	Introduction to Feedback Control Systems	12
16-311	Introduction to Robotics	12
21-228	Discrete Mathematics	9
or 15-251	Great Theoretical Ideas in Computer Science	
21-259	Calculus in Three Dimensions	9

21-272	Introduction to Partial Differential Equations	9
21-341	Linear Algebra	9
36-208	Regression Analysis	9
36-226	Introduction to Statistical Inference	9
36-350	Statistical Computing	9
36-401	Modern Regression	9
36-462	Special Topics: Data Mining	9
42-631	Neural Data Analysis	9
or 86-631	Neural Data Analysis	
42-632	Neural Signal Processing	12
F. Examples of Additional Electives relevant to major		
33-112	Physics II for Science Students ^{unless used for Science Core (section A)}	12
33-122	Physics II for Biological Sciences and Chemistry Students ^{unless used for Science Core (section A)}	9
76-385	Introduction to Discourse Analysis	9
80-210	Logic and Proofs	9
80-211	Logic and Mathematical Inquiry	9
80-220	Philosophy of Science	9
80-254	Analytic Philosophy	9
80-270	Philosophy of Mind	9
80-280	Linguistic Analysis	9
80-314	Logic and Artificial Intelligence	9
88-355	Social Brains: Neural Bases of Social Perception and Cognition	9

NOTE: this list is not restrictive. Concentration advisors can approve additional elective courses that contribute to the student's neuroscience education, subject to additional approval by the major steering committee.

* NOTE: Up to 9 units of applicable undergraduate research course work (e.g. 03-445 or 85-507/85-508) can count as a neuroscience elective (not towards a concentration). A maximum of 27 additional units can be counted as a free electives.

Free Electives (depending on concentration college)	51-61
TOTAL hours to degree	360

* NOTE: Up to 9 units of applicable undergraduate research course work (e.g. 03-445 or 85-507/85-508) can count as a neuroscience elective (not towards a concentration). A maximum of 27 additional units can be counted as a free electives.

Major in Psychology & Biological Sciences

This major is intended to reflect the interdisciplinary nature of current research in the fields of biology and psychology, as well as the national trend in some professions to seek individuals broadly trained in both the social and natural sciences.

Note: Students entering from the College of Humanities and Social Sciences will earn a Bachelor of Science in Psychology and Biological Sciences. Students in the Mellon College of Science will earn a Bachelor of Science in Biological Sciences and Psychology. Students in the joint Science and Humanities Scholars (SHS) program can complete the SHS educational core and choose either departmental order for their diploma.

Depending on a student's home college (H&SS or MCS), General Education (GenEd) requirements will be different. GenEd requirements for H&SS (p. 202) and MCS (p. 307) are found on their respective Catalog pages.

Degree Requirements:

Biological Sciences		Units
03-121	Modern Biology	9
03-231	Biochemistry I	9
03-240	Cell Biology	9
03-330	Genetics	9
03-343	Experimental Techniques in Molecular Biology	12
03-411	Topics in Research	1
03-412	Topics in Research	1
03-xxx	General Biology Elective	9
03-3xx	Advanced Biology Elective	9

03-3xx	Advanced Biology Elective	9
Total Biology units		77
Mathematics, Statistics, Physics and Computer Science Units		
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
or 21-124	Calculus II for Biologists and Chemists	
36-247	Statistics for Lab Sciences	9
or 36-201	Statistical Reasoning and Practice	
36-309	Experimental Design for Behavioral and Social Sciences	9
33-111	Physics I for Science Students ^{MCS students must complete Physics II also (either 33-112 or 33-122)}	12
15-110	Principles of Computing *	10
99-10x	Computing at Carnegie Mellon	3
Total Science units		63
Chemistry Units		
09-105	Introduction to Modern Chemistry I	10
09-106	Modern Chemistry II	10
09-217	Organic Chemistry I	9

Minimum number of units required for degree:		

Science and Humanities Scholars Program

Sponsored by the Dietrich College of Humanities and Social Sciences and by the Mellon College of Science
Dr. William Alba, Director

Office: Doherty Hall, Room 2201
www.cmu.edu/shs

The Science and Humanities Scholars (SHS) Program supports undergraduate students seeking to build their education upon a solid academic foundation in the humanities, social sciences, natural sciences, and mathematics. Students in the program, whether formally enrolled in the Mellon College of Science (MCS) or the Dietrich College of Humanities and Social Sciences (DC), can readily access the resources of both colleges. The SHS General Education curriculum enables students to prepare for any field of study in two colleges while exploring the entire university.

Science and Humanities Scholars in their first year may choose to live in a Stever House residential cluster that promotes the integration of academic and social interests. The program additionally provides students with interdisciplinary and multidisciplinary courses and activities.

Before a student declares a major, the Program Director serves as the student's primary academic advisor, complementing the range of other advising opportunities available around the university. After a student declares a major, the Director continues to provide supplementary advising for the student, especially on matters of General Education.

Entering first-year students who apply to DC or MCS with outstanding credentials may receive an invitation to the SHS Program. Invited students should carefully consider whether this academic program matches their own scholarly interests. Students enrolled in either college may also request to transfer into the Science and Humanities Scholars Program after completing at least one semester at the university.

Science and Humanities Scholars General Education Program

The requirements in the SHS General Education Program are designed to expose students to a variety of subjects and methodologies, in order to enable them to become better citizens of the world and more complete scholars. The curriculum permits flexibility and independence in selecting courses to fulfill these General Education requirements; students in the Program may petition the Director to take alternate courses in addition to the ones listed here.

Mathematical Sciences (20 units)

		Units
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
or 21-124	Calculus II for Biologists and Chemists	

Statistical Reasoning (9 units)

Students may select one of the following courses **or** any other Statistics course at the 200- level or higher.

36-247	Statistics for Lab Sciences	9
21-325	Probability	9
36-201	Statistical Reasoning and Practice	9
36-217	Probability Theory and Random Processes	9
36-225	Introduction to Probability Theory	9

Writing/Expression (9 units)

Language is a tool used to communicate, as well as a way to organize thinking. This university-wide requirement, to be completed in the first year, focuses on the social nature of language and the ways in which writing constitutes thinking.

76-101	Interpretation and Argument	9
--------	-----------------------------	---

World Cultures (9 units)

This requirement seeks to enable students to recognize how cultures have shaped and continue to shape the human experience, as well as analyze material that provide clues as to how these cultures operate.

79-104	Global Histories	9
--------	------------------	---

Freshman Seminar (6-9 units)

Students may select seminars offered by the SHS Program, Dietrich College, and the Mellon College of Science, from a list of courses provided every semester. Past and present SHS seminars include:

99-241	Revolutions of Circularity	9
99-242	Meaning Across the Millennia	9
99-243	Light from the Enlightenment	
99-245	Energy: Science, Society and Communication	9

Computational Reasoning (9-12 units)

Students may select one of the following courses offered in Computer Science, Mathematical Sciences, Philosophy, or related fields.

21-127	Concepts of Mathematics	10
21-128	Mathematical Concepts and Proofs	12
80-210	Logic and Proofs	9
80-211	Logic and Mathematical Inquiry	9
80-212	Arguments and Logical Analysis	9
15-110	Principles of Computing	10
15-112	Fundamentals of Programming and Computer Science	12
15-104	Introduction to Computing for Creative Practice	10
15-121	Introduction to Data Structures	10
15-122	Principles of Imperative Computation	10
02-201	Programming for Scientists	12

Science Core (28 units)

Choose three of the following courses. Science majors with primary majors in the Mellon College of Science must complete at least two that are outside of their major department.

03-121	Modern Biology	9-10
or 03-151	Honors Modern Biology	
03-230	Intro to Mammalian Physiology	9
or 42-202	Physiology	
09-105	Introduction to Modern Chemistry I	10
or 09-107	Honors Chemistry: Fundamentals, Concepts and Applications	
09-106	Modern Chemistry II	10
33-111	Physics I for Science Students	12
or 33-151	Matter and Interactions I	
33-112	Physics II for Science Students	12
or 33-152	Matter and Interactions II	

Distribution Requirements (36 units)

Choose a minimum of four courses, 9 units per category, totaling at least 36 units. Below are examples of courses satisfying these categories. You are encouraged to identify other courses that could fulfill these requirements; see the SHS Director for prior approval.

Cognition, Choice, and Behavior

Courses in this category use model-based analysis to broaden an understanding of human thinking, choices, and behavior on an individual basis across a variety of settings. The following list includes examples from Philosophy, Psychology, and Social and Decision Sciences.

80-130	Introduction to Ethics	9
80-150	Nature of Reason	9
80-180	Nature of Language	9
80-221	Philosophy of Social Science	9
80-230	Ethical Theory	9
80-241	Ethical Judgments in Professional Life	9
80-270	Philosophy of Mind	9
85-102	Introduction to Psychology	9
85-211	Cognitive Psychology	9
85-221	Principles of Child Development	9
85-241	Social Psychology	9
85-251	Personality	9
85-261	Abnormal Psychology	9
88-120	Reason, Passion and Cognition	9

Economic, Political, and Social Institutions

Courses in this category examine the ways in which institutions organize individual preferences and actions into collective outcomes using model-based reasoning. The following list includes examples primarily from Economics, History, and Social and Decision Sciences; similar courses in those and other departments may also fulfill this requirement.

36-303	Sampling, Survey and Society	9
70-332	Business, Society and Ethics	9
73-100	Principles of Economics	9
73-230	Intermediate Microeconomics	9
79-266	Russian History: From Communism to Capitalism	9
79-331	Body Politics: Women and Health in America	9

80-135	Introduction to Political Philosophy	9
79-350	Early Christianity	9
80-135	Introduction to Political Philosophy	9
80-136	Social Structure, Public Policy & Ethics	9
80-235	Political Philosophy	9
80-341	Computers, Society and Ethics	9
84-104	Decision Processes in American Political Institutions	9

Creative Production and Reflection

Courses in this category encourage exploration of the artistic and intellectual creation of others while allowing for personal expression and reflection upon the creative process.

xx-xxx	Courses from the College of Fine Arts (Architecture 48-xxx, Design 51-xxx, Drama 54-xxx, Music 57-xxx, Art 60-xxx, CFA Interdisciplinary 62-xxx)	Var.
76-260	Survey of Forms: Fiction	9
76-262	Survey of Forms: Nonfiction	9
76-265	Survey of Forms: Poetry	9
76-269	Survey of Forms: Screenwriting	9
79-345	The Roots of Rock and Roll	9
80-220	Philosophy of Science	9
82-1xx	Any Elementary Modern Language course	
82-2xx	Any Intermediate Modern Language course	
99-241	Revolutions of Circularity	9
99-242	Meaning Across the Millennia	9

Cultural Analysis

Courses in this category explore definitions of culture and the role culture plays in producing different actions and institutions, as well as the roles of institutions, systems, and human actions in shaping cultural contexts.

57-173	Survey of Western Music History	9
70-342	Managing Across Cultures	9
76-227	Comedy	9
76-232	Introduction to African American Literature	9
76-241	Introduction to Gender Studies	9
79-201	Introduction to Anthropology	9
79-240	The Development of American Culture	9
79-207	Development of European Culture	9
79-345	The Roots of Rock and Roll	9
79-241	African American History: Africa to the Civil War	9
79-242	African American History: Reconstruction to the Present	9
79-224	Mayan America	9
79-261	Chinese Culture and Society	9
79-330	Medicine and Society	9
80-100	Introduction to Philosophy	9
80-250	Ancient Philosophy	9
80-251	Modern Philosophy	9
80-253	Continental Philosophy	9
80-254	Analytic Philosophy	9
80-255	Pragmatism	9
80-261	Empiricism and Rationalism	9
82-273	Introduction to Japanese Language and Culture	9
82-294	Topics in Russian Language and Culture	9
82-303	Introduction to French Culture	9
82-304	The Francophone World	9
82-333	Introduction to Chinese Language and Culture	Var.
82-342	Spain: Language and Culture	9
82-343	Latin America: Language and Culture	9
82-344	U.S. Latinos: Language and Culture	9
82-345	Introduction to Hispanic Literary and Cultural Studies	9
82-396	The Faust Legend at Home and Abroad	Var.
82-415	Topics in French and Francophone Studies	9
82-426	Topics in German Literature and Culture	9
82-451	Studies in Latin American Literature and Culture	9
82-491	Topics in Twentieth-Century Russian Literature	9

BXA Intercollege Degree Programs

M. Stephanie Murray, Director
Solar Decathlon House
<http://www.cmu.edu/interdisciplinary>

Mission Statement

The BXA Intercollege Degree Programs are designed for students who want to turn talent and passion into viable professions for the future through a challenging academic regimen. BXA students pursue their goals with the help of multifaceted advising, innovative pedagogical strategies, and a focus on the impact arts have on technology and vice versa.

The goal of the Bachelor of Humanities and Arts (BHA), the Bachelor of Science and Arts (BSA), and the Bachelor of Computer Science and Arts (BCSA) BXA Intercollege Degree Programs is to allow a select group of students who demonstrate interest and accomplishment in the fine arts and the humanities, social sciences, natural sciences, computer science, and emerging media to explore beyond the traditional academic major, or integrate more than one field of study across disciplines. These programs foster the creativity of students who explore innovative approaches to the academic environments of two colleges. By merging the components in the arts and humanities, natural sciences, or computer science into an interdisciplinary/multidisciplinary study, a unique, complex product is born. BXA students produce new information, challenging questions, and innovative theory. BXA students are models of independence, motivation, and well-rounded scholarship as humanists, scientists, and artists at the same time.

In the context of the Carnegie Mellon University environment, the BXA Intercollege Degree Programs hold a special role. BXA provides access to four strong colleges that offer specialized training with expert faculty and researchers. The BXA Programs challenge students to utilize those resources as they explore and develop their own approach to interdisciplinary studies in the fine arts and the humanities and social sciences, the natural and mathematical sciences, or computer science.

BXA students balance courses in their CFA concentration with courses in their academic concentration, as well as BXA-specific courses. These BXA-specific courses give students the opportunity to integrate their areas of concentration by focusing on interdisciplinary approaches and arts-based research techniques. The curricula in the concentration areas provide students with a solid disciplinary foundation upon which they can draw for interdisciplinary projects.

A BXA Intercollege degree prepares students for graduate study and careers in an enormous variety of fields, including traditional graduate training in the arts as well as academic areas, positions in arts and education non-profits such as museums and foundations, and technical positions with media and technology companies.

Program Objectives

The skills developed by BXA students span the creative, the technical, the academic, and the practical. The objective of the BXA Intercollege Program is to prepare graduates for careers in which they will draw on their creative and academic skills to create, educate, communicate, and innovate across disciplines.

Students who complete the BXA curriculum will graduate with the following skills:

- Foundational knowledge and technical expertise in the CFA concentration area and the DC/MCS/SCS concentration area
- Ability to describe the connections between these concentrations and how the student integrates them
- Ability to communicate ideas textually, visually, and orally
- Knowledge of how the concentration disciplines intersect with history, society, and culture from local and global perspectives
- Ability to use cognitive, behavioral, and ethical dimensions within the concentration disciplines to make decisions on individual and social levels
- Experience in engaging in art research to produce new knowledge both within the CFA concentration and the DC/MCS/SCS concentration
- Experience in designing, researching, and completing a large-scale, object-based project that integrates both areas of concentration

Bachelor of Humanities and Arts Degree Program

Carnegie Mellon University offers an intercollege degree that combines the strengths of the College of Fine Arts (CFA) and the College of Dietrich College of Humanities and Social Sciences (DC). The intercollege degree, called the Bachelor of Humanities and Arts (BHA), offers depth of study in both the fine arts and the humanities, social and behavioral sciences. The BHA Degree Program enables a student to receive broader exposure to the humanities and liberal arts than is generally possible through a Bachelor of Fine Arts degree in CFA, while obtaining deeper and more substantial training in the fine arts than is generally possible through a Bachelor of Arts or Bachelor of Science degree in DC. Students receive extensive training in one or more of the fine arts disciplines as well as related advanced training in areas such as writing, social sciences, behavioral sciences, or cultural studies. The program also provides enough flexibility to allow students to explore other areas of interest. The most important aspect of the BHA Program is for students to blend their interests, and to explore the connections between their chosen disciplines.

The BHA curriculum is divided into three parts: 1) BHA General Education coursework, 2) CFA concentration coursework, and 3) DC concentration coursework.

Students choose their fine arts concentration from among the five schools in CFA: Architecture, Art, Design, Drama, or Music. A student must meet the entry requirements for the particular CFA school of their choice. While in the BHA Program, a student may change their CFA concentration only if they pass all admission requirements for that particular school.

Students choose their humanities or social/behavioral sciences concentration from the list of majors and minors offered by DC.

The BHA Degree Program is governed by faculty and administrators from both colleges and led by the director of the BXA Intercollege Degree Programs. The director and associate director of the BXA Intercollege Degree Programs are the primary advisors and liaisons between CFA and DC. Students receive extensive advising support. Each student has two additional academic advisors: an advisor in the admitting school of CFA for their fine arts concentration, and an advisor in DC for their humanities/social sciences concentration. This network of advisors guides each student through their curriculum.

Masters of Arts Management (MAM) Option

BHA students who have an interest in arts management and wish to go on for an advanced degree may select courses in their sophomore and junior years to prepare them for this area. A student in the junior year may apply to the Accelerated Master's Program with the School of Public Policy & Management at Heinz College. In this program students take both graduate and undergraduate courses in the senior year, earn the BHA degree, and continue on for an additional year to complete the work for the Masters of Arts Management (MAM) degree.

BHA Curriculum

	Units
I. BHA General Education	111
II. DC Concentration	81
III. CFA Concentration	108
IV. Free Electives	78
Total BHA Degree Requirements	378

I. BHA General Education

(14 courses, 111 units minimum)

- Communicating: Language and Interpretations (3 courses, 27 units minimum, 76-101 required, two approved modern language courses required)
- Reflecting: Societies and Cultures (1 course, 9 units, 79-104 required)
- Modeling: Mathematics and Experiments (1 course, 9 units minimum)

- Deciding: Social Sciences and Values (3 courses, 27 units minimum, 36-201 required)
- Computing @ Carnegie Mellon (1 course, 3 units, 99-101 or 99-102 required)
- BXA Required Courses (5 courses, 36 units minimum, 52-190 and/ or 52-291, 52-391, 52-392, 52-401, 52-402)

Communicating: Language and Interpretations (3 courses, 27 units minimum)

Courses in this category give special attention to the study of language as interpretation, expression and argument within and across multiple discourses. Students examine language for its internal logics and structures.

76-101 Interpretation and Argument 9
(various topics by section) www.cmu.edu/hss/english/first_year/index.html

82-xxx Modern Languages 18
Complete two courses taught in a language offered by the Modern Language Department. A wide selection of courses are offered in Arabic, Chinese Studies, European Studies, French and Francophone Studies, German Studies, Hispanic Studies, Italian, Japanese Studies, Russian Studies, and Spanish. Students must complete two courses in the same language. Languages taught at other institutions are also acceptable (with advisor approval).

Reflecting: Societies and Cultures (1 course, 9 units)

This category emphasizes the study of history, society, and culture from local and global perspectives.

79-104 Global Histories 9
(various topics by section) <http://www.history.cmu.edu/undergraduate/fall.html>

Modeling: Mathematics and Experiments (1 course, 9 units minimum)

Courses in this category stress the interplay of mathematical (formal) theories and experimental work. Some courses investigate the internal structure of theories, whereas others use them as models for producing real-world knowledge. Such models may be drawn from a variety of disciplines including the natural sciences, but also, for example, psychology and computer science. The interactions between theorizing and experimenting (observing) can be understood within an intellectual framework that invites comparative assessment. Select one course from the following course options:

Mathematics

21-110	Problem Solving in Recreational Mathematics	9
21-111	Calculus I	10
21-112	Calculus II *	10
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation *	10
21-127	Concepts of Mathematics	10
21-241	Matrices and Linear Transformations	10
21-256	Multivariate Analysis *	9
21-257	Models and Methods for Optimization *	9
21-259	Calculus in Three Dimensions *	9
80-110	Nature of Mathematical Reasoning	9
80-210	Logic and Proofs	9
80-211	Logic and Mathematical Inquiry	9
80-212	Arguments and Logical Analysis	9

Natural Science

02-223	Personalized Medicine: Understanding Your Own Genome	9
02-250	Introduction to Computational Biology *	12
02-261	Quantitative Cell and Molecular Biology Laboratory	9
03-121	Modern Biology	9
03-125	Evolution	9
03-132	Basic Science to Modern Medicine	9
03-161	Molecules to Mind	9
03-230	Intro to Mammalian Physiology *	9
03-231	Biochemistry I *	9
03-232	Biochemistry I *	9

03-250	Introduction to Computational Biology *	12
03-362	Cellular Neuroscience *	9
03-363	Systems Neuroscience *	9
09-101	Introduction to Experimental Chemistry	3
09-103	Atoms, Molecules and Chemical Change	9
09-105	Introduction to Modern Chemistry I	10
09-106	Modern Chemistry II *	10
09-217	Organic Chemistry I *	9
09-218	Organic Chemistry II *	9
09-221	Laboratory I: Introduction to Chemical Analysis *	12
09-222	Laboratory II: Organic Synthesis and Analysis *	12
12-201	Geology	9
33-100	Basic Experimental Physics	6
33-104	Experimental Physics	9
33-106	Physics I for Engineering Students *	12
33-107	Physics II for Engineering Students *	12
33-111	Physics I for Science Students *	12
33-112	Physics II for Science Students *	12
33-114	Physics of Musical Sound	9
33-115	Physics for Future Presidents	9
33-124	Introduction to Astronomy	9
33-131	Matter and Interaction I *	12
33-132	Matter and Interactions II *	12
33-211	Physics III: Modern Essentials *	10
33-213	Mini-Course in Special Relativity *	4
33-224	Stars, Galaxies and the Universe *	9
33-355	Nanoscience and Nanotechnology *	9

Other Courses

02-223	Personalized Medicine: Understanding Your Own Genome	9
05-413	Human Factors	9
06-100	Introduction to Chemical Engineering *	12
09-109	Kitchen Chemistry Sessions	3
09-209	Kitchen Chemistry Sessions *	3
12-100	Introduction to Civil and Environmental Engineering	12
15-104	Introduction to Computing for Creative Practice	10
15-110	Principles of Computing	10
15-112	Fundamentals of Programming and Computer Science	12
15-121	Introduction to Data Structures *	10
18-100	Introduction to Electrical and Computer Engineering	12
19-101	Introduction to Engineering and Public Policy *	12
24-101	Fundamentals of Mechanical Engineering *	12
27-100	Engineering the Materials of the Future	12
33-120	Science and Science Fiction	9
36-202	Statistical Methods *	9
42-101	Introduction to Biomedical Engineering *	12
80-220	Philosophy of Science	9
80-222	Measurement and Methodology	9
80-226	Revolutions in Science	9
80-312	Philosophy of Mathematics *	9
80-322	Philosophy of Physics	9
80-323	Philosophy of Biology	9
85-355	Introduction to Cognitive Neuroscience *	9
85-370	Perception	9
85-392	Human Expertise *	9
85-406	Autism: Psychological and Neuroscience Perspectives	9
85-412	Cognitive Modeling *	9
85-414	Cognitive Neuropsychology *	9
85-419	Introduction to Parallel Distributed Processing *	9
85-423	Cognitive Development *	9
85-429	Cognitive Brain Imaging *	9
88-360	Behavioral Economics	9
88-391	Technology and Economic Growth	9
99-238	Materials, Energy and Environment	9

* Indicates co-requisites and/or prerequisites required.

Deciding: Social Sciences and Values (3 courses, 27 units minimum)

The theme of this category is the exploration of cognitive, behavioral and ethical dimensions of decision-making on both the individual and social level. Making decisions requires a broad understanding of human rationality and social interaction. Some courses examine the critical collection and analysis of data for achieving such an understanding, whereas others emphasize the historical development of policies and values, which form the matrix for decision-making.

36-201	Statistical Reasoning and Practice -REQUIRED	9
08-200/19-211	Ethics and Policy Issues in Computing	9
36-207	Probability and Statistics for Business Applications	9
36-220	Engineering Statistics and Quality Control *	9
36-247	Statistics for Lab Sciences *	9
36-303	Sampling, Survey and Society *	9
73-100	Principles of Economics	9
73-230	Intermediate Microeconomics *	9
73-328	Health Economics *	12
73-433	Environmental Policy and Economics *	9
73-469	Global Electronic Markets: Economics and the Internet	9
79-342	Introduction to Science and Technology Studies	9
80-130	Introduction to Ethics	9
80-136	Social Structure, Public Policy & Ethics	9
80-208	Critical Thinking	9
80-221	Philosophy of Social Science	9
80-230	Ethical Theory	9
80-235	Political Philosophy	9
80-241	Ethical Judgments in Professional Life	9
80-242	Conflict and Dispute Resolution	9
80-244	Environmental Ethics	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
80-270	Philosophy of Mind	9
80-271	Philosophy and Psychology	9
80-305	Rational Choice	9
80-321	Causation, Law, and Social Policy *	9
80-324	Philosophy of Economics	9
80-335	Deliberative Democracy: Theory and Practice	9
80-337	Philosophy, Politics & Economics	9
80-341	Computers, Society and Ethics	9
80-348	Health Development and Human Rights	9
80-405	Game Theory	9
80-430	Ethics and Medical Research	9
80-447	Global Justice	9
84-104	Decision Processes in American Political Institutions	9
84-330	CMU/WSP: The United States Supreme Court	12
84-331	CMU/WSP: Congress	12
84-334	CMU/WSP: International Policy	12
84-336	CMU/WSP: The Presidency and Executive Branch	12
84-342	CMU/WSP: Fiscal Policy-Making in the U.S.	12
84-346	CMU/WSP: Race and Politics in the American City	12
84-347	CMU/WSP: Lobbying, Money, and Influence in Washington	12
84-348	CMU/WSP: Spies! The Politics of Intelligence	12
84-350	CMU/WSP: Campaigns and Elections	12
84-362	Diplomacy and Statecraft	9
84-380	Grand Strategy in the United States	9
85-102	Introduction to Psychology	9
85-211	Cognitive Psychology	9
85-213	Human Information Processing and Artificial Intelligence	9
85-219	Biological Foundations of Behavior	9
85-221	Principles of Child Development	9
85-241	Social Psychology	9
85-251	Personality	9

85-261	Abnormal Psychology	9
85-395	Applications of Cognitive Science	9
88-120	Reason, Passion and Cognition	9
88-363	Behavioral Economics Theory *	9
88-365	Behavioral Economics and Public Policy *	9
88-388	Psychological Models of Decision Making *	9

* Indicates co-requisites and/or prerequisites required.

Computing @ Carnegie Mellon (1 course, 3 units)

This is a mini-course, pass/no pass, to be completed in the first semester.

99-101	Computing @ Carnegie Mellon	3
or 99-102	Computing @ Carnegie Mellon	

BXA Required Courses (5 courses, 36 units minimum)

BXA-specific courses give students the opportunity to integrate their areas of concentration by focusing on interdisciplinary approaches and arts-based research techniques.

52-190	BXA Seminar I: Building the Wunderkammer	9
or 52-291	BXA Seminar II: Building BXA	
52-391	BXA Junior Portfolio	0
52-392	BXA Seminar III: Deconstructing Disciplines	9
52-401	BXA Seminar IV: Capstone Fall	9
52-402	BXA Seminar V: Capstone Spring	9

II. Dietrich College of Humanities and Social Sciences Concentration

(9 courses, 81 units minimum)

Each student meets individually with a BHA DC Academic Advisor to design an 81 unit DC concentration based on existing DC majors/minors. Please refer to the DC section of this catalog to review the individual majors and minors offered. Curriculum for several BHA DC concentration options are outlined below and others will be made available in the BXA office throughout the academic year.

A completed DC Concentration Sheet must be approved by the concentration faculty advisor and submitted to the BXA office by the end of the student's sophomore year.

Anthropology Concentration (81 units minimum)

The BHA concentration in Anthropology offers students training in ethnographic methods and in theoretical understandings of culture. Students examine the evolution, depth, and complexities of ethnography, and explore notions of "culture" in diverse settings, over time and across space. In today's world, students are increasingly aware of the importance of developing a sophisticated approach to culture and its articulation with changes in the domains of the arts, technology, economics, and politics. The BHA concentration in Anthropology provides students with the tools to link artistic practices to various aspects of globalization.

Students in the Anthropology concentration are required to take an introductory course and a methods/theory course (18 units), two regional courses and two topical courses (36 units), two advanced language courses (18 units), and complete a culminating capstone/independent study (9 units).

Introductory and Methods Courses (2 courses, 18 units)

Students must complete 18 units (typically two courses) selecting from the list below.

79-201	Introduction to Anthropology	9
79-297	Dilemmas and Controversies in Anthropology	9
79-380	Ethnographic Methods	9

Anthropological Perspectives (4 courses, 36 units)

Students gain knowledge of specialized theoretical and regional topics by choosing 36 units (typically four courses) selecting from the list below.

79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-224	Mayan America	9

79-235	Caribbean Cultures	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-278	Rights to Representation: Indigenous People and their Media	9
79-295	Race Relations in the Atlantic World	9
79-296	Perspectives on Social Protest	9
79-299	Trafficking Persons: Children in a Global Context	9
79-312	International Human Rights Institutions in Theory and Practice	6
79-314	The Politics and Culture of Memory	9
79-315	Hawai'i: America's Pacific Island State	9
79-317	Art, Anthropology, and Empire	9
79-332	Medical Anthropology	9
79-355	Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective	9
79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9

Note: Courses that count toward this category may be taken at another university, and the units transferred to the BHA concentration under the guidance of the BHA Anthropology faculty advisor.

Language Courses (2 courses, 18 units)

Every student is expected to take two upper level (intermediate or above) language courses (18 units). These courses deepen the immersion in a culture or society that the Anthropology concentration provides a student, and should coordinate with the regional courses selected for the concentration.

Capstone/Independent Study (1 course, 9 units)

Every student is required to do a culminating research project; this may be part of an advanced course (9 units). Students should work with the BHA Anthropology faculty advisor to determine the best method for completing the capstone research project. This project may be complementary to the BHA Capstone Project sequence (52-401 and 52-402) that is completed in the senior year.

Cognitive Neuroscience Concentration (81 units minimum)

Cognitive neuroscience is a science concerned with discovering biological bases of psychological functions. It addresses questions of how behavior is produced by neural circuits of the brain and also how those neural circuits are in turn influenced by behavioral experiences. Students with a concentration in Cognitive Neuroscience are expected to learn about existing findings within the field and also to become proficient in how to conduct and analyze scientific investigations directed toward understanding the biological basis of behavior. This includes observing behavior, formulating hypotheses, designing experiments to test these hypotheses, running experiments, performing statistical analyses, and writing reports.

Introductory and Survey Coursework (36 units)

03-121	Modern Biology	9
03-363	Systems Neuroscience	9
85-219	Biological Foundations of Behavior	9
85-211	Cognitive Psychology	9
or 85-213	Human Information Processing and Artificial Intelligence	9

Research Methods Training (18 units)

36-309	Experimental Design for Behavioral and Social Sciences	9
85-314	Cognitive Neuroscience Research Methods *	9

* 85-310 Research Methods in Cognitive Psychology may be substituted if necessary.

Distribution Requirements (27 units)

Complete three courses with at least one from each category below.

Approaches to Cognitive Neuroscience:

15-386	Neural Computation	9
15-883	Computational Models of Neural Systems	12
36-746	Statistical Methods for Neuroscience and Psychology	12
85-412	Cognitive Modeling	9
85-414	Cognitive Neuropsychology	9
85-419	Introduction to Parallel Distributed Processing	9

85-429	Cognitive Brain Imaging	9
<u>Cognitive Neuroscience Electives:</u>		
03-260	Neurobiology of Disease	9
03-362	Cellular Neuroscience	9
03-364	Developmental Neuroscience	9
03-761	Neural Plasticity	9
15-486	Artificial Neural Networks	12
85-356	Music and Mind: The Cognitive Neuroscience of Sound	9
85-370	Perception	9
85-385	Auditory Perception: Sense of Sound	9
85-390	Human Memory	9
85-406	Autism: Psychological and Neuroscience Perspectives	9

Creative Writing Concentration (81 units minimum)

In the Creative Writing concentration, BHA students develop their talents in writing fiction, poetry, and other imaginative forms. While studying with faculty members who are practicing poets and prose writers, students read widely in literature, explore the resources of their imaginations, sharpen their critical and verbal skills, and develop a professional attitude toward their writing. The Creative Writing program is based on a conservatory model, made up of faculty and students who have an intense commitment to their work.

Students in the Creative Writing concentration are required to take two of the introductory Survey of Forms courses, ideally in their sophomore year. Choices include Poetry (76-265), Fiction (76-260), Screenwriting (76-269), and Nonfiction (76-261). In order to proceed into the upper level courses in the major (and in each of the genres), students must do well in these introductory courses (receive a grade of A or B). After completing the Survey of Forms courses, students take four workshops in fiction, poetry, screenwriting, or nonfiction. At least two of the workshops must be taken in a single genre. In the writing workshops, students develop their critical and verbal abilities through close writing and analysis of poems, stories, and other literary forms. Their work is critiqued and evaluated by peers and the faculty.

Survey of Forms Courses (2 courses, 18 units)

76-260	Survey of Forms: Fiction	9
76-261	Survey of Forms: Creative Nonfiction	9
76-265	Survey of Forms: Poetry	9
76-269	Survey of Forms: Screenwriting	9

Note: A student must receive a grade of A or B in the Survey of Forms class in a specific genre in order to be eligible to enroll in a workshop of that genre. A student who receives a grade of C in a Survey of Forms course may enroll in a related workshop only with the permission of the workshop professor. A student who receives a D or R in Survey of Forms may not take a workshop in that genre.

Creative Writing Workshops (4 courses, 36 units)

Complete four Creative Writing workshops, at least two in a single genre. Workshops in all genres may be taken more than once for credit.

76-365	Beginning Poetry Workshop	9
76-366	Beginning Fiction Workshop	9
76-460	Beginning Fiction Workshop	9
76-462	Advanced Fiction Workshop	9
76-464	Creative Nonfiction Workshop	9
76-465	Advanced Poetry Workshop	9
76-469	Advanced Screenwriting Workshop	9
76-4xx	Elective Workshops (various forms)	9

English Electives (3 courses, 27 units)

Complete three courses from the English Department's offerings. Reading in Forms classes are recommended, as is 76-306 Editing and Publishing. Please consult the list of courses published each semester by the Department for current offerings. Students should discuss curriculum choices with the Creative Writing advisor to determine the best electives for their focus in Creative Writing.

Decision Science Concentration (81 units minimum)

Decision Science is grounded in theories and methods drawn from psychology, economics, philosophy, statistics, and management science. Courses in the BHA concentration in Decision Science cover the three aspects of decision science: (a) normative analysis, creating formal models of rational choice; (b) descriptive research, studying how cognitive,

emotional, social, and institutional factors affect judgment and choice, and (c) prescriptive interventions, seeking to improve judgment and decision making. In addition to gaining a broad education in the principles of judgment and decision making, students with a concentration in Decision Science gain broadly applicable skills in research design and analysis. They also have the chance to think about and discuss decision making in many different areas.

Disciplinary Perspectives (5 courses, 45 units)

85-211	Cognitive Psychology	9
88-120	Reason, Passion and Cognition (freshman or sophomore year)	9
88-220	Policy Analysis I	9
88-223	Decision Analysis and Decision Support Systems	9
88-302	Behavioral Decision Making	9

Research Methods (2 courses, 18 units)

36-202	Statistical Methods	9
88-251	Empirical Research Methods	9

Electives (2 courses, 18 units)

Complete at least 18 units from the following categories of courses. The selected courses may be from one category or from any combination of categories. Note that not all elective courses are offered every year. At least one of these courses (9 units) must be a Department of Social and Decision Sciences course (88-xxx).

Biological and Behavioral Aspects of Decision Making:

85-352	Evolutionary Psychology	9
85-377	Attitudes and Persuasion	9
85-442	Health Psychology	9
88-360	Behavioral Economics	9
88-365	Behavioral Economics and Public Policy	9
88-388	Psychological Models of Decision Making	9
88-421	Emotion: Physiology, Neurobiology, Expression, and Decision Making	9
88-442	Decision Science in Intergroup Conflict	9

Managerial and Organizational Aspects of Decision Making:

70-311	Organizational Behavior	9
or 88-260	Organizations	
70-381	Marketing I	9
70-460	Mathematical Models for Consulting	9
88-221	Policy Analysis II	9
88-419	Negotiation	9
88-444	Public Policy and Regulation	9
88-451	Policy Analysis Senior Project	12
or 88-452	Policy Analysis Senior Project	

Philosophical and Ethical Perspectives on Decision Making:

19-426	Environmental Decision Making	9
80-208	Critical Thinking	9
80-221	Philosophy of Social Science	9
80-241	Ethical Judgments in Professional Life	9
80-245	Medical Ethics	9
80-305	Rational Choice	9
80-321	Causation, Law, and Social Policy	9

Economic and Statistical Methods for Decision Science:

70-460	Mathematical Models for Consulting	9
73-347	Game Theory for Economists	9
80-337	Philosophy, Politics & Economics	9
80-405	Game Theory*	9
88-316	Game Theory*	9
88-360	Behavioral Economics	9
88-367	Behavioral Economics in the Wild	9
88-387	Social Norms and Economics	9

* 80-405 and 88-316 are different courses and are not cross-listed.

Decision Science and Public Policy:

88-221	Policy Analysis II	9
88-365	Behavioral Economics and Public Policy	9

88-405	Risk Perception and Communication	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
88-444	Public Policy and Regulation	9
88-451	Policy Analysis Senior Project	12
or 88-452	Policy Analysis Senior Project	

Research Methods for Decision Science:

36-303	Sampling, Survey and Society	9
70-460	Mathematical Models for Consulting	9
88-252	Causal Inference in the Field: Using Data to Study Crime, Love, Sports & More	9
88-388	Psychological Models of Decision Making	9
88-402	Modeling Complex Social Systems	9
88-435	Decision Science and Policy	9

Economics Concentration (81 units minimum)

The BHA concentration in Economics provides a solid understanding of economic theory and quantitative economic analysis. The introductory core disciplinary sequences in economic theory and quantitative analysis rely on a knowledge base of calculus and statistics. The advanced data analysis component pays additional attention to ordinal data and the study of surveys. Students also study political, historical, cultural, and social institutions within an economic context.

Mathematics Pre-requisites

These courses are not counted as part of your DC Concentration. They may be used to satisfy general education or free elective requirements.

21-120	Differential and Integral Calculus	10
21-256	Multivariate Analysis	9

Economic Theory Requirements (27 units)

73-100	Principles of Economics	9
73-230	Intermediate Microeconomics	9
73-270	Writing for Economists	9

Quantitative Analysis Requirements (27 units)

These courses require 36-201 Statistical Reasoning and Practice as a pre-requisite; 36-201 fulfills a general education Deciding requirement, as well.

36-202	Statistical Methods	9
36-303	Sampling, Survey and Society	9
73-240	Intermediate Macroeconomics	9

Advanced Economics Electives (18 units)

Students must take two advanced elective courses. Advanced elective courses are those numbered 73-300 through 73-495 (excluding 73-374 Econometrics II, 73-407 Fundamentals of Statistical Modeling, and 73-450 Economics Colloquium) as well as courses designated by the program offered by other departments/programs. Additionally, students may work with their economics advisor to structure alternative sets of courses to meet these requirements based on their particular interests, subject to course availability.

Senior Project (9 units)

Students will take the Senior Project course in conjunction with the 52-401 BXA Seminar IV: Capstone Fall course in the fall of their senior year.

73-497	Senior Project	9
--------	----------------	---

English Concentration (81 units minimum)

The BHA concentration in English is distinctive in drawing from the artistic and research strengths of the Department's faculty in Literary and Cultural Studies, Rhetoric, and Creative Writing. Literary and Cultural Studies focuses on the way texts are formally constructed and how they function in historical and contemporary contexts. Creative Writing helps students focus on language as a tool to explore and depict experience. Rhetoric focuses on the principles through which writers construct texts and audiences respond to them. Drawing from all of these perspectives, students with a Concentration in English learn the research skills and writing strategies to enable them to analyze the language and texts of other writers and to report their research in effective texts of their own. Such training can prepare students for graduate work in literature, cultural studies, or rhetoric, and also for careers in law, business, or government, which require similar skills in interpretation, research, and writing.

Introductory Courses (2 courses, 18 units)

The 200-level core courses are designed to introduce students to writing in a variety of genres, to a knowledge of literary and other media forms, and to a basic theoretical knowledge of how texts are produced and interpreted. In the Interpretive Practices course, students are introduced to basic concepts, methods, and practices of literary and rhetorical approaches to texts. In the Survey of Forms course, students learn how to use language to express experience through poetic and narrative forms.

76-26X	Survey of Forms (Nonfiction, Fiction, Poetry, Screenwriting)	9
76-294	Interpretive Practices	9

Research Course (1 course, 9 units)

Research in English offers training in gathering information systematically and in building arguments based on that information. Students will hone their skills in reading texts, using critical commentary, assessing print and electronic materials, and conducting interviews and surveys. They will learn how to test their hypotheses against alternatives and present their research to audiences within the discipline of English. The historical or thematic content of this course will vary from one semester to another. While 76-394 is not a pre-requisite for 400-level courses, it is strongly recommended that students with a BHA concentration in English take this course in their junior year.

76-394	Research in English	9
--------	---------------------	---

Rhetoric Course (1 course, 9 units)

Complete one course from a set of varied offerings in Rhetoric as designated each term by the English Department. Rhetoric courses focus explicitly on language and discourse as objects of study and emphasize the relationships of language, text structure, and meaning within specific contexts.

300-Level Courses (2 courses, 18 units)

Complete two 300-level courses that investigate the production and interpretation of texts and other media from a variety of periods and theoretical and methodological perspectives. Course offerings that meet these requirements are advertised on a semester-by-semester basis. For students with a BHA Concentration in English, 76-294 Interpretive Practices is a prerequisite for these courses. Course options include but are not limited to the following:

76-321	History of the British Novel	9
76-327	Influential Women Writers	9
76-334	Literature of Wall Street	9
76-339	Topics in Film Studies	9
76-341	Gender and Sexuality in Performance	9
76-350	History of Critical Ideas: Reading and Spectatorship	9
76-3xx	Any 300 level course with advisor approval	9

400-Level Courses (2 courses, 18 units)

Complete two 400-level seminar courses that investigate a specific topic in depth and allow students to work on a major research-based paper. Courses in this category will be advertised on a semester-by-semester basis. For students with a BHA Concentration in English, 76-294 Interpretive Practices is a prerequisite and 76-394 Research in English is pre- or co-requisite. Among current course offerings, examples include but are not limited to the following:

76-414	Politics, Media, and Romantic Literature 1789-1830	9
76-430	Arthurian Romance and Its Modern Legacy	9
76-439	Seminar in Film and Media Studies	9
76-445	John Milton: Poetry, Paradise, and Revolution	9
76-453	Literature of Empire	9
76-4xx	Any 400 level course with advisor approval	9

Period Course Requirement

The period course requirement is not a separate course requirement per se but one that needs to be met through the selection of the required 300- and 400-level courses. At least two of these four required courses must be "period" courses, that is, courses that focus on texts that are connected in time and place or through common social concerns. One of these two courses must focus on a historical period prior to 1900. Courses in this category will vary from year to year and be advertised on a semester-by-semester basis. Such courses may be at either the 300- or 400-level.

Elective Course (1 course, 9 units)

Complete one course from the English Department's offerings. This course may be at the 200-, 300-, or 400-level. Electives may include any courses

offered by the English Department with the exception of courses designed for non-majors. Some semester offerings may include cross-listed courses from Modern Languages or History.

Environmental Studies Concentration (81 units minimum)

The concentration in Environmental Studies focuses on human-environment interactions from a multitude of disciplinary perspectives. The curriculum draws on the expertise of faculty across several Carnegie Mellon colleges in order to provide students with the interdisciplinary background and skills necessary to understand environmental problems and the means to mitigate them. It emphasizes three general areas: (1) natural science and technology; (2) social sciences; and (3) the humanities. The flexible curriculum features training in research methods; a set of core courses on fundamental environmental issues including energy, pollution, and biological diversity; and a project course experience geared toward policy formulation. It is recommended that students take 21-111 Calculus I and 36-202 Statistical Methods as prerequisites for higher-level coursework.

Note that some courses carry prerequisites and/or reserve seats for primary majors. Students interested in pursuing the concentration must meet beforehand with the faculty director and their BHA academic advisor in order to map out a course of study. Students are encouraged to be alert to new course offerings; every effort will be made to find equivalent courses that meet student interest when done in consultation with the faculty director.

Foundation of Environmental Sciences (18 units minimum)

Complete one required science course:

03-121	Modern Biology	9
--------	----------------	---

Choose one of the following courses:

03-124	Modern Biology Laboratory (co-requisite: 03-121)	9
03-125	Evolution	9
09-103	Atoms, Molecules and Chemical Change	9
09-105	Introduction to Modern Chemistry I	10
09-106	Modern Chemistry II	10

Disciplinary Perspectives (18 units)

Choose two of the following courses:

09-510	Chemistry and Sustainability	9
73-148	Environmental Economics	9
76-319	Environmental Rhetoric	9
79-374	American Environmental History: Critical Issues	9

Thematic Electives (15 units minimum)

Choose two of the following courses:

12-100	Introduction to Civil and Environmental Engineering	12
19-101	Introduction to Engineering and Public Policy	12
19-424	Energy and the Environment	9
60-203	Concept Studio: EcoArt	10
76-395	Science Writing	9
79-372	Perspectives on the Urban Environment	9
79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9
80-348	Health Development and Human Rights	9
88-223	Decision Analysis and Decision Support Systems	9
88-302	Behavioral Decision Making	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
90-765	Cities, Technology and the Environment	6
90-798	Environmental Policy & Planning	12
90-808	Energy Policy	6
90-xxx	Heinz College courses (open to seniors)	

Research and Analytical Methods (18 units)

Choose two of the following courses:

36-309	Experimental Design for Behavioral and Social Sciences	9
79-380	Ethnographic Methods	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9
88-220	Policy Analysis I	9

88-251	Empirical Research Methods	9
88-252	Causal Inference in the Field: Using Data to Study Crime, Love, Sports & More	9
88-432	International Policy Decision Modeling Workshop	9

Project Course (12 units)

Complete one of the following courses:

19-451	EPP Projects (pre-approved sections)	12
19-452	EPP Projects	12

Ethics, History, & Public Policy Concentration (81 units minimum)

The BHA concentration in Ethics, History, & Public Policy (EHPP) provides students with a rigorous, interdisciplinary humanistic and social-scientific education. The concentration in EHPP encourages the development of a broad technical skill set that will benefit students in whatever career they ultimately choose to pursue. Students with a concentration in EHPP learn how to analyze and construct arguments; to evaluate evidentiary statements; to persuade people to agree with their particular claims; to conduct research under time and resource constraints; and to craft policies that address real world problems in a way that is sensitive both to history and competing sets of values. Comprised of courses in the departments of History, Philosophy, Economics, and Decision Science, the BHA concentration in EHPP encourages specialization, internship experiences, and research in a wide range of policy areas.

Economics Requirement (1 course, 9 units)

Choose one of the following courses:

73-100	Principles of Economics	9
88-220	Policy Analysis I	9

History Core (3 courses, 27 units)

Required History Core Courses:

79-200	Introduction to Historical Research	9
79-300	History of American Public Policy	9

Choose one Survey Course:

US Survey		
79-240	The Development of American Culture	9
Non-US Survey		
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-224	Mayan America	9
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-233	The United States and the Middle East since 1945	9
79-235	Caribbean Cultures	9
79-237	Comparative Slavery	9
79-251	India/America: Democracy, Diversity, Development	9
79-255	Irish History	6
79-256	20th Century Germany	9
79-257	Germany and the Second World War	9
79-258	French History: From the Revolution to De Gaulle	9
79-259	France During World War II	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9

79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9

Philosophy Core (3 courses, 27 units)

Choose one course from three of the four categories below. No more than 18 units at the 100-level may be counted toward this requirement.

Ethics (9 units):

80-130	Introduction to Ethics	9
80-230	Ethical Theory	9

Political Philosophy (9 units):

80-135	Introduction to Political Philosophy	9
80-235	Political Philosophy	9

Foundations of Social Science (9 units):

80-221	Philosophy of Social Science	9
80-321	Causation, Law, and Social Policy	9
80-337	Philosophy, Politics & Economics	9

Applied Philosophy (9 units):

80-136	Social Structure, Public Policy & Ethics	9
80-241	Ethical Judgments in Professional Life	9
80-244	Environmental Ethics	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
80-341	Computers, Society and Ethics	9
80-344	Management, Environment, and Ethics	9
80-348	Health Development and Human Rights	9
80-447	Global Justice	9

Elective Courses (2 courses, 18 units)

Choose any two courses from any of the following categories.

Engineering and Public Policy:

19-424	Energy and the Environment	9
19-426	Environmental Decision Making	9
19-448	Science, Technology & Ethics	9

Business:

70-311	Organizational Behavior	9
70-321	Negotiation and Conflict Resolution	9
70-332	Business, Society and Ethics	9
70-364	Business Law	9
70-365	International Trade and International Law	9
70-430	International Management	9

Economics:

73-148	Environmental Economics	9
73-310	Evolution of Economic Ideas and Analysis	9
73-358	Economics of the Environment and Natural Resources	9
73-359	Benefit-Cost Analysis	9
73-365	Firms, Market Structures, and Strategy	9
73-372	International Money and Finance	9
73-375	History of Money and Monetary Policy	9
73-408	Law and Economics	9
73-476	American Economic History	9

English:

76-492	Rhetoric of Public Policy	9
--------	---------------------------	---

History:

79-221	Development and Democracy in Latin America	9
79-231	American Foreign Policy: 1945-Present	9
79-233	The United States and the Middle East since 1945	9
79-242	African American History: Reconstruction to the Present	9

79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9
79-303	Pittsburgh and the Transformation of Modern Urban America	6
79-320	Women, Politics, and Protest	9
79-331	Body Politics: Women and Health in America	9
79-339	Juvenile Delinquency and Film (1920 to "The Wire")	9
79-342	Introduction to Science and Technology Studies	9
79-359	Terrorism and U.S. National Security	6
79-371	African American Urban History	9
79-374	American Environmental History: Critical Issues	9
79-383	Epidemics, Disease, and Public Health	9
79-389	Stalin and Stalinism	9

Philosophy:

80-241	Ethical Judgments in Professional Life	9
80-256	Modern Moral Philosophy	9
80-305	Rational Choice	9
80-341	Computers, Society and Ethics	9
80-344	Management, Environment, and Ethics	9
80-405	Game Theory	9

Social and Decision Sciences:

84-104	Decision Processes in American Political Institutions	9
88-223	Decision Analysis and Decision Support Systems	9
88-343	Economics of Technological Change	9
88-345	Perspectives on Industrial Research and Development	9
88-347	Complex Technological Systems: Past, Present, and Future	9
88-371	Entrepreneurship, Regulation and Technological Change	9
88-387	Social Norms and Economics	9
88-423	Institutions, Entrepreneurship, and Innovation	9
88-444	Public Policy and Regulation	9

Note: Other elective courses may be approved at the discretion of the EHPP faculty advisor and should be noted on a student's DC Concentration Sheet.

Film & Media Studies Concentration (81 units minimum)

Film and the electronic media have become a crucial part of contemporary culture and society; they constitute an important tool for understanding social arrangements, historical changes, and play an increasingly important role in the development of aesthetic and cultural theory. The BHA concentration in Film & Media Studies takes an interdisciplinary approach to the study of film and other electronic media. Courses provide techniques for analyzing and criticizing film and other media, for assessing their value as historical, anthropological and social scientific data, and for understanding the aesthetic and philosophical premises of various media texts. In addition, students may take courses in the processes of film-making, offered through special arrangement with the Pittsburgh Filmmakers (a non-profit media arts center, operating since 1971, that provides workshops, seminars, screenings, exhibitions, and training programs in the media and photographic arts).

The courses listed below are offered with at least general regularity. Participating departments may subsequently develop and offer other courses that, while not listed here, are deemed appropriate for this minor. The minor faculty advisor should be consulted (especially when the schedule of courses to be offered for a given semester becomes available) to identify such additional courses.

Introductory Course (9 units)

76-239	Introduction to Film Studies	9
--------	------------------------------	---

Required Intermediate Course (9 units)

76-339	Topics in Film Studies (May be taken up to three times and counted for additional credit toward Intermediate Courses if topics differ.)	9
--------	--	---

Intermediate Courses (27 units)

Complete a minimum of 27 units of course work, chosen in any combination from the following three categories.

Film and the Study of Society:

76-238	Introduction to Media Studies	9
--------	-------------------------------	---

Film and Anthropology:

79-278	Rights to Representation: Indigenous People and their Media	9
--------	---	---

Filmmaking:

76-269	Survey of Forms: Screenwriting	9
FM 200	Documentary Production (please go to CFA 100 to register for this course)	9

Other 200 or 300 level courses in English, History, and Modern Languages can be counted in this category when their primary topic is film and media. Please consult the Film & Media Studies faculty advisor.

Advanced Courses (36 units)

Complete four advanced courses that concentrate on film directly or that use it as a tool of social or cultural analysis.

FM 301	Advanced Filmmaking (please go to CFA 100 to register for this course)	9
76-438	Film and Media Studies: Television	9
76-439	Seminar in Film and Media Studies	9
76-469	Advanced Screenwriting Workshop	9
82-491	Topics in Twentieth-Century Russian Literature	Var.

Global Studies Concentration (81 units minimum)

The BHA concentration in Global Studies is designed for students interested in humanistic approaches to understanding past and present processes of globalization. Participating faculty in the departments of History, Modern Languages, and English conduct research in Africa, Asia, Europe, Latin America, the Middle East, and the Pacific. The rigorous yet flexible Global Studies curriculum combines anthropology, history, literary and cultural studies, and advanced language training in order to help students make sense of complex interactions among global processes, regional and local cultures, and societal structures. BHA concentration students in Global Studies develop a broad understanding of their prospects and responsibilities as citizens of the world confronting challenging contemporary problems.

There are two required courses for the concentration: Introduction to Global Studies (79-275) and Advanced Seminar in Global Studies (79-400). Students also choose among several courses focused on theory, research methods, transnational histories, and regional/national histories and cultures. Demonstrating intermediate to advanced level proficiency in a language other than English is a crucial component of the major in Global Studies.

In addition to coursework at Carnegie Mellon, BHA students with a concentration in Global Studies are encouraged to incorporate a semester of study abroad into their course of study in order to immerse themselves in society different from their own with unfamiliar cultural practices, language, and history.

Students should consult frequently with the BHA advisor, the Global Studies academic program manager, and with participating faculty who will help students to craft a coherent course of study on specific topics and/or regions that may lead to the capstone research project (79-400 Advanced Seminar in Global Studies), the BXA capstone project (52-401 and 52-402) or a Dietrich College senior honors thesis (<http://hss.cmu.edu/seniorhonorsprogram.html>). Program faculty and the academic program manager will also work with students to connect their academic interests and their participation in student organizations and/or organizations based in Pittsburgh with transnational reach.

Global Studies Introductory and Capstone Courses (2 courses, 21 units)

Students must earn a final grade of "C" or better for these courses to count toward the major.

79-275	Introduction to Global Studies	9
79-400	Advanced Seminar in Global Studies	12

Language Requirement

Demonstrating intermediate to advanced level proficiency in a language other than English is a crucial component of the concentration in Global Studies. Normally this requirement can be satisfied by successfully completing a course conducted in the second language at the 300-level or above for French, German, Italian, or Spanish, or the fourth semester

(Intermediate II) level or above for Arabic, Chinese, Japanese, or Russian. Comparable proficiency for other languages can be considered. Additional advanced cultural, historical, and literary study in the second language is strongly recommended. Courses in a language other than English may also be counted as Global Studies transnational, global, regional courses or Global Studies electives as appropriate.

Theoretical and Topical Core Courses (2 courses, 18 units)

To gain a solid foundation in the theories, methods, and analytical topics underpinning the concentration in Global Studies, students select 18 units (typically two courses) from the core courses listed below. Students must earn a final grade of "C" or better in these courses to fulfill the theoretical and topical core course requirement.

76-453	Literature of Empire	9
76-497	Culture: Interdisciplinary Approaches	9
79-200	Introduction to Historical Research	9
79-278	Rights to Representation: Indigenous People and their Media	9
79-297	Dilemmas and Controversies in Anthropology	9
79-314	The Politics and Culture of Memory	9
79-317	Art, Anthropology, and Empire	9
79-318	Sustainable Social Change: History and Practice	6
79-332	Medical Anthropology	9
79-355	Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective	9
79-376	Doing Transnational History	9
79-377	Food, Culture, and Power: A History of Eating	9
79-380	Ethnographic Methods	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9

Transnational, Global, and Regional Courses (3 courses, 27 units)

To gain insight into how complex transnational and global processes shape and are affected by local, national, and regional dynamics, students will select 27 units (typically three courses) from any subcategories below.

Transnational and Global Courses:

76-322	Global Masala: South Asians in the Diaspora	9
76-353	Global Studies	9
76-440	Postcolonial Theory: Diaspora and Transnationalism	9
76-448	The Global Renaissance	9
79-224	Mayan America	9
79-233	The United States and the Middle East since 1945	9
79-237	Comparative Slavery	9
79-251	India/America: Democracy, Diversity, Development	9
79-254	The Jewish Diaspora in Latin America	9
79-276	Beyond the Border	6
79-282	Europe and the World since 1800	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9
79-289	Animal Planet: An Environmental History of People and Animals	6
79-295	Race Relations in the Atlantic World	9
79-299	Trafficking Persons: Children in a Global Context	9
79-310	From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present	9
79-312	International Human Rights Institutions in Theory and Practice	6
79-342	Introduction to Science and Technology Studies	9
79-383	Epidemics, Disease, and Public Health	9
79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9
79-385	The Making of the African Diaspora	9
80-348	Health Development and Human Rights	9
80-447	Global Justice	9
82-304	The Francophone World	9
82-345	Introduction to Hispanic Literary and Cultural Studies	9
84-326	Theories of International Relations	9

Regional Courses:

Africa		
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
Eastern and Southern Asia and the Pacific		
76-354	South Asian Literature	9
79-211	East Asia in the World, 1600-Present	9
79-264	Tibet in History and Imagination	9
82-431	China and the West	9
88-411	Rise of the Asian Economies	9
Europe		
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-268	World War I: The Twentieth Century's First Catastrophe	9
79-323	Family, Gender, and Sexuality in European History, 500-1800	9
82-320	Contemporary Society in Germany, Austria and Switzerland	9
82-323	Germany, Austria and Switzerland in the 20th Century	9
82-415/416	Topics in French and Francophone Studies	9
82-441	Studies in Peninsular Literature and Culture	9
The Middle East		
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-307	Religion and Politics in the Middle East	9
79-398	Documenting the 1967 Arab-Israeli War	9
82-300	Topics in Cross-Cultural Studies	9
The Americas		
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-223	Mexico: From the Aztec Empire to the Drug War	9
79-235	Caribbean Cultures	9
82-343	Latin America: Language and Culture	9
82-451	Studies in Latin American Literature and Culture	9
82-455/456	Topics in Hispanic Studies	9
<u>Electives</u> (2 courses, 15 units minimum)		
Students are required to take an additional 15 units (typically two courses) of electives, selected from one or both of the subcategories below. "Theoretical and Topical Core Courses" and "Transnational, Global, and Regional Courses" listed above that are not used to fulfill those requirements may be counted as electives in addition to the courses listed below.		
Those students who wish to pursue an optional Global Studies Senior Thesis (9 units) as one of their electives may do so by arrangement with Global Studies faculty; the thesis will often involve work in a language other than English. This option is not to be confused with the two-semester Dietrich College Senior Honors Thesis, for graduating with college-level honors.		
Thematic Courses:		
70-365	International Trade and International Law	9
76-241	Introduction to Gender Studies	9
76-318	Communicating in the Global Marketplace	9
76-386	Language & Culture	9
76-450	Literary and Cultural Theory: Law, Culture, and the Humanities	9
79-201	Introduction to Anthropology	9
79-281	Introduction to Religion	9
79-296	Perspectives on Social Protest	9

79-298	Mobile Phones & Social Media in Development & Human Rights: A Critical Appraisal	6
79-301	History of Surveillance: From the Plantation to Edward Snowden	6
79-330	Medicine and Society	9
79-349	The Holocaust in Historical Perspective	9
79-506	Global Studies Internship	9
80-244	Environmental Ethics	9
80-247	Ethics and Global Economics	9
80-335	Deliberative Democracy: Theory and Practice	9
80-344	Management, Environment, and Ethics	9
82-215	Introduction to Modern Arabic Literature and Culture	Var.
82-311	Arabic Language and Culture I	9
82-312	Arabic Language and Culture II	9
82-358	Literacies Across Language and Culture	9
82-541	Special Topics: Hispanic Studies	Var.
84-275	Comparative Politics	9
84-310	International Political Economy and Organizations	9
84-362	Diplomacy and Statecraft	9
88-410	The Global Economy: A User's Guide	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9

Nation-based Courses:

76-337	Intro to Ethnic American Studies	9
79-231	American Foreign Policy: 1945-Present	9
79-315	Hawai'i: America's Pacific Island State	9
79-320	Women, Politics, and Protest	9
79-331	Body Politics: Women and Health in America	9
82-344	U.S. Latinos: Language and Culture	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
82-333	Introduction to Chinese Language and Culture	Var.
82-433	Topics in Contemporary Culture of China	9
82-434	Studies in Chinese Traditions	9
82-440	Studies in Chinese Literature & Culture	9
79-258	French History: From the Revolution to De Gaulle	9
79-259	France During World War II	9
82-303	Introduction to French Culture	9
82-305	French in its Social Contexts	9
79-257	Germany and the Second World War	9
79-326	German History through Film	9
82-327	The Emergence of the German Speaking World	9
82-425	Topics in German Literature and Culture	9
82-427	Nazi and Resistance Culture	9
82-428	History of German Film	Var.
79-319	India through Film	6
79-255	Irish History	6
82-361	Italian Language and Culture I	9
82-362	Italian Language and Culture II	9
82-273	Introduction to Japanese Language and Culture	9
82-278	Japanese Film and Literature: The Art of Storytelling	9
82-473	Topics in Japanese Studies	9
82-474	Topics in Japanese Studies	9
82-253	Korean Culture Through Film	9
82-254	World of Korea, Then and Now	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-389	Stalin and Stalinism	9
82-293	Introduction to Russian Culture	9
82-294	Topics in Russian Language and Culture	9
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
82-342	Spain: Language and Culture	9

International Relations and Politics Concentration (81 units minimum)

The International Relations and Politics (IRP) BHA concentration analyzes the role of politics at the national, regional, international, and transnational levels; examines political and institutional arrangements within and among these levels; and investigates the grand strategy of nation-states.

Statesmen, scholars, and policy makers often define grand strategy as the combination of diplomatic, economic, military, and political factors used by leaders to defend their respective nation-states. The IRP major investigates the way in which leaders and citizens construct grand strategy and national security policy more generally; the impact of domestic and international forces on states' security and economic policies; and the significance of alliances, coalitions, and international institutions for world politics.

Although the study of grand strategy and political institutions is the flagship initiative of the concentration, students are also able to study the effects of culture, economics, and society on the international system through a rich set of elective courses.

Thinking systematically about international and domestic politics is the core objective of the IRP concentration. The concentration is rooted in the discipline of political science but also utilizes the interdisciplinary strengths of behavioral decision science, complex social systems, economics, strategy, entrepreneurship and technological change, and political history. Thus, students pursuing this concentration will use the analytic tools of game theory, economic and statistical analysis, qualitative analysis, rational choice theory, and theories of behavioral decision making as they study alliances, coalitions, institutions, and political strategy.

Recognizing the influence of language and culture on politics, students are required to complete the intermediate (200) level, or its equivalent, in a modern language other than English. Advanced-level study is strongly encouraged.

Open to all Carnegie Mellon undergraduates, the Carnegie Mellon University Washington Semester Program (CMU/WSP) allows students to study public policy and intern in Washington for one semester. Courses taken through CMU/WSP will count toward the elective sequence in public policy for IRP concentration.

Students' understanding of politics is further informed by courses and colloquia offered by CMU's top-ranked departments, divisions, and schools in business, computer science, engineering, and the humanities.

IRP students interested in developing their research skills are encouraged to apply for a research position with the Center for International Relations and Politics. They are also encouraged to join student organizations focused on domestic or international politics. Becoming involved in the Institute for Politics and Strategy, as well as attending lectures and events sponsored by the Center for International Relations and Politics will provide additional opportunities for students.

The International Relations and Politics concentration is offered through the Institute for Politics and Strategy.

Core Courses (6 courses, 54 units)

84-104	Decision Processes in American Political Institutions	9
84-265	Political Science Research Methods	9
84-275	Comparative Politics	9
84-326	Theories of International Relations	9
36-202	Statistical Methods	9
73-100	Principles of Economics	9
or 88-220	Policy Analysis I	

Language Requirement

BHA students are required to complete the intermediate (200) level or the equivalent in a modern language other than English. This Language Requirement may be satisfied by the BHA General Education Modern Languages requirement if the 200-level is reached. Advanced level study is strongly encouraged.

Electives (3 courses, 27 units minimum)

International Relations and Politics BHA students will either:

Option 1) take 27 units (three courses) from the elective lists below. Students must take two courses (18 units) from the Grand Strategy and Political Institutions category. The remaining one course (9 units) must come from the Economics and Society or International Cultures categories. At least two courses (18 units) must be from the Institute for Politics and Strategy (84-xxx).

Grand Strategy and Political Institutions (2 courses, 18 units)

19-609 Public Policy and Regulation

19-662	Special Topics: Technology and Development in China & India	12	88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9	88-413	Energy and Climate: History, Science, Technology, & Policy in the US 1776-2076	9
79-218	United States and the World	9	88-419	Negotiation	9
79-231	American Foreign Policy: 1945-Present	9	88-423	Institutions, Entrepreneurship, and Innovation	9

300 or 400- level language course (at most one for this category)		

OR

Option 2) complete the majority of their electives via the Carnegie Mellon University Washington Semester Program (CMU/WSP) Public Policy elective sequence. Any elective units not fulfilled during CMU/WSP may be completed through coursework from the Grand Strategy and Political Institutions elective list.

The Washington Semester Program (CMUWSP) Public Policy Elective Sequence includes:

• Internship Seminar	12
• Policy Forum	12
• Core Seminar	12
• Elective Seminar	12

A list of CMU/WSP Core and Elective Seminars may be found in the CMU/WSP section of the undergraduate catalog (p. 282).

Japanese Studies Concentration (81 units minimum)

A BHA concentration in Japanese Studies promotes not just language proficiency but also an understanding of Japanese culture. Students who arrive at Carnegie Mellon with previous language study and/or who have high Advanced Placement, an International Baccalaureate, a Cambridge GCE Advanced level, or internal placement exam scores will be able to begin taking courses in the concentration earlier in their undergraduate program. In all cases, progress in the concentration will be accelerated by study abroad, which is recommended for all students.

Prerequisites

Low-intermediate level proficiency in Japanese. This is equivalent to the completion of three courses (two at the 100-level and one at the 200-level) or exemption based on internal placement test scores.

Core Courses in Japanese (36-39 units)

82-272	Intermediate Japanese II *	12
82-273	Introduction to Japanese Language and Culture	9
82-371	Advanced Japanese I	9
82-372	Advanced Japanese II	9

* Placement out of 82-272 is possible. For students who place out of 82-272, a minimum of 9 additional units must be taken from the Japanese Electives of the "Japanese Studies and Interdisciplinary Electives" category below.

Core Courses in Modern Languages (12 units)

Complete one 9 unit course plus the Senior Seminar (3 units).

82-280	Learning About Language Learning	9
82-281	Tutoring for Community Outreach	Var.
82-282	Community Service Learning	Var.
82-358	Literacies Across Language and Culture	9
82-383	Second Language Acquisition: Theories and Research	9
82-388	Understanding Second Language Fluency	9
82-480	Social and Cognitive Aspects of Bilingualism	9
82-580	Senior Seminar in Modern Languages	3

Japanese Studies and Interdisciplinary Electives (33 units minimum)

Complete three courses from Japanese Electives and one course from Interdisciplinary Electives, or a minimum of two courses from Japanese Electives and two courses from Interdisciplinary Electives in consultation with the Japanese advisor. One course from Interdisciplinary Electives must be chosen from the History department courses, or with permission of the advisor students can instead complete at least one Japanese history course at the University of Pittsburgh (e.g., Modern Japan, Popular Religion in a Changing Japan, and Modern East Asia), one in Japan when they study abroad, or in a summer program at any other university.

Japanese Electives:

82-373	Structure of the Japanese Language	9
--------	------------------------------------	---

82-374	Technical Japanese	9
82-473/474	Topics in Japanese Studies (Students may repeat with new topics.)	9
82-476	Japanese Discourse Analysis	9
82-505	Undergraduate Internship	Var.
82-571/572	Special Topics: Japanese Studies	Var.

Interdisciplinary Electives:

This list is compiled from possibilities such as but not limited to the following. Students should consult OLR and the advisor for the most up to date interdisciplinary electives appropriate for the Japanese Studies curriculum. Courses may be suggested to the advisor for approval as a substitute.

English		
76-239	Introduction to Film Studies	9
76-386	Language & Culture	9
76-387	Narrative & Argument	9

History		
79-211	East Asia in the World, 1600-Present	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-275	Introduction to Global Studies	9

Modern Languages

82-278	Japanese Film and Literature: The Art of Storytelling	9
82-280	Learning About Language Learning	9
82-281	Tutoring for Community Outreach	Var.
82-282	Community Service Learning	Var.
82-358	Literacies Across Language and Culture	9
82-373	Structure of the Japanese Language	9
82-374	Technical Japanese	9
82-383	Second Language Acquisition: Theories and Research	9
82-388	Understanding Second Language Fluency	9
82-480	Social and Cognitive Aspects of Bilingualism	9

Music

57-306	World Music	6
--------	-------------	---

Philosophy

80-180	Nature of Language	9
80-280	Linguistic Analysis	9
80-281	Language and Thought	9
80-380	Philosophy of Language	9

Psychology

85-375	Crosscultural Psychology	9
85-421	Language and Thought	9

Social and Decision Science

88-384	Conflict and Conflict Resolution in International Relations	9
--------	---	---

Linguistics Concentration (81 units minimum)

The BHA concentration in Linguistics combines courses from the departments of English, Modern Languages, Philosophy and Psychology and the Language Technologies Institute. Linguistics is the study of human language, and it encompasses a broad spectrum of research questions, approaches and methodologies. Some linguists are concerned with the cognitive aspects of language learning, production and comprehension; some are concerned with language as a social and cultural phenomenon; others engage in the analysis of linguistic form and meaning, some from a functional and others from a formal perspective. There are also computational approaches to linguistics with both applied and theoretical goals.

Introductory Course (1 course, 9 units)

80-180	Nature of Language	9
--------	--------------------	---

Fundamental Skills Courses (2 courses, 18 units)

Take one course each in two of the following three areas:

Sounds:

80-282 Phonetics and Phonology I 9

Structure:

76-389 Rhetorical Grammar 9
80-280 Linguistic Analysis 9
80-285 Natural Language Syntax 9

Meaning:

76-385 Introduction to Discourse Analysis 9
80-381 Meaning in Language 9
80-383 Language in Use 9

Breadth Courses (2 courses, 18 units)

Take one course from each of the following two areas:

Language Learning and Language Cognition:

76-420 Process of Reading and Writing 9
82-280 Learning About Language Learning 9
82-383 Second Language Acquisition: Theories and Research 9
82-585 Topics in Second Language Acquisition 9
85-354 Infant Language Development 9
85-421 Language and Thought 9

Discourse, Society and Culture:

76-318 Communicating in the Global Marketplace 9
76-385 Introduction to Discourse Analysis 9
76-386 Language & Culture 9
82-273 Introduction to Japanese Language and Culture 9
82-305 French in its Social Contexts 9
82-311 Arabic Language and Culture I 9
82-312 Arabic Language and Culture II 9
82-333 Introduction to Chinese Language and Culture 9

Elective Courses (4 courses, 36 units)

Take four additional electives. These can be additional courses from the Fundamental Skills courses or Breadth courses listed above, or any other course which must be approved by the Director as a linguistics elective. Listed below are the additional electives taught on a regular basis. Additional appropriate courses are offered irregularly or on a one-off basis. The Director will provide students with a list of possible electives each semester, and will assist students in selecting electives which are consistent with their goals and interests. A list of these courses must be filed in the BXA office.

11-411 Natural Language Processing 12
11-716 Graduate Seminar on Dialog Processing 6
11-721 Grammars and Lexicons 12
11-722 Grammar Formalisms 12
11-761 Language and Statistics 12
11-762 Language and Statistics II 12
15-492 Special Topic: Speech Processing 12
76-373 Argument 9
76-378 Literacy: Educational Theory and Community Practice 9
76-451 Topics in Language Study 9
76-476 Rhetoric of Science 9
80-281 Language and Thought 9
80-283 Syntax and Discourse 9
80-284 Invented Languages 9
80-286 Words and Word Formation: Introduction to Morphology 9
80-287 Historical and Comparative Linguistics 9
80-380 Philosophy of Language 9
80-382 Phonetics and Phonology II 9
80-384 Linguistics of Turkic Languages 9
80-385 Linguistics of Germanic Languages 9
82-373 Structure of the Japanese Language 9
82-388 Understanding Second Language Fluency 9
82-442 Analysis of Spoken Spanish 9
82-444 The Structure of Spanish 9
82-476 Japanese Discourse Analysis 9

82-480 Social and Cognitive Aspects of Bilingualism 9

Language Requirement

Students must successfully complete two semesters of consecutive language courses. Students may not test out of this requirement. However, language courses taken at other institutions or as part of a study abroad program will typically substitute for a semester of language study.

Professional Writing Concentration (81 units minimum)

Professional Writing combines liberal and professional education with a strong foundation in rhetorical studies. The concentration in Professional Writing has a strong career orientation and is specifically designed to prepare students for successful careers as writers and communications specialists in a range of fields: publishing, government, journalism, the non-profit sector, education, public and media relations, corporate communications, advocacy writing, and the arts. The concentration is designed to develop articulate and reflective communications professionals with both the skills needed to enter and negotiate current work contexts (including writing for the web and other digital media) and the analytic and problem-solving skills needed to understand and keep pace with cultural and technological change.

Foundation Courses (4 courses, 36 units)

76-26x Survey of Forms (Nonfiction, Fiction, Poetry, or Screenwriting) 9
76-271 Introduction to Professional and Technical Writing 9
76-373 Argument 9
76-390 Style 9

Rhetoric/Language Studies Course (1 course, 9 units)

Students with a concentration in Professional Writing complete one course from designated Rhetoric courses offered and advertised each semester by the English Department. Rhetoric courses focus on understanding the role of language and language practices in both personal and professional contexts. Courses emphasize the relationships between texts and their contexts and pay particular attention to textual features, meaning, processes of reading and writing, and the ways in which language practices vary over time and across situations and cultures. The courses also equip students with explicit techniques for analyzing, understanding, and exploring language practices. The Rhetoric/Language Studies courses may also be taken as part of the concentration requirements for three additional, Advanced Writing/Rhetoric courses and include but are not limited to the following list.

76-319 Environmental Rhetoric 9
76-351 Rhetorical Invention 9
76-355 Leadership, Dialogue, and Change 9
76-373 Argument 9
76-386 Language & Culture 9
76-390 Style 9
76-396 Non-Profit Advocacy: Genres, Methods, and Issues 9
76-428 Visual Verbal Communication 9
76-476 Rhetoric of Science 9
76-484 Discourse Analysis 9
76-491 Rhetorical Analysis 9

Advanced Writing/Rhetoric Courses (3 courses, 27 units minimum)

Students with a concentration in Professional Writing complete three Advanced Writing/Rhetoric courses at the 300- or 400-level. Options for these courses include all of the Rhetoric/Language Studies courses listed above plus the writing-focused courses listed below. Additional courses that fulfill these requirements are advertised on a semester-by-semester basis. For help in choosing which of the possible options are most appropriate for various professional goals – journalism, writing for new media, editing and publishing, public relations/corporate communications, or science and technical writing – consult your English Department advisor and the “Selected Core Courses & Electives for PW Majors” advising sheet available through the English Department. All students with a concentration in PW, regardless of their career focus, are encouraged to take 76-391 Document & Information Design and 76-487 Web Design (in conjunction with the 3-unit 76-488 Web Design Lab) to extend their skills in writing for print to include information design for digital media. Both courses focus on the role of the writer in these specializations and provide lab instruction in the relevant software and related computer skills.

76-301 Internship Var.
76-302 Global Communication Center Practicum 9

76-319	Environmental Rhetoric	9
76-351	Rhetorical Invention	9
76-355	Leadership, Dialogue, and Change	9
76-372	News Writing	9
76-375	Magazine Writing	9
76-386	Language & Culture	9
76-389	Rhetorical Grammar	9
76-391	Document & Information Design	12
76-396	Non-Profit Advocacy: Genres, Methods, and Issues	9
76-428	Visual Verbal Communication	9
76-476	Rhetoric of Science	9
76-481	Writing for Multimedia	12
76-484	Discourse Analysis	9
76-487	Web Design	12
76-491	Rhetorical Analysis	9

English Elective (1 course, 9 units)

Students with a concentration in Professional Writing complete one additional course from the English Department's offerings. This course should be one that focuses on the relationships between texts and their cultural and historical contexts. Courses in literature, cultural studies, rhetoric, and media studies that meet this requirement are advertised on a semester-by-semester basis. The English Elective may be any course offered by the Department with the exception of 76-270 Writing for the Professions and 76-272 Language in Design, both of which are designed for non-majors and overlap with 76-271 Introduction to Professional and Technical Writing. Students with a concentration in PW are additionally encouraged to supplement their PW coursework with 76-300 Professional Seminar (3 units) to learn more about internship and career options in professional writing. 76-300 meets once per week and is offered every fall semester.

Psychology Concentration (81 units minimum)

Psychology is a science that embraces both biological and social sciences. It is a science concerned with establishing principles and laws regarding the ways in which people think, feel, and behave through the scientific study of human behavior. Students with a concentration in Psychology are expected not only to learn about findings already established by psychologists, but also to become proficient in the investigation and analysis of behavior. This includes observing behavior, formulating hypotheses, designing experiments to test these hypotheses, running experiments, performing statistical analyses, and writing reports.

Breadth Courses (4 courses, 36 units)

To gain familiarity with the breadth of the field of Psychology, students take 85-102 Introduction to Psychology and three survey courses.

Required Intro Course:

85-102	Introduction to Psychology	9
--------	----------------------------	---

Survey Courses:

85-211	Cognitive Psychology	9
or 85-213	Human Information Processing and Artificial Intelligence	
85-219	Biological Foundations of Behavior	9
85-221	Principles of Child Development	9
85-241	Social Psychology	9
85-251	Personality	9

Research Methods and Statistics (2 courses, 18 units)

Students complete one course in Research Methods (9 units). The corresponding survey course is a prerequisite for this course.

85-310	Research Methods in Cognitive Psychology	9
85-314	Cognitive Neuroscience Research Methods	9
85-320	Research Methods in Developmental Psychology	9
85-330	Analytic Research Methods	9
85-340	Research Methods in Social Psychology	9

The following Statistics course is a prerequisite or co-requisite for all the Research Methods courses. This Statistics course counts toward the Psychology concentration.

36-309	Experimental Design for Behavioral and Social Sciences -Fall	9
--------	--	---

Advanced Courses (3 courses, 27 units)

Complete any three advanced courses or seminars in Psychology numbered higher than 85-341 (excepting 85-480, 85-482, 85-484, 85-505, 85-506, 85-507, 85-508).

Social & Political History Concentration (81 units minimum)

The BHA concentration in Social & Political History focuses on new ways to understand the past and new ways to use what we know, as well as on connections between past and present and on how historical knowledge facilitates understanding of social, cultural, and policy change. The History concentration emphasizes empirical methods and conceptual analysis, as well as specific research skills relevant to many types of jobs and further professional training. The History concentration combines a structured sequence of courses, training in research methods, theoretical concepts, and analytical writing skills, plus a considerable array of electives.

The BHA concentration in Social & Political History emphasizes broad-based, cumulative knowledge and interpretive skills in the study of the past. Offerings at the 200- and 300-level are designed to allow maximum flexibility in meeting requirements and maximum choice in focusing on particular themes, places, or eras. Upper-level courses aim to give students majoring in History more time together in smaller classes and more experience working with primary and secondary sources. The senior capstone seminar, Advanced Studies in History, provides training and experience in conducting original research and in interpretive, analytical writing—skills that prepare graduates for professional careers as well as for graduate or law school.

Options available in the following areas: 1) General Social & Political History, 2) US History 3) Regional or Non-US History

Required Courses for All Concentration Options (2 courses, 21 units)

79-200	Introduction to Historical Research -Sophomore or Junior year	9
79-420	Historical Research Seminar -Fall, Senior year	12

Work with History Advisor to Approve Concentration Option (60 units minimum):

General Social & Political History Required Courses (1 course, 9 units)

Required US Survey Course:

79-240	The Development of American Culture	9
--------	-------------------------------------	---

Choose one (9 units) Non-US Survey Course:

79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-224	Mayan America	9
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-233	The United States and the Middle East since 1945	9
79-235	Caribbean Cultures	9
79-237	Comparative Slavery	9
79-251	India/America: Democracy, Diversity, Development	9
79-255	Irish History	6
79-256	20th Century Germany	9
79-257	Germany and the Second World War	9
79-258	French History: From the Revolution to De Gaulle	9
79-259	France During World War II	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-267	The Soviet Union in World War II: Military, Political, and Social History	9

79-272 Iberian Encounters: Muslims, Christians, and Jews in Spain 9

A minimum of 42 additional History units must be approved with the History advisor. Any History courses not fulfilling another major requirement may be chosen as an elective.

US History Required Courses (1 course, 9 units)

Required US Survey Course:

79-240 The Development of American Culture 9

Choose one (9 units) Non-US Survey Course:

79-202 Flesh and Spirit: Early Modern Europe, 1400-1750 9

79-205 20th Century Europe 9

79-207 Development of European Culture 9

79-221 Development and Democracy in Latin America 9

79-222 Between Revolutions: The Development of Modern Latin America 9

79-224 Mayan America 9

79-225 West African History in Film 9

79-226 African History: Earliest Times to 1780 9

79-227 African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid 9

79-229 Origins of the Arab-Israeli Conflict, 1880-1948 9

79-230 Arab-Israeli Conflict and Peace Process since 1948 9

79-233 The United States and the Middle East since 1945 9

79-235 Caribbean Cultures 9

79-237 Comparative Slavery 9

79-251 India/America: Democracy, Diversity, Development 9

79-255 Irish History 6

79-256 20th Century Germany 9

79-257 Germany and the Second World War 9

79-258 French History: From the Revolution to De Gaulle 9

79-259 France During World War II 9

79-261 Chinese Culture and Society 9

79-262 Modern China 9

79-264 Tibet in History and Imagination 9

79-265 Russian History: From the First to the Last Tsar 9

79-266 Russian History: From Communism to Capitalism 9

79-267 The Soviet Union in World War II: Military, Political, and Social History 9

79-272 Iberian Encounters: Muslims, Christians, and Jews in Spain 9

Choose three (27 units) US History Courses:

79-231 American Foreign Policy: 1945-Present 9

79-233 The United States and the Middle East since 1945 9

79-241 African American History: Africa to the Civil War 9

79-242 African American History: Reconstruction to the Present 9

79-243 The Civil War in American Memory 6

79-244 Women in American History 9

79-245 Capitalism and Individualism in American Culture 9

79-246 Industrial America 9

79-247 The Civil War Era: 1848-1877 9

79-249 20th Century U.S. History 9

79-251 India/America: Democracy, Diversity, Development 9

79-252 Recent U.S. History, 1945-Present 9

79-288 Bananas, Baseball, and Borders: Latin America and the United States 9

79-300 History of American Public Policy 9

79-303 Pittsburgh and the Transformation of Modern Urban America 6

79-304 African Americans in Pittsburgh 6

79-315 Hawai'i: America's Pacific Island State 9

79-318 Sustainable Social Change: History and Practice 6

79-320 Women, Politics, and Protest 9

79-328 Photographers and Photography Since World War II 9

79-330 Medicine and Society 9

79-331 Body Politics: Women and Health in America 9

79-339 Juvenile Delinquency and Film (1920 to "The Wire") 9

79-340 Juvenile Delinquency and Juvenile Justice 9

79-342 Introduction to Science and Technology Studies 9

79-343 History of American Urban Life 9

79-345 The Roots of Rock and Roll 9

79-346 American Political Humor 9

79-348 Abraham Lincoln at 200 9

79-357 History of Black American Music 6

79-371 African American Urban History 9

79-372 Perspectives on the Urban Environment 9

79-374 American Environmental History: Critical Issues 9

79-383 Epidemics, Disease, and Public Health 9

79-395 The Arts in Pittsburgh 9

A minimum of 15 additional History units must be approved with the History advisor. Any History courses not fulfilling another major requirement may be chosen as an elective.

Regional or Non-US History Required Courses (2 courses, 18 units)

Choose two (18 units) Required Survey Courses:

79-202 Flesh and Spirit: Early Modern Europe, 1400-1750 9

79-203 Social and Political Change in 20th Century Central and Eastern Europe 9

79-205 20th Century Europe 9

79-207 Development of European Culture 9

79-221 Development and Democracy in Latin America 9

79-222 Between Revolutions: The Development of Modern Latin America 9

79-224 Mayan America 9

79-225 West African History in Film 9

79-226 African History: Earliest Times to 1780 9

79-227 African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid 9

79-229 Origins of the Arab-Israeli Conflict, 1880-1948 9

79-230 Arab-Israeli Conflict and Peace Process since 1948 9

79-233 The United States and the Middle East since 1945 9

79-240 The Development of American Culture 9

79-251 India/America: Democracy, Diversity, Development 9

79-255 Irish History 6

79-256 20th Century Germany 9

79-258 French History: From the Revolution to De Gaulle 9

79-261 Chinese Culture and Society 9

79-262 Modern China 9

79-264 Tibet in History and Imagination 9

79-265 Russian History: From the First to the Last Tsar 9

79-266 Russian History: From Communism to Capitalism 9

Choose three (27 units) Regional History Courses:

African Diaspora

79-222 Between Revolutions: The Development of Modern Latin America 9

79-225 West African History in Film 9

79-226 African History: Earliest Times to 1780 9

79-227 African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid 9

79-235 Caribbean Cultures 9

79-237 Comparative Slavery 9

79-241 African American History: Africa to the Civil War 9

79-242 African American History: Reconstruction to the Present 9

79-291 Globalization in East African History 6

79-295 Race Relations in the Atlantic World 9

79-304	African Americans in Pittsburgh	6
79-357	History of Black American Music	6
79-371	African American Urban History	9
79-385	The Making of the African Diaspora	9
79-386	Entrepreneurs in Africa, Past, Present and Future	9
East Asia		
79-251	India/America: Democracy, Diversity, Development	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-309	20th Century China Through Film	9
Europe		
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-255	Irish History	6
79-256	20th Century Germany	9
79-257	Germany and the Second World War	9
79-258	French History: From the Revolution to De Gaulle	9
79-259	France During World War II	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
79-323	Family, Gender, and Sexuality in European History, 500-1800	9
79-326	German History through Film	9
79-341	The Cold War in Documents and Film	9
79-352	Christendom Divided: The Protestant and Catholic Reformation, 1450-1650	9
79-353	Religious Identities and Religious Conflicts in 19th Century Europe	9
79-362	Law and Disorder in Early Modern Europe, 1400-1800	9
79-389	Stalin and Stalinism	9
Latin America		
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-224	Mayan America	9
79-235	Caribbean Cultures	9
79-237	Comparative Slavery	9
79-254	The Jewish Diaspora in Latin America	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9
79-295	Race Relations in the Atlantic World	9
Middle East		
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-233	The United States and the Middle East since 1945	9
79-307	Religion and Politics in the Middle East	9
79-398	Documenting the 1967 Arab-Israeli War	9
Russia and the Former Soviet States		
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-341	The Cold War in Documents and Film	9
79-389	Stalin and Stalinism	9

A minimum of 15 additional History units must be approved with the History advisor. Any History courses not fulfilling another major requirement may be chosen as an elective.

III. College of Fine Arts Concentration

(number of courses vary, 108 units minimum)

BHA students choose one of the following concentrations:

- Architecture (108 units)
- Art (108 units)
- Design (108 units)
- Drama (108 units)
- Music (108 units)

Architecture Concentration (108 units minimum)

Architecture Required Courses (52 units minimum)

48-100	Architecture Design Studio: Foundation I -Fall, Freshman year	10-12
or 48-095	Spatial Concepts for Non-Architects I	
48-120	Digital Media I -Fall, Freshman year	6
48-121	Analog Media I -Fall, Freshman year	6
48-125	Digital Media II -Spring, Freshman year	6
48-126	Analog Media II -Spring, Freshman year	6
48-240	Historical Survey of World Architecture and Urbanism I -Spring, Freshman year	9
48-241	Modern Architecture -Fall, Sophomore year	9

Architecture Electives (56 units minimum)

A minimum of 56 additional Architecture units must be approved by the Architecture advisor. A list of these selected courses must be filed in the BXA office.

Art Concentration (108 units minimum)

PORTFOLIO REVIEW REQUIRED FOR ADMISSION

Concept Studios (2 courses, 20 units)

Complete two courses:

60-101	Concept Studio: The Self and the Human Being	10
60-201	Concept Studio: Space and Time	10
60-202	Concept Studio: Systems and Processes	10
60-203	Concept Studio: EcoArt	10
60-204	Concept Studio: Networked Narrative	10

Media Studios (3 courses, 30 units)

Complete three courses:

60-150	2D Media Studio: Drawing	10
60-160	2D Media Studio: Imaging	10
60-250	2D Media Studio: Painting	10
60-251	2D Media Studio: Print Media	10
60-130-60-130	3-D Media Studio I-I (complete two minis, 5 units each)	10
60-131-60-131	3D Media Studio II-II (complete two minis, 5 units each)	10
60-110	Electronic Media Studio: Introduction to the Moving Image	10
60-210	Electronic Media Studio: Introduction to Interactivity	10

Advanced Studios (4 courses, 40 units)

Complete four courses. Courses may be offered in the fall and/or spring. Students may take courses in any media area (ETB, SIS, CP or DP3). They may take all courses in one media area if a focus is desired.

60-401/402	Senior Studio	10
60-403	Extended Studio	10
60-410 - 60-429	Advanced Electronic and Time-Based Work (ETB)	10
60-430 - 60-447	Advanced Sculpture, Installation and Site-Work (SIS)	10
60-448 - 60-449	Advanced Contextual Practice (CP)	10
60-450 - 60-498	Advanced Drawing, Painting, Print Media and Photography (DP3)	10
60-499	Studio Independent Study (one only)	10

Art History/Theory (2 courses, 18 units)

60-205	Modern Visual Culture 1789-1960 -Fall	9
60-206	Contemporary Visual Culture 1960 - Present - Spring	9

Review Requirement (complete 2 required reviews, 0 units)

A review is required at the end of the sophomore and senior years. Pass/no pass only.

60-200	Sophomore Review -Spring	0
60-400	Senior Review -Fall	0

Design Concentration (108 units minimum)

PORTFOLIO REVIEW REQUIRED FOR ADMISSION

Design Required Courses (96 units)

51-101	Studio: Survey of Design -Fall, Freshman year	9
51-103	Design Workshop I -Fall, Freshman year	3
51-121	Visualizing -Fall, Freshman year	9
51-171	Placing -Fall, Freshman year	9
51-102	Design Lab -Spring, Freshman year	9
51-104	Design Workshop II -Spring, Freshman year	3
51-122	Collaborative Visualizing -Spring, Freshman year	9
51-172	Systems -Spring, Freshman year	9

Choose Two Studios:

51-225	Communications Studio I: Understanding Form & Context -Fall, Sophomore year	4.5, 4.5
or 51-245	Products Studio I: Understanding Form & Context	
or 51-265	Environments Studio I: Understanding Form & Context	

Choose Two Corresponding Labs:

51-227	Prototyping Lab I: Communications -Fall, Sophomore year	4.5, 4.5
or 51-247	Prototyping Lab I: Products	
or 51-267	Prototyping Lab I: Environments	
51-271	How People Work -Fall, Sophomore year	9
51-371	Futures -Fall, Junior year or later	9

Design Electives (12 units minimum)

A minimum of 12 additional Design units must be approved by the Design advisor. A list of these selected courses must be filed in the BXA office.

Drama Concentration (108 units minimum)

AUDITION/INTERVIEW REQUIRED FOR DIRECTING OR DRAMATURGY CONCENTRATION OPTION. PORTFOLIO REVIEW/INTERVIEW REQUIRED FOR DESIGN OR PRODUCTION TECHNOLOGY AND MANAGEMENT CONCENTRATION OPTION.

Options available in the following areas: 1) Design, 2) Directing, 3) Dramaturgy, 4) Production Technology & Management

There is no BHA Acting or Musical Theatre option.

Required Courses for All Concentration Options (20 units)

54-175-54-176	Conservatory Hour-Conservatory Hour (1 unit each)	2
54-177	Foundations of Drama I	6
or 54-178	Foundations of Drama I	
54-281	Foundations of Drama II (prerequisite: 54-177 or 54-178)	6
or 54-282	Foundations of Drama II	
54-381	Special Topics in Drama: History, Literature and Criticism	6

Work with Drama Faculty Option Coordinator to Approve Concentration Option (88 units minimum):

Design Required Courses (26 units)

54-151-54-152	Stagecraft-Stagecraft (15 units + 11 units)	26
---------------	---	----

A minimum of 62 additional Design units must be approved by the Design faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Directing Required Courses (52 units)

54-121-54-122	Directing I: Sources-Directing I: Sources	18
---------------	---	----

54-221-54-222	Directing II: Fundamentals-Directing II: Fundamentals	18
54-159-54-160	Production Symposium I-I	12
54-517-54-518	Director's Colloquium-Director's Colloquium (four times, 4 units total)	2

A minimum of 36 additional Directing units must be approved by the Directing faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Dramaturgy Required Courses (53 units minimum)

54-109	Dramaturgy 1: Approaches to Text	9
54-184	Dramaturgy 2: Introduction to Production Dramaturgy	9
54-121	Directing I: Sources	9
54-160	Production Symposium I -Spring	6
54-200-54-200	Dramaturgy Forum-Dramaturgy Forum -Fall (minimum of two; every semester it is offered while enrolled)	2
54-xxx	Dramaturgy 3, 4, 5 or 6 (minimum of two; all four if enrolled as BXA for six semesters or more)	18

A minimum of 35 additional Dramaturgy units must be approved by the Dramaturgy faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Production Technology and Management Required Courses (26 units)

54-151-54-152	Stagecraft-Stagecraft (15 units + 11 units)	26
---------------	---	----

A minimum of 62 additional PTM units must be approved by the PTM faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Music Concentration (108 units minimum)

AUDITION REQUIRED FOR PERFORMANCE CONCENTRATION OPTION. PORTFOLIO REVIEW/INTERVIEW REQUIRED FOR COMPOSITION, MUSICOLOGY, OR MUSIC TECHNOLOGY CONCENTRATION OPTION.

Options available in the following areas: 1) Performance (instrumental, piano, organ, voice), 2) Composition 3) Musicology, 4) Music Technology

Required Course for All Concentration Options (9 units)

57-152	Harmony I -Fall	9
or 57-149	Basic Harmony I	

Work with Music Advisor to Approve Concentration Option (99 units minimum):

Performance and Composition Required Courses (76 units)

57-161	Eurhythmics I -Fall (recommended co-requisite: 57-181)	3
57-181	Solfège I -Fall	3
or 57-180	Basic Solfège I	
or 57-185	Advanced Solfège I	
57-173	Survey of Western Music History -Fall (co-requisite: 57-188)	9
57-188	Repertoire and Listening for Musicians	1
57-69x	BXA Studio (4 semesters)	36
57-xxx	Major Ensemble (4 semesters)	24

A minimum of 23 additional Music units must be approved by the Music advisor. A list of these selected courses must be filed in the BXA office.

Musicology Required Courses (45 units)

57-283	Music History I (co-requisite: 57-190)	9
57-284	Music History II (co-requisite: 57-289)	9
57-285	Music History III (co-requisite: 57-290)	9
57-189	Introduction to Repertoire and Listening for Musicians	3
57-190	Repertoire and Listening for Musicians I	3
57-289	Repertoire and Listening for Musicians II	3
57-290	Repertoire and Listening for Musicians III	3
57-611	Independent Study in History	6

Choose 36 units from:

57-209	The Beatles	9
57-306	World Music	6
57-412	Opera Since Wagner	9
57-414	Music and Nature	9
57-415	Mozart Operas	6
57-477	Music of the Spirit	6
57-478	Survey of Historical Recording	6
57-480	History of Black American Music	6

Graduate Musicology courses may be taken with instructor permission.

A minimum of 18 additional Music units must be approved by the Music advisor. A list of these selected courses must be filed in the BXA office.

Music Technology Required Courses (40 units)

57-101	Introduction to Music Technology	6
57-181	Solfege I -Fall	3
or 57-180	Basic Solfege I	
or 57-185	Advanced Solfege I	
57-173	Survey of Western Music History -Fall (co-requisite: 57-188)	9
57-188	Repertoire and Listening for Musicians	1
57-337	Sound Recording	6
57-347	Electronic and Computer Music	6
57-xxx	Independent Study in Music Technology or Sound Recording	9

Choose 36 units from:

33-114	Physics of Musical Sound	9
57-153	Harmony II -Spring	9
57-182	Solfege II -Spring	3
or 57-186	Advanced Solfege II	
57-283	Music History I (co-requisite: 57-190)	9
57-284	Music History II (co-requisite: 57-289)	9
57-285	Music History III (co-requisite: 57-290)	9
57-190	Repertoire and Listening for Musicians I	3
57-289	Repertoire and Listening for Musicians II	3
57-290	Repertoire and Listening for Musicians III	3
57-338	Sound Editing and Mastering	6
57-345	Hacking the Music World	9
57-438	Multitrack Recording	9
60-131	3D Media Studio II	5
60-210	Electronic Media Studio: Introduction to Interactivity	10

A minimum of 23 additional Music units must be approved by the Music advisor. A list of these selected courses must be filed in the BXA office.

IV. Free Electives

(approximately 9 courses, 78 units)

Take any Carnegie Mellon course. Many BHA students use their electives to broaden or deepen their concentrations. A maximum of 9 units of physical education and/or military science may be counted toward this requirement. Physical education and military science courses will not be calculated in a student's QPA.

Bachelor of Science and Arts Degree Program

Carnegie Mellon University recognizes that there are students who are naturally gifted in both the fine arts and the natural sciences or mathematics. In order to accommodate students who want to pursue an education simultaneously in these areas, we offer a degree that combines the strengths of the College of Fine Arts (CFA) and the Mellon College of Science (MCS). The intercollege degree, called the Bachelor of Science and Arts (BSA), is a rigorous program that offers a unique group of qualified

students the opportunity to develop their talents and interests in an area of the fine arts and an area of the natural sciences or mathematics.

The BSA curriculum is divided into three parts: 1) BSA General Education coursework, 2) CFA concentration coursework, and 3) MCS concentration coursework.

Students choose their fine arts concentration from among the five schools in CFA: Architecture, Art, Design, Drama or Music. A student must meet the entry requirements for the particular CFA school of their choice. While in the BSA Program, a student may change their CFA concentration only if they pass all admission requirements for that particular school.

Students choose their science concentration from among the four departments in MCS: Biological Sciences, Chemistry, Mathematical Sciences, Neurobiology, or Physics.

The BSA Degree Program is governed by faculty and administrators from both colleges and led by the director of the BXA Intercollege Degree Programs. The director and associate director of the BXA Intercollege Degree Programs are the primary advisors and liaisons between CFA and MCS. Students receive extensive advising support. Each student has two additional academic advisors: an advisor in the admitting school of CFA for their fine arts concentration, and an advisor in MCS for their natural sciences/mathematics concentration. This network of advisors guides each student through their curriculum.

BSA Curriculum

	Units
I. BSA General Education	129
II. MCS Concentration	114-134
III. CFA Concentration	108
IV. Free Electives	9-29
Total BSA Degree Requirements	380

I. BSA General Education

(18 courses, 129 units minimum)

- Mathematics (2 courses, 20 units, 21-120 and 21-122 or 21-124 required)
- Science (3 courses, 31 units, 03-121, 09-105, and 33-111 required)
- First-year Courses (2 courses, 12 units, 76-101 and 99-101 or 99-102 required)
- ENGAGE (3 courses, 3 units)
- Cultural/Global Understanding (1 course, 9 units)
- Humanities and Social Sciences (2 courses, 18 units)
- BXA Required Courses (5 courses, 36 units minimum, 52-190 and/or 52-291, 52-391, 52-392, 52-401, 52-402)

Technical Breadth Requirements (5 courses, 51 units)

As a 21st Century practicing scientist or mathematician, our graduates will work with others from a variety of technical backgrounds. Therefore, all of our students will be broadly trained within the technical fields of science and math. Students will fulfill this training by completing five (5) introductory technical courses in the Mellon College of Science at Carnegie Mellon University.

A student must take the five (5) courses listed below. AP/IB/Cambridge credit may be used to fulfill some of these requirements, but STEM electives must be taken at CMU or at another university for transfer credit to reach the total of five (5) Technical Breadth courses. A list of STEM electives can be found in the MCS general education requirements (p. 309).

Mathematics (2 courses, 20 units)

21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
or 21-124	Calculus II for Biologists and Chemists	

Science (3 courses, 31 units)

03-121	Modern Biology	9
09-105	Introduction to Modern Chemistry I	10
33-121	Physics I for Science Students	12

Nontechnical Breadth Requirements (8 courses, 42 units)

MCS aspires for all of our undergraduates to leave our campus with a strong sense of personal integrity, social responsibility, ethics, working with

diverse others, global engagement, and personal health and well-being. The following non-technical breadth requirements will require students to develop a personalized plan for their course selection and meta-curricular participation to maximize their CMU experience. Our graduates will be well trained to be life-long and life-wide learners that will lead the scientific community and the world at large.

All candidates for BSA degree must complete the following non-technical breadth requirements:

First-year Courses (2 courses, 12 units)

76-101	Interpretation and Argument (various topics by section) www.cmu.edu/hss/english/first_year/index.html	9
99-101 or 99-102	Computing @ Carnegie Mellon Computing @ Carnegie Mellon	3

ENGAGE (3 courses, 3 units)

The ENGAGE courses are self-directed learning opportunities (using the MyCORE online platform) designed to enhance students' engagement with wellness and community service. Choose three courses from the list below:

38-110	ENGAGE in Service	1
38-230	ENGAGE in Wellness: Looking Inward	1
38-330	ENGAGE in Wellness: Looking Outward	1
38-430	ENGAGE in Wellness: Looking Forward	1

Cultural/Global Understanding (1 course, 9 units)

Cultural or global understanding course(s) may be taken at any time. Nine (9) or more units from the following group of courses will fulfill this requirement. Any student who finds an appropriate Carnegie Mellon course not on the list below that might fulfill this requirement should contact their academic advisor to review the course description to determine if it can be substituted. Cultural and global understanding courses that are taken while studying abroad can be used to fulfill this category. In addition, transfer courses will also be considered for this category.

57-173	Survey of Western Music History	9
57-209	The Beatles	9
57-306	World Music	6
70-342	Managing Across Cultures	9
73-331	Political Economy of Inequality and Redistribution	9
76-221	Books You Should Have Read By Now	9
76-227	Comedy	9
76-232	Introduction to African American Literature	9
76-239	Introduction to Film Studies	9
76-241	Introduction to Gender Studies	9
76-386	Language & Culture	9
79-104	Global Histories	9
79-201	Introduction to Anthropology	9
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-221	Development and Democracy in Latin America	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-240	The Development of American Culture	9
79-241	African American History: Africa to the Civil War	9
79-242	African American History: Reconstruction to the Present	9
79-255	Irish History	6
79-261	Chinese Culture and Society	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-275	Introduction to Global Studies	9
79-281	Introduction to Religion	9
79-297	Dilemmas and Controversies in Anthropology	9
79-307	Religion and Politics in the Middle East	9
79-345	The Roots of Rock and Roll	9
79-349	The Holocaust in Historical Perspective	9
79-350	Early Christianity	9

79-355	Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective	9
79-357	History of Black American Music	6
79-377	Food, Culture, and Power: A History of Eating	9
80-100	Introduction to Philosophy	9
80-250	Ancient Philosophy	9
80-251	Modern Philosophy	9
80-253	Continental Philosophy	9
80-254	Analytic Philosophy	9
80-255	Pragmatism	9
80-276	Philosophy of Religion	9
82-xxx	Any course from Modern Languages	9
99-241	Revolutions of Circularity	9
99-3xx	Any of the Country Today courses	9

Humanities and Social Sciences (2 courses, 18 units)

To fulfill this requirement, students must complete a minimum of two (2) nontechnical courses totaling at least 18 units in the Tepper School of Business and/or the Dietrich College of Humanities and Social Sciences. Courses counted toward the Cultural/Global Understanding requirement, and 76-101, do not count toward this requirement.

Check our web site for courses from DC, CFA, and Tepper that may NOT be used (<http://www.cmu.edu/mcs/undergrad/advising/hss-finearts/deletions.html>) to satisfy this requirement because they are too technical in nature, plus a list of courses in other colleges (including SCS, CIT, Tepper, and Heinz College) that do satisfy (<http://www.cmu.edu/mcs/undergrad/advising/hss-finearts/additions.html>) this requirement.

BXA Required Courses (5 courses, 36 units minimum)

BXA-specific courses give students the opportunity to integrate their areas of concentration by focusing on interdisciplinary approaches and arts-based research techniques.

52-190	BXA Seminar I: Building the Wunderkammer	9
or 52-291	BXA Seminar II: Building BXA	
52-391	BXA Junior Portfolio	0
52-392	BXA Seminar III: Deconstructing Disciplines	9
52-401	BXA Seminar IV: Capstone Fall	9
52-402	BXA Seminar V: Capstone Spring	9

II. Mellon College of Science Concentration

(number of courses vary, 114-134 units)

BSA students choose one of the following concentrations:

- Biological Sciences (117 units)
- Chemistry (121 units)
- Mathematical Sciences (122 units)
- Neurobiology (114 units)
- Physics (134 units)

Biological Sciences Concentration (117 units minimum)

Biological Sciences Required Courses (99 units minimum)

03-231	Biochemistry I	9
or 03-232	Biochemistry I	
03-240	Cell Biology	9
03-330	Genetics	9
03-124	Modern Biology Laboratory	9
or 03-343	Experimental Techniques in Molecular Biology	
03-201/202	Undergraduate Colloquium for Sophomores	2
09-106	Modern Chemistry II	10
09-217	Organic Chemistry I	9
09-218	Organic Chemistry II	9
09-221	Laboratory I: Introduction to Chemical Analysis	12
09-222	Laboratory II: Organic Synthesis and Analysis*	12
or 03-344	Experimental Biochemistry	
or 03-345	Experimental Cell and Developmental Biology	
or 03-346	Experimental Neuroscience	
33-122	Physics II for Biological Sciences and Chemistry Students	9

* Students must complete 03-343 if they wish to take 03-344/5/6.

Biological Sciences Electives (2 courses, 18 units)

One course must be an advanced elective selected from 03-3xx or higher, excluding 03-445.

Chemistry Concentration (121 units minimum)

Chemistry Required Courses (103 units)

09-106	Modern Chemistry II	10
09-219	Modern Organic Chemistry	10
09-220	Modern Organic Chemistry II	10
09-214	Physical Chemistry	9
or 09-344	Physical Chemistry (Quantum): Microscopic Principles of Physical Chemistry	
or 09-345	Physical Chemistry (Thermo): Macroscopic Principles of Physical Chemistry	
09-348	Inorganic Chemistry	10
09-221	Laboratory I: Introduction to Chemical Analysis	12
09-222	Laboratory II: Organic Synthesis and Analysis	12
09-321	Laboratory III: Molecular Design and Synthesis	12
or 09-323	Bioorganic Chemistry Laboratory	
09-204	Professional Communication Skills in Chemistry	3
09-201-09-202	Undergraduate Seminar I - Undergraduate Seminar II: Safety and Environmental Issues for Chemists - Undergraduate Seminar III	3
09-402	Undergraduate Seminar VI	3
33-122	Physics II for Biological Sciences and Chemistry Students	9

Advanced Chemistry Electives (2 courses, 18 units)

May be any upper level chemistry course, 09-3xx or higher, or Biochemistry I, 03-231 or 03-232, with the exception of 09-435 Independent Study, which can be used only by permission of the Director of Undergraduate Studies.

Mathematical Sciences Concentration (122 units minimum)

Mathematical Sciences Required Courses (86 units minimum)

(Reasonable substitutions within the core program will be allowed.)

15-110	Principles of Computing	10
21-127	Concepts of Mathematics (prerequisite for 15-211)	10
21-228	Discrete Mathematics	9
21-241	Matrices and Linear Transformations	10
or 21-341	Linear Algebra	
21-259	Calculus in Three Dimensions	9
21-260	Differential Equations	9
or 33-231	Physical Analysis	
21-355	Principles of Real Analysis I	9
21-373	Algebraic Structures	9
33-142	Physics II for Engineering and Physics Students	12
or 33-152	Matter and Interactions II	

Mathematical Sciences Electives (2 courses, 18 units)

Students with a music focus should take 21-372 Partial Differential Equations and Fourier Analysis.

Mathematical Sciences, Statistics, or Computer Science Electives (2 courses, 18 units)

May be computer science course above the 100-level, mathematical science courses beyond the calculus sequence, and statistics courses at the level of 36-225 or higher.

Neurobiology Concentration (114 units minimum)

Neurobiology Required Courses (12 courses, 96 units)

03-362	Cellular Neuroscience	9
09-217	Organic Chemistry I	9
33-122	Physics II for Biological Sciences and Chemistry Students	9
85-211	Cognitive Psychology	9
85-219	Biological Foundations of Behavior	9
or 03-161	Molecules to Mind	
03-363	Systems Neuroscience	9

03-201	Undergraduate Colloquium for Sophomores	2
03-231	Biochemistry I	9
03-240	Cell Biology	9
03-330	Genetics	9
03-342	Introduction to Biological Laboratory Practices	1
03-343	Experimental Techniques in Molecular Biology	12

Neurobiology Electives (2 courses, 18 units)

One course must be an advanced elective selected from 03-3xx or higher.

Physics Concentration (134 units minimum)

Physics Required Courses (116 units)

21-259	Calculus in Three Dimensions	9
33-104	Experimental Physics	9
33-142	Physics II for Engineering and Physics Students	12
or 33-152	Matter and Interactions II	
33-201	Physics Sophomore Colloquium I -Fall	2
33-202	Physics Sophomore Colloquium II -Spring	2
33-211	Physics III: Modern Essentials	10
33-228	Electronics I	10
33-231	Physical Analysis	10
33-232	Mathematical Methods of Physics	10
33-234	Quantum Physics	10
33-301	Physics Upperclass Colloquium I -Fall	1
33-302	Physics Upperclass Colloquium II -Spring	1
33-331	Physical Mechanics I	10
33-338	Intermediate Electricity and Magnetism I	10
33-340	Modern Physics Laboratory	10
33-341	Thermal Physics I	10

Physics Electives (2 courses, 18 units)

Two courses to be pre-approved by the Physics Department.

33-xxx	Two Physics Electives	18
--------	-----------------------	----

Note: 33-114 Physics of Musical Sound (9 units) is highly recommended for students with a Music concentration.

III. College of Fine Arts Concentration

(number of courses vary, 108 units minimum)

BSA students choose one of the following concentrations:

- Architecture (108 units)
- Art (108 units)
- Design (108 units)
- Drama (108 units)
- Music (108 units)

Architecture Concentration (108 units minimum)

Architecture Required Courses (52 units minimum)

48-100	Architecture Design Studio: Foundation I-Fall, Freshman year	10-12
or 48-095	Spatial Concepts for Non-Architects I	
48-120	Digital Media I-Fall, Freshman year	6
48-121	Analog Media I -Fall, Freshman year	6
48-125	Digital Media II -Spring, Freshman year	6
48-126	Analog Media II -Spring, Freshman year	6
48-240	Historical Survey of World Architecture and Urbanism I -Spring, Freshman year	9
48-241	Modern Architecture -Fall, Sophomore year	9

Architecture Electives (56 units minimum)

A minimum of 56 additional Architecture units must be approved by the Architecture advisor. A list of these selected courses must be filed in the BXA office.

Art Concentration (108 units minimum)

PORTFOLIO REVIEW REQUIRED FOR ADMISSION

Concept Studios (2 courses, 20 units)

Complete two courses:

60-101	Concept Studio: The Self and the Human Being	10
60-201	Concept Studio: Space and Time	10
60-202	Concept Studio: Systems and Processes	10
60-203	Concept Studio: EcoArt	10
60-204	Concept Studio: Networked Narrative	10

Media Studios (3 courses, 30 units)

Complete three courses:

60-150	2D Media Studio: Drawing	10
60-160	2D Media Studio: Imaging	10
60-250	2D Media Studio: Painting	10
60-251	2D Media Studio: Print Media	10
60-130-60-130	3-D Media Studio I-I (complete two minis, 5 units each)	10
60-131-60-131	3D Media Studio II-II (complete two minis, 5 units each)	10
60-110	Electronic Media Studio: Introduction to the Moving Image	10
60-210	Electronic Media Studio: Introduction to Interactivity	10

Advanced Studios (4 courses, 40 units)

Complete four courses. Courses may be offered in the fall and/or spring. Students may take courses in any media area (ETB, SIS, CP or DP3). They may take all courses in one media area if a focus is desired.

60-401/402	Senior Studio	10
60-403	Extended Studio	10
60-410 - 60-429	Advanced Electronic and Time-Based Work (ETB)	10
60-430 - 60-447	Advanced Sculpture, Installation and Site-Work (SIS)	10
60-448 - 60-449	Advanced Contextual Practice (CP)	10
60-450 - 60-498	Advanced Drawing, Painting, Print Media and Photography (DP3)	10
60-499	Studio Independent Study (one only)	10

Art History/Theory (2 courses, 18 units)

60-205	Modern Visual Culture 1789-1960 -Fall	9
60-206	Contemporary Visual Culture 1960 - Present - Spring	9

Review Requirement (Complete 2 required reviews, 0 units)

A review is required at the end of the sophomore and senior years. Pass/no pass only.

60-200	Sophomore Review -Spring	0
60-400	Senior Review -Fall	0

Design Concentration (108 units minimum)

PORTFOLIO REVIEW REQUIRED FOR ADMISSION

Design Required Courses (96 units)

51-101	Studio: Survey of Design -Fall, Freshman year	9
51-103	Design Workshop I -Fall, Freshman year	3
51-121	Visualizing -Fall, Freshman year	9
51-171	Placing -Fall, Freshman year	9
51-102	Design Lab -Spring, Freshman year	9
51-104	Design Workshop II -Spring, Freshman year	3
51-122	Collaborative Visualizing -Spring, Freshman year	9
51-172	Systems -Spring, Freshman year	9

Choose Two Studios:

51-225	Communications Studio I: Understanding Form & Context -Fall, Sophomore year	4.5, 4.5
or 51-245	Products Studio I: Understanding Form & Context	
or 51-265	Environments Studio I: Understanding Form & Context	

Choose Two Corresponding Labs:

51-227	Prototyping Lab I: Communications -Fall, Sophomore year	4.5, 4.5
--------	---	----------

or 51-247	Prototyping Lab I: Products	
or 51-267	Prototyping Lab I: Environments	
51-271	How People Work -Fall, Sophomore year	9
51-371	Futures -Fall, Junior year or later	9

Design Electives (12 units minimum)

A minimum of 12 additional Design units must be approved by the Design advisor. A list of these selected courses must be filed in the BXA office.

Drama Concentration (108 units minimum)

AUDITION/INTERVIEW REQUIRED FOR DIRECTING OR DRAMATURGY CONCENTRATION OPTION. PORTFOLIO REVIEW/INTERVIEW REQUIRED FOR DESIGN OR PRODUCTION TECHNOLOGY AND MANAGEMENT CONCENTRATION OPTION.

Options available in the following areas: 1) Design, 2) Directing, 3) Dramaturgy, 4) Production Technology and Management

There is no BSA Acting or Musical Theatre option.

Required Courses for All Concentration Options (20 units)

54-175-54-176	Conservatory Hour-Conservatory Hour (1 unit each)	2
54-177	Foundations of Drama I	6
or 54-178	Foundations of Drama I	
54-281	Foundations of Drama II (prerequisite: 54-177 or 54-178)	6
or 54-282	Foundations of Drama II	
54-381	Special Topics in Drama: History, Literature and Criticism	6

Work with Drama Faculty Option Coordinator to Approve Concentration Option (88 units minimum):

Design Required Courses (26 units)

54-151-54-152	Stagecraft-Stagecraft (15 units + 11 units)	26
---------------	---	----

A minimum of 62 additional Design units must be approved by the Design faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Directing Required Courses (52 units)

54-121-54-122	Directing I: Sources-Directing I: Sources	18
54-221-54-222	Directing II: Fundamentals-Directing II: Fundamentals	18
54-159-54-160	Production Symposium I-I	12
54-517-54-518	Director's Colloquium-Director's Colloquium (four times, 4 units total)	2

A minimum of 36 additional Directing units must be approved by the Directing faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Dramaturgy Required Courses (53 units minimum)

54-109	Dramaturgy 1: Approaches to Text	9
54-184	Dramaturgy 2: Introduction to Production Dramaturgy	9
54-121	Directing I: Sources	9
54-160	Production Symposium I -Spring	6
54-200-54-200	Dramaturgy Forum-Dramaturgy Forum -Fall (minimum of two; every semester it is offered while enrolled)	2
54-xxx	Dramaturgy 3, 4, 5 or 6 (minimum of two; all four if enrolled as BXA for six semesters or more)	18

A minimum of 35 additional Dramaturgy units must be approved by the Dramaturgy faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Production Technology and Management Required Courses (26 units)

54-151-54-152	Stagecraft-Stagecraft (15 units + 11 units)	26
---------------	---	----

A minimum of 62 additional PTM units must be approved by the PTM faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Music Concentration (108 units minimum)

AUDITION REQUIRED FOR PERFORMANCE CONCENTRATION OPTION.
PORTFOLIO REVIEW/INTERVIEW REQUIRED FOR COMPOSITION,
MUSICOLOGY, OR MUSIC TECHNOLOGY CONCENTRATION OPTION.

Options available in the following areas: 1) Performance (instrumental, piano, organ, voice), 2) Composition 3) Musicology, 4) Music Technology

Required Course for All Concentration Options (9 units)

57-152	Harmony I -Fall	9
or 57-149	Basic Harmony I	

Work with Music Advisor to Approve Concentration Option (99 units minimum):

Performance and Composition Required Courses (76 units)

57-161	Eurhythmics I -Fall (recommended co-requisite: 57-181)	3
57-181	Solfège I -Fall	3
or 57-180	Basic Solfège I	
or 57-185	Advanced Solfège I	
57-173	Survey of Western Music History -Fall (co-requisite: 57-188)	9
57-188	Repertoire and Listening for Musicians	1
57-69x	BXA Studio (4 semesters)	36
57-xxx	Major Ensemble (4 semesters)	24

A minimum of 23 additional Music units must be approved by the Music advisor. A list of these selected courses must be filed in the BXA office.

Musicology Required Courses (45 units)

57-283	Music History I (co-requisite: 57-190)	9
57-284	Music History II (co-requisite: 57-289)	9
57-285	Music History III (co-requisite: 57-290)	9
57-189	Introduction to Repertoire and Listening for Musicians	3
57-190	Repertoire and Listening for Musicians I	3
57-289	Repertoire and Listening for Musicians II	3
57-290	Repertoire and Listening for Musicians III	3
57-611	Independent Study in History	6

Choose 36 units from:

57-209	The Beatles	9
57-306	World Music	6
57-412	Opera Since Wagner	9
57-414	Music and Nature	9
57-415	Mozart Operas	6
57-477	Music of the Spirit	6
57-478	Survey of Historical Recording	6
57-480	History of Black American Music	6

Graduate Musicology courses may be taken with instructor permission.

A minimum of 18 additional Music units must be approved by the Music advisor. A list of these selected courses must be filed in the BXA office.

Music Technology Required Courses (40 units)

57-101	Introduction to Music Technology	6
57-181	Solfège I -Fall	3
or 57-180	Basic Solfège I	
or 57-185	Advanced Solfège I	
57-173	Survey of Western Music History -Fall (co-requisite: 57-188)	9
57-188	Repertoire and Listening for Musicians	1
57-337	Sound Recording	6
57-347	Electronic and Computer Music	6
57-xxx	Independent Study in Music Technology or Sound Recording	9

Choose 36 units from:

33-114	Physics of Musical Sound	9
--------	--------------------------	---

57-153	Harmony II -Spring	9
57-182	Solfège II -Spring	3
or 57-186	Advanced Solfège II	
57-283	Music History I (co-requisite: 57-190)	9
57-284	Music History II (co-requisite: 57-289)	9
57-285	Music History III (co-requisite: 57-290)	9
57-190	Repertoire and Listening for Musicians I	3
57-289	Repertoire and Listening for Musicians II	3
57-290	Repertoire and Listening for Musicians III	3
57-338	Sound Editing and Mastering	6
57-345	Hacking the Music World	9
57-438	Multitrack Recording	9
60-131	3D Media Studio II	5
60-210	Electronic Media Studio: Introduction to Interactivity	10

A minimum of 23 additional Music units must be approved by the Music advisor. A list of these selected courses must be filed in the BXA office.

IV. Free Electives

(approximately 1-3 courses, 9-29 units)

Take any Carnegie Mellon course. A maximum of 9 units of physical education and/or military science may be counted toward this requirement. Physical education and military science courses will not be calculated in a student's QPA.

Bachelor of Computer Science and Arts Degree Program

Carnegie Mellon University recognizes that there are students who are naturally gifted in both the fine arts and computer science. In order to accommodate students who want to pursue an education simultaneously in these areas, we offer a degree that combines the strengths of the College of Fine Arts (CFA) and the School of Computer Science (SCS). The intercollege degree, called the Bachelor of Computer Science and Arts (BCSA), is a rigorous program that offers a unique group of qualified students the opportunity to develop their talents and interests in an area of the fine arts and computer science.

The BCSA curriculum is divided into three parts: 1) BCSA General Education coursework, 2) CFA concentration coursework, and 3) SCS concentration coursework.

Students choose their fine arts concentration from among the five schools in CFA: Architecture, Art, Design, Drama or Music. A student must meet the entry requirements for the particular CFA school of their choice. While in the BCSA Program, a student may change their CFA concentration only if they pass all admission requirements for that particular school.

The BCSA Degree Program is governed by faculty and administrators from both colleges and led by the director of the BXA Intercollege Degree Programs. The director and associate director of the BXA Intercollege Degree Programs are the primary advisors and liaisons between CFA and SCS. Students receive extensive advising support. Each student has two additional academic advisors: an advisor in the admitting school of CFA for their fine arts concentration, and an advisor in SCS for their computer science concentration. This network of advisors guides each student through their curriculum.

BCSA Curriculum

	Units
I. BCSA General Education	121
II. SCS Concentration	111
III. CFA Concentration	108-118
IV. Free Electives	30-40
Total BCSA Degree Requirements	380

I. BCSA General Education

(15 courses, 121 units minimum)

- Writing/Expression (1 course, 9 units, 76-101 required)
- Cultural Analysis (1 course, 9 units)
- Mathematics (2 courses, 20 units, 21-120 and either 21-122 or 21-241 required), Probability (1 course, 9 units minimum required)
- Science (2 courses, 18 units minimum)
- Engineering (In consultation with your academic advisor, an engineering course could substitute for one of the two Science requirements.)
- Economic, Political, & Social Institutions OR Cognition, Choice & Behavior (1 course, 9 units minimum)
- One additional course from one of the following departments: English, History, Modern Languages, Philosophy, or Psychology (1 course, 9 units minimum)
- Computing @ Carnegie Mellon (1 course, 3 units, 99-101 or 99-102 required)
- BXA Required Courses (5 courses, 36 units minimum, 52-190 and/or 52-291, 52-391, 52-392, 52-401, 52-402)

Writing (1 course, 9 units)

Broadly considered, language is a tool used to communicate, as well as a way to organize non-visual and non-mathematical thinking. This requirement focuses on the social nature of language and the ways in which writing constitutes thinking.

76-101	Interpretation and Argument	9
(various topics by section) www.cmu.edu/hss/english/first_year/index.html		

Cultural Analysis (1 course, complete 9 units)

This requirement seeks to recognize cultures that have shaped and continue to shape the human experience; courses in this category are usually either broad in place, time, or cultural diversity.

57-173	Survey of Western Music History *	9
70-342	Managing Across Cultures *	9
76-232	Introduction to African American Literature *	9
76-239	Introduction to Film Studies *	9
76-241	Introduction to Gender Studies *	9
79-104	Global Histories	9
79-207	Development of European Culture	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-226	African History: Earliest Times to 1780	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-240	The Development of American Culture	9
79-241	African American History: Africa to the Civil War	9
79-242	African American History: Reconstruction to the Present	9
79-255	Irish History	6
79-262	Modern China	9
79-281	Introduction to Religion	9
79-282	Europe and the World since 1800	9
79-345	The Roots of Rock and Roll	9
79-350	Early Christianity	9
79-395	The Arts in Pittsburgh	9
79-396	Music and Society in 19th and 20th Century Europe and the U.S.	9
80-100	Introduction to Philosophy	9
80-250	Ancient Philosophy	9
80-251	Modern Philosophy	9
80-253	Continental Philosophy	9
80-254	Analytic Philosophy	9
80-255	Pragmatism	9
80-276	Philosophy of Religion	9
82-273	Introduction to Japanese Language and Culture	9
82-293	Introduction to Russian Culture	9
82-303	Introduction to French Culture *	9
82-304	The Francophone World *	9

82-333	Introduction to Chinese Language and Culture *	Var.
82-342	Spain: Language and Culture *	9
82-343	Latin America: Language and Culture *	9
82-344	U.S. Latinos: Language and Culture *	9
82-345	Introduction to Hispanic Literary and Cultural Studies *	9

* Indicates co-requisites and/or prerequisites required.

Mathematics & Probability (3 courses, 29 units minimum)

Choose two mathematics courses (20 units):

21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
or 21-241	Matrices and Linear Transformations	

Choose one probability course (9 units minimum):

15-359	Probability and Computing	12
21-325	Probability	9
36-217	Probability Theory and Random Processes	9
36-225	Introduction to Probability Theory	9

Science (2 courses, 18 units minimum)

Choose two courses from the following list:

03-121	Modern Biology	9
09-105	Introduction to Modern Chemistry I	10
21-259	Calculus in Three Dimensions	9
33-111	Physics I for Science Students	12

Engineering

In consultation with your academic advisor, an engineering course could substitute for one of the two Science requirements.

Economic, Political & Social Institutions OR Cognition, Choice & Behavior (1 course from either category, complete 9 units minimum)

Economic, Political & Social Institutions

This requirement explores the processes by which institutions organize individual preferences and actions into collective outcomes.

19-101	Introduction to Engineering and Public Policy *	12
36-303	Sampling, Survey and Society *	9
70-332	Business, Society and Ethics *	9
73-100	Principles of Economics	9
73-230	Intermediate Microeconomics *	9
73-240	Intermediate Macroeconomics *	9
79-300	History of American Public Policy	9
79-320	Women, Politics, and Protest	9
79-331	Body Politics: Women and Health in America	9
80-135	Introduction to Political Philosophy	9
80-136	Social Structure, Public Policy & Ethics	9
80-235	Political Philosophy	9
80-244	Environmental Ethics	9
80-245	Medical Ethics	9
80-341	Computers, Society and Ethics	9
84-104	Decision Processes in American Political Institutions	9
88-110	Experiments with Economic Principles	9
88-220	Policy Analysis I	9

* Indicates co-requisites and/or prerequisites required.

Cognition, Choice, and Behavior

This requirement explores the process of thinking, decision making, and behavior in the context of the individual.

70-311	Organizational Behavior *	9
80-130	Introduction to Ethics	9
80-150	Nature of Reason	9
80-180	Nature of Language	9
80-221	Philosophy of Social Science	9
80-230	Ethical Theory	9

80-241	Ethical Judgments in Professional Life	9
80-270	Philosophy of Mind	9
80-271	Philosophy and Psychology	9
80-275	Metaphysics	9
80-281	Language and Thought	9
85-102	Introduction to Psychology	9
85-211	Cognitive Psychology	9
85-221	Principles of Child Development	9
85-241	Social Psychology	9
85-251	Personality	9
85-261	Abnormal Psychology	9
88-120	Reason, Passion and Cognition	9
88-260	Organizations	9

* Indicates co-requisites and/or prerequisites required.

Complete ONE additional course from one of the following departments (1 course, complete 9 units minimum)

- English
- History
- Modern Languages
- Philosophy
- Psychology

Computing @ Carnegie Mellon (1 course, 3 units)

This is a mini-course, pass/no pass, to be completed in the first semester.

99-101	Computing @ Carnegie Mellon -REQUIRED	3
or 99-102	Computing @ Carnegie Mellon	

BXA Required Courses (5 courses, 36 units minimum)

BXA-specific courses give students the opportunity to integrate their areas of concentration by focusing on interdisciplinary approaches and arts-based research techniques.

52-190	BXA Seminar I: Building the Wunderkammer	9
or 52-291	BXA Seminar II: Building BXA	
52-391	BXA Junior Portfolio	0
52-392	BXA Seminar III: Deconstructing Disciplines	9
52-401	BXA Seminar IV: Capstone Fall	9
52-402	BXA Seminar V: Capstone Spring	9

II. School of Computer Science Concentration

Computer Science Concentration (111 units minimum)

Prerequisite

15-112	Fundamentals of Programming and Computer Science	12
--------	--	----

Computer Science Core Requirements (56 units)

15-122	Principles of Imperative Computation	10
15-150	Principles of Functional Programming	10
15-210	Parallel and Sequential Data Structures and Algorithms	12
15-213	Introduction to Computer Systems	12
15-251	Great Theoretical Ideas in Computer Science	12

Concepts of Mathematics (10 units)

21-127	Concepts of Mathematics (co-requisite for 15-122; prerequisite for 15-150)	10
--------	---	----

Applications Courses or CS Electives (5 courses, 45 units minimum)

Choose a minimum of five courses from SCS beyond the core requirements, 200-level or higher, not including 15-221, 15-351, 16-223, 08-200. Listed below are suggested choices for these electives. Consult with the CS advisor if interested in courses not listed.

05-331	Building Virtual Worlds (12 units for CS concentration, 12 units for Art concentration)	24
05-391	Designing Human Centered Software	12

11-411	Natural Language Processing	12
15-214	Principles of Software Construction: Objects, Design, and Concurrency	12
15-237	Special Topic: Cross-Platform Mobile Web Apps	12
15-322	Introduction to Computer Music	9
15-323	Computer Music Systems and Information Processing	9
15-381	Artificial Intelligence: Representation and Problem Solving	9
15-415	Database Applications	12
15-437	Web Application Development	12
15-451	Algorithm Design and Analysis	12
15-462	Computer Graphics	12
15-463	Computational Photography	12
15-464	Technical Animation	12
15-465	Animation Art and Technology	12
15-466	Computer Game Programming	12
16-362	Mobile Robot Programming Laboratory	12
16-384	Robot Kinematics and Dynamics	12
16-385	Computer Vision	9

III. College of Fine Arts Concentration

(number of courses vary, 108-118 units minimum)

BCSA students choose one of the following concentrations:

- Architecture (108 units)
- Art (118 units)
- Design (108 units)
- Drama (108 units)
- Music (108 units)

Architecture Concentration (108 units minimum)

Architecture Required Courses (52 units minimum)

48-100	Architecture Design Studio: Foundation I -Fall, Freshman year	10-12
or 48-095	Spatial Concepts for Non-Architects I	
48-120	Digital Media I -Fall, Freshman year	6
48-121	Analog Media I -Fall, Freshman year	6
48-125	Digital Media II -Spring, Freshman year	6
48-126	Analog Media II -Spring, Freshman year	6
48-240	Historical Survey of World Architecture and Urbanism I -Spring, Freshman year	9
48-241	Modern Architecture -Fall, Sophomore year	9

Architecture Electives (56 units minimum)

A minimum of 56 additional Architecture units must be approved by the Architecture advisor. A list of these selected courses must be filed in the BXA office.

Art Concentration (118 units minimum)

PORTFOLIO REVIEW REQUIRED FOR ADMISSION

Concept Studios (2 courses, 20 units)

Complete two courses:

60-101	Concept Studio: The Self and the Human Being	10
60-201	Concept Studio: Space and Time	10
60-202	Concept Studio: Systems and Processes	10
60-203	Concept Studio: EcoArt	10
60-204	Concept Studio: Networked Narrative	10

Media Studios (2 courses, 20 units)

Complete two courses:

60-150	2D Media Studio: Drawing	10
60-160	2D Media Studio: Imaging	10
60-250	2D Media Studio: Painting	10
60-251	2D Media Studio: Print Media	10
60-130-60-130	3-D Media Studio I-I (complete two minis, 5 units each)	10

60-131-60-131	3D Media Studio II-II (complete two minis, 5 units each)	10
60-110	Electronic Media Studio: Introduction to the Moving Image	10
60-210	Electronic Media Studio: Introduction to Interactivity	10

Advanced Studios (6 courses, 60 units)

Complete six courses. Courses may be offered in the fall and/or spring. Students may take courses in any media area (ETB, SIS, CP or DP3). They may take all courses in one media area if a focus is desired.

60-401/402	Senior Studio	10
60-403	Extended Studio	10
60-410 - 60-429	Advanced Electronic and Time-Based Work (ETB)	10
60-430 - 60-447	Advanced Sculpture, Installation and Site-Work (SIS)	10
60-448 - 60-449	Advanced Contextual Practice (CP)	10
60-450 - 60-498	Advanced Drawing, Painting, Print Media and Photography (PDP)	10
60-499	Studio Independent Study (one only)	10

Art History/Theory (2 courses, 18 units)

60-205	Modern Visual Culture 1789-1960 -Fall	9
60-206	Contemporary Visual Culture 1960 - Present - Spring	9

Review Requirement (Complete 2 required reviews, 0 units)

A review is required at the end of the sophomore and senior years. Pass/no pass only.

60-200	Sophomore Review -Spring	0
60-400	Senior Review -Fall	0

Design Concentration (108 units minimum)

PORTFOLIO REVIEW REQUIRED FOR ADMISSION

Design Required Courses (96 units)

51-101	Studio: Survey of Design -Fall, Freshman year	9
51-103	Design Workshop I -Fall, Freshman year	3
51-121	Visualizing -Fall, Freshman year	9
51-171	Placing -Fall, Freshman year	9
51-102	Design Lab -Spring, Freshman year	9
51-104	Design Workshop II -Spring, Freshman year	3
51-122	Collaborative Visualizing -Spring, Freshman year	9
51-172	Systems -Spring, Freshman year	9

Choose Two Studios:

51-225	Communications Studio I: Understanding Form & Context -Fall, Sophomore year	4.5, 4.5
--------	---	----------

or 51-245 Products Studio I: Understanding Form & Context
or 51-265 Environments Studio I: Understanding Form & Context

Choose Two Corresponding Labs:

51-227	Prototyping Lab I: Communications -Fall, Sophomore year	4.5, 4.5
--------	---	----------

or 51-247	Prototyping Lab I: Products	
or 51-267	Prototyping Lab I: Environments	
51-271	How People Work -Fall, Sophomore year	9
51-371	Futures -Fall, Junior year or later	9

Design Electives (12 units minimum)

A minimum of 12 additional Design units must be approved by the Design advisor. A list of these selected courses must be filed in the BXA office.

Drama Concentration (108 units minimum)

AUDITION/INTERVIEW REQUIRED FOR DIRECTING OR DRAMATURGY CONCENTRATION OPTION. PORTFOLIO REVIEW/INTERVIEW REQUIRED FOR DESIGN OR PRODUCTION TECHNOLOGY AND MANAGEMENT CONCENTRATION OPTION.

Options available in the following areas: 1) Design, 2) Directing, 3) Dramaturgy, 4) Production Technology and Management
There is no BHA Acting or Musical Theatre option.

Required Courses for All Concentration Options (20 units)

54-175-54-176	Conservatory Hour-Conservatory Hour (1 unit each)	2
54-177	Foundations of Drama I	6
or 54-178	Foundations of Drama I	
54-281	Foundations of Drama II (prerequisite: 54-177 or 54-178)	6
or 54-282	Foundations of Drama II	
54-381	Special Topics in Drama: History, Literature and Criticism	6

Work with Drama Faculty Option Coordinator to Approve Concentration Option (88 units minimum):

Design Required Courses (26 units)

54-151-54-152	Stagecraft-Stagecraft (15 units + 11 units)	26
---------------	---	----

A minimum of 62 additional Design units must be approved by the Design faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Directing Required Courses (52 units)

54-121-54-122	Directing I: Sources-Directing I: Sources	18
54-221-54-222	Directing II: Fundamentals-Directing II: Fundamentals	18
54-159-54-160	Production Symposium I-I	12
54-517-54-518	Director's Colloquium-Director's Colloquium (four times, 4 units total)	2

A minimum of 36 additional Directing units must be approved by the Directing faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Dramaturgy Required Courses (53 units minimum)

54-109	Dramaturgy 1: Approaches to Text	9
54-184	Dramaturgy 2: Introduction to Production Dramaturgy	9
54-121	Directing I: Sources	9
54-160	Production Symposium I -Spring	6
54-200-54-200	Dramaturgy Forum-Dramaturgy Forum -Fall (minimum of two; every semester it is offered while enrolled)	2
54-xxx	Dramaturgy 3, 4, 5 or 6 (minimum of two; all four if enrolled as BXA for six semesters or more)	18

A minimum of 35 additional Dramaturgy units must be approved by the Dramaturgy faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Production Technology and Management Required Courses (26 units)

54-151-54-152	Stagecraft-Stagecraft (15 units + 11 units)	26
---------------	---	----

A minimum of 62 additional PTM units must be approved by the PTM faculty option coordinator. A list of these selected courses must be filed in the BXA office.

Music Concentration (108 units minimum)

AUDITION REQUIRED FOR PERFORMANCE CONCENTRATION OPTION. PORTFOLIO REVIEW/INTERVIEW REQUIRED FOR COMPOSITION, MUSICOLOGY, OR MUSIC TECHNOLOGY CONCENTRATION OPTION.

Options available in the following areas: 1) Performance (instrumental, piano, organ, voice), 2) Composition 3) Musicology, 4) Music Technology

Required Course for All Concentration Options (9 units)

57-152	Harmony I -Fall	9
or 57-149	Basic Harmony I	

Work with Music Advisor to Approve Concentration Option (99 units minimum):

Performance and Composition Required Courses (76 units)

57-161	Eurhythmics I -Fall (recommended co-requisite: 57-181)	3
57-181	Solfège I -Fall	3
or 57-180	Basic Solfège I	
or 57-185	Advanced Solfège I	

57-173	Survey of Western Music History -Fall (co-requisite: 57-188)	9
57-188	Repertoire and Listening for Musicians	1
57-69x	BXA Studio (4 semesters)	36
57-xxx	Major Ensemble (4 semesters)	24

A minimum of 23 additional Music units must be approved by the Music advisor. A list of these selected courses must be filed in the BXA office.

Musicology Required Courses (45 units)

57-283	Music History I (co-requisite: 57-190)	9
57-284	Music History II (co-requisite: 57-289)	9
57-285	Music History III (co-requisite: 57-290)	9
57-189	Introduction to Repertoire and Listening for Musicians	3
57-190	Repertoire and Listening for Musicians I	3
57-289	Repertoire and Listening for Musicians II	3
57-290	Repertoire and Listening for Musicians III	3
57-611	Independent Study in History	6

Choose 36 units from:

57-209	The Beatles	9
57-306	World Music	6
57-412	Opera Since Wagner	9
57-414	Music and Nature	9
57-415	Mozart Operas	6
57-477	Music of the Spirit	6
57-478	Survey of Historical Recording	6
57-480	History of Black American Music	6

Graduate Musicology courses may be taken with instructor permission.

A minimum of 18 additional Music units must be approved by the Music advisor. A list of these selected courses must be filed in the BXA office.

Music Technology Required Courses (40 units)

57-101	Introduction to Music Technology	6
57-181	Solfege I -Fall	3
or 57-180	Basic Solfege I	
or 57-185	Advanced Solfege I	
57-173	Survey of Western Music History -Fall (co-requisite: 57-188)	9
57-188	Repertoire and Listening for Musicians	1
57-337	Sound Recording	6
57-347	Electronic and Computer Music	6
57-xxx	Independent Study in Music Technology or Sound Recording	9

Choose 36 units from:

33-114	Physics of Musical Sound	9
57-153	Harmony II -Spring	9
57-182	Solfege II -Spring	3
or 57-186	Advanced Solfege II	
57-283	Music History I (co-requisite: 57-190)	9
57-284	Music History II (co-requisite: 57-289)	9
57-285	Music History III (co-requisite: 57-290)	9
57-190	Repertoire and Listening for Musicians I	3
57-289	Repertoire and Listening for Musicians II	3
57-290	Repertoire and Listening for Musicians III	3
57-338	Sound Editing and Mastering	6
57-345	Hacking the Music World	9
57-438	Multitrack Recording	9
60-131	3D Media Studio II	5
60-210	Electronic Media Studio: Introduction to Interactivity	10

A minimum of 23 additional Music units must be approved by the Music advisor. A list of these selected courses must be filed in the BXA office.

IV. Free Electives

(approximately 3-4 courses, 30-40 units minimum)

Take any Carnegie Mellon course. A maximum of 9 units of physical education and/or military science may be counted toward this requirement. Physical education and military science courses will not be calculated in a student's QPA.

College of Engineering

James H. Garrett, Jr., Dean and Thomas Lord Professor of Civil and Environmental Engineering
 Annette M. Jacobson, Associate Dean for Undergraduate Studies
 Kurt Larsen, Assistant Dean for Undergraduate Studies
 Office: Scaife Hall 110
<http://www.cit.cmu.edu/>

Carnegie Institute of Technology, the engineering college of the university, has three main activities - undergraduate education, graduate education, and research. Its continuing goal has been to maintain excellence in all these activities. The degree to which this goal has been achieved is attested to by the demand for its graduates, the success of its alumni, the quality of its students and faculty, the adoption elsewhere of its innovations, and the national and international recognition it receives in educational and research activities.

The college offers the degree of bachelor of science in chemical engineering, civil engineering, electrical and computer engineering, mechanical engineering, and materials science and engineering. All of these programs are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

An engineering student may also choose to pursue a minor in one of the CIT designated minor programs, or a double major in engineering and public policy or biomedical engineering, or to design a minor, additional major or dual-degree programs with other non-engineering departments.

Educational Objectives

The overarching objective of our engineering curriculum is to provide our students an education that enables them to be productive and fulfilled professionals throughout their careers. Our more specific, measurable objectives for graduates of our engineering curriculum are the following:

- Graduates recognize that they acquired a high quality, rigorous technical education from the College of Engineering at Carnegie Mellon.
- Graduates, in addition to their technical knowledge, recognize that they have acquired a broader body of knowledge that allows them to understand the larger context of the problems that they must address during their career.
- Graduates use their technical foundation and their broader base of knowledge to be successful in a diverse collection of individual careers inside and outside of the engineering profession.

From its earliest days, Carnegie Institute of Technology (CIT) has considered undergraduate education to be the key element in the development of future leaders. In this regard, CIT has adopted a plan for education that is designed to equip students with the capacity to learn and to continue the process of self-education throughout their lives. The present curriculum incorporates this philosophy by providing the opportunity for both breadth in a number of engineering, science, humanities and fine arts areas as well as depth in a major area of concentration. To achieve these goals, our flexible curriculum has been designed to allow students to customize their program to suit their needs and to help each student acquire:

- A thorough and integrated understanding of fundamental knowledge in fields of a students' major interest and the ability to use this knowledge;
- Competence in the orderly way of thinking, which professionals and scientists have always used in reaching sound, creative conclusions, with the goal that after graduation the student can, by such thinking, reach decisions both as a professional and as a citizen;
- An ability to learn independently with scholarly orderliness, so that after graduation the student will be able to grow in wisdom and keep abreast of the changing knowledge and problems of the profession and the society in which he or she participates;
- The philosophical outlook, breadth of knowledge, and sense of values which will increase the student's understanding and enjoyment of life and enable each student to recognize and deal effectively with the human, economic, ethical and social aspects of professional problems; and
- The ability to communicate ideas to others in a comprehensive and understandable manner.

The curriculum encourages students to confront professional problems, accomplished through team and problem-oriented courses, as well as courses which emphasize design or individual projects. These classes stress creativity and independent thought and require the student to define the problem, propose a solution or a design in the presence of technical and

socioeconomic constraints, to make judgments among alternative solutions, and to explore innovative alternatives to more conventional solutions.

First Year for Engineering Students

The Carnegie Mellon engineering education is based on engineering and science fundamentals that give students the skills to face new and challenging situations. The first year in engineering provides a broad foundation upon which students build a curriculum in their eventual major.

Since students in CIT do not select a major until the end of the first year, all first year students share a common experience consisting of introductory courses in the engineering majors (one each semester), calculus, physics, other science courses which compliment specific introductory engineering courses, and courses in the College of Humanities and Social Sciences (General Education). This curriculum helps make an informed decision about a final major. Below is an examples of a standard schedule for a first-year engineering student.

Introductory Engineering Elective	12
Restricted Technical Elective	9-12
Differential and Integral Calculus	10
General Education ⁵	9
Computing @ Carnegie Mellon	3
Introductory Engineering Elective	12
Restricted Technical Elective	10
Integration, Differential Equations, Approximation	10
General Education Course ⁵	9

Notes:

1. Each semester every CIT department offers its Introductory Engineering Elective.* Every first year CIT student must select one such course each semester.
* Except 19-101, offered only in spring.
2. Each Introductory Engineering Elective requires a specific Restricted Technical Elective (as a pre- or co-requisite) as given below:

Introductory Engineering Course	Restricted Technical Elective
Biomedical Engineering	03-121
Chemical Engineering	09-105
Civil Environmental Engineering	33-106
Electrical Computer Engineering	15-110 or 15-112
Engineering Public Policy	33-106
Mechanical Engineering	33-106
Materials Science Engineering	33-106

3. Restricted Technical Electives include the following courses:

		Units
03-121	Modern Biology	9
09-105	Introduction to Modern Chemistry I	10
15-110	Principles of Computing	10
or 15-112	Fundamentals of Programming and Computer Science	
33-106	Physics I for Engineering Students	12

4. All students must complete 33-106 Physics I for Engineering Students by the end of the first year. Therefore, if a student chooses to take Introduction to Chemical Engineering (with 09-105 as a co-requisite) during one semester and Introduction to Electrical and Computer Engineering (with 15-110 as a co-requisite), the student must take 33-106 in place of the General Education requirement in the Spring semester of the first year and take the General Education course in a subsequent semester. Alternatively, a student entering the university with AP credit in a required first year course may substitute 33-106 in its place.
2. Interpretation and Argument, 76-101, should be completed in the first year. Some students for whom English is not a native language, may have to take 76-100 first.

Program in General Education for CIT Students for the Class of 2015 and earlier

27 Units Breadth Requirement

Humanistic Studies (Cultural Analysis)*	9 units
Cognitions and Institutions*	9 units
Writing/Expression **	9 units

* A list of acceptable courses for Humanistic Studies and Cognitions and Institutions is available at www.cit.cmu.edu in the General Education section.

** The Writing/Expression requirement consists of the following course: 76-101 Interpretation and Argument (9 units)

27 units Depth Sequence in Humanities, Social Science, or Fine Arts

A sequence of humanities, social science, or fine arts courses which provides depth in a specific area. Usually, 27 units from a single department meet this requirement. However, related courses from different departments may also satisfy this requirement. A depth sequence in language must include at least three nine-unit courses in the same language. Statistics Department courses may NOT be used to satisfy this requirement. Courses from Business Administration (70-xxx) and Heinz College that are on the above "Acceptable Non-DC/CFA courses for Non-Technical Electives" list can be used as part of a Depth Sequence. Although this requirement is typically satisfied by completing 3 courses of at least 9 units each, some acceptable courses are greater or less than 9 units (e.g. 6-unit Art courses). While mini courses of fewer than 9 units may be combined to equal 9 unit courses, the excess units from courses greater 9 units may NOT be used to satisfy this requirement. For example, a 12 unit, 6 unit, 9 unit combination is not acceptable. A 6 unit, 3 unit, 9 unit, 9 unit combination is acceptable.

18 units Non-Technical Electives

Two unrestricted humanities, social science or fine arts courses. Non-technical courses from Business Administration, or the Heinz College may also satisfy this requirement. Accounting, finance, management, marketing, production, and statistics courses are regarded as technical courses and may NOT be used to satisfy this requirement. Although this requirement is typically satisfied by completing 2 courses of at least 9 units each, some acceptable courses are greater or less than 9 units (e.g. 6-unit Art courses). While mini courses of fewer than 9 units may be combined to equal 9 unit courses, the excess units from courses greater 9 units may NOT be used to satisfy this requirement. For example, a 12 unit, 6 unit combination is not acceptable. A 6 unit, 3 unit, 9 unit combination is acceptable.

Free Elective Courses

A free elective is any graded Carnegie Mellon course. However, a maximum of nine units in the form of pass/fail or non-factorable courses (including physical education, StuCo and military science) may be taken as free electives in most CIT degree programs.

Program in General Education for CIT students for the Class of 2016 and later

The environment in which today's engineering graduates will find themselves working is evolving rapidly. Technical innovation is becoming ever more critical to retaining a competitive edge. This is true for individuals, for firms and for nations. Start-ups, as well as established companies, have significant international opportunities but also face more competition in a global economy. Seizing these opportunities and dealing with the associated challenges requires an understanding of the global context in which engineers work, as well as understanding multi-disciplinary approaches to technological innovation across cultures.

The College of Engineering has developed General Education Requirements designed to ensure that our students are ready to work effectively in the global economy, and become the innovators and leaders of tomorrow.

Complete the following requirements to graduate (72 units):

- 76-101 Interpretation and Argument (some students may need to take 76-100 first)
- One course from the following list:

73-100	Principles of Economics	9
--------	-------------------------	---

73-230	Intermediate Microeconomics	9
84-104	Decision Processes in American Political Institutions	9
85-102	Introduction to Psychology	9
79-104	Global Histories	9
or one other PPC or SDM course (defined below)		

AFTER FRESHMAN YEAR

Students must complete each of the categories (descriptions of categories follow below) ***Any courses taken on this list that are below 9 units will require additional coursework to complete the requirement :**

- Innovation & Internationalization (I&I)
 - 9 units from the I&I list of courses (which could be two 4.5 unit courses);
- Peoples, Places, and Cultures (PPC) ¹
 - 9 units from the PPC list; or a 9-12 unit course in a modern language at the 200+ level
- Social Analysis and Decision Making (SDM)
 - 9 units from the SDM list of courses (which could be two 4.5 unit courses)
- Writing and Expression (W&E)
 - 9 units from the W&E list of courses (in addition to 76-101)
- General Education Electives
 - At least 18 units (any combination) from the four categories: I&I, PPC, SDM or W&E, or non-technical academic courses from the Dietrich College or the College of Fine Arts excluding those listed on the CIT website under General Education Exclusions (http://engineering.cmu.edu/current_students/services/general_education_requirements/general_education_exclusions.html).

¹ Students can receive exemption through an approved study abroad program (these students would then have three General Education Electives to complete instead of two).

Experiential LEARNING (EL)

- 6 EL points by participating in a variety of approved activities in the following timeframe:
 - 2 points sophomore fall semester (39-210)
 - 2 points sophomore spring semester (39-220)
 - 2 points junior fall semester (39-310)

* A list of acceptable courses to complete these requirements is available at the CIT website, under General Education Requirements (http://engineering.cmu.edu/current_students/services/general_education_requirements).

General Education Categories

People, Places and Cultures (PPC)

PPC courses are designed to help you gain better understanding of the diversity of the world in which we live, and the way in which social, political, economic and technical factors interact to shape that world.

Social Analysis and Decision Making (SDM)

SDM courses are focused on helping you to gain an understanding of different ways in which individuals and societies approach and make decisions.

Innovation and Internationalization (I&I)

I&I courses are intended to expose to you the opportunities and potential that engineering provides with regard to developing cutting-edge technologies and leveraging the fundamental skills you gain in your education to make these pioneering ideas come to fruition in a global context.

Experiential Learning (EL)

Being curious and constantly looking for inspiration are critical parts of lifelong learning. To be successful as an engineer and as a citizen, your education must not stop when you graduate from Carnegie Mellon. The EL requirement aims to encourage a habit of lifelong learning about innovation

and the growing internationalization in engineering and, indeed of many other aspects of the modern world. The goal of this requirement is to help inspire the habits of being open to new ideas as successful, innovative engineers.

To do that, during both semesters of your sophomore year, and the first semester of your junior year, we require you to choose a few related activities that are not part of your formal course work. Examples could include:

- Attending approved seminars and then submitting a one page write up of your thoughts on what you heard;
- Participating in one of the "country courses" or other weekend courses that the University runs; or
- Holding an official leadership position (eg President, Vice President, Secretary, Treasurer) in an organization from this list (http://engineering.cmu.edu/current_students/services/organizations.html).

Additional Majors and Dual Degrees in CIT

A major is defined as a program that must be completed for the granting of a degree. Additional majors comprise a single degree with majors in two separate areas; for example, the degree of Bachelor of Science in Chemical Engineering and an additional major in English. Although the additional major requires the completion of two designated programs, they may have overlapping requirements that can be met simultaneously. The general principle used to measure eligibility for a Carnegie Institute of Technology additional major is that the major (core) requirements of both departments must be completed. Finally, although the student is formally enrolled as an undergraduate in one of the departments (the parent department, which is responsible for scheduling and other administrative actions for the student), the student should apply for the additional major through the second department and coordinate requirements with both departments.

The additional major is to be distinguished from a dual degree program, which results in two separate bachelor's degrees; for example, Bachelor of Science in Chemical Engineering and a Bachelor of Arts in English. The dual degree, though, requires a minimum of 90 units of work in addition to the units required for the first degree. The second degree may be earned in Bachelor of Science or Bachelor of Arts degree programs.

Requirements for students wishing to complete Additional Majors in CIT

Note: This applies to all students.

The student must satisfactorily pass all requirements of the regular and complete program (with the permissible exceptions) leading to a degree in CIT. The minimum number of units required for the additional major is the number required by the parent department or major.

The student takes and satisfactorily completes the courses specified by a second department, usually using elective space available in the first program.

The second department, on the basis of the specified number of courses plus the courses comprising the parent department's regular degree requirements, then certifies that the student has completed the requirements for a major in the second department.

Equivalent technical electives may be substituted at the discretion of the departments/colleges.

Non-technical courses in the curricula can be used to meet the requirements of the second major. But if the second major is not an H&SS department, the program must include a minimum of 72 units of General Education courses to meet CIT requirements for graduation.

Designated Minors Offered by CIT

(for engineering students)

In addition to their regular majors for B. S. degrees, undergraduate students in the Carnegie Institute of Technology can elect to complete an interdisciplinary Designated Minor. These minors have been added to the Carnegie Institute of Technology curriculum to promote flexibility and diversity among the college's engineering students. Independent of major, a student is free, but not required, to pursue a selected designated minor from the following list:

- Audio Engineering
- Automation and Control
- Biomedical Engineering*

- Colloids, Polymers and Surfaces
- Electronic Materials
- Environmental Engineering and Sustainability
- Global Engineering
- Manufacturing Engineering
- Material Science and Engineering
- Mechanical Behavior of Materials
- Robotics*

* Also available for non-CIT students

Complete descriptions of the designated minors can be found at Undergraduate Designated Minors in CIT (p. 119).

To declare a CIT Designated Minor, please contact the director listed for each minor.

Minors for Non-Engineering Students

Students in a non-engineering discipline can also declare certain CIT minors:

- Biomedical Engineering
- Engineering Studies
- Technology and Policy
- Robotics

A full listing of curriculum for these minors when taken by non-engineering students can be found at CIT Minors for Non-Engineering Students (p. 125).

Academic Standards

Grading Practices

For undergraduate grading regulations, please see Undergraduate Academic Regulations (p. 47).

CIT Dean's Honor List

Each semester, Carnegie Institute of Technology recognizes students who have earned outstanding academic records by naming them on the dean's honor list. The criterion for such recognition is a semester quality point average of at least 3.75 while completing at least 36 factorable units and earning no incomplete grades.

Transfer into CIT Departments

Undergraduate students admitted to colleges other than CIT who wish to transfer into a CIT department during their first year should consult with an advisor in the Office of Undergraduate Studies in the CIT Dean's Office. Students admitted to CIT but excluded from certain departments must also consult with the CIT Dean's Office if they wish to transfer into a restricted CIT department.

First-year students can apply for transfer after mid-semester grades for the spring semester have been posted. At that time, a decision will be based on availability of space and the student's academic performance.

CIT undergraduate students beyond the first year wishing to transfer into another CIT department may apply if they are in good academic standing and if there is room in the department of their choice. If the demand for any department exceeds the space available, then the department will admit students based on a comparative evaluation of all applicants at the end of each semester, up to the limit of available space.

Undergraduate students not in CIT who wish to transfer into a CIT department beyond the first year will be considered for transfer on a rolling space available/academic performance basis.

Criteria for all applicants include space in the department, good academic standing, and successful completion of or being currently enrolled in at least one introductory to engineering course (minimally the one of the target major), the appropriate science corequisite, math (21-120, 21-122) and Physics 1 (33-106, 33-111, or 33-131).

Procedure for transfer of students from another university into CIT departments: A student first applies through the Office of Admission. If the Office of Admission believes the applicant is acceptable, the student's record is sent to the appropriate department for evaluation and a decision on acceptance. The CIT department head has the right to refuse to accept the student if there are space restrictions and/or if the student's chance for success in the CIT department is determined to be questionable based on past academic performance.

Academic Actions

In the first year, a student's quality point average below 1.75 in either semester invokes an academic action. For all subsequent semesters, a student's semester QPA or the cumulative QPA (excluding the first year) below 2.0 invokes an academic action.

Probation

The action of probation occurs in the following cases:

- One semester QPA of the first year falls below 1.75.
- The semester QPA of a student in good standing beyond the first year falls below 2.00.

The term of probation is one semester as a full-time student. First year students are no longer on probation at the end of the semester if their semester QPA AND their cumulative QPA are 1.75 or above. Students in the third or subsequent semester of study are no longer on probation at the end of one semester if the semester QPA AND cumulative QPA (excluding the first year) are 2.00 or above.

Probation Continued

A student who is currently on one semester of probation but whose record indicates that the standards are likely to be met by the end of the next semester may be continued on probation at the discretion of the associate dean.

Suspension

A student who does not meet minimum standards at the end of one semester of probation will be suspended.

A first year student will be suspended if the QPA from each semester is below 1.75.

A student in the third or subsequent semester of study will be suspended if the semester QPA or the cumulative QPA (excluding the first year) is below 2.00 for two consecutive semesters.

The normal period of suspension is one academic year (two semesters). At the end of that period a student may petition to return to school (on probation) by completing the following steps:

1. Writing a formal petition requesting to return and receiving permission in writing from the assistant dean for undergraduate studies.
2. Completing a Return from Leave of Absence form from Enrollment Services; and
3. Providing transcripts and clearance forms if the student has been in a degree program at another college or university even though academic credit earned will not transfer back to Carnegie Mellon unless prior approval from the Assistant Dean is given.

Students who are suspended, take a leave of absence or withdraw are required to vacate the campus (including residence halls and Greek houses) within a maximum of two days after the action and to remain off the campus for the duration of the time specified. This action includes debarment from part-time or summer courses at the university for the duration of the period of the action.

Drop

This is a permanent severance. A student is dropped when it seems clear that the student will never be able to meet minimum standards. A student who has been suspended and fails to meet minimum standards after returning to school is dropped.

If students are dropped, they are required to vacate campus (including dormitories and fraternity houses) within a maximum of two days after the action. This action includes debarment from part-time or summer courses.

The relation indicated above between probation, suspension, and drop is normal, not binding. In unusual circumstances, College Council may suspend or drop a student without prior probation.

Graduation Requirements

To be eligible to graduate, undergraduate students must complete all course requirements for their department with a cumulative Quality Point Average of at least 2.0 for all courses taken. For undergraduate students who enrolled at Carnegie Mellon as freshman and whose freshman grades cause the cumulative QPA to fall below 2.0, this requirement is modified to be a cumulative QPA of at least 2.0 for all courses taken after the freshman year. Note, however, the cumulative QPA that appears on the student's final transcript will be calculated based on all grades in all courses taken, including freshman year. Some departments may have additional QPA

requirements in order to graduate. Students are encouraged to confirm all graduation requirements with their academic advisor.

Students must be recommended for a degree by the faculty of CIT.

A candidate must meet the residence requirement of having completed at least 180 units at Carnegie Mellon University.

Students must meet all financial obligations to the university before being awarded a degree.

Modification of Graduation Requirements: A student may seek permission to modify graduation requirements by petition to the CIT College Council.

Other Regulations Affecting Student Status

Schedule Changes

Add/drop procedure information and grading procedures for dropped courses can be found under Undergraduate Academic Regulations (p. 47).

Course Add Deadline

The last date to ADD courses is stipulated for each semester on the university calendar - about two weeks after the beginning of a term. This applies to all courses with the following exception: the final date to add half-semester mini-courses is the last class day of the first week of the course.

Course Drop/Withdraw Deadline

CIT undergraduate students may **drop** a course on-line on or before the deadline published in the official university calendar. This deadline is two weeks after mid-semester grades are due in The HUB. The deadline to drop a half-semester mini course is the last day of the fourth week of the mini course. When a course is dropped by the deadlines, the course is removed entirely and disappears from a student's academic record. After the official university deadline to drop, undergraduate students may **withdraw** from a course on-line on or before the last day of classes, excluding final examinations. The deadline to withdraw from a half-semester mini course is the last class day of the mini course. When a student withdraws from a course between the official university deadline to drop a course and the last day of classes, a "W" (Withdrawal) is assigned as a grade, which appears on the student's academic record. This "W" grade does not affect a student's QPA.

CIT undergraduates who are registered as full time students as of the tenth class day are expected to remain full time for the duration of a semester. Full time is defined by being registered for a minimum of 36 factorable units. Students may not drop or withdraw from courses that will reduce their factorable units below 36 unless there are extenuating circumstances for which they obtain approval from the CIT College Council. Undergraduates who are registered as part time (those carrying fewer than 36 factorable units) as of the 10th class day are also subject to the above deadlines to drop or withdraw from a course.

Exceptions to the regulations above will be granted only upon approval of a petition to the College Council.

Undergraduate Designated Minors in the College of Engineering

Undergraduate students in the Carnegie Institute of Technology can elect to complete an interdisciplinary Designated Minor in addition to their regular majors for B.S. degrees. Designated minors have been added to the curriculum of the Carnegie Institute of Technology to promote flexibility and diversity among the college's engineering students. Independent of a student's major, he or she is able to pursue a selected designated minor from the following list:

- Audio Engineering
- Automation and Controls
- Biomedical Engineering
- Colloids, Polymers and Surfaces Technology
- Electronic Materials
- Environmental Engineering
- Global Engineering
- Materials Science and Engineering
- Mechanical Behavior of Materials
- Robotics (see "CIT Minors for Non-Engineering Students (p. 125)")

An engineering student may elect to complete a CIT designated minor. Generally, the student takes all the required courses in an engineering major but uses electives to take courses needed to fulfill the requirements of the designated minor. Upon completion of the requirements of a CIT designated minor and the engineering degree, the minor is a formally recognized on the student's transcript.

Each of the CIT designated minors is administered by a Program Committee consisting of faculty from all major engineering departments who serve as faculty advisors. Each Program Committee certifies the completion of requirements of the designated minor. But the student's major department is responsible for approving the degree with a designated minor after reviewing a student's entire academic record. Any substitution or departure from the published curriculum should be avoided. For example, non-technical courses may not be substituted for required technical courses or electives. Equivalent technical electives offered by a designated minor as substitutions for required courses in a major must be approved by the Head of the student's major department.

Although a student generally can complete a designated minor without increasing the number of required units for graduation, early planning in electing a designated minor is important. A student also may find that some minors are more compatible than others with his/her major because of different relations between various major and minor requirements. The requirements for these CIT designated minors are listed below.

Audio Engineering Designated Minor

Tom Sullivan, Director and Faculty Advisor

This sequence is for candidates who are engineering majors with interest in and/or have background in music, recording, sound-editing and/or other music technology areas; or majors from any discipline in the university who have the above interests and who can meet the prerequisite requirements for the engineering courses in the minor.

Note: Students who do not have the requisite engineering/science/math background should investigate the Minor in Music Technology offered by the School of Music.

Course Requirements

The student must have taken the appropriate prerequisite courses for the listed courses.

Prerequisite Courses, 0-3 units

Beginning Piano is required of students who do not pass a piano proficiency test.

57-103	Elective Studio (Beginning Piano Class)	3
--------	---	---

Music Courses, 40-43 units

Basic Harmony I is required of students who do not qualify for entrance into Harmony I, based on their scores on the theory placement test.

57-101	Introduction to Music Technology	6
57-149	Basic Harmony I	9
or 57-152	Harmony I	
57-173	Survey of Western Music History *	9
57-188	Repertoire and Listening for Musicians	1
57-337	Sound Recording	6

* co-requisite 57-188.

(choose two of the courses below)

15-322	Introduction to Computer Music	9
57-338	Sound Editing and Mastering	6
57-347	Electronic and Computer Music	6
57-438	Multitrack Recording	9

Technical Courses, 33 units

Other courses may be taken with the approval of the Audio Engineering Minor Advisor.

33-114	Physics of Musical Sound	9
18-493	Electroacoustics **	12

** prerequisites 18-220 and 18-290.

(choose one of the courses below)

15-210	Parallel and Sequential Data Structures and Algorithms	12
or 15-214	Principles of Software Construction: Objects, Design, and Concurrency	
18-320	Microelectronic Circuits ⁺	12
18-348	Embedded Systems Engineering **	12
18-349	Embedded Real-Time Systems **	12
18-391	Noisy Signal Representation and Processing *	12

* prerequisite 18-290.

** prerequisite 18-240 and 18-213.

⁺ prerequisite 18-220.

Units required for minor:

73-79

Automation and Controls Designated Minor

Erik Ydstie, Director and Faculty Advisor
Office: DH 4210 A

The objective of the Designated Minor in Automation and Control Engineering is to expose CIT students to the breadth of knowledge required by the modern practice of control and automation. With this objective in mind, the requirements include not only two courses in control system analysis and design, but also courses on real-time computation, software engineering, hardware implementation, and applications. The minor is expected to attract primarily students from Chemical Engineering, Electrical and Computer Engineering, and Mechanical Engineering. The main interdisciplinary component of the minor is between engineering and computer science, although many opportunities exist for creating a program across several CIT departments.

Course Requirements

The minor requires a minimum of six courses as described below:

Note: The course lists below are not necessarily current or complete. Appropriate courses not listed below may be counted toward the requirements for the minor upon approval by one of the departmental the faculty advisors. Students interested in the Automation and Control Engineering Designated Minor are encouraged to look for applicable courses each semester in CIT, CS, and Robotics.

One basic control course:		Units
18-370	Fundamentals of Control	12
24-451	Feedback Control Systems	12
One course on control system analysis and design:		
06-708	Advanced Process Dynamics and Control	12
18-771	Linear Systems	12
One course on computing and software		
15-211	Fundamental Data Structures and Algorithms	12
12-741	Data Management	6
18-549	Embedded Systems Design	12
18-649	Distributed Embedded Systems	12
One course on hardware implementation:		
06-423	Unit Operations Laboratory	9
18-474	Embedded Control Systems	12
18-578	Mechatronic Design	12
One course on applications:		
06-606	Computational Methods for Large Scale Process Design & Analysis	9
16-311	Introduction to Robotics	12
16-761	Mobile Robots	12
24-351	Dynamics	10
xx-xxx	Independent project	12
One elective course:		
xx-xxx	Any course in the list above excluding the basic control course category	6-12
15-381	Artificial Intelligence: Representation and Problem Solving	9
15-385	Introduction to Computer Vision	6
15-413	Software Engineering Practicum	12
15-440	Distributed Systems-Time Software	12
18-348	Embedded Systems Engineering	12
18-349	Embedded Real-Time Systems	12
18-491	Fundamentals of Signal Processing	12
18-771	Linear Systems	12
24-341	Manufacturing Sciences	9

Biomedical Engineering Minor

Conrad M. Zapanta, Ph.D.
www.bme.cmu.edu
Campus Office for Student Affairs: Doherty Hall 2100

The minor program is designed for engineering students who desire exposure to biomedical engineering but may not have the time to pursue the Biomedical Engineering additional major. The program is open to students of all colleges and is popular among science majors. In conjunction with other relevant courses, the program may provide a sufficient background for jobs or graduate studies in biomedical engineering. Students interested in a medical career may also find this program helpful.

The Biomedical Engineering minor curriculum is comprised of three core courses and two or three electives. Students pursuing the minor may contact BME Associate Head (<http://www.bme.cmu.edu/people/staff.html#ADH>) for advice. Students interested in declaring Biomedical Engineering minor should contact either the Associate Department Head (<http://www.bme.cmu.edu/people/staff.html#ADH>) of Biomedical Engineering or the Biomedical Engineering Undergraduate Program Coordinator (<http://www.bme.cmu.edu/people/staff.html#UPC>).

Requirements

College of Engineering Students (5 courses):

03-121	Modern Biology	9
42-101	Introduction to Biomedical Engineering (co-req. or pre-req. 03-121)	12
42-202	Physiology (pre-req. 03-121 or permission of instructor)	9
xx-xxx	Elective I (>= 9 units) #	
xx-xxx	Elective II (>= 9 units) +	

Non-Engineering Students (6 courses)

03-121	Modern Biology	9
42-101	Introduction to Biomedical Engineering (co-req. or pre-req. 03-121)	12
42-202	Physiology (pre-req. 03-121 or permission of instructor)	9
xx-xxx	Elective I (>= 9 units) #	
xx-xxx	Elective II (>= 9 units) +	
xx-xxx	A second Introductory Engineering Course* or Any 42-xxx Course Numbered 42-3xx or Higher and worth at Least 9 Units	

Some Special Topics, newly offered or intermittently offered 42-xxx may be acceptable as electives. Students should consult with their advisors and petition the Biomedical Engineering Undergraduate Affairs Committee for permission to include such courses.

Notes

Elective I cannot be a required course in the student's major. It may be

- Any track gateway, restricted elective, or track elective course selected from any of the four Biomedical Engineering tracks. See the online catalog (<http://www.bme.cmu.edu/ugprog/catalog.html>) for a listing of courses.
- Any 42-xxx course with a 42-300 or higher number and worth at least 9 units.
- 42-203 Biomedical Engineering Laboratory (or the cross-listed version 03-206 for students in the Health Professions Program). The course has a limited capacity and priority is given to students who have declared the Additional Major in Biomedical Engineering.**
- One semester of 42-200 Sophomore BME Research Project, 42-300 Junior BME Research Project, 42-400 Senior BME Research Project or 39-500 CIT Honors Research Project. The project must be supervised by a core or courtesy Biomedical Engineering faculty member and for 9 or more units.

+ Elective II must be a Biomedical Engineering track gateway, track elective, or restricted Elective course that is offered by one of the Engineering Departments (06-xxx, 12-xxx, 18-xxx, 19-xxx, 24-xxx, 27-xxx or 42-xxx). The only exception is that 03-232, the biotechnology-focused version of Biochemistry taught each Spring by the Department of Biological Sciences, is also acceptable. Organic Chemistry I 09-217 is a pre-requisite of 03-232.

* Selected from 06-100 Introduction to Chemical Engineering, 12-100 Introduction to Civil and Environmental Engineering, 18-100 Introduction to Electrical and Computer Engineering, 19-101 Introduction to Engineering and Public Policy, 27-100 Engineering the Materials of the Future, or 24-101 Fundamentals of Mechanical Engineering. Note that these courses may involve co-requisites.

** Priority for enrollment in 42-203 or 03-206 will be given to students who have declared the Additional Major in Biomedical Engineering. If sufficient room in the course remains after all majors have been accommodated in a given semester, students who have declared the Biomedical Engineering Designated Minor will be given the next priority for enrollment. If space still allows, other students will be enrolled.

Colloids, Polymers and Surfaces Designated Minor

Annette Jacobson, Director
Office: Doherty Hall 3102B
Website: http://www.cit.cmu.edu/current_students/services/majors_minors/engineering_minors/cps.html

The sequence of courses in the Colloids, Polymers and Surfaces (CPS) designated minor provides an opportunity to explore the science and engineering of fine particles and macromolecules as they relate to complex fluids and interfacially engineered materials. These topics are very relevant to technology and product development in industries that manufacture pharmaceuticals, coatings and paints, pulp and paper, biomaterials, surfactants and cleaning products, cosmetics and personal care products, food, textiles and fibers, nanoparticles, polymer/plastics, composite materials.

Course Requirements

This minor requires a total of five classes. The following four courses are mandatory:

06-609/09-509	Physical Chemistry of Macromolecules	9
06-607	Physical Chemistry of Colloids and Surfaces	9
06-426	Experimental Colloid Surface Science	9
06-466	Experimental Polymer Science	9

In addition, the student must take one course from the following list:

06-221	Thermodynamics	9
24-221	Thermodynamics I	10
27-215	Thermodynamics of Materials	12
33-341	Thermal Physics I	10
09-345	Physical Chemistry (Thermo): Macroscopic Principles of Physical Chemistry	9

Electronic Materials Designated Minor

David W. Greve, Director
Office: Hamerschlag Hall B204

Lisa A. Porter, Co-Director
Office: Roberts Engineering Hall 145

Website: http://www.cit.cmu.edu/current_students/services/majors_minors/engineering_minors/electronic_materials.html

Many of the technological changes in recent decades—notably the rise of digital data processing—has been made possible by continuing advances in the performance of electronic devices. These advances include continuous improvement in microprocessor performance, optical communication bandwidth, and magnetic disk storage capacity. Other new areas of innovation include the development of micromechanical systems and the development of flat panel display technology. These advances depend on interactions between engineers from many different disciplines. In particular, there is a strong interaction between device design and materials engineering and processing.

The Electronic Materials Minor is intended to provide students with a firm basis for the application of electronic materials in advanced systems. This minor is well suited for students who intend to pursue careers in the electronics industry (included, but not limited to, semiconductor integrated circuit design and manufacturing, and magnetic storage engineering). The minor also provides an excellent preparation for students interested in pursuing graduate work in MSE, ECE, or Applied Physics.

This minor is primarily intended to offer ECE and MSE students an understanding of the important features that must be built into a material during processing so that it will function as required in an electronic or

magnetic device. Other students interested in pursuing this minor should consult their advisors to determine whether it will be practical in their own curriculum. Such students are expected to take both 18-100 and 27-201 as introductory courses.

Students in the Electronic Materials program are urged to consider registering for an undergraduate project in addition to the requirements below, especially if they intend to apply to graduate school. The co-directors will make every effort to arrange a suitable project for interested students.

Course Requirements

The minor requires an introductory course together with a minimum of 48 additional units as specified below.

Required Introductory Courses:

18-100	Introduction to Electrical and Computer Engineering (MSE students)	12
27-201	Structure of Materials (ECE students)	9

Elective Courses:

48 additional units, with 24 units from Group A and 24 units from Group B. Some courses are a required part of one of the curricula and consequently cannot be counted again for the minor program.

We have determined that “courses which are a required part of a curriculum” are those which are specifically named in the curriculum requirements. Consequently technical electives and breadth and depth electives may be double-counted.

Group A

27-202	Defects in Materials (ECE students only)	9
06-619	Semiconductor Processing Technology	9
27-542	Processing and Properties of Thin Films	9
27-217	Phase Relations and Diagrams (ECE students only)	12
27-533	Principles of Growth and Processing of Semiconductors	6
27-432	Electronic and Thermal Properties of Metals, Semiconductors and Related Devices	9
27-433	Dielectric, Magnetic, Superconducting Properties of Materials & Related Devices (only if not required in your curriculum)	9
27-551	Properties of Ceramics and Glasses	9
27-216	Transport in Materials (ECE students only)	9
33-225	Quantum Physics and Structure of Matter (ECE students only)	9

Group B

18-310	Fundamentals of Semiconductor Devices	12
18-715	Physics of Applied Magnetism	12
18-716	Advanced Applied Magnetism	12
18-8xx	— An appropriate 800-level course (for example, 18-813, 18-815, 18-819).	

Note: Other appropriate courses may be substituted with the approval of the coordinators in the event that limited course offerings make it impossible to satisfy the requirements as described above.

Environmental Engineering and Sustainability Designated Minor

Neil M. Donahue, Director
Office: Doherty Hall 2116

Concern for the environment now influences a wide range of public, private and engineering decisions. Environmental Engineering is widely recognized as a discipline at the graduate and professional level, and undergraduate training in environmental issues and processes can provide the preparation necessary to pursue this career path, or serve as a useful complement to a career in any of the traditional areas of engineering. Sustainability issues are not considered critical across engineering disciplines. Effective preparation requires broad knowledge and skills in the areas of environmental engineering, sustainability, and environmental policy.

Faculty Advisors

The Environmental Engineering and Sustainability program is a focus for faculty members from diverse engineering backgrounds. The faculty are actively engaged in teaching and conducting research in this field. Current faculty advisors are:

- Biomedical Engineering — Robert Tilton
- Chemical Engineering - Neil Donahue
- Civil and Environmental Engineering — Peter Adams and Scott Matthews
- Electrical and Computer Engineering — Marija Ilic
- Engineering and Public Policy — Edward Rubin
- Mechanical Engineering — Ryan Sullivan
- Materials Science and Engineering — Robert Heard

To declare this minor, submit a minor declaration form to the Department of Civil and Environmental Engineering.

Course Requirements

The requirements include two core courses, three technical electives, and two policy electives.

A1. Core Courses in Sustainability 12 units

Select one course from:

12-712/19-717	Introduction to Sustainable Engineering	12
12/19-714	Environmental Life Cycle Assessment	12

A2. Core Courses in Environmental Engineering 9 units

Select one course from:

12-351	Environmental Engineering	9
24/19-424	Energy and the Environment	9
12-651	Air Quality Engineering	9
24-425	Combustion and Air Pollution Control	9
12-702	Fundamentals of Water Quality Engineering	12

B. Technical Electives in Environmental Engineering and Sustainability 27 units

Select three from the following list:

03-121	Modern Biology	9
09-106	Modern Chemistry II	10
09-510	Chemistry and Sustainability	9
12-201	Geology	9
12-351	Environmental Engineering	9
12-651	Air Quality Engineering	9
12-657	Water Resource Systems Engineering	9
12-658	Hydraulic Structures	9
12-702	Fundamentals of Water Quality Engineering	12
12-712/19-717	Introduction to Sustainable Engineering	12
12/19-714	Environmental Life Cycle Assessment	12
12-718	Environmental Engineering, Sustainability, and Science Project	12
24/19-424	Energy and the Environment	9

24-425	Combustion and Air Pollution Control	9
27-323	Powder Processing of Materials	9
27-367	Selection and Performance of Materials *	6
27-421	Processing Design *	6
48-315	Environment I: Climate & Energy	9
79-289	Animal Planet: An Environmental History of People and Animals	6

* 6 units; must be combined with 3 additional units

C. Policy Electives 18 units

Select two from the following list of humanities/social science-oriented courses:

06/19-365	Water Technology Innovation and Policy	9
19-448	Science, Technology & Ethics	9
48-576	Mapping Urbanism	9
73-148	Environmental Economics	9
73-358	Economics of the Environment and Natural Resources	9
73-359	Benefit-Cost Analysis	9
76-319	Environmental Rhetoric	9
79-303	Pittsburgh and the Transformation of Modern Urban America	6
79-372	Perspectives on the Urban Environment	9
80-244	Environmental Ethics	9
88-220	Policy Analysis I	9
88-221	Policy Analysis II	9
88-223	Decision Analysis and Decision Support Systems	9
90-758	Ethics & Public Policy in a Global Society	6
90-765	Cities, Technology and the Environment	6
90-789	Sustainable Community Development	12
90-798	Environmental Policy & Planning	12

NOTES:

1. Courses cannot be double-counted for lists A and B.
2. Courses used to fulfill the first year restricted technical electives for CIT **cannot** be double counted for list B requirements
3. A group of three environmental policy courses, from List C, excluding Heinz courses, may be counted as fulfilling the general education depth requirement required of all CIT students if and only if the student completes the Environmental Engineering and Sustainability Minor. Approval of the selected courses from List C for fulfillment of this CIT depth sequence is required from the student's home department advisor.
4. Courses required within a student's CIT major **can** be double counted for list A or B course requirements, with the exception that 12-351 Environmental Engineering can be counted toward completion of the minor for non-CEE students only.
5. Students may take up to two list B courses in their home department. One list B course must be from outside their home department. EPP double majors should NOT consider EPP their home department. BME double majors should NOT consider BME their home department.
6. At most ONE 48-xxx course can be used as a List B course and one as a List C course. The 48-xxx courses may not be acceptable as technical electives by some CIT engineering departments.
7. Other environmentally related technical electives with similar or related content may be substituted for List B courses **only** with written permission of the Director.
8. Other humanities and social science courses with similar or related content may be substituted for Type C courses **only** with written permission of the Director.
9. A list of available courses for the minor in each semester is provided to students who have declared the minor and to all faculty advisors for the minor.

Global Engineering Designated Minor

Treci Bonime, Director
Office: Scaife Hall 110

Many engineers work on international projects or for multinational companies. Carnegie Mellon is an international community, with a significant fraction of international students and many events featuring foreign speakers and cultural experiences. This minor is intended for engineering students interested in broadening their background in international experiences and global awareness and engagement.

Course Requirements

International Management (1 course)

Complete one course in international management or business such as:

70-342	Managing Across Cultures	9
70-365	International Trade and International Law	9
70-381	Marketing I	9
70-430	International Management	9
88-384	Conflict and Conflict Resolution in International Relations	9

Or approved equivalent.

Regional Specialization (1 course)

Complete one course in non-US History, international politics, or literature in a single region of the world. See the list at http://www.cit.cmu.edu/global/courses_degrees.html below for examples (Note: Please consult with the Global Engineering director before planning your course schedule, as some course information may have changed).

Ethics (1 course)

Any ethics course that provides some exposure to international ethics issues such as:

70-332	Business, Society and Ethics	9
80-136	Social Structure, Public Policy & Ethics	9
80-244	Environmental Ethics	9
80-247	Ethics and Global Economics	9

Or approved equivalent

Modern Languages

Demonstration of basic competency in a foreign language via one of the three options listed below:

- Complete one (1) Modern Languages course at the 200 level, with a minimum grade of C, or
- Achieve a score of 4 or higher in one foreign language Advanced Placement examination, or
- Demonstrate equivalent proficiency to the satisfaction of the Department of Modern Languages

Study/Work Abroad

Study or engineering internship work abroad for a semester or a summer. The region visited should be consistent with the language and regional culture/history studied.

Materials Science and Engineering Designated Minor

Michael E. McHenry, Director
Office: Roberts Engineering Hall 243

The Designated Minor in Materials Science and Engineering provides the CIT student with a background in the field of Materials Science and Engineering.

This minor is open to all CIT students, with the exception of MSE majors. All required and elective courses are taught within the MSE Department.

Course Requirements

The minor requires a minimum of 45 units, with two semester long required courses (the first being a sequence of two minis).

Prerequisites

Students wishing to take the MSE minor must have prerequisite thermodynamics and transport courses. The prerequisite MSE courses may be substituted for by a thermodynamics and transport course in another engineering discipline.

Core Courses (21 units)

27-211	Structure of Materials (Minor Option)	6
27-212	Defects in Materials (Minor Option)	6
27-217	Phase Relations and Diagrams	12

The laboratories with these courses are not required as core but will be counted as elective units if desired.

Elective Courses (24 units minimum)

The student must select a minimum of 24 units from the following list:

27-100	Engineering the Materials of the Future	12
27-301	Microstructure and Properties I	9
27-311	Polymeric Biomaterials	9
27-323	Powder Processing of Materials	9
27-324	Introduction to Polymer Science and Engineering	9
27-325	Polymer Physics and Morphology	9
27-357	Introduction to Materials Selection	6
27-367	Selection and Performance of Materials	6
27-582	Phase Transformations in Solids	9
27-433	Dielectric, Magnetic, Superconducting Properties of Materials & Related Devices	9
27-432	Electronic and Thermal Properties of Metals, Semiconductors and Related Devices	9
27-421	Processing Design	6
27-445	Structure, Properties and Performance Relationships in Magnetic Materials	9
27-591	Mechanical Behavior of Materials	9
27-454	Supervised Reading	Var.
27-533	Principles of Growth and Processing of Semiconductors	6
27-555	Materials Project I	Var.
27-565	Nanostructured Materials	9
27-542	Processing and Properties of Thin Films	9
27-551	Properties of Ceramics and Glasses	9
27-566	Special Topics in MSE:Using Matls Informatics to Assess Societal Impact of Matls	9
27-592	Solidification Processing	9
42-444	Medical Devices	9

Mechanical Behavior of Materials Designated Minor

Warren M. Garrison, Jr., Director
Office: Wean Hall 3303

An understanding of mechanical behavior is important to both the development of new materials and the selection of appropriate materials for many applications. The mechanical behavior of materials is best investigated and understood by integrating solid mechanics with the microstructural basis of flow and fracture. The purpose of this minor is to allow a formal basis for students to pursue an integrated approach to the mechanical behavior of materials.

Although this minor is open to all CIT students, only students in the departments of Civil Engineering, Materials Science and Engineering, and Mechanical Engineering can take advantage of the double counting permitted for some courses in their department majors. Students in other departments may have difficulty in fulfilling the requirements in four years.

Faculty Advisors

- Chemical Engineering — Paul Sides
- Electrical and Computer Engineering — David W. Greve
- Mechanical Engineering — Paul S. Steif
- Materials Science and Engineering — Warren M. Garrison, Jr.

Course Requirements

The minor requires six courses: three core courses, two solid mechanics courses, and one materials science course. In satisfying these course requirements, each student must take three out-of-department courses. Each student is required to complete three core courses:

Core Courses:

27-201	Structure of Materials	9
27-591	Mechanical Behavior of Materials	9-12
or 27-791	Mechanical Behavior of Materials	
12-212	Statics	9
or 24-261	Statics	

Group A: Materials Science Courses

Each student must take one course from this list of Materials Science courses:

27-202	Defects in Materials ¹	9
27-357	Introduction to Materials Selection ²	6
27-551	Properties of Ceramics and Glasses	9
42-411	Engineering Biomaterials	9

¹ 27-202 cannot be used by MSE students to satisfy the requirements of the minor.

² 27-357 cannot be used by MSE students to satisfy the requirements of the minor.

Group B: Solid Mechanics Courses

Each student must take two of the following Solid Mechanics courses:

12-231	Solid Mechanics	9
or 24-262	Stress Analysis	
12-635	Structural Analysis	9
or 24-351	Dynamics	

Students should check with the director of the program or their faculty advisor for an up-to-date list of relevant courses that will count towards this minor. For more information, please consult the Undergraduate Course Catalog and the current Schedule of Classes.

Engineering Minors for Non-Engineering Students

Biomedical Engineering Minor

(for non-engineering students)

Conrad M. Zapanta, Ph.D.
www.bme.cmu.edu

Campus Office for Student Affairs: Doherty Hall 2100

BME offers a minor program for those non-CIT students who desire coordinated training in BME. The Biomedical Engineering Minor is designed to train students to apply engineering techniques to problems in medicine and biology. Emphasis is placed on describing biological organisms as engineering systems and on applying engineering technology to clinical and laboratory situations.

Upon completing the Biomedical Engineering Minor, the student may elect to continue graduate studies in Biomedical engineering or basic biomedical sciences at either the master's or Ph.D. level. In addition, some of the courses in BME minor will assist students in preparing for medical school. Students who pursue jobs in biomedical engineering are involved in developing and improving medical devices, automating medical procedures using information technology, characterizing the operation of physiological systems, designing artificial organs, and altering microbes and mammalian cells for the production of useful drugs and chemicals.

Students in the minor program can choose from a wide range of electives to build skills in a number of areas of biomedical engineering. Students who wish to complete the Biomedical Engineering Designated Minor should complete the CIT Minor Request Form (http://www.cit.cmu.edu/files/documents/minor_request.pdf) and return it to the Associate Head of the Department of Biomedical Engineering (<http://www.bme.cmu.edu/contact.html>).

Requirements for non-CIT students: six courses, minimum of 60 units

03-121	Modern Biology	9
42-101	Introduction to Biomedical Engineering	12
42-202	Physiology (pre-req. 03-121 or permission of instructor)	9
xx-xxx	Elective I #	
xx-xxx	Elective II +	
xx-xxx	A second Introductory Engineering Course* or Any 42-xxx Course Numbered 42-3xx or Higher and Worth at Least 9 Units	

Some Special Topics, newly offered or intermittently offered 42-xxx may be acceptable as electives. Students should consult with their advisors and petition the Biomedical Engineering Undergraduate Affairs Committee for permission to include such courses as track electives.

Notes:

- # This course cannot be a required course in the student's major. It may be
1. Any Track Gateway, Track Elective, Restricted Elective, or Track Capstone course selected from any of the four Biomedical Engineering tracks. A list of track courses is provided under the BME Additional Major listing in the catalog and is periodically updated on the website.
 2. Any 42-xxx course with a 42-300 or higher number and worth at least 9 units.
 3. 42-203 Biomedical Engineering Laboratory (or the cross-listed version 03-206 for students in the Health Professions Program)**.
 4. One semester of 42-200 Sophomore BME Research Project, 42-300 Junior BME Research Project, 42-400 Senior BME Research Project or 39-500 Honors Research Project, as long as the research project is supervised by a regular or courtesy Biomedical Engineering faculty member and the project is conducted for 9 or more units of academic credit.

+ Elective II must be a Biomedical Engineering Track Gateway, Track Elective, Restricted Elective, or Track Capstone course that is offered by one of the CIT Departments (06-xxx, 12-xxx, 18-xxx, 19-xxx, 24-xxx, 27-xxx or 42-xxx). The only exception is that 03-232, the biotechnology-focused version of Biochemistry taught each Spring by the Department of Biological Sciences, is also acceptable, provided students meet the prerequisites and corequisites for that course.

* Select either 06-100 Introduction to Chemical Engineering, 12-100 Introduction to Civil and Environmental Engineering, 18-100 Introduction to Electrical and Computer Engineering, 19-101 Introduction to Engineering and Public Policy, 27-100 Engineering the Materials of the Future, or 24-101

Fundamentals of Mechanical Engineering. Note that corequisites are required for these courses

** Priority for enrollment in 42-203 or 03-206 will be given to students who have declared the Additional Major in Biomedical Engineering. If sufficient room in the course remains after all majors have been accommodated in a given semester, students who have declared the Biomedical Engineering Designated Minor will be given the next priority for enrollment. If space still allows, other students will be enrolled.

Engineering Studies Minor

(for non-engineering students)

Kurt Larsen, Director

Office: Scaife Hall 110

Carnegie Mellon undergraduate students enrolled in colleges other than engineering can complete a Minor in Engineering Studies in addition to their regular majors. Students pursuing this minor are required to complete courses from at least two different engineering departments in order to assure some breadth of exposure to engineering. In addition, the minor provides students the opportunity to pursue an in-depth concentration in a particular field of engineering.

For the Minor in Engineering Studies, students must complete five engineering courses as follows and must earn a cumulative QPA of 2.00 in these five courses. Students may declare the minor by contacting the Director after they have successfully completed two introductory engineering courses (from list #1 below).

Double counting of core courses in student's primary major is not permitted.

Because of the nature of the courses offered by Engineering and Public Policy, only two EPP courses (including 19-101) can be used toward the minor requirements. Students need special permission to use an Engineering and Public Policy course (EPP-19-xxx) toward minor requirements. Students interested in EPP coursework should consider the Technology and Policy minor instead.

Requirements

1. Two of the following:

12-100	Introduction to Civil and Environmental Engineering	12
18-100	Introduction to Electrical and Computer Engineering	12
19-101	Introduction to Engineering and Public Policy	12
24-101	Fundamentals of Mechanical Engineering	12
27-100	Engineering the Materials of the Future	12
42-101	Introduction to Biomedical Engineering	12
06-100	Introduction to Chemical Engineering	12

2. Three courses of at least 9 units each from one or more CIT departments

3. Up to one of the following Robotics courses can count toward the ES minor. But it cannot be double-counted with the Robotics minor or double major.

16-311	Introduction to Robotics	12
16-362	Mobile Robot Programming Laboratory	12
16-384	Robot Kinematics and Dynamics	12
16-385	Computer Vision	9
16-421	Vision Sensors	12
16-474	Robotics Capstone	12

4. **NOTE:** The following courses may NOT be included as part of the Minor in Engineering Studies. In addition to the courses listed, most EPP courses (19-xxx) are not permissible for the minor and students should contact the Director for prior approval of EPP courses.

06-262	Mathematical Methods of Chemical Engineering	12
12-201	Geology	9
15-213	Introduction to Computer Systems	12

18-200	Emerging Trends in Electrical and Computer Engineering	1
18-202	Mathematical Foundations of Electrical Engineering	12
18-213	Introduction to Computer Systems	12
24-201	Engineering Graphics	9
24-311	Numerical Methods	12
39-200	Business for Engineers	9
42-202	Physiology	9

Technology and Policy Minor

(for non-engineering students)

Deanna H. Matthews, Director Office: Baker Hall 129

The Technology and Policy Minor is administered by the Department of Engineering and Public Policy (EPP) for students who are majoring in areas other than engineering. The Technology and Policy Minor is designed to give students a basic understanding of the interactions between technology, society and policy and some project experience in problems involving technology and policy.

Pre-requisites: Students should have prerequisite knowledge in economics (73-100 Principles of Economics or higher level economics course) and statistics (36-202 Statistical Methods or higher level statistics course) in order to pursue the Technology and Policy Minor.

Course Requirements

19-101	Introduction to Engineering and Public Policy	12
19-301	Decision Making Methods for EPP or other approved Decision Science course	9
or 19-351	Applied Methods for Technology-Policy Analysis	
19-451	EPP Projects	12
or 19-452	EPP Projects	
xx-xxx	Two EPP Technology-Policy Electives	18

EPP Technical Electives include courses in CIT, MCS, or SCS that address problems at the society-technology interface and the means of analyzing these issues. A list of qualifying Technology-Policy electives is assembled each semester and is available from the EPP Department. Example Technology-Policy electives include:

19-211	Ethics and Policy Issues in Computing	9
19-365	Water Technology Innovation and Policy	9
19-402	Telecommunications Technology, Policy & Management	12
19-411	Global Competitiveness: Firms, Nations and Technological Change	9
19-424	Energy and the Environment	9

Students must earn a cumulative QPA of 2.0 in all courses taken for the minor. Required courses taken for a student's primary major may not be counted toward the Technology and Policy Minor. Elective courses for a student's primary major or courses fulfilling general education requirements may be counted, however.

Robotics Minor

Director: Dr. Howie Choset
Administrative Coordinator: Julie Goldstein
Website: http://www.ri.cmu.edu/education/ugrad_minor.html

The Minor in Robotics provides an opportunity for undergraduate students at Carnegie Mellon to learn the principles and practices of robotics through theoretical studies and hands-on experience with robots. The Minor is open to students in any major of any college at Carnegie Mellon. Students initially learn the basics of robotics in an introductory robotics overview course. Additional required courses teach control systems and robotic manipulation. Students also choose from a wide selection of electives in robotics, perception, computer vision, cognition and cognitive science, or computer graphics. Students have a unique opportunity to undertake independent research projects, working under the guidance of Robotics Institute faculty members; this provides an excellent introduction to robotics research for those considering graduate studies.

All Robotics Minors are required to take Introduction to Robotics (16-311). This course is designed to help students understand the big picture of what is going on in robotics through topics such as kinematics, mechanisms, motion planning, sensor based planning, mobile robotics, sensors, and vision. The minor also requires students to take a controls class and a kinematics class. These courses provide students with the necessary

intuition and technical background to move on to more advanced robotics courses. In addition to the required courses, students must take 2 electives. The student must have course selection approved by the Director during the application submission process.

A 2.5 QPA in the Minor curriculum is required for graduation. Courses that are taken Pass/Fail or audited cannot be counted for the Minor.

Admission

Admission to the Undergraduate Minor in Robotics is limited to current Carnegie Mellon students. Students interested in signing up for the minor should fill out the application form (https://www-preview.ri.cmu.edu/education/apply/ugrad_appform.html).

Prerequisite

Successful candidates for the Robotics Minor will have prerequisite knowledge of C language, basic programming skills, and familiarity with basic algorithms. Students can gain this knowledge by taking 15-122 Principles of Imperative Computation.

Required Courses

Overview:		Units
16-311	Introduction to Robotics	12

Controls (choose one of the following):

06-464	Chemical Engineering Process Control	9
24-451	Feedback Control Systems	12
18-370	Fundamentals of Control	12
16-299	Introduction to Feedback Control Systems (Computer Science)	12
16-xxx	Upper-level RI course with instructor and Program Director's permission	

Kinematics (choose one of the following):

16-384	Robot Kinematics and Dynamics	12
24-355	Kinematics and Dynamics of Mechanisms	9
16-xxx	Upper-level RI course with instructor and Program Director's permission	

Electives

Two Electives (chosen from the following):		Units
10-601	Introduction to Machine Learning	12
11-344	Machine Learning in Practice	12
15-381	Artificial Intelligence: Representation and Problem Solving	9
15-424	Foundations of Cyber-Physical Systems	12
15-462	Computer Graphics	12
15-463	Computational Photography	12
15-491	Special Topic: CMRoboBits: Creating Intelligent Robots	12
15-494	Special Topic: Cognitive Robotics	12
16-264	Humanoids	12
16-362	Mobile Robot Programming Laboratory	12
16-385	Computer Vision	9
16-421	Vision Sensors	12
16-423	Designing Computer Vision Apps	12
16-597	Undergraduate Reading and Research	Var.
18-342	Fundamentals of Embedded Systems	12
18-348	Embedded Systems Engineering	12
18-349	Embedded Real-Time Systems	12
18-549	Embedded Systems Design	12
18-578	Mechatronic Design	12
85-370	Perception	9
85-382	Consciousness and Cognition	9
85-395	Applications of Cognitive Science	9
85-412	Cognitive Modeling	9
85-419	Introduction to Parallel Distributed Processing	9
85-426	Learning in Humans and Machines	9

Graduate level Robotics courses may be used to meet the elective requirement with permission from the Program Director. Graduate level Mechanical Engineering and Electrical and Computer Engineering courses

that are relevant to robotics may be used to meet the elective requirement with permission from the Program Director.

Students may count up to 12 units of 16-597 Undergraduate Reading and Research towards the degree requirements.

Double-Counting Restriction

Courses being used to satisfy the requirements for the Robotics Minor may not be counted towards another minor. Students are permitted to double count a maximum of two courses from their Major (excluding General Education requirements) towards the Minor in Robotics. Free electives are not subject to the double counting policy.

Department of Biomedical Engineering

Campus Office for Student Affairs and Graduate Admissions
Doherty Hall 2100

Ph: (412) 268-3955
Fax: (412) 268-1173

Biomedical Engineering Overview

Biomedical engineering education at Carnegie Mellon reflects the belief that a top biomedical engineer must be deeply trained in both a traditional engineering practice and biomedical sciences. The unique additional major program leverages extensive collaborations with sister departments in the College of Engineering and with major medical institutions in Pittsburgh. This collaborative approach, combined with a rigorous engineering education, confers unique depth and breadth to the education of Biomedical Engineering graduates.

Students who elect Biomedical Engineering as a major must also declare a major in one of the traditional engineering disciplines: Chemical Engineering, Civil & Environmental Engineering, Electrical & Computer Engineering, Materials Science & Engineering, or Mechanical Engineering.

The curriculum, demanding but readily feasible to complete in four years, is highly rewarding to motivated students.

Common Requirements for the Additional Major

The Biomedical Engineering additional major program takes advantage of curricular overlaps between Biomedical Engineering and traditional engineering majors, such that the dual major can be completed in four years with only a modest increase in course requirements. The requirements for Biomedical Engineering consist of the core, the tracks, and the capstone design course. The core exposes students to basic facets of biomedical engineering to lay a foundation. The tracks allow students to build depth in a specific aspect of biomedical engineering. The capstone design (<http://www.bme.cmu.edu/ugprog/design.html>) engages students in team work to develop real-world applications.

While most tracks are designed to parallel a traditional engineering discipline, a General Biomedical Engineering track is available for students intending on pursuing graduate studies or medical school, and a self-designed track allows students to pursue specific areas not covered by the pre-defined tracks. **The additional major in Biomedical Engineering should be declared at the same time when declaring a traditional engineering major.**

Course Requirements for the Additional Major Degree

Student majoring in Biomedical Engineering must meet three sets of requirements: 1) Biomedical Engineering (BME), 2) a traditional engineering discipline, and 3) CIT General Education (http://engineering.cmu.edu/current_students/services/general_education_requirements/general_education_2016) sequence. The Quality Point Average (QPA) for courses that count toward the additional major must be 2.00 or better. No course taken on a pass/fail or audit basis may be counted toward the additional major.

The course requirements for the BME portion of the additional major are as follows:

Core Courses (all required)

		Units
42-101	Introduction to Biomedical Engineering- Fall and Spring	12
42-201	Professional Issues in Biomedical Engineering- Fall and Spring	3
42-202	Physiology- Fall and Spring	9
42-203	Biomedical Engineering Laboratory- Fall and Spring [#]	9
03-121	Modern Biology- Fall and Spring	9
42-401	Foundation of BME Design	6
42-402	BME Design Project- Spring	9

[#] Also known as 03-206 for Health Professions Program students.

* 42-401 serves as the precursor/pre-requisite for 42-402 BME Design Project.

Tracks (Completion of one track is required)

- Biomaterials and Tissue Engineering (BMTE (<http://www.bme.cmu.edu/ugprog/bmte.html>))
- Biomechanics (BMEC (<http://www.bme.cmu.edu/ugprog/bmec.html>))
- Biomedical Signal and Image Processing (BSIP (<http://www.bme.cmu.edu/ugprog/bsip.html>))
- Cellular and Molecular Biotechnology (CMBT (<http://www.bme.cmu.edu/ugprog/cmbt.html>))
- General Biomedical Engineering (GBME (<http://www.bme.cmu.edu/ugprog/gbme.html>))
- Self-Designed Biomedical Engineering (SBME (<http://www.bme.cmu.edu/ugprog/sbme.html>))

Biomaterials and Tissue Engineering (BMTE) Track

Overview

The BMTE track addresses issues at the interface of materials science, biology and engineering. The topics include the interactions between materials and cells or tissues, the effects of such interactions on cells and tissues, the design of materials for biological applications, and the engineering of new tissues.

Targets

The BMTE track is ideal for students interested in combining the education of Biomedical Engineering with Materials Science & Engineering or with Chemical Engineering. Both provide the necessary foundation in chemistry and/or materials science. Students of this track may develop careers in biotechnology, tissue engineering, biopharmaceuticals, and medical devices that leverage materials properties.

Requirements

In addition to the Biomedical Engineering core courses, students in the BMTE Track must take the following combination of courses:

- One (1) BMTE Gateway course
- One (1) **Required** BMTE elective
- Two (2) other Electives (either one of the two options)
 1. One (1) BMTE Elective (either **Required** or **Additional**) and one (1) **Restricted** Elective
 2. Two (2) Additional BMTE Electives

BMTE Gateway Course[#]

03-231	Biochemistry I- Fall	9
03-232	Biochemistry I- Spring [#]	9

[#] Note that only 03-232 satisfies Chemistry Engineering course requirements. Either 03-231 or 03-232 satisfies Materials Science & Engineering requirements.

BMTE Electives

Required BMTE Electives (must take one of the following)

42/27-411	Engineering Biomaterials- Fall	9
42-612/27-520	Tissue Engineering- Spring	12

Additional BMTE Electives

03-240	Cell Biology- Spring	9
09-217	Organic Chemistry I- Fall ^{2,#}	9
or 09-218	Organic Chemistry II	
42-620	Engineering Molecular Cell Biology- Fall	12
42-624	Biological Transport and Drug Delivery- Spring	9
42-643/24-615	Microfluids- Intermittent	12
42-698	Special Topics-B Stem Cell Engineering - Fall, every other year	9
42-698	Special Topics-G Molecular and Micros-Scale Polymeric Biomaterials in Medicine - Spring, every other year	9
42-699	Special Topics-N Applied Nanoscience and Nanotechnology in Biomedical Engineering - Fall	12

² Note that either 09-217 or 09-218 (offered in the Spring), but not both, may be counted as a BMTE Elective.

Chemical Engineering requirement

Restrictive Elective Courses (choose at most one)

42-698	Special Topics-A Bioinstrumentation - Fall	9
42-698	Special Topics-C Introduction to Biomedical Signal Processing - Fall	9
42-698	Special Topics-D Engineering in Medicine - Fall	9
42-698	Special Topics-E Surgery for Engineers- Spring	9
42-698	Special Topics-F Technological Innovation in Biomedical Engineering - Fall	9
42-698	Special Topics-H Systems Modeling and Analysis for Biomedical Engineering- Fall	9
42-699	Special Topics-G Computational Methods in Biomedical Engineering - Spring	12
42-x00	BME Research *	Var.
39-500	Honors Research Project *	Var.

* The 42-x00 research project (42-200/300/400 Sophomore/Junior/Senior Biomedical Engineering Research Project OR 39-500 Honors Research Project) must be on a BME topic supervised or co-supervised by a BME faculty member and conducted for 9 or more units of credit.

Some Special Topics and newly offered or intermittently offered courses may be acceptable as BMTE track electives. Students should consult with their BME advisors and petition the BME Undergraduate Affairs Committee for permission to include such courses as BMTE track electives.

Sample schedules can be found on the BMTE (<http://www.bme.cmu.edu/upprog/bmte.html>) page on the BME website.

Biomechanics (BMEC) Track

Overview

The BMEC track addresses the application of solid or fluid mechanics to biological and medical systems. It provides quantitative understanding of the mechanical behavior of molecules, cells, tissues, organs, and whole organisms. The field has seen a wide range of applications from the optimization of tissue regeneration to the design of surgical and rehabilitation devices.

Targets

The BMEC track is ideally suited to the combined education of Biomedical Engineering and Mechanical Engineering or Civil & Environmental Engineering. Both provide the necessary foundation in the underlying physical principles and their non-Biomedical Engineering applications. This track may also appeal to students of Electrical & Computer Engineering who are interested in biomedical robotics. Education in biomechanics enables students to pursue careers in medical devices or rehabilitation engineering.

Requirements

In addition to the Biomedical Engineering core courses, students in the BMEC Track must take the following combination of courses:

- One (1) BMEC Gateway Course

- One (1) **Required** BMEC Elective
- Two (2) other Electives (either one of the two options)

1. One (1) BMEC Elective (either **Required** or **Additional**) and one (1) Restricted Elective
2. Two (2) BMEC Electives (either **Required** or **Additional**)

BMEC Gateway Course¹

24-231 Fluid Mechanics

06-261 Fluid Mechanics

12-355 Fluid Mechanics

12-355 Fluid Mechanics

¹Note that 24-231 Fluid Mechanics satisfies Mechanical Engineering course requirements, 06-261 Fluid Mechanics satisfies Chemical Engineering course requirements, and 12-355 Fluid Mechanics satisfies Civil & Environmental Engineering course requirements.

BMEC Electives

Required BMEC Electives (must take at least one of the following)

42-341	Introduction to Biomechanics- Fall	9
42-645/24-655	Cellular Biomechanics- Intermittent	9
42-646/24-657	Molecular Biomechanics- Spring, every other year	9
42-648	Cardiovascular Mechanics	12
42-698	Special Topics-I Biofluid Mechanics- Fall	9

Additional BMEC Electives

33-441/03-439	Introduction to BioPhysics- Fall	10
42-444	Medical Devices- Fall and Spring	9
42-447	Rehabilitation Engineering- Fall	9
42-640/24-658	Computational Bio-Modeling and Visualization- Spring	12
42-643/24-615	Microfluids-Spring, Intermittent	12
42-647	Introduction to Continuum Biomechanics- Spring	12

Restrictive Elective Courses (choose at most one)

42-698	Special Topics-A Bioinstrumentation - Fall	9
42-698	Special Topics-C Introduction to Biomedical Signal Processing - Fall	9
42-698	Special Topics-D Engineering in Medicine - Fall	9
42-698	Special Topics-E Surgery for Engineers- Spring	9
42-698	Special Topics-F Technological Innovation in Biomedical Engineering - Fall	9
42-698	Special Topics-H Systems Modeling and Analysis for Biomedical Engineering- Fall	9
42-699	Special Topics-G Computational Methods in Biomedical Engineering - Spring	12
42-x00	BME Research *	Var.
39-500	Honors Research Project *	Var.

* The 42-x00 research project (42-200/300/400 Sophomore/Junior/Senior Biomedical Engineering Research Project OR 39-500 Honors Research Project) must be on a BME topic supervised or co-supervised by a BME faculty member and conducted for 9 or more units of credit.

Some Special Topics, newly offered or intermittently offered courses may be acceptable as track electives. Students should consult with their advisors and petition the BME Undergraduate Affairs Committee for permission to include such courses as track electives.

Sample schedules can be found on the BMEC (<http://www.bme.cmu.edu/upprog/bmec.html>) page on the BME website.

Biomedical Signal and Image Processing (BSIP) Track

Overview

The BSIP track addresses bio/medical phenomena based on the information embedded in sensor-detected signals, including digital images and nerve electrical pulses. Students in this track will gain understanding of the technologies involved in acquiring signals and images, the mathematical principles underlying the processing and analysis of signals, and the applications of signal/image processing methods in basic research and medicine.

Targets

This track aligns most naturally with a combined education of Biomedical Engineering and Electrical & Computer Engineering, which lays a solid foundation in signal processing principles. This track prepares students for careers in medical imaging or smart prosthetics. It also interfaces with many clinical practices including radiology, neurology/neurosurgery, and pathology.

Requirements

In addition to the Biomedical Engineering core courses, students in the BSIP Track must take the following combination of courses:

- One (1) BSIP Gateway course
 - One (1) **Required** BSIP elective
 - Two (2) other Electives (either one of the two options)
1. One (1) BSIP Electives (either **Required** or **Additional**) and one (1) **Restricted** Elective
 2. Two (2) BSIP Electives (either **Required** or **Additional**)

BSIP Gateway Course

18-290 Signals and Systems - Fall/Spring

BSIP Electives

Required BSIP Electives (must take at least one of the following)

42-431/18-496	Introduction to Biomedical Imaging and Image Analysis- Fall	12
42-630	Introduction to Neuroscience for Engineers- Spring	12
42-631	Neural Data Analysis- Fall	9
42-632	Neural Signal Processing- Spring	12

Additional BSIP Electives

03-534	Biological Imaging and Fluorescence Spectroscopy- Spring	9
15-386	Neural Computation- Spring	9
18-491	Fundamentals of Signal Processing- Fall ¹	12
or 18-792	Advanced Digital Signal Processing	
42-426	Biosensors and BioMEMS- Spring, every other year	9
42-447	Rehabilitation Engineering- Fall	9
42-640/24-658	Computational Bio-Modeling and Visualization- Spring	12
42-698	Special Topics- A : Bioinstrumentation - Fall	9
42-698	Special Topics- P Introduction to Biophotonics- Fall	9
42-735	Medical Image Analysis- Spring	12

¹ Note that either 18-491 or 18-792 (offered in Spring), but not both, may be counted as a BSIP Elective.

Restrictive Elective Courses (choose at most one)

42-698	Special Topics-D Engineering in Medicine - Fall	9
42-698	Special Topics-E Surgery for Engineers- Spring	9
42-698	Special Topics-F Technological Innovation in Biomedical Engineering - Fall	9
42-698	Special Topics-H Systems Modeling and Analysis for Biomedical Engineering- Fall	9
42-699	Special Topics-G Computational Methods in Biomedical Engineering - Spring	12
42-x00	BME Research *	Var.
39-500	Honors Research Project *	Var.

* The 42-x00 research project (42-200/300/400 Sophomore/Junior/Senior Biomedical Engineering Research Project OR 39-500 Honors Research Project) must be on a BME topic supervised or co-supervised by a BME faculty member and conducted for 9 or more units of credit.

Some Special Topics, newly offered or intermittently offered courses may be acceptable as track electives. Students should consult with their advisors and petition the BME Undergraduate Affairs Committee for permission to include such courses as track electives.

Sample schedules can be found on the BSIP (<http://www.bme.cmu.edu/ugprog/bsip.html>) page on the BME website.

Cellular and Molecular Biotechnology (CMBT) Track

Overview

The CMBT track emphasizes fundamentals and applications of biochemistry, biophysics, and cell biology, and processes on the nanometer to micrometer size scale. Students in this track acquire understanding of the molecular and cellular bases of life processes, and build skills in quantitative modeling of live cell-based biotechnologies and in technologies that exploit the unique properties of biomolecules in non-biological settings.

Targets

The CMBT track is ideally suited for the combined education of Biomedical Engineering and Chemical Engineering, which provides a strong core of chemistry and molecular processing principles. The track may also interest students of Mechanical Engineering, Materials Science & Engineering, or Civil & Environmental Engineering who have an interest in molecular aspects of Biomedical Engineering. The CMBT track prepares students for careers in bio/pharmaceutical, medical diagnostics, biosensors, drug delivery, and biological aspects of environmental engineering.

requirements

In addition to the Biomedical Engineering core courses, students in the CMBT Track must take the following combination of courses:

- One (1) CMBT Gateway course
- One (1) **Required** CMBT Elective
- Two (2) other Electives (either one of the two options)
 1. One (1) CMBT Elective (either **Required** or **Additional**) and one (1) **Restricted** Elective
 2. Two (2) CMBT Electives (either **Required** or **Additional**)

CMBT Gateway Course

03-231 Biochemistry I (9 units) [#] - Fall

03-232 Biochemistry I (9 units) [#] - Spring

[#]Note that only 03-232 satisfies Chemistry Engineering course requirements, either 03-231 or 03-232 satisfies Materials Science & Engineering requirements.

CMBT Electives

Required CMBT Electives (must take at least one of the following)

42-620	Engineering Molecular Cell Biology	12
42-623	Cellular and Molecular Biotechnology	9
42-624	Biological Transport and Drug Delivery	9

Additional CMBT Electives

03-240	Cell Biology- Spring	9
42/06-622	Bioprocess Design- Spring, intermittent	9
42-643	Microfluids- Spring, intermittent	12
42-645/24-655	Cellular Biomechanics- Intermittent	9
42-646/24-657	Molecular Biomechanics- Spring, every other year	9
42-698	Special Topics-B Stem Cell Engineering - Spring, every other year	9
42-699	Special Topics-N Applied Nanoscience and Nanotechnology -Fall	12

Some Special Topics, newly offered or intermittently offered courses may be acceptable as track electives. Students should consult with their advisors and petition the BME Undergraduate Affairs Committee for permission to include such courses as track electives.

Restrictive Elective Courses (choose at most one)

42-698	Special Topics-A Bioinstrumentation - Fall	9
42-698	Special Topics-C Introduction to Biomedical Signal Processing - Fall	9
42-698	Special Topics-D Engineering in Medicine - Fall	9
42-698	Special Topics-E Surgery for Engineers- Spring	9
42-698	Special Topics-F Technological Innovation in Biomedical Engineering - Fall	9
42-698	Special Topics-H Systems Modeling and Analysis for Biomedical Engineering- Fall	9
42-699	Special Topics-G Computational Methods in Biomedical Engineering - Spring	12

42-x00	BME Research *	Var.
39-500	Honors Research Project *	Var.

* The 42-x00 research project (42-200/300/400 Sophomore/Junior/Senior Biomedical Engineering Research Project OR 39-500 Honors Research Project) must be on a BME topic supervised or co-supervised by a BME faculty member and conducted for 9 or more units of credit.

Sample schedules can be found on the CMBT (<http://www.bme.cmu.edu/uprog/cmbt.html>) page on the BME website.

General Biomedical Engineering (GBME) Track

The GBME track provides broader education in biomedical engineering than other tracks. It is aimed at students who intend on pursuing medical or graduate school and desire a general coverage of biomedical engineering with maximal flexibility in course selection. Students are strongly encouraged to consult the advisor(s) and tailor the electives according to their career plan.

Requirements

In addition to the Biomedical Engineering core requirements, students must fulfill the following requirements.

- One (1) Gateway Course listed for BMEC, BMTE, BSIP, or CMBT track.
- Three (3) Electives from BMEC, BMTE, BSIP, or CMBT track, or from other 42-6xx courses.

Some Special Topics, newly offered or intermittently offered courses may be acceptable as track electives. Students should consult with their advisors and petition the BME Undergraduate Affairs Committee for permission to include such courses as track electives.

** The 42-x00 research project (42-200/300/400 Sophomore/Junior/Senior Biomedical Engineering Research Project OR 39-500 Honors Research Project) must be on a BME topic supervised or co-supervised by a BME faculty member and conducted for 9 or more units of credit. Students may count EITHER 42-x00 BME Research OR 39-500 Honors Research Project (with BME supervision) OR 42-698-E Surgery for Engineers as a track elective. Students may count **EITHER** Surgery for Engineers 42-698-E **OR** Biomedical Engineering Research project, but not both, as one track elective.

Self-Designed Biomedical Engineering (SBME) Track

The SBME track is aimed at helping highly motivated students who have a strong sense of career direction that falls beyond the scope of regular Biomedical Engineering tracks. Students are allowed to design the "track" portion of the curriculum in consultation with the faculty. Example themes include medical robotics, neural engineering, or computational biomedical engineering.

The SBME track is fundamentally different from the GBME track. While the GBME track builds the breadth and may include only courses that are already associated with the four other defined tracks, the SBME track allows students to choose courses relevant to the theme from across the University.

Requirements

In addition to the Biomedical Engineering core requirements, students must take four elective courses of at least 9 units each. These elective courses must form a coherent theme that is relevant to biomedical engineering. In addition, at least one of the elective courses must be judged by the Biomedical Engineering Undergraduate Affairs Committee to have substantial biological or medical content.

Students may count EITHER Surgery for Engineers 42-698-E OR Biomedical Engineering Research project (42-x00), but not both, as one track elective. The research project (42-200/300/400 Sophomore/Junior/Senior Biomedical Engineering Research Project OR 39-500 Honors Research Project) must be on a biomedical engineering topic supervised or co-supervised by a core or courtesy Biomedical Engineering faculty member and for 9 or more units.

Petition Procedure

1. Students wishing to pursue a self-designed track should first consult with the Biomedical Engineering Undergraduate Affairs Committee. Contacts for the Committee are Prof. Robert Tilton (<http://www.bme.cmu.edu/people/faculty4.html#Tilton>) (committee chair), and Prof. Conrad Zapanta (<http://www.bme.cmu.edu/people/faculty4.html#Zapanta>) (Biomedical Engineering Associate Head).

www.bme.cmu.edu/people/faculty4.html#Zapanta) (Biomedical Engineering Associate Head).

2. A SBME track proposal must be submitted electronically as a Word document to Prof. Conrad Zapanta (<http://www.bme.cmu.edu/people/faculty4.html#Zapanta>) at least three weeks prior to Pre-Registration during the spring of the sophomore year. The proposal must include:

- The four courses of the designed track, including catalog descriptions and when these courses are expected to be taken.
- A justification of how these courses form a coherent theme relevant to biomedical engineering.
- Two alternative courses that may substitute for one of the proposed courses, in case the original course is not available.

3. Once approved, the student must sign an agreement listing the theme and the four courses comprising the SBME track.

4. In the event that issues beyond the student's control, such as course scheduling or cancellation, prevent the student from completing the approved course plan, the student may petition the Biomedical Engineering Undergraduate Affairs Committee to

- Substitute a course with another course that fits the approved theme, OR
- Move to the GBME track. The student must complete one of the regular track Gateway courses, otherwise completed SBME courses may count toward GBME requirements.

Minor in Biomedical Engineering

Conrad M. Zapanta, Ph.D.

www.bme.cmu.edu

Campus Office for Student Affairs: Doherty Hall 2100

The minor program is designed for engineering students who desire exposure to biomedical engineering but may not have the time to pursue the Biomedical Engineering additional major. The program is open to students of all colleges and is popular among science majors. In conjunction with other relevant courses, the program may provide a sufficient background for jobs or graduate studies in biomedical engineering. Students interested in a medical career may also find this program helpful.

The Biomedical Engineering minor curriculum is comprised of three core courses and two or three electives. Students pursuing the minor may contact BME Associate Head (<http://www.bme.cmu.edu/people/staff.html#ADH>) for advice. Students interested in declaring Biomedical Engineering minor should contact either the Associate Department Head (<http://www.bme.cmu.edu/people/staff.html#ADH>) of Biomedical Engineering or the Biomedical Engineering Undergraduate Program Coordinator (<http://www.bme.cmu.edu/people/staff.html#UPC>).

Requirements

College of Engineering Students (5 courses):

03-121	Modern Biology	9
42-101	Introduction to Biomedical Engineering (co-req. or pre-req. 03-121)	12
42-202	Physiology (pre-req. 03-121 or permission of instructor)	9
xx-xxx	Elective I (>= 9 units) #	
xx-xxx	Elective II (>= 9 units) +	

Non-Engineering Students (6 courses)

03-121	Modern Biology	9
42-101	Introduction to Biomedical Engineering (co-req. or pre-req. 03-121)	12
42-202	Physiology (pre-req. 03-121 or permission of instructor)	9
xx-xxx	Elective I (>= 9 units) #	
xx-xxx	Elective II (>= 9 units) +	
xx-xxx	A second Introductory Engineering Course* or Any 42-xxx Course Numbered 42-3xx or Higher and worth at Least 9 Units	

Some Special Topics, newly offered or intermittently offered 42-xxx may be acceptable as electives. Students should consult with their advisors and petition the Biomedical Engineering Undergraduate Affairs Committee for permission to include such courses.

Notes

Elective I cannot be a required course in the student's major. It may be

1. Any track gateway, restricted elective, or track elective course selected from any of the four Biomedical Engineering tracks. See the online catalog (<http://www.bme.cmu.edu/ugprog/catalog.html>) for a listing of courses.
2. Any 42-xxx course with a 42-300 or higher number and worth at least 9 units.
3. 42-203 Biomedical Engineering Laboratory (or the cross-listed version 03-206 for students in the Health Professions Program). The course has a limited capacity and priority is given to students who have declared the Additional Major in Biomedical Engineering.**
4. One semester of 42-200 Sophomore BME Research Project, 42-300 Junior BME Research Project, 42-400 Senior BME Research Project or 39-500 CIT Honors Research Project. The project must be supervised by a core or courtesy Biomedical Engineering faculty member and for 9 or more units.

+ Elective II must be a Biomedical Engineering track gateway, track elective, or restricted Elective course that is offered by one of the Engineering Departments (06-xxx, 12-xxx, 18-xxx, 19-xxx, 24-xxx, 27-xxx or 42-xxx). The only exception is that 03-232, the biotechnology-focused version of Biochemistry taught each Spring by the Department of Biological Sciences, is also acceptable. Organic Chemistry I 09-217 is a pre-requisite of 03-232.

* Selected from 06-100 Introduction to Chemical Engineering, 12-100 Introduction to Civil and Environmental Engineering, 18-100 Introduction to Electrical and Computer Engineering, 19-101 Introduction to Engineering and Public Policy, 27-100 Engineering the Materials of the Future, or 24-101 Fundamentals of Mechanical Engineering. Note that these courses may involve co-requisites.

** Priority for enrollment in 42-203 or 03-206 will be given to students who have declared the Additional Major in Biomedical Engineering. If sufficient room in the course remains after all majors have been accommodated in a given semester, students who have declared the Biomedical Engineering Designated Minor will be given the next priority for enrollment. If space still allows, other students will be enrolled.

Full-Time Faculty

ANTAKI, JAMES F., Professor of Biomedical Engineering – Ph.D, University of Pittsburgh, 1991; .

ARMITAGE, BRUCE A., Professor of Chemistry, Biological Sciences, and Biomedical Engineering – Ph.D., University of Arizona, 1993; .

BETTINGER, CHRISTOPHER J., Associate Professor of Biomedical Engineering and Materials Science & Engineering – Ph.D., Massachusetts Institute of Technology, 2008; .

BRUCHEZ, MARCEL P., Associate Professor of Biological Sciences, Chemistry, and Biomedical Engineering – Ph.D., University of California, Berkeley, 1998; .

CAMPBELL, PHIL G., Research Professor, Institute of Complex Engineering Systems, Biomedical Engineering, Biological Sciences, Materials Science & Engineering – Ph.D., The Pennsylvania State University, 1985; .

CHASE, STEVEN M., Assistant Professor of Biomedical Engineering and Center for the Neural Basis of Cognition – Ph.D., Johns Hopkins University, 2006; .

CHOSSET, HOWIE, Professor, Robotics Institute, Biomedical Engineering, and Electrical & Computer Engineering – Ph.D., California Institute of Technology, 1996; .

COHEN-KARNI, TZAHI, Assistant Professor of Biomedical Engineering – Ph.D., Harvard, 2011; .

COOK, KEITH, Associate Professor of Biomedical Engineering – Ph.D., Northwestern University, 2000; .

DAHL, KRIS N., Associate Professor of Biomedical Engineering, Chemical Engineering, and Materials Science & Engineering – Ph.D., University of Pennsylvania, 2004; .

DOMACH, MICHAEL M., Professor of Chemical Engineering and Biomedical Engineering – Ph.D., Cornell University, 1983; .

FEDDER, GARY K., Howard M. Wilkoff Professor, Institute for Complex Engineering Systems, Biomedical Engineering, Electrical & Computer Engineering, Robotics Institute – Ph.D., University of California, Berkeley, 1994; .

FEINBERG, ADAM W., Associate Professor of Biomedical Engineering and Materials Science & Engineering – Ph.D., University of Florida, 2004; .

GALEOTTI, JOHN, Adjunct Assistant Professor of Biomedical Engineering – Ph.D, Carnegie Mellon University, 2007; .

GEYER, HARMUT, Assistant Professor, Robotics Institute and Biomedical Engineering – Ph.D., Friedrich-Schiller-University of Jena, Germany, 2005; .

HITCHENS, KEVIN, Assistant Research Professor of Biological Sciences and Biomedical Engineering – Ph.D., University of Virginia, 1997; .

HO, CHIEN, Professor of Biological Sciences and Biomedical Engineering – Ph.D., Yale University, 1961; .

HOLLINGER, JEFFREY O., Professor Emeritus of Biomedical Engineering and Biological Sciences – D.D.S. and Ph.D., University of Maryland, 1973 & 1981; .

HSIA, JIMMY, Professor of Biomedical and Mechanical Engineering – Ph.D., Massachusetts Institute of Technology, 1990; .

KAINERSTORFER, JANA M., Assistant Professor of Biomedical Engineering – Ph.D., University of Vienna, 2010; .

KELLY, SHAWN, Adjunct Assistant Professor of Biomedical Engineering – Ph.D., Massachusetts Institute of Technology, 2003; .

KOVACEVIC, JELENA, Professor and Head of Electrical & Computer Engineering, and Professor of Biomedical Engineering – Ph.D., Columbia University, 1991; .

LEDUC, PHILIP R., Professor of Mechanical Engineering, Biomedical Engineering, and Biological Sciences – Ph.D., Johns Hopkins University, 1999; .

LOESCHE, MATHIAS, Professor of Physics and Biomedical Engineering – Ph.D., Technical University of Munich, 1986; .

MANDAL, MAUMITA, Assistant Professor of Chemistry and Biomedical Engineering – Ph.D., Ctr for Cellular & Molecular Biology, Hyderabad, India, 2001; .

MCHENRY, MICHAEL E., Professor of Materials Science & Engineering and Biomedical Engineering – Ph.D., Massachusetts Institute of Technology, 1988; .

MINDEN, JONATHAN S., Professor of Biological Sciences and Biomedical Engineering – Ph.D., Albert Einstein College of Medicine, 1985; .

MOURA, JOSE M. F., Professor of Electrical & Computer Engineering and Biomedical Engineering – Ph.D., Massachusetts Institute of Technology, 1975; .

MURPHY, ROBERT F., Ray and Stephanie Lane Professor of Computational Biology and Professor of Biological Sciences, Biomedical Engineering, and Machine Learning – Ph.D., California Institute of Technology, 1980; .

OZDOGANLAR, BURAK, Associate Professor of Mechanical Engineering, Biomedical Engineering and Materials Science & Engineering – Ph.D., University of Michigan, 1999; .

PRZYBYCIEN, TODD M., Professor of Biomedical Engineering and Chemical Engineering – Ph.D., California Institute of Technology, 1989; .

RABIN, YOED, Professor of Mechanical Engineering and Biomedical Engineering – D.Sc., Technion - Israel Institute of Technology, 1994; .

RIVIERE, CAMERON N., Associate Research Professor, Robotics Institute and Biomedical Engineering – Ph.D., Johns Hopkins University, 1995; .

ROHDE, GUSTAVO K., Associate Professor of Biomedical Engineering – Ph.D., University of Maryland, 2005; .

RUSSELL, ALAN J., Highmark Distinguished Career Professor, Institute of Complex Engineering Systems and Biomedical Engineering – Ph.D., University of London, 1987; .

SCHNEIDER, JAMES W., Professor of Chemical Engineering and Biomedical Engineering – Ph.D., University of Minnesota, 1998; .

SHIMADA, KENJI, Theodore Ahrens Professor in Engineering – Ph.D., Massachusetts Institute of Technology, 1993; .

STETTEN, GEORGE D., Research Professor, Robotics Institute and Biomedical Engineering – MD/Ph.D., State University of New York Syracuse Health Center, 1991, and University of North Carolina, 2000; .

SURESH, SUBRA, Professor of Materials Science & Engineering, Biomedical Engineering, Engineering & Public Policy, and Public Policy & Management President, Carnegie Mellon University – Sc.D., Massachusetts Institute of Technology, 1981; .

TILTON, ROBERT D., Professor of Biomedical Engineering and Chemical Engineering – Ph.D., Stanford University, 1991; .

TRUMBLE, DENNIS, Adjunct Assistant Professor of Biomedical Engineering (on campus) - Ph.D., Carnegie Mellon University, 2010; .

WAGGONER, ALAN S., Professor of Biological Sciences and Biomedical Engineering - Ph.D., University of Oregon, 1969; .

WANG, YU-LI, Mehrabian Professor and Head of Biomedical Engineering - Ph.D., Harvard University, 1980; .

WASHBURN, NEWELL R. , Associate Professor of Biomedical Engineering, Chemistry, and Materials Science & Engineering - Ph.D., University of California, Berkeley, 1998; .

WEISS, LEE E., Research Professor, Robotics Institute, Biomedical Engineering, and Materials Science & Engineering - Ph.D., Carnegie Mellon University, 1984; .

WHITEHEAD, KATHRYN A, Assistant Professor of Chemical and Biomedical Engineering - Ph.D., University of California, Santa Barbara, 2007; .

YU, BYRON, Associate Professor of Biomedical Engineering and Electrical & Computer Engineering - Ph.D., Stanford University, 2007; .

ZAPANTA, CONRAD M., Teaching Professor and Associate Head of Biomedical Engineering - Ph.D., The Pennsylvania State University, 1997; .

ZHANG, YONGJIE JESSICA, Associate Professor of Mechanical Engineering and Biomedical Engineering - Ph.D., University of Texas at Austin, 2005; .

Department of Chemical Engineering

Lorenz Biegler, Head
Office: Doherty Hall 1107

Chemical engineering is a broad discipline based on chemistry, mathematics, physics and biology that applies the principles of engineering science and process systems engineering to the development and commercialization of new products and processes. Engineering science provides experimental and theoretical models for predicting the behavior of fluid flow and heat transfer in materials and biological systems, as well as chemical reactions and mass transfers that take place in multi-component mixtures. Process systems engineering provides methodologies for the systematic design and analysis of processes, including their control, safety, and environmental impact. The department emphasizes the basic principles of engineering science and process systems engineering through problem solving, and it strives to broaden the experience of students by offering a significant number of electives, undergraduate research projects, an integrated masters degree, industrial internships and study abroad programs, all of which benefit from our strong industrial ties.

A career in chemical engineering offers challenging and well-compensated positions in a wide variety of growth industries. Graduates may supervise the operation of chemical plants, redesign chemical processes for pollution prevention, or be involved in the research and development of new products or processes in high technology areas. These activities require knowledge of chemical reactions and catalysis, separation technologies and energy recovery systems, all of which are thoroughly presented in our curriculum. In the petroleum industry, for example, our national need for fuels demands well-trained chemical engineers in catalysis. A significant number of chemical engineers are also hired by industries associated with colloids (fine particles), polymers (plastics and resins), and coatings (e.g., paint, integrated circuits). Opportunities exist in biotechnology, the computer industry, environmental firms, and consulting companies. Other examples include the processing of advanced polymeric systems, thin films for the semiconductor and data storage industry, and chip fabrication. A growing number of consulting companies hire chemical engineers to develop computer software for the simulation and real-time optimization of chemical processes, for predicting how toxic chemicals are dispersed and degraded in soils and in the atmosphere, and for evaluating the economic feasibility of industrial projects. The diversity of career opportunities arises from the depth and breadth of the curriculum. For instance, the pharmaceutical industry recruits chemical engineers who possess a combined expertise in process engineering and biochemistry/molecular biology.

The curriculum emphasizes the fundamentals of physical, chemical, and biological phenomena, mathematical modeling, exposure to biotechnology and problem solving techniques. These provide rigorous preparation for immediate employment after graduation, or a strong basis for graduate school. The depth and breadth of coursework makes chemical engineering an excellent major for students interested in either medical or business schools. Computing is integrated throughout the curriculum, and extensive use is made of mathematical modeling and simulation software in the department's Gary J. Powers Educational Computer Lab. The Robert Rothfus Laboratory and Lubrizol Analytical Laboratory feature state-of-the-art experiments that illustrate applications in safety, environmental, product development, and computerized data acquisition and control.

Educational Objectives and Outcomes

The objectives for the program are that graduates of the department will obtain employment or attend graduate school, will advance in their chosen careers, and will be productive and fulfilled professionals throughout their careers. The curriculum and programs are developed to prepare students to attain these educational objectives.

Students majoring in chemical engineering learn the science and engineering that govern chemical processing systems. Fundamental principles, problem solving, systems analysis and design, development of self-confidence, and communication skills are emphasized. Students are made aware of modern tools, industrial needs and societal issues. This combination of fundamental knowledge and skills provides a firm foundation for future learning and career growth. The goal of the department is to produce students who will become leaders in their careers. Students who complete the curriculum will have attained the following educational outcomes:

- an ability to apply knowledge of mathematics, science, and engineering
- an ability to design and conduct experiments, as well as to analyze and interpret data

- an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- an ability to function on multidisciplinary teams
- an ability to identify, formulate, and solve engineering problems
- an understanding of professional and ethical responsibility
- an ability to communicate effectively
- the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- a recognition of the need for, and an ability to engage in, life-long learning
- a knowledge of contemporary issues
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

The department offers a number of special programs for students majoring in Chemical Engineering. In addition to the double majors offered by the College of Engineering such as Biomedical Engineering and Engineering & Public Policy, students may choose from a variety of minors in technical areas offered by the College of Engineering. Undergraduate research projects are also available in the areas of bioengineering, complex fluids engineering, environmental engineering, process systems engineering, and catalysis & surface science. Students may participate in study abroad programs during their junior year. In addition to the University program with EPFL in Switzerland and ITESM Monterey in Mexico, the department provides its own exchange programs with Yonsei University in Seoul, Korea, RWTH Aachen in Germany, and Imperial College in London, Great Britain. Students may also participate in Practical Internships for Senior Chemical Engineering Students, a one-year industrial internship program offered between the Junior and Senior years. Finally, qualified students may enroll in our Master of Chemical Engineering program. This degree is typically completed in the fifth year. However, depending on the number of advanced placement courses and course load at Carnegie Mellon, this degree could be awarded during the B.S. graduation, or after one additional semester.

Curriculum

The program in chemical engineering within the Department of Chemical Engineering is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

First Year

Fall		Units
21-120	Differential and Integral Calculus	10
76-xxx	Designated Writing/Expression Course	9
99-101	Computing @ Carnegie Mellon	3
06-100	Introduction to Chemical Engineering	12
09-105	Introduction to Modern Chemistry I	10
		44

Spring		Units
21-122	Integration and Approximation	10
xx-xxx	Introductory Engineering Elective (other than ChE)	12
33-106	Physics I for Engineering Students	12
xx-xxx	General Education Course	9
		43

Second Year

Fall		Units
21-259	Calculus in Three Dimensions	9
06-221	Thermodynamics	9
06-222	Sophomore Chemical Engineering Seminar	1
09-106	Modern Chemistry II	10
xx-xxx	Computer Sci./Physics II *	10-12
xx-xxx	General Education Course	9

39-210	Experiential Learning I	0
		38
Spring		Units
06-261	Fluid Mechanics	9
06-262	Mathematical Methods of Chemical Engineering	12
09-221	Laboratory I: Introduction to Chemical Analysis	12
xx-xxx	Physics II/Computer Sci.*	12-10
xx-xxx	General Education Course	9
39-220	Experiential Learning II	0
		42

* Computer Science/Physics II: Students should complete 15-110 Principles of Computing or 15-112 Fundamentals of Programming and Computer Science as well as 33-107 Physics II for Engineering Students by the end of the Sophomore year. The recommended sequence is 33-106 /33-107 for engineering students, however, 33-111/ 33-112 or 33-131 /33-132 will also meet the CIT Physics requirement.

For those students who have not taken 06-100 as one of the two Introductory Engineering Electives, 06-100 should be taken in the Fall Semester of the Sophomore year. The General Education Course normally taken during that semester may be postponed until the Junior year. These students should consult with their faculty advisors as soon as possible.

At the end of the Sophomore year, a student should have completed the following required basic science and computer science courses:

09-105	Introduction to Modern Chemistry I	10
09-106	Modern Chemistry II	10
09-221	Laboratory I: Introduction to Chemical Analysis	12
15-110	Principles of Computing	10
or 15-112	Fundamentals of Programming and Computer Science	
33-106	Physics I for Engineering Students	12
33-107	Physics II for Engineering Students	12
99-10x	Computing @ Carnegie Mellon	3

Third Year

Fall		Units
06-321	Chemical Engineering Thermodynamics	9
06-322	Junior Chemical Engineering Seminar	2
06-323	Heat and Mass Transfer	9
09-217	Organic Chemistry I	9
or 09-219	Modern Organic Chemistry	
09-347	Advanced Physical Chemistry	12
xx-xxx	General Education Course	9
39-310	Experiential Learning III	0
		50

Spring		Units
06-361	Unit Operations of Chemical Engineering	9
06-363	Transport Process Laboratory	9
06-364	Chemical Reaction Engineering	9
03-232	Biochemistry I**	9
xx-xxx	Unrestricted Elective	9
xx-xxx	General Education Course	9
		54

Fourth Year

Fall		Units
06-421	Chemical Process Systems Design	12
06-423	Unit Operations Laboratory	9
xx-xxx	Unrestricted Elective	9
xx-xxx	Unrestricted Elective	9
xx-xxx	General Education Course	9
		48

Spring		Units
06-462	Optimization Modeling and Algorithms	6
06-463	Chemical Product Design	6
06-464	Chemical Engineering Process Control	9
xx-xxx	Unrestricted Elective	9

xx-xxx	Unrestricted Elective	9
xx-xxx	General Education Course	9
		48

**Students pursuing a Chemical Engineering/Engineering and Public Policy double major are waived from taking the Biochemistry Elective. They will take 36-220.

Notes:

- In addition to the graduation requirement of an overall QPA of 2.0 (not counting the First Year), the Department of Chemical Engineering requires a cumulative QPA of 2.0 in all chemical engineering courses (all those numbered 06-xxx).
- Minimum number of units required for graduation: 389.
- Overloads are permitted only for students maintaining a QPA of 3.0 or better during the preceding semester.
- Electives: To obtain a Bachelor of Science degree in Chemical Engineering, students must complete 06-100 and one other Introductory Engineering Elective. There are also five Unrestricted Electives. At most, 9 units of ROTC or Physical Education can be counted toward these electives. Students must discuss choice of electives with their faculty advisors.
- Undergraduate Research: Independent research projects are available by arrangement with a faculty advisor. Many students conduct these research projects for elective credit by enrolling in 06-200, 06-300, or 06-400 (Sophomore, Junior, or Senior Research Projects) or 39-500 Honors Research Project for eligible Seniors.
- Advanced undergraduates may also take Chemical Engineering graduate courses (600+ level).

Double Major in Engineering and Public Policy (EPP)

Students may pursue a double major in Chemical Engineering and EPP. This double major is very flexible, built around Electives, Social Analysis, Probability and Statistics courses, and projects. Specific course choices should be discussed with a faculty advisor and an EPP advisor.

Double Major in Biomedical Engineering (BME)

Students may pursue a double major in Chemical Engineering and BME. Specific course choices should be discussed with a faculty advisor and a BME advisor.

Minors with a B.S. in Chemical Engineering

Chemical Engineering students are eligible for any CIT Designated Minor. Those minors that are especially well suited to Chemical Engineers include Audio Engineering, Automation and Controls, Biomedical Engineering, Colloids, Polymers & Surfaces, Electronic Materials, Environmental Engineering, Global Engineering, Manufacturing Engineering, Materials Science and Engineering, Mechanical Behavior of Materials, and Robotics.

The minor requirements may be fulfilled with electives. Other minors, such as the Supply Chain Management minor in association with the Tepper School of Business, are also available outside of CIT. These should be discussed with a faculty advisor.

Minor in Colloids, Polymers, and Surfaces (CPS)

Historically, the CPS coursework sequence has had a long-standing popularity among chemical engineering students. A detailed description of the minor can be found in the CIT Minors section of this catalog, or ask your Chemical Engineering faculty advisor, or the Director of CPS. Chemical Engineering students may use four of their electives to obtain the CPS minor. This is a sequence of closely related courses that explore the science and engineering of polymeric materials, particulates, micro-structured fluids, and interfacially engineered materials. Completion of the following five courses constitutes the CPS minor:

06-221	Thermodynamics	9
06-426	Experimental Colloid Surface Science	9
06-466	Experimental Polymer Science	9
06-607	Physical Chemistry of Colloids and Surfaces	9

06-609/09-509 Physical Chemistry of Macromolecules 9

Typically, 06-607 is taken in the spring of the Junior year, while 06-609 also known as 09-509, 06-426 and 06-466 are taken during the Senior year.

Practical Internships for Senior Chemical Engineering Students (PISCES)

Chemical Engineering students may apply in the fall of their Junior year for a salaried, one-year PISCES with a partner company. Admitted students begin their internships after completion of the Junior year. Following the internship, students return to complete their Senior year. There are several advantages of a one full-year internship, including the opportunity to gain a breadth of professional experience that is not generally possible in a shorter program, more opportunity to make important contributions to the partner company, and the opportunity to complete Senior year courses in their normal sequence with no need for curriculum rearrangements. Interested students should consult with their faculty advisors.

International Chemical Engineering Exchange Programs

Chemical Engineering students may apply during their Sophomore year to spend their Junior year at RWTH Aachen in Germany, Yonsei University in Seoul, Korea, or at Imperial College in London, Great Britain. A summer exchange program in Dortmund, Germany is also available. These exchange programs provide a great opportunity for students to obtain international experience while taking courses very similar to those offered at Carnegie Mellon. Students considering any of these programs should consult with their faculty advisors, and students considering the Aachen program in particular are advised to take at least one introductory German course before or during their Sophomore year.

Fifth Year Master of Chemical Engineering (MChE)

The CIT Integrated Masters/Bachelors (IMB) Degree program provides the opportunity for qualified undergraduate students to obtain a master's degree in Chemical Engineering with one or two extra semesters of study. The goal is to deepen our graduates' understanding of the fundamentals of chemical engineering, and to provide them with a broader set of professional skills or to expose them to other technical disciplines.

The MChE program is aimed at undergraduate students from Carnegie Mellon and candidates from other universities. Unfortunately, no financial support is available. For Carnegie Mellon students, the degree typically would be completed in their fifth year. Depending on advanced placement and semester overloads, however, CMU students can complete the degree at the time of the B.S. graduation or with one additional semester. All students must have graduate status once they have completed their B.S. degree; beyond eight semesters, degree program students must have full-time graduate student status in at least one (e.g., their final) semester whether or not they have already completed their BS degree.

Upon graduating from this program, students seek industrial positions or placement in graduate programs at other universities. Students in the MChE program may apply for the PhD program at Carnegie Mellon University via the normal application process. Their applications are considered alongside all the other applications received that year. If accepted into the PhD program, they enter it after completing the MChE degree.

A minimum of five completed semesters in residence as an undergraduate student and an overall QPA of 3.0 is required for eligibility. Taking the GRE and recommendation letters are not required. The application fee is waived for currently-enrolled undergraduate Chemical Engineering students.

The MChE program differs from the MS program because the MChE program does not require a project report or thesis.

Research and Teaching Faculty

SHELLEY ANNA, Professor of Chemical Engineering – Ph.D., Harvard University; Carnegie Mellon, 2003–.

LORENZ T. BIEGLER, University Professor and Bayer Professor of Chemical Engineering. Head of Department – Ph.D., University of Wisconsin; Carnegie Mellon, 1981–.

KRIS N. DAHL, Associate Professor of Chemical Engineering – Ph.D., University of Pennsylvania; Carnegie Mellon, 2006–.

MICHAEL M. DOMACH, Professor of Chemical Engineering – Ph.D., Cornell University; Carnegie Mellon, 1983–.

NEIL M. DONAHUE, Professor of Chemical Engineering and Chemistry – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2000–.

ANDREW J. GELLMAN, Lord Professor of Chemical Engineering – Ph.D., University of California, Berkeley; Carnegie Mellon, 1992–.

CHRYSANTHOS GOUNARIS, Assistant Professor of Chemical Engineering – Ph.D., Princeton University; Carnegie Mellon, 2013–.

IGNACIO E. GROSSMANN, University Dean Professor of Chemical Engineering – Ph.D., Imperial College, University of London; Carnegie Mellon, 1979–.

ANNETTE M. JACOBSON, Teaching Professor of Chemical Engineering and Director of Colloids, Polymers, and Surfaces Program – Ph.D., Carnegie Mellon; Carnegie Mellon, 1988–.

MYUNG S. JHON, Professor of Chemical Engineering – Ph.D., University of Chicago; Carnegie Mellon, 1980–.

ADITYA KHAIR, Assistant Professor of Chemical Engineering – PhD, California Institute of Technology; Carnegie Mellon, 2010–.

JOHN KITCHIN, Professor of Chemical Engineering – Ph.D., University of Delaware; Carnegie Mellon, 2006–.

SPYROS N. PANDIS, Research Professor of Chemical Engineering and Engineering and Public Policy – Ph.D., California Institute of Technology; Carnegie Mellon, 1993–.

DENNIS C. PRIEVE, Gulf Professor Of Chemical Engineering – Ph.D., University of Delaware; Carnegie Mellon, 1974–.

TODD M. PRZYBYCIEN, Professor Of Chemical Engineering And Biomedical Engineering – Ph.D., California Institute of Technology; Carnegie Mellon, 1998–.

NIKOLAOS V. SAHINIDIS, John E. Swearingen Professor of Chemical Engineering – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2007–.

JAMES W. SCHNEIDER, Professor of Chemical Engineering – Ph.D., University of Minnesota; Carnegie Mellon, 1999–.

PAUL J. SIDES, Professor of Chemical Engineering – Ph.D., University of California, Berkeley; Carnegie Mellon, 1981–.

JEFFREY J. SIROLA, Distinguished Service Professor – PhD, University of Wisconsin; Carnegie Mellon, 2011–.

SUSANA C. STEPPAN, Assistant Teaching Professor – PhD, University of Massachusetts; Carnegie Mellon, 2004–.

ROBERT D. TILTON, Professor of Chemical Engineering – Ph.D., Stanford University; Carnegie Mellon, 1992–.

LYNN M. WALKER, Professor of Chemical Engineering – Ph.D., University of Delaware; Carnegie Mellon, 1997–.

ARTHUR W. WESTERBERG, Emeritus, University Professor of Chemical Engineering – Ph.D., DIC, Imperial College, University of London; Carnegie Mellon, 1976–.

KATHRYN WHITEHEAD, Assistant Professor of Chemical Engineering – Ph.D., University of California; Carnegie Mellon, 2012–.

B. ERIK YDSTIE, Professor of Chemical Engineering – Ph.D., Imperial College, University of London; Carnegie Mellon, 1992–.

Department of Civil and Environmental Engineering

David A. Dzombak, Head
Office: Porter Hall 119-D
<http://www.cmu.edu/cee/>

The role of civil and environmental engineers, in the broadest sense, is to apply technology to meet society's needs. Civil engineers plan, design, and manage facilities used daily by the public and industry, such as buildings, airports, water supply, and waste management systems. They work at the intersection of the built, natural, and information environments. Today's civil and environmental engineers are also called upon by government and industry to provide leadership on complex technical and societal issues such as demands for infrastructure improvement in our cities, remediation of hazardous waste sites, provision of safe drinking water, and incorporation of environmental safeguards in new designs. Civil and Environmental Engineering requires broad technical training and strong communication skills because of the complexity of large projects and the interactions with engineers in other fields, lawyers, politicians, and the public. Carnegie Mellon's curriculum is intended to provide this versatility for professional practice in civil and environmental engineering or as a foundation for other professional pursuits.

The Department of Civil and Environmental Engineering offers a wide spectrum of opportunities for direct entry into the engineering profession, for graduate education in engineering, or entry into various other professions. While maintaining its emphasis on the fundamental understanding of the behavior of constructed facilities through the application of the physical sciences and mathematics, the curriculum has continually evolved in directions that exploit advances in technology. The methods of engineering design are introduced in the first year and are emphasized throughout the curriculum in both traditional and open-ended project-oriented courses. The basic undergraduate degree program leads to a B.S. in Civil Engineering. Students with a specific interest in Environmental Engineering are advised to undertake the Minor in Environmental Engineering and Sustainability.

Central to the evolution of technology and its impact on engineering practice is the increased emphasis on computer-aided engineering. Several courses on computer methods are required in the curriculum, and virtually every course offered by the department requires the use of computers in applications of either analysis or design. Our curriculum emphasizes the development of scientific inquiry with the perspective of social, economic, and institutional developments. For graduates who wish to enter directly the engineering profession in such specialties as structural engineering, construction, or environmental engineering, this approach to teaching allows application of the most advanced technological developments. Others who wish to pursue graduate study are prepared to engage in research on the highest level, either in traditional specialties or in emerging fields such as smarter infrastructure. For many years, some graduates also have found their undergraduate preparation highly suited for entry into graduate schools of business, law, and medicine.

A student may choose to concentrate in a specialty area in Civil Engineering, to pursue a minor in one of the College of Engineering designated minor programs, or to design a double major or double degree program. Sample specialty areas are described in this section. The College of Engineering designated minor programs can be found under the College of Engineering section. The double-major requirements with Biomedical Engineering and with Engineering and Public Policy are described in the curriculum specified by those departments. Other double-major programs selected by recent graduates include computer science, economics, mathematics, business, architecture, history, and foreign languages. Each student should have well-defined objectives in selecting courses leading to a specialty, a minor, or a double major. Faculty mentors and the Director of Undergraduate Programs are available to discuss students' educational goals.

Educational Objectives

The objectives of the Bachelor of Science in Civil Engineering curriculum are to develop graduates who embody the following definitions:

- Graduates distinguish themselves within their organizations as individuals able to complete both conventional and cutting-edge professional challenges related to one or more of the areas of the built, natural, and information environments;
- Graduates work for a wide range of engineering and non-engineering organizations located both in the U.S. and internationally, and work on a wide range of activities, such as academic research, government service and private sector activity; and
- Graduates are innovative, proactive, and adaptive professionals, highly engaged in their professional communities.

The Civil Engineering curriculum is intended to allow ample opportunity for students to pursue areas of personal interest. The opportunity for self-exploration requires careful advising to gain meaningful educational experiences. We believe that design and team working experiences should occur at regular intervals in the curriculum, and that graduates should have appropriate "hands on" experience in laboratories and projects. Students are encouraged to participate in research projects and to pursue study or work abroad.

The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

By the end of the B.S. program, students should have achieved the following student outcomes:

- A. an ability to apply knowledge of mathematics, science and engineering
- B. an ability to design and conduct experiments, as well as to analyze and interpret data
- C. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- D. an ability to function on multidisciplinary teams
- E. an ability to identify, formulate, and solve engineering problems
- F. an understanding of professional and ethical responsibility
- G. an ability to communicate effectively
- H. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
 - I. a recognition of the need for, and an ability to engage in lifelong learning
 - J. a knowledge of contemporary issues relevant to engineering practice
- K. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

The curriculum has been designed, and is periodically evaluated and refined, to provide students instruction and experiences that lead to the development of these abilities and skills.

All students admitted to the College of Engineering are not required to declare a major until the end of the first year, and may have selected a variety of Introductory Engineering Electives and associated Restricted Technical Electives within the common foundation specified for first year engineering students. By the end of the sophomore year, a civil engineering major is expected to have completed, in addition to 12-100 Introduction to Civil and Environmental Engineering, the following Restricted Technical Electives:

09-101	Introduction to Experimental Chemistry	3
09-105	Introduction to Modern Chemistry I	10
15-110	Principles of Computing	10
21-120	Differential and Integral Calculus	10

21-122	Integration and Approximation	10
21-259	Calculus in Three Dimensions	9
21-260	Differential Equations	9
33-106	Physics I for Engineering Students	12
33-107	Physics II for Engineering Students	12

Appearing below is the recommended four-year program of study for the BS in civil engineering. Advising and formulation of appropriate programs is available through the department for transfer students, students with advanced placement, or students wishing to study abroad.

Curriculum

First Year

Fall		Units
12-100	Introduction to Civil and Environmental Engineering	12
21-120	Differential and Integral Calculus	10
33-106	Physics I for Engineering Students	12
99-10x	Computing @ Carnegie Mellon	3
xx-xxx	Dietrich College or CFA Course	9
		46

Spring		Units
xx-xxx	Introduction to Engineering (other than CEE)	12
21-122	Integration and Approximation	10
33-107	Physics II for Engineering Students	12
09-101	Introduction to Experimental Chemistry	3
xx-xxx	Dietrich College or CFA Course	9
		46

Sophomore Year

Fall		Units
12-212	Statics	9
21-259	Calculus in Three Dimensions	9
15-110	Principles of Computing	10
09-105	Introduction to Modern Chemistry I	10
39-210	Experiential Learning I	0
xx-xxx	Dietrich College or CFA Course	9
		47

Spring		Units
12-231	Solid Mechanics	9
12-232	Solid Mechanics Lab	3
12-271	Introduction to Computer Application in Civil & Environmental Engineering	9
21-260	Differential Equations	9
39-220	Experiential Learning II	0
xx-xxx	Dietrich College or CFA Course	9
xx-xxx	Elective 1	9
		48

* Notes: If a student takes an Introduction to Engineering course which has a co-requisite other than Physics II, the co-requisite (either 15-110 or 09-105) should be taken in the freshman year while Physics II will fill the respective slot in the sophomore year.

Since College of Engineering first year students are not required to select a major, the above curriculum is based on the assumption that a potential civil engineering student is likely to select 12-100 as one of the two Introduction to Engineering courses in the first year. Otherwise, incoming sophomores should take 12-100 in the fall in lieu of Modern Chemistry or the Dietrich College elective.

Junior Year

Fall		Units
12-301	Civil Environmental Engineering Projects	9
12-335	Soil Mechanics	9
12-336	Soil Mechanics Laboratory	3
12-355	Fluid Mechanics	9
12-356	Fluid Mechanics Lab	3
39-310	Experiential Learning III	0

xx-xxx	Dietrich College or CFA Course	9
xx-xxx	Elective 2	9
		51

Spring		Units
12-351	Environmental Engineering	9
12-352	Environmental Engineering Lab	3
27-357	Introduction to Materials Selection	6
12-358	Materials Lab	3
36-220	Engineering Statistics and Quality Control	9
xx-xxx	Elective 3	9
xx-xxx	Elective 4	9
		48

Senior Year

Fall		Units
12-401	Civil & Environmental Engineering Design	15
12-411	Project Management for Construction	9
12-421	Engineering Economics	6
xx-xxx	Dietrich College or CFA Course	9
xx-xxx	Elective 5	9
		48

Spring		Units
xx-xxx	Dietrich College or CFA Course	9
xx-xxx	Dietrich College or CFA Course	9
xx-xxx	Elective 6	9
xx-xxx	Elective 7	9
xx-xxx	Elective 8	9
		45

379 Minimum number of units required for degree:

Notes on Electives

1. One elective must be in the basic sciences, from the following list:

03-121	Modern Biology	9
12-201	Geology	9

Substitutions may be made only with the approval of the Department Head.

2. One elective course is restricted to a 600-level Civil Engineering course of at least 9 units, except 12-648 and 12-690. This Civil Engineering elective is a co-requisite for 12-401.

Specialty Areas in Civil Engineering

Students may select a set of civil engineering and technical electives in the junior and senior years that enable them to concentrate in a specialty area, if they so desire. Some examples for grouping electives into specialty areas, together with representative course selections, are indicated below. Other possible groupings may be discussed with a faculty mentor.

Advanced Infrastructure Systems

		Units
12-600	AutoCAD	3
12-631	Structural Design	12
12-636	Geotechnical Engineering	9
12-657	Water Resource Systems Engineering	9
15-211	Fundamental Data Structures and Algorithms	12
18-100	Introduction to Electrical and Computer Engineering	12
21-228	Discrete Mathematics	9
21-241	Matrices and Linear Transformations	10
		76

Environmental Engineering, Science and Management

		Units
12-629	Environmental Microbiology for Engineers	9
12-636	Geotechnical Engineering	9
12-651	Air Quality Engineering	9

12-657	Water Resource Systems Engineering	9
12-658	Hydraulic Structures	9
06-221	Thermodynamics	9
06-620	Global Atmospheric Chemistry: Fundamentals and Data Analysis Methods	9
09-510	Chemistry and Sustainability	9
24-424	Energy and the Environment	9
48-795	LEED, Green Design and Building Rating in Global Context	6
		87

Structures, Mechanics and Materials

		Units
12-600	AutoCAD	3
12-635	Structural Analysis	9
24-370	Engineering Design I: Methods and Skills	12
12-631	Structural Design	12
12-636	Geotechnical Engineering	9
21-228	Discrete Mathematics	9
21-241	Matrices and Linear Transformations	10
24-262	Stress Analysis	12
		76

Double Majors and Minors

Civil engineering students may pursue double majors and minors in a variety of subjects, taking advantage of the free elective courses for other requirements. The College of Engineering has added designated minors to promote flexibility and diversity among engineering students. Many civil engineering undergraduates pursue designated minors in such areas as Global Engineering or Environmental Engineering and Sustainability.

Co-Operative Education Program

Students in civil engineering are encouraged to undertake professional internships during summer breaks. In addition, a formal cooperative internship program is available for either Jan-Aug or May-Dec in the junior year. Students undertaking these 8-month professional internships would ordinarily graduate after an additional semester of study. Program details are available from the Career Center or the Civil and Environmental Engineering office.

Integrated B.S./M.S. Program

Interested undergraduates may plan a course of study that leads to both the BS in Civil Engineering and the MS in Civil and Environmental Engineering. This course of study will ordinarily require ten semesters of study, although advanced placement or other study may reduce this time. Students can apply appropriate units earned as undergraduates for their MS program as long as they are beyond the 379 units required for the BS in Civil Engineering degree. In the ninth semester of study, students must register in graduate status. Interested students should consult their academic advisor or the CEE department office for information about admission to the MS program.

Faculty

AMIT ACHARYA, Professor of Civil and Environmental Engineering - Ph.D., University of Illinois at Urbana - Champaign; Carnegie Mellon, 2000-.

PETER ADAMS, Professor of Civil and Environmental Engineering and Engineering and Public Policy - Ph.D., California Institute of Technology; Carnegie Mellon, 2001-.

BURCU AKINCI, Paul P. Christiano Professor of Civil and Environmental Engineering - Ph.D., Stanford University; Carnegie Mellon, 2000-.

MARIO BERGES, Assistant Professor of Civil and Environmental Engineering - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2010-.

JACOBO BIELAK, P.E., Hamerschlag University Professor of Civil and Environmental Engineering - Ph.D., California Institute of Technology, P.E.; Carnegie Mellon, 1978-.

LAWRENCE G. CARTWRIGHT, P.E., Professor Emeritus of Civil and Environmental Engineering and Director of the Civil Engineering

Laboratories - M.S., Carnegie Mellon University, P.E.; Carnegie Mellon, 1977-.

SARAH J. CHRISTIAN, P.E., Assistant Teaching Professor, Civil and Environmental Engineering - Ph.D., Stanford; Carnegie Mellon, 2015-.

JARED L. COHON, President Emeritus, Carnegie Mellon University, University Professor of Civil and Environmental Engineering and Engineering and Public Policy - Ph.D., Massachusetts Institute of Technology, P.E.; Carnegie Mellon, 1997-.

KAUSHIK DAYAL, Associate Professor of Civil and Environmental Engineering - Ph.D., California Institute of Technology; Carnegie Mellon, 2008-.

DAVID A. DZOMBAK, Department Head and Hamerschlag University Professor of Civil and Environmental Engineering - Ph.D., Massachusetts Institute of Technology, P.E.; Carnegie Mellon, 1989-.

SUSAN FINGER, Professor of Civil and Environmental Engineering - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1989-.

JAMES H. GARRETT, P.E., JR., Dean, College of Engineering and Thomas Lord Professor, Civil and Environmental Engineering - Ph.D., Carnegie Mellon University, P.E.; Carnegie Mellon, 1990-.

KELVIN GREGORY, Associate Professor of Civil and Environmental Engineering - Ph.D., University of Iowa; Carnegie Mellon, 2006-.

CHRIS T. HENDRICKSON, Hamerschlag University Professor of Civil and Environmental Engineering - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1978-.

ATHANASIOS KARAMALIDIS, Associate Research Professor of Civil and Environmental Engineering - Ph.D., Democritus University of Thrace; Carnegie Mellon, 2010-.

XUESONG (PINE) LIU, Research Assistant Professor - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2015-.

GREGORY LOWRY, Walter J. Blenko, Sr. Professor of Civil and Environmental Engineering - Ph.D., University of Illinois; Carnegie Mellon, 2002-.

H. SCOTT MATTHEWS, Professor of Civil and Environmental Engineering and Engineering and Public Policy - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2001-.

MEAGAN S. MAUTER, Assistant Professor, Civil and Environmental Engineering and Engineering and Public Policy - Ph.D., Yale University; Carnegie Mellon, 2015-.

FRANCIS C. MCMICHAEL, Professor Emeritus, Civil and Environmental Engineering and Engineering and Public Policy - Ph.D., California Institute of Technology; .

DAVID NAKLES, Professor of the Practice, Civil and Environmental Engineering - Ph.D., Carnegie Mellon; .

HAE YOUNG NOH, Assistant Professor of Civil and Environmental Engineering - Ph.D., Stanford University; Carnegie Mellon, 2013-.

IRVING J. OPPENHEIM, P.E., Professor of Civil and Environmental Engineering and Architecture - Ph.D., Cambridge University, P.E.; Carnegie Mellon, 1972-.

MATTEO POZZI, Assistant Professor of Civil and Environmental Engineering - Ph.D., University of Trento, Italy; Carnegie Mellon, 2012-.

ZHEN (SEAN) QIAN, Assistant Professor, Civil and Environmental Engineering - Ph.D., University of California, Davis; Carnegie Mellon, 2015-.

CONSTANTINE SAMARAS, Assistant Professor, Civil and Environmental Engineering - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2014-.

MITCHELL J. SMALL, H. John Heinz Professor, Civil and Environmental Engineering and Engineering and Public Policy - Ph.D., University of Michigan; Carnegie Mellon, 1982-.

JAMES M. THOMPSON, P.E., Assistant Teaching Professor - Ph.D., Lehigh University; Carnegie Mellon, 2012-.

JEANNE VANBRIESEN, P.E., Duquesne Light Company Professor of Civil and Environmental Engineering - Ph.D., Northwestern University; Carnegie Mellon, 1999-.

<http://www.ece.cmu.edu/>

The field of electrical and computer engineering encompasses a remarkably diverse and fertile set of technological areas, including analog and digital electronics, computer architecture, computer-aided design and manufacturing of VLSI/ULSI circuits, intelligent robotic systems, computer-based control systems, telecommunications and computer networking, wireless communication systems, signal and information processing and multimedia systems, solid state physics and devices, microelectromechanical systems (MEMS), electromagnetic and electromechanical systems, data storage systems, embedded systems, distributed computing, mobile computing, real-time software, digital signal processing, and optical data processing. The extraordinary advances in the field during the last fifty years have impacted nearly every aspect of human activity. These advances have resulted not only in advanced computer systems but also in consumer products such as “smart” cars, programmable dishwashers and other home appliances, cell phones and mobile computing systems, video games, home security systems, advanced medical systems for imaging, diagnosis, testing and monitoring. Systems and products such as these serve to enhance our quality of life and have also served as the basis for significant economic activity. In short, the field of electrical and computer engineering has become central to society as we know it.

The Department of Electrical and Computer Engineering at Carnegie Mellon is actively engaged in education and research at the forefront of these new technologies. Because of the diverse and broad nature of the field and the significant growth in knowledge in each of its sub areas, it is no longer possible for any single individual to know all aspects of electrical and computer engineering. Nevertheless, it is important that all electrical and computer engineers have a solid knowledge of the fundamentals with sufficient depth and breadth. Society is placing increasing demands on our graduates to try their skills in new contexts. It is also placing increasing value on engineers who can cross traditional boundaries between disciplines, and who can intelligently evaluate the broader consequences of their actions. Our curriculum is designed to produce world-class engineers who can meet these challenges.

Educational Outcomes and Objectives

The B.S. in Electrical and Computer Engineering is a broad and highly flexible degree program structured to provide students with the smallest set of constraints consistent with a rich and comprehensive view of the profession. It is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. Students are encouraged and stimulated to explore multiple areas of theory and application. The Faculty of Electrical and Computer Engineering have adopted the following outcomes from ABET and have established the following objectives for the B.S. in Electrical and Computer Engineering curriculum:

Educational Outcomes

1. An ability to apply knowledge of mathematics, science and engineering.
2. An ability to design and conduct experiments, as well as to analyze and interpret data.
3. An ability to design a system, component or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability.
4. An ability to function in multi-disciplinary teams.
5. An ability to identify, formulate and solve engineering problems.
6. An understanding of professional and ethical responsibilities.
7. An ability to communicate effectively.
8. The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental and societal context.
9. A recognition of the need for, and an ability to engage in life-long learning.
10. A knowledge of contemporary issues.

11. An ability to use the techniques, skills and modern engineering tools necessary for engineering practice.

ECE Education Objectives

The ECE program objectives are shown below. They represent our vision for what our students will be doing in their engineering careers five years after they have graduated. The principal behaviors we seek to foster in our students are *expertise*, *innovation* and *leadership*. Our graduates will be:

Experts

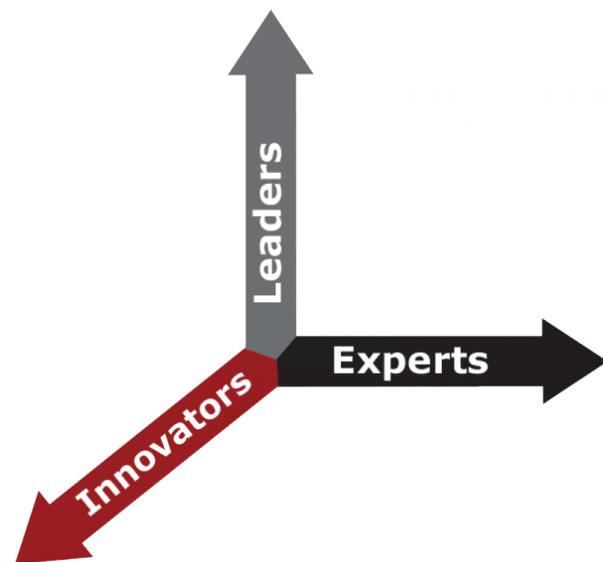

- They will solve problems by applying ECE fundamentals
- Their solutions will reflect depth of understanding in their sophistication.
- Their solutions will reflect breadth of understanding by drawing on multiple disciplines.

Innovators

- They will demonstrate creativity in their engineering practice.
- They will consider holistic systems-oriented approaches in their designs.
- They will think strategically in their planning and execution.

Leaders

- They will take initiative, and demonstrate resourcefulness.
- They will collaborate in multidisciplinary teams.
- They will be leaders in their organizations, their profession and in society.

Three dimensions of objectives for our graduates.

Curriculum Overview

Minimum number of units required for degree: 379 units.

In addition to the Carnegie Institute of Technology general education and freshman year requirements (143 units), the B.S. in Electrical and Computer Engineering requires 15-122 Principles of Imperative Computation (10 units), Physics II (12 units), two math or science electives (18 units), a Probability and Statistics course (9 units), 109 units of Electrical and Computer Engineering coursework, and 2 math co-requisites (21 units). The remaining units needed to reach the 379 required to graduate are Free Electives (57 units).

The Electrical and Computer Engineering coursework is divided into the categories of Core, Area Courses, Coverage, and Capstone Design.

The Core consists of five courses (18-100 Introduction to Electrical and Computer Engineering, 18-220 Electronic Devices and Analog Circuits, 18-240 Structure and Design of Digital Systems, 18-213 Introduction to Computer Systems, and 18-290 Signals and Systems). There are also two math co-requisites (18-202 and 21-127) and Physics II that are required co-requisites for the core. These courses provide the fundamental knowledge-base upon which all other electrical and computer engineering courses are built. 18-100 is generally taken during the freshman year, while the remaining courses in the Core are started in the sophomore year. The core courses are ideally completed by the end of the junior year (The department strongly recommends that students not take more than two core courses in the same semester). Although the core courses (and their co-requisites) may be taken in any order, students generally first take the course in their primary area of interest. This gives added flexibility to later course selection in related areas.

Students are also required to complete a seminar course during the fall semester of the sophomore year. This course, 18-200 Emerging Trends in Electrical and Computer Engineering, introduces students to the many areas within ECE and helps them decide which areas are of primary interest to them.

To satisfy the ECE Area Courses Requirement, at least two Area courses must be completed from one of the following five principal areas in ECE (24 units):

- *Device Sciences and Nanofabrication*: Solid State Physics, Electromagnetic Fields and Waves, Magnetics, Optics, etc.;
- *Signals and Systems*: Digital Signal Processing, Communication Systems, Control Systems, etc.;
- *Circuits*: Analog and Digital Circuits, Integrated Circuit Design, etc.;
- *Computer Hardware*: Logic Design, Computer Architecture, Networks, etc.; and
- *Computer Software*: Programming, Data Structures, Compilers, Operating Systems, etc.

One additional course from a second area must be taken (12 units)

For Coverage any additional ECE course(s) can be taken or an approved Computer Science course (see the ECE website for the list of approved Computer Science courses) totaling at least 12 units.

Finally, all students are required to take a Capstone Design course. In the Capstone Design courses, numbered 18-5XX, students participate in a semester-long design project with teams of other students. Students learn project management skills, make oral presentations, write reports, and discuss the broader social and ethical dimensions of ECE. Current Capstone Design courses are listed on the ECE Department website (<http://www.ece.cmu.edu/programs-admissions/bachelors/academic-guide>).

B.S. Curriculum

Minimum number of units required for degree: 379

For detailed information and regulations of the curriculum along with the degree requirements and the most recent version of the ECE curriculum and course descriptions, please refer to the ECE Home Page: <http://www.ece.cmu.edu/>

University Requirement

99-101	Computing @ Carnegie Mellon	3
or 99-102	Computing @ Carnegie Mellon	

CIT Requirements (see CIT section of the catalog for specifics (p. 115)):

CIT General Education	72	
Two semesters of calculus	20	
33-106	Physics I for Engineering Students ¹	12

One other introductory engineering course (generally taken during the freshman year)	12
--	----

¹33-106/107 is the recommended sequence for engineering students, although 33-111/112 or 33-131/132 would also meet the CIT Physics requirement.

Specific ECE requirements:

One Introduction to Electrical and Computer Engineering course (generally taken during the freshman year)

18-100	Introduction to Electrical and Computer Engineering	12
--------	---	----

One ECE Seminar, taken during the fall of the sophomore year

18-200	Emerging Trends in Electrical and Computer Engineering	1
--------	--	---

Four ECE core courses, three with math co-requisites

18-220	Electronic Devices and Analog Circuits	12
--------	--	----

33-107	Physics II for Engineering Students (co-requisite to 18-220)	12
--------	--	----

18-290	Signals and Systems	12
--------	---------------------	----

18-202	Mathematical Foundations of Electrical Engineering (co-requisite to 18-220 and 18-290)	12
--------	--	----

18-240	Structure and Design of Digital Systems	12
--------	---	----

21-127	Concepts of Mathematics (co-requisite to 18-240)	10
--------	--	----

18-213	Introduction to Computer Systems	12
--------	----------------------------------	----

Two Area Courses from 1 of the 5 Areas within ECE	24
---	----

One additional Area Course from a second Area	12
---	----

One Coverage Course (any additional ECE course or Approved CS course as listed on the ECE web site)	12
---	----

One Capstone Design Course (any 18-5xx course)	12
--	----

Other ECE Requirements:

15-112	Fundamentals of Programming and Computer Science	12
--------	--	----

15-122	Principles of Imperative Computation	10
--------	--------------------------------------	----

Two Math/Science electives	18
----------------------------	----

36-217	Probability Theory and Random Processes	9
--------	---	---

or 36-225	Introduction to Probability Theory	
-----------	------------------------------------	--

Free Electives	56
----------------	----

The math/science requirement can be satisfied with any course from The Mellon College of Science or The Department of Statistics except for: 100-level courses in Mathematics or Statistics, and courses designed for non-science or engineering majors, such as (but not limited to) 09-103, 09-104, 21-257, 33-124, 36-201, 36-202, 36-207 or 36-208. Although shown in the Junior and year, these courses may be taken at any time. Mathematics courses of particular interest to students in ECE are:

21-228	Discrete Mathematics	9
--------	----------------------	---

21-241	Matrices and Linear Transformations	10
--------	-------------------------------------	----

21-259	Calculus in Three Dimensions	9
--------	------------------------------	---

21-260	Differential Equations	9
--------	------------------------	---

[56 units]Free Electives

A Free Elective is defined as any graded course offered by any academic unit of the university (including research institutes such as the Robotics Institute (<http://www.ri.cmu.edu>) and the Software Engineering Institute (<http://www.sei.cmu.edu>)). A total of at least 56 units of Free Electives must be taken.

Up to 9 units of ROTC and Physical Education courses or other courses taken as Pass/Fail may also be used toward Free Electives.

Transfer of courses from other high-quality universities may be accepted through submission of the Transfer Credit Request form on the CIT web page (http://www.cit.cmu.edu/current_students/services/transfer_credit.html).

The large number of units without categorical constraints provides the student, in consultation with their Faculty Advisor or Mentor, with the flexibility to design a rich educational program.

Sample Curriculum

The following table shows a possible roadmap through our broad and flexible curriculum:

Freshman		Sophomore	
Fall	Spring	Fall	Spring
18-100 Introduction to Electrical and Computer Engineering	Introductory Engineering course	18-200 Emerging Trends in Electrical and Computer Engineering	18-2xx ECE Core course
15-112 Fundamentals of Programming and Computer Science	33-106 Physics I for Engineering Students	18-2xx ECE Core Course	21-127 Concepts of Mathematics or 18-200 Mathematical Foundations of Electrical Engineering
21-120 Differential and Integral Calculus	21-122 Integration and Approximation	18-202 Mathematical Foundations of Electrical Engineering or 21-127 Concepts of Mathematics	15-122 Principles of Imperative Computation
76-101 Interpretation and Argument	First-year General Education course	33-107 Physics II for Engineering Students	36-217 Probability Theory and Random Processes
99-101 Computing @ Carnegie Mellon		General Education course	General Education course
		39-210 Experiential Learning I	39-220 Experiential Learning II

Junior		Senior	
Fall	Spring	Fall	Spring
18-2xx ECE Core course	18-2xx ECE Core course	18-xxx ECE Coverage course	18-5xx ECE Capstone Design course
18-3xx/4xx ECE Area 1 course (first course in Area)	18-3xx/4xx ECE Area course (either 2nd course from Area 1 or the Area 2 course)	18-3xx/4xx ECE Area course (either 2nd course from Area 1 or the Area 2 course)	General Education course
General Education course	Math/Science Elective 2	General Education course	Free Elective
Math/Science elective 1	General Education course	Free Elective	Free Elective
Free Elective	Free Elective	Free Elective	Free Elective
39-310 Experiential Learning III			

Notes on the Curriculum

Policy on ECE Coverage Courses with Fewer than 12 Units

The basic curriculum requirements for Area courses, Coverage and Capstone Design are stated in terms of courses rather than units. The nominal total of 60 units for these categories is determined by assuming that each course is 12 units. In the event that courses with fewer than 12 units are used to satisfy some or all of these requirements, additional courses from the ECE coverage lists must be taken until the total units in ECE courses beyond the core meets or exceeds 60 units. Any ECE coverage course is acceptable, and any excess units beyond the required 60 may be counted as free elective credit.

QPA Requirement and Overload Policy

An overload is defined as any schedule with more than 54 units in one semester. A student will only be permitted to overload by 12 units if he or she achieved a QPA of at least 3.5 out of 4.0 in the previous semester he or she is registering for, or if his or her overall QPA is at least a 3.5.

Pass/Fail policy

Up to 9 units of ROTC and Physical Education courses or other courses taken as Pass/Fail may be used toward Free Electives. ECE core courses may not be taken as pass/fail. ECE project-based courses (including capstone design courses) may not be taken pass/fail. No ECE requirements may be fulfilled using a pass/fail course (except for 99-10x and 18-200)

Other Graduation Requirements

To be eligible to graduate, undergraduate students must complete all course requirements for their program with a cumulative Quality Point Average of at least 2.0. For undergraduate students who enrolled at Carnegie Mellon as freshmen and whose freshman grades cause the cumulative QPA to fall below 2.0, this requirement is modified to be a cumulative QPA of at least 2.0 for all courses taken after the freshman year. Note, however, the cumulative QPA that appears on the student's final transcript will be calculated based on all grades in all courses taken, including freshman year. Students are encouraged to confirm all graduation requirements with their academic advisor.

CIT has the following requirement for graduation. "Students must complete the requirements for their specified degrees with a cumulative quality point

average of 2.00 or higher for all courses taken after the freshman year [this is the CIT QPA on the Academic Audit].

In addition, a student is expected to achieve a cumulative quality point average of 2.00 in a series of core departmental courses." In ECE, this means that the student must complete 18-100 Introduction to Electrical and Computer Engineering, ECE Core, Area Courses, Coverage, and Capstone Design courses with a minimum QPA of 2.0 to graduate. When more than one possibility exists for meeting a specific requirement (e.g., Area Course), the courses used for calculating the ECE QPA will be chosen so as to maximize the QPA. Similarly, when an ECE course is retaken, the better grade will be used in the computation of the minimum QPA for the ECE QPA requirement to graduate.

Other Opportunities in ECE

ECE Cooperative Education Program

The ECE Co-Op is a unique 8-month contiguous extended internship experience in which ECE students with a minimum QPA of 3.0 may opt to participate in. Students typically engage in this option in the spring semester of their junior year, from January through August. A May through December option is also available. Students who engage in this program typically graduate in 4.5 academic years (but still eight semesters). Eligible students interested in participating should contact their advisor in the ECE Undergraduate and Graduate Programs Office. Students are required to submit a formal application consisting of a transcript, a resume, and a one-page statement of purpose including an academic plan. Students then work with the Career Center to find a Co-Op position. Once a Co-Op position is found, a Co-Op job description is required from the employer, to be approved by the ECE Undergraduate Office.

While on the Co-Op assignment, the students are participating in a recognized CIT educational program, retaining their full-time student status, akin to our students who study abroad in established exchange programs (such as NCTU or EPFL) for one or two semesters.

Upon returning to Carnegie Mellon, the students are required to submit for approval the following two documents to the ECE Undergraduate Office: a three to five page technical report of the Co-Op work, and a one page assessment and evaluation of the Co-Op experience. Students may obtain more detailed information through the department, the Career Center in the University Center, or online at <http://www.ece.cmu.edu/programs-admissions/bachelors/index.html>

Integrated M.S./B.S. Degrees Program

The Integrated Master's/Bachelor's program (otherwise known as the IMB program) is an exciting opportunity for students who excel academically to achieve not just a Bachelor's degree in ECE, but also a Master's degree through our Professional MS degree program-without needing to apply separately. This means no application fee, and no need to take the GRE (Graduate Record Exam). In order to be awarded the MS degree in the IMB program, the student must also earn their BS degree, either simultaneously with the MS degree or at least one semester prior to the awarding of the MS degree. If a course is eligible for the MS degree but must be used to complete the BS degree, the BS degree takes priority over the MS degree.

If a student is at least a 2nd semester junior, has completed at least 270 units and has at least an overall 3.00 QPA, he or she is guaranteed admission into the Professional MS degree in ECE through the IMB program. To be officially admitted, the student must complete the IMB program form.

If a student does not meet the exact overall 3.00 QPA requirement, he or she is eligible to petition for his or her admission into the IMB program during his or her senior year. Students may obtain the petition forms through a meeting with their assigned academic advisor.

Professional MS Degree Requirements:

Please see the ECE web site for the requirements for the Professional MS degree (<http://www.ece.cmu.edu/programs-admissions/masters/ms-requirements.html>). For students in the ECE IMB program, all requirements for the Professional MS degree are in addition to the requirements for the BS in ECE. No requirements for the MS degree may be used in any way toward the BS degree, including minors, additional majors or dual degrees.

Residency requirements and financial impacts:

Once a student in the IMB program has completed all of the requirements for the BS degree, he or she may become a graduate (Masters) student. To do this, the student's undergraduate degree is certified, and that student officially graduates with the BS degree. Once a student's undergraduate degree has been certified, no more courses may then be applied toward the BS degree. This includes courses toward minors and additional majors, although students pursuing an undergraduate dual degree with another department may still continue to apply additional coursework toward that second degree.

If a student takes more than 8 semesters to complete both the BS and MS degrees, then he or she must be a graduate student for at least one semester before graduating with the MS degree.

To determine the most appropriate time for an undergraduate student to become a graduate student, he or she should consult with Enrollment Services to understand how becoming a graduate student will affect financial aid, and with his or her academic advisor to determine a course schedule. When a student is a graduate student through the IMB program, the department is able to provide some financial assistance through Teaching Assistantships. Please see the ECE web site for further information regarding this financial assistance.

Faculty

DAVID ANDERSEN, Adjunct Professor of Electrical and Computer Engineering.

JAMES ANTAKI, Professor of Biomedical Engineering, Courtesy Professor of Electrical and Computer Engineering; Associate Professor of Bioengineering and Surgery at the University of Pittsburgh - Ph.D., University of Pittsburgh; Carnegie Mellon, 2014-.

JIM BAIN, Professor of Electrical and Computer Engineering and Materials Science Engineering; Associate Director, Data Storage Systems Center - Ph.D., Stanford University; Carnegie Mellon, 1993-.

NIKHIL BALRAM, Adjunct Professor of Electrical and Computer Engineering - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2014-.

LUJO BAUER, Assistant Research Professor of CyLab and Electrical and Computer Engineering - Ph.D., Princeton University; Carnegie Mellon, 2005-.

VIJAYAKUMAR BHAGAVATULA, Associate Dean for Graduate and Faculty Affairs of the College of Engineering; Professor of Electrical and Computer Engineering - Ph.D., Carnegie Mellon University; Carnegie Mellon, 1982-.

RONALD P. BIANCHINI, Adjunct Professor of Electrical and Computer Engineering - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2005-.

SHAWN BLANTON, Professor of Electrical and Computer Engineering; Director of the Center for Silicon System Implementaton - Ph.D., University of Michigan, Ann Arbor; Carnegie Mellon, 1995-.

TIMOTHY X. BROWN, Visiting Professor of Electrical and Computer Engineering and Energy Engineering at CMU Rwanda - PhD, California Institute of Technology; .

DAVID BRUMLEY, Associate Professor of Electrical and Computer Engineering, Courtesy Professor of the School of Computer Science; Technical Director of CyLab - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2008-.

RANDAL E. BRYANT, University Professor of the School of Computer Science; Courtesy Professor of Electrical and Computer Engineering - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1984-.

L. RICHARD CARLEY, ST Microelectronics Professor of Electrical and Computer Engineering - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1984-.

DAVID P. CASASANT, Emeritus George Westinghouse Professor of Electrical and Computer Engineering - Ph.D., University of Illinois; Carnegie Mellon, 1969-.

TSUHAN CHEN, Adjunct Professor of Electrical and Computer Engineering; Professor of Electrical and Computer Engineering at Cornell University - Ph.D., California Institute of Technology; Carnegie Mellon, 1997-.

HOWIE CHOSET, Professor of the Robotics Institute; Courtesy Professor of Electrical and Computer Engineering - Ph.D., California Institute of Technology; Carnegie Mellon, 1996-.

NICOLAS CHRISTIN, Assistant Research Professor of Electrical and Computer Engineering and CyLab - Ph.D., University of Virginia; Carnegie Mellon, 2005-.

EDMUND M. CLARKE, Fore Systems University Professor of Computer Science; Courtesy Professor of Electrical and Computer Engineering - Ph.D., Cornell University; Carnegie Mellon, 1982-.

ANUPMAN DATTA, Associate Professor of Computer Science and Electrical and Computer Engineering; Assistant Research Professor of CyLab - Ph.D., Stanford University; Carnegie Mellon, 2007-.

ROBERT DAVIS, John and Claire Bertucci Distinguished Professor of Materials Science and Engineering; Courtesy Professor of Electrical and Computer Engineering - Ph.D., University of California, Berkeley; Carnegie Mellon, 2010-.

JOHN DOLAN, Principal Systems Scientist of The Robotics Institute; Courtesy Professor of Electrical and Computer Engineering - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2006-.

HAKAN ERDOGMUS, Associate Teaching Professor of Software Engineering at CMU Silicon Valley - Ph.D., Université du Québec; Carnegie Mellon, 2014-.

CHRISTOS FALOUTSOS, Professor of Computer Science and Electrical and Computer Engineering - Ph.D., University of Toronto; Carnegie Mellon, 1998-.

BABAK FALSAFI, Adjunct Professor of Electrical and Computer Engineering and Computer Science; - Ph.D., University of Wisconsin, Madison; Carnegie Mellon, 2001-.

GARY FEDDER, Howard M. Wilkoff Professor of Electrical and Computer Engineering and Robotics; Director of ICES; Director of MEMS Laboratory - Ph.D., University of California at Berkeley; Carnegie Mellon, 1994-.

RANDY FEENSTRA, Professor of Physics and Electrical and Computer Engineering - Ph.D., California Institute of Technology; Carnegie Mellon, 1995-.

FRANZ FRANCHETTI, Associate Research Professor, Electrical and Computer Engineering - Ph.D., Vienna University of Technology; Carnegie Mellon, 2001-.

RAJEEV GANDHI, Systems Engineer, Electrical and Computer Engineering - Ph.D., University of California at Santa Barbara; Carnegie Mellon, 2003-.

GREGORY R. GANGER, Jatrass Professor of Electrical and Computer Engineering and Computer Science; Director PDL - Ph.D., University of Michigan; Carnegie Mellon, 1997-.

AMINATA GARBA, Assistant Teaching Professor of Electrical and Computer Engineering at CMU Rwanda - Ph.D., McGill University; Carnegie Mellon, 2013-.

GARTH GIBSON, Professor of Computer Science and Electrical and Computer Engineering - Ph.D., University of California at Berkeley; Carnegie Mellon, 1991-.

PETER GILGUNN, Adjunct Faculty - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2012-.

VIRGIL GLIGOR, Professor of Electrical and Computer Engineering; Co-Director, CyLab - Ph.D., University of California, Berkeley; Carnegie Mellon, 2008-.

SETH C. GOLDSTEIN, Associate Professor of Computer Science and Electrical and Computer Engineering - Ph.D., University of California at Berkeley; Carnegie Mellon, 1997-.

DAVID W. GREVE, Professor of Electrical and Computer Engineering - Ph.D., Lehigh University; Carnegie Mellon, 1982-.

MARTIN GRISS, Professor of Electrical and Computer Engineering, Director of the Disaster Management Initiative — Carnegie Mellon Silicon Valley - Ph.D., University of Illinois; Carnegie Mellon, 2008-.

PULKIT GROVER, Assistant Professor - Ph.D., University of California at Berkeley; Carnegie Mellon, 2013-.

MOR HARCHOL-BALTER, Associate Professor of Computer Science and Electrical and Computer Engineering - Ph.D., University of California at Berkeley; Carnegie Mellon, 1999-.

FRED HIGGS, Assistant Professor of Electrical and Computer Engineering and Mechanical Engineering - Ph.D., Rensselaer Polytechnic Institute; Carnegie Mellon, 2003-.

ALEX HILLS, Professor of Electrical and Computer Engineering; Distinguished Service Professor of Engineering and Public Policy - Ph.D., Carnegie Mellon University; Carnegie Mellon, 1992-.

JAMES F. HOBURG, Emeritus Professor of Electrical and Computer Engineering - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1975-.

JAMES HOE, Professor of Electrical and Computer Engineering and Computer Science; Co - Director CALCM, ITRI Lab@ CMU - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2000-.

RALPH HOLLIS, Research Professor Robotics and Electrical and Computer Engineering; Director, Microdynamics Systems Laboratory Carnegie - Ph.D., University of Colorado, Boulder; Carnegie Mellon, 1993-.

GABRIELA HUG, Assistant Professor, Electrical and Computer Engineering - Ph.D., ETH Zurich, Switzerland; Carnegie Mellon, 2009-.

MARIJA ILIC, Professor of Electrical and Computer Engineering and Engineering and Public Policy - D.Sc., Washington University; Carnegie Mellon, 2002-.

MOHAMMAD ISLAM, Assistant Professor of Chemical Engineering, Electrical and Computer Engineering and Materials Science Engineering – Ph.D., Lehigh University; Carnegie Mellon, 2008–.

COLLIN JACKSON, Assistant Research Professor of Electrical and Computer Engineering, Cylab and Information Networking Institute, Carnegie Mellon Silicon Valley – Ph.D., Stanford University; Carnegie Mellon, 2009–.

TAKEO KANADE, U.A. and Helen Whitaker Professor of Computer Science and Robotics; Professor of Electrical and Computer Engineering – Ph.D., Kyoto University; Carnegie Mellon, 1980–.

SOUUMYA KAR, Assistant Research Professor of Electrical and Computer Engineering – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2011–.

PRADEEP KHOSLA, Philip and Marsha Dowd Professor of Electrical and Computer Engineering and Robotics; Dean, Carnegie Institute of Technology; Co-Director, Carnegie Mellon Cylab – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1986–.

HYONG S. KIM, Drew D. Perkins (E'86) Professor of Electrical and Computer Engineering; Director, Cylab Korea – Ph.D., University of Toronto; Carnegie Mellon, 1990–.

PHILIP J. KOOPMAN, Associate Professor of Electrical and Computer Engineering and Computer Science – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1989–.

JELENA KOVACEVIC, David Edward Schramm Professor, Electrical and Computer Engineering; Co-Director, Center for Bioimage Informatics – Ph.D., Columbia University; Carnegie Mellon, 2003–.

BRUCE H. KROGH, Professor of Electrical and Computer Engineering – Ph.D., University of Illinois at Urbana-Champaign; Carnegie Mellon, 1983–.

MARK H. KRYDER, University Professor of Electrical and Computer Engineering; Chief Technical Officer and Vice President of Research, Seagate (Retired) – Ph.D., California Institute of Technology; Carnegie Mellon, 1978–.

DAVID N. LAMBETH, Emeritus Professor of Electrical and Computer Engineering and Materials Science and Engineering – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1989–.

DAVE LAUGHLIN, ALCOA Professor of Materials Science Engineering; Professor of Electrical and Computer Engineering – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1974–.

XIN LI, Assistant Professor, Electrical and Computer Engineering – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2001–.

JASON LOHN, Associate Research Professor of Electrical and Computer Engineering; Senior Research Scientist, Carnegie Mellon Silicon Valley – Ph.D., University of Maryland; Carnegie Mellon, 2009–.

YI LOU, Assistant Professor of Electrical and Computer Engineering – Ph.D., Columbia University; Carnegie Mellon, 2005–.

KEN MAI, Assistant Professor of Electrical and Computer Engineering – Ph.D., Stanford University; Carnegie Mellon, 2005–.

WOJCIECH MALY, U.A. and Helen Whitaker Professor of Electrical and Computer Engineering – Ph.D., Polish Academy of Sciences, Warsaw; Carnegie Mellon, 1986–.

DIANA MARCULESCU, Professor of Electrical and Computer Engineering; ; Associate Department Head for Academic Affairs, Electrical and Computer Engineering – Ph.D., University of Southern California; Carnegie Mellon, 2000–.

RADU MARCULESCU, Professor of Electrical and Computer Engineering – Ph.D., University of Southern California; Carnegie Mellon, 2000–.

ROY MAXION, Principle Systems Scientist Computer Science and Electrical and Computer Engineering – Ph.D., University of Colorado; Carnegie Mellon, 1984–.

TIMOTHY MCCOY, Adjunct Professor of Electrical and Computer Engineering; Director, Research and Development Converteam North America – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2008–.

M. GRANGER MORGAN, Professor of Electrical and Computer Engineering; Lord University Professor and Head, Department of Engineering and Public Policy; Professor, H.J. Heinz III School of Public Policy and Management – Ph.D., University of California, San Diego; Carnegie Mellon, 1974–.

JAMES MORRIS, Professor of Computer Science and Electrical and Computer Engineering; Dean, Carnegie Mellon Silicon Valley – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1982–.

JOSÉ M. F. MOURA, University Professor of Electrical and Computer Engineering; Professor of Biomedical Engineering – D.Sc., Massachusetts Institute of Technology; Carnegie Mellon, 1986–.

TODD MOWRY, Associate Professor of Computer Science and Electrical and Computer Engineering; Co-Director CALCM – Ph.D., Stanford University; Carnegie Mellon, 1997–.

TAMAL MUKHERJEE, Professor of Electrical and Computer Engineering – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1996–.

ONUR MUTLU, Assistant Professor of Electrical and Computer Engineering and Computer Science – Ph.D., University of Texas at Austin; Carnegie Mellon, 2009–.

WILLIAM NACE, Assistant Teaching Professor of Electrical and Computer Engineering – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2008–.

PRIYA NARASIMHAN, Associate Professor of Electrical and Computer Engineering – Ph.D., University of California at Santa Barbara; Carnegie Mellon, 2001–.

ROHIT NEGI, Professor of Electrical and Computer Engineering – Ph.D., Stanford University; Carnegie Mellon, 2000–.

CHARLES P. NEUMAN, Professor of Electrical and Computer Engineering – Ph.D., Harvard University; Carnegie Mellon, 1969–.

DAVID O'HALLARON, Professor of Computer Science and Electrical and Computer Engineering; Director Intel Research, Pittsburgh – Ph.D., University of Virginia; Carnegie Mellon, 1989–.

JEYANANDH PARAMESH, Assistant Professor of Electrical and Computer Engineering – Ph.D., University of Washington; Carnegie Mellon, 2007–.

JON M. PEHA, Professor of Engineering and Public Policy and Electrical and Computer Engineering – Ph.D., Stanford University; Carnegie Mellon, 1991–.

CÉCILE PÉRAIRE, Assistant Teaching Professor at CMU Silicon Valley – Ph.D., École polytechnique fédérale de Lausanne; Carnegie Mellon, 2014–.

ADRIAN PERRIG, Professor of Electrical and Computer Engineering, Engineering and Public Policy and Computer Science; Technical Director, Cylab – Ph.D., Carnegie Mellon; Carnegie Mellon, 2002–.

GIANLUCA PIAZZA, Associate Professor – Ph.D., University of California at Berkeley; Carnegie Mellon, 2012–.

LAWRENCE T. PILEGGI, Tanoto Professor of Electrical and Computer Engineering; – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1996–.

MARKUS PÜSCHEL, Adjunct Professor – Ph.D., University of Karlsruhe; Carnegie Mellon, 1999–.

RAGUNATHAN RAJKUMAR, Professor of Electrical and Computer Engineering and computer Science; Co – Director – GM-CM CRL; Director, Real-Time and Multimedia Systems Laboratory, Ph.D., Carnegie Mellon University; Carnegie Mellon, 1992–.

DAVID RICKETTS, Assistant Professor of Electrical and Computer Engineering – Ph.D., Harvard University; Carnegie Mellon, 2006–.

GUSTAVO ROHDE, Assistant Professor of Biomedical Engineering and Electrical and Computer Engineering – Ph.D., University of Maryland; Carnegie Mellon, 2006–.

RONALD ROHRER, Emeritus Professor of Electrical and Computer Engineering – Ph.D., University of California, Berkeley; Carnegie Mellon, 2008–.

ANTHONY ROWE, Assistant Research Professor – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2009–.

ROB A. RUTENBAR, Adjunct Professor of Electrical and Computer Engineering and Computer Science; Director, MARCO Focus Center for Circuit and System Solutions – Ph.D., University of Michigan; Carnegie Mellon, 1984–.

ASWIN SANKARANARAYANAN, Assistant Professor – Ph.D., University of Maryland; Carnegie Mellon, 2013–.

MAHADEV SATYANARAYANAN, Carnegie Professor of Computer Science; Professor of Electrical and Computer Engineering – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1983–.

MARIOS SAVVIDES, Associate Research Professor; Director, Cylab Biometrics Center – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2005–.

TUVIAH E. SCHLESINGER, Adjunct Faculty – Ph.D., California Institute of Technology; Carnegie Mellon, 1985–.

SRINIVASAN SESHAN, Associate Professor of Computer Science and Electrical and Computer Engineering – Ph.D., University of California at Berkeley; Carnegie Mellon, 2000–.

DANIEL P. SIEWIOREK, Buhl University Professor of Electrical and Computer Engineering and Computer Science; Director, Human Computer Interaction Institute – Ph.D., Stanford University; Carnegie Mellon, 1972–.

BRUNO SINOPOLI, Associate Professor of Electrical and Computer Engineering, Robotics Institute and Mechanical Engineering - Ph.D., University of California, Berkeley; Carnegie Mellon, 2007-.

MARVIN A. SIRBU, Professor of Engineering and Public Policy, Electrical and Computer Engineering and Tepper School of Business - D.Sc., Massachusetts Institute of Technology; Carnegie Mellon, 1985-.

METIN SITTI, Associate Professor of Mechanical Engineering, Electrical and Computer Engineering and Robotics Institute - Ph.D., University of Toledo; Carnegie Mellon, 2002-.

ASIM SMALAGIC, Research Professor of ICES and Electrical and Computer Engineering; Director, LINC'S - Ph.D., University of Sarajevo and University of Edinburgh; Carnegie Mellon, 1992-.

DAWN SONG, Adjunct Professor of Electrical and Computer Engineering and Computer Science - Ph.D., University of California at Berkeley; Carnegie Mellon, 2002-.

DANIEL D. STANCIL, Adjunct Professor of Electrical and Computer Engineering - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1986-.

PETER STEENKISTE, Professor of Electrical and Computer Engineering and Computer Science - Ph.D., Stanford University; Carnegie Mellon, 1987-.

RICHARD M. STERN, JR., Professor of Electrical and Computer Engineering, Language Technologies Institute, Computer Science, and Biomedical Engineering; Lecturer, Music - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1977-.

ANDRZEJ J. STROJWAS, Keithley Professor of Electrical and Computer Engineering - Ph.D., Carnegie Mellon University; Carnegie Mellon, 1983-.

THOMAS SULLIVAN, Associate Teaching Professor, Electrical and Computer Engineering; Lecturer, Music - Ph.D., Carnegie Mellon University; Carnegie Mellon, 1996-.

PATRICK TAGUE, Assistant Research Professor of Electrical and Computer Engineering, Cylab and Information Networking Institute, Carnegie Mellon Silicon Valley - Ph.D., University of Washington; Carnegie Mellon, 2009-.

SAROSH N. TALUKDAR, Emeritus Professor of Electrical and Computer Engineering - Ph.D., Purdue University; Carnegie Mellon, 1974-.

DONALD E. THOMAS, JR., Professor of Electrical and Computer Engineering - Ph.D., Carnegie Mellon University; Carnegie Mellon, 1977-.

OZAN TONGUZ, Professor of Electrical and Computer Engineering - Ph.D., Rutgers University; Carnegie Mellon, 2000-.

ELIAS TOWE, Professor of Electrical and Computer Engineering; Albert and Ethel Grobstein Memorial Professor of Materials Science and Engineering; Director, CNXT - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2001-.

TAHA SELIM USTUN, Assistant Professor of Electrical and Computer Engineering at CMU Rwanda - Ph.D., Victoria University; Carnegie Mellon, 2013-.

PAULO VERISSIMO, Adjunct Professor of Electrical and Computer Engineering and Professor of University of Lisboa, Portugal - Ph.D., IST of the Technical University of Lisboa; Carnegie Mellon, 2008-.

ANTHONY WASSERMAN, Professor of Software Engineering Practice, Carnegie Mellon Silicon Valley, Electrical and Computer Engineering - Ph.D., University of Wisconsin; Carnegie Mellon, 2008-.

JEFF WELDON, Assistant Professor of Electrical and Computer Engineering - Ph.D., University of California, Berkeley; Carnegie Mellon, 2011-.

ROBERT WHITE, Emeritus, University Professor Emeritus of Electrical and Computer Engineering and Engineering and Public Policy - Ph.D., Stanford University; Carnegie Mellon, 1993-.

JEANNETTE WING, President's Professor of Computer Science; Professor of Electrical and Computer Engineering - Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1985-.

OSMAN YAĞAN, Assistant Research Professor of Electrical and Computer Engineering at CMU Silicon Valley - Ph.D., University of Maryland, College Park; Carnegie Mellon, 2013-.

ERIK YDSTIE, Professor of Chemical Engineering and Electrical and Computer Engineering - Ph.D., Imperial College, London; Carnegie Mellon, 1992-.

BYRON YU, Assistant Professor - Ph.D., Stanford University; Carnegie Mellon, 2009-.

HUI ZHANG, Professor of Computer Science and Electrical and Computer Engineering - Ph.D., University of California, Berkeley; Carnegie Mellon, 1995-.

PEI ZHANG, Assistant Research Professor of Software Engineering at CMU Silicon Valley, Electrical and Computer Engineering, Information Networking Institute and Cylab - Ph.D., Princeton University; Carnegie Mellon, 2008-.

JIA ZHANG, Associate Professor of Software Engineering at CMU Silicon Valley - Ph.D., University of Illinois, Chicago; Carnegie Mellon, 2014-.

JIAN-GANG ZHU, ABB Professor of Electrical and Computer Engineering; Director, DSSC.; Professor of Materials Science and Engineering and Physics - Ph.D., University of California, San Diego; Carnegie Mellon, 1997-.

JINGXI ZHU, Assistant Professor of the Joint Institute of Engineering; Visiting Professor of Electrical and Computer Engineering - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2014-.

BOB IANNUCCI, Associate Dean and Director of Silicon Valley Campus, Distinguished Service Professor - PhD, Massachusetts Institute of Technology; .

Department of Engineering and Public Policy

Douglas C. Sicker, Head
Deanna H. Matthews, Associate Department Head for Undergraduate Affairs
Office: Baker Hall 129
<http://www.epp.cmu.edu>

The Department of Engineering and Public Policy (EPP) is a unique department that works on problems at the interface between technology and society. Society is largely responsible for setting the goals and framing the problems that engineers and scientists work on. However, technologies designed by engineers and scientists profoundly change the societies in which they operate. Technology has enabled a healthier, richer, and more productive society. At the same time, technology has contributed to the creation of many of the more serious problems our society faces.

Technology can help us build a happier, freer, and more fulfilling life, while maintaining risks and undesirable impacts at acceptable levels. But that does not happen automatically. It takes careful hard work by people who understand both technology and the society in which they live. In order to do their jobs responsibly and well in today's world, engineers and scientists must develop an understanding of the interface between technology and society and a command of the skills necessary to work at that interface. The undergraduate degree programs of the Department of Engineering and Public Policy (EPP) have been designed to allow undergraduate students at Carnegie Mellon University to add this important dimension to their traditional engineering or science education. EPP additional major graduates, for the most part, will enter traditional careers, but will carry with them a set of insights and skills that will help them to better deal with issues in technology and policy, and better exercise their ethical and social obligations as practicing professionals.

Overview of the Undergraduate Programs in EPP

The undergraduate additional major programs in EPP combines the strong foundation in mathematics and physical sciences, and the development of engineering or science skills with a rigorous preparation in the analysis of social and political problems. The curriculum includes subject matter which is not part of traditional technical or social science curricula, but which contains elements of each. Students complete courses in four core areas: economics, statistics, decision-making, and communication. Breadth is achieved through EPP Technology-Policy elective courses. Finally, students apply their skills in a project preparatory course and two interdisciplinary problem-solving projects. Problem areas for these projects are chosen from local, state, and national situations, and include such topics as industrial automation and robotics, environmental control, telecommunication and computer technologies, product safety, and energy systems. Students from several CMU colleges enroll in these projects courses exposing EPP additional majors to working in truly interdisciplinary situations. Examples of past project course topics (http://www.epp.cmu.edu/undergraduate/project_courses.html) and final reports are available.

Additional Major in Engineering and Public Policy

The EPP department offers an additional major in Engineering and Public Policy (EPP) with each of the five traditional engineering departments in the engineering college. The engineering double major leads to a fully accredited engineering degree that prepares students for traditional technical careers. EPP additional major engineers are not educated to be a different kind of engineer. Rather, their education is intended to enable them to be better, more socially responsible engineers in the traditional technical fields.

Additional Major in Science, Technology, and Public Policy

Beginning in Fall 2014, we also offer an additional major in Science, Technology and Public Policy (STPP) for students outside of the engineering college who are earning a B.S. degree. This includes students in the Mellon College of Science, the School of Computer Science, and select majors in the Dietrich College. Similar to the additional major in Engineering and Public Policy, the additional major in Science, Technology and Public Policy is meant to broaden the perspectives on a student's primary major and provide additional skills for future careers.

Minor in Technology and Policy

The department also offers a minor in Technology and Policy for non-engineering majors. The Technology and Policy minor exposes students

to issues at the interface of science, technology, and society, and how interdisciplinary approaches are needed to solve complex problems.

Career Options with EPP Additional Majors

Students who select one of the EPP additional majors graduate with a regular accredited engineering degree or complete science degree, and thus have all of the options for traditional technical careers as their single major classmates. A large portion of our double major students pursue traditional technical careers after graduation.

The advantage of the additional major is the added set of skills and perspectives, which allow a graduate of the program to improve the quality, sensitivity, and social responsiveness of their work, and the work of their colleagues. Employers recognize these skills and often view our graduates as more attractive for a traditional engineering position. Firms contact the EPP department every year to recruit EPP graduates because of their satisfaction with the knowledge and skills acquired by EPP students.

The additional major also opens up a collection of other options that are not available to most technical graduates. These include jobs in policy analysis in federal, state, and local government or in public policy consulting firms. Alumni also pursue careers in companies to deal with issues like government regulation, environmental control, worker health and safety, product liability and safety, telecommunications policy, energy systems, and the social impact of large technological systems.

Students also choose to continue their formal education, doing graduate work in engineering, the social sciences, law, or interdisciplinary programs.

Faculty Advisors

Faculty in several departments serve as advisors and information resources to students selecting the EPP undergraduate programs. Given the interdisciplinary perspective of EPP, students may find that a faculty member outside their traditional major can provide support and guidance with EPP-related courses and career paths. The EPP Associate Department Head for Undergraduate Affairs is Deanna Matthews. Dr. Matthews can provide general academic advice and guidance for all EPP double majors. Other faculty affiliated with the undergraduate programs in EPP are:

- Civil Engineering: Peter Adams, Scott Matthews, Mitch Small
- Chemical Engineering: Meagan Mauter
- Computer Science: Lorrie Cranor
- Electrical and Computer Engineering: Jon Peha, Marvin Sirbu
- Engineering and Public Policy: Ines Azevedo, Liz Casman, Erica Fuchs, Paulina Jaramillo, Deanna Matthews, Granger Morgan
- Mechanical Engineering: Jeremy Michalek, Edward Rubin
- Material Science and Engineering: Jay Whitacre
- Social and Decision Sciences: Paul Fischbeck, Baruch Fischhoff

EPP Program Educational Objectives

Society needs engineers and scientists who understand how they impact the surrounding environment and it needs policy makers with more depth of technical expertise. EPP graduates help bridge this gap. Through required courses, carefully selected electives, and project activities, double major students in Engineering and Public Policy develop the perspectives and skills that enable students to understand and work at the interface between technology and society.

Together with the objectives of the traditional technical majors, the Engineering and Public Policy undergraduate program aims to produce graduates who:

- are leaders and innovators in their professions and communities,
- value and make use of the broader perspective and analysis skills acquired through their additional major experience on Engineering and Public Policy in the workplace and beyond.

EPP Student Outcomes

By the end of the combined B.S. programs in a traditional engineering program and the EPP program, students should have attained the following:

1. an ability to apply knowledge of mathematics, science, and engineering;
2. an ability to design and conduct experiments, as well as to analyze and interpret data;

3. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
4. an ability to function on multidisciplinary teams;
5. an ability to identify, formulate, and solve engineering problems;
6. an understanding of professional and ethical responsibility;
7. an ability to communicate effectively;
8. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context;
9. a recognition of the need for, and an ability to engage in life-long learning;
10. a knowledge of contemporary issues;
11. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice;

plus these additional skills:

12. an ability to demonstrate that engineering analysis alone is not sufficient to solve a "real world" societal need or problem;
13. an ability to complete an analysis of a problem that involves technical, social science/behavioral, and policy dimensions and components;
14. an ability to characterize the scale and systems level impacts of technology and public policy solutions;
15. an ability to structure unstructured problems as part of a multi-disciplinary team;
16. an ability to recognize they are appropriately trained for careers beyond traditional engineering.

Course Requirements for the Additional Major in EPP

Students pursuing an additional major in EPP must complete three sets of requirements: courses for the EPP additional major, courses for their traditional disciplinary major, and general education courses. The student should refer to the relevant sections of this catalog for the required courses in the traditional disciplinary major. The EPP additional major is designed to be completed with a traditional disciplinary major in the standard four-year time frame. However, additional units or course work may be required. Some courses for the EPP additional major may also satisfy requirements for traditional disciplinary majors or for general education courses.

Course Requirements

Course		Units
19-101	Introduction to Engineering and Public Policy	12
19-201	EPP Sophomore Seminar	1
73-100	Principles of Economics	9
36-220	Engineering Statistics and Quality Control (or other approved statistics course)	9
19-301 or 88-223 or 88-302	Decision Making Methods for EPP Decision Analysis and Decision Support Systems Behavioral Decision Making (or other approved decision science course)	9
19-325 or 76-270	Technology and Policy Writing for Lay Audiences Writing for the Professions (or other approved writing course)	9
19-351	Applied Methods for Technology-Policy Analysis	9
19-451	EPP Projects	12
19-452	EPP Projects	12
	Three EPP Technology-Policy Electives	24

Introductory Courses

19-101 Introduction to Engineering and Public Policy

19-201 EPP Sophomore Seminar

The two introductory courses prepare students for the double major experience through discussion and assessment of technology-policy interactions. 19-101 Introduction to Engineering and Public Policy may be taken as the second introductory engineering course during the first year for engineering students. 19-201 EPP Sophomore Seminar is required in addition to any corresponding seminar course in a student's traditional degree program.

Core Area Courses

73-100 Principles of Economics

36-220 Engineering Statistics and Quality Control

EPP Decision Science elective - one of the following, or other approved course:

19-301 Decision Making Methods for EPP

88-223 Decision Analysis and Decision Support Systems

88-302 Behavioral Decision Making

EPP Writing and Communications elective - one of the following, or other approved course:

19-325 Technology and Policy Writing for Lay Audiences

76-270 Writing for the Professions

The four core area courses provide the foundational skills in the social sciences that are needed for robust analysis of policy problems. 73-100 Principles of Economics should be taken as a CIT First Year General Education course. AP credit for 73-100 is accepted, but then students are encouraged to take 73-230 Intermediate Microeconomics.

36-220 Engineering Statistics and Quality Control is required for all CE, ME, and MSE students in their traditional engineering majors. ChE students will substitute 36-220 for 03-232 Biochemistry I. ECE students, who take 36-217 Probability Theory and Random Processes for their traditional engineering major, may take 36-220 or 36-226 Introduction to Statistical Inference. Students should complete the statistics requirement by the end of sophomore year. A statistics course is a prerequisite for the EPP Decision Science elective.

The EPP Decision Science elective fulfills either the CIT General Education Social Analysis and Decision Making requirement or a CIT General Education free elective. The EPP Writing and Communications course fulfills the CIT General Education Writing and Expressions requirement.

Technology-Policy Electives

- At least 3 courses of EPP Technology-Policy electives (24 units minimum)

EPP Technology-Policy Electives include courses that belong to three categories. First, EPP Technology-Policy Electives include courses that synthesize engineering analysis and social analysis perspectives and apply them to problems with substantial societal and technological components. Specific areas of interest for these courses are (1) energy, resources, and the environment, (2) risk assessment, (3) forensic engineering, (4) urban engineering, (5) information and communication technology, and (6) product engineering and design, among others. Second, EPP Technology-Policy Electives include courses that teach methods or analysis skills necessary for solving complex problems. Examples include mathematical or statistical courses related to optimization or estimation, or economics courses related to economic analysis. Finally, EPP Technology-Policy Electives include courses that provide technical background for policy relevant issues. These courses are fundamental for understanding our current engineering systems and how proposed changes can be implemented. Examples include courses on electricity systems, engine design, or atmospheric systems.

Qualifying courses for EPP Technology-Policy Electives are determined each semester. The majority of 19-xxx EPP departmental courses are considered EPP Technology-Policy Electives. Exceptions will be identified when the courses are offered. 19-301 and 19-351 are required courses for the EPP additional major and may not be used as EPP Technology-Policy electives. Courses from other departments also are acceptable as electives. Students should work with their advisors to define areas of concentration or a selection of breadth courses for the EPP Technology-Policy Electives.

Students are required to take at least three EPP Technology-Policy electives for a minimum of 24 units. Units may be added in any combination, but a maximum of one 3-unit course is permitted. Up to 9 units of research may be used with approval. Students may not use a required course from their traditional disciplinary major for these elective units. However, students may use an elective course from their traditional major requirements to meet the requirements of both their traditional engineering major and an EPP Technology-Policy elective, but the units for the course will not be double-counted toward units required for their degree. Some EPP Technology-Policy elective courses may fulfill requirements for CIT General Education categories (e.g., 19-411 Global Competitiveness: Firms, Nations and Technological Change is an I&I course), otherwise students use Free Elective units to complete this requirement.

Capstone Courses

- 19-351 Applied Methods for Technology-Policy Analysis
- 19-451 or 19-452 EPP Projects (taken twice)

The capstone courses synthesize the technical skills and knowledge from a student's traditional major with the social science skills and broad perspective of the EPP major.

19-351 Applied Methods for Technology-Policy Analysis is a preparatory course for the EPP Projects. 19-351 may be completed as a co-requisite of 19-451/19-452 EPP Projects. The course fulfills CIT General Education free elective units.

19-451/19-452 EPP Projects are taken twice by all students. EPP Projects are technology/policy projects which deal with research and development of recommendations for solving actual and critical problems currently affecting society. The students, faculty, and graduate student managers for the project are drawn from EPP, Social and Decision Sciences, and the Heinz College, and other CMU departments, and hence bring different areas of expertise to the structuring and solution of the problem. The topics for EPP Projects are drawn from diverse areas such as environmental systems and resources, public transportation, urban engineering problems, energy and fuel utilization, the interaction of law and technology, strategic materials and vulnerability of supply, technical issues in national security, and problems in automation, robotics, and communication technology. Students use Free Elective units to complete this requirement.

Notes on EPP double major requirements

Students should follow the suggested curriculum timelines for completing the math, science, and engineering course requirements of the traditional major with the exception of 36-220 which should be taken as early as possible and no later than the end of sophomore year.

All students must complete 76-101 Interpretation and Argument. Some courses as noted above may be used to fulfill requirements of general education courses. Acceptable courses for the CIT General Education requirements are maintained by the CIT Dean's Office. Students must submit a plan during their first-semester as an EPP student (usually Fall sophomore year) for these general education courses demonstrating their relevance to EPP.

Students must complete the minimum number of units as required by their traditional major for graduation. In some cases, students completing the EPP additional major may need to complete additional units to meet all requirements for the traditional major and EPP additional major.

In addition to any other graduation requirements (e.g., regarding course work, minimum QPA, pass/fail course work, etc.) of the student's traditional disciplinary major, students must earn a minimum QPA of 2.0 in all courses required for the EPP major.

Side-by-side curriculum charts (<http://www.cmu.edu/epp/prospective/undergraduate/epp-additional-major/curriculum-charts>) of the curricula for the traditional engineering majors alone versus the traditional engineering majors with the EPP double major can assist students in determining the course requirements and scheduling needed to complete the degree requirements.

A proposed semester plan is below. Students work with their faculty advisors to determine the best sequence of courses given the varied requirements in the traditional majors.

Course	Semester
19-101 Introduction to Engineering and Public Policy	First-year Spring
73-100 Principles of Economics	First-year Fall or Spring
19-201 EPP Sophomore Seminar	Sophomore Fall
36-220 Engineering Statistics and Quality Control	Sophomore Fall or Spring
EPP Writing and Communications Elective	Sophomore Fall or Spring
EPP Decision Science Elective	Junior Fall
19-351 Applied Methods for Technology-Policy Analysis	Junior Spring
3 EPP Technology-Policy Electives	Junior and/or Senior year
19-451/19-452 EPP Projects	Senior Fall and Spring

Course Requirements for the Additional Major in STPP

The requirements for the Science, Technology and Public Policy additional major are the same as those for the Engineering and Public Policy additional major. Similar to CIT-EPP students, some courses will fulfill some major requirements or "general education" requirements (e.g. 73-100 for Economics students, statistics course for most majors). Other courses will use students' elective spaces or free elective units. Core courses required for a student's major will not be allowed to double-count for Technology Policy electives, but elective courses can be selected that fulfill both major elective requirements and Technology Policy electives. Students pursuing

the STPP additional major should work with their advisors to determine how best to fit the additional major requirements into their course load.

Introductory Courses

		Units
19-101	Introduction to Engineering and Public Policy	12
19-201	EPP Sophomore Seminar	1

Core Area Courses

73-100	Principles of Economics	9
Statistics course — one of the following:		
36-220	Engineering Statistics and Quality Control	9
36-226	Introduction to Statistical Inference	9
73-407	Fundamentals of Statistical Modeling	9
or other approved statistics course		

EPP Decision Science course — one of the following:

19-301	Decision Making Methods for EPP	9
88-223	Decision Analysis and Decision Support Systems	9
88-302	Behavioral Decision Making	9
or other approved decision science course		

EPP Writing and Communications course — one of the following:

19-325	Technology and Policy Writing for Lay Audiences	9
76-270	Writing for the Professions	9
76-271	Introduction to Professional and Technical Writing	9
or other approved writing and communications course		

Technology-Policy Electives

3 courses, at least 24 units	24 minimum units
------------------------------	-------------------------

Capstone Courses

19-351	Applied Methods for Technology-Policy Analysis	9
19-451	EPP Projects	12
or 19-452	EPP Projects	
(taken twice, 12 units each for 24 units total)		

Students may complete some of the introductory and core area courses as part of their primary major or General Education course requirements. Required courses in a primary major cannot be used to fulfill Technology-Policy electives; however, elective courses in a primary major may be able to fulfill Technology-Policy elective requirements as well.

Fifth Year M.S. program in Engineering and Public Policy

Students, regardless of whether they complete an undergraduate additional major or not, may apply for the fifth year masters program that will lead to the additional degree of Master of Science in Engineering and Public Policy. This course of study will ordinarily require two additional semesters of study beyond that required for the undergraduate degrees in the primary major and EPP double major. Some coursework towards the MS may be able to be completed during the student's senior year, however no courses taken may count for both a BS in CIT and the MS in EPP. The primary concern for scheduling and completing this integrated program is completing the core courses in the EPP graduate program, as some of these courses are taught every other academic year only. Students interested in the program must have a minimum 3.0 QPA and should contact their advisor for details on the application process and course requirements.

Minor in Technology and Policy

The department also offers a minor in Technology and Policy to non-CIT majors. This minor allows students outside of engineering to sample the EPP requirements and develop exposure and awareness to issues at the interface of science, technology, and society.

Pre-requisites: Students should have prerequisite knowledge in economics (73-100 Principles of Economics or higher level economics course) and statistics (36-202 Statistical Methods or higher level statistics course) in order to pursue the Technology and Policy Minor.

Course Requirements		Units
19-101	Introduction to Engineering and Public Policy	12
19-301	Decision Making Methods for EPP (or other approved Decision Science course)	9

or 19-351	Applied Methods for Technology-Policy Analysis	
19-451	EPP Projects	12
or 19-452	EPP Projects	
xx-xxx	Two EPP Technology-Policy Electives	18

EPP Technical Electives include courses in CIT, MCS, or SCS that address problems at the society-technology interface and the means of analyzing these issues. A list of qualifying Technology-Policy electives is assembled each semester and is available from the EPP Department. Example Technology-Policy electives include:

19-211	Ethics and Policy Issues in Computing	9
19-365	Water Technology Innovation and Policy	9
19-402	Telecommunications Technology, Policy & Management	12
19-411	Global Competitiveness: Firms, Nations and Technological Change	9
19-424	Energy and the Environment	9

Students must earn a cumulative QPA of 2.0 in all courses taken for the minor. Required courses taken for a student's primary major may not be counted toward the Technology and Policy Minor. Elective courses for a student's primary major or courses fulfilling general education requirements may be counted, however.

Details of this program are provided in the discussion of CIT minors; see Technology and Policy Minor Description (p. 126).

Bachelor of Science in Engineering and Public Policy and Master of Science in Public Policy and Management

Highly motivated and talented students can earn the EPP double major bachelor's degree, and a master's degree in the H. John Heinz College of Public Policy and Management in a five-year course of study. Students interested in the combined degree program should enroll in a standard double major program in an engineering specialty and EPP. During the third year of study, the student applies to the Heinz College for admission to the master's program; an academic record of B average or better is normally a prerequisite for admittance.

The five-year course of study is possible because of specific course load overlaps between the EPP and Heinz College programs: (1) some social analysis requirements in EPP, usually four semester courses, can be satisfied with Heinz College common core courses in economics and social science; (2) at least one project course is common and applicable to both curriculums; (3) at least one additional EPP technical elective, engineering option, or project course will be accepted for Heinz College credit following the usual request to the master's committee.

Students desiring this option should seek faculty advice and counsel in their freshman or sophomore year so that a curriculum satisfying all the degree requirements can be ensured. Contact the Associate Department Head for Undergraduate Affairs in EPP for more information. For general information on Heinz 3-1-1 programs please contact the Heinz College or refer to their website.

EPP Undergraduate/Graduate Level Courses

Many courses taught by the department (19-XXX courses) are offered to undergraduate and graduate students. These "dual level" courses are offered in two formats:

- Some courses are taught under both an undergraduate and graduate number. An example is 19-402 Telecommunications Technology, Policy & Management. In these types of courses, students who sign up under the 700-level (graduate) course number may be expected to perform the same coursework at a higher level, and/or complete additional coursework, compared to 19-4XX students. Undergraduates who choose to take the course under the graduate number will be also be expected to work at the higher expectation/coursework level.
- Other courses are taught under a 600 level number. An example is 19-688 Innovation for Energy and the Environment. These courses may be taken by undergraduates as a senior level course, or by graduate students as a graduate level course. As with dual number courses, graduate level students or undergraduates taking the course for graduate credit may be required to perform coursework at a higher level and/or complete additional coursework. Undergraduates who are taking a 600 level course for graduate credit should identify this fact to both the course instructor and to their EPP department advisor.

Students who have questions about the requirements of a specific EPP 400/700, or 600 level course, should contact the course instructor.

Other departments may have different policies regarding courses offered under both an undergraduate and graduate number, and courses offered under numbers other than the 100, 200, 300, 400, or 700 levels. Students who wish to take these courses should check with those departments for their specific policies.

Faculty

PETER ADAMS, Professor of Civil and Environmental Engineering / Engineering and Public Policy - Ph.D., Caltech; Carnegie Mellon, 2001-.

JAY APT, Professor of Technology of The Tepper School of Business / Engineering and Public Policy - Ph.D., MIT; Carnegie Mellon, 2000-.

DANIEL ARMANIOS, Assistant Professor - PhD, Stanford University; Carnegie Mellon, 2015-.

V. S. ARUNACHALAM, Collaborating Professor of Engineering and Public Policy / Materials Science and Engineering / Robotics Institute - Ph.D., Wales D.Eng. (h.c.), Roorkee;; Carnegie Mellon, 1992-.

INES LIMA AZEVEDO, Associate Professor of Engineering and Public Policy - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2009-.

MICHEL BEZY, Distinguished Service Professor of Engineering and Public Policy; Associate Director, Carnegie Mellon University in Rwanda - Ph.D., Université Catholique de Louvain; Carnegie Mellon, 2011-.

ALFRED BLUMSTEIN, J. Erik Jonsson University Professor of Urban Systems and Operations Research; Professor of The H. John Heinz III College / Engineering and Public Policy - Ph.D., Cornell University; Carnegie Mellon, 1969-.

SERGUEY BRAGUINSKY, Associate Professor of Social and Decision Sciences / Engineering and Public Policy - Ph.D., Keio University; Carnegie Mellon, 2008-.

TRAVIS BREAU, Assistant Professor of Computer Science / Engineering and Public Policy - Ph.D., North Carolina State University; Carnegie Mellon, 2010-.

KATHLEEN M. CARLEY, Professor of the Institute of Software Research / Social and Decision Sciences / The H. John Heinz III College / Engineering and Public Policy - Ph.D., Harvard University; Carnegie Mellon, 1984-.

ELIZABETH CASMAN, Associate Research Professor of Engineering and Public Policy - Ph.D., The Johns Hopkins University; Carnegie Mellon, 1997-.

JARED L. COHON, University Professor of Civil and Environmental Engineering / Engineering and Public Policy; President Emeritus - Ph.D., MIT; Carnegie Mellon, 1997-.

LORRIE FAITH CRANOR, Professor of Computer Science / Engineering and Public Policy - D.Sc., Washington University in St. Louis; Carnegie Mellon, 2003-.

NEIL M. DONAHUE, Professor of Chemical Engineering / Chemistry / Engineering and Public Policy - Ph.D., MIT; Carnegie Mellon, 2000-.

PEDRO FERREIRA, Assistant Professor of The H. John Heinz III College / Engineering and Public Policy - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2007-.

PAUL S. FISCHBECK, Professor of Social and Decision Sciences / Engineering and Public Policy - Ph.D., Stanford University; Carnegie Mellon, 1990-.

BARUCH FISCHHOFF, Howard Heinz University Professor; Professor of Social and Decision Sciences / Engineering and Public Policy - Ph.D., Hebrew University; Carnegie Mellon, 1987-.

EDEN S. FISHER, Professor of the Practice of Engineering and Public Policy; Executive Director, MS Program in Engineering and Technology Innovation Management - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2006-.

ERICA R. H. FUCHS, Associate Professor of Engineering and Public Policy - Ph.D., MIT; Carnegie Mellon, 2007-.

MICHAEL GRIFFIN, Associate Research Professor of Engineering and Public Policy - Ph.D., University of Rhode Island; Carnegie Mellon, 2000-.

ALEX HILLS, Distinguished Service Professor of Electrical and Computer Engineering / Engineering and Public Policy - Ph.D., Carnegie Mellon University; Carnegie Mellon, 1992-.

DAVID A. HOUNSHELL, David M. Roderick Professor of Technology and Social Change; Professor of Social and Decision Sciences / Engineering and Public Policy - Ph.D., University of Delaware; Carnegie Mellon, 1991-.

GABRIELLA HUG, Assistant Professor of Electrical and Computer Engineering / Engineering and Public Policy – Ph.D, Swiss Federal Institute of Technology Zurich; Carnegie Mellon, 2009–.

PAULINA JARAMILLO, Assistant Professor of Engineering and Public Policy – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2008–.

RAMAYYA KRISHNAN, Dean of The H. John Heinz III College; William W. and Ruth F. Cooper Professor of Management Science and Information Systems; Professor of Engineering and Public Policy – Ph.D., University of Texas at Austin; Carnegie Mellon, 1987–.

DEANNA MATTHEWS, Assistant Teaching Professor of Engineering and Public Policy; Associate Department Head for Undergraduate Affairs – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2001–.

H. SCOTT MATTHEWS, Professor of Civil and Environmental Engineering / Engineering and Public Policy – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1999–.

MEAGAN MAUTER, Assistant Professor of Chemical Engineering / Engineering and Public Policy – Ph.D., Yale University; Carnegie Mellon, 2012–.

JEREMY J. MICHALEK, Professor of Mechanical Engineering / Engineering and Public Policy – Ph.D., University of Michigan; Carnegie Mellon, 2005–.

M. GRANGER MORGAN, University and Lord Chair Professor of Engineering; Professor of Engineering and Public Policy / Electrical and Computer Engineering / The H. John Heinz III College – Ph.D., University of California, San Diego; Carnegie Mellon, 1974–.

SPYROS N. PANDIS, Research Professor of Chemical Engineering / Engineering and Public Policy – Ph.D., California Institute of Technology; Carnegie Mellon, 1993–.

JON M. PEHA, Professor of Engineering and Public Policy / Electrical and Computer Engineering – Ph.D., Stanford University; Carnegie Mellon, 1991–.

ALLEN ROBINSON, Raymond J. Lane Distinguished Professor; Head of Mechanical Engineering; Professor of Mechanical Engineering / Engineering and Public Policy – Ph.D., University of California, Berkeley; Carnegie Mellon, 1998–.

EDWARD S. RUBIN, Alumni Chair Professor of Environmental Engineering and Science; Professor of Engineering and Public Policy / Mechanical Engineering – Ph.D., Stanford University; Carnegie Mellon, 1969–.

DOUGLAS SICKER, Head of Engineering and Public Policy; Professor of Engineering and Public Policy / Computer Science – Ph.D., University of Pittsburgh; Carnegie Mellon, 2014–.

JEFFREY J. SIROLA, Distinguished Service Professor of Sustainable Energy Systems, Chemical Engineering / Engineering and Public Policy – Ph.D., University of Wisconsin-Madison; Carnegie Mellon, 2011–.

MARVIN A. SIRBU, Professor of Engineering and Public Policy / Industrial Administration / Electrical and Computer Engineering – Sc.D., MIT; Carnegie Mellon, 1985–.

MITCHELL J. SMALL, The H. John Heinz III Professor of Environmental Engineering; Professor of Civil and Environmental Engineering / Engineering and Public Policy; Associate Department Head for Graduate Affairs – Ph.D., University of Michigan; Carnegie Mellon, 1982–.

DEBORAH STINE, Professor of the Practice of Engineering and Public Policy – Ph.D., American University; Carnegie Mellon, 2012–.

ESWARAN SUBRAHMANYAN, Research Professor of Institute for Complex Systems / Engineering and Public Policy – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1984–.

SUBRA SURESH, President of Carnegie Mellon University; Professor of Materials Science and Engineering / Engineering and Public Policy / Biomedical Engineering / Public Policy and Management – Ph.D., MIT; Carnegie Mellon, 2013–.

JOEL A. TARR, Richard S. Caliguiri Professor of Urban and Environmental History and Policy; Professor of History / Engineering and Public Policy / The H. John Heinz III College – Ph.D., Northwestern University; Carnegie Mellon, 1967–.

JAY WHITACRE, Associate Professor of Materials Science and Engineering / Engineering and Public Policy – Ph.D., University of Michigan; Carnegie Mellon, 2007–.

HAIBO ZHAI, Assistant Research Professor of Engineering and Public Policy – Ph.D., North Carolina State University; Carnegie Mellon, 2008–.

Emeriti Faculty

TUNG AU, University Professor of Civil and Environmental Engineering / Engineering and Public Policy, Emeritus – Ph.D., University of Illinois; Carnegie Mellon, 1957–.

JAMES GOODBY, Distinguished Service Professor, Emeritus – A.B., Harvard ; Carnegie Mellon, 1989–.

CHRIS T. HENDRICKSON, Emeritus University Professor – PhD, MIT; Carnegie Mellon, 1978–.

FRANCIS MCMICHAEL, Walter J. Blenko, Senior Professor of Environmental Engineering; Professor of Civil and Environmental Engineering / Engineering and Public Policy, Emeritus – Ph.D., California Institute of Technology; Carnegie Mellon, 1967–.

BENOÎT MOREL, Associate Teaching Professor of Engineering and Public Policy / Physics, Emeritus – Ph.D., University of Geneva; Carnegie Mellon, 1987–.

INDIRA NAIR, Former Vice Provost for Education; Professor of Engineering and Public Policy, Emeritus – Ph.D., Northwestern University ; Carnegie Mellon, 1978–.

HENRY R. PIEHLER, Professor of Materials Science and Engineering / Engineering and Public Policy / Biomedical Engineering, Emeritus – Sc.D. , MIT; Carnegie Mellon, 1967–.

SAROSH TALUKDAR, Professor of Electrical and Computer Engineering / Engineering and Public Policy, Emeritus – Ph.D., Purdue University; Carnegie Mellon, 1974–.

ROBERT M. WHITE, University Professor of Electrical and Computer Engineering / Engineering and Public Policy, Emeritus – Ph.D., Stanford University; Carnegie Mellon, 1993–.

Department of Mechanical Engineering

Allen Robinson, Raymond J. Lane Distinguished Professor and Department Head
Scaife Hall 401
<http://www.cmu.edu/me>

General Overview

Mechanical engineers design, analyze, and manufacture new products and technologies. They address society's needs by combining mechanical engineering fundamentals with innovative ideas. We structure our curriculum by emphasizing engineering theory, hands-on experience and technical skills. By doing so, our students learn how to solve practical problems and analyze situations by converting concepts into reliable and cost-effective devices and processes.

Mechanical engineers work in a variety of sectors: small start-up companies, multi-national corporations, government agencies, national laboratories, consulting firms, and universities. Specializing in research, design, manufacturing, or management, they design and implement devices that affect our daily lives. For example:

- Jet Engines
- Automobiles
- Aircraft and Spacecraft
- Acceleration and Pressure Sensors
- Heating, Ventilating, and Air Conditioning Systems
- Power Generations Systems
- Biomedical and Biomechanical Devices (such as artificial hip implants)
- Mechanical and Electronic Systems (such as robots)

Through our curriculum, students receive a solid scientific foundation from the start. During their first year, students take courses in mathematics, physics, computer programming, and chemistry. In addition, students also take two introductory engineering courses which expose them to the different engineering departments. Our mechanical engineering introductory course is project-oriented; students learn about the various disciplines of mechanical engineering through lectures, laboratories, and hands-on projects.

In their sophomore and junior years, students take core engineering courses to develop strong engineering fundamentals. These course topics include:

- Solid and Fluid Mechanics
- Thermodynamics
- Heat Transfer
- Dynamics
- Systems and Controls
- Design Methods and Skills
- Experimentation and Numerical Methods

During their senior year, students complete a capstone course in engineering design. In this course, students work on teams to develop prototype hardware for new products. These projects expose students to the design process, from concept to product, and emphasize effective communication and presentations skills. Past design projects include:

- low-squeal disk brakes
- high efficiency engines
- neck gear to minimize spinal injury in sports
- stabilizer support arm for movie cameras

Additionally, students can utilize our flexible elective structure to pursue individual interests. We recognize the broad role mechanical engineers play in society—as leaders in business, government, and law. Therefore, we offer elective options that enable students to:

- begin taking elective courses during their junior year
- specialize in a particular area of mechanical engineering
- emphasize a technical area within another engineering or science department
- pursue interests in another Carnegie Mellon department (such as foreign language, design, music, or business) to earn a double major or minor

We offer advanced courses that students can choose as electives, depending on their interests. Electives include:

- energy conversion
- controls
- vibrations
- dynamics
- manufacturing
- robotics
- internal combustion engines
- mechatronics
- fluid and solid mechanics
- engineering design

As mentioned, students can also take technical and non-technical electives from other Carnegie Mellon departments. Students can use these courses to pursue a double major or minor, or develop an individual concentration with a faculty advisor.

Students can also tailor their undergraduate experiences through study abroad, research, or the Integrated Master's/Bachelor's Program. In today's global society, a study abroad experience is crucial and should serve as an integral part of an undergraduate engineering education, including a possible college Global Engineering minor. An academic experience abroad is encouraged and assistance provided for course choices, but students may also participate in research, complete an internship, or partake in an international service-learning engineering project abroad. Exceptional students are eligible to participate in departmental or college senior honors research under faculty supervision, which students find enriching. In the Integrated Master's/Bachelor's program, students take graduate courses during their senior year, accumulating credit toward their Master's degrees. Students can then complete all the requirements for the M.S. degree (course-work option) in the fall following their B.S. degree.

Students use the latest computer-based design and analysis methods for their courses and project work, including industry-standard design tools aided by computers. We provide an undergraduate computer lab where students can complete design work, structural analyses, thermal/fluid finite element analyses, and dynamic system simulations. Using computer tools, students can visualize a product's performance before they fabricate it.

We also provide students with a variety of resources including MIG welding, rapid prototyping, and a fully equipped student shop (includes lathes, drill presses, milling machines, band saws, and other hand and power tools). Our Thermal Fluids and Mechanical Systems laboratories contain state-of-the-art experimentation hardware and software.

Our faculty performs research sponsored by industry and government agencies. Faculty often use their research results as specific examples, case studies, and projects in undergraduate courses, allowing students to see firsthand the recent advances in mechanical engineering.

We also sponsor frequent seminars and invite nationally and internationally reputed speakers to give lectures. We encourage all students to attend these seminars to learn about broad perspectives on mechanical engineering.

You can find additional information about the Mechanical Engineering program on our website, <http://www.cmu.edu/me/>. Additionally, we describe our resources and policies in more detail in our Undergraduate Student Handbook, available online.

Educational Objectives

According to ABET (<http://www.abet.org/>) which evaluates applied science, computing, engineering and technology programs for accreditation, "program educational objectives are broad statements that describe what graduates are expected to attain within a few years of graduation." In view of this definition, the Mechanical Engineering program at Carnegie Mellon has the two following program educational objectives:

- Graduates distinguish themselves as innovative problem solvers and leaders in multidisciplinary settings, making use of a high quality and rigorous technical education that is enriched by a flexible curriculum and interdisciplinary research opportunities.
- Graduates excel in diverse career paths in either the engineering profession or an alternative field, or succeed in graduate studies.

The undergraduate curriculum in the Department of Mechanical Engineering offers students significant opportunities to pursue directions of personal interest, including minors, double majors, participation in research projects, and study abroad. Design and teamwork experiences occur at regular

intervals in the curriculum, and graduates have significant hands-on experience through laboratories and projects. The faculty of the Department has endorsed the following set of skills, or outcomes that graduates of the program are expected to have:

- A. an ability to apply knowledge of mathematics, science, and engineering
- B. an ability to design and conduct experiments, as well as to analyze and interpret data
- C. an ability to design a system, component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability
- D. an ability to function on multidisciplinary teams
- E. an ability to identify, formulate, and solve engineering problem
- F. an understanding of professional and ethical responsibility
- G. an ability to communicate effectively
- H. the broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context
- I. a recognition of the need for, and an ability to engage in lifelong learning
- J. a knowledge of contemporary issues
- K. an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Curriculum

The following template outlines the four-year B.S. program through the standard and recommended course sequence. To ensure that prerequisites are completed and to prevent scheduling conflicts, students should discuss any changes to this sequence with the department academic advisor.

Freshman Year

Fall	Units
21-120 Differential and Integral Calculus	10
24-101 Fundamentals of Mechanical Engineering	12
33-106 Physics I for Engineering Students	12
99-101 Computing @ Carnegie Mellon	3
76-101 Interpretation and Argument	9
	46

Spring	Units
21-122 Integration and Approximation	10
xx-xxx Second Introductory Engineering Course	12
xx-xxx Restricted Technical Elective 10-13	10
xx-xxx General Education Course	9
	41

Sophomore Year

Fall	Units
21-259 Calculus in Three Dimensions	9
24-221 Thermodynamics I	10
24-261 Statics	10
xx-xxx Restricted Technical Elective 10-13	13
xx-xxx General Education Course	9
24-200 Machine Shop Practice *Preferred sophomore year, required by senior year	1
39-210 Experiential Learning I	0
	52

Spring	Units
21-260 Differential Equations	9
24-231 Fluid Mechanics	10
24-262 Stress Analysis	12
xx-xxx Restricted Technical Elective 10-13	12

xx-xxx General Education Course	9
24-202 Introduction to Computer Aided Design *Required sophomore year	1
39-220 Experiential Learning II	0
	53

Junior Year

Fall	Units
24-302 Mechanical Engineering Seminar I- taken either fall or spring	2
24-322 Heat Transfer	10
24-370 Engineering Design I: Methods and Skills	12
24-351 Dynamics	10
36-220 Engineering Statistics and Quality Control	9
xx-xxx General Education Course	9
39-310 Experiential Learning III	0
	52

Spring	Units
24-321 Thermal-Fluids Experimentation	12
24-311 Numerical Methods	12
24-352 Dynamic Systems and Controls	12
xx-xxx General Education Course	9
	45

Senior Year

Fall	Units
24-441 Engineering Design II: Conceptualization and Realization- required either fall or spring; alternate with xx-xxx 9 unit elective	12
24-452 Mechanical Systems Experimentation	9
xx-xxx Elective	9
xx-xxx Elective	9
xx-xxx General Education Course	9
	48

Spring	Units
24-441 Engineering Design II: Conceptualization and Realization OR xx-xxx Elective	12
24-xxx Mechanical Engineering Technical Elective	9-12
xx-xxx Elective	9
xx-xxx Elective	9
xx-xxx General Education Course	9
	39

Notes on the Curriculum

- Students need a minimum of 382 units to complete the B.S. degree.
- During the first year, students complete 24-101 Fundamentals of Mechanical Engineering and another introductory engineering course. If students did not take 24-101 during their first year, they should take 24-101 during their fall semester of their sophomore year in place of the General Education Course. They can then replace that General Education Course in their junior or senior years.
- Students must pass the following three courses before they begin the core Mechanical Engineering courses in the fall of their sophomore year: 21-120 Differential and Integral Calculus (10 units) 21-122 Integration and Approximation (10 units) 33-106 Physics I for Engineering Students (12 units)*
*33-106 / 33-107 is the recommended sequence for engineering students, although 33-111 / 33-112 or 33-131 /33-132 would also meet the CIT Physics requirement.

Mechanical engineering undergraduates must satisfy a Science Laboratory requirement to graduate. Normally the Science Laboratory requirement is satisfied by passing 09-101 Introduction to Experimental Chemistry (3 units). Students can also satisfy the Science Laboratory requirement by passing one of the following courses:

03-124 Modern Biology Laboratory	9
33-100 Basic Experimental Physics	6
33-104 Experimental Physics	9

42-203	Biomedical Engineering Laboratory	9
--------	-----------------------------------	---

These courses may have prerequisites and tight enrollment limits that students should consider in their planning.

4. Students are required to complete 36-220 Engineering Statistics and Quality Control, which may be scheduled in any semester. The sequence of calculus courses (21-120 , 21-122 , 21-259) and 21-260 Differential Equations should be scheduled as indicated, due to Mechanical Engineering Core class prerequisites.

5. The communications requirement can be satisfied by completing at least one of the following options:

		Units
24-302	Mechanical Engineering Seminar I- either fall or spring	2
70-340	Business Communications	9
76-270	Writing for the Professions	9

6. Students must enroll in 24-452 Mechanical Systems Experimentation in the fall of their senior year.

7. 24-441 Engineering Design II: Conceptualization and Realization may be taken in either fall or spring of senior year.

Restricted Technical Electives

Students should have the following courses completed by the end of their sophomore year. These courses are listed as "Restricted Technical Electives" in the example course sequence. Students do have some flexibility in how they sequence these courses during their freshman and sophomore years:

33-107	Physics II for Engineering Students	12
09-101	Introduction to Experimental Chemistry	3
09-105	Introduction to Modern Chemistry I	10
15-110	Principles of Computing	10

Mechanical Engineering Technical Electives

We require students to take at least one elective labeled as "Mechanical Engineering Technical Elective" in the example course sequence. Students must take at least one non-core 24-xxx course (9-unit minimum) to fulfill the technical elective requirement. Options include:

Design and Manufacturing

24-341	Manufacturing Sciences	9
24-674	Design of Biomechatronic Systems for Humans	12
24-681	Computer-Aided Design	12
24-682	Computer-Aided Engineering	12
24-683	Design for Manufacture and the Environment	12
24-688	Introduction to CAD and CAE Tools	12

Mechanical Systems

24-355	Kinematics and Dynamics of Mechanisms	9
24-361	Intermediate Stress Analysis	10
24-451	Feedback Control Systems	12
24-655	Cellular Biomechanics	9
24-657	Molecular Biomechanics	9

Thermal-Fluid Systems

24-332	Potential Flow Aerodynamics	9
24-421	Internal Combustion Engines	12
24-424	Energy and the Environment	9
24-425	Combustion and Air Pollution Control	9
24-615	Microfluidics	12
24-616	Tribology-Friction, Lubrication and Wear	12
24-623	Molecular Simulation of Materials	12
24-642	Fuel Cell Systems	12

We regularly offer these courses and/or new options according to our teaching schedule. However we cannot guarantee to offer a particular course in a given semester.

Students can also take certain mechanical engineering graduate courses to fulfill the technical elective requirement. However, students must have the appropriate prerequisites and the instructor must approve taking the course. Students can find a list of graduate courses we offer on our website.

Students cannot use the research or project courses to fulfill the technical elective requirement. However, they can use these courses to fill the remaining five elective slots. Courses that do not fulfill the technical elective requirements are:

24-391/ 24-392 Mechanical Engineering Project
24-491/ 24-492 Department Research Honors
39-xxx CIT series courses

Electives

Students must complete five elective courses, as indicated in the example course sequence. Students can take either technical or non-technical courses to fill these five slots from either the mechanical engineering department, College of Engineering, or any other Carnegie Mellon department. However, students may only use one elective slot for a physical education course or for ROTC. We offer these electives so students can pursue individual interests or obtain a minor or double major.

Constructing a Program of Study

In order to properly plan their course sequence, students should select their six elective courses with the department academic advisor. If students are pursuing minors, double majors, or double degrees, they should choose electives that meet requirements of these programs. We provide more information on selecting courses and electives in the Undergraduate Student Handbook. We offer the following options to students for tailoring our program to fit their needs and interests.

Specialization Within Mechanical Engineering

Students can specialize in a specific area by taking additional mechanical engineering electives beyond the one required technical elective. Students can choose courses from the Mechanical Engineering Technical Electives list or take approved mechanical engineering graduate courses.

Research and Independent Study Projects

Students can work on a design or research project if supervised and coordinated by a faculty advisor. Interested students should contact faculty members to identify potential projects of mutual interest. Projects generally involve lab, analytical, field, design or computer work.

Students complete projects and research by taking either or both of the following courses for their electives. As previously mentioned, students cannot use these courses to fulfill the technical elective requirement.

24-391/392	Mechanical Engineering Project	Var.
24-491/492	Department Research Honors	Var.

*Students enrolled in 24-391/392 do not have an additional QPA (quality point average) requirement for this course.

Qualified students enrolled in 24-491/492 are recognized at commencement. To graduate with research honors, students must have a QPA of 3.2 or higher, complete 18 units of 24-491/492 with at least at least a "B" grade, and submit an approved thesis to their faculty research advisor.

Students who complete all requirements for CIT Honors Research will also graduate with research honors. These students must complete 18 units of (39-500) CIT Honors Research under the supervision of a mechanical engineering faculty member.

Developing a Concentration of Interdisciplinary Studies

Students can also take courses outside of mechanical engineering to fill elective slots. Usually students select courses around a common theme; although courses span several departments, students choose courses to form a specific concentration. Students can either construct an informal program of study based on their interests or they can pursue a minor or double major using these courses.

Pursuing a Minor or Double Major

The College of Engineering offers designated minors for students wishing to specialize in an engineering area. Students can find a list of minors on the CIT website (www.cit.cmu.edu). Students can generally complete a designated minor without increasing the number of units required for graduation, but they should plan early in order to complete a minor on time.

Students can also complete a double major within the College of Engineering. Students can earn double majors in Mechanical Engineering and Engineering and Public Policy, or Mechanical Engineering and Biomedical Engineering.

Additionally, students can pursue minors or double majors with other Carnegie Mellon departments. Interested students should contact the main

department of the minor/double major they seek to learn the requirements for that program.

Advising

The department academic advisors are assigned initially to all new students and will continue to assist with any curriculum questions and registration issues until they graduate.

The department academic advisors will:

- Verify progress toward degree requirements
- Discuss course alternatives for CIT requirements and electives
- Register research credit
- Assist with pre-requisite waivers
- Offer basic information regarding double major/minors, study abroad procedures, etc
- Explain summer transfer credit policies

Faculty mentors will:

- Explain technical content of coursework
- Suggest appropriate concentrations that match students' career objectives
- Discuss research opportunities
- Offer graduate school and employment advice
- Offer general advice and mentoring

Students should attend the fall sophomore lunch to meet professors, utilize introductions during sophomore core classes and check the website for additional faculty information. Faculty appointments as needed, may also be arranged through the academic advising office. The academic advisor will assign a faculty mentor to students that have not indicated a selection at the end of the sophomore year.

As a regular part of monitoring progress toward completion of the degree, students should compare their transcripts with the department's degree requirements. Academic Audit - the HUB website- www.cmu.edu/hub.

Integrated Master's/Bachelor's Degree (IMB)

An integrated program is available to Carnegie Mellon engineering undergraduate students who also wish to complete a master's degree in mechanical engineering (MSC option).

As reflective of the CIT Integrated Master's/Bachelor's Degree Program policy, effective Fall 2012, students may complete their master's degree with only one additional full-time semester after the bachelor's degree. Student's participating in IMB will be changed to graduate status during the 9th (and subsequent) semesters.

Students must complete at least 24 units of graduate coursework by the end of the Senior year. A QPA of 3.0 or better must be attained in those courses, and they cannot be used to satisfy the requirements of the bachelor's degree. Students must also have a cumulative undergraduate QPA of a 3.0 or higher. During the summer immediately after the Senior year, students could complete up to 12 units of Graduate Supervised Reading or Graduate Master of Science Project. During the following Fall semester, students then complete all remaining coursework (a maximum of 60 units per semester). A total of 96 units are required for completion of the MSC option.

Interested students are **required** to complete the Integrated Master's/Bachelor's Degree Program Form.

Quality Point Average Requirements

To be eligible to graduate, undergraduate students must complete all course requirements for their program with a cumulative Quality Point Average of at least 2.00 for all courses taken. For undergraduate students who enrolled at Carnegie Mellon as freshmen and whose freshman grades cause the cumulative QPA to fall below 2.0, this requirement is modified to be a cumulative QPA of at least 2.0 for all courses taken after the freshman year. Note, however, the cumulative QPA that appears on the student's final transcript will be calculated based on all grades in all courses taken, including freshman year. The Mechanical Engineering Department requires that students attain a quality point average of 2.00 or higher for all required Mechanical Engineering core courses.

Pursuant to university rules, students can repeat a course in which a grade below C was attained in order to achieve the QPA requirement. When a course is repeated, all grades will be recorded on the official academic transcript and will be calculated in the student's QPA. The highest grade so

obtained will be used to calculate the quality point average for all required Mechanical Engineering courses.

Full-Time Faculty

SHELLEY ANNA, Professor of Mechanical Engineering – Ph.D, Harvard University; Carnegie Mellon, 2003–.

JACK LEE BEUTH, Professor of Mechanical Engineering – Ph.D., Harvard University; Carnegie Mellon, 1992–.

JONATHAN CAGAN, George Tallman and Florence Barrett Ladd Professor of Mechanical Engineering – Ph.D, University of California, Berkeley; Carnegie Mellon, 1990–.

STEVEN COLLINS, Associate Professor of Mechanical Engineering – Ph.D, University of Michigan; Carnegie Mellon, 2010–.

MAARTEN P. DE BOER, Professor of Mechanical Engineering – Ph.D, University of Minnesota; Carnegie Mellon, 2007–.

NOÉ VARGAS HERNÁNDEZ, Associate Professor of Mechanical Engineering – Ph.D, Arizona State University; Carnegie Mellon, 2014–.

C. FRED HIGGS III, Professor of Mechanical Engineering – Ph.D., Rensselaer Polytechnic Institute; Carnegie Mellon, 2003–.

B. REEJA JAYAN, Assistant Professor of Mechanical Engineering – Ph.D, University of Texas-Austin; Carnegie Mellon, 2015–.

LEVENT BURAK KARA, Associate Professor of Mechanical Engineering – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2007–.

PHILIP R. LEDUC, William J. Brown Professor of Mechanical Engineering – Ph.D., The Johns Hopkins University; Carnegie Mellon, 2002–.

SHAWN LITSTER, Associate Professor of Mechanical Engineering – Ph.D, Stanford University; Carnegie Mellon, 2008–.

CARMEL MAJIDI, Assistant Professor of Mechanical Engineering – Ph.D., University of California, Berkeley; Carnegie Mellon, 2011–.

JONATHAN A. MALEN, Associate Professor of Mechanical Engineering – Ph.D, University of California, Berkeley; Carnegie Mellon, 2009–.

ALAN J.H. MCGAUGHEY, Professor of Mechanical Engineering – Ph.D., University of Michigan; Carnegie Mellon, 2005–.

JEREMY J. MICHALEK, Professor of Mechanical Engineering – Ph.D., University of Michigan; Carnegie Mellon, 2005–.

O. BURAK OZDOGANLAR, Ver Planck Professor of Mechanical Engineering – Ph.D, University of Michigan; Carnegie Mellon, 2004–.

ALBERT PRESTO, Assistant Research Professor of Mechanical Engineering – Ph.D, Carnegie Mellon University; Carnegie Mellon, 2012–.

YOED RABIN, Professor of Mechanical Engineering – D.Sc., Technion-Israel Institute of Technology; Carnegie Mellon, 2000–.

ALLEN L. ROBINSON, Raymond J. Lane Distinguished Professor & Department Head – Ph.D., University of California, Berkeley; Carnegie Mellon, 1998–.

EDWARD STEPHEN RUBIN, Professor of Mechanical Engineering – Ph.D., Stanford University; Carnegie Mellon, 1969–.

SHENG SHEN, Assistant Professor of Mechanical Engineering – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2011–.

KENJI SHIMADA, Theodore Ahrens Professor of Engineering – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1996–.

SATBIR SINGH, Assistant Teaching Professor of Mechanical Engineering – Ph.D, University of Wisconsin-Madison; Carnegie Mellon, 2012–.

METIN SITTI, Professor of Mechanical Engineering – Ph.D., University of Tokyo; Carnegie Mellon, 2002–.

KOUSHIL SREENATH, Assistant Professor of Mechanical Engineering – Ph.D., University of Michigan at Ann Arbor; Carnegie Mellon, 2013–.

PAUL SETH STEIF, Professor of Mechanical Engineering – Ph.D., Harvard University; Carnegie Mellon, 1983–.

RYAN SULLIVAN, Assistant Professor of Mechanical Engineering – Ph.D., University of California at San Diego; Carnegie Mellon, 2012–.

VENKAT VISWANATHAN, Assistant Professor of Mechanical Engineering – Ph.D., Stanford University; Carnegie Mellon, 2013–.

SHI-CHUNE YAO, Professor of Mechanical Engineering – Ph.D., University of California, Berkeley; Carnegie Mellon, 1977–.

YONGJIE ZHANG, Associate Professor of Mechanical Engineering - Ph.D., University of Texas at Austin; Carnegie Mellon, 2007-.

Emeriti

ADNAN AKAY, Lord Emeritus Professor of Mechanical Engineering - PhD, North Carolina State University; Carnegie Mellon, 1992-.

NORMAN CHIGIER, Emeritus Professor of Mechanical Engineering - Sc.D., University of Cambridge; Carnegie Mellon, 1981-.

JERRY HOWARD GRIFFIN, William J. Brown Emeritus Professor of Mechanical Engineering - Ph.D., California Institute of Technology; Carnegie Mellon, 1981-.

WILFRED THOMAS ROULEAU, Emeritus Professor of Mechanical Engineering - Ph.D., Carnegie Institute of Technology; Carnegie Mellon, 1954-.

Department of Materials Science and Engineering

Gregory S. Rohrer, Head Office: Wean Hall 3327
<http://materials.cmu.edu>

Materials Science & Engineering (MSE) is an engineering discipline that applies the tools of basic and applied sciences and engineering to the manufacture and application of materials and devices. The four broad classes of Materials to which this paradigm is applied are metals, polymers, ceramics, and composites. Essentially every technology (historical, modern, and future) depends on materials development and innovation.

The overarching paradigm of MSE is to determine and to exploit the connection between processing, structure, and properties of materials to engineer materials that fit the performance criteria for specific applications, which are useful for the technological needs of our society. In addition to this product specific knowledge, MSE is concerned with the implications of materials production and their sustainable use on the environment and energy resources.

Graduates of the MSE department are pursuing careers in an expanding spectrum of companies, national laboratories, and universities. Their activities cover a wide range of materials related endeavors that include microelectronics, energy production and storage, biomedical applications, aerospace, information technology, nanotechnology, manufacturing and materials production. Many of our undergraduate alumni choose to attend graduate school; they are accepted into the top Materials graduate schools in the country.

The standard curriculum of the department provides fundamental training for all materials science and engineering areas (http://materials.cmu.edu/ugrad/std_fresh.html). The core courses provide understanding and training on tools for working with the (atomic) structure of materials that governs their properties, the thermodynamic relationships that govern the stability of materials, and the rates at which changes take place in materials. Students complete their learning with a capstone design experience in the final year, which integrates their materials knowledge and training with engineering team skill development. To supplement the core course program, students may also participate in the current research programs of the faculty and conduct undergraduate research projects as part of their program of study.

While the core program is focused on the understanding of the internal or surface structure of materials in order to predict and engineer their properties, there is also an elective program that allows students to focus within a chosen material class, whether it is ceramics, semiconductors, metals, composites, magnetic or optical materials, bio-materials or polymers. The option of concentration in the one or more of the areas of application such as electronic materials*, engineering design*, biomedical engineering*, environmental engineering*, manufacturing engineering*, mechanical behavior of materials*, biomedical and health engineering**, and engineering and public policy**, is also available. (*= Designated Minor, **= Double Major). Our curriculum is designed to provide a strong foundation in fundamental knowledge and skills that provide an excellent base for our graduates planning to continue on to graduate studies. For our graduates who seek employment in industry, the program provides the foundation on which a graduate can build his/her domain specific knowledge. For students that develop or seek opportunities in other disciplines after graduation, the MSE curriculum provides a modern liberal education combined with the engineering rigors, i.e. one that inculcates a thoughtful, problem-solving approach to professional life. It is thus the goal of our education to provide a global and modern education in Materials Science and Engineering to support our graduates during their careers in materials industries or as a foundation for further studies in any of the leading global institutions of graduate education.

Accreditation

The MSE Undergraduate Program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Educational Objectives

The faculty of the Department of Materials Science and Engineering, in consultation with students, alumni and other interested parties, has decided that the overarching objective of the MSE curriculum is to provide an education that enables our graduates to be productive and fulfilled professionals throughout their careers.

Specifically, our program will produce graduates who:

1. are successful in a top graduate school and/or in materials science & engineering positions;
2. excel in professionalism and leadership in modern interdisciplinary materials engineering practice, while accounting for the impact of their profession on an evolving society;
3. creatively advance our collective understanding of the principles of materials science and engineering and/or innovate the design of technological systems;
4. contribute effectively as an individual, team member, and/or a leader to achieve personal, group and institutional goals.

Based on these objectives, our program is focused to allow our students to be successful regardless of their future career choice.

Student Outcomes

The Materials Science and Engineering Program has the following student outcomes to prepare graduates to attain the program educational objectives:

MSE Outcome A:

An ability to apply a knowledge of mathematics, science and engineering

MSE Outcome B:

An ability to design and conduct experiments, as well as to analyze and interpret data

MSE Outcome C:

An ability to design a system component, or process to meet desired needs within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability, and sustainability

MSE Outcome D:

An ability to function on multidisciplinary teams

MSE Outcome E:

An ability to identify, formulate, and solve engineering problems

MSE Outcome F:

An understanding of professional and ethical responsibility

MSE Outcome G:

An ability to communicate effectively

MSE Outcome H:

The broad education necessary to understand the impact of engineering solutions in a global, economic, environmental, and societal context

MSE Outcome I:

A recognition of the need for, and ability to engage in life-long learning

MSE Outcome J:

A knowledge of contemporary issues

MSE Outcome K:

An ability to use the techniques, skills, and modern engineering tools necessary for engineering practice

Standard Program

Freshman Year

Fall		Units
21-120	Differential and Integral Calculus	10
27-100	Engineering the Materials of the Future *	12
33-106	Physics I for Engineering Students #	12
99-101	Computing @ Carnegie Mellon	3
xx-xxx	General Education Course	9
		46

Spring		Units
21-122	Integration and Approximation	10
33-107	Physics II for Engineering Students **	12
xx-xxx	Introductory Engineering Elective	12
09-101	Introduction to Experimental Chemistry	3
76-101	Interpretation and Argument	9
		46

Sophomore Year

Fall		Units
27-201	Structure of Materials	9
27-210	Materials Engineering Essentials	6
27-215	Thermodynamics of Materials	12
21-259	Calculus in Three Dimensions	9
09-105	Introduction to Modern Chemistry I **	10
15-110	Principles of Computing	10
or 15-112	Fundamentals of Programming and Computer Science	
39-210	Experiential Learning I	0
		56

Spring		Units
27-202	Defects in Materials	9
27-205	Introduction to Materials Characterization	3
27-216	Transport in Materials	9
27-217	Phase Relations and Diagrams	12
21-260	Differential Equations	9
39-220	Experiential Learning II	0
xx-xxx	General Education Course	9
		51

Junior Year

Fall		Units
27-301	Microstructure and Properties I	9
27-xxx	MSE Restricted Elective [1]	9
xx-xxx	Free Elective [1]	9
33-225	Quantum Physics and Structure of Matter or	9
or 09-217	Organic Chemistry I	
or 03-121	Modern Biology	
xx-xxx	General Education Course	9
39-310	Experiential Learning III	0
		45

Spring		Units
27-367	Selection and Performance of Materials	6
xx-xxx	General Education Course	9
27-xxx	MSE Restricted Elective [2]	9
27-xxx	MSE Restricted Elective [3]	9
xx-xxx	Free Elective [2]	9
36-220	Engineering Statistics and Quality Control	9
		51

Senior Year

Fall		Units
27-401	MSE Capstone Course I	12
27-xxx	MSE Restricted Elective [4]	9
xx-xxx	Free Elective [3]	9
xx-xxx	H&SS Elective [1]	9
xx-xxx	General Education Course	9
		48

Spring		Units
27-xxx	MSE Approved Technical Elective	9
xx-xxx	Free Elective [4]	9
xx-xxx	Free Elective [5]	9
xx-xxx	H&SS Elective [2]	9
		36

379 Minimum number of units required for degree:

* The Materials in Engineering course 27-100 may also be taken in the spring semester, and must be taken before the end of the sophomore year (the H&SS Elective in the Sophomore Spring may be moved to later in the program to accommodate the 27-100 course).

** These courses must be taken before the end of the sophomore year, but need not be taken in the same order or semester as listed above.

The recommended sequence is 33-106 / 33-107 for Engineering students. However, 33-111 / 33-112 or 33-131 / 33-132 will also meet the CIT Physics requirement.

Industrial Intern Program

An industrial internship option (IIO - cooperative educational program) within the department offers an MSE student an opportunity to obtain valuable experience and insight from alternating periods in industry and on campus (beginning the spring after the sophomore year). The combination of learning while participating in an industrial environment with academic course work creates strongly motivated students and a personalized learning situation. Graduation with a B.S. degree occurs four and one-third calendar years after entering the university. Exceptionally able students may be admitted to a program leading to both the B.S. and M.S. degrees in five years. Students in the IIO program should consult with their faculty advisors before electing to participate in any of the designated minor programs.

Following the standard or industrial internship programs the graduate of the Department of Materials Science and Engineering is well prepared for leadership in our highly technological society which continues to demand more and more from the materials used in engineered systems. Many of our graduates elect to continue their education to the Master's and Doctoral Level in order to satisfy their need for advanced education in the discipline.

Notes on the Curriculum

Quality Point Average

In addition to the College requirement of a minimum cumulative quality point average of 2.00 for all courses taken beyond the freshman year, the Department requires a quality point average of 2.00 or higher in courses taken in the MSE department. Students may repeat a course to achieve the QPA requirement. Only the higher grade will be used for this departmental calculation.

MSE Restricted Electives

The MSE Restricted Electives are listed below. Each student in the Standard or Industrial Internship program must take at least 45 units from this list. In double major programs at least 36 units are required. The total number of units may be reached through any combination of the courses below.

		Units
27-323	Powder Processing of Materials	9
27-324	Introduction to Polymer Science and Engineering	9
27-402	MSE Capstone Course II	12
27-410	Computational Techniques in Engineering	12
27-411	Engineering Biomaterials	9
27-421	Processing Design	6
27-432	Electronic and Thermal Properties of Metals, Semiconductors and Related Devices	9

27-433	Dielectric, Magnetic, Superconducting Properties of Materials & Related Devices	9
27-445	Structure, Properties and Performance Relationships in Magnetic Materials	9
27-454	Supervised Reading	Var.
27-520	Tissue Engineering	12
27-533	Principles of Growth and Processing of Semiconductors	6
27-542	Processing and Properties of Thin Films	9
27-551	Properties of Ceramics and Glasses	9
27-555	Materials Project I	Var.
27-556	Materials Project II	Var.
27-561	Special Topics: Kinetics of Metallurgical Reactions and Processes	6
27-565	Nanostructured Materials	9
27-566	Special Topics in MSE: Using Matls Informatics to Assess Societal Impact of Matls	9
27-570	Molecular and Micro-scale Polymeric Biomaterials in Medicine	9
27-582	Phase Transformations in Solids	9
27-591	Mechanical Behavior of Materials	9
27-592	Solidification Processing	9
06-466	Experimental Polymer Science	9
06-609	Physical Chemistry of Macromolecules	9
06-619	Semiconductor Processing Technology	9
09-509	Physical Chemistry of Macromolecules	9
12-201	Geology	9
12-411	Project Management for Construction	9
12-631	Structural Design	12
18-310	Fundamentals of Semiconductor Devices	12
24-262	Stress Analysis	12
24-341	Manufacturing Sciences	9
24-361	Intermediate Stress Analysis	10
33-341	Thermal Physics I	10
33-448	Introduction to Solid State Physics	9
42-411	Engineering Biomaterials	9
42-699	Special Topics- Tissue Engineering	12

* Any materials based research project within CIT under an advisor of Courtesy Standing in MSE, at advisors discretion.

MSE graduate courses may also be counted as restrictive electives subject to approval by Undergraduate advisors.

Integrated B.S./M.S. Program

Undergraduates who excel academically have the unique opportunity to receive simultaneously or sequentially both B.S. and M.S. degrees from the department. The primary purpose of the Integrated Master and Bachelor (IMB) Degree Program is to provide students with superior breadth and depth in technical material, which will better prepare them for careers in industry. Students interested in pursuing the IMB Degrees are encouraged to begin taking some of the required graduate courses before their last year. The MSE department offers two M.S. degrees: one in Materials Science and Engineering (MSE), a coursework degree, and one in Materials Science (MS), a coursework + research degree. The IMB Degree Program to obtain an M.S. in MSE (MS) degree normally requires two (three to four) additional full academic semesters of coursework (coursework + research) beyond the B.S. Degree Requirements (normally eight academic semesters). Experience has shown that students complete the IMB program in eight to ten full academic semesters after enrolling at CMU.

Degree Requirements

IMB students can be enrolled in either the M.S. in MSE (coursework) or the M.S. in MS (coursework + research) degree programs, depending on their preference.

Students must meet the requirements of either the M.S. in MSE or the M.S. in MS degree programs, as well as any specially stated rules below.

Eligibility

The IMB Program is available to all undergraduates who maintain a cumulative QPA of 3.0 or better, including the freshman year and the years in which they are enrolled in the IMB. Exceptions can be made by the Department on the basis of other factors, including extenuating (e.g., medical) circumstances, improvement in grades, strong recommendation letters, etc.

Students become eligible to apply to the program during the spring semester of their junior year (5th semester), or the semester in which they accumulate 280 or more units, whichever is earlier.

Enrollment

Students interested in the IMB program are not required to follow the formal application process for acceptance into the MSE graduate program. There is no requirement to provide a formal application, application fee, GRE scores, recommendation letters, official transcripts, or a statement of purpose. Interested students are encouraged request acceptance into the program by contacting the Department Head of MSE by email prior to the middle of the semester in which they become eligible.

Requirements to Enroll as a Graduate Student

If a student takes more than 8 semesters to complete both the B.S. and M.S. in MSE (coursework), then he or she must be a graduate student for at least one full-time 15-week academic semester (Fall or Spring) before graduating, whether or not they have already completed their B.S. degree.

If a student takes more than 8 semesters to complete both the B.S. and M.S. in MS (coursework + research), then he or she must be a graduate student for at least two full-time 15-week academic semesters (Fall or Spring) before graduating, whether or not they have already completed their B.S. degree.

Tuition Assistance

When a student is a full-time graduate student through the IMB program, the department is able to provide some tuition assistance through optional Teaching Assistantships.

Additional Information

Once the student has been accepted, the student should meet with his or her IMB academic advisor(s) to determine a course schedule.

The student must indicate departmental program coordinator at which point they intend, if necessary, to register as a graduate student.

Once a student in the IMB program has completed all of the requirements for the B.S. degree, he or she should become a graduate student.

To determine the most appropriate time for an undergraduate student to become a graduate student, he or she should consult with Enrollment Services to understand how becoming a graduate student will affect financial aid.

Faculty

CHRIS BETTINGER, Associate Professor – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2010–.

MICHAEL BOCKSTALLER, Professor – Ph.D., Max-Planck Institute for Polymer Research; Carnegie Mellon, 2005–.

ROBERT F. DAVIS, Professor – Ph.D., University of California, Berkeley; Carnegie Mellon, 2004–.

MARC DE GRAEF, Professor – Ph.D., Catholic University Leuven (Belgium); Carnegie Mellon, 1993–.

ADAM FEINBERG, Associate Professor – Ph.D., University of Florida; Carnegie Mellon, 2010–.

RICHARD J. FRUEHAN, Professor – Ph.D., University of Pennsylvania; Carnegie Mellon, 1981–.

WARREN M. GARRISON, Professor – Ph.D., University of California at Berkeley; Carnegie Mellon, 1984–.

ROBERT HEARD, Teaching Professor – Ph.D., University of Toronto; Carnegie Mellon, 2003–.

ELIZABETH A. HOLM, Professor – Ph.D., University of Michigan; Carnegie Mellon, 2012–.

MOHAMMAD F. ISLAM, Associate Research Professor of Materials Science and Engineering – Ph.D., Lehigh University; Carnegie Mellon, 2005–.

DAVID E. LAUGHLIN, Professor – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1974–.

MICHAEL E. MCHENRY, Professor – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1989–.

YOOSUF PICARD, Associate Research Professor – Ph.D., University of Michigan; Carnegie Mellon, 2009–.

P. CHRIS PISTORIUS, Professor – Ph.D., University of Cambridge; Carnegie Mellon, 2008–.

LISA M. PORTER, Professor – Ph.D., North Carolina State; Carnegie Mellon, 1997-.

GREGORY S. ROHRER, Professor and Head – Ph.D., University of Pennsylvania; Carnegie Mellon, 1990-.

ANTHONY D. ROLLETT, Professor – Ph.D., Drexel University; Carnegie Mellon, 1995-.

PAUL A. SALVADOR, Professor – Ph.D., Northwestern University; Carnegie Mellon, 1999-.

MAREK SKOWRONSKI, Professor – Ph.D., Warsaw University; Carnegie Mellon, 1988-.

VINCENT SOKALSKI, Assistant Research Professor – Ph.D., Carnegie Mellon; Carnegie Mellon, 2013-.

SUBRA SURESH, Professor and President of the University – Sc.D., Massachusetts Institute of Technology; Carnegie Mellon, 2013-.

ELIAS TOWE, Professor – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2001-.

BRYAN A. WEBLER, Assistant Professor – Ph.D., Carnegie Mellon; Carnegie Mellon, 2013-.

JAY WHITACRE, Professor – Ph.D., University of Michigan; Carnegie Mellon, 2007-.

Emeriti Faculty

THADDEUS B. MASSALSKI, Professor Emeritus of Physics, Materials Science and Engineering – Ph.D., D.Sc., University of Birmingham, England D.Sc. (h), University of Warsaw, Poland;; Carnegie Mellon, 1959-.

HENRY R. PIEHLER, Professor of Materials Science and Engineering, and Public Policy – D.Sc., Massachusetts Institute of Technology; Carnegie Mellon, 1967-.

PAUL WYNBLATT, Professor Emeritus of Materials Science and Engineering – Ph.D., University of California at Berkeley; Carnegie Mellon, 1981-.

Affiliated Faculty

AMIT ACHARYA, Professor, Civil and Environmental Engineering – Ph.D., University of Illinois, Urbana-Champaign; Carnegie Mellon, 2000-.

JAMES BAIN, Professor, Electrical and Computer Engineering – Ph.D., Stanford University; Carnegie Mellon, 1993-.

JACK BEUTH, Professor, Mechanical Engineering – Ph.D., Harvard University; Carnegie Mellon, 1992-.

MAARTEN DE BOER, Associate Professor of Mechanical Engineering – Ph.D., University of Minnesota; Carnegie Mellon, 2007-.

PHIL CAMPBELL, Research Professor, Institute for Complex Engineered Systems – Ph.D., The Pennsylvania State University; Carnegie Mellon, 2000-.

ITZHAQ COHEN-KARNI, Assistant Professor of Biomedical Engineering – Ph.D., Harvard University; .

KRIS NOEL DAHL, Associate Professor of Chemical Engineering and BioMedical Engineering and Materials Science and Engineering – Ph.D., University of Pennsylvania; Carnegie Mellon, 2006-.

KAUSHIK DAYAL, Associate Professor of Civil and Environmental Engineering – Ph.D., California Institute of Technology; Carnegie Mellon, 2008-.

RANDALL FEENSTRA, Professor, Physics – Ph.D., California Institute of Technology Carnegie Mellon; Carnegie Mellon, 1995-.

STEPHEN GAROFF, Professor, Physics – Ph.D., Harvard University; Carnegie Mellon, 1988-.

ANDREW GELLMAN, Lord Professor, Chemical Engineering – Ph.D., University of California, Berkeley; Carnegie Mellon, 1992-.

JOHN KITCHIN, Associate Professor of Chemical Engineering – Ph.D., University of Delaware; Carnegie Mellon, 2006-.

DAVID KINDERLEHRER, Professor, Mathematical Sciences – Ph.D., University of California, Berkeley; Carnegie Mellon, 1990-.

JOATHAN MALEN, – Ph.D., University of California, Berkeley; Carnegie Mellon, 2009-.

KRZYSZTOF MATYJASZEWSKI, J.C. Warner Professor of Natural Sciences, Department of Chemistry and Materials Science and Engineering – Ph.D., Polytechnical University of Łódź, Poland; Carnegie Mellon, 1985-.

ALAN MCGAUGHEY, Associate Professor – Ph.D., University of Michigan; Carnegie Mellon, 2005-.

O. BURAK OZDOGANLAR, Professor of Mechanical Engineering – Ph.D., University of Michigan; Carnegie Mellon, 2004-.

ROBERT SEKERKA, University Professor, Physics, Mathematics and Materials Science – Ph.D., Harvard; Carnegie Mellon, 1969-.

ROBERT SUTER, Professor, Physics – Ph.D., Clark University; Carnegie Mellon, 1981-.

LYNN WALKER, Professor of Chemical Engineering – Ph.D., University of Delaware; Carnegie Mellon, 1997-.

NEWELL R. WASHBURN, Associate Professor of Chemistry, Biomedical Engineering and Materials Science and Engineering – Ph.D., University of California, Berkeley; Carnegie Mellon, 2004-.

LEE WEISS, Research Professor, ICES – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1983-.

MICHAEL WIDOM, Professor of Physics – Ph.D., University of Chicago; Carnegie Mellon, 1985-.

JIAN-GANG ZHU, Professor, Electrical and Computer Engineering – Ph.D., University of California at San Diego,; Carnegie Mellon, 1997-.

College of Fine Arts

Dan J. Martin, Dean (CFA 100)
 Eric Anderson, Associate Dean for Faculty Development and Governance (MM 110)
 Franco Sciannameo, Associate Dean for Interdisciplinary Initiatives (PCA G302)
<http://www.cfa.cmu.edu>

Overview

The College of Fine Arts at Carnegie Mellon University was founded in 1905 as the first comprehensive arts learning institution in the United States. For 110 years it has educated outstanding artists, architects, designers, theater artists and musicians who have made important contributions to culture in the United States and the world. The alumni of the College of Fine Arts have shaped the worlds of television, stage, film, and electronic media; are collected in numerous international museums; have composed for and are performing in and conducting major symphony orchestras, choruses and opera companies throughout the world; have built notable buildings, pioneered innovative sustainable design strategies and created interactive software systems; created significant innovations in graphic and industrial design; and are professors and deans in major arts institutions.

The College of Fine Arts concentrates on the education of professionals in the arts in the broader context of Carnegie Mellon University. Beyond their education in their chosen field, through required and elective course work, students are involved with other disciplines within the College of Fine Arts and within the other colleges of Carnegie Mellon University. Further, the College's location in the Oakland District of Pittsburgh with its broad cultural resources (The Carnegie Museum of Art, the Carnegie Museum of Natural History, The Carnegie Library, the University of Pittsburgh, The Hillman Library, the Frick Fine Arts Building, and Phipps Conservatory and Botanical Gardens) places the College of Fine Arts at the center of a premier cultural environment.

The College of Fine Arts has a 9:1 student faculty ratio which provides a rigorous learning environment. It is a highly spirited federation of schools (Architecture, Art, Design, Drama and Music) made up of students and faculty who have an intense need to create and excel. Interacting among the schools, the University and the wider community are research centers such as the Frank-Ratchye Studio for Creative Inquiry, the Center for Building Performance and Diagnostics, Remaking Cities Institute, Center for Iranian Music, and the Center for Arts in Society. The intellectual and artistic life of the College is interwoven with a dense calendar of theater performances, concerts, exhibitions, film and media presentations and lectures by visiting artists, practitioners and scholars.

The College of Fine Arts offers a wide range of professionally oriented majors and minors in each of its schools. In addition, the College offers the Bachelor of Humanities and Arts (BHA), jointly with the Dietrich College of Humanities and Social Sciences, the Bachelor of Science and Arts (BSA), jointly with the Mellon College of Science, the Bachelor of Computer Science and Arts (BCSA), jointly with the School of Computer Science, and the Master of Arts Management (MAM) and Master of Entertainment Industry Management (MEIM), jointly with the Heinz College of Public Policy and Management. These are presented only briefly below, but a complete listing of the graduation requirements for these programs may be found in the school descriptions later in this section and elsewhere in this volume.

Architecture Office: CFA 201

The School of Architecture offers a five-year NAAB accredited Bachelor of Architecture undergraduate degree for students who seek professional careers in architectural practice. Beyond standard preparation in architectural design, history and representation, its curriculum stresses the centrality of aesthetics, scientific knowledge and tectonic resolution in the education of future practicing professionals. A core of university course work in mathematics, physical sciences, social sciences, writing and history is prerequisite to sequences in design, building and environmental technology, and architectural history. The school offers M.S. degrees in Architecture; Architecture, Engineering & Construction Management; Building Performance and Diagnostics; Computational Design; and Sustainable Design. In addition, the School offers a Masters of Urban Design and a Masters of Tangible Interaction Design. The School of Architecture has a well-known architectural Ph.D. program that provides qualified students with the opportunity to continue their studies in the areas of specialization for which the School is recognized.

Art Office: CFA 300

The primary mission of the School of Art is to develop in the individual student the skills, knowledge, and commitment required to work as an artist in society. The four-year undergraduate program leads to a Bachelor of Fine Arts degree in Art. Concentrations within the art major are offered in four areas: 1) Painting, Drawing, Print Media and Photography; 2) Electronic and Time-Based Work; 3) Sculpture, Installation, and Site Work; and 4) Contextual Practice. A Master of Fine Arts degree in Art is also offered.

Design Office: MM 110

The School of Design combines its professional program with a sound education in the liberal arts, leading to careers in many fields of design. It offers the following degrees: Bachelor of Design with concentrations in Communications, Products, and Environments; M.Design in Design for Interactions; M.P.S. in Design for Interactions; M.A. in Design; M. of Integrated Innovation for Productions & Services (a joint degree with the Department of Mechanical Engineering and the Tepper School of Business); Ph.D. in Design; Doctor in Design.

Drama Office: PCA 220

The School of Drama offers a highly focused, world-class theatre education with thorough preparation for sustained careers and innovation in today's widely-varied entertainment industries. The undergraduate programs lead to BFA degrees in Drama, with focuses in Acting, Music Theatre, Directing, Dramaturgy, Design, Production Technology and Management; MFA programs are offered in Scene, Costume, Sound, and Lighting Design; Directing; Dramatic Writing; and Production Technology and Management.

Music Office: CFA 105

The School of Music has as its goal the preparation of musicians for careers in performance, composition, conducting, music education and music technology. The programs provide the opportunity to study with world-class artists utilizing the best aspects of conservatory training in the context of a major research university, combining the educational with the intensely professional. The Bachelor of Fine Arts is offered in Music Composition, Music Performance, and Music and Technology (a joint degree with the School of Computer Science and the Electrical and Computer Engineering Department) with minors in Collaborative Piano, Conducting, Music Education, Music Performance, and Music Technology available. The Master of Music is offered in Composition, Conducting, Performance, Music Education, and Music and Technology (a joint degree with Computer Science and the Electrical and Computer Engineering Department).

BXA Intercollege Degree Program

Bachelor of Humanities and Arts (BHA), Bachelor of Science and Arts (BSA), Bachelor of Computer Science and Arts (BCSA)

M. Stephanie Murray, Director & Academic Advisor

Location: Solar Decathlon House

www.cmu.edu/interdisciplinary

The **Bachelor of Humanities and Arts (BHA)** is a four-year intercollege degree-granting program designed for students interested in blending studies in the College of Fine Arts and the Dietrich College of Humanities and Social Sciences. The BHA degree combines a General Education requirement, a concentration of courses in the College of Fine Arts, a concentration of courses in the Dietrich College of Humanities and Social Sciences, and free electives. Please refer to Intercollege Programs in this catalog for details.

The **Bachelor of Science and Arts (BSA)** is a four-year intercollege degree-granting program designed for students interested in combining studies in the College of Fine Arts and the Mellon College of Science. It combines General Core requirements, a concentration of courses in the College of Fine Arts, a concentration of courses in the Mellon College of Science, and free electives. Please refer to Intercollege Programs in this catalog for details.

The **Bachelor of Computer Science and Arts (BCSA)** is a four-year intercollege degree-granting program designed for students interested in pursuing fields that comprehensively meld technology and the arts through courses offered in the College of Fine Arts and the School of Computer Science. It combines General Core requirements, a concentration of courses

in the College of Fine Arts, a concentration of courses in the School of Computer Science, and free electives. Please refer to Intercollege Programs in this catalog for details.

The Master of Arts Management Program

1116 Hamburg Hall

The search for both increased support and larger audiences has intensified over the last decade and now, more than ever, arts organizations seek skilled managers. To meet this need, the College of Fine Arts and the Heinz College's School of Public Policy and Management jointly developed the Master of Arts Management (MAM) Program to provide strong leadership in theater companies, dance companies, orchestras, opera companies, museums, galleries and arts policy organizations. In addition to the traditional two-year graduate degree structure, the Master of Arts Management Program provides undergraduate students the opportunity to complete the Bachelor of Fine Arts and Master of Arts Management degrees within a period of five years through the Heinz College's Accelerated Masters Program (AMP). MAM Program alumni can be found managing music and arts service organizations; marketing orchestras, theaters and dance companies; fund-raising for museums, opera companies, ballet companies and public television stations; and managing the finances of university arts departments and private businesses working in the arts and entertainment industry.

Student Defined Majors in the College of Fine Arts

To apply for a Student Defined Major in the College of Fine Arts, one:

1. Must be a student in good standing in the University and have completed at least one semester successfully.
2. Must have a cumulative QPA of 2.75 or better. A student whose QPA is under 2.75 may still submit a proposal. If the proposal is accepted by the Associate Deans, the student must apply for transitional status for the following semester and will have 1 semester to improve his or her QPA to the 2.75 minimum. If the student is not successful in raising the QPA to the 2.75 minimum, he or she may lose the affiliation with the current home department in the College of Fine Arts. If this happens the student must either be re-admitted back into the old program or seek admittance into another department or college.
3. Must have a statement of purpose that explains how and why the proposed course of study will be the best way for the student to receive an education and degree from Carnegie Mellon. This statement should detail the academic backbone of the program and project possible career paths after graduation.
4. Must outline the proposed courses to be taken and the semester in which they might be taken.
5. Must have a faculty mentor in the College of Fine Arts who has agreed to mentor the student through the completion of the degree. This mentor should be from the school where the student is taking the majority of his or her courses, and be approved by the Associate Deans.
6. Once the proposal has been submitted to the Associate Deans and they have reviewed it, the student will be required to go to the academic advisors in the school/schools where he or she will be taking courses and have them sign-off on the courses which are specific to their schools. Once the student has obtained all the necessary signatures, the completed proposal should be returned to CFA 100 for final review and approval by the Associate Deans.

All signed documentation should be submitted to the Office of the Dean of Fine Arts, CFA 100, by May 1 to be effective in the fall semester, and by October 1 to be effective in the spring semester. The proposal will be considered by the Associate Deans of the College, in consultation with the appropriate School Heads and Academic Advisors. Proposals that come in after these dates will be considered, but may not be able to be processed until the following semester. In that case, the student has the option to become a transitional student for a semester.

Under most circumstances the degree conferred at graduation will be a Bachelor of Arts. To continue in the program a student must show academic progress toward the degree. The academic actions of the College will apply to all student-defined majors. The Office of the Dean, in consultation with the faculty mentor and academic advisor, will determine certification of the degree.

Student Organizations

Professional and honorary societies for students in the College of Fine Arts are the American Institute of Architects, Architecture Peer Mentors, Architecture Student Advisory Council, the Design League, American

Institute of Graphic Arts (AIGA), Industrial Designers Society of America (IDSA), United States Institute for Theatre Technology (USITT), Phi Mu Alpha Sinfonia (music fraternity for men), Sigma Alpha Iota (music sorority for women), Pi Kappa Lambda (honorary for students in music) and the Music Educators' National Conference.

Academic Standards

Grading Practices

Grades given to record academic performance in the College of Fine Arts are detailed in the catalog section entitled "Undergraduate Academic Regulations." All courses taught by the schools in the College of Fine Arts follow the standard letter grade system of the university. Responsibility for the grade given the student rests entirely with the instructor and the school concerned. A permanent grade may not be raised by taking a second examination. Students who wish to repeat a course already passed must obtain approval from the Dean of the College. At the time of approval, the Dean will decide in the light of circumstances whether the new grade or the old grade will be the official grade used as the computing factor for honors. Both grades, however, will appear on the official transcript.

Academic Actions

The decision to impose academic action is first initiated at the conclusion of each semester by the School faculty most involved in the student's primary area of study and then presented at the end of the semester to the CFA Academic Advisory Council for confirmation.

A student who is not making satisfactory progress toward meeting professional standards or toward completing graduation requirements in a School may have any of the academic actions listed below imposed by that School even though the student has received "passing" grades.

The academic actions listed below do not follow a particular sequence; any of the actions may be appropriately imposed at any time upon recommendation of the School faculty concerned and confirmation by the CFA Academic Advisory Council.

Warning: For failure to maintain professional standards in a required course; or insufficient evidence of serious application to the professional standards of the School; or an overall quality point average below a satisfactory level. Warning action is intended to notify the student of unsatisfactory performance, and to suggest that the student take steps to determine and correct the cause of the difficulty.

Probation: For failure to pass any professional course as outlined by the faculty of the School; or failure to meet the professional standards of the School although no failing grades are given; or failure to earn the minimum quality point average required to continue in the School. A student on probation may be required to achieve a specified quality point average. The student must improve scholastic standing to an acceptable level in order to be removed from Probation. A student not doing so may be Suspended or Dropped at the end of the semester.

Final Probation: For significantly poor performance, or for continued failure to meet the professional standards of the School. The student must improve scholastic standing to an acceptable level in order to be removed from Final Probation. A student not doing so may be Suspended or Dropped at the end of the semester. This action may be taken without previous academic action.

School Suspension: For poor performance, or for personal problems that create an impediment to professional achievement in the School. A student is suspended from the School, but not the University, when it is deemed in the best interest of the student to allow continuation of study outside of the School during the period of the suspension. The student is not permitted to take courses in the School for a period to be determined by this faculty action, but will be re-admitted at the end of the period of School Suspension specified by the faculty after the condition of the School Suspension is satisfied.

Drop from the School: A student is Dropped from the School when it is clear that the student's progress in professional training is insufficient to warrant continuing in the current professional field of study in this College. This action is taken in the case of a student who has been lacking in some essential requirement in the chosen professional field, but whose general scholastic ability, habits and character justify an opportunity in some other field of education. This action terminates the student's enrollment in the current School, but is not intended to prejudice admission to another Department, School, or College of the University, or to another institution.

This academic action allows the student three choices:

- Transfer to another Carnegie Mellon University Department or School. A student must contact that Department or School of choice to discuss possible transfer.

- Request for Transitional status in the College of Fine Arts for one semester (see below: Transitional Students). A student must make an appointment at the Carnegie Mellon Advising Resource Center in order to pursue this option.
- Withdraw from Carnegie Mellon University. An application for Withdrawal/Leave of Absence form is enclosed with the letter notifying a student of this academic action.

Drop from the College: A student is Dropped from the College when it is clear that the student shows no indication of being able to reach an acceptable level of performance or maintain steady progress toward completing graduation requirements. This action terminates the student's enrollment in the College of Fine Arts, but is not intended to prejudice admission to another College of the University, or to another institution.

This academic action allows the student three choices:

- Transfer to another Carnegie Mellon University College. A student must contact that College of choice to discuss possible transfer.
- Request for Transitional status in the College of Fine Arts for one semester (see below: Transitional Students). A student must make an appointment at the Carnegie Mellon Advising Resource Center in order to pursue this option.
- Withdraw from Carnegie Mellon University. An application for Withdrawal/Leave of Absence form is enclosed with the letter notifying a student of this academic action.

A student who has been suspended from the University or has withdrawn is required to leave the campus, including residence halls and Greek houses, within a maximum of two days after the action and to remain off campus for the duration of the time specified. This action includes exclusion from part-time and summer study at the University for the duration of the period of the action.

Dean's Honor List

Each semester the College of Fine Arts recognizes those students who have attained outstanding semester quality point averages by naming them to the Dean's List. To be eligible, students must complete at least 36 factorable units and have no conditional, missing or failing grades in core classes at the time when final semester grades are recorded. The top 35% of eligible students in each of the College of Fine Arts schools are named to the Dean's List.

Graduation Requirements

Because of the special nature of work in the College of Fine Arts, the first year in all schools should be considered probationary, a period in which a student and faculty can evaluate professional promise in terms of the college's standards. Graduation from the College of Fine Arts follows the general university guidelines. As part of a student's qualification for an undergraduate degree, the equivalent of two terms of full-time work must be pursued under the direction of faculty members in the college during the period immediately prior to the degree award. Courses completed at other institutions will not be acceptable as terminal credit for a degree. Exceptions to this stipulation can be recommended by a school faculty in unusual cases, but the concurrence of the College Council is necessary before final approval of an exception can be given.

To be eligible to graduate, undergraduate students must complete all course requirements for their program with a cumulative Quality Point Average of at least 2.0 for all courses taken. For undergraduate students who enrolled at Carnegie Mellon as freshmen and whose freshman grades cause the cumulative QPA to fall below 2.0, this requirement is modified to be a cumulative QPA of at least 2.0 for all courses taken after the freshman year. Note, however, the cumulative QPA that appears on the student's final transcript will be calculated based on all grades in all courses taken, including freshman year. Some programs may have additional QPA requirements in order to graduate.

Other graduation requirements in the College of Fine Arts are described in the curriculum of each school. Further questions about specific course requirements and the total number of units required should be directed to the respective school advisors.

Other Regulations Affecting Student Status

Schedule Changes

Courses may be added or dropped within the times stated in the college calendar. No courses may be added or dropped after the stated deadline dates except with the approval of the student's School Head and the Dean of the College. (See Undergraduate Academic Regulations (p. 47) for Add/Drop procedures.)

Withdrawal/Leave of Absence

Please refer to the Student Leave Policy.

Transitional Students

The designation Transitional Student has been instituted by the Dean of the College of Fine Arts to assist students who have been judged unlikely to make satisfactory progress in their chosen professional field, or who on their own initiative, have changed their mind about their originally chosen field of study. Being a Transitional Student gives them an opportunity to maintain a relationship with the College of Fine Arts while re-orienting career plans and goals. It also gives them time to enhance their admissibility to another school in the college, another college in the university, or another institution. Ordinarily a student will be permitted to register as a Transitional Student for no more than one semester.

Transitional status is made available to students upon the advice of their advisors or upon their own request. A student must make an appointment at the Carnegie Mellon Advising Resource Center to discuss this option.

Transfer Students

Undergraduate students seeking transfer within or to any school of the College of Fine Arts must file an application with the School and proceed with the established transfer application procedure, audition, portfolio review or ASAT requirements. Admission may dictate freshman status regardless of the student's prior college experience.

Materials

The college does not furnish students with any drawing materials, make-up materials, textbooks, or other expendable equipment except those in courses in which materials fees are charged to cover specific costs.

Retention of Students' Work

The college reserves the right to retain indefinitely any student work the faculty may select. All work not retained by the faculty must be claimed at the time specified on the bulletin boards of the schools concerned. The college assumes no liability for student materials in its custody.

Minors Offered by the College of Fine Arts

The College of Fine Arts offers minors in Architecture, Art, Design, Drama, and Music to students from other colleges at Carnegie Mellon University. These minors allow students at Carnegie Mellon to take courses and develop a direction for electives in any of the five schools in CFA. Students in the College of Fine Arts may also earn minors outside of their major within other schools in the College. They may also study any of the minors offered by the other colleges to the University at large, thus taking advantage of the broad educational opportunities available at Carnegie Mellon University.

Minors Offered by the College of Fine Arts:

- Architecture
- Architectural History (available also to B. Arch candidates)
- Architectural Representation and Visualization (available also to B. Arch candidates)
- Architectural Technology
- Art
- Building Science (available only to B. Arch candidates)
- Communication Design
- Drama
- History of the Arts
- Industrial Design
- Music
- Music Technology
- Music Theory
- Musicology
- Photography
- Sound Design

Guidelines for students are: 1) except where so designated, CFA students are not eligible to earn a minor in their own school; students from outside CFA may earn a minor in any school in CFA; 2) faculty advisors in the student's home school (in consultation with the academic officer of the other unit involved) will advise students as to the structuring of the courses in each minor; 3) a minor is not to be considered an overload; rather, through the assistance of faculty advisors it should be integrated into a student's overall units required for graduation; 4) the advisors will also monitor the student's development in these minors and keep records in their files which indicate the fulfillment of the course requirements in the minors, as well as in the majors in the student's own school. Courses listed as possible for the minors may be available, but not all courses are offered every semester. Students should consult with their advisors.

Students interested in earning a minor in any of the CFA schools should contact: Architecture: Heather Workinger; Art: Keni Jefferson; Design: Melissa Cicozi; Drama: Amy Nichols; Music: Sharon Johnston.

Minors under Architecture

Minor in Architecture

This sequence is for candidates who intend to develop intellectual links to the architectural profession. The scope of courses offered includes a full spectrum of professional issues in architecture.

Prerequisite Courses	9 units
79-104 Global Histories	9
or 62-110 Passport to the Arts	
Required Courses	18–21 units
48-100 Architecture Design Studio: Foundation I	12
or 48-095 Spatial Concepts for Non-Architects I	
48-240 Historical Survey of World Architecture and Urbanism I	9
Elective Courses*	27 units
48-121 Analog Media I	6
48-126 Analog Media II	6

48-120 Digital Media I	6
48-125 Digital Media II	6
48-215 Materials and Assembly	9
48-324 Structures/Statics	9
48-351 Human Factors in Architecture	9
48-452 Real Estate Design and Development	6
48-453 Urban Design Methods	6
48-383 Ethics and Decision Making in Architecture	6
48-xxx Architecture History (Pre-Approval of coursework required)	9
48-xxx Architecture Elective (Pre-Approval of coursework required)	9

Minimum Units: 54

*Students should consult the Architecture advisor regarding elective choices.

Minor in Architectural History

(available also to B. Arch Candidates)

This sequence is intended for candidates interested in the history of architecture in its many manifestations, including high style and vernacular buildings, western and non-western traditions, built and theoretical works, and rural to urban contexts. Non-architecture majors are required to take 54 units of architectural history. Architecture majors wishing to minor in Architectural History must fulfill the three core required courses in architectural history, plus four additional architectural history electives, for a total of 63 units. Students wishing to pursue the minor should meet with the Architecture advisor to determine if a course is eligible.

Required Courses	18 units
48-240 Historical Survey of World Architecture and Urbanism I	9
48-241 Modern Architecture	9

Elective Courses 36 units/45 units

Students wishing to pursue the minor should meet with the Architecture advisor to determine course eligibility for electives.

Minimum Units: 54 (non architecture majors)

Minimum Units: 63 (architecture majors)

Minor in Architectural Representation and Visualization

This sequence is for candidates who intend to develop particular skills in architectural representation. The Minor in Architectural Representation and Media is intended for those students that want to deepen their knowledge in architectural representation and media and for those who are interested in gaining advanced placement (AMP) in the M.S. programs offered by the School in the areas of Computational Design, Tangible Interaction Design and/or Emerging Media. It is earned by completing the four required media courses and then an additional three elective courses in these areas. Architecture majors wishing to pursue a Minor in Architectural Representation and Visualization must complete the required 33 units and at least an additional 30 units to fulfill the minor for a total of 63 units.

Required Courses	33 units
48-120 Digital Media I	6
48-125 Digital Media II	6
48-121 Analog Media I	6
48-126 Analog Media II	6
Elective Courses	21 units/30 units
48-568 Advanced CAD, BIM, and 3D Visualization	9
48-576 Mapping Urbanism	9

48-724	Scripting and Parametric Design	6
48-3xx	Architectural Drawing Elective (Pre-Approval of coursework required)	9
48-xxx	Architectural Representation/Visualization Elective: (Pre-Approval of coursework required)	9
48-xxx	Architectural Representation/Visualization Elective: (Pre-Approval of coursework required)	9

Minimum Units: 54 (non-architecture majors)

Minimum Units: 63 (architecture majors)

Minor in Architectural Technology

This sequence is for candidates who intend to develop intellectual links to the technical aspects of the profession. It is not available to B. Arch Candidates.

Prerequisite Courses		22 units
33-106	Physics I for Engineering Students	12
21-120	Differential and Integral Calculus	10

Elective Courses		32 units
48-116	Building Physics	9
48-215	Materials and Assembly	9
48-324	Structures/Statics	9
48-315	Environment I: Climate & Energy	9
48-432	Environment II: Advanced Building Systems Integration & Mechanical Systems	9
48-752	Zero Energy Housing	9

Minimum Units: 54

Minor in Building Science

(Available only to B. Arch Candidates)

The Minor in Building Science is intended for those students that want to deepen their knowledge in the building sciences and for those who are interested in gaining advanced placement (AMP) in the M.S. programs offered by the School in the areas of Building Performance & Diagnostics and Sustainable Design. It is earned by completing the two required building technology and three environmental science courses and then an additional three elective courses in the building sciences.

Required Course		12 units
48-722	Building Performance Modeling	12

Elective Courses		45 units
48-795	LEED, Green Design and Building Rating in Global Context	6
48-721	Building Controls and Diagnostics	12
48-723	Performance of Advanced Building Systems	9
48-729	Productivity, Health and the Quality of Buildings	9-12
48-749	Special Topics in CD: Parametric Modeling with BIM	Var.
48-752	Zero Energy Housing	9

Minimum Units: 54

Minors under Art

Minor in Art

Concept Studio (choose one)		10 units
60-101	Concept Studio: The Self and the Human Being	10
60-201	Concept Studio: Space and Time	10
60-202	Concept Studio: Systems and Processes	10

Media Studios (choose two)		20 units
60-110	Electronic Media Studio: Introduction to the Moving Image	10
60-210	Electronic Media Studio: Introduction to Interactivity	10
60-130-60-130	3-D Media Studio I-I Mini 1 and Mini 2 must be in different media.	10
60-131-60-131	3D Media Studio II-II Mini 3 and Mini 4 must be in different media.	10
60-150	2D Media Studio: Drawing	10
60-160	2D Media Studio: Imaging	10
60-250	2D Media Studio: Painting	10

Advanced Media (choose two)		20 units
60-4xx	Advanced ETB: Electives	10
60-4xx	Advanced SIS: Electives	10
60-4xx	Advanced PDP: Electives	10
60-4xx	Advanced CP: Electives	10

Art History/Theory (choose one)		9 units
60-1xx	Art History Elective	9
60-2xx	Art History Elective	9
60-3xx	Art History Elective	9

Minimum units: 59

Minor in the History of Arts

This minor of six or more courses as designated below, will offer students a grouping of Arts History courses that can provide a broad survey in the arts or a highly specialized field. For College of Fine Arts students, all courses meeting the requirements of the Minor in the History of the Arts must be taken outside of their major School, with the exception of the School of Architecture. Interested students should contact Svenja Drouven in the College of Fine Arts, Room 100.

Introductory Level Courses		27 units
(choose at least three, CFA students pick 3 outside of major)		
48-240	Historical Survey of World Architecture and Urbanism I (pre-requisite for all advanced architecture classes below)	9
51-271	How People Work	9
54-239	History of Architecture and Decor 1: Ancients to Gothic	Var.
54-245	History of Clothing	Var.
54-246	History of Clothing 2	Var.
57-173	Survey of Western Music History	9
60-205	Modern Visual Culture 1789-1960	9
60-206	Contemporary Visual Culture 1960 - Present	9

Advanced Courses		27 units
(choose at least three, CFA students pick 3 outside of major)*		
48-340	Modern Architecture and Theory 1900-1945	9
48-341	Expression in Architecture	9
48-348	Architectural History of Mexico & Guatemala	9

48-440	American Regions & Regionalism: An Architectural History of Place, Time, and Cul	9
51-272	Cultures	9
51-378	History of the Book and Printing	6
54-381	Special Topics in Drama: History, Literature and Criticism	6
54-382	History of Drama	3
57-209	The Beatles	9
57-477	Music of the Spirit	6
57-478	Survey of Historical Recording	6
Art History/Theory Special Topics 60-350 to 60-398 (instructor permission only)		9
62-360	Photographers and Photography Since World War II	9
62-371/79-372	Photography, The First 100 Years, 1839-1939	9
79-395	The Arts in Pittsburgh	9
79-396	Music and Society in 19th and 20th Century Europe and the U.S.	9

Minimum units required: 54

* Other courses not on this list may qualify as approved by CFA Dean's Office (College of Fine Arts, Room 100).

Minor in Media Design – IDEATe

The minor in Media Design is offered by the School of Art as part of the Integrative Design, Arts and Technology (IDEATe) network. IDEATe offers students the opportunity to become immersed in a collaborative community of faculty and peers who share expertise, experience, and passions at the intersection of arts and technology. Students will engage in active “learning by doing” in state-of-the-art maker spaces. The program addresses current and emerging real-world challenges that require disciplinary expertise coupled with multidisciplinary perspectives and collaborative integrative approaches.

The IDEATe undergraduate curriculum consists of eight interrelated concentration areas, all of which can also be taken as minors. The themes of these areas integrate knowledge in technology and arts: Game Design, Animation & Special Effects, Media Design, Learning Media, Sound Design, Innovation and Entrepreneurship, Intelligent Environments, and Physical Computing. For more information about the IDEATe network, please see Undergraduate Options (<http://coursecatalog.web.cmu.edu/servicesandoptions/undergraduateoptions/#ideate>).

In the Media Design minor, students learn to design digitally mediated experiences across different platforms, from mobile apps to large-scale installations, and for varied applications, from media for daily living to mediated performances.

Curriculum

Required Courses

One Portal Course

- 15-104 Introduction to Computing for Creative Practice for students in Dietrich College, the College of Fine Arts, and the Tepper School of Business. (DC, CFA, and TSB students may take 15-112 Fundamentals of Programming and Computer Science as a substitute for 15-104.)
- 62-150 Introduction to Media Synthesis and Analysis for students in the College of Engineering, Mellon College of Science, and School of Computer Science.

Four Collaborative or Supportive Courses

54-498	Expanded Theater Fusion Studio	10
60-446	Advanced SIS: Expanded Theater Fusion Studio	10
51-236	Information Design	9
18-099	Special Topics: Mobile App Design & Development	12
15-294	Special Topic: Rapid Prototyping Technologies	5
18-551	Digital Communication and Signal Processing Systems Design	12
62-478	digITool	6
60-110	Electronic Media Studio: Introduction to the Moving Image	10
60-210	Electronic Media Studio: Introduction to Interactivity	10
60-412	Interactive Art and Computational Design	12

60-441	Advanced CP/SIS: Urban Intervention	10
--------	-------------------------------------	----

Electives

Students may take a collaborative or supportive course from one of the other IDEATe areas as one of their four collaborative or supportive courses toward the Media Design minor.

Double-Counting Restriction

Students may double-count two of their Media Design minor courses for other requirements.

Minor in Design

Minor in Design is a great way for students to diversify their studies and incorporate design skills and thinking into their overall academic experiences. Students who are already School of Design majors are not eligible to earn a Design minor. The 54 required units must be unique to the Design minor. No courses may be double counted.

Requirements and Electives

For a design minor, students must complete 54 units: 36 units of required courses, plus 18 units of design electives.

Required Design Courses

Both of these:

51-262	Communication Design Fundamentals: Design for Interactions for Communications (formerly CDF)	9
51-264	Industrial Design Fundamentals: Design for Interactions for Products (formerly IDF)	9

Two of these:

51-171	Placing	9
51-172	Systems	9
51-173	Human Experience in Design	9
51-271	How People Work	9

Two Design Electives:

51-xxx (9 units)

51-xxx (9 units)

Applications

Students must submit transcripts, personal statements, and completed applications by the beginning of February, and submit portfolios or design projects by the beginning of March. They must also obtain permission to complete minors from their major advisors. The minor application form includes detailed requirements.

Admission depends mainly on a student's demonstration of design skills and aptitude. Students are notified of acceptance by the end of March.

If you are interested in applying for the Minor in Design, please contact Design Advisor, Melissa Cicozi <cicozi@cmu.edu>. You can download the Design Project and Application at www.design.cmu.edu, or paper applications are available at the School of Design office, MMCH 110.

Minor in Drama

The Drama minor provides students with a well-rounded opportunity to obtain preliminary professional exposure to the theatre arts. Courses may involve acting, directing, playwriting, design, production technology and management, and dramatic literature courses. Students also become involved with Drama productions by signing up for Production for Non-Majors, which involves evening crew work on various Drama productions.

Admission Requirements

1. Students must apply to enter the program in the office of the Drama Sr. Academic Advisor, Amy Nichols, PCA 223.
2. The student must successfully pass one Drama course prior to being considered for minor status.

Required Courses 25 units

54-163	Production for Non Majors	6
54-164	Production for Non Majors	6
54-175/176	Conservatory Hour	1
54-177	Foundations of Drama I	6
or 54-178	Foundations of Drama I	
54-281	Foundations of Drama II	6
or 54-282	Foundations of Drama II	

Students must meet with the School of Drama Production Manager (PCA 224) for assignments related to Production for Non-Majors.

Elective Courses 30 units

The remainder of the minor is fulfilled with Drama courses of the student's choosing, with approval from the Sr. Academic Advisor in the School of Drama, Amy Nichols. For certain courses, students may need instructor permission to register.

Elective Courses not requiring instructor permission:

54-187/188	Introduction to Playwriting	9
54-189/190	Advanced Playwriting	9
54-191/192	Acting for Non-Majors	9
54-193/194	Comedic Writing for Film and Television	9
54-195/196	Advanced Screenwriting	9

Selected Elective Courses requiring instructor permission:

54-109	Dramaturgy 1: Approaches to Text	9
54-121	Directing I: Sources	9
54-157	Basic PTM	6
54-169	Studiocraft	13
54-171	Basic Design	6

Additional Drama Courses are available by instructor agreement and may require an audition, interview, or portfolio review. Students should contact the Drama Sr. Academic Advisor, Amy Nichols, to inquire about permission for specific courses in which they are interested.

Minimum units required: 55

Minors in Music

Minor in Music

This sequence is for candidates who are majors from any discipline in the university other than music who have some background in music and would like to know more about music.

Admission Requirements:

1. The student must apply to enter the program in the office of the Director of Student Services (CFA 108).

Prerequisite Course 0-3 units

Beginning Piano is required of students who do not pass a piano proficiency test.

57-294	Beginning Piano Test	0
57-329	Beginning Piano for Minors	3

Required Music Courses 25 units

Basic Harmony I and/or Basic Solfege I are required of students who do not qualify for entrance into Harmony I and/or Solfege I, based on their scores on the theory and solfege placement tests.

57-152	Harmony I	9
57-161	Eurhythmics I	3
57-181	Solfege I	3
57-173	Survey of Western Music History	9
57-188	Repertoire and Listening for Musicians	1

Required Studio Courses (studio fee is charged) 24 units

57-1xx	Elective Studio	6
57-1xx	Elective Studio	6
57-1xx	Elective Studio	6
57-1xx	Elective Studio	6

Elective Courses 18 units

Elective courses are to be chosen from those courses listed for the School of Music in the current course catalog. Performance electives are encouraged. (An audition is required for all School of Music performance ensembles.)

Minimum units required: 67

Minor in Music Technology

This sequence is for candidates who majors from any discipline in the university who have some background in music and would like to know more about music technology.

Note: Students in the School of Music have slightly different requirements for the Minor in Music Technology. See School of Music (p. 197).

Admission Requirements

The student must apply to enter the program in the office of the Director of Student Services (CFA 108).

Prerequisite Course 0-3 units

Beginning Piano is required of students who do not pass a piano proficiency test.

57-294	Beginning Piano Test	0
57-329	Beginning Piano for Minors	3

Required Music Courses 25 units

Basic Harmony I and/or Basic Solfege I are required of students who do not qualify for entrance into Harmony I and/or Solfege I, based on their scores on the theory and solfege placement tests.

57-152	Harmony I	9
57-161	Eurhythmics I	3
57-173	Survey of Western Music History	9
57-181	Solfege I	3
57-188	Repertoire and Listening for Musicians	1

Sound Recording Courses 21 units

57-337	Sound Recording	6
57-338	Sound Editing and Mastering	6
57-438	Multitrack Recording	9

Music Technology/Sound Courses (choose 3) 21 units

Choose three courses. One of the three courses must be either Introduction to Computer Music or Electronic and Computer Music. (Note that 15-112 is a prerequisite for 15-322; 57-101 or 57-171 is a prerequisite for 57-347.) Other courses may be taken with the permission of the music technology minor advisor.

15-322	Introduction to Computer Music	9
15-323	Computer Music Systems and Information Processing	9
33-114	Physics of Musical Sound	9

54-509	Theatrical Sound System Design	9
54-666	Production Audio	6
57-345	Hacking the Music World	9
57-347	Electronic and Computer Music	6
60-131	3D Media Studio II	5
60-210	Electronic Media Studio: Introduction to Interactivity	10

Minimum units required: 67

Minor in Music Theory

This sequence is for candidates who are majors from any discipline in the university who have some background in music and would like to know more about music theory.

Note: Students in the School of Music have slightly different requirements for the Minor in Music Theory. See School of Music (p. 197).

Admission Requirements

The student must apply to enter the program in the office of the Director of Student Services (CFA 108).

Prerequisite Course 0–3 units

Beginning Piano is required of students who do not pass a piano proficiency test.

57-294	Beginning Piano Test	0
57-329	Beginning Piano for Minors	3

Required Music Courses 25 units

57-152	Harmony I	9
57-161	Eurhythmics I	3
57-173	Survey of Western Music History	9
57-181	Solfege I	3
57-188	Repertoire and Listening for Musicians	1

Required Theory Courses 21 units

57-151	Counterpoint in Theory and Application	6
57-153	Harmony II	9
57-408	Form and Analysis	6

Upper Level Theory Course (choose one) 6 units

See theory courses on the Music Support Courses Two-Year Rotation list. It is available on the Inside Music website:<http://music.cfa.cmu.edu/>. Click on Music Support Course Two-Year Rotation. A graduate course may be taken with the permission of the instructor.

Elective Courses 18 units

Elective courses are to be chosen from those courses listed for the School of Music in the current course catalog.

Minimum units required: 70

Minor in Musicology

This sequence is for candidates who are majors from any discipline in the university who have some background in music and would like to know more about music history.

Admission Requirements

The student must apply to enter the program in the office of the Director of Student Services (CFA 108).

Prerequisite Course 0–3 units

Beginning Piano is required of students who do not pass a piano proficiency test.

57-294	Beginning Piano Test	0
57-329	Beginning Piano for Minors	3

Required Music Courses 15 units

57-152	Harmony I	9
57-161	Eurhythmics I	3
57-181	Solfege I	3

Required Musicology Courses 36 units

57-283	Music History I	9
57-284	Music History II	9
57-285	Music History III	9
57-190	Repertoire and Listening for Musicians I	3
57-289	Repertoire and Listening for Musicians II	3
57-290	Repertoire and Listening for Musicians III	3

Upper Level Musicology Course (choose one) 6 units

See musicology courses on the Music Support Courses Two-Year Rotation list. It is available on the Inside Music website:<http://music.cfa.cmu.edu/>. Click on Music Support Course Two-Year Rotation. A graduate course may be taken with the permission of the instructor.

Elective Courses 18 units

Elective courses are to be chosen from those courses listed for the School of Music in the current course catalog.

Minimum units required: 75

Minor in Sound Design – IDeATe

The minor in Sound Design is offered by the School of Music as part of the Integrative Design, Arts and Technology (IDeATe) network. IDeATe offers students the opportunity to become immersed in a collaborative community of faculty and peers who share expertise, experience, and passions at the intersection of arts and technology. Students will engage in active “learning by doing” in state-of-the-art maker spaces. The program addresses current and emerging real-world challenges that require disciplinary expertise coupled with multidisciplinary perspectives and collaborative integrative approaches.

The IDeATe undergraduate curriculum consists of eight interrelated concentration areas, all of which can also be taken as minors. The themes of these areas integrate knowledge in technology and arts: Game Design, Animation & Special Effects, Media Design, Learning Media, Sound Design, Innovation and Entrepreneurship, Intelligent Environments, and Physical Computing. For more information about the IDeATe network, please see Undergraduate Options (<http://coursecatalog.web.cmu.edu/servicesandoptions/undergraduateoptions/#ideate>).

In the Sound Design minor, students create experimental music or explore new, technology-enabled applications and markets for sound design, music creation, and performance.

Curriculum

Required Courses

One Portal Course		Units
18-090	Digital Media Interactions: Signal Processing for the Arts	10

62-150	Introduction to Media Synthesis and Analysis for students in the College of Engineering, Mellon College of Science, and School of Computer Science	10
--------	--	----

Four Collaborative or Supportive Courses

57-344	Experimental Sound Synthesis	9
57-345	Hacking the Music World	9
15-322	Introduction to Computer Music	9
57-347	Electronic and Computer Music	6
60-439	Advanced SIS/CP: Hybrid Instrument Building	10
54-509	Theatrical Sound System Design	9

Electives

Students may take a collaborative or supportive course from one of the other IDEATe areas as one of their four collaborative or supportive courses toward the Sound Design minor.

Double-Counting Restriction

Students may double-count two of their Sound Design minor courses for other requirements.

Minors under CFA Dean's Office

Minor in Photography

The Photography Minor exposes students to the breadth of photography offering experiences in traditional photography (i.e. film exposure and silver printing) to digital shooting and output. The student who takes the Photography Minor will become familiar with photography's craft, its history and significant practitioners, and develop his/her own distinct engagement with the medium.

Students may apply for the Photography Minor after they have taken a CFA or Pittsburgh Filmmakers' beginning photography course. Freshmen should not apply for the minor. Students in four-year undergraduate programs may apply in their sophomore or junior year. Students in five-year undergraduate programs, such as Architecture, may apply in their second, third, or fourth year. Applications are accepted in both the fall and spring semesters. Students will be admitted to the minor based on their aptitude, appropriate level of photography skills, and space availability within the program. Once admitted, students will be assigned a faculty advisor who will help them determine a sequence of courses that best fits their needs and interests.

Application Requirements

The application process for the Photography Minor requires submission of: a completed application form signed by the home department advisor, a personal statement, and a portfolio of photographs. Contact the CFA Photography Administrator, Jamie Gruzka, MM B18, for further information and an application form.

Photography Required Courses (3) minimum 27 units

62/60-141/51-281	Black and White Photography I * **	10
62-241	Black and White Photography II	10
62-142	Digital Photography I	10

Photography Elective (1) minimum 9 units

Choose one (1) additional photography course from the list below in consultation with the photo advisor, or consult Jamie Gruzka for current offerings. Also, photo courses may be taken at Pittsburgh Filmmakers. Please refer to their course catalog that is available in the CFA Dean's Office, CFA 100, or online: pghfilmmakers.org (<http://www.pghfilmmakers.org>)

62-165	Mutable Landscape:	10
62-245	Portrait Photography	10
62-265	Alternative Photo Processes	10
62-325	View Camera	10
62-326	Photographic Narrative	9
62-375	Large Format Photography: The Antiquarian Avant-Garde	10

Photo History Required Course (1)9 units

62-371	Photography, The First 100 Years, 1839-1939 **	9
or 62-360	Photographers and Photography Since World War II	

History, Theory, or Criticism of the Visual Arts Elective (1)9 units

Choose one (1) additional History, Theory or Criticism of the Arts course in consultation with the photo advisor. A second Photo History course (62-360 or 62-371) can be used for this requirement.

* prerequisite for photo courses other than history, theory, and/or criticism course

** or course approved by the photography advisor

Minimum units required: 54

School of Architecture

Stephen R. Lee, AIA, LEED AP, Head
Office: CFA 201
<http://www.soa.cmu.edu>

The School of Architecture (SoA) provides deep immersion in the discipline of architecture, intensified by the broader Carnegie Mellon culture of interdisciplinary innovation and creative inquiry.

We define the discipline of architecture as the integrated pursuit of design creativity, historical perspective, social responsibility, technical expertise, and global environmental leadership. Our undergraduate and graduate degree programs prepare students to be excellent, discipline-defining design thinkers in diverse global contexts.

This world-class architecture education is enhanced by our position within one of the world's leading research and entrepreneurship institutions, and by the foundational premise that architectural excellence demands both rigorous training in fundamentals and the development of unique specializations. Students may extend their core knowledge either through concentration in architecture subdisciplines like sustainable design or computational design, or through interdisciplinary interaction with CMU's other renowned programs—whether the sciences, the humanities, business, or robotics. Though every School of Architecture student graduates with intensive architecture knowledge, no two graduates leave with the same education.

In the twenty-first century, few architecture problems are straightforward. Graduates of SoA excel in the roles architects have performed for centuries—and in new roles catalyzed by the depth and breadth of their education—to create and execute innovative solutions to a huge range of emerging global challenges.

Bachelor of Architecture Program

The NAAB-accredited five-year Bachelor of Architecture (B.Arch) program prepares students to be design-thought leaders in a variety of fields, as well as to continue on their path to licensure in the profession of architecture. The B.Arch program begins with three largely scripted years of studio and coursework, providing students a strong, multifaceted foundation in architectural principles and methods. In the fourth and fifth years, students tailor their studio and course choices to the interests they've honed in their first three years: they may choose to continue a general-studies approach or may concentrate their work more heavily in a specific architectural subdiscipline. All B.Arch graduates are thoroughly prepared to continue toward professional licensure, but the tone of their education is distinctly personal.

Each course required for the B.Arch program falls into one of seven categories, each pursuing a set of specific objectives for student learning:

- **Studio (168 units):** Architectural design studio (prescribed for the first three years and selective thereafter) is the backbone of every semester in the B.Arch program. Students learn to combine rigorously rational and resourcefully creative techniques to identify design problems, collect and analyze data, apply theoretical and practical strategies in creation of a design solution, and evaluate its results through extensive testing; and to describe and work at various points along the continuum between form-finding and form-making. (Courses: Foundation I & II, Elaboration I & II, Integration I & II, Advanced Synthesis Options Thesis/Studio I & II)
- **Critical Practice (42 units):** A multifaceted field of practice, architecture interacts with dynamic social, organizational, economic, professional, and cognitive contexts. In this sequence, students learn to use methods from cognitive psychology to analyze the influence of human factors on design, construction and occupancy; to resolve ethical dilemmas with adjudication strategies based in architectural case study; to demonstrate critical awareness and broad understanding of the factors informing the intelligent resolution of architecture and construction; and to identify the roles of architects, urban designers and planners in shaping the built environment in a global context. (Courses: First Year Seminar: Architecture Edition I & II, Context, Human Factors in Architecture, Real Estate Design and Development, Issue of Practice)
- **Design Tools (24 units):** Drawing and modeling both by hand and with the computer are core skills for developing powers of observation, the ability to think in three dimensions, and the communication of architectural ideas. By using a range of analog and digital design tools to engage in the act of making, students will be able to explore,

analyze, formulate, fabricate, and represent ideas about the built environment. (Courses: Analog Media I & II, Digital Media I & II)

- **Environmental Science (27 units):** Environmental education is one of our highest priorities. In this sequence, students learn to describe first principles of and computational approaches to the lighting and thermal performance of buildings; to demonstrate qualitative and quantitative climate- and environment-responsive strategies (energy conservation, passive heating/cooling, daylighting, natural ventilation); to select, configure, and represent building service systems; and to maintain global awareness of high-performance systems-integration strategies. (Courses: Building Physics, Environment I: Climate & Energy, Environment II: Mechanical Systems for Buildings)
- **History (27 units):** In architectural history courses, students learn to identify chronologically and geographically diverse building styles, building types, and urban plans; to describe the cultural, intellectual and aesthetic contexts surrounding the creation of those buildings and sites; to write clearly and persuasively about the historic built environment; and to demonstrate critical thinking, quality research, and effective information management. In addition to the two-semester Historical Survey of World Architecture, each student completes one elective course on architectural history within the School of Architecture. A minor in architectural history is available to students completing four additional, approved, nine-unit architectural history courses beyond these three required courses. (Courses: Historical Survey of World Architecture and Urbanism, Modern Architecture, Architectural History III)
- **Building Technology (18 units):** We understand technical knowledge as design knowledge and place major emphasis on understanding the state-of-the-art and innovative building structure, enclosure, mechanical, lighting, and interior systems. Students learn to design gravity- and lateral load-resisting systems for buildings; to select, configure and size construction systems in wood, masonry, steel, and concrete; and to distinguish among construction materials with regard to their process of manufacture, their physical properties, their environmental performance, and their methods of selection and specification. (Courses: Materials and Assembly, Structures/Statics)
- **General Studies (135 units):** University coursework in mathematics, physical sciences, social sciences, writing, and history are prerequisite to the School's own offerings. (Courses: Interpretation and Argument, Computing @ Carnegie Mellon, Descriptive Geometry, Fundamentals of Computational Design, University Electives)

Curriculum

First Year: FOUNDATION

48-100	Architecture Design Studio: Foundation I	12
48-025	First Year Seminar: Architecture Edition I	3
48-116	Building Physics	9
48-120	Digital Media I	6
48-121	Analog Media I	6
76-101	Interpretation and Argument	9
99-101	Computing @ Carnegie Mellon	3
48-105	Architecture Design Studio: Foundation II	12
48-026	First Year Seminar: Architecture Edition II	3
48-125	Digital Media II	6
48-126	Analog Media II	6
48-240	Historical Survey of World Architecture and Urbanism I	9
xx-xxx	University Elective (1)	9

Second Year: ELABORATION

48-200	Architecture Design Studio: Elaboration I	18
48-241	Modern Architecture	9
62-275	Fundamentals of Computational Design	9
xx-xxx	University Elective (2)	9
48-205	Architecture Design Studio: Elaboration II	18

48-215	Materials and Assembly	9
48-351	Human Factors in Architecture	9
62-175	Descriptive Geometry	6

Third Year: INTEGRATION

48-300	Architecture Design Studio: Integration I	18
48-315	Environment I: Climate & Energy	9
48-324	Structures/Statics	9
48-250	Context	9
48-305	Architecture Design Studio: Integration II	18
48-380	Real Estate Design and Development	6
48-381	Issues of Practice	6
48-383	Ethics and Decision Making in Architecture	6
xx-xxx	University Elective (3)	9

Fourth Year: ADVANCED TOPICS

48-400	Advanced Synthesis Options Studio I	18
48-432	Environment II: Advanced Building Systems Integration & Mechanical Systems	9
48-xxx	Architectural History III	9
xx-xxx	University Elective (4)	9
48-405	Advanced Synthesis Options Studio II	18
xx-xxx	University Elective (5)	9
xx-xxx	University Elective (6)	9
48-xxx	School Elective (1)	9
48-497	Thesis Prep	3

Fifth Year: ADVANCED TOPICS

48-500	Advanced Synthesis Options Studio III	18
xx-xxx	University Elective (7)	9
xx-xxx	University Elective (8)	9
xx-xxx	University Elective (9)	9
48-505	Advanced Synthesis Options Studio III	18
48-519	Architecture Design Studio: Thesis II	18
xx-xxx	University Elective (10)	9
xx-xxx	University Elective (11)	9
xx-xxx	University Elective (12)	9

Total number of units required: ¹ 450

Minors in Architecture

Undergraduate students in the SoA can also qualify to earn one of three minors within the subject of architecture. These are the Minor in Architectural History, the Minor in Building Science, and the minor in Architectural Representation and Media.

The Minor in Architectural History is intended for those students that want to deepen their knowledge in architectural history. It is earned by completing the three required architectural history courses and then an additional four elective courses in architectural history.

The Minor in Building Science is intended for those students that want to deepen their knowledge in the building sciences and for those who are interested in gaining advanced placement (AMP) in the M.S. programs offered by the School in the areas of Building Performance & Diagnostics and Sustainable Design. It is earned by completing the two required building technology and three environmental science courses and then an additional three elective courses in the building sciences.

The Minor in Architectural Representation and Media is intended for those students that want to deepen their knowledge in architectural representation and media and for those who are interested in gaining advanced placement (AMP) in the M.S. programs offered by the School in the areas of Computational Design, Tangible Interaction Design and/or Emerging Media. It is earned by completing the four required media courses and then an additional three elective courses in these areas.

Minors in Other Disciplines

Undergraduate architecture students may also earn minors in many of the departments or schools on campus. Generally, a student must take six courses within a specific department or concentration to receive a minor. Students interested in minors must contact the school or department of interest to determine specific requirements or prerequisites. Since students of architecture are required to take fifteen electives (135 units), students can easily complete a minor without adding additional coursework to their curriculum.

Graduate Degree Programs

Carnegie Mellon University is recognized for outstanding contributions to science, technology, management, policy, and the fine arts. The School of Architecture builds on a tradition of interdisciplinary study.

Our faculty's diverse set of backgrounds and commitment to professional practice and scholarly research make for a rich learning experience.

Our graduates hold positions in innovative design practices, research organizations, federal and municipal governments, the building and manufacturing industries, and at leading universities both in the US and abroad.

Our programs reflect a commitment to excellence. Students with motivation and ability receive an outstanding educational opportunity at Carnegie Mellon University's School of Architecture.

The School of Architecture offers seven (7) post-professional Master, and three (3) PhD degrees in the following areas of study:

Master of Science in Architecture

The Master of Science in Architecture (MSA) is a post-professional, research-based degree program intended primarily for practitioners in the building industry who are interested in broadening their knowledge base and skill set for use in professional practice. This program is structured on a 9-month (2 semester) curriculum, allowing those already established in the field to take a leave of absence and return with relatively little discontinuity to their careers.

The MSA program allows each student the freedom to customize his or her own curriculum. While this program is ideal for students seeking to enhance an existing skill set, it can also act as a testing ground where students are able to explore new and varied areas of academic study. Whether one chooses to delve deeply into a focused area of research or acquire a broad overview, students are encouraged to draw from resources both within the School of Architecture and throughout the University.

Master of Science in Computational Design and Doctor of Philosophy in Computational Design

One of the first and best-known Computational Design programs in the US, our legacy continues today. Under the direction of dedicated faculty and in collaboration with other departments in the University, (e.g., School of Computer Sciences and the Department of Civil & Environmental Engineering), our visionary students continue to push for innovation and evolution of the state-of-the art in design technology.

Master of Science in Building Performance and Diagnostics and Doctor of Philosophy in Building Performance and Diagnostics

Building Performance & Diagnostics deals with the comprehensive integration of *building design* and *advanced technology*, as a means of producing high performance architecture. Led by the Center for Building Performance & Diagnostics (CBPD) and housed within the Robert L. Preger Intelligent Workplace (<http://www.cmu.edu/greenpractices/greenign-the-campus/green-buildings/intelligent-workplace.html>), students have the opportunity to gain both diversity and depth of knowledge from world-renowned an experienced faculty.

Master of Urban Design

Building on our legacy of Urban Design, and in partnership with the Remaking Cities Institute (RCI) (<http://www.cmu.edu/rci>), this 12-month, Studio-based Master of Urban Design program emphasizes environmental, economic, social and cultural issues affecting the contemporary metropolis, while providing a comprehensive foundation in design, theory, history, policy, management and technical skill.

Master of Science of Tangible Interaction Design

The Master of Tangible Interaction Design (mTID) is truly an interdisciplinary program that integrates computational intelligence and the physical world.

MTID students make interaction tangible by building and programming working prototypes. Housed in the Computation Design (CoDe) Lab (<http://code.arc.cmu.edu>), and leveraging our state-of-the-art Digital Fabrication (dFab) Lab (<http://www.cmu-dfab.com>), the program cultivates experimentation and collaboration in an intimate studio setting.

Master of Science in Sustainable Design

At the forefront of research in sustainable design and technology for over 35 years, Carnegie Mellon's School of Architecture is recognized internationally for its large core of dedicated faculty, providing a solid foundation from which students can learn how to positively and sustainably affect the future of the built environment. This is a post-professional degree program that integrates Design and Technology to provide a comprehensive knowledge base for professional practice.

Master of Science in Architecture-Engineering Construction Management and Doctor of Philosophy in Architecture-Engineering Construction Management

A joint effort between the School of Architecture and the Department of Civil & Environmental Engineering, the Architecture-Engineering-Construction Management (AECM) programs prepare building delivery professionals for careers in capital project delivery. Graduates are educated to become effective decision makers who can positively impact economic, environmental, and ethical aspects of the built environment through professional management strategies. AECM programs deal with the entire life-cycle of capital projects, from pre-design, to design, construction, commissioning, operation, and maintenance stages. They focus on the integration of design and technology, in particular, advanced information systems, as a means of improving building performance, and eliminating negative environmental impact.

Advanced Standing in Master Degree Programs

The School of Architecture offers a unique opportunity to undergraduate students who wish to pursue a Masters degree in an architecture-related field through the Accelerated Masters Program (AMP). Undergraduate students may apply to the AMP in their 4th year of their architecture education, and if accepted, can apply units earned in their 5th year of their undergraduate architecture degree to their graduate degree. This allows students to graduate with a Masters degree in an accelerated period of time.

Student Advising

At the end of every semester, the faculty reviews each student's progress in all courses. Reviews during the first year are intended to determine a student's capabilities in relation to the study of architecture at Carnegie Mellon University, and the School works with each student to ensure placement within the university if a change is desired. Subsequent reviews monitor and ensure continued progress in all sequences of the program.

Students are urged to meet with their assigned faculty advisor to review their academic progress and plans before each semester. Such meetings are important to take full advantage of elective possibilities within the curriculum, general progress toward graduation, and professional goal setting. Students should also check their progress using the online academic audit in the Student Information Online (SIO).

Study Away Program

The School of Architecture strongly encourages students to study away. The perspective gained through immersion in another culture and language is invaluable. Study abroad can fall into four categories: University Direct Exchanges, University Sponsored Programs, External Programs, and Departmental Summer Programs.

To receive credit for courses taken away, the student must have a C or better (not C-) in the course and have an official translated transcript sent to the School of Architecture. Studio work conducted abroad must be presented to the School Head and Studio Coordinator for approval.

Students should make the decision to study away by the fall of their third year, so they can plan their courses accordingly. Students are allowed one semester away for which they receive studio credit except for those students at approved yearlong direct exchange programs. To qualify for study away, a student must have completed the third-year of their program, have a minimum overall QPA of a 3.00 (or 2.75 for SoA summer study abroad) and be in good academic standing.

Summer Courses

Students can receive credit for passing comparable courses at other institutions with advanced approval from the School. A Transfer Credit Evaluation form must be completed prior to enrollment at the other institution for a course to be considered for transfer.

Faculty

OMER AKIN, Professor – PhD, Carnegie Mellon University; Carnegie Mellon, 1973-.

MARYLOU ARSCOTT, Studio Professor – BArch, Architectural Association; Carnegie Mellon, 2007-.

MARTIN AURAND, Principal Architecture Librarian/Archivist – MLIS, University of Pittsburgh; Carnegie Mellon, 1987-.

AZIZAN AZIZ, Senior Researcher, CBPD – MS Building Performance & Diagnostics, Carnegie Mellon University; Carnegie Mellon, 1997-.

NINA BARBUTO, Adjunct Instructor – MArch, Southern California Institute of Architecture; Carnegie Mellon, 2014-.

JOSHUA BARD, Adjunct Assistant Professor – MArch, University of Michigan; Carnegie Mellon, 2012-.

WILLIAM BATES, Adjunct Associate Professor – MArch, University of Miami; Carnegie Mellon, 2014-.

ERIC BROCKMEYER, Adjunct Assistant Professor – MTID, Carnegie Mellon University; Carnegie Mellon, 2011-.

LEE CALISTI, Adjunct Associate Professor – BArch, Kent State University; Carnegie Mellon, 2002-.

DONALD K. CARTER, Director, Remaking Cities Institute – BArch, Carnegie Mellon University; Carnegie Mellon, 2009-.

ERICA COCHRAN, Assistant Professor and UDream Coordinator – PhD, Carnegie Mellon University; Carnegie Mellon, 2009-.

DOUG COOPER, Andrew Mellon Professor – BArch, Carnegie Mellon University; Carnegie Mellon, 1976-.

LIZA CRUZE, – MArch, Virginia Tech; .

DANA CUPKOVA, Assistant Professor, Lucian & Rita Caste Chair – MArch, UCLA; Carnegie Mellon, 2013-.

GERARD DAMIANI, Associate Professor – BArch, Syracuse University; Carnegie Mellon, 1996-.

STEFANI DANES, Adjunct Professor – MArch, Yale University; Carnegie Mellon, 1986-2001, 2009-.

JEFFREY DAVIS, Adjunct Professor – BS Architecture, University of Illinois, Urbana-Champaign; Carnegie Mellon, 1996-.

DONNA FICCA, Adjunct Assistant Professor – BArch, Virginia Tech; Carnegie Mellon, 2011-.

JONATHAN GOLLI, Adjunct Assistant Professor – MArch, University of Toronto; Carnegie Mellon, 2007-.

MATTHEW HUBER, Adjunct Assistant Professor – BArch, Carnegie Mellon University; Carnegie Mellon, 2014-.

EDDY KIM, Visiting Assistant Professor, George N. Pauley Jr. Fellow – MDes, Harvard University; Carnegie Mellon, 2014-.

JEFF KING, Adjunct Assistant Professor – MArch, Tulane University; Carnegie Mellon, 2005-.

SUZU (ZEKUN) LI, Adjunct Instructor – MUD, Carnegie Mellon University; Carnegie Mellon, 2014-.

NICHOLAS LIADIS, Adjunct Assistant Professor – MArch, University of Detroit; Carnegie Mellon, 2010-.

JENNIFER LUCCHINO, Adjunct Associate Professor – MArch, Rice University; Carnegie Mellon, 2002-.

JAMES O'TOOLE, Adjunct Associate Professor – BArch, Penn State University; Carnegie Mellon, 2008-.

RAMI EL SAMAHY, Assistant Teaching Professor – MArch, Harvard University; Carnegie Mellon, 2006-.

JOHN EBERHARD, Professor Emeritus – M.S., Industrial Management, Massachusetts Institute of Technology; Carnegie Mellon, 1989-.

JEREMY FICCA, Associate Professor, Director dFab Lab – MArch, Harvard University; Carnegie Mellon, 2007-.

JOHN FOLAN, T. David Fitz-Gibbon Associate Professor – MArch, University of Pennsylvania; Carnegie Mellon, 2008-.

KAI GUTSCHOW, Associate Professor – PhD, Columbia University; Carnegie Mellon, 1998-.

VOLKER HARTKOPF, Professor, Director CBPD – PhD, University of Stuttgart; Carnegie Mellon, 1972-.

HAL HAYES, Studio Professor – BArch, Carnegie Mellon University; Carnegie Mellon, 2008-.

DELBERT HIGHLANDS, Professor Emeritus – MArch, Carnegie Mellon University; Carnegie Mellon, 1985-.

JONATHAN KLINE, Adjunct Professor – MFA, Penn State University; Carnegie Mellon, 2002-.

RAMESH KRISHNAMURTI, Professor – PhD, University of Waterloo; Carnegie Mellon, 1989-.

KRISTEN KURLAND, Teaching Professor – BArch, University of Pittsburgh; Carnegie Mellon, 1996-.

KHEE POH LAM, Professor – PhD, Carnegie Mellon University; Carnegie Mellon, 2003-.

STEPHEN LEE, Professor and Head – MArch, Carnegie Mellon University; Carnegie Mellon, 1981-.

DAVID LEWIS, Teaching Professor Emeritus – MArch, Leeds College of Architecture; Carnegie Mellon, 1982-.

CINDY LIMAURO, Professor, Drama – MFA in Lighting Design, Florida State University; Carnegie Mellon, 1987-.

VIVIAN LOFTNESS, University Professor – MArch, Massachusetts Institute of Technology; Carnegie Mellon, 1981-.

ARTHUR LUBETZ, Adjunct Professor – BArch, Carnegie Mellon University; Carnegie Mellon, 1988-.

GERRY MATTERN, Adjunct Professor – B.E., Rose Polytechnic Institute; Carnegie Mellon, 1982-.

MICK MCNUTT, Adjunct Associate Professor – MArch, Syracuse University; Carnegie Mellon, 2007-.

CHRISTINE MONDOR, Adjunct Associate Professor – BArch, Carnegie Mellon University; Carnegie Mellon, 1999-.

IRVING OPPENHEIM, Professor – PhD, Cambridge; Carnegie Mellon, 1972-.

STEPHEN QUICK, Adjunct Professor – MArch, Cornell University; Carnegie Mellon, 2010-.

CHARLES ROSENBLUM, Adjunct Assistant Professor – PhD, University of Virginia; Carnegie Mellon, 2000-.

DIANE SHAW, Associate Professor – PhD, University of California - Berkeley; Carnegie Mellon, 1996-.

SCOTT SMITH, Director, Shop – MFA, Cranbrook; Carnegie Mellon, 1984-.

KENT SUHRBIER, Adjunct Associate Professor – BArch, Carnegie Mellon University; Carnegie Mellon, 2000-.

FRANCESCA TORELLO, Adjunct Associate Professor – PhD, Politecnico Torino; Carnegie Mellon, 2007-.

VAVARA TOULKERIDOU, Adjunct Instructor – PhD, Carnegie Mellon University; Carnegie Mellon, 2013-.

RICHARD TURSKY, Assistant Director, Digital Fabrication Lab – MArch, University of Michigan; Carnegie Mellon, 2014-.

VALENTINA VAVASIS, Adjunct Associate Professor – MBA, Northwestern University; Carnegie Mellon, 2014-.

SPIKE WOLFF, Adjunct Assistant Professor – MArch, SCI-Arc; Carnegie Mellon, 2003-.

HEATHER WORKINGER MIDGLEY, Adjunct Associate Professor – PhD, Indiana University of Pennsylvania; Carnegie Mellon, 2006-.

School of Art

John Carson, Head
Office: College of Fine Arts 300
<http://www.cmu.edu/art>

The university-based undergraduate program offered by the School of Art is designed to develop individuals capable of working as artists in a complex, rapidly changing global culture. The program incorporates an expansive approach to art and acknowledges that "working as artists" leads toward a wide variety of pursuits.

Admission to the undergraduate program is highly competitive. Students must show promise of excellence in both academic and artistic performance. Evidence of creative leadership is a plus.

The art faculty, all practicing artists or scholars, provide an intense, professional learning environment in which students develop close ties with their instructors and each other.

Art students are encouraged to take full advantage of the university environment through exposure to faculty and students in other departments in the College of Fine Arts and throughout the University. They are also encouraged to participate in the numerous cultural opportunities on campus and in the larger Pittsburgh community.

The School of Art maintains a variety of studio and workshop accommodations to make possible its wide range of media offerings. It occupies the top two floors of the College of Fine Arts building, as well as a significant portion of Doherty Hall. Numerous exhibition venues inform or present student work including the Ellis Gallery, The Miller Gallery, and the Frame Gallery, which is managed entirely by students.

The progressive curriculum requires that students attain high levels of knowledge, skill and commitment. The four-year undergraduate program offers one general Bachelor of Fine Arts (B.F.A.) in Art.

Using five categories of courses, the curriculum presents art-making in a unique manner which respects tradition and encourages innovation. The course categories are:

- I. Concept Studios
- II. Media Studios
- III. Advanced Studios
- IV. Academic Art Courses
- V. University Academic Courses

Studio courses comprise over sixty percent of the course of study and academic courses comprise the remainder. The division of the studio curriculum into conceptually-driven and media-driven courses acknowledges that neither concept nor media can be presented independently of one another. This curriculum ensures that all students experience high-quality, consistent training in a variety of approaches.

I. Concept Studios

The Concept Studios are the core of the art curriculum. Students are required to complete five concept studios, but may enroll in additional semesters. Experiences gained in the other four components of the program are integrated into Concept Studios. Themes and topics addressed in Concept Studios include: the self and the human being, space/time, systems/processes, contextual practice, and senior studio.

Freshman and sophomore Concept Studios are organized around structured assignments designed to assist the student in developing a personal, non-medium-specific approach to generating art as well as in learning transferable conceptual skills. The progression from semester to semester leads toward increasing complexity and independence. Contextual Practice Studios embrace the context or social conditions in which an artwork exists, covering a range of methods to making art in the public including street art, interactive social media, environmental art, hacktivism, participatory art, guerilla performance, project-based community art, and urban interventions. In the senior year, the Concept Studios, titled Senior Studio, are devoted to a single student-generated body of work.

II. Media Studios

The Media Studios can be viewed as the foundation courses for the program. Students take a total of seven Media Studios within the freshman and sophomore years. These studios ensure that all students have an exploratory experience with all of the media resources of the school. They also serve as preparation for advanced studio work.

Two-Dimensional Media Studios introduce drawing and imaging during the freshman year, and painting or print media during the sophomore year.

Electronic Media Studios introduce the moving image through video and animation during the freshman year, and interactivity in the sophomore year. Three-Dimensional Media Studios introduce media such as ceramics, welding, wood, metals, kinetic sculpture, and digital fabrication during the freshman year.

III. Advanced Studios

Students take a total of twelve Advanced Studio elective courses over the course of the second semester of the sophomore year and the junior and senior years. These courses address specialized studio work in one of the four artistic concentration areas in the school, which are:

- Drawing, Painting, Print Media, and Photography (DP3)
- Sculpture, Installation, and Site Work (SIS)
- Electronic and Time-Based Work (ETB)
- Contextual Practice (CP)

A minimum of four courses must be taken in one of these concentration areas. One of the twelve Advanced Studio courses must be a College of Fine Arts interdisciplinary course or in one of the Schools outside of Art: Architecture, Design, Drama, Music.

IV. Academic Art Courses

First-semester freshmen are required to take Contemporary Issues Forum (60-104), an introduction to current practices in the visual arts. A three-semester art history/theory survey sequence is then required of all students:

Freshman Year (spring):	Adventures in Arts Time
Sophomore Year (fall):	Modern Visual Culture: 1789-1960
Sophomore Year (spring):	Contemporary Visual Culture: 1960 to the Present

After the sophomore year, students must take two elective academic art courses.

V. University Academic Courses

Eleven academic courses outside of Art are required.

Freshman Year

The student is required to take the following three courses:

Computing @ Carnegie Mellon (99-101), Global Histories (79-104), and Interpretation and Argument (76-101).

After Freshman Year

The student must take one course in each of the following academic areas or "options":

- Humanities and Languages or "Culture Option"
- Math, Science and Engineering or "Technical Option"
- History, Psychology, Economics or "Social Science Option"

The student must then take at least three additional courses from ONE of the academic areas/options listed above.

Finally, the student must take two additional, but unspecified, academic electives.

In selecting courses for the university academic component of the curriculum, students are encouraged to complete a cluster of courses that appeals to and develops their interests as emerging artists. In the process of taking their university electives, students can often simultaneously earn a minor.

Bachelor of Fine Arts (B.F.A.) Curriculum

Below is the recommended distribution of courses in the four-year B.F.A. curriculum. After the freshman year, students may begin to choose university electives. After the first semester of the sophomore year, students have more options regarding the sequencing and selection of their coursework.

First Year

Fall		Units
60-101	Concept Studio: The Self and the Human Being	10
60-130-60-130	3-D Media Studio I-I Mini 1 and Mini 2 must be in different media.	10
60-150	2D Media Studio: Drawing	10
60-104	Contemporary Issues Forum	6
76-101	Interpretation and Argument	9
99-101	Computing @ Carnegie Mellon	3
		48

Spring		Units
60-110	Electronic Media Studio: Introduction to the Moving Image	10
60-131-60-131	3D Media Studio II-II Mini 3 and Mini 4 must be in different media.	10
60-160	2D Media Studio: Imaging	10
60-109	Adventures in Arts Time	9
79-104	Global Histories	9
		48

Second Year

Fall		Units
60-201	Concept Studio: Space and Time	10
or 60-202	Concept Studio: Systems and Processes	
60-210	Electronic Media Studio: Introduction to Interactivity	10
60-250	2D Media Studio: Painting	10
or 60-251	2D Media Studio: Print Media	
60-205	Modern Visual Culture 1789-1960	9
xx-xxx	Academic Elective	9
		48

Spring		Units
60-280	Introduction to Contextual Practice	10
60-4xx	Advanced Studio Elective	10
60-4xx	Advanced Studio Elective	10
60-206	Contemporary Visual Culture 1960 - Present	9
xx-xxx	Academic Elective	9
		48

Third Year

Fall		Units
60-4xx	Advanced Studio Elective	10
60-4xx	Advanced Studio Elective	10
60-4xx	Advanced Studio Elective	10
60-3xx	Academic Art Elective	9
xx-xxx	Academic Elective	9
		48

Spring		Units
60-4xx	Advanced Studio Elective	10
60-4xx	Advanced Studio Elective	10
60-4xx	Advanced Studio Elective	10
60-3xx	Academic Art Elective	9
xx-xxx	Academic Elective	9
		48

Fourth Year

Fall		Units
60-401	Senior Studio	10
60-403	Extended Studio or 60-4xx Advanced Studio Elective	10
60-4xx	Advanced Studio Elective	10
xx-xxx	Academic Elective	9
xx-xxx	Academic Elective	9
		48

Spring		Units
60-402	Senior Studio	10
60-403	Extended Studio or 60-4xx Advanced Studio Elective	10
60-4xx	Advanced Studio Elective	10
xx-xxx	Academic Elective	9
xx-xxx	Academic Elective	9
		48

Total Units for the B.F.A. Art Degree **384**

Sophomore and Senior Year Reviews

Students give an overview of their work twice in their four-year course of study. At the end of the sophomore year, students undergo a faculty review of their work to date in the program. A successful review is required for advancement to the junior year.

The senior review affords students in the fall of their final year the opportunity to review, analyze and summarize their work and to engage a faculty committee in discussion about issues that face someone preparing to enter a career in art.

Art Majors Minor or Double Majoring in Another Department

About a third of current B.F.A. Art students pursue a minor or a second major. If students are contemplating this option, they must discuss their plans with academic advisors from the minor or second major department as well as with the School of Art academic advisor.

Study Abroad

Art students are encouraged to spend either a semester of their junior year, or a summer before or after their junior year, in one of many available international programs. These programs include exchange programs sponsored by the School of Art in which a student's financial aid package remains in effect, and programs sponsored by other institutions. International exchange programs currently active include the following:

China	University of Hong Kong, Shatin, Hong Kong
France	Ecole nationale superieure des Beaux-Arts, Paris
Germany	Universitat der Kunste Berlin, Berlin
Israel	Bezalel Academy, Jerusalem
Japan	Tokyo Polytechnic University, Tokyo
Korea	The Korean National University of the Arts, Seoul
New Zealand	Auckland Institute of Technology, Auckland

Programs with other Pittsburgh Institutions

Art students are eligible to take courses at the nearby University of Pittsburgh's History of Art and Architecture Department, at Pittsburgh Filmmakers, and at the Pittsburgh Glass Center. Established agreements with these institutions and other Pittsburgh colleges, universities or centers offer cross-registration opportunities at no additional expense to the student.

BXA Intercollege Degree Programs

Bachelor of Computer Science and Arts (BCSA) Bachelor of Humanities and Arts (BHA) Bachelor of Science and Arts (BSA)

Carnegie Mellon University offers a degree program that combines an Art Focus (11 courses for BHA and BSA, 12 courses for BCSA) with a focus in the Dietrich College of Humanities and Social Sciences, the Mellon College of Science, or the School of Computer Science. The Assistant Head of the School advises BXA majors in selecting courses in the Art Focus. A description of these three programs, and a list of requirements and electives, can be found in the in the BXA Intercollege Degrees Program section of this catalog.

Art Minors

Students from other colleges and departments are eligible to pursue a minor in art. A minor requires six courses in the School of Art, selected from a list of requirements and electives as described in the Minors Offered by the College of Fine Arts section of this catalog.

Master of Fine Arts (M.F.A.) Degree

The School of Art offers a three-year program leading to a Master of Fine Arts in Art. This is a unique program designed to connect art-making to the university at large, and to Pittsburgh communities and organizations. Information about this program is available at the School of Art website: <http://www.cmu.edu/art>.

Master of Arts Management (M.A.M.) Degree

The College of Fine Arts and the Heinz College School of Public Policy and Management co-sponsor a Master of Arts Management degree. Students admitted to the M.A.M. degree program in their junior year may complete both a Bachelor of Fine Arts degree and a Master of Arts Management degree in five years. Students interested in this graduate degree should consult with advisors early in their undergraduate program.

Pre-College Programs

The School of Art maintains two pre-college programs: a Saturday program during the academic year and a six-week program during the summer. These programs are designed to prepare the college-bound high school student for college level work in art. Information on these programs may be obtained by contacting the School of Art.

Full-Time Tenure Track Faculty

KIM BECK, Associate Professor of Art – M.F.A., Rhode Island School of Design; Carnegie Mellon, 2004–.

BOB BINGHAM, Professor of Art – M.F.A., University of California, Davis; Carnegie Mellon, 1993–.

LOWRY BURGESS, Professor of Art – Post-Graduate Degree, Pennsylvania Academy of Fine Arts/University of Pennsylvania; Carnegie Mellon, 1989–.

JOHN CARSON, Regina and Marlin Miller Professor of Art and Head of the School of Art – M.F.A., California Institute of the Arts; Carnegie Mellon, 2006–.

JAMES DUESING, Professor of Art – M.F.A., University of Cincinnati; Carnegie Mellon, 1997–.

ECHO EGGBRECHT, Assistant Professor of Art – M.F.A., Hunter College, CUNY; Carnegie Mellon, 2006–.

ANDREW JOHNSON, Associate Professor of Art – M.F.A., Carnegie Mellon University; Carnegie Mellon, 2004–.

ELAINE A. KING, Professor of Art History and Theory – Ph.D., Northwestern University; Carnegie Mellon, 1981–.

CAROL KUMATA, Professor of Art – M.F.A., University of Wisconsin, Madison; Carnegie Mellon, 1979–.

GOLAN LEVIN, Associate Professor of Art – M.S., Massachusetts Institute of Technology; Carnegie Mellon, 2004–.

JOSEPH MANNINO, Professor of Art – M.F.A., University of Southern Illinois; Carnegie Mellon, 1986–.

CLAYTON MERRELL, Professor of Art – M.F.A., Yale University; Carnegie Mellon, 1998–.

ALI MOMENI, Associate Professor of Art – Ph.D., University of California at Berkeley; Carnegie Mellon, 2012–.

PAOLO PEDERCINI, Associate Professor of Art – M.F.A., Rensselaer Polytechnic Institute; Carnegie Mellon, 2009–.

RICHARD PELL, Associate Professor of Art – M.F.A., Rensselaer Polytechnic Institute; Carnegie Mellon, 2008–.

MARTIN PREKOP, Professor of Art – M.F.A., Rhode Island School of Design; Carnegie Mellon, 1993–.

MELISSA RAGONA, Associate Professor of Visual Culture and Critical Theory – Ph.D., State University of New York at Buffalo; Carnegie Mellon, 2003–.

JON RUBIN, Associate Professor of Art – M.F.A., California College of Arts and Crafts; Carnegie Mellon, 2006–.

DEVAN SHIMOYAMA, Assistant Professor of Art – M.F.A., Yale University; Carnegie Mellon, 2014–.

SUZIE SILVER, Professor of Art – M.F.A., The School of the Art Institute of Chicago; Carnegie Mellon, 1999–.

SUSANNE SLAVICK, Andrew W. Mellon Professor of Art – M.F.A., Tyler School of Art; Carnegie Mellon, 1984–.

Visiting Faculty

JOSHUA REIMAN, Visiting Assistant Professor of Art – M.F.A., Syracuse University; Carnegie Mellon, 2011–.

ANGELA WASHCO, Visiting Assistant Professor of Art – M.F.A., University of California, San Diego; Carnegie Mellon, 2015–.

Full-time Joint Appointments

CHARLEE BRODSKY, Associate Professor of Art and Photography – M.F.A., Yale University; Carnegie Mellon, 1978–.

ROGER DANNENBERG, Senior Research Computer Scientist and Artist – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1982–.

JAMIE GRUZSKA, Special Faculty and CFA Photography Administrator – M.F.A., University of Buffalo; .

JUDITH SCHACHTER, Professor of Anthropology, History, and Art – Ph.D., University of Minnesota; Carnegie Mellon, 1984–.

DYLAN VITONE, Associate Professor, School of Design – M.F.A., Massachusetts College of Art; Carnegie Mellon, 2006–.

Adjunct Courtesy Appointments

SARAH ELDRIDGE, Adjunct Faculty.

PATRICIA MAURIDES, Adjunct Faculty – M.F.A., Carnegie Mellon University; Carnegie Mellon, 1999–.

School of Design

Office: Margaret Morrison Carnegie Hall 110
<http://design.cmu.edu>

Design at Carnegie Mellon

Design is the thoughtful activity that humanizes our environment through visual communication and the shaping of products that help us in our daily lives. Whether in magazines and books, posters and exhibitions, video and film, human-computer interactions, or any of the myriad of everyday products such as furniture, consumer goods, vehicles, or medical equipment, designers play an important role in shaping the form and content of our experience.

Designers are concerned with aesthetics, but they are equally concerned with serving people. This requires more than skill in the fine arts. It also requires knowledge about the needs, desires, expectations, and capabilities of human beings. It requires skills of observation and interpretation that help us understand the people that we want to serve. More than this, however, designers must also understand the technological issues that stand behind effective products. They must understand the materials, tools, and production processes of the modern world. An education in design is an education for the mind as well as the eye and hand.

The undergraduate program enables students to develop specialized skills in the areas of Product (Industrial) Design, Communication (Graphic) Design and Environments (design for physical and digital environments), while providing them with a solid foundation in design studies. Students study systems thinking; the ability to see and solve problems at multiple levels of scale, and situate their work within larger social and environmental contexts.

The over-arching theme of the curricula is *design for interactions*, which acknowledges that 'ecologies' of products and communications often come together within complex physical and digital environments. Coursework balances making and theory with the integration of new, emergent technologies. Students are encouraged to explore the scope of design as well as the responsibility and ethics involved in the design of interactions between people, the built world, and the environment.

The curriculum is one that provides students with the ability to customize their degree: they may choose to specialize in one of three areas offered (Products, Communications, Environments), but also have the option of combining any two, to create a unique, interdisciplinary design degree.

The undergraduate curriculum also introduces students to three important areas of design focus: design for service, design for social innovation and transition design. These represent both new and established design approaches to framing and solving problems. In their senior year, students bring their disciplinary specialty (communications, products or environments) to projects that are situated within the areas of design for service and/or design for social innovation.

The School offers a Bachelor of Design with tracks in Communications, Products, or Environments.

Communications

The ability to communicate and shape meaning is one of the most powerful and ubiquitous forms of design in today's world. Students learn to design effective communications across a wide variety of media that *always* exist within complex webs of interactions between people, products, and environments. Areas of study include narrative and storytelling, information design, and a variety of analog and digital visualization techniques. Students develop the ability to identify specific audiences and communicate to them through effective visual, verbal and aural communications that educate, inform and delight.

They study the dynamic and 'emergent' characteristics of communications in a globally networked society where technologies and modes of individual and mass communication are constantly changing. Students learn systems thinking and engage in an iterative, multi-disciplinary and collaborative design process that involves research, observation, prototyping and rigorous evaluation. Students develop the ability to identify and communicate to specific audiences through effective visual and verbal communications that educate, inform, delight and invite participation.

Products

Students learn to design products and their interactions within the context of human needs and they develop a deep understanding of the ways in which products shape behavior. Our curriculum acknowledges that no product exists in isolation—it is *always* part of a larger system comprised of people, communications and environments. Within the context of design for service, products exist as 'touchpoints' in a service ecology. For this reason, students learn systems thinking and engage in an iterative, multi-disciplinary and collaborative design process that involves research, observation, modeling/prototyping and rigorous evaluation.

Students are introduced to current production and manufacturing processes as well as sustainable approaches, such as cradle-to-cradle, lifecycle analysis and the use of new, more environmentally friendly materials. The School has a well-equipped analog and digital prototyping facility where students work with traditional materials such as wood and metal and learn to design and prototype using CAD software and 3D digital printers.

Environments

Students learn to design for complex environments that exist in the digital, physical and multi-modal realms. Most of the products and communications we interact with are situated within complex physical spaces (our homes, classrooms, places of business, shopping malls, even amusement parks). We also interact with complex online environments such as large websites, social networking and virtual reality environments. And increasingly we interact in 'smart' physical spaces with multi-modal communications in a combination of the analog and the digital.

In our curriculum, environments are seen as integrated and dynamic systems that require the design of interactions at multiple levels of scale. Students acquire a diverse set of skills that includes a deep understanding of spatial relationships, designing *with* and *for* emerging, multi-media technologies and an understanding of the cognitive challenges presented by multi-modal spaces.

Students who focus on the design of environments delve deep into systems thinking and systems dynamics and spend time learning to collaborate and lead within multi-disciplinary teams (solving large problems involving complex spaces almost always involves teams of people from different disciplines).

Design Minor Program

The School also offers a minor in Design for well-qualified students. Further information on the minor program is provided earlier in the catalog.

The Design Curriculum

The design curriculum is for students who are interested in full-time undergraduate study leading to entry-level professional employment or advanced graduate study in the areas of Communication Design, Product Design, or Design for Environments. The first year is a period of discovery, where students explore studio projects and supporting courses in the ideas and methods of design practice as well as courses in design studies. The second and third years are a period of concentration and development primarily within the student's area(s) of specialization. The fourth year is a period of integration and advanced study, with studio projects involving teams of students from all areas of design. There are studio courses throughout all four years, supported by departmental electives in the ideas and methods of design practice and other courses in the history, theory, and criticism of design. In addition, the School also requires all students to take a substantial number of general education courses offered by other departments throughout the university. General education is an essential part of the education of a professional designer.

Foundation Year

In their freshmen year, students are introduced to all three areas of design specialty: Product (Industrial), Communication (Graphic) and digital and physical Environments. Here, they explore these unique and complementary areas of design and gain a wide range of skill sets such as systems thinking, iterative process, collaboration and visualization, and work in both two and three dimensional materials as well as digital media.

At the end of their freshman year, students are given the opportunity to begin to focus their interests in two of three design areas (products/

communications/environments) and will eventually decide upon a single area of focus or a dual path of study.

This is the first-year curriculum for all design students.

First Year

Fall

Studio		Units
51-101	Studio: Survey of Design	9
51-103	Design Workshop I	3
Ideas and Methods		Units
51-121	Visualizing	9
Design Studies		Units
51-171	Placing	9
General Education		Units
76-101	Interpretation and Argument	9
85-102	Introduction to Psychology	9
99-101	Computing @ Carnegie Mellon	3

Spring

Studio		Units
51-102	Design Lab	9
51-104	Design Workshop II	3
Ideas and Methods		Units
51-122	Collaborative Visualizing	9
51-132	Introduction to Photo Design 1st mini	4.5
51-134	Photo Design II 2nd mini	4.5
Design Studies		Units
51-172	Systems	9
General Education		Units
79-104	Global Histories	9

Second Year

Following the first-year program, students select two out of three areas of interest: Products[P], Communications[C], Environments[E]. In the fourth semester students select one of the two areas to study more deeply. Students investigate the relationships people form with designed artifacts and the roles that physical, visual, and digital forms play in our lives. They apply what they learn to the design of products, communications, and environments that facilitate interactions. Students are also required to take general education courses to gain a broad vision of many disciplines and fields of knowledge that are relevant to design.

Second Year

Fall

Studio		Units
51-225	Communications Studio I: Understanding Form & Context (Pick two)	4.5, 4.5
or 51-245	Products Studio I: Understanding Form & Context	
or 51-265	Environments Studio I: Understanding Form & Context	
Ideas and Methods		Units
51-227	Prototyping Lab I: Communications (Pick two corresponding labs)	4.5, 4.5
or 51-247	Prototyping Lab I: Products	
or 51-267	Prototyping Lab I: Environments	
51-2xx	Design Selective (choose from list)	9
Design Studies		Units
51-271	How People Work	9
General Education		Units
xx-xxx	Academic Elective	9

Spring

Studio		Units
51-228	Communications Studio II: Designing Communications for Interactions	9
or 51-248	Products Studio II: Designing Products for Interactions	
or 51-268	Environments Studio II: Designing Environments for Interaction	
Ideas and Methods		Units
51-208	Research Methods	9
51-239	Prototyping Lab II: Communications	9
or 51-249	Prototyping Lab II: Products	
or 51-269	Prototyping Lab II: Environments	
Design Studies		Units
51-272	Cultures	9
General Education		Units
xx-xxx	Academic Elective	9

Third Year

In the fifth and sixth semesters, students may choose to continue their fourth semester area of focus, or they may choose to study their second area of study from the third semester. Students study how design functions at various levels of scale and degrees of complexity situated in specific contexts. They design products, communications, and environments that function as cohesive systems that live within the built and social worlds.

Third Year

Fall

Studio		Units
51-323	Communications Studio III: Designing for Complex Communication Systems	9
or 51-343	Products Studio III: Designing for Complex Products Systems	
or 51-363	Environments Studio III: Designing for Complex Environment Systems	
Ideas and Methods (Select one Design Elective)		Units
51-321	Photographic Narrative	9
51-231	Calligraphy I	9
51-257	Introduction to Computing for Creative Practices	10
51-349	Visual Notation/Journaling	9
51-322	Advanced Digital Imaging	4.5
51-335	Mapping and Diagraming	9
51-359	Prototyping Tools for Embodying UX Design	9
51-355	Experimental Sketching	4.5
51-399	Junior Independent Study	Var.
Design Studies		Units
51-371	Futures	9
General Education		Units
xx-xxx	Academic Elective	9
xx-xxx	Free Elective	9

Spring

Studio		Units
51-330	Communications Studio IV: Designing Communications for Social Systems	9
or 51-350	Products Studio IV: Designing Products for Social Systems	
or 51-360	Environments Studio IV: Designing Environments for Social Systems	
Ideas and Methods (Select one Design Elective)		Units
51-322	Advanced Digital Imaging	4.5
51-328	Advanced Web Design	9
51-334	Photography, Community & Change	9
51-344	Advanced Digital Prototyping	6
51-346	Production Prototyping	6
51-376	Semantics & Aesthetics	9
51-380	Experiential Media Design	9

51-388	Sharing Economies	9
Design Studies		Units
51-372	Persuasion	9
General Education		Units
xx-xxx	Academic Elective	9
xx-xxx	Free Elective	9

Fourth Year

In the senior year, students work to identify their next steps in professional practice, entrepreneurship, or in academia. They apply their design skills and knowledge to client-based and/or self-defined projects that focus on the design of services or social innovation.

The fall semester features the Design Research Studio, a semester-long project where students work in teams applying skill and knowledge learned in Products, Communications, and/or Environments. In the spring the Capstone Project challenges students to work independently on a semester-long project, deepening their understanding of service or social innovation design principles.

Fourth Year

Fall

Studio		Units
51-481	Design Research Studio: Service Design	12
or 51-491	Design Research Studio: Design for Social Innovation	

Ideas and Methods (Select one Design Elective)		Units
51-379	Information+Interaction+Perception	9
51-423	Pieces 2.0: Social Innovation: Desis Lab	9
51-441	Foundation of BME Design	6

xx-xxx	Free Elective	9

Other Requirements

General education courses should be selected from other departments throughout the university. Students are strongly advised to select a balanced set of general education electives-in addition to Interpretation and Argument, Global Histories and Introduction to Psychology - from three broad areas of study: arts and humanities, social and behavioral sciences, and natural sciences and engineering, including mathematics. While free electives may include studio courses in other departments, academic electives are non-studio (lecture) courses in other departments. Specific recommendations (and general requirements) for electives in all of these areas are available from advisors in the School of Design. The School places strong emphasis on the value of general education for personal growth as well as professional development. General education electives allow a student to obtain a minor in another department or program, such as business, human-computer interaction, IDEATE, engineering, professional and technical writing, or architecture.

Students may enroll for no more than 18 units of independent study courses, and no more than one independent study per semester. A minimum 3.0 GPA is required for independent study. Independent study is permitted only in the third and fourth years of the program. Proposals for independent study courses must be developed jointly by the student and a faculty advisor. Guidelines are available from the School.

A minimum GPA of 2.0 is required to maintain Professional Program status. Grades lower than "C" in required Design courses will result in academic probation, suspension, or drop from the School of Design.

Full-time students are required to enroll for a minimum of 36 units per semester, with 45 units required for expected degree progress (typically five courses per semester). The minimum number of units required for graduation in Design is 360.

Standards

The design curriculum adheres closely to the fundamental professional entry-level standards established by the two leading national design organizations: the American Institute of Graphic Arts (AIGA) and the Industrial Designers Society of America (IDSA).

Applications

The School of Design accepts applications from students who are completing secondary education or who wish to transfer from within Carnegie Mellon University. The School also accepts applications from students who wish to transfer from other institutions. Students applying for the program are asked to either 1) submit a portfolio or 2) complete a design project (available as a PDF on the Design web site) as evidence of design ability. This is considered in balance with evidence of academic ability, based on secondary school grades, SAT scores, class rank, and letters of recommendation. The School also accepts applications for the design minors program for a limited number of spaces. Details are available from the design office.

Faculty

ERIC ANDERSON, Associate Professor of Design - M.A., Ohio State University; Carnegie Mellon, 1998-.

MARK BASKINGER, Associate Professor of Design - M.F.A., University of Illinois; Carnegie Mellon, 2003-.

DANIEL BOYARSKI, Professor of Design - M.F.A., Indiana University School for Design, Kunstgewerbeschule, Basel, Switzerland; Carnegie Mellon, 1982-.

CHARLEE MAE BRODSKY, Professor of Photography - M.F.A., Yale University; Carnegie Mellon, 1978-.

WAYNE CHUNG, Associate Professor of Design - MID, University of the Arts; Carnegie Mellon, 2007-.

JODI FORLIZZI, Professor, joint faculty in Design and Human Computer Interaction Institute - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2000-.

BRUCE HANINGTON, Associate Professor of Design of Environmental and Industrial Design - Master of Environmental and Industrial Design, University of Calgary; Carnegie Mellon, 1998-.

KRISTIN HUGHES, Associate Professor of Design - M.F.A., Virginia Commonwealth University; Carnegie Mellon, 2001-.

AISLING KELLIHER, Associate Professor – M.S. & Ph.D, MIT; Carnegie Mellon, 2012–.

MARK MENTZER, Professor of Drawing – B.F.A., Carnegie Mellon University; Carnegie Mellon, 1975–.

THOMAS L. MERRIMAN, Teaching Professor in Design – B.F.A., Carnegie Mellon University; Carnegie Mellon, 1985–.

STACIE ROHRBACH, Associate Professor of Design – MGD, North Carolina State University; Carnegie Mellon, 2003–.

PETER SCUPELLI, Assistant Professor – MDes & Ph.D, Carnegie Mellon; Carnegie Mellon, 2011–.

STEPHEN J. STADELMEIER, Associate Professor of Design – M.S., Cornell University; Carnegie Mellon, 1977–.

CAMERON TONKINWISE, Associate Professor – Ph.D, University of Sydney; Carnegie Mellon, 2012–.

ANDREW TWIGG, Assistant Teaching Professor – B.A., Allegheny College; Carnegie Mellon, 2014–.

DYLAN VITONE, Associate Professor – M.F.A., Massachusetts College of Art; Carnegie Mellon, 2004–.

JOHN ZIMMERMAN, Associate Professor, joint faculty in Design and Human Computer Interaction Institute – MDes, Carnegie Mellon University; Carnegie Mellon, 2002–.

MATT ZYWICA, Assistant Teaching Professor – B.F.A., University of Illinois; Carnegie Mellon, 2014–.

Courtesy Appointments

LUIS VON AHN, Assistant Professor of Computer Science – Ph.D, Carnegie Mellon University; Carnegie Mellon, 2005–.

JONATHAN CAGAN, George Tallman Ladd Professor of Mechanical Engineering – Ph.D., University of California Berkeley.; .

SUGURU ISHIZAKI, Associate Professor of Rhetoric and Visual Design – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2005–.

DAVID S. KAUFER, Professor of English and Rhetoric – Ph.D., University of Wisconsin; Carnegie Mellon, 1980–.

GOLAN LEVIN, Associate Professor of Art – M.S., Massachusetts Institute of Technology; Carnegie Mellon, 2004–.

Special Faculty

JOSEPH M. BALLAY, IDSA, Professor of Design, Emeritus – M.F.A., Carnegie Mellon University; Carnegie Mellon, 1970-2002–.

ROBERT O. SWINEHART, Professor of Design, Emeritus – M.F.A., Northern Illinois University; Carnegie Mellon, 1974 - 2010–.

School of Drama

Peter Cooke, Head of School
Office: Purnell Center for the Arts, 221
<http://www.drama.cmu.edu>

The information contained in this section is accurate as of July 31, 2015 and is subject to change. Please contact the School of Drama with any questions.

The School of Drama at Carnegie Mellon University is the oldest drama program in the country. CMU Drama offers rigorous, world-class classical training in theater while providing thorough preparation for contemporary media.

As a member of the Consortium of Conservatory Theater Training Programs, the school chooses students to participate in the program based on their potential ability. Every Drama student is treated as a member of a theatrical organization and must acquire experience in all phases of the dramatic arts. Students are also asked to broaden their knowledge through courses in the other colleges of the university. The undergraduate Drama program, which incorporates approximately 200 students, leads to a Bachelor of Fine Arts in Drama. The options available are: Acting, Music Theater, Design, Production Technology and Management, Directing, Dramaturgy, and Theater Studies. The production of plays, a natural extension of demanding class work, is our lab, and constitutes one of the school's major activities. The choice of texts used is determined by the particular needs of current students. Each semester, 15 to 25 lab productions, directed by faculty, guest directors, and advanced students, are presented in our three theater spaces. The labs range from completely mounted, full-length dramatic and musical works to more simply produced directing projects and one-acts. The Drama program is rigorous and exacting, making demands on students that necessitate good health, a willingness to work and a commitment to professional discipline at all times. Because of full daytime class work and heavy production schedules, much production preparation takes place in the evening. Drama students, therefore, are advised to live in residence halls or in the immediate vicinity of the campus.

Acting Option

The Acting option is designed to prepare the student for immediate entry into the profession. It is a sequence-based training program with accumulative skills building upon each other over the course of four years. It is a conservatory training course, and the curriculum focuses primarily on the technique and craft of theater. At the same time it offers skills that are applicable to all media. Courses in acting, voice, speech, movement, and theater history are integral parts of the program at all four levels.

In addition to studio classes, Acting majors are required to take at least one liberal arts class each semester outside the school of drama to expand their intellectual curiosity and worldview.

All students must demonstrate a commitment to growth, show continued progress in their work and in the knowledge of their craft, and show a respect for professional standards in discipline, quality and ethics.

The freshman year is a discovery year and provides an introduction to basic skills-working from self, learning to play objectives and actions and the beginning of character exploration.

In the sophomore year these skills are solidified and deepened as more sophisticated, verbally complex material is introduced, through a focus on in-depth scene study, both contemporary and Shakespeare.

In the junior year students continue to develop their craft by investigating a variety of styles, including Greek, Brecht, and Restoration. Skills are now tested and strengthened through public performance.

The senior year provides a bridge from training to the professional world and offers the opportunity to appear on the School of Drama's main stage.

At the end of the senior year, students are introduced to the profession through Showcase performances in New York City and Los Angeles. The privilege to participate in Showcase is subject to the approval of the School of Drama faculty and as a rule is granted only to students who have obtained the necessary credits for graduation.

Music Theater Option

The students in the Music Theater program share the training philosophy and much of the same curriculum as others in the acting option. In addition, they take courses particular to the demands of Music Theater. These include private voice along with training in a variety of dance techniques (Ballet, Jazz, Tap and Broadway Styles) and music theater styles and skills.

Design Option

Design students are expected to develop artistic ability in the conception and execution of scene, lighting, sound and costume design for plays of all periods under varying theatrical conditions. Students may elect to have a focus on one or two areas but must have a solid background in all four. Freshmen in design receive instruction in drawing and painting, three-dimensional techniques, and in the application of basic design principles through courses in drawing and design. Sophomores learn to apply design principles to the theater through research, play analysis, and studies in the fundamentals of scene, lighting, sound and costume design. Design assignments cover various styles and periods and include the preparation of models, renderings, and working drawings, lighting storyboards, and light plots. Juniors and Seniors take specialized courses in two areas of stage design and are expected to head studio and main-stage production crews. As part of the degree work, juniors may design sets, lights, sound or costumes for a production in the Studio Theater and seniors may design sets, lights, sound or costumes for a Master's thesis show or a main-stage production. Designing for lab productions, both those that are highly resourced and those that are moderately resourced, requires a variety of creative approaches, preparing designers for a variety of real-world situations.

Directing Option

The John Wells Directing Program promotes creativity, intellectual curiosity, a broad and well-rounded understanding of the theater and leadership ability. It provides a detailed exploration of the technique of directing for stage and for camera. The curriculum is designed for those serious about the art of directing and intending to pursue a career in theater, film or television.

Course work in scene design, lighting and costume design develops the students' visual sophistication as well as an understanding of how these elements combine in practical production situations. Stage management skills are studied and practiced. Theater history, criticism, play-writing, play development and theater management classes introduce the student to the wide range of knowledge necessary for directing. There are many avenues open for practical application: scene work in class, a short film written and directed by the students, opportunities in multi-camera directing and a studio project. The broad scope of the directing curriculum encourages the director's interaction with all the theatrical disciplines. Collaboration in all forms, so necessary to the art, is the goal.

Production Technology and Management (PTM) Option

The Production Technology and Management program develops the technologists and managers of the future with an intensive curriculum designed to synthesize academic development and production experience. The curriculum focuses on the production requirements of live performance, in the form of traditional theatrical presentation, while also providing exposure to television, film and emerging technology-based art forms. Integrated in a world class research university environment, the School of Drama is uniquely positioned to contribute to the advancement of the collaborative arts. The goal of the PTM program is to prepare today's students to become tomorrow's leading professionals in the entertainment industry.

All undergraduate students begin with the development of visual and written communication skills. The first four semesters immerse the student in a range of collaborative and individual studies: scenery, costume, sound and lighting design fundamentals; dramatic structure and interpretation; manual and computer-based drafting; perspective and figure drawing, fundamentals of directing; production management and preparation, history of art and history of architecture and décor. The last four semesters focus

in the student's analytical skills within their chosen area of concentration: technical direction or stage/production management.

Technical Directors are offered classes in: material applications, metal working techniques, structural design, scenic crafts, fabrication design and detailing, machinery design, rigging techniques, power system and electronic design fundamentals, introduction to sound design, automation system technology, technical management and production management. Technical Directors may take a single semester internship at an approved regional or commercial producing organization, in lieu of one semester of study. Student selected elective courses, outside the School of Drama, provide balance and breadth to the professional undergraduate education offered in the PTM program of study.

Stage Managers and Production Managers are offered classes in: stage management, production planning and scheduling, theater management, introduction to accounting, cash budgeting, producing for television and film, camera lab, computer applications, technical management, organizational behavior, principles of economics, business communications and production management workshop. Stage and Production Managers may take a single semester internship at an approved regional or commercial producing organization, in lieu of one semester of study. Student selected elective courses, outside the School of Drama, provide balance and breadth to the professional undergraduate education offered in the PTM program of study.

Dramaturgy Option

Dramaturgy is the number-one growth field in the entertainment industry. Dramaturgs are theater insiders who thrive on the process of being behind living theater events. They love reading, writing, and thinking and believe in the power of theater to enlighten, stimulate and entertain audiences. Through Carnegie Mellon University's new and innovative Dramaturgy Option you'll become an expert on historical practices and aesthetic theories behind any text, whether in production or waiting to come alive on stage. You will have the insights to reveal playwrights' intentions and the ability to communicate them to producers, directors, performers, and audiences.

The Dramaturgy adapts traditional, historical, and classic texts for the modern stage; aids directors, designers, and performers in clarifying their insights; collaborates with artistic directors in choosing exceptional repertory; finds social relevance in every work; links audiences with the ideas behind the productions in program notes, lectures, and talk-backs.

You will receive rigorous, highly structured academic and artistic training; broad and deep historical research; intensive study of aesthetic and critical theories; practical, professional-level experience in full scale theater productions; opportunities to develop diversity by studying with Carnegie Mellon University professors in other arts as well as in the sciences and humanities; opportunities to study abroad; opportunities to work with professional companies in the US, Asia, Latin America, Africa, and Europe.

Your career possibilities include literary management; story editing for films and television; production dramaturgy; teaching: developing the talents and insights of students at educational institutions.

Theater Studies Option

The Theater Studies option offers students from any of the School's conservatory areas of specialized study the opportunity to continue developing their theater related skills while expanding their interests to other artistic and academic areas. This option will only be available to Drama students who have completed their sophomore year in the School of Drama (ie: two years of conservatory training). Students are required to write a proposal outlining their interests in the Theater Studies option, and the proposal must be approved by the Head of the School of Drama.

The goal of the Theater Studies option is to enable students to explore the diverse opportunities for which conservatory drama training can be a basis, and to examine the possibility of post graduate education in a new area of specialization after obtaining a BFA in Drama. As the intent of the Theater Studies option is to broaden your experiences, a semester studying abroad or participating in a recommended internship is required for one semester, either in the fall or spring. Individualized courses of study are established for each student in consultation with an appropriate faculty advisor.

Curriculum

The School of Drama curriculum is continuously reviewed and modified in an effort to provide the best conservatory experience for undergraduate students in the School of Drama. The following curriculum is subject to change. Not all requirements are listed, and units are often variable within

each Option based on performances, production assignments, and individual projects.

Acting Option

Freshman Year

Fall		Units
54-011	Warmup	1
54-101	Acting I	10
54-103	Speech I	6
54-105	Voice/Alexander I	5
54-107	Movement I	4
54-110	Text for Actors	2
54-159	Production Symposium I	6
54-175	Conservatory Hour	1
54-177	Foundations of Drama I	6
79-104	Global Histories	9
99-101	Computing @ Carnegie Mellon	3

Spring		Units
54-012	Warmup	1
54-102	Acting I	10
54-104	Speech I	6
54-106	Voice/Alexander I	5
54-108	Movement I	4
54-160	Production Symposium I	6
54-176	Conservatory Hour	1
76-101	Interpretation and Argument	9
xx-xxx	Non-Drama Elective	6-9

Sophomore Year

Fall		Units
54-201	Acting II	12
54-203	Voice and Speech II	5
54-207	Movement II	5
54-211	Actor Dance II	3
54-261	Production Symposium II (in either Fall or Spring)	6
54-281	Foundations of Drama II or H&SS Approved Elective *	6
xx-xxx	Non-Drama Elective	6-9
54-213	Singing for Actors II (Optional)	3

Spring		Units
54-202	Acting II	12
54-204	Voice and Speech II	6
54-208	Movement II	3
54-212	Actor Dance II	3
54-242	Improvisation	2
54-262	Production Symposium II (in either Fall or Spring)	6
54-282	Foundations of Drama II or H&SS Approved Elective *	6
xx-xxx	Non-Drama Elective	6-9
54-214	Singing for Actors II (Optional)	3

Junior Year

Fall		Units
54-301	Acting III	10
54-305	Voice/Alexander III	5
54-307	Movement III	5
54-309	Accents for the Stage	6
54-311	Rehearsal and Performance III	16
54-325	Actor Dance III	2
54-409	Theatre Lab for Undergraduates	4
xx-xxx	Non-Drama Elective	6-9
54-317	Singing for Actors III (Optional)	2

54-327	Junior Auditioning (Optional)	2
Spring		Units
54-302	Acting III	10
54-304	Dialects for the Stage	6
54-306	Voice/Alexander III	5
54-308	Movement III	5
54-312	Rehearsal and Performance III	16
54-326	Actor Dance III	2
xx-xxx	Non-Drama Elective	6-9
54-318	Singing for Actors III (Optional)	2
54-327	Junior Auditioning (Optional)	2

Senior Year

Fall		Units
54-285	Alexander Technique (Optional)	1.5
54-381	Special Topics in Drama: History, Literature and Criticism	6
54-401	Camera Lab	3
54-407	Movement IV	4
54-411	Rehearsal and Performance IV	16
54-413	Showcase	4
54-419	Voice & Speech IV	3
54-493	Business of Acting	4
54-519	Acting for the Camera	6
54-405	Undergraduate Future Stages	6
xx-xxx	Non-Drama Elective	
54-403	Voice Over Acting (Optional)	3
Spring		Units
54-285	Alexander Technique (Optional)	1.5
54-402	Camera Lab	3
54-412	Rehearsal and Performance IV	16
54-414	Showcase	9
54-421	Directing: Text to Stage	3
54-438	Acting IV	3
54-520	Acting for the Camera	6
xx-xxx	Non-Drama Elective	6-9

NON-DRAMA ELECTIVES:

Actors take a minimum of seven Non-Drama Electives, 6-9 units each.

Notes:

* Foundations of Drama II will be taken only one semester in the sophomore year. Sophomore Actors will be required to take an approved Humanities & Social Sciences (HSS) course in the Deitrich College during the semester they are not taking Foundations of Drama II. This H&SS course counts as one of the seven required Non-Drama Electives.

Music Theater Option

Freshman Year

Fall		Units
54-101	Acting I	10
54-103	Speech I	6
54-105	Voice/Alexander I	5
54-107	Movement I	4

DIRECTED ELECTIVES: ENGLISH Units
Dramaturgy students take 7 English courses (one theory course, four 200-300 level, two 400-level)

Sample Recommended English Electives:

76-245	Shakespeare: Tragedies and Histories	9
76-247	Shakespeare: Comedies and Romances	9
76-330	Medieval Literature	9
76-331	Renaissance Literary and Cultural Studies	9
76-335	20th Century American: Mid-20th Century Fiction	9
76-431	Chaucer	9
76-432	Advanced Seminar in African American Studies	9
76-438	Film and Media Studies: Television	9

DIRECTED ELECTIVES: HISTORY Units
Dramaturgy students take at least 3 History courses (two 200-level and one 300-level). One course must focus on history pre-1900, and one must focus on African, Asian, Latin American, or Caribbean studies.

DIRECTED ELECTIVES: EUROPEAN STUDIES Units
Dramaturgy students take one European Studies course (cannot be an English course, but can be a History course)

DIRECTED ELECTIVES: FOREIGN LANGUAGE Units
Dramaturgy students take at least one Foreign Language course at the 200-level or above.

DIRECTED ELECTIVES: DRAMA Units
Dramaturgy students take at least ONE of the following Drama courses:

54-101	Acting I	10
54-187	Introduction to Playwriting	9
54-221	Directing II: Fundamentals	Var.
54-330	Introduction to Stage Management	6

NON-DRAMATURGY ELECTIVES:
Dramaturgy students take a minimum of seven Non-Dramaturgy Electives, 6-9 units each.

Notes:

- * Dramaturgy students starting a modern language at the 100-level should begin in the fall of freshman year.
- ** Dramaturgy 3, 4, 5, and 6 may be taken in any order in the sophomore, junior, and senior year.
- *** Dramaturgy students are required to take a total of 18 units of Special Topics in Drama: History, Literature and Criticism during their junior and senior year.
- ~ Dramaturgy Internship may be completed in the summer, fall, or spring semester of junior senior year.

School of Music

Denis Colwell, Head
Office: The College of Fine Arts 105
<http://music.cmu.edu/>

The School of Music at Carnegie Mellon University offers the best aspects of conservatory training within a great university, combining preparation for a lifetime in performance, composition or music and technology with the advantages of learning in an intense academic environment. Every student in the School of Music is a performance, composition or music and technology major. The School of Music is an accredited institutional member of the National Association of Schools of Music.

Each performance major is challenged to develop through individual instruction with master teachers. The School's relationship with the renowned Pittsburgh Symphony Orchestra is among the strongest conservatory-symphony orchestra relationships in the United States, and Pittsburgh's uniquely strong sense of musical community fosters close relationships with the Pittsburgh Opera, Opera Theater of Pittsburgh, Pittsburgh Ballet Theatre, Pittsburgh Chamber Music Society, and a host of other professional musical organizations.

Regular performing ensembles include the Carnegie Mellon Philharmonic, Wind Ensemble, Baroque Ensemble, Contemporary Ensemble, Jazz Orchestra, Jazz Vocal Ensemble, Chorus, and Opera. Some of the School's ensembles are instrument specific: Chamber Music ensembles and the Percussion Ensemble, among others. Opportunities for performance are stressed – undergraduate performance majors perform junior and senior recitals, chamber music is publicly presented, frequent performance opportunities on and off campus are provided, and community outreach is vigorously supported.

The School of Music has an intense commitment to new music, led by composition faculty, conductors who devote fully rehearsed cycles of the Philharmonic to works by student composers, and studio faculty whose own performing careers regularly feature new works, and including regular performances of student works in almost every Contemporary Ensemble Program, frequent opportunities with the Wind Ensemble and Chorus, and inclusion on student recitals. The School's state-of-the-art recording facilities are an especially important resource for composers beginning their public careers.

All teaching is entrusted to professional faculty — there are no assistant studio teachers or doctoral teaching fellows — and specialists in Musicology, Theory, Counterpoint, Analysis, Composition, Computer Music, Eurhythmics, Solfege, Music Education, Pedagogy, Collaborative Piano and Coaching, Acting and Movement, Diction, Literature and Repertoire, Baroque Music, Chamber Music, Jazz, Conducting, and Recording Science provide a broad and rich platform for comprehensive musical preparation. At the same time, the university provides the greatest possible support for students combining their majors with minors in all disciplines, unique joint degree programs, and double major programs. These opportunities significantly increase a student's career options and marketability in the changing professional world of music.

Facilities

The teaching facilities of the School of Music are located on the ground, main, and mezzanine floors of the College of Fine Arts, on the first floor of Margaret Morrison Hall, and in Skibo Gymnasium. Teaching, rehearsal, and practice rooms are equipped with Steinway pianos. Music students also have access to a state-of-the-art recording studio and music technology cluster. Performances take place in Kresge Recital Hall, Carnegie Music Hall, Alumni Concert Hall, and Mellon Institute Auditorium. The Hunt Library houses a fine collection of books, records, and scores. Listening and conference rooms are also available in the library.

School of Music Options

The School of Music offers a Bachelor of Fine Arts in the following areas:

- Performance (Instrumental, Voice, Piano, Organ)
- Composition

To earn a Bachelor's degree in either of these options, a candidate must satisfactorily fulfill all the requirements of the School of Music.

The School of Music jointly with the School of Computer Science and the Carnegie Institute of Technology offers a Bachelor of Science in the following area:

- Music and Technology

Within the options listed above eligible students may elect specializations in the following areas:

- Dalcroze Eurhythmics Certificate
- Piano Pedagogy Certificate
- Collaborative Piano Minor
- Conducting Minor
- Music Education Certification Minor
- Music Technology Minor
- Music Theory Minor
- Sound Design Minor

Dalcroze Eurhythmics Certificate

This program is designed to prepare teachers in the Dalcroze approach to music learning. The course of study includes eurhythmics, piano improvisation, and Dalcroze pedagogy. Carnegie Mellon undergraduates may enter the Dalcroze Training Program during their junior year. However, the certificate will be granted only upon completion of their undergraduate degree. This program is recommended particularly to students who would like to incorporate Dalcroze principles into their teaching and to those who want to obtain more experience in this field.

Piano Pedagogy Certificate

A two-year program leading to certification in piano pedagogy is open to current Carnegie Mellon keyboard majors. Piano and organ majors learn to teach piano in a closely supervised environment of class piano instruction. This program has received national acclaim as a model of excellence, with Carnegie Mellon children consistently capturing prestigious awards in national piano competitions.

Collaborative Piano Minor

The collaborative piano minor consists of a six-semester sequence of courses designed to give the students experience with vocalists and instrumentalists. There are individual coaching sessions as well as practical experience in vocal and instrumental studios.

Conducting Minor

This program is designed for students who are interested in acquiring conducting skills, in anticipation of either graduate study in conducting or a music education career. It includes required courses in basic conducting techniques for both choral and instrumental ensembles, orchestration, score reading/keyboard harmony, and elective courses in instrumental and vocal methods, diction, and literature and repertoire.

Music Education Certification Minor

Music Education Certification is a five-year program, with courses starting in the sophomore year. Bachelor of Fine Arts candidates who complete this program and pass the Praxis tests will receive Pennsylvania state certification in music (K-12), which is recognized in almost all other states.

Music Technology Minor

The student will take a series of courses which may include electronic and computer music, recording technology, the physics of sound, and computer programming. A rich computer music research environment enables talented students to work as programmers with outstanding faculty researchers, whose current projects are gaining international recognition in the areas of computer music and artificial intelligence.

Music Theory Minor

This program is designed for students who are interested in advanced theory and analysis skills, in anticipation of either graduate study in theory or graduate study that requires a substantial level of theory knowledge. The student will take advanced theory and analysis courses and also support courses in the physics of musical sound and the psychology of music.

Sound Design Minor

Students in the Sound Design concentration will explore the processes and products of digital sound and music. They will receive basic training in key component areas: principles of computer music, hybrid instrument building, concepts in sound design. Combining this training with courses that bring together experts from many disciplines, they will create experimental music or explore new, technology-enabled, applications and markets for sound design, music creation, and performance.

Performances and Activities of the School of Music

The School of Music sponsors performances, master classes, and lectures by outstanding national and international guest artists. Announcements of faculty, student, and guest performances are released every month to the students and the community.

General Requirements for BFA Candidates

Candidates for the Bachelor of Fine Arts degree in composition are required to complete a composition for orchestra in their senior year.

Candidates for the Bachelor of Fine Arts degree in performance are required to give public performances in their junior and senior years. Candidates for the Bachelor of Fine Arts degree in string performance are required to give public performances in their sophomore, junior, and senior years.

Candidates for the Bachelor of Fine Arts degree in performance are required to pass one semester (piano majors must pass two semesters) of a course that includes experience with pedagogy for their major studio area.

- Instrumental majors must take the class for their area to fulfill the Pedagogy Course requirement on the Instrumental curriculum (57-023 Bassoon Studio Performance Class, 57-448 Brass Pedagogy 57-437 Literature and Repertoire, 57-022 Clarinet Studio Performance Class, 57-018 Double Bass Studio Performance Class, 57-020 Flute Studio Performance Class, 57-437 Literature and Repertoire, 57-449 Beginning Piano for Children, 57-021 Oboe Studio Performance Class, 57-030 Percussion Studio Performance Class, 57-016 Viola Studio Performance Class, 57-015 Violin Studio Performance Class).
- Bagpipe, organ and saxophone majors must fulfill the pedagogy requirement as part of satisfying all demands outlined in their Major Studio syllabi, 57-522 Major Studio (Bagpipe), 57-502 Major Studio (Organ) and 57-514 Major Studio (Saxophone).
- Piano majors must take 57-273 Piano Pedagogy I and 57-274 Piano Pedagogy II.
- Voice majors must take 57-010 Voice Studio Performance Class.

Candidates for the Bachelor of Fine Arts degree in applied areas other than piano are required to pass a piano proficiency test.

Candidates for all School of Music degrees are required to pass four repertoire proficiency tests, and to pass a major choral ensemble or a major instrumental ensemble as assigned and to pass Convocation every semester of residence in the School of Music.

Music Curriculum

The music curriculum is based on the following five building blocks:

- Studio
- Theory
- History
- Ensemble
- Academics

1. Studio — This is the heart of the school. Students receive individualized instruction with senior faculty in their major area of study: performance or composition.

2. Theory — These courses are designed to help students develop listening skills, to acquire theoretical knowledge, to recognize structural techniques and manipulate technological resources. It includes courses in sight-reading, ear-training, eurhythmics, harmony, contrapuntal techniques, analysis of musical forms, 20th-21st century techniques, orchestration, score reading, and electronic and computer music for compositional and educational purposes. One music support course in the piano, organ, and instrumental curricula must be a theory course.

3. History - These courses cover in depth the music of the western world and survey the styles and musical structures of non-western music.

4. Ensemble — This area includes student participation in some of the following ensembles: Carnegie Mellon Philharmonic, Wind Ensemble, Baroque Ensemble, Contemporary Ensemble, Jazz Orchestra, Jazz Vocal Ensemble, Chorus, Opera, Chamber Music ensembles, and Percussion Ensemble.

5. Academics — The School of Music requires one general studies course (outside of the School) each semester and six semesters of elective courses for graduation. These accumulated credits may be applied to minors or majors in other disciplines. Exceptional students in good academic and musical standing within the School are permitted to take additional courses beyond the number required for graduation. There is no charge for extra credits taken at Carnegie Mellon. One elective course in the performance curricula must be a course that includes experience with pedagogy for the student's major studio area.

Credits — The total number of units required for graduation is 407 for voice majors; 392 for composition majors; 380 for instrumental, organ, and piano majors. Three units equal one credit.

57-692	Dalcroze Pedagogy/Practice Teaching	3

57-350	Dalcroze Piano Improvisation	6
xx-xxx	Creative Movement/Choreography	3
57-641	Dalcroze Research Paper	3
57-642	Dalcroze Research Paper	3

Piano Pedagogy Certificate30 units

57-273	Piano Pedagogy I	6
57-274	Piano Pedagogy II	6
57-275	Piano Pedagogy III	6
57-276	Piano Pedagogy IV	6
57-429	Beginning Piano for Children	6

Bachelor of Science in Music and Technology

The Bachelor of Science in Music and Technology is offered jointly by the School of Music, the School of Computer Science (SCS), and the Carnegie Institute of Technology (CIT).

This program consists of a set of courses that span both music and technology, as well as a capstone composition/design/performance project. Courses in all three areas of study are stipulated in the music and technology undergraduate curriculum and provide for students coming from any of the three areas. In other words, regardless of a student's entry point — an interest in computer science, electrical engineering, or music — the coursework prescribed will allow the student to gain the requisite knowledge and experience in all three areas. Students will work closely with advisors and will be guided in both course selection and capstone projects.

General Requirements 85 units

Seminar

57-570	Music and Technology Seminar (8 semesters for a total of 8 units)	8
--------	---	---

University

99-10x	Computing @ Carnegie Mellon	3
76-101	Interpretation and Argument	9
79-104	Global Histories	9

Humanities

xx-xxx	Cognition, Choice and Behavior course	9
xx-xxx	English, History, Modern Languages, Philosophy, or Psychology course	9

Mathematics

21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10

Science

33-114	Physics of Musical Sound	9
33-106	Physics I for Engineering Students	12

Electives 33 units

Music Core 87 units

57-152	Harmony I	9
57-153	Harmony II	9
57-408	Form and Analysis	6
57-151	Counterpoint in Theory and Application	6
57-258	20th-21st Century Techniques	6
57-257	Orchestration I	6
57-xxx	Music Support Course	6
57-189	Introduction to Repertoire and Listening for Musicians	3
57-190	Repertoire and Listening for Musicians I	3
57-289	Repertoire and Listening for Musicians II	3
57-290	Repertoire and Listening for Musicians III	3
57-181	Solfege I	3
57-182	Solfege II	3
57-183	Solfege III	3
57-184	Solfege IV	3

57-161	Eurhythmics I	3
57-162	Eurhythmics II	3
57-173	Survey of Western Music History	9

Music and Technology Core 120 units

15-112	Fundamentals of Programming and Computer Science	12
15-122	Principles of Imperative Computation	10
15-322	Introduction to Computer Music	9
18-100	Introduction to Electrical and Computer Engineering	12
18-202	Mathematical Foundations of Electrical Engineering	12
18-290	Signals and Systems	12
57-101	Introduction to Music Technology	6
57-347	Electronic and Computer Music	6
57-337	Sound Recording	6
57-338	Sound Editing and Mastering	6
57-438	Multitrack Recording	9
57-571	Music and Technology Project	12
57-572	Music and Technology Project	12

Concentration

Students complete either the Music Concentration or the Technical Concentration:

Music Concentration	60 units
57-5xx	Studio (4 semesters) 36
57-4xx	Major Ensemble (4 semesters) 24

Technical Concentration	57 or 55 units
21-127	Concepts of Mathematics 10
15/18-213	Introduction to Computer Systems 12

AND EITHER:

18-220	Electronic Devices and Analog Circuits 12
18-240	Structure and Design of Digital Systems 12
15-2xx/18-3xx	Electives in ECE or CS 12
or above	

OR:

15-128	Freshman Immigration Course 1
15-210	Parallel and Sequential Data Structures and Algorithms 12
15-323	Computer Music Systems and Information Processing 9
15-2xx/18-3xx	Electives in ECE or CS 12
or above	

Total number of units required for major 380

Minor in Collaborative Piano for Piano Majors in the School of Music

Admission Requirements:

The student must apply to enter the program in the office of the Director of Student Services (CFA 108).

36 units Required Courses

57-381	Collaborative Piano I	6
57-382	Collaborative Piano II	6
57-383	Collaborative Piano III	6
57-384	Collaborative Piano IV	6
57-385	Collaborative Piano V	6
57-386	Collaborative Piano VI	6

18 units Electives

(choose from the following courses)

57-220	English Diction	3
57-221	Italian Diction	3
57-222	French Diction	3
57-223	German Diction	3
57-332	Introduction to Conducting	6
57-336	Instrumental/Choral Conducting	6
57-431	Italian Literature and Repertoire	3
57-432	French Literature and Repertoire	3
57-433	Musical Theatre Literature and Repertoire	3
57-434	Musical Theatre Literature and Repertoire	3
57-435	German Literature and Repertoire	3
57-436	English/Contemporary Literature and Repertoire	3
57-459	Score Reading/Keyboard Harmony	6
57-607	Vocal Methods	3

Minimum units required for Collaborative Piano Minor: 54

Minor in Conducting for Students in the School of Music

Admission Requirements:

1. The student must apply to enter the program in the office of the Director of Student Services (CFA 108) and have an interview with a member of the conducting faculty.
2. A 3.0 cumulative overall QPA and good academic standing are required for acceptance into the minor in conducting. Note that only a limited number of students can be accepted into the program.
3. In addition to the prerequisite courses listed below, the student must display superior solfège skills, by completing Advanced Solfège I and II with "A" or "B" grades or by demonstrating the equivalent level of skills.
4. Introduction to Conducting and Instrumental/Choral Conducting must be completed during the sophomore year with "A" grades before the student can register for the advanced conducting courses.
5. Conducting Practicum must be taken during the same semester as Independent Study in Conducting.
6. A 3.0 cumulative overall QPA is required for graduation with the minor in conducting.

30 units Prerequisite Courses

57-152	Harmony I	9
57-153	Harmony II	9
57-161	Eurhythmics I	3
57-162	Eurhythmics II	3
57-189	Introduction to Repertoire and Listening for Musicians	3
57-191	Keyboard Studies	3

45 units Required Courses

57-332	Introduction to Conducting	6
57-336	Instrumental/Choral Conducting	6
57-408	Form and Analysis	6
57-257	Orchestration I	6
57-459	Score Reading/Keyboard Harmony	6
57-xxx	Music Support Course	6
57-364	Conducting Practicum	3
57-618	Independent Study in Conducting	6

12 units Electives

(choose from the following courses)

57-220	English Diction	3
57-221	Italian Diction	3
57-222	French Diction	3
57-223	German Diction	3
57-258	20th-21st Century Techniques	6
57-337	Sound Recording	6

57-338	Sound Editing and Mastering	6
57-360	Brass Methods	3
57-361	Percussion Methods	3
57-363	String Methods	3
57-362	Woodwind Methods	3
57-431	Italian Literature and Repertoire	3
57-432	French Literature and Repertoire	3
57-435	German Literature and Repertoire	3
57-607	Vocal Methods	3
57-227	Jazz Orchestra	3
57-229	Chamber Music	3
Minimum units required for Conducting minor:		57

Minor in Music Education for Students in the School of Music

Admission Requirements:

The student should apply to the music education faculty no earlier than spring of the freshman year.

45 units Corequisite General Courses

76-101	Interpretation and Argument	9
21-xxx	Mathematics Course #1	9
21-xxx	Mathematics Course #2	9
76-xxx	English Literature Course	9
85-xxx	Educational Psychology Course	9

18 units Corequisite Music Courses

57-391	Keyboard Studies (Music Ed)	3
57-392	Keyboard Studies (Music Ed)	3
57-393	Keyboard Studies Test (Music Ed)	0
57-332	Introduction to Conducting	6
57-336	Instrumental/Choral Conducting	6

General Education Courses

36 units

Also required are three classes offered at other Pittsburgh schools: EDUC 333 Assessment & Adaptation: Students with Special Needs AND EDUC 634 Inclusion: Issues and Strategies, both at Chatham University; and IL 2257 Teaching English Language Learners, at the University of Pittsburgh (27 units).

57-331	Principles of Education	9
--------	-------------------------	---

48 units Music Education Methods Courses

General Methods Courses

57-375	Music in the Elementary School	6
57-356	Elementary Guided Teaching	3
57-376	Music in the Secondary School	6
57-355	Secondary Guided Teaching	3

Applied Area Methods Courses

57-207	Secondary Studio	Var.
57-360	Brass Methods	3
57-361	Percussion Methods	3
57-363	String Methods	3
57-362	Woodwind Methods	3
57-607	Vocal Methods	3

Band Methods Courses

Required is either Fundamentals of Marching Band or Stage Direction.

57-334	Fundamentals of Marching Band	3
57-370	Stage Direction	3
57-333	Band and Choral Arranging	6

15 units Music Education Teaching Courses

57-608	Observation	3
57-603	Practice Teaching (Elementary)	6

57-604	Practice Teaching (Secondary)	6
Minimum units required for Music Education Minor:		99

Minor in Music Technology for Students in the School of Music

Admission Requirements:

The student must apply to enter the program in the office of the Director of Student Services (CFA 108).

18 units Prerequisite Courses

57-152	Harmony I	9
57-161	Eurhythmics I	3
57-181	Solfege I	3
57-189	Introduction to Repertoire and Listening for Musicians	3

21 units Sound Recording Courses

57-337	Sound Recording	6
57-338	Sound Editing and Mastering	6
57-438	Multitrack Recording	9

21 units Music Technology/Sound Courses (Choose 3)

Choose three courses. One of the three courses must be either Introduction to Computer Music or Electronic and Computer Music. (Note that 15-112 is a prerequisite for 15-322; 57-101 or 57-171 is a prerequisite for 57-347.) Other courses may be taken with the permission of the music technology minor advisor.

15-322	Introduction to Computer Music	9
15-323	Computer Music Systems and Information Processing	9
33-114	Physics of Musical Sound	9
54-509	Theatrical Sound System Design	9
54-666	Production Audio	6
57-345	Hacking the Music World	9
57-347	Electronic and Computer Music	6
60-131	3D Media Studio II	5
60-210	Electronic Media Studio: Introduction to Interactivity	10

Minimum units required: 67

Minor in Music Theory for Students in the School of Music

Admission Requirements:

The student must apply to enter the program in the office of the Director of Student Services (CFA 108).

18 units Prerequisite Courses

57-152	Harmony I	9
57-161	Eurhythmics I	3
57-181	Solfege I	3
57-189	Introduction to Repertoire and Listening for Musicians	3

21 units Upper Level Theory Courses (Choose 3)

See theory courses on the Music Support Courses Two-Year Rotation list. It is available on the Inside Music website (<http://music.cfa.cmu.edu>). A graduate course may be taken with the permission of the instructor.

Graduate Theory Course (Choose 1)

units 6-9

See graduate theory courses on the Music Support Courses Two-Year Rotation list. It is available on the Inside Music website (<http://music.cfa.cmu.edu>). The course is to be chosen with the advisor's approval.

18 units Support Courses

33-114	Physics of Musical Sound	9
57-377	Psychology of Music	9
Minimum units required for Music Theory Minor:		70

Minor in Sound Design – IDEaTe

The minor in Sound Design is offered by the School of Music as part of the Integrative Design, Arts and Technology (IDEaTe) network. IDEaTe offers students the opportunity to become immersed in a collaborative community of faculty and peers who share expertise, experience, and passions at the intersection of arts and technology. Students will engage in active “learning by doing” in state-of-the-art maker spaces. The program addresses current and emerging real-world challenges that require disciplinary expertise coupled with multidisciplinary perspectives and collaborative integrative approaches.

The IDEaTe undergraduate curriculum consists of eight interrelated concentration areas, all of which can also be taken as minors. The themes of these areas integrate knowledge in technology and arts: Game Design, Animation & Special Effects, Media Design, Learning Media, Sound Design, Innovation and Entrepreneurship, Intelligent Environments, and Physical Computing. For more information about the IDEaTe network, please visit <http://coursecatalog.web.cmu.edu/servicesandoptions/undergraduateoptions/#ideate>

In the Sound Design minor, students create experimental music or explore new, technology-enabled applications and markets for sound design, music creation, and performance.

Curriculum

Required Courses

- One Portal Course
 - 18-090 Digital Media Interactions: Signal Processing for the Arts
 - 62-150 Introduction to Media Synthesis and Analysis for students in the College of Engineering, Mellon College of Science, and School of Computer Science.
- Four Collaborative or Supportive Courses
 - 57-344 Experimental Sound Systems and Synthesis
 - 57-345 Hacking the Music World
 - 15-322 Introduction to Computer Music
 - 54-367 Conceptual Sound Design
 - 57-347 Electronic and Computer Music
 - 60-439 Hybrid Instrument Building
 - 54-509 Theatrical Sound System Design

Electives

Students may take a collaborative or supportive course from one of the other IDEaTe areas as one of their four collaborative or supportive courses toward the Sound Design minor.

Double-Counting Restriction

Students may double-count two of their Sound Design minor courses for other requirements.

Minor in Music Performance/Music (Composition) for Students in the School of Music

Admission Requirements:

1. The student must apply to enter the program in the office of the Director of Student Services (CFA 108).
2. The student must perform an acceptable audition. Requirements for the audition can be found in the Admission section of the Undergraduate Catalog.

18 units Prerequisite Courses

57-161	Eurhythmics I	3
57-181	Solfège I	3
57-152	Harmony I	9
57-189	Introduction to Repertoire and Listening for Musicians	3

24 units Required Studio Courses (studio fee is charged)

57-496	Minor Studio	6
57-497	Minor Studio	6
57-498	Minor Studio	6
57-499	Minor Studio	6

18 units Required Language Courses (voice minors)

Language Course (Choose 1)

82-101	Elementary French I	12
82-121	Elementary German I	12
82-161	Elementary Italian I	12

Diction Course (Choose 1)

An introductory course in the applicable language is a corequisite for each of these courses.

57-221	Italian Diction	3
57-222	French Diction	3
57-223	German Diction	3

Literature and Repertoire Course (Choose 1)

An introductory course in the applicable language is a prerequisite for each of these courses.

57-431	Italian Literature and Repertoire	3
57-432	French Literature and Repertoire	3
57-435	German Literature and Repertoire	3

Minimum Units Required for Music Performance/Music (Composition) Minor: 24-42

Faculty

DOUGLAS AHLSTEDT, Professor of Voice – M.M., Eastman School of Music; Carnegie Mellon, 1998–.

CHRISTOPHER ALLEN, Artist Lecturer in Percussion.

ALBERTO ALMARZA, Associate Professor of Flute – M.F.A., Carnegie Mellon University; Carnegie Mellon, 1991–.

DONNA AMATO, Artist Lecturer in Piano and Staff Pianist – B.M., University of Arizona; Carnegie Mellon, 1998–.

JENNIFER AYLMEYER, Assistant Professor of Voice.

LEONARDO BALADA, University Professor of Composition – Diploma, The Juilliard School of Music; Carnegie Mellon, 1970–.

JEANNE BAXTRESSER, Vira I. Heinz University Professor of Flute – B.M., The Juilliard School of Music; Carnegie Mellon, 1997–.

NEAL BERNTSEN, Artist Lecturer in Trumpet – M.M., Northwestern University; Carnegie Mellon, 2003–.

RAYMOND BLACKWELL, Vocal Coach and Staff Pianist – M.M., SUNY Binghamton; Carnegie Mellon, 2003–.

JEREMY BRANSON, Artist Lecturer in Percussion Carnegie Mellon, 2009–.

WILLIAM CABALLERO, Associate Teaching Professor in Horn – B.M., New England Conservatory; Carnegie Mellon, 2007–.

JUDITH CAGLEY, Artist Lecturer in Solfège – M.S.Ed., Duquesne University; Carnegie Mellon, 2006–.

CHRISTOPHER CAPIZZI, Artist Lecturer in Jazz Piano – M.A.M., Carnegie Mellon University; Carnegie Mellon, 2004–.

ANDRES CARDENES, Dorothy Richard Starling and Alexander Speyer, Jr. University Professor of Violin Carnegie Mellon, 1989–.

ANDREW CARLISLE, Director of Piping.

L. MARK CARVER, Associate Teaching Professor in Collaborative Piano – M.M., Carnegie Mellon University; Carnegie Mellon, 1995–.

REBECCA CHERIAN, Artist Lecturer in Trombone Carnegie Mellon, 1993–.

ALEC CHIEN, Artist Lecturer in Piano Literature and Repertoire.

DENIS COLWELL, Head and Associate Professor Carnegie Mellon, 1980–.

MURRAY CREWE, Artist Lecturer in Bass Trombone Carnegie Mellon, 2001–.

DANIEL CURTIS, Resident Conductor.

- MICHELE DE LA REZA, Assistant Teaching Professor of Dance – M.S., University of Pittsburgh; Carnegie Mellon, 2007–.
- CYNTHIA DEALMEIDA, Associate Teaching Professor in Oboe – M.M., Temple University; Carnegie Mellon, 1991–.
- ERIC DEFADE, Director of Jazz EnsembleCarnegie Mellon, 2002–.
- ROBERT DELL, Artist Lecturer in Music Education.
- MARK DOMENCIC, Artist Lecturer in Music Theory – M.M., Carnegie Mellon University; Carnegie Mellon, 2007–.
- THOMAS DOUGLAS, Teaching Professor of Voice – M.M., Duquesne University; Carnegie Mellon, 1991–.
- PAUL EVANS, Artist Lecturer in Percussion – MM, Temple University; Carnegie Mellon, 1995–.
- ROBERT FALLON, Assistant Professor of Musicology – Ph.D., University of California, Berkeley; Carnegie Mellon, 2009–.
- JAMES FERLA, Artist Lecturer in Guitar – M.F.A., Carnegie Mellon University; Carnegie Mellon, 1977–.
- CYRUS FOROUGH, Professor of ViolinCarnegie Mellon, 2001–.
- NANCY GALBRAITH, Professor of Composition – M.M., West Virginia University; Carnegie Mellon, 1984–.
- PAUL GERLACH, Artist Lecturer in Music Education – M.F.A., Carnegie Mellon University; Carnegie Mellon, 1982–.
- NANCY GOERES, Artist Lecturer in Bassoon – B.M., Boston University; Carnegie Mellon, 1988–.
- PETER GUILD, Artist Lecturer in Double Bass.
- DAVID HARDING, Associate Professor in Viola and Chamber Music.
- MICAH HOWARD, Artist Lecturer in Double BassCarnegie Mellon, 2010–.
- ROSEANNA IRWIN, Associate Teaching Professor of Coaching and Accompanying – M.M., Duquesne University; Carnegie Mellon, 1990–.
- JOHN PAUL ITO, Assistant Professor of Music TheoryCarnegie Mellon, 2011–.
- ANNE JACKOVIC, Artist Lecturer in Solfege.
- CURTIS JOHNSON, Artist Lecturer in Saxophone.
- PAUL JOHNSTON, Artist Lecturer in Music HistoryCarnegie Mellon, 2005–.
- ANNABELLE JOSEPH, Professor of Music – D.A., Carnegie Mellon University; Carnegie Mellon, 1986–.
- KENNETH KEELING, Associate Head and Professor Emeritus of Music – D.M.A., Catholic University of America; Carnegie Mellon, 1996–.
- SUNG-IM KIM, Staff PianistCarnegie Mellon, 2011–.
- CRAIG KNOX, Artist Lecturer in TubaCarnegie Mellon, 2005–.
- PETER KOPE, Assistant Teaching Professor of DanceCarnegie Mellon, 2007–.
- STEPHEN KOSTYNIK, Artist Lecturer in French Horn.
- CARLA LARocca, Associate Teaching Professor of Keyboard Studies – M.F.A., Carnegie Mellon University; Carnegie Mellon, 1991–.
- LANCE LADUKE, Artist Lecturer in Euphonium – B.M., Michigan State University; Carnegie Mellon, 2003–.
- ELIZABETH LAWRENCE, Artist Lecturer in Jazz Voice and Director of Jazz Vocal Ensemble – M.M., Manhattan School of Music; Carnegie Mellon, 1996–.
- GREGORY LEHANE, Professor of Drama and Music – M.F.A., Carnegie Mellon University; Carnegie Mellon, 1991–.
- HANNA WU LI, Professor of Piano and Piano Pedagogy – M.M., Northwestern University; Carnegie Mellon, 1969–.
- LUZ MANRIQUEZ, Associate Teaching Professor in Collaborative Piano – M.M., Carnegie Mellon University; Carnegie Mellon, 1992–.
- JOHN MARCINIZYN, Artist Lecturer in Guitar and Composition – Ph.D., University of Pittsburgh; Carnegie Mellon, 1991–.
- JOHN MCCARTHY, String Methods Instructor.
- LORNA MCGHEE, Artist Lecturer in FluteCarnegie Mellon, 2015–.
- MONIQUE MEAD, Director of Music Entrepreneurial Studies.
- STEPHEN NEELY, Artist Lecturer in Eurhythmics – M.M., Carnegie Mellon University; Carnegie Mellon, 1998–.
- RODRIGO OJEDA, Staff PianistCarnegie Mellon, 2011–.
- BENJAMIN OPIE, Artist Lecturer in Music Technology – M.M., Duquesne University; Carnegie Mellon, 2005–.
- NATALIE OZEAS, Professor of Music Education and Director of Graduate Studies – Ed.D., University of Pittsburgh; Carnegie Mellon, 1989–.
- ROBERT PAGE, University Professor Emeritus of Music – M.M., Indiana University; Carnegie Mellon, 1976–.
- MILDRED MILLER POSVAR, Artist Lecturer in Voice – BM, Cleveland Institute of Music; Carnegie Mellon, 1981–.
- DAVID PREMO, Artist Lecturer in CelloCarnegie Mellon, 1994–.
- RICHARD RANDALL, Assistant Professor of Music Theory – Ph.D., Eastman School of Music; Carnegie Mellon, 2008–.
- MICHAEL RUSINEK, Artist Lecturer in ClarinetCarnegie Mellon, 1998–.
- CHRISTOPHER RUTH, Artist Lecturer in Music History.
- VAHAN SARGSYAN, Staff Pianist.
- SERGEY SCHEPKIN, Associate Professor of Piano – D.M.A., New England Conservatory; Carnegie Mellon, 2003–.
- STEPHEN SCHULTZ, Associate Teaching Professor of Music History and Flute – M.M., San Francisco State University; Carnegie Mellon, 2002–.
- RICCARDO SCHULZ, Associate Teaching Professor and Director of Recording Activities – M.A., University of Pittsburgh; Carnegie Mellon, 1988–.
- FRANCO SCIANNAMEO, Associate Teaching Professor of Film Musicology and CFA Associate Dean.
- MARIA SPACAGNA, Associate Professor of Voice.
- STEPHEN STORY, Associate Conductor of Wind Ensemble.
- PETER SULLIVAN, Artist Lecturer in TromboneCarnegie Mellon, 2000–.
- DANIEL TEADT, Artist Lecturer in Voice.
- MARILYN TAFT THOMAS, Professor of Music – Ph.D., University of Pittsburgh; Carnegie Mellon, 1981–.
- THOMAS THOMPSON, Associate Teaching Professor of Clarinet and Co-Director of Wind Ensemble – M.M., Northwestern University; Carnegie Mellon, 1986–.
- KELLY TRUMBULL, Artist Lecturer in ActingCarnegie Mellon, 2015–.
- REZA VALI, Professor of Composition – Ph.D., University of Pittsburgh; Carnegie Mellon, 1988–.
- GRETCHEN VAN HOESEN, Artist Lecturer in Harp – M.M., The Juilliard School; Carnegie Mellon, 1985–.
- KAREN ROETHLISBERGER VERM, Staff Pianist – M.M., Cincinnati Conservatory; Carnegie Mellon, 2004–.
- GEORGE VOSBURGH, Artist Lecturer in Trumpet and Co-Director of Wind Ensemble – B.A., University of Rochester; Carnegie Mellon, 2003–.
- JAMES WHIPPLE, Artist Lecturer in Music Theory – BA, Carnegie Mellon University; Carnegie Mellon, 1995–.
- COLETTE JOUSSE WILKINS, Artist Lecturer in Solfege – First Prize, Conservatoire National de Versailles, France; Carnegie Mellon, 1974–.
- ANNE MARTINDALE WILLIAMS, Artist Lecturer in Cello – Diploma, Curtis Institute of Music; Carnegie Mellon, 1987–.
- CHRISTOPHER WU, Artist Lecturer in ViolinCarnegie Mellon, 2009–.
- LENNY YOUNG, Artist Lecturer in SolfegeCarnegie Mellon, 2015–.
- ISAIAS ZELKOWICZ, Artist Lecturer in Viola – M.M., The Juilliard School; Carnegie Mellon, 1981–.

The Marianna Brown Dietrich College of Humanities and Social Sciences

Richard Scheines, Dean
 Brian Junker, Associate Dean for Academic Affairs
 Joseph E. Devine, Associate Dean for Undergraduate Studies and Interim Director, Dietrich College Academic Advisory Center
<http://www.hss.cmu.edu>

The Dietrich College of Humanities and Social Sciences is one of Carnegie Mellon's seven principal colleges. The college consists of the undergraduate program in Economics; the departments of English, History, Modern Languages, Philosophy, Psychology, Social and Decision Sciences, and Statistics; an interdepartmental program in Information Systems; and the Institute for Politics and Strategy. The college accounts for approximately one-fifth of the university's undergraduate population; 80% of the college's students are undergraduates. The college is staffed by 223 full-time faculty, and approximately 20 part-time faculty.

Like its Carnegie Mellon counterparts in engineering, science, computer science, business, and the fine arts, the college has three primary and interrelated foci: undergraduate education, graduate education, and research or creative pursuits. Thus, the college shares in the university's mission of merging first-rate, innovative research and creativity with undergraduate and graduate education.

Liberal/Professional Education

Edward Fiske, former Education Editor of The New York Times and author of the Fiske Guide to Colleges, long ago noted that the college and university have done "perhaps the most original thinking of any American university in pursuing the twin goals of liberal-professional education." These goals continue to guide the college's educational enterprise. The college's educational program is "liberal" in that it stresses breadth and invites wide-ranging inquiry, both through its general education curriculum and through programs in the humanities, behavioral sciences, and social sciences. The "professional" dimension of the college's educational program derives from practical application of analytical and problem-solving skills and also from a subset of in-depth major programs which prepare students for a range of career fields as well as for graduate or professional school. In its belief that these two types of knowledge ("liberal" and "professional") are highly complementary, Dietrich College embraces a philosophy that has its roots in Carnegie Mellon's institutional origins: namely, that the traditional liberal arts disciplines merit close, rigorous study, while at the same time practical skills are also mastered.

The rationale for this liberal/professional approach stems from the premise that the intellectual foundations of a challenging liberal education and meaningful professional education are essentially the same. Knowledgeable and effective citizens are as much in need of broad intellectual perspectives, analytical skills, and problem-solving strategies as are most professionals. Moreover, as leaders in American higher education generally agree, undergraduate education is not well served if professional specialization in undergraduate programs is achieved prematurely. The challenge is to strike a balance between breadth and depth, both within and outside of one's specialty. Such a balance insures versatility in one's profession and the knowledge and ability to keep pace as individuals and citizens with changes in our social, technical, and cultural environments. Thus, the objectives of both liberal and professional education can and should work in tandem to complement and enhance one another.

Degree and Program Options

Dietrich College offers a wide range of majors, as well as minors which provide a secondary focus to one's primary area of study. In addition, there are a number of special programs which add breadth and enhance a student's overall experience.

Dietrich College Majors

Department	Name of Major (Degree Options)
Economics	Economics (B.A./B.S.)
English	English (B.A.)
English	Creative Writing (B.A.)
English	Professional Writing (B.A.)
English	Technical Writing and Communication (B.S.)
History	Global Studies (B.A.)
History	Social and Political History (B.A./B.S.)
Interdepartmental*	Economics and Mathematical Sciences (B.S.) (by admission)
Interdepartmental	Economics and Statistics (B.S.)
Interdepartmental	Environmental Policy (additional major only)
Interdepartmental	Ethics, History, and Public Policy (B.A./B.S.)
Interdepartmental	Information Systems (B.S.) (by admission)
Interdepartmental	Linguistics (B.A.)
Interdepartmental**	Neuroscience (B.S.)
Interdepartmental***	Psychology and Biological Sciences (B.S.)
Interdepartmental+	Statistics and Machine Learning (B.S.)
Interdepartmental	Student-Defined (B.A./B.S.) (by admission)
Modern Languages	Chinese Studies (B.A.)
Modern Languages	French and Francophone Studies (B.A.)
Modern Languages	German Studies (B.A.)
Modern Languages	Hispanic Studies (B.A.)
Modern Languages	Japanese Studies (B.A.)
Modern Languages	Russian Studies (B.A.)
Philosophy	Logic and Computation (B.S.)
Philosophy	Philosophy (B.A.)
Institute for Politics and Strategy	International Relations and Politics (B.S.)
Psychology	Cognitive Science (B.S.)
Psychology	Psychology (B.A./B.S.)
Social and Decision Sciences	Decision Science (B.S.)
Social and Decision Sciences	Policy and Management (B.S.)
Statistics	Statistics (B.S.)

Notes:

* Offered jointly by the Program in Economics and the Department of Mathematical Sciences

** Offered jointly by the Department of Biological Sciences and the Center for the Neural Basis of Cognition

*** Offered jointly by the Departments of Psychology and Biological Sciences

+ Offered jointly by the Departments of Statistics and Computer Science

Additional Majors

Dietrich College students may pursue additional majors and/or minors in the college, as well as in other Carnegie Mellon colleges. An additional major refers to the completion of the requirements for a second major while also completing the requirements for the primary major and degree.

Most Dietrich College majors are also available as additional majors; one (Environmental Policy) is available only as an additional major. Students from outside Dietrich College can pursue additional majors offered by the college, and would be required to complete only those courses in the college's general education program that are prerequisites to courses required for the Dietrich College major in question.

Minors

Minors are like majors in that they consist of coherent programs of study in a department, or across departments. Minors differ from majors in the number of the courses required and in the breadth and depth of the curriculum in the minor's area(s) of study. Dietrich College students can also pursue minors offered and made available by other Carnegie Mellon colleges and departments.

There are two types of minors in Dietrich College: departmental minors, which are housed in a single Dietrich College academic department; and interdepartmental minors, which are sponsored by more than one academic department and administered through the faculty advisor's academic department. The college's minors are available to students from all colleges in the university.

Department	Name of Minor
Economics	Economics
English	Creative Writing
English	English
English	Professional Writing
English	Technical Writing
History	Anthropology
History	Social and Political History
Interdepartmental	African and African American Studies
Interdepartmental	Environmental Studies
Interdepartmental	Film and Media Studies
Interdepartmental	Gender Studies
Interdepartmental	Global Systems and Management
Interdepartmental	Health Care Policy and Management
Interdepartmental	Linguistics
Interdepartmental	Neural Computation
Interdepartmental	Religious Studies
Interdepartmental	Science, Technology and Society
Interdepartmental	Sociology
Interdepartmental	Student-Defined (by admission)
Modern Languages	Chinese Studies
Modern Languages	French and Francophone Studies
Modern Languages	German Studies
Modern Languages	Hispanic Studies
Modern Languages	Japanese Studies
Modern Languages	Russian Studies
Philosophy	Ethics
Philosophy	Logic and Computation
Philosophy	Philosophy
Institute for Politics and Strategy	International Relations and Politics
Institute for Politics and Strategy	Politics and Public Policy
Psychology	Cognitive Neuroscience
Psychology	Psychology
Social and Decision Sciences	Policy and Management
Statistics	Statistics

Multiple Degrees

"Multiple undergraduate degrees" is defined as more than one undergraduate degree granted by the university (whether simultaneous or sequential). One diploma is awarded for each degree; each degree has one

primary major associated with it, and the possibility of an additional major and/or minor.

Dietrich College undergraduate students who wish to earn an additional undergraduate degree with a primary major also from Dietrich College must:

- Satisfy all requirements for the primary major to be linked to the additional degree.
- Complete at least 90 units beyond the total units required for the first degree. If the major associated with the additional degree requires less than 90 units, the student would earn additional elective units to reach the 90-unit minimum. If the major associated with the additional degree requires more than 90 units, the student would perform exceed the 90-unit minimum in order to fulfill all of the requirements for the additional degree's primary major.
- Comply with CMU's Statute of Limitations Policy: All units required for an undergraduate degree, whether earned in residence, transferred from another institution or granted via advanced placement, must have been earned within eight (8) years prior to the date on which the degree is granted.

Non-Dietrich College undergraduate students at Carnegie Mellon who wish to earn an additional undergraduate degree with a Dietrich College primary major must complete all of the requirements listed above, plus any portion of the Dietrich College general education program not already fulfilled by prior undergraduate course work.

Bachelor of Arts & Bachelor of Science

Some Dietrich College majors lead to a Bachelor of Arts (B.A.) degree and others lead to a Bachelor of Science (B.S.) degree. In some majors students may choose between a B.A. and a B.S. degree. B.A. degree programs usually require less course work in technical and/or quantitative disciplines, and more depth and breadth in various humanities, social sciences, and (in some cases) the arts. In contrast, B.S. degrees are offered in majors requiring more technical, quantitative or scientific competencies.

Dietrich College General Education Program

<http://www.hss.cmu.edu/gened/>

Carnegie Mellon's educational legacy emphasizes the connection between theoretical and practical knowledge. Similarly, the university's interdisciplinary approach to education embraces the practical application and analysis of knowledge in institutional, social, historical, and global contexts. The Dietrich College general education program (hereafter referred to as the "GenEd program") supports the development of that expertise and ensures that students gain well-informed perspectives and methodologies by providing the foundational knowledge required for in-depth study. Additionally, the GenEd program provides freshmen and sophomores - whether they have a specific interest, multiple interests, or are undecided about majors - with a systematic, intentional way of sampling the many options available in order to formulate, pursue and achieve their academic goals.

Categories

To transcend narrow disciplinary boundaries, the GenEd program focuses on five broad intellectual activities that are exercised in nearly all disciplines: communicating, reflecting, modeling, deciding and creating. General subject areas associated with each activity are also indicated below. These activities form the bases for GenEd curriculum categories, in which suitable courses are included from all parts of the university.

The five categories are:

1. communicating (<http://www.hss.cmu.edu/gened/gened-category.asp#Communicating>): language and interpretation
2. reflecting (<http://www.hss.cmu.edu/gened/gened-category.asp#Reflecting>): societies and cultures
3. modeling (<http://www.hss.cmu.edu/gened/gened-category.asp#Modeling>): mathematics, the physical and natural sciences, and experiments
4. deciding (<http://www.hss.cmu.edu/gened/gened-category.asp#Deciding>): social sciences and values
5. creating (<http://www.hss.cmu.edu/gened/gened-category.asp#Creating>): designs and productions

This framework highlights central features of an ideal learning environment and the university's core intellectual mission.

Courses

1. Communicating: Language and Interpretations(18 units)

Courses in this category give special attention to the study of language as interpretation, expression and argument within and across multiple discourses. Students examine language for its internal logics and structures. They also explore its rhetorical, historical, cultural, or philosophical dimensions, assessing how it functions while expanding their writing skills and sharpening their analytical abilities.

Required	Units
76-101 Interpretation and Argument	9
xx-xxx One additional "communicating" course*	9

Note: Non-native English speakers may be placed into 76-100 Reading and Writing in an Academic Context (9 units), instead of 76-101, in their first semester. After successful completion of 76-100, they must take 76-101. For these students, these two courses will fulfill the GenEd "communicating" requirement category.

* For a list and descriptions of additional courses approved for this category, visit the Dietrich College General Education web site (<http://www.hss.cmu.edu/gened>)

2. Reflecting: Societies and Cultures(18 units)

This category emphasizes the study of history, society, and culture from local and global perspectives. Courses investigate contemporary societies as well as those of the past, along with their rich array of cultural products, artifacts, and ideas. They encourage a comparative and reflective approach to the understanding of the past and what it can bring to the constitution of present social relations and cultural outlooks.

Required	Units
79-104 Global Histories	9
xx-xxx One additional "reflecting" course*	9

* For a list and descriptions of additional courses approved for this category, visit the Dietrich College General Education web site (<http://www.hss.cmu.edu/gened>).

3. Modeling: Mathematics, Physical and Natural Sciences, and Experiments(27 units)

Courses in this category stress the interplay of mathematical (formal) theories and experimental work. Some courses investigate the internal structure of theories, whereas others use them as models for producing real-world knowledge. Such models may be drawn from a variety of disciplines including the natural and mathematical sciences, but also such fields as psychology and computer science. The interactions between theorizing and experimenting (observing) can be understood within an intellectual framework that invites comparative assessment.

- mathematical sciences (complete a minimum of 9 units)
- natural sciences (complete a minimum of 9 units)
- one other modeling course (complete a minimum of 9 units)

(For courses approved for this category, visit the Dietrich College General Education (<http://www.hss.cmu.edu/gened>) web site.)

4. Deciding: Social Sciences and Values(18 units)

The theme of this category is the exploration of cognitive, behavioral and ethical dimensions of decision-making on both the individual and societal levels. Making decisions requires a broad understanding of human rationality and social interaction. Some courses examine the critical collection and analysis of data for achieving such an understanding, whereas others emphasize the historical development of policies and values which form the matrix for decision-making.

Required	Units
36-201 Statistical Reasoning and Practice	9
xx-xxx One additional "deciding" course*	9

* For a list and descriptions of additional courses approved for this category, visit the Dietrich College General Education web site (<http://www.hss.cmu.edu/gened>).

5. Creating: Designs and Productions(18 units)

In the arts, the humanities, the sciences, and in engineering, it is essential to produce artifacts: e.g., a painting, a poem, a musical performance, a piece of technology, the design of an experiment, or the proof of a mathematical theorem. Courses may center on the students' creation of artifacts, but they may also analyze such creations by exploring creative

processes at work within and across disciplines. Such explorations should be informed by a deep understanding of contexts of production and reception.

For courses approved for this category, visit the Dietrich College General Education (<http://www.hss.cmu.edu/gened>) web site.

6. TWO Additional GenEd courses(18 units)

These courses are selected from any GenEd category.

7. University Requirement (UR)(3 units)

99-101 Computing @ Carnegie Mellon	3
or 99-102 Computing @ Carnegie Mellon	

This course is a 3-unit mini-course, pass/no credit, completed in the first or second semester of the first year.

8. Freshman Seminar Requirement (FSR)(9 units)

This requirement ensures that all first-year students in Dietrich College have at least one small-group course experience in their first year. Taught by selected members of the college's faculty, these seminars enroll 15-17 students, are centered around topics based on faculty research and expertise, and are formatted to encourage a high level of student participation and interaction. For current seminar topics and course descriptions, visit the Dietrich College general education (<http://www.hss.cmu.edu/gened>) website. NOTE: The freshman seminar will not simultaneously fulfill any other requirement (e.g., in a major or minor).

College Services and Programs

The educational programs in Dietrich College are complemented by a number of services, special programs, centers, and computing facilities.

Dietrich College Academic Advisory Center

Joseph E. Devine, Associate Dean and Interim Director
Office: Baker Hall A57
<http://www.cmu.edu/hss/advisory-center/>

The Dietrich College of Humanities and Social Sciences' Academic Advisory Center (AAC) is primarily responsible for advising and monitoring the progress of students prior to deciding on a major. As the "home base" for undergraduates who are new to the college, the AAC provides an accessible, welcoming environment where students can seek information, advice, and counsel about selecting courses, the college's general education program requirements, and the various majors and minors available. Just as important, advisors support students' transition to life and study in the university. The advisor-student relationship is a reciprocal one. Advisors' goals are to meet students where they are, to help them learn to successfully navigate the Carnegie Mellon environment, to become increasingly self-sufficient, and to make viable, informed and confident academic and personal decisions. This kind of relationship is vital to a student's ability to progress, grow and thrive in a new and demanding educational environment. Additionally, the AAC serves as the office of student records for Dietrich College. Acting on behalf of the College Council, the assistant dean oversees adherence to university and college academic policies and procedures, and with staff assistance, processes related transactions.

The center's advising philosophy and strategies, as with academic advising college-wide, reflect the university's statement on academic advising.

The AAC is a walk-in center, although individual appointments may be made and are encouraged. The center's hours are 8:30 a.m. to 5:00 p.m., Monday through Friday.

Globalization and International Politics

Faculty Director (IRP): Kiron K. Skinner, kskinner@andrew.cmu.edu, 412-268-3238, Porter Hall 223F
Faculty Director (GS): John Soluri, jsoluri@andrew.cmu.edu, 412-268-7122, Baker Hall 363
Academic Advisor: Emily Half, ehalf@andrew.cmu.edu, 412-268-7082, Baker Hall A60C
<http://www.cmu.edu/ir/>
<http://www.cmu.edu/hss/globalstudies>

As "globalization" accelerates in and across many domains (politics, economics, trade, culture, the environment, health, etc.), interest in international issues and topics grows steadily. In order to better reflect Carnegie Mellon's comparative strengths in a range of relevant areas, two Dietrich College majors have emerged from a common foundation. One (International Relations and Politics) offers strong conceptual and methodological roots in political science and the other social sciences, while the other (Global Studies) is more squarely grounded in humanities

methodologies and disciplines such as history, anthropology, languages, and cultural studies. Students are thus able to capitalize on the strengths of each major's faculty research and teaching in their respective home departments. Having an academic advisor common to both majors provides a critical linchpin to help students with interests in these fields to see and understand their distinctions. They may then work closely with each program's faculty director for assistance in navigating their way through requirements, vigorously pursuing special opportunities such as a semester in Washington, D.C. or study abroad, and taking part in opportunities for inter-program collaboration.

Dietrich College Senior Honors Program

Joseph E. Devine, Director; Associate Dean for Undergraduate Studies
Office: Baker Hall 154F
<http://www.hss.cmu.edu/>

From its inception in 1982, the Dietrich College senior honors program has provided outstanding undergraduate students with the opportunity to work individually with faculty members throughout the college on original research and creative projects. The honors program is a senior-year program. Admission is based on achievement of a cumulative QPA of at least 3.50 in the major and 3.25 overall, endorsement of a thesis proposal by the faculty member who will serve as thesis advisor, and department head approval. Honors students enroll in an honors thesis course sequence for both semesters of the senior year (9 units per semester). Upon successful completion of the honors thesis, a student qualifies for graduation with Dietrich College Honors, and will have this designation as well as the thesis title noted on the final transcript.

Students have found the honors program to be a very positive experience in allowing for focused, individualized work on a sustained independent project. In the opportunity it provides to demonstrate one's capacity for independent and original work, the senior honors program comprises an experience that helps significantly in presenting oneself to prospective employers or graduate programs.

Humanities Scholars Program

Timothy Haggerty, Director
Office: Baker Hall 154Q
<http://www.hss.cmu.edu/hsp/>

The Humanities Scholars Program (HSP) is a rigorous, four-year undergraduate program dedicated to fostering innovative interdisciplinary study and research in the humanities. The program works with the undergraduate admissions office to identify a subset of students admitted to Dietrich College who have a special interest in the humanities as they are conceptualized at Carnegie Mellon. These students are invited into a program that includes a shared set of courses as well as an optional residential component.

As practiced within its four departments - English, history, philosophy and modern languages - the humanities at Carnegie Mellon provide broad reflective analysis of humanity and its artifacts. Scholarship may incorporate, as examples, hermeneutic, ethnographic, critical, formal, or quantitative analyses within its arguments. At Carnegie Mellon, research has yielded original themes that have become institutional strengths, including social and global perspectives on culture, science and technology; languages, literature and discourse; the arts in society; cognition and rational decision making; and ethics and public policy.

During the first two years of the program, scholars take a series of four seminars that are designed to introduce them to different fields of the humanities and their disciplinary approaches (representative HSP seminars can be viewed on the program website). In the third and fourth years, students are free to pursue their major course of study. The program complements, rather than replaces, a major or minor course of study. In addition, HSP courses help fulfill breadth requirements, including the freshman seminar requirement and selected college general education requirements.

While in the program, scholars also participate in extracurricular events on campus and in the community that include talks by visiting scholars, theater performances, conferences, and exhibits that highlight the importance of humanistic inquiry and its relevance in public discourse.

Students complete their research under the direction of a faculty advisor and meet in a research seminar headed by the director of the program in the spring of their fourth year. This seminar is designed to develop and showcase their abilities in addressing a topic from multiple disciplinary standpoints.

Quantitative Social Science Scholars Program

Russell Golman, Director
Office: Porter Hall 223J
<http://www.cmu.edu/hss/qsss>

The Quantitative Social Science Scholars Program (QSSS) offers a unique opportunity in undergraduate education at Carnegie Mellon. In recent years, advances in computing power, increasingly powerful models of human behavior, and the exponential growth of data sets recording human economic and social activity have created exciting new possibilities for entrepreneurs, policymakers, and scholars seeking insight into human social behavior. Firms throughout the economy can now use data analytics to identify new markets, avoid errors, and improve efficiency. Policymakers can use the same techniques to shape the direction and expand the impact of social policies designed to promote the public good. Social scientists can also use these techniques to create a broader and deeper scientific understanding of human behavior that serves as the foundation upon which both entrepreneurs and policymakers can build.

The QSSS program is designed to help outstanding undergraduates impact society through the use of these techniques. It does so by laying out a structured program of training in advanced quantitative techniques that can be broadly applied across a range of social science disciplines and topics. Students combine this methodological training with more traditional coursework in the social science major of their choice. The program equips students to undertake sophisticated analysis of their own, and features an integrative senior thesis project that applies their methodological training to a research question of their own choosing.

The QSSS program is not a freestanding major or a minor, per se. It is a program designed to be taken in conjunction with a social science major in Dietrich College. The program recruits students with a range of interests across the social sciences to create a cohesive interdisciplinary learning community. Majors that could fit well with this program include (but are not limited to) economics, decision science, policy and management, international relations and politics, and statistics.

Special features of the QSSS program include:

- An optional residential component that allows QSSS students to live together in their first year
- An exclusive QSSS freshman seminar (this seminar fulfills the Dietrich College freshman seminar requirement)
- A core curriculum in five segments: mathematical and statistical foundations, social science modeling, regression analysis of large data sets, data collection and generation, and analytic and computational methods.
- A required senior thesis under the supervision of a faculty advisor from the student's home department and benefitting from the QSSS thesis proseminar.
- A QSSS seminar series that invites speakers to campus to help students in the program see how the skills they are developing are applied both in research and in practice.

Science and Humanities Scholars Program

William Alba, Director
Office: Doherty Hall 2201
<http://www.cmu.edu/shs/>

The Science and Humanities Scholars Program (SHS) is designed to enable talented students to develop and pursue an undergraduate program that builds upon their interests and achievements in the humanities, natural sciences, mathematics, or social sciences. The program is based on a special general education core that provides an academic foundation from which students can select a major in either the Dietrich College of Humanities and Social Sciences or the Mellon College of Science.

Features of the SHS program include:

- Equal access to courses in both MCS and Dietrich College
- An optional residential program that allows a group of SHS first-year students to live together in a dormitory cluster
- Opportunities to collaborate with faculty in cutting-edge interdisciplinary research
- A broad selection of freshman seminars led by distinguished faculty from across the two colleges

Selected students admitted to Dietrich College and/or Mellon College of Science are invited to join the SHS program at the same time that they receive their notification of admission to the university. Those accepting are advised by the SHS program director until they declare a major.

Student-Defined Program

Joseph E. Devine, Director; Associate Dean for Undergraduate Studies
Office: Baker Hall 154

<http://www.cmu.edu/dietrich/undergraduate/student-defined-majors.html>

For students whose educational goals cannot be as adequately served by the curricula of existing programs, the college provides the opportunity to self-define a major or minor. The procedure for establishing such a major

centers on a written proposal, submitted to the college dean's office. This proposal consists of two parts:

Major description and rationale: A description of the components of the proposed program of study; a presentation of the objectives of the program of study, why it represents a coherent and (given available faculty, courses, and other resources) viable course of study, and the reason(s) why these objectives cannot be accomplished within one or more of the college's existing programs.

The curriculum: Presentation of a complete outline of all courses that will comprise the requirements for the major or minor, categorized according to that component of the major program to which each belongs (e.g., mathematics prerequisites; research methods; theoretical perspectives; etc.), and second, a semester-by-semester outline that indicates when each course is to be taken (or, for any already taken, when taken). The minimum requirement for graduation is, as with all majors in the college, 360 units of credit.

Proposals and curricula are evaluated for clarity of focus, coherence and depth in related areas, and viability within the context of the college and university. Proposals should generally be developed no later than the sophomore year, and approved majors begin their program generally no later than the junior year.

As with all other Dietrich College majors, Dietrich College student-defined primary majors must fulfill all of the college's general education requirements.

Study Abroad Scholarships

http://www.hss.cmu.edu/departments/deans_office/studyabroad/scholarships_studyabroad.html

The Dietrich College Dean's Office and the Department of Modern Languages offer the following scholarships to encourage study abroad:

Alumni Study Abroad Scholarships

Funding generously provided by Dietrich College alumni. Multiple scholarships of up to \$1200 are awarded each year to DC, SHS or BHA students to be used toward a semester or full year of study abroad. Current sophomores and juniors will receive preference.

Patricia Askwith-Kenner Scholarships

Provided by an endowment from Patricia Askwith-Kenner. Scholarships of \$3,000 for majors and minors in Modern Languages for semester or full year. Preference to current sophomores and juniors with no study abroad experience.

Patricia Askwith-Kenner Summer Scholarships

Provided by an endowment from Patricia Askwith-Kenner. Scholarships of \$1,200 for majors and minors in Modern Languages for summer study. One scholarship will be reserved for members of the MLSAC. Preference to current sophomores and juniors with no study abroad experience.

The Hannah Estermann Bergman Fund for Study Abroad

Given in memory of Hannah Estermann Bergman, Margaret Morrison Carnegie College class of 1946. This annual scholarship will provide up to \$1,000 to one DC, SHS or BHA student who is currently studying Spanish. Preference will be given to current sophomores and juniors.

The Abel M. Bomberault Travel Fellowship

In memory of Abel M. Bomberault, class of 1956. Multiple scholarships of up to \$3,000 for DC, BHA, or SHS students for semester or full year study abroad in a French-speaking country with preference for France. Majors and minors in French will be given preference.

The Abel M. Bomberault Travel Fellowship (for summer)

In memory of Abel M. Bomberault, class of 1956. Multiple scholarships of up to \$1,200 for DC, BHA, or SHS students for summer study abroad in a French-speaking country with preference for France. Majors and minors in French will be given preference.

The Brona Stein Buerger Scholarship

Given in memory of Brona Stein Buerger, Margaret Morrison Carnegie College class of 1962. These annual scholarships provide up to \$2,000 to one or two DC, BHA or SHS students to be used toward a semester or full year of study abroad. Current sophomores and juniors will receive preference.

Sema (MM'49) and Ivan (E '48) Faigen Scholarship

Made possible by a gift from alumni Sema and Ivan Faigen. Up to \$1500 for majors and minors in Modern Languages for summer study abroad.

The Lena Foo Study Abroad Scholarship

Provided by an Endowment from Lena Foo. Scholarship of \$1,200 for a major or minor in Chinese for summer study in China.

Max Kade Scholarships

Provided by a grant from the Max Kade Foundation. Scholarships of \$1,200 for students of German for summer study at the Goethe Institutes in Germany.

Pickering Scholarships

Made possible by a gift from alumna Martha B. Pickering. Scholarships of \$1,200 for summer study in Asia. Preference to majors/minors in Chinese or Japanese.

Funds from each of these scholarships may be applied to tuition, room and board, airfare to the country and/or book expenses for any accredited study abroad program.

For more information about these scholarships, including eligibility requirements and application time line, see: http://www.hss.cmu.edu/departments/deans_office/studyabroad/scholarships_studyabroad.html

Dietrich College Summer Internship Opportunity Grants

<http://hss.cmu.edu/summerinternoppgrants.html>

Dietrich College encourages students to pursue interesting and professionally relevant internship opportunities as summer employment. Often, however, the very positions that provide students with first-rate, challenging work experiences are unpaid or provide minimal pay. To help compensate students for taking on work experiences that will be invaluable in helping them define and move toward their career goals, the Dietrich College Summer Internship Opportunity Grant Program seeks to make it more possible for students to take advantage of unpaid but worthwhile internship opportunities with grants of up to \$2,000.

Undergraduates (including SHS students) with primary majors in Dietrich College, as well as BHA students are eligible and encouraged to apply. Current sophomores and juniors receive preference. NOTE: Graduating seniors are not eligible.

Students are expected to find their own internships. There are many resources available to help in finding internships, including the Career and Professional Development Center's TartanTrak database. Preference for grants is given to students who find positions in the public sector or non-profit agencies.

For more information, including application time line and instructions, see: <http://hss.cmu.edu/summerinternoppgrants.html>

Carnegie Mellon University Washington Semester Program

Kiron Skinner, Faculty Director; kskinner@andrew.cmu.edu, Porter Hall 223E
Emily Half, Academic Program Manager; ehalf@andrew.cmu.edu;
412-268-7082, Baker Hall A60C

Emily Baddock, Program Director in Washington, DC;
ebaddock@andrew.cmu.edu; 202-608-8316, 100 Maryland Ave NE, Suite
510, Washington, DC 20002

<http://www.cmu.edu/ir/washington-semester-program/index.html>

From embassy headquarters to nongovernmental organizations, think tanks to advocacy organizations, and consulting firms to media outlets, Washington, DC, is a focal point for many international and public policy activities.

Undergraduates from any course of study who would value firsthand policy experience are invited to apply to the Carnegie Mellon University Washington Semester Program (CMU/WSP), sponsored by the university's Institute for Politics and Strategy. As a member of the University of California Washington Center (UCDC) consortium of schools, CMU/WSP is part of a broad and diverse intellectual community of faculty and students. In this semester-long program, students live, work, and study in Washington, DC, coming into direct contact with political, business, and community leaders and learning about the most pressing policy issues of the day.

CMU/WSP students earn 48 units for their semester in Washington, interning three days per week in any sector or field of interest within Washington, DC, while taking classes two days per week and in the evenings. Courses are offered by Carnegie Mellon and UCDC faculty. The Institute for Politics and Strategy sponsors events and a policy forum in Washington for students participating in the program to further enrich their experience and enhance their understanding of how Washington functions as a hub of international and public policy decision making. UCDC also provides policy-oriented events.

Students should contact the academic program manager for more information or to discuss how the CMU/WSP may fit into their curriculum.

Curriculum

All students enroll in the following two courses.

84-360	CMU/WSP: Internship Seminar	12
84-450	IRP Capstone Policy Forum	12

Students select one core seminar from the following list.

Core Seminar

84-330	CMU/WSP: The United States Supreme Court	12
84-331	CMU/WSP: Congress	12
84-332	CMU/WSP: Washington Media	12
84-333	CMU/WSP: General Research Seminar	12
84-334	CMU/WSP: International Policy	12
84-336	CMU/WSP: The Presidency and Executive Branch	12

Students select one elective seminar from the following list.

Elective Seminar

84-340	CMU/WSP: American Political Journalism	12
84-341	CMU/WSP: U.S. Foreign Policy in the Middle East	12
84-342	CMU/WSP: Fiscal Policy-Making in the U.S.	12
84-343	CMU/WSP: Sports, Politics, and Society	12
84-344	CMU/WSP: Politics and Poems: Writing Verse in DC	12
84-345	CMU/WSP: Cultural Policy: Cultural Heritage and Cultural Diplomacy	12
84-346	CMU/WSP: Race and Politics in the American City	12
84-347	CMU/WSP: Lobbying, Money, and Influence in Washington	12
84-348	CMU/WSP: Spies! The Politics of Intelligence	12
84-349	CMU/WSP: The Theater of Politics	12
84-350	CMU/WSP: Campaigns and Elections	12

Academic Standards, Regulations and Protocols

Transferring into Dietrich College

Undergraduate students in other Carnegie Mellon colleges who wish to transfer (<http://www.cmu.edu/hss/advisory-center/transferring/transfer-in.html>) to Dietrich College apply through the college's Academic Advisory Center, located in Baker Hall A57. If approved, the transfer is into the college first and then, when appropriate, into a primary major. Decisions regarding transfer requests will be based on evidence of adequate prior academic performance and on the applicant's prospects for success in the college and intended major.

The earliest point when undergraduates are considered for transfer into Dietrich College is the second semester of the first year. Students interested in transferring to Dietrich College should begin the process well before the course registration period for the upcoming semester. While transfer applications may be submitted at any time, interviews will not be scheduled for transfer candidates during the three-week period that includes course registration week for the next semester and the two weeks prior.

Academic Actions

In order to maintain good academic standing, Dietrich College students must attain at least minimum quality point averages for each semester (as well as cumulatively) and also maintain adequate progress toward completing graduation requirements. Minimum quality point averages for good academic standing are 1.75 in the freshman year and 2.00 thereafter. "Adequate progress towards graduation" generally means that students are successfully completing 45-50 units per semester so that at the end of eight semesters they will have accumulated the minimum of 360 units required for graduation, as well as completed all college Gen Ed and primary major course requirements.

When a student fails to meet minimum performance criteria, it normally results in an "academic action." Depending on the circumstances, one of the following actions is taken: academic probation, continued probation, suspension, or drop. These academic actions are recommended by the college's departments based on the guidelines described below. However, the sequence of the academic actions is not automatic in all cases. Decisions may be based on unique individual student performance and circumstances, and are not determined purely on the basis of grades and quality point averages.

Probation

A student is placed on academic probation when performance either for the semester or cumulatively fails to meet the minimum standard. The term of academic probation is one semester, and signifies to the student the college's insistence that academic performance return to at least the minimum acceptable level. A student is removed from academic probation and returned to good academic standing when both the semester and cumulative quality point averages meet at least the stated minimum, and when adequate progress toward completing graduation requirements is being made. A student who has had one semester on probation and is not yet meeting minimum requirements but is making significant progress in this regard may be continued on probation.

Suspension

Academic suspension is the usual action taken when a student fails to meet the minimum semester or cumulative requirements for two consecutive semesters. In general, a freshman will be suspended if the semester and overall QPAs are below 1.75; for sophomores, juniors, and seniors, if these are below 2.00. Failure to maintain adequate progress toward graduation may also be a contributing factor in such decisions.

The minimum period of academic suspension is normally two semesters, during which a student on academic suspension is expected to reflect on the circumstances leading up to the suspension, identify the issues that prevented him or her from achieving academic success, and take actions that address these issues and demonstrate sufficient readiness to return to the university and successfully resume his or her studies. These actions could include a work or internship experience, a limited amount of approved academic course work at another college or university, and — if relevant — appropriate medical care.

Midway through the semester before a suspended student is eligible to return to the university, he or she will be notified by the Assistant Dean with detailed instructions about the process for requesting approval to return and re-enroll.

Once cleared to return from academic suspension, the Enrollment Services office will be notified and the student will be eligible to enroll. While on academic suspension, students are considered to be on a mandatory "leave of absence," and are governed by college and university policies concerning leaves of absence and withdrawals. See subsequent discussions of "Leave of Absence and Withdrawal from the College." Students returning from academic suspension do so on final academic probation.

Drop

The most severe academic action occurs when a student is dropped from the college and the university, and is not permitted to re-enroll. This normally results when a student, already on final academic probation, continues to perform at levels below the minimum set by the college for good academic standing, and shows no indication of being able to reach an acceptable level of performance or maintain steady progress toward completing graduation requirements. It is also an option when, in unusual cases, a student has performed poorly, and has been unresponsive to outreach efforts by college and/or university offices seeking to offer help and support.

Dietrich College Dean's Honor List

Each semester the college recognizes those students who have attained outstanding semester quality point averages by naming them to the Dietrich College dean's honor list.

Students who complete at least 45 factorable units and attain a semester QPA from 3.50 through 3.74 are named to the Dean's List, with Honors; if the semester QPA is 3.75 or higher, students are named to the Dean's List, with High Honors.

Students who complete at least 36 or up to 44 factorable units and attain a semester QPA of 3.75 or higher are named to the Dean's List, with Honors.

In addition, it is generally the case that students are not eligible for the dean's list who receive conditional grades (i.e., I [incomplete] or X [conditional failure]) at the time when final semester grades are recorded.

Course Overloads

Overloading is defined as taking more than the equivalent of five full-semester courses in one semester; for Dietrich College students this usually means registering for more than 50 units in one semester.

Eligibility to overload is defined as having a QPA of at least 3.00 in the last completed semester, based on a course load of at least 45 factorable units, and a current cumulative QPA of at least 3.00. Students new to the college and university (i.e., first-year students and new external transfer students) may not overload during their first Carnegie Mellon semester.

Eligibility to overload does not automatically allow the student to register for an overload. Rather, students must complete an overload petition, and meet with their primary academic advisor to discuss the proposed overload. If approved, the academic advisor will increase the student's unit maximum in the student record system for the relevant semester.

The first opportunity to register for a course overload is after registration week for the proposed overload semester. Registration week for the spring semester is usually the third week in November; for the fall semester, it is usually the third week in April. Consult the official academic calendar for the exact dates.

If as a result of final grades for the current semester a student approved to overload for the next semester falls below the QPA overload eligibility criteria, the academic advisor may withdraw the overload permission. Students thus affected are responsible for resolving this in consultation with their academic advisor.

Physical Education and StuCo* Courses

A maximum of nine units of credit for any combination of Physical Education (69-xxx) and StuCo (98-xxx) courses may be counted as credit toward graduation requirements. Physical Education and StuCo courses are not included when calculating a student's QPA or when calculating units to determine eligibility to carry a course overload.

* StuCo (<http://www.cmu.edu/stuco>) refers to "student led courses" — i.e., courses designed by students, and approved to be offered for academic credit.

Course Failures and Course Repetitions

Students who fail a required course must repeat and pass it (or take and successfully complete another approved course that fulfills the requirement). If a failed course is a prerequisite to more advanced course

work within a particular course sequence, the failed course must in general be repeated before moving on to the higher level course. Exception: Dietrich College freshman seminars may not be repeated, or replaced by a second seminar. Dietrich College students who do not successfully complete their freshman seminar must select and successfully complete an additional course from one of the college's general education categories.

Failed courses that are repeated and passed, or courses that are passed but repeated in order to obtain a higher grade, are not replaced on the student's record. Both course grades remain on the record, and are included in calculating the student's QPA. Students who repeat a course that they have already passed will not be able to apply the second set of units for the course toward graduation requirements.

Internships-for-Credit

An internship-for-credit is a supervised, professional work experience with clear links to a student's academic program, performed primarily or totally outside a regular course structure, and for which a student earns academic credit. Students doing an internship for academic credit must be registered through the academic department of the faculty member supervising the internship, and must register for the internship course during the term (including the summer) when the internship work is being performed. There is no additional tuition charge for internships that are taken during the academic year. Students registered for internships during the summer will be billed for tuition at the per-unit rate set by the university.

To receive academic credit, the internship:

- requires the involvement of a Carnegie Mellon faculty sponsor and an on-site supervisor in the design and evaluation of the internship;
- may include regular or periodic meetings between the student, the faculty sponsor, and/or the internship site supervisor to monitor progress;
- requires an end-product for submission to the faculty sponsor. This usually takes the form of a paper, but may also include a presentation, or some other approved form;
- can be taken for a regular letter grade by registering for the internship course through the sponsoring department. With department approval, the internship may be counted toward program requirements.
- can vary from 3-18 units in any one semester, and is limited only by the college rule of a maximum of 27 units of internship credit that can be applied to graduation requirements.

Policies and practices regarding internships-for-credit vary among academic departments. Departments are not obligated to allow internship credit for its majors, and are free to determine whether an internship may be used to fulfill requirements or serve only as an elective. An internship-for-credit is a graded experience. Each department will determine appropriate criteria for the grade if an internship is approved for credit.

Credits are earned according to the following scale: 9 units = the equivalent of 1 day (9-12 hours) per week during a semester (100 hours), 18 units = the equivalent of 2 days (12-20 hours) per week during a semester (200 hours). A Dietrich College student may not earn more than 18 units of internship credit during a semester or count more than 27 units of internship credit toward fulfillment of graduation requirements.

When the internship sponsor requires that a student receive academic credit from the home institution, the student should contact the Dietrich College Associate Dean for Undergraduate Studies for information and advice about available options.

Dietrich College Credit Policy for Non-Carnegie Mellon Courses

The following policies govern the practice of Dietrich College undergraduates taking courses elsewhere and requesting that credits for these courses transfer to their Carnegie Mellon University academic record. Courses taken elsewhere will be considered for transfer credit if the institution offering them is fully accredited, and if the courses in question are judged to be acceptable for the purposes proposed by the student.

Limits

Once a student enrolls in the university as a degree candidate, he or she may take a maximum of five courses (or their rough unit equivalent) elsewhere and transfer these back for credit toward their Carnegie Mellon degree.

No courses may be transferred and be substituted for the following general education requirements:

- 76-101 Interpretation and Argument or 76-100 Reading and Writing in an Academic Context

- 79-104 Global Histories
- 36-201 Statistical Reasoning and Practice
- 99-101 Computing @ Carnegie Mellon or 99-102 Computing @ Carnegie Mellon
- Freshman Seminar requirement

In addition, no more than two courses from another institution may be counted for Dietrich College general education requirements; no more than one course from another institution may count in any one general education category (e.g., "communicating," "reflecting," etc.)

Exceptions

These limits do not apply to courses and credits approved through Advanced Placement examinations, International Baccalaureate examinations, cross-registration through the Pittsburgh Consortium for Higher Education (PCHE), Washington Semester program, and approved study abroad or exchange programs. Exceptions to these restrictions may be made only by way of written petition to the Dietrich College Council (c/o the Dietrich College Academic Advisory Center).

Grades

Courses taken elsewhere must be taken for a regular letter grade (not pass/no credit or pass/fail) in order to be granted transfer credit. Students must earn a final grade of at least "C" in order for the credit to transfer. A "C-" grade is not transferable when its equivalency is below a 2.00 on a 4.00 scale, or 70%. Only units, not grades, transfer for courses taken elsewhere, and thus do not affect a student's Carnegie Mellon QPA. Courses offered elsewhere only on a "pass/fail" basis are not eligible for CMU transfer credit.

External Transfer Students

For students entering Carnegie Mellon and Dietrich College as external transfers, the same five-course limit applies after they become Carnegie Mellon degree candidates, unless their transfer credits reach the 180-unit limit for transfer credit stipulated by university policy. A candidate for the bachelor's degree must complete at the university a minimum of four semesters of full-time study, or the equivalent of part-time study, comprising at least 180 units of coursework. If a degree has already been obtained at another institution, courses that count toward that degree may not be used again as transfer credit toward a Carnegie Mellon University undergraduate degree.

Internal Transfer Students

This policy applies retroactively to students who enter Dietrich College through internal transfer. Courses previously approved for transfer credit may be re-evaluated for consistency with relevant Dietrich College or program policies and standards.

Students on Academic Suspension

Subject to the college's policy limiting transfer course credit, students on academic suspension from Dietrich College will be permitted to receive credit for no more than three courses per semester taken elsewhere, and no more than a total of five courses elsewhere, while on suspension. Approval to take these courses for credit is to be obtained in advance.

While on academic suspension, students are considered to be on a mandatory "leave of absence" and are governed by College and University policies concerning leaves of absence and withdrawals (<http://www.cmu.edu/hub/registration/leave.html>).

Dietrich College Department Limits

Dietrich College academic departments may not exceed these college limits, but may impose stricter limits regarding courses that students propose to take elsewhere to fulfill major requirements.

Double-Counting Courses

Double-counting refers to instances when a course taken to fulfill one requirement counts simultaneously toward a requirement in another major or minor program. While the college encourages study in complementary areas where majors and minors frequently share common requirements, it also wants to keep clear the meaning and integrity of the labels "major" and "minor." To preserve the integrity of these definitions, double-counting is permitted in Dietrich College on a very limited basis, and only in those instances when the course(s) in question represent only a small portion of the second program.

The college and its departments have developed program-specific guidelines for this practice that appear throughout the Dietrich College section of this catalog, and particularly in the case of major and minor programs that students frequently pursue in combination.

Graduation Requirements

Eligibility for graduation in Dietrich College requires that a student:

1. complete all general education requirements,
2. complete all course requirements in a primary major,
3. achieve a cumulative quality point average of at least 2.00 for all courses taken (or, alternatively, for all courses taken after the 1st year),
4. earn at least 360 units with a minimum of 180 units taken at Carnegie Mellon University,
5. be recommended (certified) for graduation by the faculty of the student's primary major department,
6. meet all financial obligations to the university, and
7. qualify for graduation within eight years of the date on which the degree is granted.

The college reserves the right to modify these academic standards, regulations, and protocols.

Graduation with University Honors

Dietrich College students who achieve an overall QPA of at least 3.50 will be recommended for graduation with university honors.

Graduation with College Honors

Students who successfully complete a senior honors thesis under the auspices of the Dietrich College senior honors program qualify for graduation with Dietrich College honors.

Dietrich College Interdisciplinary Majors

When addressing complex issues, we often rely on approaches that take advantage of a variety of relevant disciplines. The college houses the special category of "interdepartmental majors" for programs where this interdisciplinary approach is most pronounced and in which the varied disciplinary perspectives are most fully integrated. These majors are presented here separately, rather than as departmentally-based options, to reflect and underscore their sponsorship by more than one academic department and the unique features that follow from this structure.

Interdepartmental majors are administered by the academic department of the major's faculty advisor.

The Major in Economics and Mathematical Sciences

Faculty Advisor: Carol Goldberg
Office: GSIA 133
Email: cg28@andrew.cmu.edu

The B.S. in Economics and Mathematical Sciences (<http://coursecatalog.web.cmu.edu/dietrichcollegeofhumanitiesandsocialsciences/undergraduateeconomicsprogram/#bsineconomicsandmathematicalsciencescurriculum>) is a collaborative effort between the Department of Mathematical Sciences and the Undergraduate Economics Program. Combining advanced mathematics with advanced economic theory is the hallmark of this curriculum. The curriculum provides students with courses that complement and develop depth of understanding of economic theory, applied economics, and applied mathematics. This major offers an integrated curriculum, guiding students through a program of coursework that exploits and builds upon the synergies between mathematics and economics. This degree program equips students with the mathematical tools that are essential for success in Ph.D. programs in economics; mathematics; and key functional areas of business including finance, accounting, marketing, and information systems. Students pursuing this degree will be well prepared for the beginning of their research careers in academia, government, and industry. There are a limited number of student slots in this program; interested students may apply as early as their sophomore year.

The Major in Economics and Statistics

Academic Advisor: Paige Houser
For questions about Economics courses contact: Carol Goldberg or Kathleen Conway
For questions about Statistics courses contact: Rebecca Nugent or Paige Houser

Office: Baker Hall 132A
Email: acadcoord@stat.cmu.edu

The Major in Economics and Statistics provides an interdisciplinary course of study aimed at students with a strong interest in the empirical analysis of economic data. With joint curriculum from the Department of Statistics and the Undergraduate Economics Program, the major provides students with a solid foundation in the theories and methods of both fields. Students in this major are trained to advance the understanding of economic issues through the analysis, synthesis and reporting of data using the advanced empirical research methods of statistics and econometrics. Graduates are well positioned for admission to competitive graduate programs, including those in statistics, economics and management, as well as for employment in positions requiring strong analytic and conceptual skills - especially those in economics, finance, education, and public policy.

The requirements for the B.S. in Economics and Statistics are the following:

I. Prerequisites 38-39 units

1. Mathematical Foundations 38-39 units

Calculus

21-120	Differential and Integral Calculus	10
--------	------------------------------------	----

and one of the following three:

21-122	Integration and Approximation	10
21-127	Concepts of Mathematics	10

21-257	Models and Methods for Optimization	9
--------	-------------------------------------	---

and one of the following:

21-256	Multivariate Analysis	9
21-259	Calculus in Three Dimensions	9

Note: Passing the MSC 21-120 assessment test is an acceptable alternative to completing 21-120.

Note: Taking both 21-111 and 21-112 is equivalent to 21-120. The Mathematical Foundations total is then 48-49 units. The Economics and Statistics major would then total 201-202 units.

Linear Algebra

One of the following three courses:

21-240	Matrix Algebra with Applications	10
21-241	Matrices and Linear Transformations	10
21-242	Matrix Theory	10

Note: 21-241 and 21-242 are intended only for students with a very strong mathematical background.

II. Foundations 18-27 units

2. Economics Foundations 9 units

73-100	Principles of Economics	9
--------	-------------------------	---

3. Statistical Foundations 9-18 units

Sequence 1 (For students beginning their freshman or sophomore year)

36-201	Statistical Reasoning and Practice	9
--------	------------------------------------	---

and one of the following:

36-202	Statistical Methods	9
36-208	Regression Analysis	9
36-309	Experimental Design for Behavioral and Social Sciences	9

Or extra statistical elective**

*Acceptable equivalents for 36-201 are 36-207 (70-207), 36-220 and 36-247.

**Students who enter the program with 36-225/36-226 should discuss options with their advisors.

Sequence 2 (For students beginning later in their college career)

Advanced

Choose one of the following courses:

36-303	Sampling, Survey and Society	9
36-315	Statistical Graphics and Visualization	9
36-461	Special Topics: Statistical Methods in Epidemiology	9
36-462	Special Topics: Data Mining	9
36-463	Special Topics: Multilevel and Hierarchical Models	9
36-464	Special Topics: Applied Multivariate Methods	9

III. Disciplinary Core 126 units

1. Economics Core 36 units

73-230	Intermediate Microeconomics	9
73-240	Intermediate Macroeconomics	9
73-270	Writing for Economists	9
73-374	Econometrics II	9

2. Statistics Core 36 units

36-225 Introduction to Probability Theory ^{**} 9
and one of the following two courses:

36-226 Introduction to Statistical Inference ^{*} 9
36-326 Mathematical Statistics (Honors) ^{*} 9

and both of the following two courses:

36-401 Modern Regression ^{*} 9
36-402 Advanced Methods for Data Analysis 9

*In order to be a major in good standing, a grade of C or better is required in 36-225 (or equivalents), 36-226 or 36-326 and 36-401. Otherwise you will not be allowed to continue in the major.

#It is possible to substitute 36-217 or 21-325 for 36-225. (36-225 is the standard introduction to probability, 36-217 is tailored for engineers and computer scientists, and 21-325 is a rigorous Probability Theory course offered by the Department of Mathematics.)

3. Computing 9 units

36-350 Statistical Computing ^{*} 9

*A higher level Computer Science course approved by your Academic Advisor may be used as a substitute.

4. Advanced Electives 45 units

Students must take three advanced Economics elective courses (numbered 73-300 through 73-495, excluding 73-374, 73-407 and 73-450) and two advanced Statistics elective courses (numbered 36-303, 36-315, or 36-410 through 36-495).

Total number of units for the major 182-192 units

Total number of units for the degree 360 units

Sample Program

The following sample program illustrates one way to satisfy the requirements of the Economics and Statistics Major. Keep in mind that the program is flexible and can support other possible schedules (see footnotes below the schedule).

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-120 Differential and Integral Calculus	36-202 Statistical Methods	21-122 Integration and Approximation **	21-240 Matrix Algebra with Applications
36-201 Statistical Reasoning and Practice	21-256 Multivariate Analysis	36-225 Introduction to Probability Theory	36-226 Introduction to Statistical Inference
73-100 Principles of Economics	73-155 Legonomics: Building Blocks of Economic Analysis	73-230 Intermediate Microeconomics	73-240 Intermediate Macroeconomics
-----*	-----	-----	-----
-----	-----	-----	-----
Junior		Senior	
Fall	Spring	Fall	Spring
36-350 Statistical Computing	36-402 Advanced Methods for Data Analysis	Statistics Elective	Economics Elective
36-401 Modern Regression	73-270 Writing for Economists	Economics Elective	Statistics Elective
73-374 Econometrics II	Economics Elective	-----	-----
-----	-----	-----	-----
-----	-----	-----	-----

*In each semester, ----- represents other courses (not related to the major) which are needed in order to complete the 360 units that the degree requires.

** Students can also take 21-127 or 21-257. Students should consult with their advisor.

73-155 is not required but it is recommended by the Economics department.

Prospective PhD students might add 21-127 fall of sophomore year, replace 21-240 with 21-241, add 21-260 in spring of junior year and 21-355 in fall of senior year.

Students who elect Economics and Statistics as a second major must fulfill all Economic and Statistics degree requirements. Majors in many other programs would naturally complement a Statistics Major, including Business Administration, Social and Decision Sciences, Policy and Management, Social & Political History, and Psychology.

With respect to double-counting courses, it is departmental policy that students must have at least six courses (three Economics and three Statistics) that do not count for their primary major. If students do not have at least six, they typically take additional advanced electives.

Students are advised to begin planning their curriculum (with appropriate advisors) as soon as possible. This is particularly true if the other major has a complex set of requirements and prerequisites.

Additional Major in Environmental Policy

Faculty Director: John Soluri
Office: Baker Hall 240
E-mail: jsoluri@andrew.cmu.edu

The additional major in Environmental Policy focuses on human - environment interactions from a multitude of disciplinary perspectives. The curriculum draws on the expertise of faculty across several Carnegie Mellon colleges in order to provide students with the interdisciplinary background and skills necessary to understand environmental problems and the means to mitigate them. It emphasizes three general areas: (1) natural science and technology; (2) social sciences; and (3) the humanities. The flexible curriculum features training in research methods; a set of core courses on fundamental environmental issues including energy, pollution, and biological diversity; and a project course experience geared toward policy formulation. The total units required are 121.

Note that some courses carry prerequisites and/or reserve seats for primary majors. Students interested in pursuing the additional major must meet beforehand with the Faculty Director and their home unit academic advisor in order to evaluate the feasibility of completing the additional major and to map out a course of study. Double counting follows guidelines set by the Dietrich College. Students are encouraged to be alert to new course offerings; every effort will be made to find equivalent courses that meet student interest when done in consultation with the Faculty Director.

Prerequisites (55-57 units)

Complete ALL of the following courses:

	Units
21-111 Calculus I-(or equivalent)	10
36-201 Statistical Reasoning and Practice	9
36-202 Statistical Methods	9

Complete THREE of the following courses:

03-121 Modern Biology	9
03-124 Modern Biology Laboratory-(03-121 is corequisite)	9
03-125 Evolution	9
09-103 Atoms, Molecules and Chemical Change	9
09-105 Introduction to Modern Chemistry I	10
09-106 Modern Chemistry II	10

Disciplinary Perspectives: Complete TWO of the following courses (18 units)

09-510 Chemistry and Sustainability	9
73-148 Environmental Economics	9
76-319 Environmental Rhetoric	9
79-374 American Environmental History: Critical Issues	9

Thematic Electives: Complete TWO of the following courses (18 units)

12-100 Introduction to Civil and Environmental Engineering	12
19-101 Introduction to Engineering and Public Policy	12
19-424 Energy and the Environment	9
60-203 Concept Studio: EcoArt	10
76-395 Science Writing	9
79-372 Perspectives on the Urban Environment	9

79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9
80-348	Health Development and Human Rights	9
88-223	Decision Analysis and Decision Support Systems	9
88-302	Behavioral Decision Making	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
90-765	Cities, Technology and the Environment	6
90-798	Environmental Policy & Planning	12
90-808	Energy Policy	6

(90-xxx Heinz College courses open only to seniors)

Research and Analytical Methods: Complete TWO of the following courses (18 units)

		Units
36-309	Experimental Design for Behavioral and Social Sciences	9
79-380	Ethnographic Methods	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9
88-220	Policy Analysis I	9
88-251	Empirical Research Methods	9
88-252	Causal Inference in the Field: Using Data to Study Crime, Love, Sports & More	9
88-432	International Policy Decision Modeling Workshop	9

Project Course: Complete ONE of the following courses (12 units)

19-451	EPP Projects (pre-approved topics)	12
19-452	EPP Projects (pre-approved topics)	12

The Major in Ethics, History, and Public Policy

Alex John London, Director
Office: Baker Hall 150A
Email: ajlondon@andrew.cmu.edu

<http://www.cmu.edu/hss/ehpp/>

The B.A./B.S. in Ethics, History, and Public Policy is an interdepartmental major offered jointly by the Departments of History and Philosophy. It prepares students for leadership positions by providing them with a rigorous, interdisciplinary humanistic and social-scientific education. It also serves as an excellent springboard for graduate study in a wide variety of disciplines such as law, public policy, ethics, and advocacy. The program focuses equally on the historical understanding of how modern-day problems have evolved, and the importance of developing clear criteria for ethical decision-making. The capstone project course provides students with the opportunity to engage with real-world public policy challenges using the methods, theories, and knowledge that they have gained through the major. Offered jointly by the departments of History and Philosophy, the B.A./B.S. in EHPP encourages specialization, internship experiences, and research in a wide range of policy areas.

Curriculum

Students graduating with a primary major in Ethics, History, and Public Policy may elect to receive either a Bachelor of Arts or a Bachelor of Science Degree (additional requirements apply; see below). Basic requirements include 120 units encompassing 9 units in Economics, 36 units in History, 36 units in Philosophy, 27 units of elective courses, and a 12-unit senior capstone course. This program may also be taken as an additional (e.g., second) major.

I. Economics Requirement 9 units

Choose one of the following:

73-100	Principles of Economics	9
88-220	Policy Analysis I	9

3

II. History Core 36 units

Choose one 9-unit course from each category below:

Policy History (9 units)

79-300	History of American Public Policy	9
--------	-----------------------------------	---

U.S. History (9 units)

79-240	The Development of American Culture	9
79-249	20th Century U.S. History	9

Non-U.S. History (9 units)

79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-223	Mexico: From the Aztec Empire to the Drug War	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-237	Comparative Slavery	9
79-251	India/America: Democracy, Diversity, Development	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-307	Religion and Politics in the Middle East	9

Historical Methods and Approaches (9 units)

79-200	Introduction to Historical Research	9
--------	-------------------------------------	---

III. Philosophy Core 36 units

Choose one 9-unit course from each category below. No more than 18 units at the 100 level may be counted toward this requirement.

Ethics (9 units)

80-130	Introduction to Ethics	9
80-230	Ethical Theory	9

Political Philosophy (9 units)

80-135	Introduction to Political Philosophy	9
80-235	Political Philosophy	9

Foundations of Social Science (9 units)

80-221	Philosophy of Social Science	9
80-321	Causation, Law, and Social Policy	9
80-324	Philosophy of Economics	9
80-337	Philosophy, Politics & Economics	9

Applied Philosophy (9 units)

80-136	Social Structure, Public Policy & Ethics	9
80-244	Environmental Ethics	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
80-335	Deliberative Democracy: Theory and Practice	9
80-348	Health Development and Human Rights	9
80-447	Global Justice	9

IV. Senior Capstone Project Course 12 units

79-449	EHPP Project Course [cross-listed]	12
80-449	EHPP Project Course	12

The Ethics, History and Public Policy Project Course is required for the Ethics, History and Public Policy major and is taken in the fall semester of the senior year. In this capstone course, Ethics, History and Public Policy majors carry out a collaborative research project that examines

a compelling current policy issue that can be illuminated with historical research and philosophical and policy analysis. The students develop an original research report based on both archival and contemporary policy analysis and they present their results to a client organization in the community.

V. Elective Courses 27 units

Choose any three courses from any category or categories shown below.

Engineering and Public Policy (some courses have prerequisites; see EPP catalog listing)

19-424	Energy and the Environment	9
19-426	Environmental Decision Making	9
19-448	Science, Technology & Ethics	9

Business

70-311	Organizational Behavior	9
70-321	Negotiation and Conflict Resolution	9
70-332	Business, Society and Ethics	9
70-364	Business Law	9
70-365	International Trade and International Law	9
70-430	International Management	9

Economics (some courses have prerequisites; see Economics catalog listing)

73-148	Environmental Economics	9
73-310	Evolution of Economic Ideas and Analysis	9
73-352	Public Economics	9
73-358	Economics of the Environment and Natural Resources	9
73-359	Benefit-Cost Analysis	9
73-365	Firms, Market Structures, and Strategy	9
73-372	International Money and Finance	9
73-375	History of Money and Monetary Policy	9
73-408	Law and Economics	9
73-476	American Economic History	9

English

76-492	Rhetoric of Public Policy	9
--------	---------------------------	---

History

Courses from the EHPP History Core (above) may be taken as electives only if they are not being used to fulfill the core requirement. Double counting is not permitted.

79-217	The War in Vietnam	9
79-221	Development and Democracy in Latin America	9
79-231	American Foreign Policy: 1945-Present	9
79-233	The United States and the Middle East since 1945	9
79-242	African American History: Reconstruction to the Present	9
79-253	American Massacres in History and Memory	6
79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9
79-296	Perspectives on Social Protest	9
79-298	Mobile Phones & Social Media in Development & Human Rights: A Critical Appraisal	6
79-299	Trafficking Persons: Children in a Global Context	9
79-301	History of Surveillance: From the Plantation to Edward Snowden	6
79-302	Drone Warfare: Ethics, Law, Politics, History, and Strategy	6
79-303	Pittsburgh and the Transformation of Modern Urban America	6
79-305	Moneyball Nation: Data in American Life	9
79-310	From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present	9
79-312	International Human Rights Institutions in Theory and Practice	6
79-320	Women, Politics, and Protest	9
79-325	U.S. Gay and Lesbian History	6
79-331	Body Politics: Women and Health in America	9

79-338	History of Education in America	9
79-339	Juvenile Delinquency and Film (1920 to "The Wire")	9
79-340	Juvenile Delinquency and Juvenile Justice	9
79-342	Introduction to Science and Technology Studies	9
79-349	The Holocaust in Historical Perspective	9
79-355	Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective	9
79-359	Terrorism and U.S. National Security	6
79-371	African American Urban History	9
79-374	American Environmental History: Critical Issues	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9
79-383	Epidemics, Disease, and Public Health	9
79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9
79-389	Stalin and Stalinism	9

Philosophy

Courses from the EHPP Philosophy Core (above) may be taken as electives only if they are not being used to fulfill the core requirement. Double counting is not permitted.

80-256	Modern Moral Philosophy	9
80-305	Rational Choice	9
80-405	Game Theory	9

Institute for Politics and Strategy

84-310	International Political Economy and Organizations	9
84-380	Grand Strategy in the United States	9
84-393	Legislative Decision Making: U.S. Congress	9
84-402	Judicial Politics and Behavior	9

Social and Decision Sciences

88-223	Decision Analysis and Decision Support Systems	9
88-281	Topics in Law: 1st Amendment	9
88-343	Economics of Technological Change	9
88-345	Perspectives on Industrial Research and Development	9
88-347	Complex Technological Systems: Past, Present, and Future	9
88-371	Entrepreneurship, Regulation and Technological Change	9
88-387	Social Norms and Economics	9
88-423	Institutions, Entrepreneurship, and Innovation	9
88-444	Public Policy and Regulation	9

VI. Bachelor of Science Option

Students may elect to earn a Bachelor of Science rather than a Bachelor of Arts degree by completing two courses from the list below, or by petitioning the Director of EHPP to accept equivalent courses as substitutions.

21-257	Models and Methods for Optimization	9
36-202	Statistical Methods	9
or 36-208	Regression Analysis	
36-207	Probability and Statistics for Business Applications	9
36-303	Sampling, Survey and Society	9
36-309	Experimental Design for Behavioral and Social Sciences	9
80-305	Rational Choice	9
88-251	Empirical Research Methods	9

Additional Major

The B.A./B.S. in Ethics, History, and Public Policy may be scheduled as an additional major in consultation with the Director of Ethics, History, and Public Policy, Professor Alex John London, ajlondon@andrew.cmu.edu.

Ethics, History, and Public Policy Sample Curriculum

Junior Year		Senior Year	
Fall	Spring	Fall	Spring
Core requirement in Economics	Core requirement in History or Philosophy	Capstone Course	EHPP Elective Course
Core requirement in History or Philosophy	Core requirement in History or Philosophy	EHPP Elective Course	Second Course (open)
Core requirement in History or Philosophy	Core requirement in History or Philosophy	EHPP Elective Course	Third Course (open)
Core requirement in History or Philosophy	Core requirement in History or Philosophy	Fourth Course (open)	Fourth Course (open)
Core requirement in History or Philosophy	Fifth Course (open)	Fifth Course (open)	Fifth Course (open)

The above sample program is presented as a two-year (junior-senior year) plan for completing EHPP major requirements. Its purpose is to show that this program can be completed in as few as two years; not that it must be. Students may enter the EHPP major, and begin major course requirements, as early as the start of the sophomore year, or even in the first year. Students should consult their advisor when planning their program.

The Major in Information Systems

Faculty Program Director: Randy S. Weinberg
Office: Porter Hall 224C, rweinberg@cmu.edu
Program Advisor: Carol Young
Office: Porter Hall 222F, caroly@cmu.edu
Faculty: C.F. Larry Heimann, Jeria Quesenberry, Raja Sooriamrthi

Information Systems (IS) is a unique and innovative undergraduate interdisciplinary program, drawing on a wide range of exciting college and university strengths. IS is an internationally recognized undergraduate major for students who want to design and implement effective solutions to meet organizational and management needs for information and decision support. IS majors learn how elements of organizations, technology, economics, social aspects and human interaction work together to create effective computer-based information systems to affect real outcomes. Graduates of the Program are ideally situated to take a leading role in managing and shaping our information-based future.

For full program information, go to The Major in Information Systems (p. 250).

The Major in Linguistics

Tom Werner, Director
Office: Baker Hall 155F
Email: twerner@andrew.cmu.edu

Linguistics is the study of human language, and it encompasses a broad spectrum of research questions, approaches and methodologies. Some linguists are concerned with the cognitive aspects of language learning, production and comprehension; some are concerned with language as a social and cultural phenomenon; others engage in the analysis of linguistic form and meaning, some from a functional and others from a formal perspective. There are also computational approaches to linguistics with both applied and theoretical goals.

The major in Linguistics reflects the multidisciplinary character of the field and of the Linguistics faculty here at Carnegie Mellon, offering a program which provides students with the fundamental tools of linguistic analysis while maintaining a focus on the human context in which language is learned and used. The major is available as either a primary major or an additional major. It is an ideal choice for students with a general interest in their own or other languages, and combines well thematically with studies in any of the departments represented in the major.

Curriculum

The Linguistics major requires a total of 12 courses, which includes 2 semesters of language study. In addition, primary majors in Linguistics are required to write a Senior Thesis in their final year. At least three courses (not including specific language courses) must be at the 300-level or higher. All courses counted towards the major must be taken for a letter grade and passed with a grade of "C" or above. For Dietrich College students, up to 2 of these courses may be counted also as satisfying the college's general education requirements (as long as the double-counting maximum established by the college is not exceeded), with permission of the major director. Students from other colleges may fulfill their Humanities requirements using courses taken towards the Linguistics Major. However, no courses may be counted simultaneously towards the Linguistics Major and any other major.

Introductory course

80-180 Nature of Language 9

Fundamental Skills

Take **one** course from **each** of the following core subject areas:

Sounds

80-282 Phonetics and Phonology I 9

Structure

76-389 Rhetorical Grammar 9

80-280 Linguistic Analysis 9

80-285 Natural Language Syntax 9

Meaning

80-381 Meaning in Language 9

80-383 Language in Use 9

76-385 Introduction to Discourse Analysis 9

Breadth

Take **one** course from **each** of the following breadth subject areas:

Area 1: Language Learning and Language Cognition

76-420 Process of Reading and Writing 9

82-280 Learning About Language Learning 9

82-383 Second Language Acquisition: Theories and Research 9

82-585 Topics in Second Language Acquisition 9

85-354 Infant Language Development 9

85-421 Language and Thought 9

Area 2: Discourse, Society and Culture

76-318 Communicating in the Global Marketplace 9

76-385 Introduction to Discourse Analysis 9

76-386 Language & Culture 9

82-273 Introduction to Japanese Language and Culture 9

82-305 French in its Social Contexts 9

82-311 Arabic Language and Culture I 9

82-312 Arabic Language and Culture II 9

82-333 Introduction to Chinese Language and Culture Var.

Electives

Take **four** additional electives. These can be **additional courses from the Fundamental Skills courses or Breadth courses listed above**, or **any other course which is approved** by the Director as a linguistics elective. Listed below are the additional electives taught on a regular basis. **Additional appropriate courses** are offered irregularly or on a one-off basis. The Director will provide students with a list of possible electives each semester, and will assist students in selecting electives which are consistent with their goals and interests.

76-373 Argument 9

76-378 Literacy: Educational Theory and Community Practice 9

76-451 Topics in Language Study 9

76-476 Rhetoric of Science 9

80-281 Language and Thought 9

80-283 Syntax and Discourse 9

80-284 Invented Languages 9

80-286 Words and Word Formation: Introduction to Morphology 9

80-287 Historical and Comparative Linguistics 9

80-380 Philosophy of Language 9

80-382 Phonetics and Phonology II 9

80-384 Linguistics of Turkic Languages 9

80-385 Linguistics of Germanic Languages 9

82-373 Structure of the Japanese Language 9

82-388 Understanding Second Language Fluency 9

82-442 Analysis of Spoken Spanish 9

82-444 The Structure of Spanish 9

82-476 Japanese Discourse Analysis 9

82-480 Social and Cognitive Aspects of Bilingualism 9

11-411	Natural Language Processing	12
11-716	Graduate Seminar on Dialog Processing	6
11-721	Grammars and Lexicons	12
11-722	Grammar Formalisms	12
11-761	Language and Statistics	12
11-762	Language and Statistics II	12
15-492	Special Topic: Speech Processing	12

Language Requirement

Students must successfully complete two semesters of consecutive language courses. (Note that students may not 'test out' of this requirement. However, language courses taken at other institutions or as part of a study abroad program will typically substitute for a semester of language study.)

Senior Thesis [primary majors only]

Primary majors must complete a senior thesis (a workload equivalent to a 12-unit course) during their senior year. Topics must be approved by an advisor, who will work with the student and guide the thesis project.

Notes

- Course numbers 82-305, 82-311, 32-312, 82-373, 82-442, 82-444, 82-476 are taught in the language of analysis.
- All 11-xxx and 15-xxx courses have significant Computer Science prerequisites. Interested students should check with the course instructor before registering.
-
- Language specific "Language and Culture" courses may be taken either as electives or towards the second breadth area. However only one such course per language area may be counted towards the major.

The Major in Psychology and Biological Sciences

This unified major is intended to reflect the interdisciplinary nature of our current research in the fields of psychology and biology, as well as the national trend in some professions to seek individuals broadly trained in both the social and natural sciences. Students entering from the Dietrich College of Humanities and Social Sciences will earn a Bachelor of Science in Psychology and Biological Sciences. Students entering from the Mellon College of Sciences receive a Bachelor of Science in Biological Sciences and Psychology. Students entering from the Science and Humanities Scholars (SHS) program can complete the SHS educational core and choose either departmental order for their diploma.

Pre-Major Requirements

The unified major specifies particular pre-major requirements in the areas of mathematical sciences and statistics, natural science, and computational reasoning. Particular courses are specified in these areas because they are prerequisites for courses required in the major and therefore they are the most efficient way to complete the general education requirements for either Dietrich College or SHS. All other general education categories can be filled in any way that satisfies the requirements of the student's college or of the SHS program.

The major in Psychology and Biological Sciences is offered only as a B.S. degree. Full curriculum requirements can be viewed here (p. 285).

Student-Defined Major Program

Joseph E. Devine, Director; Associate Dean for Undergraduate Studies
Office: Baker Hall 154F
Email: jd0x@andrew.cmu.edu
<http://www.hss.cmu.edu/studentdefinedmajor.html>

For Dietrich College students whose educational goals cannot be as adequately served by the curricula of existing majors, the college offers the opportunity to self-define a major. The procedure for establishing such a major centers on a written proposal, submitted to the Dietrich College Dean's Office. This proposal consists of two parts:

Major description and rationale. A description of the components of the proposed program of study; a presentation of the objectives of the program of study, how it represents a coherent and (given available faculty, courses, and other resources) viable course of study, and the reason(s) why these objectives cannot be accomplished within one or more of the college's existing majors.

The curriculum. Presentation of a complete outline of all courses that will comprise the requirements for the major. These courses should be categorized in two ways: first, according to that component of the major program to which each belongs (e.g., mathematical prerequisites; research methods; theoretical perspectives; etc.); and second, a semester-by-semester outline that indicates when each course is to be taken (or, for any already taken, when taken and grade received). In addition to courses taken at Carnegie Mellon, the major's curriculum may include courses taken (or to be taken) at other schools, related projects or internships, or programs of study abroad. The minimum requirements for graduation is, as with all majors in the college, 360 units of credit and completion of the Dietrich College general education program.

Proposals and curricula are evaluated for clarity of focus, coherence and depth in related areas, and viability. Proposals should generally be developed no later than the sophomore year, and approved majors begin their program generally no later than the junior year.

The student-defined option is also possible to propose as an additional major or minor. These options extend to undergraduates from all Carnegie Mellon colleges.

Dietrich College Interdisciplinary Minors

Dietrich College interdepartmental minors are programs whose content and components span two or more academic departments to form coherent patterns of study.

A number of interdepartmental minors are offered by Dietrich College and are, in general, available to all Carnegie Mellon undergraduate students. As well, there are numerous other minors offered by other colleges in the university that are generally available to Dietrich College students. The full list of minors available to Carnegie Mellon students is located in the catalog index under "Minors."

Completion of the requirements for any of these minors is noted on the final transcript.

To declare a Dietrich College interdepartmental minor, students should contact the college's Academic Advisory Center (AAC) and the faculty advisor for that minor.

To discuss the possibility of declaring a non-Dietrich College minor, contact the advisor listed for the minor in question.

In general, unless noted, no course taken to fulfill requirements for these interdepartmental minors may apply toward any other program's requirements.

The Minor in African and African American Studies

Faculty Director: Edda L. Fields-Black
Office: Baker Hall 362
Email: fieldsblack@cmu.edu

Mission

The African and African American Studies minor introduces students to several large regions of the world: sub-Saharan Africa, the Americas, and the Caribbean. Broad geographic coverage and a comparative framework encourage students to make connections between Africa and the African Diaspora, as well as among different Diasporan communities. The minor offers undergraduates the opportunity to undertake an empirical and theoretical examination of the cultural, political, social, and historical experiences of Africans and people of African descent.

This unique transnational minor brings together several departments and colleges within the university and allows students to develop analytical skills particular to the arts, humanities, social sciences, public policy, and management. The African and African American Studies minor allow students a considerable degree of freedom in their choice of electives and independent research projects, including opportunities to study and conduct research in a relevant foreign language.

Courses taken to fulfill requirements in other major or minor programs may only be applied to this minor with permission of the Faculty Director.

Requirements

- The minor is composed of 54 units - two core courses and four elective courses.
- The elective courses must include one course that requires a research paper or project.
- Students may take an additional two core courses as electives, but not more than four total courses.
- Students must take courses in at least two of the four regions (African, African American, Latin American, and the Caribbean) between their core and elective courses.

Core Courses 18 units

Choose two from the History and/or English Department courses listed below:

African		
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-236	Introduction to African Studies	9

African American

76-232	Introduction to African American Literature	9
76-332	African American Literature: The African American Crime Novel	9
79-241	African American History: Africa to the Civil War	9
79-242	African American History: Reconstruction to the Present	9

Caribbean		
79-235	Caribbean Cultures	9

Elective Courses 36 units

African		
79-162	Freshman Seminar: "Slavery" and "Freedom" in African History?	9
79-225	West African History in Film	9
79-237	Comparative Slavery *	9
79-291	Globalization in East African History	6
79-385	The Making of the African Diaspora *	9
79-386	Entrepreneurs in Africa, Past, Present and Future	9

82-304	The Francophone World **	9
--------	--------------------------	---

African American		
57-480/79-357	History of Black American Music	6
76-333	African American Studies	9
76-432	Advanced Seminar in African American Studies *	9
79-237	Comparative Slavery *	9
79-304	African Americans in Pittsburgh	6
79-371	African American Urban History	9
79-376	Doing Transnational History From Western Africa to Gullah/Geechee and Back	9

Caribbean		
79-237	Comparative Slavery *	9
79-295	Race Relations in the Atlantic World	9
79-385	The Making of the African Diaspora *	9
82-304	The Francophone World **	9

Latin American		
79-317	Art, Anthropology, and Empire	9
82-343	Latin America: Language and Culture	9
82-451	Studies in Latin American Literature and Culture	9

Notes:

* Denotes courses that require a research paper/project.

** Denotes courses taught in a foreign language

The Minor in Environmental Studies

Faculty Director: John Soluri
Office: Baker Hall 363
Email: jsoluri@andrew.cmu.edu

The minor in Environmental Studies draws on the expertise of faculty across several Carnegie Mellon colleges in order to provide students with the interdisciplinary background and skills to understand environmental problems, their origins, and the means to mitigate them. It emphasizes three general areas: (1) natural science and technology, (2) social sciences, and (3) the humanities and arts. Coursework covers key environmental topics related to energy, pollution, and biological diversity.

Note that some courses carry prerequisites and/or reserve seats for primary majors. Students interested in pursuing the minor should meet with the Faculty Director to map out a course of study. Double counting rules follows guidelines set by the Dietrich College.

Students are strongly encouraged to be on the lookout for relevant new course offerings; every effort will be made to find equivalent courses that meet student interest when done in consultation with the Faculty Director.

Curriculum 54 units

Foundation of Environmental Sciences 18 units

One course in Biology

	Units
03-121 Modern Biology or	9
03-125 Evolution	9

One course in Chemistry

09-103 Atoms, Molecules and Chemical Change 9

Perspectives on Environmental Problems (36 units distributed across the three categories listed below)

Humanities

76-319 Environmental Rhetoric	9
79-289 Animal Planet: An Environmental History of People and Animals	6
79-354 Energy & Climate: History, Science, Technology, and Policy in the US 1776-2076	9
79-372 Perspectives on the Urban Environment	9
79-374 American Environmental History: Critical Issues	9
79-384 Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9
80-348 Health Development and Human Rights	9

Economics and Policy

73-148 Environmental Economics	9
88-412 Energy, Climate Change, and Economic Growth in the 21st Century	9
90-798 Environmental Policy & Planning (only open to seniors)	12
90-808 Energy Policy (only open to seniors)	6

Environmental Art, Sciences, and Technology

09-510 Chemistry and Sustainability	9
19-101 Introduction to Engineering and Public Policy	12
19-424 Energy and the Environment	9
60-203 Concept Studio: EcoArt	10

The Minor in Film and Media StudiesFaculty Advisor: David Shumway
Office to declare the minor: Baker Hall 259

Film and the electronic media have become a crucial part of contemporary culture and society; they constitute an important tool for understanding social arrangements, historical changes, and play an increasingly important role in the development of aesthetic and cultural theory. The H&SS minor in Film and Media Studies takes an interdisciplinary approach to the study of film and other electronic media. Courses provide techniques for analyzing and criticizing film and other media, for assessing their value as historical, anthropological and social scientific data, and for understanding the aesthetic and philosophical premises of various media texts. In addition, students may take courses in the processes of film-making, offered through special arrangement with the Pittsburgh Filmmakers (a non-profit media arts center, operating since 1971, that provides workshops, seminars, screenings, exhibitions, and training programs in the media and photographic arts).

Courses taken to fulfill requirements for other major or minor programs may not be applied to the Film and Media Studies Minor requirements.

Curriculum 54 units

The courses listed below are offered with at least general regularity. Participating departments may subsequently develop and offer other courses that, while not listed here, are deemed appropriate for this minor. The minor faculty advisor should be consulted (especially when the schedule of courses to be offered for a given semester becomes available) to identify such additional courses.

Introductory Course 9 units

76-239 Introduction to Film Studies (prerequisite for 76-439) 9

Required Intermediate Course 9 units

76-339 Topics in Film Studies (May be taken up to three times and counted for additional credit toward Intermediate Courses if topics differ) 9

Intermediate Courses 27 units

Complete a minimum of 27 units of course work, chosen in any combination from the following three course groups. (All courses are 9 units unless otherwise indicated).

1. Film and the Study of Society
76-238 Introduction to Media Studies 9
82-296 A Century of Russian Film 9

2. Film and Anthropology
79-278 Rights to Representation: Indigenous People and their Media 9

3. Filmmaking
76-269 Survey of Forms: Screenwriting 9
FM 200 Intermediate Filmmaking (please go to CFA 100 to register for this course)

Other 200 or 300 level courses in English, History, and Modern Languages can be counted in this category when their primary topic is film and media. Please consult the minor faculty advisor.

Advanced Courses 9 units

Complete one advanced course that concentrates on film directly or that uses it as a tool of social or cultural analysis. One additional advanced course may be taken in place of an intermediate course.

FM 301 Advanced Filmmaking (please go to CFA 100 to register for this course)

76-438 Film and Media Studies: Television 9
76-439 Seminar in Film and Media Studies 9
76-469 Advanced Screenwriting Workshop 9

The Minor in Gender StudiesFaculty Advisors: Kristina Straub and Lisa Tetrault
Office to declare minor: English, Baker Hall 259

Gender studies is an interdisciplinary field that investigates how gender is embedded in social, cultural, and political relationships. It understands gender as a category of power that intersects with other power relations, including race, class, and sexuality. Courses allow students to develop a deeper understanding of how gender operates, and to transfer the analytical skills they acquire to other courses as well as to their personal and professional lives. The minor combines coursework in some combination of the following fields: English, history, anthropology, psychology, philosophy, economics, and modern languages.

Courses taken to fulfill requirements in other major or minor programs may not be applied to the Gender Studies minor requirements (and vice versa).

Curriculum 54 units

The courses listed below are offered with at least general regularity. Participating departments may develop and offer other courses that, while not listed here, are appropriate for the study of gender. Consult the minor advisor to confirm the relevance of unlisted, gender-focused courses.

Required Introductory Courses 18 units

Complete one of the following (9 units)
76-241 Introduction to Gender Studies 9
79-331 Body Politics: Women and Health in America 9

and one of the following (9 units):

76-245 Shakespeare: Tragedies and Histories 9

76-247	Shakespeare: Comedies and Romances	9
79-244	Women in American History	9
85-221	Principles of Child Development	9

Elective Intermediate Courses 27 units

Choose three of the following courses:

76-327	Influential Women Writers	9
76-341	Gender and Sexuality in Performance	9
79-320	Women, Politics, and Protest	9
79-325	U.S. Gay and Lesbian History	6
79-331	Body Politics: Women and Health in America	9
85-350	Psychology of Prejudice	9

Elective Advanced Courses 9 units

These courses are generally offered at the advanced junior and senior level. Offerings vary from semester to semester and a list will be made available to minors prior to registration each term. For questions about courses and about how to declare a minor, contact the advisors.

Students may also take more than 9 units from the "Advanced Course" list to count for the 54 unit total. For information about additional course offerings, contact Kristina Straub, ks3t@andrew.cmu.edu, 412.268.6458 or Lisa Tetrault, tetrault@andrew.cmu.edu, 412.268.4440.

The Minor in Global Systems and Management

Faculty Advisor: Gary J. DiLisio
Office: PH 222F

Graduates across all disciplines are increasingly likely to find themselves working as part of a global development team on a wide variety of business, consumer, and intellectual products and services.

The Global Systems and Management minor (GSM) is intended for students wishing to develop skills essential for participating in emerging opportunities in global business systems, systems development, product development and global project management. GSM exposes students to contemporary issues and practices facing organizations, managers and individuals working on a global scale across political, cultural and temporal boundaries. GSM presents an opportunity for students to learn about being part of an organization that works globally with its employees, business partners, customers and supply chains.

Students will learn about global project management, outsourcing and cross-cultural communications from theoretical and practical viewpoints. An organized elective structure enables students to tailor the minor to reflect their specific interests.

Curriculum 54 units

GSM is offered jointly across the departments and programs of the Dietrich College of Humanities and Social Sciences with participation from the Tepper School of Business. The minor is administered by the Dietrich College Information Systems program. The minor requires students to complete 54 units:

- one Information Systems course: 67-329 Contemporary Themes in Global Systems (offered only in the Fall semester)
- two courses in Communications
- a combination of 27 units with at least 9 units in each of the categories of:
 - Humanities, Heritage and Culture
 - International Management

Study Abroad Options

Students are encouraged to complete a semester of study abroad. With prior approval from the GSM Advisor, study abroad courses may be applied to GSM minor requirements except for 67-329 Contemporary Themes in Global Systems. Please consult with the GSM Advisor before embarking on the semester of study abroad.

Double Counting of Courses

Students may apply one course taken to fulfill a requirement in another major or minor program toward the GSM minor.

Core Course

Required course:

67-329	Contemporary Themes in Global Systems (Fall Semester Only)	9
--------	--	---

Communications 18 units

Complete two courses:

70-321	Negotiation and Conflict Resolution	9
70-340	Business Communications	9
70/85/88-341	Organizational Communication	9
70-342	Managing Across Cultures	9
76-270	Writing for the Professions	9
76-318	Communicating in the Global Marketplace	9
76-386/786	Language & Culture	9
76-428	Visual Verbal Communication	9
85-375	Crosscultural Psychology	9
88-419	Negotiation	9

Humanities, Heritage and Culture (HHC) & International Management (IM) 27 units

(Complete 9 units of HHC and 18 units of IM ---OR--- 18 units of HHC and 9 units of IM)

Humanities, Heritage and Culture

Humanities Heritage and Culture consists of:

- History Department courses: 79-200 level or above covering international/regional studies that are outside of U.S. history
- Modern Languages Department courses: 82-200 level or above, covering international or regional studies but not including elementary or intermediate language courses

79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9
79-221	Development and Democracy in Latin America	9
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-235	Caribbean Cultures	9
79-251	India/America: Democracy, Diversity, Development	9
79-254	The Jewish Diaspora in Latin America	9
79-255	Irish History	6
79-257	Germany and the Second World War	9
79-258	French History: From the Revolution to De Gaulle	9
79-259	France During World War II	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-271	Russian Studies Topics	6
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
79-274	19th and 20th Century Russia: Society, Art, Music and Theater	9
79-275	Introduction to Global Studies	9
79-278	Rights to Representation: Indigenous People and their Media	9
79-291	Globalization in East African History	6
79-295	Race Relations in the Atlantic World	9
79-297	Dilemmas and Controversies in Anthropology	9

79-299	Trafficking Persons: Children in a Global Context	9
79-307	Religion and Politics in the Middle East	9
79-308	Inventing the American Airplane: Technology and Military Aviation, 1898-1945	6
79-309	20th Century China Through Film	9
79-310	From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present	9
79-312	International Human Rights Institutions in Theory and Practice	6
79-323	Family, Gender, and Sexuality in European History, 500-1800	9
79-326	German History through Film	9
79-341	The Cold War in Documents and Film	9
79-349	The Holocaust in Historical Perspective	9
79-355	Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9
79-385	The Making of the African Diaspora	9
79-386	Entrepreneurs in Africa, Past, Present and Future	9
82-215	Introduction to Modern Arabic Literature and Culture	Var.
82-253	Korean Culture Through Film	9
82-273	Introduction to Japanese Language and Culture	9
82-303	Introduction to French Culture	9
82-304	The Francophone World	9
82-305	French in its Social Contexts	9
82-311	Arabic Language and Culture I	9
82-312	Arabic Language and Culture II	9
82-320	Contemporary Society in Germany, Austria and Switzerland	9
82-323	Germany, Austria and Switzerland in the 20th Century	9
82-333	Introduction to Chinese Language and Culture	Var.
82-342	Spain: Language and Culture	9
82-343	Latin America: Language and Culture	9
82-345	Introduction to Hispanic Literary and Cultural Studies	9
82-361	Italian Language and Culture I	9
82-362	Italian Language and Culture II	9
82-399	Special Topics: Russian in Context	Var.
82-415	Topics in French and Francophone Studies	9
or 82-416	Topics in French and Francophone Studies	
82-425	Topics in German Literature and Culture	9
82-431	China and the West	9
82-433	Topics in Contemporary Culture of China	9
82-441	Studies in Peninsular Literature and Culture	9
82-450	Advanced Research in Hispanic Language & Culture	9
82-456	Topics in Hispanic Studies	9
82-473	Topics in Japanese Studies	9
or 82-474	Topics in Japanese Studies	
International Management		
19-411	Global Competitiveness: Firms, Nations and Technological Change	9
67-319-67-331	Global Technology Consulting Groundwork - Technology Consulting in the Global Community (these two courses are taken sequentially)	6
70-342	Managing Across Cultures	9
70-365	International Trade and International Law	9
70-430	International Management	9
70-480	International Marketing	9
73-372	International Money and Finance	9
79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9
88-378	International Economics	9
88-384	Conflict and Conflict Resolution in International Relations	9
88-410	The Global Economy: A User's Guide	9
88-411	Rise of the Asian Economies	9

88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
88-415	Global Competitiveness: Firms Nations, and Technological Change	9
88-432	International Policy Decision Modeling Workshop	9

MINIMUM NUMBER OF UNITS REQUIRED FOR MINOR 54

Minor in Health Care Policy and Management

Sponsored by:

H. John Heinz III College
Dietrich College of Humanities and Social Sciences
Mellon College of Science

Faculty Advisors:

Jason D'Antonio, Mellon College of Science
James F. Jordan, H. John Heinz III College

The face of health care is changing. The practice of medicine is being fundamentally altered by the forces of change in public policy, health care organizations and in the industry as a whole. The role of individual professionals in this industry is changing as rapidly as the industry itself. Traditional career paths have disappeared overnight to be replaced by new opportunities that require new skills. New organizations are placing new demands on their professional and medical staffs. The criteria of efficiency and financial stability are entering the domains of diagnosis and treatment.

This minor is designed to provide students considering a career in the health professions with an understanding of how these changes are likely to affect their careers. Students will become familiar with the critical policy and management issues and will begin to learn to operate effectively in the emerging health care environment. The curriculum combines economic, organizational, managerial, historical and psychological perspectives on these issues to provide a foundation for a deepened understanding of the changing structure of health care organizations and policy.

Curriculum 60 units minimum

Seven courses (a minimum of 60 units) are required to complete this minor. Entry into the minor requires completion of 73-100 Principles of Economics or 88-220 Policy Analysis I or the equivalent by approval.

Required Courses 39 units

Students are required to take the following courses.

79-330	Medicine and Society	9
90-836	Health Systems	6
90-861	Health Policy	6
94-705	Health Economics	12

Elective Courses 27 units

Complete a minimum of 27 units.

Heinz College Courses

90-708	Healthcare Ethics	6
90-721	Healthcare Management	6
90-818	Health Care Quality & Performance Improvement	6
90-830	Introduction to Financial Management of Health Care	6
90-831	Advanced Financial Management of Health Care	6
90-832	Health Law	6
90-863	Health Policy II	6
94-706	Healthcare Information Systems	12

Humanities and Social Sciences Courses (9 units each)

76-494	Healthcare Communications	9
79-383	Epidemics, Disease, and Public Health	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
85-241	Social Psychology	9
85-442	Health Psychology	9
85-446	Psychology of Gender	9

Please note that some of these courses have prerequisites that will not count toward the completion of the requirements for this minor.

The Minor in Linguistics

Tom Werner, Director
Office: Baker Hall 155F
Email: twerner@andrew.cmu.edu

The Interdepartmental Minor in Linguistics combines courses from the departments of Philosophy, English, Modern Languages, Psychology and the Language Technologies Institute. It synthesizes the linguistics related offerings in these departments and provides students with an academic experience that reflects the interdisciplinary character of the subject.

The Minor in Linguistics requires a total of 6 courses: the introductory linguistics course; two fundamental skills courses; and three additional electives. All courses counted towards the Minor must be taken for a letter grade and passed with a grade of "C" or above.

Introductory course

80-180	Nature of Language	9
--------	--------------------	---

Fundamental Skills

Take **one** course from **two** of the following core subject areas:

Sounds

80-282	Phonetics and Phonology I	9
--------	---------------------------	---

Structure

76-389	Rhetorical Grammar	9
80-280	Linguistic Analysis	9
80-285	Natural Language Syntax	9

Meaning

80-381	Meaning in Language	9
80-383	Language in Use	9
76-385	Introduction to Discourse Analysis	9

Electives

Take three additional linguistics courses. These can be additional courses from the Fundamental Skills categories above, or any other course which is approved by the Director as a linguistics elective. For electives taught on a regular basis, see courses listed as Breadth or Electives in the Undergraduate Catalog entry for the Linguistics Major.

The Minor in Neural Computation

Director: Dr. Tai Sing Lee
Administrative Coordinator: Melissa Stupka
Website: http://www.cnbc.cmu.edu/upnc/nc_minor/

The minor in Neural Computation is an inter college minor jointly sponsored by the School of Computer Science, the Mellon College of Science, and the Dietrich College of Humanities and Social Sciences, and is coordinated by the Center for the Neural Basis of Cognition (CNBC) (<http://www.cnbc.cmu.edu>).

The Neural Computation minor is open to students in any major of any college at Carnegie Mellon. It seeks to attract undergraduate students from computer science, psychology, engineering, biology, statistics, physics, and mathematics from SCS, CIT, Dietrich College and MCS. The primary objective of the minor is to encourage students in biology and psychology to take computer science, engineering and mathematics courses, to encourage students in computer science, engineering, statistics and physics to take courses in neuroscience and psychology, and to bring students from different disciplines together to form a community. The curriculum and course requirements are designed to maximize the participation of students from diverse academic disciplines. The program seeks to produce students with both basic computational skills and knowledge in cognitive science and neuroscience that are central to computational neuroscience.

Curriculum

The minor in Neural Computation will require a total of five courses: four courses drawn from the four core areas (A: Neural Computation, B: Neuroscience, C: Cognitive Psychology, D: Intelligent System Analysis), one from each area, and one additional depth elective chosen from one of the core areas that is outside the student's major. The depth elective can be replaced by a one-year research project in computational neuroscience. No more than two courses can be double counted toward the student's major or other minors. However, courses taken for general education requirements of the student's degree are not considered to be double counted. A course taken to satisfy one core area cannot be used to satisfy

the course requirement for another core area. The following listing presents a set of current possible courses in each area. Substitution is possible but requires approval by the director of the minor program.

A. Neural Computation

		Units
15-386	Neural Computation	9
15-387	Computational Perception	9
15-883	Computational Models of Neural Systems	12
85-419	Introduction to Parallel Distributed Processing	9
86-375	Computational Perception	9
Pitt-Mathematics-1800	Introduction to Mathematical Neuroscience	9

B. Neuroscience

03-362	Cellular Neuroscience	9
03-363	Systems Neuroscience	9
03-365	Neural Correlates of Learning and Memory	9
42-630	Introduction to Neuroscience for Engineers (crosslisted with 18-690)	12
85-765	Cognitive Neuroscience	Var.
Pitt-Neuroscience 1000	Introduction to Neuroscience	9
Pitt-Neuroscience 1012	Neurophysiology	9

C. Cognitive Psychology

85-211	Cognitive Psychology	9
85-213	Human Information Processing and Artificial Intelligence	9
85-412	Cognitive Modeling	9
85-414	Cognitive Neuropsychology	9
85-419	Introduction to Parallel Distributed Processing	9
85-426	Learning in Humans and Machines	9
85-765	Cognitive Neuroscience	Var.

D. Intelligent System Analysis

10-601	Introduction to Machine Learning	12
15-381	Artificial Intelligence: Representation and Problem Solving	9
15-386	Neural Computation	9
15-387	Computational Perception	9
15-486	Artificial Neural Networks	12
15-494	Special Topic: Cognitive Robotics	12
16-299	Introduction to Feedback Control Systems	12
16-311	Introduction to Robotics	12
16-385	Computer Vision	9
18-290	Signals and Systems	12
24-352	Dynamic Systems and Controls	12
36-225	Introduction to Probability Theory	9
36-247	Statistics for Lab Sciences	9
36-401	Modern Regression	9
36-410	Introduction to Probability Modeling	9
42-631	Neural Data Analysis	9
42-632	Neural Signal Processing	12
86-375	Computational Perception	9
86-631	Neural Data Analysis	9

Prerequisites

The required courses in the above four core areas require a number of basic prerequisites: basic programming skills at the level of 15-110 Principles of Computing and basic mathematical skills at the level of 21-122 Integration and Approximation or their equivalents. Some courses in Area D require additional prerequisites. Area B Biology courses require, at minimum, 03-121 Modern Biology. Students might skip the prerequisites if they have the permission of the instructor to take the required courses. Prerequisite courses are typically taken to satisfy the students' major or other requirements. In the event that these basic skill courses are not part of the prerequisite or required courses of a student's major, one of them can potentially count toward the five required courses (e.g. the depth elective), conditional on approval by the director of the minor program.

Research Requirements (Optional)

The minor itself does not require a research project. The student however may replace the depth elective with a year-long research project. In special

circumstances, a research project can also be used to replace one of the five courses, as long as (1) the project is not required by the student's major or other minor, (2) the student has taken a course in each of the four core areas (not necessarily for the purpose of satisfying this minor's requirements), and (3) has taken at least three courses in this curriculum not counted toward the student's major or other minors. Students interested in participating in the research project should contact any faculty engaged in computational neuroscience or neural computation research at Carnegie Mellon or in the University of Pittsburgh. A useful webpage that provides listing of faculty in neural computation is <http://www.cnbc.cmu.edu/computational-neuroscience>. The director of the minor program will be happy to discuss with students about their research interest and direct them to the appropriate faculty.

Fellowship Opportunities

The Program in Neural Computation (PNC) administered by the Center for the Neural Basis of Cognition currently provides 3-4 competitive full-year fellowships (\$11,000) to Carnegie Mellon undergraduate students to carry out mentored research in neural computation. The fellowship has course requirements similar to the requirements of the minor. Students do not apply to the fellowship program directly. They have to be nominated by the faculty members who are willing to mentor them. Therefore, students interested in the full-year fellowship program should contact and discuss research opportunities with any CNBC faculty at Carnegie Mellon or University of Pittsburgh working in the area of neural computation or computational neuroscience and ask for their nomination by sending email to Dr. Tai Sing Lee, who also administers the undergraduate fellowship program at Carnegie Mellon. See <http://www.cnbc.cmu.edu/fellowcompneuro> for details.

The Program in Neural Computation also offers a summer training program for undergraduate students from any U.S. undergraduate college. The students will engage in a 10-week intense mentored research and attend a series of lectures in neural computation. See the <http://www.cnbc.cmu.edu/summercompneuro> for application information.

The Minor in Religious Studies

Faculty Director: Allyson Creasman
Office: Baker Hall 240
Email: allysonc@andrew.cmu.edu

The Religious Studies minor offers students, a range of intellectual tools for thinking about religious ideas, behaviors and institutions. It also enables students to build a base of knowledge that extends beyond any one particular religious tradition.

The minor consists of six courses, totaling at least 54 units. Courses taken to fulfill requirements in other major or minor programs may only be applied to this minor with permission of the Faculty Director.

Curriculum 54 units

Religious Studies minors must satisfy the following requirements.

The "required" course listed below is offered regularly; the "distribution" and "elective" courses are offered with at least general regularity. Participating departments may subsequently offer other courses that, while not listed here, may satisfy requirements for this minor. The Faculty Director should be consulted to identify such additional courses (especially after the schedule of courses to be offered for a given semester becomes available).

Core Course 9 units

This required course introduces several modes of inquiry regarding religion, such as philosophy of religion, sociological and behavioral approaches to religion, historical analysis of religious subject matter, literary and critical analysis of religious texts, theological modes of thought, and anthropological treatments of religion.

79-281	Introduction to Religion	9
--------	--------------------------	---

Distribution Requirements 18 units

A distribution course is one that applies a particular discipline to more than one religion. Complete one course from two of the three different disciplinary approaches listed below (Historical, Philosophical, Textual). Feel free to consult with the Faculty Director about other options.

Historical Approaches

79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
79-307	Religion and Politics in the Middle East	9

79-353	Religious Identities and Religious Conflicts in 19th Century Europe	9
Philosophical Approaches		
80-276	Philosophy of Religion	9
Textual Approaches		
76-346	Angels and Diplomats -- Renaissance Poetry from Wyatt to Milton	9

Elective Courses 27 units

Complete courses totaling at least 27 units. In addition to the Carnegie Mellon courses listed below, electives may be chosen from among any of the courses listed above under "Distribution Requirements" that were not used to fulfill that requirement.

76-330	Medieval Literature	9
76-346	Angels and Diplomats -- Renaissance Poetry from Wyatt to Milton	9
76-430	Arthurian Romance and Its Modern Legacy	9
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-254	The Jewish Diaspora in Latin America	9
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
79-307	Religion and Politics in the Middle East	9
79-349	The Holocaust in Historical Perspective	9
79-350	Early Christianity	9
79-352	Christendom Divided: The Protestant and Catholic Reformation, 1450-1650	9
79-353	Religious Identities and Religious Conflicts in 19th Century Europe	9
80-276	Philosophy of Religion	9

Students may cross-register for relevant electives at the University of Pittsburgh, Duquesne University, or other Pittsburgh institutions with the permission of the Faculty Director for the religious studies minor.

The Minor in Science, Technology and Society

Faculty Director: Jay Aronson,
Office: Baker Hall 246B
Email: aronson@andrew.cmu.edu

This minor provides varied perspectives on the development and meaning of science and technology in modern society. The core courses enable you to explore the philosophical underpinnings, cultural and historical contexts, and economic and literary assessments of the interplay among science, technology, and society. Elective courses enable you to pursue in greater depth and variety subjects and approaches that build on both the core courses and your primary major.

Courses taken to fulfill requirements in other major or minor programs may only be applied to this minor with permission of the Faculty Director.

Curriculum 54 units

Core Courses 27 units

Complete two courses from Area 1 and one course from Area 2.

Area 1. History, Philosophy, and Social Studies of Science and Technology (18 units)

79-330	Medicine and Society	9
79-342	Introduction to Science and Technology Studies	9
79-354	Energy & Climate: History, Science, Technology, and Policy in the US 1776-2076	9
80-226	Revolutions in Science	9
80-323	Philosophy of Biology	9

Area 2. Language and Rhetoric in Science and Technology (9 units)

51-326	Photography & Family	9
76-319	Environmental Rhetoric	9
76-395	Science Writing	9
76-425	Science in the Public Sphere	9

76-476	Rhetoric of Science	9
76-492	Rhetoric of Public Policy	9

Electives 27 units

Complete three courses from the approved list of elective courses. Courses listed in Areas 1 and 2 may also be taken as electives if not already completed for an Area requirement. For a listing of approved courses, consult the description of the minor in Science, Technology and Society on the Dietrich College of Humanities and Social Sciences' webpage (<http://www.hss.cmu.edu/index.html>), or contact the Faculty Director directly at aronson@andrew.cmu.edu.

Area 3. Electives

15-xxx	Special Topics	9-12
18-482	Telecommunications, Technology Policy & Management	12
48-448	History of Sustainable Architecture	9
79-331	Body Politics: Women and Health in America	9
79-332	Medical Anthropology	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9
79-383	Epidemics, Disease, and Public Health	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
80-341	Computers, Society and Ethics	9
85-380	In Search of Mind: The History of Psychology	9

The Minor in Sociology

Faculty Director, Saurabh Bhargava
Program Advisor, Connie Angermeier
Office: Porter Hall 208A
Email: cla2@andrew.cmu.edu

The Sociology minor provides the student with a solid introduction to the central concepts in sociological theory and a grounding in the methods of empirical inquiry needed to understand societies, their histories, and how they change over time. Students choose among selected topics including social psychology, work and organizations, social networks, technology and society, medical sociology, and gender and family. Exposure to these topics will help students understand and appreciate the processes by which families, groups, and organizations form and evolve over time; by which individuals affect and are affected by the society in which they live; and by which technology and institutions shape and influence society. This background in empirical tools and social theory will strengthen students' ability to enter graduate studies in sociology, social history, social science, and organizational theory; to begin professional careers involving social analysis, network analysis, data analysis of teams, groups and organizations, social analysis within journalism, political institutions, the government; and to enter the corporate environment with a thorough understanding of organizational activity.

Curriculum 54 units

In addition to the general education requirements of the student's college and the requirements of the student's major, Sociology minors must satisfy the following requirements. The Core courses comprise 18 units of the minor. One course is taken from the Organizations cluster, and one course is taken from the Methodology cluster. The Elective courses comprise 36 units of the minor. Sociology minors should consult with the program advisor to plan a course schedule prior to registration.

NOTE: The core courses are offered regularly; the elective courses are offered with at least general regularity. Participating departments may subsequently develop and offer other courses that, while not listed here, are deemed appropriate for this minor. The program advisor should be consulted (especially when the schedule of courses to be offered for a given semester becomes available) to identify such additional courses.

No more than 9 units in the Sociology minor may be counted to fulfill any other major or minor's requirements.

Core Courses 18 units

A. Organizations

Complete one course.

70-311	Organizational Behavior	9
88-260	Organizations	9

B. Methodology

Complete one course.

36-202	Statistical Methods	9
70-208	Regression Analysis	9
85-340	Research Methods in Social Psychology	9
88-251	Empirical Research Methods	9
88-252	Causal Inference in the Field: Using Data to Study Crime, Love, Sports & More	9

Elective Courses 36 units

Complete four courses (a minimum of 36 units) from the following list. Two courses (18 units) must be taken from one category to complete the depth requirement. One course (9 units) must be taken from the other category. The remaining course (9 units) may be taken from either category. Appropriate courses offered by the Department of Sociology at the University of Pittsburgh (available during the academic year through cross-registration) may also be included as part of this option. Contact the Sociology program advisor for more information.

1. Sociology of Gender, Family, and Culture

70-342	Managing Across Cultures	9
79-244	Women in American History	9
79-261	Chinese Culture and Society	9
79-308	Inventing the American Airplane: Technology and Military Aviation, 1898-1945	6
79-320	Women, Politics, and Protest	9
79-323	Family, Gender, and Sexuality in European History, 500-1800	9
79-331	Body Politics: Women and Health in America	9
79-332	Medical Anthropology	9
79-339	Juvenile Delinquency and Film (1920 to "The Wire")	9
79-343	History of American Urban Life	9
79-377	Food, Culture, and Power: A History of Eating	9
80-230	Ethical Theory	9
80-245	Medical Ethics	9
80-305	Rational Choice	9
85-241	Social Psychology	9
85-446	Psychology of Gender	9

2. Sociology of Work, Organizations, and Technology

70-332	Business, Society and Ethics	9
70-414	Entrepreneurship for Engineers	9
73-331	Political Economy of Inequality and Redistribution	9
79-342	Introduction to Science and Technology Studies	9
80-341	Computers, Society and Ethics	9
88-341	Organizational Communication	9
88-345	Perspectives on Industrial Research and Development	9
88-347	Complex Technological Systems: Past, Present, and Future	9
88-371	Entrepreneurship, Regulation and Technological Change	9
88-391	Technology and Economic Growth	9
88-402	Modeling Complex Social Systems	9
88-413	Energy and Climate: History, Science, Technology, & Policy in the US 1776-2076	9
88-415	Global Competitiveness: Firms Nations, and Technological Change	9
88-419	Negotiation	9
88-423	Institutions, Entrepreneurship, and Innovation	9
88-435	Decision Science and Policy	9
88-451	Policy Analysis Senior Project	12
or 88-452	Policy Analysis Senior Project	

Note: Some courses have additional prerequisites.

Undergraduate Economics Program

Carol B. Goldberg, Executive Director of Undergraduate Economics (Tepper, Room 130)
 Kathleen Conway, Associate Director (Tepper, Room 131)
 Program Office: Tepper School of Business, Room 139
 E-mail: econprog@andrew.cmu.edu
 Advising Appointment Online Scheduler: <http://tepper.cmu.edu/undergradappt>
<http://tepper.cmu.edu/prospective-students/undergraduate/economics>

At its most fundamental level, economics is the study of how scarce resources are allocated. What will be produced and consumed, how much, and by whom? These questions are central to the well-being of people throughout the world. Economists identify, model, and analyze problems with the objective of developing practical and efficient solutions to challenges confronting society. Economists are also active participants in the processes and institutions through which economic policies are implemented. In the public arena sphere, economists contribute to design of programs and incentive systems to foster efficient implementation of policies. In the private sector, economists bring modeling and data-analytic skill to bear, both in identifying ways to enhance productive efficiency within the firm and in developing strategies to enhance effectiveness of the firm as it competes in the global marketplace. Increasingly, economists are taking advantage of advances in technology to design new exchange systems in applications as diverse as global electronic markets, kidney exchanges, pollution control, and school choice mechanisms.

Carnegie Mellon University enjoys a rich history of innovative research in the field of economics. The university has a distinctive culture that fosters collaborative, problem-oriented, theoretically rigorous, and empirically tested research. The success of this distinctive approach is manifest in the international recognition accorded past and present faculty, including nine Nobel Prizes in Economics. In the classroom, faculty bring the same rigorous, innovative approach to help develop the tremendous intellectual potential and analytic skills of students who are drawn to study economics at Carnegie Mellon. Project courses and hands-on applications in classes enable our students to gain valuable practical experience in honing their skills in economic reasoning, modeling, and data analysis.

The Undergraduate Economics Program has a unique position at Carnegie Mellon University. It is the sole undergraduate program that is a joint program of the Tepper School of Business and the Dietrich College of Humanities and Social Sciences. The combination of research strength (Tepper has been home to nine Nobel Laureates in Economics) and commitment to liberal arts and interdisciplinary studies (Dietrich has "the most creative general education program of any American university" - New York Times) provides our undergraduates with a world-class economics program.

Economics majors are considered members of both colleges and enjoy the full support and services of both. Undergraduate economics students should consult the program's website and handbook for details about applicable Tepper and Dietrich academic policies and procedures.

Educational Objectives

The Undergraduate Economics Program offers a range of degrees in economics designed to develop strong analytical skills and a solid foundation in the discipline of economics. More specifically, measurable objectives for our economics curriculum are the following:

- Students should be able to identify, explain, and use economic concepts, theories, models, and data-analytic techniques.
- Students should acquire and use knowledge of economics, mathematics, statistics, and computing flexibly in a variety of contexts, providing the foundation for success in graduate studies and careers in the public and private sectors.
- Students should be able to apply their economic tools to formulate positions on a wide range of social and economic problems and engage effectively in policy debates.
- Students should use the investigative skills necessary for conducting original economic research and participating effectively in project teams.
- Students should be able to deliver effective presentations in which they combine visual communication design with oral arguments and/or the written word.

Advising

The Undergraduate Economics Program is committed to providing students with the opportunity to have meaningful and informative discussions about their academic, intellectual, and career interests with a wide range of advisors and mentors. In college, advising meetings are not the same thing as "being sent to the principal's office" in high school. Instead, advising meetings are extended discussions which may address both immediate and long-term interests, concerns, and desires/needs. Students pursuing a degree in economics are assigned an economics advisor who meets with them on a regular basis. Any CMU undergraduate student interesting in taking an economics courses is invited to meet with an economics advisor. To facilitate scheduling advising meetings, please use the online appointment scheduler (<http://tepper.cmu.edu/undergradappt>).

The economics curriculum is cumulative; higher-level courses build upon the foundations learned in the core course. This results in students needing to be aware of course-sequencing and the schedule of classes.

Students are encouraged to meet frequently with their Undergraduate Economics Program academic advisor to ensure that their courses fulfill the requirements towards their degree and are appropriately sequenced. Historically, successful students typically checked-in with their advisor frequently and sought the advice of their academic advisor in selecting courses, pursuing additional degrees, and planning ahead for study abroad.

First-Year Advising

Most first-year students who major in economics enter the Carnegie Mellon University as Dietrich College students, and are assigned a Dietrich College Academic Advisory Center (<http://www.cmu.edu/hss/advisory-center>) (AAC) advisor. Students who are considering majoring in economics are encouraged to contact the Undergraduate Economics Program academic advisors so that they will have access to program resources; program-level advising; and the community of faculty, staff, and students.

First-year students are **not** expected to know which degree option they wish to pursue. For this reason, the first-year curricula are quite similar for the four primary degrees awarded by the program. As students become involved in their course work, participate in the extra- and co-curricular activities sponsored by the Undergraduate Economics Program, and discussions with faculty and economics advisors, the decision of which degree to pursue becomes evident.

Study Abroad

The Undergraduate Economics Program encourages students to consider enriching their undergraduate experience by studying abroad at some point during their undergraduate tenure. Studying abroad is widely defined as either study, work, internship, volunteer, or research opportunities abroad during your college career. Studying abroad provides students with not only more awareness of cultural literacies, but it further enhances their education by providing them with the opportunity to compare and contrast different economies and regimes. Many students consider their study abroad experience to be a watershed moment in their studies. With a bit of careful planning, study abroad can be worked into most any economics student's 4-year schedule.

Preparation for Professional School Programs

Many economics students will attend professional graduate school programs (e.g., DDS, JD, MBA, MD, MPP, M.Sc. Finance, etc.) immediately after graduation or within the first five years of earning their undergraduate degree. Students who are considering applying to professional graduate schools are encouraged to meet with an economics advisor early in their career at CMU. The economics advisors can provide structure and information that are invaluable during a student's intellectual and career exploration. Knowing that the choice of courses, student achievement, extra- and co-curricular activities, professional school entrance exam test scores (e.g., GMAT, LSAT, MCAT, etc), and faculty recommendations are key determinants of acceptance into these varied programs, the economics advisors will help you plan your time at CMU.

Preparation for Ph.D. Programs in Economics

The Undergraduate Economics Program has been successful in preparing students for admission into the nation's most competitive doctoral programs. The life of a researcher (whether in academia or in the private research sector) requires a set of skills that undergraduate students will begin to acquire through course work, research, and focused conversations with faculty and advisors. Doctoral programs in economics are looking for specific analytical skills. Key determinants of acceptance into these programs are the choice of courses, student achievement, research experience, graduate school entrance exam test scores (specifically the GRE), and faculty recommendations. Students who are considering pursuing a higher academic degree are encouraged to meet an economics advisor early in their career at CMU. Interested students are encouraged to look at the B.S. in Economics and Mathematical Sciences curriculum.

Curricula

In order to accommodate students' wide variety of goals, four primary degree programs are available: Bachelor of Arts in Economics, Bachelor of Science in Economics, Bachelor of Science in Economics and Mathematical Sciences (jointly administered by the Department of Mathematics and the Undergraduate Economics Program), and Bachelor of Science in Economics and Statistics (jointly administered by the Department of Statistics and the Undergraduate Economics Program).

The four major degree programs have been designed to provide students with a solid understanding of the central theories and analytical tools of the field of economics, while maintaining the flexibility necessary to meet the needs of a diversity of career paths. The four degrees produce strong analytical thinkers who are able to model and analyze complex problems. Graduates of the Undergraduate Economics Program gain employment as economic analysts in both the private and public sectors; pursue advanced professional degrees in business, law, and public policy; as well as enter into Ph.D. programs in economics, statistics, finance, and related fields.

For students who major in other academic fields, additional major programs in Economics and in Economics and Statistics and a minor degree program in Economics are available. Information about these degrees can be found following the discussions about the major curricula.

Major Degree Requirements and Sample Schedules

In addition to completing a minimum 360 units and fulfilling both the Dietrich General Education requirements and all University requirements, recipients of an undergraduate degree in economics must complete courses in mathematics, probability and statistics, writing, economic theory, and economic analysis, as well as a set of advanced electives and other specialized courses. It is important for students to realize that degree requirements are actually the "minimum" set of degree requirements. In fact, most economics students take more courses in their major than is strictly required.

Following the list of requirements for each degree are sample four-year course schedules for a student pursuing an undergraduate degree in economics. As there are many different ways of completing the requirements, students are strongly encouraged to meet with an economics advisor to tailor their courses to their own particular needs. Students are responsible for ensuring that they understand all of the program requirements and that they meet the necessary conditions for graduation. When planning course schedules, students must give consideration to all prerequisite and co-requisite requirements.

In addition to meeting university and college graduation requirements, the Undergraduate Economics Program has the additional requirement: Economics courses counting towards any economics primary degree, additional major, or minor must be completed with a grade of "C" or higher.

B.A. in Economics

The B.A. in Economics provides a strong foundation in economic analysis and quantitative methods. The curriculum's breadth incorporates the study of political, historical, and social institutions so that students may use the economic toolkit to address the current challenges humanity faces. Built into the degree is the opportunity to study political, historical, cultural, and social institutions from other CMU departments; these courses are referred to as "Special Electives". The advanced data analysis component of the B.A. in Economics Curriculum pays additional attention to ordinal data and the study of surveys. The capstone of the curriculum is the Senior Project course where students use their qualitative and quantitative skills to contribute to the body of knowledge in empirical, experimental, and/or theoretical studies. Students pursuing this degree will be well-equipped to pursue graduate work (professional and academic), enter directly into the business world, or pursue public service.

B.A. in Economics Curriculum

Total Number of Units for the Major: 173/182

Mathematics Prerequisites (19 units)

Courses		Units
21-120	Differential and Integral Calculus Passing the MCS assessment test is an acceptable alternative to completing 21-120.	10
21-256	Multivariate Analysis	9

Sophomore Economics Colloquium (1 unit)

		Units
73-450	Economics Colloquium	1

Writing Requirement (9 units)

		Units
73-270	Writing for Economists	9

Economic Theory Requirements (27 units)

		Units
73-100	Principles of Economics	9
73-230	Intermediate Microeconomics	9
73-240	Intermediate Macroeconomics	9

Economic History Requirement (9 Units)

		Units
73-310	Evolution of Economic Ideas and Analysis	9

Quantitative Analysis Requirements (36 Units)

		Units
36-201	Statistical Reasoning and Practice	9
or 36-207	Probability and Statistics for Business Applications	
or 70-207	Probability and Statistics for Business Applications	
36-202	Statistical Methods	9
or 36-208	Regression Analysis	
or 70-208	Regression Analysis	
73-407	Fundamentals of Statistical Modeling	9
36-303	Sampling, Survey and Society	9

Advanced Economics Electives (36 Units)

Students must take four advanced elective courses. Advanced elective courses are those numbered 73-300 through 73-495 (excluding 73-310 Evolution of Economic Ideas and Analysis, 73-374 Econometrics II, 73-407 Fundamentals of Statistical Modeling, and 73-450 Economics Colloquium) as well as selected courses designated by the Program offered by other departments/programs. Additionally, students may work with their advisor to structure alternative sets of courses to meet these requirements based on their particular interests, subject to course availability.

Special Electives (27 Units)

Students must take three special elective courses in the humanities and social sciences. The complete list of courses designated as special electives is available to current students at MyTepper (<http://>

mytepper.tepper.cmu.edu). The list below is representative of the courses that qualify as "Special Electives"; this is not an exhaustive list of qualifying courses. In particular, the graduate courses from Heinz College which open to B.A. in Economics students are not presented.

Course List

Representative List of Special Elective Courses		Units
79-221	Development and Democracy in Latin America	9
79-245	Capitalism and Individualism in American Culture	9
79-246	Industrial America	9
79-266	Russian History: From Communism to Capitalism	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9
79-300	History of American Public Policy	9
79-392	History of Modern Warfare	9
79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9
79-386	Entrepreneurs in Africa, Past, Present and Future	9
80-130	Introduction to Ethics	9
80-136	Social Structure, Public Policy & Ethics	9
80-221	Philosophy of Social Science	9
80-235	Political Philosophy	9
88-260	Organizations	9
80-305	Rational Choice	9
80-321	Causation, Law, and Social Policy	9
80-337	Philosophy, Politics & Economics	9
80-348	Health Development and Human Rights	9
84-310	International Political Economy and Organizations	9
88-365	Behavioral Economics and Public Policy	9
88-387	Social Norms and Economics	9
88-411	Rise of the Asian Economies	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9

Senior Work (9 Units; 18 Units for students working on an honors thesis in economics)

	Units
73-497 Senior Project	9
or 73-500 & 73-501 Tepper College Honors Thesis I and Tepper College Honors Thesis II	
or 66-501 & 66-502 H&SS Senior Honors Thesis I and H&SS Senior Honors Thesis II	

Sample Schedule for B.A. in Economics

The sample schedule below is an illustration of how students might plan their four-year schedules. This schedule has been designed to highlight the following characteristics of the degree program: 1) the work load is roughly 45-50 units per semester, hence there is no need for course overloading; and 2) room has been built into the schedule that would allow students to pick up additional degrees and/or study abroad. It is important for students to realize that degree requirements are the actually the "minimum" set of degree requirements. In fact, most economics students take more courses in their major than is strictly required.

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-120 Differential and Integral Calculus	21-256 Multivariate Analysis	73-230 Intermediate Microeconomics	73-240 Intermediate Macroeconomics
36-201 Statistical Reasoning and Practice	36-202 Statistical Methods	73-450 Economics Colloquium	73-407 Fundamentals of Statistical Modeling
73-100 Principles of Economics	73-155 Legonomics: Building Blocks of Economic Analysis**	"Special Elective"	Economics Elective
-----*	-----	-----	-----
-----	-----	-----	-----

Junior		Senior	
Fall	Spring	Fall	Spring
73-310 Evolution of Economic Ideas and Analysis	36-303 Sampling, Survey and Society	73-497 Senior Project	Economics Elective
73-270 Writing for Economists	Economics Elective	Economics Elective	----
"Special Elective"	"Special Elective"	----	----
----	----	----	----
----	----	----	----

*In each semester, ----- represents courses that are not directly required for the major.

** While not required, 73-155 is strongly recommended.

B.S. in Economics

The B.S. in Economics provides a strong foundation in economic theory and advanced quantitative analysis. The curriculum focuses on using "real-world" data to forecast behavior and to investigate the relationships between observed phenomenon and economic models. Combining these sophisticated economic modeling data analytic skills with our wide range of upper-level economic electives provides students with a rigorous analytical foundation that will allow them to pursue any career that interests them. The capstone of the curriculum is the Senior Project course where students use their qualitative and quantitative skills to contribute to the body of knowledge in empirical, experimental, and/or theoretical studies. Students completing this degree will be well-equipped to pursue graduate work (professional and academic) or enter directly into the business world or public service.

B.S. in Economics Curriculum

Total Number of Units for the Major 156/165

Mathematics Requirement (29 Units)

	Units
21-120 Differential and Integral Calculus Passing the MCS assessment test is an acceptable alternative to completing 21-120.	10
21-256 Multivariate Analysis	9
or 21-259 Calculus in Three Dimensions	
21-122 Integration and Approximation *	10
or 21-127 Concepts of Mathematics	
or 21-257 Models and Methods for Optimization	
*Students are encouraged to meet with an economics advisor to determine which course best fits their interests	

Sophomore Colloquium (1 Unit)

	Units
73-450 Economics Colloquium	1

Quantitative Analysis Requirements (27 Units)

	Units
36-225 Introduction to Probability Theory	9
or 36-217 Probability Theory and Random Processes	
or 21-325 Probability	
73-274 Econometrics I	9
73-374 Econometrics II	9

Writing Requirement (9 Units)

	Units
73-270 Writing for Economists	9

Economic Theory Requirements (27 Units)

	Units
73-100 Principles of Economics	9
73-230 Intermediate Microeconomics	9
73-240 Intermediate Macroeconomics	9

Advanced Economics Electives (54 Units)

Students must take six advanced elective courses. Advanced elective courses are those numbered 73-300 through 73-495 (excluding 73-374 Econometrics II, 73-407 Fundamentals of Statistical Modeling, and 73-450 Economics Colloquium). For the purpose of these requirements, the Undergraduate Economics Program may also designate as advanced elective courses from other departments/programs. Additionally, students may work with their advisor to structure alternative sets of courses to meet these requirements based on their particular interests, subject to course availability.

Senior Work (9 Units; 18 Units for students working on an honors thesis in economics)

		Units
73-497	Senior Project	9
or 73-500 & 73-501	Tepper College Honors Thesis I and Tepper College Honors Thesis II	
or 66-501 & 66-502	H&SS Senior Honors Thesis I and H&SS Senior Honors Thesis II	

Sample Course Schedule for the B.S. in Economics

The sample schedule below is an illustration of how students might plan their four-year schedules. This schedule has been designed to highlight the following characteristics of the degree program: 1) the work load is roughly 45-50 units per semester, hence there is no need for course overloading; and 2) room has been built into the schedule that would allow students to pick up additional degrees and/or study abroad. It is important for students to realize that degree requirements are the actually the "minimum" set of degree requirements. B.S. in Economics and Mathematical Sciences

The B.S. in Economics and Mathematical Sciences is a collaborative effort between the Department of Mathematical Sciences and the Undergraduate Economics Program. Combining advanced mathematics with advanced economic theory is the hallmark of this curriculum. The curriculum provides students with courses that complement and develop depth of understanding of economic theory, applied economics, and applied mathematics. This degree offers an integrated curriculum, guiding students through a program of coursework that exploits and builds upon the synergies between mathematics and economics. This degree program equips students with the mathematical tools that are essential for success in Ph.D. programs in economics; mathematics; and key functional areas of business including finance, accounting, marketing, and information systems. Students pursuing this degree will be well prepared for the beginning of their research careers in academia, government, and industry. There are a limited number of student openings in this program; interested students may apply as early as their sophomore year. The application process may include a discussion

with the Department of Mathematics's Director of Undergraduate Studies and the Undergraduate Economics Program's Executive Director; a Carnegie Mellon faculty recommendation; and a completed application submission (The application requests information about academic achievement, potential research interests, academic and/or research recognition, and meta-curricular activities. Details may be found at MyTepper (<http://mytepper.tepper.cmu.edu>)). Acceptance into the degree program is based on academic performance, rigor of coursework, and initiative while at Carnegie Mellon. In order to graduate with the B.S. in Economics and Mathematical Sciences, students must maintain a cumulative Q.P.A. of 3.33.

B.S. in Economics and Mathematical Sciences Curriculum

Total Number of Units for the Major 230

Economic Theory Requirements (27 Units)

		Units
73-100	Principles of Economics	9
73-230	Intermediate Microeconomics	9
73-240	Intermediate Macroeconomics	9

Quantitative Analysis Requirements (36 Units)

		Units
36-225	Introduction to Probability Theory	9
or 36-217	Probability Theory and Random Processes	
or 21-325	Probability	
36-226	Introduction to Statistical Inference	9
36-401	Modern Regression	9
73-374	Econometrics II	9

Mathematical Sciences Requirements (85 Units)

		Units
21-120	Differential and Integral Calculus	10
	Passing the MCS assessment test is an acceptable alternative to completing 21-120.	
21-122	Integration and Approximation	10
21-127	Concepts of Mathematics	10
21-228	Discrete Mathematics	9
21-241	Matrices and Linear Transformations	10
21-259	Calculus in Three Dimensions	9-10
or 21-256	Multivariate Analysis	
or 21-268	Multidimensional Calculus	
or 21-269	Vector Analysis	
21-260	Differential Equations	9
21-355	Principles of Real Analysis I	9
21-356	Principles of Real Analysis II	9

Programming Requirement (10 Units)

		Units
15-110	Principles of Computing	10

Writing Requirement (9 Units)

		Units
73-270	Writing for Economists	9

Advanced Economic Electives (36 Units)

Students must take four advanced economics elective courses. Advanced Elective courses are those courses numbered 73-300 through 73-495, (excluding 73-374 Econometrics II, 73-407 Fundamentals of Statistical Modeling, and 73-450 Economics Colloquium) as well as courses designated by the Undergraduate Economics Program which are offered by other departments/programs. Students are encouraged to work with their advisors to structure a set of courses which meet these requirements based on their particular interests, subject to course availability.

Recommended Advanced Economics Electives:

73-310	Evolution of Economic Ideas and Analysis	9
73-315	Market Design	9
73-338	Financial Crises and Risk	9

73-347	Game Theory for Economists	9
--------	----------------------------	---

Mathematical Science Depth Electives (27 Units)

Students must take three advanced mathematics depth courses. Students are encouraged to work with their advisors to structure a set of courses which meet these requirements based on their particular interests, subject to course availability.

Recommended Mathematical Science Depth Electives:

21-292	Operations Research I	9
21-329	Set Theory	9
21-365	Projects in Applied Mathematics	9
21-366	Topics in Applied Mathematics	9
21-371	Functions of a Complex Variable	9
21-374	Field Theory	9
21-441	Number Theory	9
21-484	Graph Theory	9
21-499	Undergraduate Research Topic	9

Note: Only one of the following three courses may count towards the required Mathematical Sciences Depth Electives: 21-365, 21-366, or 21-499.

Sample Course Schedule for the B.S. in Economics and Mathematical Sciences

The sample schedule below is an illustration of how students might plan their four-year schedules. This schedule has been designed to highlight the following characteristics of the degree program: 1) the work load is roughly 45-50 units per semester, hence there is no need for course overloading; 2) room has built into the schedule that would allow students to pick up additional degrees and/or study abroad; and 3) the demands of this degree require students to carefully plan their degree program while keeping in mind the college-level and university-level graduation requirements. It is important for students to realize that degree requirements are the actually the "minimum" set of degree requirements. In fact, most economics students take more courses in their major than is strictly required.

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-120 Differential and Integral Calculus	15-110 Principles of Computing	21-122 Integration and Approximation	21-241 Matrices and Linear Transformations
36-201 Statistical Reasoning and Practice	21-256 Multivariate Analysis	21-127 Concepts of Mathematics	36-226 Introduction to Statistical Inference
73-100 Principles of Economics	73-155 Legonomics: Building Blocks of Economic Analysis**	73-230 Intermediate Microeconomics	73-240 Intermediate Macroeconomics
-----*	-----	36-225 Introduction to Probability Theory	Economics Elective
-----	-----	-----	-----

Junior		Senior	
Fall	Spring	Fall	Spring
21-260 Differential Equations	21-355 Principles of Real Analysis I	21-228 Discrete Mathematics	21-356 Principles of Real Analysis II
73-374 Econometrics II	Economics Elective	36-401 Modern Regression	-----
73-270 Writing for Economists	Economics Elective	Mathematics Elective	-----
Economics Elective	Mathematics Elective	-----	-----
Mathematics Elective	-----	-----	-----

*In each semester, ----- represents courses not directly required for the major. Please note that students pursuing the B.S. in Mathematical Sciences and Economics must fulfill the Mellon College General Education requirements and not the Dietrich College General Education requirements.

**While not required, 73-155 is strongly recommended.

B.S. in Economics and Statistics

Academic Advisor: Paige Houser
 For questions about Economics courses contact: Carol Goldberg or Kathleen Conway
 For questions about Statistics courses contact: Rebecca Nugent or Paige Houser

Office: Baker Hall 132A
 Email: acadcoord@stat.cmu.edu

The Major in Economics and Statistics provides an interdisciplinary course of study aimed at students with a strong interest in the empirical analysis of economic data. With joint curriculum from the Department of Statistics and the Undergraduate Economics Program, the major provides students with a solid foundation in the theories and methods of both fields. Students in this major are trained to advance the understanding of economic issues through the analysis, synthesis and reporting of data using the advanced empirical research methods of statistics and econometrics. Graduates are well positioned for admission to competitive graduate programs, including those in statistics, economics and management, as well as for employment in positions requiring strong analytic and conceptual skills - especially those in economics, finance, education, and public policy.

The requirements for the B.S. in Economics and Statistics are the following:

I. Prerequisites 38-39 units

1. Mathematical Foundations 38-39 units

Calculus

21-120	Differential and Integral Calculus	10
--------	------------------------------------	----

and one of the following three:

21-122	Integration and Approximation	10
21-127	Concepts of Mathematics	10
21-257	Models and Methods for Optimization	9

and one of the following:

21-256	Multivariate Analysis	9
21-259	Calculus in Three Dimensions	9

Note: Passing the MSC 21-120 assessment test is an acceptable alternative to completing 21-120.

Note: Taking both 21-111 and 21-112 is equivalent to 21-120. The Mathematical Foundations total is then 48-49 units. The Economics and Statistics major would then total 201-202 units.

Linear Algebra

One of the following three courses:

21-240	Matrix Algebra with Applications	10
21-241	Matrices and Linear Transformations	10
21-242	Matrix Theory	10

Note: 21-241 and 21-242 are intended only for students with a very strong mathematical background.

II. Foundations 18-27 units

2. Economics Foundations 9 units

73-100	Principles of Economics	9
--------	-------------------------	---

3. Statistical Foundations 9-18 units

Sequence 1 (For students beginning their freshman or sophomore year)

36-201	Statistical Reasoning and Practice	9
--------	------------------------------------	---

and one of the following:

36-202	Statistical Methods	9
36-208	Regression Analysis	9
36-309	Experimental Design for Behavioral and Social Sciences	9

Or extra statistical elective**

*Acceptable equivalents for 36-201 are 36-207 (70-207), 36-220 and 36-247.

**Students who enter the program with 36-225/36-226 should discuss options with their advisors.

Sequence 2 (For students beginning later in their college career)

Advanced

Choose one of the following courses:

36-303	Sampling, Survey and Society	9
36-315	Statistical Graphics and Visualization	9

36-461	Special Topics: Statistical Methods in Epidemiology	9
36-462	Special Topics: Data Mining	9
36-463	Special Topics: Multilevel and Hierarchical Models	9
36-464	Special Topics: Applied Multivariate Methods	9

III. Disciplinary Core 126 units

1. Economics Core 36 units

73-230	Intermediate Microeconomics	9
73-240	Intermediate Macroeconomics	9
73-270	Writing for Economists	9
73-374	Econometrics II	9

2. Statistics Core 36 units

36-225 Introduction to Probability Theory *# 9

and one of the following two courses:

36-226	Introduction to Statistical Inference *	9
36-326	Mathematical Statistics (Honors) *	9

and both of the following two courses:

36-401	Modern Regression *	9
36-402	Advanced Methods for Data Analysis	9

*In order to be a major in good standing, a grade of C or better is required in 36-225 (or equivalents), 36-226 or 36-326 and 36-401. Otherwise you will not be allowed to continue in the major.

#It is possible to substitute 36-217 or 21-325 for 36-225. (36-225 is the standard introduction to probability, 36-217 is tailored for engineers and computer scientists, and 21-325 is a rigorous Probability Theory course offered by the Department of Mathematics.)

3. Computing 9 units

36-350	Statistical Computing *	9
--------	-------------------------	---

*A higher level Computer Science course approved by your Academic Advisor may be used as a substitute.

4. Advanced Electives 45 units

Students must take three advanced Economics elective courses (numbered 73-300 through 73-495, excluding 73-374, 73-407 and 73-450) and two advanced Statistics elective courses (numbered 36-303, 36-315, or 36-410 through 36-495).

Total number of units for the major 182-192 units

Total number of units for the degree 360 units

Sample Program

The following sample program illustrates one way to satisfy the requirements of the Economics and Statistics Major. Keep in mind that the program is flexible and can support other possible schedules (see footnotes below the schedule).

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-120 Differential and Integral Calculus	36-202 Statistical Methods	21-122 Integration and Approximation **	21-240 Matrix Algebra with Applications
36-201 Statistical Reasoning and Practice	21-256 Multivariate Analysis	36-225 Introduction to Probability Theory	36-226 Introduction to Statistical Inference
73-100 Principles of Economics	73-155 Legonomics: Building Blocks of Economic Analysis	73-230 Intermediate Microeconomics	73-240 Intermediate Macroeconomics
-----*	-----	-----	-----
-----	-----	-----	-----

Junior		Senior	
Fall	Spring	Fall	Spring
36-350 Statistical Computing	36-402 Advanced Methods for Data Analysis	Statistics Elective	Economics Elective
36-401 Modern Regression	73-270 Writing for Economists	Economics Elective	Statistics Elective
73-374 Econometrics II	Economics Elective	-----	-----
-----	-----	-----	-----
-----	-----	-----	-----

*In each semester, ----- represents other courses (not related to the major) which are needed in order to complete the 360 units that the degree requires.

** Students can also take 21-127 or 21-257. Students should consult with their advisor.

73-155 is not required but it is recommended by the Economics department.

Prospective PhD students might add 21-127 fall of sophomore year, replace 21-240 with 21-241, add 21-260 in spring of junior year and 21-355 in fall of senior year.

Students who elect Economics and Statistics as a second major must fulfill all Economic and Statistics degree requirements. Majors in many other programs would naturally complement a Statistics Major, including Business Administration, Social and Decision Sciences, Policy and Management, Social & Political History, and Psychology.

With respect to double-counting courses, it is departmental policy that students must have at least six courses (three Economics and three Statistics) that do not count for their primary major. If students do not have at least six, they typically take additional advanced electives.

Students are advised to begin planning their curriculum (with appropriate advisors) as soon as possible. This is particularly true if the other major has a complex set of requirements and prerequisites.

Supplemental Programs

Honors Program in Economics

Outstanding students are eligible for the honors programs in both the Tepper School of Business and the Dietrich College of Humanities and Social Sciences. For more information, consult the Dietrich Honors Program website (<http://www.cmu.edu/dietrich/undergraduate/programs/shp>).

The Tepper Senior Honors Program in Economics (<http://tepper.cmu.edu/prospective-students/undergraduate/economics/curriculum/research/senior-honors-program>) provides qualified students with the opportunity to engage in original research during their senior year at Carnegie Mellon. The primary rewards of participating in the Honors Program in Economics are three-fold. First comes the satisfaction of undertaking and completing an original piece of research. Working independently or with a faculty member to identify a research question and claim ownership of its discovery process is a rewarding experience. Second is the opportunity to challenge oneself intellectually. The third advantage is the opportunity to graduate with Tepper Honors. For many, this process of intellectual inquiry and knowledge creation is the highlight and culmination of their undergraduate academic experience.

Students are invited into the Tepper Senior Honors Program in Economics during their junior year. Invitation is based on academic achievement at Carnegie Mellon University, ability to work independently, and tenacity of spirit.

Accelerated Master's Degree Programs

Accelerated Master's Degree programs enable exceptional students to earn both an undergraduate degree and a masters degree by remaining one additional year at Carnegie Mellon. The Heinz College of Public Policy and Management offers four professional accelerated masters degree programs: a Master of Science in Arts Administration (<http://www.heinz.cmu.edu/school-of-public-policy-management/arts-management-mam>), Master of Science of Health Care and Policy Management (<http://www.heinz.cmu.edu/school-of-public-policy-management/healthcare-policy-management-hcpm>), Master of Information Systems Management (<http://www.heinz.cmu.edu/school-of-information-systems-and-management/information-systems-management-mism>), and Master of Science in Public Policy and Management (<http://www.heinz.cmu.edu/school-of-public-policy-management/public-policy-management-msppm>). The Tepper School of

Business offers one accelerated professional degree, a Master in Business Administration.

Dual Degree in Economics

A student pursuing a primary degree outside of the department may obtain a dual degree by completing all of the requirements for the B.S. in Economics or the B.S. in Economics and Statistics along with the Dietrich College general education requirements. In addition, the student's total units completed must be at least 90 units in excess of the requirement for the student's other degree(s) or at least 450 units, whichever is greater. Interested students should meet with an economics advisor.

Additional Major in Economics Curriculum

All university students are eligible to pursue an additional major in economics in conjunction with a major in any department in the university other than economics. The requirements for the Additional Major in Economics are the same as those for the B.S. in Economics, except that the Dietrich College General Education requirements are waived. In order to avoid "double counting" issues, students are encouraged to meet with an economics advisor. When courses are shared across degrees, students pursuing an Additional Major in Economics are asked to take additional advanced economics electives.

Additional Major in Economics and Statistics Curriculum

All university students are eligible to pursue a major in economics and statistics in conjunction with a major in any department in the university other than statistics or economics. The requirements for the Additional Major in Economics in Statistics are the same as those for the B.S. in Economics and Statistics, except that the Dietrich College General Education requirements are waived. In order to avoid "double counting" issues, students are encouraged to meet with an economics or statistics advisor. When courses are shared across degrees, students pursuing an Additional Major in Economics and Statistics are asked to take additional advanced economics or statistics electives.

Minor in Economics

The Minor in Economics degree program provides students with a solid understanding of economic theory and data analysis.

All university students are eligible to pursue the Minor in Economics in conjunction with a major in any other department in the university. In order to avoid "double counting" issues, students are encouraged to meet with an economics advisor. When courses are shared across degrees, students pursuing a minor in Economics are asked to take additional advanced economics electives.

All economics course counting towards the minor must be completed with a grade of "C" or higher.

Minor in Economics (Total Number of Units for the Minor: 82/91)

Mathematics Requirements (19 Units)

	Units
21-120 Differential and Integral Calculus	10
21-256 Multivariate Analysis	9

Economic Theory Requirements (18/27 Units)

	Units
73-100 Principles of Economics	9
73-230 Intermediate Microeconomics	9
73-240 Intermediate Macroeconomics *	9

*Some students may choose to focus their minor in microeconomics theory and applications. These students may elect not to take 73-240 Intermediate Macroeconomics, and instead, replace it with an additional advanced economics elective.

Quantitative Analysis Requirements (18/27 Units)

The quantitative analysis path is often determined by the major requirements. The sequence is designed to give students an understanding of probability theory, regression analysis, and quantitative economic analysis. Students are encouraged to talk with an economics advisor to determine which requirements best complement their primary fields of study.

	Units
Option One	
36-201 Statistical Reasoning and Practice	9
36-202 Statistical Methods	9
or 36-309 Experimental Design for Behavioral and Social Sciences	
73-407 Fundamentals of Statistical Modeling	9
Option Two	
70/36-207 Probability and Statistics for Business Applications	9
70/36-208 Regression Analysis	9
73-407 Fundamentals of Statistical Modeling	9
Option Three	
36-220 Engineering Statistics and Quality Control	9
73-407 Fundamentals of Statistical Modeling	9
Option Four	
36-217 Probability Theory and Random Processes	9
or 36-225 Introduction to Probability Theory	
36-202 Statistical Methods	9
or 36-309 Experimental Design for Behavioral and Social Sciences	
or 36-226 Introduction to Statistical Inference	
73-407 Fundamentals of Statistical Modeling	9
or 73-374 Econometrics II	

Advanced Economics Electives (18/27 Units)

Students must take two advanced elective courses. Advanced elective courses are those numbered 73-300 through 73-495 (excluding 73-374 Econometrics II, 73-407 Fundamentals of Statistical Modeling, and 73-450 Economics Colloquium) as well as courses designated by the program offered by other departments/programs. Additionally, students may work with their economics advisor to structure alternative sets of courses to meet these requirements based on their particular interests, subject to course availability.

Academic Standards and Policies

Undergraduate economics students are in the unique position of belonging to two CMU colleges, Marianna Brown Dietrich College of Humanities and Social Sciences and the Tepper School of Business. To find a detailed description of policies governing economics students, please consult the undergraduate section of MyTepper (<http://mytepper.tepper.cmu.edu>).

Faculty

LAURENCE ALES, Associate Professor of Economics - Ph.D., University of Minnesota; Carnegie Mellon, 2008-.

KATHARINE ANDERSON, Assistant Professor of Economics and Entrepreneurship - Ph.D., University of Michigan; Carnegie Mellon, 2010-.

STEPHEN M. CALABRESE, Visiting Associate Professor of Economics, Carnegie Mellon University-Qatar - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2007-.

KAREN B. CLAY, Associate Professor of Economics and Public Policy, H. J. Heinz III College - Ph.D., Stanford University; Carnegie Mellon, 1998-.

ROBERT M. DAMMON, Dean; Professor of Financial Economics - Ph.D., University of Wisconsin; Carnegie Mellon, 1984-.

TIMOTHY P. DERDINGER, Assistant Professor of Economics and Strategy - Ph.D., University of Southern California; Carnegie Mellon, 2009-.

KENNETH B. DUNN, Professor of Financial Economics - Ph.D., Purdue University; Carnegie Mellon, 1979-.

DENNIS N. EPPLE, Thomas Lord University Professor of Economics - Ph.D., Princeton University; Carnegie Mellon, 1974-.

CHRISTINA FONG, Senior Research Scientist in Social and Decision Sciences, College of Humanities and Social Sciences – Ph.D., University of Massachusetts; Carnegie Mellon, 2001–.

MARTIN GAYNOR, E.J. Barone Professor of Economics and Health Policy, H. J. Heinz III College – Ph.D., Northwestern University; Carnegie Mellon, 1995–.

MARVIN GOODFRIEND, Friends of Allan Meltzer Professorship; Professor of Economics – Ph.D., Brown University; Carnegie Mellon, 2005–.

RICHARD C. GREEN, Richard M. and Margaret S. Cyert Chair; Professor of Financial Economics – Ph.D., University of Wisconsin; Carnegie Mellon, 1982–.

JOACHIM RYOHEI GROEGER, Assistant Professor of Economics – Ph.D., London School of Economics; Carnegie Mellon, 2010–.

ISA E. HAFALIR, Associate Professor of Economics – Ph.D., Pennsylvania State University; Carnegie Mellon, 2007–.

BURTON HOLLIFIELD, PNC Professor of Finance; Professor of Financial Economics – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1999–.

KARAM KANG, Assistant Professor of Economics – Ph.D., University of Pennsylvania; Carnegie Mellon, 2012–.

ONUR KESTEN, Associate Professor of Economics – Ph.D., University of Rochester; Carnegie Mellon, 2005–.

YAROSLAV KRYUKOV, Assistant Professor of Economics – Ph.D., Northwestern University; Carnegie Mellon, 2008–.

ALEXEY KUSHNIR, Assistant Professor of Economics – Ph.D., Pennsylvania State University; Carnegie Mellon, 2014–.

FINN KYDLAND, The Richard P. Simons Distinguished Professorship; University Professor of Economics; Nobel Laureate (2004) – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1977–.

REBECCA LESSEM, Assistant Professor of Economics – Ph.D., University of Wisconsin-Madison; Carnegie Mellon, 2011–.

BENNETT T. MCCALLUM, H. J. Heinz Professor of Economics – Ph.D., Rice University; Carnegie Mellon, 1981–.

ALLAN H. MELTZER, The Allan H. Meltzer University Professor of Political Economy – Ph.D., University of California, Los Angeles; Carnegie Mellon, 1957–.

ROBERT A. MILLER, Richard M. Cyert and Morris DeGroot Professor of Economics and Statistics – Ph.D., University of Chicago; Carnegie Mellon, 1982–.

JOHN R. O'BRIEN, Associate Dean, Carnegie Mellon University-Qatar; Associate Professor of Accounting and Experimental Economics – Ph.D., University of Minnesota; Carnegie Mellon, 1984–.

DUANE J. SEPPI, BNY Mellon Professor of Finance; Head, Master of Science in Computational Finance – Ph.D., University of Chicago; Carnegie Mellon, 1986–.

CHRISTOPHER SLEET, Professor of Economics – Ph.D., Stanford University; Carnegie Mellon, 2005–.

FALLAW B. SOWELL, Associate Professor of Economics – Ph.D., Duke University; Carnegie Mellon, 1988–.

CHESTER S. SPATT, Pamela R. and Kenneth B. Dunn Professor of Finance – Ph.D., University of Pennsylvania; Carnegie Mellon, 1979–.

STEPHEN E. SPEAR, Professor of Economics – Ph.D., University of Pennsylvania; Carnegie Mellon, 1982–.

CHRISTOPHER I. TELMER, Associate Professor of Financial Economics – Ph.D., Queen's University (Canada); Carnegie Mellon, 1992–.

SHU LIN WEE, Assistant Professor of Economics – Ph.D., University of Maryland; Carnegie Mellon, 2014–.

SEVIN YELTEKIN, Associate Professor of Economics – Ph.D., Stanford University; Carnegie Mellon, 2005–.

M. BUMIN YENMEZ, Assistant Professor of Economics – Ph.D., Stanford University; Carnegie Mellon, 2010–.

ARIEL ZETLIN-JONES, Assistant Professor of Economics – Ph.D., University of Minnesota; Carnegie Mellon, 2012–.

ANTONIO MIRALLES, Visiting Assistant Professor of Economics – Ph.D., Boston University; Carnegie Mellon, 2015–.

NICHOLAS MULLER, Visiting Associate Professor of Economics – Ph.D., Yale University; Carnegie Mellon, 2015–.

HAKKI YAZICI, Visiting Assistant Professor of Economics – Ph.D., University of Minnesota; Carnegie Mellon, 2015–.

Adjunct Faculty

CAROL B. GOLDBURG, Executive Director, Undergraduate Economics Program; Adjunct Professor of Economics – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2005–.

ELIF INCEKARA HAFALIR, Adjunct Assistant Professor of Economics – Ph.D., Pennsylvania State University; Carnegie Mellon, 2007–.

JOSEPH RUDMAN, Adjunct Professor of Business Communications – D.A., Carnegie Mellon University; Carnegie Mellon, 1974–.

FREDERICK H. RUETER, Adjunct Professor of Economics – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1998–.

Visiting Faculty

SERRA BORANBAY-AKAN, Visiting Assistant Professor of Economics – Ph.D., Northwestern University; Carnegie Mellon, 2013–.

Department of English

Department of English
 Andreea Ritivoi, Department Head
 Department Office: Baker Hall 259
<http://english.cmu.edu/>

The Department of English at Carnegie Mellon involves students in the important study of reading and writing as they are embedded in historical, cultural, professional, technological, and literary practices. Working with faculty who are themselves writers, scholars, and researchers in these areas, students become effective writers and analysts of various kinds of texts in a range of media. We hold strongly to our traditional interest in print documents but extend the idea of text to include other media such as film, multimedia, and on-line texts. The types of texts that students and faculty work with include academic writing, criticism, fiction and nonfiction, professional and technical writing, argument and public advocacy, poetry, film, and even screenwriting. The English Department faculty have particular strengths in Creative Writing, in Literary and Cultural Studies, and in Rhetoric. Specialists in each area use distinctive methods of studying texts, but all share a deep commitment to working in small and intense workshops and seminars to help students learn to become experts in analyzing existing texts, and in producing original and distinctive work of their own.

The English Department offers a B.A. in English, a B.A. in Creative Writing, a B.A. in Professional Writing, and a B.S. in Technical Writing and Communication. All four majors involve the relationship of texts to contexts, and all four are structured to allow students to balance liberal and professional interests. Students in the English B.A. focus on the production and interpretation of print texts and other media in their social and cultural contexts. Students in the Creative Writing B.A. focus on analyzing and learning to produce poetic and narrative forms. Students in the Professional Writing B.A. focus on analyzing and producing non-fiction for a variety of professional contexts. Students in the Technical Writing B.S. focus on integrating writing with technical expertise in a chosen area of concentration. In addition to the four majors, the department offers a minor in English and strongly encourages non-majors in the campus community to join us in English courses, beginning with offerings at the 200-level.

English faculty and students represent a diverse but close community with a shared interest in understanding how texts are produced and understood. This interest is the foundation for the formal curriculum and also the inspiration for a range of complementary activities, including a reading series of distinguished writers of poetry, fiction, and non-fiction. English majors also have multiple opportunities to gain experience in publishing, editing, and marketing through involvement with *The Oakland Review* and The Carnegie Mellon University Press. Many of our students hold writing and editorial positions on the student newspaper, *The Tartan*, and other campus publications. We also offer a strong internship program that places student writers in media, non-profit, arts, corporate, and technical internships before they graduate. The end of every year culminates in a gala event to celebrate our students and their writing achievements in literary, academic, and professional writing. For this event, known as the Pauline Adamson Awards, we invite a well-known writer to do a public reading and then present and celebrate student writing awards in over a dozen categories, all judged anonymously by writing professionals from outside the university. Nationally prominent speakers who have participated in this event include Michael Cunningham, Jamaica Kincaid, Michael Ondaatje, Tobias Wolfe, Elizabeth Alexander, and Dennis Lehane.

Undergraduate students also have the opportunity to apply to the various Masters level graduate programs sponsored by the department. Students interested in communications careers in both the public and private sectors may receive advanced training in our Masters in Professional Writing (MAPW) program. Students who have interests in visual as well as verbal communication apply to the Masters in Design in Communication Planning and Information Design (jointly administered with the School of Design). Students with academic interests looking toward doctoral work can apply to our Masters programs in Rhetoric and in Literary and Cultural Studies to acquaint themselves with and to prepare for academic careers. The best of our Masters candidates may request consideration for the Department's Ph.D. programs in Rhetoric or in Literary and Cultural Studies and will be, in any case, well prepared for graduate work no matter where they choose to go. Upper level undergraduates interested in graduate level work should contact the English Department directly for further information and for advice on planning their junior and senior years to prepare for graduate study.

Majoring in English: The Four English Degree Options

All students who major in English choose one of the four majors offered by the department as the main focus of their studies:

- The B.A. in English
- The B.A. in Creative Writing
- The B.A. in Professional Writing
- The B.S. in Technical Writing & Communication

Other Options for English Majors

Students who wish to broaden their experience with English courses may do so by taking more than the minimum requirements for each major or by combining two of the majors within the department for a double major in English. Common combinations include Professional Writing and Creative Writing, Creative Writing and the B.A. in English, or the B.A. in English and Professional Writing. Students who are already majoring in one of the English degrees can generally add a second English major by completing additional courses. Consult the English Department and the section below on "Completing an Additional Major in English" for further detail.

All of the English majors may also be combined with majors and minors from other Carnegie Mellon departments and colleges. English Department advisors can help you to explore the available options and to choose a major or combination of programs that is appropriate for your interests and goals.

How the Curriculum is Structured

In addition to Dietrich College requirements, English majors complete 11 to 12 courses (99 to 114 units) specifically related to their chosen major within English and structured as indicated below. Please note that courses taken to fulfill requirements in other major or minor programs may not be applied to requirements for any of the English Department majors or minors.

Core Requirements for the Specific Major (7 to 9 courses, 63 to 81 units)

Complete seven to nine courses.

The Core Requirements differ for each major and are designed explicitly to provide both breadth and depth within the specific major the student has chosen.

English Electives (3 to 4 courses, 27 to 36 units)

Complete three to four elective courses.

Elective Courses for the major are designed to add breadth to each student's study within English and to provide experience with the range of approaches to reading and writing available within the department. Students in all English majors are encouraged to sample widely from the Department's offerings.

The B.A. in English

An important role of English departments has been to create interpretations of the literature of various historical periods, including the present. The B.A. in English (EBA) at Carnegie Mellon builds on, and also extends, this tradition by teaching texts as part of a complex web of historical conditions and relationships; by teaching both major literary texts and public and non-fiction documents; and by teaching film, television, and other storytelling media alongside more conventional texts.

The B.A. in English is distinctive in drawing from the artistic and research strengths of the Department's faculty in Literary and Cultural Studies, Rhetoric, and Creative Writing. Literary and Cultural Studies focuses on the way texts are formally constructed and how they function in historical and contemporary contexts. Creative Writing helps students focus on language as a tool to explore and depict experience. Rhetoric focuses on the principles through which writers construct texts and audiences respond to them. Drawing from all of these perspectives, students in the B.A. in English

learn the research skills and writing strategies to enable them to analyze the language and texts of other writers and to report their research in effective texts of their own. Such training can prepare students for graduate work in literature, cultural studies, or rhetoric, and also for careers in law, business, or government, which require similar skills in interpretation, research, and writing.

The 200-level core courses are designed to introduce students to writing in a variety of genres, to a knowledge of literary and other media forms, and to a basic theoretical knowledge of how texts are produced and interpreted. In the Interpretive Practices course, students are introduced to basic concepts, methods, and practices of literary and rhetorical approaches to texts. In the Survey of Forms course, students learn how to use language to express experience through poetic and narrative forms.

In addition to these courses, students take at least one course in rhetoric, two 300-level EBA core courses, and two 400-level seminars designed to introduce them to the functioning of texts within specific cultural and rhetorical contexts. Two of 300- and 400-level courses must feature a specific historical period, and one of these “period” courses must have a pre-1900 focus. Period study introduces students to a range of historical and cultural texts and to a range of methods for analyzing these texts in their original context and across contexts. Courses that fulfill the Rhetoric Requirement focus explicitly on language and discourse as objects of study and emphasize the relationships of language, text structure, and meaning within specific contexts.

Interpretive Practices (76-294) and Research in English (76-394) are required of students in the B.A. in English. Interpretive Practices grounds students in literary and cultural theory and trains them in writing interpretations of texts. Research in English offers training in gathering information systematically and in building arguments based on that information. Students will hone their skills in reading texts, using critical commentary, assessing print and electronic materials, and conducting interviews and surveys. They will learn how to test their hypotheses against alternatives and present their research to audiences within the discipline of English. The historical or thematic content of this course will vary from one semester to another. While 76-394 is not a pre-requisite for 400 level courses, it is strongly recommended that EBA majors take this course in their Junior year. At the advanced level EBA majors are required to take two 400-level seminars for which Interpretive Practices (76-294) is a pre-requisite.

EBA majors also complete three English Electives, one at the 200 or above level and two at the 300 or 400 level. Electives at the 200 level allow students to sample introductory courses in special topics – such as gender and media studies – within rhetorical, literary, and cultural studies, or genre courses in the novel or comedy. Electives at the 300 and 400 level encourage students to explore more advanced study in the various offerings within the department. In choosing their electives, EBA students are encouraged to sample courses from across the department.

Curriculum

In addition to satisfying all of the Dietrich College degree requirements for B.A. candidates, English B.A. majors must complete 11 courses in the following areas:

EBA Core (8 courses, 72 units)

Complete both courses:

76-26x	Survey of Forms (Nonfiction, Fiction, Poetry, or Screenwriting)	
76-294	Interpretive Practices	9

Complete six required courses.

1. Research Course (1 course, 9 units)

76-394 Research in English

2. Rhetoric Requirement (1 course, 9 units)

Complete one course from a set of varied offerings in Rhetoric as designated each term by the English Department. Rhetoric courses focus explicitly on language and discourse as objects of study and emphasize the relationships of language, text structure, and meaning within specific contexts.

3-4. 300-level Courses (2 courses, 18 units)

Complete two 300-level courses that investigate the production and interpretation of texts and other media from a variety of periods and theoretical and methodological perspectives. Course offerings that meet these requirements are advertised on a semester-by-semester basis.

For EBA majors, 76-294 Interpretive Practices is a prerequisite for these courses. Course options include but are not limited to the following:

76-321	History of the British Novel	9
76-327	Influential Women Writers	9
76-334	Literature of Wall Street	9
76-339	Topics in Film Studies	9
76-341	Gender and Sexuality in Performance	9
76-350	History of Critical Ideas: Reading and Spectatorship	9
76-3xx	300-level English Course	9

5-6. 400-level Seminar Courses (2 courses, 18 units)

Complete two 400-level seminar courses which investigate a specific topic in depth and allow students to work on a major research-based paper. Courses in this category will be advertised on a semester-by-semester basis. For EBA majors, Interpretive Practices (76-294) is a prerequisite and Research in English (76-394) is pre- or co-requisite. Among current course offerings, examples include but are not limited to the following:

76-439	Seminar in Film and Media Studies	9
76-414	Politics, Media, and Romantic Literature 1789-1830	9
76-430	Arthurian Romance and Its Modern Legacy	9
76-445	John Milton: Poetry, Paradise, and Revolution	9
76-453	Literature of Empire	9
76-4xx	400-level English course	9

“Period” Course Requirement

The period course requirement is not a separate course requirement per se but one that needs to be met through the selection of the required 300- and 400-level courses. At least two of these four required courses must be “period” courses, that is, courses that focus on texts that are connected in time and place or through common social concerns. One of these two courses must focus on a historical period prior to 1900. Courses in this category will vary from year to year and be advertised on a semester-by-semester basis. Such courses may be at either the 300 or 400 level

English Electives (3 courses, 27 units)

Complete three courses from the English Department’s offerings. One may be at the 200 level or above; the remaining two must be at the 300 or 400 level. Electives may include any courses offered by the English Department with the exception of courses designed for non-majors. Some semester offerings may include cross-listed courses from Modern Languages or History.

English B.A. Sample Curriculum

As a department, we recommend beginning the major in the sophomore year if possible. Students in Dietrich College may declare a major as early as mid-semester of the spring of their first year and begin major requirements the following fall. Interpretive Practices (76-294) should generally be taken in the sophomore year and before Research in English (76-394).

Sophomore Year	Junior Year	
	Fall	Spring
76-294 Interpretive Practices	76-26x Survey of Forms	76-3xx 300-level EBA Course*
	76-394 Research in English	76-3xx/4xx Rhetoric Course
	76-3xx/4xx Rhetoric Course	76-2xx/3xx/4xx English Elective
	76-2xx/3xx/4xx English Elective	Elective
	Elective	Elective
	Elective	

Senior Year

Fall	Spring
76-4xx 400-level Seminar**	76-4xx 400-level Seminar**

Elective	Elective

* Interpretive Practices (76-294) is a prerequisite for 300-level EBA courses
 ** Interpretive Practices (76-294) is a prerequisite and Research in English (76-394) is a pre- or co-requisite for 400-level seminars.

The B.A. in Creative Writing

Carnegie Mellon is one of a small number of English departments in the country where undergraduates can major in Creative Writing. In the Creative Writing major (CW), students develop their talents in writing fiction, poetry, screenwriting, and creative nonfiction. While studying with faculty members who are writers, Creative Writing majors read widely in literature, explore the resources of their imaginations, sharpen their critical and verbal skills, and develop a professional attitude toward their writing. Students also have the opportunity to work with other nationally known poets and fiction writers through the department's Visiting Writers series. The CW program is made up of faculty and students who have an intense commitment to their work. Students who do not exhibit a high level of commitment and promise in the introductory classes will not be encouraged to continue in the major.

Beginning with the Dietrich College requirements, the curriculum for Creative Writing majors is designed to broaden the students' intellectual backgrounds and encourage their analytical abilities. English courses beyond the Creative Writing core requirements provide additional practice in the careful reading, writing and understanding of literary texts.

Students in the Creative Writing major are required to take two of the introductory Survey of Forms courses, ideally in their sophomore year. Choices include: Survey of Forms: Poetry (76-265), Survey of Forms: Fiction (76-260), Survey of Forms: Screenwriting (76-269), and Survey of Forms: Creative Nonfiction (76-261). In order to proceed into the upper level courses in the major (and in each of the genres), students must do well in these introductory courses (receive a grade of A or B). In their junior and senior years, Creative Writing majors take four workshops in fiction, poetry, screenwriting, or nonfiction. At least two of the workshops must be taken in a single genre. In the writing workshops, students develop their critical and verbal abilities through close writing and analysis of poems, stories, and other literary forms. Their work is critiqued and evaluated by peers and the faculty. Students may write a Senior Project or Honors Thesis (if they qualify for Dietrich College honors) under the supervision of a faculty member during their senior year.

Carnegie Mellon also offers Creative Writing majors various extracurricular opportunities for professional development. For example, they may work as interns with the Carnegie Mellon University Press, which is housed in the English Department. The Press publishes scholarly works, and books of poetry and short stories by both new and established American writers. Students may help edit and submit their work for publication to *The Oakland Review*, a Carnegie Mellon University-sponsored annual journal, and *Dossier*, the literary supplement to *The Tartan* (the student newspaper). Students also have opportunities to read their works in a series of readings by student writers held in the Gladys Schmitt Creative Writing Center and to hear nationally known authors as part of the Carnegie Mellon Visiting Writers series. Additionally, the English Department (in cooperation with the Carnegie Mellon University Press) offers prizes for students each year in the writing of fiction, non-fiction, poetry and screenwriting. These include the Pauline Adamson Awards, the Academy of American Poets Prize, the Carnegie Mellon University Press Prizes in poetry and fiction, the Family Friendly Programming Forum Scholarships in Film, and the Topol Award in Creative Writing/Fiction. In addition, the Gladys Schmitt Scholarship Fund and the Gladys Schmitt Student Enhancement Fund provide support for creative writing majors to attend writing conferences and festivals.

Because the Creative Writing program provides a disciplined atmosphere in which to study and write, it appeals especially to students who are as concerned with their personal growth as with vocational goals. Nevertheless, the extracurricular writing activities and a variety of writing internships available on and off campus can provide Creative Writing majors with valuable experiences for planning their future. After graduation, many Creative Writing majors go on to graduate writing programs and to careers in teaching, publishing, public relations, advertising, TV and film, or freelance writing and editing.

Curriculum

In addition to satisfying all of the Dietrich College degree requirements for B.A. candidates, Creative Writing majors must complete 11 courses in the following areas:

Creative Writing Core (7 courses, 63 units)

Survey of Forms Courses (2 courses, 18 units):

		Units
76-260	Survey of Forms: Fiction *	9
76-261	Survey of Forms: Creative Nonfiction *	9
76-262	Survey of Forms: Nonfiction	9
76-265	Survey of Forms: Poetry *	9
76-269	Survey of Forms: Screenwriting *	9

* A student must receive a grade of A or B in the Survey of Forms class in a specific genre in order to be eligible to enroll in a workshop of that genre. A student who receives a grade of C in a Survey of Forms course may enroll in a related workshop only with the permission of the workshop professor. A student who receives a D or R in Survey of Forms may not take a workshop in that genre.

Reading in Forms (1 course, 9 units):

		Units
76-362	Reading in Forms: Non-Fiction	9
76-363	Reading in Forms: Poetry	9
76-364	Reading in Forms: Fiction	9

Four Creative Writing Workshops (4 courses, 36 units)

Complete four Creative Writing workshops, at least two in a single genre. Workshops in all genres may be taken more than once for credit.

		Units
76-365	Beginning Poetry Workshop	9
76-366	Beginning Fiction Workshop	9
76-375	Magazine Writing	9
76-460	Beginning Fiction Workshop	9
76-462	Advanced Fiction Workshop	9
76-465	Advanced Poetry Workshop	9
76-469	Advanced Screenwriting Workshop	9

English Electives (4 courses, 36 units)

Complete four additional courses from the English Department's offerings. Two of the four English Electives must be courses that are designated as fulfilling the literature requirement and focus on close reading of literary texts. Please consult the list of courses published each semester by the Department for current offerings. English Electives may include any course offered by the Department. Additionally, English Electives can include no more than one course at the 200 level. The remaining English Electives must be at the 300 or 400 level. In choosing Electives, students are encouraged to sample courses from across the Department.

Creative Writing B.A. Sample Curriculum

This plan is presented as a two-year (junior-senior) plan for completing major requirements. Its purpose is to show that this program can be completed in as few as two years, not that it should or must be. In fact, as a department, we recommend beginning the major in the sophomore year if possible. Students in Dietrich College may declare a major as early as mid-semester of the spring of their first year and begin major requirements the following fall.

Junior		Senior	
Fall	Spring	Fall	Spring
76-26x Survey of Forms	76-26x Survey of Forms	76-3xx/4xx Creative Writing Workshop	76-3xx/4xx Creative Writing Workshop
76-36x Reading in Forms	76-3xx/4xx Creative Writing Workshop	76-3xx/4xx Creative Writing Workshop	76-3xx/4xx English Elective
76-2xx/3xx/4xx English Elective	76-3xx/4xx English Elective	76-3xx/4xx English Elective	Elective
Elective	Elective	Elective	Elective
Elective	Elective	Elective	Elective

The B.A. in Professional Writing

Professional Writing (PW) combines a professional education with a strong foundation in rhetorical studies. The major prepares students for successful careers as writers and communications specialists in a range of fields, including but not limited to: editing and publishing, government, law, journalism, the non-profit sector, education, public and media relations, corporate communications, advocacy writing, and the arts.

The PW major includes 12 courses: 9 PW Core Requirements + 3 English Electives. The 9 Core Requirements include foundations courses in genre studies, editing, and argument, plus a cluster of advanced rhetoric and specialized writing courses, all designed to closely integrate analysis and production. Through special topics courses—journalism, web design, advocacy writing, document design for print, science writing, public relations and corporate communications, writing for multimedia—students can pursue specializations while working with faculty who are both experts and practicing professionals in these fields. PW majors also gain experience in working on team- and client-based projects and receive focused support to develop a portfolio of polished writing samples to use in applying for internships and employment. Through English Electives in Rhetoric, Creative Writing, and Literary and Cultural Studies, students gain additional practice in the careful reading, writing, and analysis of both literary and non-fictional texts and important insights into how texts function in their historical and contemporary contexts. As a capstone experience, senior PW majors have the opportunity to complete a Senior Project or, upon invitation from the college, a Senior Honors Thesis in Rhetoric or Professional Writing. PW students can also apply for research grants through the Undergraduate Research Office to work on independent research projects with faculty.

While the major appeals to students with strong professional interests, both core and elective requirements develop the broad intellectual background one expects from a university education and prepare students to either enter the workplace or pursue graduate study in fields as diverse as communications, law, business, and education. PW majors also have the opportunity to apply for the Department's accelerated MA in Professional Writing, the MAPW 4+1, which allows them to complete the degree in 2 semesters instead of the usual 3. Because the major in Professional Writing is deliberately structured as a flexible degree that allows a broad range of options, PW majors should consult closely with their English Department advisors on choosing both elective and required courses and in planning for internships and summer employment.

Various opportunities for writers to gain professional experience and accumulate material for their writing portfolios are available through campus publications, department-sponsored internships for academic credit, and writing-related employment on and off campus.

PW majors also have the option of taking writing internships for academic credit during their junior or senior year and are also strongly encouraged to seek professional internships throughout their undergraduate years and during their summers. Opportunities in public and media relations, newspaper and magazine writing, healthcare communication, publishing, technical writing, public service organizations, and writing for the web and new media illustrate both internship possibilities and the kinds of employment that Professional Writing majors have taken after graduation.

All PW students are encouraged to enroll in the English Department's 3-unit course, Professional Seminar (76-300), which meets once a week during the fall term and provides majors with the opportunity to meet and network with practicing professionals in a range of communications fields.

Curriculum

In addition to satisfying all of the Dietrich College degree requirements for B.A. candidates, Professional Writing majors must fulfill 12 requirements in the following areas:

Professional Writing Core (9 courses, 81 units)

Complete nine courses.

Foundations Courses (4 courses, 36 units):

76-26x	Survey of Forms (Nonfiction, Fiction, Poetry, or Screenwriting)	9
76-271	Introduction to Professional and Technical Writing	9
76-390	Style	9
76-373	Argument	9

Rhetoric Requirement (1 course, 9 units):

Complete one course from a set of varied offerings in Rhetoric as designated each term by the English Department. Rhetoric courses focus explicitly on language and discourse as objects of study and emphasize the relationships of language, text structure, and meaning within specific contexts. Courses include but are not limited to the following:

		Units
76-318	Communicating in the Global Marketplace	9
76-319	Environmental Rhetoric	9
76-325	Intertextuality	9
76-340	American English	9
76-351	Rhetorical Invention	9
76-355	Leadership, Dialogue, and Change	9
76-361	Digital Humanities: Corpus Rhetoric	9
76-378	Literacy: Educational Theory and Community Practice	9
76-386	Language & Culture	9
76-389	Rhetorical Grammar	9
76-396	Non-Profit Advocacy: Genres, Methods, and Issues	9
76-420	Process of Reading and Writing	9
76-425	Science in the Public Sphere	9
76-428	Visual Verbal Communication	9
76-475	Legal Rhetoric in a Global World	9
76-476	Rhetoric of Science	9
76-484	Discourse Analysis	9
76-491	Rhetorical Analysis	9

Advanced Writing/Rhetoric Courses (4 courses, 36-42 units):

Complete four courses from a set of varied offerings in Advanced Writing/Rhetoric as designated each term by the English Department. Options include all courses that fulfill the Rhetoric requirement, plus additional courses in specialized areas of professional writing. Students should select courses in consultation with their English Department advisor or the Director of Professional and Writing. Courses include but are not limited to the following:

		Units
76-301	Internship	Var.
76-302	Global Communication Center Practicum	9
76-318	Communicating in the Global Marketplace	9
76-319	Environmental Rhetoric	9
76-325	Intertextuality	9
76-340	American English	9
76-351	Rhetorical Invention	9
76-355	Leadership, Dialogue, and Change	9
76-360	Literary Journalism Workshop	9
76-361	Digital Humanities: Corpus Rhetoric	9
76-372	News Writing	9
76-375	Magazine Writing	9
76-378	Literacy: Educational Theory and Community Practice	9
76-386	Language & Culture	9
76-389	Rhetorical Grammar	9
76-391	Document & Information Design	12
76-395	Science Writing	9
76-396	Non-Profit Advocacy: Genres, Methods, and Issues	9
76-420	Process of Reading and Writing	9
76-425	Science in the Public Sphere	9
76-428	Visual Verbal Communication	9
76-472	Topics in Journalism: Multimedia Storytelling in a Digital Age	9
76-474	Software Documentation	9
76-475	Legal Rhetoric in a Global World	9
76-476	Rhetoric of Science	9
76-481	Writing for Multimedia	12
76-484	Discourse Analysis	9
76-487	Web Design	12
76-491	Rhetorical Analysis	9

76-494	Healthcare Communications	9
39-605	Engineering Design Projects	12

English Electives (3 courses, 27 units):

Complete three courses from any of English Department's offerings (exceptions include 76-270, which is designed for non-majors). One may be at the 200 level or above; the remaining two must be at the 300 or 400 level. Two must be courses designated as Text/Context Electives, which focus on the relationship between texts and their cultural and historical contexts.

Professional Writing B.A. Sample Curriculum

This plan is presented as a two-year (junior-senior) plan for completing major requirements. Its purpose is to show that this program can be completed in as few as two years, not that it should or must be. In fact, as a department, we recommend beginning the major in the sophomore year if possible. Students in Dietrich College may declare a major as early as mid-semester of the spring of their first year and begin major requirements the following fall.

The B.S. in Technical Writing & Communication

The B.S. in Technical Writing & Communication (TWC) is one of the oldest undergraduate technical communication degrees in the country with a history that stretches back to 1958. The degree is specifically designed to prepare students for successful careers involving scientific, technical, and computer-related communication, including writing and designing for digital media.

Today's technical communicators have the strong backgrounds in technology, communication, and design needed to enter a broad range of information-based fields, and do work that both includes and goes well beyond writing documents for print distribution. The expanding range of options includes positions that involve organizing, managing, communicating, and facilitating the use of both technical and non-technical information in a range of fields and media.

Technical communicators develop and design web sites, explain science and technology to the public, develop print and multimedia materials, develop information management systems, design and deliver corporate training, and develop support systems for consumer products ranging from software for word processing or personal finances to complex data management systems.

The B.S. in TWC recognizes the important changes taking place in communication-based careers and includes two distinctive "tracks," one in Technical Communication (TC) and one in Scientific and Medical Communication (SMC). Both tracks begin with a common core of foundation courses in print and on-line communication as well as a shared set of prerequisites in math, statistics, and computer programming. The two tracks differ in the set of theory/specialization courses beyond the core, with each track including a specialized set appropriate to its focus.

In both tracks, TWC students work on real projects for actual clients, learn group interaction and management skills, and develop a flexible repertoire of skills and strategies to keep up with advances in software and technology. Above all, they focus on developing structures and information strategies to solve a broad range of communication and information design problems.

TWC students are able to draw on exceptional resources on and off campus to enhance their education. Most obvious are the course offerings of Carnegie Institute of Technology, the Mellon College of Science, and the School of Computer Science. Additional course offerings in business, organizational behavior, policy and management, psychology, history, and design are also encouraged. As a capstone experience, Seniors have the opportunity to complete a Senior Project or, upon invitation from the college, a Senior Honors Thesis. TWC students can also apply for grants

and fellowship through the Undergraduate Research Office to work on independent research projects with faculty.

While the major appeals to students with strong professional interests, both core and elective requirements develop the broad intellectual background one expects from a university education and prepare students to either enter the workplace upon graduation or pursue graduate study in fields as diverse as communications, business, instructional design, information design, education, and science and healthcare writing.

Various opportunities for writers to gain professional experience are available through campus publications, department-sponsored internships for academic credit, and writing-related employment on and off campus. TWC students have the option of doing internships for academic credit during their junior or senior year and are encouraged to pursue a series of internships throughout their 4 years and during their summers.

All TWC students are encouraged to enroll in the English Department's 3-unit course, Professional Seminar (76-300), which meets once a week during the fall term and provides majors with the opportunity to meet and network with practicing professionals in a range of communications fields.

The Technical Communication (TC) Track

The Technical Communication track (TC) prepares students for careers in the rapidly changing areas of software and digital media. Students learn the fundamentals of visual, verbal, and on-line communication as well as the technical skills needed to design, communicate, and evaluate complex communication systems and to manage the interdisciplinary teams needed to develop them. Students become fluent in both print-based and electronic media across a variety of information genres and learn to design information for a range of specialist and non-expert audiences. The TWC/TC major can be pursued as a primary major within Dietrich College or as a secondary major for students in other Colleges with an interest in combining their specialized subject matter knowledge with strong writing and communications skills. Graduates of this track are likely to follow in the footsteps of previous TWC students from Carnegie Mellon who are currently employed as web designers, information specialists, technical writers, and information consultants in a range of technology and communication-based organizations including Salesforce.com, IBM, Oracle, Microsoft, Apple, and HP Vertica.

The Scientific and Medical Communication (SMC) Track

The Scientific and Medical Communication track (SMC) is designed for students who seek careers that focus on communication and information design problems in health, science, and medicine. It should appeal to students with interests in the health care professions, science and public policy, patient education, scientific journalism and related fields. Like the TC track, the SMC track is designed to provide both the technical and the communication skills needed to analyze and solve complex communication problems. Students learn the fundamentals of visual, verbal, and on-line communication as well as the technical skills needed to design, communicate, and evaluate complex information systems and to manage the interdisciplinary teams needed to develop them. Students become fluent in both print-based and electronic media across a variety of information genres and learn to design information for a range of specialist and non-expert audiences. The TWC/SMC major can be pursued as a primary major within Dietrich College or as a secondary major for students in other Colleges, such as MCS, with an interest in science or medicine.

Curriculum for the TWC degree

All Technical Writing & Communication majors must satisfy the Dietrich College requirements for the B.S. degree, and a set of 3 to 4 prerequisite courses in calculus, statistics, and computer science. All prerequisites should be completed by the beginning of the fall semester, junior year. Prerequisites may double count toward Dietrich College Requirements or requirements for other majors or minors.

Mathematics Prerequisite (1 course, 10 units):

Complete one of the following:	Units
21-111 Calculus I	10
21-112 Calculus II	10
21-120 Differential and Integral Calculus	10
21-127 Concepts of Mathematics	10

Statistics Prerequisite (1 course, 9 units):

36-201 Statistical Reasoning and Practice	9
---	---

Computer Science Prerequisites (1 - 2 courses*, 10 - 22 units):

Students in the Technical Communication track must complete two required Computer Science courses: Units

15-110	Principles of Computing	10
15-112	Fundamentals of Programming and Computer Science	12

Students in the Scientific and Medical Communication track complete one required Computer Science course: Units

15-110	Principles of Computing	10
--------	-------------------------	----

15-110 Principles of Computing is designed for students with little or no prior programming experience and is appropriate for students in both the SMC and TC tracks. 15-112 Fundamentals of Programming and Computer Science prepares students in the TC track for all other advanced Computer Science courses.

Beyond these prerequisites, students in both TC and SMC tracks take a common set of 5 TWC Core Requirements in writing, communication, and information design. To complement these foundations courses, TWC students take a set of 3 Theory/Specialization courses specific to either TC or SMC. In addition, students in the SMC track take a series of 3 courses in the natural sciences or engineering relevant to their areas of interest, while TC students take 3 electives in management, technology, and social issues.

TWC Core Requirements (5 courses, 51 units):

76-26x	Survey of Forms (Nonfiction, Fiction, Poetry, or Screenwriting)	9
76-271	Introduction to Professional and Technical Writing	9
76-390	Style	9
76-391	Document & Information Design *	12
76-487	Web Design **	12

* prerequisite = 76-271 Introduction to Professional and Technical Writing

**prerequisite = 76-271 Introduction to Professional and Technical Writing + 76-391 Document & Information Design

Theory/Specialization Courses (3 courses, 27 units):

Complete 3 courses to deepen your area of speciality and complement your chosen track (TC or SMC) in the major. One must be chosen from among courses designated as Recommended Options for TWC majors. Theory/Specialization courses, including those marked as Recommended Options, are advertised by the English Department on a semester-by-semester basis. TWC students should select courses in consultation with their faculty advisor.

Recommended courses include but are not limited to the following: Units

76-319	Environmental Rhetoric	9
76-361	Digital Humanities: Corpus Rhetoric	9
76-395	Science Writing	9
76-425	Science in the Public Sphere	9
76-428	Visual Verbal Communication	9
76-474	Software Documentation	9
76-476	Rhetoric of Science	9
76-481	Writing for Multimedia *	12
76-491	Rhetorical Analysis	9
76-494	Healthcare Communications	9

Additional Options include but are not limited to the following: Units

76-301	Internship	Var.
76-302	Global Communication Center Practicum	9
76-318	Communicating in the Global Marketplace	9
76-319	Environmental Rhetoric	9
76-325	Intertextuality	9
76-340	American English	9
76-351	Rhetorical Invention	9
76-355	Leadership, Dialogue, and Change	9
76-360	Literary Journalism Workshop	9
76-361	Digital Humanities: Corpus Rhetoric	9
76-372	News Writing	9
76-375	Magazine Writing	9
76-378	Literacy: Educational Theory and Community Practice	9
76-386	Language & Culture	9

76-389	Rhetorical Grammar	9
76-391	Document & Information Design	12
76-395	Science Writing	9
76-396	Non-Profit Advocacy: Genres, Methods, and Issues	9
76-420	Process of Reading and Writing	9
76-425	Science in the Public Sphere	9
76-428	Visual Verbal Communication	9
76-472	Topics in Journalism: Multimedia Storytelling in a Digital Age	9
76-474	Software Documentation	9
76-475	Legal Rhetoric in a Global World	9
76-476	Rhetoric of Science	9
76-481	Writing for Multimedia	12
76-484	Discourse Analysis	9
76-487	Web Design	12
76-491	Rhetorical Analysis	9
39-605	Engineering Design Projects	12

Electives (3 courses, 27 units):

TWC majors take 3 courses outside of English to deepen their area of specialty in their track. Typically, students in the SMC track select courses in the natural sciences, psychology, and social and decision sciences, or (for example) healthcare-related courses in the Heinz School. Students in the TC track typically select courses from engineering, design, HCI, computer science, math or statistics. Students should work with their faculty advisor and the Program Director to select courses that are meaningful for their track.

TWC Sample Curriculum

This plan is presented as a five-semester (spring of sophomore year through senior year) plan for completing major requirements. Its purpose is to show that this program can be completed in as few as five semesters not that it should or must be. In fact, as a department, we strongly recommend beginning the major in the fall of the sophomore year if possible. The five-semester time frame is needed because of sequencing issues related to the required core courses. The plan does not include the 4 prerequisite courses, which should be completed by the junior year.

Sophomore Year		Junior Year	
Spring	Fall	Spring	Fall
76-271 Introduction to Professional and Technical Writing*	76-391 Document & Information Design*	76-3xx/4xx Theory/Specialization Course	
76-390 Style	76-26x Survey of Forms	Technical Communication Elective	
Elective	Technical Communication Elective	Elective	
Elective	Elective	Elective	
Elective	Elective	Elective	

Senior Year	
Fall	Spring
76-487 Web Design*	76-3xx/4xx Theory/Specialization Course
76-3xx/4xx Theory/Specialization Course	Technical Communication Elective Course
Elective	Elective
Elective	Elective
Elective	Elective

* These courses must be taken in the sequence indicated. 76-271 is offered all semesters and therefore can be taken fall or spring of sophomore year. 76-271 is a prerequisite for 76-391, and 76-271 + 76-391 are the prerequisites for 76-487. 76-391 and 76-487 are offered only in the fall semesters.

Completing an Additional Major in English

Students with interests that include more than one of the department's majors have the option of completing an additional major within the department. Students may combine any of the B.A. degrees or combine the B.S. in Technical Writing and Communication with either the B.A. in English or the B.A. in Creative Writing. Students may not combine the Professional Writing and the Technical Writing & Communication majors because so many of the courses overlap.

Students majoring in two or more English Department degrees must fulfill the Core Requirements for the Major for both programs. The Survey of Forms core requirement, common to all 4 majors, needs to be taken only once but can count toward both majors. Similarly, the English Electives need to be taken only once and can count toward both majors with the understanding that a student must complete the number of English Electives required by the program with the higher number of Electives. For example, a student combining the B.A. in English with the Creative Writing major would take the 4 English Electives required for Creative Writing.

Because the Survey of Forms course and the English Electives are allowed to double count toward both majors, students who are already majoring in one of the English degrees can generally add a second major within the department by completing 6 to 8 additional courses. For example, a student who has fulfilled all 11 requirements for the BA in English can complete the additional major in Creative Writing by adding the 6 courses of the Creative Writing Core beyond the first Survey of Forms requirement: one additional Survey of Forms course, one Reading in Forms course, and 4 Writing Workshops. Because sequencing of courses can become an issue when doing multiple majors, students are strongly advised to consult closely with their English Department advisors about the sequence of their courses.

Completing a Secondary Major in English

Students in other departments who wish to complete a secondary major in the English Department should contact the Academic Coordinator in the English Department Office to file a secondary major application form and be assigned to an English Department advisor. Secondary majors in the four English degrees are required to complete all requirements for the chosen major. Additionally, courses taken to fulfill requirements within the primary major may not double count for requirements within the chosen English Department major. The only exceptions to this rule are the TC electives for the TWC/TC degree and the Natural Science and Engineering requirements for the TWC/SMC degree. In planning schedules for a secondary major, it is critically important that students consult with both departments in which they are majoring to be sure that all requirements for graduation can be met.

Minor in English

The English Department also offers minors in Creative Writing, English Studies, Professional Writing, and Technical Writing. The minors require a minimum of five courses (45 units), plus completion of (or credit for) Interpretation and Argument (76-101) or an equivalent requirement. The minors in English are available to all undergraduate students except English majors, who may not both major and minor in English.

Courses taken to fulfill requirements in other major or minor programs may not be applied to English minor requirements (and vice versa).

Courses that meet the various requirements are advertised on a semester-by-semester basis. Full descriptions are available each semester from the English Department main office. We also publish a document titled "What Counts for What for Minors," which indicates which courses offered in a given term fulfill specific requirements in each of the minor concentrations.

English Studies Minor

Complete 6 courses, including Interpretation and Argument (76-101) as a prerequisite.

		Units
76-101	Interpretation and Argument (or credit for equivalent course)	9
76-294	Interpretive Practices (prerequisite for 300- and 400- level courses)	9
76-3xx	Two 300-level courses in Literature, Cultural Studies, or Rhetoric	18

76-xxx	One additional 300/400 level seminar in Literature, Cultural Studies, or Rhetoric*	9
76-xxx	200-level or above English Elective**	9

* Note that at least some 400-level seminars have Research in English (76-394) as a pre- or co-requisite. Students planning to take a 400-level seminar to fulfill this requirement should plan to take Research in English (76-394) as one of their 300-level courses.

** The English Elective may be any course offered by the English Department.

Creative Writing Minor

Complete 6 courses, including Interpretation and Argument (76-101) as a prerequisite.

		Units
76-101	Interpretation and Argument (or credit for equivalent course)	9
76-26x	Survey of Forms	9
76-xxx	Two 300/400 level Fiction, Poetry, or Screenwriting Workshop Classes	18
76-3xx	One Reading in Forms Course	9
76-2xx	One 200-level or above English Elective	9

* A student must receive a grade of A or B in the Survey of Forms class in order to be eligible to enroll in a workshop of that genre. A student who receives a grade of C in a Survey of Forms course may enroll in a related workshop only with the permission of his or her workshop professor. A student who receives a D or R in Survey of Forms may not take a workshop in that genre.

Professional Writing Minor

Complete 6 courses, including Interpretation and Argument (76-101) as a prerequisite.

		Units
76-101	Interpretation and Argument (or credit for equivalent course)	9
76-270 or 76-271	Writing for the Professions Introduction to Professional and Technical Writing	9
76-xxx	One 300/400 level Rhetoric course*	9
76-xxx	Two 300/400 level Advanced Writing/Rhetoric courses	18
76-xxx	One 200-level or above English elective**	9

* Courses for PW minors in these areas are advertised by the English Department each semester.

** The English Elective may be any course offered by the English Department.

Technical Writing Minor

Complete 6 courses, including Interpretation and Argument (76-101) as a prerequisite.

		Units
76-101	Interpretation and Argument	9
76-270 or 76-271	Writing for the Professions Introduction to Professional and Technical Writing	9
76-xxx	One 300/400 level Rhetoric course	9
76-xxx	Two 300/400 level Advanced Writing/Rhetoric Course courses	18
76-xxx	One 200-level or above English Elective**	9

* Courses for TW minors in these areas are advertised by the English Department each semester.

** The English Elective may be any course offered by the English Department.

Senior Honors Thesis

Seniors in all four majors in the English Department who meet the necessary requirements are invited by the College of Humanities and Social Sciences (Dietrich College) to propose and complete a Senior Honors Thesis during their final year of study. The thesis may focus on research and/or original

production in any of the areas offered as a major within the Department. To qualify for the Dietrich College Honors Program, students must have a cumulative Quality Point Average of at least 3.50 in their major and 3.25 overall at the end of their junior year and be invited by Dietrich College to participate. Students then choose a thesis advisor within the Department and propose and get approval from Dietrich College for a Senior Honors Thesis. The Honors Thesis is completed over the two semesters of the senior year (9 units each semester) under the direction of the chosen advisor. By successfully completing the thesis, students earn 18 units of credit and qualify for graduation with "College Honors."

Creative Writing majors participating in the Senior Honors Thesis program may petition to have one semester of their thesis work count as one of their Workshop course requirements. Students interested in this option should contact the Director of Undergraduate Studies.

Internship Program

Qualified students in all four of the Department's degree programs have the option of doing a professional internship for academic credit during their junior or senior years. These opportunities help students explore possible writing-related careers as well as gain workplace experience. Each internship is arranged, approved, and overseen by the Department's Internship Coordinator. Particular attention is given to matching students to internship sites of specific interest to them. Students have interned in a wide variety of communications-related positions including placements at local radio, television, and print publications; museums, theaters, and cultural organizations; non-profit and public service organizations; public relations, advertising, and marketing firms; software and technology companies; new media organizations; and hospitals and healthcare communication organizations.

To be eligible for an internship, students must have a Quality Point Average of 3.0 or better and credit for at least one writing course (including Survey of Forms) beyond Interpretation and Argument (76-101). Internships generally carry 3-12 units of credit. A 9-unit internship is the standard and requires a minimum of 120-140 hours (8-10 hours per week over a 15-week term) of work at the internship site during the term. In addition, interns complete a reflective journal and a series of short research and writing assignments relevant to the specific internship. Students doing an internship for credit must be registered for the internship during the term (including summer) when they are working at the internship site. Majors in the Department may count one 9-12 unit internship for one of their degree requirements, generally an English elective.

The Accelerated MA in Professional Writing: MAPW 4+1

The MAPW 4+1 is a special program under which Carnegie Mellon students (usually majors or minors in the English department or BHA or BHS students with relevant coursework) can qualify to complete the MA in Professional Writing in 2 semesters instead of the usual 3. Students apply for admissions during their junior or senior year and, following admission and evaluation of their transcripts, may receive credit for up to four courses, or one full semester of work toward the MA requirements. The degree has a professional focus, combines intensive work in both writing and visual design, and prepares students for a range of communications careers. The coursework and career options most commonly pursued by students in the degree include

- Writing for New Media, including web design and information design
- Writing for Print Media, including Journalism
- Editing & Publishing
- Technical writing, including instructional design
- Science, Technology, and Healthcare Writing
- Public & Media Relations / Corporate Communications / Nonprofit Communication

Students interested in applying to the 4+1 program should consult the Director of the MAPW program early in their junior year for further details and advice on shaping undergraduate coursework to qualify for this option. Detailed information on the program and relevant financial aid is available at <http://english.cmu.edu/> under the tab for the MAPW.

Faculty

MARIAN AGUIAR, Associate Professor of English and Literary and Cultural Studies - Ph.D., University of Massachusetts; Carnegie Mellon, 2002-.

AMAL AL-MALKI, Associate Teaching Professor, Liberal & Social Sciences, Carnegie Mellon University-Qatar - Ph.D., University of London; Carnegie Mellon, 2003-.

Undergraduate Degree Options in the Department of History

- **The B.A./B.S. in Social & Political History**
- **The B.A. in Global Studies**
- **The B.A./B.S. in Ethics, History, and Public Policy**

The Department of History offers undergraduates a choice of three majors: the major in Social & Political History, the major in Global Studies, and the interdepartmental major in Ethics, History, and Public Policy (administered by the Philosophy Department). Specific requirements and courses for each major are detailed below.

All three History majors are grounded firmly in the liberal arts. Each has a strong interdisciplinary bent and an equally strong commitment to using knowledge of the past to illuminate present-day social, cultural, and political affairs.

In different ways, all three majors emphasize empirical research methods and conceptual analysis, and cultivate reading, research, and writing abilities central to a variety of professions. Our students develop strong analytic and writing skills; choose among diverse U.S., global, and thematic courses; learn experientially through internships and/or study abroad; and benefit from small class sizes and easy access to faculty who are internationally known for innovative historical, anthropological, and other social science approaches to investigating the past. The study of history necessarily includes diverse societies and controversial public policy issues, usefully blending liberal education with professional development.

History is also excellent preparation for leadership positions in law, business, journalism, politics, education, and government service (e.g., U.S. Foreign Service, Health & Human Services, Federal Trade Commission). The resumes of innumerable CEOs and government statesmen show how effectively the study of history serves as a foundation for preparing leaders both at home and abroad.

Having been trained to analyze subtle and complex issues, to develop breadth of understanding, to dig out information and make sense of it, and to present their findings effectively, graduates of the History Department do extremely well in many types of for-profit, non-profit, governmental, and non-governmental organizations. Because history training combines research and writing skills with analysis of social and policy trends, it also prepares graduates for journalism and other writing careers in the modern media age.

All three History degree programs combine easily with majors in Business, Economics, English, Information Systems, Modern Languages, Philosophy, Professional Writing, Social and Decision Sciences, and Statistics.

Additional Majors

The majors in Social & Political History, Global Studies, and Ethics, History, and Public Policy may be declared as additional majors in consultation with the director of each program: Professor Steven Schlossman for Social & Political History (sls@cmu.edu), Professor John Soluri for Global Studies (jsoluri@andrew.cmu.edu), and Professor Alex London (Philosophy Department; ajlondon@andrew.cmu.edu).

Interdepartmental Majors

In addition to Ethics, History, and Public Policy major, History faculty are also integral participants in two interdepartmental majors described elsewhere in this catalog: International Relations and Politics in the Institute for Politics and Strategy, and Russian Studies in the Modern Languages Department. History courses are also central to the Environmental Policy major (additional major only).

Minors

Options for pursuing a minor in Social & Political History or Anthropology are discussed below, following the sub-section on Ethics, History, and Public Policy.

Several other minors with strong History content, detailed elsewhere in the Undergraduate Catalog, can be linked with any degree. Students should contact the relevant History faculty members listed below:

- African and African American Studies: Professor Edda Fields-Black (fieldsblack@cmu.edu)
- Environmental Studies: Professor John Soluri (jsoluri@andrew.cmu.edu)
- Gender Studies: Professor Lisa Tetrault (tetrault@andrew.cmu.edu)
- Religious Studies: Professor Allyson Creasman (allysonc@andrew.cmu.edu)
- Russian Studies: Professor Wendy Goldman (goldman@andrew.cmu.edu)
- Science, Technology, and Society: Professor Jay Aronson (aronson@andrew.cmu.edu).

Research Centers

The Department of History supports two research centers to coordinate sponsored research by faculty and graduate students. Both centers welcome undergraduates to attend and participate in frequent on-campus seminars and events. These are the *Center for African American Urban Studies and the Economy (CAUSE)*, Joe W. Trotter, Director, and the *Center for History and Policy*, Steven Schlossman, Director.

The Major in Social & Political History

Director of Undergraduate Studies: Professor Steven Schlossman; sls@cmu.edu, Baker Hall 236A, 412/268-2885
 Academic Advisor: Dr. Naum Kats; kats@andrew.cmu.edu, Baker Hall 240, 412/268-2880
http://www.history.cmu.edu/undergraduate/history_major.html

Social & Political History is a research- and writing-intensive major that emphasizes analysis of change over time and in-depth understanding of the societies, cultures, economies, political systems and conflicts that have shaped our world.

Students in Social & Political History may opt for 1) a general history degree or 2) an in-depth concentration in one of seven regions of the world: Asia, Europe, United States, African Diaspora, the Middle East, Latin America and the Caribbean, or Russia and the Former Soviet States [*There is no longer a language requirement for the regional concentration in Social & Political History.*] The department offers many broad survey courses, but electives in History also often focus on areas of specialized faculty expertise, such as environment, technology, gender, culture, labor, race, science, criminal justice, education, war, public health, politics, and diplomacy.

For students interested in pursuing a professional career in History, options today include not only research and teaching (CMU history graduates have earned Ph.D. degrees at Harvard, Northwestern, and other major universities) but also expert positions in museums, archives, historic sites, the armed services, media documentaries, and other public history venues. Often, history graduates pursue post-undergraduate professional school, such as law, business administration, education, public policy, urban planning, librarianship, journalism, the ministry, or social work. Schools in these fields usually prefer students who have acquired broad perspectives on human problems in addition to specialized skills.

Curriculum

Students graduating with a primary major in Social & Political History may pursue a B.A. or B.S. degree. This program may also be taken as an additional (i.e., second) major. Requirements for both primary and additional Social & Political History majors are Global Histories (79-104), which all Dietrich College and Tepper College students must take, plus an additional 93 units that meet the requirements of either the general Social & Political History major or a U.S. or regional concentration, for a total of 102 units.

All students in the Social & Political History major are required to complete two research-training courses: Introduction to Historical Research (79-200), a 9-unit course, and the Historical Research Seminar (79-420), a 12-unit course that is regularly offered in the Fall semester of the senior year. Students must earn a final grade of "C" or better in these two courses in order to fulfill the requirements for the major.

Social & Political History Major (General)

I. Required History Courses (39 units)

79-104	Global Histories	9
79-200	Introduction to Historical Research	9
79-240	The Development of American Culture	9
79-420	Historical Research Seminar	12

II. Required Non-U.S. Survey Course (choose one -- 9 units)

79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-223	Mexico: From the Aztec Empire to the Drug War	9
79-224	Mayan America	9
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-233	The United States and the Middle East since 1945	9
79-235	Caribbean Cultures	9
79-237	Comparative Slavery	9
79-251	India/America: Democracy, Diversity, Development	9
79-256	20th Century Germany	9
79-258	French History: From the Revolution to De Gaulle	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9

III. Social & Political History Elective Courses (54 units)

Students must complete 54 elective History units (typically 6 courses) for the general Social & Political History major. Any history courses not fulfilling another major requirement may be chosen as an elective.

Social & Political History majors have considerable flexibility in choosing their elective courses, but should consult with the Academic Advisor, Dr. Naum Kats (BH 240), or the Director of Undergraduate Studies, Dr. Steven Schlossman, in making their selections.

Social & Political History Major (General) — Sample Curriculum

Required Dietrich College General Education Course: 79-104 Global Histories (need not be completed before beginning the major).

Junior	Senior		
	Spring	Fall	Spring
79-200 Introduction to Historical Research	Non-U.S. Survey Course	79-420 Historical Research Seminar	History Elective
79-240 The Development of American Culture	History Elective	History Elective	History Elective
History Elective	History Elective	Third Course (open)	Third Course (open)
Fourth Course (open)	Fourth Course (open)	Fourth Course (open)	Fourth Course (open)
Fifth Course (open)	Fifth Course (open)	Fifth Course (open)	Fifth Course (open)

The table above represents a two-year (junior-senior) plan for completing all requirements for the Social & Political History Major (General). The purpose of this table is merely to show that the Social & Political History Major (General) can be completed in as few as two years, not that it must

be. Students may declare the major and begin course requirements as early as the start of the sophomore year and in some instances in the freshman year. Students should meet with the department's Director of Undergraduate Studies, Professor Steven Schlossman, sls@cmu.edu, for both short- and long-term course planning.

Social & Political History Major With a United States Concentration

I. Required History Courses (39 units)

79-104	Global Histories	9
79-200	Introduction to Historical Research	9
79-240	The Development of American Culture	9
79-420	Historical Research Seminar	12

II. Required Non-U.S. Survey Course (choose one -- 9 units)

79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-223	Mexico: From the Aztec Empire to the Drug War	9
79-224	Mayan America	9
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-233	The United States and the Middle East since 1945	9
79-235	Caribbean Cultures	9
79-237	Comparative Slavery	9
79-251	India/America: Democracy, Diversity, Development	9
79-256	20th Century Germany	9
79-258	French History: From the Revolution to De Gaulle	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9

III. United States Concentration Courses (27 units)

Students must complete 27 units (typically 3 courses) for the United States concentration, selecting from the list below.

79-217	The War in Vietnam	9
79-231	American Foreign Policy: 1945-Present	9
79-233	The United States and the Middle East since 1945	9
79-241	African American History: Africa to the Civil War	9
79-242	African American History: Reconstruction to the Present	9
79-243	The Civil War in American Memory	6
79-244	Women in American History	9
79-245	Capitalism and Individualism in American Culture	9
79-246	Industrial America	9
79-247	The Civil War Era: 1848-1877	9
79-249	20th Century U.S. History	9
79-251	India/America: Democracy, Diversity, Development	9
79-252	Recent U.S. History, 1945-Present	9

79-253	American Massacres in History and Memory	6
79-268	World War I: The Twentieth Century's First Catastrophe	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9
79-300	History of American Public Policy	9
79-301	History of Surveillance: From the Plantation to Edward Snowden	6
79-303	Pittsburgh and the Transformation of Modern Urban America	6
79-304	African Americans in Pittsburgh	6
79-305	Moneyball Nation: Data in American Life	9
79-310	From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present	9
79-315	Hawai'i: America's Pacific Island State	9
79-318	Sustainable Social Change: History and Practice	6
79-320	Women, Politics, and Protest	9
79-324	Adolescence in the 20th and 21st Centuries	6
79-330	Medicine and Society	9
79-331	Body Politics: Women and Health in America	9
79-338	History of Education in America	9
79-339	Juvenile Delinquency and Film (1920 to "The Wire")	9
79-340	Juvenile Delinquency and Juvenile Justice	9
79-341	The Cold War in Documents and Film	9
79-343	History of American Urban Life	9
79-345	The Roots of Rock and Roll	9
79-346	American Political Humor	9
79-348	Abraham Lincoln at 200	9
79-354	Energy & Climate: History, Science, Technology, and Policy in the US 1776-2076	9
79-363	The Rise of Modern Golf, 1860 to the Present	9
79-369	Disasters in American History: Floods and Hurricanes	6
79-370	Disasters in American History (2):Epidemics & Fires	6
79-371	African American Urban History	9
79-372	Perspectives on the Urban Environment	9
79-374	American Environmental History: Critical Issues	9
79-383	Epidemics, Disease, and Public Health	9

IV. History Elective Courses (27 units)

Students must complete 27 elective History units (typically 3 courses) for the United States Concentration. Any History courses not fulfilling another major requirement may be chosen as an elective.

Social & Political History majors have considerable flexibility in choosing their elective courses, but should consult with the Academic Advisor, Dr. Naum Kats (BH 240), or the Director of Undergraduate Studies, Dr. Steven Schlossman, in making their selections.

Social & Political History Major with a United States Concentration — Sample Curriculum

Required Dietrich College General Education Course: 79-104 Global Histories (need not be completed before beginning the major).

Junior		Senior	
Fall	Spring	Fall	Spring
79-200 Introduction to Historical Research	Non-U.S. Survey	79-420 Historical Research Seminar	U.S. History Concentration Course
79-240 The Development of American Culture	U.S. History Concentration Course	U.S. History Concentration Course	History Elective
History Elective	History Elective	Third Course (open)	Third Course (open)
Fourth Course (open)	Fourth Course (open)	Fourth Course (open)	Fourth Course (open)
Fifth Course (open)	Fifth Course (open)	Fifth Course (open)	Fifth Course (open)

The table above represents a two-year (junior-senior) plan for completing all requirements for the Social & Political History Major with a concentration in U.S. history. The purpose of this table is merely to show that the Social & Political History Major with a U.S. concentration can be completed in as few as two years, not that it must be. Students may declare the major and begin course requirements as early as the start of the sophomore year and in some instances in the freshman year. Students interested in concentrating in U.S. History should meet with the Director

of Undergraduate Studies, Professor Steven Schlossman, sls@cmu.edu, for both short- and long-term course planning.

Social & Political History Major with a Non-U.S. Regional Concentration

Students may opt to concentrate on one of the following regions of the world: African Diaspora, Asia, Europe, Latin America and the Caribbean, the Middle East, or Russia and the Former Soviet States [There is no longer a language requirement for the regional concentration in Social & Political History.]

I. Required History Courses (30 units)

79-104	Global Histories	9
79-200	Introduction to Historical Research	9
79-420	Historical Research Seminar	12

II. Required Survey Courses (choose two -- 18 units)

79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-223	Mexico: From the Aztec Empire to the Drug War	9
79-224	Mayan America	9
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-233	The United States and the Middle East since 1945	9
79-235	Caribbean Cultures	9
79-237	Comparative Slavery	9
79-240	The Development of American Culture	9
79-251	India/America: Democracy, Diversity, Development	9
79-256	20th Century Germany	9
79-258	French History: From the Revolution to De Gaulle	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9

III. Regional Concentration Courses (27 units)

Students must complete 27 units (typically 3 courses) in a single area of regional concentration.

Concentration in The African Diaspora

79-222	Between Revolutions: The Development of Modern Latin America	9
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-237	Comparative Slavery	9
79-241	African American History: Africa to the Civil War	9
79-242	African American History: Reconstruction to the Present	9
79-291	Globalization in East African History	6
79-304	African Americans in Pittsburgh	6

79-357	History of Black American Music	6
79-371	African American Urban History	9
79-385	The Making of the African Diaspora	9
79-386	Entrepreneurs in Africa, Past, Present and Future	9

Concentration in Asia

79-211	East Asia in the World, 1600-Present	9
79-251	India/America: Democracy, Diversity, Development	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-309	20th Century China Through Film	9
79-319	India through Film	6

Concentration in Europe

79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-256	20th Century Germany	9
79-257	Germany and the Second World War	9
79-258	French History: From the Revolution to De Gaulle	9
79-259	France During World War II	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-268	World War I: The Twentieth Century's First Catastrophe	9
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
79-282	Europe and the World since 1800	9
79-323	Family, Gender, and Sexuality in European History, 500-1800	9
79-326	German History through Film	9
79-352	Christendom Divided: The Protestant and Catholic Reformation, 1450-1650	9
79-353	Religious Identities and Religious Conflicts in 19th Century Europe	9
79-362	Law and Disorder in Early Modern Europe, 1400-1800	9
79-389	Stalin and Stalinism	9

Concentration in Latin America and the Caribbean

79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-223	Mexico: From the Aztec Empire to the Drug War	9
79-224	Mayan America	9
79-235	Caribbean Cultures	9
79-237	Comparative Slavery	9
79-254	The Jewish Diaspora in Latin America	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9

Concentration in the Middle East

79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-233	The United States and the Middle East since 1945	9
79-307	Religion and Politics in the Middle East	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9

79-398	Documenting the 1967 Arab-Israeli War	9
--------	---------------------------------------	---

Concentration in Russia and the Former Soviet States

79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-389	Stalin and Stalinism	9

IV. History Elective Courses (27 units)

Students must complete 27 elective History units (typically 3 courses) for the regional concentration. Any History courses not fulfilling another major requirement may be chosen as an elective.

Social & Political History majors have considerable flexibility in choosing their elective courses, but should consult with the Academic Advisor, Dr. Naum Kats (BH 240), or the Director of Undergraduate Studies, Dr. Steven Schlossman, in making their selections.

Social & Political History Major with a Regional Concentration — Sample Curriculum

Required Dietrich College General Education Course: 79-104 Global Histories (need not be completed before beginning the major).

Junior		Senior	
Fall	Spring	Fall	Spring
79-200 Introduction to Historical Research	Regional Concentration Course	79-420 Historical Research Seminar	Regional Concentration Course
Required Survey Course	Required Survey Course	Regional Concentration Course	History Elective
History Elective	History Elective	Third Course (open)	Third Course (open)
Fourth Course (open)	Fourth Course (open)	Fourth Course (open)	Fifth Course (open)
Fifth Course (open)	Fifth Course (open)	Fifth Course (open)	Fourth Course (open)

The table above represents a two-year (junior-senior) plan for completing all requirements for the Social & Political History Major with a Regional Concentration. The purpose of this table is merely to show that the Social & Political History Major with a Regional Concentration can be completed in as few as two years, not that it must be. Students may declare the major and begin course requirements as early as the start of the sophomore year and in some instances in the freshman year. Students should meet with the Director of Undergraduate Studies, Professor Steven Schlossman, sls@cmu.edu, for both short- and long-term course planning.

Additional Major in Social & Political History

The Social & Political History Major (general or with any concentration) may be scheduled as an additional major in consultation with the Director of Undergraduate Studies, Professor Steven Schlossman, sls@cmu.edu.

Bachelor of Science Option

Students may elect to earn a Bachelor of Science rather than a Bachelor of Arts degree by completing two courses from the list below, or by petitioning the Director of Undergraduate Studies, Professor Steven Schlossman, sls@cmu.edu to accept equivalent courses as substitutions.

21-257	Models and Methods for Optimization	9
36-202	Statistical Methods or	9
36-208	Regression Analysis	9
36-207	Probability and Statistics for Business Applications	9
36-303	Sampling, Survey and Society	9
36-309	Experimental Design for Behavioral and Social Sciences	9
80-305	Rational Choice	9
88-251	Empirical Research Methods	9

The Major in Global Studies

Director: Professor John Soluri; jsoluri@andrew.cmu.edu, Baker Hall 363, 412-268-7122
 Academic Program Manager: Emily Half; ehalf@andrew.cmu.edu, Baker Hall A60C, 412-268-7082
<http://www.cmu.edu/hss/globalstudies>

The Department of History offers the major in Global Studies, an interdisciplinary major designed for students interested in humanistic approaches to understanding past and present processes of globalization. Participating faculty in the departments of History, Modern Languages, and English conduct research in Africa, Asia, Europe, Latin America, the Middle East, and the Pacific. The rigorous yet flexible Global Studies curriculum combines anthropology, history, literary and cultural studies, and advanced language training in order to help students make sense of complex interactions among global processes, regional and local cultures, and societal structures. Global Studies majors develop a broad understanding of their prospects and responsibilities as citizens of the world confronting challenging contemporary problems.

There are three required courses for the major: the general education course Global Histories (79-104), Introduction to Global Studies (79-275), and Advanced Seminar in Global Studies (79-400). Majors also choose among several courses focused on theory, research methods, transnational histories, and regional/national histories and cultures. Demonstrating intermediate to advanced level proficiency in a language other than English is a crucial component of the major in Global Studies.

In addition to coursework at Carnegie Mellon, Global Studies majors are encouraged to incorporate a semester of study abroad into their course of study in order to immerse themselves in a society different from their own with unfamiliar cultural practices, language, and history. Global Studies majors may also enroll in 79-506 Global Studies Internship, a course that enables them to earn credit while gaining first-hand experience working with Pittsburgh-based organizations that work across borders.

Majors should consult frequently with the program's academic program manager and with participating faculty who will help students to craft a coherent course of study on specific topics and/or regions that may lead to the capstone research project (79-400 Advanced Seminar in Global Studies) or a Dietrich College senior honors thesis (<http://hss.cmu.edu/seniorhonorsprogram.html>). Program faculty and the academic program manager will also work with students to connect their academic interests and their participation in student organizations and/or organizations based in Pittsburgh with transnational reach.

Curriculum

Students graduating with a primary major in Global Studies receive a Bachelor of Arts degree. Global Studies may also be taken as an additional (e.g., second) major. Required courses include 79-104 plus 93 additional units (including 79-275 and 79-400) and proficiency in a modern language other than English. Students may double count a maximum of two courses taken for the Global Studies major that are also being used to fulfill the requirements of other majors and programs. Students should consult with the Global Studies academic program manager (see above) about new courses and study abroad courses that may be approved for students pursuing the major in Global Studies.

I. Required General Education Course (9 units)

79-104	Global Histories	9
--------	------------------	---

II. Global Studies Introductory Course (9 units)

Students must earn a final grade of "C" or better for the course to count toward the major.

79-275	Introduction to Global Studies	9
--------	--------------------------------	---

III. Language Requirement

Demonstrating intermediate to advanced level proficiency in a language other than English is a crucial component of the major in Global Studies. Normally this requirement can be satisfied by successfully completing a course conducted in the second language at the 300 level or above for French, German, Italian, or Spanish, or the fourth semester (Intermediate II) level or above for Arabic, Chinese, Japanese, or Russian. Comparable proficiency for other languages can be considered. Additional advanced cultural, historical, and literary study in the second language is strongly recommended. Courses in a language other than English may also be counted as Global Studies transnational, global, or regional courses or Global Studies electives as appropriate.

IV. Theoretical and Topical Core Courses (18 units)

To gain a solid foundation in the theories, methods, and analytical topics underpinning the major in Global Studies, students select 18 units (typically two classes) from the core courses listed below. Students must earn a final grade of "C" or better in these courses to fulfill the theoretical and topical core course requirement.

76-453	Literature of Empire	9
76-497	Culture: Interdisciplinary Approaches	9

79-200	Introduction to Historical Research	9
79-278	Rights to Representation: Indigenous People and their Media	9
79-297	Dilemmas and Controversies in Anthropology	9
79-314	The Politics and Culture of Memory	9
79-317	Art, Anthropology, and Empire	9
79-318	Sustainable Social Change: History and Practice	6
79-332	Medical Anthropology	9
79-355	Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective	9
79-376	Doing Transnational History	9
79-377	Food, Culture, and Power: A History of Eating	9
79-380	Ethnographic Methods	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9

V. Transnational, Global, and Regional Courses (27 units)

To gain insight into how complex transnational and global processes shape and are affected by local, national, and regional dynamics, students will select 27 units (typically three courses) from any subcategories below.

Transnational and Global Courses

76-322	Global Masala: South Asians in the Diaspora	9
76-353	Global Studies	9
76-440	Postcolonial Theory: Diaspora and Transnationalism	9
76-448	The Global Renaissance	9
79-224	Mayan America	9
79-233	The United States and the Middle East since 1945	9
79-237	Comparative Slavery	9
79-251	India/America: Democracy, Diversity, Development	9
79-254	The Jewish Diaspora in Latin America	9
79-276	Beyond the Border	6
79-282	Europe and the World since 1800	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9
79-289	Animal Planet: An Environmental History of People and Animals	6
79-295	Race Relations in the Atlantic World	9
79-299	Trafficking Persons: Children in a Global Context	9
79-310	From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present	9
79-312	International Human Rights Institutions in Theory and Practice	6
79-342	Introduction to Science and Technology Studies	9
79-383	Epidemics, Disease, and Public Health	9
79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9
79-385	The Making of the African Diaspora	9
80-348	Health Development and Human Rights	9
80-447	Global Justice	9
82-304	The Francophone World	9
82-345	Introduction to Hispanic Literary and Cultural Studies	9
84-326	Theories of International Relations	9

Regional Courses

Africa:		
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-291	Globalization in East African History	6
79-386	Entrepreneurs in Africa, Past, Present and Future	9
Eastern and Southern Asia and the Pacific:		
76-354	South Asian Literature	9
79-211	East Asia in the World, 1600-Present	9
79-264	Tibet in History and Imagination	9
82-431	China and the West	9

88-411	Rise of the Asian Economies	9	79-301	History of Surveillance: From the Plantation to Edward Snowden	6
Europe:			79-330	Medicine and Society	9
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9	79-349	The Holocaust in Historical Perspective	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9	79-506	Global Studies Internship	9
79-205	20th Century Europe	9	80-244	Environmental Ethics	9
79-207	Development of European Culture	9	80-247	Ethics and Global Economics	9
79-268	World War I: The Twentieth Century's First Catastrophe	9	80-335	Deliberative Democracy: Theory and Practice	9
79-323	Family, Gender, and Sexuality in European History, 500-1800	9	80-344	Management, Environment, and Ethics	9
79-353	Religious Identities and Religious Conflicts in 19th Century Europe	9	82-215	Introduction to Modern Arabic Literature and Culture	Var.
82-320	Contemporary Society in Germany, Austria and Switzerland	9	82-311	Arabic Language and Culture I	9
82-323	Germany, Austria and Switzerland in the 20th Century	9	82-312	Arabic Language and Culture II	9
82-415	Topics in French and Francophone Studies	9	82-358	Literacies Across Language and Culture	9
82-416	Topics in French and Francophone Studies	9	82-541	Special Topics: Hispanic Studies	Var.
82-441	Studies in Peninsular Literature and Culture	9	84-275	Comparative Politics	9
The Middle East:			84-310	International Political Economy and Organizations	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9	84-362	Diplomacy and Statecraft	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9	88-410	The Global Economy: A User's Guide	9
79-307	Religion and Politics in the Middle East	9	88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
79-398	Documenting the 1967 Arab-Israeli War	9			
82-300	Topics in Cross-Cultural Studies	9	<u>Nation-based Courses</u>		
The Americas:			76-337	Intro to Ethnic American Studies	9
79-221	Development and Democracy in Latin America	9	79-231	American Foreign Policy: 1945-Present	9
79-222	Between Revolutions: The Development of Modern Latin America	9	79-315	Hawai'i: America's Pacific Island State	9
79-223	Mexico: From the Aztec Empire to the Drug War	9	79-320	Women, Politics, and Protest	9
79-235	Caribbean Cultures	9	79-331	Body Politics: Women and Health in America	9
82-343	Latin America: Language and Culture	9	82-344	U.S. Latinos: Language and Culture	9
82-451	Studies in Latin American Literature and Culture	9	79-261	Chinese Culture and Society	9
82-455	Topics in Hispanic Studies	9	79-262	Modern China	9
82-456	Topics in Hispanic Studies	9	82-333	Introduction to Chinese Language and Culture	Var.
(27 units)VI. Elective Courses			82-433	Topics in Contemporary Culture of China	9
Students are required to take an additional 27 units (typically 3 courses) of electives, selected from one or both of the subcategories below. Category IV and V courses listed above that are not used to fulfill those requirements may be counted as electives in addition to the courses listed below.			82-434	Studies in Chinese Traditions	9
Those students who wish to pursue an optional Global Studies Senior Thesis (9 units) as one of their electives may do so by arrangement with Global Studies faculty; the thesis will often involve work in a language other than English. This option is not to be confused with the two-semester Dietrich College Senior Honors Thesis, for graduating with college-level honors.			82-440	Studies in Chinese Literature & Culture	9
Global Studies offers students the opportunity to gain credit for a 9 unit elective while gaining first-hand experience interning with Pittsburgh-based organizations that work across borders. 79-506 Global Studies Internship is offered every semester and students should register for the course after consulting with the academic advisor and faculty director. The faculty director will assist students with matching their interests to local organizations and identifying an on-site supervisor available to collaborate in the ongoing and final evaluation of the student's work.			79-258	French History: From the Revolution to De Gaulle	9
<u>Thematic Courses</u>			79-259	France During World War II	9
70-365	International Trade and International Law	9	82-303	Introduction to French Culture	9
76-241	Introduction to Gender Studies	9	82-305	French in its Social Contexts	9
76-318	Communicating in the Global Marketplace	9	79-256	20th Century Germany	9
76-386	Language & Culture	9	79-257	Germany and the Second World War	9
76-450	Literary and Cultural Theory: Law, Culture, and the Humanities	9	79-326	German History through Film	9
79-201	Introduction to Anthropology	9	82-327	The Emergence of the German Speaking World	9
79-281	Introduction to Religion	9	82-425	Topics in German Literature and Culture	9
79-296	Perspectives on Social Protest	9	82-427	Nazi and Resistance Culture	9
79-298	Mobile Phones & Social Media in Development & Human Rights: A Critical Appraisal	6	82-428	History of German Film	9
			79-319	India through Film	6
			79-255	Irish History	6
			82-361	Italian Language and Culture I	9
			82-362	Italian Language and Culture II	9
			82-273	Introduction to Japanese Language and Culture	9
			82-278	Japanese Film and Literature: The Art of Storytelling	9
			82-473	Topics in Japanese Studies	9
			82-474	Topics in Japanese Studies	9
			82-253	Korean Culture Through Film	9
			82-254	World of Korea, Then and Now	9
			79-265	Russian History: From the First to the Last Tsar	9
			79-266	Russian History: From Communism to Capitalism	9
			79-267	The Soviet Union in World War II: Military, Political, and Social History	9
			79-389	Stalin and Stalinism	9
			82-293	Introduction to Russian Culture	9
			82-294	Topics in Russian Language and Culture	9
			79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
			82-342	Spain: Language and Culture	9

VII. Senior Capstone Course (12 units)

The research seminar is the capstone course for Global Studies majors and is designed to give students the chance to define and carry out a research project of personal interest. Students are strongly encouraged to incorporate their prior coursework (including foreign language training), study abroad or internships into their research. Students must earn a final grade of "C" or better for the course to count toward the major.

79-400

Advanced Seminar in Global Studies

12

Global Studies Major — Sample Curriculum

This sample curriculum represents a plan for completing the requirements for the Global Studies major. Global Studies students are encouraged to spend a semester abroad and the plan below demonstrates that study abroad fits well into the curriculum. Like most majors in the Dietrich College, the Global Studies major can be completed in as few as two years of undergraduate study. Students may declare the Global Studies major and take appropriate courses as early as the second semester of the freshman year and as late as the junior year, and should consult frequently with the Global Studies academic program manager (see above) about their course of study in Pittsburgh and possibly abroad.

Freshman		Sophomore	
Fall	Spring	Fall	Spring
79-104 Global Histories	79-275 Introduction to Global Studies	GS Theoretical & Topical Core Course	GS Theoretical & Topical Core Course
76-101 Interpretation and Argument	36-201 Statistical Reasoning and Practice	GS Transnational, Global, Regional Course	GS Transnational, Global, Regional Course
Freshman Seminar	Language Course or Gen Ed	Language Course or Elective	Language Course or Elective
Language Course or Gen Ed	Fourth Course (open)	Fourth Course (open)	Fourth Course (open)
Fifth Course (open)	Fifth Course (open)	Fifth Course (open)	Fifth Course (open)
99-101 Computing @ Carnegie Mellon			

Junior		Senior	
Fall	Spring	Fall	Spring
GS Transnational, Global, Regional Course	STUDY ABROAD*	66-501 H&SS Senior Honors Thesis I**	66-502 H&SS Senior Honors Thesis II**
GS Elective	GS Elective	Language Course or Elective	79-400 Advanced Seminar in Global Studies
Language Course or Elective	GS Elective	Third Course (open)	Language Course or Elective
Fourth Course (open)	Language Course or Elective	Fourth Course (open)	Third Course (open)
Fifth Course (open)	Fourth Course (open)	Fifth Course (open)	Fourth Course (open)
	Fifth Course (open)		

*Spring semester of the junior year is a popular semester for study abroad. However, Global Studies majors may instead choose to study abroad in spring of sophomore year, fall of junior year, or fall of senior year. Students should discuss study abroad and curricular planning with the academic program manager.

**Students are not required to complete a college honors thesis. However, many Global Studies majors choose to apply for the senior honors thesis program. Students who do not pursue a senior honors thesis should select an elective in its place.

Additional Major

Global Studies may be elected as a primary or an additional major; the requirements for each are the same. Contact the academic program manager (see contact information above) to elect the additional major.

The Major in Ethics, History, and Public Policy

Alex John London, Director
Office: Baker Hall 150A
Email: ajlondon@andrew.cmu.edu

<http://www.cmu.edu/hss/ehpp/>

The B.A./B.S. in Ethics, History, and Public Policy is an interdepartmental major offered jointly by the Departments of History and Philosophy. It prepares students for leadership positions by providing them with a rigorous, interdisciplinary humanistic and social-scientific education. It also serves as an excellent springboard for graduate study in a wide variety of disciplines such as law, public policy, ethics, and advocacy. The program focuses equally on the historical understanding of how modern-day problems have evolved, and the importance of developing clear criteria for ethical decision-making. The capstone project course provides students with the opportunity to engage with real-world public policy challenges using the methods, theories, and knowledge that they have gained through the major. Offered jointly by the departments of History and Philosophy, the B.A./B.S. in EHPP encourages specialization, internship experiences, and research in a wide range of policy areas.

Curriculum

Students graduating with a primary major in Ethics, History, and Public Policy may elect to receive either a Bachelor of Arts or a Bachelor of Science Degree (additional requirements apply; see below). Basic requirements include 120 units encompassing 9 units in Economics, 36 units in History, 36 units in Philosophy, 27 units of elective courses, and a 12-unit senior capstone course. This program may also be taken as an additional (e.g., second) major.

I. Economics Requirement

9 units

Choose one of the following:

73-100 Principles of Economics 9

88-220 Policy Analysis I 9

3

II. History Core

36 units

Choose one 9-unit course from each category below:

Policy History (9 units)

79-300 History of American Public Policy 9

U.S. History (9 units)

79-240 The Development of American Culture 9

79-249 20th Century U.S. History 9

Non-U.S. History (9 units)

79-202 Flesh and Spirit: Early Modern Europe, 1400-1750 9

79-203 Social and Political Change in 20th Century Central and Eastern Europe 9

79-205 20th Century Europe 9

79-207 Development of European Culture 9

79-222 Between Revolutions: The Development of Modern Latin America 9

79-223 Mexico: From the Aztec Empire to the Drug War 9

79-226 African History: Earliest Times to 1780 9

79-227 African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid 9

79-229 Origins of the Arab-Israeli Conflict, 1880-1948 9

79-230 Arab-Israeli Conflict and Peace Process since 1948 9

79-237 Comparative Slavery 9

79-251 India/America: Democracy, Diversity, Development 9

79-261 Chinese Culture and Society 9

79-262 Modern China 9

79-264 Tibet in History and Imagination 9

79-265 Russian History: From the First to the Last Tsar 9

79-266 Russian History: From Communism to Capitalism 9

79-307 Religion and Politics in the Middle East 9

Historical Methods and Approaches (9 units)

79-200 Introduction to Historical Research 9

III. Philosophy Core 36 units

Choose one 9-unit course from each category below. No more than 18 units at the 100 level may be counted toward this requirement.

Ethics (9 units)

80-130 Introduction to Ethics 9

80-230 Ethical Theory 9

Political Philosophy (9 units)

80-135 Introduction to Political Philosophy 9

80-235 Political Philosophy 9

Foundations of Social Science (9 units)

80-221 Philosophy of Social Science 9

80-321 Causation, Law, and Social Policy 9

80-324 Philosophy of Economics 9

80-337 Philosophy, Politics & Economics 9

Applied Philosophy (9 units)

80-136 Social Structure, Public Policy & Ethics 9

80-244 Environmental Ethics 9

80-245 Medical Ethics 9

80-247 Ethics and Global Economics 9

80-335 Deliberative Democracy: Theory and Practice 9

80-348 Health Development and Human Rights 9

80-447 Global Justice 9

IV. Senior Capstone Project Course 12 units

79-449 EHPP Project Course [cross-listed] 12

80-449 EHPP Project Course 12

The Ethics, History and Public Policy Project Course is required for the Ethics, History and Public Policy major and is taken in the fall semester of the senior year. In this capstone course, Ethics, History and Public Policy majors carry out a collaborative research project that examines a compelling current policy issue that can be illuminated with historical research and philosophical and policy analysis. The students develop an original research report based on both archival and contemporary policy analysis and they present their results to a client organization in the community.

V. Elective Courses 27 units

Choose any three courses from any category or categories shown below.

Engineering and Public Policy (some courses have prerequisites; see EPP catalog listing)

19-424 Energy and the Environment 9

19-426 Environmental Decision Making 9

19-448 Science, Technology & Ethics 9

Business

70-311 Organizational Behavior 9

70-321 Negotiation and Conflict Resolution 9

70-332 Business, Society and Ethics 9

70-364 Business Law 9

70-365 International Trade and International Law 9

70-430 International Management 9

Economics (some courses have prerequisites; see Economics catalog listing)

73-148 Environmental Economics 9

73-310 Evolution of Economic Ideas and Analysis 9

73-352 Public Economics 9

73-358 Economics of the Environment and Natural Resources 9

73-359 Benefit-Cost Analysis 9

73-365 Firms, Market Structures, and Strategy 9

73-372 International Money and Finance 9

73-375 History of Money and Monetary Policy 9

73-408 Law and Economics 9

73-476 American Economic History 9

English

76-492 Rhetoric of Public Policy 9

History

Courses from the EHPP History Core (above) may be taken as electives only if they are not being used to fulfill the core requirement. Double counting is not permitted.

79-217 The War in Vietnam 9

79-221 Development and Democracy in Latin America 9

79-231 American Foreign Policy: 1945-Present 9

79-233 The United States and the Middle East since 1945 9

79-242 African American History: Reconstruction to the Present 9

79-253 American Massacres in History and Memory 6

79-267 The Soviet Union in World War II: Military, Political, and Social History 9

79-288 Bananas, Baseball, and Borders: Latin America and the United States 9

79-296 Perspectives on Social Protest 9

79-298 Mobile Phones & Social Media in Development & Human Rights: A Critical Appraisal 6

79-299 Trafficking Persons: Children in a Global Context 9

79-301 History of Surveillance: From the Plantation to Edward Snowden 6

79-302 Drone Warfare: Ethics, Law, Politics, History, and Strategy 6

79-303 Pittsburgh and the Transformation of Modern Urban America 6

79-305 Moneyball Nation: Data in American Life 9

79-310 From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present 9

79-312 International Human Rights Institutions in Theory and Practice 6

79-320 Women, Politics, and Protest 9

79-325 U.S. Gay and Lesbian History 6

79-331 Body Politics: Women and Health in America 9

79-338 History of Education in America 9

79-339 Juvenile Delinquency and Film (1920 to "The Wire") 9

79-340 Juvenile Delinquency and Juvenile Justice 9

79-342 Introduction to Science and Technology Studies 9

79-349 The Holocaust in Historical Perspective 9

79-355 Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective 9

79-359 Terrorism and U.S. National Security 6

79-371 African American Urban History 9

79-374 American Environmental History: Critical Issues 9

79-381 Energy and Empire: How Fossil Fuels Changed the World 9

79-383 Epidemics, Disease, and Public Health 9

79-384 Garbage Gone Global: Managing Waste in an Age of Mass Consumption 9

79-389 Stalin and Stalinism 9

Philosophy

Courses from the EHPP Philosophy Core (above) may be taken as electives only if they are not being used to fulfill the core requirement. Double counting is not permitted.

80-256 Modern Moral Philosophy 9

80-305 Rational Choice 9

80-405 Game Theory 9

Institute for Politics and Strategy

84-310 International Political Economy and Organizations 9

84-380 Grand Strategy in the United States 9

84-393 Legislative Decision Making: U.S. Congress 9

84-402 Judicial Politics and Behavior 9

Social and Decision Sciences

88-223	Decision Analysis and Decision Support Systems	9	79-207	Development of European Culture	9
88-281	Topics in Law: 1st Amendment	9	79-221	Development and Democracy in Latin America	9
88-343	Economics of Technological Change	9	79-222	Between Revolutions: The Development of Modern Latin America	9
88-345	Perspectives on Industrial Research and Development	9	79-223	Mexico: From the Aztec Empire to the Drug War	9
88-347	Complex Technological Systems: Past, Present, and Future	9	79-224	Mayan America	9
88-371	Entrepreneurship, Regulation and Technological Change	9	79-225	West African History in Film	9
88-387	Social Norms and Economics	9	79-226	African History: Earliest Times to 1780	9
88-423	Institutions, Entrepreneurship, and Innovation	9	79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
88-444	Public Policy and Regulation	9	79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
			79-230	Arab-Israeli Conflict and Peace Process since 1948	9

VI. Bachelor of Science Option

Students may elect to earn a Bachelor of Science rather than a Bachelor of Arts degree by completing two courses from the list below, or by petitioning the Director of EHPP to accept equivalent courses as substitutions.

21-257	Models and Methods for Optimization	9
36-202	Statistical Methods	9
or 36-208	Regression Analysis	
36-207	Probability and Statistics for Business Applications	9
36-303	Sampling, Survey and Society	9
36-309	Experimental Design for Behavioral and Social Sciences	9
80-305	Rational Choice	9
88-251	Empirical Research Methods	9

Additional Major

The B.A./B.S. in Ethics, History, and Public Policy may be scheduled as an additional major in consultation with the Director of Ethics, History, and Public Policy, Professor Alex John London, ajlondon@andrew.cmu.edu.

Ethics, History, and Public Policy Sample Curriculum

Junior Year		Senior Year	
Fall	Spring	Fall	Spring
Core requirement in Economics	Core requirement in History or Philosophy	Capstone Course	EHPP Elective Course
Core requirement in History or Philosophy	Core requirement in History or Philosophy	EHPP Elective Course	Second Course (open)
Core requirement in History or Philosophy	Core requirement in History or Philosophy	EHPP Elective Course	Third Course (open)
Core requirement in History or Philosophy	Core requirement in History or Philosophy	Fourth Course (open)	Fourth Course (open)
Core requirement in History or Philosophy	Fifth Course (open)	Fifth Course (open)	Fifth Course (open)

The above sample program is presented as a two-year (junior-senior year) plan for completing EHPP major requirements. Its purpose is to show that this program can be completed in as few as two years; not that it must be. Students may enter the EHPP major, and begin major course requirements, as early as the start of the sophomore year, or even in the first year. Students should consult their advisor when planning their program.

The Minor in Social & Political History

Director of Undergraduate Studies: Professor Steven Schlossman; sls@cmu.edu, Baker Hall 236A, 412/268-2885
 Academic Advisor: Dr. Naum Kats; kats@andrew.cmu.edu, Baker Hall 240, 412/268-2880
http://www.history.cmu.edu/undergraduate/history_major.html

The minor in Social & Political History involves a minimum of 54 units of History course work.

Curriculum (54 units)

I. Required History Survey Courses (choose two -- 18 units)

Students must complete 18 units (typically 2 courses) from the following list of survey courses:

79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9

79-207	Development of European Culture	9
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-223	Mexico: From the Aztec Empire to the Drug War	9
79-224	Mayan America	9
79-225	West African History in Film	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-231	American Foreign Policy: 1945-Present	9
79-233	The United States and the Middle East since 1945	9
79-235	Caribbean Cultures	9
79-237	Comparative Slavery	9
79-240	The Development of American Culture	9
79-241	African American History: Africa to the Civil War	9
79-242	African American History: Reconstruction to the Present	9
79-245	Capitalism and Individualism in American Culture	9
79-251	India/America: Democracy, Diversity, Development	9
79-252	Recent U.S. History, 1945-Present	9
79-256	20th Century Germany	9
79-258	French History: From the Revolution to De Gaulle	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-272	Iberian Encounters: Muslims, Christians, and Jews in Spain	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9

II. Elective courses for the Minor in Social & Political History (36 units)

Students must complete 36 elective History units (typically 4 courses). Social & Political History minors have considerable flexibility in choosing their elective courses, but should feel free to consult with the Director of Undergraduate Studies in making their selections.

The Minor in Anthropology

Faculty Advisor: Judith Schachter; jm1e@andrew.cmu.edu (judithm@cmu.edu), Baker Hall 242D, 412-268-3239
 Academic Advisor: Emily Half; ehalf@andrew.cmu.edu, Baker Hall A60C, 412-268-7082

The Minor in Anthropology is offered by the Department of History to train students in ethnographic methods and in theoretical understandings of culture. Students examine the evolution, depth, and complexities of ethnography, and explore notions of "culture" in diverse settings, over time and across space. In today's world, students are increasingly aware of the importance of developing a sophisticated approach to culture and its articulation with changes in the domains of the arts, technology, economics, and politics. The Minor in Anthropology, which may be taken alone but especially complements the majors in Global Studies and in Social & Political History, provides students with the tools to link artistic practices to various aspects of globalization.

The Minor in Anthropology requires that students complete two "Introductory and Methods" courses (18 units) and four "Anthropological Perspectives" courses (36 units). In addition, 79-104 Global Histories is required (9 units), but it may be taken at any time during the student's coursework. Including this course, the Minor in Anthropology totals 63 units.

The minor in Anthropology involves a minimum of 54 units of History Department course work (not including 79-104 Global Histories), as described below.

Curriculum (63 units)

I. Required General Education Course (9 units)

This requirement need not be satisfied before beginning any minor in the History Department.

79-104	Global Histories	9
--------	------------------	---

II. Introductory and Methods Courses (18 units)

Students must complete 18 units (typically 2 courses) for the Introductory and Methods Courses, selecting from the list below.

79-201	Introduction to Anthropology	9
79-297	Dilemmas and Controversies in Anthropology	9
79-380	Ethnographic Methods	9

III. Anthropological Perspectives _ (36 units)

Students must complete 36 units (typically 4 courses) for Anthropological Perspectives Courses, selecting from the list below.

79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-221	Development and Democracy in Latin America	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-223	Mexico: From the Aztec Empire to the Drug War	9
79-224	Mayan America	9
79-235	Caribbean Cultures	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-275	Introduction to Global Studies	9
79-276	Beyond the Border	6
79-278	Rights to Representation: Indigenous People and their Media	9
79-295	Race Relations in the Atlantic World	9
79-296	Perspectives on Social Protest	9
79-299	Trafficking Persons: Children in a Global Context	9
79-312	International Human Rights Institutions in Theory and Practice	6
79-314	The Politics and Culture of Memory	9
79-315	Hawai'i: America's Pacific Island State	9
79-317	Art, Anthropology, and Empire	9
79-332	Medical Anthropology	9
79-342	Introduction to Science and Technology Studies	9
79-355	Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective	9
79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9

Senior Honors Thesis: Dietrich College

The Dietrich College Honors Program may be undertaken by students completing the major in Social & Political History, the major in Global Studies, or the interdepartmental major in Ethics, History, and Public Policy. An Honors Thesis requires two semesters of work. Eligibility requirements are set by the College; contact the Associate Dean of Dietrich College for details.

Senior Thesis: History Department

Seniors may write a one- or two-semester Senior Thesis in History (which differs from the "Honors Thesis" option, described above) with permission of the Director of Undergraduate Studies and a designated History faculty member who will supervise its completion.

Study Abroad

Study abroad is especially encouraged for all students in the History Department; this experience can help students better understand the relationship between cultural heritage and modern political processes in a host country. To make study abroad successful and to find how study abroad fits into requirements, History majors should prepare study abroad proposals in consultation with a relevant faculty member.

Faculty

CAROLINE JEAN ACKER, Associate Professor of History – Ph.D., University of California, San Francisco; Carnegie Mellon, 1993–.

JAY D. ARONSON, Associate Professor of History; Director of Ethics, History, and Public Policy – Ph.D., University of Minnesota; Carnegie Mellon, 2004–.

ALLYSON F. CREASMAN, Associate Professor of History – Ph.D., University of Virginia; Carnegie Mellon, 2005–.

LAURIE Z. EISENBERG, Teaching Professor of History – Ph.D., University of Michigan; Carnegie Mellon, 1992–.

PAUL EISS, Associate Professor of Anthropology and History – Ph.D., University of Michigan; Carnegie Mellon, 2000–.

EDDA FIELDS-BLACK, Associate Professor of History – Ph.D., University of Pennsylvania; Carnegie Mellon, 2001–.

WENDY Z. GOLDMAN, Professor of History – Ph.D., University of Pennsylvania; Carnegie Mellon, 1988–.

EMANUELA GRAMA, Assistant Professor of Anthropology and History – Ph.D., University of Michigan; Carnegie Mellon, 2013–.

DONNA HARSCH, Professor of History; Department Head – Ph.D., Yale University; Carnegie Mellon, 1990–.

RICKY W. LAW, Assistant Professor of History – Ph.D., University of North Carolina; Carnegie Mellon, 2013–.

KATHERINE A. LYNCH, Professor of History; Director of Graduate Studies – Ph.D., Harvard University; Carnegie Mellon, 1980–.

CHRISTOPHER J. PHILLIPS, Assistant Professor of History – Ph.D., Harvard University; Carnegie Mellon, 2014–.

BENJAMIN REILLY, Associate Teaching Professor of History, Carnegie Mellon-Qatar – Ph.D., University of Pittsburgh; Carnegie Mellon, 2004–.

SCOTT A. SANDAGE, Associate Professor of History – Ph.D., Rutgers University; Carnegie Mellon, 1995–.

JUDITH SCHACHTER, Professor of Anthropology and History – Ph.D., University of Minnesota; Carnegie Mellon, 1984–.

STEVEN SCHLOSSMAN, Professor of History; Director of Undergraduate Studies – Ph.D., Columbia University; Carnegie Mellon, 1988–.

NICO SLATE, Associate Professor of History – Ph.D., Harvard University; Carnegie Mellon, 2009–.

JOHN SOLURI, Associate Professor of History; Director of Global Studies – Ph.D., University of Michigan; Carnegie Mellon, 1999–.

JOEL A. TARR, Richard S. Caliguiri University Professor of History and Policy – Ph.D., Northwestern University; Carnegie Mellon, 1967–.

LISA M. TETRAULT, Associate Professor of History – Ph.D., University of Wisconsin; Carnegie Mellon, 2005–.

JOE WILLIAM TROTTER, Giant Eagle Professor of History and Social Justice – Ph.D., University of Minnesota; Carnegie Mellon, 1985–.

BENNO R. WEINER, Assistant Professor of History – Ph.D., Columbia University; Carnegie Mellon, 2015–.

Special Faculty

JOSEPH E. DEVINE, Associate Dean for Undergraduate Studies, Dietrich College of Humanities and Social Sciences – D.A., Carnegie Mellon University; Carnegie Mellon, 1979–.

KAREN FAULK, Visiting Assistant Professor of Anthropology and History – Ph.D., University of Michigan; Carnegie Mellon, 2009–.

MICHAL R. FRIEDMAN, Visiting Assistant Professor of History – Ph.D., Columbia University; Carnegie Mellon, 2010–.

TIMOTHY HAGGERTY, Director of the Humanities Scholars Program – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2000–.

LANSINE KABA, Distinguished Visiting Professor of History, Carnegie Mellon-Qatar – Ph.D., Northwestern University; Carnegie Mellon, 2009–.

NAUM KATS, Undergraduate Advisor, Department of History – Ph.D., University of Saint Petersburg, Russia; Carnegie Mellon, 1990–.

Emeriti

EDWIN FENTON, Professor Emeritus of History - Ph.D., Harvard University; Carnegie Mellon, 1954-.

DAVID H. FOWLER, Professor Emeritus of History - Ph.D., Yale University; Carnegie Mellon, 1959-.

RICHARD MADDOX, Professor Emeritus of Anthropology and History - Ph.D., Stanford University; Carnegie Mellon, 1993-.

DAVID W. MILLER, Professor Emeritus of History - Ph.D., University of Chicago; Carnegie Mellon, 1967-.

JOHN MODELL, Professor Emeritus of History - Ph.D., Columbia University; Carnegie Mellon, 1982-.

DANIEL P. RESNICK, Professor Emeritus of History - Ph.D., Harvard University; Carnegie Mellon, 1966-.

DONALD S. SUTTON, Professor of History and Anthropology - Ph.D., Cambridge University, England; Carnegie Mellon, 1969-.

The Major in Information Systems

Faculty Program Director: Randy S. Weinberg

Office: Porter Hall 222

<http://www.cmu.edu/information-systems/>

Information Systems (IS), found within the Dietrich College of Humanities and Social Sciences, is an internationally recognized undergraduate major for students who want to design and implement effective solutions to meet organizational, societal and management needs for information and decision support.

In today's complex, interconnected world, the effective creation, distribution, and use of information via technology is central to daily life. Computer based information systems facilitate, enable and often define the relationships between corporations and consumers, buyers and suppliers, businesses of all sizes, social networks, and citizens and their governments. Understanding these relationships and effectively addressing the collection, flow, and distribution of information is vital to running a modern organization, enterprise or government agency.

Information Systems involves the effective design, delivery, use and impact of information and communications technologies in organizations and society. The importance of information technology and information systems to organizations and the need for well-educated professionals in the field is the basis for the Information Systems curriculum at Carnegie Mellon. Whether implementing applications, providing management or decision support, managing complex systems projects, or helping organizations design business processes or cope with rapid change, IS professionals fill an essential need across all sectors of society.

Information systems students at Carnegie Mellon learn to use, manage and deploy information technologies to address real problems or opportunities. They develop a solid foundation in computing, communications, as well as software development principles, languages, and methods. Since Information Systems generally operate within organizations, IS students study social sciences and organizational theory. IS students learn how to right-size information technology solutions to meet real-world economic and organizational constraints. Information Systems students also learn, through hands-on experience, the critical importance of professional communications, problem analysis, critical thinking and teamwork. Building on the multi-disciplinary strengths of the university and the Dietrich College of Humanities and Social Sciences, graduates in Information Systems are ideally suited to take a leading role in shaping our information-based future.

The flexible nature of the program encourages students to explore their own interests through program electives, study in a contemporary content area or through optional second majors and minors.

IS students are well prepared to pursue graduate work in a wide range of fields. For students interested in master's degree-level graduate work at Carnegie Mellon, there are many possibilities, including accelerated Masters degree programs in Information Systems Management, Human Computer Interaction, Information Security Policy and Management, Engineering Technology and Innovation Management, and Business Administration.

IS graduates continue to be in high demand in the information-age workplace. There has been a strong job market for IS students in recent years, and national trends indicate that this is likely to continue. IS majors often take jobs in consulting companies, major software firms, large corporations, and start-up companies. Internship opportunities closely parallel the job market.

In addition to the Dietrich College General Education Requirements and basic prerequisites in Mathematics, Statistics and Computer Science, IS students must complete the Professional Core, the Disciplinary Core and a focused Content Area. In the Professional Core (consisting of six courses), students learn the basic skills necessary to analyze, design, implement and test high-quality, cost effective information systems. Two of the Professional Core courses are project-based experiences in which small teams of students develop and deliver solutions to real information problems.

In the Disciplinary Core (consisting of three courses), students study key areas fundamental to understanding and solving problems in information systems: professional communications; quantitative analysis and research methods; and organizations, policy, and social science.

IS students also complete three courses within one Content Area. The content areas are designed to provide students an opportunity to gain additional depth in a focused area. Currently, twelve content areas are available: (1) Business / Enterprise Systems, (2) Computing and Information Systems & Technology, (3) Social and Global Systems, (4) Quantitative Analysis, (5) Game Design, (6) Animation and Special Effects, (7) Media

Design, (8) Learning Media, (9) Sound Design, (10) Entrepreneurship for Creative Industries, (11) Intelligent Environments, (12) Physical Computing. Content areas (5) through (12) are offered through CMU's Integrative Design, Arts, and Technology (IDeATe) (<http://www.cmu.edu/ideate>) initiative combining arts and technology.

Study Abroad Options in Information Systems

Given the rise of globalization and its effect on information systems development, we encourage students to consider expanding their international experience by spending a semester studying abroad. The IS program is very flexible in allowing students to pursue these opportunities. With careful planning, study abroad is possible during most semesters. Students interested in study abroad should talk with the IS Academic Advisor to help plan an appropriate course of study. With prior approval, study abroad courses may be applied to major requirements.

Information Systems as Additional Major or Minor

Information Systems is not available as either an additional major or minor.

Transfer into Information Systems

Most IS students are admitted directly into Information Systems as incoming freshmen. Only Information Systems major students are permitted to enroll in the Professional Core courses (67-250 and above), and IS students have enrollment priority in IS electives.

Students in high academic standing may apply to be admitted to the Information Systems major as transfer students. Transfers into Information Systems will always be subject to availability of space in the major. Applications will be considered based on the following criteria:

- Strong record of academic performance at Carnegie Mellon (minimum QPA of 3.4)
- Relevance and clarity of personal statement
- Interviews with IS Academic Advisor and Dietrich College Academic Advisory Center (AAC) Advisors or Assistant Dean (AAC)
- Relevance of courses completed to date
- Completion of 15-112 Fundamentals of Programming and Computer Science with final grade of 'A' or 'B'

Applications for admission to the major are considered at the end of each Fall and Spring semester. Application materials must be submitted to the Academic Advising Center no later than the last day of classes of the fall or spring semester.

Students accepted as transfers to the IS program would normally be expected to complete the usual prerequisites and begin the Professional Core courses during the next available semester.

Dietrich College undergraduate students who want to transfer to IS must apply through the Dietrich College Academic Advisory Center, Baker Hall A56. Undergraduate students in other Carnegie Mellon colleges who wish to transfer to the Dietrich College and then into Information Systems should also apply through the Dietrich College Academic Advisory Center (<http://www.cmu.edu/hss/advisory-center/transferring/transfer-in.html>), Baker Hall A57. Students from other Carnegie Mellon colleges must be approved for admission to both the Dietrich College and Information Systems.

Students interested in applying for transfer to the Information Systems major should contact the IS Academic Advisor for information regarding availability, application procedures and deadlines. Potential applicants to the IS major should be working toward a sensible alternative major, so that their success at Carnegie Mellon is not predicated on admission to the IS program.

Curriculum

The Information Systems major is offered only as a Bachelor of Science (B.S.) degree. In addition to major requirements outlined below, all Information Systems students must fulfill the General Education

requirements for the Dietrich College of Humanities and Social Sciences. A total of 360 units is required for the degree.

Requirements are subject to revision. Advisor approval is required for each student's major curriculum plan. Any proposed course substitutions to courses required for the IS major must be approved in advance by the IS Academic Advisor.

Prerequisites

Information Systems requires completion of prerequisite courses in Mathematics, Statistics and Computer Science. All prerequisites must be successfully completed prior to the start of Fall semester, junior year.

Mathematics and Statistics

Complete one of the following calculus sequences:

		Units
21-111	Calculus I	10
21-112	Calculus II	10

OR

		Units
21-120	Differential and Integral Calculus	10
21-256	Multivariate Analysis (Required for advanced business courses)	9

OR

		Units
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation (Required for advanced computer science courses)	10

AND also complete:

		Units
36-201	Statistical Reasoning and Practice	9

Computer Science

Three Computer Science courses are required. To maintain normal progress toward the Information Systems degree, students must complete 15-121 Introduction to Data Structures prior to the start of Spring Semester, sophomore year.

Students entering the program as freshmen will complete a Computer Science Placement Test. Depending on appropriate Advanced Placement credit and results of the Computer Science Placement Test, entering students may place directly into 15-112 or 15-121. 15-110 is taken as the first Computer Science prerequisite unless a student places directly into 15-112 or 15-121. Most students entering the program will begin the sequence with 15-110.

		Units
15-110	Principles of Computing	10
15-112	Fundamentals of Programming and Computer Science	12
15-121	Introduction to Data Structures	10

Note: Students cannot receive credit for both 15-104 Introduction to Computing for Creative Practice and 15-110 Principles of Computing.

Professional Core

The Professional Core consists of six courses (five core courses and one core elective).

Complete all five of these courses:

		Units
67-250	The Information Systems Milieux (Spring Semester Only)	9
67-262	Database Design and Development (Fall Semester Only)	9
67-272	Application Design and Development (Spring Semester Only)	9
67-373	Software Development Project (Spring Semester Only)	12
67-475	Innovation in Information Systems (Fall Semester Only)	12

Core courses are only offered once per academic year.

Note: Students transferring into Information Systems may substitute 67-344 Organizational Intelligence in the Information Age for 67-250 The Information Systems Milieux.

Professional Core Elective

Plus, complete 6 to 12 units chosen from the following options:

		Units
19-402	Telecommunications Technology, Policy & Management	12
67-306	Special Topics: Management of Computer and Information Systems	6
67-308	Innovation Studio: Health Care Information Systems	9
67-309	Special Topics	6
67-311	Database Design and Implementation	9
67-319-67-331	Global Technology Consulting Groundwork - Technology Consulting in the Global Community (these two courses are taken sequentially)	6
67-327	Web Application Security	6
67-328	Mobile to Cloud: Building Distributed Applications	9
67-329	Contemporary Themes in Global Systems	9
67-330	Technology Consulting in the Community	9
67-344	Organizational Intelligence in the Information Age	9
67-353	IT & Environmental Sustainability	6
67-362	Big Data and Analytics	9
67-370	Intelligent Decision Support Systems	9
67-442	Mobile Application Development in iOS	9
88-223	Decision Analysis and Decision Support Systems	9

OR Any Computer Science course above 15-121 with prerequisite of 15-112 or higher.

OR Any Human-Computer Interaction course (05-xxx).

OR other *pre-approved* 67-3xx or 67-4xx which may be offered from time to time. Students wishing to apply such courses to their Professional Core requirement must complete a course substitution application through the IS Academic Advisor.

OR other *pre-approved* courses offered by the Engineering & Public Policy Department (19-xxx).

NOTE: 67-1xx and 67-2xx courses may not be applied to this requirement.

Disciplinary Core

Complete one course (9 units) from each of the three Disciplinary Core categories.

Professional Communications

Information systems professionals communicate with a wide range of people in most organizations and often facilitate communications between diverse groups of stakeholders. Consequently, the most successful professionals typically are those with strong communication skills. These courses help students see that the structure and presentation of information affects how well (and how easily) it can be understood and used.

Complete one course (9 units). It is recommended that this requirement be completed by the end of junior year:

		Units
15-221	Technical Communication for Computer Scientists	9
36-315	Statistical Graphics and Visualization	9
51-261	Communication Design Fundamentals: Design for Interactions for Communications	9
or 51-262	Communication Design Fundamentals: Design for Interactions for Communications	
70-321	Negotiation and Conflict Resolution	9
70-340	Business Communications	9
70-341	Organizational Communication	9
70-342	Managing Across Cultures	9
76-270	Writing for the Professions	9
76-272	Language in Design	9
88/70/85-341	Organizational Communication	9

Quantitative Analysis and Research Methods

This area focuses on decision making and data analysis — essential to development of useful information systems. This area exposes students to analytic methods in the social sciences and quantitative methods for approaching complex methods.

Complete one course (9 units). It is recommended that this requirement be completed in the sophomore year:

	Units
21-257	9
21-325	9
36-202	9
36/70-208	9
36-217	9
36-225	9
36-303	9
36-309	9
67-360	9
67-362	9
67-370	9
80-305	9
80-405	9
88-223	9
88-251	9

Organizations, Policy, and Social Science

The focus of this area is on how organizations function in modern social and economic environments. Students will develop a greater understanding of how social policy and technology influence organizations and how they operate.

Complete one course (9 units):

	Units
08-200/19-211	9
15-390/70-421	9
19-402	12
19-403	12
19-411	9
67-308	9
67-344	9
67-353	6
70-311	9
70-332	9
70/85/88-341	9
70-342	9
70-414	9
70-415	9
70-416	9
70-420	9
70-437	9
80-341	9
88-220	9
88-223	9
88-260	9

Content Area

Complete a minimum of 27 units from one of the Content Areas below. No Content Area course may also be used to fulfill a Disciplinary Core or Professional Core requirement.

Business/Enterprise Systems

This content area broadens a student's knowledge in the business, economics and policy aspects of large scale information systems.

	Units
19-402	12

19-411	Global Competitiveness: Firms, Nations and Technological Change	9
67-301	Networks and Telecommunications	9
67-306	Special Topics: Management of Computer and Information Systems	6
67-308	Innovation Studio: Health Care Information Systems	9
67-309	Special Topics	6
67-311	Database Design and Implementation	9
67-319-67-331	Global Technology Consulting Groundwork - Technology Consulting in the Global Community (these two courses are taken sequentially)	6
67-328	Mobile to Cloud: Building Distributed Applications	9
67-330	Technology Consulting in the Community	9
67-344	Organizational Intelligence in the Information Age	9
67-353	IT & Environmental Sustainability	6
67-370	Intelligent Decision Support Systems	9
67-442	Mobile Application Development in iOS	9
70-332	Business, Society and Ethics	9
70-366	Intellectual Property and E-Commerce	6
70-371	Operations Management	9
70-414	Entrepreneurship for Engineers	9
or 70-415	Introduction to Entrepreneurship	
or 70-420	Entrepreneurship for Scientists	
or 70-421	Entrepreneurship for Computer Scientists	
70-437	Organizational Learning and Strategic Management	9
70-438	Commercialization and Innovation	9
70-443	Digital Marketing and Social Media Strategy	9
70-449	Social, Economic and Information Networks	9
70-455	Modern Data Management	9
70-460	Mathematical Models for Consulting	9
70/73-465	Technology Strategy	9
70-471	Supply Chain Management	9
70-476	Service Operations Management	9
73-359	Benefit-Cost Analysis	9
73-469	Global Electronic Markets: Economics and the Internet	9
76-391	Document & Information Design	12
76-487	Web Design	12

Computing and Information Systems & Technology

This content area allows students to focus on current and emerging technologies.

		Units
05-391	Designing Human Centered Software	12
05-410	User-Centered Research and Evaluation	12
05-430	Programming Usable Interfaces	15
05-431	Software Structures for User Interfaces	15
05-432	Personalized Online Learning	12
05-433	Programming Usable Interfaces OR Software Structures for Usable Interfaces	6
05-499	Special Topics in HCI	Var.
16-311	Introduction to Robotics	12
16-362	Mobile Robot Programming Laboratory	12
19-403	Policies of Wireless Systems and the Internet	12
19-411	Global Competitiveness: Firms, Nations and Technological Change	9
60-415	Advanced ETB: Animation	10
67-311	Database Design and Implementation	9
67-327	Web Application Security	6
67-328	Mobile to Cloud: Building Distributed Applications	9
67-362	Big Data and Analytics	9
67-442	Mobile Application Development in iOS	9
Any 15-xxx course above 15-121 with prerequisite of 15-112 or higher		

Social and Global Systems

This content area exposes students to key themes in globalization and global systems . management, policy, international business, and technology.

	Units
19-402 Telecommunications Technology, Policy & Management	12
19-403 Policies of Wireless Systems and the Internet	12
19-411 Global Competitiveness: Firms, Nations and Technological Change	9
67-319-67-331 Global Technology Consulting Groundwork - Technology Consulting in the Global Community (these two courses are taken sequentially)	6
67-329 Contemporary Themes in Global Systems	9
67-330 Technology Consulting in the Community	9
67-353 IT & Environmental Sustainability	6
70-342 Managing Across Cultures	9
70-365 International Trade and International Law	9
70-430 International Management	9
70-480 International Marketing	9
73-372 International Money and Finance	9
76-318 Communicating in the Global Marketplace	9
76-386 Language & Culture	9
79-318 Sustainable Social Change: History and Practice	6
79-381 Energy and Empire: How Fossil Fuels Changed the World	9
88-371 Entrepreneurship, Regulation and Technological Change	9
88-378 International Economics	9
88-384 Conflict and Conflict Resolution in International Relations	9
88-391 Technology and Economic Growth	9
88-410 The Global Economy: A User's Guide	9
88-411 Rise of the Asian Economies	9

Additionally, other *pre-approved* courses offered by the Engineering & Public Policy Department (19-xxx) may be used to fulfill the Social and Global Systems Content Area.

Quantitative Analysis

Students will learn to apply analytic and quantitative methods for approaching complex, ambiguous problems.

	Units
21-257 Models and Methods for Optimization	9
21-292 Operations Research I	9
36/70-208 Regression Analysis	9
36-217 Probability Theory and Random Processes or 36-225 Introduction to Probability Theory	9
36-303 Sampling, Survey and Society	9
36-309 Experimental Design for Behavioral and Social Sciences	9
36-350 Statistical Computing	9
36-401 Modern Regression	9
36-410 Introduction to Probability Modeling or 36-46x Topics in Statistics	9
67-360 Applied Analytics	9
67-362 Big Data and Analytics	9
67-370 Intelligent Decision Support Systems	9
70-460 Mathematical Models for Consulting	9
70-462 Stochastic Modeling and Simulations	9
73-363 Econometrics	9
88-223 Decision Analysis and Decision Support Systems	9
88-251 Empirical Research Methods	9

Integrative Design, Arts, and Technology (IDeATe) Content Areas:

An IDeATe content area consists of a minimum of 27 units which may include one Portal Course (other than 15-104 Introduction to Computing for Creative Practice) plus 2 courses from one of the areas below.

Game Design (IDeATe)

In this content area, students will learn both theory and skill in the key areas of games: dramatic narrative and character development, visual and sound synthesis, special effects and performance capture, programming and engine development, interface and interaction architecture development, game assessment and redesign. Please visit the Game Design website (<http://www.cmu.edu/ideate/concentrations-and-minors/game-design.html>) for information about available courses.

Animation and Special Effects (IDeATe)

The interconnected components of performance capture, rendering, 3D and 2D animation, and special effects will be covered in this content area. Course information can be found at the Animation and Special Effects website (<http://www.cmu.edu/ideate/concentrations-and-minors/animation-and-special-effects.html>).

Media Design (IDeATe)

The digital mediation of experiences content area explores the interconnected development of technology and content in new media systems and the meaning that arises from the resulting forms. Students learn to design mediated experiences across different platforms, from mobile to large-scale installations. Course information can be found on the Media Design website (<http://www.cmu.edu/ideate/concentrations-and-minors/media-design.html>).

Learning Media (IDeATe)

Students in this content area will combine their diverse skills for the design of effective new media systems for learning; from games for learning to tangible learning tool kits and remote learning systems. They will leverage new technologies, media arts knowledge, and learning science principles to create engaging experiences with measurable real world impact. For course information, please visit the Learning Media website (<http://www.cmu.edu/ideate/concentrations-and-minors/learning-media.html>).

Sound Design (IDeATe)

This content area will explore the processes and products of digital sound and music. Students will receive basic training in key areas: principles of computer music, hybrid instrument building, concepts in sound design. 62-150 Intro to Signal Processing for Creative Practice (10 units) is the required portal course for this content area and will serve as one of the courses for this content area. Course information can be found at the Sound Design website. (<http://www.cmu.edu/ideate/concentrations-and-minors/sound-design.html>)

Entrepreneurship for Creative Industries (IDeATe)

Students in this content area will develop the knowledge and skills to lead and innovate in creative industries. Their interdisciplinary, hands-on coursework will emphasize the conceptualization of innovative products and the structuring of innovation processes. Courses and additional information can be found at the Entrepreneurship for Creative Industries website (<http://www.cmu.edu/ideate/concentrations-and-minors/entrepreneurship-for-creative-industries.html>).

Intelligent Environments (IDeATe)

The focus of this content area is on spaces that support efficiency and high quality of experience, addressing both the integrated development of such environments and the resulting experience. The required portal course for this content area is 62-150 Intro to Signal Processing for Creative Practice (10 units) or 16-223/60-223 Introduction to Physical Computing (10 units) and will serve as one of the courses for this content area. Course information can be found at the Intelligent Environments website (<http://www.cmu.edu/ideate/concentrations-and-minors/intelligent-environments.html>).

Physical Computing (IDeATe)

The barriers between computing devices and their users have slowly dissolved. The physical world is becoming a key interface for computing and the internet of things is becoming the next generation of connectivity. Students in this content area will explore the technical, experiential, and semantic issues of this evolution. Course information can be found on the Physical Computing website (<http://www.cmu.edu/ideate/concentrations-and-minors/physical-computing.html>).

Double Counting of Courses

"Double Counting" refers to instances when a course taken to fulfill one requirement counts simultaneously toward a requirement in another major or minor program. Double Counting is permitted in the Dietrich College on a very limited basis. Information Systems students may double count

no more than two courses used to fulfill any Information Systems major requirement (beyond the Dietrich College General Education requirements and Prerequisite courses) with any combination of dual degrees, additional majors, minors or graduate degree programs. Only one course may double count with any minor. No course can count for more than one requirement within the major. Students must also adhere to any policy restrictions on double counting enforced by the academic department of the student's additional major or minor.

Course Repeats

Per university policy, when a course is repeated, all grades will be recorded on the official academic transcript and will be calculated in the student's QPA. This is the case regardless if the first grade for the course is a passing or failing grade.

Undergraduate students who wish to repeat a course already passed must obtain approval from the student's Dean or Department Head. When a student takes a course s/he has already passed, only one set of units will count towards graduation requirements.

Information Systems Sample Curriculum

Freshman		Sophomore	
Fall	Spring	Fall	Spring
67-100 Information Systems Freshman Workshop	67-250 The Information Systems Milieux	67-262 Database Design and Development	67-272 Application Design and Development
15-110 Principles of Computing	15-112 Fundamentals of Programming and Computer Science	15-121 Introduction to Data Structures	Disciplinary Core Course
21-111 Calculus I	21-112 Calculus II	Disciplinary Core Course	Elective Course

Faculty

C.F. LARRY HEIMANN, Teaching Professor - Ph.D., Washington University (St. Louis); Carnegie Mellon, 1998-.

JOSEPH S. MERTZ, Teaching Professor (joint Appointment with Heinz College) - Ph.D., Carnegie Mellon University; Carnegie Mellon, 1997-.

JERIA QUESENBERRY, Associate Teaching Professor - Ph.D., Pennsylvania State University; Carnegie Mellon, 2007-.

RAJA SOORIAMURTHI, Teaching Professor - Ph.D., Indiana University; Carnegie Mellon, 2007-.

RANDY S. WEINBERG, Teaching Professor; Program Director, Information Systems - Ph.D., University of Minnesota; Carnegie Mellon, 1998-.

CHADI AOUN, Associate Teaching Professor - Carnegie Mellon - Qatar - Ph.D., University of New South Wales; Carnegie Mellon, 2015--.

ANIS CHARFI, Associate Teaching Professor - Carnegie Mellon - Qatar - Dr. Ing., Technische Universität Darmstadt; Carnegie Mellon, 2015-.

ALEX CHEEK, Assistant Teaching Professor - Carnegie Mellon - Qatar - M.Des., Carnegie Mellon University; Carnegie Mellon, 2014-.

DIVAKARAN LIGINLAL, Teaching Professor - Carnegie Mellon - Qatar - Ph.D., University of Arizona - Tucson; Carnegie Mellon, 2009-.

SELMA LIMAM MANSAR, Teaching Professor - Carnegie Mellon - Qatar - Ph.D., National Polytechnic Institute of Grenoble; Carnegie Mellon, 2007-.

DANIEL PHELPS, Associate Teaching Professor - Carnegie Mellon - Qatar - Ph.D., Florida State University; Carnegie Mellon, 2007-.

RAY TSAI, Professor of Practice - Carnegie Mellon - Qatar - Ph.D., University of North Texas; Carnegie Mellon, 2011-.

Department of Modern Languages

Susan G. Polansky, Department Head
Bonnie L. Youngs, Director of Undergraduate Studies
Department Office: Baker Hall 160
<http://www.cmu.edu/dietrich/modlang/>

Studying foreign languages and their cultures is desirable and essential for understanding our complex global world. It is crucial to educate global citizens who will be sensitive to other cultures and capable of communicating in other languages. Proficiency in a foreign language by itself, or combined with other professional training, may lead to a variety of rewarding careers. Moreover, the personal experience of mastering another language is enriching and gratifying.

The Majors in Chinese Studies, French & Francophone Studies, German Studies, Hispanic Studies, Japanese Studies, and Russian Studies

These majors are designed to lead to acquisition of communicative language proficiency and substantive knowledge of other cultures.

Drawing on the unique interdisciplinary climate of the Carnegie Mellon campus, the undergraduate majors in Modern Languages encourage the acquisition of multiple skills by students with varied backgrounds, talents, and interests. An important resource in support of these goals is the Modern Language Resource Center (MLRC), a state-of-the-art facility that provides students with access to authentic foreign language materials such as original television broadcasts, interactive video projects, Technology Enhanced Language Learning (TELL) courses, international audio and video resources, and computerized assessment tools.

Students majoring in a modern language are also encouraged to enroll, preferably during their junior year, in a study-abroad program or to spend a summer abroad at a language institute or in an internship. Semester or year-long programs are available in places such as China, France, Germany, Japan, Africa, Russia, Spain, and Latin America. The Department also sponsors summer courses in China, Germany, and Spain. Foreign film series, informal conversation tables, native-speaker conversation partners, speaking and writing assistants, and Student Advisory Committee cultural events are some of the activities organized by the Department of Modern Languages to increase students' ability in languages and knowledge of cultures.

The major in Modern Languages is designed to permit students to acquire communicative language proficiency in their language of specialization. Courses in culture and civilization offer students a solid introduction to the main currents in national literatures as well as artistic and social movements. These courses integrate study of cultures with skill development in reading, writing, and aural/oral communication. In addition, the student who majors in Modern Languages will develop a perspective on the learning and use of second languages, from both a social and cognitive point of view, within contemporary American society and in an increasingly global community. Working closely with their advisor, language majors are guided to develop personal interests by taking courses in other disciplines such as fine arts, history, psychology, philosophy, and other humanities and social sciences, which often include readings, discussions, and papers in the foreign language. The rich technological environment of the campus strongly enhances all fields of language study.

Second language proficiency is an asset which provides students with practical as well as theoretical bases for a variety of paths after graduation. Students of Modern Languages have taken paths to a wide variety of careers in government, entrepreneurship and business, law, technology and engineering firms, media, public health, health policy, and health professions, non-profit organizations, entertainment and creative arts, and education. They are also prepared to pursue graduate studies in second language-related fields (e.g. linguistics, second language acquisition, literary and cultural studies).

Curriculum

Six specializations are available in the Department of Modern Languages: Chinese Studies, French and Francophone Studies, German Studies, Hispanic Studies, Japanese Studies, and Russian Studies.

Language-specific faculty advisors for these majors are:

Chinese Studies- Dr. Elisabeth Kaske, Associate Professor of Chinese Studies and Dr. Yueming Yu, Teaching Professor of Chinese Studies
French & Francophone Studies-Dr. Bonnie Youngs, Teaching Professor of French & Francophone Studies
German Studies-Dr. Stephen Brockmann, Professor of German
Hispanic Studies-Dr. Therese Tardio, Associate Teaching Professor of Hispanic Studies
Japanese Studies-Dr. Yasufumi Iwasaki, Associate Teaching Professor of Japanese and Dr. Keiko Koda, Professor of Japanese and Second Language Acquisition
Russian Studies-Dr. Charlene Castellano, Teaching Professor of Russian

The Major in Chinese Studies96-99 units

Faculty Advisors

Dr. Elisabeth Kaske, Associate Professor of Chinese Studies (ekaske@andrew.cmu.edu) Dr. Yueming Yu, Teaching Professor of Chinese Studies (yyu@andrew.cmu.edu)

Prerequisites

Intermediate-level proficiency in the Chinese language. This is equivalent to the completion of three courses (two at the 100-level and one at the 200-level), or placement or exemption based on Advanced Placement, International Baccalaureate or CMU internal placement test scores. In all cases, progress will be accelerated by study abroad, which is highly recommended for all majors. (Study abroad advisor - Dr. Yueming Yu, yyu@andrew.cmu.edu)

Students with native or near-native proficiency in listening and speaking of the language prior to entering CMU should consult with the major advisor for a different curriculum that may accelerate their completion of the requirement.

Students may double count a maximum of one course taken for the Chinese Studies major that is also being used to fulfill the requirements of other majors, minors, and programs.

1. Core Courses in Chinese Studies39-42 units*

Complete all four courses

		Units
82-232	Intermediate Chinese II (may be substituted by 82-235 Intermediate Chinese for Heritage Students)	12
82-331	Advanced Chinese I	9
82-332	Advanced Chinese II	9
82-333	Introduction to Chinese Language and Culture **	Var.

*Students who place out of 82-232/82-235 must take a minimum of 9 additional units chosen from List A Electives.

**Students must take this course for 12 units to fulfill the requirement. Students who take this course for 9 units prior to declaring their major must register for 3 units of independent study later in their studies.

2. Core Courses in Modern Languages12 units

Complete one 9 unit course* plus the Senior Seminar (3 units) in the spring of the senior year.

		Units
82-280	Learning About Language Learning	9
82-281	Tutoring for Community Outreach	Var.
82-282	Community Service Learning	Var.
82-283	Language, Diversity, & Cultural Identity	9
82-358	Literacies Across Language and Culture	9
82-383	Second Language Acquisition: Theories and Research	9
82-388	Understanding Second Language Fluency	9
82-480	Social and Cognitive Aspects of Bilingualism	9
82-580	Senior Seminar in Modern Languages	3

* In consultation with the major advisor, students may substitute a Modern Languages course elective with one related to language analysis, language learning, or acquisition of language and culture from the listings in Chinese Studies or from another department. Examples: 80-180 Nature of Language, 85-421 Language and Thought.

3. Core Courses in History & Society 9 units

Complete one course after consultation with the major advisor and the designated History or Modern Languages professor.

	Units
79-261 Chinese Culture and Society	9
79-262 Modern China	9
79-309 20th Century China Through Film	9
82-230 Topics in Cultural Comparison	9
82-234 Topics in Chinese History	9
82-237 Topics in Traditional China	9
82-238 Topics in Chinese Culture	9

4. Chinese Studies and Interdisciplinary Electives 36 units

Complete two courses (18 units) from List A and two courses (18 units) from List B, or two courses (18 units) from List A, one (9 units) from List B, and one (9 units) from List C.

List A. Core Chinese Studies Electives 18 units

	Units
82-432 Popular Culture in China	9
82-433 Topics in Contemporary Culture of China *	9
82-434 Studies in Chinese Traditions *	9
82-436 Introduction to Classical Chinese	9
82-439 Modern China Through Literature *	9
82-440 Studies in Chinese Literature & Culture *	9
82-531/532 Special Topics in Chinese Studies *	Var.

*Students may repeat these courses with new topics.

List B: Chinese Studies Electives (minimum) 9 units

	Units
82-334 Structure of Chinese	9
82-335 Readings in Chinese	9
82-337 Mandarin Chinese for Oral Communication I	9
82-338 Mandarin Chinese for Oral Communication II	9
82-339 Business Language & Culture in China I	9
82-340 Business Language & Culture in China II	9
82-432 Popular Culture in China	9
82-439 Modern China Through Literature	9
82-440 Studies in Chinese Literature & Culture	9
82-432 Popular Culture in China	9
82-433 Topics in Contemporary Culture of China *	9
82-434 Studies in Chinese Traditions *	9
82-436 Introduction to Classical Chinese	9
82-439 Modern China Through Literature *	Var.
82-440 Studies in Chinese Literature & Culture *	9
82-436 Introduction to Classical Chinese	9
82-505 Undergraduate Internship	Var.
82-531/532 Special Topics in Chinese Studies *	Var.

* Students may repeat these courses with new topics.

List C. Interdisciplinary Electives

This list is compiled from possibilities such as but not limited to the following. Students should consult OLR and their major advisor for the most up to date interdisciplinary electives appropriate for the Chinese Studies curriculum. Courses may be suggested to the major advisor for approval as a substitute. Note that not all courses are offered each semester.

	Units
Architecture	
48-351 Human Factors in Architecture	9
48-551 Ethics and Decision Making in Architecture	9
Art	
60-373 Aesthetics from a Global Viewpoint	9
60-399 Art History/Theory Independent Study	9
Business	
	Units

70-342	Managing Across Cultures	9
70-365	International Trade and International Law	9
70-430	International Management	9

	Units	
English		
76-318	Communicating in the Global Marketplace	9
76-339	Topics in Film Studies	9
76-386	Language & Culture	9
76-387	Narrative & Argument	9

	Units	
History		
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-309	20th Century China Through Film	9

	Units	
Modern Languages		
82-230	Topics in Cultural Comparison	9
82-234	Topics in Chinese History	9
82-237	Topics in Traditional China	9
82-238	Topics in Chinese Culture	9
82-280	Learning About Language Learning	9
82-281	Tutoring for Community Outreach	Var.
82-282	Community Service Learning	Var.
82-283	Language, Diversity, & Cultural Identity	9
82-358	Literacies Across Language and Culture	9
82-383	Second Language Acquisition: Theories and Research	9
82-388	Understanding Second Language Fluency	9
82-480	Social and Cognitive Aspects of Bilingualism	9

	Units	
Philosophy		
80-180	Nature of Language	9
80-280	Linguistic Analysis	9
80-276	Philosophy of Religion	9
80-380	Philosophy of Language	9

	Units	
Psychology		
85-375	Crosscultural Psychology	9
85-421	Language and Thought	9

	Units	
Social and Decision Science		
88-384	Conflict and Conflict Resolution in International Relations	9
88-391	Technology and Economic Growth	9
88-410	The Global Economy: A User's Guide	9
88-411	Rise of the Asian Economies	9
88-415	Global Competitiveness: Firms Nations, and Technological Change	9

5. Oral Proficiency Interview

Complete an oral proficiency interview. At the latest, this exam should be scheduled by midterm of the senior spring semester. Students are permitted to retake the test.

Study Abroad

A semester or year of study abroad is strongly recommended. Consult with your advisor and the Office of International Education (OIE) about possible options.

Senior Honors Thesis

Modern Languages majors are encouraged to undertake a Senior Honors Thesis (*Modern Languages Honors Thesis*, 82-591/82-592 or Dietrich College *Senior Honors Thesis I, II*, 66-501/66-502). The Honors Thesis program provides qualified seniors with a valuable opportunity to combine their academic and personal experiences and interests into a unique research project. (Prerequisites: a 3.5 QPA in Chinese and a 3.25 QPA overall)

Chinese Studies (B.A.) Sample Curriculum

This sample curriculum assumes that all prerequisites for 82-331 are fulfilled prior to the junior year.

Junior Year		Senior Year	
Fall	Spring	Fall	Spring
82-331 Advanced Chinese I	82-332 Advanced Chinese II	Core Chinese Studies Elective From List A	Core Chinese Studies Elective From List A

This is presented as a two-year (junior-senior) plan for completing the major requirements. It is intended to show that this program can be completed in as few as two years, not that it must be. Students may enter their major and begin major course requirements as early as the start of the sophomore year, and in some instances in the first year. Students should consult their advisor when planning their program.

This plan is also an example of the suggested sequence of study for students who have had little or no prior exposure to the language. Such students would need to satisfy the prerequisites (elementary and intermediate language study) during their freshman and sophomore years.

The Major in French and Francophone Studies 93 units

Faculty Advisor

Dr. Bonnie Youngs, Teaching Professor of French and Francophone Studies (byoungs@cmu.edu)

Prerequisites

Intermediate-level proficiency in French. This is equivalent to the completion of four courses (two at the 100-level and two at the 200-level) or exemption based on Advanced Placement, International Baccalaureate or Carnegie Mellon internal placement test scores. In all cases, progress will be accelerated by study abroad, which is highly recommended for all majors. (Study abroad advisor: Dr. Michael West, mjwest@andrew.cmu.edu)

Students may double count a maximum of one course taken for the French & Francophone Studies major that is also being used to fulfill the requirements of other majors, minors, and programs.

1. Core Courses in French and Francophone Studies 27 units

Complete all three courses.

	Units
82-303 Introduction to French Culture	9
82-304 The Francophone World	9
82-305 French in its Social Contexts	9

2. Core Courses in Modern Languages 12 units

Complete one 9 unit course* plus the Senior Seminar (3 units) in the spring of the senior year.

	Units
82-280 Learning About Language Learning	9
82-281 Tutoring for Community Outreach	Var.
82-282 Community Service Learning	Var.
82-283 Language, Diversity, & Cultural Identity	9
82-358 Literacies Across Language and Culture	9
82-383 Second Language Acquisition: Theories and Research	9
82-388 Understanding Second Language Fluency	9
82-480 Social and Cognitive Aspects of Bilingualism	9
82-580 Senior Seminar in Modern Languages	3

* In consultation with the major advisor, students may substitute a Modern Languages course elective with one related to language analysis, language learning, or acquisition of language and culture from the listings in French & Francophone Studies or from another department. Examples: 80-180 Nature of Language, 85-421 Language and Thought.

3. French and Francophone Studies Interdisciplinary Electives 54 units

Complete six courses (54 units) from List A or five courses (45 units) from List A and one (9 units) from List B.

List A. French and Francophone Electives

	Units
82-404 Francophone Realities *	9
82-415/416 Topics in French and Francophone Studies *	9
82-501/502 Special Topics: French and Francophone Studies	Var.
82-505 Undergraduate Internship	Var.

* Students may repeat these courses with new topics.

List B. Interdisciplinary Electives

This list is compiled from possibilities such as but not limited to the following. Students should consult OLR and their major advisor for the most up to date interdisciplinary electives appropriate for the French & Francophone Studies curriculum. Courses may be suggested to the major advisor for approval as a substitute. Note that not all courses are offered each semester.

Architecture		Units
48-338	European Cities in the XIX Century: Planning, Architecture, Preservation	9
48-340	Modern Architecture and Theory 1900-1945	9
48-341	Expression in Architecture	9
48-448	History of Sustainable Architecture	9
English		Units
76-239	Introduction to Film Studies	9
76-318	Communicating in the Global Marketplace	9
76-385	Introduction to Discourse Analysis	9
76-386	Language & Culture	9
76-387	Narrative & Argument	9
History		Units
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-258	French History: From the Revolution to De Gaulle	9
79-275	Introduction to Global Studies	9
79-350	Early Christianity	9
79-353	Religious Identities and Religious Conflicts in 19th Century Europe	9
79-385	The Making of the African Diaspora	9
79-386	Entrepreneurs in Africa, Past, Present and Future	9
79-396	Music and Society in 19th and 20th Century Europe and the U.S.	9
Modern Languages		Units
82-227	Germany & the European Union	9
82-280	Learning About Language Learning	9
82-281	Tutoring for Community Outreach	Var.
82-282	Community Service Learning	Var.
82-283	Language, Diversity, & Cultural Identity	9
82-358	Literacies Across Language and Culture	9
82-383	Second Language Acquisition: Theories and Research	9
82-388	Understanding Second Language Fluency	9
82-480	Social and Cognitive Aspects of Bilingualism	9
Music		Units
57-173	Survey of Western Music History	9
57-306	World Music	6
57-441	Analysis of 19th Century Music	9
Philosophy		Units
80-180	Nature of Language	9
80-247	Ethics and Global Economics	9
80-280	Linguistic Analysis	9

80-281	Language and Thought	9
80-282	Phonetics and Phonology I	9
80-380	Philosophy of Language	9
80-381	Meaning in Language	9
Psychology		Units
85-375	Crosscultural Psychology	9
85-421	Language and Thought	9
Social and Decision Sciences		Units
88-384	Conflict and Conflict Resolution in International Relations	9
88-391	Technology and Economic Growth	9
88-415	Global Competitiveness: Firms Nations, and Technological Change	9
88-419	Negotiation	9

4. Oral Proficiency Interview

Complete an oral proficiency interview. At the latest, this exam should be scheduled by midterm of the senior spring semester. Students are permitted to retake the test.

Study Abroad

A semester or year of study abroad or internship is strongly recommended. Consult with your advisor and the Office of International Education (OIE) about possible options.

Senior Honors Thesis

Modern Languages majors are encouraged to undertake a Senior Honors Thesis (*Modern Languages Honors Thesis*, 82-591/82-592 or Dietrich College *Senior Honors Thesis I, II*, 66-501/66-502). The Honors Thesis program provides qualified seniors with a valuable opportunity to combine their academic and personal experiences and interests into a unique research project. (Prerequisites: a 3.5 QPA in French and a 3.25 QPA overall)

The Major in German Studies 93 units

Faculty Advisor

Dr. Stephen Brockmann, Professor of German Studies (smb@andrew.cmu.edu)

Prerequisites

Intermediate-level proficiency in German. This is equivalent to the completion of four courses (two at the 100-level and two at the 200-level) or exemption based on Advanced Placement, International Baccalaureate or Carnegie Mellon internal placement test scores. In all cases, progress will be accelerated by study abroad, which is highly recommended

for all majors. (Study abroad advisor: Dr. Gabriele Eichmanns Maier, eichgabi@andrew.cmu.edu)

Students may double count a maximum of one course taken for the German Studies major that is also being used to fulfill the requirements of other majors, minors, and programs.

1. Core Courses in German Studies 27 units

Complete all three courses.*

82-320	Contemporary Society in Germany, Austria and Switzerland	9
82-323	Germany, Austria and Switzerland in the 20th Century	9
82-327	The Emergence of the German Speaking World	9

* A 400-level course may be substituted with the major advisor's approval.

2. Core Courses in Modern Languages 12 units

Complete one 9-unit course* in Modern Languages, plus the senior seminar (3 units) in spring of the senior year.

82-280	Learning About Language Learning	9
82-281	Tutoring for Community Outreach	Var.
82-282	Community Service Learning	Var.
82-283	Language, Diversity, & Cultural Identity	9
82-358	Literacies Across Language and Culture	9
82-383	Second Language Acquisition: Theories and Research	9
82-388	Understanding Second Language Fluency	9
82-480	Social and Cognitive Aspects of Bilingualism	9
82-580	Senior Seminar in Modern Languages	3

* In consultation with the major advisor, students may substitute a Modern Languages course elective with one related to language analysis, language learning, or acquisition of language and culture from the listings in German Studies or from another department. Examples: 80-180 Nature of Language, 85-421 Language and Thought.

3. German Studies and Interdisciplinary Electives 54 units

Complete five courses (45 units) from List A and one (9 units) from List B, or a minimum of three courses (27 units) from List A and one or two courses (9-18 units) from List B. The student may complete an additional 3 units of coursework in German to allow a List B elective to count as a List A elective, with permission of the major advisor and the course instructor.

List A. German Electives

82-420	German Classical Literature	9
82-421	German Literature of the Nineteenth Century	9
82-422	German Literature of the Early Twentieth Century	9
82-425/426	Topics in German Literature and Culture *	9
82-427	Nazi and Resistance Culture	9
82-428	History of German Film	9
82-505	Undergraduate Internship	Var.
82-521/522	Special Topics: German Studies *	Var.

* Students may repeat these courses with new topics.

List B. Interdisciplinary Electives

From possibilities such as but not limited to the following. Students should consult OLR and their major advisor for the most up to date interdisciplinary electives appropriate for the German Studies curriculum. Courses may be suggested to the major advisor for approval as a substitute. Note that not all courses are offered each semester.

This is presented as a two-year (junior-senior) plan for completing the major requirements. It is intended to show that this program can be completed in as few as two years, not that it must be. Students may enter their major and begin major course requirements as early as the start of the sophomore year, and in some instances in the first year. Students should consult their advisor when planning their program.

This plan is also an example of the suggested sequence of study for students who have had little or no prior exposure to the language. Such students would need to satisfy the prerequisites (elementary and intermediate language study) during their freshman and sophomore years.

The Major in Russian Studies 75–78 units

Faculty Advisor

Dr. Charlene Castellano, Teaching Professor of Russian
(cc62@andrew.cmu.edu)

The major in Russian Studies is jointly administered by the Departments of History and Modern Languages. Students are required to fulfill requirements in history and in language and culture.

Prerequisites

Elementary-level proficiency in the Russian language. This is equivalent to the completion of two courses at the 100-level, or placement or exemption based on Advanced Placement, International Baccalaureate or CMU internal placement test scores. Carnegie Mellon students who arrive with previous language study and/or who have high AP or CEEB scores will be able to begin taking courses toward the major earlier in their undergraduate program and will also be able, should they so desire, to complete an additional major. In all cases, progress will be accelerated by study abroad, which is highly recommended for all majors. (Study abroad advisor - Dr. Charlene Castellano, cc62@andrew.cmu.edu)

Students may double count a maximum of one course taken for the Russian Studies major that is also being used to fulfill the requirements of other majors, minors, and programs.

1. Core Course in History 9 units

Complete one course.*

79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9

* Both courses are recommended.

1

2. Required Electives in History 18 units

Complete two courses. In consultation with the major advisor, students may substitute a different course. Units

79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-341	The Cold War in Documents and Film	9

3. Core Courses in Modern Languages 27 units

Complete three courses.

82-291	Intermediate Russian I	9
82-292	Intermediate Russian II	9
82-399	Special Topics: Russian in Context (Students can repeat 82-399 with different topics.)	Var.

Should a student enter the Russian Studies program with demonstrated language proficiency at the intermediate or advanced level, higher level courses will be used to complete the required total of 27 units from the list of core courses in Modern Languages. Advanced language options include *Special Topics: Russian*, a repeatable course, as well as subject-oriented language supplements to existing courses taught in English in a variety of fields. The student can add a language supplement (3 units) to selected 9-unit electives, earning a total of 12 units for the language-supplemented course.

4. Required Electives 18 units

Complete two courses. This list is compiled from possibilities such as but not limited to the following. Students should consult OLR and their major advisor for the most up to date interdisciplinary electives appropriate for the Russian Studies curriculum. Courses may be suggested to the major advisor for approval as a substitute. Note that not all courses are offered each semester.

History

79-205	20th Century Europe	9
79-231	American Foreign Policy: 1945-Present	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9

79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-341	The Cold War in Documents and Film	9

Modern Languages

82-283	Language, Diversity, & Cultural Identity	9
82-294	Topics in Russian Language and Culture *	Var.
82-296	A Century of Russian Film	9
82-396	The Faust Legend at Home and Abroad (or 82-193 which is a Freshman Seminar.)	Var.
82-397	Russia's Demons	Var.
82-399	Special Topics: Russian in Context *	Var.
82-400	Russian Studies Topics (section A and/or B)	6
82-491	Topics in Twentieth-Century Russian Literature *	Var.
82-492	The Historical Imagination in Nineteenth-Century Russian Literature	Var.
82-505	Undergraduate Internship	Var.
82-580	Senior Seminar in Modern Languages **	3

*Students may repeat these courses with new topics.

**If their schedule permits and after consultation with the major advisor, students may elect to take the 3-unit Modern Languages Senior Seminar in addition to two 9-unit electives.

5. Required Independent Research 3–6 units

Complete one course.	Units	
82-599	Russian Studies Thesis	Var.

In the senior year, majors are required to undertake an independent research or translation project in which their language skills are applied to Russian-language materials. This project, which earns 3 to 6 units, is conducted in connection with an existing course in Russian history, language, literature or politics. The student works closely with the professor to select a topic requiring the use of Russian sources suitable to the student's proficiency level. For example, students may choose to prepare a translation of a little-known piece of Russian literature or a debate from a nineteenth-century journal, to compare Soviet and Western newspaper coverage of the Cuban missile crisis, to research Russian opinion of American race relations, or to read and evaluate the reviews of a popular Russian novel.

Study Abroad

Students in both the major and minor programs are encouraged to spend a semester or summer in Russia via an approved exchange program. Many exchange programs offer instruction in Russian language, history, literature, and culture, in internationally recognized universities. They also offer travel to ancient sites and cities, visits to museums, palaces, exhibitions, and monuments, and the opportunity to live with a Russian host family. Scholarship monies are available.

Faculty Exchange Program

In 1993, the College of Humanities and Social Sciences initiated a faculty exchange program with the Russian State University of the Humanities (RGGU), one of the foremost universities in Russia, located in Moscow. Carnegie Mellon has hosted faculty members from RGGU specializing in history, language and philosophy. These professors have joined our College departments for a semester, offering unique courses and perspectives not generally available to our students. In the past, these Russian visitors have offered courses on the Russian Civil War as well as advanced language and literature courses. Several faculty members from Carnegie Mellon have visited Moscow, using the RGGU exchange to pursue archival research and collaborative projects. The exchange offers students an opportunity to study language from native speakers, gain exposure to different perspectives on history and politics, and gather firsthand knowledge about recent developments in Russia. In addition, the exchange can provide important contacts for students interested in pursuing careers abroad.

Sample Curriculum - Russian Studies, B.A.

This sample curriculum assumes that all prerequisites for 82-291 are fulfilled prior to the junior year.

Junior Year		Senior Year	
Fall	Spring	Fall	Spring
82-291 Intermediate Russian I	82-292 Intermediate Russian II	82-399 Special Topics: Russian in Context	82-599 Russian Studies Thesis
Core Course in History 76-265/266	Required Elective in History	82-399 Special Topics: Russian in Context	Required Elective
Elective	Required Elective	Required Elective	82-580 Senior Seminar in Modern Languages
Elective	Elective	Elective	Elective
Elective	Elective	Elective	Elective

This is presented as a two-year (junior-senior) plan for completing the major requirements. Its purpose is to show that this program can be completed in as few as two years, not that it must be. Students may enter their major and begin major course requirements as early as the start of the sophomore year, and in some instances in the first year. Students should consult their advisor when planning their program.

This plan is also an example of the suggested sequence of study for students who have had little or no prior exposure to the language. Such students would need to satisfy the prerequisites (elementary and intermediate language study) during their freshman and sophomore years.

Modern Languages as an Additional Major

In addition to their primary major, a student may complete a major in Chinese Studies, French and Francophone Studies, German Studies, Hispanic Studies, Japanese Studies, and Russian Studies. Students outside of Dietrich College interested in an additional major in Modern Languages need to fulfill only the requirements for the Modern Languages major but not the Dietrich College General Education requirements.

Minors in the Department of Modern Languages

The Department of Modern Languages also offers minors in Chinese Studies, French and Francophone Studies, German Studies, Hispanic Studies, Japanese Studies, and Russian Studies. A minor in one of these language and culture areas requires core courses similar to the major and includes a variety of options for electives. Many students study abroad as part of their program. Students who minor in Modern Languages have found the program an enriching complement to their major areas of study and an asset to their work in government, entrepreneurship and business, law, technology and engineering firms, media, public health, health policy, and health professions, non-profit organizations, entertainment and creative arts, and education.

Curriculum

The minimum requirement for the minor in French and Francophone Studies, German Studies or Hispanic Studies is 54 units (not including any 100- or 200-level prerequisite work in the chosen language), as outlined below. The minimum requirement for the minor in Chinese Studies, Japanese Studies or Russian Studies is 54-60 units, depending on the student's language background.

Language-specific faculty advisors for these specializations are:

Chinese Studies-Dr. Gang Liu, Assistant Teaching Professor of Chinese Studies, Dr. Sue-mei Wu, Teaching Professor of Chinese Studies, and Tianxue Yao, Lecturer of Chinese Studies

French & Francophone Studies- Dr. Bonnie Youngs, Teaching Professor of French & Francophone Studies

German Studies-Dr. Gabriele Eichmanns Maier, Associate Teaching Professor of German Studies

Hispanic Studies-Dr. Felipe Gómez, Associate Teaching Professor of Hispanic Studies and Dr. María del Mar Rosa Rodríguez, Assistant Professor of Hispanic Studies

Japanese Studies- Dr. Yasufumi Iwasaki, Associate Teaching Professor of Japanese and Dr. Yoshihiro Yasuhara, Assistant Teaching Professor of Japanese Studies

Russian Studies-Dr. Charlene Castellano, Teaching Professor of Russian

The Minor in Chinese Studies 57-60 units

Faculty Advisors

Dr. Gang Liu, Assistant Teaching Professor of Chinese Studies (gangliu@andrew.cmu.edu)

Dr. Sue-mei Wu, Teaching Professor of Chinese Studies (suemei@andrew.cmu.edu)

Tianxue Yao, Lecturer of Chinese Studies (tyao@andrew.cmu.edu)

Prerequisites

Intermediate-level proficiency in the Chinese language. This is equivalent to the completion of three courses (two at the 100-level and one at the 200-level), or placement or exemption based on Advanced Placement, International Baccalaureate or CMU internal placement test scores. In all cases, progress will be accelerated by study abroad, which is highly recommended for all minors. (Study abroad advisor - Dr. Yueming Yu, yyu@andrew.cmu.edu).

Students may double count a maximum of one course taken for the Chinese Studies minor that is also being used to fulfill the requirements of other majors, minors, and programs.

Students with native or near-native proficiency in listening and speaking of the language prior to entering CMU should consult with the minor advisors for a different curriculum that may accelerate their completion of the requirement.

1. Core Courses in Chinese Studies 36-39 units

Complete four courses.

82-232	Intermediate Chinese II (may be substituted by 82-235 Intermediate Chinese for Heritage Students)	12
82-235	Intermediate Chinese for Heritage Students *	12
82-331	Advanced Chinese I	9
82-332	Advanced Chinese II	9
82-333	Introduction to Chinese Language and Culture **	Var.

*Students who place out of 82-232/82-235 must take a minimum of 9 additional units chosen from List A Electives.

**Students must take this course for 12 units with the additional work in Chinese to fulfill the requirement. Students who take this course for 9 units prior to declaring their minor must register for 3 units of independent study later in their studies.

2. Chinese Studies and Interdisciplinary Electives 18 units

List A. Chinese Studies Electives

Complete two courses (18 units) from List A or one course (9 units) from List A and one (9 units) from List B.

82-334	Structure of Chinese	9
82-335	Readings in Chinese	9
82-337	Mandarin Chinese for Oral Communication I	9
82-338	Mandarin Chinese for Oral Communication II	9
82-339	Business Language & Culture in China I	9
82-340	Business Language & Culture in China II	9
82-432	Popular Culture in China	9
82-433	Topics in Contemporary Culture of China *	9
82-440	Studies in Chinese Literature & Culture *	9
82-432	Popular Culture in China	9
82-433	Topics in Contemporary Culture of China *	9
82-434	Studies in Chinese Traditions *	9
82-436	Introduction to Classical Chinese *	9
82-439	Modern China Through Literature *	9
82-440	Studies in Chinese Literature & Culture *	9
82-505	Undergraduate Internship	Var.
82-531/532	Special Topics in Chinese Studies *	Var.

*Students may repeat these courses with new topics.

List B. Interdisciplinary Electives

This list is compiled from possibilities such as but not limited to the following. Students should consult OLR and their minor advisor for the most up to date interdisciplinary electives appropriate for the Chinese Studies curriculum. Courses may be suggested to the minor advisor for approval as a substitute. Note that not all courses are offered each semester.

Architecture		Units
48-351	Human Factors in Architecture	9
48-551	Ethics and Decision Making in Architecture	9
Art		Units
60-373	Aesthetics from a Global Viewpoint	9
60-399	Art History/Theory Independent Study	9
Business Administration		Units
70-342	Managing Across Cultures	9
70-365	International Trade and International Law	9
70-430	International Management	9
English		Units
76-318	Communicating in the Global Marketplace	9
76-339	Topics in Film Studies	9
76-386	Language & Culture	9
76-387	Narrative & Argument	9
History		Units
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-309	20th Century China Through Film	9
Modern Languages		Units
82-230	Topics in Cultural Comparison	9
82-234	Topics in Chinese History	9
82-237	Topics in Traditional China	9
82-238	Topics in Chinese Culture	9
82-280	Learning About Language Learning	9
82-281	Tutoring for Community Outreach	Var.
82-282	Community Service Learning	Var.

88-384	Conflict and Conflict Resolution in International Relations	9
88-391	Technology and Economic Growth	9
88-410	The Global Economy: A User's Guide	9
88-411	Rise of the Asian Economies	9
88-415	Global Competitiveness: Firms Nations, and Technological Change	9

The Minor in French and Francophone Studies 54 units

Faculty Advisor

Dr. Bonnie Youngs, Teaching Professor of French and Francophone Studies (byoungs@cmu.edu)

Prerequisites

Intermediate-level proficiency in French. This is equivalent to the completion of four courses (two at the 100-level and two at the 200-level) or exemption based on Advanced Placement, International Baccalaureate or Carnegie Mellon internal placement test scores. In all cases, progress will be accelerated by study abroad, which is highly recommended for all minors. (Study abroad advisor - Dr. Michael West, mjwest@andrew.cmu.edu (eichgabi@andrew.cmu.edu))

Students may double count a maximum of one course taken for the French & Francophone Studies minor that is also being used to fulfill the requirements of other majors, minors, and programs.

1. Core Courses in French and Francophone Studies 27 units

Complete three courses.

82-303	Introduction to French Culture	9
82-304	The Francophone World	9
82-305	French in its Social Contexts	9

2. French and Francophone Studies and Interdisciplinary Electives 27 units

Complete three courses (27 units) from List A, or two courses (18 units) from List A and one (9 units) from List B.

List A. French Electives

82-404	Francophone Realities *	Units 9
82-415/416	Topics in French and Francophone Studies *	9
82-501/502	Special Topics: French and Francophone Studies	Var.
82-505	Undergraduate Internship	Var.

* Students may repeat these courses with new topics.

List B. Interdisciplinary Electives

This list is compiled from possibilities such as but not limited to the following. Students should consult OLR and their minor advisor for the most up to date interdisciplinary electives appropriate for the French & Francophone Studies curriculum. Courses may be suggested to the minor advisor for approval as a substitute. Note that not all courses are offered each semester.

Architecture		Units
48-338	European Cities in the XIX Century: Planning, Architecture, Preservation	9
48-340	Modern Architecture and Theory 1900-1945	9
48-341	Expression in Architecture	9
48-448	History of Sustainable Architecture	9
English		Units
76-239	Introduction to Film Studies	9
76-318	Communicating in the Global Marketplace	9
76-385	Introduction to Discourse Analysis	9
76-386	Language & Culture	9
76-387	Narrative & Argument	9
History		Units
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-205	20th Century Europe	9

85-375	Crosscultural Psychology	9
85-421	Language and Thought	9
Social and Decision Sciences		Units
88-384	Conflict and Conflict Resolution in International Relations	9
88-391	Technology and Economic Growth	9
88-415	Global Competitiveness: Firms Nations, and Technological Change	9
88-419	Negotiation	9

The Minor in German Studies 54 units

Faculty Advisor

Dr. Gabriele Eichmanns Maier, Associate Teaching Professor of German Studies
(eichgabi@andrew.cmu.edu)

Prerequisites

Intermediate-level proficiency in German. This is equivalent to the completion of four courses (two at the 100-level and two at the 200-level) or exemption based on Advanced Placement, International Baccalaureate or Carnegie Mellon internal placement test scores. In all cases, progress will be accelerated by study abroad, which is highly recommended for all minors. (Study abroad advisor - Dr. Gabriele Eichmanns Maier, eichgabi@andrew.cmu.edu)

Students may double count a maximum of one course taken for the German Studies minor that is also being used to fulfill the requirements of other majors, minors, and programs.

1. Core Courses in German Studies 27 units

Complete three courses.*

		Units
82-320	Contemporary Society in Germany, Austria and Switzerland	9
82-323	Germany, Austria and Switzerland in the 20th Century	9
82-327	The Emergence of the German Speaking World	9

* A 400-level course may be substituted with the minor advisor's approval.

2. German Studies & Interdisciplinary Electives 27 units

Complete three courses (27 units) from List A or two courses (18 units) from List A and one (9 units) from List B.

List A. German Studies Electives

		Units
82-420	German Classical Literature	9
82-421	German Literature of the Nineteenth Century	9
82-422	German Literature of the Early Twentieth Century	9
82-425/426	Topics in German Literature and Culture *	9
82-427	Nazi and Resistance Culture	9
82-428	History of German Film	9
82-521/522	Special Topics: German Studies *	Var.

*Students may repeat these courses with new topics.

List B. Interdisciplinary Electives

This list is compiled from possibilities such as but not limited to the following. Students should consult OLR and their minor advisor for the most

up to date interdisciplinary electives appropriate for the German Studies curriculum. Courses may be suggested to the minor advisor for approval as a substitute. Note that not all courses are offered each semester.

Architecture		Units
48-338	European Cities in the XIX Century: Planning, Architecture, Preservation	9
48-340	Modern Architecture and Theory 1900-1945	9
48-350	Postwar Modern Architecture and Theory	9
English		Units
76-239	Introduction to Film Studies	9
76-386	Language & Culture	9
76-387	Narrative & Argument	9
76-483	Corpus Analysis in Rhetoric	9
History		Units
79-205	20th Century Europe	9
79-257	Germany and the Second World War	9

54 units The Minor in Hispanic Studies

The Minor in Hispanic Studies 54 units

Faculty Advisors

Dr. Felipe Gómez, Associate Teaching Professor of Hispanic Studies
(fgomez@andrew.cmu.edu)

Dr. María del Mar Rosa Rodríguez, Assistant Professor of Hispanic Studies
(mrosarod@andrew.cmu.edu)

Prerequisites

Intermediate-level proficiency in Spanish. This is equivalent to the completion of four courses (two at the 100-level and two at the 200-level) or exemption based on Advanced Placement, International Baccalaureate or Carnegie Mellon internal placement test scores. In all cases, progress will be accelerated by study abroad, which is highly recommended for all minors. (Study abroad advisor - Dr. Therese Tardio, tardio@andrew.cmu.edu)

Students may double count a maximum of one course taken for the Hispanic Studies minor that is also being used to fulfill the requirements of other majors, minors, and programs.

1. Core Courses in Hispanic Studies 27 units

Complete two courses.

	Units
82-342 Spain: Language and Culture	9
82-343 Latin America: Language and Culture	9
82-344 U.S. Latinos: Language and Culture	9

Complete the following course.

	Units
82-345 Introduction to Hispanic Literary and Cultural Studies	9

2. Hispanic Studies and Interdisciplinary Electives 27 units

Complete three courses (27 units) from List A or two courses (18 units) from List A and one (9 units) from List B.

List A: Hispanic Studies Electives

	Units
82-441 Studies in Peninsular Literature and Culture *	9
82-442 Analysis of Spoken Spanish	9
82-443 Spanish Reading and Translation Workshop	9
82-444 The Structure of Spanish	9
82-451 Studies in Latin American Literature and Culture	9
82-455/456 Topics in Hispanic Studies *	9
82-505 Undergraduate Internship	Var.
82-541/542 Special Topics: Hispanic Studies *	Var.

* Students may repeat these courses with new topics.

List B. Interdisciplinary Electives

This list is compiled from possibilities such as but not limited to the following. Students should consult OLR and their minor advisor for the most up to date interdisciplinary electives appropriate for the Hispanic Studies curriculum. Courses may be suggested to the minor advisor for approval as a substitute. Note that not all courses are offered each semester.

The Minor in Japanese Studies 54–57 units

Faculty Advisors

Dr. Yasufumi Iwasaki, Associate Teaching Professor of Japanese (yiwasaki@andrew.cmu.edu)

Dr. Yoshihiro Yasuhara, Associate Teaching Professor of Japanese Studies (yyashuar@andrew.cmu.edu)

Prerequisites

Intermediate-level of proficiency in the Japanese language. This is equivalent to the completion of three courses (two at the 100-level and one at the 200-level), or placement or exemption based on Advanced Placement, Cambridge GCE Advanced level, International Baccalaureate or CMU internal placement test scores. In all cases, progress will be accelerated by study abroad, which is highly recommended for all minors. (Study abroad advisor - Dr. Yasufumi Iwasaki, yiwasaki@andrew.cmu.edu)

Students may double count a maximum of one course taken for the Japanese Studies minor that is also being used to fulfill the requirements of other majors, minors, and programs.

1. Core Courses in Japanese Studies 27–39 units*

Complete four courses.

82-272 Intermediate Japanese II *	12
82-273 Introduction to Japanese Language and Culture	9
82-371 Advanced Japanese I	9
82-372 Advanced Japanese II	9

*Students who place out of 82-272 must take 9 units chosen from the List A electives.

2. Japanese Studies and Interdisciplinary Electives 18 units

Complete two courses (18 units) from List A, or one course (9 units) from List A and one (9 units) from List B.

List A. Japanese Studies Electives

82-373 Structure of the Japanese Language	9
82-374 Technical Japanese	9
82-473/474 Topics in Japanese Studies *	9
82-476 Japanese Discourse Analysis	9
82-505 Undergraduate Internship	Var.
82-571/572 Special Topics: Japanese Studies *	Var.

*Students may repeat these courses with new topics.

List B. Interdisciplinary Electives

This list is compiled from possibilities such as but not limited to the following. Students should consult OLR and their minor advisor for the most up to date interdisciplinary electives appropriate for the Japanese Studies curriculum. Courses may be suggested to the minor advisor for approval as a substitute. Note that not all courses are offered each semester.

English	
76-239 Introduction to Film Studies	9
76-386 Language & Culture	9
76-387 Narrative & Argument	9
History	

79-211	East Asia in the World, 1600-Present	9
79-261	Chinese Culture and Society	9
79-262	Modern China	9
79-275	Introduction to Global Studies	9
Modern Languages		
82-234	Topics in Chinese History	9
82-278	Japanese Film and Literature: The Art of Storytelling	9
82-280	Learning About Language Learning	9
82-281	Tutoring for Community Outreach	Var.
82-282	Community Service Learning	Var.
82-283	Language, Diversity, & Cultural Identity	9
82-358	Literacies Across Language and Culture	9
82-373	Structure of the Japanese Language	9
82-374	Technical Japanese	9
82-383	Second Language Acquisition: Theories and Research	9
82-388	Understanding Second Language Fluency	9
82-480	Social and Cognitive Aspects of Bilingualism	9
Music		
57-306	World Music	6
Philosophy		
80-180	Nature of Language	9
80-280	Linguistic Analysis	9
80-380	Philosophy of Language	9
Psychology		
85-375	Crosscultural Psychology	9
85-421	Language and Thought	9
Social and Decision Sciences		
88-384	Conflict and Conflict Resolution in International Relations	9

The Minor in Russian Studies 54 units

Faculty Advisor

Dr. Charlene Castellano, Teaching Professor of Russian
(cc62@andrew.cmu.edu)

The minor in Russian Studies is jointly administered by the Departments of History and Modern Languages. Students are required to fulfill requirements in history and in language and culture.

Prerequisites

Elementary-level proficiency in the Russian language. This is equivalent to the completion of two courses at the 100-level, or placement or exemption based on Advanced Placement, International Baccalaureate or CMU internal placement test scores. Carnegie Mellon students who arrive with previous language study and/or who have high AP or CEEB scores will be able to begin taking courses toward the minor earlier in their undergraduate program. In all cases, progress will be accelerated by study abroad, which is highly recommended for all minors. (Study abroad advisor - Dr. Charlene Castellano, cc62@andrew.cmu.edu)

Students may double count a maximum of one course taken for the Russian Studies minor that is also being used to fulfill the requirements of other majors, minors, and programs.

1. Required Course in History	9 units
Complete one course. *	Units
79-265 Russian History: From the First to the Last Tsar	9
79-266 Russian History: From Communism to Capitalism	9
* Both courses are recommended.	
2. Required Electives in History	18 units
In consultation with the minor advisor, students may choose a substitute.	Units
79-267 The Soviet Union in World War II: Military, Political, and Social History	9

79-341 The Cold War in Documents and Film	9
---	---

3. Core Courses in Modern Languages 18 units

Complete both courses.	Units
82-291 Intermediate Russian I	9
82-292 Intermediate Russian II	9

Should a student enter the Russian Studies program with demonstrated language proficiency at the intermediate or advanced level, higher level courses will be used to complete the required total of 18 units of core courses in Modern Languages. Advanced language options include *Special Topics: Russian*, a repeatable course, as well as subject-oriented language supplements to existing courses taught in English in a variety of fields. The student can add a language supplement (3 units) to selected 9-unit electives, earning a total of 12 units for the language-supplemented course.

4. Interdisciplinary Electives 18 units

Complete two courses. This list is compiled from possibilities such as but not limited to the following. Students should consult their minor advisor for the most up to date interdisciplinary electives appropriate for the Russian Studies curriculum. Courses may be suggested to the minor advisor for approval as a substitute. Note that not all courses are offered each semester.

History	Units
79-205 20th Century Europe	9
79-231 American Foreign Policy: 1945-Present	9
79-265 Russian History: From the First to the Last Tsar	9
79-266 Russian History: From Communism to Capitalism	9
79-267 The Soviet Union in World War II: Military, Political, and Social History	9
79-341 The Cold War in Documents and Film	9

Modern Languages	Units
82-283 Language, Diversity, & Cultural Identity	9
82-294 Topics in Russian Language and Culture *	Var.
82-296 A Century of Russian Film	9
82-396 The Faust Legend at Home and Abroad	Var.
82-397 Russia's Demons	Var.
82-399 Special Topics: Russian in Context *	Var.
82-400 Russian Studies Topics (section A and/or B)	6
82-491 Topics in Twentieth-Century Russian Literature	9
82-492 The Historical Imagination in Nineteenth-Century Russian Literature	Var.

* Students may repeat these course with new topics.

Study Abroad

A semester or year of study abroad is strongly recommended. Consult with your advisor and the Office of International Education (OIE) about possible options. Students are encouraged to spend a semester or summer in Russia via an approved exchange program. Many exchange programs offer instruction in Russian language, history, literature, and culture, in internationally recognized universities. They also offer travel to ancient sites and cities, visits to museums, palaces, exhibitions, and monuments, and the opportunity to live with a Russian host family. Scholarship opportunities are available.

Faculty

MARIANA ACHUGAR, Associate Professor of Hispanic Studies & Second Language Acquisition - Ph.D., University of California at Davis; Carnegie Mellon, 2003-.

STEPHEN BROCKMANN, Professor of German with courtesy appointments in English and History - Ph.D., University of Wisconsin Madison; Carnegie Mellon, 1993-.

CHARLENE CASTELLANO, Teaching Professor of Russian with a courtesy appointment in English - Ph.D., Cornell University; Carnegie Mellon, 1990-.

ERIK HELIN, Special Lecturer, Carnegie Mellon - Qatar - MA, Eastern Michigan; Carnegie Mellon, 2006-.

ZEINAB IBRAHIM, Associate Teaching Professor, Carnegie Mellon - Qatar - Ph.D., Georgetown University; Carnegie Mellon, 2009-.

KENYA C. DWORKIN Y MENDEZ, Associate Professor of Hispanic Studies with courtesy appointments in English and History – Ph.D., University of California, Berkeley; Carnegie Mellon, 1993–.

GABRIELE EICHMANNS-MAIER, Associate Teaching Professor of German – Ph.D., University of Washington; Carnegie Mellon, 2008–.

BARBARA FREED, Professor Emeritus of French & Francophone Studies and Second Language Acquisition – Ph.D., University of Pennsylvania; Carnegie Mellon, 1990–.

FELIPE GOMEZ, Associate Teaching Professor of Hispanic Studies – Ph.D., University of Illinois at Urbana-Champaign; Carnegie Mellon, 2006–.

CHRISTIAN HALLSTEIN, Teaching Professor of German – Ph.D., Pennsylvania State University; Carnegie Mellon, 1979–.

PAUL HOPPER, Paul Mellon Distinguished Professor Emeritus of the Humanities, Rhetoric and Linguistics with a courtesy appointment in Modern Languages – Ph.D., University of Texas; Carnegie Mellon, 1990–.

YASUFUMI IWASAKI, Associate Teaching Professor of Japanese – Ph.D., University of Illinois; Carnegie Mellon, 2005–.

BARBARA JOHNSTONE, Professor Emeritus of Rhetoric and Linguistics with a courtesy appointment in Modern Languages – Ph.D., University of Michigan; Carnegie Mellon, 1997–.

CHRISTOPHER M. JONES, Teaching Professor of French & Francophone Studies and Director of Modern Language Resource Center – Ph.D., University of Massachusetts, Amherst; Carnegie Mellon, 1993–.

ELISABETH KASKE, Associate Professor of Chinese Studies – Ph.D., Heidelberg University; Carnegie Mellon, 2010–.

KEIKO KODA, Professor of Japanese and Second Language Acquisition and Director of Graduate Studies – Ph.D., University of Illinois at Urbana-Champaign; Carnegie Mellon, 1995–.

GANG LIU, Assistant Teaching Professor of Chinese Studies – Ph.D., University of Michigan; Carnegie Mellon, 2010–.

BRIAN MACWHINNEY, Professor of Psychology with a courtesy appointment in Modern Languages – Ph.D., University of California, Berkeley; Carnegie Mellon, 1981–.

MAME NIANG-MEUNIER, Assistant Professor of French & Francophone Studies – Ph.D., Louisiana State University; Carnegie Mellon, 2012–.

SUSAN G. POLANSKY, Teaching Professor of Hispanic Studies and Head of Modern Languages – Ph.D., Boston College; Carnegie Mellon, 1986–.

GIOVANNI PUPPO, Instructor of Italian – Ph.D., University of Rome; Carnegie Mellon, 1975–.

MARIA DEL MAR ROSA-RODRIGUEZ, Assistant Professor of Hispanic Studies – Ph.D., Emory University; Carnegie Mellon, 2009–.

JURIS SILENIEKS, Professor Emeritus of French – Ph.D., University of Nebraska; Carnegie Mellon, 1960–.

CANDACE SKIBBA, Assistant Teaching Professor of Hispanic Studies – Ph.D., University of Wisconsin-Madison; Carnegie Mellon, 2006–.

DONALD SUTTON, Professor Emeritus of History with a courtesy appointment in Modern Languages – Ph.D., Cambridge University; Carnegie Mellon, 1969–.

NAOKO TAGUCHI, Associate Professor of Japanese and Second Language Acquisition – Ph.D., Northern Arizona University; Carnegie Mellon, 2005–.

THERESE TARDIO, Associate Teaching Professor of Hispanic Studies – Ph.D., University of Pittsburgh; Carnegie Mellon, 2001–.

G. RICHARD TUCKER, Paul Mellon University Professor Emeritus of Applied Linguistics with a courtesy appointment in Psychology – Ph.D., McGill University; Carnegie Mellon, 1992–.

JAN VAIRO, Senior Lecturer – M.A., University of Pittsburgh; Carnegie Mellon, 1992–.

REMI (ADAM) VAN COMPERNOLLE, Assistant Professor of French & Francophone Studies & Second Language Acquisition – Ph.D., Penn State; Carnegie Mellon, 2012–.

MICHAEL J. WEST, Teaching Professor of French & Francophone Studies – Ph.D., University of California-Santa Barbara; Carnegie Mellon, 1989–.

DANIELLE WETZEL, Teaching Professor and Director of First Year Writing with a courtesy appointment in Modern Languages – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2006–.

SETH WIENER, Assistant Professor of Second Language Acquisition and Chinese – Ph.D., Ohio State University; Carnegie Mellon, 2015–.

SUE-MEI WU, Teaching Professor of Chinese Studies – Ph.D., Ohio State University; Carnegie Mellon, 2000–.

TIANXUE YAO, Senior Lecturer – M.A., Carnegie Mellon University, M.A., JiLin University; Carnegie Mellon, 1996–.

YOSHIHIRO YASUHARA, Associate Teaching Professor of Japanese Studies – Ph.D., Pennsylvania State University; Carnegie Mellon, 2010–.

BONNIE L. YOUNGS, Teaching Professor of French & Francophone Studies and Director of Undergraduate Studies – Ph.D., University of Pennsylvania; Carnegie Mellon, 1993–.

YUEMING YU, Teaching Professor of Chinese Studies – Ed.D., University of Pittsburgh; Carnegie Mellon, 1992–.

Department of Philosophy

David Danks, Department Head
Office: Baker Hall 161
<http://www.hss.cmu.edu/philosophy/index.php>

The Department of Philosophy was founded in 1985 and reflects the tradition of philosophy as a central discipline in the humanities. The department has achieved an international reputation through the acclaimed research of its members and its innovative educational programs, not only in traditional topics such as ethics, philosophy of mind, logic, and theory of knowledge, but in such contemporary and applied areas as automated theorem proving, machine learning, the foundations of statistics, causal discovery, forward learning theory, game and decision theory, conflict resolution, and business ethics.

Philosophy thrives through contact with other disciplines. Interdisciplinary work, a traditional strength of the Carnegie Mellon community, is vital to the department and is reflected in the courses we offer, many of which incorporate substantive material from a range of other disciplines. Some courses are actually team-taught with professors from other departments and schools around the university.

Our programs are designed to develop our students' analytical sophistication and their practical and theoretical skills in specializations outside the department (see the sample curricula below). The department welcomes and, indeed, encourages minors and additional majors from other disciplines who are interested in reflecting on the foundation of their own subjects. The department offers two different undergraduate major programs, and jointly sponsors two interdepartmental majors: Ethics, History, and Public Policy (with the Department of History), and Linguistics (with English, Modern Languages, and Psychology):

- the B.A. or B.S. in Ethics, History, and Public Policy (interdisciplinary major with Department of History)
- the B.S. in Logic and Computation
- the B.A. in Philosophy
- the B.A. in Linguistics (interdisciplinary major with Departments of English, Modern Languages, and Psychology)

The major in Logic and Computation is perhaps the most non-traditional of the department's majors. It offers students a firm background in computer science, together with a solid grounding in logic, philosophy, and mathematics. This reflects the department's commitment to the use of formal, analytic methods in addressing philosophical issues. A flexible system of electives allows students to focus their efforts in any of a wide range of disciplines, from engineering to the fine arts. As a capstone to the program, students engage in original research in their senior year, and write a thesis under the direction of an advisor.

The department also sponsors four minor programs:

- the minor in Ethics
- the minor in Linguistics
- the minor in Logic and Computation
- the minor in Philosophy

Finally, the department offers two master's programs directly extending the departmental majors. Both programs are coordinated with and build on the undergraduate programs, so that majors can complete the requirements for the master's degree in one additional year:

- the M.S. in Logic and Computation
- the M.A. in Philosophy

Students who choose the appropriate specialized track in the Logic and Computation major (namely, sample 2 of the Curricula listed below) can be admitted to the M.S. program in Language and Information Technology offered by the School of Computer Science. To complete the discussion of departmental programs, it should be mentioned that the department sponsors as part of the Program in Pure and Applied Logic (offered jointly with the Departments of Computer Science and Mathematics) a Ph.D. in Logic, Computation, and Methodology.

The Major in Ethics, History, and Public Policy

Alex John London, Director
Office: Baker Hall 150A
Email: ajlondon@andrew.cmu.edu

<http://www.cmu.edu/hss/ehpp/>

The B.A./B.S. in Ethics, History, and Public Policy is an interdepartmental major offered jointly by the Departments of History and Philosophy. It prepares students for leadership positions by providing them with a rigorous, interdisciplinary humanistic and social-scientific education. It also serves as an excellent springboard for graduate study in a wide variety of disciplines such as law, public policy, ethics, and advocacy. The program focuses equally on the historical understanding of how modern-day problems have evolved, and the importance of developing clear criteria for ethical decision-making. The capstone project course provides students with the opportunity to engage with real-world public policy challenges using the methods, theories, and knowledge that they have gained through the major. Offered jointly by the departments of History and Philosophy, the B.A./B.S. in EHPP encourages specialization, internship experiences, and research in a wide range of policy areas.

Curriculum

Students graduating with a primary major in Ethics, History, and Public Policy may elect to receive either a Bachelor of Arts or a Bachelor of Science Degree (additional requirements apply; see below). Basic requirements include 120 units encompassing 9 units in Economics, 36 units in History, 36 units in Philosophy, 27 units of elective courses, and a 12-unit senior capstone course. This program may also be taken as an additional (e.g., second) major.

I. Economics Requirement 9 units

Choose one of the following:

73-100	Principles of Economics	9
88-220	Policy Analysis I	9

3

II. History Core 36 units

Choose one 9-unit course from each category below:

Policy History (9 units)

79-300	History of American Public Policy	9
--------	-----------------------------------	---

U.S. History (9 units)

79-240	The Development of American Culture	9
79-249	20th Century U.S. History	9

Non-U.S. History (9 units)

79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-222	Between Revolutions: The Development of Modern Latin America	9
79-223	Mexico: From the Aztec Empire to the Drug War	9
79-226	African History: Earliest Times to 1780	9
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-237	Comparative Slavery	9
79-251	India/America: Democracy, Diversity, Development	9
79-261	Chinese Culture and Society	9

79-262	Modern China	9
79-264	Tibet in History and Imagination	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-307	Religion and Politics in the Middle East	9

Historical Methods and Approaches (9 units)

79-200	Introduction to Historical Research	9
--------	-------------------------------------	---

III. Philosophy Core 36 units

Choose one 9-unit course from each category below. No more than 18 units at the 100 level may be counted toward this requirement.

Ethics (9 units)

80-130	Introduction to Ethics	9
80-230	Ethical Theory	9

Political Philosophy (9 units)

80-135	Introduction to Political Philosophy	9
80-235	Political Philosophy	9

Foundations of Social Science (9 units)

80-221	Philosophy of Social Science	9
80-321	Causation, Law, and Social Policy	9
80-324	Philosophy of Economics	9
80-337	Philosophy, Politics & Economics	9

Applied Philosophy (9 units)

80-136	Social Structure, Public Policy & Ethics	9
80-244	Environmental Ethics	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
80-335	Deliberative Democracy: Theory and Practice	9
80-348	Health Development and Human Rights	9
80-447	Global Justice	9

IV. Senior Capstone Project Course 12 units

79-449	EHPP Project Course [cross-listed]	12
80-449	EHPP Project Course	12

The Ethics, History and Public Policy Project Course is required for the Ethics, History and Public Policy major and is taken in the fall semester of the senior year. In this capstone course, Ethics, History and Public Policy majors carry out a collaborative research project that examines a compelling current policy issue that can be illuminated with historical research and philosophical and policy analysis. The students develop an original research report based on both archival and contemporary policy analysis and they present their results to a client organization in the community.

V. Elective Courses 27 units

Choose any three courses from any category or categories shown below.

Engineering and Public Policy (some courses have prerequisites; see EPP catalog listing)

19-424	Energy and the Environment	9
19-426	Environmental Decision Making	9
19-448	Science, Technology & Ethics	9

Business

70-311	Organizational Behavior	9
70-321	Negotiation and Conflict Resolution	9
70-332	Business, Society and Ethics	9
70-364	Business Law	9
70-365	International Trade and International Law	9
70-430	International Management	9

Economics (some courses have prerequisites; see Economics catalog listing)

73-148	Environmental Economics	9
73-310	Evolution of Economic Ideas and Analysis	9
73-352	Public Economics	9

73-358	Economics of the Environment and Natural Resources	9
73-359	Benefit-Cost Analysis	9
73-365	Firms, Market Structures, and Strategy	9
73-372	International Money and Finance	9
73-375	History of Money and Monetary Policy	9
73-408	Law and Economics	9
73-476	American Economic History	9

English

76-492	Rhetoric of Public Policy	9
--------	---------------------------	---

History

Courses from the EHPP History Core (above) may be taken as electives only if they are not being used to fulfill the core requirement. Double counting is not permitted.

79-217	The War in Vietnam	9
79-221	Development and Democracy in Latin America	9
79-231	American Foreign Policy: 1945-Present	9
79-233	The United States and the Middle East since 1945	9
79-242	African American History: Reconstruction to the Present	9
79-253	American Massacres in History and Memory	6
79-267	The Soviet Union in World War II: Military, Political, and Social History	9
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9
79-296	Perspectives on Social Protest	9
79-298	Mobile Phones & Social Media in Development & Human Rights: A Critical Appraisal	6
79-299	Trafficking Persons: Children in a Global Context	9
79-301	History of Surveillance: From the Plantation to Edward Snowden	6
79-302	Drone Warfare: Ethics, Law, Politics, History, and Strategy	6
79-303	Pittsburgh and the Transformation of Modern Urban America	6
79-305	Moneyball Nation: Data in American Life	9
79-310	From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present	9
79-312	International Human Rights Institutions in Theory and Practice	6
79-320	Women, Politics, and Protest	9
79-325	U.S. Gay and Lesbian History	6
79-331	Body Politics: Women and Health in America	9
79-338	History of Education in America	9
79-339	Juvenile Delinquency and Film (1920 to "The Wire")	9
79-340	Juvenile Delinquency and Juvenile Justice	9
79-342	Introduction to Science and Technology Studies	9
79-349	The Holocaust in Historical Perspective	9
79-355	Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective	9
79-359	Terrorism and U.S. National Security	6
79-371	African American Urban History	9
79-374	American Environmental History: Critical Issues	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9
79-383	Epidemics, Disease, and Public Health	9
79-384	Garbage Gone Global: Managing Waste in an Age of Mass Consumption	9
79-389	Stalin and Stalinism	9

Philosophy

Courses from the EHPP Philosophy Core (above) may be taken as electives only if they are not being used to fulfill the core requirement. Double counting is not permitted.

80-256	Modern Moral Philosophy	9
80-305	Rational Choice	9
80-405	Game Theory	9

84-310	International Political Economy and Organizations	9
84-380	Grand Strategy in the United States	9
84-393	Legislative Decision Making: U.S. Congress	9
84-402	Judicial Politics and Behavior	9

Social and Decision Sciences

88-223	Decision Analysis and Decision Support Systems	9
88-281	Topics in Law: 1st Amendment	9
88-343	Economics of Technological Change	9
88-345	Perspectives on Industrial Research and Development	9
88-347	Complex Technological Systems: Past, Present, and Future	9
88-371	Entrepreneurship, Regulation and Technological Change	9
88-387	Social Norms and Economics	9
88-423	Institutions, Entrepreneurship, and Innovation	9
88-444	Public Policy and Regulation	9

VI. Bachelor of Science Option

Students may elect to earn a Bachelor of Science rather than a Bachelor of Arts degree by completing two courses from the list below, or by petitioning the Director of EHPP to accept equivalent courses as substitutions.

21-257	Models and Methods for Optimization	9
36-202	Statistical Methods	9
or 36-208	Regression Analysis	
36-207	Probability and Statistics for Business Applications	9
36-303	Sampling, Survey and Society	9
36-309	Experimental Design for Behavioral and Social Sciences	9
80-305	Rational Choice	9
88-251	Empirical Research Methods	9

Additional Major

The B.A./B.S. in Ethics, History, and Public Policy may be scheduled as an additional major in consultation with the Director of Ethics, History, and Public Policy, Professor Alex John London, ajlondon@andrew.cmu.edu.

Ethics, History, and Public Policy Sample Curriculum

Junior Year		Senior Year	
Fall	Spring	Fall	Spring
Core requirement in Economics	Core requirement in History or Philosophy	Capstone Course	EHPP Elective Course
Core requirement in History or Philosophy	Core requirement in History or Philosophy	EHPP Elective Course	Second Course (open)
Core requirement in History or Philosophy	Core requirement in History or Philosophy	EHPP Elective Course	Third Course (open)
Core requirement in History or Philosophy	Core requirement in History or Philosophy	Fourth Course (open)	Fourth Course (open)
Core requirement in History or Philosophy	Fifth Course (open)	Fifth Course (open)	Fifth Course (open)

The above sample program is presented as a two-year (junior-senior year) plan for completing EHPP major requirements. Its purpose is to show that this program can be completed in as few as two years; not that it must be. Students may enter the EHPP major, and begin major course requirements, as early as the start of the sophomore year, or even in the first year. Students should consult their advisor when planning their program.

The Major in Linguistics

Tom Werner, Director
Office: Baker Hall 155F
Email: twerner@andrew.cmu.edu

Linguistics is the study of human language, and it encompasses a broad spectrum of research questions, approaches and methodologies. Some linguists are concerned with the cognitive aspects of language learning, production and comprehension; some are concerned with language as a social and cultural phenomenon; others engage in the analysis of linguistic form and meaning, some from a functional and others from a formal perspective. There are also computational approaches to linguistics with both applied and theoretical goals.

The major in Linguistics reflects the multidisciplinary character of the field and of the Linguistics faculty here at Carnegie Mellon, offering a program which provides students with the fundamental tools of linguistic analysis while maintaining a focus on the human context in which language is learned and used. The major is available as either a primary major or an additional major. It is an ideal choice for students with a general interest in their own or other languages, and combines well thematically with studies in any of the departments represented in the major.

Curriculum

The Linguistics major requires a total of 12 courses, which includes 2 semesters of language study. In addition, primary majors in Linguistics are required to write a Senior Thesis in their final year. At least three courses (not including specific language courses) must be at the 300-level or higher. All courses counted towards the major must be taken for a letter grade and passed with a grade of "C" or above. For Dietrich College students, up to 2 of these courses may be counted also as satisfying the college's general education requirements (as long as the double-counting maximum established by the college is not exceeded), with permission of the major director. Students from other colleges may fulfill their Humanities requirements using courses taken towards the Linguistics Major. However, no courses may be counted simultaneously towards the Linguistics Major and any other major.

Introductory course

80-180	Nature of Language	9
--------	--------------------	---

Fundamental Skills

Take **one** course from **each** of the following core subject areas:

Sounds

80-282	Phonetics and Phonology I	9
--------	---------------------------	---

Structure

76-389	Rhetorical Grammar	9
80-280	Linguistic Analysis	9
80-285	Natural Language Syntax	9

Meaning

80-381	Meaning in Language	9
80-383	Language in Use	9
76-385	Introduction to Discourse Analysis	9

Breadth

Take **one** course from **each** of the following breadth subject areas:

Area 1: Language Learning and Language Cognition

76-420	Process of Reading and Writing	9
82-280	Learning About Language Learning	9
82-383	Second Language Acquisition: Theories and Research	9
82-585	Topics in Second Language Acquisition	9
85-354	Infant Language Development	9
85-421	Language and Thought	9

Area 2: Discourse, Society and Culture

76-318	Communicating in the Global Marketplace	9
76-385	Introduction to Discourse Analysis	9
76-386	Language & Culture	9
82-273	Introduction to Japanese Language and Culture	9
82-305	French in its Social Contexts	9
82-311	Arabic Language and Culture I	9

82-312	Arabic Language and Culture II	9
82-333	Introduction to Chinese Language and Culture	Var.

Electives

Take **four** additional electives. These can be **additional courses from the Fundamental Skills courses or Breadth courses listed above, or any other course which is approved** by the Director as a linguistics elective. Listed below are the additional electives taught on a regular basis. **Additional appropriate courses** are offered irregularly or on a one-off basis. The Director will provide students with a list of possible electives each semester, and will assist students in selecting electives which are consistent with their goals and interests.

76-373	Argument	9
76-378	Literacy: Educational Theory and Community Practice	9
76-451	Topics in Language Study	9
76-476	Rhetoric of Science	9
80-281	Language and Thought	9
80-283	Syntax and Discourse	9
80-284	Invented Languages	9
80-286	Words and Word Formation: Introduction to Morphology	9
80-287	Historical and Comparative Linguistics	9
80-380	Philosophy of Language	9
80-382	Phonetics and Phonology II	9
80-384	Linguistics of Turkic Languages	9
80-385	Linguistics of Germanic Languages	9
82-373	Structure of the Japanese Language	9
82-388	Understanding Second Language Fluency	9
82-442	Analysis of Spoken Spanish	9
82-444	The Structure of Spanish	9
82-476	Japanese Discourse Analysis	9
82-480	Social and Cognitive Aspects of Bilingualism	9
11-411	Natural Language Processing	12
11-716	Graduate Seminar on Dialog Processing	6
11-721	Grammars and Lexicons	12
11-722	Grammar Formalisms	12
11-761	Language and Statistics	12
11-762	Language and Statistics II	12
15-492	Special Topic: Speech Processing	12

Language Requirement

Students must successfully complete two semesters of consecutive language courses. (Note that students may not 'test out' of this requirement. However, language courses taken at other institutions or as part of a study abroad program will typically substitute for a semester of language study.)

Senior Thesis [primary majors only]

Primary majors must complete a senior thesis (a workload equivalent to a 12-unit course) during their senior year. Topics must be approved by an advisor, who will work with the student and guide the thesis project.

Notes

- Course numbers 82-305, 82-311, 32-312, 82-373, 82-442, 82-444, 82-476 are taught in the language of analysis.
- All 11-xxx and 15-xxx courses have significant Computer Science prerequisites. Interested students should check with the course instructor before registering.
- Language specific "Language and Culture" courses may be taken either as electives or towards the second breadth area. However only one such course per language area may be counted towards the major.

The Major in Logic and Computation

Joel Smith, Director
Office: Baker Hall 161C
Email: joelms@cmu.edu

The Logic and Computation curriculum takes advantage of the preparation provided by the H&SS General Education Program in mathematics,

philosophy, psychology, and statistics. It is flexible in that it permits students to focus on any of a number of areas including (but not limited to):

- computer science;
- language and information technology;
- artificial intelligence and cognitive science;
- logic and the foundations of mathematics;
- methodology and philosophy of science.

Students in the program take a common core of courses in logic, methodology, and computer science, together with an associated seminar in their senior year. The individual focus is achieved by selecting a sequence of four advanced and closely related courses. It is in this area of focus (or specialization) that students write their senior thesis under the supervision of a faculty member. A number of sample curricula are presented below.

The resulting education in logic, analytic philosophy, mathematics, statistics, and computer science enables students to pursue professional careers or graduate study. The analytic and communication skills developed in the major support a wide range of career choices, including those among the fields of technology, business, and law. Fields of graduate study for which students are well prepared include, for example, computer science, cognitive science, philosophy, logic, and linguistics.

Students who are interested in pursuing this major, or who are pursuing it already, should take note of the Cognitive Science major in the Department of Psychology. That major is so closely related that it is not difficult to pursue it as an additional major, and it provides an intellectually exciting complement.

Curriculum

Logic and Computation is a B.S. degree. In their freshman and sophomore years, students are expected to take three courses that provide preparation in computer science, mathematics, and statistics: 15-112 Fundamentals of Programming and Computer Science, 21-127 Concepts of Mathematics, 36-201 Statistical Reasoning and Practice. 80-211 Logic and Mathematical Inquiry is part of the major's Core Requirements, but should be taken no later than the spring of the sophomore year. This also applies to the computer science sequence 15-122 and 15-150.

NOTE: Students should complete the prerequisites before their junior year. It is strongly recommended that students take 80-211 Logic and Mathematical Inquiry no later than the spring of their sophomore year and, if possible, also 15-122 and 15-150/15-211. However, with suitable planning and advice from the program director, it is possible to complete the program in two years, beginning in the junior year.

The course requirements for the major consist of seven core courses (including one seminar) and four electives. The core courses provide comprehensive background in logic, computability, and analytic philosophy. 80-310 Formal Logic and 80-150 Nature of Reason must be taken no later than the fall of the junior year. Four advanced electives are chosen in the area of focus, and should support independent research towards fulfilling the senior thesis requirement. In their senior year, students present and discuss their research in 80-511 Thesis Seminar. All courses, if taken at CMU, must be taken for a letter grade and passed with a grade of "C" or above.

2

Prerequisites	29 units
15-110 Principles of Computing	10
21-127 Concepts of Mathematics	10
36-201 Statistical Reasoning and Practice	9

Logic and Computation Core	69-71 units
80-150 Nature of Reason	9
80-211 Logic and Mathematical Inquiry	9
80-310 Formal Logic	9
80-311 Undecidability and Incompleteness	9
15-122 Principles of Imperative Computation	10
15-150 Principles of Functional Programming	10
or 15-211 Fundamental Data Structures and Algorithms	
80-511 Thesis Seminar	9

Logic and Computation Electives 36 units

Bearing in mind prerequisites, Logic and Computation majors must complete four advanced courses in areas that use logical and computational

tools, such as philosophy, computer science, linguistics, mathematical logic, psychology, or statistics. The sequence of courses, mostly at the 300-level, must be selected in consultation with the program director.

Sample Curricula

Here are five samples of Logic and Computation curricula (beyond the core courses), each reflecting a different emphasis.

Sample 1.

A student interested in Computer Science might take the following courses:

80-315	Modal Logic	9
80-413	Category Theory	9
15-312	Foundations of Programming Languages	12
15-317	Constructive Logic	9

Sample 2.

A student interested in Language and Information Technology might take the following courses:

80-280	Linguistic Analysis	9
80-281	Language and Thought	9
80-381	Meaning in Language	9
80-383	Language in Use	9
80-580	Seminar on the Philosophy of Language	9

Sample 3.

A student interested in Artificial Intelligence and Cognitive Science might take the following courses:

80-314	Logic and Artificial Intelligence	9
80-315	Modal Logic	9
80-411	Proof Theory	9
85-412	Cognitive Modeling	9

Sample 4.

A student interested in Logic and the Foundations of Mathematics might consider the following courses:

80-254	Analytic Philosophy	9
80-312	Philosophy of Mathematics	9
80-365	Ramsey	9
80-411	Proof Theory	9
80-413	Category Theory	9

Sample 5.

A student interested in Methodology might consider the following courses:

80-220	Philosophy of Science	9
80-221	Philosophy of Social Science	9
80-321	Causation, Law, and Social Policy	9
36-309	Experimental Design for Behavioral and Social Sciences	9

Logic and Computation Degree Requirements (minimum) 360 units

Logic and Computation as a Second Major

The Logic and Computation major is also suitable as a second major for students in H&SS or for students in other colleges within the university. Non-H&SS students interested in an additional major in Logic and Computation need to take only those courses in the H&SS General Education Program that are prerequisites to courses required in the major; all other H&SS General Education requirements are waived for these students. Depending on the student's back-ground, the requirements of the second major in Logic and Computation can be fulfilled with as few as five additional courses. However, the department limits the courses that may be 'double counted'; the core courses in the Philosophy department may not be double counted.

The M.S. Program in Logic and Computation

The Department of Philosophy also offers a graduate M.S. degree in Logic and Computation, which culminates with the writing of a master's thesis. It is ordinarily a two-year program, but students in the Logic and Computation major are able to complete the additional requirements in one year. Interested students are invited to contact the department for further information and apply to the program in their senior year. Details can be found on the department's homepage: <http://hss.cmu.edu/philosophy/>

The Major in Philosophy

Joel Smith, Director
Office: Baker Hall 161C
Email: joelms@cmu.edu

The Major in Philosophy is intended to be flexible and to facilitate double majors in other fields (including majors with a strong professional focus). It provides students with a broad humanities education and sharpens their analytical skills. We encourage, but do not require, students to choose a thematic concentration through their electives. Sample curricula emphasizing Pre-Law, Metaphysics and Epistemology, Ethics and Social Philosophy, and Philosophy of Mind are suggested below. However, alternative emphases can be proposed and approved by the Director. The Major in Philosophy is a B.A. degree.

Curriculum

In addition to the general education requirements for the student's college, Philosophy primary majors and additional majors must complete 80-100 Introduction to Philosophy and nine Philosophy courses in the Areas listed below. The 80-100 requirement must be fulfilled before the first semester of the junior year. Only two of the remaining nine courses may be at the 100-level, and two of the nine courses must be at the 300-level or higher. All ten courses, if taken at CMU, must be taken for a letter grade and passed with a grade of "C" or above. Courses from other universities, as well as an 80-100 skills test, may be substituted with permission of the Director. For H&SS students, up to 4 of these courses may be counted also as satisfying the College's General Education requirements, with permission of the Director. Students are to choose one course out of each of the Areas 1-4, two courses out of Area 5, and may freely select three courses in Area 6. As per the requirement of the College of H&SS, a student's Freshman Seminar course may not count toward the fulfillment of the major requirements.

Introduction to Philosophy 9 units

80-100	Introduction to Philosophy	9
--------	----------------------------	---

Area 1: Values and Normative Theory 9 units

One of the following:

80-130	Introduction to Ethics	9
80-135	Introduction to Political Philosophy	9
80-136	Social Structure, Public Policy & Ethics	9
80-230	Ethical Theory	9
80-235	Political Philosophy	9
80-244	Environmental Ethics	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
80-248	Engineering Ethics	9
80-335	Deliberative Democracy: Theory and Practice	9
80-337	Philosophy, Politics & Economics	9
80-348	Health Development and Human Rights	9
80-430	Ethics and Medical Research	9
80-431	Meta-ethics	9
80-447	Global Justice	9
80-530	Seminar on Ethical Theory	Var.

Area 2: Philosophy of Mind/Language/Metaphysics 9 units

One of the following:

80-180	Nature of Language	9
80-270	Philosophy of Mind	9
80-271	Philosophy and Psychology	9
80-275	Metaphysics	9
80-276	Philosophy of Religion	9
80-280	Linguistic Analysis	9
80-281	Language and Thought	9
80-282	Phonetics and Phonology I	9
80-283	Syntax and Discourse	9
80-380	Philosophy of Language	9
80-381	Meaning in Language	9
80-382	Phonetics and Phonology II	9
80-383	Language in Use	9
80-384	Linguistics of Turkic Languages	9

80-575	Seminar on Metaphysics	Var.
80-580	Seminar on the Philosophy of Language	9

Area 3: Logic/Philosophy of Mathematics9 units

One of the following:

80-110	Nature of Mathematical Reasoning	9
80-210	Logic and Proofs	9
80-211	Logic and Mathematical Inquiry	9
80-212	Arguments and Logical Analysis	9
80-310	Formal Logic	9
80-311	Undecidability and Incompleteness	9
80-312	Philosophy of Mathematics	9
80-314	Logic and Artificial Intelligence	9
80-315	Modal Logic	9
80-411	Proof Theory	9
80-413	Category Theory	9
80-513	Seminar on Philosophy of Mathematics	9
80-514	Categorical Logic Seminar	9

Area 4: Epistemology/Metaphysics9 units

One of the following:

80-150	Nature of Reason	9
80-201	Epistemology	9
80-208	Critical Thinking	9
80-220	Philosophy of Science	9
80-221	Philosophy of Social Science	9
80-222	Measurement and Methodology	9
80-226	Revolutions in Science	9
80-305	Rational Choice	9
80-321	Causation, Law, and Social Policy	9
80-322	Philosophy of Physics	9
80-323	Philosophy of Biology	9
80-324	Philosophy of Economics	9
80-405	Game Theory	9
80-515	Seminar on the Foundations of Statistics	9
80-516	Seminar on Causation	Var.
80-520	Seminar on Philosophy Science	9
80-521	Seminar on Formal Epistemology	9

Area 5: History of Philosophy18 units

Two of the following:

80-150	Nature of Reason	9
80-226	Revolutions in Science	9
80-250	Ancient Philosophy	9
80-251	Modern Philosophy	9
80-252	Kant	9
80-253	Continental Philosophy	9
80-254	Analytic Philosophy	9
80-255	Pragmatism	9
80-256	Modern Moral Philosophy	9
80-257	Nietzsche	9
80-258	Hume	9
80-261	Empiricism and Rationalism	9
80-262	Introduction to the Philosophy of Bertrand Russell	9
80-264	William James and Philosophical Psychology	9
80-363	19th Century Foundations of Science	9

Area 6: Elective27 units

Three other philosophy courses, or appropriate courses from other departments, with the permission of the Director.

Sample Curricula

Here are four sample curricula, reflecting different emphases.

1. For an emphasis on Law & Social Policy, a student might take:

Area 1	
80-235	Political Philosophy 9

Area 2	
80-180	Nature of Language 9
Area 3	
80-211	Logic and Mathematical Inquiry 9
Area 4	
80-208	Critical Thinking 9
Area 5	
80-150	Nature of Reason 9
80-250	Ancient Philosophy 9
Area 6	
80-321	Causation, Law, and Social Policy 9
80-348	Health Development and Human Rights 9
80-447	Global Justice 9

2. For an emphasis on Philosophy of Science, a student might take:

Area 1	
80-136	Social Structure, Public Policy & Ethics 9
Area 2	
80-275	Metaphysics 9
Area 3	
80-211	Logic and Mathematical Inquiry 9
Area 4	
80-220	Philosophy of Science 9
or 80-221	Philosophy of Social Science 9
Area 5	
80-250	Ancient Philosophy 9
80-226	Revolutions in Science 9
Area 6	
80-150	Nature of Reason 9
80-221	Philosophy of Social Science 9
80-322	Philosophy of Physics 9
80-323	Philosophy of Biology 9

3. For an emphasis on Ethics and Social Philosophy, a student might take:

Area 1	
80-230	Ethical Theory 9
Area 2	
80-276	Philosophy of Religion 9
Area 3	
80-110	Nature of Mathematical Reasoning 9
Area 4	
80-221	Philosophy of Social Science 9
or 80-321	Causation, Law, and Social Policy 9
Area 5	
80-250	Ancient Philosophy 9
Area 6	
80-321	Causation, Law, and Social Policy 9

4. For an emphasis on Philosophy of Mind, a student might take:

Area 1	
80-130	Introduction to Ethics 9
Area 2	
80-270	Philosophy of Mind 9
Area 3	
80-211	Logic and Mathematical Inquiry 9
Area 4	
80-201	Epistemology 9
Area 5	
80-251	Modern Philosophy 9
Area 6	
80-275	Metaphysics 9
80-257	Nietzsche 9
80-314	Logic and Artificial Intelligence 9

Additional Major

Students who want an additional major in Philosophy must fulfill the same departmental requirements as primary majors in Philosophy.

The M.A. Program in Philosophy

The Department of Philosophy also offers a graduate M.A. degree in Philosophy, which culminates with the writing of a master's thesis. It is ordinarily a two-year program, but students in the Philosophy major are able to complete the additional requirements in one year. Interested students are invited to visit the department's homepage for further information: www.hss.cmu.edu/philosophy/.

Philosophy Department Minors

All majors in the Department allow for minors; in addition, there is a Minor in Ethics and an interdepartmental minor in Linguistics. The requirements are again designed to be flexible and to allow students to tailor courses to their special interests, while providing some breadth.

The Minor in Ethics

With the explosive growth of science and technology have come both new possibilities and new problems. Developments in medicine, in biology, in chemistry, in nuclear engineering or in computer science all have costs as well as benefits, and they present us with many hard choices. Some of the hardest of these new problems are moral problems.

The Philosophy Department's Minor in Ethics introduces students to central ethical concepts and theories proposed and defended by the great philosophers of the past; it provides an understanding of how these theories and concepts can be applied to practical problems. This background in ethical theory and its applications should help students to respond more sensitively and appropriately to the new and unavoidable ethical problems that businesses, unions, and branches of government must face.

Ethics Core Courses 27 units

Complete three courses from any of the following areas with at least two courses at the 200-level or higher.

80-130	Introduction to Ethics	9
80-135	Introduction to Political Philosophy	9
80-136	Social Structure, Public Policy & Ethics	9
80-230	Ethical Theory	9
80-235	Political Philosophy	9
80-241	Ethical Judgments in Professional Life	9
80-244	Environmental Ethics	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
80-335	Deliberative Democracy: Theory and Practice	9
80-337	Philosophy, Politics & Economics	9
80-348	Health Development and Human Rights	9
80-430	Ethics and Medical Research	9
80-447	Global Justice	9

Ethics Electives 18 units

Complete two courses at the 200-level or higher.

The Minor in Linguistics

The Interdepartmental Minor in Linguistics is jointly sponsored with the departments of English, Modern Languages, and Psychology. It synthesizes the linguistics related offerings in these departments and provides students with an academic experience that reflects both the interdisciplinary character of the subject and its cross-departmental representation in H&SS. Students who wish to receive a minor in Linguistics must complete six courses. For a detailed discussion of the curriculum and the flexible electives, consult the Dietrich College Interdisciplinary Minors section of the catalog.

The Minor in Logic and Computation

The Minor in Logic and Computation provides students with general course work in logic, the theory of computation, and philosophy. Students must complete six courses, among them the following three core courses.

Logic and Computation Core Courses 27 units

80-150	Nature of Reason	9
80-211	Logic and Mathematical Inquiry	9

or 80-210	Logic and Proofs	
80-310	Formal Logic	9
or 80-311	Undecidability and Incompleteness	

Logic and Computation Electives 27 units

Students must take two courses in the Philosophy Department at the 300-level or higher, in subjects related to logic and computation, and an additional course at the 300-level or higher in an area that uses logical and computational tools, such as philosophy, computer science, linguistics, mathematics, psychology, or statistics. The choice of electives must be approved by the program director.

The Minor in Philosophy

The Minor in Philosophy allows students to complement their primary majors with a broad philosophical grounding.

Logic/Methodology Requirements 9 units

Complete one course:

80-110	Nature of Mathematical Reasoning	9
80-210	Logic and Proofs	9
80-211	Logic and Mathematical Inquiry	9
80-212	Arguments and Logical Analysis	9
80-220	Philosophy of Science	9
80-221	Philosophy of Social Science	9
80-222	Measurement and Methodology	9
80-226	Revolutions in Science	9
80-310	Formal Logic	9
80-311	Undecidability and Incompleteness	9
80-312	Philosophy of Mathematics	9
80-314	Logic and Artificial Intelligence	9
80-315	Modal Logic	9
80-321	Causation, Law, and Social Policy	9
80-322	Philosophy of Physics	9
80-323	Philosophy of Biology	9
80-324	Philosophy of Economics	9
80-411	Proof Theory	9
80-413	Category Theory	9
80-513	Seminar on Philosophy of Mathematics	9
80-514	Categorical Logic Seminar	9
80-515	Seminar on the Foundations of Statistics	9
80-516	Seminar on Causation	Var.
80-520	Seminar on Philosophy Science	9
80-521	Seminar on Formal Epistemology	9

History of Philosophy Requirements 18 units

Complete two courses:

80-150	Nature of Reason	9
80-226	Revolutions in Science	9
80-250	Ancient Philosophy	9
80-251	Modern Philosophy	9
80-252	Kant	9
80-253	Continental Philosophy	9
80-254	Analytic Philosophy	9
80-255	Pragmatism	9
80-256	Modern Moral Philosophy	9
80-257	Nietzsche	9
80-258	Hume	9
80-261	Empiricism and Rationalism	9
80-262	Introduction to the Philosophy of Bertrand Russell	9
80-363	19th Century Foundations of Science	9
80-264	William James and Philosophical Psychology	9

Philosophy Electives 18 units

Complete 18.0 units in the Philosophy Department at the 200-level or higher.

The Honors Program

The H&SS Senior Honors Program provides recognition of outstanding performance by students majoring in Philosophy, Logic and Computation or Ethics, History, and Public Policy. Students have the opportunity to develop their skills and to apply their knowledge through completion of an honors thesis in their senior year. By completing the thesis, students earn 18 units of credit and qualify for graduation with College Honors. To qualify for the honors program, students must maintain a quality point average of at least 3.50 in the major and 3.25 overall, and be invited by the department to become a participant.

Undergraduate Research Fellows

Qualified upper level undergraduates, preferably majors in one of the Philosophy Department's programs, may apply to serve in their junior or senior years as fellows in the Laboratory for Symbolic and Educational Computing (LSEC). Applications are reviewed in the fall. Visit LSEC from the Department's website, <http://www.hss.cmu.edu/philosophy/labs-lsec.php>, or contact Professors Joseph Ramsey or Wilfried Seig for additional information.

Faculty

JEREMY AVIGAD, Professor of Philosophy – Ph.D., University of California, Berkeley; Carnegie Mellon, 1996–.

STEVEN AWODEY, Professor of Philosophy – Ph.D., University of Chicago; Carnegie Mellon, 1997–.

ADAM BJORNDAHL, Assistant Professor of Philosophy – Ph.D., Cornell University; Carnegie Mellon, 2014–.

ROBERT CAVALIER, Teaching Professor of Philosophy – Ph.D., Duquesne University; Carnegie Mellon, 1987–.

DAVID DANKS, Professor of Philosophy – Ph.D., University of California, San Diego; Carnegie Mellon, 2003–.

BENJAMIN R. GEORGE, Assistant Professor of Philosophy – Ph.D., University of California, Los Angeles; Carnegie Mellon, 2014–.

CLARK GLYMOUR, Alumni University Professor of Philosophy – Ph.D., Indiana University; Carnegie Mellon, 1984–.

MARALEE HARRELL, Associate Teaching Professor of Philosophy – Ph.D., University of California, San Diego; Carnegie Mellon, 2003–.

KEVIN T. KELLY, Professor of Philosophy – Ph.D., University of Pittsburgh; Carnegie Mellon, 1985–.

ALEX LONDON, Professor of Philosophy – Ph.D., University of Virginia; Carnegie Mellon, 2000–.

RICHARD SCHEINES, Professor of Philosophy – Ph.D., University of Pittsburgh; Carnegie Mellon, 1987–.

TEDDY I. SEIDENFELD, Herbert A. Simon Professor of Philosophy and Statistics – Ph.D., Columbia University; Carnegie Mellon, 1985–.

WILFRIED SIEG, Patrick Suppes Professor of Philosophy – Ph.D., Stanford University; Carnegie Mellon, 1985–.

MANDY SIMONS, Associate Professor of Philosophy – Ph.D., Cornell University; Carnegie Mellon, 1998–.

JOEL SMITH, Distinguished Career Teaching Professor of Philosophy – Ph.D., University of Pittsburgh; Carnegie Mellon, 2000–.

PETER L. SPIRITES, Professor of Philosophy – Ph.D., University of Pittsburgh; Carnegie Mellon, 1987–.

DANIELLE WENNER, Assistant Professor of Philosophy – Ph.D., Rice University; Carnegie Mellon, 2013–.

THOMAS WERNER, Assistant Teaching Professor of Philosophy – Ph.D., Rutgers University; Carnegie Mellon, 2003–.

KUN ZHANG, Assistant Professor of Philosophy – Ph.D., The Chinese University of Hong Kong; Carnegie Mellon, 2015–.

KEVIN ZOLLMAN, Associate Professor of Philosophy – Ph.D., University of California, Irvine; Carnegie Mellon, 2009–.

Special Faculty

CHRISTINA BJORNDAHL, Teaching Instructor – Ph.D. Candidate, Cornell University; Carnegie Mellon, 2014–.

DAVID GRAY, Assistant Teaching Professor of Philosophy, Carnegie Mellon-Qatar – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2009–.

DERRICK GRAY, Teaching Instructor – Ph.D., Rice University; Carnegie Mellon, 2013–.

ANDY NORMAN, Teaching Instructor – Ph.D., Northwestern University; Carnegie Mellon, 2006–.

JOSEPH RAMSEY, Director of Research Computing – Ph.D., University of California, San Diego; Carnegie Mellon, 2006–.

Affiliated Faculty

WAYNE WU, Associate Professor and Associate Director of CNBC – Ph.D., University of California, Berkeley; Carnegie Mellon, 2010–.

Emeritus Faculty

DANA S. SCOTT, Hillman University Professor of Mathematical Logic, Computer Science and Philosophy (Emeritus) – Ph.D., Princeton University; Carnegie Mellon, 1981–.

Institute for Politics and Strategy

Kiron K. Skinner, Director
Department Office: Porter Hall 223E

The Institute for Politics and Strategy (IPS) is dedicated to the study of politics through the discipline of political science with support from other social science disciplines. In this way, IPS carries on a respected tradition of interdisciplinary political science at Carnegie Mellon University. The Institute for Politics and Strategy also builds upon the university's rich heritage of applying basic science to issues of public policy.

At various times during the past fifty years, CMU faculty members have been innovators of what is now known as formal theory and public choice. Indeed, some of them were involved in the founding and early meetings of scholarly organizations in these areas. Political science teaching and research took place in numerous CMU colleges but by the early 2000s most teaching and research in political science occurred in the Department of Social and Decision Sciences (SDS). Home also to research and teaching in behavioral economics, complex social systems, decision science, and strategy, entrepreneurship, and technological change, SDS supported a rigorous undergraduate and doctoral program in political science focused on US politics, quantitative methods, formal theory, game theory, and social choice.

Started during the 1999-2000 academic year, the additional major in international relations stood alongside the political science major. That major, the university's first full-scale undergraduate teaching program in international relations, was a joint initiative by the Department of History, the Department of Modern Languages, and the Department of Social and Decision Sciences. As student enrollment flourished and the opportunity arose to develop the major's social science component, the additional major became a stand-alone course of study. It was renamed International Relations and Politics (IRP) and moved to the Department of Social and Decision Sciences. The name of the major signifies that those studying IRP will learn about international relations and domestic politics from the standpoint of the discipline of political science.

At the same time, IRP taps into and contributes to CMU's strengths in other social sciences such as decision science. Decidedly analytical and quantitative, the IRP major preserves and expands CMU's tradition in political science.

With the beginning of the 2015-16 academic year, IRP will be the flagship academic program in IPS. The major will continue to provide the rich set of courses and programmatic offerings that have made it an attractive course of study for students from all of CMU's colleges.

Basic science is the foundation for the public policy activities of IPS. Analytical social science and interdisciplinary research and teaching are used to better understand, explain, anticipate, and solve public policy problems.

The CMU traditions of analytical political science and applied social science are reflected in the range of degree programs and entities that IPS supports and oversees. The academic programs included in the Institute for Politics and Strategy are:

- International Relations and Politics Major (primary and additional);
- International Relations and Politics Minor;
- Politics and Public Policy Minor; and
- Master of Information Technology Strategy.

The IRP minor shares core courses with the IRP major. The minor in Politics and Public Policy has a greater focus on domestic politics and public policy than either the IRP major or minor. The Master of Information Technology Strategy (MITS) (<http://www.cmu.edu/mits>) program provides graduate students with core interdisciplinary competencies in cyber security. The master's program is a joint initiative by the College of Engineering, Dietrich College, and the School of Computer Science. IPS manages the Dietrich College portion of MITS. The Institute for Software Research, a department in the School of Computer Science, is the administrative home for MITS.

IPS administers these initiatives:

- The Center for International Relations and Politics;
- The Carnegie Mellon University Washington Semester Program; and
- The Institute for Strategic Analysis.

The Center for International Relations and Politics (CIRP) is a university hub for scholarly and policy-oriented activities on domestic and international issues. CIRP (<http://www.cmu.edu/ir>) supports and promotes student and

faculty research and hosts national and international thought leaders through its Policy Forum.

The Carnegie Mellon University Washington Semester Program (CMU/WSP) is a semester-long program for undergraduates interested in taking courses and interning in Washington. The minor in Politics and Public Policy may be earned by completing CMU/WSP and taking an additional core course in the International Relations and Politics major.

Founded in 2013, the Institute for Strategic Analysis facilitates and supports CMU faculty members interested in bringing their scientific research to bear upon problems of national security. These problems include terrorism, cyber challenges, war avoidance, intelligence, and the intersection of energy and security. ISA facilitates strategic engagements between CMU faculty and leaders in the defense and intelligence community as they seek mutually beneficial ways to have basic research inform national security policy.

The Major in International Relations and Politics

Kiron K. Skinner, Faculty Director; kskinner@andrew.cmu.edu, Porter Hall 223E
Emily Half, Academic Program Manager; ehalf@andrew.cmu.edu, Baker Hall A60C, 412-268-7082

The International Relations and Politics (IRP) major analyzes the role of politics at the national, regional, international, and transnational levels; examines political and institutional arrangements within and among these levels; and investigates the grand strategy of nation-states.

Statesmen, scholars, and policy makers often define grand strategy as the combination of diplomatic, economic, military, and political factors used by leaders to defend their respective nation-states. The IRP major investigates the way in which leaders and citizens construct grand strategy and national security policy more generally; the impact of domestic and international forces on states' security and economic policies; and the significance of alliances, coalitions, and international institutions for world politics.

Although the study of grand strategy and political institutions is the flagship initiative of the major, students are also able to study the effects of culture, economics, and society on the international system through a rich set of elective courses.

Thinking systematically about international and domestic politics is the core objective of the IRP major. To this end, the major has prerequisites in analytical methods, mathematics, and statistics that help to sharpen students' ability to undertake scientific analysis in the required substantive and historical courses. The major is rooted in the discipline of political science but also utilizes the interdisciplinary strengths of behavioral decision science, complex social systems, economics, strategy, entrepreneurship and technological change, and political history. Thus, students pursuing this major will use the analytic tools of game theory, economic and statistical analysis, qualitative analysis, rational choice theory, and theories of behavioral decision making as they study alliances, coalitions, institutions, and political strategy.

Recognizing the influence of language and culture on politics, students are required to complete the intermediate (200) level, or its equivalent, in a modern language other than English. Advanced-level study is strongly encouraged.

Open to all Carnegie Mellon undergraduates, the Carnegie Mellon University Washington Semester Program (CMU/WSP) allows students to study public policy and intern in Washington for one semester. Courses taken through CMU/WSP will count toward the elective sequence in public policy for IRP majors.

Students' understanding of politics is further informed by courses and colloquia offered by CMU's top-ranked departments, divisions, and schools in business, computer science, engineering, and the humanities.

IRP majors interested in developing their research skills are encouraged to apply for a research position with the Center for International Relations and Politics. They are also encouraged to join student organizations focused on domestic or international politics. Becoming involved in the Institute for Politics and Strategy, as well as attending lectures and events sponsored by the Center for International Relations and Politics will provide additional opportunities for students.

The International Relations and Politics major is offered through the Institute for Politics and Strategy. It is available as a primary major and additional major in the Dietrich College of Humanities and Social Sciences. Minors in International Relations and Politics and Politics and Public Policy are also available.

Prerequisites

All International Relations and Politics majors must complete mathematics, statistics, and analytic methods prerequisites (see below) by the end of the sophomore year.

Mathematics Prerequisite	Units
21-111-21-112 Calculus I-II or 21-120 Differential and Integral Calculus	10-20

Students who successfully pass the proctored Calculus Assessment on campus at the 21-120 level will be required to take a more advanced 21-xxx course for this prerequisite. 21-122, 21-240, or 21-256 are suggested.

Statistics Prerequisite	Units
36-201 Statistical Reasoning and Practice	9

Students must take one course (9-10 units) from the following set (or an approved alternative) of Analytic Methods courses. Students may not double count a course used to fulfill the Mathematics Prerequisite for the Analytic Methods Prerequisite.

Analytic Methods Prerequisite	Units
21-122 Integration and Approximation	10
21-256 Multivariate Analysis	9
36-303 Sampling, Survey and Society	9
36-315 Statistical Graphics and Visualization	9
80-210 Logic and Proofs	9
73-230 Intermediate Microeconomics	9
73-240 Intermediate Macroeconomics	9
80-305 Rational Choice	9
80-405 Game Theory	9
88-252 Causal Inference in the Field: Using Data to Study Crime, Love, Sports & More	9
88-316 Game Theory	9
88-402 Modeling Complex Social Systems	9
88-424 Decision Theory and Rational Choice	9
88-435 Decision Science and Policy	9

Curriculum

Core Courses	Units
84-104 Decision Processes in American Political Institutions	9
84-265 Political Science Research Methods	9
84-275 Comparative Politics	9
84-326 Theories of International Relations	9
84-450 IRP Capstone Policy Forum	Var.
36-202 Statistical Methods	9
73-100 Principles of Economics or 88-220 Policy Analysis I	9

Language Requirement

Students are required to complete the intermediate (200) level or the equivalent in a modern language other than English. Advanced level study is strongly encouraged. Students who successfully pass a language placement exam on campus, at the intermediate II level or higher, are required to take an advanced language course to satisfy the language requirement.

45 units Electives

International Relations and Politics students will either:

Option 1) take 45 units (five courses) from the elective lists below. Students must take three courses (27 units) from the Grand Strategy and Political Institutions category. The remaining two courses (18 units) must come from the Economics and Society and/or International Cultures categories. At least two courses (18 units) must be from the Institute for Politics and Strategy (84-xxx). Most courses listed below are 9-unit courses, but some are fewer. When courses offered for fewer than 9 units are chosen, students should note that a minimum of 45 units is required, and should plan to take one or more additional courses as appropriate.

OR

Option 2) complete the majority of their electives via the Carnegie Mellon University Washington Semester Program (CMU/WSP) Public Policy elective sequence. Any elective units not fulfilled during CMU/WSP may be completed through coursework from the Grand Strategy and Political Institutions elective list.

The Washington Semester Program (CMUWSP) Public Policy Elective Sequence includes:

- Internship Seminar (12 units)
- Policy Forum (12 units) - This course will count toward the IRP Capstone Policy Forum (84-450) Core Course Requirement.
- Core Seminar (12 units)
- Elective Seminar (12 units)

A list of CMU/WSP Core and Elective Seminars may be found in the CMU/WSP section of the undergraduate catalog (p. 282) below.

Grand Strategy and Political Institutions	Units
19-609 Public Policy and Regulation	9
19-662 Special Topics: Technology and Development in China & India	12
79-203 Social and Political Change in 20th Century Central and Eastern Europe	9
79-218 United States and the World	9
79-231 American Foreign Policy: 1945-Present	9
79-298 Mobile Phones & Social Media in Development & Human Rights: A Critical Appraisal	6
79-301 History of Surveillance: From the Plantation to Edward Snowden	6
79-302 Drone Warfare: Ethics, Law, Politics, History, and Strategy	6
79-310 From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present	9
79-359 Terrorism and U.S. National Security	6
79-360 Conspiracies, Spies, and Assassins in Revolutionary Europe	6
79-389 Stalin and Stalinism	9
79-392 History of Modern Warfare	9
80-135 Introduction to Political Philosophy	9
80-235 Political Philosophy	9
80-321 Causation, Law, and Social Policy	9
80-335 Deliberative Democracy: Theory and Practice	9
84-210 Comparative Political Systems	9
84-320 Domestic Politics and International Affairs	9
84-321 Autocrats and Democrats	9
84-322 Attitudes, the Media, and Conflict in International Relations	9
84-323 War and Peace	9
84-324 Democracies and War	9
84-362 Diplomacy and Statecraft	9
84-380 Grand Strategy in the United States	9
84-386 The Privatization of Force	9
84-389 Terrorism and Insurgency	9
84-393 Legislative Decision Making: U.S. Congress	9
84-402 Judicial Politics and Behavior	9
84-414 International and Subnational Security	9
88-223 Decision Analysis and Decision Support Systems	9
88-281 Topics in Law: 1st Amendment	9
88-284 Topics of Law: The Bill of Rights	9
88-302 Behavioral Decision Making	9
88-388 Psychological Models of Decision Making	9
88-405 Risk Perception and Communication	9
88-415 Global Competitiveness: Firms Nations, and Technological Change	9
88-442 Decision Science in Intergroup Conflict	9
Economics and Society	Units
70-342 Managing Across Cultures	9
70-365 International Trade and International Law	9
70-430 International Management	9
73-148 Environmental Economics	9
73-328 Health Economics	12
73-331 Political Economy of Inequality and Redistribution	9

73-372	International Money and Finance	9	79-381	Energy and Empire: How Fossil Fuels Changed the World	9																																
73-375	History of Money and Monetary Policy	9	79-383	Epidemics, Disease, and Public Health	9																																
73-394	Development Economics	9	79-385	The Making of the African Diaspora	9																																
79-386	Entrepreneurs in Africa, Past, Present and Future	9	79-398	Documenting the 1967 Arab-Israeli War	9																																
80-136	Social Structure, Public Policy & Ethics	9	82-304	The Francophone World	9																																
80-244	Environmental Ethics	9	82-320	Contemporary Society in Germany, Austria and Switzerland	9																																
80-247	Ethics and Global Economics	9	82-323	Germany, Austria and Switzerland in the 20th Century	9																																
80-344	Management, Environment, and Ethics	9	82-333	Introduction to Chinese Language and Culture	Var.																																
80-348	Health Development and Human Rights	9	82-342	Spain: Language and Culture	9																																
80-447	Global Justice	9	82-343	Latin America: Language and Culture	9																																
84-310	International Political Economy and Organizations	9	82-344	U.S. Latinos: Language and Culture	9																																
88-352	Environmental Economics and Policy	9	82-345	Introduction to Hispanic Literary and Cultural Studies	9																																
88-378	International Economics	9	82-361	Italian Language and Culture I	9																																
88-391	Technology and Economic Growth	9	82-362	Italian Language and Culture II	9																																
88-410	The Global Economy: A User's Guide	9	82-431	China and the West	9																																
88-411	Rise of the Asian Economies	9	82-433	Topics in Contemporary Culture of China	9																																
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9	82-441	Studies in Peninsular Literature and Culture	9																																
88-413	Energy and Climate: History, Science, Technology, & Policy in the US 1776-2076	9	82-451	Studies in Latin American Literature and Culture	9																																
88-419	Negotiation	9	82-455	Topics in Hispanic Studies	9																																
88-423	Institutions, Entrepreneurship, and Innovation	9	82-474	Topics in Japanese Studies	9																																
International Cultures		Units	82-541	Special Topics: Hispanic Studies	Var.																																
76-318	Communicating in the Global Marketplace	9	85-375	Crosscultural Psychology	9																																
76-322	Global Masala: South Asians in the Diaspora	9	300 or 400- level language course (at most one for this category)																																		
76-386	Language & Culture	9	NOTE: Some courses have additional prerequisites.																																		
79-205	20th Century Europe	9	International Relations and Politics, B.S.																																		
79-211	East Asia in the World, 1600-Present	9	These sample curricula represent a plan for completing the requirements for the B.S. in International Relations and Politics. International Relations and Politics students are encouraged to spend a semester studying and interning in Washington, DC, through the CMU/WSP (http://www.cmu.edu/ir/washington-semester-program), and/or study abroad. The plan below demonstrates that a semester off-campus fits well into the curriculum. As with most majors in the Dietrich College, the International Relations and Politics major can be completed in as few as two years of undergraduate study, not that it must be. Students may declare the B.S. in International Relations and Politics and take appropriate courses as early as the second semester of the freshman year and as late as the second semester sophomore year, and should consult frequently with the academic program manager (see above) about their course of study.

*All students are strongly encouraged to participate in the CMU/WSP (<http://www.cmu.edu/ir/washington-semester-program>) and/or in a study abroad program. Spring semester of the junior year is a popular semester to study off-campus. However, International Relations and Politics majors may instead choose to participate in the CMU/WSP or study abroad in spring of sophomore year, fall of junior year, or fall of senior year. Students should consult the academic advisor when planning their curricular program.

**Students are not required to complete a college honors thesis. However, many International Relations and Politics majors choose to apply for the senior honors thesis program. Students who do not pursue a senior honors thesis should select an elective in its place.

Additional Major

Students who elect International Relations and Politics as an additional major must fulfill all of the requirements of the International Relations and Politics major.

Minor in International Relations and Politics

The International Relations and Politics (IRP) minor analyzes the role of politics at the national, regional, international, and transnational levels; examines political and institutional arrangements within and among these levels; and investigates the grand strategy of nation-states.

Statesmen, scholars, and policy makers often define grand strategy as the combination of diplomatic, economic, military, and political factors used by leaders to defend their respective nation-states. The IRP minor investigates the way in which leaders and citizens construct grand strategy and national security policy more generally; the impact of domestic and international forces on states' security and economic policies; and the significance of alliances, coalitions, and international institutions for world politics. The study of grand strategy and political institutions is the flagship initiative of the minor.

In the tradition of Carnegie Mellon University, political science is studied and taught in an interdisciplinary manner. Utilizing the interdisciplinary strengths of the social sciences at CMU, IRP students study political phenomena through the perspectives of behavioral decision science, complex social systems, economics, strategy, entrepreneurship and technological change, and political history. Students pursuing the minor may find it helpful to develop their analytical tools of game theory, economic and statistical analysis, qualitative analysis, rational choice theory, and theories of behavioral decision making as they study alliances, coalitions, institutions, and political strategy. Recognizing the influence of language and culture on politics and international relations, students are encouraged to study a modern language other than English.

The International Relations and Politics minor is offered through the Institute for Politics and Strategy. It is available as a minor in the Dietrich College of Humanities and Social Sciences.

Prerequisites

73-100	Principles of Economics	9
or 88-220	Policy Analysis I	

Curriculum

54 units

Students must take all three core courses (27 units):

84-104	Decision Processes in American Political Institutions	9
84-275	Comparative Politics	9

84-326	Theories of International Relations	9
--------	-------------------------------------	---

Students select three courses (27 units) from any of the elective sequences below. Two courses must be taken from the Institute for Politics and Strategy and have an 84-number course:

Grand Strategy and Political Institutions		
19-609	Public Policy and Regulation	9
19-662	Special Topics: Technology and Development in China & India	12
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-218	United States and the World	9
79-231	American Foreign Policy: 1945-Present	9
79-298	Mobile Phones & Social Media in Development & Human Rights: A Critical Appraisal	6
79-301	History of Surveillance: From the Plantation to Edward Snowden	6
79-302	Drone Warfare: Ethics, Law, Politics, History, and Strategy	6
79-310	From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present	9
79-359	Terrorism and U.S. National Security	6
79-360	Conspiracies, Spies, and Assassins in Revolutionary Europe	6
79-389	Stalin and Stalinism	9
79-392	History of Modern Warfare	9
80-135	Introduction to Political Philosophy	9
80-235	Political Philosophy	9
80-321	Causation, Law, and Social Policy	9
80-335	Deliberative Democracy: Theory and Practice	9
84-210	Comparative Political Systems	9
84-320	Domestic Politics and International Affairs	9
84-321	Autocrats and Democrats	9
84-322	Attitudes, the Media, and Conflict in International Relations	9
84-323	War and Peace	9
84-324	Democracies and War	9
84-362	Diplomacy and Statecraft	9
84-380	Grand Strategy in the United States	9
84-386	The Privatization of Force	9
84-389	Terrorism and Insurgency	9
84-393	Legislative Decision Making: U.S. Congress	9
84-402	Judicial Politics and Behavior	9
84-414	International and Subnational Security	9
88-223	Decision Analysis and Decision Support Systems	9
88-281	Topics in Law: 1st Amendment	9
88-284	Topics in Law: The Bill of Rights	9
88-302	Behavioral Decision Making	9
88-388	Psychological Models of Decision Making	9
88-405	Risk Perception and Communication	9
88-415	Global Competitiveness: Firms Nations, and Technological Change	9
88-442	Decision Science in Intergroup Conflict	9
Economics and Society		
70-342	Managing Across Cultures	9
70-365	International Trade and International Law	9
70-430	International Management	9
73-148	Environmental Economics	9
73-328	Health Economics	12
73-331	Political Economy of Inequality and Redistribution	9
73-372	International Money and Finance	9
73-375	History of Money and Monetary Policy	9
73-394	Development Economics	9
79-386	Entrepreneurs in Africa, Past, Present and Future	9
80-136	Social Structure, Public Policy & Ethics	9
80-244	Environmental Ethics	9
80-247	Ethics and Global Economics	9
80-344	Management, Environment, and Ethics	9
80-348	Health Development and Human Rights	9

80-447	Global Justice	9	82-333	Introduction to Chinese Language and Culture	Var.
84-310	International Political Economy and Organizations	9	82-342	Spain: Language and Culture	9
88-352	Environmental Economics and Policy	9	82-343	Latin America: Language and Culture	9
88-378	International Economics	9	82-344	U.S. Latinos: Language and Culture	9
88-391	Technology and Economic Growth	9	82-345	Introduction to Hispanic Literary and Cultural Studies	9
88-410	The Global Economy: A User's Guide	9	82-361	Italian Language and Culture I	9
88-411	Rise of the Asian Economies	9	82-362	Italian Language and Culture II	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9	82-433	Topics in Contemporary Culture of China	9
88-413	Energy and Climate: History, Science, Technology, & Policy in the US 1776-2076	9	82-441	Studies in Peninsular Literature and Culture	9
88-419	Negotiation	9	82-451	Studies in Latin American Literature and Culture	9
88-423	Institutions, Entrepreneurship, and Innovation	9	82-455	Topics in Hispanic Studies	9
International Cultures			82-474	Topics in Japanese Studies	9
76-318	Communicating in the Global Marketplace	9	82-541	Special Topics: Hispanic Studies	Var.
76-322	Global Masala: South Asians in the Diaspora	9	85-375	Crosscultural Psychology	9
76-386	Language & Culture	9	Minor in Politics and Public Policy		
79-205	20th Century Europe	9	Rooted in the discipline of political science, the minor in Politics and Public Policy investigates U.S. public policy issues and other matters of domestic politics while providing students hands-on and practical learning experiences. Students pursuing the Politics and Public Policy minor must participate in the Carnegie Mellon University Washington Semester Program for one semester during their undergraduate experience.		
79-211	East Asia in the World, 1600-Present	9	From embassy headquarters to nongovernmental organizations, think tanks to advocacy organizations, and consulting firms to media outlets, Washington, DC, is a focal point for many international and public policy activities. Open to all Carnegie Mellon undergraduates, the Carnegie Mellon University Washington Semester Program (CMU/WSP) allows students to study public policy and intern in Washington for one semester. Undergraduates from any course of study who would value firsthand policy experience are invited to apply to the Carnegie Mellon University Washington Semester Program and declare a minor in Politics and Public Policy.		
79-221	Development and Democracy in Latin America	9	As a member of the University of California Washington Center (UCDC) consortium of schools, CMU/WSP is part of a broad and diverse intellectual community of faculty and students. In this semester-long program, students live, work, and study in Washington, DC, coming into direct contact with political, business, and community leaders and learning about the most pressing policy issues of the day.		
79-222	Between Revolutions: The Development of Modern Latin America	9	Students earn 48 units for the Carnegie Mellon University Washington Semester Program, interning three days per week in any sector or field of interest within Washington, DC, while taking classes two days per week and in the evenings. Courses are offered by CMU and UCDC faculty. The Center for International Relations and Politics sponsors events and a policy forum in Washington for students participating in the program to further enrich their experience and enhance their understanding of how Washington functions as a hub of international and public policy decision making. UCDC also provides policy-oriented events.		
79-223	Mexico: From the Aztec Empire to the Drug War	9	The minor in Politics and Public Policy is offered through the Institute for Politics and Strategy in the Dietrich College of Humanities and Social Sciences.		
79-224	Mayan America	9	Prerequisites		
79-227	African History: Height of Trans-Atlantic Slave Trade to the End of Apartheid	9	73-100	Principles of Economics	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9	or 88-220	Policy Analysis I	
79-230	Arab-Israeli Conflict and Peace Process since 1948	9	Curriculum		
79-233	The United States and the Middle East since 1945	9	57 units		
79-235	Caribbean Cultures	9	All students must take the following two courses while participating in the CMU/WSP (24 units):		
79-251	India/America: Democracy, Diversity, Development	9	84-360	CMU/WSP: Internship Seminar	12
79-255	Irish History	6	84-450	IRP Capstone Policy Forum	12
79-256	20th Century Germany	9	Students select one core seminar from the following list of courses offered in the CMU/WSP (12 units):		
79-257	Germany and the Second World War	9	84-330	CMU/WSP: The United States Supreme Court	12
79-259	France During World War II	9	84-331	CMU/WSP: Congress	12
79-261	Chinese Culture and Society	9	84-332	CMU/WSP: Washington Media	12
79-262	Modern China	9	84-333	CMU/WSP: General Research Seminar	12
79-264	Tibet in History and Imagination	9	84-334	CMU/WSP: International Policy	12
79-265	Russian History: From the First to the Last Tsar	9	84-336	CMU/WSP: The Presidency and Executive Branch	12
79-266	Russian History: From Communism to Capitalism	9			
79-267	The Soviet Union in World War II: Military, Political, and Social History	9			
79-275	Introduction to Global Studies	9			
79-282	Europe and the World since 1800	9			
79-288	Bananas, Baseball, and Borders: Latin America and the United States	9			
79-291	Globalization in East African History	6			
79-299	Trafficking Persons: Children in a Global Context	9			
79-307	Religion and Politics in the Middle East	9			
79-312	International Human Rights Institutions in Theory and Practice	6			
79-314	The Politics and Culture of Memory	9			
79-320	Women, Politics, and Protest	9			
79-338	History of Education in America	9			
79-342	Introduction to Science and Technology Studies	9			
79-377	Food, Culture, and Power: A History of Eating	9			
79-381	Energy and Empire: How Fossil Fuels Changed the World	9			
79-383	Epidemics, Disease, and Public Health	9			
79-385	The Making of the African Diaspora	9			
79-398	Documenting the 1967 Arab-Israeli War	9			
82-304	The Francophone World	9			
82-320	Contemporary Society in Germany, Austria and Switzerland	9			
82-323	Germany, Austria and Switzerland in the 20th Century	9			

Students select one elective seminar from the following list of courses offered in the CMU/WSP (12 units):

84-340	CMU/WSP: American Political Journalism	12
84-341	CMU/WSP: U.S. Foreign Policy in the Middle East	12
84-342	CMU/WSP: Fiscal Policy-Making in the U.S.	12
84-343	CMU/WSP: Sports, Politics, and Society	12
84-344	CMU/WSP: Politics and Poems: Writing Verse in DC	12
84-345	CMU/WSP: Cultural Policy: Cultural Heritage and Cultural Diplomacy	12
84-346	CMU/WSP: Race and Politics in the American City	12
84-347	CMU/WSP: Lobbying, Money, and Influence in Washington	12
84-348	CMU/WSP: Spies! The Politics of Intelligence	12
84-349	CMU/WSP: The Theater of Politics	12
84-350	CMU/WSP: Campaigns and Elections	12

Students select one course from the following list of courses offered at Carnegie Mellon University's Pittsburgh or Qatar campus. Students may take this course before or after participating in the CMU/WSP. (9 units):

84-104	Decision Processes in American Political Institutions	9
84-275	Comparative Politics	9
84-326	Theories of International Relations	9

Carnegie Mellon University Washington Semester Program

Kiron Skinner, Faculty Director; kskinner@andrew.cmu.edu, Porter Hall 223E
Emily Half, Academic Program Manager; ehalf@andrew.cmu.edu;
412-268-7082, Baker Hall A60C
Emily Baddock, Program Director in Washington, DC;
ebaddock@andrew.cmu.edu; 202-608-8316, 100 Maryland Ave NE, Suite 510, Washington, DC 20002

<http://www.cmu.edu/ir/washington-semester-program/index.html>

From embassy headquarters to nongovernmental organizations, think tanks to advocacy organizations, and consulting firms to media outlets, Washington, DC, is a focal point for many international and public policy activities.

Undergraduates from any course of study who would value firsthand policy experience are invited to apply to the Carnegie Mellon University Washington Semester Program (CMU/WSP), sponsored by the university's Institute for Politics and Strategy. As a member of the University of California Washington Center (UCDC) consortium of schools, CMU/WSP is part of a broad and diverse intellectual community of faculty and students. In this semester-long program, students live, work, and study in Washington, DC, coming into direct contact with political, business, and community leaders and learning about the most pressing policy issues of the day.

CMU/WSP students earn 48 units for their semester in Washington, interning three days per week in any sector or field of interest within Washington, DC, while taking classes two days per week and in the evenings. Courses are offered by Carnegie Mellon and UCDC faculty. The Institute for Politics and Strategy sponsors events and a policy forum in Washington for students participating in the program to further enrich their experience and enhance their understanding of how Washington functions as a hub of international and public policy decision making. UCDC also provides policy-oriented events.

Students should contact the academic program manager for more information or to discuss how the CMU/WSP may fit into their curriculum.

Curriculum

All students enroll in the following two courses.

84-360	CMU/WSP: Internship Seminar	12
84-450	IRP Capstone Policy Forum	12

Students select one core seminar from the following list.

84-330	CMU/WSP: The United States Supreme Court	12
84-331	CMU/WSP: Congress	12
84-332	CMU/WSP: Washington Media	12
84-333	CMU/WSP: General Research Seminar	12

84-334	CMU/WSP: International Policy	12
84-336	CMU/WSP: The Presidency and Executive Branch	12

Students select one elective seminar from the following list.

Elective Seminar

84-340	CMU/WSP: American Political Journalism	12
84-341	CMU/WSP: U.S. Foreign Policy in the Middle East	12
84-342	CMU/WSP: Fiscal Policy-Making in the U.S.	12
84-343	CMU/WSP: Sports, Politics, and Society	12
84-344	CMU/WSP: Politics and Poems: Writing Verse in DC	12
84-345	CMU/WSP: Cultural Policy: Cultural Heritage and Cultural Diplomacy	12
84-346	CMU/WSP: Race and Politics in the American City	12
84-347	CMU/WSP: Lobbying, Money, and Influence in Washington	12
84-348	CMU/WSP: Spies! The Politics of Intelligence	12
84-349	CMU/WSP: The Theater of Politics	12
84-350	CMU/WSP: Campaigns and Elections	12

Executive Committee and Affiliated Faculty

KIRON K. SKINNER, Associate Professor of International Relations and Political Science; Institute Director – Ph.D., Harvard University; Carnegie Mellon, 1999–.

BARUCH FISCHHOFF, Howard Heinz University Professor of Social and Decision Sciences and of Engineering and Public Policy – Ph.D., The Hebrew University of Jerusalem; Carnegie Mellon, 1987–.

MARK S. KAMLET, University Professor of Economics and Public Policy and Provost Emeritus – Ph.D., University of California, Berkeley; Carnegie Mellon, 1978–.

ALLAN H. MELTZER, The Allan H. Meltzer University Professor of Political Economy – Ph.D., University of California, Los Angeles; Carnegie Mellon, 1957–.

Lecturers

COLIN P. CLARKE, Lecturing Faculty in International Relations and Politics – Ph.D., University of Pittsburgh; Carnegie Mellon, 2014–.

MOLLY DUNIGAN, Lecturing Faculty in International Relations and Politics – Ph.D., Cornell University; Carnegie Mellon, 2014–.

GEOFFREY MCGOVERN, Lecturing Faculty in International Relations and Politics – Ph.D., Binghamton University., J.D., Harvard University; Carnegie Mellon, 2013–.

Fellows

THOMAS KARAKO, Fellow in the Institute for Politics and Strategy – Ph.D., Claremont Graduate University; Carnegie Mellon, 2015–.

Post-Doctoral Fellows

ANDREW BAUSCH, Post-Doctoral Fellow in International Relations and Politics – Ph.D., New York University; Carnegie Mellon, 2013–.

KAZUTO OHTSUKI, Post-Doctoral Fellow in International Relations and Politics – Ph.D., New York University; Carnegie Mellon, 2014–.

ANNA PECHENKINA, Post-Doctoral Fellow in International Relations and Politics – Ph.D., Pennsylvania State University; Carnegie Mellon, 2013–.

Department of Psychology

Michael Tarr, Department Head
Department Office: Baker Hall 346-C
<http://www.psy.cmu.edu>

Can newborn infants perceive the world as we do, or is it just "a blooming buzzing confusion"? Do personality, beliefs and social factors influence health? How do scientists and young children make discoveries, and what abilities make these insights possible? How does brain activity reveal differences in thinking? Can computers think the way people do?

These are some of the questions that psychologists at Carnegie Mellon are trying to answer.

For the student who is majoring in Psychology, Cognitive Science or Neuroscience, studying with faculty who are on the leading edge of research on questions like the above can be a very exciting experience.

The Psychology Department at Carnegie Mellon has long been noted as one of the pioneering Psychology Departments in the world, particularly in such areas as cognitive psychology, cognitive science, social psychology, developmental psychology, cognitive neuroscience, and health psychology. The Psychology Department offers 5 majors: B.A. and B.S. degrees in Psychology, as well as a B.S. degree in Cognitive Science and together with the Department of Biological Sciences, a unified B.S. double major in Psychology and Biological Sciences, and an Intercollege major in Neuroscience.

The Major in Psychology

Psychology is a discipline that embraces both biological and social sciences. It is a science concerned with establishing principles and laws regarding the ways in which people think and behave through the scientific study of human behavior.

The orientation of the Carnegie Mellon Psychology curriculum is toward developing highly skilled and knowledgeable graduates. About half of our graduates go on to graduate or professional school. The remainder seek to expand their problem-oriented analytic skills to qualify themselves for job opportunities beyond those typically open to liberal arts students.

Majors in the department are expected not only to learn about findings already established by psychologists, but also to become proficient in the investigation and analysis of behavior. This includes observing behavior, formulating hypotheses, designing experiments to test these hypotheses, running experiments, performing statistical analysis, and writing reports. The department has many resources for students to use in acquiring these skills. For instance, students interested in child development may be involved in the child development laboratory and observational facilities which are a part of the Carnegie Mellon Children's School which operates under the department's aegis. Students interested in health or clinical psychology might have opportunities to do internships in applied settings, and all Psychology majors have access to extensive computer facilities for data analysis and simulation work. The department also has a state of the art set of undergraduate research laboratories and computer clusters, and through the Scientific Imaging & Brain Research Center, a magnet is in use for conducting brain imaging studies using fMRI.

In addition to formal class work, students are encouraged to participate in elective research projects where they may register and receive credit for freshmen research experience course, 85-506 Readings in Psychology, Fall research experience in 85-507 Research in Psychology or Spring research experience in 85-508 Research in Psychology. In the research in psychology course, the student may work on an ongoing research project or develop and carry out a new research project with a faculty member. There is university and departmental funding available to help support student-initiated research projects and student travel to present research results at scientific meetings and conferences. In the Readings courses, the student reads extensively on a particular topic. The faculty member and student meet to discuss the readings, and the student writes a paper on the topic selected. The Psychology Department Website (<http://www.psy.cmu.edu>), provides descriptions of faculty (<http://www.psy.cmu.edu/people/faculty.html>) research interests that the student can use in determining who should be approached to supervise a particular research or reading project.

Students interested in gaining field work experience via a number of internship opportunities available to them can receive credit through 85-482 Internship in Psychology, 85-480 Internship in Clinical Psychology or 85-484 Practicum in Child Development. Clinical internships are available with a variety of clinical settings including the prestigious Western Psychiatric

Institute and Clinic (the teaching hospital of the Department of Psychiatry at the University of Pittsburgh Medical School). During the internship, students get first-hand experience with different clinical populations. Developmental Practicum experience is available in the department-run CMU Children's School (<http://www.psy.cmu.edu/cs>).

Psychology Curriculum

Mathematics 19-20 units

21-111-21-112 Calculus I-II 20

or

21-120-21-122 Differential and Integral Calculus - Integration and Approximation 20

or

21-120-21-256 Differential and Integral Calculus - Multivariate Analysis 19

*Students who place out of 21-120 with AP credit are only required to successfully complete 21-122 or 21-256 instead of the full two semester sequence.

*21-124 may be substituted for 21-122 for those interested in Neuroscience or Biology.

Statistics Sequence 18 units

36-201	Statistical Reasoning and Practice	9
36-309	Experimental Design for Behavioral and Social Sciences	9

*In certain circumstances, 36-202 can be a substitute for 36-309.

Breadth Requirement 36 units

85-102	Introduction to Psychology *	9
Survey Courses - Complete Three		
85-211	Cognitive Psychology	9
or 85-213	Human Information Processing and Artificial Intelligence	
85-219	Biological Foundations of Behavior	9
85-221	Principles of Child Development	9
85-241	Social Psychology	9
85-251	Personality	9

* A fourth survey course can be taken in place of Introduction to Psychology

Research Methods* 18 units

Complete two courses.

85-310	Research Methods in Cognitive Psychology	9
85-314	Cognitive Neuroscience Research Methods	9
85-320	Research Methods in Developmental Psychology	9
85-330	Analytic Research Methods	9
85-340	Research Methods in Social Psychology	9

* Prerequisites for all Research Methods courses: 36-309 or equivalent, and corresponding survey course.

Advanced Courses 18 units

Advanced psychology courses exist within four areas (cognitive, cognitive neuroscience, developmental, social and health psychology.) Any advanced content course or seminar in psychology or any psychology course higher than 85-350. Exceptions for the advanced course requirement are: 85-480, 85-482, 85-484, 85-484, 85-506, 85-507, 85-508, 85-601, 85-602, 66-501, 66-502.

Computer Science Requirement 10 units

15-110	Principles of Computing	10
--------	-------------------------	----

Natural Science Requirement (B.A. 18 units, B.S. 36 units, both of which include 9 units of GenEd Science)

The Psychology major requires (for B.S. candidates) three additional natural science courses (with two in the same science) beyond the College's General Education natural science requirement. For the B.A. the requirement is one course beyond the General Education requirement in natural science.

These courses can be selected from the following areas:

03-XXX	Biology*
09-XXX	Chemistry
33-XXX	Physics

*Given the growing relevance of biology to psychology, it is strongly recommended that for the B.S. a minimum of two courses in biology be included as part of the natural science requirement.

Additional Major in Psychology

In order to complete an additional major in Psychology, a student must fulfill all of the Psychology major requirements within the department -- in other words, the breadth requirement, computing requirement, three survey courses at the 200-level, two research methods courses, and two advanced courses. These courses must include at least 81 units, plus calculus prerequisites and the 36-201 statistics course or equivalent and 36-309. In addition, B.S. candidates must take the three-course science requirement and B.A. candidates complete one science course beyond the GenEd requirement.

Concentrations within the Psychology Major

Students who wish to focus their Psychology program on a specific area can do so either by the careful selection of Psychology elective courses focusing on their area of interest or by pursuing one of the following concentrations. Students must obtain a concentration form from the Undergraduate Program Coordinator, Emilie O'Leary, receive approval from their psychology faculty advisor, then returning the signed copy to Emilie in Baker Hall 339. The completion of a concentration will be recognized in the Psychology Graduation Brochure.

Health-Psychology Concentration

For Psychology majors who wish to have a focus of their study on Health Psychology, the following courses should be selected as part of their Psychology Major in conjunction with their Psychology advisor's approval.

As part of the B.S. science requirement:

- 03-121 Modern Biology
- + one additional Biology course

As part of the psychology breadth requirement:

- 85-219 Biological Foundations of Behavior
- 85-241 Social Psychology

As part of the psychology Research Methods requirement:

- 85-340 Research Methods in Social Psychology

As part of the advanced coursework in psychology requirement, at least two of the following:

- 85-442 Health Psychology
- 85-443 Social Factors and Well-Being
- 85-446 Psychology of Gender
- 85-501 Stress, Coping and Well-Being

Cognitive-Neuroscience Concentration

For Psychology majors who wish to have a focus of their study be on Cognitive Neuroscience, the following courses should be selected as part of their Psychology Major in conjunction with their Psychology advisor's approval.

As part of the B.S. Science requirement:

- 03-121 Modern Biology
- 03-363 Systems Neuroscience

As part of the psychology Breadth requirement:

- 85-211 Cognitive Psychology
- 85-219 Biological Foundations of Behavior

As part of the Research Methods requirement:

- 85-310 Research Methods in Cognitive Psychology
- 85-314 Cognitive Neuroscience Research Methods

As part of the advanced coursework in psychology requirement, at least two of the following:

- 85-356 Music and Mind: The Cognitive Neuroscience of Sound
- 85-370 Perception
- 85-406 Autism: Psychological and Neuroscience Perspectives
- 85-414 Cognitive Neuropsychology
- 85-419 Introduction to Parallel Distributed Processing
- 85-429 Cognitive Brain Imaging

Developmental Psychology Concentration

For Psychology majors who wish to have a focus of their study be on Developmental Psychology, the following courses should be selected as part of their Psychology Major in conjunction with their Psychology advisor's approval.

As part of the B.S. science requirement:

- 03-121 Modern Biology

As part of the psychology Breadth requirement:

- 85-221 Principles of Child Development

As part of the psychology Research Methods Requirement:

- 85-320 Research Methods in Developmental Psychology

As part of the advanced coursework in psychology requirement, at least two of the following:

- 85-354 Infant Language Development
- 85-363 Attention, Its Development and Disorders
- 85-406 Autism: Psychological and Neuroscience Perspectives
- 85-423 Cognitive Development

Additional course requirement, one of the following:

- 85-484 Practicum in Child Development
- 03-350 Developmental Biology

Cognitive Psychology Concentration

For Psychology majors who wish to have a focus of their study be on Cognitive Psychology and/or Cognitive Modeling, the following courses should be selected as part of their Psychology Major in conjunction with their Psychology advisor's approval.

As part of the B.S. science requirement:

- 03-121 Modern Biology

As part of the psychology Breadth requirement:

- 85-211 Cognitive Psychology

As part of the psychology Research Methods requirement:

- 85-310 Research Methods in Cognitive Psychology

As part of the advanced coursework in psychology requirement, at least two of the following:

- 85-355 Introduction to Cognitive Neuroscience
- 85-356 Music and Mind: The Cognitive Neuroscience of Sound
- 85-370 Perception
- 85-380 In Search of Mind: The History of Psychology
- 85-390 Human Memory
- 85-392 Human Expertise
- 85-395 Applications of Cognitive Science
- 85-406 Autism: Psychological and Neuroscience Perspectives
- 85-412 Cognitive Modeling

- 85-414 Cognitive Neuropsychology
- 85-419 Introduction to Parallel Distributed Processing
- 85-421 Language and Thought
- 85-426 Learning in Humans and Machines
- 85-429 Cognitive Brain Imaging

Social-Personality Psychology Concentration

For Psychology majors who wish to have a focus of their study be on Social and/or Personality Psychology, the following courses should be selected as part of their Psychology Major in conjunction with their Psychology advisor's approval.

As part of the Psychology Breadth requirement:

- 85-241 Social Psychology
- 85-251 Personality

As part of the Psychology Research Methods requirement:

- 85-340 Research Methods in Social Psychology

As part of the advanced coursework in psychology requirement, at least two of the following:

- 85-352 Evolutionary Psychology
- 85-358 Pro-Social Behavior
- 85-375 Crosscultural Psychology
- 85-377 Attitudes and Persuasion
- 85-443 Social Factors and Well-Being
- 85-444 Relationships
- 85-446 Psychology of Gender
- 85-501 Stress, Coping and Well-Being

Clinical/Counseling Psychology Concentration

For Psychology majors who wish to have a focus of their study be on Clinical/Counseling Psychology, the following courses should be selected as part of their Psychology Major in conjunction with their Psychology advisor's approval.

As part of the Psychology Breadth requirement at least one of the following:

- 85-241 Social Psychology
- 85-251 Personality

Required additional coursework:

- 85-261 Abnormal Psychology
- 85-281 Introduction to Clinical Psychology
- 85-480 Internship in Clinical Psychology

As part of the Psychology Research Methods requirements:

- 85-340 Research Methods in Social Psychology

As part of the advanced coursework in psychology requirement, at least two of the following:

- 85-375 Crosscultural Psychology
- 85-377 Attitudes and Persuasion
- 85-406 Autism: Psychological and Neuroscience Perspectives
- 85-414 Cognitive Neuropsychology
- 85-425 Child Psychopathology and Treatment
- 85-442 Health Psychology
- 85-443 Social Factors and Well-Being
- 85-444 Relationships
- 85-446 Psychology of Gender
- 85-481 Seminar in Intervention
- 85-501 Stress, Coping and Well-Being

Neuroscience Major

The Psychology Department at Carnegie Mellon University has a major focus on the role of the brain and nervous system in cognition and behavior, including biological approaches involving the health impact that arises from the interaction of behavior with the nervous, endocrine, and immune systems. These interests are manifested in faculty research (<http://www.psy.cmu.edu>), departmental and university centers that operate from or heavily involve the department (e.g., the Center for Cognitive Brain Imaging (<http://www.ccbi.cmu.edu>), and the Center for the Neural Basis of Cognition (<http://www.cnbc.cmu.edu>)) as well as undergraduate coursework (http://www.psy.cmu.edu/undergrad_program) and graduate coursework.

For undergraduates, there are a number of ways in which students with an interest in these approaches can pursue that interest in an organized fashion.

Carnegie Mellon University recently launched *BrainHub* – an initiative designed to leverage its core strengths in cognitive science, engineering, and computer science, and our emerging excellence in biological sciences, to harness the technology that helps the world explore brain and behavior. Students will be able to take advantage of exciting opportunities such as lectures hosted on various topics, newly funded CMU campus research projects trying to answer pressing questions in brain science and the many global partnerships with other institutions all with the same motivating goal to enhance and increase research in brain sciences.

Finally, for any interested student, there is a minor in Cognitive Neuroscience available through the Psychology department (see below).

Unified Double Major in Psychology & Biological Sciences

This major is intended to reflect the interdisciplinary nature of current research in the fields of biology and psychology, as well as the national trend in some professions to seek individuals broadly trained in both the social and natural sciences.

Note: Students entering from the College of Humanities and Social Sciences will earn a Bachelor of Science in Psychology and Biological Sciences. Students in the Mellon College of Science will earn a Bachelor of Science in Biological Sciences and Psychology. Students in the joint Science and Humanities Scholars (SHS) program can complete the SHS educational core and choose either departmental order for their diploma.

Depending on a student's home college (H&SS or MCS), General Education (GenEd) requirements will be different. GenEd requirements for H&SS (p. 202) and MCS (p. 307) are found on their respective Catalog pages.

Degree Requirements:

Biological Sciences		Units
03-121	Modern Biology	9
03-231	Biochemistry I	9
03-240	Cell Biology	9
03-330	Genetics	9
03-343	Experimental Techniques in Molecular Biology	12
03-411	Topics in Research	1
03-412	Topics in Research	1
03-xxx	General Biology Elective	9
03-3xx	Advanced Biology Elective	9
03-3xx	Advanced Biology Elective	9
Total Biology units		77
Mathematics, Statistics, Physics and Computer Science		Units
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
or 21-124	Calculus II for Biologists and Chemists	
36-247	Statistics for Lab Sciences	9
or 36-201	Statistical Reasoning and Practice	
36-309	Experimental Design for Behavioral and Social Sciences	9
33-111	Physics I for Science Students MCS students must complete Physics II also (either 33-112 or 33-122)	12
15-110	Principles of Computing *	10

Minimum number of units required for degree:

The Major in Cognitive Science

The Psychology Department offers a B.S. degree in Cognitive Science. The field of cognitive science has grown out of increasingly active interaction among psychology, linguistics, artificial intelligence, philosophy, and neuroscience. All of these fields share the goal of understanding intelligence. By combining these diverse perspectives, students of cognitive science are able to understand cognition at a deep level. Because this major is administered by the Psychology Department, it focuses on human cognition and the experimental study of the human mind as illuminated by the techniques of the above disciplines.

Cognitive Science Curriculum

The Cognitive Science major is only offered as a B.S. degree. Candidates should complete before the junior year the two-semester calculus sequence 21-120 /21-256 (or alternatively 21-120/21-122)* and a statistics sequence (36-201 or equivalent and if possible, 36-309). In addition, candidates complete 15-112 Fundamentals of Programming and Computer Science, as their departmental computing course.

Because of the number and sequential nature of required courses, prospective Cognitive Science majors are encouraged to begin course work for the major prior to junior year. In particular, completion of calculus, 36-201, and 85-211 or 85-213 before the junior year will enable students to complete 85-310 and 36-309 and by the Fall semester of their sophomore or junior year and, if interested, to then take advantage of research opportunities in the department.

*The 3-Semester sequence 21-111 /21-112/21-256 may be substituted by students who have already taken 21-111 before deciding on the major.

Computing Prerequisite10 units

15-112	Fundamentals of Programming and Computer Science	12
--------	--	----

Mathematics29-30 units

21-120-21-122	Differential and Integral Calculus - Integration and Approximation	20
---------------	--	----

or

21-120-21-256	Differential and Integral Calculus - Multivariate Analysis	19
---------------	--	----

21-127	Concepts of Mathematics	10
--------	-------------------------	----

*Students who place out of 21-120 are only required to successfully complete 21-122 or 21-256 instead of the full two-semester sequence.

Statistics Sequence18 units

36-201	Statistical Reasoning and Practice	9
36-309	Experimental Design for Behavioral and Social Sciences	9

Computational/Cognitive Modeling Core29-31 units

Two of the following:		Units
15-122	Principles of Imperative Computation	10
15-150	Principles of Functional Programming	10
15-251	Great Theoretical Ideas in Computer Science	12

Plus one of the following:

85-412	Cognitive Modeling	9
85-419	Introduction to Parallel Distributed Processing	9
85-426	Learning in Humans and Machines	9

Cognitive Psychology Core27 units

		Units
85-211	Cognitive Psychology	9
or 85-213	Human Information Processing and Artificial Intelligence	
85-310	Research Methods in Cognitive Psychology	9

Plus one of the following:

85-219	Biological Foundations of Behavior	9
85-355	Introduction to Cognitive Neuroscience	9
85-414	Cognitive Neuropsychology	9

Cognitive Science Concentration

(4 courses, concentration approval required)

These four courses are chosen in conjunction with your advisor to form a coherent area of concentration from the course list under "Cognitive Science Concentration" in the current Undergraduate Catalog. Before proceeding with the choice of courses, students must fill out the concentration form, obtained from Emilie O'Leary in Baker Hall 339, with a description of the concentration area and the planned set of four courses. Courses not represented on the list may, with pre-approval of advisor and department, be used to satisfy part of this requirement. The four courses are not required to be within any single category below but be coherent within the major and the focus may vary across disciplinary boundaries.

Computer Science36 units

15-385	Introduction to Computer Vision	6
15-453	Formal Languages, Automata, and Computability	9
10-601	Introduction to Machine Learning	12
05-410	User-Centered Research and Evaluation	12

05-432 Personalized Online Learning 12

Psychology

85-219	Biological Foundations of Behavior	9
85-352	Evolutionary Psychology	9
85-354	Infant Language Development	9
85-355	Introduction to Cognitive Neuroscience	9
85-370	Perception	9
85-375	Crosscultural Psychology	9
85-380	In Search of Mind: The History of Psychology	9
85-390	Human Memory	9
85-392	Human Expertise	9
85-395	Applications of Cognitive Science	9
85-406	Autism: Psychological and Neuroscience Perspectives	9
85-412	Cognitive Modeling	9
85-414	Cognitive Neuropsychology	9
85-419	Introduction to Parallel Distributed Processing	9
85-421	Language and Thought	9
85-423	Cognitive Development	9
85-426	Learning in Humans and Machines	9
85-429	Cognitive Brain Imaging	9

Philosophy

80-210	Logic and Proofs	9
80-211	Logic and Mathematical Inquiry	9
80-220	Philosophy of Science	9
80-254	Analytic Philosophy	9
80-255	Pragmatism	9
80-270	Philosophy of Mind	9
80-310	Formal Logic	9
80-311	Undecidability and Incompleteness	9
80-314	Logic and Artificial Intelligence	9

Linguistics

76-385	Introduction to Discourse Analysis	9
80-280	Linguistic Analysis	9

Decision Sciences

88-302	Behavioral Decision Making	9
--------	----------------------------	---

Neurosciences

03-362	Cellular Neuroscience	9
03-363	Systems Neuroscience	9
42-202	Physiology	9
15-386	Neural Computation	9
15-883	Computational Models of Neural Systems	12

Science Requirement 18 units (minimum)

The Cognitive Science program requires two additional science courses (in the same science) beyond the college's two-course Science General Education requirement.

These can be selected from any one of the following areas.

03-xxx	Biology*
09-xxx	Chemistry
33-xxx	Physics

* Those interested in a cognitive neuroscience focus are recommended to take biology courses, including if possible, 03-362, or 03-363.

Additional Major in Cognitive Science

In order to complete a double major in Cognitive Science, a student must fulfill the major requirements as listed under the Cognitive Science major. These include the programming requirement (15-112), the Mathematics and Statistics prerequisites, Computational/Cognitive Modeling Core, The Cognitive Psychology Core, the Cognitive Science Concentration Requirement, and the Supplementary Science Requirement. Students will

be assigned a department advisor to help plan their program of studies in Cognitive Science.

Minors in Psychology and Cognitive Neuroscience

72 units Minor in Psychology

I. Introductory course

85-102	Introduction to Psychology*	9
--------	-----------------------------	---

*A survey course can be taken in place of 85-102.

II. Area Survey courses

Complete two courses.

85-211	Cognitive Psychology	9
or 85-213	Human Information Processing and Artificial Intelligence	
85-219	Biological Foundations of Behavior	9
85-221	Principles of Child Development	9
85-241	Social Psychology	9
85-251	Personality	9

III. Statistics

36-201	Statistical Reasoning and Practice	9
36-309	Experimental Design for Behavioral and Social Sciences	9

27 units Upper Level Courses

Complete three courses from categories IV and V, with at least one course from each.

IV. Research Methods Courses* (minimum 9 units)

85-310	Research Methods in Cognitive Psychology	9
85-314	Cognitive Neuroscience Research Methods	9
85-320	Research Methods in Developmental Psychology	9
85-330	Analytic Research Methods	9
85-340	Research Methods in Social Psychology	9

* Prerequisites for all Research Methods courses: 36-309 and the appropriate survey course.

V. Advanced courses (minimum 9 units)

Advanced psychology courses exist within four areas (cognitive, cognitive neuroscience, developmental, social and health psychology.) Any advanced content course or seminar in psychology or any psychology course higher than 85-350. Exceptions for the advanced course requirement are: 85-480, 85-482, 85-484, 85-484, 85-506, 85-507, 85-508, 85-601, 85-602, 66-501, 66-502.

Minor in Cognitive Neuroscience 63 units

The minor in Cognitive Neuroscience offered by the Department of Psychology is similar to the Neuroscience Minor offered by the Department of Biological Sciences. The differences between the two forms of the minor are determined by one required course, and additionally, by the students' choice of distribution electives. The requirements for the Cognitive Neuroscience Minor include 7 courses: four required courses, and three distribution and elective courses.

Because of the curriculum within this minor may overlap with some degree requirements, no more than 2 courses fulfilling Neuroscience or Cognitive Neuroscience Minor requirements may count towards a student's major or other minor requirements.

Cognitive Neuroscience Curriculum

Required Coursework

03-121	Modern Biology	9
03-363	Systems Neuroscience	9
85-219	Biological Foundations of Behavior	9
85-211	Cognitive Psychology	9
or 85-213	Human Information Processing and Artificial Intelligence	

Distribution Requirements

Three courses, including at least 1 from each of the following categories

Approaches to Cognitive Neuroscience		
85-314	Cognitive Neuroscience Research Methods	9
85-412	Cognitive Modeling	9
85-414	Cognitive Neuropsychology	9
85-419	Introduction to Parallel Distributed Processing	9
85-429	Cognitive Brain Imaging	9
15-386	Neural Computation	9
15-883	Computational Models of Neural Systems	12
36-746	Statistical Methods for Neuroscience and Psychology	12
Cognitive Neuroscience Electives		
03-260	Neurobiology of Disease	9
03-362	Cellular Neuroscience	9
03-364	Developmental Neuroscience	9
03-761	Neural Plasticity	9
15-486	Artificial Neural Networks	12
85-356	Music and Mind: The Cognitive Neuroscience of Sound	9
85-370	Perception	9
85-385	Auditory Perception: Sense of Sound	9
85-390	Human Memory	9
85-406	Autism: Psychological and Neuroscience Perspectives	9

The Honors Program

The Honors Program provides recognition of outstanding performance by students in the Psychology department. Participation enables students to pursue their own research ideas through completion of an honors thesis. The honors thesis is completed during the senior year. By completing a thesis, the student earns 18 units of credit and qualifies for graduation with "College Honors." To qualify for the Honors Program, the student must maintain a quality point average of at least 3.50 in the major and 3.25 overall. More information on the Honor program can be found here (<http://www.cmu.edu/dietrich/undergraduate/programs/shp>).

A year long departmental senior thesis course exists (66-501 and 66-502) for students interested in pursuing a sizable research project who do not qualify for the honors program. More information can be obtained by contacting Emilie O'Leary at emilier@andrew.cmu.edu.

Department of Social and Decision Sciences

Department Office: Porter Hall 208
<http://www.cmu.edu/dietrich/sds/>

The Department of Social and Decision Sciences is a multidisciplinary department that offers undergraduate programs that seamlessly combine frontier knowledge in the social sciences with the practical skills needed to excel in key decision making roles in the public, private, and non-profit sectors and in advanced graduate studies. Our students learn how to combine intellectual ideals with the realities of human and organizational behavior and to apply these lessons across a wide variety of endeavors, ranging from government service to leadership positions in the information economy.

The department offers undergraduate majors in Decision Science and in Policy and Management. The core courses leverage our strength in decision analysis, empirical research, organizations, and policy analysis. In addition to completing this core, students also specialize in their major area through a set of required and elective courses.

Our faculty is committed to the academic success and growth of our students and many of our undergraduates work with faculty on research projects and internships. The directors of the majors are easily accessible and encourage students to talk with them about their curriculum, progress, and available opportunities.

The Department of Social and Decision Sciences has a long history of creating innovative and prescient undergraduate programs that combine key ideas from across the social sciences into cohesive majors that allow our graduates to excel in their chosen professions or in the pursuit of advanced studies. Our emphasis on the theory and practice of individual and social decision making linked with our high-quality, multidisciplinary social science faculty, provides a solid foundation from which graduates can embrace a variety of future paths.

The Major in Decision Science

Baruch Fischhoff, Faculty Director
 Office: Porter Hall 219E
 Connie Angermeier, Academic Advisor
 Office: Porter Hall 208A
 Email: cla2@andrew.cmu.edu

The interdisciplinary field of Decision Science seeks to understand and improve the judgment and decision making of individuals, groups, and organizations. Qualified graduates can continue to PhD programs in Decision Science or related fields (e.g., psychology, business), pursue professional degrees (e.g., MBA, MD, JD, MPH), or take professional positions in business, government, consulting, or the non-profit sector. Students work with faculty and the Academic Advisor to tailor their education to their personal needs and interest.

Carnegie Mellon is one of the leading centers for the study of Decision Science - and offers the only undergraduate major that integrates analytical and behavioral approaches to decision making. Our faculty are involved in applying Decision Science in a wide variety of areas, allowing them to share practical experiences with students. These applications include medical decision making (e.g., conveying the costs and benefits of treatment options), legal decision making (e.g., reducing the effects of hindsight bias on attributions of responsibility for accidents), risk management (e.g., assessing and communicating the risks of climate change), marketing (e.g., understanding the effects of inter-temporal choice on purchasing decisions), and business (e.g., identifying unrecognized conflicts of interest).

Decision Science is grounded in theories and methods drawn from psychology, economics, philosophy, statistics, and management science. Courses in the major cover the three aspects of decision science: (a) normative analysis, creating formal models of choice; (b) descriptive research, studying how cognitive, emotional, social, and institutional factors affect judgment and choice, and (c) prescriptive interventions, seeking to improve judgment and decision making. In addition to gaining a broad education in the principles of judgment and decision making, Decision Science majors gain broadly applicable skills in research design and analysis. They also have the chance to think about and discuss decision making in many different areas.

The core courses present fundamental theories and results from the study of decision making, along with their application to real-world problems. They introduce students to methods for collecting and analyzing behavioral data. For example, students learn to conduct surveys (e.g., uncovering consumer or managerial preferences), design experiments (e.g., evaluating theories,

comparing ways of presenting information), and evaluate the effectiveness of interventions.

The elective courses provide students with additional knowledge in areas of decision making that meet their personal, intellectual, and career goals. These courses are organized into six clusters: biological and behavioral aspects of decision making, managerial and organizational aspects, philosophical and ethical perspectives, economic and statistical methods, public policy, and research methods. Students can concentrate in one area or spread their studies across them. In addition to coursework, the department offers research opportunities for interested and qualified students. Participating in research helps students to extend their mastery of decision science, discover whether a research career is right for them, and get to know faculty and graduate students better.

Prerequisites

All Decision Science majors must complete mathematics, statistics, and analytic methods prerequisites (see below), by the end of the sophomore year.

Mathematics Prerequisite	Units
21-111-21-112 Calculus I-II or 21-120 Differential and Integral Calculus	10-20

Students who successfully pass the proctored Calculus Assessment on campus or who receive credit through accepted standardized exams (such as AP, IB, or Cambridge) at the 21-120 or 21-122 levels will be required to take a more advanced 21-xxx course for this prerequisite. 21-122, 21-240, or 21-256 are suggested.

Statistics Prerequisite	Units
36-201 Statistical Reasoning and Practice	9

Students must take one course from the following set (or an approved alternative). Students may not count a course used to fulfill the Mathematics Prerequisite as also filling the Analytic Methods Prerequisite.

Analytic Methods Prerequisite	Units
21-122 Integration and Approximation	10
21-256 Multivariate Analysis	9
21-257 Models and Methods for Optimization	9
36-309 Experimental Design for Behavioral and Social Sciences	9
36-401 Modern Regression	9
36-410 Introduction to Probability Modeling	9
80-211 Logic and Mathematical Inquiry	9
80-212 Arguments and Logical Analysis	9
88-252 Causal Inference in the Field: Using Data to Study Crime, Love, Sports & More	9

Curriculum

The core curriculum in Decision Science consists of two courses in empirical research methods and five courses providing the theoretical perspectives of Decision Science.

Theoretical Perspectives	Units
88-120 Reason, Passion and Cognition **	9
85-211 Cognitive Psychology	9
88-220 Policy Analysis I	9
88-223 Decision Analysis and Decision Support Systems	9
88-302 Behavioral Decision Making	9
	45

** 88-120 should be taken in the freshman or sophomore year.

Research Methods	Units
36-202 Statistical Methods	9
88-251 Empirical Research Methods	9

18

Electives 45 units

Complete at least 45 units of courses from the following categories. The selected courses may be from one category or from any combination. Note that not all elective courses are offered every year.

At least three of these courses (27 units) must be Department of Social and Decision Sciences courses (88-xxx).

1. Biological and Behavioral Aspects of Decision Making		Units
85-352	Evolutionary Psychology	9
85-377	Attitudes and Persuasion	9
85-442	Health Psychology	9
88-342	The Neuroscience of Decision Making	9
88-360	Behavioral Economics	9
88-365	Behavioral Economics and Public Policy	9
88-388	Psychological Models of Decision Making	9
2. Managerial and Organization Aspects of Decision Making		
70-311	Organizational Behavior*	9
70-381	Marketing I	9
70-460	Mathematical Models for Consulting	9
88-221	Policy Analysis II	9
88-260	Organizations*	9
88-419	Negotiation	9
88-444	Public Policy and Regulation	9
88-451	Policy Analysis Senior Project	12
or 88-452	Policy Analysis Senior Project	
3. Philosophical and Ethical Perspectives on Decision Making		Units
19-426	Environmental Decision Making	9
80-208	Critical Thinking	9
80-221	Philosophy of Social Science	9
80-245	Medical Ethics	9
80-305	Rational Choice	9
80-321	Causation, Law, and Social Policy	9
4. Economic and Statistical Methods for Decision Science		Units
70-460	Mathematical Models for Consulting	9
73-347	Game Theory for Economists	9
80-337	Philosophy, Politics & Economics	9
80-405	Game Theory*	9
88-316	Game Theory*	9
88-360	Behavioral Economics	9
88-367	Behavioral Economics in the Wild	9
5. Decision Science and Public Policy		
84-393	Legislative Decision Making: U.S. Congress	9
88-221	Policy Analysis II	9
88-365	Behavioral Economics and Public Policy	9
88-405	Risk Perception and Communication	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
88-444	Public Policy and Regulation	9
88-451	Policy Analysis Senior Project	12
or 88-452	Policy Analysis Senior Project	
6. Research Methods for Decision Science		Units
36-303	Sampling, Survey and Society	9
70-460	Mathematical Models for Consulting	9
88-252	Causal Inference in the Field: Using Data to Study Crime, Love, Sports & More	9
88-388	Psychological Models of Decision Making	9
88-402	Modeling Complex Social Systems	9
88-435	Decision Science and Policy	9

Note: Some courses have additional prerequisites.

Elective	Elective

This is presented as a recommended plan for completing major requirements. The major can be completed in as few as two years (not that it must be), but students may not have time for other opportunities such as additional majors or study abroad. Students may declare their major as early as after spring break in the freshman year. Students who are planning to study abroad or to apply for the Heinz Accelerated Masters Program may have a very different curriculum map and should consult early - and often - with the Decision Science Academic Advisor.

Students are encouraged to consider the Washington Semester Program as part of their education. Suitable courses will be considered as fulfilling requirements of electives in the major. Please send the course syllabus, along with a note explaining how the course addresses fundamental aspects of decision science in one of the six elective categories.

88-120 should be taken as the first course in the Decision Science sequence. It is intended for students in their first or second year; it is offered in Fall semesters. It may be taken as late as the junior year.

Additional Major in Decision Science

Students who elect Decision Science as an additional major must fulfill all of the requirements of the Decision Science major.

Students pursuing Policy and Management with an additional major in Decision Science and may only count 36-202, 88-220, 88-223, and 88-251 toward the completion of both majors.

Additional majors cannot count menu electives toward simultaneously fulfilling more than one major or minor. Students who are interested in an additional major in Decision Science should see the Academic Advisor of the Decision Science program.

The Major in Policy and Management

Paul Fischbeck, Director
Office: Porter Hall 208F
Connie Angermeier, Academic Advisor
Office: Porter Hall 208A
Email: cla2@andrew.cmu.edu

The Policy and Management major prepares students for key decision-making and management roles in government, non-profit organizations, and business. The major emphasizes analytic approaches to decision making and practical management skills necessary for graduates to excel in both the public and private sectors. The multidisciplinary curriculum merges frontier knowledge on both the ideals of decision making, policy, and organization, as well as the realities of individual and organizational behavior that must be confronted if high-quality outcomes are going to be attained.

The major is comprised of four clusters of courses. The Analytic Methods requirement consists of four courses that provide theoretical training and practical experience in problem solving and decision making. These courses provide systematic methods for dealing with the complexities that make decisions difficult, ranging from incorporating issues of risk and uncertainty in decision making to dealing with choices that have mutually conflicting objectives. For example, a business or government agency may need to decide on a policy for mitigating the uncertain impacts of air

pollution while simultaneously trying to minimize the costs of such a policy on manufacturing. A firm might want to consider the uncertain reductions in security dangers from alternative policies to protect against terrorism. In this requirement, students will gain an appreciation of the economic analysis of complex decisions, as well as the trade-off between economic and political-based decision making.

The Organizational Context requirement is a course that emphasizes the analysis of how people organize and coordinate their behavior to perform complex tasks that are beyond the capability of any single individual. The course uses a multidisciplinary approach to analyze the potential shortcomings of large organizations, such as inertia, group-think, coordination failure, and bureaucratic infighting.

The Research Methods requirement is comprised of two courses focused on key methods for collecting and analyzing data that are needed to make informed decisions. Students learn to use interviews, surveys, experiments, and econometric methods to enhance their ability to test existing, and design new, policies.

Finally, the Electives requirement consists of five courses chosen by the student, in coordination with the Academic Advisor, to add depth and breadth to the major. These courses are chosen from five categories that emphasize different aspects of decision making and management: (1) policy making, (2) management, (3) technology and information, (4) international policy, and (5) political science and law. The selected courses may be from one category or from any combination of categories.

The Policy and Management major provides an excellent combination of theoretical and practical skills for students who intend to seek managerial positions. Because of its strong analytic orientation, it is also an excellent major for those who intend to go on to professional school programs in law, business, or public policy. It is also an appropriate choice for students pursuing graduate degrees in economics, political science, or decision science. One such graduate option is the accelerated masters program offered by the H. J. Heinz III School of Public Policy and Management, in which a student earns both a B.S. in Policy and Management and a M.S. in Public Policy and Management in five years.

Prerequisites

All Policy and Management majors must complete mathematics and statistics prerequisites (see below), by the end of the sophomore year.

Mathematics Prerequisites	Units
21-111-21-112 Calculus I-II	10-20
or 21-120 Differential and Integral Calculus	
21-122 Integration and Approximation	10
or 21-256 Multivariate Analysis	

Students who successfully pass the proctored Calculus Assessment on campus or who receive credit through accepted standardized exams (such as AP, IB, or Cambridge) at the 21-122 level will be required to take a more advanced 21-xxx course for this prerequisite. 21-240 or 21-256 are suggested.

Statistics Prerequisite	Units
36-201 Statistical Reasoning and Practice	9

Curriculum

Analytical Methods	Units
88-220 Policy Analysis I	9
88-221 Policy Analysis II	9
88-223 Decision Analysis and Decision Support Systems	9
88-451 Policy Analysis Senior Project	12
or 88-452 Policy Analysis Senior Project	
	39

Organizational Context	Units
88-260 Organizations	9
	9

Research Methods	Units
36-202 Statistical Methods	9
88-251 Empirical Research Methods	9
	18

Electives 45 units

Complete at least 45 units (a minimum of five courses) from the following categories of courses. Most courses listed below are 9-unit courses, but some are less. When courses offered for less than 9 units are chosen,

students should note that a minimum of 45 units is required, and should plan to take one or more additional courses as appropriate. The categories were created only to help in your selection process. You may select courses from one category or from any combination of categories.

At least 27 units (a minimum of three courses) must be Social and Decision Sciences courses (88-xxx).

1. Policy Making	Units
36-303 Sampling, Survey and Society	9
73-328 Health Economics	12
73-331 Political Economy of Inequality and Redistribution	9
73-352 Public Economics	9
79-374 American Environmental History: Critical Issues	9
80-321 Causation, Law, and Social Policy	9
88-352 Environmental Economics and Policy	9
88-365 Behavioral Economics and Public Policy	9
88-412 Energy, Climate Change, and Economic Growth in the 21st Century	9
88-423 Institutions, Entrepreneurship, and Innovation	9
88-432 International Policy Decision Modeling Workshop	9
88-435 Decision Science and Policy	9
2. Management	Units
70-321 Negotiation and Conflict Resolution	9
70-332 Business, Society and Ethics	9
70-342 Managing Across Cultures	9
70-430 International Management	9
80-241 Ethical Judgments in Professional Life	9
80-244 Environmental Ethics	9
80-344 Management, Environment, and Ethics	9
88-252 Causal Inference in the Field: Using Data to Study Crime, Love, Sports & More	9
88-341 Organizational Communication	9
88-360 Behavioral Economics	9
88-363 Behavioral Economics Theory	9
88-367 Behavioral Economics in the Wild	9
88-387 Social Norms and Economics	9
88-402 Modeling Complex Social Systems	9
88-403 Network and Social Systems	9
88-419 Negotiation	9
3. Technology and Information	Units
19-402 Telecommunications Technology, Policy & Management	12
19-448 Science, Technology & Ethics	9
73-474 The Economics of Ideas: Growth, Innovation and Intellectual Property	9
79-342 Introduction to Science and Technology Studies	9
80-341 Computers, Society and Ethics	9
88-345 Perspectives on Industrial Research and Development	9
88-347 Complex Technological Systems: Past, Present, and Future	9
88-371 Entrepreneurship, Regulation and Technological Change	9
88-391 Technology and Economic Growth	9
88-413 Energy and Climate: History, Science, Technology, & Policy in the US 1776-2076	9
88-415 Global Competitiveness: Firms Nations, and Technological Change	9
4. International Policy	Units
79-278 Rights to Representation: Indigenous People and their Media	9
80-247 Ethics and Global Economics	9
80-447 Global Justice	9
84-362 Diplomacy and Statecraft	9
84-389 Terrorism and Insurgency	9
84-414 International and Subnational Security	9
88-384 Conflict and Conflict Resolution in International Relations	9
88-410 The Global Economy: A User's Guide	9

88-411	Rise of the Asian Economies	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
88-432	International Policy Decision Modeling Workshop	9
5. Political Science and Law		Units
70-364	Business Law	9
70-365	International Trade and International Law	9
73-408	Law and Economics	9
80-235	Political Philosophy	9
80-321	Causation, Law, and Social Policy	9
84-393	Legislative Decision Making: U.S. Congress	9
84-402	Judicial Politics and Behavior	9
88-281	Topics in Law: 1st Amendment *	9
or 88-284	Topics of Law: The Bill of Rights	
88-444	Public Policy and Regulation	9

* only one course (either 88-281 or 88-284) may count toward an elective requirement in the Policy and Management major.

NOTE: Some courses have additional prerequisites.

Policy and Management Elective	Policy and Management Elective
Elective	Elective
Elective	Elective

This is presented as a two-year (junior-senior) plan for completing major requirements. Its purpose is to show that this program can be completed in as few as two years; not that it must be. Students may declare their major as early as after spring break of the first year. Students who are planning to study abroad or to apply for the Heinz Accelerated Masters Program may have a very different curriculum map and should consult early - and often - with the Academic Advisor.

Students are encouraged to consider the Washington Semester Program as part of their education. Suitable courses will be considered as fulfilling requirements of electives in the major. Please discuss course selections with the Academic Advisor after acceptance to the program.

Additional Major

Students who elect Policy and Management as an additional major must fulfill all of the requirements of the Policy and Management major.

Students pursuing Decision Science with an additional major in Policy and Management may only count 36-202 , 88-220 , 88-223 , and 88-251 toward the completion of both majors.

Additional majors cannot count menu electives toward simultaneously fulfilling more than one major or minor. Students who are interested in an additional major in Policy and Management should see the Academic Advisor of the Policy and Management program.

The Minor in Policy and Management

Paul Fischbeck, Faculty Director
 Office: Porter Hall 208F
 Connie Angermeier, Academic Advisor
 Office: Porter Hall 208A
 Email: cla2@andrew.cmu.edu

Regardless of major, many Carnegie Mellon graduates will face managerial challenges and responsibilities in their professional lives. Whether these are in their area of expertise or in more general settings, these roles will to some degree require assumption of the responsibility for directing the work of others. The Policy and Management minor is intended for students who expect to need these management concepts and skills. At most, one course may be double-counted with another major or minor.

Curriculum 54 units

36 units Required Courses

88-220	Policy Analysis I	9
88-221	Policy Analysis II	9
88-223	Decision Analysis and Decision Support Systems	9
88-260	Organizations	9

18 units Electives

Complete two courses from the following categories. At least one of the courses (9 units) must be a Social and Decision Sciences course (88-xxx).

1. Policy Making		Units
36-303	Sampling, Survey and Society	9
73-328	Health Economics	12
73-331	Political Economy of Inequality and Redistribution	9
73-352	Public Economics	9
79-374	American Environmental History: Critical Issues	9
80-321	Causation, Law, and Social Policy	9
88-352	Environmental Economics and Policy	9
88-365	Behavioral Economics and Public Policy	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
88-423	Institutions, Entrepreneurship, and Innovation	9
88-432	International Policy Decision Modeling Workshop	9
88-435	Decision Science and Policy	9
2. Management		Units
70-321	Negotiation and Conflict Resolution	9
70-332	Business, Society and Ethics	9
70-342	Managing Across Cultures	9
70-430	International Management	9
80-241	Ethical Judgments in Professional Life	9
80-244	Environmental Ethics	9
80-344	Management, Environment, and Ethics	9
88-252	Causal Inference in the Field: Using Data to Study Crime, Love, Sports & More	9
88-341	Organizational Communication	9
88-360	Behavioral Economics	9
88-363	Behavioral Economics Theory	9
88-367	Behavioral Economics in the Wild	9
88-387	Social Norms and Economics	9
88-402	Modeling Complex Social Systems	9
88-403	Network and Social Systems	9
88-419	Negotiation	9
3. Technology and Information		Units
19-402	Telecommunications Technology, Policy & Management	12
19-448	Science, Technology & Ethics	9
73-474	The Economics of Ideas: Growth, Innovation and Intellectual Property	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-342	Introduction to Science and Technology Studies	9
80-341	Computers, Society and Ethics	9
88-345	Perspectives on Industrial Research and Development	9

88-347	Complex Technological Systems: Past, Present, and Future	9
88-371	Entrepreneurship, Regulation and Technological Change	9
88-391	Technology and Economic Growth	9
88-413	Energy and Climate: History, Science, Technology, & Policy in the US 1776-2076	9
88-415	Global Competitiveness: Firms Nations, and Technological Change	9
4. International Policy		Units
79-278	Rights to Representation: Indigenous People and their Media	9
80-247	Ethics and Global Economics	9
80-447	Global Justice	9
84-389	Terrorism and Insurgency	9
84-414	International and Subnational Security	9
88-384	Conflict and Conflict Resolution in International Relations	9
88-410	The Global Economy: A User's Guide	9
88-411	Rise of the Asian Economies	9
88-412	Energy, Climate Change, and Economic Growth in the 21st Century	9
88-432	International Policy Decision Modeling Workshop	9
5. Political Science and Law		Units
70-364	Business Law	9
70-365	International Trade and International Law	9
73-408	Law and Economics	9
80-235	Political Philosophy	9
80-321	Causation, Law, and Social Policy	9
84-393	Legislative Decision Making: U.S. Congress	9
84-402	Judicial Politics and Behavior	9
88-281	Topics in Law: 1st Amendment *	9
or 88-284	Topics of Law: The Bill of Rights	
88-444	Public Policy and Regulation	9

* only one course (either 88-281 or 88-284) may count toward an elective requirement in the Policy and Management minor.

NOTE: Some courses have additional prerequisites.

Faculty

LINDA BABCOCK, James Mellon Walton Professor of Economics and Department Head - Ph.D., University of Wisconsin-Madison; Carnegie Mellon, 1988-.

SAURABH BHARGAVA, Assistant Professor - Ph.D., University of California, Berkeley; Carnegie Mellon, 2012-.

SERGUEY BRAGUINSKY, Associate Professor - Ph.D., Keio University, Japan; Carnegie Mellon, 2008-.

Department of Statistics

Chris Genovese, Department Head
Paige Houser, Academic Advisor
Email: acadcoord@stat.cmu.edu
Department Office: Baker Hall 132

Uncertainty is inescapable: randomness, measurement error, deception, and incomplete or missing information complicate all our lives. Statistics is the science and art of making predictions and decisions in the face of uncertainty. Statistical issues are central to big questions in public policy, law, medicine, industry, computing, technology, finance, and science. Indeed, the tools of Statistics apply to problems in almost every area of human activity where data are collected.

Statisticians must master diverse skills in computing, mathematics, decision making, forecasting, interpretation of complicated data, and design of meaningful comparisons. Moreover, statisticians must learn to collaborate effectively with people in other fields and, in the process, to understand the substance of these other fields. For all these reasons, Statistics students are highly sought-after in the marketplace.

Recent Statistics majors at Carnegie Mellon have taken jobs at leading companies in many fields, including the National Economic Research Association, Boeing, Morgan Stanley, Deloitte, Rosetta Marketing Group, Nielsen, Proctor and Gamble, Accenture, and Goldman Sachs. Other students have taken research positions at the National Security Agency, the U.S. Census Bureau, and the Science and Technology Policy Institute or worked for Teach for America. Many of our students have also gone on to graduate study at some of the top programs in the country including Carnegie Mellon, the Wharton School at the University of Pennsylvania, Johns Hopkins, University of Michigan, Stanford University, Emory University, Yale University, Columbia University, and Georgia Tech.

The Department and Faculty

The Department of Statistics at Carnegie Mellon University is world-renowned for its contributions to statistical theory and practice. Research in the department runs the gamut from pure mathematics to the hottest frontiers of science. Current research projects are helping make fundamental advances in neuroscience, cosmology, seismology, finance, and genetics.

The faculty members are recognized around the world for their expertise and have garnered many prestigious awards and honors. (For example, three members of the faculty have been awarded the COPSS medal, the highest honor given by professional statistical societies.) At the same time, the faculty is firmly dedicated to undergraduate education. The entire faculty, junior and senior, teach courses at all levels. The faculty are accessible and are committed to involving undergraduates in research.

The Department augments all these strengths with a friendly, energetic working environment and exceptional computing resources. Talented graduate students join the department from around the world, and add a unique dimension to the department's intellectual life. Faculty, graduate students, and undergraduates interact regularly.

How to Take Part

There are many ways to get involved in Statistics at Carnegie Mellon:

- The Bachelor of Science in Statistics in the Dietrich College of Humanities and Social Sciences (DC) is a broad-based, flexible program that helps you master both the theory and practice of Statistics. The program can be tailored to prepare you for later graduate study in Statistics or to complement your interests in almost any field, including Psychology, Physics, Biology, History, Business, Information Systems, and Computer Science.
- The Minor (or Additional Major) in Statistics is a useful complement to a (primary) major in another Department or College. Almost every field of inquiry must grapple with statistical problems, and the tools of statistical theory and data analysis you will develop in the Statistics minor will give you a critical edge.
- The Bachelor of Science in Economics and Statistics provides an interdisciplinary course of study aimed at students with a strong interest in the empirical analysis of economic data. Jointly administered by the Department of Statistics and the Undergraduate Economics Program, the major's curriculum provides students with a solid foundation in the theories and methods of both fields. (See Dietrich College Interdepartmental Majors as well as later in this section)

- The Bachelor of Science in Statistics and Machine Learning is a program housed in the Department of Statistics in which students take courses focused on Machine Learning.
- The Statistical and Mathematical Sciences Program (within the Science and Humanities Scholars Program) is an alternative path for the study of Statistics that is jointly administered by the Department of Mathematical Sciences and the Department of Statistics.
- The Statistics Concentration and the OR and Statistics Concentration in the Mathematical Sciences Major (see Department of Mathematical Sciences) are jointly administered by the Department of Mathematical Sciences and the Department of Statistics.
- There are several ongoing exciting research projects in the Department of Statistics, and the department enthusiastically seeks to involve undergraduates in this work. Both majors and non-majors are welcome.
- Non-majors are eligible to take most of our courses, and indeed, they are required to do so by many programs on campus. Such courses offer one way to learn more about the Department of Statistics and the field in general.

Curriculum

Statistics consists of two intertwined threads of inquiry: Statistical Theory and Data Analysis. The former uses probability theory to build and analyze mathematical models of data in order to devise methods for making effective predictions and decisions in the face of uncertainty. The latter involves techniques for extracting insights from complicated data, designs for accurate measurement and comparison, and methods for checking the validity of theoretical assumptions. Statistical Theory informs Data Analysis and vice versa. The Statistics Department curriculum follows both of these threads and helps the student develop the complementary skills required.

Below, we describe the requirements for the Major in Statistics and the different categories within our basic curriculum, followed by the requirements for the Minor in Statistics and the requirements for the Major in Economics and Statistics.

Note: We recommend that you use the information provided below as a general guideline, and then schedule a meeting with a Statistics Undergraduate Advisor (email: acadcoord@stat.cmu.edu) to discuss the requirements in more detail, and build a program that is tailored to your strengths and interests.

B.S. in Statistics

Academic Advisor: Paige Houser
Faculty Advisor: Howard Seltman
Office: Baker Hall 132A
Email: acadcoord@stat.cmu.edu

Students in the Bachelor of Science program develop and master a wide array of skills in computing, mathematics, statistical theory, and the interpretation and display of complex data. In addition, Statistics majors gain experience in applying statistical tools to real problems in other fields and learn the nuances of interdisciplinary collaboration. The requirements for the Major in Statistics are detailed below and are organized by categories #1-#7.

1. Mathematical Foundations (Prerequisites)29–39 units

Mathematics is the language in which statistical models are described and analyzed, so some experience with basic calculus and linear algebra is an important component for anyone pursuing a program of study in Statistics.

Calculus*:

Complete one of the following three sequences of mathematics courses at Carnegie Mellon, each of which provides sufficient preparation in calculus:

Sequence 1

21-111	Calculus I	10
21-112	Calculus II	10

and one of the following:

21-256	Multivariate Analysis	9
21-259	Calculus in Three Dimensions	9

Sequence 2

21-120	Differential and Integral Calculus	10
--------	------------------------------------	----

and one of the following:

21-256	Multivariate Analysis	9
21-259	Calculus in Three Dimensions	9

Note: Other sequences are possible, and require approval from the undergraduate advisor.

Note: Passing the MSC 21-120 assessment test is an acceptable alternative to completing 21-120.

Linear Algebra:**

Complete *one* of the following three courses:

21-240	Matrix Algebra with Applications	10
21-241	Matrices and Linear Transformations	10
21-242	Matrix Theory	10

* It is recommended that students complete the calculus requirement during their freshman year.

**The linear algebra requirement needs to be completed before taking 36-401 Modern Regression.

21-241 and 21-242 are intended only for students with a very strong mathematical background.

2. Data Analysis:36-45 units

Data analysis is the art and science of extracting insight from data. The art lies in knowing which displays or techniques will reveal the most interesting features of a complicated data set. The science lies in understanding the various techniques and the assumptions on which they rely. Both aspects require practice to master.

The Beginning Data Analysis courses give a hands-on introduction to the art and science of data analysis. The courses cover similar topics but differ slightly in the examples they emphasize. 36-201 draws examples from many fields and satisfies the H&SS College Core Requirement in Statistical Reasoning. It is therefore the recommended course for students in the College. (Note: A score of 5 on the Advanced Placement (AP) Exam in Statistics may be used to waive this requirement). Other courses emphasize examples in business (36-207), engineering and architecture (36-220), and the laboratory sciences (36-247).

The Intermediate Data Analysis courses build on the principles and methods covered in the introductory course, and more fully explore specific types of data analysis methods in more depth.

The Advanced Data Analysis courses draw on students' previous experience with data analysis and understanding of statistical theory to develop advanced, more sophisticated methods. These core courses involve extensive analysis of real data with emphasis on developing the oral and writing skills needed for communicating results.

Sequence 1 (For students beginning their freshman or sophomore year)**Beginning***

Choose *one* of the following courses:

36-201	Statistical Reasoning and Practice	9
36/70-207	Probability and Statistics for Business Applications	9
36-220	Engineering Statistics and Quality Control	9
36-247	Statistics for Lab Sciences	9

*Or extra statistical elective

Note: Students who enter the program with 36-225 or 36-226 should discuss options with an advisor. Any 36-300 or 36-400 level course that does not satisfy any other requirement for a Statistics Major and Minor may be counted as a Statistical Elective.

Intermediate

Choose *one* of the following courses

36-202	Statistical Methods	9
36/70-208	Regression Analysis	9
36-309	Experimental Design for Behavioral and Social Sciences	9

*Or extra statistical elective

Advanced

Choose *one* of the following courses:

36-303	Sampling, Survey and Society	9
36-315	Statistical Graphics and Visualization	9

Students can also take a second 36-46x (see section #5).

and take the following two courses:

36-401	Modern Regression	9
36-402	Advanced Methods for Data Analysis	9

Sequence 2 (For students beginning later in their college career)**Advanced**

Choose *two* of the following courses:

36-303	Sampling, Survey and Society	9
36-315	Statistical Graphics and Visualization	9
36-461	Special Topics: Statistical Methods in Epidemiology	9
36-462	Special Topics: Data Mining	9
36-463	Special Topics: Multilevel and Hierarchical Models	9
36-464	Special Topics: Applied Multivariate Methods	9

and take the following two courses:

36-401	Modern Regression	9
36-402	Advanced Methods for Data Analysis	9

3. Probability Theory and Statistical Theory:18 units

The theory of probability gives a mathematical description of the randomness inherent in our observations. It is the language in which statistical models are stated, so an understanding of probability is essential for the study of statistical theory. Statistical theory provides a mathematical framework for making inferences about unknown quantities from data. The theory reduces statistical problems to their essential ingredients to help devise and evaluate inferential procedures. It provides a powerful and wide-ranging set of tools for dealing with uncertainty.

To satisfy the theory requirement take the following two courses:

36-225	Introduction to Probability Theory **	9
and one of the following two courses:		
36-226	Introduction to Statistical Inference	9
36-326	Mathematical Statistics (Honors)	9

**It is possible to substitute 36-217 or 21-325 for 36-225. (36-225 is the standard introduction to probability, 36-217 is tailored for engineers and computer scientists, and 21-325 is a rigorous Probability Theory course offered by the Department of Mathematics.)

Comments:

(i) In order to be a Major or a Minor in good standing, a grade of at least a C is required in 36-225, 36-226 and 36-401. In particular, a grade of C or higher is required in order to be able to continue in the major.

(ii) In special cases, and in consultation with the Statistics Advisor, the theory requirement can be satisfied by taking the single *graduate level* class 36-625 Probability and Mathematical Statistics I, which is much more mathematically rigorous. This option should be considered by strong Statistics Majors who are also majoring in Computer Science, Operations Research, or Mathematics and/or who are considering graduate study in Statistics. This option does require special permission from the advisor. Students who end up satisfying the theory requirement by taking the (single) course 36-625 are required to take an additional statistics elective (see category #6, Statistical Electives, below).

4. Statistical Computing:9 units

36-350	Statistical Computing *	9
--------	-------------------------	---

*A higher level Computer Science course approved by your Statistics advisor may be used as a substitute.

5. Special Topics9 units

The Statistics Department offers advanced courses that focus on specific statistical applications or advanced statistical methods. These courses are numbered 36-46x (36-461, 36-462, etc.). Two of these courses will be offered every year, one per semester. Past topics included Statistical Learning, Data Mining, Statistics and the Law, Bayesian Statistics, Nonparametric Statistics, Statistical Genetics, Multilevel and Hierarchical Models, and Statistical Methods in Epidemiology. The objective of the course

is to expose students to important topics in statistics and/or interesting applications which are not part of the standard undergraduate curriculum.

To satisfy the Special Topics requirement choose *one* of the **36-46x** courses (which are 9 units).

Note: All 36-46x courses require 36-401 as a prerequisite or instructor permission.

6. Statistical Elective:9-10 units

Students are required to take one* elective which can be within or outside the Statistics Department. **Courses within statistics** can be any 300 or 400 level course (that is not used to satisfy any other requirement for the statistics major).

The following is a partial list of **courses outside statistics** that qualify as electives as they provide intellectual infrastructure that will advance the student's understanding of statistics and its applications. Other courses may qualify as well; consult with the Statistics Undergraduate Advisor.

15-110	Principles of Computing	10
15-121	Introduction to Data Structures	10
15-122	Principles of Imperative Computation	10
21-127	Concepts of Mathematics	10
21-260	Differential Equations	9
21-292	Operations Research I	9
21-301	Combinatorics	9
21-355	Principles of Real Analysis I	9
80-220	Philosophy of Science	9
80-221	Philosophy of Social Science	9
80-310	Formal Logic	9
85-310	Research Methods in Cognitive Psychology	9
85-320	Research Methods in Developmental Psychology	9
85-340	Research Methods in Social Psychology	9
88-223	Decision Analysis and Decision Support Systems	9
88-302	Behavioral Decision Making	9

Note: Additional prerequisites are required for some of these courses. Students should carefully check the course descriptions to determine if additional prerequisites are necessary.

* Students who enter the program through 36-225 or 36-226 and skip the beginning data analysis course, or students who end up satisfying the theory requirement using the (single) course 36-625, are required to take *two* electives only one of which can be outside the Statistics Department. (In general, any waived requirement is replaced by a statistical elective.)

7. Tracks*:

Self-Defined Concentration Area (with advisor's approval)36 units

The power of Statistics, and much of the fun, is that it can be applied to answer such a wide variety of questions in so many different fields. A critical part of statistical practice is understanding the questions being asked so that appropriate methods of analysis can be used. Hence, a critical part of statistical training is to gain experience applying the abstract tools to real problems. The Concentration Area is a set of four related courses outside of Statistics that prepares the student to deal with statistical aspects of problems that arise in another field. These courses are usually drawn from a *single* discipline of interest to the student and are chosen in consultation with the Statistics Undergraduate Advisor. For example, students intending to pursue careers in public policy could take further courses in History or Economics, students intending to pursue careers in the health or biomedical sciences could take further courses in Biology or Chemistry, and students intending to pursue graduate work in Statistics could take further courses in advanced Mathematics.

Mathematical Statistics Track46-52 units

21-127	Concepts of Mathematics	10
21-355	Principles of Real Analysis I	9
36-410	Introduction to Probability Modeling	9

And two of the following:

36-700	Probability and Mathematical Statistics I	12
36-705	Intermediate Statistics	12
21-228	Discrete Mathematics	9
21-257	Models and Methods for Optimization or	9
21-292	Operations Research I	9
21-301	Combinatorics	9

21-356	Principles of Real Analysis II	9
--------	--------------------------------	---

Statistics and Neuroscience Track45-54 units

85-211	Cognitive Psychology	9
85-219	Biological Foundations of Behavior	9

And three electives (at least one from Methodology and Analysis and at least one from Neuroscientific Background):

Methodology and Analysis

36-625	Probability and Mathematical Statistics I	12
36-626	Probability and Mathematical Statistics II	12
10-601	Introduction to Machine Learning	12
18-290	Signals and Systems	12
85-314	Cognitive Neuroscience Research Methods	9
42/86-631	Neural Data Analysis	9

Neuroscientific Background

03-362	Cellular Neuroscience	9
03-363	Systems Neuroscience	9
15-386	Neural Computation	9
85-355	Introduction to Cognitive Neuroscience	9
85-414	Cognitive Neuropsychology	9
85-419	Introduction to Parallel Distributed Processing	9

* Note: The concentration/track requirement is only for students whose *primary* major is statistics and have no other additional major or minor. The requirement does not apply for students who pursue an *additional* major in statistics.

Total Number of Units for the Major: 146-175*

Total Number of Units for the Degree: 360

* Note: This number can vary depending on the calculus sequence a student takes. In addition this number includes the 36 units of the "Concentration Area" category which may not be required (see category 6 above for details).

Recommendations

Students in the College of Humanities and Social Sciences who wish to major or minor in Statistics are advised to complete both the calculus requirement (one Mathematical Foundations calculus sequence) and the Beginning Data Analysis course 36-201 Statistical Reasoning and Practice by the end of their Freshman year.

The linear algebra requirement is a prerequisite for the course 36-401. It is therefore essential to complete this requirement during your junior year at the latest!

Recommendations for Prospective PhD Students

Students interested in pursuing a PhD in Statistics or Biostatistics (or related programs) after completing their undergraduate degree are strongly recommended to pursue the **Mathematical Statistics Track**.

Additional Major in Statistics

Students who elect Statistics as a second or third major must fulfill all Statistics degree requirements except for the Concentration Area requirement. Majors in many other programs would naturally complement a Statistics Major, including Tepper's undergraduate business program, Social and Decision Sciences, Policy and Management, and Psychology.

With respect to double-counting courses, it is departmental policy that students must have at least five statistics courses that do not count for their primary major. If students do not have at least five, they typically take additional advanced electives.

Students are advised to begin planning their curriculum (with appropriate advisors) as soon as possible. This is particularly true if the other major has a complex set of requirements and prerequisites or when many of the other major's requirements overlap with the requirements for a Major in Statistics.

Research

One goal of the Statistics program is to give students experience with statistical research. There is a wide variety of ongoing research projects in the department, and students have several opportunities to get involved in a project that interests them.

Before graduation, students are encouraged to participate in a research project under faculty supervision. Students can do this through projects in specific courses (such as 36-303), through an independent study, or through a summer research position.

Qualified students are also encouraged to participate in an advanced research project through 36-490 Undergraduate Research or independent study under the supervision of a Statistics faculty advisor. Students who maintain a quality point average of 3.25 overall may also apply to participate in the H&SS Senior Honors Program (p. 203).

Sample Programs

The following sample programs illustrate three (of many) ways to satisfy the requirements of the Statistics Major. However, keep in mind that the program is flexible enough to support *many* other possible schedules and to emphasize a wide variety of interests.

The first schedule uses calculus sequence 1, and 21-127 Concepts of Mathematics as a Statistical Elective outside of Statistics.

The second schedule is an example of the case when a student enters the program through 36-225 and 36-226 (and therefore skips the beginning data analysis course). The schedule uses calculus sequence 2, and includes two electives (36-315 and 36-410), both within the Statistics Department. This schedule has more emphasis on statistical theory and probability.

The third schedule is an example of the Mathematical Statistics track.

In these schedules, C.A. refers to Concentration Area courses.

Schedule 1

Freshman		Sophomore	
Fall	Spring	Fall	Spring
36-201 Statistical Reasoning and Practice	36-202 Statistical Methods	21-127 Concepts of Mathematics	36-315 Statistical Graphics and Visualization
21-111 Calculus I	21-112 Calculus II	21-256 Multivariate Analysis	C.A.

Junior		Senior	
Fall	Spring	Fall	Spring
36-225 Introduction to Probability Theory	36-226 Introduction to Statistical Inference	36-401 Modern Regression	36-402 Advanced Methods for Data Analysis
21-240 Matrix Algebra with Applications	C.A.	C.A.	36-46x Special Topics
36-350 Statistical Computing			C.A.

Schedule 2

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-120 Differential and Integral Calculus	21-256 Multivariate Analysis	36-225 Introduction to Probability Theory	36-226 Introduction to Statistical Inference
			21-240 Matrix Algebra with Applications

Junior		Senior	
Fall	Spring	Fall	Spring
36-350 Statistical Computing	36-315 Statistical Graphics and Visualization	36-46x Special Topics	36-410 Introduction to Probability Modeling
36-401 Modern Regression	36-402 Advanced Methods for Data Analysis	C.A.	C.A.
C.A.	C.A.		

Schedule 3

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-120 Differential and Integral Calculus	21-256 Multivariate Analysis	36-225 Introduction to Probability Theory	36-226 Introduction to Statistical Inference
21-127 Concepts of Mathematics	21-260 Differential Equations		21-241 Matrices and Linear Transformations

Junior		Senior	
Fall	Spring	Fall	Spring

36-401 Modern Regression	36-402 Advanced Methods for Data Analysis	21-355 Principles of Real Analysis I	
21-228 Discrete Mathematics	21-341 Linear Algebra		

B.S. in Economics and Statistics

Academic Advisor: Paige Houser

For questions about Economics courses contact: Carol Goldberg or Kathleen Conway

For questions about Statistics courses contact: Rebecca Nugent or Paige Houser

Office: Baker Hall 132A

Email: acadcoord@stat.cmu.edu

The Major in Economics and Statistics provides an interdisciplinary course of study aimed at students with a strong interest in the empirical analysis of economic data. With joint curriculum from the Department of Statistics and the Undergraduate Economics Program, the major provides students with a solid foundation in the theories and methods of both fields. Students in this major are trained to advance the understanding of economic issues through the analysis, synthesis and reporting of data using the advanced empirical research methods of statistics and econometrics. Graduates are well positioned for admission to competitive graduate programs, including those in statistics, economics and management, as well as for employment in positions requiring strong analytic and conceptual skills - especially those in economics, finance, education, and public policy.

The requirements for the B.S. in Economics and Statistics are the following:

I. Prerequisites

38-39 units

1. Mathematical Foundations

38-39 units

Calculus

21-120 Differential and Integral Calculus 10

and one of the following three:

21-122 Integration and Approximation 10

21-127 Concepts of Mathematics 10

21-257 Models and Methods for Optimization 9

and one of the following:

21-256 Multivariate Analysis 9

21-259 Calculus in Three Dimensions 9

Note: Passing the MSC 21-120 assessment test is an acceptable alternative to completing 21-120.

Note: Taking both 21-111 and 21-112 is equivalent to 21-120. The Mathematical Foundations total is then 48-49 units. The Economics and Statistics major would then total 201-202 units.

Linear Algebra

One of the following three courses:

21-240 Matrix Algebra with Applications 10

21-241 Matrices and Linear Transformations 10

21-242 Matrix Theory 10

Note: 21-241 and 21-242 are intended only for students with a very strong mathematical background.

II. Foundations

18-27 units

2. Economics Foundations

9 units

73-100 Principles of Economics 9

3. Statistical Foundations

9-18 units

Sequence 1 (For students beginning their freshman or sophomore year)

36-201 Statistical Reasoning and Practice 9

and one of the following:

36-202	Statistical Methods	9
36-208	Regression Analysis	9
36-309	Experimental Design for Behavioral and Social Sciences	9

Or extra statistical elective**

*Acceptable equivalents for 36-201 are 36-207 (70-207), 36-220 and 36-247.

**Students who enter the program with 36-225/36-226 should discuss options with their advisors.

Sequence 2 (For students beginning later in their college career)

Advanced

Choose one of the following courses:

36-303	Sampling, Survey and Society	9
36-315	Statistical Graphics and Visualization	9
36-461	Special Topics: Statistical Methods in Epidemiology	9
36-462	Special Topics: Data Mining	9
36-463	Special Topics: Multilevel and Hierarchical Models	9
36-464	Special Topics: Applied Multivariate Methods	9

III. Disciplinary Core 126 units

1. Economics Core 36 units

73-230	Intermediate Microeconomics	9
73-240	Intermediate Macroeconomics	9
73-270	Writing for Economists	9
73-374	Econometrics II	9

2. Statistics Core 36 units

36-225	Introduction to Probability Theory *#	9
--------	---------------------------------------	---

and one of the following two courses:

36-226	Introduction to Statistical Inference *	9
36-326	Mathematical Statistics (Honors) *	9

and both of the following two courses:

36-401	Modern Regression *	9
36-402	Advanced Methods for Data Analysis	9

*In order to be a major in good standing, a grade of C or better is required in 36-225 (or equivalents), 36-226 or 36-326 and 36-401. Otherwise you will not be allowed to continue in the major.

#It is possible to substitute 36-217 or 21-325 for 36-225. (36-225 is the standard introduction to probability, 36-217 is tailored for engineers and computer scientists, and 21-325 is a rigorous Probability Theory course offered by the Department of Mathematics.)

3. Computing 9 units

36-350	Statistical Computing *	9
--------	-------------------------	---

*A higher level Computer Science course approved by your Academic Advisor may be used as a substitute.

4. Advanced Electives 45 units

Students must take three advanced Economics elective courses (numbered 73-300 through 73-495, excluding 73-374, 73-407 and 73-450) and two advanced Statistics elective courses (numbered 36-303, 36-315, or 36-410 through 36-495).

Total number of units for the major 182-192 units

Total number of units for the degree 360 units

Sample Program

The following sample program illustrates one way to satisfy the requirements of the Economics and Statistics Major. Keep in mind that the

program is flexible and can support other possible schedules (see footnotes below the schedule).

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-120 Differential and Integral Calculus	36-202 Statistical Methods	21-122 Integration and Approximation **	21-240 Matrix Algebra with Applications
36-201 Statistical Reasoning and Practice	21-256 Multivariate Analysis	36-225 Introduction to Probability Theory	36-226 Introduction to Statistical Inference
73-100 Principles of Economics	73-155 Legonomics: Building Blocks of Economic Analysis	73-230 Intermediate Microeconomics	73-240 Intermediate Macroeconomics
-----*	-----	-----	-----
-----	-----	-----	-----

Junior		Senior	
Fall	Spring	Fall	Spring
36-350 Statistical Computing	36-402 Advanced Methods for Data Analysis	Statistics Elective	Economics Elective
36-401 Modern Regression	73-270 Writing for Economists	Economics Elective	Statistics Elective
73-374 Econometrics II	Economics Elective	-----	-----
-----	-----	-----	-----
-----	-----	-----	-----

*In each semester, ----- represents other courses (not related to the major) which are needed in order to complete the 360 units that the degree requires.

** Students can also take 21-127 or 21-257. Students should consult with their advisor.

73-155 is not required but it is recommended by the Economics department.

Prospective PhD students might add 21-127 fall of sophomore year, replace 21-240 with 21-241, add 21-260 in spring of junior year and 21-355 in fall of senior year.

Students who elect Economics and Statistics as a second major must fulfill all Economic and Statistics degree requirements. Majors in many other programs would naturally complement a Statistics Major, including Business Administration, Social and Decision Sciences, Policy and Management, Social & Political History, and Psychology.

With respect to double-counting courses, it is departmental policy that students must have at least six courses (three Economics and three Statistics) that do not count for their primary major. If students do not have at least six, they typically take additional advanced electives.

Students are advised to begin planning their curriculum (with appropriate advisors) as soon as possible. This is particularly true if the other major has a complex set of requirements and prerequisites.

B.S. in Statistics and Machine Learning

Academic Advisor: Paige Houser
 Faculty Advisor: Ryan Tibshirani
 Office: Baker Hall 132A
 Email: acadcoord@stat.cmu.edu

Students in the Bachelor of Science program develop and master a wide array of skills in computing, mathematics, statistical theory, and the interpretation and display of complex data. In addition, Statistics and Machine Learning majors gain experience in applying statistical tools to real problems in other fields and learn the nuances of interdisciplinary collaboration. This program is geared towards students interested in statistical computation, data science, or “Big Data” problems. The requirements for the Major in Statistics and Machine Learning are detailed below and are organized by categories.

1. Mathematical Foundations (Prerequisites) 49 - 59 units

Mathematics is the language in which statistical models are described and analyzed, so some experience with basic calculus and linear algebra is an important component for anyone pursuing a program of study in Statistics and Machine Learning.

Calculus*:

Complete one of the following three sequences of mathematics courses at Carnegie Mellon, each of which provides sufficient preparation in calculus:

Sequence 1

21-111 Calculus I

21-112	Calculus II	10
--------	-------------	----

and one of the following:

21-256	Multivariate Analysis	9
21-259	Calculus in Three Dimensions	9

Sequence 2

21-120	Differential and Integral Calculus	10
--------	------------------------------------	----

and one of the following:

21-256	Multivariate Analysis	9
21-259	Calculus in Three Dimensions	9

Note: Other sequences are possible, and require approval from the undergraduate advisor.

Note: Passing the MSC 21-120 assessment test is an acceptable alternative to completing 21-120.

Integration and Approximation

21-122	Integration and Approximation	10
--------	-------------------------------	----

Linear Algebra**:

Complete one of the following three courses:

21-240	Matrix Algebra with Applications	10
21-241	Matrices and Linear Transformations	10
21-242	Matrix Theory	10

* It is recommended that students complete the calculus requirement during their freshman year.

**The linear algebra requirement needs to be completed before taking 36-401 Modern Regression.

21-241 and 21-242 are intended only for students with a very strong mathematical background.

Mathematical Theory:

21-127	Concepts of Mathematics	10
--------	-------------------------	----

2. Data Analysis 45 - 54 units

Data analysis is the art and science of extracting insight from data. The art lies in knowing which displays or techniques will reveal the most interesting features of a complicated data set. The science lies in understanding the various techniques and the assumptions on which they rely. Both aspects require practice to master.

The Beginning Data Analysis courses give a hands-on introduction to the art and science of data analysis. The courses cover similar topics but differ slightly in the examples they emphasize. 36-201 draws examples from many fields and satisfies the Dietrich College Core Requirement in Statistical Reasoning. It is therefore the recommended course for students in the College. (Note: A score of 4 or 5 on the Advanced Placement (AP) Exam in Statistics may be used to waive this requirement). Other courses emphasize examples in business (36-207), engineering and architecture (36-220), and the laboratory sciences (36-247).

The Intermediate Data Analysis courses build on the principles and methods covered in the introductory course, and more fully explore specific types of data analysis methods in more depth.

The Advanced Data Analysis courses draw on students' previous experience with data analysis and understanding of statistical theory to develop advanced, more sophisticated methods. These core courses involve extensive analysis of real data with emphasis on developing the oral and writing skills needed for communicating results.

Sequence 1

Beginning*

Choose one of the following courses:

36-201	Statistical Reasoning and Practice	9
36/70-207	Probability and Statistics for Business Applications	9
36-220	Engineering Statistics and Quality Control	9
36-247	Statistics for Lab Sciences	9

*Or extra statistical elective

Note: Students who enter the program with 36-225 or 36-226 should discuss options with an advisor. Any 36-300 or 36-400 level course that does

not satisfy any other requirement for a Statistics Major and Minor may be counted as a Statistical Elective.

Intermediate

Choose one of the following courses:

36-202	Statistical Methods	9
36/70-208	Regression Analysis	9
36-309	Experimental Design for Behavioral and Social Sciences	9

*Or extra statistical elective

Advanced

Choose two of the following courses:

36-303	Sampling, Survey and Society	9
36-315	Statistical Graphics and Visualization	9
36-461	Special Topics: Statistical Methods in Epidemiology	9
36-462	Special Topics: Data Mining	9
36-463	Special Topics: Multilevel and Hierarchical Models	9
36-464	Special Topics: Applied Multivariate Methods	9

and take the following two courses:

36-401	Modern Regression	9
36-402	Advanced Methods for Data Analysis	9

Sequence 2

Advanced

Choose three of the following courses:

36-303	Sampling, Survey and Society	9
36-315	Statistical Graphics and Visualization	9
36-461	Special Topics: Statistical Methods in Epidemiology	9
36-462	Special Topics: Data Mining	9
36-463	Special Topics: Multilevel and Hierarchical Models	9
36-464	Special Topics: Applied Multivariate Methods	9

and take the following two courses:

36-401	Modern Regression	9
36-402	Advanced Methods for Data Analysis	9

3. Probability Theory and Statistical Theory 18 units

The theory of probability gives a mathematical description of the randomness inherent in our observations. It is the language in which statistical models are stated, so an understanding of probability is essential for the study of statistical theory. Statistical theory provides a mathematical framework for making inferences about unknown quantities from data. The theory reduces statistical problems to their essential ingredients to help devise and evaluate inferential procedures. It provides a powerful and wide-ranging set of tools for dealing with uncertainty.

To satisfy the theory requirement take the following two courses**:

36-225	Introduction to Probability Theory	9
36-226	Introduction to Statistical Inference	9

**It is possible to substitute 36-217 or 21-325 for 36-225. (36-225 is the standard introduction to probability, 36-217 is tailored for engineers and computer scientists, and 21-325 is a rigorous Probability Theory course offered by the Department of Mathematics.) 36-326 Mathematical Statistics (Honors) can be substituted for 36-226 Introduction to Statistical Inference and is considered an honors course.

Comments:

(i) In order to be a Major or a Minor in good standing, a grade of at least a C is required in 36-225, 36-226 and 36-401. In particular, a grade of C or higher is required in order to be able to continue in the major.

(ii) In special cases, and in consultation with the Statistics Advisor, the entire theory requirement can be satisfied by taking the *graduate level* class 36-625 Probability and Mathematical Statistics I, which is much more mathematically rigorous. This option should be considered by strong Statistics Majors who are also majoring in Computer Science, Operations Research, or Mathematics and/or who are considering graduate study in Statistics. This option requires special permission from the advisor. Students who end up satisfying the theory requirement by taking the (single) course

36-625 are required take an additional statistics elective (see category #6, Statistical Electives, below).

4. Computing:

64 - 67 units

Statistical modeling in practice nearly always requires computation in one way or another. Computational algorithms are sometimes treated as “black-boxes”, whose innards the statistician need not pay attention to. But this attitude is becoming less and less prevalent, and today there is much to be gained from a strong working knowledge of computational tools. Understanding the strengths and weaknesses of various methods allows the data analyst to select the right tool for the job; understanding how they can be adapted to work in new settings greatly extends the realm of problems that he/she can solve. While all Majors in Statistics are given solid grounding in computation, extensive computational training is really what sets the Major in Statistics and Machine Learning apart.

36-350	Statistical Computing	9
15-112	Fundamentals of Programming and Computer Science	12
15-122	Principles of Imperative Computation	10
10-601	Introduction to Machine Learning	12
15-351	Algorithms and Advanced Data Structures	12

*A higher level Computer Science course approved by your Statistics advisor may be used as a substitute.

and take one of the following courses:

10-605	Machine Learning with Large Datasets	12
15-381	Artificial Intelligence: Representation and Problem Solving	9
15-386	Neural Computation	9
16-720	Computer Vision	12
16-311	Introduction to Robotics	12
11-411	Natural Language Processing	12
11-761	Language and Statistics	12

*PhD level ML course as approved by Statistics advisor

** Independent research with an ML faculty member

Total number of units for the major 166-188 units

Total number of units for the degree 360 units

Recommendations

Students in the Dietrich College of Humanities and Social Sciences who wish to major or minor in Statistics are advised to complete both the calculus requirement (one Mathematical Foundations calculus sequence) and the Beginning Data Analysis course 36-201 Statistical Reasoning and Practice by the end of their Freshman year.

The linear algebra requirement is a prerequisite for the course 36-401. It is therefore essential to complete this requirement during your junior year at the latest!

Recommendations for Prospective PhD Students

Students interested in pursuing a PhD in Statistics or Machine Learning (or related programs) after completing their undergraduate degree are strongly recommended to take additional Mathematics courses. They should see a faculty advisor as soon as possible. Students should consider 36-326 Mathematical Statistics (Honors) as an alternative to 36-226. Although 21-240 Matrix Algebra with Applications is recommended for Statistics majors, students interested in PhD programs should consider taking 21-241 Matrices and Linear Transformations or 21-242 Matrix Theory instead. Additional courses to consider are 21-228 Discrete Mathematics, 21-260 Differential Equations, 21-341 Linear Algebra, 21-355 Principles of Real Analysis I, and 21-356 Principles of Real Analysis II.

Additional experience in programming and computational modeling is also recommended. Students should consider taking more than course from the list of Machine Learning electives provided under the Computing section.

Additional Major in Statistics and Machine Learning

Students who elect Statistics and Machine Learning as a second or third major must fulfill all degree requirements.

With respect to double-counting courses, it is departmental policy that students must have at least six courses (three Machine Learning and three Statistics) that do not count for their primary major. If students do not have at least six, they typically take additional advanced electives.

Students are advised to begin planning their curriculum (with appropriate advisors) as soon as possible. This is particularly true if the other major has a complex set of requirements and prerequisites or when many of the other major’s requirements overlap with the requirements for a Major in Statistics and Machine Learning.

Sample Programs

The following sample program illustrates one way to satisfy the requirements of the Statistics and Machine Learning program. Keep in mind that the program is flexible and can support other possible schedules (see footnotes below the schedule). Sample program 1 is for students who have not satisfied the basic calculus requirements. Sample program 2 is for students who have satisfied the basic calculus requirements and choose option 2 for their data analysis courses (see section #2)

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-120 Differential and Integral Calculus	21-122 Integration and Approximation	36-217 Probability Theory and Random Processes	21-241 Matrices and Linear Transformations

*In each semester, ----- represents other courses (not related to the major) which are needed in order to complete the 360 units that the degree requires.

The Minor in Statistics

Academic Advisor: Paige Houser
 Faculty Advisor: Howard Seltman
 Office: Baker Hall 132A
 Email: acadcoord@stat.cmu.edu

The Minor in Statistics develops skills that complement major study in other disciplines. The program helps the student master the basics of statistical theory and advanced techniques in data analysis. This is a good choice for deepening understanding of statistical ideas and for strengthening research skills.

In order to get a minor in Statistics a student must satisfy all the requirements in categories 1, 2 and 3 of the major requirement (see above) with the exception that in the advanced data analysis part only 36-401 and 36-402 are required. In other words, the requirements for the minor are (read the section about the Major in Statistics for details):

1. Mathematical Foundations (Prerequisites)28-38 units
Identical to Major requirements (read relevant section above carefully).

2. Data Analysis36 units

Beginning Data Analysis: 9 units (one course) - see Major requirements above.

Intermediate Data Analysis: 9 units (one course) - see Major requirements above.

Advanced Data Analysis: 18 units - 36-401 and 36-402

3. Probability Theory and Statistical Theory18 units
Identical to Major requirements (read relevant section above carefully).

Total number of units required for the minor **82 Units**

With respect to double-counting courses, it is departmental policy that students must have at least three statistics courses that do not count for their primary major. If students do not have at least three, they typically take additional advanced electives.

Sample Programs for the Minor

The following two sample programs illustrates two (of many) ways to satisfy the requirements of the Statistics Minor. Keep in mind that the program is flexible and can support many other possible schedules.

The first schedule uses calculus sequence 1, and 36-309 to satisfy the intermediate data analysis requirement. The second schedule is an example of the case when a student enters the Minor through 36-225 and 36-226 (and therefore skips the beginning data analysis course). The schedule uses calculus sequence 2, and 36-315 as an elective (to replace the beginning data analysis course).

Schedule 1

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-111 Calculus I	21-112 Calculus II	21-256 Multivariate Analysis	21-240 Matrix Algebra with Applications
36-201 Statistical Reasoning and Practice		36-309 Experimental Design for Behavioral and Social Sciences	

Junior		Senior	
Fall	Spring	Fall	Spring
36-225 Introduction to Probability Theory	36-226 Introduction to Statistical Inference	36-401 Modern Regression	36-402 Advanced Methods for Data Analysis

Schedule 2

Freshman		Sophomore	
Fall	Spring	Fall	Spring
21-120 Differential and Integral Calculus	21-256 Multivariate Analysis	36-225 Introduction to Probability Theory	36-226 Introduction to Statistical Inference

Junior		Senior	
Fall	Spring	Fall	Spring
21-240 Matrix Algebra with Applications	36-315 Statistical Graphics and Visualization	36-401 Modern Regression	36-402 Advanced Methods for Data Analysis

Substitutions and Waivers

Many departments require Statistics courses as part of their Major or Minor programs. Students seeking transfer credit for those requirements from substitute courses (at Carnegie Mellon or elsewhere) should seek permission from their advisor in the department setting the requirement. The final authority in such decisions rests there. The Statistics Department does not provide approval or permission for substitution or waiver of another department's requirements.

However, the Statistics Director of Undergraduate Studies will provide advice and information to the student's advisor about the viability of a proposed substitution. Students should make available as much information

as possible concerning proposed substitutions. Students seeking waivers may be asked to demonstrate mastery of the material.

Statistics Majors and Minors seeking substitutions or waivers should speak to the Statistics Director of Undergraduate Studies.

Faculty

XIZHEN CAI, Assistant Teaching Professor - Ph.D., The Pennsylvania State University; Carnegie Mellon, 2014-.

DAVID CHOI, Assistant Professor of Statistics and Information Systems - Ph.D., Stanford University; Carnegie Mellon, 2004-.

ALEXANDRA CHOULDECHOVA, Assistant Professor of Statistics and Public Policy - Ph.D., Stanford University; Carnegie Mellon, 2014-.

STEPHEN E. FIENBERG, University Professor and Maurice Falk Professor of Statistics and Social Sciences - Ph.D., Harvard University; Carnegie Mellon, 1980-.

MAX G'SELL, Assistant Professor - Ph.D., Stanford University; Carnegie Mellon, 2014-.

CHRISTOPHER GENOVESE, Department Head and Professor of Statistics - Ph.D., University of California, Berkeley; Carnegie Mellon, 1994-.

JOEL B. GREENHOUSE, Professor of Statistics - Ph.D., University of Michigan; Carnegie Mellon, 1982-.

AMELIA HAVILAND, Anna Loomis McCandless Professorship of Statistics and Public Policy - Ph.D., Carnegie Mellon University; Carnegie Mellon, 2003-.

JIASHUN JIN, Professor of Statistics - Ph.D., Stanford University; Carnegie Mellon, 2007-.

BRIAN JUNKER, Associate Dean and Professor of Statistics - Ph.D., University of Illinois; Carnegie Mellon, 1990-.

ROBERT E. KASS, Professor of Statistics - Ph.D., University of Chicago; Carnegie Mellon, 1981-.

ANN LEE, Associate Professor - Ph.D., Brown University; Carnegie Mellon, 2005-.

JOHN P. LEHOCZKY, Thomas Lord Professor of Statistics - Ph.D., Stanford University; Carnegie Mellon, 1969-.

JING LEI, Assistant Professor - Ph.D., University of California, Berkeley; Carnegie Mellon, 2011-.

DANIEL NAGIN, Teresa and H. John Heinz III Professor of Public Policy - Ph.D., Carnegie Mellon University; Carnegie Mellon, 1976-.

REBECCA NUGENT, Teaching Professor - Ph.D., University of Washington; Carnegie Mellon, 2006-.

ALESSANDRO RINALDO, Associate Professor - Ph.D., Carnegie Mellon; Carnegie Mellon, 2005-.

KATHRYN ROEDER, Professor of Statistics - Ph.D., Pennsylvania State University; Carnegie Mellon, 1994-.

CHAD M. SCHAFER, Associate Professor - Ph.D., University of California, Berkeley; Carnegie Mellon, 2004-.

MARK J. SCHERVISH, Professor of Statistics - Ph.D., University of Illinois; Carnegie Mellon, 1979-.

TEDDY SEIDENFELD, Herbert A. Simon Professor of Philosophy and Statistics - Ph.D., Columbia University; Carnegie Mellon, 1985-.

COSMA SHALIZI, Associate Professor - Ph.D., University of Wisconsin, Madison; Carnegie Mellon, 2005-.

RYAN TIBSHIRANI, Assistant Professor - Ph.D., Stanford University; Carnegie Mellon, 2011-.

VALERIE VENTURA, Associate Professor - Ph.D., University of Oxford; Carnegie Mellon, 1997-.

LARRY WASSERMAN, Professor of Statistics - Ph.D., University of Toronto; Carnegie Mellon, 1988-.

Emeriti Faculty

GEORGE T. DUNCAN, Professor of Statistics and Public Policy - Ph.D., University of Minnesota; Carnegie Mellon, 1974-.

WILLIAM F. EDDY, John C. Warner Professor of Statistics - Ph.D., Yale University; Carnegie Mellon, 1976-.

JOSEPH B. KADANE, Leonard J. Savage Professor of Statistics and Social Sciences – Ph.D., Stanford University; Carnegie Mellon, 1969–.

Adjunct Faculty

ANTHONY BROCKWELL, – Ph.D., Melbourne University; Carnegie Mellon, 1999–.

BERNIE DEVLIN, – Ph.D., Pennsylvania State University; Carnegie Mellon, 1994–.

Special Faculty

PETER FREEMAN, Research Associate – Ph.D., University of Chicago; Carnegie Mellon, 2004–.

HOWARD SELTMAN, Senior Research Statistician – Ph.D., Carnegie Mellon; M.D., Medical College of Pennsylvania; Carnegie Mellon, 1999–.

ISABELLA VERDINELLI, Professor in Residence – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1991–.

GORDON WEINBERG, Lecturer – M.A. Mathematics, University of Pittsburgh; Carnegie Mellon, 2004–.

Visiting Faculty

JARED MURRAY, Assistant Professor – Ph.D., Duke University; Carnegie Mellon, 2013–.

JORDAN RODU, Assistant Professor – Ph.D., University of Pennsylvania ; Carnegie Mellon, 2014–.

SAM VENTURA, Assistant Professor – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2015–.

H. John Heinz III College

Ramayya Krishnan, Dean
Office: 1509 Hamburg Hall
<http://www.heinz.cmu.edu/>

Students entering graduate programs at Carnegie Mellon University's H. John Heinz III College are accomplished, talented and committed to improving the ability of public, non-profit and private organizations to address the most difficult challenges facing society, as well as to strengthen and exploit our cultural resources through skilled leadership and management. Students gain the skills and knowledge necessary to transform that talent and commitment into a successful career and a positive force for change.

Unlike many graduate schools, we are not organized along academic departments. Faculty from our two schools -- the School of Public Policy and Management (<http://www.heinz.cmu.edu/school-of-public-policy-management>) and the School of Information Systems and Management (<http://www.heinz.cmu.edu/school-of-information-systems-and-management>) -- collaborate on instruction and research, an operating model we believe leads to innovation in research and a superior educational experience. Our strengths span the applied disciplines of empirical methods and statistics, economics, information systems and technology, operations research and organizational behavior.

Heinz College is a dynamic community of scholars and practitioners developing fundamental knowledge about and seeking innovative, applied solutions to today's most critical problems of the public, private and non-profit sectors.

Options for Carnegie Mellon Undergraduates

Heinz College does not offer undergraduate degrees. It does offer two study options, however, for students pursuing Carnegie Mellon undergraduate degrees - 1) Accelerated Master's Program (AMP), and 2) undergraduate minor in Health Care Policy and Management (see below).

Five-Year (Accelerated) Master's Programs

Heinz College's Accelerated Master's Program (AMP) allows qualified students to earn a prestigious master's degree in just five years (CMU undergrads can complete their master's degree in just one additional year of study beyond their bachelor's degree).

The following master's degrees provide an AMP and are open to students from all departments at the university:

- Master of Arts Management (MAM)
- Master of Information Systems Management (MISM)
- Master of Science in Health Care Policy and Management (MSHCPM)
- Master of Science in Information Security Policy and Management (MSISPM)
- Master of Science in Public Policy and Management (MSPPM)

In addition to the accelerated master's programs, Heinz offers traditional graduate degree programs (full-time study required):

- Master of Science in Public Policy and Management (MSPPM), with options that include:
 - concentration in Policy Analytics (POLA)
 - dual degree MSPPM/MBA program with the Tepper School of Business
 - dual degree MSPPM/JD program with the University of Pittsburgh School of Law
 - dual degree MSPPM/MDiv program with the Pittsburgh Theological Seminary
 - one year of study at the main campus in Pittsburgh and one year of study/experiential learning at our location in Washington, DC
 - one year of study at our campus in Australia and one year in Pittsburgh
- Master of Arts Management (MAM), with options that include
 - a dual degree MAM/JD program with the University of Pittsburgh School of Law
 - dual degree MAM/GIOCA that includes one year (3 semesters) of study at the main campus in Pittsburgh and two years of study/experiential learning at the University of Bologna, Italy

- Master of Entertainment Industry Management (MEIM)
- Master of Science in Health Care Policy and Management, with the option to pursue:
 - dual degree MSHCPM/MBA program with the Tepper School of Business
- Master of Science in Biotechnology and Management (MSBTM)
- Master of Information Systems Management (MISM), with options that include:
 - concentration in Business Intelligence and Data Analytics (BIDA) track
 - one year of study at our campus in Australia and one year in Pittsburgh
- Master of Science in Information Security Policy and Management (MSISPM)
- Doctor of Philosophy in Public Policy and Management (Ph.D.-PPM)
- Doctor of Philosophy in Information Systems (Ph.D.-ISM)

Heinz offers graduate degree programs for individuals with prior work experience:

- Master of Public Management (MPM)
 - full-time and part-time options available
- Master of Science in Information Technology (MSIT)
 - part-time study with the option to pursue degree via distance learning or on-campus
- Master of Medical Management (MMM)
 - includes distance and limited on-campus study components

Minor in Health Care Policy and Management

Sponsored by:

H. John Heinz III College
Dietrich College of Humanities and Social Sciences
Mellon College of Science

Faculty Advisors:

Jason D'Antonio, Mellon College of Science
James F. Jordan, H. John Heinz III College

The face of health care is changing. The practice of medicine is being fundamentally altered by the forces of change in public policy, health care organizations and in the industry as a whole. The role of individual professionals in this industry is changing as rapidly as the industry itself. Traditional career paths have disappeared overnight to be replaced by new opportunities that require new skills. New organizations are placing new demands on their professional and medical staffs. The criteria of efficiency and financial stability are entering the domains of diagnosis and treatment.

This minor is designed to provide students considering a career in the health professions with an understanding of how these changes are likely to affect their careers. Students will become familiar with the critical policy and management issues and will begin to learn to operate effectively in the emerging health care environment. The curriculum combines economic, organizational, managerial, historical and psychological perspectives on these issues to provide a foundation for a deepened understanding of the changing structure of health care organizations and policy.

Curriculum

60 units minimum

Seven courses (a minimum of 60 units) are required to complete this minor. Entry into the minor requires completion of 73-100 Principles of Economics or 88-220 Policy Analysis I or the equivalent by approval.

Required Courses

39 units

Students are required to take the following courses.

79-330	Medicine and Society	9
90-836	Health Systems	6
90-861	Health Policy	6
94-705	Health Economics	12

Elective Courses**27 units**

Complete a minimum of 27 units.

Heinz College Courses

90-708	Healthcare Ethics	6
90-721	Healthcare Management	6
90-818	Health Care Quality & Performance Improvement	6
90-830	Introduction to Financial Management of Health Care	6
90-831	Advanced Financial Management of Health Care	6
90-832	Health Law	6
90-863	Health Policy II	6
94-706	Healthcare Information Systems	12
Humanities and Social Sciences Courses (9 units each)		
76-494	Healthcare Communications	9
79-383	Epidemics, Disease, and Public Health	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
85-241	Social Psychology	9
85-442	Health Psychology	9
85-446	Psychology of Gender	9

Please note that some of these courses have prerequisites that will not count toward the completion of the requirements for this minor.

What kinds of careers do Heinz College graduates pursue?

A Heinz College degree opens doors to a wide range of professional careers in government agencies, nonprofit organizations, consulting firms, arts groups, foundations, private businesses and a host of other organizations. Heinz College graduates can get the kind of interesting, exciting jobs they want, because they have the expertise in policy, management, finance, information systems, and decision-making that employers need.

Heinz College's Ph.D. program in particular prepares qualified students from a variety of academic and professional backgrounds for careers in research, academia, government-related organizations and the private sector, in positions where expertise in advanced research is desired. Graduates of the Ph.D. program work as professors, research scientists, research directors and consultants, across diverse areas of public service and management.

Some of the jobs that have been held by Heinz College graduates include:

- Budget Analyst, Congressional Budget Office
- President/Chief Executive Officer, Urban League of Philadelphia
- Vice President, Public Finance Division, Donaldson, Lufkin & Jenrette Securities Corp.
- Executive Director, Allegheny Conference on Community Development
- Executive Director, Maryland Small Business Development Financing Authority
- District Manager, AT&T Consumer Information
- Senior Consultant, Ernst and Young
- Director of Marketing, Bardavon 1869 Opera House, Poughkeepsie, NY
- Consultant, Hill Arts and Entertainment
- Special Projects Coordinator, Washington Very Special Projects
- Managing Director, Misnomer Dance Theater
- Business Development & Licensing, Warner Bros.

How is Heinz College different?

Diversity

Heinz College's student body is internationally recognized for its diversity in ethnicity, gender and citizenship. It also is diverse in terms of students' academic backgrounds, which include undergraduate degrees in architecture, biology, business administration, computer science, economics, education, engineering, English, fine arts, government, history, information systems, philosophy, political science, sociology and many other fields.

Practical Experience

Heinz College doesn't just teach skills in the classroom:

- Through the systems synthesis project, students work in teams to analyze and develop solutions for current international, national and local problems and present their findings to the real-world client.
- Students complete a summer internship to practice the skills they've learned in school.

Impact on Society

The expertise of a renowned faculty is transferred to society through the education and research mission of Heinz College, as well as the efforts of its policy and research centers. These include the Arts Management and Technology Laboratory, Traffic21, Living Analytics Research Centre, Initiative for Digital Entertainment Analytics (IDEA), Center for Economic Development, and the Center for the Future of Work. Heinz College students can work on projects initiated in these centers or as research assistants for center faculty.

Global Heinz

With multiple locations around the United States and the world, Heinz College offers students the opportunity to gain a global perspective while pursuing their master's degree.

Since 2006, the Adelaide campus has served as the school's Asia Pacific education base and currently offers two master's level degrees - MSPPM and MSIT.

Heinz College's Washington, D.C. center (established in 2008) connects our public policy students with national and international policy makers and organizations. The goal is to create a dynamic and productive network that benefits our community at large and brings the unique strengths of Carnegie Mellon to positively impact the public interest. The office also serves as classroom space for 2nd year MSPPM students in the program's D.C. track.

The Master of Entertainment Industry Management (MEIM) program trains a new generation of leaders in the entertainment industry. Students spend a year in Pittsburgh followed by a year in Los Angeles exploring how management theories and principles are applied in the film and television industries.

Additional information can be found on our website: <http://www.heinz.cmu.edu>.

The Faculty

Heinz College faculty members have been recognized nationally and internationally for their accomplishments in research and their contributions to public policy. Their backgrounds are in economics, operations research, information systems and technology, fine arts, sociology, public policy, statistics, organizational management and behavior, finance, statistics, labor relations, and demography among other areas. The right is information on many full-time Carnegie Mellon University faculty members who teach and do research at Heinz College. For a more complete, current list, visit <http://www.heinz.cmu.edu/directories/faculty-directory/index.aspx>.

Faculty

ALESSANDRO ACQUISTI, Assistant Professor of Information Systems and Public Policy - Ph.D., UC Berkeley; Carnegie Mellon, 2003-.

SHAMENA ANWAR, Assistant Professor of Economics and Public Policy - Ph.D., Yale University; Carnegie Mellon, 2007-.

LINDA BABCOCK, James M. Walton Professor of Economics - Ph.D., University of Wisconsin at Madison; Carnegie Mellon, 1988-.

EDWARD BARR, Associate Teaching Professor - M.S., Indiana University of Pennsylvania; Carnegie Mellon, 2000-.

ALFRED BLUMSTEIN, J. Erik Jonsson University Professor of Urban Systems and Operations Research; Director, National Consortium on Violence Research - Ph.D., Cornell University; Carnegie Mellon, 1969-.

- SILVIA BORZUTSKY, Associate Teaching Professor – Ph.D., University of Pittsburgh; Carnegie Mellon, 2001–.
- LEE BRANSTETTER, Associate Professor of Economics – Ph.D., Harvard University; Carnegie Mellon, 2006–.
- KATHLEEN CARLEY, Professor of Organizational Sociology – Ph.D., Harvard University; Carnegie Mellon, 2011–.
- JONATHAN CAULKINS, Professor of Operations Research and Public Policy; Faculty Chair, Master of Public Policy and Management Program – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1990–.
- JACK CHOW, Distinguished Service Professor – M.D., University of California at San Francisco School of Medicine; Carnegie Mellon, 2011–.
- KAREN CLAY, Assistant Professor of Economics and Public Policy – Ph.D., Stanford University; Carnegie Mellon, 1997–.
- JACQUELINE COHEN, Principal Research Scientist – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1982–.
- WESLEY COHEN, (Affiliated) Professor of Economics and Social Sciences – Ph.D., Yale University; Carnegie Mellon, 1982–.
- LAURA DABBISH, Assistant Professor of Information Technology and Organizations – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2006–.
- GEORGE T. DUNCAN, Professor of Statistics, Emeritus – Ph.D., University of Minnesota; Carnegie Mellon, 2011–.
- DENNIS EPPEL, (Affiliated) Thomas Lord Professor of Economics – Ph.D., Princeton University; Carnegie Mellon, 1974–.
- JENDAYI E. FRAZER, Distinguished Service Professor – Ph.D., Stanford University; Carnegie Mellon, 2011–.
- MARTIN GAYNOR, E.J. Barone Professor of Economics and Health Policy; Faculty Chair, Ph.D. Program – Ph.D., Northwestern University; Carnegie Mellon, 1995–.
- WILPEN GORR, Professor of Public Policy and Management Information Systems – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1985–.
- ROBERT HAMPSHIRE, Assistant Professor of Operations Research and Public Policy – Ph.D., Princeton University; Carnegie Mellon, 2007–.
- JAMES F. JORDAN, Distinguished Service Professor – M.B.A., Boston University; Carnegie Mellon, 2011–.
- MARK S. KAMLET, Provost, CMU, and H. John Heinz III Professor of Economics and Public Policy – Ph.D., University of California at Berkeley; Carnegie Mellon, 1978–.
- WILLIAM P. KITTREDGE, Associate Teaching Professor – Ph.D., Maxwell School of Public Affairs and Citizenship; Carnegie Mellon, 2011–.
- STEVEN KLEPPER, (Affiliated) Professor of Economics and Social Science – Ph.D., Cornell University; Carnegie Mellon, 1980–.
- DAVID KRACKHARDT, Professor of Organizations and Public Policy – Ph.D., University of California at Irvine; Carnegie Mellon, 1991–.
- RAMAYYA KRISHNAN, William W. and Ruth F. Cooper Professor of Management Science and Information Systems; Faculty Chair, Master of Information Systems Management Program – Ph.D., University of Texas at Austin; Carnegie Mellon, 1987–.
- KRISTIN KURLAND, Associate Teaching Professor (joint with School of Architecture) – B.A., University of Pittsburgh; Carnegie Mellon, 1999–.
- LESTER LAVE, James Higgins Professor of Economics and Finance, Professor of Urban and Public Affairs, Professor of Engineering and Public Policy – Ph.D., Harvard University; Carnegie Mellon, 1963–.
- GORDON LEWIS, Associate Professor of Sociology; Faculty Chair, Master of Public Management Program – Ph.D., Stanford University; Carnegie Mellon, 1969–.
- PAMELA LEWIS, Teaching Professor of Professional Speaking – D.A., Carnegie Mellon University; Carnegie Mellon, 1980–.
- ARI LIGHTMAN, Practice Professor, Digital Media and Marketing – M.B.A., Carnegie Mellon University; Carnegie Mellon, 2011–.
- PETER MADSEN, Senior Lecturer in Ethics and Public Policy – Ph.D., Duquesne University; Carnegie Mellon, 1988–.
- DONALD MARINELLI, (Affiliated) Professor of Drama and Arts Management (College of Fine Arts) – Ph.D., University of Pittsburgh; Carnegie Mellon, 1984–.
- DAN MARTIN, Director, Master of Arts Management Program, and Associate Professor (College of Fine Arts) – M.F.A., Brooklyn College/City University of New York; Carnegie Mellon, 1993–.
- MICHAEL MCCARTHY, Associate Teaching Professor of Information Systems Management – M.S., University of Pittsburgh; Carnegie Mellon, 1999–.
- JOE MERTZ, Associate Teaching Professor – Ph.D., Carnegie Mellon; Carnegie Mellon, 1994–.
- KARYN MOORE, Assistant Teaching Professor of Information Systems – M.S., Industrial Administration, Carnegie Mellon University; Carnegie Mellon, 2003–.
- M. GRANGER MORGAN, Lord Chair Professor of Engineering and Public Policy, and Head, Department of Engineering and Public Policy – Ph.D., University of California at San Diego; Carnegie Mellon, 1974–.
- DANIEL NAGIN, Theresa and H. John Heinz III Professor of Public Policy, and Research Director, National Consortium on Violence Research – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1979–.
- DANIEL NEILL, Assistant Professor of Information Systems – M.S., University of Pittsburgh; Carnegie Mellon, 2007–.
- ERIC NYBERG, Assistant Professor of Computer Science and Public Policy (joint with School of Computer Science) – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1986–.
- REMA PADMAN, Professor of Operations Research and Information Management; Faculty Chair, Master of Science in Health Care Policy and Management Program – Ph.D., University of Texas at Austin; Carnegie Mellon, 1989–.
- LYNNE PASTOR, Visiting Associate Teaching Professor – M.S., Industrial Administration, Carnegie Mellon University; Carnegie Mellon, 2007–.
- SETH RICHARDS-SHUBIK, Assistant Professor of Economics and Public Policy – Ph.D., University of Pennsylvania; Carnegie Mellon, 2011–.
- STEPHEN ROEHRIG, Associate Professor of Information Systems and Public Policy – Ph.D., University of Pennsylvania Wharton School; Carnegie Mellon, 1991–.
- DENISE ROUSSEAU, H. J. Heinz II Professor of Organizational Behavior (joint with Graduate School of Industrial Administration) – Ph.D., University of California at Berkeley; Carnegie Mellon, 1994–.
- KIRON SKINNER, (Courtesy) Assistant Professor of History and Political Science – Ph.D., Harvard University; Carnegie Mellon, 1999–.
- DONALD SMITH, Professor of Practice; University Director for Economic Development – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1995–.
- KATHLEEN SMITH, Associate Teaching Professor – Ph.D., candidate, University of Pittsburgh; Carnegie Mellon, 1991–.
- MICHAEL SMITH, Assistant Professor of Information Technology – Ph.D., Alfred P. Sloan School of the Massachusetts Institute of Technology; Carnegie Mellon, 2000–.
- RICHARD STAFFORD, Distinguished Service Professor – M.S., Public Policy and Management, Carnegie Mellon University; Carnegie Mellon, 2005–.
- SHELBY STEWMAN, Professor of Sociology and Demography – Ph.D., Michigan State University; Carnegie Mellon, 1973–.
- ROBERT STRAUSS, Professor of Economics and Public Policy; Faculty Chair, Master of Science in Educational Technology Management Program – Ph.D., University of Wisconsin; Carnegie Mellon, 1979–.
- LAURA SYNNOTT, Associate Teaching Professor, Healthcare Policy and Management – M.S., Health Services Administration, University of Michigan; Carnegie Mellon, 2004–.
- JANUSZ SZCZYPULA, Associate Teaching Professor in Information Systems – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2000–.
- JOEL TARR, Richard S. Caliguiri Professor of Urban and Environmental History and Policy – Ph.D., Northwestern University; Carnegie Mellon, 1967–.
- LOWELL TAYLOR, Professor of Economics and Public Policy; Associate Dean of Faculty – Ph.D., University of Michigan; Carnegie Mellon, 1990–.
- RAHUL TELANG, Assistant Professor of Information Systems – Ph.D., Carnegie Mellon; Carnegie Mellon, 2001–.
- MARK WESSEL, Dean University of Wisconsin; Carnegie Mellon, 1992–.
- TIM ZAK, Associate Teaching Professor – M.B.A., New York University; Carnegie Mellon, 2011–.

Mellon College of Science

Frederick J. Gilman, Dean
 Eric W. Grotzinger, Associate Dean for Undergraduate Affairs
 Maggie Braun, Director of Core Education
 John F. Hannon, Director of Integrative Learning
 Undergraduate Office: Doherty Hall 1324
<http://www.cmu.edu/mcs/>

The Mellon College of Science (MCS) has provided the undergraduate training for many of today's leading scientists. We have earned national recognition for our integration of undergraduate education and research from such organizations as the National Science Foundation, the Howard Hughes Medical Institute, and the Beckman Foundation. MCS students gain a broad education in science, mathematics, and the liberal arts while using state-of-the-art computational approaches in their courses, laboratories, and research activities. Our faculty members are committed to teaching as well as to a wide range of scientific research. This combined emphasis on education and research brings special benefits to students, including increased awareness of current scientific developments that are incorporated in classroom instruction, and, most importantly, opportunities to participate with faculty, graduate students, and other research scientists in a variety of research projects.

In the context of rigorous training in each field, the MCS curriculum emphasizes problem-solving, communication, and analytical skills, and it teaches our students the value of hard work and discipline. Our students go on to highly successful careers in a broad range of fields like astrophysics, biotechnology, computer science, business management, environmental science, health care policy, investment banking, marketing analysis, medicine, patent law, and pharmaceuticals. Our alumni credit their education in science for preparing them for a lifetime of learning and achievement; their employers attest to their ability to succeed and to continue learning in an ever-changing world.

The MCS Departments of Biological Sciences, Chemistry, Mathematical Sciences, and Physics each outline their degree programs and courses in the departmental sections. Students select their major in the spring of the first year so that the sophomore year begins with a focus within a department. Most of the courses required within a major are scheduled in the sophomore and junior years, leaving much of the senior year and part of the junior year open for electives. This provides the opportunity to participate in undergraduate research, explore interdisciplinary studies, study abroad, pursue additional majors or minors in other fields, or take other specialty courses oriented toward immediate job placement upon graduation or entry into graduate studies.

Tailoring Your Education

The Mellon College of Science offers students tremendous opportunity for tailoring their education to meet individual professional objectives. Whether you target your degree to a particular field in your discipline via departmental options and concentrations, add a secondary major, minor, or degree to your primary degree program, participate in honors programs, or pursue a master's degree along with your bachelor's degree, MCS has much to offer you. Many of these opportunities are outlined below.

Departmental Concentrations

Each department in MCS offers degrees and programs that allow students to explore particular fields within a science discipline. These are outlined below — see the departmental sections for further details.

Biological Sciences

- Biochemistry
- Biophysics
- Cell Biology
- Computational Biology
- Developmental Biology
- Genetics
- Molecular Biology
- Neuroscience

Chemistry

- Biochemistry
- Biological Chemistry

- Colloids, Polymers, and Surfaces
- Computational Chemistry
- Environmental Chemistry
- Management
- Material Chemistry
- Polymer Science

Mathematical Sciences

- Computational and Applied Mathematics
- Computational Finance
- Discrete Mathematics and Logic
- Mathematics
- Operations Research
- Statistics

Physics

- Applied Physics
- Astrophysics
- Biological Physics
- Chemical Physics
- Computational Physics

Minors, Double Majors, and Double Degrees

As an MCS student, you can pursue additional majors and minors to complement your primary degree, not only within the science college, but also through the other colleges at Carnegie Mellon. Carnegie Mellon offers many exciting interdisciplinary majors and minors, some of which are listed below. In addition, every college and most departments have designed minors or second majors in their discipline so that you can gain expertise in their fields as well.

Some students choose to gain this expertise by following a double degree program. This results in two distinct bachelor's degrees. Please see the section on Undergraduate Academic Regulations for a more formal definition of these "Multiple Degree" programs.

Interdisciplinary Majors and Minors

Here is a sampling of just a few of the interdisciplinary minors and majors offered at Carnegie Mellon. Please see the appropriate sections elsewhere in this catalog for specific descriptions and course requirements.

- Biological Sciences and Psychology Major
- Computational Biology Major
- Computer Science Minor
- Engineering Studies Minor
- Environmental Policy Major
- Health Care Policy and Management Minor
- International Affairs Minor
- Mathematics and Economics Major
- Robotics Minor
- Scientific Computing Minor
- Technology and Policy Minor

For a complete list of the minors offered at Carnegie Mellon, please go to <http://coursecatalog.web.cmu.edu/servicesandoptions/undergraduateoptions/>

University Self-Defined Majors

With a well-thought proposal, you may be able to pursue a major you have designed to meet your particular interests and goals. Please see the catalog section on Undergraduate Options at <http://coursecatalog.web.cmu.edu/servicesandoptions/undergraduateoptions/>

Honors Degree Programs in MCS

Several of the departments in MCS offer students an opportunity to participate in a departmental honors degree program. Some of these programs result in a master's degree along with the bachelor's degree (see next section on accelerated master's programs). These programs are listed below; see the department's section of the catalog for more details.

- Honors Program in Research Biology
- Departmental Honors in Chemistry
- Honors B.S./M.S. Program in Chemistry
- Honors B.S./M.S. Program in Mathematical Sciences

Accelerated Master's Programs

Carnegie Mellon offers some accelerated master's programs for motivated students, whereby students complete both the bachelor's and the master's degree in four or five years. Some programs are in the student's home department in MCS as part of an honors program, while others are offered through one of our graduate schools at Carnegie Mellon. Below is a listing of the programs currently available to MCS students; please see the appropriate sections of the catalog for more details.

- Honors B.S./M.S. Program in Chemistry
- Honors B.S./M.S. Program in Mathematical Sciences
- Accelerated Master's Program in the Heinz College

Study Abroad

There are many programs for studying abroad, usually during your junior year. Please see the catalog section on Undergraduate Options for more details, and talk with the Office of International Education to get information and advice specifically for you.

Pre-Professional Programs

Many students in the Mellon College of Science decide to pursue professional training such as medical school or law school after completing their undergraduate work. Carnegie Mellon offers strong advising services to support these students. Through these programs, students get help with everything from course selection to identification of important experiential opportunities to the application process itself.

Health Professions Program

Faculty Contact: Jason D'Antonio

Please see the Undergraduate Options (p. 65) section for details on the Health Professions Program.

Pre-Law Advising Program

Faculty Contact: Joseph Devine

Please see the Undergraduate Options (p.) section for details on the Pre-Law Advising Program.

General Education Requirements

For Students Entering Prior to the Fall of 2015

Technical Breadth Requirements

An MCS education is based on a broad foundation in the sciences: two semesters each of calculus and physics and one semester each of biology, chemistry and computer science. This foundation corresponds to the following courses required for all MCS students.

03-121	Modern Biology	9
09-105	Introduction to Modern Chemistry I	10
15-110	Principles of Computing	10
or 15-112	Fundamentals of Programming and Computer Science	
or 02-201	Programming for Scientists	
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
or 21-124	Calculus II for Biologists and Chemists	

33-111	Physics I for Science Students	12
or 33-121	Physics I for Science Students	
33-112	Physics II for Science Students	9-12
or 33-122	Physics II for Biological Sciences and Chemistry Students	
or 33-142	Physics II for Engineering and Physics Students	

In the first year, students take two semesters of calculus, 21-120 Differential and Integral Calculus and 21-122 Integration and Approximation or 21-124 Calculus II for Biologists and Chemists. They also take three of the remaining five science core courses. The other two science core courses are completed by the end of the junior year. Additional courses in the first year include one course from the intended major; humanities, social sciences or fine arts courses; and Computing @ Carnegie Mellon, a course that introduces students to the computing environment and ethics of computing at Carnegie Mellon.

With this broad science background, a student is prepared to undertake any of the degree programs offered by the college when selecting a major at the end of the first year.

Sample First Year Schedule

Fall Semester 44-50 units

21-120	Differential and Integral Calculus	10
xx-xxx	Science Core Course	9-12
xx-xxx	Science Core Course	10
76-101	Interpretation and Argument	9
99-101	Computing @ Carnegie Mellon	3
xx-xxx	Optional First-Year Seminar or Discovery-Based Lab	3-6

Spring Semester 46-53 units

21-122	Integration and Approximation	10
or 21-124	Calculus II for Biologists and Chemists	
xx-xxx	Science Core Course	9-12
xx-xxx	Departmental Elective from Intended Major	9-10
xx-xxx	Humanities, Social Sciences, or Fine Arts Course	9
xx-xxx	Optional Free Elective Course or Discovery-Based Lab	6-9
xx-xxx	Optional First-Year Seminar	3

Notes:

1. Departmental electives from the intended major are as follows:

Biological Sciences or Chemistry:
09-106 Modern Chemistry II (10 units)

Mathematical Sciences
21-127 Concepts of Mathematics (10 units)

Physics
33-104 Experimental Physics (9 units)

2. A free elective is any Carnegie Mellon course. However, a maximum of nine units of physical education, military science and/or STUCO courses may be taken as free electives in any MCS degree program. Credit earned for physical education, military science and STUCO courses will not be calculated in a student's QPA.
3. Students who enter with advanced placement credits will follow a similar schedule with modifications for their AP work

Humanities, Social Sciences, and Fine Arts Requirements

All candidates for the bachelor's degree must complete a minimum of 72 units offered by the Dietrich College of Humanities and Social Science and/or the College of Fine Arts. These courses for MCS students are to meet the following distribution requirements:

A. Designated Writing Course (9 units)

76-101	Interpretation and Argument	9
--------	-----------------------------	---

B. Distributional Course Requirements (27 units)

Complete three courses, one each from Category 1, Category 2, and Category 3. Listed below are examples of courses that meet the requirement for each category. Students wishing to substitute a course that is not listed should meet with their advisor.

Category 1: Cognition, Choice and Behavior

80-100	Introduction to Philosophy	9
80-130	Introduction to Ethics	9
80-150	Nature of Reason	9
80-180	Nature of Language	9
80-208	Critical Thinking	9
80-220	Philosophy of Science	9
80-221	Philosophy of Social Science	9
80-230	Ethical Theory	9
80-241	Ethical Judgments in Professional Life	9
80-270	Philosophy of Mind	9
80-271	Philosophy and Psychology	9
80-312	Philosophy of Mathematics	9
85-102	Introduction to Psychology	9
85-211	Cognitive Psychology	9
85-221	Principles of Child Development	9
85-241	Social Psychology	9
85-251	Personality	9
85-261	Abnormal Psychology	9
85-390	Human Memory	9
88-120	Reason, Passion and Cognition	9

Category 2: Economic, Political and Social Institutions

19-101	Introduction to Engineering and Public Policy	12
36-303	Sampling, Survey and Society	9
70-332	Business, Society and Ethics	9
70-420	Entrepreneurship for Scientists	9
73-100	Principles of Economics	9
79-203	Social and Political Change in 20th Century Central and Eastern Europe	9
79-205	20th Century Europe	9
79-221	Development and Democracy in Latin America	9
79-245	Capitalism and Individualism in American Culture	9
79-246	Industrial America	9
79-252	Recent U.S. History, 1945-Present	9
79-316	Photography, the First 100 Years, 1839-1939	9
79-330	Medicine and Society	9
79-331	Body Politics: Women and Health in America	9
79-340	Juvenile Delinquency and Juvenile Justice	9
79-341	The Cold War in Documents and Film	9
79-374	American Environmental History: Critical Issues	9
79-377	Food, Culture, and Power: A History of Eating	9
80-135	Introduction to Political Philosophy	9
80-136	Social Structure, Public Policy & Ethics	9
80-226	Revolutions in Science	9
80-235	Political Philosophy	9
80-245	Medical Ethics	9
80-276	Philosophy of Religion	9
80-341	Computers, Society and Ethics	9
80-344	Management, Environment, and Ethics	9
84-104	Decision Processes in American Political Institutions	9
84-210	Comparative Political Systems	9
84-275	Comparative Politics	9
84-310	International Political Economy and Organizations	9
84-320	Domestic Politics and International Affairs	9
84-321	Autocrats and Democrats	9
84-322	Attitudes, the Media, and Conflict in International Relations	9
88-110	Experiments with Economic Principles	9
99-238	Materials, Energy and Environment	9
79-268	World War I: The Twentieth Century's First Catastrophe	9

Category 3: Cultural Analysis

57-173	Survey of Western Music History	9
57-209	The Beatles	9
76-227	Comedy	9

70-342	Managing Across Cultures	9
76-232	Introduction to African American Literature	9
76-239	Introduction to Film Studies	9
76-241	Introduction to Gender Studies	9
79-104	Global Histories	9
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-221	Development and Democracy in Latin America	9
79-225	West African History in Film	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-235	Caribbean Cultures	9
79-240	The Development of American Culture	9
79-241	African American History: Africa to the Civil War-American History I	9
79-242	African American History: Reconstruction to the Present-American History II	9
79-255	Irish History	6
79-261	Chinese Culture and Society	9
79-265	Russian History: From the First to the Last Tsar	9
79-281	Introduction to Religion	9
79-297	Dilemmas and Controversies in Anthropology	9
79-307	Religion and Politics in the Middle East	9
79-310	From Al Qaeda to ISIS: U.S. and European Anti-Terrorism Policies, 9/11-Present	9
79-345	The Roots of Rock and Roll	9
79-350	Early Christianity	9
80-100	Introduction to Philosophy	9
80-250	Ancient Philosophy	9
80-251	Modern Philosophy	9
80-253	Continental Philosophy	9
80-254	Analytic Philosophy	9
80-255	Pragmatism	9
80-261	Empiricism and Rationalism	9
80-276	Philosophy of Religion	9
82-xxx	Any Course Offered by Modern Languages	

C. Elective Course Requirements (36 units)

Complete non-technical courses totaling 36 units from DC, CFA, and Tepper. These can include language courses and music courses, for instance. In this category, you have the freedom to design how you want to structure your remaining general education requirements. For example, you can use these electives to build a depth sequence of 2-4 courses in a particular area or you can take courses from different areas or some combination of each.

Check our web site for courses from DC, CFA, and Tepper that may NOT be used (<http://www.cmu.edu/mcs/undergrad/advising/hss-finearts/deletions.html>) to satisfy these requirements because they are too technical in nature, plus a list of courses in other colleges (including SCS, CIT, Tepper, and Heinz College) that do satisfy these requirements (<http://www.cmu.edu/mcs/undergrad/advising/hss-finearts/additions.html>).

For Students Entering in the Fall of 2015 and Beyond

Carnegie Mellon's Mellon College of Science (MCS) has a distinguished record of educating leaders in science and technology. Science education in the 21st Century demands educational experiences that are much broader than the traditional preparation of a scholar in a chosen field of science. We want our MCS graduates to be **scholars** who are deeply trained in their discipline(s), and also **professionals** adept at communicating to broad audiences, accustomed to working in diverse, multidisciplinary teams, and keenly aware of the global context of their work. We want them to be **citizens** who are actively involved and globally engaged, and to grow as **persons** with a sense of wellness and balance.

With these ambitions in mind, we have set forth fifteen (15) outcomes that all MCS undergraduate students should complete in their time at Carnegie Mellon. Upon graduation, MCS students should be able to:

1. Apply foundational and advanced mathematical and scientific knowledge in a chosen field of study appropriately and fluently to solve

- complex problems, to integrate concepts across disciplines, and to adapt their knowledge to new situations.
- Critically assess their current state of knowledge and expertise and acquire new knowledge in pursuit of both specific scientific goals and new intellectual interests broadly throughout their lifetime.
 - Communicate effectively via oral, visual, and written formats with an understanding of the perspectives and expectations of diverse audiences, including those within their chosen discipline, outside that discipline (but within STEM), and non-scientists.
 - Participate effectively in multidisciplinary research and/or other teams pursuing a shared vision while optimizing team outcomes.
 - Use the appropriate tools and required media literacy to acquire, assess, and analyze data and information from diverse sources.
 - Recognize and explain the importance of at least one current research topic in a STEM field outside of their major.
 - Recognize and explain the similarities and differences in analyzing/ approaching problems, including in technical and non-technical fields other than their major.
 - Demonstrate knowledge of the arts, humanities, and social sciences.
 - Recognize the interplay of science, society, public policy, business, and economics.
 - Identify global examples of the reciprocal relationships among science, technology, political forces, societal contexts, and environmental issues.
 - Describe multiple similarities and differences between one's own culture and that of others.
 - Engage in recursive, reflective processes to assess their own levels of physical, emotional, and social wellness and then to choose activities that promote these aspects of wellness.
 - Engage in recursive, reflective processes to balance multiple endeavors by setting priorities and managing time in academic, meta-curricular, and personal dimensions.
 - Recognize ethical issues and appreciate the complexities of interrelationships among them, and the use of information in ethical and legal manners.
 - Articulate how one's own developing skills in science and technology can be increasingly used in constructive community service or engagement that recognizes the potential impact on local and global issues, including environmental impact and sustainability.

Students pursuing any MCS bachelor's degree will fulfill these outcomes through their primary MCS major and by completing the following technical and nontechnical breadth requirements prior to graduation.

Technical Breadth Requirements

As a 21st Century practicing scientist or mathematician, our graduates will work with others from a variety of technical backgrounds. Therefore, all of our students will be broadly trained within the technical fields of science and math. Students will fulfill this training by completing four (4) technical courses in the Science, Technology, Engineering, and/or Mathematics (STEM) fields at Carnegie Mellon University.

A student must take at least 9 units, outside of their primary major Department, from each of 4 categories listed below. These may include pre-requisite courses or courses required by their major Department but must be outside their home Department. AP/IB/Cambridge credit may not be used to fulfill these requirements. At least 3 of these courses must be taken in their first year. The categories are:

A. Life Sciences

(Refer to your specific department for how this category should be fulfilled. Some courses have pre-requisites that can be satisfied by AP, IB, Cambridge A Level Exams. Please check the prerequisites requirements as necessary.)

LIFE SCIENCES

02-223	Personalized Medicine: Understanding Your Own Genome	9
02-261	Quantitative Cell and Molecular Biology Laboratory	9
03-115	Phage Genomics Research	6
03-116	Phage Genomics Research	6
03-121	Modern Biology	9
03-124	Modern Biology Laboratory	9
03-125	Evolution	9
03-127	How Biological Experiments Work - A Project Course	9
03-161	Molecules to Mind	9

03-231	Biochemistry I	9
or 03-232	Biochemistry I	
03-250	Introduction to Computational Biology	12
03-260	Neurobiology of Disease	9
42-101	Introduction to Biomedical Engineering	12
42-202	Physiology	9
85-219	Biological Foundations of Behavior	9

B. Physical Sciences

(Refer to your specific department for how this category should be fulfilled. Some courses have pre-requisites that can be satisfied by AP, IB, Cambridge A Level Exams. Please check the prerequisites requirements as necessary.)

PHYSICAL SCIENCES

09-105	Introduction to Modern Chemistry I	10
09-106	Modern Chemistry II	10
09-107	Honors Chemistry: Fundamentals, Concepts and Applications	10
09-214	Physical Chemistry	9
09-217	Organic Chemistry I	9
09-219	Modern Organic Chemistry	10
09-221	Laboratory I: Introduction to Chemical Analysis	12
09-348	Inorganic Chemistry	10
33-111	Physics I for Science Students	12
33-106	Physics I for Engineering Students	12
33-151	Matter and Interactions I	12
33-211	Physics III: Modern Essentials	10
33-224	Stars, Galaxies and the Universe	9
33-225	Quantum Physics and Structure of Matter	9

C. Mathematics, Statistics, and Computer Science

(Refer to your specific department for how this category should be fulfilled. Some courses have pre-requisites that can be satisfied by AP, IB, Cambridge A Level Exams. Please check the prerequisites requirements as necessary.)

MATH, STATS, and CS

02-201	Programming for Scientists	12
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
21-124	Calculus II for Biologists and Chemists	10
21-127	Concepts of Mathematics	10
21-128	Mathematical Concepts and Proofs	12
21-228	Discrete Mathematics	9
21-241	Matrices and Linear Transformations	10
or 21-240	Matrix Algebra with Applications	
or 21-242	Matrix Theory	
21-259	Calculus in Three Dimensions	9
or 21-268	Multidimensional Calculus	
or 21-269	Vector Analysis	
21-260	Differential Equations	9
or 21-261	Introduction to Ordinary Differential Equations	
36-201	Statistical Reasoning and Practice	9
36-202	Statistical Methods	9
36-217	Probability Theory and Random Processes	9
36-220	Engineering Statistics and Quality Control	9
36-225	Introduction to Probability Theory	9
36-247	Statistics for Lab Sciences	9
36-309	Experimental Design for Behavioral and Social Sciences	9
15-110	Principles of Computing	10
15-112	Fundamentals of Programming and Computer Science	12
15-122	Principles of Imperative Computation	10
15-150	Principles of Functional Programming	10
15-251	Great Theoretical Ideas in Computer Science	12

D. STEM Course

- All of the above courses
- Any Introductory engineering course from CIT

- A STEM course approved by an MCS advisor

Technical Breadth--Departmental Requirements

Some of the majors in MCS require certain courses from the technical breadth requirement that are necessary for either prerequisite knowledge in the major or scientific breadth. For each of the four majors in MCS the Technical Breadth Requirement is completed as follows. If these requirements are met by AP/IB/Cambridge A Level Exams, students can choose any course from the categories to fulfill the Technical Breadth Requirement.

Biological Sciences

1. Life Sciences: any courses in this category except for the 03-XXX courses
2. Physical Sciences: 09-105, 09-106, 33-121 and 33-122
3. Math/CS/Stats: 21-120 and (21-122 or 21-124)
4. STEM Elective: will be filled by courses above or any STEM course from the approved list.

Chemistry

1. Life Sciences: 03-121 or 03-231 or 03-232
2. Physical Sciences: 33-121 and 33-122
3. Math/CS/Stats: 21-120 and (21-122 or 21-124)
4. STEM Elective: will be filled by courses above or any STEM course from the approved list.

Mathematical Sciences

1. Life Sciences: any courses in this category
2. Physical Sciences: any course in this category
3. Math/CS/Stats: any course in this category except for the 21-XXX courses and 36-201 and 36-202
4. STEM Elective: any STEM course from the approved list.

Physics

1. Life Sciences: 03-121
2. Physical Sciences: 09-105
3. Math/CS/Stats: 21-120, 21-122, 21-259
4. STEM Elective: will be fulfilled by courses above or any STEM course from the approved list.

Nontechnical Breadth Requirements

MCS aspires for all of our undergraduates to leave our campus with a strong sense of personal integrity, social responsibility, ethics, working with diverse others, global engagement, and personal health and well-being. The following non-technical breadth requirements will require students to develop a personalized plan for their course selection and meta-curricular participation to maximize their CMU experience. Our graduates will be well trained to be life-long and life-wide learners that will lead the scientific community and the world at large.

All candidates for MCS bachelor's degrees must complete the following non-technical breadth requirements:

A. The following three courses must be taken in the first year:

38-101	EUREKA!: Discovery and Its Impact	6
76-101	Interpretation and Argument	9
99-101	Computing @ Carnegie Mellon	3
or 99-102	Computing @ Carnegie Mellon	

B. The following course must be taken in the Spring of the junior year:

38-301 MCS Junior Seminar

C. ENGAGE Courses:

The ENGAGE courses are self-directed learning opportunities (using the MyCORE online platform) designed to enhance students' engagement with wellness, the arts and community service. Please see the course description for information on when these courses should be taken:

ENGAGE COURSES		
38-110	ENGAGE in Service	1
38-220	ENGAGE in the Arts	2
38-230	ENGAGE in Wellness: Looking Inward	1
38-330	ENGAGE in Wellness: Looking Outward	1
38-430	ENGAGE in Wellness: Looking Forward	1

D. Cultural/Global Understanding Course:

Cultural or global understanding course(s) may be taken at any time. Nine (9) or more units from the following group of courses will fulfill this requirement. Any student who finds an appropriate Carnegie Mellon course not on the list below that might fulfill this requirement should contact their academic advisor to review the course description to determine if it can be substituted. Cultural and global understanding courses that are taken while studying abroad can be used to fulfill this category. In addition, transfer courses will also be considered for this category. However, this course requirement *cannot* be satisfied with AP/IB/Cambridge exam credit.

CULTURAL/GLOBAL UNDERSTANDING

57-173	Survey of Western Music History	9
57-209	The Beatles	9
57-306	World Music	6
70-342	Managing Across Cultures	9
73-331	Political Economy of Inequality and Redistribution	9
76-221	Books You Should Have Read By Now	9
76-227	Comedy	9
76-232	Introduction to African American Literature	9
76-239	Introduction to Film Studies	9
76-241	Introduction to Gender Studies	9
76-386	Language & Culture	9
79-104	Global Histories	9
79-201	Introduction to Anthropology	9
79-202	Flesh and Spirit: Early Modern Europe, 1400-1750	9
79-205	20th Century Europe	9
79-207	Development of European Culture	9
79-221	Development and Democracy in Latin America	9
79-229	Origins of the Arab-Israeli Conflict, 1880-1948	9
79-230	Arab-Israeli Conflict and Peace Process since 1948	9
79-240	The Development of American Culture	9
79-241	African American History: Africa to the Civil War	9
79-242	African American History: Reconstruction to the Present	9
79-255	Irish History	6
79-261	Chinese Culture and Society	9
79-265	Russian History: From the First to the Last Tsar	9
79-266	Russian History: From Communism to Capitalism	9
79-275	Introduction to Global Studies	9
79-281	Introduction to Religion	9
79-297	Dilemmas and Controversies in Anthropology	9
79-307	Religion and Politics in the Middle East	9
79-345	The Roots of Rock and Roll	9
79-349	The Holocaust in Historical Perspective	9
79-350	Early Christianity	9
79-355	Who is a Citizen? The Politics and Cultures of Citizenship in Global Perspective	9
79-357	History of Black American Music	6
79-377	Food, Culture, and Power: A History of Eating	9
80-100	Introduction to Philosophy	9
80-250	Ancient Philosophy	9
80-251	Modern Philosophy	9
80-253	Continental Philosophy	9
80-254	Analytic Philosophy	9
80-255	Pragmatism	9
80-276	Philosophy of Religion	9
82-xxx	Any course from Modern Languages	
99-241	Revolutions of Circularity	9
99-3xx	Any of the Country Today courses	

E. Arts, Humanities, and Social Sciences Courses

To fulfill this requirement, students must complete a minimum of four (4) nontechnical courses totaling at least 36 units in the College of Fine Arts, the Tepper School of Business and/or the Dietrich College for Humanities and Social Sciences. A maximum of 18 units of these units may be fulfilled via AP/IB/Cambridge exam credit. Courses counted toward the Cultural/Global Understanding requirement, and 76-101, do not count toward this requirement.

Check our web site for courses from DC, CFA, and Tepper that may NOT be used (<http://www.cmu.edu/mcs/undergrad/advising/hss-finearts/deletions.html>) to satisfy this requirement because they are too technical in nature, plus a list of courses in other colleges (including SCS, CIT, Tepper, and Heinz College) that do satisfy (<http://www.cmu.edu/mcs/undergrad/advising/hss-finearts/additions.html>) this requirement.

For students entering in the Fall of 2015 and beyond, the following requirements apply to all MCS bachelor's degrees:

1. Students must complete a minimum of 360 units.
2. The four courses required for the Technical Breadth category can be completed at Carnegie Mellon or via transfer credit.
3. AP/IB/Cambridge exam credit cannot be used to fulfill the Cultural/Global Requirement. Cultural and global understanding courses that are taken while studying abroad can be used to satisfy this requirement. In addition transfer courses will also be considered for this category.
4. For the Arts, Humanities and Social Sciences Electives requirement, students must complete a minimum of four courses totaling at least 36 units with a maximum of 18 units from AP/IB/Cambridge exam credit.

Intercollege Programs

MCS participates in two intercollege programs, the Bachelor of Science and Arts Degree program and the Science and Humanities Scholars program. Enrollment for the Science and Humanities program is by invitation only for incoming first-year students, and by application for current students.

Bachelor of Science and Arts Degree Program (BSA)

Students in the Bachelor of Science and Arts Degree program are jointly admitted to MCS and the College of Fine Arts (CFA). This is a degree program for students who are naturally gifted in both the arts and the sciences, and allows for the combining of talents in these areas.

More details can be found at <http://coursecatalog.web.cmu.edu/servicesandoptions/intercollegeprograms/bxaintercollege/>

Science and Humanities Scholars Program (SHS)

Students in the Science and Humanities Scholars Program (SHS) are jointly admitted to MCS and the Dietrich College of Humanities and Social Sciences (DC). Participants in this program follow a special general education core, but have the flexibility to choose a primary major in either of the two colleges. More detail can be found at <http://coursecatalog.web.cmu.edu/servicesandoptions/intercollegeprograms/>

Applying Your Education Through Research

An important feature of education in MCS is the opportunity for undergraduate research experience. This experience may be arranged as a course taken for credit or occasionally as a part-time job. Our web site (www.cmu.edu/mcs/) offers a range of useful information including links to faculty research areas, links to undergraduate research programs at other institutions, and ideas on how to get involved. Because of the strong research base of MCS, undergraduate research positions offer an exciting opportunity to apply your theoretical training to participate in the discovery of new knowledge.

Students can earn MCS Research Honors for significant research accomplishments; see the policy outlined below for the requirements.

Mellon College of Science Research Honors

Undergraduates in the Mellon College of Science will be awarded MCS College Honors at the completion of their degree if they have met one of these requirements:

1. Successfully completed the Honors BS/MS program in the Department of Chemistry or Department of Mathematical Sciences.
2. Successfully completed the departmental honors program in the Department of Biological Sciences or the Department of Chemistry.
3. Earned a cumulative grade point average of 3.20 or higher and carried out significant research. Typically, this would consist of an academic project carried out for at least two semesters. However, a single project that spans a summer and a semester or that the research mentor

deems to be significant and sustained, even if the student worked for pay rather than credit, will be allowed. In addition, some form of public dissemination of this research, which has been approved by the Associate Dean of MCS, such as a peer reviewed publication, research thesis, or presentation at an external scientific meeting is required. The Meeting of the Minds by itself is not sufficient and participation in a preapproved judged competition, such as Sigma Xi, is necessary.

Final approval of nominations for MCS Honors will come from the Dean of MCS and the Associate Dean for Undergraduate Affairs.

Research Centers

The Mellon College of Science is home to a number of innovative research centers. These centers are particularly strong because of the interdisciplinary collaboration of their scientists. This interdisciplinary research brings international prestige to the college. Many students conduct undergraduate research with one of these centers.

The Bruce and Astrid McWilliams Center for Cosmology joins research efforts in astrophysics and particle physics and partners with computer science, statistics, and other disciplines to unravel the mysteries of the universe.

The Center of Atmospheric Particle Study's goal is to be the world leader in science, engineering, and policy covering the full role of fine particulate matter in the atmosphere. Our goal in research is to advance the state of knowledge across this spectrum substantially, to provide both policy-relevant research, and to participate directly and actively in the evolution of environmental policy related to particulate matter.

The Center for Computational Finance's mission is to improve the interaction between academic research and the finance industry.

The Center for Macromolecular Engineering's goals are to enhance the benefits of polymer science to society by developing new methods to prepare advanced polymer materials, train and develop tomorrow's scientists, and transfer technology to industry.

The Center of Nano-enabled Device and Energy Technologies' mission is to work on real-world problems that can be solved potentially with appropriate nano-enabled technologies.

The Center for the Neural Basis of Cognition is a joint program between Carnegie Mellon University and the University of Pittsburgh. It synthesizes the disciplines of basic and clinical neuroscience, cognitive psychology, and computer science, combining neurobiological, behavioral, computational, and brain imaging methods.

The Center for Nonlinear Analysis was established in 1991. A special focus for applications emphasizes new and innovative methods to study contemporary issues in materials science. The center has created a vigorous environment for collaboration among mathematical and allied scientists.

The Center for Nucleic Acids Science and Technology is a community of Carnegie Mellon scientists and engineers unified by interests in the chemistry, biology, and physics of DNA, RNA, and PNA (peptide nucleic acid).

The Institute for Green Science has been established as a research, education, and development center in which a holistic approach to sustainability science is being developed. The focus of the institute is in three areas: renewable energy technologies, chemical feedstocks, and benign alternatives to polluting technologies.

The Molecular Biosensor and Imaging Center uses an interdisciplinary approach to develop reagents, microscopes, and imaging tools and applies them to the investigation of fundamental problems in biology and biotechnology.

The Pittsburgh NMR Center for Biomedical Research is a joint program between Carnegie Mellon University and the University of Pittsburgh. It is supported as a Biotechnology Resource Center by the National Institutes of Health.

The Pittsburgh Supercomputing Center provides information on advanced scientific computing for engineering and research.

The Computational Biology Department seeks to realize the potential of machine learning for expanding our understanding of complex biological systems. A primary goal of the Center is to develop computational tools that will enable automated creation of detailed, predictive models of biological processes, including automated experiment design and data acquisition.

Academic Standards

Academic Actions

MCS Dean's List

Each semester MCS recognizes those students with outstanding academic records by naming them to the Dean's List. The criteria for such recognition are as follows:

Dean's List

The student must earn a quality point average of at least 3.5 while completing a minimum of 36 factorable units and earning no incomplete grades.

Dean's List High Honors

The student must earn a quality point average of at least 3.75 while completing a minimum of 36 factorable units and earning no incomplete grades.

Probation, Suspension, and Drop

In the first year, quality point averages below 1.75 in either semester invoke an academic action. For all subsequent semesters an academic action will be taken if the semester QPA or the cumulative QPA (excluding the first year) is below 2.00.

The progression below between probation, suspension, and drop is typical. However, for example, in unusual circumstances, MCS College Council may choose to suspend or drop a student without prior probation.

Probation

The action of probation will be taken if:

- One semester of the first year is below 1.75 QPA.
- The semester QPA of a student in good standing beyond the first year falls below 2.00. The term of probation is one semester as a full-time student. First-year students are no longer on probation at the end of the second semester if their semester QPA is 1.75 or above.

A student is occasionally continued on probation who has had one semester on probation and is not yet meeting minimum requirements but whose record indicates that the standards are likely to be met at the end of the next semester of study.

Suspension

A student who does not meet minimum standards at the end of one semester of probation will be suspended.

A first-year student will be suspended if the QPA from each semester is below 1.75.

A student in the third or subsequent semester of study will be suspended if the semester factor or the cumulative factor (excluding the first year) is below 2.00 for two consecutive semesters.

The minimum period of suspension is one academic year (two semesters). At the end of that period a student may return to school on probation by:

- Receiving permission in writing from the Associate Dean of MCS.
- Completing a Return from Leave form from Enrollment Services.
- Providing transcripts and clearance forms if the student has been in a degree program at another college or university, even though academic credit earned will not transfer to Carnegie Mellon unless prior approval has been granted by the Associate Dean.

Employment within the university in non-student jobs is possible for students on academic suspension, subject to the hiring criteria of the hiring department. However, a student on academic suspension wishing to accept a job on campus must speak with the Associate Dean of the student's college to ensure that the employment will not constitute a violation of the terms of suspension. The Associate Dean will generally allow such employment, in consultation with the Dean of Student Affairs. One employment benefit not available to students on academic suspension who accept a full-time job with the University is the option to take courses through tuition remission. The option to take courses becomes available only after the academic suspension is over.

Drop

This is a permanent severance from the Mellon College of Science. Students are dropped when it seems clear that they will never be able to meet

minimum standards. A student who has been suspended and who fails to meet minimum standards after returning to school is dropped.

A student who has been academically dropped or academically suspended and who is not employed by the University must absent themselves from campus and is, for the term of the suspension, barred from all activities and affiliations that stem from one's status as an enrolled student. These include registering or enrolling for courses, sitting in on classes, living in residence halls or Greek houses, membership and participation in student activities, and employment in student jobs. (NOTE: Exceptions to the restriction from student jobs for students on academic suspension will in general be granted for summer employment if the position was accepted prior to the decision to suspend.)

Transfer into MCS Departments

Undergraduate students admitted to MCS can choose to pursue any major within MCS. This choice must be made prior to the first semester of the sophomore year (normally during the second semester of the first year) and does not require approval by any department.

Undergraduate students admitted to colleges other than MCS and wishing to transfer into an MCS department during their first year should consult with the MCS Associate Dean for Undergraduate Affairs. Students may submit an internal transfer request no earlier than mid-term of the spring semester of the first year. Potential transfer students must also have successfully taken 21-120 Differential and Integral Calculus and, depending on major choice, one of the following: 03-121 Modern Biology, 09-105 Introduction to Modern Chemistry I, or 33-111 Physics I for Science Students.

MCS undergraduate students beyond the first year wishing to transfer into another MCS department may do so if they are not on academic probation and if there is room in the department of their choice. If the demand for any department exceeds the space available, then the department will admit students based on a comparative evaluation of all applicants at the end of each semester, up to the limit of available space.

Undergraduate students not in MCS and wishing to transfer into a department in MCS beyond the first year will be considered for transfer on a space available/academic performance basis. An MCS department may refuse a transfer to a non-MCS student if there are space restrictions and/or if the student's chance for success is determined to be questionable based on past academic performance.

Procedure for transfer of students from another university into an MCS department:

A student first applies through the Office of Admission. If the Office of Admission believes the applicant is acceptable, the student's record is sent to the appropriate department for evaluation and a decision on acceptance. The MCS department head has the right to refuse to accept the student if there are space restrictions and/or if the student's chance for success in the MCS department is determined to be questionable based on past academic performance.

Graduation Requirements

To be eligible to graduate, undergraduate students must complete all course requirements for their program with a cumulative Quality Point Average of at least 2.0 for all courses taken. For undergraduate students who enrolled at Carnegie Mellon as freshmen and whose freshman grades cause the cumulative QPA to fall below 2.0, this requirement is modified to be a cumulative QPA of at least 2.0 for all courses taken after the freshman year. Note, however, the cumulative QPA that appears on the student's final transcript will be calculated based on all grades in all courses taken, including freshman year. Some programs may have additional QPA requirements in order to graduate. Students are encouraged to confirm all graduation requirements with their academic advisor.

A minimum of 360 units must be completed. This will include the MCS Science Core Courses, humanities or fine arts requirements and all departmental course requirements.

Students will be required to meet the residency requirement and to have met all financial obligations to the university before being awarded a degree. The residency requirement is detailed in the Academic Regulations section of the catalog.

A student may seek permission to modify graduation requirements by petition to the MCS College Council.

Graduation Honors

There are two types of honors awarded at graduation.

University Honors

University Honors are automatically awarded to students who have earned a cumulative Q.P.A. of 3.5 or better after seven semesters.

College Research Honors

Please see the section “Mellon College of Science Research Honors” for information on how to qualify for College Research Honors.

Faculty

WILLIAM ALBA, Director of Science and Humanities Scholars Program.

MAGGIE BRAUN, Director of Core Education.

JASON D'ANTONIO, Director of Health Professions Program.

ERIC W. GROTZINGER, Associate Dean for Undergraduate Affairs.

JOHN F. HANNON, Director of Integrative Learning.

CURTIS MEYER, Associate Dean for Faculty and Graduate Affairs.

Administration

CHARLOTTE BARTOSH, Interdisciplinary Laboratory Research Technician.

VERONICA PEET, Senior Academic Advisor.

TARA PRIMIERO, Administrative Coordinator.

MAY SIMAAN, Administrative Coordinator.

Minors Offered by the Mellon College of Science

The Mellon College of Science offers several minors to students interested in broadening their scientific training or acquiring a level of expertise in a particular scientific field. The intercollege minors described below are designed to supplement your degree in science; the departmental minors offer you a means of exploring another field and are open to students throughout the university.

Intercollege Minors

Please see the descriptions below.

- Environmental Science
- Health Care Policy and Management
- Scientific Computing

Departmental Minors in the Mellon College of Science

For descriptions, please see the departmental sections which follow.

- Biological Sciences
- Chemistry
- Computational Finance
- Discrete Mathematics and Logic
- Mathematical Sciences
- Physics

Minor in Environmental Science

Advisor: Eric Grotzinger

The primary mission of the environmental sciences minor is to prepare students in the Mellon College of Science for careers or postgraduate education in the diverse fields of environmental science. We feel strongly that these endeavors must be grounded in strong fundamental science; consequently, the program extends majors in the Mellon College of Science.

We also award minors to students from other colleges, provided that they can build a course of study with sufficient scientific rigor to meet the standards of the program.

As a capstone program, the minor is built around advanced courses that extend as well as broaden the specialized education associated with the major programs. Environmental sciences are highly interdisciplinary in nature, and while it is necessary that students have an exposure to introductory courses in several of these disciplines, it is by no means sufficient; in-depth knowledge is required. We encourage all students to pursue generally broad studies, including subjects that encompass human interactions with the environment, and will provide guidance to all students interested in the area. We encourage those students who intend to devote focused attention to environmental sciences to pursue this minor.

Environmental Sciences are broadly defined as pursuits designed to develop fundamental understanding of the natural environment and human interactions with the environment. Research problems are frequently motivated by perceived problems (air, water and soil pollution, reduction in biodiversity, global climate change, etc...), but inevitably extend to the fundamental mechanisms underlying these phenomena. Research can be highly specialized (focusing for example on the biochemistry of a particular enzyme or the synthesis of a particular catalyst) or highly general (focusing for example on the complex, nonlinear interactions of populations on complex ecosystems). Our program is designed to ensure that students of the field are conversant with questions on all of these scales, from the microscopic to the global.

Required Courses:

Science Requirements (27 units)

09-217	Organic Chemistry I	9-10
or 09-219	Modern Organic Chemistry	
09-218	Organic Chemistry II	9-10
or 09-220	Modern Organic Chemistry II	
03-231/232	Biochemistry I	9

Laboratory Requirement (12 units)

09-221	Laboratory I: Introduction to Chemical Analysis	12
--------	---	----

Statistics Requirement (9 units)

36-217	Probability Theory and Random Processes	9
36-225	Introduction to Probability Theory	9
36-247	Statistics for Lab Sciences	9

Additional Course Requirements:

Complete one course from each of the following groups (substitutions can be made with the approval of the Environmental Science Advisor).

Note: Courses taken in these categories cannot also be counted toward requirements for a primary major.

Science (Mechanism)

03-442	Molecular Biology	9
09-510	Chemistry and Sustainability	9
09-520	Global Atmospheric Chemistry: Fundamentals and Data Analysis Methods	9
06-630	Atmospheric Chemistry, Air Pollution and Global Change	12
xx-xxx	Course credit may be assigned for research, fieldwork, or coursework performed outside of CMU at the discretion of the minor advisor.	

Engineering (Process)

12-100	Introduction to Civil and Environmental Engineering	12
12-201	Geology	9
12-351	Environmental Engineering	9
12-651	Air Quality Engineering	9
19-440	Combustion and Air Pollution Control	9

Policy

19-424	Energy and the Environment	9
19-448	Science, Technology & Ethics	9
73-148	Environmental Economics	9
73-358	Economics of the Environment and Natural Resources	9
79-372	Perspectives on the Urban Environment	9
79-381	Energy and Empire: How Fossil Fuels Changed the World	9
80-344	Management, Environment, and Ethics	9
99-238	Materials, Energy and Environment	9

Minor in Health Care Policy and Management

Sponsored by:

H. John Heinz III College
Dietrich College of Humanities and Social Sciences
Mellon College of Science

Faculty Advisors:

Jason D'Antonio, Mellon College of Science
James F. Jordan, H. John Heinz III College

The face of health care is changing. The practice of medicine is being fundamentally altered by the forces of change in public policy, health care organizations and in the industry as a whole. The role of individual professionals in this industry is changing as rapidly as the industry itself. Traditional career paths have disappeared overnight to be replaced by new opportunities that require new skills. New organizations are placing new demands on their professional and medical staffs. The criteria of efficiency and financial stability are entering the domains of diagnosis and treatment.

This minor is designed to provide students considering a career in the health professions with an understanding of how these changes are likely to affect their careers. Students will become familiar with the critical policy and management issues and will begin to learn to operate effectively in the emerging health care environment. The curriculum combines economic, organizational, managerial, historical and psychological perspectives on

these issues to provide a foundation for a deepened understanding of the changing structure of health care organizations and policy.

Curriculum 60 units minimum

Seven courses (a minimum of 60 units) are required to complete this minor. Entry into the minor requires completion of 73-100 Principles of Economics or 88-220 Policy Analysis I or the equivalent by approval.

Required Courses 39 units

Students are required to take the following courses.

79-330	Medicine and Society	9
90-836	Health Systems	6
90-861	Health Policy	6
94-705	Health Economics	12

Elective Courses 27 units

Complete a minimum of 27 units.

Heinz College Courses

90-708	Healthcare Ethics	6
90-721	Healthcare Management	6
90-818	Health Care Quality & Performance Improvement	6
90-830	Introduction to Financial Management of Health Care	6
90-831	Advanced Financial Management of Health Care	6
90-832	Health Law	6
90-863	Health Policy II	6
94-706	Healthcare Information Systems	12

Humanities and Social Sciences Courses (9 units each)

76-494	Healthcare Communications	9
79-383	Epidemics, Disease, and Public Health	9
80-245	Medical Ethics	9
80-247	Ethics and Global Economics	9
85-241	Social Psychology	9
85-442	Health Psychology	9
85-446	Psychology of Gender	9

Please note that some of these courses have prerequisites that will not count toward the completion of the requirements for this minor.

Minor in Scientific Computing

Advisor: Eric Grotzinger

Sometimes called "computational science," scientific computing is the application of high-performance computers and modern computational technologies to problems in the sciences and engineering. Research in this area is inherently multidisciplinary, requiring strong ties with a scientific discipline.

MCS students can easily build on their scientific training with this applied computational program. The curriculum consists of five areas of concentration, which span the natural sciences, mathematics, programming and research. The curriculum is structured to allow flexibility in choosing courses that meet students' particular interests or best compliment their major. The minor is also a natural choice for students majoring in any technical area.

Required Courses

Students must meet the requirements of the following categories:

A. Non-Introductory Science Requirement (9-12 units)

Complete 1 course from Biological Sciences, Chemistry, or Physics at the 200 level or higher, excluding those courses listed below as part of the requirements of the minor. Courses with a significant science component from other colleges may be substituted with approval from the program administrator.

B. Computational Science Requirement (18-24 units)

Complete 2 of the following courses:

03-250	Introduction to Computational Biology	12
03-511	Computational Molecular Biology and Genomics	9
09-560	Computational Chemistry	12
15-386	Neural Computation	9
33-241	Introduction to Computational Physics	9

C. Computational Methods Requirement (9 units)

Complete one of the following courses from outside of your home department.

21-320	Symbolic Programming Methods	9
21-369	Numerical Methods	9
33-232	Mathematical Methods of Physics	10
33-456	Advanced Computational Physics	9
36-410	Introduction to Probability Modeling	9

D. Applied Scientific Computing Research Project(s) (9 units)

Complete one approved research project in an area of applied scientific computing. In some cases, this research could be replaced with 9 units of an approved project-based course in advanced scientific computing. The administrator of the minor will maintain a list of appropriate courses. Under special circumstances summer research may count toward this requirement, although it cannot be counted toward the units required for graduation.

E. Complete any additional course from category C or D (9 units)

Department of Biological Sciences

Aaron P. Mitchell, Interim Department Head
Becki Campanaro, Assistant Department Head for Undergraduate Affairs
Undergraduate Office: Doherty Hall 1321
<http://www.cmu.edu/bio>

A major revolution is occurring in the field of biological sciences. Biology is undergoing unprecedented technological advances in biochemistry, biophysics, cell biology, genetics, molecular biology, developmental biology, neuroscience and computational biology. Carnegie Mellon's Department of Biological Sciences is nationally recognized as one of the outstanding departments in these areas. Advances in basic research are already being used to solve problems, not only in medicine and public health, but also in areas such as agriculture, forestry, mining, energy, and in industrial and pharmaceutical manufacturing processes. The department provides its students with an education that has both intellectual breadth and depth of exposure to modern research biology. This education can be used to gain employment immediately after graduation in government, industry or academic research laboratories, or to pursue graduate studies in a variety of areas such as science, medicine, public health, law, or business. A degree in biological sciences provides excellent preparation for medical school or other graduate programs in the health professions. These students are aided by the Carnegie Mellon Health Professions Program (HPP), an advisory and resource service for all Carnegie Mellon students who are considering careers in the health care field. (See the HPP (<http://coursecatalog.web.cmu.edu/servicesandoptions/undergraduateoptions/#healthprofessionsprogram>) section in this catalog or www.cmu.edu/hpp for more information.)

The department offers a Bachelor of Science (B.S.) degree in Biological Sciences. This program has a distinctive core curriculum that provides a foundation in biology, chemistry, computer science, mathematics, and physics. In addition to the core courses, the program includes six biology electives, five free electives as well as eight humanities, social science and fine arts electives. With these electives, students can shape a degree program according to their own interests and career goals. For students who have an interest in a particular field of biology and wish to have a specialized focus, the department offers options in biochemistry, biophysics, cell biology, computational biology, developmental biology, genetics, molecular biology and neuroscience that provide the relevant training in each area. The options are especially recommended for students who are considering graduate school in one of these areas. The B.S. degrees in Biological Sciences/Neuroscience Track and Neuroscience are available to those students who wish to pursue an in-depth study of neuroscience.

In this exciting era that includes the influence of biology and the life sciences on many fields from medicine to law, the in-depth exposure to multiple disciplines provides opportunities for students to prepare for involvement at the forefront of emerging new fields, markets, and policy changes. The Department of Biological Sciences at Carnegie Mellon is working at these new interfaces through interdisciplinary research and educational programs. Innovative interdisciplinary degrees which are offered by the department include the inter-college B.S. degrees in Computational Biology and Neuroscience as well as an unified B.S. degree in Biological Sciences and Psychology. Students also explore interdisciplinary studies through the Science and Humanities Scholars program, or pursue interests at the interface between the arts and sciences through the Bachelor of Science and Arts (B.S.A.) degree program combining biological sciences with a discipline in the College of Fine Arts. A stand-alone Bachelor of Arts (B.A.) degree is available for students who wish to expand their educational training into other fields. Many students choose to broaden their education by pursuing minors and additional majors in disciplines throughout the university, not just within the Mellon College of Science.

One of the most important features of the Department of Biological Sciences is the opportunity for undergraduate students to interact with faculty. Providing a solid foundation to scientific practice is critical; therefore, the department offers first-year students a variety of inquiry-based, hands-on courses that incorporate a wide range of topics and interests within Biological Sciences. These courses kick-start the transformation of science students to scientists. We encourage our students to get to know their faculty through one of these courses, or through mentored, independent research projects in the faculty laboratories. Our faculty members are prominent research scientists who also teach beginning and advanced courses. The upper level teaching laboratories are located in the same building as the faculty research laboratories and share scientific equipment. We encourage students to make themselves aware of the research areas of the faculty and to develop research projects with faculty. While such research is usually most important in the senior year, it may begin earlier in a student's undergraduate training. The department has an Honors Program in Research Biology to facilitate a more intensive involvement in research

for eligible students. During the past four years, more than 80 percent of the undergraduate biology majors have worked with faculty on their research and, in some cases, have been co-authors of research papers and have given presentations at national meetings.

As of the fall of 2011, the Department of Biological Sciences offers B.S. degrees in Biological Sciences as well as Computational Biology at Carnegie Mellon University in Doha, Qatar. Students enrolled in either of these degree programs will also complete the requirements outlined below. However, a limited number of required courses for the CMU-Qatar program are offered through a collaboration with the Weill Cornell Medical College in Qatar. For a listing of how the degree requirements are fulfilled for students enrolled in Doha, please consult the CMU-Qatar website (<https://www.qatar.cmu.edu/curriculum-bs>).

B.S. Biological Sciences

The Bachelor of Science (B.S.) in Biological Sciences is built around a core program and elective units as detailed in the following section.

Degree Requirements:

Biological Sciences	Units
03-121 Modern Biology	9
or 03-151 Honors Modern Biology	
03-231 Biochemistry I	9
03-240 Cell Biology	9
03-201/202 Undergraduate Colloquium for Sophomores	2
03-250 Introduction to Computational Biology	12
or 03-251 AND 03-252	
03-330 Genetics	9
03-343 Experimental Techniques in Molecular Biology	12
03-344 Experimental Biochemistry	12
or 03-345 Experimental Cell and Developmental Biology	
or 03-346 Experimental Neuroscience	
03-411 Topics in Research	1
03-412 Topics in Research	1
03-xxx Biological Sciences Electives ¹	54

Total Biology units 130

¹ Details on electives can be found in the "Biological Sciences Electives" section (see below).

Mathematics, Physics and Computer Science	Units
21-120 Differential and Integral Calculus	10
21-122 Integration and Approximation	10
or 21-124 Calculus II for Biologists and Chemists	
33-111 Physics I for Science Students	12
33-122 Physics II for Biological Sciences and Chemistry Students ³	9
02-201 Programming for Scientists ²	12
99-10x Computing at Carnegie Mellon	3

Total Science units 56

² 15-112 Fundamentals of Programming and Computer Science or 15-110 Principles of Computing can substitute for 02-201 towards the completion of the Programming course requirement.

³ 33-112 Physics II for Science Students may substitute for 33-122 Physics II for Biological Sciences and Chemistry Students towards completion of the Physics II requirement.

Chemistry	Units
09-105 Introduction to Modern Chemistry I	10
09-106 Modern Chemistry II	10
09-217 Organic Chemistry I	9
or 09-219 Modern Organic Chemistry	
09-218 Organic Chemistry II	9
or 09-220 Modern Organic Chemistry II	
09-221 Laboratory I: Introduction to Chemical Analysis	12

09-222	Laboratory II: Organic Synthesis and Analysis	12
Total Chemistry units		62
Elective Units		Units
Free Electives		39
MCS Nontechnical Breadth Requirements		72
Total Elective units		111

360 Minimum number of units required for degree:

MCS Technical Breadth Requirements

Majors entering CMU and majoring in Biological Sciences (or affiliated majors) in the Fall of 2015 or beyond will fulfill the MCS Technical Breadth requirements as follows:

1. Life Sciences: any courses in this category except for the 03-XXX courses (these can be counted as general bio electives towards your degree)
2. Physical Sciences: 09-105, 09-106, 33-121 and 33-122
3. Math/CS/Stats: 21-120 and (21-122 or 21-124)
4. STEM Elective: will be filled by courses above or any STEM course from the approved list.

Biological Sciences Electives

The following specifications apply to Biological Sciences electives:

- At least 18 units must be at the 03-3xx level or above, exclusive of 03-445 Undergraduate Research and 03-370 Principles of Biotechnology.
- Up to three interdisciplinary electives may count as biology electives.
- Up to 18 units of 03-445 Undergraduate Research may count as general biology electives; a maximum of 36 units can count for the minimum units required for graduation.
- Courses in biology taken through cross-registration or study abroad at another university may count as electives if prior permission is obtained from the Carnegie Mellon Department of Biological Sciences advisor.

Departmental Electives Group

03-115/116	Phage Genomics Research	6
03-124	Modern Biology Laboratory	9
03-125	Evolution	9
03-126	Cellular Response to the Environment	4
03-127	How Biological Experiments Work - A Project Course	9
03-161	Molecules to Mind	9
03-230	Intro to Mammalian Physiology	9
03-260	Neurobiology of Disease	9
03-326	Evolution of Regulatory Genomics	4.5
03-327	Phylogenetics	9
03-350	Developmental Biology	9
03-362	Cellular Neuroscience	9
03-363	Systems Neuroscience	9
03-364	Developmental Neuroscience	9
03-370	Principles of Biotechnology	9
03-390	Molecular and Cellular Immunology	9
03-391	Microbiology	9
03-392	Microbiology Laboratory	6
03-439	Introduction to Biophysics	9
03-442	Molecular Biology	9
03-445	Undergraduate Research	Var.
03-511	Computational Molecular Biology and Genomics	9
03-512	Computational Methods for Biological Modeling and Simulation	9
03-534	Biological Imaging and Fluorescence Spectroscopy	9
03-545	Honors Research	9
03-620	Techniques in Electron Microscopy	9
03-709	Applied Cell and Molecular Biology	12
03-711	Computational Molecular Biology and Genomics	12
03-712	Computational Methods for Biological Modeling and Simulation	12
03-713	Bioinformatics Data Integration Practicum	6

03-726	Evolution of Regulatory Genomics	6
03-727	Phylogenetics	12
03-730	Advanced Genetics	12
03-740	Advanced Biochemistry	12
03-741	Advanced Cell Biology	12
03-742	Molecular Biology	12
03-744	Membrane Trafficking	9
03-751	Advanced Developmental Biology and Human Health	12
03-762	Advanced Cellular Neuroscience	12
03-763	Advanced Systems Neuroscience	12
03-770	Principles of Biotechnology	12
03-791	Advanced Microbiology	12
03-871	Structural Biophysics	12

Interdisciplinary Electives Group

Up to three of the following courses may count as biology electives:

09-518	Bioorganic Chemistry: Nucleic Acids and Carbohydrates	9
09-519	Bioorganic Chemistry: Peptides, Proteins and Combinatorial Chemistry	9
09-521	Bioinorganic Chemistry	9
09-535	Applied topics in Macromolecular and Biophysical Techniques	9
15-211	Fundamental Data Structures and Algorithms	12
21-127	Concepts of Mathematics	10
21-259	Calculus in Three Dimensions	9
21-260	Differential Equations	9
36-201	Statistical Reasoning and Practice	9
36-247	Statistics for Lab Sciences	9
42-202	Physiology	9
85-219	Biological Foundations of Behavior	9

Options for the B.S. in Biological Sciences

Students who wish to specialize in a particular area of biology can do so through a set of departmentally defined options. A student who completes the required biology electives for any option can have up to two noted on his or her transcript. Options need not be declared. The elective courses required for each of the options are listed below.

Biochemistry OptionRequired Biology Electives:

03-740	Advanced Biochemistry	12
21-259	Calculus in Three Dimensions	9
or 21-260	Differential Equations	

Any ONE of the following courses:

09-518	Bioorganic Chemistry: Nucleic Acids and Carbohydrates	9
09-519	Bioorganic Chemistry: Peptides, Proteins and Combinatorial Chemistry	9
09-521	Bioinorganic Chemistry	9

Recommended Biology Electives:

03-442	Molecular Biology	9
03-534	Biological Imaging and Fluorescence Spectroscopy	9
03-439	Introduction to Biophysics	9
03-871	Structural Biophysics	12

Biophysics OptionRequired Biology Electives:

03-740	Advanced Biochemistry	12
03-439	Introduction to Biophysics	9
21-259	Calculus in Three Dimensions	9
or 21-260	Differential Equations	

Recommended Biology Electives:

03-534	Biological Imaging and Fluorescence Spectroscopy	9
03-871	Structural Biophysics	12

Cell Biology OptionRequired Biology Electives:

03-350	Developmental Biology	9
03-741	Advanced Cell Biology	12

Any ONE of the following courses:

03-362	Cellular Neuroscience	9
03-390	Molecular and Cellular Immunology	9

Computational Biology OptionRequired Biology Electives:

03-711	Computational Molecular Biology and Genomics	12
15-210	Parallel and Sequential Data Structures and Algorithms	12

Any ONE of the following courses:

36-247	Statistics for Lab Sciences	9
21-260	Differential Equations	9
21-241	Matrices and Linear Transformations	10

Recommended Biology Electives:

03-512	Computational Methods for Biological Modeling and Simulation	9
15-451	Algorithm Design and Analysis	12
09-560	Computational Chemistry	12

Developmental Biology OptionRequired Biology Electives:

03-350	Developmental Biology	9
03-442	Molecular Biology	9
03-751	Advanced Developmental Biology and Human Health	12

Recommended Biology Electives:

03-326	Evolution of Regulatory Genomics	4.5
03-741	Advanced Cell Biology	12

Genetics OptionRequired Biology Electives:

03-326	Evolution of Regulatory Genomics	4.5
03-327	Phylogenetics	9
03-442	Molecular Biology	9
03-730	Advanced Genetics ³	12

³ Minimum grade of B in 03-330 required.

Recommended Biology Electives:

03-391	Microbiology	9
--------	--------------	---

Molecular Biology OptionRequired Biology Electives:

03-442	Molecular Biology	9
09-518	Bioorganic Chemistry: Nucleic Acids and Carbohydrates	9
03-726	Evolution of Regulatory Genomics	6
03-727	Phylogenetics	12

Recommended Biology Electives:

03-390	Molecular and Cellular Immunology	9
03-391	Microbiology	9
03-730	Advanced Genetics	12

Neuroscience OptionRequired Biology Electives:

03-362	Cellular Neuroscience ⁴	9
--------	------------------------------------	---

03-363	Systems Neuroscience ⁴	9
--------	-----------------------------------	---

Any ONE of the following courses:

42-202	Physiology	9
03-260	Neurobiology of Disease	9
03-350	Developmental Biology	9
03-364	Developmental Neuroscience	9
03-534	Biological Imaging and Fluorescence Spectroscopy	9
85-219	Biological Foundations of Behavior	9

4. One of these courses must be completed at the Graduate Level (Complete either 03-762 or 03-763).

B.S. Biological Sciences/Neuroscience Track

The Bachelor of Science in Biological Sciences/Neuroscience Track provides an option for those Biological Sciences majors who are interested in an intensive curricular focus in neuroscience. The requirements of the Track are the same as those listed for the B.S. in Biological Sciences with the following changes to the biological sciences elective requirements:

Degree Requirements:

03-362	Cellular Neuroscience	9
03-363	Systems Neuroscience	9
03-761	Neural Plasticity ⁴	9

4 Substitutions for 03-761 Neural Plasticity may be approved by the Assistant Department Head on an individual basis. Suggested substitutions should be graduate level neuroscience courses.

Plus three of the following electives:

03-260	Neurobiology of Disease	9
03-350	Developmental Biology	9
03-364	Developmental Neuroscience	9
03-534	Biological Imaging and Fluorescence Spectroscopy	9
15-385	Introduction to Computer Vision	6
15-386	Neural Computation	9
42-202	Physiology	9
85-211	Cognitive Psychology	9
85-213	Human Information Processing and Artificial Intelligence	9
85-219	Biological Foundations of Behavior	9

B.S. Computational Biology

The Bachelor of Science in Computational Biology is listed in the Intercollege (p. 77) section of this catalog. It is a joint degree program offered between the Mellon College of Science and the School of Computer Science. Current MCS students interested in pursuing this degree should contact Dr. Becki Campanaro (DH 1321). More information can also be found on the CMU Computational Biology website (<http://lane.compbio.cmu.edu>).

B.S. Neuroscience

The Bachelor of Science in Neuroscience is listed in the Intercollege (p. 77) section of this catalog. It is a joint degree program offered between the Mellon College of Science and the Dietrich College of Humanities and Social Sciences. Current MCS students interested in pursuing this degree should contact Dr. Maggie Braun (DH 1322). More information can also be found on the CMU Neuroscience website (<http://www.cmu.edu/neuro>).

B.S. Biological Sciences and Psychology

This major is intended to reflect the interdisciplinary nature of current research in the fields of biology and psychology, as well as the national trend in some professions to seek individuals broadly trained in both the social and natural sciences.

Note: Students entering from the College of Humanities and Social Sciences will earn a Bachelor of Science in Psychology and Biological Sciences.

Students in the Mellon College of Science will earn a Bachelor of Science in Biological Sciences and Psychology. Students in the joint Science and Humanities Scholars (SHS) program can complete the SHS educational core and choose either departmental order for their diploma.

Depending on a student's home college (H&SS or MCS), General Education (GenEd) requirements will be different. GenEd requirements for H&SS (p. 202) and MCS (p. 307) are found on their respective Catalog pages.

Degree Requirements:

Biological Sciences	Units
03-121 Modern Biology	9
03-231 Biochemistry I	9
03-240 Cell Biology	9
03-330 Genetics	9
03-343 Experimental Techniques in Molecular Biology	12
03-411 Topics in Research	1
03-412 Topics in Research	1
03-xxx General Biology Elective	9
03-3xx Advanced Biology Elective	9
03-3xx Advanced Biology Elective	9
Total Biology units	77

Mathematics, Statistics, Physics and Computer Science	Units
21-120 Differential and Integral Calculus	10
21-122 Integration and Approximation	10
or 21-124 Calculus II for Biologists and Chemists	
36-247 Statistics for Lab Sciences	9
or 36-201 Statistical Reasoning and Practice	
36-309 Experimental Design for Behavioral and Social Sciences	9
33-111 Physics I for Science Students ^{MCS students must complete Physics II also (either 33-112 or 33-122)}	12
15-110 Principles of Computing *	10
99-10x Computing at Carnegie Mellon	3
Total Science units	63

Chemistry	Units
09-105 Introduction to Modern Chemistry I	10
09-106 Modern Chemistry II	10
09-217 Organic Chemistry I	9
or 09-219 Modern Organic Chemistry	
09-218 Organic Chemistry II	9
or 09-220 Modern Organic Chemistry II	
09-221 Laboratory I: Introduction to Chemical Analysis	12
09-222 Laboratory II: Organic Synthesis and Analysis	12
Total Chemistry units	62

Psychology Courses	Units
85-102 Introduction to Psychology	9
85-219 Biological Foundations of Behavior	9
85-2xx Survey Psychology Courses **	18
85-310 Research Methods in Cognitive Psychology	9
or 85-340 Research Methods in Social Psychology	
or 85-320 Research Methods in Developmental Psychology	
or 85-314 Cognitive Neuroscience Research Methods	
or 85-330 Analytic Research Methods	
85-3xx Advanced Psychology Electives	18
Total Psychology units	63

** Excluding 85-261 Abnormal Psychology

Additional Advanced Elective

9 units(Choose one of the following courses)

85-3xx Advanced Psychology Elective	9
or	
03-3xx Advanced Biology Elective	9

Additional Laboratory or Research Methods

9-12 units(Choose one of the following courses)

03-344 Experimental Biochemistry	12
----------------------------------	----

03-345 Experimental Cell and Developmental Biology	12
85-310 Research Methods in Cognitive Psychology	9
85-314 Cognitive Neuroscience Research Methods	9
85-320 Research Methods in Developmental Psychology	9
85-340 Research Methods in Social Psychology	9

Elective Units	Units
Free Electives	33-36
MCS Nontechnical Breadth or DC General Education requirements	36-48

Total Elective units 0

360

Minimum number of units required for degree:

B.A. Biological Sciences

The Department of Biological Sciences offers a Bachelor of Arts (B.A.) degree that is intended for students who wish to combine their interest in science with their interest(s) in other discipline(s) across campus. The requirements for the B.A. degree are distributed as follows:

Degree Requirements:

Biological Sciences	Units
03-121 Modern Biology	9
03-231 Biochemistry I	9
03-240 Cell Biology	9
03-201/202 Undergraduate Colloquium for Sophomores	2
03-330 Genetics	9
03-343 Experimental Techniques in Molecular Biology	12
or 03-124 Modern Biology Laboratory	
03-411 Topics in Research	1
03-412 Topics in Research	1
03-xxx General Biology Electives ⁵	18
03-3xx Advanced Biology Electives ⁶	18
Total Biology units	88

^{5,6} Please see description and requirements for electives under the B.S. in Biological Sciences section of this Catalog.

Chemistry	Units
09-105 Introduction to Modern Chemistry I	10
09-106 Modern Chemistry II	10
09-217 Organic Chemistry I	9
or 09-219 Modern Organic Chemistry	
09-218 Organic Chemistry II	9
or 09-220 Modern Organic Chemistry II	
09-221 Laboratory I: Introduction to Chemical Analysis	12
Total Chemistry units	50

Mathematics, Physics, and Computer Science	Units
21-120 Differential and Integral Calculus	10
21-122 Integration and Approximation	10
or 21-124 Calculus II for Biologists and Chemists	
33-111 Physics I for Science Students	12
33-122 Physics II for Biological Sciences and Chemistry Students ⁷	9
02-201 Programming for Scientists ⁸	12
99-10x Computing at Carnegie Mellon	3
Total Science units	56

⁷ 33-112 Physics II for Science Students can substitute for 33-122 Physics II for Biological Sciences and Chemistry Students towards completion of the Physics II requirement.

⁸ 15-112 Fundamentals of Programming and Computer Science or 15-110 Principles of Computing can substitute for 02-201 towards completion of the Programming course requirement.

Elective courses	Units
MCS Nontechnical Breadth Requirements	72
Free Electives	99-102
Total Elective units	72

360 Minimum number of units required for degree:

Masters Degree in Computational Biology

Students who are interested in more advanced training in this emerging field may want to consider the Master of Science Program in Computational Biology. For more information about this program, contact the Biological Sciences Graduate Programs Office (bio-gradoffice@andrew.cmu.edu).

Honors Program in Research Biology

The departmental Honors Program offers an opportunity to become extensively involved in research. The program requires students to conduct an independent project and to prepare a formal thesis that is written and defended in the senior year. This program does not preclude a student from completing any of the options within the department nor is it the only way in which students can participate in undergraduate research, although it is excellent preparation for graduate studies.

Minor in Biological Sciences

All university students are eligible to pursue a minor in biological sciences in conjunction with a major in any other department in the university. A minimum of six biological sciences courses (and two chemistry prerequisites) must be completed to fulfill the minor in biological sciences. The curriculum includes four required courses and two elective courses as specified below. Units awarded for undergraduate research are not applicable to elective courses. Courses taken in other departments or colleges will be considered on an individual basis.

Courses for the Minor in Biological Sciences

Prerequisites:		Units
09-105	Introduction to Modern Chemistry I	10
09-217	Organic Chemistry I	9
Required courses:		Units
03-121	Modern Biology	9
03-231/232	Biochemistry I	9
03-240	Cell Biology	9
03-330	Genetics	9
03-xxx	General Biology Elective	9
03-3xx	Advanced Biology Elective	9

73 Minimum number of units required for the Minor in Biological Sciences:

Minor in Neuroscience

The curriculum within the Neuroscience minor will allow students from various disciplines to gain fundamental knowledge of neuroscience concepts. The interdisciplinary nature of the coursework echoes the nature of the field itself; students will select courses from the natural, social, and computer sciences. Neuroscientists not only require foundational knowledge of molecular, cellular, and systems neuroscience, but they should also understand the behavioral significance and appreciate how computational work and imaging techniques can aid in clarifying normal and abnormal functioning of these fundamental processes.

Students pursuing the minor in Neuroscience will:

- Acquire foundational knowledge of the basic biological foundations of the nervous system, from the cellular through systems levels.
- Understand the effects of basic neurological function on behavior, including cognition.
- Gain an appreciation of the interdisciplinary nature of the field of neuroscience.

NOTE: Because the curriculum within this minor may overlap with some degree requirements, no more than 2 courses fulfilling Neuroscience Minor requirements may count towards the requirements of a student's major or other minor.

Courses required for the Neuroscience minor

Required courses (4):

03-121	Modern Biology	9
03-362	Cellular Neuroscience	9
03-363	Systems Neuroscience	9
85-219	Biological Foundations of Behavior	9
or 03-161	Molecules to Mind	

Distribution Requirements: Three courses, including at least 1 from each of the following categories:

Approaches to Neuroscience Category		Units
15-386	Neural Computation	9
15-883	Computational Models of Neural Systems	12
85-412	Cognitive Modeling	9
85-414	Cognitive Neuropsychology	9
85-419	Introduction to Parallel Distributed Processing	9
85-429	Cognitive Brain Imaging	9
Cognitive Neuroscience Category		Units
03-260	Neurobiology of Disease	9
03-364	Developmental Neuroscience	9
15-486	Artificial Neural Networks	12
85-211	Cognitive Psychology*	9
85-356	Music and Mind: The Cognitive Neuroscience of Sound	9
85-370	Perception	9
85-390	Human Memory	9
85-406	Autism: Psychological and Neuroscience Perspectives	9

*NOTE: 85-213 may be used instead of 85-211 when offered

Minimum number of units required for the Neuroscience Minor: 63

Transfer credit for Modern Biology

Students wishing to transfer credit for 03-121 Modern Biology from another institution must meet the following requirements:

1. The course in question should have at least an 80% match in topics with 03-121. Topics in 03-121 cover the genetic, molecular, cellular, developmental, and evolutionary mechanisms that underlie biological processes and include: Cell theory; Cell chemistry; Cell structure; Function and structure of proteins, DNA, RNA, lipids and carbohydrates; Cell respiration and fermentation; The cell cycle; Cell-cell interactions and communication; Transcription; Translation; RNA processing in Eukaryotes; DNA replication; DNA mutation and repair; Meiosis; Mitosis; and Regulation of Gene Expression.
This information is sometimes available in the course description, but more detail is often found in a course syllabus.
2. The textbook used in the transfer course should be at a comparable level to S. Freeman (2010) "Biological Science, Vol. 1 (The Cell, Genetics, and Development)," Fourth Edition, Pearson Benjamin Cummings, ISBN 0-321-61347-3.
3. Introductory level courses that focus on other biology areas (i.e. anatomy, physiology, ecology, evolution, and/or development) will not be accepted for 03-121 credit. These courses may receive credit for a general biology elective.
4. Students should contact their departmental academic advisor for the transfer credit approval process in their college.

Faculty

ALISON L. BARTH, Professor - Ph.D., University of California, Berkeley; Carnegie Mellon, 2002-.

MOHAMED BOUAQUINA, Assistant Teaching Professor - Ph.D., Carnegie Mellon, 2013-.

DANIEL BRASIER, Assistant Teaching Professor - Ph.D., University of California, San Diego; Carnegie Mellon, 2012-.

MAGGIE BRAUN, Associate Teaching Professor and Director of MCS Core Education - Ph.D., University of Pittsburgh; Carnegie Mellon, 2008-.

Units

MARCEL BRUCHEZ, Associate Professor in Biological Sciences and Chemistry, Associate Director of MBIC – Ph.D., University of California, Berkeley; Carnegie Mellon, 2006–.

AMY L. BURKERT, Teaching Professor and Vice Provost for Education – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1997–.

BECKI CAMPANARO, Assistant Department Head for Undergraduate Affairs – Ph.D., Arizona State University; Carnegie Mellon, 2015–.

JASON M. D'ANTONIO, Assistant Teaching Professor and Director of the Health Professions Program – Ph.D., University of Pittsburgh School of Medicine; Carnegie Mellon, 2013–.

CARRIE B. DOONAN, Teaching Professor and Director of Undergraduate Laboratories – Ph.D., University of Connecticut; Carnegie Mellon, 1993–.

EMILY DRILL, Assistant Teaching Professor – Ph.D., University of Pittsburgh; Carnegie Mellon, 2012–.

M. DANNIE DURAND, Associate Professor – Ph.D., Columbia University; Carnegie Mellon, 2000–.

CHARLES A. ETTENSOHN, Professor – Ph.D., Yale University; Carnegie Mellon, 1987–.

ARYN GITTIS, Assistant Professor – Ph.D., University of California, San Diego; Carnegie Mellon, 2012–.

ERIC W. GROTZINGER, Teaching Professor and Associate Dean of Undergraduate Affairs for MCS – Ph.D., University of Pittsburgh; Carnegie Mellon, 1979–.

DAVID H. HACKNEY, Professor – Ph.D., University of California, Berkeley; Carnegie Mellon, 1978–.

VERONICA F. HINMAN, Associate Professor – Ph.D., University of Queensland; Carnegie Mellon, 2006–.

CHIEN HO, Professor and Director of NMR Center of Pittsburgh – Ph.D., Yale University; Carnegie Mellon, 1979–.

JEFFREY O. HOLLINGER, Professor of Biological Sciences and Biomedical Engineering – Ph.D., D.D.S., University of Maryland; Carnegie Mellon, 2000–.

KENNETH HOVIS, Assistant Teaching Professor, Carnegie Mellon-Qatar – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2011–.

VALENTIN ILYIN, Associate Teaching Professor of Computational Biology at CMU-Qatar – Ph.D., Carnegie Mellon, 2012–.

JONATHAN W. JARVIK, Associate Professor – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1978–.

SANDRA KUHLMAN, Assistant Professor – Ph.D., University of Kentucky; Carnegie Mellon, 2012–.

FREDERICK LANNI, Associate Professor – Ph.D., Harvard University; Carnegie Mellon, 1982–.

CHRISTINA H. LEE, Associate Professor – Ph.D., University of California, San Francisco; Carnegie Mellon, 2000–.

ADAM D. LINSTEDT, Professor – Ph.D., University of California, San Francisco; Carnegie Mellon, 1995–.

A. JAVIER LOPEZ, Associate Professor – Ph.D., Duke University; Carnegie Mellon, 1989–.

BROOKE M. MCCARTNEY, Associate Professor – Ph.D., Duke University; Carnegie Mellon, 2003–.

C. JOEL MCMANUS, Assistant Professor – Ph.D., University of Wisconsin-Madison; Carnegie Mellon, 2011–.

JONATHAN S. MINDEN, Professor – Ph.D., Albert Einstein College of Medicine; Carnegie Mellon, 1990–.

AARON P. MITCHELL, Interim Department Head and Professor – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2008–.

ROBERT F. MURPHY, Professor of Biological Sciences and Department Head of Computational Biology – Ph.D., California Institute of Technology; Carnegie Mellon, 1983–.

MANOJKUMAR PUTHENVEEDU, Assistant Professor – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2009–.

GORDON S. RULE, Professor and Associate Dean for Research, Carnegie Mellon-Qatar – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1996–.

RUSSELL S. SCHWARTZ, Professor – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2002–.

SHOBA SUBRAMANIAN, Assistant Teaching Professor – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2011–.

JOSEPH P. SUHAN, Lecturer – M.A., Hofstra University; Carnegie Mellon, 1989–.

ANNETTE VINCENT, Assistant Teaching Professor, Carnegie Mellon-Qatar – Ph.D., National University of Singapore; Carnegie Mellon, 2012–.

LINDA VISOMIRSKI-ROBIC, Lecturer – Ph.D., Case Western Reserve University; Carnegie Mellon, 2003–.

ALAN S. WAGGONER, Professor and Director of MBIC – Ph.D., University of Oregon; Carnegie Mellon, 1999–.

JOHN L. WOOLFORD JR., Professor and Co-Director of CNASt – Ph.D., Duke University; Carnegie Mellon, 1979–.

Affiliated Faculty

BRUCE A. ARMITAGE, Professor of Chemistry and Co-Director of CNASt – Ph.D., University of Arizona; Carnegie Mellon, 1997–.

ZIV BAR-JOSEPH, Associate Professor of Computer Science and Machine Learning – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2003–.

PHIL G. CAMPBELL, Research Professor at the Institute for Complex Engineering Systems – Ph.D., Pennsylvania State University; Carnegie Mellon, 1999–.

KRIS DAHL, Assistant Professor of Biomedical Engineering – Ph.D., University of Pennsylvania; Carnegie Mellon, 2006–.

WILLIAM F. EDDY, Professor of Statistics – Ph.D., Yale University; Carnegie Mellon, 1976–.

ALEX EVILEVITCH, Associate Professor of Physics – Ph.D., Lund University; Carnegie Mellon, 2009–.

T.D. JACOBSEN, Assistant Director and Principal Research Scientist at the Hunt Institute for Botanical Documentation – Ph.D., Washington State University; Carnegie Mellon, 1979–.

ROBERT W. KIGER, Distinguished Service Professor and Botany Professor and the History of Science Director and Principal Research Scientist for the Hunt Institute for Botanical Documentation – Ph.D., University of Maryland; Carnegie Mellon, 1974–.

CHRISTOPHER J. LANGMEAD, Associate Professor of Computer Science – Ph.D., Dartmouth College; Carnegie Mellon, 2004–.

PHILIP R. LEDUC, Professor of Mechanical Engineering – Ph.D., The Johns Hopkins University; Carnegie Mellon, 2002–.

CARL R. OLSON, Professor of the CNBC – Ph.D., University of California, Berkeley; Carnegie Mellon, 1996–.

FREDERICK H. UTECH, Principal Research Scientist at the Hunt Institute for Botanical Documentation – Ph.D., Washington University; Carnegie Mellon, 1977–.

ERIC P. XING, Associate Professor of Computer Science, Language Technologies Institute, and Machine Learning – Ph.D., University of California, Berkeley; Carnegie Mellon, 2004–.

GE YANG, Assistant Professor of Biomedical Engineering and the Lane Center for Computational Biology – Ph.D., University of Minnesota, Twin Cities; Carnegie Mellon, 2010–.

Adjunct Faculty

JON W. JOHNSON, Professor of Neuroscience at the University of Pittsburgh – Ph.D., Stanford University; Carnegie Mellon, 2006–.

KARL KANDLER, Professor of Otolaryngology and Neurobiology at the University of Pittsburgh – Ph.D., University of Tübingen, Germany; Carnegie Mellon, 2006–.

CYNTHIA LANCE-JONES, Associate Professor of Neurobiology at the University of Pittsburgh – Ph.D., University of Massachusetts; Carnegie Mellon, 2006–.

CYNTHIA M. MORTON, Associate Curator and Head of Botany at the Carnegie Museum of Natural History – Ph.D., New York Botanical Garden/CUNY; Carnegie Mellon, 2002–.

PETER L. STRICK, Co-Director of CNBC and Distinguished Professor of Neurobiology at the University of Pittsburgh – Ph.D., University of Pennsylvania; Carnegie Mellon, 2000–.

D. LANSING TAYLOR, President and Chief Executive Officer of Cellumen, Inc. – Ph.D., State University of New York at Albany; Carnegie Mellon, 1982–.

EDDA THIELS, Assistant Professor of Neurobiology at the University of Pittsburgh – Ph.D., Indiana University; Carnegie Mellon, 2006–.

GEORGE S. ZUBENKO, Professor of Psychiatry at the University of Pittsburgh – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1984–.

Emeriti Faculty

PETER B. BERGET, Professor Emeritus – Ph.D., University of Minnesota; Carnegie Mellon, 1986–.

LINDA R. KAUFFMAN, Teaching Professor, Emeritus – Ph.D., University of Pittsburgh; Carnegie Mellon, 1977–.

WILLIAM R. MCCLURE, Professor Emeritus – Ph.D., University of Wisconsin; Carnegie Mellon, 1981–.

JOHN F. NAGLE, Professor of Biological Sciences and Physics – Ph.D., Yale University; Carnegie Mellon, 1967–.

JAMES F. WILLIAMS, Professor Emeritus – Ph.D., University of Toronto; Carnegie Mellon, 1976–.

C. ROY WORTHINGTON, Professor Emeritus – Ph.D., Adelaide University; Carnegie Mellon, 1969–.

Department of Chemistry

Hyung J. Kim, Department Head
 Karen H. Stump, Director of Undergraduate Studies
 Office: Doherty Hall 1316
<http://www.chem.cmu.edu>

Carnegie Mellon provides a family-like but very vibrant and interdisciplinary environment for science students. One of our major strengths is that most of our undergraduate students in chemistry and related fields get involved in research in faculty labs early on and get hands-on experience in cutting-edge research, some even as freshmen. Our curriculum is both fluid and innovative to give students a broad background and in-depth knowledge in chemistry and interdisciplinary areas. — Dr. Hyung J. Kim

Chemistry is an area of science involved with the study of the properties and reactions of substances ranging from living cells to subatomic particles. It is at the center of many sciences and technical fields, providing the fundamental knowledge and tools needed to address many of society's needs and to explore the unknown. Fields as diverse as genetic engineering, materials science and nanotechnology look to chemistry when they look to the future, for that is where the ultimate in understanding — the molecular level — resides.

The chemistry profession is extraordinarily diverse, with career opportunities available in the chemical, petroleum, renewable energy, nuclear power, novel polymeric materials, metals, and pharmaceutical industries, among many others. Chemistry plays an increasingly important role in the rapidly expanding biomedical and biotechnology industries. In addition to careers in industry and academia, many chemists find challenging careers in the public sector in the laboratories of the National Institutes of Health, the Department of Agriculture, the Environmental Protection Agency, the National Institute of Standards and Technology, and the Department of Energy as well as in consulting. Chemistry alums also find employment in technical fields unrelated to science but where their problem solving and communication skills are highly valued.

Chemistry is a particularly suitable major for pre-medical and other pre-health profession students. Medical schools look favorably on the rigorous reasoning skills chemists develop, as evidenced by an excellent record for student admission to advanced education in these areas. An increasing number of our graduates are seeking careers in dentistry, pharmacy or pharmacology. The Health Professions Program advises all Carnegie Mellon students considering careers in health fields. (See Health Professions Program description in this catalog for more information.) Chemistry is particularly attractive to pre-law majors anticipating a career in a legal department in the chemical industry, in patent, intellectual property or environmental law. Students interested in industrial careers often combine their chemistry program with undergraduate courses in business administration or eventually go on to study for an M.B.A.

The Department offers three Bachelor's degrees: the B.S. in Chemistry, The B.S. in Chemistry/Biological Chemistry Track and the B.A. in Chemistry. One third of the courses for the B.A. degree are free electives that may be taken in any of the departments of the University and therefore offers a high degree of flexibility. For the B.S. degrees, electives often are technical courses in chemistry or related fields of science, technology and engineering, such as biology, physics, mathematics, chemical, biomedical or materials science engineering or computer science, although they can be in other non-technical areas as well. It is possible to have all of the technical requirements completed after the junior year in the B.S. and B.A. degree programs, allowing students the flexibility to combine electives in the senior year into a focused program of specialization or to allow for additional breadth in their undergraduate experience. Students interested in graduate studies in chemistry may enroll in graduate courses. Those desiring immediate job placement may be interested in one or more of the formal options that supplement the chemistry B.S. degree. These are described in detail later. Carnegie Mellon has one of the strongest polymer science programs in the world and the undergraduate polymer science, materials chemistry or colloids, polymers and sciences options offer training that is particularly valuable for an industrial career. The Computational Chemistry option provides students with expertise in scientific computing that is highly sought after by employers in the pharmaceutical industry.

The overlap between the fields of chemistry and biological sciences continues to grow, with increased emphasis on synthetic chemicals that are used as probes or reporters of biological function and diagnostic and/or therapeutic agents. In addition, the application of sophisticated spectroscopic, structural and scanning probe/force methods on scales as low as single molecules is driving innovation and education at the chemistry/biology interface. Based on these trends the department offers the B.S. in Chemistry/Biological Chemistry Track to better prepare students for

advanced studies and a job market that values knowledge and skills from both disciplines. A combination of advanced research-focused lecture course offerings and a new laboratory course allows students to build the strong foundation typical of a successful chemistry major, while expanding out into applications of chemistry in the biological sciences. Students who complete the track will have been exposed to the latest research accomplishments and unanswered questions in biological chemistry while also gaining experience in experimental methods unique to research at this interface.

An honors program is offered for highly motivated undergraduates. It is designed primarily for students who wish to undertake a strong research-intensive program of study in contemporary chemistry. The program B.S. in Chemistry with Departmental Honors requires the completion of at least one graduate level course in chemistry, a research project, and the writing and defense of a bachelor's level honors thesis. An advanced track leading to the B.S. in Chemistry with Departmental Honors together with a Masters Degree in Chemistry involves completion of five graduate level courses and a more extensive thesis research project. This degree path is especially attractive to students who plan to pursue an industrial career. With enough advanced placement credit or by carrying heavier than usual course loads, students can complete the Honors/M.S. degree program in 8 semesters.

The majority of openings in the chemical industry presently are at the Bachelors and Masters degree levels.

Additional majors (double majors) are available with nearly all other departments provided the student can fit the required courses into the schedule. Generally, all the requirements for both departments must be met for an additional major (except for some courses with similar content). Programs are also available that lead to the degree B.S. in Chemistry with a minor in another discipline such as biological sciences, physics, mathematics, computer science, engineering studies, business administration and certain departments in the Dietrich College of Humanities and Social Sciences. Requirements for most minor programs are described by individual departments in this catalog. However, it is recommended that students who are interested in pursuing a minor as part of their degree consult with the department involved for the current requirements and further guidance about scheduling. Dual degree programs are available in which students receive two separate undergraduate degrees from two different departments in the University. These require students to complete at least 90 units of work per additional degree in addition to the units required for the first degree and the core curriculum from both colleges if the programs are in different units. Several five-year programs have been developed to allow a Carnegie Mellon undergraduate student to earn both a B.S. in Chemistry and a Master of Science degree in fields such as Health Care Policy and Management, Materials Science Engineering or Biomedical Engineering.

Study abroad programs are available for chemistry majors and programs of one to two semesters can generally be accommodated without delaying time to graduation beyond 8 semesters. One example of a formal exchange program is spending two semesters at École Polytechnique Fédérale de Lausanne (EPFL) in Switzerland. Study abroad is encouraged by the chemistry department and also can be arranged on an individual basis at universities throughout the world including Europe, Asia, Africa, New Zealand, and Australia during the academic year, the summer and winter or spring breaks. Students interested in study abroad should consult with their academic advisor and the MCS Study Abroad Advisor.

One of the most attractive features of the Department of Chemistry is the opportunity for students to interact with prominent research scientists in entry-level as well as advanced courses and in research. Since the spring of 2003, undergraduate laboratory instruction takes place in a state-of-the-art facility located in Doherty Hall. Participation in undergraduate research is encouraged and qualified students may begin projects as early as their second year. Chemistry majors interested in beginning research should consult with the Director of Undergraduate Studies to begin the process of identifying a research mentor. Approximately 90 to 98% of the graduating chemistry majors during the past ten years have taken part in research either for pay or for credit as part of their undergraduate training. Chemistry majors have been very successful in obtaining Small Undergraduate Research Grants (SURG) and Summer Undergraduate Research Fellowships (SURF) from the University to help support their research projects. Undergraduate and research laboratories are equipped with the latest scientific instrumentation. The use of computational tools is emphasized throughout the curriculum.

Program Outcomes

The faculty members of the Department of Chemistry have approved the following as a statement of our learning outcomes for recipients of an undergraduate degree in chemistry.

Upon graduation recipients of the BS or BA degree in Chemistry will:

Foundational knowledge/theory

- Have a firm foundation in the quantitative and computational thinking that underlies chemistry, including use of modern computational tools.
- Have a firm foundation in the theories and models that form the basis for reasoning about molecular systems.
- Understand how the different subdisciplines of chemistry relate to and complement one another.
- Be able to apply chemical reasoning across disciplines, such as biology, environmental science, materials science, nanotechnology, and engineering.

Practical/Experimental

- Understand that chemistry is fundamentally an experimental science, and be able to identify or create an appropriate model, formulate a hypothesis, choose an appropriate set of tools and techniques, and design an experiment that tests the hypothesis and analyze the results from that experiment drawing sound scientific conclusions from the results obtained.
- Be proficient in the use of both classical and modern tools for analysis of chemical systems.
- Be able to design and carry out synthesis of both organic and inorganic systems.
- Be able to use experience and knowledge gained through theoretical and practical design projects to conduct further research.
- Know and follow the proper procedures and regulations for safe handling and use of chemicals and chemical equipment.

Communication

- Be able to convey information, both orally and in writing, to a range of audience levels and for a variety of purposes.
- Understand how scientific information is shared between peers in modern science, including responsible conduct for acknowledging prior and current contributions.
- Be able to locate, identify, understand and critically evaluate the chemical literature.
- Develop the interpersonal skills to function cooperatively in a team setting.

Society and ethics

- Understand the opportunities and consequences of chemistry for the environment and society for both the short term and for long-term sustainability.
- Understand and apply ethics and values to all professional activities.

Professional development

- Develop an understanding of career opportunities both within and outside of chemistry, including through contacts with faculty, the career and professional development center and alumni.
- Be prepared to pursue a life and career that builds on their experiences at Carnegie Mellon to achieve their personal goals and to contribute positively to society.

B.S. in Chemistry

The majority of undergraduate degrees awarded by the Department of Chemistry are Bachelor of Science degrees. This degree program provides the most appropriate preparation for further graduate study and for research and development or analytical positions in industry. The curriculum provides a strong foundation in the fundamental areas of study in chemistry: organic, physical, inorganic and analytical chemistry, along with a rich set of research-focused, instrumentation intensive laboratory experiences aligned with those areas. Students interested in less technical areas of employment or graduate study in areas such as business, policy or law may find the Bachelor of Arts degree a more suitable alternative.

Curriculum - B.S. in Chemistry and Requirements for an Additional Major in Chemistry

This catalog and the sample schedules presented are intended to be used by students in the first year class entering in the fall of 2015. Upperclass students should refer to the appropriate previous version of the catalog published during their first year for the requirements that are specific to them.

The technical breadth requirement of the MCS core curriculum, starting with the entering class of 2015, requires a minimum of four technical courses outside of the student's primary major. Chemistry majors must at minimum take the following non-chemistry technical courses:

Technical Breadth Requirements		Units
33-121	Physics I for Science Students	12
33-122	Physics II for Biological Sciences and Chemistry Students	9
03-121	Modern Biology	9
or 03-231	Biochemistry I	
or 03-232	Biochemistry I	
15-110	Principles of Computing - or other approved programming course	10
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
or 21-124	Calculus II for Biologists and Chemists	

Students should complete this technical core as early as possible and preferably by the end of their fifth semester.

The non-technical breadth requirements for MCS students includes 76-101 Interpretation and Argument, four courses with a minimum of 36 units from the arts, humanities or social sciences and a course of at least 9 units from an approved list in the category of Cultural/Global understanding, Three ENGAGE in Wellness courses, one ENGAGE in Service course, one ENGAGE in the Arts course, EUREKA! Discovery and its Impact, the MCS first-year seminar, and the MCS Junior Seminar for a total of 72 units. For more information on allowed courses, refer to the MCS section of this catalog.

Freshman Year

Fall		Units
09-105	Introduction to Modern Chemistry I	10
or 09-107	Honors Chemistry: Fundamentals, Concepts and Applications	
21-120	Differential and Integral Calculus	10
33-111	Physics I for Science Students (to be renumbered as 33-121 starting in the spring of 2016)	12
or 03-121	Modern Biology	
or 15-110	Principles of Computing	
76-101	Interpretation and Argument	9
38-101	EUREKA!: Discovery and Its Impact	6
99-101	Computing @ Carnegie Mellon	3
		50

Students interested in majoring in chemistry who have a strong chemistry background, should enroll in 09-107 rather than 09-105. Students who complete 09-107 with an A grade will be exempted from the requirement to take 09-106 Modern Chemistry II.

02-201 Programming for Scientists is an acceptable alternative to 15-110 for chemistry majors as are any upper level courses in programming.

There are some elective laboratory courses offered for MCS students in the first year. These include 03-115 Phage Genomics Research and 09-122 Molecular Tools for Biological and Chemical Studies. The maximum units allowed during the first semester is 54; therefore, students wishing to take a lab should take an alternate technical course to Physics I such as 15-110 so that their unit total is lower.

Spring		Units
09-106	Modern Chemistry II	10
Chemistry majors who place out of 09-106 can take 09-348 Inorganic Chemistry		
21-122	Integration and Approximation	10
or 21-124	Calculus II for Biologists and Chemists	
33-121	Physics I for Science Students	12

or 03-121	Modern Biology	
or 15-110	Principles of Computing	
xx-xxx	Arts, Humanities and Social Sciences Course 1	9
xx-xxx	Free Elective	9.0
		50

Sophomore Year

Fall		Units
09-201	Undergraduate Seminar I	1
09-219	Modern Organic Chemistry	10
09-221	Laboratory I: Introduction to Chemical Analysis	12
33-122	Physics II for Biological Sciences and Chemistry Students Course is a prerequisite for 09-331, normally taken in the spring of the junior year	9
xx-xxx	Arts, Humanities and Social Sciences Course 2	9
		41

Spring		Units
09-202	Undergraduate Seminar II: Safety and Environmental Issues for Chemists	1
09-204	Professional Communication Skills in Chemistry (It is recommended that this course be completed prior to taking the junior level labs, 09-321 or 09-323.)	3
09-220	Modern Organic Chemistry II	10
09-222	Laboratory II: Organic Synthesis and Analysis	12
09-348	Inorganic Chemistry (Students wishing to pursue careers in the health professions may wish to take biochemistry, 03-232, and delay inorganic until the junior or senior year spring semester)	10
38-230	ENGAGE in Wellness: Looking Inward	1
xx-xxx	Arts, Humanities and Social Sciences Course 3	9
		46

Junior Year

Fall		Units
09-301	Undergraduate Seminar III	1
09-231	Mathematical Methods for Chemists	9
09-321	Laboratory III: Molecular Design and Synthesis	12
or 09-323	Bioorganic Chemistry Laboratory	
09-344	Physical Chemistry (Quantum): Microscopic Principles of Physical Chemistry	9
38-330	ENGAGE in Wellness: Looking Outward	1
xx-xxx	Arts, Humanities and Social Sciences course 4	9
		41

Spring		Units
09-302	Undergraduate Seminar IV	1
09-322	Laboratory IV: Molecular Spectroscopy and Dynamics	12
09-345	Physical Chemistry (Thermo): Macroscopic Principles of Physical Chemistry	9
09-331	Modern Analytical Instrumentation	9
38-301	MCS Junior Seminar	6
xx-xxx	Cultural/Global Understanding Requirement	9
		46

Senior Year

Distribution of Units for the B.S. in Chemistry and Requirements for An Additional Major in Chemistry

Minimum Total Chemistry Units 163; See distribution below

Required Chemistry Courses* Units		
09-105	Introduction to Modern Chemistry I	10
or 09-107	Honors Chemistry: Fundamentals, Concepts and Applications	
09-106	Modern Chemistry II	10
09-204	Professional Communication Skills in Chemistry	3
09-219	Modern Organic Chemistry	10
09-220	Modern Organic Chemistry II	10
09-231	Mathematical Methods for Chemists	9
09-331	Modern Analytical Instrumentation	9
09-344	Physical Chemistry (Quantum): Microscopic Principles of Physical Chemistry	9
09-345	Physical Chemistry (Thermo): Macroscopic Principles of Physical Chemistry	9
09-348	Inorganic Chemistry	10
09-221	Laboratory I: Introduction to Chemical Analysis	12
09-222	Laboratory II: Organic Synthesis and Analysis	12
09-321	Laboratory III: Molecular Design and Synthesis	12
or 09-323	Bioorganic Chemistry Laboratory	
09-322	Laboratory IV: Molecular Spectroscopy and Dynamics	12
09-xxx	Chemistry Seminars	8
09-xxx	Chemistry Electives	18

* These, plus 33-121 Physics I for Science Students and 33-122 Physics II for Biological Sciences and Chemistry Students, are the required courses for students earning an additional major in chemistry.

Students who transfer into the department and have taken 09-217 Organic Chemistry I and/or 09-218 Organic Chemistry II, will be required to complete units of 09-435 Independent Study Chemistry, 1 unit per course, under the supervision of the instructor(s) for 09-219 and/or 09-220 in order to master the course content missed in this course sequence.

Chemistry courses required for the BS degree and the additional major in chemistry that are numbered 09-2xx or higher must be taken at Carnegie Mellon University. Exceptions must be requested of and approved by the Director of Undergraduate Studies. In general such requests will be approved only under unusual or extenuating circumstances.

Other Requirements	Units
Biology (Modern Biology or Biochemistry)	9
Computer Science	10
Mathematics	20
Physics	21
Interpretation and Argument	9
Arts, Humanities and Social Sciences Courses	36
Cultural/Global Understanding	9
EUREKA! (First-year seminar)	6
MCS Junior Seminar	6
ENGAGE in Service	1
ENGAGE in Wellness Courses (three courses)	3
ENGAGE in the Arts	2
Computing @ Carnegie Mellon	3
Free Electives	62
Minimum number of units required for the degree:	360

The above B.S. curriculum recommends a range of 41-50 units per semester to meet the minimum degree requirement of 360 units. Students are strongly encouraged to take extra elective courses (except in the first year)

in whatever subjects they wish in order to enrich their backgrounds and enhance their educational experience.

Notes on Electives

Chemistry Electives

A minimum of 18 units of chemical electives is required.

Chemistry electives can be satisfied by 09-445 Undergraduate Research, or by most other chemistry courses 09-3xx or higher, undergraduate or graduate level, for which the student has the necessary prerequisites, or by 03-231/03-232 Biochemistry. Biochemistry also fulfills the Life Sciences requirement for the MCS technical breadth requirement. 09-435 Independent Study Chemistry may only be used to fulfill this requirement with permission of the Director of Undergraduate Studies. Certain interdisciplinary courses (e.g. 39-xxx) relating to chemistry can also be used with the approval of the Director of Undergraduate Studies. The scheduling of these electives can vary and students should check with the department offering the course to see which courses are offered in any given year or semester and with the Director of Undergraduate Studies in the Department of Chemistry to ascertain whether the course is an acceptable chemistry elective.

Free Electives

Free electives are defined as including any course offered by Carnegie Mellon except those in science or engineering fields that are primarily intended for non-majors. A maximum of 9 units total of Physical Education, StuCo and/or ROTC courses combined can be counted as free elective units. The Chemistry Department does not require technical electives.

B.S. in Chemistry/Biological Chemistry Track

This degree is ideal for students who wish to better prepare themselves for advanced studies in biological chemistry or biomedical fields and a job market that values knowledge and skills from both disciplines. A combination of advanced research-focused lecture course offerings and a new laboratory course will allow students to build the strong foundation typical of a successful chemistry major, while expanding out into applications of chemistry in the biological sciences.

Curriculum - B.S. in Chemistry/Biological Chemistry Track

This catalog and the sample schedules presented are intended to be used by students in the first year class entering in the fall of 2015. Upperclass students should refer to the appropriate previous version of the catalog published during their first year for the requirements that are specific to them.

The technical breadth requirement of the MCS core curriculum, starting with the entering class of 2015, requires a minimum of four technical courses outside of the student's primary major. Chemistry majors in the Biological Chemistry Track must at minimum take the following non-chemistry technical courses: 33-121 Physics I for Science Students, 33-122 Physics II for Biological Sciences and Chemistry Students, 03-121 Modern Biology, 15-110 Principles of Computing (or other approved programming course), 21-120 Differential and Integral Calculus and 21-122 Integration and Approximation **or** 21-124 Calculus II for Biologists and Chemists. Students should complete this technical core as early as possible and preferably by the end of their fifth semester.

The non-technical breadth requirements for MCS students includes 76-101 Interpretation and Argument, four courses with a minimum of 36 units from the arts, humanities or social sciences and a course of at least 9 units from an approved list in the category of Cultural/Global understanding, Three ENGAGE in Wellness courses, one ENGAGE in Service course, one ENGAGE in the Arts course, EUREKA! Discovery and its Impact, the MCS first-year seminar, and the MCS Junior Seminar for a total of 72 units. For more information on allowed courses, refer to the MCS section of this catalog.

Freshman Year

ENGAGE in Service	1
ENGAGE in the Arts	2
Computing @ Carnegie Mellon	3
Free Electives	35
Minimum number of units required for the degree:	360

The above B.S. curriculum recommends a range of 41-50 units/semester to meet the minimum degree requirement. Students are strongly encouraged to take extra elective courses (except in the first year) in whatever subjects they wish in order to enrich their backgrounds and enhance their educational experience.

NOTES ON ELECTIVES

Biological Chemistry Electives

A minimum of three biological chemistry electives for a total of 27 units or more is required.

A list of currently approved electives is provided below. One semester of 09-445 for 9 units may be used for 1 biological chemistry elective with the approval of the Undergraduate Advising and Curriculum Committee. It must be part of a longer term experience ensuring depth of knowledge in the area.

09-518	Bioorganic Chemistry: Nucleic Acids and Carbohydrates (One of these two courses is required for the degree. The other can be used as a Biological Chemistry elective.)	9
or 09-519	Bioorganic Chemistry: Peptides, Proteins and Combinatorial Chemistry	
09-535	Applied topics in Macromolecular and Biophysical Techniques	9
09-705	Chemosensors and Biosensors	12
09-716	Bioactive Natural Products	6
09-803	Chemistry of Gene Expression	12
03-240	Cell Biology	9
03-330	Genetics	9
03-344	Experimental Biochemistry	12
03-362	Cellular Neuroscience	9
03-439	Introduction to Biophysics	9
03-534	Biological Imaging and Fluorescence Spectroscopy	9
03-740	Advanced Biochemistry	12
03-871	Structural Biophysics	12
33-441	Introduction to BioPhysics	10

Free Electives

Free electives are defined as including any course offered by Carnegie Mellon except those in science or engineering fields that are primarily intended for non-majors. A maximum of 9 units total of Physical Education,

StuCo and/or ROTC courses combined can be counted as free elective units. The Chemistry Department does not require technical electives.

Options for the B.S. in Chemistry

The curriculum for the degree Bachelor of Science in Chemistry permits students to take a number of elective courses in chemistry and other fields, particularly in the junior and senior years. Students may wish to complete a group of elective courses from several specialty areas, called "options," to complement their technical education. Each option will complement the Bachelor's degree in Chemistry and will provide students with expertise in a specific area not covered by the normal undergraduate curriculum. Options are noted on the student's transcript but not on the diploma.

For each of the following options, the student should refer to the previous description of the curriculum for the B.S. in chemistry. Required courses are unchanged, and the courses that should be taken as electives for each option are listed below. Chemistry courses within an option also count towards fulfillment of the chemistry elective requirement for the B.S. degree.

A student who completes the recommended courses for any of these options will receive a certificate from the Department of Chemistry at Commencement as formal evidence of the accomplishment and a notation of this will be made on the student's transcript.

BIOCHEMISTRY OPTION		Units
03-231/232	Biochemistry I	9
03-330	Genetics	9
03-344	Experimental Biochemistry	12
xx-xxx	Elective in Biochemistry	

Elective course may be chosen from the following list

03-439	Introduction to Biophysics	9
09-518	Bioorganic Chemistry: Nucleic Acids and Carbohydrates	9
09-519	Bioorganic Chemistry: Peptides, Proteins and Combinatorial Chemistry	9
03-740	Advanced Biochemistry	12

POLYMER SCIENCE OPTION		Units
06-466	Experimental Polymer Science	9
09-502	Organic Chemistry of Polymers	9
09-509	Physical Chemistry of Macromolecules	9
09-xxx	Elective in Polymer Science	9

Elective course may be chosen from the following list

09-531	Polymer Science	9
09-445	Undergraduate Research (in a polymer area as approved by the Director of Undergraduate Studies and generally part of a longer term project)	9
27-324	Introduction to Polymer Science and Engineering	9

Other upper level courses in chemistry, biomedical engineering, materials science engineering or the colloids, polymers and surfaces program may be used with permission of the Director of Undergraduate Studies

COLLOIDS, POLYMERS and SURFACES OPTION (offered jointly with the Department of Chemical Engineering)		Units
06-426	Experimental Colloid Surface Science	9
06-466	Experimental Polymer Science	9
09-509	Physical Chemistry of Macromolecules	9
06-607	Physical Chemistry of Colloids and Surfaces	9

MATERIALS CHEMISTRY OPTION		Units
27-100	Engineering the Materials of the Future	12
27-201	Structure of Materials	9

Two Elective Courses of at least 9 units each from the list below

27-202	Defects in Materials	9
09-445	Undergraduate Research (in a materials area as approved by the Director of Undergraduate Studies and generally part of a longer term project)	9
09-502	Organic Chemistry of Polymers	9
09-509	Physical Chemistry of Macromolecules	9
09-531	Polymer Science	9
27-xxx	MSE course approved by Director of Undergraduate Studies	

ENVIRONMENTAL CHEMISTRY OPTION		Units
09-510	Chemistry and Sustainability	9
09-524	Environmental Chemistry	9
Two elective courses of at least 9 units each from the list below		
19-424	Energy and the Environment	9
19-426	Environmental Decision Making	9
19-440	Combustion and Air Pollution Control	9
12-100	Introduction to Civil and Environmental Engineering	12
09-520	Global Atmospheric Chemistry: Fundamentals and Data Analysis Methods	9
06-630	Atmospheric Chemistry, Air Pollution and Global Change	12
19-650	Climate and Energy: Science, Economics and Public Policy	9
12-651	Air Quality Engineering	9
12-657	Water Resource Systems Engineering	9
12-702	Fundamentals of Water Quality Engineering	12

MANAGEMENT OPTION		Units
73-100	Principles of Economics	9
70-101	Introduction to Business Management	9
70-122	Introduction to Accounting	9
70-364	Business Law	9

COMPUTATIONAL CHEMISTRY OPTION		Units
15-112	Fundamentals of Programming and Computer Science	12
15-122	Principles of Imperative Computation	10
or 15-150	Principles of Functional Programming	
09-560	Computational Chemistry	12
21-127	Concepts of Mathematics	10
xx-xxx	One Upper Level Computational Elective Course from the list below	
15-210	Parallel and Sequential Data Structures and Algorithms	12
15-213	Introduction to Computer Systems	12
15-214	Principles of Software Construction: Objects, Design, and Concurrency	12
33-241	Introduction to Computational Physics	9
03-250	Introduction to Computational Biology	12
09-701	Quantum Chemistry I	12
09-702	Statistical Mechanics and Dynamics	12

B.S. in Chemistry with Departmental Honors

Outstanding students with an interest in research are encouraged to consider the Honors program by the beginning of the junior year. The program combines a slightly modified B.S. curriculum with close faculty-student contact in an individual research project, concluding with the student's presentation and defense of a bachelor's honors thesis to a Thesis Committee.

The B.S. in Chemistry with Departmental Honors curriculum follows the general sequence of courses that is listed for the B.S. degree. Students are strongly urged to complete all seven of the Science Core Courses as early as possible. The honors program specifies that one of the two chemistry electives be a 12-unit graduate course, numbered 09-7xx or higher, and that of the remaining electives required, at least two be undergraduate research (18 units) and one be 09-455 Honors Thesis (taken for 6 units). Students will be encouraged to do more than the minimum amount of research, so stipends from the research advisor or other sources are sometimes available for summer B.S. honors research.

At any time before the spring term of the senior year, candidates for the B.S. in chemistry may apply to be admitted for candidacy to the Honors B.S. program. Applications are available through the Director of Undergraduate Studies. To be accepted, students will be expected to have shown excellent performance in class work – normally at least a 3.2 average QPA. Upon acceptance into the program, a Thesis Committee must be identified, which will monitor the progress of the student. The committee shall consist of at least one member of the Honors Committee to be appointed by the chair, the student's research advisor and a third faculty member agreed upon by the student and advisor. This third member can be from another department or institution and can be tenure track, teaching track

or research track faculty. It is the student's responsibility to contact the proposed third member of their committee and confirm their participation.

A written thesis suitable for an Honors B.S. degree is required and should be a clear exposition in proper scientific format of a research project done for at least 18 units of credit in 09-445 Undergraduate Research. The thesis should describe a substantive new contribution to a particular field of research. This could include, but is not limited to, the discovery of a new phenomenon, studies that enhance our understanding of a previously reported phenomenon, or the development of a new method or technique. The student's Thesis Committee will evaluate the thesis and will require that each student participate in a public oral presentation or defense of the thesis before it approves the Honors degree. The written thesis must be supplied to the members of the student's Thesis Committee no later than 1 week prior to the scheduled public defense. The defense is usually scheduled to take place during April or early May of the senior year and the Director of Undergraduate Studies will coordinate the selection of a suitable date. Students completing the B.S. with Departmental Honors in Chemistry will receive MCS College Honors as well.

The designations of MCS College Honors and Departmental Honors are noted on the transcript but not on the diploma. Only University Honors are noted on the diploma.

Honors B.S./M.S. Program in Chemistry

Outstanding students seeking an advanced degree are encouraged to apply for admission to the B.S./M.S. Honors program as early as they can but only after having made some progress on a research project that could eventually be suitable for production of a Master's level thesis. Please note that this degree is available only with the B.S. in chemistry and cannot be obtained by students pursuing a B.A. degree in chemistry. Most commonly, applications are submitted during the second half of the sophomore year or early in the junior year. Applications are available through the Director of Undergraduate Studies. Participants will have the opportunity to earn in four years not only the degree B.S. in Chemistry with Departmental Honors, but also the degree Master of Science in Chemistry. This program is highly research intensive and is not appropriate for all students. Requirements include completing five graduate level courses as electives. (See notes on Honors B.S./M.S. electives.)

The schedule of courses for the B.S./M.S. program generally moves as many courses as possible forward in the curriculum, though this is not a requirement. When possible, all Science Core Courses should be completed in the freshman year. This gives the student the following advantages: 1) greater perspective in selection of a research advisor, 2) greater maturity in performing independent research, and 3) the possibility of initiating the graduate course sequence in the junior year. Students can achieve this accelerated schedule through advanced placement or summer school though neither is a requirement.

A completed application, available from Karen Stump, ks01@andrew.cmu.edu, and written note of support from the thesis advisor must be submitted to the Director of Undergraduate Studies who will then arrange for an application meeting with the student, research advisor and Honors Committee. At this meeting the student is expected to give an oral presentation with visual aids that presents relevant background, a summary of work completed to date and a detailed plan for their thesis project.

Upon acceptance into the program, a Thesis Committee must be identified, which will monitor the progress of the student. The committee shall consist of at least one member of the Honors Committee appointed by the committee chair, the student's research advisor and a third faculty member agreed upon by the student and advisor. This third member can be from another department or institution and can be tenure track, teaching track or research track faculty. It is the student's responsibility to contact the third member of their committee and confirm their participation.

The student is expected to keep the research advisor selected by May of the sophomore year for the duration of the thesis project. Summer thesis research for 10 weeks after the sophomore and junior years is strongly suggested to assist the student in completing research of sufficient quantity and quality to complete their thesis. Students normally will be given stipends for their summer work either by their research advisor or by competing for a summer fellowship. A minimum of 3 semesters of undergraduate research is required (normally 10 units/semester), though this is rarely sufficient as the sole research experience, as is participation in group seminars during the junior and senior years. Students must present their research at least once at the Sigma Xi competition at Meeting of the Minds, the annual Carnegie Mellon undergraduate research symposium, typically at the end of the junior year. In addition students must meet with their Thesis Committee each fall to update the committee on their progress and in the fall of the senior year must prepare a written summary of their research progress to date (5 pages) and their plans for the academic year

(1 page). This report must state clearly what stage the work is in; it must be clear what work is complete and ready for publication.

At the start of the spring semester of the senior year (or their final semester if different), the student must submit a draft of the introduction for their thesis and a detailed outline of their methods, results and discussion sections to the Director of Undergraduate Studies who also chairs the Honors Committee. This will be distributed by the department and reviewed by the student's Thesis Committee.

Each student is required to submit a formal Masters Degree dissertation to the Chemistry Department in April of the senior year or at least one week prior to the date set for the thesis defense. The Thesis Committee will evaluate the written thesis and student is required to present their final oral defense of the project before the Thesis Committee. The defense is usually scheduled to take place during April or early May of the senior year and the Director of Undergraduate Studies will coordinate the selection of a suitable date. The public defense is followed by a private question and answer session with the Thesis Committee.

The dissertation, written in proper scientific format, should describe the research project in considerable detail and must withstand the scrutiny of the Thesis Committee with respect to completeness. It need not be as extensive nor contain the element of student originality characteristic of a Ph.D. thesis; however it must contain results and conclusions that are of a high enough quality to be accepted as a publication in a respected research journal. The student should refer to the ACS Style Guide for recommendations on appropriate presentation and formatting of written text, tables, graphs, and figures. As for all M.S. degree candidates in the Department, the dissertation must be approved by the faculty member in charge of the work.

Research productivity is the most important criterion for success at the evaluation points, but QPA is a strong secondary criterion. While we expect that most students will maintain a QPA of 3.5, a minimum of 3.2 must be maintained to remain in the program and will be acceptable only with a strong record of research. Candidates must also maintain a QPA of at least 3.0 in the five graduate level courses required for the degree.

Students who complete this program will receive the designations of Departmental Honors and MCS College Honors. These are designated on the transcript, not on the diploma. Only University Honors are denoted on the diploma.

Students completing the requirements for this degree receive two diplomas, one for the B.S. degree and another for the M.S. degree. Since this is a combined degree program both degrees are awarded at the same time; the awarding of the two degrees cannot be separated in time.

Notes on Honors B.S./M.S. Electives

The B.S./M.S. Honors degree requires the completion of five graduate level courses. These normally are 12-unit courses. However, in order not to penalize interdisciplinary studies which may be essential to a good thesis, up to three of the five required graduate chemistry courses may be advanced undergraduate (9-unit) courses in MCS and/or approved CIT departments. All advanced undergraduate level courses used to satisfy this requirement must be approved by the Director of Undergraduate Studies.

Curriculum - B.S. with Departmental Honors / M.S. in Chemistry

This catalog and the sample schedules presented are intended to be used by students in the first year class entering in the fall of 2015. Upperclass students should refer to the appropriate previous version of the catalog published during their first year for the requirements that are specific to them.

The technical breadth requirement of the MCS core curriculum, starting with the entering class of 2015, requires a minimum of four technical courses outside of the student's primary major. Chemistry majors must at minimum take the following non-chemistry technical courses: 33-111 Physics I for Science Students (to be re-numbered as 33-121 starting in the spring of 2016), 33-122 Physics II for Biological Sciences and Chemistry Students, either 03-121 Modern Biology **or** 03-231 Biochemistry I **or** 03-232 Biochemistry I, 15-110 Principles of Computing (or other approved programming course), 21-120 Differential and Integral Calculus and 21-122 Integration and Approximation **or** 21-124 Calculus II for Biologists and Chemists. Students should complete this technical core as early as possible and preferably by the end of their fifth semester.

The non-technical breadth requirements for MCS students includes 76-101 Interpretation and Argument, four courses with a minimum of 36 units from the arts, humanities or social sciences and a course of at least 9 units from an approved list in the category of Cultural/Global understanding, Three ENGAGE in Wellness courses, one ENGAGE in Service course, one ENGAGE in the Arts course, EUREKA! Discovery and its Impact, the MCS first-year

seminar, and the MCS Junior Seminar for a total of 72 units. For more information on allowed courses, refer to the MCS section of this catalog.

First Year

		Units
Fall		
09-105	Introduction to Modern Chemistry I	10
or 09-107	Honors Chemistry: Fundamentals, Concepts and Applications	
21-120	Differential and Integral Calculus	10
33-111	Physics I for Science Students (to be renumbered as 33-121 starting the spring 2016 semester)	12
or 03-121	Modern Biology	
or 15-110	Principles of Computing	
38-101	EUREKA!: Discovery and Its Impact	6
76-101	Interpretation and Argument	9
99-101	Computing @ Carnegie Mellon	3
		50

Students interested in majoring in chemistry who have a strong chemistry background, should enroll in 09-107 rather than 09-105. Students who complete 09-107 with an A grade will be exempted from the requirement to take 09-106 Modern Chemistry II.

02-201 Programming for Scientists is an acceptable alternative to 15-110 for chemistry majors as are any upper level courses in programming.

There are some elective laboratory courses offered for MCS students in the first year. These include 03-115 Phage Genomics Research and 09-122 Molecular Tools for Biological and Chemical Studies. The maximum units allowed during the first semester is 54; therefore, students wishing to take a lab should take 03-121 Modern Biology so that their unit total is lower and they get a start on their required biology courses.

ENGAGE in Wellness (3 courses)	3
ENGAGE in Service	1
ENGAGE in the Arts	2
Computing @ Carnegie Mellon	3
Free Electives	3-12
Minimum number of units required for degrees:	388

Free Electives

Free electives are defined as including any course offered by Carnegie Mellon except those in science or engineering fields that are primarily intended for non-majors. A maximum of 9 units total of Physical Education, StuCo and/or ROTC courses combined can be counted as free elective units. The Chemistry Department does not require technical electives.

B.A. in Chemistry

The curriculum for the B.A. degree provides students with the opportunity to take a substantial number of elective and non-technical courses. Certain chemistry, math, and other technical courses required for the B.S. degree are replaced by free electives, making this degree an ideal choice for those who wish to earn an additional major with one of the departments in the College of Humanities and Social Sciences, College of Fine Arts, or with the Business Administration program, though this is not a requirement. It is also attractive for students wishing to pursue careers in dentistry or pharmacy, career paths that require a broader preparation at the undergraduate level and hence more coursework outside of chemistry. Students may earn one or more of the options as described for B.S. degree candidates, providing they complete the courses listed.

The suggested curriculum recommends that the required technical courses be completed at the earliest opportunity, however students have considerable flexibility to postpone these courses in favor of electives, allowing compatibility with the programs of other departments. In designing such programs for a minor or additional major with chemistry, students should note that certain required chemistry courses only are offered in specific semesters, not both. These include the Fall-only courses 09-219 Modern Organic Chemistry, 09-321 Laboratory III: Molecular Design and Synthesis and 09-323 Bioorganic Laboratory and the Spring-only courses 09-214 Physical Chemistry, 09-220 Modern Organic Chemistry II, 09-348 Inorganic Chemistry, and 09-204 Professional Communication Skills in Chemistry. Also, in some cases, a course that is normally scheduled for the fall may be changed to a spring course (or the inverse) due to a departmental curriculum change.

Curriculum - B.A. in Chemistry

This catalog and the sample schedules presented are intended to be used by students in the first year class entering in the fall of 2015. Upperclass students should refer to the appropriate previous version of the catalog published during their first year for the requirements that are specific to them.

The technical breadth requirement of the MCS core curriculum, starting with the entering class of 2015, requires a minimum of four technical courses outside of the student's primary major. Chemistry majors must at minimum take the following non-chemistry technical courses:

Technical Breadth Requirements	Units
33-111 Physics I for Science Students (to be renumbered as 33-121 starting in the spring of 2016)	12
33-122 Physics II for Biological Sciences and Chemistry Students	9
03-121 Modern Biology or 03-231 Biochemistry I or 03-232 Biochemistry I	9
15-110 Principles of Computing - or other approved programming course	10
21-120 Differential and Integral Calculus	10
21-122 Integration and Approximation or 21-124 Calculus II for Biologists and Chemists	10

Students should complete this technical core as early as possible and preferably by the end of their fifth semester.

The non-technical breadth requirements for MCS students includes 76-101 Interpretation and Argument, four courses with a minimum of 36 units from the arts, humanities or social sciences and a course of at least 9 units from an approved list in the category of Cultural/Global understanding, Three ENGAGE in Wellness courses, one ENGAGE in Service course, one ENGAGE in the Arts course, EUREKA! Discovery and its Impact, the MCS first-year seminar, and the MCS Junior Seminar for a total of 72 units. For more information on allowed courses, refer to the MCS section of this catalog.

First Year

Fall	Units
09-105 Introduction to Modern Chemistry I or 09-107 Honors Chemistry: Fundamentals, Concepts and Applications	10

09-214 Physical Chemistry	9
or 09-344 Physical Chemistry (Quantum): Microscopic Principles of Physical Chemistry	
or 09-345 Physical Chemistry (Thermo): Macroscopic Principles of Physical Chemistry	
09-348 Inorganic Chemistry	10
09-221 Laboratory I: Introduction to Chemical Analysis	12
09-222 Laboratory II: Organic Synthesis and Analysis	12
09-321 Laboratory III: Molecular Design and Synthesis	12
or 09-323 Bioorganic Chemistry Laboratory	
09-xxx Chemistry Seminars	8
09-xxx Chemistry Electives	18

09-322 Laboratory IV: Molecular Spectroscopy and Dynamics may be taken in lieu of 09-321 Laboratory III: Molecular Design and Synthesis or 09-323 Bioorganic Chemistry Laboratory. However the student must complete the necessary pre- and co-requisites of 09-231, 09-344, 09-331 and 09-345. In this case 09-331 and 09-344 will count as chemistry electives towards the B.A. degree.

Students who transfer into the department and have taken 09-217 Organic Chemistry I, and/or 09-218 Organic Chemistry II, will be required to complete units of 09-435 Independent Study Chemistry, 1 unit per course, under the supervision of the instructor(s) for 09-219 and/or 09-220 in order to master the course content missed in this course sequence.

Chemistry courses required for the B.A. degree that are numbered 09-2xx or higher must be taken at Carnegie Mellon University. Exceptions must be requested of and approved by the Director of Undergraduate Studies. In general such requests will be approved only under unusual or extenuating circumstances.

Other Requirements	Units
Biology (either Modern Biology or Biochemistry)	9
Computer Science	10
Mathematics	20
Physics	21
Interpretation and Argument	9
Arts, Humanities and Social Sciences courses	36
Cultural/Global Understanding	9
EUREKA! (First year seminar)	6
MCS Junior Seminar	6
ENGAGE in Wellness (3 courses)	3
ENGAGE in Service	1
ENGAGE in the Arts	2
Computing @ Carnegie Mellon	3
Free Electives	101
Minimum number of units for the degree	360

The above B.A. curriculum recommends a range of 40-50 units per semester. The total units actually taken may exceed the 360 unit minimum, but students are strongly encouraged to take the extra elective courses in whatever subjects they wish in order to enrich their backgrounds and enhance their educational experience.

Notes on Electives

Chemistry Electives

A minimum of 18 units of chemical electives is required.

Chemical electives can be satisfied by 09-445 Undergraduate Research, or by most other chemistry courses 09-3xx or higher, undergraduate or graduate, for which the student has the necessary prerequisites, or by 03-231/03-232 Biochemistry I. Biochemistry also fulfills the Life Sciences requirement for the MCS technical breadth requirement. 09-435 Independent Study Chemistry, may only be used to fulfill this requirement with permission of the Director of Undergraduate Studies. Certain interdisciplinary courses (e.g. 39-xxx) relating to chemistry can also be used with permission by the Director of Undergraduate Studies. The scheduling of these electives can vary and students should check with the department offering the course to see which courses are offered in any given year or semester and with the Director of Undergraduate Studies in the Department of Chemistry to ascertain whether the course is an acceptable chemistry elective.

Free Electives

Free electives are defined as including any course offered by Carnegie Mellon except those in science or engineering fields that are primarily intended for non-majors. A maximum of 9 units total of Physical Education and/or ROTC courses combined can be counted as free elective units. The Chemistry Department does not require technical electives.

Requirements for a Minor in Chemistry

In order for a student to receive a minor in Chemistry in conjunction with a B.S. or B.A. degree from another (primary) department, the successful completion of six courses as distributed below is required. Students pursuing the minor must inform the Chemistry Department of their intentions in writing using the MCS form for declaration of a minor so that the minor designation can be approved prior to graduation. The form may be obtained in the department office, DH 1317 or from the MCS undergraduate web page, <http://www.cmu.edu/mcs/undergrad/advising/forms/index.html>. **It should be completed and submitted to the department office, DH 1317, no later than the end of the course add period of the final semester prior to graduation.** If you decide at a later date not to complete the minor, it would be helpful to notify the Director of Undergraduate Studies, ks01@andrew.cmu.edu, so that it can be removed from your record. Minors are listed on the transcript but not on the diploma.

Note: An introductory chemistry class equivalent to either 09-105 Introduction to Modern Chemistry I or 09-107 Honors Chemistry: Fundamentals, Concepts and Applications is a presumed prerequisite to beginning the minor in chemistry.

A. Four Required Core Courses

09-106	Modern Chemistry II	10
09-221	Laboratory I: Introduction to Chemical Analysis	9-12
or 09-207	Techniques in Quantitative Analysis	
09-217	Organic Chemistry I	9-10
or 09-219	Modern Organic Chemistry	
Choice of one of the following courses:		
09-214	Physical Chemistry	9
09-344	Physical Chemistry (Quantum): Microscopic Principles of Physical Chemistry	9
09-345	Physical Chemistry (Thermo): Macroscopic Principles of Physical Chemistry	9
09-347	Advanced Physical Chemistry	12
09-348	Inorganic Chemistry	10

Courses in this group that are not used to satisfy Part A core courses may be used to satisfy elective course requirements in part B below, if they are **not** required by the student's primary department. However the only combination of physical chemistry courses (09-344, 09-345, 09-347 and 09-214) that is allowed is 09-344 and 09-345.

Enrollment in 09-347 is only open to students majoring in chemical engineering.

B. Two Elective Courses from the following list.

09-344	Physical Chemistry (Quantum): Microscopic Principles of Physical Chemistry	9
--------	--	---

or 09-214	Physical Chemistry	
09-345	Physical Chemistry (Thermo): Macroscopic Principles of Physical Chemistry	9
09-348	Inorganic Chemistry	10
09-222	Laboratory II: Organic Synthesis and Analysis	9-12
or 09-208	Techniques for Organic Synthesis and Analysis	
09-218	Organic Chemistry II	9-10
or 09-220	Modern Organic Chemistry II	
03-231/232	Biochemistry I	9
09-xxx	Approved Upper Level Chemistry Course (must be 09-3xx or higher but see exclusions noted below)	

Courses in this section (part B above) can not be counted toward the minor if they are required in any way by the student's primary department or towards an additional major or minor other than as a free elective. For example, students majoring in Biological Sciences can not double count 03-231 (or 03-232), 09-208 (or 09-222), or 09-218 (or 09-220) toward the elective courses for the minor in chemistry. Chemical engineering majors can not count 03-231 (or 03-232) or a chemistry course that is used to satisfy that department's required chemistry or advanced chem/biochem elective. Also, chemical engineering majors can not use 09-344, 09-345 or 09-214 due to the similarity of these courses to 09-347 Advanced Physical Chemistry, which is required by the chemical engineering department.

09-231 Mathematical Methods for Chemists, does not count towards the minor in chemistry. The undergraduate research courses 09-445 Undergraduate Research and 09-435 Independent Study Chemistry cannot be used for the minor.

Transfer credit will be accepted only for the prerequisite 09-105, 09-106 and 09-217. All other classes towards the chemistry minor must be completed at Carnegie Mellon University.

Transfer Credit for Chemistry Courses

1. Requests for transfer credit for chemistry classes taken at other institutions should be made to Karen Stump, the Director of Undergraduate Studies in the Department of Chemistry. Students making such requests should follow the policies and procedures in place within their home colleges in assembling materials for such requests. Consult with your advisor on the appropriate steps.
2. At minimum requests must be accompanied by a complete syllabus including the textbook that will be used, a detailed list of topic areas and an indication of whether or not the course is part of the curriculum for science majors at the other institution.
3. No transfer credit will be awarded for the laboratory classes required for the chemistry or biology major at Carnegie Mellon University, 09-207, 09-221, 09-208, 09-222, 09-321, 09-323 and 09-322. Requests for transfer credit for 09-101, Introduction to Experimental Chemistry, will be accepted with the appropriate documentation.
4. In assessing the suitability of courses for transfer credit, the following factors are considered:
 - The rigor of the course must be comparable to that offered at Carnegie Mellon. This is usually assessed via the textbook used and the amount of time spent on topic areas.
 - The topic areas should match to a degree of at least 80% those covered in the comparable course at Carnegie Mellon University.
5. 09-105 Introduction to Modern Chemistry I focuses primarily on structure and bonding. Detailed topics include the following:
 - History and Conceptual Basis of Modern Chemistry
 - Radiation, Quantum Mechanics, and Atomic Structure
 - Periodic Table and Trends in Elemental Properties (including discussion of exceptions to trends)
 - Bonding (bond polarity)
 - Lewis Structures (octet rule and exceptions; formal charge)
 - Resonance Structures
 - Molecular shapes
 - Molecular Polarity
 - Naming compounds
 - Interparticle (intermolecular) forces and comparing physical properties from them
 - Valence Bond (Localized Electron) and Molecular Orbital Theory
 - Determining number of moles and chemical formulas

- Writing and balancing chemical equations (in particular completing combustion and double displacement reactions – including acid-base and precipitation reactions)
 - Stoichiometry – limiting reactant and percentage yield
 - Gases (mainly ideal) and stoichiometric applications involving them
 - Phase transitions
 - Solutions (determining concentrations, dilution problems, stoichiometric applications, application of solubility rules to determine if a precipitate forms)
 - Acid-base reactions and titrations
 - Oxidations Numbers and Redox Reactions/Titrations (including balancing redox reactions)
 - Colligative Properties; Mixtures and Distillation
 - Transition Metal Complexes and Crystal Field Theory (including crystal field stabilization energy and optical properties)
6. 09-106 Modern Chemistry II focuses primarily on thermodynamics, kinetics and equilibrium. Detailed topic areas include the following.
- Thermochemistry and Thermodynamics (First, Second, and Third Laws, with gas expansion/compression applications, including reversible, adiabatic processes)
 - Internal energy, enthalpy, entropy, Gibbs Free energy, and determination of spontaneity
 - Kinetics : Determination of rate, order, rate laws (including application of pseudo-rate laws, application of integrated rate law to determine order, relationship between time and amount in a reaction, and half-life
 - Reaction mechanisms – applying fast equilibrium and steady-state approximations to determine rate law consistent with mechanism
 - Chemical Equilibrium : determination of Q and K expressions, determination of direction in which reaction proceeds to achieve equilibrium (using Q and Le Chatelier's principles, quantitative calculations to determine K or amounts at various stages, dependence of K on temperature, relationship between Gibbs Free energy, Q, and K)
 - Acid-Base Equilibria: writing dissociation equilibrium reactions and acid-base "neutralization" reactions, autoionization of water (determination of pH and pOH, use of K_w), writing K_a and K_b expressions from dissociation equilibria, quantitative equilibrium calculations for weak acids and bases, titrations between strong species, strong-weak species, and weak-weak species, buffers (calculations of pH and amounts, including how to make a buffer), polyprotic species (quantitative applications and titrations), solubility and precipitation equilibria, determination of K_{sp} expressions and quantitative applications of those expressions, complex ion formation equilibria, emphasis is placed on equilibrium problems that involve multiple types of simultaneous equilibria
 - Electrochemistry: Electrochemical cell notation and writing half-reactions from it, Faraday constant to connect number of moles of electrons / reaction amounts with current, connection of Gibbs Free Energy to cell voltage (potential) at equilibrium and non-equilibrium conditions, determination of K 's (acid-base, solubility constants) or amounts using Nernst equation in concentration cells (K for cell reaction)

Faculty

CATALINA ACHIM, Professor of Chemistry – Ph.D., Carnegie Mellon; Carnegie Mellon, 2001–.

BRUCE A. ARMITAGE, Professor of Chemistry, Co-Director Center for Nucleic Acids Science and Technology – Ph.D., University of Arizona; Carnegie Mellon, 1997–.

STEFAN BERNHARD, Professor of Chemistry – Ph.D., University of Fribourg (Switzerland); Carnegie Mellon, 2009–.

MARK E. BIER, Research Professor and Director, Center for Molecular Analysis – Ph.D., Purdue University; Carnegie Mellon, 1996–.

EMILE BOMINAAR, Associate Research Professor – Ph.D., University of Amsterdam (The Netherlands); Carnegie Mellon, 1994–.

MARCEL P. BRUCHEZ, Associate Professor of Chemistry and Biological Sciences, Director, Molecular Biosensor and Imaging Center – Ph.D., University of California, Berkeley; Carnegie Mellon, 2006–.

TERRENCE J. COLLINS, Teresa Heinz Professor in Green Chemistry, Director, Institute for Green Science – Ph.D., University Auckland, (New Zealand); Carnegie Mellon, 1988–.

SUBHA R. DAS, Associate Professor of Chemistry – Ph.D., Auburn University; Carnegie Mellon, 2006–.

NEIL M. DONAHUE, Thomas Lord Professor of Chemistry, Professor of Chemical Engineering and Engineering and Public Policy; Director, Steinbrenner Institute for Environmental Education and Research – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2000–.

REBECCA FREELAND, Associate Dean for Special Projects, Mellon College of Science and Associate Head, Department of Chemistry – Ph.D., Carnegie Mellon; Carnegie Mellon, 1993–.

ROBERTO GIL, Research Professor and Director, NMR Facility – Ph.D., Córdoba National University (Argentina); Carnegie Mellon, 2002–.

SUSAN T. GRAUL, Associate Teaching Professor – Ph.D., Purdue University; Carnegie Mellon, 1992–.

YISONG (ALEX) GUO, Assistant Professor of Chemistry – Ph.D., University of California at Davis; Carnegie Mellon, 2013–.

MICHAEL P. HENDRICH, Professor of Chemistry – Ph.D., University of Illinois; Carnegie Mellon, 1994–.

RONGCHAO JIN, Professor of Chemistry – Ph.D., Northwestern University; Carnegie Mellon, 2006–.

HYUNG J. KIM, Professor of Chemistry – Ph.D., State University of New York at Stony Brook; Carnegie Mellon, 1992–.

TOMASZ KOWALEWSKI, Professor of Chemistry – Ph.D., Polish Academy of Sciences (Poland); Carnegie Mellon, 2000–.

MARIA KURNIKOVA, Associate Professor of Chemistry – Ph.D., University of Pittsburgh; Carnegie Mellon, 2003–.

DANITH LY, Professor of Chemistry – Ph.D., Georgia Tech; Carnegie Mellon, 2001–.

MAUMITA MANDAL, Assistant Professor of Chemistry – Ph.D., Center for Cellular and Molecular Biology (India); Carnegie Mellon, 2008–.

KRZYSZTOF MATYJASZEWSKI, J.C. Warner University Professor of Natural Sciences and Director, Center for Macromolecular Engineering – Ph.D., Polish Academy of Sciences (Poland); Carnegie Mellon, 1986–.

ECKARD MÜNCK, Professor of Chemistry – Ph.D., Technical University of Darmstadt, (Germany); Carnegie Mellon, 1990–.

TERRANCE B. MURPHY, Teaching Professor at Carnegie Mellon University-Qatar – Ph.D., University of Washington; Carnegie Mellon, 2008–.

KEVIN NOONAN, Assistant Professor of Chemistry – Ph.D., University of British Columbia (Canada); Carnegie Mellon, 2011–.

HUNAID NULWALA, Assistant Research Professor – Ph.D., University of California at Santa Barbara; Carnegie Mellon, 2013–.

GARY D. PATTERSON, Professor of Chemistry – Ph.D., Stanford University; Carnegie Mellon, 1984–.

LINDA A. PETEANU, Professor of Chemistry – Ph.D., University of Chicago; Carnegie Mellon, 1992–.

GIZELLE SHERWOOD, Assistant Teaching Professor – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2009–.

GLORIA SILVA, Assistant Teaching Professor – Ph.D., Universidad Nacional de Córdoba (Argentina); Carnegie Mellon, 2002–.

KAREN H. STUMP, Teaching Professor and Director of Undergraduate Studies and Laboratories – M.S., Carnegie Mellon University; Carnegie Mellon, 1983–.

RYAN SULLIVAN, Assistant Professor of Chemistry and Mechanical Engineering – Ph.D., University of California, San Diego; Carnegie Mellon, 2012–.

STEFANIE SYDLIK, Assistant Professor of Chemistry – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 2015–.

LEONARD VUOCOLO, Assistant Teaching Professor – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2006–.

NEWELL WASHBURN, Associate Professor of Chemistry and Biomedical Engineering – Ph.D., University of California, Berkeley; Carnegie Mellon, 2004–.

DAVID YARON, Professor of Chemistry – Ph.D., Harvard University; Carnegie Mellon, 1992–.

Emeriti

GUY C. BERRY, University Professor of Chemistry and Polymer Science, Emeritus – Ph.D., University of Michigan; Carnegie Mellon, 1960–.

AKSEL A. BOTHNER-BY, Professor of Chemistry, Emeritus - Ph.D., Harvard University; Carnegie Mellon, 1958-.

ALBERT A. CARETTO JR., Professor of Chemistry, Emeritus - Ph.D., University of Rochester; Carnegie Mellon, 1959-.

JOSEF DADOK, Professor of Chemical Instrumentation, Emeritus - Ph.D., Czechoslovak Academy of Sciences; Carnegie Mellon, 1967-.

PAUL J. KAROL, Professor of Chemistry - Ph.D., Columbia University; Carnegie Mellon, 1969-.

ROBERT L. KAY, Professor of Chemistry, Emeritus - Ph.D., University of Toronto; Carnegie Mellon, 1963-.

MIGUEL LLINAS, Professor of Chemistry - Ph.D., University of California at Berkeley; Carnegie Mellon, 1976-.

STUART W. STALEY, Professor of Chemistry, Emeritus - Ph.D., Yale University; Carnegie Mellon, 1986-.

ROBERT F. STEWART, Professor of Chemistry, Emeritus - Ph.D., California Institute of Technology; Carnegie Mellon, 1978-.

CHARLES H. VAN DYKE, Associate Professor of Chemistry, Emeritus - Ph.D., University of Pennsylvania; Carnegie Mellon, 1963-.

Adjunct Faculty

COLIN HORWITZ, Adjunct Research Professor of Chemistry and Chief Technology Officer, GreenOx Catalysts and Deputy Director, Institute for Green Science - Ph.D., Northwestern University; Carnegie Mellon, 1993-.

JOHN PETERSON MYERS, CEO and Chief Scientist of Environmental Health Sciences - Ph.D., University of California at Berkeley; Carnegie Mellon, 2010-.

Courtesy

MICHAEL BOCKSTALLER, Professor of Materials Science Engineering and Faculty of Chemistry - Ph.D., Johannes Gutenberg University (Germany); Carnegie Mellon, 2005-.

ALEX EVILEVITCH, Associate Professor of Physics and Faculty of Chemistry - Ph.D., Lund University; Carnegie Mellon, 2009-.

ANDREW GELLMAN, Thomas Lord Professor of Chemical Engineering, Professor of Materials Science Engineering and Chemistry; Co-Director W.E. Scott Institute for Energy Innovation - Ph.D., University of California, Berkeley; Carnegie Mellon, 1992-.

GORDON RULE, Professor of Biological Sciences and Faculty of Chemistry - Ph.D., Carnegie Mellon University; Carnegie Mellon, 1995-.

JAMES SCHNEIDER, Professor of Chemical Engineering and Faculty of Biomedical Engineering and Chemistry - Ph.D., University of Minnesota; Carnegie Mellon, 1999-.

ALAN S. WAGGONER, Maxwell H. & Gloria C. Connan Professor of Life Sciences, Faculty of Biomedical Engineering and Chemistry - Ph.D., University of Oregon; Carnegie Mellon, 1982-.

LYNN WALKER, Professor of Chemical Engineering and Faculty of Chemistry and Materials Science Engineering - Ph.D., University of Delaware; Carnegie Mellon, 1997-.

JOHN L. WOOLFORD JR., Professor of Biological Sciences; Co-Director of CNASt and Faculty of Chemistry - Ph.D., Duke University; Carnegie Mellon, 1979-.

Department of Mathematical Sciences

Thomas Bohman, Department Head
 William J. Hrusa, Associate Head
 John F. Mackey, Associate Head
 Office: Wean Hall 6113
<http://www.math.cmu.edu>

Mathematics provides much of the language and quantitative underpinnings of the natural and social sciences, and mathematical scientists have been responsible for the development of many of the most commonly used tools in business management as well as for laying the foundation for computational and computer science. The name of the Department of Mathematical Sciences reflects its tradition of outstanding research and teaching of applicable mathematics relating to these areas. Indeed, the Department contains highly ranked research groups in Applied Mathematics, Discrete Mathematics, Logic, and Mathematical Finance. These research strengths are reflected in the variety of options that the Department provides for its undergraduate majors.

The Department offers a B.S. degree in Mathematical Sciences with concentrations in Mathematics, Operations Research and Statistics, Statistics, Discrete Mathematics and Logic, and Computational and Applied Mathematics.

The B.S. in Mathematics Curriculum is the least structured of our programs, in recognition of the wide variety of interests that can be productively coupled with the study of mathematical sciences. It can be an appropriate choice for students planning for graduate study in mathematics or seeking to design their curriculum to take advantage of the many opportunities for a second major from another department in the University.

The Operations Research and Statistics Concentration prepares students to enter the area of operations research, which is expected to be among the growth occupations over the next decade. Mathematicians with a background in operations research are especially valuable in such diverse activities as project planning, production scheduling, market forecasting and finance. Such applications are found in virtually all industrial and governmental settings.

The Statistics Concentration prepares students to contribute to a wide variety of research areas. Applications range from experimental design and data analysis in the physical and social sciences, medicine and engineering, to modeling and forecasting in business and government, to actuarial applications in the financial and insurance industries. This is also a useful second major for students planning for graduate study and research in subject areas requiring a strong statistical background.

The Discrete Mathematics and Logic Concentration provides a background in discrete mathematics, mathematical logic, and theoretical computer science. This concentration prepares the student to do research in these and related fields, or to apply their ideas elsewhere.

Finally, the Computational and Applied Mathematics Concentration provides the background needed to support the computational and mathematical analysis needs of a wide variety of businesses and industries and is well suited to students with an interest in the physical sciences and engineering.

The Department places great emphasis on the advising of students. This is critical if students are to make the most of their years at the University. Students are urged to work carefully with their advisor and other faculty to formulate their degree programs. Study abroad is encouraged, and an interested student should investigate the opportunities available in the Undergraduate Options section of the catalog.

Special options within the Department

The Department offers special opportunities for the exceptionally well-prepared and intellectually ambitious student. These options are available to students from any department in the University.

Matrix Theory and Vector Analysis

For selected Freshmen entering the University, we offer the Fall/Spring sequence of 21-242 Matrix Theory and 21-269 Vector Analysis, which include a rigorous introduction to proofs and abstract mathematics. Typically, a student choosing this sequence has mastered the operational aspects of high school mathematics and now seeks a deeper conceptual understanding.

Mathematical Studies

Following the 21-242/21-269 sequence, we offer Mathematical Studies Analysis I/II and Mathematical Studies Algebra I/II. These courses provide excellent preparation for graduate study, with many of the participants taking graduate courses as early as their Junior year. The typical enrollment of about 15 students allows for close contact with faculty. Admission to Mathematical Studies is by invitation, and interested students should apply during the Spring of their Freshman year.

Honors Degree Program

This demanding program qualifies the student for two degrees: The Bachelor of Science and the Master of Science in Mathematical Sciences. This program typically includes the Mathematical Studies option. For students who complete the Mathematical Studies sequence, the Master of Science degree in Mathematical Sciences may be earned together with a Bachelor of Science from another department.

Interdisciplinary Programs

Several interdisciplinary options enable a student to combine mathematics with other disciplines.

- The Bachelor of Science and Arts (p. 105) program allows a student to combine mathematics with study in any of the five schools in the College of Fine Arts.
- The Science and Humanities Scholars (p. 86) program includes an option shared with the Statistics Department in the Humanities and Social Sciences College that leads to a BS in Mathematics and Statistics.
- The Bachelor of Science in Mathematics and Economics (p. 386) is a flexible program which allows students to develop depth in both fields of study. Note: for students whose home college is Dietrich College, this major is known as the Bachelor of Science in Economics and Mathematical Sciences.
- Finally, a joint program with the Heinz College of Public Policy and Management and the Tepper School of Business leads to the degree Bachelor of Science in Computational Finance (<http://coursecatalog.web.cmu.edu/servicesandoptions/intercollegeprograms/#bachelorofscienceincomputationalfinance>). (p. 77)

Curricula

For each concentration, we provide a list of the requirements and a suggested schedule that takes prerequisites into account. A Mathematical Sciences, Computer Science, Physics, Statistics Elective refers to any course from the Departments of Mathematical Sciences, Computer Science, Physics, Statistics, respectively, satisfying the following restrictions: a mathematical sciences course must be at the 21-300 level or above or 21-270 or 21-292, a computer science course must be at the 15-200 level or above, a physics course must be at the 33-300 level or above, and a statistics course must have at least 36-225 as a prerequisite.

Mathematical Sciences majors are required to complete an introductory computer science course, either 15-110 or 15-112. Students who plan to take further computer science courses must complete 15-112.

An H&SS Elective refers to a course in the Dietrich College of Humanities and Social Sciences requirements as described in the catalog section for the Mellon College of Science. A course listed as an Elective is a free elective with the only restriction that the maximum total of ROTC, STUCO, and Physical Education units that will be accepted for graduation is nine.

For a list of courses required for all MCS students see "First Year for Science Students." (p.)

Mathematics Degree

This program is the most flexible available to our majors. The flexibility to choose eight electives within the major plus seven humanities courses and seven free electives allows the student to design a program to suit his or her individual needs and interests. The requirements for the Mathematics Degree are:

Mathematical Sciences Courses (required)

The alternative courses 21-242, 21-261, and 21-268 (or 21-269) are particularly recommended for a student planning to pursue graduate work.

Courses	Units	
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
21-127	Concepts of Mathematics	10
or 21-128	Mathematical Concepts and Proofs	
21-228	Discrete Mathematics	9
or 15-251	Great Theoretical Ideas in Computer Science	
21-241	Matrices and Linear Transformations	10
or 21-242	Matrix Theory	
36-225	Introduction to Probability Theory	9
or 21-325	Probability	
21-259	Calculus in Three Dimensions	9
or 21-268	Multidimensional Calculus	
or 21-269	Vector Analysis	
21-260	Differential Equations	9
or 21-261	Introduction to Ordinary Differential Equations	
or 33-231	Physical Analysis	
21-341	Linear Algebra	9
21-355	Principles of Real Analysis I	9
21-356	Principles of Real Analysis II	9
21-373	Algebraic Structures	9

112

Forty-five units of (required) Mathematical Sciences electives (at the 21-300 level or above or 21-270 or 21-292).

27 Units of (required) Mathematical Sciences (at the 21-300 level or above or 21-270 or 21-292, or Computer Science (at the 15-200 level or above), or Physics (at the 33-300 level or above), or Statistics (must have at least 36-225 as a prerequisite) electives.

MCS General Education (required)

MCS or SHS humanities, social sciences, and science core (114 units)

Mathematical Sciences Electives for Students Intending Graduate Studies

Students preparing for graduate study in mathematics should consider the following courses as Mathematical Sciences electives, choosing among them according to the desired area of graduate study:

21-301	Combinatorics	9
21-371	Functions of a Complex Variable	9
21-372	Partial Differential Equations and Fourier Analysis	9
21-374	Field Theory	9
21-441	Number Theory	9
21-465	Topology	9
21-467	Differential Geometry	9
21-470	Selected Topics in Analysis	9
21-476	Introduction to Dynamical Systems	9
21-484	Graph Theory	9
21-600	Mathematical Logic I	12
21-602	Introduction to Set Theory I	12
21-603	Model Theory I	12
21-610	Algebra I	12
21-620	Real Analysis	6
21-621	Introduction to Lebesgue Integration	6
21-630	Ordinary Differential Equations	12
21-640	Introduction to Functional Analysis	12
21-651	General Topology	12
21-660	Introduction to Numerical Analysis I	12
21-701	Discrete Mathematics	12
21-720	Measure and Integration	12
21-721	Probability	12
21-737	Probabilistic Combinatorics	12
21-738	Extremal Combinatorics	12

Note that courses 21-600 and above carry graduate credit. Courses at the 600 level are designed as transitional courses to graduate study. A student preparing for graduate study should also consider undertaking independent work. The Department offers 21-499 Undergraduate Research Topic and 21-599 Undergraduate Reading and Research for this purpose.

Courses 21-700 and above can be used with the permission of both the instructor and the department.

Suggested Schedule for students without ap credit

Freshman Year

Fall	Units	
21-120	Differential and Integral Calculus	10
21-127	Concepts of Mathematics	10
or 21-128	Mathematical Concepts and Proofs	
38-101	First-year Seminar	6
76-101	Interpretation and Argument	9
99-101	Computing @ Carnegie Mellon	3
xx-xxx	Life/Physical Sciences Course	9
		47

Spring	Units	
15-110	Principles of Computing	10
or 15-112	Fundamentals of Programming and Computer Science	
21-122	Integration and Approximation	10
21-241	Matrices and Linear Transformations	10
or 21-242	Matrix Theory	
xx-xxx	Physical/Life Sciences Course	9
xx-xxx	H&SS Elective	9
		48

Sophomore Year

Fall	Units	
21-228	Discrete Mathematics	9
or 15-251	Great Theoretical Ideas in Computer Science	
21-268	Multidimensional Calculus	10
xx-xxx	STEM Course	9
xx-xxx	H&SS Elective	9
xx-xxx	Free Elective	9
		46

Spring	Units	
21-261	Introduction to Ordinary Differential Equations	10
21-373	Algebraic Structures	9
xx-xxx	Mathematical Sci, Statistics, or Computer Sci Elective	9
xx-xxx	STEM Course	9
xx-xxx	H&SS Elective	9

45**Minimum number of units for the degree: 360****Operations Research and Statistics Concentration**

An operations research professional employs quantitative and computational skills toward enhancing the function of an organization or process. Students choosing this concentration will develop problem-solving abilities in mathematical and statistical modeling and computer-based simulation in areas such as network design, transportation scheduling, allocation of resources and optimization. In addition to courses in mathematics and statistics, a basic background in economics and accounting is included. Since problems in business and industry are often solved by teams, the program also includes a group project to be undertaken in the Senior year. Students choosing this concentration may not pursue an additional major or minor in Statistics in the Humanities and Social Sciences College.

The requirements for the concentration in Operations Research and Statistics are:

Mathematical Sciences Courses (required)

The alternative courses 21-242, 21-261, and 21-268 (or 21-269) are particularly recommended for a student planning to pursue graduate work.

Courses		Units
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
21-127	Concepts of Mathematics	10
or 21-128	Mathematical Concepts and Proofs	
21-228	Discrete Mathematics	9
or 15-251	Great Theoretical Ideas in Computer Science	
21-241	Matrices and Linear Transformations	10
or 21-242	Matrix Theory	
21-259	Calculus in Three Dimensions	9
or 21-268	Multidimensional Calculus	
or 21-269	Vector Analysis	
21-260	Differential Equations	9
or 21-261	Introduction to Ordinary Differential Equations	
or 33-231	Physical Analysis	
21-292	Operations Research I	9

21-369	Numerical Methods	9
21-393	Operations Research II	9
		94

Statistics Courses (required)

Courses		Units
36-225	Introduction to Probability Theory	9
or 21-325	Probability	
36-226	Introduction to Statistical Inference	9
36-401	Modern Regression	9
36-402	Advanced Methods for Data Analysis	9
36-410	Introduction to Probability Modeling	9
		45

Economics, Business, and Computer Science Courses (required)

Courses		Units
15-110	Principles of Computing	10
70-122	Introduction to Accounting	9
73-100	Principles of Economics	9
73-230	Intermediate Microeconomics	9
73-240	Intermediate Macroeconomics	9
		46

Depth Electives (required)

Five depth electives (required), to be chosen from the list below. The course 21-355 is particularly recommended for a student planning to pursue graduate work.

15-122	Principles of Imperative Computation	10
15-150	Principles of Functional Programming	10
15-210	Parallel and Sequential Data Structures and Algorithms	12
21-270	Introduction to Mathematical Finance	9
21-301	Combinatorics	9
21-341	Linear Algebra	9
21-355	Principles of Real Analysis I	9
21-356	Principles of Real Analysis II	9
21-365	Projects in Applied Mathematics	9
21-366	Topics in Applied Mathematics	9
21-370	Discrete Time Finance	9
21-373	Algebraic Structures	9
21-377	Monte Carlo Simulation for Finance	9
21-378	Mathematics of Fixed Income Markets	9
21-420	Continuous-Time Finance	9
21-484	Graph Theory	9
36-461	Special Topics: Statistical Methods in Epidemiology	9
36-462	Special Topics: Data Mining	9
36-463	Special Topics: Multilevel and Hierarchical Models	9
36-464	Special Topics: Applied Multivariate Methods	9
70-371	Operations Management	9
70-460	Mathematical Models for Consulting	9
70-471	Supply Chain Management	9

MCS General Education (required)

MCS or SHS humanities, social sciences, and science core (114 units)

Note that 73-100, 73-230, and 73-240 satisfy requirements from the MCS general education core.

Minimum number of units for the degree: 360

Statistics Concentration

Statistics is concerned with the process by which inferences are made from data. Statistical methods are essential to research in a wide variety of scientific disciplines. For example, principles of experimental design that assist chemists in improving their yields also help poultry farmers grow bigger chickens. Similarly, time series analysis is used to better understand radio waves from distant galaxies, hormone levels in the blood, and concentrations of pollutants in the atmosphere. This diversity of application is an exciting aspect of the field, and it is one reason for the current demand for well-trained statisticians.

The courses 36-225 Introduction to Probability Theory and 36-226 Introduction to Statistical Inference taken in the Junior year serve as the basis for all further statistics courses. The course 21-325 is a more mathematical alternative to 36-225.

The Statistics Concentration is jointly administered by the Department of Mathematical Sciences and the Department of Statistics. The Department of Statistics considers applications for the master's program from undergraduates in the Junior year. Students who are accepted are expected to finish their undergraduate studies, using some electives in the Senior year to take courses recommended by the Department of Statistics. This will ensure a strong background to permit completion of the master's program in one year beyond the baccalaureate. The requirements for the Statistics Concentration are:

Mathematical Sciences Courses (required)

The alternative courses 21-242, 21-261, and 21-268 (or 21-269) are particularly recommended for a student planning to pursue graduate work.

Courses	Units
21-120 Differential and Integral Calculus	10
21-122 Integration and Approximation	10
21-127 Concepts of Mathematics	10
or 21-128 Mathematical Concepts and Proofs	
21-228 Discrete Mathematics	9
or 15-251 Great Theoretical Ideas in Computer Science	
21-241 Matrices and Linear Transformations	10
or 21-242 Matrix Theory	
21-259 Calculus in Three Dimensions	9
or 21-268 Multidimensional Calculus	
or 21-269 Vector Analysis	
21-260 Differential Equations	9
or 21-261 Introduction to Ordinary Differential Equations	
or 33-231 Physical Analysis	
21-292 Operations Research I	9
21-369 Numerical Methods	9
21-393 Operations Research II	9
	94

Statistics Courses (required)

Courses	Units
36-225 Introduction to Probability Theory	9
or 21-325 Probability	
36-226 Introduction to Statistical Inference	9
36-401 Modern Regression	9
36-402 Advanced Methods for Data Analysis	9
36-410 Introduction to Probability Modeling	9
	45

Economics and Computer Science Courses (required)

Courses	Units
15-112 Fundamentals of Programming and Computer Science	12
15-122 Principles of Imperative Computation	10
73-100 Principles of Economics	9
	31

Depth Electives (required)

Four depth electives, including at least one statistics course, to be chosen from the list below. The course 21-355 Principles of Real Analysis I is particularly recommended for a student planning to pursue graduate work.

15-150 Principles of Functional Programming	10
15-210 Parallel and Sequential Data Structures and Algorithms	12
21-270 Introduction to Mathematical Finance	9
21-341 Linear Algebra	9
21-355 Principles of Real Analysis I	9
21-356 Principles of Real Analysis II	9
21-365 Projects in Applied Mathematics	9
21-366 Topics in Applied Mathematics	9
21-370 Discrete Time Finance	9

360 Minimum number of units required for the degree:

Discrete Mathematics and Logic Concentration

Discrete mathematics is the study of finite and countable structures and algorithms for the manipulation and analysis of such structures, while mathematical logic is the study of axiomatic systems and their mathematical applications. Both are flourishing research areas and have close ties with computer science.

The Discrete Mathematics and Logic Concentration provides a firm background in discrete mathematics and mathematical logic, together with the elements of theoretical computer science. It prepares the student to pursue research in these fields, or to apply their ideas in the many disciplines (ranging from philosophy to hardware verification) where such ideas have proved relevant.

The requirements for the Discrete Mathematics and Logic Concentration are:

Mathematical Sciences and Computer Science Courses (required)

The alternative course 21-242 is particularly recommended for a student planning to pursue graduate work. Students who plan to pursue graduate study in mathematical logic are strongly advised to take 21-300.

		Units
15-122	Principles of Imperative Computation	10
15-150	Principles of Functional Programming	10
15-210	Parallel and Sequential Data Structures and Algorithms	12

21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
21-127	Concepts of Mathematics	10
or 21-128	Mathematical Concepts and Proofs	
21-241	Matrices and Linear Transformations	10
or 21-242	Matrix Theory	
21-300	Basic Logic	9
or 15-317	Constructive Logic	
21-228	Discrete Mathematics	9
or 15-251	Great Theoretical Ideas in Computer Science	
21-301	Combinatorics	9
21-341	Linear Algebra	9
21-355	Principles of Real Analysis I	9
21-373	Algebraic Structures	9
		126

Computer Science electives (required)

Any two courses at the 300 level or above. The following are specifically suggested:

15-312	Foundations of Programming Languages	12
15-451	Algorithm Design and Analysis	12
15-453	Formal Languages, Automata, and Computability	9

Students pursuing this concentration who minor in Computer Science must take two additional Computer Science courses at the 300 level or above to avoid excessive double counting.

Mathematical Sciences Electives (required)

Seven courses from lists 1 and 2 below, including at least three chosen from list 1.

List 1 (Discrete Mathematics and Logic Electives)

21-325	Probability	9
21-329	Set Theory	9
21-374	Field Theory	9
21-400	Intermediate Logic	9
21-441	Number Theory	9
21-484	Graph Theory	9
21-602	Introduction to Set Theory I	12
21-603	Model Theory I	12
21-610	Algebra I	12
21-701	Discrete Mathematics	12
80-405	Game Theory	9
80-411	Proof Theory	9
80-413	Category Theory	9

List 2 (General Mathematics Electives)

21-259	Calculus in Three Dimensions	9-10
or 21-268	Multidimensional Calculus	
or 21-269	Vector Analysis	
21-260	Differential Equations	9-10
or 21-261	Introduction to Ordinary Differential Equations	
or 33-231	Physical Analysis	
21-292	Operations Research I	9
21-356	Principles of Real Analysis II	9
21-366	Topics in Applied Mathematics	9
21-369	Numerical Methods	9
21-370	Discrete Time Finance	9
21-371	Functions of a Complex Variable	9
21-372	Partial Differential Equations and Fourier Analysis	9
21-393	Operations Research II	9
21-420	Continuous-Time Finance	9
21-470	Selected Topics in Analysis	9
21-476	Introduction to Dynamical Systems	9
21-499	Undergraduate Research Topic	9

Any graduate course in mathematics at the 600 and 700 level not included in List 1.

MCS General Education (required)

MCS or SHS humanities, social sciences, and science core (114 units)

360 Minimum number of units required for degree:**Computational and Applied Mathematics Concentration**

This concentration is designed to prepare students for careers in business or industry which require significant analytical, computational and problem solving skills. It also prepares students with interest in computational and applied mathematics for graduate school.

The students in this concentration develop skills to choose the right framework to quantify or model a problem, analyze it, simulate and in general use appropriate techniques for carrying the effort through to an effective solution. The free electives allow the student to develop an interest in a related area by completing a minor in another department, such as Engineering Studies, Economics, Information Systems or Business Administration.

The requirements for the Computational and Applied Mathematics Concentration are:

Mathematical Sciences Courses (required)

The alternative courses 21-242, 21-261, and 21-268 (or 21-269) are particularly recommended for a student planning to pursue graduate work.

Courses		Units
21-120	Differential and Integral Calculus	10
21-122	Integration and Approximation	10
21-127	Concepts of Mathematics	10
or 21-128	Mathematical Concepts and Proofs	
21-228	Discrete Mathematics	9
or 15-251	Great Theoretical Ideas in Computer Science	
21-241	Matrices and Linear Transformations	10
or 21-242	Matrix Theory	
21-259	Calculus in Three Dimensions	9
or 21-268	Multidimensional Calculus	
or 21-269	Vector Analysis	
21-260	Differential Equations	9
or 21-261	Introduction to Ordinary Differential Equations	
or 33-231	Physical Analysis	
21-320	Symbolic Programming Methods	9
36-225	Introduction to Probability Theory	9
or 21-325	Probability	
21-355	Principles of Real Analysis I	9
21-356	Principles of Real Analysis II	9
21-369	Numerical Methods	9
		112

Computer Science Courses (required)

Courses		Units
15-122	Principles of Imperative Computation	10

Mathematics Electives (required)

Students must take 36 units from the list below:

21-292	Operations Research I	9
21-341	Linear Algebra	9
21-365	Projects in Applied Mathematics	9
21-366	Topics in Applied Mathematics	9
21-370	Discrete Time Finance	9
21-371	Functions of a Complex Variable	9

21-372	Partial Differential Equations and Fourier Analysis	9
21-377	Monte Carlo Simulation for Finance	9
21-378	Mathematics of Fixed Income Markets	9
21-393	Operations Research II	9
21-420	Continuous-Time Finance	9
21-467	Differential Geometry	9
21-470	Selected Topics in Analysis	9
21-476	Introduction to Dynamical Systems	9
21-620	Real Analysis	6
21-621	Introduction to Lebesgue Integration	6
21-630	Ordinary Differential Equations	12
21-640	Introduction to Functional Analysis	12
21-651	General Topology	12
21-660	Introduction to Numerical Analysis I	12
21-690	Methods of Optimization	12
21-720	Measure and Integration	12
21-721	Probability	12
21-732	Partial Differential Equations I	12

Students must take 9 units of Mathematical Sciences (at the 21-300 level or above or 21-270 or 21-292), or Computer Science (at the 15-200 level or above), or Physics (at the 33-300 level or above), or Statistics (must have at least 36-225 as a prerequisite) electives.

21-366 Topics in Applied Mathematics and 21-470 Selected Topics in Analysis have content that varies from year to year. These courses can be taken more than once (with permission).

Note that courses 21-600 and above carry graduate credit. 600-level courses are designed as transitional courses to graduate study.

A student preparing for graduate study should also consider undertaking independent work. The Department offers 21-499 Undergraduate Research Topic and 21-599 Undergraduate Reading and Research for this purpose.

These courses can be taken as part of satisfying the Depth Elective requirement, but require permission of both the instructor and the department.

Courses 21-700 and above can be used with the permission of both the instructor and the department.

MCS General Education (required)

MCS or SHS humanities, social sciences, and science core (114 units).

Students not in MCS are required to take 15-110 Principles of Computing (10 units).

Suggested Schedule

Freshman Year

Fall		Units
21-120	Differential and Integral Calculus	10
21-126	Introduction to Mathematical Software	3
21-127	Concepts of Mathematics	10
or 21-128	Mathematical Concepts and Proofs	
38-101	First-year Seminar	6
76-101	Interpretation and Argument	9
xx-xxx	Life/Physical Sciences Course	9
		47

Spring		Units
21-122	Integration and Approximation	10
21-228	Discrete Mathematics	9
21-241	Matrices and Linear Transformations	10
or 21-242	Matrix Theory	
xx-xxx	Physical/Life Sciences Course	9
xx-xxx	H&SS Elective	9
		47

Sophomore Year

Fall		Units
15-112	Fundamentals of Programming and Computer Science	12
21-268	Multidimensional Calculus	10

or 21-269	Vector Analysis	
xx-xxx	STEM Course	9
xx-xxx	H&SS Elective	9
xx-xxx	Free Elective	9
		49

Spring		Units
15-122	Principles of Imperative Computation	10
21-261	Introduction to Ordinary Differential Equations	10
xx-xxx	Mathematics Elective	9
xx-xxx	STEM Course	9
xx-xxx	H&SS Elective	9
		47

Junior Year

Fall		Units
21-320	Symbolic Programming Methods	9
21-325	Probability	9
21-355	Principles of Real Analysis I	9
xx-xxx	H&SS Elective	9
xx-xxx	Free Elective	9
		45

Spring		Units
21-356	Principles of Real Analysis II	9
21-369	Numerical Methods	9
xx-xxx	Depth Elective	9
xx-xxx	Cultural/Global Understanding Elective	9
xx-xxx	Free Elective	9
		45

Senior Year

Fall		Units
xx-xxx	Mathematics Elective	9
xx-xxx	Mathematics Elective	9
xx-xxx	Free Elective	9
xx-xxx	Free Elective	9
xx-xxx	Free Elective	9
		45

Spring		Units
xx-xxx	Mathematics Elective	9
xx-xxx	Free Elective	9
xx-xxx	Free Elective	9
xx-xxx	Free Elective	9
xx-xxx	Free Elective	9
		45

360Minimum units required for degree:

Double Major Requirements

All degrees offered by the Department are available as a second major to students majoring in other departments. Interested students should contact the Department for further information and guidance. In general the requirements for a second major include all the required courses except the MCS core, free electives and 21-201 Undergraduate Colloquium.

The Minor in Mathematical Sciences

The Minor includes six courses. 21-127 Concepts of Mathematics is a prerequisite for 21-228 and recommended for 21-241. The minimum preparation required for 21-355 Principles of Real Analysis I is 21-122 and 21-127 or equivalent courses.

21-127	Concepts of Mathematics	10
21-228	Discrete Mathematics	9-12
or 15-251	Great Theoretical Ideas in Computer Science	
21-241	Matrices and Linear Transformations	10
or 21-242	Matrix Theory	
21-355	Principles of Real Analysis I	9

21-3xx	Mathematical Sciences Elective
21-3xx	Mathematical Sciences Elective

To avoid excessive double counting, the two Mathematical Sciences Electives may not also count toward the student's major.

The Minor in Discrete Mathematics and Logic

This minor develops the fundamentals of discrete mathematics and logic necessary to understand the mathematical foundations of many computer related disciplines. Required courses are:

21-228	Discrete Mathematics ¹	9-12
or 15-251	Great Theoretical Ideas in Computer Science	
21-300	Basic Logic	9
or 15-317	Constructive Logic	
21-301	Combinatorics	9

¹21-127 Concepts of Mathematics is a prerequisite for 21-228.

Three of the following (at least one from each group):

Logic		
21-329	Set Theory	9
21-400	Intermediate Logic	9
21-602	Introduction to Set Theory I	12
21-603	Model Theory I	12
21-700	Mathematical Logic II	12
Algebra and Discrete Mathematics		
21-341	Linear Algebra	9
21-373	Algebraic Structures	9
21-374	Field Theory	9
21-441	Number Theory	9
21-484	Graph Theory	9
21-610	Algebra I	12
21-701	Discrete Mathematics	12

The Honors Degree Program

This demanding program leads to an M.S. in Mathematical Sciences, normally in four years, in addition to the student's B.S. degree. The key element in the program is usually the Mathematical Studies sequence. Admission to the Honors Program, in the Junior year, requires an application while admission to the Math Studies sequences is by invitation only. In the application process the Department will hold to the same high standards which apply to admission to any graduate program.

The core undergraduate honors courses are:

Freshman Year

Fall		Units
21-242	Matrix Theory (Honors version of 21-241 Matrices and Linear Transformations)	10
Spring		
21-269	Vector Analysis (Honors version of 21-268 Multidimensional Calculus)	10

Sophomore Year

Fall		
21-235	Mathematical Studies Analysis I (Honors version of 21-355 Principles of Real Analysis I)	10
21-237	Mathematical Studies Algebra I (Honors version of 21-373 Algebraic Structures)	10
Spring		
21-236	Mathematical Studies Analysis II (Honors version of 21-356 Principles of Real Analysis II)	10
21-238	Mathematical Studies Algebra II (Honors version of 21-341 Linear Algebra)	10

Honors Program Requirements:

21-901	Masters Degree Research	Var.
--------	-------------------------	------

Five graduate mathematics courses: 60 units

Each student in the honors degree program will have a thesis advisor in addition to his or her academic advisor. In practice, the student must start thinking about the thesis as early as possible. For this reason we include some thesis work, 3 units of 21-901 Masters Degree Research, in the Fall semester of the Senior year to allow for exploratory work under supervision. The actual thesis work is then planned for the final semester with 15 units of 21-901 Masters Degree Research. The student must give a public presentation and will be examined on the thesis and related mathematics.

The five graduate courses must include at least one course from each of the following areas:

- Analysis: for example, Measure and Integration, Complex Analysis, Functional Analysis
- Algebra, Logic, Geometry and Topology: for example, Mathematical Logic I, Algebra I, General Topology, Discrete Mathematics, Commutative Algebra, Differential Geometry
- Applied Mathematics: for example, Introduction to Continuum Mechanics, Probability Measures, Probability Theory, Graphs and Network Flows, Ordinary Differential Equations, Methods of Optimization, Introduction to Numerical Analysis I, Partial Differential Equations I, Sobolev Spaces.

Faculty

PETER B. ANDREWS, Emeritus – Ph.D., Princeton University; Carnegie Mellon, 1963–.

JEREMY AVIGAD, Professor – Ph.D., University of California, Berkeley; Carnegie Mellon, 1996–.

EGON BALAS, University Professor – Ph.D., University of Brussels; Carnegie Mellon, 1968–.

THOMAS BANCHOFF, Shelly Visiting Professor – Ph.D., University of California at Berkeley; Carnegie Mellon, 2015–.

ALBERT A. BLANK, Emeritus – Ph.D., New York University; Carnegie Mellon, 1969–.

MANUEL BLUM, University Professor – Ph.D., Massachusetts Institute of Technology; Carnegie Mellon, 1999–.

THOMAS BOHMAN, Professor – Ph.D., Rutgers University; Carnegie Mellon, 1998–.

DEBORAH BRANDON, Associate Teaching Professor – Ph.D., Carnegie Mellon University; Carnegie Mellon, 1991–.

BORIS BUKH, Assistant Professor – Ph.D., Princeton University; Carnegie Mellon, 2012–.

CHARLES V. COFFMAN, Emeritus – Ph.D., Johns Hopkins University; Carnegie Mellon, 1962–.

CLINTON CONLEY, Assistant Professor – Ph.D., University of California Los Angeles; Carnegie Mellon, 2009–.

GERARD CORNUEJOLS, University Professor – Ph.D., Cornell University; Carnegie Mellon, 1978–.

JAMES CUMMINGS, Professor – Ph.D., Cambridge University; Carnegie Mellon, 1996–.

HASAN DEMIRKOPARAN, Associate Teaching Professor – Ph.D., Michigan State University; Carnegie Mellon, 2005–.

IRENE M. FONSECA, University Professor – Ph.D., University of Minnesota; Carnegie Mellon, 1987–.

TIMOTHY FLAHERTY, Associate Teaching Professor – Ph.D., University of Pittsburgh.; Carnegie Mellon, 1999–.

ALAN M. FRIEZE, Professor – Ph.D., University of London; Carnegie Mellon, 1987–.

IRINA GHEORGHICIUC, Assistant Teaching Professor – Ph.D., University of Pennsylvania; Carnegie Mellon, 2007–.

JAMES M. GREENBERG, Emeritus – Ph.D., Brown University; Carnegie Mellon, 1995–.

RAMI GROSSBERG, Professor – Ph.D., Hebrew University of Jerusalem; Carnegie Mellon, 1988–.

MORTON E. GURTIN, Emeritus – Ph.D., Brown University; Carnegie Mellon, 1966–.

DAVID HANDRON, Associate Teaching Professor – Ph.D., Rice University; Carnegie Mellon, 1999–.

WILLIAM J. HRUSA, Professor – Ph.D., Brown University; Carnegie Mellon, 1982–.

GAUTAM IYER, Associate Professor – Ph.D., University of Chicago; Carnegie Mellon, 2009–.

GREGORY JOHNSON, Assistant Teaching Professor – Ph.D., University of Maryland; Carnegie Mellon, 2009–.

DAVID KINDERLEHRER, Professor – Ph.D., University of California at Berkeley; Carnegie Mellon, 1990–.

DMITRY KRAMKOV, Professor – Ph.D., Steklov Mathematical Institute; Carnegie Mellon, 2000–.

KASPER LARSEN, Associate Professor – Ph.D., University of Southern Denmark; Carnegie Mellon, 2007–.

JOHN P. LEHOCZKY, Professor – Ph.D., Stanford University; Carnegie Mellon, 1969–.

GIOVANNI LEONI, Professor – Ph.D., University of Minnesota; Carnegie Mellon, 2002–.

PO-SHEN LOH, Assistant Professor – Ph.D., Princeton University; Carnegie Mellon, 2009–.

JOHN MACKEY, Teaching Professor – Ph.D., University of Hawaii; Carnegie Mellon, 2003–.

DANIELA MIHAI, Assistant Teaching Professor – Ph.D., University of Pittsburgh; Carnegie Mellon, 2007–.

RICHARD A. MOORE, Emeritus – Ph.D., Washington University; Carnegie Mellon, 1956–.

ROY A. NICOLAIDES, Professor – Ph.D., University of London; Carnegie Mellon, 1984–.

WALTER NOLL, Emeritus – Ph.D., Indiana University; Carnegie Mellon, 1956–.

MARION L. OLIVER, Teaching Professor – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2004–.

DAVID R. OWEN, Emeritus – Ph.D., Brown University; Carnegie Mellon, 1967–.

WESLEY PEGDEN, Assistant Professor – Ph.D., Rutgers University; Carnegie Mellon, 2013–.

ROBERT L. PEGO, Professor – Ph.D., University of California at Berkeley; Carnegie Mellon, 2004–.

AGOSTON PISZTORA, Associate Professor – Ph.D., ETH Zurich; Carnegie Mellon, 1996–.

MARY RADCLIFFE, Shelly Postdoctoral Teaching Fellow – Ph.D., University of California at San Diego; Carnegie Mellon, 2015–.

SCOTT ROBERTSON, Assistant Professor – Ph.D., Boston University; Carnegie Mellon, 2011–.

HAYDEN SCHAEFFER, Assistant Professor – Ph.D., University of California at Los Angeles; Carnegie Mellon, 2015–.

JOHN W. SCHAEFFER, Professor – Ph.D., Indiana University; Carnegie Mellon, 1983–.

JUAN J. SCHÄFFER, Professor – Ph.D., Universität Zürich; Carnegie Mellon, 1968–.

ERNEST SCHIMMERLING, Professor – Ph.D., University of California at Los Angeles; Carnegie Mellon, 1998–.

DANA SCOTT, Emeritus – Ph.D., Princeton University; Carnegie Mellon, 1981–.

ROBERT F. SEKERKA, University Professor – Ph.D., Harvard University; Carnegie Mellon, 1969–.

STEVEN E. SHREVE, University Professor – Ph.D., University of Illinois; Carnegie Mellon, 1980–.

DEJAN SLEPCEV, Associate Professor – Ph.D., University of Texas at Austin; Carnegie Mellon, 2006–.

RICHARD STATMAN, Professor – Ph.D., Stanford University; Carnegie Mellon, 1984–.

SHLOMO TA'ASAN, Professor – Ph.D., Weizmann Institute; Carnegie Mellon, 1994–.

LUC TARTAR, University Professor of Mathematics Emeritus – Ph.D., University of Paris; Carnegie Mellon, 1987–.

IAN TICE, Assistant Professor – Ph.D., New York University; Carnegie Mellon, 2012–.

RUSSELL C. WALKER, Teaching Professor – D.A., Carnegie Mellon University; Carnegie Mellon, 1984–.

NOEL S. WALKINGTON, Professor – Ph.D., University of Texas at Austin; Carnegie Mellon, 1989–.

WILLIAM O. WILLIAMS, Emeritus – Ph.D., Brown University; Carnegie Mellon, 1966–.

ZELEALEM YILMA, Assistant Teaching Professor – Ph.D., Carnegie Mellon University; Carnegie Mellon, 2015–.

Department of Physics

Stephen Garoff, Head
Office: Wean Hall 7325
Kunal Ghosh, Assistant Head for Undergraduate Affairs
Office: Wean Hall 7303
Heather Corcoran, Student Programs Coordinator
Student Programs Office: Wean Hall 7319
<http://www.cmu.edu/physics>

Physics, one of the basic sciences, has its origin in the irrepressible human curiosity to explore and understand the natural world. This fundamental urge to discover has led to the detailed understanding of a remarkable variety of physical phenomena. Our knowledge now encompasses the large-scale movement of galaxies, the minute motions within atoms and nuclei, and the complex structure of the assemblies of molecules that make life possible. The spectacular expansion of our comprehension of the physical world forms an impressive part of the intellectual and cultural heritage of our times. The opportunity to add to this heritage is an important source of motivation for young physicists. The application of discoveries in physics to the solution of complex modern technological problems offers a vast field in which physicists make decisive contributions. The interplay of pure and applied physics has always been fruitful and today ensures many rewarding career opportunities for physics students.

Carnegie Mellon's undergraduate curriculum in physics has been carefully designed to provide a firm knowledge of the basic principles of physics, an appreciation of a wide range of physical problems of current interest, and the capacity to formulate and solve new problems. In addition to classwork and problem solving, the curriculum includes studying physical phenomena in the laboratory. Physics students are strongly encouraged to go beyond the formal theoretical and experimental course work and become involved in research projects under the guidance of individual faculty members.

Students may choose from a variety of degree options:

- B.S. in Physics
- B.A. in Physics
- B.S. in Physics with Tracks in:
 - Applied Physics
 - Astrophysics
 - Biological Physics
 - Chemical Physics
 - Computational Physics

The objectives and requirements for each of these options are described in the paragraphs below. Each allows considerable latitude in the choice of electives.

Through the judicious choice of elective courses, a double major program combining physics and another discipline can be readily achieved. A minor in physics is also offered for those students who major in other disciplines. The student, with the help of their faculty advisors, can easily build a program that aims at specific career objectives.

The Department maintains an active and wide-ranging program of advising. Beyond aiding in academic planning, the department advisors can also assist students in finding research work during the academic year, technical jobs and internships for the summer, as well as planning and executing the necessary steps for gaining employment or continuing their studies beyond the bachelor's degree. Whether students follow a standard curriculum or not, they should consult their academic advisor at least once every semester.

B.S. in Physics

B.S. degree candidates can choose studies in not only a wide variety of intermediate and advanced topics in physics but also a range of material in other science or engineering fields. The B.S. degree provides a solid foundation for students wishing to go on to graduate work in physics or any of a large number of fields in pure or applied science or engineering, for which a sound grasp of physics and mathematics is essential. This program also provides excellent preparation for careers in teaching, for work in industrial or governmental research and development, or for other employment in business or industry with a significant scientific component.

Degree Requirements are as follows:

- Carnegie Mellon University Requirements
 - A minimum of 360 units is required.

- 99-101, 99-102, or 99-103 Computing @ Carnegie Mellon

- [MCS Technical Breadth Requirements](#)
See MCS section of this catalog
- [MCS Nontechnical Breadth Requirements](#)
See MCS Section of this catalog
- Additional Core Physics/Math Courses
 - 33-104 Experimental Physics
 - 33-211 Physics III: Modern Essentials
 - 33-228 Electronics I
 - 33-231 Physical Analysis
 - 33-232 Mathematical Methods of Physics
 - 33-234 Quantum Physics
 - 33-331 Physical Mechanics I
 - 33-338 Intermediate Electricity and Magnetism I
 - 33-340 Modern Physics Laboratory
 - 33-341 Thermal Physics I
 - 21-259 Calculus in Three Dimensions
- Physics Colloquium Courses
 - 33-201 Physics Sophomore Colloquium I
 - 33-202 Physics Sophomore Colloquium II
 - 33-301 Physics Upperclass Colloquium I
 - 33-302 Physics Upperclass Colloquium II
- Physics, Mathematics and Technical Electives
 - 8 courses of at least 9 units each
 - Allowed courses depend on track chosen: see below.
- Free Electives
 - Approximately 26 units: actual number depends on track chosen and satisfying 360 total units
 - A free elective is any Carnegie Mellon course; however, a maximum of 9 units of physical education and/or military science and/or StuCo courses may be taken as free electives.

We offer a Physics Major with or without a track. A track is like a "menu deal" at a fast-food restaurant: when one chooses a track, one gets a package of physics and other required courses and electives. The specialized electives for each of the tracks are described below:

- No Track (p. 349)
- Applied Physics (p. 349)
- Astrophysics (p. 349)
- Biological Physics (p. 350)
- Chemical Physics (p. 350)
- Computational Physics (p. 350)

A student does not need to choose a track but can follow the general, non-track physics curriculum. You can also take all the courses that a track requires without being in a track. You can declare, change, or leave your track by discussing with the Assistant Head for Undergraduate Affairs.

Students planning to undertake graduate studies in physics are strongly advised to take the following courses:

- 33-332 Physical Mechanics II
- 33-339 Intermediate Electricity and Magnetism II
- 33-445 Adv Quantum Physics I
- 33-446 Advanced Quantum Physics II

Qualifying Electives in Physics

The following courses qualify as specialized Physics Electives for the B.S. and B.A. degrees and the Minor of Physics:

- 33-114 Physics of Musical Sound (B.A. and minor only)
- 33-120 Science and Science Fiction (B.A. and minor only)
- 33-224 Stars, Galaxies and the Universe (Fall)
- 33-241 Introduction to Computational Physics (Fall)
- 33-332 Physical Mechanics II (Spring)
- 33-339 Intermediate Electricity and Magnetism II (Spring)

- 33-342 Thermal Physics II (Spring)
- 33-350 Undergraduate Research
- 33-353 Intermediate Optics (Alt. Fall - F16, F18)
- 33-355 Nanoscience and Nanotechnology (Alt. Fall - F15, F17)
- 33-398 Special Topics
- 33-441 Introduction to BioPhysics (Fall)
- 33-444 Introduction to Nuclear and Particle Physics (Spring)
- 33-445 Adv Quantum Physics I (Fall)
- 33-446 Advanced Quantum Physics II (Spring)
- 33-448 Introduction to Solid State Physics (Spring)
- 33-451 Senior Research
- 33-456 Advanced Computational Physics (Spring)
- 33-466 Extragalactic Astrophysics and Cosmology (Spring)
- 33-467 Astrophysics of Stars and the Galaxy (Fall)
- 33-499 Supervised Reading
- 33-650 General Relativity (Fall)
- 33-658 Quantum Computation and Quantum Information Theory (Alt. Spring - S16, S18)
- 33-7xx Physics Graduate Level Courses (see list below)

Only one of the two courses - 33-114 and 33-120 may be used for BA.

Only one of the two courses - 33-350 (at least 9 units), 33-451 (at least 9 units), and 33-499 (at least 9 units) - may be used to satisfy as a Qualifying Elective in Physics. Any exceptions must be pre-approved by the Assistant Head for Undergraduate Affairs.

Physics Breadth Electives

A Physics Major with or without a track, one of the Physics electives must be a Physics "breadth" Elective course to be chosen from the following:

- 33-353 Intermediate Optics (Alt. Fall- F16, F18)
- 33-355 Nanoscience and Nanotechnology (Alt. Fall- F15, F17)
- 33-441 Introduction to BioPhysics (Fall)
- 33-444 Introduction to Nuclear and Particle Physics (Spring)
- 33-448 Introduction to Solid State Physics (Spring)
- 33-466 Extragalactic Astrophysics and Cosmology (Spring)
- 33-467 Astrophysics of Stars and the Galaxy (Fall)
- 33-650 General Relativity (Fall)
- 33-658 Quantum Computation and Quantum Information Theory (Alt. Spring- S16, S18)

Some of these courses are included in particular tracks. Then, no additional Physics Breadth Elective need to be chosen.

Physics Graduate Courses

- 33-755 Quantum Mechanics I
- 33-756 Quantum Mechanics II
- 33-758 Quantum Computation and Quantum Information Theory
- 33-759 Introduction to Mathematical Physics I
- 33-761 Classical Electrodynamics I
- 33-762 Classical Electrodynamics II
- 33-765 Statistical Mechanics
- 33-767 Biophysics: From Basic Concepts to Current Research
- 33-769 Quantum Mechanics III: Many Body and Relativistic Systems
- 33-770 Field Theory I
- 33-771 Field Theory II
- 33-777 Introductory Astrophysics
- 33-779 Introduction to Nuclear and Particle Physics
- 33-780 Nuclear and Particle Physics II
- 33-783 Solid State Physics

B.S. in Physics - Sample Schedule (No Track) BEGINNING FALL 2015 AND BEYOND

***MCS Cultural Global Understanding Category; see MCS Catalog

B.A. in Physics

The Bachelor of Arts degree in Physics offers a flexible program that allows students to combine the study of Physics with the opportunity to do intensive work in substantive areas such as liberal arts, teaching, business or law. With 82 units of free electives, it is feasible for students to obtain, for example, a double major with a department in the College of Humanities and Social Sciences, the College of Fine Arts, or the Tepper School of Business. It is expected that students will focus their elective courses in a well defined academic area. Students must meet with the Assistant Head for undergraduate Affairs and construct an approved plan of study.

The requirements for the B.A. degree are the same as for the B.S. degree, except that the 8 Physics, Mathematics and Technical Electives in the B.S. program become Free Electives in the BA program.

Degree Requirements are as follows:

- Carnegie Mellon University Requirements
 - A minimum of 360 units is required.
 - 99-101, 99-102, or 99-103 Computing @ Carnegie Mellon
- MCS Technical Breadth Requirements
See MCS section of this catalog
- MCS Nontechnical Breadth Requirements
See MCS section of this catalog

In addition, all core MCS requirements are listed in the MCS sections of this catalog, and must be fulfilled on time.

- Additional Core Physics/Math Courses
 - 33-104 Experimental Physics (by fall of sophomore year)
 - 33-211 Physics III: Modern Essentials
 - 33-228 Electronics I
 - 33-231 Physical Analysis
 - 33-232 Mathematical Methods of Physics
 - 33-234 Quantum Physics
 - 33-331 Physical Mechanics I
 - 33-338 Intermediate Electricity and Magnetism I
 - 33-341 Thermal Physics I
 - 21-259 Calculus in Three Dimensions
- Physics Colloquium Courses
 - 33-201 Physics Sophomore Colloquium I
 - 33-202 Physics Sophomore Colloquium II
 - 33-301 Physics Upperclass Colloquium I
 - 33-302 Physics Upperclass Colloquium II
- Qualifying Physics Electives (p. 347)
 - 2 courses of at least 9 units each
- Free Electives
 - Approximately 82 units: actual number depends on satisfying 360 total units
