The evolution of the culture and language of German immigrants to Texas from the 1840s through the present and how they have influenced other ethnic groups in Texas. Three lectures a week for one semester. Only one of the following may be counted: American Studies 370 (Topic: Language, Culture, and the Texas German Experience), 370 (Topic 47), Anthropology 324L (Topic: Language, Culture, and the Texas German Experience), 324L (Topic 55), Germanic Civilization 327E (Topic 11) German, Scandinavian, and Dutch Studies 351C, Linguistics 350 (Topic: Language, Culture, and the Texas German Experience), 373 (Topic 10). Additional prerequisite: Upper-division standing.

### **ANT 325J. The Photographic Image.**

Applies concepts and practices from visual ethnography to the study of memory, place, and everyday life. Subjects include developing counterintuitive and subversive approaches to practices of looking and techniques of representation. Two lecture hours and two lab hours a week for one semester. Anthropology 325L (Topic: The Photographic Image) and 325J may not both be counted. Prerequisite: Upper-division standing.

### **ANT 325L. Cultural Studies, Public Culture, and Folklore: Selected Topics.**

Consideration of folklore in different culture areas of the Western Hemisphere. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

**Topic 11: Cultural Heritage on Display.** Explores the public construction and display of traditional American folk culture by studying popular folklife-oriented tourist sites. American Studies 321 (Topic: Cultural Heritage on Display) and Anthropology 325L (Topic 11) may not both be counted.

**Topic 12: Russian Myths and Folktales.** Same as Comparative Literature 323 (Topic 34), Russian, East European, and Eurasian Studies 325 (Topic 22), and Russian 330 (Topic 9). Examination of the Russian folktale, its roots in ancient, pre-Christian Slavic religious tradition, its connections with other forms of folklore such as myth and legend, and its transformation in modern Russian literature. Subjects include the continuing influence of folklore explored through various aspects of Russian culture, including literature, music, ballet, film, and popular culture. Only one of the following may be counted: Anthropology 325L (Topic: Russian Myths and Folk Tales), 325L (Topic 12), Comparative Literature 323 (Topic: Russian Myths and Folk Tales), 323 (Topic 34), Russian 330 (Topic: Russian Myths and Folk Tales), 330 (Topic 9), Russian, East European and Eurasian Studies 325 (Topic: Russian Myths and Folk Tales), 325 (Topic 22). Additional prerequisite: Upper-division standing.

**Topic 13: Representation of Jews in the American Public Sphere.** Same as Jewish Studies 365 (Topic 11) and Religious Studies 346 (Topic 8). Examines how Jews have been represented and constituted in American public culture as a race, religion, and/or nation through distinct institutions and display practices. Only one of the following may be counted: Anthropology 325L (Topic: Representation of Jews in the American Public Sphere), 325L (Topic 13), Jewish Studies 365 (Topic: Representation of Jews in the American Public Sphere), 365 (Topic 11), Religious Studies 346 (Topic: Representation of Jews in the American Public Sphere), 346 (Topic 8).

**Topic 14: Traveling Culture.** Examines mobility as a point of inquiry into questions of identity, community, belonging, place and landscape, art, representation, cultural difference, experience, and history. Only one of the following may be counted: Anthropology 325L (Topic: Traveling Culture), 325L (Topic 14), Russian, East European, and Eurasian Studies 325 (Topic: Traveling Culture).

**Topic 15: Practices of Looking.** Develops methodological and analytic tools for the examination of visual culture. Anthropology 325L (Topic: Practices of Looking) and 325L (Topic 15) may not both be counted.

**Topic 17: American Jewish Material Culture.** Same as Jewish Studies 365 (Topic 12) and Religious Studies 346 (Topic 9). Examines the interplay between material culture and Jewish identity and thought in contemporary America. Only one of the following may be counted: Anthropology 325L (Topic: American Jewish Material Culture), 325L (Topic 17), Jewish Studies 365 (Topic: American Jewish Material Culture), 365 (Topic 12), Religious Studies 346 (Topic: American Jewish Material Culture), 346 (Topic 9).

### **ANT 325M. Language in Culture and Society.**

Same as Linguistics 373 (Topic 3: Language in Culture and Society) and Sociology 352M (Topic 4: Language in Culture and Society). Language as a cultural resource; functions of language in society; survey of language communities. Three lecture hours a week for one semester. Prerequisite: Anthropology 302, 305, 307, or Linguistics 306; or consent of instructor.

**ANT 325N. Language and Speech in American Society.**

Same as American Studies 321 (Topic 2: Language and Speech in American Society), Linguistics 373 (Topic 2: Language and Speech in American Society), and Sociology 352M (Topic 3: Language and Speech in American Society). Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and Anthropology 302, 305, 307, or Linguistics 306.

**ANT 326C. Native Americans in Texas.**

Same as American Studies 321G. Studies the history of Native Americans in Texas using concepts and evidence from anthropology, history, archaeology, historical geography, and Native American studies. Three lecture hours a week for one semester. Only one of the following may be counted: American Studies 321 (Topic: Native Americans in Texas), Anthropology 324L (Topic: Native Americans in Texas), 326C. Prerequisite: Upper-division standing.

**ANT 326D. Native Americans in the Plains.**

The ethnohistory of some of the most influential Native American groups on the plains, from the arrival of the Spanish through the reservation period. Three lecture hours a week for one semester. Only one of the following may be counted: American Studies 321 (Topic: Native Americans in the Plains), Anthropology 324L (Topic: Native Americans in the Plains), 326D, History 365G (Topic: Native Americans in the Plains). Prerequisite: Upper-division standing.

**ANT 326E. Plains Archaeology: Prehistory and History.**

Explores the evidence of human activities on the central and southern plains from prehistoric to historical times (ca. 11,000 BC to ca. AD 1850). Three lecture hours a week for one semester. Anthropology 324L (Topic: Plains Archaeology: Prehistory and History) and 326E may not both be counted. Prerequisite: Upper-division standing.

**ANT 326F. Great Discoveries in Archaeology.**

Same as European Studies 346 (Topic 2: Great Discoveries in Archaeology). The stories, myths, and people behind some of the great archaeological discoveries. Three lecture hours a week for one semester. Only one of the following may be counted: Anthropology 324L (Topic: Great Discoveries in Archaeology), Anthropology 326F, European Studies 346 (Topic 2). Prerequisite: Upper-division standing.

**ANT 326L. Cultures in Contact.**

History of the interactions of the indigenous peoples of the Americas with Africans, Asians, and Europeans over the past five hundred years. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**ANT 327C. Topics in American Cultures.**

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

**Topic 1: Race and Ethnicity in the United States.****ANT 327D. Colonial Latin American Archaeology.**

Same as Latin American Studies 324L (Topic 13: Colonial Latin American Archaeology). Focuses on the Spanish colonies in Latin America. Three lecture hours a week for one semester. Only one of the following may be counted: Anthropology 324L (Topic: Colonial Latin American Archaeology), 327D, Latin American Studies 324L (Topic 13).

**ANT 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Anthropology.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser

in the Department of Anthropology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

**ANT 330C. Theories of Culture and Society.**

Examination of the theoretical approaches that have established the intellectual foundations of contemporary sociocultural anthropology. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**ANT 432L. Primate Anatomy.**

Comparative and functional anatomy of primates, including humans; emphasis on adaptations and evolution of the various taxa. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: Anthropology 301.

**ANT 334L. North American Archaeology.**

Regional cultural development of Native American societies from the earliest human occupations to the historic period. Three lecture hours a week for one semester. Prerequisite: Upper-division standing or consent of instructor.

**ANT 336L. Native American Cultures North of Mexico.**

Same as American Studies 321 (Topic 3: Native American Cultures North of Mexico). Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**ANT 340C. Ethnographic Research Methods.**

Introduction to methods used in conducting ethnographic research; emphasis on research design, analysis, writing, and ethical considerations. Three lecture hours a week for one semester. Prerequisite: Anthropology 302, 305, or 307.

**ANT 344K. Films: An Anthropological Perspective.**

Films viewed and discussed. How is cultural meaning communicated? What systems of signification are involved? What are possibilities and limitations of ethnographic films? Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**ANT 345C. Urban Cultures.**

The culture of cities, including the distinctive forms of expressive culture, ethnic and racial conflict, and political or economic activity that cities generate. Three lecture hours a week or two lecture hours and one discussion hour a week for one semester. Prerequisite: Upper-division standing.

**ANT 346L. Primate Social Behavior.**

Studies primate behavior and why primates do what they do, including basic theoretical principles and the models used to explain primate behavior. Three lecture hours a week for one semester. Anthropology 346L and 348K (Topic 6: Primate Social Behavior) may not both be counted. Prerequisite: Anthropology 301.

**ANT 346M. Comparative Primate Ecology.**

The basics of how organisms interact with their environment, focusing on a wide range of primates from a comparative perspective. Discusses how various aspects of ecology are used to conserve primate populations. Three lecture hours a week for one semester. Anthropology 346M and 348K (Topic 7: Comparative Primate Ecology) may not both be counted. Prerequisite: Anthropology 301.

**ANT 347C. Methods in Primate Biology.**

The study of primate behavior and the methods by which animal behavior is observed and documented. Students conduct a research project and

write a report. One lecture hour and three laboratory hours a week for one semester. Prerequisite: Anthropology 346L , 346M , or Biology 359K with a grade of at least C.

#### **ANT 348. Human Origins and Evolution.**

Detailed examination and analysis of morphological trends evident in the hominid fossil record. Two lecture hours and two laboratory hours a week for one semester. Prerequisite: Anthropology 301.

#### **ANT 348K. Current Topics in Physical Anthropology.**

An in-depth study of current topics, controversies, and literature on the evolution, morphology, genetics, and behavioral ecology of primates, including humans. Three lecture hours a week for one semester; additional hours may be required for some topics. May be repeated for credit when the topics vary. Prerequisite: Anthropology 301.

##### **Topic 1: Human Evolution.**

**Topic 8: Evolutionary Anatomy of the Head and Neck.** The comparative and functional anatomy of the head and neck in primates and other mammals.

**Topic 9: Introduction to Primate Anatomy.** Explores the relationship between primate anatomical form and function.

**Topic 10: Primate Conservation.** The theory and practices of conservation biology as applied to primates. Explores species and community characteristics influencing extinction risk, current threats to primates, and potential conservation strategies.

**Topic 11: Early Hominid Evolution.** Examines the early stages of human evolution in Africa starting from the last common great ape ancestor through the origin of the genus *Homo*, looking at the behavioral and morphological adaptations that characterize the earliest stages of human evolution. Anthropology 348K (Topic: Early Hominid Evolution) and 348K (Topic 11) may not both be counted.

**Topic 12: Sex and Human Nature.** Provides an introduction to the scientific study of sexual behavior, mate choice, and reproduction in humans from the perspective of evolutionary biology; examines a wide range of genetic, ecological, social, physiological, and behavioral aspects of human sexuality. Anthropology 348K (Topic: Sex and Human Nature) and 348K (Topic 12) may not both be counted.

#### **ANT 349C. Human Variation.**

The patterns of biological variation within and between human populations. Examines physical, genetic, and behavioral traits, and considers both the microevolutionary and cultural processes that influence those traits. Three lecture hours a week for one semester. Anthropology 348K (Topic: Human Variation) and 349C may not both be counted. Prerequisite: Anthropology 301.

#### **ANT 349D. Anthropological Genetics.**

Basic principles of molecular genetics and population genetics as they relate to the study of humans and other primates. Three lecture hours a week for one semester. Anthropology 348K (Topic: Anthropological Genetics) and 349D may not both be counted. Prerequisite: Anthropology 301.

#### **ANT 350C. Primate Sensory Ecology.**

An integrated perspective on the comparative anatomy, physiology, and ecological significance of sensory adaptations in primates. Three lecture hours a week for one semester. Anthropology 348K (Topic 5: Primate Sensory Ecology) and 350C may not both be counted. Prerequisite: Anthropology 301.

#### **ANT 350M. Evolution of Primate Behavior.**

Mechanisms underlying the evolution of human and nonhuman primate behavior. The reasons and ways primates live in social groups; comparisons between human and nonhuman primates using living

primates, fossil remains, and archaeological evidence. Three lecture hours a week for one semester. Prerequisite: Anthropology 301.

#### **ANT 351E. Primate Evolution.**

Examination of the fossil record for nonhuman primate evolution, including basic concepts of the anatomy, ecology, and systematics of living primates. Three lecture hours a week for one semester. Anthropology 348K (Topic 4: Primate Evolution) and 351E may not both be counted. Prerequisite: Anthropology 301.

#### **ANT 453. Archaeological Analysis.**

Derivation of chronology and cultural information from archaeological data; the role of archaeology in modern life. Four lecture hours a week for one semester. Prerequisite: Anthropology 304 or Archaeology 301.

#### **ANT 353E. Archaeological Laboratory Analysis.**

The analysis of artifacts, features, architecture, and other remains recovered in the field. Four and one-half laboratory hours a week for one semester. Anthropology 324L (Topic: Archaeological Laboratory Analysis) and 353E may not both be counted. Prerequisite: Anthropology 662.

#### **ANT 358Q. Supervised Research.**

Individual instruction. Prerequisite: Upper-division standing.

#### **ANT 360K. The Civilization of the Maya.**

Same as Latin American Studies 324L (Topic 10: The Civilization of the Maya). Maya prehistory and history: the archaeological record, codices and inscriptions, and Spanish conquest writings. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

#### **ANT 361K. The Civilizations of Ancient Mexico.**

Same as Latin American Studies 324L (Topic 11: The Civilizations of Ancient Mexico). Mexican cultures from earliest prehistory to the European conquest. Three lecture hours a week for one semester. Prerequisite: Anthropology 302 and six semester hours of upper-division coursework in social science.

#### **ANT 662. Field Archaeology.**

Two hundred and forty hours of fieldwork. May be repeated for credit, but may be taken only once on the letter-grade basis. May be repeated for credit.

#### **ANT 362K. Archaeology of Texas and Vicinity.**

Cultural history of Texas and neighboring areas, from early prehistoric times to Anglo-American settlements. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

#### **ANT 462M. Archaeological Techniques.**

Problems in planning, organizing, and carrying out archaeological surveys and excavations. Four lecture hours a week for one semester. Prerequisite: Anthropology 453.

#### **ANT 366. Anatomy and Biology of the Human Skeleton.**

Comprehensive study of the human skeleton, with special attention to methods of identification. One lecture hour and four laboratory hours a week for one semester. Prerequisite: Upper-division standing and Anthropology 301.

#### **ANT 374M. Sociolinguistics.**

Same as Linguistics 374M. An in-depth treatment of current interests in sociolinguistic research literature. Subjects include language and gender; social, regional, and ethnic dialects of American English; language use in African American communities; language and identity in a pluralistic

society; and language, literacy, and education. Three lecture hours a week for one semester. Prerequisite: Anthropology 302 or Linguistics 306.

### **ANT 376P, 676P. Research Internship.**

Restricted to anthropology majors. Supervised fieldwork in a business or community setting related to the student's career and research interests. Students conduct research and apply anthropological skills to real-world problems. Approximately 150 or 300 hours of fieldwork. May be repeated for credit, but no more than six semester hours may be counted toward the major requirement. Prerequisite: Upper-division standing and consent of instructor.

### **ANT 379. Problems in Anthropology.**

Supervised individual research on selected problems in anthropology. Three lecture hours a week for one semester. May be repeated for credit. Prerequisite: Six semester hours of upper-division coursework in anthropology and consent of instructor.

### **ANT 679H. Honors Tutorial Course.**

For honors candidates in anthropology. Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis. Conference course for two semesters. Prerequisite: For 679HA, admission to the Anthropology Honors Program; for 679HB, Anthropology 679HA.

## **Science, Technology, and Society: STS**

### **Lower-Division Courses**

#### **STS 101. Key Ideas and Issues in Science, Technology, and Society.**

Designed to introduce students to the main areas of interest in science, technology, and society. Lectures, readings, and discussions include speakers from various academic disciplines. One lecture hour a week for one semester. Offered on the pass/fail basis only.

#### **STS 311. Topics in Science, Technology, and Society.**

Some topics may include an academic service-learning component; these are identified in the Course Schedule. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

#### **STS 318. How We Shape Discoveries and How They Shape Us.**

Technical, historical, and cultural approaches to the multiple dimensions and complexities of scientific and technological innovation, and how they shape and are shaped by society. Cases for discussion are drawn from energy discoveries, nanoscience, biomedicine, and materials science advances. Three lecture hours a week for one semester.

#### **STS 319. Information Technology and Social Life.**

The impact of technologies on social life, and the necessity for applying skills developed in the liberal arts to managing new ways of life mediated through technologies, including work and home environments. Includes an academic service-learning component. Three lecture hours a week for one semester.

### **Upper-Division Courses**

#### **STS 321. Introduction to Science, Technology, and Society.**

Introduction to the history of communication technology, including how past innovations shaped societies and how current changes are transforming human cultures, universities, and the liberal arts. Three lecture hours a week for one semester. Prerequisite: Completion of at least thirty semester hours of coursework.

#### **STS 331. Topics in Science, Technology, and Society.**

Some topics may include an academic service-learning component; these are identified in the Course Schedule. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

#### **STS 332. The Nanotechnology and Science Revolution.**

The societal impacts of nanotechnology and how this emerging technology might transform the future of technologies, manufacturing, and innovation. Three lecture hours a week for one semester. Science, Technology, and Society 331 (Topic: Impacts of Science: Nanotechnology, Technology, and Life) and 332 may not both be counted.

#### **STS 360. Senior Seminar in Science, Technology, and Society.**

Senior capstone seminar. Allows the student to integrate the knowledge he or she has gained in the major field of study with that provided by the concentration in science, technology, and society. Three lecture hours a week for one semester. Prerequisite: Completion of at least ninety semester hours of coursework, including Science, Technology, and Society 321.

#### **STS 367. Conference Course in Science, Technology, and Society.**

Supervised work on specific projects in science, technology, and society. Three conference hours a week for one semester. May be repeated for credit. Prerequisite: Completion of at least thirty-six semester hours of coursework and approval of written application by the supervising instructor.

#### **STS 370. Research Internship.**

Supervised fieldwork in a business or community setting related to the student's career and research interests. Approximately six to ten hours of work a week for one semester, to be arranged with faculty member and internship sponsor. May be repeated for credit, but no more than six semester hours of Science, Technology, and Society 370 may be counted toward the concentration requirement. Prerequisite: Science, Technology, and Society 321, upper-division standing, and consent of instructor.

## **Department of Asian Studies**

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

### **Asian Studies: ANS**

#### **Lower-Division Courses**

##### **ANS 301M. Introductory Topics in Asian Studies.**

Discussion of various problems involving language, history, and culture in Asia. Three lecture hours a week for one semester; additional hours may be required for some topics. Some topics partially fulfill legislative requirement for American history. May be repeated for credit when the topics vary.

**Topic 3: History of East Asia to 1800.** Same as History 305K. A survey of the traditional history and culture of China, Japan, Korea, and Vietnam.

**Topic 4: History of East Asia since 1800.** Same as History 305L. A survey of the modern history of China, Japan, Korea, and Vietnam.

**Topic 6: Asia's Futures.** Same as Government 314 (Topic 5: Asia's Futures). Current issues, visible trends, and projections for Asia's future.

**Topic 11: Introduction to Buddhism.** Same as Religious Studies 312C. A structural and historical overview of Buddhism through the examination of various schools, doctrines, biographical narratives, and contemporary ethical issues. Only one of the following may be counted: Asian Studies 301M (Topic 11), Religious Studies 312 (Topic: Introduction to Buddhism), 312C.

**Topic 13: Forbidden Romance in Modern Chinese Literature.** Same as Comparative Literature 305 (Topic 1). Introduction to modern Chinese literature from the late Qing Dynasty (latter half of the nineteenth century) to the present. Only one of the following may be counted: Asian Studies 301M (Topic: Forbidden Romance in Modern Chinese Literature), 301M (Topic 13), Comparative Literature 305 (Topic: Forbidden Romance in Modern Chinese Literature), 305 (Topic 1).

**Topic 14: East Asian Martial Arts Films.** Explores the concept of "East Asian" from the cinematic perspective, focusing on the martial arts film genre. Additional hours required for film screenings. Asian Studies 301M (Topic: Everybody is Kung Fu Fighting) and 301M (Topic 14) may not both be counted.

**Topic 15: Introduction to Islam.** Same as History 306N (Topic 7), Islamic Studies 310, and Religious Studies 319. The beliefs, theology, history, and main social and legal institutions of Islam, including the concept of God and society, the role of women, and Islamic government and movements. Three lecture hours a week for one semester. Only one of the following may be counted: Asian Studies 301M (Topic 15), History 306N (Topic 7), Islamic Studies 310, Middle Eastern Studies 310 (Topic 1: Introduction to Islam), Religious Studies 319.

**Topic 16: Introduction to Japanese Film.** Broad survey of Japanese cinema, including silent films, feature films, documentaries, and anime, that covers the basic history of Japanese cinema. Background in Japanese not required, all films are subtitled in English. Additional hours may be required for film/media screenings. Asian Studies 301M (Topic: Introduction to Japanese Film) and 301M (Topic 16) may not both be counted.

### **ANS 301R. History of the Religions of Asia.**

Same as Religious Studies 302. Eastern religions: an introduction to the basic forms and the historical development of the religious traditions of India, China, and Japan. Three lecture hours a week for one semester.

### **ANS 302C. Introduction to China.**

Same as History 302C. Introduction to Chinese civilization, past and present, including religion, literature, arts, philosophy, and history. Three lecture hours a week for one semester. Only one of the following may be counted: Asian Studies 302C, History 302C, 306N (Topic: Introduction to China).

### **ANS 302D. Introduction to Korean Culture and History.**

Introduction to Korea's history, culture, and civilization from antiquity to the present. Three lecture hours a week for one semester. Asian Studies 301M (Topic 10) and 302D may not both be counted.

### **ANS 302J. Introduction to Japan.**

Introduction to Japanese civilization, past and present, including religion, literature, arts, philosophy, and history. Three lecture hours a week for one semester.

### **ANS 302K. Introduction to South Asia.**

Same as Anthropology 310L (Topic 5: Introduction to India). Introduction to Indian and south Asian civilization, past and present, including religion, literature, arts, philosophy, and history. Only one of the following may be

counted: Anthropology 310L (Topic 5), Asian Studies 302K, History 306N (Topic: Introduction to India).

### **ANS 307C. Introduction to the History of India.**

Same as History 307C. Survey of the history of the Indian subcontinent from prehistoric times to the present. Three lecture hours a week for one semester.

### **ANS 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Asian Studies.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **ANS 320. Topics in Great Literatures of Asia.**

Conducted in English. Introduction to various Asian literatures, emphasizing philosophical, religious, and social concepts. Three lecture hours a week for one semester; additional hours may be required for some topics. Asian Studies 320 and 361 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

#### **Topic 2: Genji to Godzilla: Adaptations of the Japanese Classics.**

Examines how premodern, modern, and contemporary classics of Japanese literature, film, and theater get adapted over the centuries, and how culture, politics, gender, genre, and medium influence the adaptation process. Additional hours may be required for film/media screenings. Asian Studies 320 (Topic: Genji to Godzilla) and 320 (Topic 2) may not both be counted. Additional prerequisite: Upper-division standing.

### **ANS 321M. Politics in Japan.**

Same as Government 321M. Survey of postwar Japanese politics; the occupation, governmental institutions, interest groups, protest movements, industrial policy, the government-business relationship, and political and economic reform. Three lecture hours a week for one semester. Only one of the following may be counted: Asian Studies 321M, 361 (Topic: Politics in Japan), Government 321M. Prerequisite: Six semester hours of lower-division coursework in government.

### **ANS 322M. Politics in China.**

Same as Government 322M. Survey of twentieth-century China: historical trends; 1911 revolution; Warlord-Nationalist period; Communist revolution; post-1949 issues; new social and political institutions. Three lecture hours a week for one semester. Only one of the following may be counted: Asian Studies 322M, 361 (Topic: Politics in China), Government 322M. Prerequisite: Six semester hours of lower-division coursework in government.

### **ANS 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Asian Studies.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Asian Studies. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **ANS 338L. East Asian International Relations.**

Same as Government 338L. Survey of Russian/Soviet, Japanese, Chinese, and American foreign policies of the twentieth century, emphasizing Pacific-region interests; historical policies; intermittent conflicts, such as China versus Japan, Korean War, Indochina Wars; China's emergence as a nuclear power. Three lecture hours a week for one semester. Only one of the following may be counted: Asian Studies 338L, 361 (Topic: East Asian International Relations), Government 338L. Prerequisite: Upper-division standing and six semester hours of lower-division coursework in government.

### **ANS 340. Topics in Asian Religions.**

Topics in the religions and mythologies of the peoples of Asia. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

**Topic 4: History of Hindu Religious Traditions.** Same as Anthropology 324L (Topic 23: History of Hindu Religious Traditions), History 364G (Topic 1: History of Hindu Religious Traditions), and Religious Studies 321. History of major doctrines, practices, and institutions that shaped the development of Hinduism; how religions adapt to social and cultural change and often provide the catalyst for change. Prerequisite: Upper-division standing.

**Topic 5: History of Indian Buddhism.** Same as Religious Studies 322. The institutional, social, economic, and doctrinal history of Buddhism in India. Prerequisite: Upper-division standing or consent of instructor.

**Topic 6: Religion and Rebellion in Modern East Asia.** Same as Religious Studies 352 (Topic 3). ## **Department of Classics**

No knowledge of Greek or Latin is required for courses in classical civilization or in ancient history and classical civilization. These courses may not be counted toward fulfillment of any foreign language requirement.

Unless otherwise indicated, all Greek courses are ancient Greek (including New Testament Greek). Students beginning ancient Greek normally follow the regular sequence: Greek 506, 507, 311, and 312K. An intensive sequence is also available: Greek 804 and 412, normally followed by 311.

Students beginning Latin normally follow the regular sequence: Latin 506, 507, 311, and 312K or 316. Students may instead follow an accelerated sequence; information about this sequence is available from the undergraduate departmental adviser. Students with high school or transfer credit in Latin usually begin University coursework at a higher level. To ensure proper placement, students should consult the undergraduate adviser for the Department of Classics before registering.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

## **Department of French and Italian**

In all French civilization and Italian civilization courses, both lectures and readings are in English. In French 301, lectures are in English and readings are in French. All other courses are conducted primarily in the foreign language.

Students with knowledge of either language must take appropriate steps to determine at which level they may begin work at the University. Students with transfer credit for college work done at another institution may start at the next higher level here. All other students with knowledge of either language are required to take the placement test administered by the Center for Teaching and Learning for placement in French or the departmentally administered classification test for placement in Italian.

Students are urged to consult departmental advisers about any problem either with placement or with credit by examination.

Students who wish to continue their study of French or Italian may consult departmental advisers about appropriate upper-division courses and prerequisites.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

**GRG 325. Geography of Texas.**

Texas as an environmental and cultural borderland: as a transition zone between plains and mountains, humid and arid, South and West, Anglo-America and Latin America. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**GRG 326. Regions and Cultures of Europe.**

Same as European Studies 346 (Topic 19) and Russian, East European, and Eurasian Studies 345 (Topic 2). Spatial patterns in Europe, with emphasis on cultural, historical, and political geography. Only one of the following may be counted: European Studies 346 (Topic: Regions and Cultures of Europe), 346 (Topic 19), Geography 326, Russian, East European, and Eurasian Studies 345 (Topic 2). Prerequisite: Upper-division standing.

**GRG 327. Geography of the Former Soviet Union.**

Same as Russian, East European, and Eurasian Studies 345 (Topic 4: Geography of the Former Soviet Union). A systematic introduction to cultural, physical, political, and economic geography of the former Soviet Union. Focus on the fundamental transformation that the former Socialist Union Republics, now sovereign states, have undergone since 1991. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**GRG 328. Geography of the Middle East.**

Same as Middle Eastern Studies 341 (Topic 1: Geography of the Middle East). Major elements of physical and social environment in the region extending from Egypt to Afghanistan. Three lecture hours a week for one semester. Only one of the following may be counted: Geography 328, Middle Eastern Studies 322K (Topic 3: Geography of the Middle East), 341 (Topic 1). Prerequisite: Upper-division standing.

**GRG 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Geography.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Geography and the Environment. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

**GRG 331. Geography of Asia.**

Natural regions and cultural landscapes of Asia, excluding the former Soviet Union. Three lecture hours a week for one semester. Asian Studies 331 and Geography 331 may not both be counted. Prerequisite: Upper-division standing.

**GRG 331K. Nature, Society, and Adaptation.**

Same as Anthropology 324L (Topic 17: Cultural Ecology). Long term trajectories of change in human environment relationships, including issues of human evolution and human nature, violence, population, food, agriculture, urbanization, globalizing modernization, and environmental impacts; issues of sustainability, cultural survival, human rights, and environmental protection. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**GRG 333C. Severe and Unusual Weather.**

In-depth discussion of inclement weather phenomena (tornadoes, tropical cyclones, floods, drought) and their effects on human beings, as well as the climatology of those types of weather events. Three lecture hours

a week for one semester, with additional field hours to be arranged. Prerequisite: Geography 301K.

### **GRG 333K. Climate Change.**

Examines changes in climatic systems over both short and long time periods in relation to impacts on physical and ecological systems. Discusses past, present, and future changes in climatic conditions and the methods used to make those evaluations. Three lecture hours a week for one semester. Geography 333K and 356T (Topic: Climate Change) may not both be counted. Prerequisite: Upper-division standing and Geography 301C or 301K.

### **GRG 334. Conservation, Resources, and Technology.**

Analysis of the relationship between the human population and its resource base, with particular emphasis on current problems in environmental resource management. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **GRG 334C. Environmental Hazards.**

Earth science processes that affect human activities: soil, erosion, flooding, slope stability, earthquakes, volcanism, and water resources and quality. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **GRG 334K. Soils.**

Morphology, genesis, properties, and distribution of world soils. Factors of soil formation. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and six semester hours of coursework in physical geography or one or more of the geological or natural sciences, or the equivalent.

### **GRG 335C. Quaternary Landscapes.**

Changing physical and biotic landscapes on the Ice Age earth during the last two million years. Reconstruction of Quaternary geomorphic landscapes based on principles and applications of geochronology and paleoclimatology. Three lecture hours a week for one semester. Geography 335C and 385C may not both be counted. Prerequisite: Upper-division standing and Geography 301C.

### **GRG 335K. Mountain Geocology.**

Geological evolution of mountains. Physical geography of mountains: climates, soils, vegetation, landforms and geomorphic processes. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and six semester hours of coursework in physical geography or one or more of the geological or natural sciences.

### **GRG 335N. Landscape Ecology.**

The study of spatial patterns in the earth's biosphere found within landscapes, typically areas measured in square kilometers. Examines the processes that create those patterns, drawing from ecology, biogeography, and many other disciplines. Also explores the practical applications of landscape ecology to the study of natural environments and those managed or altered by human activities. Three lecture hours a week for one semester. Geography 335N and 356T (Topic: Landscape Ecology) may not both be counted. Prerequisite: Upper-division standing and three semester hours of coursework in physical geography or one of the geological or natural sciences.

### **GRG 336. Contemporary Cultural Geography.**

Same as Urban Studies 354 (Topic 8). Recent theoretical developments in cultural geography, with a focus on landscapes and the everyday practices that imbue them with meaning; the ways those meanings are contested and are the foci of struggle; and how the relationship between culture and space plays a central role in the social construction of identity. Three lecture hours a week for one semester. Only one of the

following may be counted: Geography 336, Urban Studies 354 (Topic: Contemporary Cultural Geography), 354 (Topic 8). Prerequisite: Upper-division standing.

### **GRG 336C. National Parks and Protected Areas.**

The history, purpose, and meaning of national parks (and preserves, refuges, and other publicly protected natural areas), from their inception at Yellowstone in 1872 to their present global distribution. Emphasis is on key management issues and dilemmas in the parks today; and the adoption and modification of Western notions of nature preservation within non-Western cultural settings. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **GRG 337. The Modern American City.**

Same as Architecture 350R (Topic 1: The Modern American City) and Urban Studies 352 (Topic 1: The Modern American City). Issues facing residents of United States cities, such as transportation and housing, poverty and crime, metropolitan finance, environmental and architectural design; historical/comparative urban evolution. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **GRG 338C. Rivers and Landscapes: Fluvial Geomorphology.**

Drainage basin evolution and channel adjustment, variability of river systems in differing geomorphic regimes, relationships between fluvial systems and other components of physical geography, and the role of humans as geomorphic agents. Three lecture hours a week for one semester, with additional field hours to be arranged. Prerequisite: Upper-division standing; and Geography 301C or Geological Sciences 401, or the equivalent.

### **GRG 339. Process Geomorphology.**

Analysis of geomorphic processes and their effects on landform development. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and credit or registration for Geography 301C or Geological Sciences 401.

### **GRG 339C. Principles of Environmental Conservation.**

Environmental conservation issues, focusing on the factors that control the production and consumption of environment-based resources. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **GRG 339K. Environment, Development, and Food Production.**

Assessment of various types of agriculture with regard to environmental factors and management techniques. Three lecture hours a week for one semester. Geography 339K and 390S may not both be counted. Prerequisite: Upper-division standing.

### **GRG 340D. Political Ecology of Globalization and Environmental Degradation.**

Study of current environmental problems from the perspective of political ecology, which critically examines political, economic, and social relations between humans and the natural world. Uses case studies from Africa, Latin America, Asia, and the Middle East to address climate change, deforestation, desertification, biodiversity, and environmental justice. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **GRG 341K. Landscapes of Mexico and Caribbean America.**

Same as Latin American Studies 330 (Topic 2: Landscapes of Mexico and Caribbean America). The natural regions and cultural landscapes of Mexico, Central America, and the West Indies. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **GRG 342C. Sustainable Development.**

Historical and contemporary analysis of international development with a focus on the prospects for environmental sustainability. Three lecture hours a week for one semester. Asian Studies 342C and Geography 342C may not both be counted. Prerequisite: Upper-division standing.

### **GRG 344K. Global Food, Farming, and Hunger.**

Examination of contemporary transformations in global agro-food systems, with emphasis on the current paradox of epidemic obesity in some parts of the world and enduring hunger in others. Three lecture hours a week for one semester. Geography 344K and 356T (Topic: Farming, Food, and Global Hunger) may not both be counted. Prerequisite: Upper-division standing.

### **GRG 346. The Human Use of the Earth.**

The state of the world from an ecological perspective. Case studies are drawn from a wide range of ecological settings and involve both traditional and modern societies. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **GRG 348C. Geography of South Asia.**

Same as Asian Studies 348C. Natural regions and cultural landscapes of South Asia. Agriculture, urban structure, issues of environment and development. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

### **GRG 350K. Geographies of Globalization.**

Examines the process of globalization by theoretically and empirically analyzing the rise of capitalism and industrial modernity, its evolution into a global system through methods such as colonization and free-trade imperialism, and its metamorphosis into the postmodern cultural, economic and political process known as globalization. Three lecture hours a week for one semester. Geography 350K and 356T (Topic: Introduction to Globalization) may not both be counted.

### **GRG 356. Topics in Environmental Geography.**

Topics include environmental assessment methods and techniques, the conservation movement, and climate and people. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

**Topic 1: Children's Environmental Health.** Contemporary issues in environmental health, with an emphasis on how modern environmental issues directly affect children. Focuses on the decision-making process and the larger concept of environmental ethics. Examines the relationship between humans and nature, and the concepts of sustainability, resilience, and global health. Geography 356 (Topic: Children's Environmental Health) and 356 (Topic 1) may not both be counted.

### **GRG 356C. Geo-Archaeology and Environmental History.**

Long-term ecology as reconstructed from settlement and land-use histories. Empirical case studies in environmental history from the Mediterranean region, the Near East, and Mesoamerica. Applications to degradation, desertification, sustainability, and global change. Three lecture hours a week for one semester. Only one of the following may be counted: Anthropology 382N, Geography 356C, 382K. Prerequisite: Upper-division standing.

### **GRG 356T. Topics in Geography.**

Three lecture hours a week for one semester. Some topics may require additional field trips; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

**Topic 1: The Culture of Cities.** Geography 356T (Topic 1) is same as American Studies 370 (Topic 13: The Culture of Cities) and Urban Studies 354 (Topic 4: The Culture of Cities). Examines the social, geographical, and cultural evolution of the United States from a rural and small-town society to an urban and suburban nation. Subjects may include the segregation of public and private space; the formation of urban subcultures organized by gender, work, race, religion, and sexuality; social and spatial divisions between rich and poor and native-born and immigrant; and the increasing importance of "cultural capital" in reshaping urban politics and in conflicts over revitalization and gentrification. Prerequisite: Upper-division standing.

**Topic 2: Memory and Place.** Geography 356T (Topic 2) is same as American Studies 370 (Topic 23: Memory and Place). Explores how cultural memory is produced in its various forms, from memorials, public art, and commodities to popular culture, rituals, and museums, and how public remembering is inevitably anchored in specific geographic places. Prerequisite: Upper-division standing.

**Topic 3: Geographical Information Systems and Remote Sensing for Archaeology and Paleontology.** Geography 356T (Topic 3) is same as Anthropology 324L (Topic 33: Geographical Information Systems and Remote Sensing for Archaeology and Paleontology). Designed to give students interested in the fields of archaeology, physical anthropology, and paleontology a foundation in the use of geographical information systems (GIS) and the analysis of remotely sensed data from satellites and aerial photographs. Prerequisite: Upper-division standing.

**Topic 4: Northern Lands and Cultures.** Same as European Studies 346 (Topic 9) and Russian, East European, and Eurasian Studies 345 (Topic 6). Develops geographical understanding of the Circumpolar region of the North, an ancient human habitat, home to distinct millennia-old civilizations. Only one of the following may be counted: European Studies 346 (Topic: Northern Lands and Cultures), 346 (Topic 9), Geography 356T (Topic: Northern Lands and Cultures), 356T (Topic 4), Russian, East European, and Eurasian Studies 345 (Topic: Northern Lands and Cultures), 345 (Topic 6). Additional prerequisite: Upper-division standing.

**Topic 5: Urban Publics.** The concept of the public in the city and how it has shifted over time along the lines of gender, ethnicity, race, and class. Examines contemporary struggles over defining the urban public and how those struggles are linked to social, cultural, political, and economic forces. Subjects include uses of public space, the public sphere, eminent domain, urban politics, civic engagement, and political participation. Only one of the following may be counted: Geography 356T (Topic: Urban Publics), 356T (Topic 5), Urban Studies 354 (Topic: Urban Publics). Prerequisite: Upper-division standing.

**Topic 6: The Environmental Change and Management of Large Rivers.** An interdisciplinary perspective on the physical processes of large rivers. Subjects include land degradation; deforestation; river engineering; flood processes; sedimentology; floodplains management; ecohydrology; Quaternary fluvial geomorphology; and paleohydrology. Only one of the following may be counted: Geography 356T (Topic: Environmental Change and Management of Large Rivers), 356T (Topic 6), Latin American Studies 330 (Topic: Environmental Change and Management of Large Rivers). Prerequisite: Upper-division standing.

**Topic 7: The Geography Of Media.** Explores the media from a geographical perspective. Geography 356T (Topic: Geography of Media) and 356T (Topic 7) may not both be counted. Prerequisite: Upper-division standing.

### **GRG 357. Medical Geography.**

The geographic distribution, expansion, and contraction of the infectious diseases that have the greatest influence in shaping human societies today: malaria, AIDS, and others. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**GRG 358. Cities in Developing Countries.**

Comparative analysis of demographic, social, economic, and political features of cities in Latin America, the Middle East, Asia, and Africa; emphasis on regional imbalance, migration, occupational and social stratification, housing the poor, and suburbanization. Possibilities for individual research. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**GRG 358E. Geography and Religion.**

Same as Humanities 350 (Topic 3: Geography and Religion). Ideas about the relationships among the natural world, myth, and ritual; principal focus on Christianity, Islam, and Judaism and their offshoots and antagonists in the Western world. Three lecture hours a week for one semester. Only one of the following may be counted: Geography 358E, Humanities 350 (Topic 3), Middle Eastern Studies 322K (Topic 15: Geography and Religion). Prerequisite: Upper-division standing.

**GRG 460C. The Geographer's Craft.**

A comprehensive introductory survey of research techniques used in contemporary geography. The course uses the problem-solving approach to teach technical skills and concepts drawn from cartography, remote sensing, geographical information systems, spatial statistics, and maps and map interpretation. Three lecture hours and one and one-half laboratory hours a week for one semester.

**GRG 360G. Environmental Geographic Information Systems.**

An introduction to the creation and use of geographic information systems. Three lecture hours and two discussion hours a week for one semester. Prerequisite: Geography 310C.

**GRG 360L. Spatial Analysis.**

Application of statistical techniques to spatial problems: research and experimental design, hypothesis testing and sampling, with reference to spatial patterns and areal associations. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**GRG 462K. Introduction to Remote Sensing of the Environment.**

The use of electromagnetic energy to sense objects in the natural environment; interpretation and recognition of patterns detected by sensors. Three lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Upper-division standing.

**GRG 464K. Advanced Remote Sensing and Pattern Analysis.**

Advanced classification techniques for satellite image processing and landscape pattern analysis. Three lecture hours and one and one-half discussion hours a week for one semester. Geography 356 (Topic: Advanced Remote Sensing and Pattern Analysis) and 464K may not both be counted. Prerequisite: Upper-division standing, and Geography 462K or the equivalent or consent of instructor.

**GRG 366C. Comparative Ecosystems.**

The important ecosystem processes that affect the distributions, characteristics, and management of natural environments at landscape, regional, and continental scales. Ecosystem functions, including nutrient cycling, water balance, and the role of natural disturbances in a wide range of ecosystems, from the tundra to the rain forests and grasslands of the tropics. Three lecture hours a week for one semester. Geography 356T (Topic: Comparative Ecosystems) and 366C may not both be counted. Prerequisite: Upper-division standing and three semester hours of coursework in physical geography or one of the geological or natural sciences.

**GRG 366K. Biogeography.**

Contemporary patterns of plant and animal distribution, and the environmental and historical processes affecting them. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and three semester hours of coursework in physical geography or one of the geological or natural sciences.

**GRG 367K. Vegetation Ecology.**

Plant autecology and synecology. Ecological factors and processes of plant communities. Vegetation geology, succession, and dynamics. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and six semester hours of coursework in physical geography or one or more of the geological or natural sciences.

**GRG 368C. Spatial Analysis and Geographic Information Systems.**

Addresses spatial problem solving by focusing on both the theoretical/conceptual and practical aspects of geographic information systems modeling. Describes geographic information systems techniques and spatial statistics used to quantify and measure spatial patterns. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and credit or registration for Geography 360G.

**GRG 470C. Advanced Geographic Information Systems.**

Study of methods of spatial analysis, design and implementation of a geographic information system, vector and raster modeling, and advanced applications of geographic information systems. Three lecture hours and one and one-half laboratory hours a week for one semester. Prerequisite: Geography 360G and consent of instructor.

**GRG 373F. Field Techniques.**

Introduction to the collection and mapping of environmental and cultural data, involving both classroom lectures and outdoor exercises. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, a major in geography, and consent of instructor.

**GRG 373K. Field Methods for Landscape Characterization.**

The design of research questions and the acquisition of data for the characterization of landscapes. Utilizes geographical and ecological field-based methods. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and Geography 301C or the equivalent.

**GRG 374. Frontiers in Geography.**

Restricted to geography majors and students seeking a secondary school teaching certificate with geography as the second teaching field. Current concerns and methodology in the field of geography; an introduction to theory and research in geography. The equivalent of three lecture hours a week for one semester, with one field trip to be arranged. Prerequisite: Upper-division standing and consent of the undergraduate adviser.

**GRG 476T. Topics in Geography.**

Three lecture hours and one and one-half laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing.

**GRG 679H. Honors Tutorial Course.**

For honors candidates in geography. Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis. Regular conferences with the faculty supervisor are also required. Conference course for two semesters. Prerequisite: For 679HA, admission to the Geography Honors Program no later than two semesters before expected graduation; for 679HB, Geography 679HA. A University grade point average of at least 3.00 and a grade point average

in geography of at least 3.50 are required for admission to the Geography Honors Program.

### **GRG 379K. Conference Course.**

Supervised individual study of selected problems in geography. Conference course. May be repeated for credit. Prerequisite: Six semester hours of upper-division coursework in one or more of the social, geological, or natural sciences; and consent of instructor.

### **GRG 379L. Practicum: Internships in Applied Geography.**

Research and staff experience working in an appropriate government agency or private business. At least six but no more than nine hours of work a week for one semester. Prerequisite: Completion of at least seventy semester hours of coursework, including twelve semester hours of geography, and consent of the undergraduate adviser.

## **Urban Studies: URB**

### **Lower-Division Courses**

#### **URB 301. Introduction to Urban Studies.**

Same as Geography 307C. A multidisciplinary study of cities and complex urban environments; historical and contemporary issues from both national and international perspectives. Three lecture hours a week for one semester.

#### **URB 305. Introductory Topics in Urban Studies.**

An introduction to urban studies within the framework of different disciplines. Topics include urban history, urban education, politics and governance, economics, design and planning, and society and culture. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

#### **URB 315. Urban Studies Research Methods.**

An introduction to urban studies research methodologies. Includes sources of urban data, the use of the library in urban research, formulating research questions, research design, methods commonly used in urban research, the use of computers to store and manipulate quantitative urban data, and an introduction to data analysis and theoretical and practical applications of urban research. Three lecture hours a week for one semester. Prerequisite: Mathematics 408C or 408K with a grade of at least C-; Mathematics 316 or Statistics and Scientific Computation 305 with a grade of at least C-; and Urban Studies 301.

### **Upper-Division Courses**

#### **URB 325. Special Topics in Urban Studies.**

Three lecture hours a week for one semester. Additional hours may be required for some topics; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

#### **URB 350. Topics in Urban Politics and Governance.**

The basic political and administrative structures of cities and metropolitan regions, including problems associated with local and regional government. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

**Topic 1: Urban Politics.** Same as Government 370L (Topic 11: Urban Politics). Prerequisite: Six semester hours of lower-division coursework in government.

#### **URB 351. Topics in Urban Economics.**

Urban economics and the application of economic analysis to urban concerns, including economic development, urbanization, urban form,

public finance, and competition. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

#### **Topic 1: Development Problems and Policies in Latin America.**

Same as Economics 355 and Latin American Studies 355 (Topic 1: Development Problems and Policies in Latin America). Description of the Latin American economy; business and market organization; problem of growth (involving credit, public finance, trade, investment aspects). Prerequisite: Economics 304K and 304L with a grade of at least C- in each.

**Topic 2: Urban Economics.** Same as Economics 334K. Economic analysis of urban areas; emphasis on the nature of current urban problems--slums, transportation, finance--and an evaluation of current policy. Prerequisite: Economics 420K with a grade of at least C-.

**Topic 3: Regional Economics.** Same as Economics 334L. Spatial aspects of economics, including concepts, theories, and policy applications. Prerequisite: Economics 420K with a grade of at least C-.

**Topic 4: Development Economics.** Same as Economics 333K. Introduction to theories of economic development; discussion of leading issues. Three lecture hours a week for one semester. Only one of the following may be counted: Economics 333K, Urban Studies 351 (Topic: Development Economics), 351 (Topic 4). Additional prerequisite: Economics 420K with a grade of at least C-.

**Topic 5: Introduction to Real Estate and Urban Land Development.** Same as Real Estate 358. Restricted to students in a McCombs School of Business major. An examination of the principles of real estate and urban land economics. Topics include investment, valuation, financing, and public policy in real estate and mortgage markets. Three lecture hours a week for one semester. Only one of the following may be counted: Real Estate 358, Urban Studies 351 (Topic: Introduction to Real Estate and Urban Land Development), 351 (Topic 5). Additional prerequisite: Credit or registration for Finance 357 or 357H.

#### **URB 352. Topics in Urban Design and Planning.**

Issues concerning the built environment and urban infrastructure, environmental sustainability, and the public policy framework designed to manage the challenges presented by these issues. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

**Topic 1: The Modern American City.** Same as Architecture 350R (Topic 1: The Modern American City) and Geography 337. Issues facing residents of United States cities, such as transportation and housing, poverty and crime, metropolitan finance, environmental and architectural design; historical/comparative urban evolution. Prerequisite: Upper-division standing.

**Topic 2: American Dream: Status Quo and Alternatives.** Same as Architecture 350R (Topic 2: American Dream: Status Quo and Alternatives).

**Topic 3: Urban Design Practice.** Same as Architecture 350R (Topic 3: Urban Design Practice).

**Topic 4: Economy/Value/Quality of Life.** Same as Architecture 350R (Topic 4: Economy/Value/Quality of Life).

**Topic 5: Modernism in American Design and Architecture.** Same as American Studies 330 and Art History 339Q. A historical survey of artifacts, buildings, and urban environments, focusing on responses to machine-age civilization. Additional prerequisite: Upper-division standing.

**Topic 6: Principles of Physical Planning.** Same as Community and Regional Planning 369K. Introductory course in the physical dimension of urban planning. Three lecture hours a week for one semester. Only one of the following may be counted: Community and Regional Planning 369K, Urban Studies 352 (Topic: Principles of Physical Planning), 352 (Topic 6). Additional prerequisite: For students in the

School of Architecture: Architecture 560R with a grade of at least C; for others, consent of instructor.

### **URB 353. Topics in Urban History.**

The historical evolution of cities, contemporary urban development trends, and the links between social development and physical form. Three lecture hours a week for one semester. Some topics partially fulfill legislative requirement for American history. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

**Topic 1: African American History since 1860.** Same as American Studies 321F, African and African Diaspora Studies 357D, and History 357D. Survey of the history of African Americans in the United States from 1860 to the present: Emancipation, Reconstruction politics, migration and urbanization, and the evolution of African American culture; kinds of sources and methods valuable for analyzing African American life and culture. Only one of the following may be counted: African and African Diaspora Studies 357D, American Studies 321 (Topic: African American History since 1860), 321F, History 357D, Urban Studies 353 (Topic 1). Partially fulfills legislative requirement for American history. Prerequisite: Upper-division standing.

**Topic 2: Texas, 1914 to the Present.** Same as History 320R and Mexican American Studies 374 (Topic 16: Texas, 1914 to the Present). The steady dissociation of Texas from its Old South status to a transitional state and a power in national politics. Three semester hours of Texas history may be substituted for half of the legislative requirement for American history. Prerequisite: Upper-division standing.

**Topic 5: Environmental History of North America.** Same as American Studies 329 and History 350R (Topic 7: Environmental History of North America). The history of humanity's influence on the plants, animals, microlife, soils, water, and air of North America, and vice versa, from the arrival of the proto-Indians to the contemporary environmental crisis. Only one of the following may be counted: American Studies 329, History 350L (Topic 4: Environmental History of North America), 350R (Topic 7), Urban Studies 353 (Topic 5). Partially fulfills legislative requirement for American history. Prerequisite: Upper-division standing and six semester hours of coursework in history.

### **URB 354. Topics in Urban Society and Culture.**

Topics on the social and cultural diversity within cities; social policies; and the sociocultural impact of the media and other institutions on urban development. Three lecture hours a week for one semester. Some topics partially fulfill legislative requirement for American history. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

**Topic 2: Society of Modern Mexico.** Same as Latin American Studies 325 (Topic 1: Society of Modern Mexico) and Sociology 335. Family, community, industrialization, and urbanization in modern Mexico.

**Topic 4: The Culture of Cities.** Same as American Studies 370 (Topic 13: The Culture of Cities) and Geography 356T (Topic 1: The Culture of Cities). Examines the social, geographical, and cultural evolution of the United States from a rural and small-town society to an urban and suburban nation. Subjects may include the segregation of public and private space; the formation of urban subcultures organized by gender, work, race, religion, and sexuality; social and spatial divisions between rich and poor and native-born and immigrant; and the increasing importance of "cultural capital" in reshaping urban politics and in conflicts over revitalization and gentrification. Prerequisite: Upper-division standing.

**Topic 7: Vienna: Memory and the City.** Same as American Studies 370 (Topic 41: Vienna: Memory and the City), European Studies 346 (Topic 5: Vienna: Memory and the City), and History 362G (Topic 2: Vienna: Memory and the City). Examines the ways in which cultural

memory has shaped, and continues to shape, urban life in Vienna, Austria. ## **Department of Germanic Studies**

Students with knowledge of German must take a placement test before registering for a German course. Students with transfer credit are strongly encouraged to take a placement test. The lower-division placement test consists of the SAT Subject Test in German with a listening component,

with additional questions from the Department of Germanic Studies. The student may earn credit through this examination for any German language course currently offered; the examination also helps the student and the adviser determine with which course the student should begin the study of German at the University. Credit for German 328, and 330C or 331L, may also be earned by special examination. Information about these tests is available from the departmental undergraduate adviser and from the Center for Teaching and Learning, 2616 Wichita.

A student with no knowledge of German may take any beginning German language course. Graduate students preparing for the doctoral reading examination may take German 301.

Before enrolling for the first time in any other language offered in the Department of Germanic Studies, all students with knowledge of that language, however acquired, must be tested to determine the course for which they should register. Information about placement tests is available from the departmental undergraduate adviser.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

**Topic 26: Latin American Literature and Film.** Same as Spanish 350K (Topic 4: Latin American Literature and Film). Studies, in a broad sense, the connections between Latin American cinema and literature, through extensive readings and in-class movie exhibitions. A number of renowned literary works by Latin American authors and their film versions will be analyzed with a comparative approach. Only one of the following may be counted: Latin American Studies 370S (Topic 26), Spanish 350 (Topic: Latin American Literature and Film), 350K

(Topic 4), 352 (Topic: Literature and Cinema in Spanish America). Prerequisite: Spanish 325K, 325L, 326K, or 326L.

**Topic 27: Introduction to Literatures and Cultures.** Same as Spanish 328C. Overview of Iberian and/or Latin American literatures and cultures, including the arts and popular expressions, from a multidisciplinary perspective. Among the regions studied are Spain; North, Central, and South America; the Caribbean; and related areas in Africa. Three lecture hours a week for one semester. Only one of the following may be counted: Latin American Studies 370S (Topic 27), Spanish 328, 328C. Only one of the following may be counted: Latin American Studies 370S (Topic 3), 370S (Topic 27), Spanish 322K, 328C. Additional prerequisite: Spanish 611D, 612, or 312L.

**Topic 28: Mediascapes: Literature and Media in the Caribbean.** Same as Spanish 350K (Topic 5). Analyzes the relationship between literature and media technologies in contemporary Caribbean cultures. Examination of the notion and uses of Caribbean mediascapes; in other words, the uses of media technologies derived from film, television, the internet and YouTube, and the ways they are used and read in the Spanish Caribbean. Only one of the following may be counted: Latin American Studies 328 (Topic 5), 370S (Topic 28), Spanish 350K (Topic 5), Spanish Civilization 320C (Topic 2).

**Topic 29: Indigenous Voices: From Nezahualcoyotl to Radio.** Same as Spanish 350K (Topic 6). Examines how Indigenous writers, intellectuals, and cultural producers have creatively established their own voices through writing and other forms of media. Only one of the following may be counted: Latin American Studies 370S (Topic: Indigenous Voices), 370S (Topic 29), Spanish 350 (Topic: Indigenous Voices), 350K (Topic 6).

**Topic 30: Fantastic Fiction from Latin America.** Same as Spanish 355 (Topic 1). Analysis of short stories by Latin American writers that in some way represent an alternative to realism. Latin American Studies (Topic 30) and Spanish 355 (Topic 1) may not both be counted.

**Topic 31: Nonfiction Narratives from Latin America.** Same as Spanish 355 (Topic 2). Study of nonfiction works written in contemporary Latin America as experimental narrative forms that offer insight about current political, social, and economic problems of the region. Examination of these realities through readings and careful analysis of the works of popular nonfiction Latin American writers.

**Topic 32: Jewish Voices from Latin America.** Same as Spanish 355 (Topic 3). Overview of popular Jewish writers from Brazil and Spanish America, with special emphasis on those who portray in their work the situation of the Jewish communities of their respective cities and countries. Only one of the following may be counted: Jewish Studies 363 (Topic: Latin American Jewish Writers), 363 (Topic 15), Latin American Studies 328 (Topic 4), 370S (Topic: Latin American Jewish Writers), 370S (Topic 32), Spanish 352 (Topic: Latin American Jewish Writers), 355 (Topic 3), Spanish Civilization 320C (Topic 1).

**Topic 33: Sex and Sexuality in Latin America.** Same as Spanish 355 (Topic 4). Examines different representations of sex, sexuality, and eroticism in the various cultures of Latin America. These concepts do not refer to explicit or provocative texts or images in books, films, or photographs alone. On the contrary, they include a vast gamut of life, love, pain, and social conflict. Only one of the following may be counted: Latin American Studies 370S (Topic: Sexo/Sexualidad en Latinoamerica), 370S (Topic 33), Spanish 352 (Topic: Sexo/Sexualidad en Latinoamerica), 355 (Topic 4).

**Topic 34: Revolutionary Imagination in Latin American Cultures.** Same as Spanish 355 (Topic 5). Explores literary expressions in Latin America that reflect a dissident or transgressive imaginary published during the revolutionary period (1960-1990). Examination of how different sociohistorical experiences require new narrative forms, and innovative ways of exploring and codifying collective community identities. Only one of the following may be counted: Latin American Studies 370S (Topic: Revolutionary Imagination in Latin American

Literature), 370S (Topic 34), Spanish 352 (Topic: Revolutionary Imagination in Latin American Literature), 355 (Topic 5).

**Topic 36: East/West/New World Encounters.** Same as Spanish 355 (Topic 7). Survey of works mostly in the Latin American and Hispanic literary tradition in which images or themes related to the East (Asia, Eastern Africa, the Middle East) are developed. Only one of the following may be counted: Latin American Studies 370S (Topic: Visions of the East in Latin American Writing), 370S (Topic 36), Spanish 352 (Topic: Visions of the East in Latin American Writing), 355 (Topic 7).

**Topic 37: Memory and Writing in Caribbean Culture.** Same as Spanish 355 (Topic 8). Studies literary works from the greater Caribbean basin (with a focus on Cuba and Puerto Rico) in which the act of remembering is emphatically dramatized and described. Only one of the following may be counted: Latin American Studies 370S (Topic: Writing and Memory in Caribbean Literature), 370S (Topic 37), Spanish 355 (Topic 8), 375 (Topic: Writing and Memory in Caribbean Literature).

**Topic 38: Literary Figurations in the Multimedia Age.** Same as Spanish 355 (Topic 9). Focuses on the figurations of sounds and images in literary language in the context of the multimedia environment of modern and contemporary Latin America. Only one of the following may be counted: Latin American Studies 370S (Topic: Literary Figurations in the Multimedia Age), 370S (Topic 38), Spanish 352 (Topic: Literary Figurations in the Multimedia Age), 355 (Topic 9).

**Topic 41: Contemporary Mesoamerican Indigenous Literatures.** Same as Spanish 356 (Topic 3). Examines the early Mesoamerican mythological narrative, Popol Wuj, as well as twentieth-century Central American texts. Explores ethnicity, class, gender, and traditional cultures as main factors in regional negotiations of identity constructions. Only one of the following may be counted: Latin American Studies 370S (Topic: Contemporary Indigenous Literature), 370S (Topic 41), Spanish 352 (Topic: Contemporary Indigenous Literature), 356 (Topic 3).

**Topic 42: African Diasporas.** Same as Spanish 358 (Topic 1). Analysis of the sociocultural contexts of the African diaspora in the Americas with particular focus on the Caribbean and Brazil. Focuses on the contributions of the African diasporic populations and the stylistic strategies through which they constructed their social, political, and cultural agency. Only one of the following may be counted: Latin American Studies 370S (Topic: African Diaspora in Latin America and the Caribbean), 370S (Topic 42), Spanish 358 (Topic 1), 375 (Topic: African Diaspora in Latin America and the Caribbean).

**Topic 43: United States Latino Literatures and Cultures in Context.** Same as Spanish 359. Examines the United States Latino literary and cultural production from multidisciplinary perspectives, such as literature, film, music, and performance. Analysis of the literatures and experiences of United States Latino writers and artists in their historical and cultural specificities. Three lecture hours a week for one semester. Latin American Studies 370S (Topic 43) and Spanish 359 may not both be counted. Additional prerequisite: Spanish 327C (or 327G), and one of the following: 328C, 330L, or Spanish Civilization 320C.

### **LAS 378. Capstone Course in Latin American Studies.**

Three lecture hours a week for one semester Prerequisite: Upper-division standing.

### **LAS 379. Conference Course in Latin American Studies.**

Supervised individual study of selected problems in Latin American studies. Conference course. May be repeated for credit. Prerequisite: Upper-division standing and consent of instructor and the undergraduate adviser in Latin American studies.

### **LAS 679H. Honors Tutorial Course.**

For honors candidates in Latin American studies. Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis. Conference course for two semesters. Prerequisite: For Latin American Studies 679HA, Latin American Studies 359H, admission to the Latin American Studies Honors Program, and written consent of the Latin American Studies Honors Program adviser; for 679HB, Latin American Studies 679HA.

### **American Sign Language: ASL**

#### **Lower-Division Courses**

#### **ASL 601C. Accelerated First-Year American Sign Language.**

Introduction to American Sign Language and its vocabulary and sentence structure. A six-hour course comparable to American Sign Language 506 and 507. Six lecture hours a week for one semester. Only one of the following may be counted: American Sign Language 601C, 601D, 506. American Sign Language 601C and 507 may not both be counted. Offered on the letter-grade basis only.

#### **ASL 601D. American Sign Language I: Beginning.**

This course focuses on the development of beginner-level comprehension and production skills in American Sign Language. Students learn how to attend to visual language and use their hands and body for producing ASL constructions. Elementary vocabulary and grammar is covered, along with information about Deaf culture. Six lecture hours a week for one semester. Only one of the following may be counted: American Sign Language 601C, 601D, 506. American Sign Language 601D and 507 may not both be counted. Offered on the letter-grade basis only.

#### **ASL 506 (TCCN: SGNL 1501). First-Year American Sign Language I.**

Introduction to American Sign Language. Five lecture hours a week for one semester. Only one of the following may be counted: American Sign Language 601C, 601D, 506. Offered on the letter-grade basis only.

#### **ASL 507 (TCCN: SGNL 1502). First-Year American Sign Language II.**

American Sign Language vocabulary and basic sentence structure. Five lecture hours a week for one semester. Only one of the following may be counted: American Sign Language 601C, 601D, 507. Offered on the letter-grade basis only. Prerequisite: American Sign Language 506 with a grade of at least C.

#### **ASL 610D. American Sign Language II: Beginning.**

Focuses on the development of intermediate-level proficiency in ASL. An introduction to more complex grammatical constructions with the goal of engaging in conversations in ASL on a variety of topics. Examines the historical aspects of the Deaf community and related themes. Six lecture hours a week for one semester. Only one of the following may be counted: American Sign Language 610D, 611C, 312K. American Sign Language 507 and 610D may not both be counted. Offered on the letter-grade basis only. Prerequisite: American Sign Language 601D or 507 with a grade of at least C.

### **ASL 611C. Accelerated Second-Year American Sign Language.**

Focuses on developing conversational skills in American Sign Language and introduces American Sign Language literature and folklore. Six lecture hours a week for one semester. Only one of the following may be counted: American Sign Language 611C, 311D, 312K. American Sign Language 611C and 312L may not both be counted. Offered on the letter-grade basis only. Prerequisite: American Sign Language 601C, 507, or 610D with a grade of at least C.

### **ASL 311D. American Sign Language III: Intermediate.**

Focuses on maintaining and building upon a student's intermediate ASL skills. Grammar coverage includes complex constructions that involve the signing space, and vocabulary building includes comparisons between English words and ASL signs in order for the learner to make appropriate vocabulary choices in their ASL production. Complex questions facing the contemporary Deaf community are discussed. Three lecture hours a week for one semester. American Sign Language 311D and 312L may not both be counted. American Sign Language 611C and 311D may not both be counted. Offered on the letter-grade basis only. Prerequisite: American Sign Language 601C, 610D, or 312K with a grade of at least C.

### **ASL 312K (TCN: SGNL 2301). Second-Year American Sign Language I.**

Development of conversational skills in American Sign Language. Three lecture hours a week for one semester. American Sign Language 611C and 312K may not both be counted. American Sign Language 610D and 312K may not both be counted. Offered on the letter-grade basis only. Prerequisite: American Sign Language 601C or 507 with a grade of at least C.

### **ASL 312L (TCN: SGNL 2302). Second-Year American Sign Language II.**

Further development of conversational skills in American Sign Language; introduction to American Sign Language literature and folklore. Three lecture hours a week for one semester. American Sign Language 611C and 312L may not both be counted. American Sign Language 311D and 312L may not both be counted. Offered on the letter-grade basis only. Prerequisite: American Sign Language 312K with a grade of at least C.

## **Upper-Division Courses**

### **ASL 320. Advanced American Sign Language Conversation.**

Advanced development of conversational skills in American Sign Language, with a focus on sophisticated linguistic structures and important issues in deaf studies. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: American Sign Language 611C or 312L with a grade of at least C-.

### **ASL 326. Sign Languages and Signing Communities.**

Same as Linguistics 350 (Topic 3: Sign Languages and Signing Communities). Examines the grammar of signed languages, their use in signing communities, and the acquisition of signed languages as first languages. No knowledge of American Sign Language is required. Three lecture hours a week for one semester. May not be counted toward fulfillment of the foreign language requirement for any bachelor's degree. Prerequisite: Upper-division standing.

### **ASL 336. Introduction to Sign Interpreting.**

Introduction to sign interpreting from American Sign Language into English and from English into American Sign Language. Topics include the ethics of interpreting and the problems that arise in interpreting in different social and professional situations. Three lecture hours a week for one semester. Prerequisite: American Sign Language 611C, or credit or registration for American Sign Language 312L.

### **ASL 350. Topics in American Sign Language, Deaf Studies, and Interpreting.**

Three lecture hours a week for one semester. Additional hours may be required for some topics; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

**Topic 1: American Sign Language Literature.** Examines American Sign Language literature; includes narratives, language games, and poetry. Three lecture hours a week for one semester. American Sign Language 350 (Topic: American Sign Language Literature) and 350 (Topic 1) may not both be counted. Additional prerequisite: American Sign Language 610D with a grade of at least C, or credit or registration in American Sign Language 311D or 312L.

### **ASL 357. Undergraduate Research.**

Supervised research experience. Individual instruction. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Upper-division standing and American Sign Language 506 with a grade of at least C-.

## **Linguistics: LIN**

### **Lower-Division Courses**

#### **LIN 306. Introduction to the Study of Language.**

Survey of major areas of linguistics: sound systems, grammatical structures, historical development of languages, language families and linguistic universals, dialect differences and their social significance. Three lecture hours a week for one semester.

#### **LIN 312. Interdisciplinary Approaches to Language.**

An interdisciplinary and multidisciplinary introduction to the manifold aspects of language. Three lecture hours a week for one semester. May be repeated for credit when the topics vary.

#### **LIN 312C. Culture and Communication.**

Same as Anthropology 307. An introduction to the study of culture through communication and the theory of signs. Three lecture hours or two lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Anthropology 307, Linguistics 312 (Topic: Culture and Communication), 312C.

#### **LIN 312D. Languages around the World.**

Explores the language families of the world. Considers such questions as: what does it mean for languages to be related, and how do we know that they are related in the first place; why are there only a handful of language families in Europe and Africa while there are scores in South America and New Guinea; What can we say about where a language or language family may have originated; and how much living history is being lost as languages become endangered or extinct when people stop speaking them? Three lecture hours a week for one semester. Linguistics 312 (Topic: Languages Around the World) and 312D may not both be counted.

#### **LIN 312E. Language of Sign and Gesture.**

Explores how language, a faculty that arises in the brain, is expressed by the body, both for spoken languages (via the vocal tract) and for signed languages (via the hands and face). Also includes an examination of how language, a special cognitive faculty unique to humans, intersects and overlaps with other communication systems, with a focus on gesture, the nonlinguistic communicative systems used by humans and some nonhuman species. Three lecture hours a week for one semester. Linguistics 312 (Topic: Language in the Body) and 312E may not both be counted.

### **LIN 313. Language and Computers.**

Natural language processing, including spam filtering, dialogue systems, spelling and grammar correction, forensic linguistics, cryptography, and machine translation. Studies how these systems function, the difficulties in implementing them, and implications of such technologies for society. Three lecture hours a week for one semester. Linguistics 312 (Topic: Language and Computers) and 313 may not both be counted.

### **LIN 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Linguistics.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **LIN 321L. American English.**

Same as English 321L. An overview of the historical development of English in the Americas. Attention to regional, social, and ethnic differences, and their implications for public education. Three lecture hours a week for one semester. Prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

### **LIN 322. Gypsy Language and Culture.**

Linguistic introduction to Romani; relationship to languages of India; history from 280 BC; modern dialects and international standard language; history and culture as reflected in the language. Three lecture hours a week for one semester. Only one of the following may be counted: Asian Studies 372 (Topic 13: Gypsy Language and Culture); Linguistics 322; Russian, East European, and Eurasian Studies 325 (Topic 1: Gypsy Language and Culture).

### **LIN 323L. English as a World Language.**

Same as English 323L. An account of the spread of English around the world; national, social, and regional varieties. Three lecture hours a week for one semester. Prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

### **LIN 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Linguistics.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Linguistics. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **LIN 344K. Phonetics: The Production and Perception of Speech Sounds.**

Articulation and transcription of speech sounds; distinctive feature systems; physiological and acoustical aspects of phonetics; common phonological processes. Three lecture hours a week for one semester.

### **LIN 345. Language Change and Language Variation.**

Three lecture hours a week for one semester. Prerequisite: Linguistics 344K.

### **LIN 350. Special Topics in the Study of Language.**

Nontechnical examination of social, educational, and political problems to which current linguistic knowledge is relevant. Three lecture hours a

week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

**Topic 1: Language and the Brain.** Same as Communication Sciences and Disorders 350. Prerequisite: Upper-division standing.

**Topic 2: Language and Thought.** Study of the relation between language and thought, using a cognitive science approach. Examines the words people use and how people think; whether language structure affects thought; and some cognitive aspects of language. Prerequisite: Upper-division standing.

**Topic 3: Sign Languages and Signing Communities.** Same as American Sign Language 326. Examines the grammar of signed languages, their use in signing communities, and the acquisition of signed languages as first languages. No knowledge of American Sign Language is required. May not be counted toward fulfillment of the foreign language requirement for any bachelor's degree. Prerequisite: Upper-division standing.

**Topic 4: Language and People.** Areas in language and linguistics that most directly impact people, such as language and ethnicity, language and nation-building, and language politics. Prerequisite: Upper-division standing.

**Topic 5: Bilingual Language Acquisition.** Examines various aspects of bilingual first language acquisition including phonology, morphology, and syntax, as well as the child's use of his/her languages. Prerequisite: Upper-division standing.

**Topic 6: Indigenous Languages of the Americas.** Same as Latin American Studies 322 (Topic 15: Indigenous Languages of the Americas). Examines various aspects of languages in the Americas, including their linguistic structures, the cultural domains in which they exist, and their histories of language contact and change. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

**Topic 9: Psycholinguistics.** Examines the psychological mechanisms that people use in learning, comprehending, and producing language. Prerequisite: Upper-division standing.

**Topic 10: How to Describe a Language.** Practical introduction to language documentation and preservation. Subjects include language diversity and practical methods for describing, documenting, and preserving languages, with an emphasis on the phonological and morphological analysis of restricted data sets, as well as the role of linguists in conjunction with communities of speakers who wish to document or revitalize their languages. Three lecture hours a week for one semester. Linguistics 350 (Topic: How to Describe a Language) and 350 (Topic 10) may not both be counted. Additional prerequisite: Upper-division standing.

**Topic 11: Speech Intelligibility.** An overview of the main empirical findings on talker-, listener-, and signal-related factors that shape speech intelligibility, the degree to which spoken language can be comprehended. Explores how signal-related (physical), peripheral (auditory-perceptual), and system-related (mental) factors condition variation in both the production and perception of intelligible speech. Also examines how variation in intelligibility conditions different levels of spoken language processing and different tasks that the listener is performing during spoken language comprehension. Three lecture hours a week for one semester. Linguistics 350 (Topic: Speech Intelligibility) and 350 (Topic 11) may not both be counted. Additional prerequisite: Linguistics 344K, 358S, or consent of instructor.

**Topic 12: Analyzing Text Data: A Statistics Toolkit for Linguists.** Introduction to statistical concepts and analyses via language problems and linguistic data sets. Three lecture hours a week for one semester. Linguistics 350 (Topic: Words in a Haystack) and 350 (Topic 12) may not both be counted. Additional prerequisite: Upper-division standing.

### **LIN 353C. Introduction to Computational Linguistics.**

Introduction to key representations and algorithms used in computational linguistics and the main natural language processing applications.

Three lecture hours a week for one semester. Linguistics 350 (Topic: Introduction to Computational Linguistics) and 353C may not both be counted.

### **LIN 353N. Natural Language Processing.**

Introduces theoretical and applied topics relating to natural language processing, including machine translation, search, automatic summarization, and dialog systems. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 378 (Topic: Natural Language Processing), Linguistics 350 (Topic: Natural Language Processing), 353N.

### **LIN 357. Undergraduate Research.**

Supervised research experience. Individual instruction. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Upper-division standing and Linguistics 306 with a grade of at least C-.

### **LIN 358Q. Supervised Research.**

Supervised student-initiated research. Individual instruction. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Upper-division standing and Linguistics 306 with a grade of at least C-.

### **LIN 358S. Fundamentals of Speech Science.**

Same as Communication Sciences and Disorders 358S. Neurophysiological mechanisms underlying the encoding and decoding of speech. Three lecture hours a week for one semester. Only one of the following may be counted: Communication Sciences and Disorders 358S, 396N, Linguistics 358S. Prerequisite: Upper-division standing and a University grade point average of at least 2.25; for Communication Sciences and Disorders majors, Communication Sciences and Disorders 313L and 358 with a grade of at least C in each.

### **LIN 360K. Introduction to English Grammar.**

Introduction to the study of the syntactic structure of modern English from the viewpoint of generative grammar. Three lecture hours a week for one semester. English 360K and Linguistics 360K may not both be counted. Prerequisite: Upper-division standing.

### **LIN 364M. History of the English Language.**

Same as English 364M. Development of sounds, forms, and vocabulary of the English language from its origins to the present. Three lecture hours a week for one semester. Prerequisite: Nine semester hours of coursework in English or rhetoric and writing.

### **LIN 372K. Sound Patterns: From Sound to Word.**

Methods and principles of analyzing the sound systems of languages. Three lecture hours a week for one semester. Prerequisite: Linguistics 344K.

### **LIN 372L. Syntax and Semantics: The Structure and Meaning of Utterances.**

Methods and principles of describing the syntactic systems of languages. Three lecture hours a week for one semester. Prerequisite: Upper-division standing and Linguistics 306.

### **LIN 373. Topics in Linguistics and Related Disciplines.**

Introduction to the study of the areas of linguistics that involve other disciplines, such as sociolinguistics, psycholinguistics, mathematical methods in linguistics. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

**Topic 1: Child Language.** Examination of theory and research concerning the development of language in the child. Linguistics 373

(Topic 1) and Psychology 333P may not both be counted. Prerequisite: Upper-division standing.

**Topic 2: Language and Speech in American Society.** Same as American Studies 321 (Topic 2: Language and Speech in American Society), Anthropology 325N, and Sociology 352M (Topic 3: Language and Speech in American Society). Prerequisite: Upper-division standing, and Anthropology 302, 305, 307, or Linguistics 306.

**Topic 3: Language in Culture and Society.** Same as Anthropology 325M and Sociology 352M (Topic 4: Language in Culture and Society). Language as a cultural resource; functions of language in society; survey of language communities. Prerequisite: Anthropology 302, 305, 307, or Linguistics 306; or consent of instructor.

**Topic 7: Introduction to Cognitive Science.** Same as Cognitive Science 360 (Topic 1: Introduction to Cognitive Science) and Philosophy 365 (Topic 2: Introduction to Cognitive Science). Prerequisite: Upper-division standing.

**Topic 9: The German Language: Historical Perspectives.** Same as Anthropology 320L (Topic 9) and German 369 (Topic 4). Only one of the following may be counted: Anthropology 320L (Topic 8: German and English: Historical Perspectives), 320L (Topic 9), Classical Civilization 348 (Topic 8: German and English: Historical Perspectives), 348 (Topic 9: The German Language: Historical Perspectives), German 369 (Topic 4), Germanic Civilization 327E (Topic 9: German and English: Historical Perspectives), Linguistics 373 (Topic 8: German and English: Historical Perspectives), 373 (Topic 9). Additional prerequisite: Three semester hours of upper-division coursework in German or Linguistics.

**Topic 10: Language, Culture, and the Texas German Experience.** Same as American Studies 370 (Topic 47), Anthropology 324L (Topic 55), and German, Scandinavian, and Dutch Studies 351C. The evolution of the culture and language of German immigrants to Texas from the 1840s through the present and how they have influenced other ethnic groups in Texas. Three lectures a week for one semester. Only one of the following may be counted: American Studies 370 (Topic: Language, Culture, and the Texas German Experience), 370 (Topic 47), Anthropology 324L (Topic: Language, Culture, and the Texas German Experience), 324L (Topic 55), Germanic Civilization 327E (Topic 11) German, Scandinavian, and Dutch Studies 351C, Linguistics 350 (Topic: Language, Culture, and the Texas German Experience), 373 (Topic 10). Additional prerequisite: Upper-division standing.

### **LIN 374M. Sociolinguistics.**

Same as Anthropology 374M. An in-depth treatment of current interests in sociolinguistic research literature. Subjects include language and gender; social, regional, and ethnic dialects of American English; language use in African American communities; language and identity in a pluralistic society; and language, literacy, and education. Three lecture hours a week for one semester. Prerequisite: Anthropology 302 or Linguistics 306.

### **LIN 379. Conference Course in Linguistics.**

Supervised individual study of selected problems in linguistics. Conference course. May be repeated for credit. Prerequisite: Six semester hours of upper-division coursework in linguistics.

### **LIN 679H. Honors Tutorial Course.**

Supervised individual reading for one semester, followed by research and writing to produce a substantial paper. Conference course for two semesters. May be repeated for credit. Prerequisite: For 679HA, admission to the Linguistics Honors Program; for 679HB, Linguistics 679HA.

# Department of Middle Eastern Studies

Before enrolling for the first time in any language offered by the Department of Middle Eastern Studies, all students with knowledge of the language, however acquired, must be tested to determine the course for which they should register. Information about the tests is available from the departmental undergraduate adviser. The Department of Middle Eastern Studies considers students educated in a Middle Eastern language beyond the elementary school level to be native speakers of that language.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

### **PHL 679H. Honors Tutorial Course.**

Supervised individual reading for one semester, followed by research and writing to produce a substantial paper on a special topic in philosophy, to be completed during the second semester. Conference course for two semesters. Prerequisite: For 679HA, admission to the Philosophy Honors Program; for 679HB, Philosophy 679HA.

### **PHL 379K. Conference Course.**

Intensive tutorial study of selected problems in philosophy. Conference course. May be repeated for credit. Prerequisite: Nine semester hours of upper-division coursework in philosophy and consent of instructor and the undergraduate adviser in philosophy.

## **Plan II Honors Program**

### **Social Science: S S**

#### **Lower-Division Courses**

#### **S S 301. Honors Social Science.**

An introduction to the study of the individual, society, or culture using the methods of one of the social sciences. Three lecture hours a week for one semester. With consent of the director of Plan II, may be repeated once for elective credit. Prerequisite: Admission to the Plan II Honors Program.

## Upper-Division Courses

### Tutorial Course: T C

## Lower-Division Courses

### T C 302. First-Year Signature Course: Plan II.

Restricted to first-year Plan II students. Small-group seminar involving reading, discussion, writing, and oral reporting around a central interdisciplinary topic. Designed to introduce undergraduates to scholarly analysis from an interdisciplinary perspective. Includes an introduction to University resources, such as research facilities, museums, and attendance at University lectures or performances as assigned. Multiple sections may be offered in the fall and spring with various topics and instructors. Three lecture hours a week for one semester. Some sections may require additional meeting times; these are identified in the Course Schedule. Only one of the following may be counted: Tutorial Course 302, Undergraduate Studies 302, 303.

### T C 603. Composition and Reading in World Literature.

Reading of masterpieces of world literature and intensive training in writing and in critical analysis of literature. Three lecture hours a week for two semesters. Only one of the following may be counted: English 603A, Rhetoric and Writing 306, 306Q, Tutorial Course 603A; only one of the following may be counted: Comparative Literature 315, English 603B, Tutorial Course 603B. Prerequisite: For 603A, admission to the Plan II Honors Program; for 603B, Tutorial Course 603A.

### T C 310. Modes of Reasoning.

Introduction to forms of quantitative reasoning: computer science, game theory, operations research, or statistics and probability. Three lecture hours a week for one semester. Philosophy 313Q and Tutorial Course 310 may not both be counted. Prerequisite: Admission to the Plan II Honors Program.

## Upper-Division Courses

### T C 325. Topics in the Arts and Sciences.

Analysis of various topics within the arts and sciences through reading, research, written reports, and discussion. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing in the Plan II Honors Program or consent of instructor; additional prerequisites vary with the topic.

### T C 125K. Topics in the Arts and Sciences.

Analysis of topics in the arts, sciences, and social sciences through reading, discussion, and lectures. The equivalent of one lecture hour a week for one semester. Some topics are offered on the pass/fail basis only; these are identified in the Course Schedule. May be repeated for credit. Prerequisite: Upper-division standing in the Plan II Honors Program or consent of instructor.

### T C 126. Plan II/Knowledge Is Power Program Charter Schools Partnership.

Restricted to students in the Plan II Honors Program. Mentorship of younger students attending an Austin-area Knowledge Is Power Program (KIPP) school. Through mentoring and class meetings, students will be deeply immersed in issues related to education reform, (in)equality of educational opportunity, and in promising strategies, such as those used by KIPP, for addressing such issues. The equivalent of one lecture hour and two hours of service a week for one semester. May be repeated for credit. Offered on the letter-grade basis only. Prerequisite: Consent of instructor.

### T C 330. Special Topics in Plan II.

Restricted to Plan II majors. Three lecture hours a week for one semester, with additional hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor.

### T C 357. The Junior Seminar.

Seminar sections of about fifteen students. The subjects vary, but in each the attempt is made through careful reading, discussion, and written work to analyze and compare varied approaches to topics of lasting importance. Three lecture hours a week for one semester. Students must take this course twice with different topics to fulfill degree requirements; with consent of the director of Plan II, a third topic may be taken as an elective. Prerequisite: Upper-division standing in Plan II.

### T C 359T. Essay Course.

Directed reading followed by the writing of an essay. Conference course, with additional hours to be arranged. Prerequisite: Two semesters of Tutorial Course 357 and consent of the director.

### T C 660H. Thesis Course: Honors.

Directed reading followed by the writing of a substantial essay. Conference course for two semesters, with additional hours to be arranged. Prerequisite: For 660HA, two semesters of Tutorial Course 357 and consent of the director; for 660HB, Tutorial Course 660HA.

## Department of Psychology

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

## Psychology: PSY

### Lower-Division Courses

#### PSY 301 (TCCN: PSYC 2301). Introduction to Psychology.

Basic problems and principles of human experience and behavior. Three lecture hours a week for one semester, or the equivalent in independent study.

#### PSY 304 (TCCN: PSYC 2308). Introduction to Child Psychology.

General introduction to physical, social, and cognitive development from conception onward. Three lecture hours a week for one semester. Psychology 304 and 333D may not both be counted. Prerequisite: Psychology 301 with a grade of at least C.

#### PSY 305. Introduction to Cognitive Psychology.

Introduction to the study of how people perceive, act, communicate, and reason. Three lecture hours a week for one semester. Prerequisite: Psychology 301 with a grade of at least C.

#### PSY 308. Biopsychology.

Introduction to the biological bases of psychological processes and behavior. Overview of the physiology and anatomy of the nervous system, followed by a survey of brain mechanisms of perception, cognition, learning, and emotion; biological perspectives on drug action and mental disease. Three lecture hours a week for one semester. Prerequisite: Psychology 301 with a grade of at least C.

**PSY 309 (TCCN: PSYC 2316). Personality.**

Research and theory concerning personality structure, dynamics, development, and assessment. Three lecture hours a week for one semester. Prerequisite: Psychology 301 with a grade of at least C.

**PSY 317 (TCCN: PSYC 2317). Statistical Methods in Psychology.**

Recommended for majors who plan to do graduate work in psychology or related fields. Measures of central tendency and variability; statistical inference; correlation and regression. Three lecture hours a week for one semester. Prerequisite: Psychology 301 with a grade of at least C.

**PSY 418. Statistics and Research Design.**

Students may not enroll in Psychology 418 more than twice. Survey of statistics, including central tendency, variability and inference, and scientific methodology used in psychological research. Three lecture hours and two discussion hours a week for one semester. Prerequisite: Psychology 301 with a grade of at least C and credit for one of the following: Mathematics 302, 303D, 403K, 305G, 408C, 408K, 316; or Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

**PSY 319K (TCCN: PSYC 2319). Social Psychology.**

Theory and research on the analysis of human conduct in social settings. Three lecture hours a week for one semester. Prerequisite: Psychology 301 with a grade of at least C.

**PSY 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Psychology.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

**Upper-Division Courses****PSY 323. Perception.**

Theory and research in the ways we extract information from the environment. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

**PSY 323P. Perceptual Systems: Neurons, Behavior, and Evolution.**

An introduction to perceptual systems, with an emphasis on perception in human and nonhuman primates. Topics include the physics of perceptual stimuli, the neural processing of perceptual information, the performance of human and other primates in perceptual tasks, and the evolution of perceptual systems. Three lecture hours a week for one semester. Psychology 323P and 341K (Topic: Perceptual Systems: Neurons/Behavior/Evolution) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K,

Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

**PSY 323S. Sex Differences in Cognition and Perception.**

Examination of facts, theories, and implications of sex differences in human cognition and perception. Topics include genetic and hormonal origins of sex differences, structural differences in the body and brain, verbal abilities, spatial abilities, learning, memory, sensory-motor abilities, and the auditory, olfactory, visual, and other sensory systems. Three lecture hours a week for one semester. Psychology 323S and 341K (Topic: Sex Differences in Cognition and Perception) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

**PSY 323V. Seeing and Acting in a Virtual World.**

Methods of experimentation and discovery for examining one's own perceptions and actions in ordinary life. Three lecture hours a week for one semester. Psychology 323V and 341K (Topic: Seeing/Acting in Virtual World) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for others, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), 306 (or Statistics and Scientific Computation 306), or 318 (or Statistics and Scientific Computation 318).

**PSY 325K. Advanced Statistics.**

Advanced statistical theory and methods for analysis of behavioral sciences data; topics include analysis of variance and covariance, regression, and nonparametric techniques. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

**PSY 326K. Principles of Conditioning and Learning.**

Laws of animal and human learning, and the underlying mechanisms. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering

335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Psychology.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Psychology. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **PSY 332. Behavioral Neuroscience.**

Neuroscientific study of behavioral functions: fundamental structure and function of the human nervous system, sensory systems and perception, motor systems and behavior, motivation and learning, brain disorders and maladaptive behavior. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 332C. Hormones and Behavior.**

Neuroscientific study of hormones and behavior in animals and humans. Includes sexual behavior, sexual differentiation, parental behavior, aggressive behavior, feeding and drinking, stress, learning, and memory. Three lecture hours a week for one semester. Psychology 332C and 341K (Topic: Hormones and Behavior) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 332D. Human Brain Imaging in Psychology.**

Study of human brain imaging technologies such as fMRI and electrophysiology. Three lecture hours a week for one semester. Psychology 332D and 341K (Topic: Human Brain Imaging in Psychology) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for others, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), 306 (or Statistics and Scientific Computation 306), or 318 (or Statistics and Scientific Computation 318).

### **PSY 332M. The Neuroscience of Motivation and Reward.**

Examination of mechanisms of the brain that control behaviors such as incentive motivation, reward, aversion, and addiction. Three lecture

hours a week for one semester. Psychology 332M and 341K (Topic: Neuroscience of Motivation and Reward) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for others, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), 306 (or Statistics and Scientific Computation 306), or 318 (or Statistics and Scientific Computation 318).

### **PSY 333C. Controversial Issues in Development.**

An exploration of questions in developmental psychology that are currently in dispute. Topics may include stem cell research, treatment of juveniles in the legal system, physician-assisted suicide, and methods of sex education. Three lecture hours a week for one semester. Psychology 333C and 341K (Topic: Controversial Issues in Development) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 333D. Introduction to Developmental Psychology.**

Physical, social, and cognitive development in humans. Three lecture hours a week for one semester. Psychology 304 and 333D may not both be counted. Psychology 333D and Women's and Gender Studies 345 (Topic 6: Introduction to Developmental Psychology) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 333E. Identity Formation.**

An introduction to historical theories of and current research on identity, with particular focus on identity development in the domains of occupation, religion, politics and morality, gender, ethnicity, and adoption. Three lecture hours a week for one semester. Psychology 333E and 341K (Topic: Identity Formation) may not both be counted. ### **PSY 333F. Fantasy and Reality.**

Examination of how children and adults decide what is real and what is not. Topics include the fantasy-reality distinction, magical thinking, and religious cognition. Three lecture hours a week for one semester. Psychology 333F and 341K (Topic: Fantasy and Reality) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 333M. Infant Development.**

Examination of genetic and environmental determinants of social, perceptual, and cognitive development in infants from theoretical and research perspectives. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 333N. Cognitive Development.**

Overview of the development of thinking from infancy through childhood. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 333P. Child Language.**

Examination of theory and research concerning the development of language in the child. Three lecture hours a week for one semester. Only one of the following may be counted: Linguistics 373 (Topic 1: Child Language), 373 (Topic: Language Acquisition), Psychology 333P. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 333R. Social Development in Children.**

Development of social behavior (for example, sex typing and aggression) and social relationships. Three lecture hours a week for one semester. Psychology 333R and Women's and Gender Studies 345 (Topic 19: Social Development in Children) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil

Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 333T. Adolescent Development.**

Physical, cognitive, social, and personality development during adolescence. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 333W. Moral Development.**

An introduction to theory and research on morality. Topics include culture and morality, Freudian and social learning perspectives on moral development, Kohlberg's theory of morality, challenge to Kohlberg's theory, and cognitive, familial, and emotional influence on morality. Three lecture hours a week for one semester. Psychology 333W and 341K (Topic: Moral Development) may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 334D. Psychology of Human Mating.**

Mate selection, sources of conflict, and mating over the life span, studied in the context of evolutionary psychology and sexual selection theory. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 334E. Evolutionary Psychology.**

Fundamentals of evolutionary psychology, including issues of natural and sexual selection, adaptation, and domain-specific psychological mechanisms. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 337. Psychology of Language.**

Consideration of approaches to the study of language, its development in children, and its functioning; important research from psychology and

linguistics. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 338K. Psychology of Reading.**

Theory and research on the reading process and its acquisition. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 339. Behavior Problems of Children.**

Adjustment difficulties during childhood and adolescence; causation and treatment. Three lecture hours a week for one semester. Only one of the following may be counted: Human Development and Family Sciences 339, 342, Psychology 339. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 341K. Selected Topics in Psychology.**

Topics of contemporary interest that may vary from semester to semester. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

#### **Topic 4: Health Psychology.**

#### **Topic 7: Epidemiology.**

#### **Topic 8: Learning and the Brain.**

**Topic 12: Personality Assessment.** Theoretical and methodological issues involved in trying to understand and measure personality.

#### **Topic 14: Robot Cognition.**

**Topic 15: History of Modern Psychology.** A survey of the diverse roots of modern psychology, the competing schools that influenced psychology's development, and the perspectives that guide scholarship in present-day psychology. Psychology 341K (Topic 15) and 341K (Topic: History and Systems of Psychology) may not both be counted.

### **PSY 343K. Substance Abuse.**

Causes of substance abuse: the evolutionary perspective, sex differences, predisposition, biological and cognitive theories; emphasis on food and alcohol. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 345. Individual Differences.**

Study of person-to-person variation in intelligence, personality, and interests, with an emphasis on genetic and environmental determinants, developmental processes, and their relation to real-world outcomes. Three lecture hours a week for one semester. Psychology 341K (Topic: Individual Differences) and 345 may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 346K. Psychology of Sex.**

Development of sex from genes to human behavior. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 350. Motivation.**

Theory and research on motivation; biological and social determinants. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 352. Abnormal Psychology.**

Biological and social factors in the development and treatment of psychopathology. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 353K. Psychopharmacology.**

The pharmacology and the neurochemical, neurophysiological, and psychological effects of psychoactive drugs, with regard to their use as therapeutic and behavioral research tools. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 355. Cognition.**

Theoretical and critical analysis of the development, nature, and function of the thought process. Three lecture hours a week for one semester. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 355C. Development of Categories and Concepts.**

Study of the historical and contemporary knowledge about the ways that people learn about concepts. Three lecture hours a week for one semester. Psychology 341K (Topic: Categories and Concepts) and 355C may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for others, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), 306 (or Statistics and Scientific Computation 306), or 318 (or Statistics and Scientific Computation 318).

### **PSY 355D. Animal Cognition.**

An introduction to animal intelligence and the evolution of mind. Examines what is known about intelligence in other animals, how intelligence is revealed in social and problem-solving behavior, and the ways in which human intelligence is structured by its evolutionary past. Three lecture hours a week for one semester. Psychology 341K (Topic: Animal Cognition) and 355D may not both be counted. Prerequisite: For

psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 355M. The Cognitive Psychology of Music.**

Cognitive foundations of music in terms of physics of sound, the psychophysics of musical experience, perceptual organization of musical scenes, the perception of time through rhythm, and the ways in which music reflects natural form. Three lecture hours a week for one semester. Psychology 341K (Topic: Cognitive Psychology of Music) and 355M may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for others, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), 306 (or Statistics and Scientific Computation 306), or 318 (or Statistics and Scientific Computation 318).

### **PSY 355N. Cognitive Neuroscience.**

Exploration of the link between the brain, mind, and behavior and cognitive neuroscience techniques. Three lecture hours a week for one semester. Psychology 341K (Topic: Cognitive Neuroscience) and 355N may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for others, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Data Sciences 302 (or Statistics and Scientific Computation 302), 303 (or Statistics and Scientific Computation 303), 304 (or Statistics and Scientific Computation 304), 305 (or Statistics and Scientific Computation 305), 306 (or Statistics and Scientific Computation 306), or 318 (or Statistics and Scientific Computation 318).

### **PSY 355R. Reasoning and Decision Making.**

Survey of psychological research on how people reason and make decisions. Topics include mental models, causality, analogy, heuristics, emotion, motivation, culture, and decision making. Three lecture hours a week for one semester. Psychology 341K (Topic: Reasoning and Decision Making) and 355R may not both be counted. Prerequisite: For psychology majors, upper-division standing and Psychology 301 and 418 with a grade of at least C in each; for nonmajors, upper-division standing, Psychology 301 with a grade of at least C, and one of the following with a grade of at least C: Biology 318M, Civil Engineering 311S, Economics 329, Educational Psychology 371, Electrical Engineering 351K, Government 350K, Mathematics 316, 362K, Mechanical Engineering 335, Psychology 317, Sociology 317L, Social Work 318, Statistics 309, Statistics and Scientific Computation 302, 303, 304, 305, 306, 318.

### **PSY 357. Undergraduate Research.**

Supervised research experience. Individual instruction. May not be counted toward a major in psychology. May be repeated for credit.

Offered on the pass/fail basis only. Prerequisite: At least thirty semester hours of college coursework, Psychology 301 with a grade of at least C, and consent of instructor.

### **PSY 458. Experimental Psychology.**

Techniques of psychological research illustrated in a series of laboratory experiments. Two lecture hours and four laboratory hours a week for one semester. Prerequisite: Upper-division standing, Psychology 301 and 418 with a grade of at least C in each, and a University grade point average of at least 3.25.

### **PSY 158H. Honors Research Tutorial.**

Enrollment restricted to students in the Psychology Honors Program. Individual instruction. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Upper-division standing, Psychology 301 and 418 with a grade of at least C in each, and consent of the honors adviser.

### **PSY 359. Selected Topics: Readings: Tutorial.**

Supervised reading in selected topics of significance; area of intensive study is chosen by the student in consultation with the instructor. Individual instruction. May not be counted toward a major in psychology. May be repeated for credit. Offered on the pass/fail basis only. Prerequisite: Upper-division standing, Psychology 301 with a grade of at least C, and consent of instructor.

### **PSY 359H. Honors Research I.**

Three lecture hours a week for one semester. Prerequisite: Upper-division standing, Psychology 301 and 418 with a grade of at least C in each, six semester hours of upper-division coursework in psychology, a grade point average of at least 3.50 in psychology courses taken at the University, a University grade point average of at least 3.25, and consent of the honors adviser.

## **Department of Air Force Science**

The Air Force Reserve Officer Training Corps (AFROTC) was activated at the University of Texas in September, 1947. The program is designed to commission career-oriented officers who meet specific Air Force requirements. The AFROTC objective is to place on active duty lieutenants who demonstrate dedication to their assignments, willing acceptance of responsibility, critical and creative thinking, and the ability to speak and write effectively.

AFROTC courses are taught by Air Force officers and are approved for college credit toward the cadet's degree program in amounts determined by the college concerned.

AFROTC scholarships are available to selected cadets. Scholarships are awarded on the basis of overall merit, with particular attention paid to academic achievement. Recipients must maintain academic standards in order to retain the scholarships. Other scholarships are also available for upper-division cadets. Additional information is available from the chair of the department.

Extracurricular activities available through AFROTC include; intramural athletics, parades, ceremonies, formal military functions, field trips to Air Force installations, and membership in national military societies.

Air force science courses are designed to prepare selected students for a commission in the United States Air Force through the AFROTC program. Students who do not hold AFROTC scholarships may take lower-division courses with no military obligation. Scholarship students and selected students who elect to take upper-division courses are on contract. Upon graduation and commissioning he/she will enter active duty in the United States Air Force.

# Department of Military Science

The Army Reserve Officers' Training Corps (ROTC) was established at the University of Texas in September, 1947. As a senior division unit, it is designed to provide a course of military instruction that will permit qualified students to prepare themselves for commissions as second lieutenants while they pursue other academic courses leading to baccalaureate or advanced degrees from the University.

Upon being commissioned a second lieutenant, each student has the opportunity to serve in the active Army, Army Reserve, or National Guard.

The Army ROTC program, in addition to providing a basic foundation in military subjects, is designed to develop the highest qualities of leadership, character, and citizenship through the wide variety of extracurricular activities it sponsors. Such activities include parades, ceremonies, social events, a Ranger detachment, and intramural athletic teams.

The Army ROTC program is normally a four-year program divided into a basic course and an advanced course. The basic course is conducted during the first two years and the advanced course during the last two years. Certain students may qualify for advanced placement in the program based on previous military training in Junior ROTC, a service academy, active duty in a military service, credit for other college courses, or completion of a special four-week summer camp, normally between the sophomore and junior year.

The Department of the Army has determined that a need exists for all Army ROTC cadets to have a demonstrated proficiency in selected disciplines. These courses are called Professional Military Education (PME) and must be completed prior to graduation. A list of courses that fulfill PME requirements is available from the chair of the Department of Military Science.

Two-, three-, and four-year scholarship programs are offered to selected cadets. The four-year scholarship program is administered by the Department of the Army, but selection is based on the Professor of Military Science Order of Merit List (OML). Applicants must apply while in high school. The remaining programs are administered directly through the Department of Military Science.

Scholarship students receive \$300 to \$500 a month for up to ten months for each year of their scholarship. The scholarship pays for required tuition and mandatory fees, laboratory expenses, and books. Nonscholarship students receive \$450 to \$500 a month during the advanced course. For additional information, contact the scholarship and enrollment officer at [arotc@uts.cc.utexas.edu](mailto:arotc@uts.cc.utexas.edu) or <http://www.utexas.edu/cola/depts/arotc>.

## Military Science: M S

### Lower-Division Courses

#### **M S 000. Leadership Laboratory.**

Open only to students in associated military science courses. Leadership responsibilities for planning, coordination, execution, and evaluation of training and other activities. Self-confidence and team-building leadership skills that can be applied throughout life. One and one-half laboratory hours a week for one semester. Required of all military science students. Prerequisite: Concurrent enrollment in another military science course.

#### **M S 101. Basic Military Science I-A.**

Designed to increase self-confidence through team study and activities in basic drill, physical fitness, rappelling, leadership reaction course, first aid, making presentations, and basic marksmanship. Fundamental concepts of leadership in a profession. One one-hour lecture/practice session a

week for one semester. Prerequisite: Concurrent enrollment in Military Science 000.

#### **M S 103. Basic Military Science I-B.**

Principles of effective leading. Designed to reinforce self-confidence through participation in physically and mentally challenging exercises with upper-division ROTC students. Communication skills that improve individual performance and group interaction. Relationship of organizational ethical values to the effectiveness of a leader. One one-hour lecture/practice session a week for one semester. Prerequisite: Concurrent enrollment in Military Science 000.

#### **M S 210. Basic Military Science II-A.**

Ethics-based leadership skills designed to develop individual abilities and contribute to effective team-building. Focus on oral presentations, writing concisely, planning of events, coordination of group efforts, advanced first aid, land navigation, and basic military tactics. Fundamentals of ROTC's Leadership Assessment Program. Two lecture/practice hours a week for one semester, and a weekend field training exercise. Prerequisite: Concurrent enrollment in Military Science 000.

#### **M S 212. Basic Military Science II-B.**

Introduction to individual and team aspects of military tactics in small-unit operations. Includes use of radio communications, making safety assessments, movement techniques, planning for team safety/security, and methods of pre-execution checks. Practical exercises with upper-division ROTC students. Techniques for training others as an aspect of continued leadership development. Two lecture/practice hours a week for one semester, and a weekend field training exercise. Prerequisite: Concurrent enrollment in Military Science 000.

## Upper-Division Courses

#### **M S 320. Advanced Military Science III-A.**

Series of practical opportunities to lead small groups, receive personal assessments and encouragement, and lead again in situations of increasing complexity. Use of small-unit defensive tactics and opportunities to plan and conduct training for lower-division students. Three lecture hours a week for one semester. Prerequisite: Concurrent enrollment in Military Science 000 and approval of departmental representative.

#### **M S 320K. Advanced Military Science III-B.**

Continued study of methods covered in Military Science 320. Students analyze tasks; prepare written or oral guidance for team members to accomplish tasks; delegate tasks and supervise; plan for and adapt to the unexpected in organizations under stress; examine and apply lessons from leadership case studies; examine the importance of ethical decision making in enhancing team performance. Three lecture/practice hours a week for one semester. Prerequisite: Concurrent enrollment in Military Science 000 and approval of departmental representative.

#### **M S 375. Leadership and Ethics (IV-A).**

Military leadership and professional ethics; post and installation support system; introduction to the military justice system. Three lecture hours a week for one semester. Prerequisite: Concurrent enrollment in Military Science 000 and approval of departmental representative.

Fundamentals of the military justice system; training and logistical management systems; military social functions; role of the second lieutenant. Three lecture hours a week for one semester. Prerequisite: Concurrent enrollment in Military Science 000 and approval of departmental representative.

### **M S 379. Advanced Military Science V-A.**

Advanced study and research on historic and contemporary military subjects and events. Three lecture hours a week for one semester. Prerequisite: Concurrent enrollment in Military Science 000.

### **M S 379K. Advanced Military Science V-B.**

Advanced study and research on historic and contemporary military subjects and events. Three lecture hours a week for one semester. Prerequisite: Concurrent enrollment in Military Science 000.

## **Department of Naval Science**

The Naval Reserve Officers Training Corps (NROTC) was established at the University of Texas in September, 1940, to offer the naval science courses necessary to qualify University students for commissions in the United States Navy or Marine Corps.

Qualified students may apply for the four-year or two-year Navy-Marine Scholarship Program or college program (nonscholarship) and earn a commission in the Navy or Marine Corps.

NROTC scholarship students are appointed midshipmen, United States Naval Reserve, by the Secretary of the Navy, and granted the compensation and benefits authorized by law. While students attend the University, the Navy pays tuition, the cost of textbooks, fees of an instructional nature, and a subsistence allowance of \$250 to \$450 a month during the academic year. During drill periods and summer training periods, midshipmen wear government-furnished uniforms. Students should submit scholarship applications to a naval recruiting station before December 1 of each year or to the Department of Naval Science after the first semester of enrollment in the college program. Additional information is available from the chair of the department.

### **Naval Science: N S**

#### **Lower-Division Courses**

##### **N S 000. Drill.**

Three laboratory hours a week for one semester.

##### **N S 302. Introduction to Naval Science.**

A general introduction to sea power and the naval service, including the mission, organization, regulations, warfare components, and personnel programs. Three lecture hours a week for one semester.

##### **N S 603. Naval Ships Systems I and II.**

Introduction to types, structures, and purposes of naval ships and weapons systems. Three lecture hours a week for two semesters.

**Topic 46: Toni Morrison.** Same as African and African Diaspora Studies 372E (Topic 1: Toni Morrison) and English 349S (Topic 5: Toni Morrison). An examination of select novels by the Nobel Laureate and Pulitzer Prize-winning novelist focuses on the positional uniqueness that womanism shares with a predominant feminism, which surfaces in historicized familial relationships. Only one of the following may be counted: African and African Diaspora Studies 372E (Topic 1), 374F (Topic: Toni Morrison), English 349S (Topic 5), Women's and Gender Studies 340 (Topic: Toni Morrison), 345 (Topic 46). Prerequisite: Six semester hours of upper-division coursework in English.

**Topic 47: The Face of Justice.** Same as Government 357M (Topic 11). Examination of the inalienable rights: liberty, due process, equality, speech, assembly, security in the home, and practice or nonpractice of religion. Historical overview of women's rights and women's participation in the justice system. Discussion of individuals whose rights are being protected, and those whose rights are being overlooked by the American judicial system. Only one of the following may be counted: Government 357M (Topic: Face of Justice), 357M (Topic 11), Liberal Arts Honors 350 (Topic: Face of Justice), Women's and Gender Studies 345 (Topic: Face of Justice), 345 (Topic 47). Offered on the letter-grade basis only. Additional prerequisite: For government majors, six semester hours of lower-division coursework in government; for others, upper-division standing.

**Topic 48: Women's Autobiographical Writing.** Same as English 370W (Topic 11). Examines the autobiographical impulse in women's writing by exploring the concept of the individualistic self versus the sense of self as a part of community and duty, and the way in which that communal self can both partake of humankind and participate in self-actualization. Only one of the following may be counted: English 370W (Topic: Women's Autobiographical Writing), 370W (Topic 11), Women's and Gender Studies 345 (Topic: Women's Autobiographical Writing), 345 (Topic 48).

**Topic 49: History of American Feminism.** Same as History 350R (Topic 20). Only one of the following may be counted: History 350R (Topic: History of American Feminism), 350R (Topic 20), Women's and Gender Studies 345 (Topic: History of American Feminism), 345 (Topic 49). Partially fulfills legislative requirement for American history.

**Topic 52: American Literary Masculinities.** Same as English 370W (Topic 12). Explores constructions of masculinity in American literature from a generally, but not exclusively, feminist perspective. Subjects include what masculinity has meant at different times in United States history, and how it has varied in meaning and significance according to broad categories of identity such as social class, race, region, and queerness. Only one of the following may be counted: English 370W (Topic: American Literary Masculinities), 370W (Topic 12), Women's and Gender Studies 345 (Topic: American Literary Masculinities), 345 (Topic 52). Additional prerequisite: For English majors, nine semester hours of coursework in English or rhetoric and writing; for others, upper-division standing.

**Topic 53: Gender and Sexuality in Ancient Novel.** Same as Classical Civilization 348 (Topic 13). The major works of prose fiction from Greco-Roman antiquity and how those works relate to the intellectual, cultural, and social currents of late antiquity. Only one of the following may be counted: Classical Civilization 348 (Topic: Gender and Sexuality in Ancient Novel), 348 (Topic 13), Women's and Gender Studies 345 (Topic: Gender and Sexuality in Ancient Novel), 345 (Topic 53).

### **WGS 350. Feminist Theory.**

Restricted to women's and gender studies majors and minors. Feminist theory with selections from women's and gender studies scholars. Recommended feminist theory course for women's and gender studies majors. Three lecture hours a week for one semester. Women's and Gender Studies 322 (Topic 4: Feminist Theory) and 350 may not both be counted. Prerequisite: Upper-division standing and nine semester hours of coursework in women's and gender studies.

### **WGS 356. Introduction to Feminist Research Methods.**

Restricted to women's and gender studies majors and minors. Introduction to feminist research methods across a range of traditional disciplines. Designed to prepare students to analyze research within gender studies and to develop their own research skills. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and six semester hours of coursework in women's and gender studies.

**WGS 358Q. Supervised Research.**

Supervised individual research on an issue in women's and gender studies. Individual instruction. Prerequisite: Upper-division standing, Women's and Gender Studies 356 with grade of at least C-, and written consent of the supervising faculty member; consent forms are available in the Center for Women's and Gender Studies.

**WGS 360. Research and Thesis in Women's and Gender Studies.**

Restricted to women's and gender studies majors. Individual project or paper to be completed under the direction of a women's and gender studies faculty member. Conference course. Offered on the letter-grade basis only. Prerequisite: Upper-division standing; Women's and Gender Studies 356 with grade of at least C-; credit or registration for Women's and Gender Studies 358Q; and written consent of the supervising faculty member on a consent form available in the Center for Women's and Gender Studies for that purpose.

**WGS 466. Guidance in Adult-Child Relationships.**

Same as Human Development and Family Sciences 466. Theory and implementation of positive child and adult interactions, communication, and guidance strategies. Two lecture hours and four laboratory hours a week for one semester. Only one of the following may be counted: Human Development and Family Sciences 466, Women's and Gender Studies 345 (Topic 4: Guidance in Adult-Child Relationships), 466. Prerequisite: Human Development and Family Sciences 313 and 113L; and three semester hours of upper-division coursework in human development and family sciences, education, psychology, or sociology.

**WGS 679H. Honors Tutorial Course.**

Restricted to honors candidates majoring in women's and gender studies. Individual reading of selected works for one semester, followed in the second semester by the writing of an honors thesis. The equivalent of three lecture hours a week for two semesters. Prerequisite: For 679HA, twelve semester hours of coursework in women's and gender studies and consent of supervising faculty; for 679HB, Women's and Gender Studies 679HA.

**WGS 379L. Internship in Women's and Gender Studies.**

Experience working in the community or for a nonprofit agency. Six to nine hours of work a week for one semester. Prerequisite: At least twelve semester hours of coursework in women's and gender studies and written consent of the supervising faculty member; consent forms are available in the Center for Women's and Gender Studies.

**WGS 379S. Senior Seminar.**

Intensive study of selected topics in women's and gender studies. Three lecture hours a week for one semester. May not be repeated for credit. Offered on the letter-grade basis only. Prerequisite: Upper-division standing and completion of at least ninety semester hours of coursework, including six hours in women's and gender studies.

## General Information

### Arts and Sciences Education

The academic program offered cooperatively by the College of Natural Sciences and the College of Liberal Arts provides what is sometimes referred to as a “liberal arts” or an “arts and sciences” education. No matter what area of knowledge a student intends to specialize in, the program of study will require courses in both colleges. The colleges work together to ensure that the individual interests and needs of the students pursuing an arts and sciences program are met.

Guidelines for developing a coherent plan of study are provided by major requirements, by sequential prerequisites, and by optional patterns of emphasis. Departmental majors, areas of specialization, and interdepartmental programs are designed to enable every student to study at least one field in depth. These programs are sufficiently broad in scope to allow students in the same major to develop quite different plans of study in pursuit of their individual interests and goals. Each student should choose courses that are intellectually challenging and that contribute to his or her long-term objectives.

Arts and sciences students are required to take a certain number of courses in the natural sciences, the social and behavioral sciences, and the humanities. Consequently, whatever their fields of study, they have the opportunity to learn something about the basic differences in the ways questions are raised and answered in several fields of inquiry, and about the techniques for validating the answers and putting the results to use. At the same time, they may gain some of the philosophical and historical perspectives that illuminate and give form to general or specialized knowledge and help to reveal its relevance.

Both teachers and students sometimes make the assumption that independent and creative study is exclusively for the gifted. In fact, the primary requirement is that the student be highly motivated, although he or she must also demonstrate ability. The departments that make up the two arts and sciences colleges encourage all qualified students to work independently in special honors courses and seminars and in conference, studio, or laboratory work. The student is free to define a major, to determine whether a given assignment will be an adventure or a chore, free to develop its latent possibilities or merely satisfy its explicit demands. True creativity presupposes more than a gift for innovation; it requires an unceasing commitment to thinking and working at one's highest level.

As competence is gained in a chosen field, the mind should be progressively sharpened, disciplined, and enriched. The student who

leaves arts and sciences studies with an enhanced understanding of self and humankind, of cultural and historical heritage, of the world and the universe, and of the moral values that make it possible to live a meaningful life, will have made the most of education, having gained something over and above the objective of vocational preparedness.

## Financial Assistance Available through the College

A number of scholarship funds established by individuals, foundations, and industrial or research organizations are available to students in the college. Awards are made for reasons ranging from academic promise to financial need. More information about scholarships is given at <http://cns.utexas.edu/honors/scholarships-fellowships>.

## Student Services

### Academic Advising

Academic advising is a responsibility shared by advisers and students. Advisers help students clarify their values and goals, assist with the selection of courses, and monitor and evaluate students' progress toward their degrees. Each student is assigned an academic adviser in his or her proposed field of study; students are expected to communicate with their advisers before registration each semester.

### Career Design Center

The Career Design Center is a multidisciplinary hub for students to explore the next phase of their professional or educational career. Additional information is given on the Career Design Center Web site (<http://cns.utexas.edu/career-design-center>).

### Study Abroad

Students are encouraged to incorporate an international experience into their course of study. In addition to the traditional study abroad programs, students may take advantage of programs specifically designed for science study, including faculty-led courses, Maymester courses, and research abroad. The Office for Honors, Research, and International Study provides information sessions, one-on-one advising, and resources for science students interested in these programs.

## Student Programs

The College of Natural Sciences offers additional programs to supplement the degree plans. Additional information is given at <http://cns.utexas.edu/>.

### Biology Scholars Program

The Biology Scholars Program (BSP) is designed to provide lower-division biology students with a broader understanding of the study of biology and a strong sense of community as they begin their academic careers. Throughout the two-year program, BSP provides academic support, resources for peer-led study, and community service opportunities. Each semester, BSP students take a specialized critical thinking seminar on topics that range from the study of biological sciences to graduate and professional careers in biology. These classes emphasize working in small groups and help BSP students develop strong problem-solving and study skills.

### Emerging Scholars Program

The Emerging Scholars Program (ESP) is designed to help highly motivated mathematics, science, and engineering students toward continued academic success in essential first-year math and science courses. ESP students work closely with faculty members and with other high-achieving students in a supplemental workshop designed to enrich their course experience and intensify their understanding of the course

material. The ESP experience is currently available in calculus and chemistry. Students are invited to participate during the spring of their senior year of high school on the basis of strong academic credentials and history of achievement in mathematics and sciences.

## Freshman Research Initiative

The Freshman Research Initiative introduces undergraduate students to the world of scientific research at the beginning of their academic careers by integrating a three-semester research experience into coursework required for the degree. All students begin with an introductory research methods course in the first semester, followed by two semesters of work on real, cutting-edge research projects in fields like biology, biochemistry, nanotechnology, molecular biology, astronomy, physics, mathematics, and computer science. After finishing the course sequence, interested students are assisted in joining faculty or other research laboratories for further work.

## Texas Interdisciplinary Plan

The Texas Interdisciplinary Plan (TIP) transforms the learning experience for its students by creating small academic communities that promote academic excellence and leadership. TIP offers a collection of selective academic programs that serve about nine hundred students each year, including TIP Scholars, TIP Fellows, Getting Ready for Advanced Degrees (grad), and the TIP Mentor Academy. While each program is unique, all incorporate assisted registration for courses, mentoring, tutoring, and academic and social connections. Admission criteria differ for each program. More information is available from the TIP office.

## Undergraduate Research

One advantage that the University offers undergraduates is the opportunity to participate in state-of-the-art research with some of the world's most respected scientists. Each department in the College of Natural Sciences supports undergraduate research programs in which students may earn University credit. Students may also earn special departmental honors for exceptional research. The college holds an annual Undergraduate Research Forum to recognize and reward students who participate in research. Additional opportunities vary from department to department; information is available in the Office for Honors, Research, and International Study.

## UTeach-Natural Sciences

UTeach-Natural Sciences is an innovative teacher preparation program that allows students to pursue middle grades and secondary school teacher certification within a four-year mathematics, science, or computer science degree program. While learning the subject matter of their majors, students also learn how to teach. Upon completing the program, students graduate with a bachelor's degree and are recommended for a middle grades or secondary school teaching certificate. The UTeach-Natural Sciences program invites students to explore their interest in teaching as early as the freshman year. Through courses taught by some of Texas's most respected secondary school math and science teachers, students learn quickly whether they are suited to the profession. More information about teacher certification requirements is given in the UTeach Teacher Certification (p. 543) of Degrees and Programs.

## Women in Natural Sciences

The Women in Natural Sciences (WINS) Honors Residential Program is designed to promote the involvement and success of women in the sciences. Students live together in an honors dormitory during their first year and participate in socially and educationally enriching activities. In their first semester they take an innovative small seminar class in which they are introduced to faculty members in their areas of interest. Through the seminar and a wide range of academic, cultural, and social events,

WINS students are connected with other students and faculty members who share their interest in science.

# Admission and Registration

## Admission Policies of the College

Admission and readmission of undergraduate students to the University is the responsibility of the director of admissions. Information about admission to the University is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/admission/undergraduate-admission>).

Freshman and transfer students wishing to enter the College of Natural Sciences must apply for admission with the Office of Admissions. The College of Natural Sciences works jointly with the Office of Admissions to identify applicants who have demonstrated preparation and interest in mathematics and sciences. A student must be admitted to the college to pursue a degree program described in this section. A student who is denied admission to the college may seek to enter another college or school.

## Freshman Admission

Applicants should be prepared to make the necessary placements scores on the placement exams for calculus or statistics upon admission into the college. Mathematics, in the form of calculus or statistics, is required for all natural sciences degrees. To enroll in a calculus or statistics course in college, students must first take the mathematics placement exam. Information about scores necessary for placement are posted by the Student Division (<http://cns.utexas.edu/students/incoming-students/assessments>).

## Internal Transfer

Students enrolled in other colleges or schools at the University may apply by April 15 to be considered for admission into an entry-level major in the following fall semester. If April 15 falls on a weekend or an official university holiday, the application is due on the next business day.

Admission to the college is limited and competitive. To be competitive, students should:

1. Complete a minimum of twenty-four semester hours in residence
2. Achieve a grade point average of at least 3.00 in residence
3. Complete one of the following courses in residence with a grade of at least B-: Mathematics 408C, 408D, 408K, 408L, 408M, 408N, 408S, or Statistics and Data Sciences 302.
4. Complete two of the following courses in residence with grades of at least B-: Biology 311C, Chemistry 301, 302, Physics 303K, and 303L, or majors level equivalents.
5. Submit an essay describing how the intended major would impact achievement of the educational and career goals.

Students may also submit evidence of scientific achievements in the form of a resume or other document, if desired.

## External Transfer

Students enrolled at other universities who wish to enter the College of Natural Sciences must apply for transfer admission through the Office of Admissions. Students must meet transfer admission deadlines and requirements.

Admission to the college is limited and competitive. To be competitive, students should:

1. Complete a minimum of thirty transferable semester hours.
2. Achieve a grade point average of at least 3.00
3. Complete one of the following courses with a grade of at least *B*:- Mathematics 408C, 408D, 408K, 408L, 408M, 408N, 408S, and Statistics and Data Sciences 302.
4. Complete two of the following courses with grades of at least *B*:- Biology 311C, Chemistry 301, CH 302, Computer Science 311, 312, Physics 303K, and 303L, or majors level equivalents.
5. Submit an essay describing how the intended major would impact achievement of the educational and career goals.

Meeting all of the criteria does not guarantee admission. Students who do not meet all of the criteria are welcome to apply. Students may also submit evidence of scientific achievements in the form of a resume or other document, if desired.

## The Entry-Level Major

All new freshman and transfer students are admitted into the College of Natural Sciences in an entry-level major. After completing a specified set of entry-level mathematics and science courses required for the degree with a grade of at least *C*- in each course, students are admitted to the major and option they plan to pursue unless the major or option has special admission-to-major requirements.

Students who wish to pursue computer science but who were not admitted to the entry-level major by the Office of Admissions must have a minimum overall grade point average of 2.50 in residence at the University to transfer into the entry-level major. If a student completes transfer courses approved as substitutes for the entry-level courses, he or she may also count the grades of the approved substitutes toward the minimum overall grade point average of 2.50 for admission into the entry-level major. A student who is not admitted may submit an appeal to the department for consideration.

## Adding a Simultaneous Major or Changing Majors

Students interested in declaring a simultaneous major must first discuss the impact of the simultaneous major on their progress toward degree and develop a timely graduation plan with their academic advisers. Students approved to declare a simultaneous major must follow the application procedure and meet admission requirements that have been established for the simultaneous major. At minimum, students must complete thirty semester hours of coursework in residence at the University. Students interested in changing majors must meet the entry-level or admission requirements of the major they wish to enter.

## Admission-to-Major Requirements

### The Major in Computer Science

Several programs are available to undergraduates who wish to major in computer science. Each program involves an admission process in addition to the student's application for admission to the University. All students may apply to the University as entry-level computer science majors and later seek admission to one of the computer science programs as described in this section; those seeking admission to the Turing Scholars program may also apply to that program when they apply for admission to the University. Students who were not admitted to the entry-level major by the Office of Admissions must have a minimum overall grade point average of 2.50 in residence at the University to transfer into the entry-level major. A student who is not admitted may submit an appeal to the department for consideration.

Admission requirements for the Bachelor of Arts with a major in computer science, the Bachelor of Science and Arts with a major in computer science, the Bachelor of Science in Computer Science, option I, and the Integrated Program are given below. Those for the Bachelor of Science in Computer Science, option II, Turing Scholars honors, and option III, computer science honors, are given in Academic Policies and Procedures (p. 535).

### Bachelor of Arts; the Bachelor of Science and Arts; and the Bachelor of Science in Computer Science, Option I and V

To apply for admission to the Bachelor of Arts with a major in computer science, the Bachelor of Science and Arts with a major in computer science, or the Bachelor of Science in Computer Science, option I and option V degree programs, the student must earn a grade of at least *C*- in each of three entry-level courses: Computer Science 311 or 311H, Computer Science 312 or 312H, and 314 or 314H. It is recommended that he or she complete all of the entry-level courses in residence at the University. However, he or she may request that transfer courses be approved as substitutes for the entry-level courses. The letter grades for approved transfer courses will be used in combination with entry-level courses taken in residence to calculate the grade point average required for admission to the major. He or she must earn a grade point average of at least 2.75 in the three entry-level courses taken in residence or out of residence, and a grade point average of at least 2.00 in all courses taken in residence. A student who is not admitted may submit an appeal to the department for consideration. These requirements apply to entry-level computer science students seeking admission to the Bachelor of Arts major in Computer Science, the Bachelor of Science and Arts major in Computer Science, and the Bachelor of Science in Computer Science, option I and option V.

Students are evaluated after the end of each fall semester, spring semester, and summer session by the Department of Computer Science Admission Committee. Students should consult advisers in the College of Natural Sciences Department of Computer Science for information about admission to the major.

### The Integrated Program in Computer Science

The Integrated Program is a curriculum of undergraduate and graduate coursework that allows the student to earn the Bachelor of Science in Computer Science and the Master of Science in Computer Science, the Master of Science in Information Studies, or the Master of Science in Computational Science, Engineering, and Mathematics degrees at the same time. The integrated Master of Science in Computer Science includes the same coursework as the traditional master's degree program, as well as the opportunity for research. The integrated Master of Science in Information Studies allows students to choose a pathway for completing a capstone and electronic portfolio comprised of a professional experience project, a master's report, or a thesis. The integrated Master of Science in Computational Science, Engineering, and Mathematics includes the same coursework as the traditional computational sciences, engineering and mathematics master's degree program and also offers opportunity for research.

Students in the Integrated Program are expected to become leaders in the profession. Highly motivated students with the personal qualities and intellectual capacity to establish successful careers in higher education and industry are encouraged to apply.

Undergraduates typically follow option I, II, or III for their first three years, then enter the Integrated Program in their fourth year. Admission is granted only for the fall semester; January 2 is the application deadline for those who wish to begin the program the following fall. By the end of the spring semester in which they apply, students must have completed

at least sixty semester hours of coursework, including Computer Science 345 or 345H, 429 or 429H, and 353.

Admission is based on the applicant's grade point average, letters of recommendation, statement of purpose, and SAT Reasoning Test or ACT scores, as well as other relevant examples of academic ability and leadership. An applicant with a University grade point average of less than 3.50 is unlikely to be admitted. Admission may be restricted by the availability of instructional resources. Application materials and information about deadlines are published by the Department of Computer Science, available at <http://www.cs.utexas.edu/>.

Before beginning the fifth year, students in the Integrated Program must be admitted to the Graduate School and the graduate program in the Department of Computer Science, the School of Information, or the Institute of Computational Science, Engineering, and Mathematics. Application forms must be completed by January 2 of the student's fourth year. Before the application deadline, students must have completed the prescribed work common to all Bachelor of Science in Computer Science options. They must earn an acceptable score on the Graduate Record Examinations General Test (GRE) and must have their test scores reported to the University. Students usually take the GRE in the fall semester of their fourth year.

## The Coordinated Program in Dietetics

Freshman and transfer applicants to the University who plan to enter the Coordinated Program in Dietetics (CPD) should begin in the entry-level major in nutrition. When they have met the requirements described below, students may apply for admission to the CPD.

Prior to applying for admission to the CPD, students must complete at least sixty semester hours of the coursework required for the Bachelor of Science in Nutrition, option I, including Biology 325 or 325H, and 365S; Biochemistry 369; and Nutrition 307, 107L, 312 or 312H, 112L or 312R, 315, and 326. A list of other recommended courses is available from the School of Human Ecology. Students must have a grade point average of at least 2.70 in coursework taken in residence at the University. Students should consult advisers in the School of Human Ecology for information about the application process and deadlines. Application materials are available from the school.

The number of applicants to the CPD may exceed the number that can be adequately instructed by the faculty and accommodated within available facilities. Admission decisions are based on the student's biology, chemistry, and nutrition grade point average, his or her University grade point average, and other factors. These factors include, but are not limited to, the difficulty of the student's coursework, work or volunteer experience, leadership, commitment to the profession of dietetics, and personal interview. Students whose applications are denied may reapply.

## The Bachelor of Science in Environmental Science

Students must be admitted to the Bachelor of Science in Environmental Science degree program; they may apply for admission after completing the following requirements:

The student must earn a grade of at least C- in Biology 311C, Chemistry 301, Mathematics 408C or 408N; and a grade of at least B- in Geological Sciences 401 or 303. To be competitive for admission, the student must have a grade point average of at least 2.75 in these four courses.

Applications are evaluated after the end of each fall and spring semester. Students whose applications are denied may reapply through the supplemental admission process the following semester. Admission decisions are based on the student's grade point average in the basic sequence courses, his or her University grade point average, and other

factors; these factors include, but are not limited to, the difficulty of the student's course load, course repetitions, and proven mathematical ability. Students should consult advisers in the College of Natural Sciences Transitional Advising Center (TRAC) for information about the application process and application deadlines.

More information about the degree program is given in Bachelor of Science in Environmental Science (p. 534).

## The Bachelor of Science in Neuroscience, Option I

Prior to applying for admission to the Bachelor of Science in Neuroscience, option I, degree program, the student must earn grades of at least B- in Neuroscience 330 or 365R, and 335. Neuroscience 330 or 365R, and 335 must be taken in residence. The student must also complete any of the four following courses, with grades of at least C-: Biology 311C, 311D, 315H, 325H; Chemistry 301, 301H, 302, 302H, and 204; Mathematics 408C, 408D, 408N, 408S, 408M, 427K, and 427L; and Physics 301, 316, 303K, 303L, 317K, and 317L. To be competitive for admission, the student should have a combined grade point average of at least 3.00 in the six courses required for admission. Entry-level majors are encouraged to take Neuroscience 330 in the fall of their first year, and Neuroscience 335 in the spring of their first year.

To apply, the student should consult advisers in the Center for First-Year Advising for information about the application process and deadlines. Applications are evaluated after the end of each fall and spring semester by the Department of Neuroscience. Students whose applications are denied may reapply twice through the supplemental admission process. Admission decisions are based on a number of factors including, but not limited to, the student's grade point average, course load difficulty, and written statement about their commitment to a future in the field of neuroscience.

## The Major in Public Health

To apply for admission to the public health degree program, the student must have earned a grade of at least C- in Biology 311C and 311D or 315H; Chemistry 301 or 301H and 302 or 302H; and Mathematics 408C or 408N; and a grade of at least B- in Public Health 317. To be competitive for admission, the student must have a grade point average of at least 2.75 in these six courses.

Applications are evaluated after the end of each fall and spring semester. Students whose applications are denied may reapply through the supplemental admission process the following semester. Admission decisions are based on the student's grade point average in the basic sequence courses, his or her University grade point average, and other factors; these factors include, but are not limited to, the difficulty of the student's course load, course repetitions, and proven mathematical ability. Students should consult advisers in the College of Natural Sciences Center for First-Year Advising for information about the application process and application deadlines.

Students who plan to follow option II, public health honors, must be admitted to the Dean's Scholars Honors Program (p. 536).

To apply for admission to option III, the student must already be admitted to option I. The option I student may apply for admission to option III upon completion of the fourth semester with a grade point average of at least 3.40. The eligible option I student may apply to option III and the Master of Public Health program following the admission schedule and policies of the School of Public Health at the University of Texas Health Sciences Center at Houston. The application is typically completed during the fifth semester of the Bachelor of Science in Public Health, Option I. Admission to option III requires approval by the Department of Molecular Biosciences

at the University of Texas at Austin and the School of Public Health at the University of Texas Health Sciences Center at Houston at the Austin Regional campus.

## The Major in Textiles and Apparel

### Admission to the Field Experience Programs

All textiles and apparel students must complete a field experience. The internship experience facilitates learning through the blending of theory and practice. The program is a cooperative effort involving three major participants: the student, the sponsoring firm or site supervisor, and the faculty coordinator.

The primary purpose of the program is to provide students with a realistic view of their profession through actual work experience in a professional environment. Experiences in the field setting challenge the student developmentally by providing an opportunity for both cognitive and effective learning, as well as fundamental changes in attitude, work habits, and maturity level.

Before beginning the internship, students will be expected to participate in interviews with representatives from participating sites. These interviews are designed to prepare students for a competitive marketplace. To ensure a placement that best meets the professional needs of each student, the program partners with organizations and support industries over a wide geographic area. The program director must approve all sites prior to a student's acceptance of the internship. Once a student accepts an approved internship, the placement is binding. Depending on the policy of the host site, the intern may or may not receive compensation. During the internship, the student is responsible for all assignments given by the faculty coordinator and the internship site. The interning student is also responsible for housing, relocation arrangements, and expenses.

Materials, information about deadlines, and directions for application are available from the Director of Internships in Textiles and Apparel.

### Option I: Apparel, Functional, and Technical Design

#### Application Process for Internship

Students must apply and be admitted to the Apparel, Functional, and Technical Design Internship Program the semester before they plan to participate in their internship.

Before applying to the internship program, students must complete the following courses with a grade of at least C- in each: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 316L, 164K (Topic 1: *Flat Pattern*), 264L (Topic 1: *Flat Pattern*), and 355C.

### Internship Semester

Textiles and Apparel 352C. Students may opt to take additional coursework during this semester.

### Option II: Merchandising and Consumer Sciences

#### Application Process for Internship

Students must apply and be admitted to the Merchandising and Consumer Sciences Internship Program the semester before they plan to participate in their merchandising and consumer sciences internship block.

Before applying to the internship program, students must complete the following courses with a grade of at least C- in each: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 316Q, 219C, 119L, 151, and 376. The merchandising and consumer sciences internship block is to be completed during the senior year, serving as the capstone experience for merchandising and consumer sciences majors.

### Internship Semester

The merchandising and consumer sciences internship block is comprised of four internship courses: Textiles and Apparel 315K, 352M, 355P, and 377, as well as a placement in an approved field experience, all taken concurrently. Students may not enroll in additional coursework during the semester.

### Option IV: Textile Conservation and Museum Studies

#### Application Process for Internship

Students must apply and be admitted to the Textile Conservation and Museum Studies Internship Program the semester before they plan to participate in their conservation internship.

Before applying to the internship program, students must complete the following courses with a grade of at least C- in each: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 151, 354C, 354D, 354E, 354F, 355D. The Textile Conservation and Museum Studies Internship is to be completed during the senior year, serving as the capstone experience for textile conservation and museum studies majors.

### Internship Semester

Textiles and Apparel 652C. Students may opt to take additional course work during this semester.

## Academic Policies and Procedures

### Academic Standards

#### Mathematics Placement

Mathematics, in the form of calculus or statistics, is required for all natural sciences degrees. To enroll in a calculus or statistics course in the college, students must first take the mathematics placement exam. Scores necessary for placement into specific mathematics and statistics courses are posted by the Student Division (<http://cns.utexas.edu/students/incoming-students/assessments>). More information about scores and course placement is available from academic advisers.

#### Repetition of a Course

No student may enroll in any course in the College of Natural Sciences more than twice, even if the course is needed to meet degree requirements, without first obtaining the written consent of his or her major adviser and of the department that offers the course; students in colleges other than the College of Natural Sciences need only departmental approval. A symbol of Q or W counts as an enrollment unless it has been approved by the dean's office for nonacademic reasons.

A student may not repeat any course in which he or she has earned a grade of C- or better.

Departments in the college may have additional requirements for students who repeat courses.

#### Concurrent Enrollment

Concurrent enrollment is enrollment simultaneously at the University and at another educational institution or in University Extension. Math and science courses may not be taken concurrently during fall and spring semesters and will not be counted toward a degree unless they are specifically approved in advance by the College of Natural Sciences. The college permits concurrent enrollment during summers without prior approval and during fall and spring semesters with certain restrictions. Students must see their academic advisers to petition for approval. No

more than 30 percent of the semester hours required for any degree in the college may be completed online with University Extension.

## Undergraduates in a Graduate Course

The College of Natural Sciences encourages undergraduates who excel academically and would benefit from further challenges to enroll in graduate courses. With permission, undergraduates may count graduate courses toward their undergraduate degrees or may reserve them for graduate credit. To enroll in a graduate course, undergraduates must meet the University's eligibility requirements and must receive permission from the course instructor, the graduate adviser for the field in which the course is offered, and the college. Undergraduates reserving courses for graduate credit must also receive permission from the graduate dean. More information is given in Coursework in the Graduate School and the School of Law (p. 15).

## Petitions for Degree Requirements

Petitions for exceptions to degree requirements, other than the University-wide core curriculum, are handled through an online petition system. Academic advisers initiate petitions on the student's behalf and route them through departmental faculty advisers. The most common reason for petitioning is to request the substitution of transfer coursework for a specific degree requirement. Final decisions on all petitions are made by the dean's office. Degree requirements are very rarely waived outright.

## Honors

There are several avenues available for undergraduates to achieve honors recognition for exemplary academic ability and performance. They include: University-wide Honors, graduation with University Honors, college-wide honors programs, departmental honors degree options, and completion of departmental honors. University-wide Honors consists of recognition each fall and spring for students who meet the university criteria for University Honors. Graduation with University Honors consists of recognition at the time of graduation to a percentage of the college's graduates for students who meet the University criteria for graduating with University Honors.

The College of Natural Sciences offers Bachelor of Science and Arts and Bachelor of Science honors degree options. These honors degrees are available to students in the Dean's Scholars Program, the Health Science Scholars Program, and the Polymathic Scholars Program. Each program has its own admission process and requirements for participants to remain in good standing. The College of Natural Sciences Honors Center is available for inquires about admission and requirements.

Honors degree options that are sponsored by departments include: Turing Scholars in Computer Science; Honors in Advanced Human Development and Family Sciences Program; and the Honors in Advanced Nutritional Sciences Program.

Lastly, students may earn departmental honors upon graduation through completion and approval of an undergraduate thesis.

## University Honors

Information relating to University Honors can be found in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/university-honors>). In addition, the College of Natural Sciences encourages academic excellence through programs such as the Dean's Scholars Honors Program and Turing Scholars in Computer Science. Students may also graduate with departmental honors as described below and may earn membership in one or more of the honorary scholastic societies open to undergraduates.

## Graduation with University Honors

The University recognizes no more than the top 20 percent of each college's May graduating class as graduating with University Honors. To be eligible, an undergraduate must have completed at least sixty semester hours of coursework in residence at the University. Graduation with University Honors is based on the average of all grades earned in courses taken in residence at the University, whether the courses were passed, failed, or repeated. Courses taken pass/fail are counted in the sixty-hour minimum, but only letter grades (including *F* in pass/fail courses) are used to determine the grade point average.

Detailed requirements for graduation from the College of Natural Sciences with University Honors are given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/honors/graduation-with-university-honors>).

## Dean's Scholars Honors Program

The Dean's Scholars Honors Program is a comprehensive honors degree program for highly motivated and talented students. The key features of the program are a first-semester research methods course; a breadth requirement, usually completed during the first four semesters, that exposes students to various forms of scientific inquiry; and at least two semesters of supervised research and writing that culminate in an honors thesis. Students in good standing in the Dean's Scholars Honors Program may follow the honors option for the appropriate bachelor of science degree. The honors degree option is available in most fields in the college.

Application to the Dean's Scholars Honors Program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available in the program office and on the Dean's Scholars Web site (<http://cns.utexas.edu/ds>). Students may enter the program as freshmen, as transfer students, or after they have enrolled at the University. In general, students who have completed more than fifty semester hours of college coursework are not considered for admission.

Factors in the admission decision are the student's high school and/or University grades, class rank, the rigor of the courses the student has taken, the quality of the required application essays, faculty recommendations, and the student's interest and aptitude in math and science as demonstrated by relevant extracurricular activities.

To remain in good standing in the Dean's Scholars Honors Program, students must maintain an in-residence grade point average of at least 3.25 after thirty hours in residence, of at least 3.40 after sixty hours in residence, and of at least 3.50 after ninety hours in residence. Students who fail to maintain the required grade point average will usually be dismissed from the program. Under special circumstances and at the discretion of the departmental honors adviser, a student may be allowed to continue under academic review.

## Health Science Scholars Program

The Health Science Scholars Program is intended for students whose interest in science is focused on clinical careers and healthcare practice or policy. Health Science Scholars pursue a Bachelor of Science and Arts honors degree and complete a major in a field of study within the College of Natural Sciences, as well as an interdisciplinary minor which complements their scientific interest and prepares them for health professions, policy, or business. Students complete a departmental honors thesis, or a health-related internship/practicum and a thesis that synthesizes and analyzes scholarly literature related to the internship/practicum.

Application to the Health Science Scholars Program is separate from, and in addition to, application to the University. Application materials and

information about deadlines are available on the Health Science Scholars Web site (<http://cns.utexas.edu/honors/honors-programs-center/health-science-scholars>).

## Polymathic Scholars Program

The Polymathic Scholars Program is designed for students with a strong interest in the sciences, but who also have strong scholarly interests beyond their major. Polymathic Scholars design an interdisciplinary minor field of study—a field defined by the students' interests and limited only by their ability to engage them as a scholar. The interdisciplinary minor is an opportunity for the student to explore the impacts of their field of study or a completely different field of interest. Polymathic Scholars pursue a Bachelor of Science and Arts honors degree and complete a thesis that synthesizes and analyzes scholarly literature within their field of study.

Application to the Polymathic Scholars Program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available on the Polymathic Scholars Web site (<http://cns.utexas.edu/honors/honors-programs-center/polymathic-scholars>).

## Turing Scholars in Computer Science

The Department of Computer Science offers a comprehensive honors degree program for highly motivated and talented students. The key features of the program are an intensive, accelerated freshman- and sophomore-year program; special Turing Scholars sections of many advanced computer science courses; a second-semester freshman-year course that introduces students to the research activities of the department; and at least two semesters of supervised research and writing. Upon completion of both a sequence of Turing Scholars courses, approved by the program director, and an approved thesis, students graduate as Turing Scholars in Computer Science.

Students in the Turing Scholars program pursue the Bachelor of Science in Computer Science, option II. Application to the program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available in the Department of Computer Science and on the Turing Scholars Web site (<http://cns.utexas.edu/honors/honors-programs-center/turing-scholars>). Students may enter the program either as freshmen or after they have enrolled at the University. Factors in the admission decision are the student's high school grades and class rank, the rigor of the courses the student has taken, the quality of the required application essays, and the student's interest and aptitude in math, science, and computing as demonstrated by extracurricular activities.

More information about the degree program is given in the Degrees and Programs (p. 560) section.

## Honors In Advanced Human Development and Family Sciences Program

The Department of Human Development and Family Sciences offers a comprehensive honors degree program for highly motivated and talented students. The key features of the program are a core of small, select Human Development and Family Sciences courses that expose students to the research activities of the department, and at least two semesters of supervised research and writing that culminates in an honors thesis and presentation of student research in an approved public forum. Application to the Human Development and Family Sciences Honors Program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available in the Department of Human Development and Family Sciences and online (<http://he.utexas.edu/hdfs/undergraduate-program/honors>). Students may enter the program as freshmen, as transfer students, or after they

have enrolled at the University. Factors in the admission decision are the student's high school and/or University grades, class rank, the rigor of the courses the student has taken, faculty recommendations, standardized test scores and the student's interest and aptitude in math and science as demonstrated by relevant extracurricular activities.

More information about the degree program is given in the Degrees and Programs (p. 566) section.

## Honors In Advanced Nutritional Sciences Program

The Department of Nutritional Sciences offers a comprehensive honors degree program for highly motivated and talented students. The key features of the program are a core of select nutrition courses that expose students to the research activities of the department; and at least two semesters of supervised research and writing that culminates in an honors thesis and presentation of student research in an approved public forum. Application to the Honors in Advanced Nutritional Sciences Program is separate from, and in addition to, application to the University. Application materials and information about deadlines are available in the Department of Nutritional Sciences and online (<http://he.utexas.edu/ntr/undergraduate-program/degree-options/option-iv-hans>). Students may enter the program as freshmen, as transfer students, or after they have enrolled at the University. Factors in the admission decision are the student's high school and/or University grades, class rank, the rigor of the courses the student has taken, the quality of the required application essays, faculty recommendations, and the student's interest and aptitude in math and science as demonstrated by relevant extracurricular activities.

More information about the degree program is given in the Degrees and Programs (p. 574) section.

## College Honors

### Departmental Honors

Most departments in the College of Natural Sciences offer departmental honors programs to their majors. Minimum requirements for the completion of all such programs include (1) a University grade point average of at least 3.00; (2) a three-semester-hour thesis or research project, or a reasonable equivalent, with a grade of at least *B-*; some programs may require a higher grade; (3) completion, with a grade point average of at least 3.50, of the coursework required for a major in the field in which the student seeks honors; and (4) completion at the University of at least sixty semester hours of coursework counted toward the degree.

The statement "Special Honors in (name of field)" appears on the transcript of each graduate certified as having completed the honors program.

### Astronomy Departmental Honors

Majors who plan to seek special departmental honors in astronomy should apply to the honors adviser for admission to the honors program no later than the beginning of the fourth year; application by the end of the third year is recommended. A University grade point average of at least 3.00 and a combined University grade point average in physics and astronomy of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) Astronomy 379H, *Honors Tutorial Course*, in which the student completes a supervised research project; the student may take a second semester of Astronomy 379H if necessary to complete the project; two semesters in this course may be counted toward the major requirement; (2) a written report and oral presentation on the research project approved by the research supervisor and the honors adviser; (3) a University grade point average of at least 3.00 and a combined University grade point average

in physics and astronomy of at least 3.50; and (4) completion at the University of at least sixty semester hours of coursework counted toward the degree.

## Biochemistry Departmental Honors

Majors who plan to seek special departmental honors in biochemistry should apply to the honors adviser for admission to the honors program no later than the beginning of the senior year. A University grade point average of at least 3.00 and a grade point average in biochemistry and chemistry of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Biochemistry; (2) two semesters of Chemistry 379H, *Chemistry Honors Tutorial Course*; (3) a thesis and a presentation based on research; the research topic and the thesis must be approved by the supervising faculty member and the undergraduate faculty adviser; (4) a University grade point average of at least 3.00 and a grade point average in biochemistry and chemistry of at least 3.50; (5) completion at the University of at least sixty semester hours of coursework counted toward the degree; and (6) approval of the honors adviser.

## Biology Departmental Honors

Majors who plan to seek special departmental honors in biology should apply to the honors adviser for admission to the honors program no later than the beginning of the senior year. A University grade point average of at least 3.00 and a grade point average in biology of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors, which are in addition to the requirements of the major, are (1) two semesters of Biology 379H, *Honors Tutorial Course*; (2) a thesis based on original research and approved by the supervising faculty member and the honors adviser; honors students in the human biology option must select both a thesis supervisor and a second reader, one of whom must be a tenure-track faculty member or senior lecturer in the School of Biological Sciences; (3) a University grade point average of at least 3.00 and a grade point average in biology of at least 3.50; and (4) completion at the University of at least sixty semester hours of coursework counted toward the degree.

## Chemistry Departmental Honors

Majors who plan to seek special departmental honors in chemistry should apply to the honors adviser for admission to the honors program no later than the beginning of the senior year. A University grade point average of at least 3.00 and a grade point average in chemistry of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Chemistry; (2) two semesters of Chemistry 379H, *Chemistry Honors Tutorial Course*; (3) a thesis and a presentation based on research; the research topic and the thesis must be approved by the supervising faculty member and the undergraduate faculty adviser; (4) a University grade point average of at least 3.00 and a grade point average in chemistry of at least 3.50; (5) completion at the University of at least sixty semester hours of coursework counted toward the degree; and (6) approval of the honors adviser.

## Computer Science Departmental Honors

Students seeking special departmental honors must meet with a faculty adviser at least two semesters before they plan to graduate to discuss potential research topics and the requirements for receiving special departmental honors.

The requirements for graduation with special departmental honors are (1) Computer Science 379H, *Computer Science Honors Thesis*, with a grade of at least B-; (2) a University grade point average of at least 3.00 and a grade point average in computer science of at least 3.50; (3) a thesis, written on the subject of the student's research and approved in comprehensive examination by a committee consisting of at least three faculty members, including the honors adviser; and (4) completion at the University of at least sixty semester hours of coursework counted toward the degree.

## Human Development and Family Sciences Departmental Honors

Majors who plan to seek special departmental honors in human development and family sciences should apply to the Departmental Honors Committee for admission to the honors program no later than the beginning of the senior year. The requirements for admission are a University grade point average of at least 3.00 and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Human Development and Family Sciences; (2) Human Development and Family Sciences 379H, *Honors Tutorial Course*; (3) completion of an honors thesis and an accompanying presentation, both of which must be approved by a committee consisting of the research supervisor and another faculty member; (4) a University grade point average of at least 3.00, a grade point average in Human Development and Family Sciences 379H of at least 3.00, and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree and for honors; and (5) completion at the University of at least sixty semester hours of coursework counted toward the degree.

## Human Ecology Departmental Honors

Majors who plan to seek special departmental honors in human ecology must follow the requirements of the departmental honors program in human development and family sciences, nutrition, or textiles and apparel.

## Mathematics Departmental Honors

Majors who plan to seek special departmental honors in mathematics should apply to the honors adviser for admission to the honors program at least two semesters before their expected graduation. A University grade point average of at least 3.00 and a grade point average in mathematics of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) Mathematics 379H, *Honors Tutorial Course*; (2) a thesis on the subject of the student's research or project approved in comprehensive examination by a committee consisting of at least three faculty members; (3) a University grade point average of at least 3.00 and a grade point average in mathematics of at least 3.50; and (4) completion at the University of at least sixty semester hours of coursework counted toward the degree. In order to fulfill the first requirement, students must meet the prerequisite of Mathematics 379H—Mathematics 365C, 367K, 373K, or 374G with a grade of at least A-, and another of these courses with a grade of at least B-; and consent of the honors adviser.

## Nutrition Departmental Honors

Majors who plan to seek special departmental honors in nutrition should apply to the Departmental Honors Committee for admission to the honors program no later than the beginning of the senior year. The requirements for admission are a University grade point average of at least 3.00 and a

grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Nutrition; (2) Nutrition 379H, *Honors Tutorial Course*; this course may be repeated once for credit; (3) completion of an honors thesis and an accompanying presentation, both of which must be approved by a committee consisting of the research supervisor and another faculty member; (4) a University grade point average of at least 3.00, a grade point average in Nutrition 379H of at least 3.00, and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree and for honors; and (5) completion at the University of at least sixty semester hours of coursework counted toward the degree.

## Physics Departmental Honors

Majors who plan to seek special departmental honors in physics should apply to the honors adviser for admission to the honors program near the end of the third year. A University grade point average of at least 3.00 and a grade point average in physics of at least 3.50 are required for admission.

The requirements for graduation with special departmental honors are (1) Physics 379H, *Honors Tutorial Course*; (2) a written honors thesis approved by faculty readers assigned by the department; (3) a University grade point average of at least 3.00 and a grade point average in physics of at least 3.50; and (4) completion at the University of at least sixty semester hours of coursework counted toward the degree.

## Textiles and Apparel Departmental Honors

Majors who plan to seek special departmental honors in textiles and apparel should apply to the Departmental Honors Committee for admission to the honors program no later than the beginning of the senior year. The requirements for admission are a University grade point average of at least 3.00 and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree.

The requirements for graduation with special departmental honors are (1) all requirements for the degree of Bachelor of Science in Textiles and Apparel; (2) Textiles and Apparel 379H, *Honors Tutorial Course*; this course may be repeated once for credit; (3) completion of an honors thesis and an accompanying presentation, both of which must be approved by a committee consisting of the research supervisor and another faculty member; (4) a University grade point average of at least 3.00, a grade point average in Textiles and Apparel 379H of at least 3.00, and a grade point average of at least 3.50 in coursework in the School of Human Ecology that is required for the degree and for honors; and (5) completion at the University of at least sixty semester hours of coursework counted toward the degree.

# Graduation

## Special Requirements of the College

All students must fulfill the General Requirements (p. 17) for graduation. Students in the College of Natural Sciences must also fulfill the following requirements.

1. The University requires that the student complete in residence at least sixty semester hours of the coursework counted toward the degree. For the Bachelor of Arts, Plan I, these sixty hours must include at least eighteen hours in the major.
2. All University students must complete in residence at least twenty-four of the last thirty semester hours counted toward the degree.

For students seeking the Bachelor of Science in Medical Laboratory Science, this rule applies to the academic work completed at the University.

3. The University requires that at least six semester hours of advanced coursework in the major be completed in residence. Additional hours in the professional or major sequence in many cases are required by individual natural sciences degree programs.
4. A candidate for a degree must be registered in the College of Natural Sciences either in residence or in absentia the semester or summer session the degree is to be awarded. Graduation applications must be submitted no later than the date given in the academic calendar. The application and supplemental in absentia instructions are available via the College of Natural Sciences Web Site (<http://cns.utexas.edu/students/degrees-majors-advising/graduation>).

## Applying for Graduation

An electronic degree audit is created for each student each semester. The student should view the audit through IDA, the University's Interactive Degree Audit system. The degree audit tells the student the courses he or she must take and the requirements he or she must fulfill to receive the degree. The degree audit normally provides an accurate statement of requirements, but the student is responsible for knowing the requirements for the degree as stated in a catalog under which he or she is eligible to graduate and for registering so as to fulfill all these requirements. The student should speak with his or her assigned academic adviser before registering if in doubt about any requirement.

In the semester or summer session in which the degree is to be conferred, the candidate must be registered at the University and must file an online graduation application form via the graduation section of the College of Natural Sciences Web Site (<http://cns.utexas.edu/students/degrees-majors-advising/graduation>). This should be done during the first week of classes, if possible, but in no event later than the deadline to apply for an undergraduate degree; this date is given in the official academic calendar. No degree will be conferred unless the graduation application form has been filed on time.

## Degrees and Programs

The College of Natural Sciences offers the following undergraduate degrees:

1. Bachelor of Science and Arts, with majors in astronomy, biochemistry, biology, chemistry, computer science, human development and family sciences, human ecology, nutrition, mathematics, neuroscience, and physics.
2. Bachelor of Science degrees in astronomy, biochemistry, biology, chemistry, computer science, environmental science, human development and family sciences, mathematics, medical laboratory science, neuroscience, nutrition, physics, public health, and textiles and apparel.
3. Bachelor of Arts, Plan I, with majors in astronomy, biochemistry, biology, chemistry, computer science, human ecology, mathematics, and physics.

The Bachelor of Science and Arts degree offers a cross-disciplinary experience for students who want to combine a strong core science experience with coursework in areas such as business, communications, fine arts, and the liberal arts. Students choose a major comprised of forty-eight hours of science and mathematics. Students choose either a fifteen-hour minor in a field of study outside of sciences, or an eighteen to twenty-four hour transcript-recognized certificate such as business foundations, core texts and ideas (studying books that shaped western

civilization and thought), food and society, forensic science, pre-health professions, teaching, and textile conservation, among others.

The Bachelor of Science degrees provide deep exploration of science fields for students preparing for graduate science programs and careers as specialized scientists. The degrees contain between eighty to ninety hours of science and mathematics, and typically have multiple specialized options that reflect niche areas of study.

The Bachelor of Arts, Plan I, is shared with the College of Liberal Arts.

A student may not earn more than one Bachelor of Arts, Bachelor of Science and Arts, or Bachelor of Science in Environmental Science degree from the University. A student may earn only one undergraduate degree in a particular field of study from the College of Natural Sciences. A student who holds a Bachelor of Arts or a Bachelor of Science and Arts degree from the University may earn a second major designation in another field of study that will appear on the University transcript.

The title of a graduate's degree appears on his or her diploma, but the major does not. The degree, the major, and the transcript-recognized certificate appear on the graduate's University transcript.

A natural sciences student who wishes to add another major in the college must meet the criterion described in the Admission and Registration (p. 532) section.

## Applicability of Certain Courses

### Physical Activity Courses

Physical activity (PED) courses and Kinesiology 119 may not be counted toward a degree in the College of Natural Sciences. However, they are counted as courses for which the student is enrolled, and the grades are included in the grade point average.

### ROTC Courses

ROTC units are maintained on campus by the Departments of Air Force Science, Military Science, and Naval Science. Information about each program is available from the chair of the department.

Nine semester hours of designated University of Texas at Austin coursework in air force science, military science, or naval science may be counted toward any degree in the College of Natural Sciences.

### Courses Taken on the Pass/Fail Basis

No more than sixteen semester hours taken on the pass/fail basis may be counted toward the Bachelor of Arts, Plan I. No more than six semester hours taken on the pass/fail basis may be counted toward the Bachelor of Science and Arts degree and the Bachelor of Science degrees. In general, only electives may be taken on the pass/fail basis. Complete rules on registration on the pass/fail basis are given in the *General Information Catalog*.

### Courses in a Single Field

For the Bachelor of Arts, Plan I, no more than thirty-nine hours may be counted in any one field of study, including the major, unless major requirements state otherwise. Additionally, for the Bachelor of Arts, Plan I, no more than thirty-nine hours may be counted in any one college or school other than the College of Liberal Arts or the College of Natural Sciences.

### College Algebra

Algebra courses at the level of Mathematics 301 or the equivalent may not be counted toward a degree in the College of Natural Sciences.

## Transcript-Recognized Certificate Programs

Undergraduate certificate programs encourage students to explore academic areas that support and extend their degree plans. The following certificates require at least eighteen semester hours of coursework, some of which may also be used to fulfill degree requirements. Undergraduates who complete the certificate requirements in conjunction with their degree requirements or within one year after earning the degree will receive a certificate and recognition on their University transcript. A maximum of nine hours in the certificate program may be taken after completion of the undergraduate degree. At least half of the required coursework in the certificate program must be completed in residence at the University.

### Certificate in Computational Science and Engineering

Information relating to the Certificate in Computational Science and Engineering (p. 14) can be found in The University section.

### The Elements of Computing Program

The Elements of Computing Program, administered by the Department of Computer Science, is designed to support computational work in disciplines other than computer science and to provide students with skills in the use of computer applications. Any non-computer science major may take any elements of computing course for which he or she meets the prerequisite. No application process is required.

To earn the Elements of Computing Certificate, students must complete eighteen semester hours of coursework with a grade of at least C- in each course. The following coursework is required:

- One core course: Computer Science 303E, *Elements of Computers and Programming*, or the equivalent
- Five of the following courses, including at least three upper-division courses:
  - Computer Science 301K, *Foundations of Logical Thought*
  - Computer Science 302, *Computer Fluency*
  - Computer Science 313E, *Elements of Software Design*
  - Computer Science 320N, *Topics in Computer Science for Nonmajors*
  - Computer Science 324E, *Elements of Graphics and Visualization*
  - Computer Science 326E, *Elements of Networking*
  - Computer Science 327E, *Elements of Databases*
  - Computer Science 329E, *Topics in Elements of Computing*

With the approval of the certificate program faculty committee, other appropriate courses may be counted toward the elective requirement.

### Forensic Science Certificate

The Forensic Science Certificate provides an interdisciplinary perspective for students interested in careers in forensic science.

Students seeking employment in forensic science laboratories upon graduation are encouraged to select biology and chemistry courses. Some of these courses may require introductory biology and chemistry courses as prerequisites.

No admission to the certificate is required. Students must contact the dean's office in the College of Natural Sciences to apply for the certificate during the semester in which they are completing the requirements. The certificate consists of eighteen hours, including:

1. Three to six hours of forensic science, chosen from Anthropology 301, 324L (approved topics), and 366.

2. Six to twelve hours chosen from any of the following courses relevant to forensic science:
  - a. Criminalistics: Sociology 302, 325K, and 325L
  - b. Behavioral Science: Psychology 301, 308, 319K, and 352
  - c. Pharmacology: Neuroscience 365D
3. To achieve the minimum of eighteen hours required for the certificate, up to eight hours may be selected from any of the following courses:
  - a. Anatomy and Physiology: Biology 309D or 365S, 446L, 361T, 165U, and 371L
  - b. Chemistry: Chemistry 220C, 320M, 320N, 455, and Biochemistry 369
  - c. Genetics and Microbiology: Biology 325, 325L, 325T, 226L, and 326R
  - d. Statistics and Computation: One course chosen from the following: Biology 321G, Statistics and Data Sciences 302, 304, 306, 328M, or Mathematics 316.

## Certificate in Scientific Computation

The Certificate in Scientific Computation helps undergraduates equip themselves with the mathematical, statistical, and computer-based tools necessary to investigate complex systems in a variety of applications. It is designed to appeal to students across the University in science, engineering, economics, premedicine, sociology, and many other disciplines. The program is administered by the Department of Statistics and Data Sciences. To be admitted, a student must be in good standing in an approved undergraduate degree program and must have earned a grade of at least C- in each certificate course he or she has completed. Students may apply for admission to the program at any point in their undergraduate study; they are encouraged to apply as early as possible so that they can be advised throughout the program.

The following coursework is required. Students must also complete Mathematics 408D or 408M as a prerequisite. No single course or topic may be used to meet more than one of these requirements.

1. Statistics and Data Sciences 222
2. One course in linear algebra, discrete mathematics, or differential equations chosen from the following: Mathematics 340L, 341, 362M, 372K, Statistics and Data Sciences 329C
3. Two courses in scientific computing, chosen from two of the following areas:
  - a. *Numerical methods*: Aerospace Engineering 211K, Chemical Engineering 348, Computer Science 323E, 323H, 367, Mathematics 348, Petroleum and Geosystems Engineering 310, Statistics and Data Sciences 335
  - b. *Statistical methods*: Biomedical Engineering 335, Electrical Engineering 351K, Mathematics 358K, 378K
  - c. *Other computing topics*: Computer Science 324E, 327E, 329E (approved topics), 377, Mathematics 346, 362M, 368K, 372K, 375T (approved topics), 376C, Mechanical Engineering 367S, Statistics and Data Sciences 329D, 374C, 374D, 374E
4. One of the following courses in applied computational science: Aerospace Engineering 347, Biology 321G, Biomedical Engineering 342, 346, 377T (approved topics), Chemistry 368 (approved topics), Computer Science 324E, 329E (approved topics), Economics 363C, Electrical Engineering 379K (approved topics), Geological Sciences 325K, Mathematics 375T (approved topics), 374M, Physics 329
5. An independent research course: Statistics and Data Sciences 479R.

## Evidence and Inquiry Certificate\*

The Evidence and Inquiry Certificate allows students to design an area of study shaped by questions that require evidence and methodologies

outside their major. Students work with faculty and academic consultants to identify interests, map them onto academic disciplines at the University, and determine questions related to those interests that might be answerable by research that combines expertise from at least two disciplines. Students describe their area of study, identify primary questions, name two University of Texas at Austin faculty members with research experience relevant to their field, and justify the courses they would take in a written proposal that must be approved by a member of program's faculty panel. Students have the opportunity to present an original research project in a capstone seminar. Those who plan to pursue the certificate should apply to the program for admission no later than the end of their third long semester. More information about the Evidence and Inquiry Certificate is available on the College of Natural Sciences Web site (<https://cns.utexas.edu/students/degrees-majors-advising/transcripted-certificates>).

The certificate program requires eighteen semester hours of coursework, including at least nine hours completed in residence. Students must meet the following requirements:

1. Critical thinking or research methods course from an approved list available from the adviser. The approved list may include Undergraduate Studies 303, (*One of the following subjects: Originality in the Arts and Sciences; Research Methods; or Critical Thinking for the 21st Century*). Other subjects or courses may be eligible for substitution by petition.
2. Four additional courses, including at least six semester hours of upper-division coursework, from the student's approved evidence and inquiry area of study.
3. *Senior Capstone Seminar*: Natural Sciences 371

In the College of Natural Sciences, the Evidence and Inquiry Certificate may be used to complement any major. Some certificate courses will also fulfill degree requirements established by the student's major department and are given later in this section; however, some of the eighteen hours required for the certificate may be in addition to the number of hours required for the degree.

## Food and Society Certificate

Though food-related issues vary widely in focus, they are all linked by their complexity and are deeply interdisciplinary nature, each relating to topics of health and nutrition, genetics, politics, culture, the environment, economics, and business. Students will be able to appreciate the full range of these interdisciplinary ties and apply new perspectives to their primary academic majors and careers.

Students completing the certificate will be able to apply a more comprehensive understanding of the implications of their food-related actions and decisions; find better solutions to today's complex problems; formulate more effective public policy; become better informed and active citizens; and make healthier choices for themselves and their families.

No admission to the certificate is required. Students must contact the advising office in the School of Human Ecology to apply for the certificate the semester before the certificate requirements are met. The certificate consists of eighteen hours, of which nine hours must be in upper-division coursework. Courses must be completed with minimum grades of at least C- unless the course is offered only on the pass/fail basis.

Some of the courses may contain prerequisites that are in addition to the coursework for the certificate.

1. Three hours of introductory nutrition, chosen from Nutrition 306, 312, or 312H.

2. Fifteen hours selected from a minimum of two themes chosen from a, b, and c. No more than nine hours in a single theme may be applied toward the certificate.
  - a. Nutrition and Health
    - i Nutrition 307, *Introductory Food Science*
    - ii Nutrition 315, *Nutrition through the Life Cycle*
    - iii Nutrition 218, *Assessment of Nutritional Status* and Nutrition 118L, *Assessment of Nutritional Status Laboratory*
    - iv Nutrition 330, *Nutrition Education and Counseling*
    - v Nutrition 321, *International Nutrition: The Developing World*
    - vi Nutrition 334, *Foodservice Systems Management*
    - vii Nutrition 353, *Field Experience in International Nutrition*
    - viii Nutrition 365 (Topic 4: Obesity and Metabolic Health)
    - ix Sociology 308S, *Introduction to Health and Society*
    - x Nursing 309, *Global Health*
  - b. Culture and History
    - i Nutrition 316, *Culture and Food*
    - ii American Studies 370 (Topic 26: American Food)
    - iii Anthropology 307, *Culture and Communication*
    - iv Asian Studies 379 (Topic 7: *Cuisine and Culture in Asia*)
    - v Classical Civilization 340 (Topic 6: *Food, Health, and Culture in the Ancient Mediterranean*)
    - vi Classical Civilization 348 (Topic 14: *Ancient Greek Medicine*)
  - c. Politics, Economics, and Environment
    - i Nutrition 331, *International Nutrition: Social and Environmental Policies*
    - ii Nutrition 332, *Community Nutrition*
    - iii Geography 331K, *Nature, Society, and Adaptation*
    - iv Geography 344K, *Global Food, Farming, and Hunger*
    - v Geography 339K, *Environment, Development, and Food Production*
    - vi Government 370L (Topic 21: *Politics of Food in America*)
    - vii Marine Science 308, *Humans and a Changing Ocean*
    - viii Marine Science 367K, *Human Exploration and Exploitation of the Sea*

## Pre-Health Professions Certificate

The Pre-Health Professions Certificate assists students in preparing for post-baccalaureate, healthcare professional programs.

Students are encouraged to work closely with the Health Professions Office to select healthcare themes relevant to their professional career goals. Some of the courses may contain prerequisites that are in addition to the coursework for the certificate.

Majors in the College of Natural Sciences must seek the Science Major Track. The composition of the science major track is one-half science coursework and one-half coursework from a theme related to healthcare. No admission to the track is required.

Majors outside of the College of Natural Sciences must seek the Non-Science Major Track. The composition of the non-science major track is science coursework necessary for admission to post-baccalaureate, healthcare professional programs. Non-science majors may apply to the certificate program upon completion of the following courses with grades of at least *B-*: Chemistry 301 and completion of one of the following: Statistics and Data Sciences 302, Mathematics 408C, 408K, or 408N. Upon admission, the ability to progress in the certificate is dependent on completion of the certificate courses with satisfactory grades. Non-science majors who complete the certificate may be eligible to enroll in select

upper-division courses necessary for application to the health professions programs to which they are applying.

Students must contact the dean's office in the College of Natural Sciences to request the certificate during the semester in which they are completing the requirements. The certificate consists of a minimum of eighteen hours. Each course presented for the certificate must be completed with a grade of at least C-.

## Science Major Track

1. Complete up to nine hours chosen from the following:
  - a. Biochemistry and Chemistry: Chemistry 220C, 320M, 320N, and Biochemistry 369
  - b. Biology: Biology 311C, 311D, and 206L
  - c. Physics: Physics 302K, 102M, 302L, 102N; 317K, 117M, 317L, 117N; 301, 101L, 316, 116L; 303K, 103M, 303L, 103N.
  - d. Statistics: One of the following courses: Mathematics 316, Statistics and Data Sciences 302, 304, 306, or 328M.
2. Complete a minimum of nine hours chosen from the following themes relevant to healthcare:
  - a. Cultural Awareness:
    - i Anthropology 322M (Topic 5: *Indians of Mexico and Guatemala*)
    - ii Asian American Studies 301 and Asian American Studies 310 (Topic 1: *Psychological Perspectives on Asian American Identity*)
    - iii African and African Diaspora Studies 301
    - iv Latin American Studies 324L (Topic 16: *Mexican Immigration Cultural History*)
    - v Mexican American Studies 307
    - vi Middle Eastern Studies 301L
  - b. Health and Anatomy:
    - i Classical Civilization 306M
    - ii Educational Psychology 363 (Topic 3: *Human Sexuality*) or Health Education 366.
    - iii Health Education 335, 343, 352K, 370K, and 373
    - iv Kinesiology 320, 324K, 325K, and 326K
    - v Psychology 301, 308, 332C, Psychology 341K (Topic 4: *Health Psychology*), Psychology 346K, and Psychology 353K.
  - c. Healthcare Policy:
    - i Communication Studies 322E
    - ii History 350R (Topic 18: *Women in Sickness and Health*)
    - iii Philosophy 325M
    - iv Nursing 309 and Nursing 321
    - v Sociology 307M, 319, 336D, 354K, 358D, 368D, and 369K
    - vi Urban Studies 350 (Topic: *Human Health and the Environment*)
    - vii *Geography 357*
    - viii *Public Health 317*
  - d. Human and Societal Development:
    - i Communication Studies 310K and 322E.
    - ii Educational Psychology 369K (Topic 10: *Educational Neuroscience*).
    - iii Human Development and Family Sciences 304, 313, 335, 342, 351, and 378K (Topic: *Biobehavioral Health Processes Across the Family*).
    - iv Nursing 310.

v Psychology 301, 308, 332C, 341K (Topic 4: *Health Psychology*), and 346K.

vi Sociology 302 and 330C.

e. Nutrition:

i Communication Studies 322E

ii History 350R (Topic 5: *American Cultural History of Alcohol and Drugs*)

iii Nutrition 312, 218, 326, and 331

### Non-science Major Track

1. Complete a minimum of eighteen hours from the following:

a. Biology: Biology 311C, 311D, and 206L

b. Chemistry: Chemistry 302 and Chemistry 204.

c. Physics: Physics 302K, 102M, 302L, and 102N. The following physics sequences may substitute if they are already completed: Physics 317K, 117M, 317L, and 117N; Physics 301, 101L, 316, and 116L; Physics 303K, 103M, 303L, and 103N.

2. Students who successfully complete the Non-Science Major Track in requirement 1 will be eligible to enroll in the following courses according to the professional field they intend to enter. These additional courses are not required to earn the Pre-Health Professions Certificate.

a. Pre-dental preparation: Biochemistry 369; Biology 320, 325, 326M; Chemistry 320M, 320N, 220C

b. Pre-medical preparation: Biochemistry 369; Biology 320, 325; Chemistry 320M, 320N, 220C

c. Pre-occupational therapy preparation: Biology 325, 446L, 365S, 165U; Mathematics 316

d. Pre-optometry preparation: Biochemistry 369; Biology 325, 326M, 226L, 446L, 365S, 165U; Chemistry 320M, 320N, 220C; Mathematics 316

e. Pre-physical therapy preparation: Biology 325, 446L, 365S, 165U; Mathematics 316

f. Pre-physician assistant preparation: Biochemistry 369; Biology 320, 325, 326M, 226L, 344, 446L, 365S, 165U; Chemistry 320M, 320N, 220C; Mathematics 316; Nutrition 306.

g. Pre-pharmacy preparation: Biology 325, 326M, 226L, 446L, 365S, 165U; Chemistry 320M, 320N, 220C; Mathematics 316

h. Pre-veterinary preparation: Biochemistry 369; Biology 325, 326R, 226L, 344; Statistics and Data Sciences 321 or 328M

## Certificate in Textile Conservation and Museum Studies

The Certificate in Textile Conservation and Museum Studies helps undergraduates equip themselves with the fiber science, exhibition planning, textile conservation, and museum management skills necessary to conserve textiles in various settings. It is designed to appeal to students across the University in science, history, information science, computational science, merchandising, fiber science and apparel design, and many other disciplines. The program is administered by the Division of Textiles and Apparel in the School of Human Ecology. To be admitted, a student must be in good standing in an approved undergraduate degree program and must have earned a grade of at least C- in each certificate course he or she has completed. Students may apply for admission to the program at any point in their undergraduate study; they are encouraged to apply as early as possible so that they can be advised throughout the program.

The following coursework is required.

1. Textiles and Apparel 205 and 105L
2. Textiles and Apparel 219C and 119L
3. Textiles and Apparel 325L
4. Textiles and Apparel 325M
5. Textiles and Apparel 355D
6. Textiles and Apparel 352C
7. Information Studies 304W
8. Information Studies 335W

## UTeach Natural Sciences Secondary Teaching Option Certificate\*\*

The UTeach Natural Sciences program offers a secondary teaching option certificate to students who intend to teach at the middle or high school level.

The following coursework is required, with grades of at least C-.

1. One of the following courses: Biology 337 (Topic 2: *Research Methods: UTeach*), Chemistry 368 (Topic 1: *Research Methods: UTeach*), or Physics 341 (Topic 7: *Research Methods: UTeach*).
2. History 329U or Philosophy 329U.
3. Eighteen hours of professional development coursework, consisting of:
  - a. Curriculum and Instruction 650S
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360.
  - e. UTeach-Natural Sciences 101,110, and UTeach-Natural Sciences 170
4. In addition, students must meet the following requirements to graduate and be recommended for certification:
  - a. University grade point average of at least 2.50.
  - b. Successful completion of secondary teacher certification and identified discipline specific content courses.
  - c. Successful passing of final teaching portfolio review, conducted by the UTeach Program in Natural Sciences.

### Special Requirements

Students who successfully complete this certificate may be eligible for recommendation for state teaching certification if they have met all professional development and discipline specific content courses. Students seeking middle grades certification must also complete the following courses with grades of at least C-: Educational Psychology 363M (Topic 3: *Adolescent Development*) or Psychology 301 and 304; and Curriculum and Instruction 339E. Students must adhere to the current state certification requirements, even if they differ from those listed in a University Catalog. For more information about these requirements, students should consult with the UTeach-Natural Sciences academic adviser.

## UTeach Teacher Certification

UTeach-Natural Sciences prepares students in the College of Natural Sciences and the Jackson School of Geosciences for single-field teacher certification in mathematics or computer science or for composite certification with biology, chemistry, geological sciences, or physics as the primary teaching field. Composite certification that includes engineering is also available through UTeach-Engineering, in collaboration with the Cockrell School of Engineering. Composite certification requires forty-eight semester hours of coursework, consisting of twenty-four hours in one science, twelve in a second science, and six each in two additional sciences.

Students can complete the courses for certification as electives within a standard bachelor's degree program; lists of the required content courses and additional certification requirements are available in the UTeach-Natural Sciences office. However, students are strongly encouraged to consider the teaching options in biology, chemistry, geological sciences, mathematics, nutrition, and physics. These incorporate not only the required coursework in the major but also the professional development courses, supporting courses, and courses in other sciences that are required for certification.

To graduate and be recommended for certification, the student must have a University grade point average of at least 2.50. He or she must have earned a grade of at least C- in each of the professional development courses and supporting courses listed below and must pass the final teaching portfolio review. Information about the portfolio review and additional certification requirements is available from the UTeach-Natural Sciences academic adviser.

Students must adhere to current certification requirements, even if they differ from those listed in a University catalog.

## Professional Development Sequence

All students seeking teacher certification must complete the following courses:

1. UTeach-Natural Sciences 101, *Secondary Teacher Education Preparation: STEP 1*
2. UTeach-Natural Sciences 110, *Secondary Teacher Education Preparation: STEP 2*
3. UTeach-Natural Sciences 170, *Student Teaching Seminar*
4. Curriculum and Instruction 650S, *Secondary School Teaching Practicum*
5. Curriculum and Instruction 365C, *Knowing and Learning in Math and Science*
6. Curriculum and Instruction 365D, *Classroom Interactions*
7. Curriculum and Instruction 365E, *Project-Based Instruction*

Students seeking middle grades certification must also complete the following courses. To be recommended for certification, the student must earn a grade of at least C- in each course.

Curriculum and Instruction 339E, *Secondary School Literacy across the Disciplines*,  
Educational Psychology 363M (Topic 3: *Adolescent Development*); or both Psychology 301, *Introduction to Psychology*, and Psychology 304, *Introduction to Child Psychology*

## Supporting Courses

1. One of the following:  
Biology 337 (Topic 2: *Research Methods: UTeach*)  
Chemistry 368 (Topic 1: *Research Methods: UTeach*)  
Physics 341 (Topic 7: *Research Methods: UTeach*)
2. One of the following:  
History 329U, *Perspectives on Science and Mathematics*  
Philosophy 329U, *Perspectives on Science and Mathematics*

Interested students are encouraged to start the program at any time during their undergraduate careers. Students must be considering a teaching career in middle grades or secondary school science, computer science, mathematics, and/or engineering, and must meet grade point average requirements. Students who are interested in teaching earlier grades should consult the College of Education.

## Bachelor of Arts, Plan I

The requirements for the Bachelor of Arts under Plan I are designed to give each student flexibility in the selection of courses to meet individual needs.

A total of 120 semester hours is required. Thirty-six hours must be in upper-division courses. At least sixty hours, including twenty-one hours of upper-division coursework, must be completed in residence at the University; at least twenty-four of the last thirty hours must be completed in residence at the University. Provided residence rules are met, credit may be earned by examination, by extension, by correspondence (up to 30 percent of the hours required for the degree), or, with the approval of the dean, by work transferred from another institution. Up to sixteen semester hours of classroom and/or correspondence coursework may be taken on the pass/fail basis; this coursework may be counted only as electives.

All students must complete the University's (p. 20) Core Curriculum (p. 20). In the process of fulfilling the core curriculum and other degree requirements, all students must complete courses with content in the following areas:

1. Writing: two flagged courses, including one at the upper-division level, beyond Rhetoric and Writing 306 or its equivalent.
2. Quantitative reasoning: one flagged course

Courses in the major and minor may also be used to fulfill prescribed work requirements unless expressly prohibited. A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills one requirement may also be used to fulfill a flag requirement. Courses that fulfill these flag requirements will be identified in the *Course Schedule* by the appropriate flags.

The student must fulfill both the University (p. 17) G (p. 17) General Requirements (p. 17) for graduation and the R (p. 539) Requirements of the College of Natural Sciences (p. 539). University graduation requirements include a grade point average of at least 2.00 in all courses taken at the University (including credit by examination, correspondence, and extension) for which a grade or symbol other than Q, W, X, or CR is recorded; for the Bachelor of Arts, Plan I, the student must also earn a grade point average of at least 2.00 in courses taken at the University and counted toward the major requirement. The student should also refer to the description of his or her major in the section "Majors and Minors" below, since some majors include higher minimum scholastic requirements.

More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

## Prescribed Work

1. *Writing*: Two courses beyond Rhetoric and Writing 306 or the equivalent that carry a writing flag. One of these courses must be upper-division. Courses with a writing flag are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.
2. *Foreign language*: Four semesters or the equivalent in a single foreign language.

The foreign language requirement is the attainment of a certain proficiency, as well as the completion of a specified number of courses; however, the courses taken to gain proficiency are not electives and may not be taken on the pass/fail basis. Any part of the requirement may be fulfilled by credit by examination.

To achieve proficiency in a foreign language as rapidly as possible, qualified students are urged to take intensive foreign language courses. Information about these courses is available from the departments that offer them.

Courses used to fulfill the foreign language requirement must be language courses; literature-in-translation courses, for example, may not be counted.

3. *Social science*: Three semester hours chosen from a list of approved courses, in addition to the course used to fulfill the social and behavioral sciences requirement of the core curriculum. The course(s) must be in a field of study taught in the College of Liberal Arts and must be in a different field of study from the course used to fulfill the social and behavioral sciences requirement of the core. Courses on the approved list are primarily in anthropology, economics, geography, linguistics, psychology, and sociology, but not every course in these fields is approved. Courses that are approved to count toward any core curriculum area other than social and behavioral sciences may not be counted toward this requirement.

The list is available each semester in the Student Division and on the College of Liberal Arts Web site (<http://www.utexas.edu/cola/student-affairs/Majors-and-Degrees/Course-Lists.php>).

4. *Mathematics*: Three semester hours in mathematics, excluding Mathematics 301, 316K, and 316L.
5. *Natural science*: Six semester hours in natural sciences, in addition to the courses counted toward the science and technology requirements of the core curriculum. Courses used to fulfill this requirement must be chosen from the fields of study listed below; no more than three hours may be in either the history of science or the philosophy of science. To satisfy the mathematics and science and technology requirements of the core curriculum and the natural science requirement of the Bachelor of Arts, Plan I, a student may count (1) no more than twelve hours in mathematics, computer science, and statistics and data sciences combined; and (2) no more than nine hours in any single field of study.
  - a. Astronomy
  - b. Biology
  - c. Chemistry
  - d. Geological sciences
  - e. Marine science
  - f. Nutrition
  - g. Physical science
  - h. Physics
  - i. Mathematics (excluding Mathematics 301), computer science, statistics and data sciences
  - j. Other alternative science courses approved by the dean
  - k. Approved alternative courses in history of science and philosophy of science

6. *Cultural expression, human experience, and thought*: Three semester hours chosen from a list of approved courses. The course(s) must be in a field of study taught in the College of Liberal Arts. A course counted toward any requirement of the core curriculum may not also be counted toward this requirement.

A list of approved courses is available each semester in the Student Division and on the College of Liberal Arts Web site (<http://www.utexas.edu/cola/student-affairs/Student-Services/Majors-and-Degrees/Course-Lists.php>).

## Electives

In addition to the core curriculum, prescribed work, and major and minor, the student must complete enough elective coursework to provide the 120 semester hours required for the degree. These 120 hours may include no more than twelve semester hours of Bible courses; nine hours of designated coursework in air force science, military science, or naval science; sixteen hours completed on the pass/fail basis; thirty-nine hours in any one field of study offered in the College of Liberal Arts or the College of Natural Sciences, unless major requirements state otherwise; and thirty-nine hours in any other single college or school of the University.

## Majors and Minors

### Major Requirements

The Bachelor of Arts, Plan I, requires the completion of all requirements for one major.

The number of semester hours required in the major varies with the field selected. Unless the requirements of the major state otherwise, a major consists of at least twenty-four but no more than thirty-nine semester hours, with at least fifteen hours in upper-division courses. Of these fifteen hours, six must be completed in residence. At least eighteen hours of coursework in the major, including six hours of upper-division coursework, must be completed in residence at the University.

### Minors

Students in most majors must also fulfill the requirements of a minor. The requirements of the minor are established by the major department and are given with the major requirements. Additional restrictions may be imposed by the academic department(s) in which the student takes the courses used to fulfill the requirements of the minor; before planning to use a course to fulfill the minor requirement, the student should consult the department that offers the course.

## Astronomy

### Major

The following coursework is required:

1. Physics 301 and 101L
2. Physics 316 and 116L (Prerequisites: Physics 301 and 101L)
3. Physics 315 and 115L (Prerequisites: Physics 316 and 116L)
4. Nine semester hours of upper-division coursework in astronomy, including at least two of the following courses:
  - Astronomy 352K
  - Astronomy 352L
  - Astronomy 353
  - Astronomy 358
  - Astronomy 364
5. Six additional upper-division hours in astronomy and/or physics

### Minor

Six semester hours of coursework (other than astronomy, lower-division physics, lower-division mathematics, and Mathematics 427K) approved by the undergraduate adviser; and either six semester hours of upper-division physics in addition to the courses used to fulfill the

major requirements or six semester hours of upper-division coursework approved by the undergraduate adviser.

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

All astronomy majors should consult the astronomy undergraduate adviser regularly about the choice of appropriate courses in both the major and the minor. Qualified students are encouraged to carry out a supervised research project by taking a conference course, such as Astronomy 375 or 379H. No more than six of the hours counted toward the major requirement may be earned in conference courses.

## Biochemistry

In addition to the requirements below, biochemistry majors must take either Mathematics 408C and 408D or Mathematics 408N, 408S, and Statistics and Data Sciences 328M; and eight semester hours of physics: either Physics 301, 101L, 316, and 116L; 303K, 103M, 303L, and 103N; or 317K, 117M, 317L, and 117N.

### Major

1. Chemistry 301 or 301H
2. Chemistry 302 or 302H
3. Chemistry 204 or 317
4. Chemistry 320M
5. Chemistry 353 or 353M
6. Chemistry 455
7. Biochemistry 339F
8. Biochemistry 369L
9. Two of the following courses:
  - Biochemistry 339J
  - Biochemistry 339M
  - Biochemistry 339N
  - Biochemistry 370

### Minor

Either Biology 311C, 311D, and 325 or 315H and 325H; six additional semester hours in biology, three of which are chosen from Biology 328, 339, 345, 361T, Neuroscience 365R or Biology 371M, and 365S; and three additional hours chosen from the preceding list or from Biology 320, 325T, 226L and either 326M or 326R, 327D, 330, 331L, 335, 336, 339M, 344, 346, 347, 349, 360K, 361, 377 and Neuroscience 365W.

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

## Biology

In addition to the requirements below, biology majors must complete Mathematics 408C or 408N, Chemistry 301 or 301H, 302 or 302H, and 204; and one of the following: (1) Chemistry 220C, 320M, and 320N; (2) eight hours of coursework in physics, including laboratory work; or (3) six hours of coursework in computer science, including at least three hours of upper-division work.

### Major

The following coursework is required:

1. Either Biology 311C, 311D, and 325 or Biology 315H and 325H.
2. Biology 206L or 208L.

3. Six semester hours in core biology courses, consisting of three hours in each of the following areas.
  - a. Cellular, developmental, and molecular biology: Biology 320, 344, 349.
  - b. Ecology and evolution: Biology 357, 370, 373.
4. Eighteen additional semester hours of coursework, consisting of three hours in each of the following six areas. No course may be counted toward more than one of the six areas in requirement 4. No course may be counted toward both requirement 3 and requirement 4. The courses counted toward requirement 4 must include at least three laboratory courses.
  - a. Cellular, developmental, and molecular biology: Biology 320, 320L, 323L, 325L, 325T, 226L, 326R, 328D, 330, 230L, 331L, 332, 333, 335, 336, 339, 339M, 344, 347, 349, 349L, 350M, 360K, 160L, 366, 366R, 368L, Biochemistry 369, Neuroscience 366L, 366S.
  - b. Physiology and neurobiology: Biology 322, 122L, 328, 329, 129L, 336, 339, 345, 345E, 359K, 359R, 360K, 160L, 361, 361L, 361T, 365N, 365S, 165U, 371L, 371M, Neuroscience 365D, 365L, 365R, 365T, 365W, and 366C.
  - c. Ecology and evolution: Biology 328M, 321L, 340L, 448L, 351, 352, 453L, 354L, 455L, 456L, 357, 359J, 364, 369L, 370, 471G, 373, 373L, 375, Marine Science 352C, 354Q.
  - d. Animal biology: Biology 321L, 438L, 340L, 346, 446L, 448L, 453L, 354L, 455L, 359J, 359K, 359R, 361T, 365S, 369L, 371L, 478L, Marine Science 354, 354C.
  - e. Plant biology: Biology 322, 122L, 324 and 124L, 327 and 127L, 328, 328D, 350M, 351, 352, 374 and 174L, Marine Science 352D.
  - f. Microbiology: Biology 226L, 326R, 329, 129L, 330, 230L, 333, 339, 364, Marine Science 354E.

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

## Chemistry

In addition to the requirements below, chemistry majors must take Mathematics 408C and 408D or Mathematics 408N, 408S, and 408M; and eight semester hours of physics: either Physics 301, 101L, 316, and 116L; 303K, 103M, 303L, and 103N; or 317K, 117M, 317L, and 117N.

### Major

1. Chemistry 301 or 301H
2. Chemistry 302 or 302H
3. Chemistry 204 or 317
4. One of the following sequences:
  - Chemistry 220C, 320M, and 320N; or
  - Chemistry 128K, 128L, 328M, and 328N
5. Chemistry 353
6. Chemistry 153K
7. Chemistry 354 or 354L
8. Chemistry 154K
9. Chemistry 456
10. Chemistry 376K

### Minor

Either (1) twelve semester hours of biology, geological sciences, mathematics, physics, or, with written consent of the department chair and approval of the dean, a field of study outside the College of Natural Sciences or the Jackson School of Geosciences; or (2) Computer Science

303E, 313E, and six hours chosen from Computer Science 323E, 324E, 326E, 327E, and 329E. Students who complete the second option may simultaneously fulfill some of the requirements of the Elements of Computing Certificate (p. 540).

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

## Computer Science

An undergraduate may not enroll in any computer science course more than once without written consent of an undergraduate adviser in computer science. No student may enroll in any computer science course more than twice. No student may take more than three upper-division computer science courses in a semester without written consent of an undergraduate adviser in computer science.

### Major:

The following courses in computer science:

1. *Theory*: Computer Science 311 or 311H\*, 331, or 331H\*, and three additional hours from an approved list available in the department.
2. *Programming*: Computer Science 312 or 312H\*, 314 or 314H\*, and three additional hours from an approved list available in the department.
3. *Systems*: Computer Science 429 or 429H\*, 439 or 439H\*, and three additional hours from an approved list available in the department.
4. Twelve additional hours of upper-division courses in computer science.

Computer Science 370 may be counted toward the degree only once.

### Minor for Computer Science Majors

Mathematics 408C or 408N, and 340L or Statistics and Data Sciences 329C, and 321.

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

With the exception of Computer Science 311 or 311H\*, 312 or 312H\*, and 314 or 314H\*, all computer science courses that may be counted toward a degree in computer science are restricted to students who have been admitted to the computer science major or have the consent of the undergraduate faculty adviser.

\* Computer science courses with numbers ending in *H* are intended for students pursuing the Bachelor of Science in computer science, option II, the Turing Scholars program, and option III, computer science honors. Students outside these options may enroll in these courses only with the special consent of the honors director.

## Human Ecology

### Major

Human ecology majors must complete thirty semester hours of coursework in the School of Human Ecology, including at least fifteen hours of upper-division coursework and at least six hours chosen from each of the following areas:

1. Human Development and Family Sciences 304, 312, 313, 113L, 315L, 322, and 337;

2. Nutrition 306, 307, 107L, 312 or 312H, 112L, 315, 316, 218, 118L, 326 and 126L, 321, 331, 332, and 338W or 338H;
3. Textiles and Apparel 205, 105L, 316Q, 219C and 119L, 325L, and 325M

Additionally, students must complete the following coursework with a grade of at least C- in each course:

1. Mathematics 408N or the equivalent;
2. Statistics and Data Sciences 302, 303, 304, 305, 306, or 325H;
3. Please complete one of these sequences:
  - a. Chemistry 301 or 301H, 302 or 302H, and Biology 311C, or
  - b. Chemistry 301 or 301H and Biology 311C and 311D;
4. two to four additional hours in astronomy, biology, chemistry, computer science, geological sciences, mathematics, and/or physics. Courses designed for non-science majors may not be counted toward this requirement. This coursework also meets the core curriculum mathematics and science and technology requirements.

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00.

To develop a meaningful and coherent degree program, the student should select courses with the assistance of faculty and academic advisers.

## Mathematics

Undergraduates seeking a Bachelor of Arts degree with a major in mathematics must choose either the standard option or the middle grades or secondary school teaching option.

### Major: Standard Option

At least twenty-four semester hours of upper-division coursework in mathematics. Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00.

The student must complete the following:

1. Mathematics 408C and 408D
2. Mathematics 340L or 341
3. Mathematics 328K, 343K, or 373K
4. Mathematics 361K or 365C
5. Mathematics 362K
6. To broaden the student's training, at least one course chosen from the following: Mathematics 333L, 339J, 339U, 343L, 343M, 344K, 348, 358K, 361, 367K, 368K, 372K, 374M, 376C, 378K

### Major: Options in Mathematics for Middle Grades and Secondary School Teaching:

At least twenty-four semester hours of upper-division coursework in mathematics. Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00.

The teaching options are designed to give students the mathematical background appropriate for teaching middle grades and secondary school mathematics, but students must meet additional requirements, including grade point average requirements, to obtain certification. Lists of the combined requirements of the UTeach-Natural Sciences certification

programs and these options are available from the UTeach-Natural Sciences academic adviser and in the *Undergraduate Catalog*.

All students must complete the following:

1. Mathematics 408C and 408D
2. Mathematics 340L or 341
3. Mathematics 315C, 325K, 333L, 358K, and 362K
4. Mathematics 360M or 375D
5. Mathematics 361K or 365C
6. Mathematics 328K, 343K, or 373K

Students pursuing teacher certification through the UTeach-Natural Sciences program must also complete the following:

7. Biology 337 (Topic 2: *Research Methods—UTeach*), Chemistry 368 (Topic 2: *Research Methods—UTeach*), or Physics 341 (Topic 7: *Research Methods—UTeach*)
8. History 329U or Philosophy 329U
9. Eighteen semester hours of professional development coursework consisting of:
  - a. Curriculum and Instruction 650S
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360
  - e. UTeach-Natural Sciences 101, 110, and 170
10. For students seeking middle grades certification, the following courses: Educational Psychology 363M (Topic 3: *Adolescent Development*), or Psychology 301 and 304; and Curriculum and Instruction 339E

To graduate and be recommended for certification, students who follow the teaching option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 8 and in each of the professional development courses listed in requirement 9 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 10. For information about the portfolio review and additional teacher certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

## Physics

### Major

Physics 315, 115L, 355, and at least fifteen semester hours of upper-division coursework in physics, including Physics 336K, 352K, and 353L.

Additionally, students majoring in physics must complete Chemistry 301 or 301H, 302 or 302H, and 204.

### First Minor for Physics Majors

Twelve semester hours of mathematics, of which six must be in upper-division coursework; the upper-division coursework must include three hours in differential equations.

### Second Minor for Physics Majors

Six semester hours, of which three must be in upper-division coursework, in any one of the following: biology, chemistry, geological sciences, philosophy, psychology; or in courses offered in the College of Education or the Cockrell School of Engineering. Courses used to fulfill specific

degree requirements other than the writing requirement may not also be used to fulfill this requirement.

Students must earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00.

## Bachelor of Science and Arts

The requirements for the bachelor of science and arts degree are designed to give each student an opportunity to combine a core mathematics or science experience with an interdisciplinary curriculum which complements his or her major. Students pursuing the Bachelor of Science and Arts will major in a discipline within the College of Natural Sciences as well as minor in a field of study which allows the student to explore applications of his or her major in the broader society, allows the student to see the impacts of the sciences in other fields of study, and develops a complementary expertise, which supports multidisciplinary study.

All students pursuing an undergraduate degree must complete the University's (p. 20) Core Curriculum (p. 20). The prescribed work requirements for the Bachelor of Science and Arts consist of the language, arts, and culture requirement, major requirements, minor or transcript-recognized certificate requirements, and electives. Students may not use a course in one area of prescribed work to fulfill the requirements of another area of prescribed work; the only exception to this rule is that a course that fulfills one requirement may also be used to fulfill a flag requirement. Courses used to fulfill prescribed work requirements may be used to fulfill the University core curriculum requirements except where expressly prohibited.

In the process of fulfilling the core curriculum and other degree requirements, all students must complete courses with content in the following areas:

1. Writing: two flagged courses, including one at the upper-division level, beyond Rhetoric and Writing 306 or its equivalent
2. Ethics and leadership: one flagged course
3. Independent inquiry: one flagged course
4. Quantitative reasoning: one flagged course

Students pursuing a Bachelor of Science and Arts must fulfill both the University general requirements for graduation and the requirements of the College of Natural Sciences. These include a University grade point average of at least 2.00 in all courses taken at the University (including credit by examination, correspondence, and extension), and a grade of at least C- in all math and science courses required in the major. Students completing a transcript-recognized certificate program must meet the minimum grade requirements and grade point average requirements of the program. Students must also complete a minimum of sixty hours in residence at the University, including at least eighteen hours of the major in residence.

Students may earn an honors major in their fields of study upon graduation by completing the following requirements:

1. Good standing in the Health Science Honors Program or the University Fellows Program.
2. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
3. Six hours of coursework in the major must be at the honors-level.
4. Natural Sciences 371.
5. A University grade point average of at least 3.50.

## Prescribed Work Common to All Majors

### 1. Language, Arts, and Culture Requirement

Twelve hours selected from at least two of the following four areas:

- Fine arts*: courses chosen from design, ensemble, fine arts, music, studio art, performance, visual art studies, and theatre and dance.
- Humanities*: courses chosen from American studies, ancient history and classical civilization, art history, classical civilization, comparative literature, English, humanities, philosophy, religious studies, and rhetoric and writing.
- Social and behavioral sciences*: courses chosen from anthropology, economics, geography, government, history, linguistics, psychology, and sociology.
- Foreign language and culture*: foreign language courses or culture courses chosen from an approved list available in the college advising centers. Students who elect to pursue a foreign language must minimally complete a one-year competency.

Courses used to satisfy the University core curriculum, or credit earned by examination, may not be used to satisfy this requirement.

### 1. Major Requirements

The specific courses required for the major vary with the major selected and are described in the links to the right. Unless the requirements of the major state otherwise, a major consists of at least thirty-six but no more than forty-nine semester hours.

### 2. Minor or Certificate Requirement

The Bachelor of Science and Arts requires the completion of all requirements for one transcript-recognized certificate program or a minor. A minor consists of at least fifteen hours in a single field of study that is outside the College of Natural Sciences, Cockrell School of Engineering, and Jackson School of Geosciences. A student may not pursue a certificate that requires more than three hours of coursework required in the major, or more than six hours of coursework in their major field of study.

### 3. Electives

Enough additional coursework to make a total of 120 semester hours.

## Astronomy

### Major

#### 1. Mathematics:

- Mathematics 408C and 408D.
- Mathematics 427K.

#### 2. Primary science:

- Physics 301, 101L, 315, 115L, 316, and 116L.
- Two courses chosen from the following: Astronomy 352K, 353, and 358.
- Six additional upper-division semester hours in astronomy and physics.

#### 3. Secondary science:

Twelve additional semester hours of majors-level coursework from one or more of the following areas. It is recommended that students select three of the twelve hours to also fulfill the Natural Science and Technology Part II core curriculum requirement.

- Biology
- Chemistry
- Computer Science
- Geological Sciences

e. Mathematics

f. Statistics and Data Sciences

## Biochemistry

### Major

#### 1. Mathematics:

- Mathematics 408C or 408N.
- Statistics and Data Sciences 328M.

#### 2. Primary science:

- Chemistry 301 or 301H, 302 or 302H, and 204.
- Chemistry 320M.
- Biochemistry 339F and 369L.
- Two courses chosen from the following: Biochemistry 339J, 339M, 339N, and 370.

#### 3. Secondary science:

- Biology 311C, 311D and 325, or Biology 315H and 325H.
- One of the following physics sequences:
  - Physics 317K, 117M, 317L, and 117N (recommended).
  - Physics 301, 101L, 316, and 116L.
  - Physics 303K, 103M, 303L, and 103N.

## Biology

### Major

#### 1. Mathematics:

- Mathematics 408C or 408N.
- Statistics and Data Sciences 328M.

#### 2. Primary science:

- Biology 206L or 208L; 311C, 311D, and 325, or 315H and 325H.
- One of the following: Biology 320 or 344.
- One of the following: Biology 370 or 373.
- Nine additional semester hours, including three hours each from three of the four following areas. Courses used to satisfy requirement b or c may not also be used to satisfy requirement d. Of the nine semester hours chosen, at least one approved laboratory course must be completed. These courses are marked with an asterisk. Biology 377 may count with approval of the undergraduate adviser.

- Animal Biology: Biology 321L\*, 438L\*, 340L\*, 347, 349, 448L\*, 353F\*, 453L\*, 354L\*, 455L\*, 359J, 359K, 359R, 361T, 365S, 369F\*, 369L\*, 371L\*, 478L\*, Marine Science 354 and 354C, and Neuroscience 365R, 366L\*, 366S.
- Ecology and Evolution: Biology 357, 456L\*, 370, 373, 375, and Marine Science 320, 120L\*, 352C.
- Molecular Genetics and Microbiology: Biology 320, 325L\*, 326M, 326R, 226L\*, 327D, 344, 366R, Biochemistry 369, and Marine Science 354E.
- Plant Biology: Biology 322 and 122L\*, 324 and 124L\*, 327 and 127L\*, 328, 328D\*, 350M, 351, 352, 374 and 174L\*, and Marine Science 352D.

#### 3. Secondary science:

- Chemistry 301 or 301H, 302 or 302H, and 204.
- Six additional semester hours of majors-level coursework chosen from astronomy, biology, chemistry, computer science, environmental science, geological sciences, mathematics, marine

science, neuroscience, nutrition, public health, physics, statistics and data sciences, and systems biology.

## Chemistry

### Major

1. Mathematics:
  - a. Mathematics 408C and 408D, or 408N and 408S.
2. Primary science:
  - a. Chemistry 301 or 301H, 302 or 302H, and 204 or 317.
  - b. Chemistry 320M, 320N and 220C, or 328M, 328N, 128K and 128L.
  - c. Chemistry 353 or 353M, and 153K.
  - d. Chemistry 431; 455 or 456; and Biochemistry 369.
3. Secondary science: One of the following physics sequences:
  - a. Physics 301, 101L, 316, and 116L.
  - b. Physics 303K, 103M, 303L, and 103N.
  - c. Physics 317K, 117M, 317L, and 117N.

## Computer Science

### Major

1. Mathematics:
  - a. Mathematics 408C or 408N.
  - b. Mathematics 340L or Statistics and Data Sciences 329C.
  - c. Statistics and Data Sciences 321.
2. Primary science:
  - a. Theory: Computer Science 311 or 311H, and 331 or 331H.
  - b. Programming: Computer Science 312 or 312H, and 314 or 314H.
  - c. Systems: Computer Science 429 or 429H, and 439 or 439H.
  - d. Twelve additional semester hours of approved upper-division computer science.
3. Secondary science:
  - a. Six semester hours of majors-level coursework chosen from a single field of study: astronomy, biology, chemistry, geological sciences, marine science, or physics. It is recommended that students select courses that will also fulfill the Natural Science and Technology Part I core curriculum requirement.

## Human Ecology

### Major

1. Mathematics:
  - a. Statistics and Data Sciences 302.
  - b. Mathematics 408C, 408N, or Statistics and Data Sciences 332.
2. Primary science:
  - a. Twenty-seven semester hours from the School of Human Ecology, including the following:
  - b. One of the following: Human Development and Family Sciences 304, 304H, 313 and 113L, or 313H and 113L.
  - c. Nutrition 306, 312, or 312H.
  - d. Textiles and Apparel 303 or 205 and 105L.
  - e. Fifteen semester hours of upper-division coursework.
3. Secondary science:

- a. Chemistry 301 or 301H.
- b. Biology 311C.
- c. Biology 311D, 302, or 302H.

## Human Development and Family Sciences

### Major

1. Mathematics:
  - a. Statistics and Data Sciences 302.
  - b. Mathematics 408C or 408N, or Statistics and Data Sciences 332.
2. Primary science:
  - a. Human Development and Family Sciences 304, 313 and 113L, and 315L.
  - b. Eighteen semester hours of upper-division human development and family sciences.
3. Secondary science:
  - a. Chemistry 301 or 301H.
  - b. Biology 311C.
  - c. One of the following courses: Biology 311D, Chemistry 302, or 302H.

## Mathematics

### Major

1. Mathematics:
  - a. Mathematics 408C and 408D.
2. Primary science:
  - a. Mathematics 341.
  - b. Mathematics 328K, 343K, or 373K.
  - c. Mathematics 362K.
  - d. Mathematics 361K or 365C.
  - e. Twelve additional semester hours of approved upper-division mathematics.
3. Secondary science:
  - a. Six semester hours of majors-level coursework chosen from a single field of study: astronomy, biology, chemistry, geological sciences, marine science, or physics. It is recommended that students select courses that will also fulfill the Natural Science and Technology Part I core curriculum requirement.
  - b. Three semester hours of majors-level coursework chosen from a different field of study: astronomy, biology, chemistry, computer science, geological sciences, marine science, or physics. It is recommended that students select a course that will also fulfill the Natural Science and Technology Part II core curriculum requirement.

## Neuroscience

### Major

1. Mathematics:
  - a. Mathematics 408C or 408N and 408S.
  - b. Statistics and Data Sciences 328M.
2. Primary science:
  - a. Biology 206L; 311C and 311D, or 315H and 325H.
  - b. Neuroscience 365R or 330.

- c. Neuroscience 335.
  - d. Twelve additional semester hours of neuroscience, chosen from: Biology 337 (Topic: *Evolutionary Neuroscience*), 337 (Topic: *Sensory Neuroscience*), 337 (Topic: *Genetic Analysis of Behavior and Disease*), 359K, 365N, Neuroscience 365T, 365W, 366C, 366D, 366E, 367F, and 466G.
3. Secondary science:
- a. Chemistry 301 or 301H, 302 or 302H, and 204.
  - b. One of the following physics sequences:
    - i Physics 301, 101L, 316, 116L.
    - ii Physics 303K, 103M, 303L, 103N.
    - iii Physics 317K, 117M, 317L, 117N.

## Nutrition

### Major

1. Mathematics:
  - a. Statistics and Data Sciences 302, 304, 306, 325H, or 328M.
  - b. Mathematics 408C or 408N or Statistics and Data Sciences 332.
2. Primary science:
  - a. One of the following sequences:
    - i Nutrition 312, 112L, 326, and 126L.
    - ii Nutrition 312H and 312R.
  - b. Sixteen additional semester hours of nutrition, including twelve semester hours of upper-division coursework.
3. Secondary science:
  - a. Chemistry 301 or 301H, 302 or 302H, and 204.
  - b. Chemistry 320M.
  - c. Biology 311C.

## Physics

### Major

1. Mathematics:
  - a. Mathematics 408C, 408D, 427K, and 427L.
2. Primary science:
  - a. Physics 301, 101L, 315, 115L, 316, and 116L.
  - b. Physics 336K, 352K, 355, 369, and 373.
  - c. One course chosen from the following: Mathematics 340L; and Physics 329, 333, 345, 353L, 362K, 362L, 474, 375S, 375R, or 375P.
3. Secondary science:
  - a. Three semester hours of majors-level coursework chosen from: astronomy, biology, chemistry, computer science, and geological sciences. It is recommended that students select a course that will also fulfill the Natural Science and Technology Part II core curriculum requirement.

## Bachelor of Science in Astronomy

Astronomy tells us about the place of humankind in the universe: how Earth was created, how the Sun was formed, how galaxies form and evolve. It tells us where the universe is going and where it came from. Astronomers address these questions at a fundamental level. Their goal is to determine the basic and controlling properties of the universe and to transmit that knowledge to society. The Bachelor of Science in Astronomy is designed to give students an understanding of the universe and to prepare them to participate in the advancement of this exciting search.

Two options are available: astronomy and astronomy honors. Students who plan to follow option II, astronomy honors, must be admitted to the Dean's Scholars Honors Program (p. 536).

## Prescribed Work Common to all Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Astronomy must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. One of the following foreign language/culture choices. Students in option II are exempt from this requirement.
  - a. Second-semester-level proficiency, or the equivalent, in a foreign language.
  - b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour courses in one foreign culture area chosen from an approved list available in the dean's office and the college advising centers.
4. At least thirty-six semester hours of upper-division coursework.
5. At least twenty-one hours of upper-division coursework, including at least twelve semester hours in physics and astronomy, must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Astronomy

6. Six semester hours in biology, chemistry, computer science, and/or geological sciences. Chemistry 301 or 301H and the courses in the Elements of Computing Certificate Program may be counted toward this requirement; any other course to be counted must meet major requirements in the department that offers it.
7. Mathematics 408C and 408D, or the equivalent; and 427K, 427L, and 340L.
8. Physics 301, 101L, 315, 115L, 316, 116L, 336K, 352K, 353L, 355, 362K, 369, and 373.
9. Twelve semester hours of upper-division coursework in astronomy, including Astronomy 352K, 353, and 358. Astronomy 351 is recommended.
10. Nine additional semester hours of upper-division coursework in physics and/or astronomy.
11. Enough additional coursework to make a total of 123 semester hours.

### Option II: Astronomy Honors

6. Breadth requirement: An honors mathematics course, Chemistry 301H, and nine additional hours of coursework chosen from honors courses in the college. Credit earned by examination may not be counted toward this requirement.
7. Physics 301, 101L, 315, 115L, 316, and 116L.
8. Twelve semester hours of upper-division coursework in astronomy approved by the departmental honors adviser.

9. Eighteen semester hours of upper-division coursework in physics approved by the departmental honors adviser.
10. Three additional semester hours of upper-division coursework in astronomy or physics.
11. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
12. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
13. Astronomy 379H and either a three-semester-hour upper-division research course approved by the departmental honors adviser or a second section of Astronomy 379H.
14. Sixteen additional hours of coursework approved by the departmental honors adviser.
15. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
16. Enough additional coursework to make a total of 120 semester hours.

## Special Requirements

Students in both options must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in *General Information*.

To graduate under option II, students must remain in good standing in the Dean's Scholars Honors Program, must earn grades of at least A- in the departmental research and thesis courses described in requirement 12 above, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum (<http://cns.utexas.edu/research-experience/undergraduate-research/undergraduate-research-forum>).

## Bachelor of Science in Biochemistry

The degree of Bachelor of Science in Biochemistry is intended to prepare students for professional careers as chemists, either upon graduation or after graduate study in chemistry or related fields. In addition, it may serve as the basis for work in many areas outside pure chemistry, such as materials science, medicine and other health-related fields, pharmacology, patent law, business, and environmental science. The honors option is intended to prepare students for academic or research careers.

Students who plan to follow option III, biochemistry honors, must be admitted to the Dean's Scholars Honors Program (<http://catalog.utexas.edu/undergraduate/natural-sciences/academic-policies-and-procedures/#deansscholarshonorsprogram>).

## Prescribed Work Common to all Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (<http://catalog.utexas.edu/undergraduate/undergraduate-studies/academic-policies-and-procedures/#corecurriculum>).

In addition, students seeking the Bachelor of Science in Biochemistry must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.

2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. At least thirty-six semester hours of upper-division coursework.
4. At least twenty-one semester hours of upper-division coursework, including at least twelve semester hours of upper-division coursework in chemistry, must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Biochemistry

5. Mathematics 408C and 408D, or 408N and 408S.
6. Biostatistics: Biology 328M or Statistics and Data Sciences 328M.
7. One of the following sequences:
  - a. Physics 301, 101L, 316, and 116L;
  - b. 303K, 103M, 303L, and 103N; or
  - c. 317K, 117M, 317L, and 117N.
8. The following chemistry courses:
  - a. General chemistry: Chemistry 301 or 301H, 302 or 302H, and 204 or 317.
  - b. Organic chemistry: Chemistry 320M.
  - c. Biochemistry: Biochemistry 339F and 369L, and three additional courses chosen from Biochemistry 339J, 339M, 339N, and 370.
  - d. Physical chemistry: Chemistry 353 or 353M.
  - e. Analytical chemistry: Chemistry 455.
9. One of the following sequences:
  - a. Biology 311C, 311D, and 325; or
  - b. Biology 315H and 325H.
10. Completion of one of the following:
  - a. Eighteen additional semester hours of upper-division biochemistry, biology, chemistry, and neuroscience;
  - b. Eighteen additional semester hours in a field of study approved by the undergraduate adviser; or
  - c. A transcript-recognized certificate.
11. Enough additional coursework to make a total of 120 semester hours.

### Option III: Biochemistry Honors

5. Breadth requirement: An honors mathematics course, Biology 315H and 325H, Chemistry 301H and 302H, and three additional semester hours of coursework chosen from honors courses in the college. Credit earned by examination may not be counted toward this requirement.
6. The following chemistry courses:
  - a. General chemistry: Chemistry 204 or 317.
  - b. Organic chemistry: Chemistry 128K, 128L, 328M, and 328N; or 220C, 320M, and 320N.
  - c. Biochemistry: Biochemistry 339F and 369L, and three additional courses chosen from Biochemistry 339J, 339M, 339N, and 370.
  - d. Physical chemistry: Chemistry 353 or 353M.
  - e. Analytical chemistry: Chemistry 455.
6. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
7. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
8. Chemistry 379H or 379H and either a three-semester-hour upper-division research course approved by the departmental honors adviser or a second section of Chemistry 379H or Biochemistry 379H.

9. Twenty-four additional semester hours of coursework approved by the departmental honors adviser.
10. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
11. Enough additional coursework to make a total of 120 semester hours.

## Special Requirements

Students in all options must fulfill both the University's (p. 17) General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>) *Catalog*.

To graduate under option III, students must remain in good standing in the Dean's Scholars Honors Program, must earn grades of at least A- in the departmental research and thesis courses described in requirement 8 above, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum may be found on the College of Natural Sciences Web site (<https://cns.utexas.edu/>).

## Order and Choice of Work

The student must consult the undergraduate adviser each semester regarding order and choice of work.

## Bachelor of Science in Biology

The Bachelor of Science in Biology degree program offers ten options. The options have certain prescribed work in common, and each option has additional requirements. Many fields in the study of biological systems require broadly based training that transcends the classical boundaries of biology. In planning a program of work to meet his or her degree requirements, a student interested in specializing in these interdisciplinary areas should choose courses both in biology and in sciences that complement biology. Students who plan to complete the program within four years will have little flexibility in course selection unless they plan a schedule in advance. More information is given in order and choice of work (p. 557) below.

Students who plan to follow option IX, biology honors, must be admitted to the Dean's Scholars Honors Program (p. 536).

## Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Biology must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. Options I, III–VII and X: One of the following foreign language/culture choices. Students in options II, VIII, and IX are exempt from this requirement.
  - a. Second-semester-level proficiency, or the equivalent, in a foreign language.
  - b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour courses in one foreign culture area chosen from an approved list available in the dean's office and the college advising centers.
4. At least twenty-four semester hours of upper-division coursework beyond Biology 325 in biology and approved related fields, including at least one course from each of the following areas. In most options, the student must use specific courses to meet this requirement; these courses are listed in Additional Prescribed Work for Each Option (p. 553).
  - a. Cellular, developmental, and molecular biology: Biology 320, 326R, 344, 349.
  - b. Physiology and neuroscience: Biology 328, 361T, 365S, Neuroscience 365R.
  - c. Ecology, evolution, and behavior: Biology 357, 359K, 370, 373.
5. All students must complete at least thirty-six semester hours of upper-division coursework; at least twenty-one semester hours of upper-division coursework in biology must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Ecology, Evolution, and Behavior

6. Mathematics 408C and 408D, or 408N and 408S.
7. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N;
  - c. Physics 303K, 103M, 303L, and 103N; or
  - d. Physics 302K, 102M, 302L, and 102N
8. Chemistry 301 or 301H, 302 or 302H, and 204.
9. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; these courses must be completed before the student progresses to other upper-division biology courses.
10. At least four laboratory courses in biology; three of these courses must be upper-division. One of the four courses must have a field component; the following courses may be used to meet this requirement: Biology 321L, 340L, 453L, 354L, 455L, 456L, 369L, 373L, Marine Science 352D, 354, 354C.
11. Statistics and Data Sciences 328M and three hours of coursework chosen from the following: Chemistry 320M, Computer Science 303E or 313E or the equivalent, Geological Sciences 401 or 303, or an upper-division mathematics courses.
12. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete the following courses; no single course may be used to meet more than one of these requirements:
  - a. Ecology: Biology 357, 373, or Marine Science 320.
  - b. Evolution: Biology 370.
  - c. Behavior and comparative physiology: Biology 322 and 122L, 359K, or 361T.
  - d. One of the following taxon-based diversity courses or pairs of courses: Biology 321L, 324 and 124L, 327 and 127L, 340L, 448L,

352, 353F, 453L, 354L, 455L, 369L, Marine Science 352D, 354, 354C, 354E.

- e. Six additional hours chosen from the following:
  - i Evolution: 472L, 374 and 174L, 478L.
  - ii Ecology: Biology 456L, 364, 364E, 373L, Marine Science 120L, 352C.
  - iii Behavior: Biology 438L, 359J, 359R.
  - iv Conservation biology: Biology 375, Marine Science 354Q.

13. Enough additional coursework to make a total of 126 semester hours.

## Option II: Human Biology

- 6. Mathematics 408C or 408N, and Statistics and Data Sciences 328M\*.
- 7. One of the following courses: Mathematics 408D, 408S, or Statistics and Data Sciences 348.
- 8. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N;
  - c. Physics 303K, 103M, 303L, and 103N; or
  - d. Physics 302K, 102M, 302L, and 102N
- 9. Chemistry 301 or 301H, 302 or 302H, and 204.
- 10. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; these courses must be completed before the student progresses to other upper-division biology courses.
- 11. At least four laboratory courses in biology and related fields, including Biology 206L or 208L. Three of these courses must be upper-division, including one course in biology. Courses that may count toward the laboratory requirement are marked with an asterisk.
- 12. Chemistry 220C, 320M, and 320N.
- 13. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete Biology 346, at least six semester hours in area a below, and at least three hours each in areas b through d
  - a. Cellular and molecular biology: Biology 320, 320L\*, 323L\*, 325L\*, 325T, 226L and 326R, 344.
  - b. Physiology: Biology 361T, 365S, Neuroscience 365R.
  - c. Behavior and psychology: Biology 359K, 359R, Psychology 332.
  - d. Evolution and ecology: Biology 357, 364, 370, 373.
- 14. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete at least fifteen semester hours of coursework, including at least nine hours of upper-division work, from one of the two following groups of concentrations. A course counted toward requirement 13 may not also be counted toward requirement 14.

Group A: Biochemistry 369 and twelve additional hours chosen from the following concentrations.

- a. Cellular, molecular, and developmental biology: Biology 320, 320L\*, 323L\*, 325L\*, 325T, 226L\*, 326R, 327E, 328D\*, 330, 230L\*, 331L\*, 332, 337 (Topic: *Genomics*), 339, 339M, 345, 349, 349L\*, 365N, 366R.
- b. Genetics and biotechnology: Biology 325L\*, 325T, 226L\*, 326R, 327D, 327E, 335, 337 (Topic: *Genomics*), 339, 347, 361, 366, 366R, Philosophy 325M.
- c. Pathogenesis and immunity: Biology 226L\*, 326R, 327E, 330, 230L\*, 327D, 331L\*, 332, 336, 337 (Topic: *Genomics*), 339, 347, 360K, 160L\*, 360M, 361, 361L\*, 361P, 366, Neuroscience 365T.

Group B: Fifteen hours chosen from the following concentrations; only one of the following courses may be counted: Anthropology 432L\*, Biology

446L\*, 478L\*, or Kinesiology 324K\*. Sociology 319 and 369K may not both be counted.

- a. Social aspects of health and disease: Biochemistry 369, Geography 357, Pharmacy 310K or 350K, Philosophy 325M, Sociology 307E, 307M, 307P, Sociology 308 (Topic 3: *Life and Death Decisions*; Topic: *Conquest of Disease*), Sociology 319, 321K, 330C, 336C, 336D, 354K, 358D, 369K.
- b. Problems of developing countries: Biology 351, Geography 340D, 342C, 346, 356, 356T (Topic: *Global Societies*), 357, 358, Sociology 319, 324K, 340C, 369K, 369L.
- c. Human impact on the environment: 373, 373L\*, 375, Geography 334, 335N, 336C, 346, 356T (Topic: *Environment, Development, and Food Production*), 366K, 367K, Marine Science 320, 120L\*, 354Q, Philosophy 325C, Sociology 319.
- d. Human variation and evolution: Biochemistry 369 and twelve hours chosen from the following courses: Anthropology 432L\*, 346L, 346M, 347C, 348, 348K (approved topics only), 349C, 350C, 351E, Biology 446L\*, 478L\*, Kinesiology 324K\*.

15. Enough additional coursework to make a total of 120 semester hours.

## Option III: Marine and Freshwater Science

- 6. Mathematics 408C and 408D, or 408N and 408S.
- 7. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N;
  - c. Physics 303K, 103M, 303L, and 103N; or
  - d. Physics 302K, 102M, 302L, and 102N
- 8. Chemistry 301 or 301H, 302 or 302H, 204, 220C, 320M, and 320N.
- 9. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; these courses must be completed before the student progresses to other upper-division biology courses.
- 10. At least four laboratory courses in biology, of which three must be upper-division; the student must complete Biology 206L or 208L.
- 11. Biology 328M or Statistics and Data Sciences 328M.
- 12. Marine Science 310; Biology 101C (Topic 1: *Marine Science Seminar*); and three semester hours in geological sciences, chosen from courses that may be counted toward the requirements for a major in geological sciences.
- 13. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete the following courses:
  - a. Biology 226L and 326R.
  - b. Marine Science 320 and 120L.
  - c. At least twenty-one semester hours of coursework chosen from the following: Biology 321L, 327, 127L, 328, 128L, 354L, 361T, 370, 375, Geological Sciences 422K, Marine Science 440, 352C, 352D, 353 (Topic 17: *Marine Fish Physiology*), 354C, 354Q, 354T, 354U, 356, 357, 367K, 170, 270, 370, Biology 448L or Marine Science 354, Biology 364 or Marine Science 354E; six hours of this coursework must be completed at the Marine Science Institute at Port Aransas (<http://www.utmsi.utexas.edu>).
- 14. Enough additional coursework to make a total of 126 semester hours.

## Option IV: Microbiology and Infectious Diseases

- 6. Mathematics 408C or 408N and Statistics and Data Sciences 328M.
- 7. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N;

- c. Physics 303K, 103M, 303L, and 103N; or
  - d. Physics 302K, 102M, 302L, and 102N
8. Chemistry 301 or 301H, 302 or 302H, 204, and Chemistry 220C, 320M, 320N, and Biochemistry 369.
  9. Biology 311C, 311D, and 325 or Biology 315H and 325H; these courses must be completed before the student progresses to other upper-division biology courses.
  10. Biology 206L.
  11. Two upper-division biology laboratory courses, one of which must be chosen from Biology 230L, 160L, and 361L; **Biology 377-FRI/377/379H** may be used for the second course if approved in advance by the microbiology faculty adviser; Biology 226L may not be used to fulfill this requirement.
  12. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete the following courses: Biology 226L, 326R, 330, 339, 360K, 366, 370, and 320 or 344.
  13. Enough additional coursework to make a total of 126 semester hours.
10. At least four laboratory courses in biology. The student must complete Biology 206L, and at least nine semester hours chosen from the following courses: Biology 320L, 325L, 331L, 371L, 478L, Electrical Engineering 374L, Neuroscience 365L, 366L, 478L, 366P, 366S.
  11. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete the following courses:
    - a. Biology 320, 344, 349, 370, and Neuroscience 365R.
    - b. Six semester hours chosen from the following courses: Biology 359K, 365N, Neuroscience 365D, 365T, 365W, 366C, 366D, 466G, Psychology 353K.
    - c. Six semester hours chosen from the following courses: Biology 328M or Statistics and Data Sciences 328M, Biology 321G, 337J, Chemistry 353 or 353M, 354, Biochemistry 369, 370, Computer Science 313E, 323E, 324E, 326E, 327E, Electrical Engineering 411, 313, 325, 438, 438K, 351K, 374K.
    - d. Three additional semester hours chosen from the following courses: Computer Science 303E, Psychology 308, 332, or 353K.
  12. Enough additional coursework to make a total of 126 semester hours.

### Option V: Cell and Molecular Biology

6. Mathematics 408C or 408N and Statistics and Data Sciences 328M.
7. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N; or
  - c. Physics 303K, 103M, 303L, and 103N
8. Chemistry 301 or 301H, 302 or 302H, 204, 220C, 320M, 320N, and Biochemistry 369.
9. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; these courses must be completed before the student progresses to other upper-division biology courses.
10. At least four laboratory courses in biology, of which three must be upper-division; **Biology 377-FRI/377/379H** may be used for the second course if approved in advance by the cell and molecular biology faculty adviser.
11. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete the following courses:
  - a. Biology 320 and 344.
  - b. Biology 226L, 326R, 349, 370, and one of the following: 320L, 331L, 349L.
  - c. Biology 328, 365S, Neuroscience 365R.
  - d. At least six semester hours chosen from the following: Biology 323L, 325L, 325T, 327D, 330, 230L, 335, 336, 337J, 339, 339M, 347, 349L, 350M, 360K, 160L, 360M, 365N, 366, 366R, Chemistry 353 or 353M, and Neuroscience 365D, 365L, 365T, 365W.
12. Enough additional coursework to make a total of 126 semester hours.

### Option VI: Neurobiology

6. Mathematics 408C and 408D, or 408N and 408S.
7. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N;
  - c. Physics 303K, 103M, 303L, and 103N; or
  - d. Physics 302K, 102M, 302L, and 102N
8. Chemistry 301 or 301H, 302 or 302H, 204, 220C, 320M, and 320N.
9. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; these courses must be completed before the student progresses to other upper-division biology courses.

### Option VII: Plant Biology

6. Mathematics 408C or 408N and Statistics and Data Sciences 328M.
7. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N;
  - c. Physics 303K, 103M, 303L, and 103N; or
  - d. Physics 302K, 102M, 302L, and 102N
8. Chemistry 301 or 301H, 302 or 302H, 204, 220C, 320M, and 320N.
9. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; these courses must be completed before the student progresses to other upper-division biology courses.
10. Four biology laboratory courses, of which three must be upper-division; one of which must be chosen from chosen from Biology 206L or 208L; Biology 377-FRI/377/379H may be used for the second course if approved in advance by the plant biology faculty adviser
11. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete at least twenty-four hours of coursework chosen from the following: Biology 320, 320L, 322 and 122L, 323L, 324 and 124L, 327 and 127L, 328, 328D, 331L, 350M, 351, 352, 370, 472L, 373, 373L, 374 and 174L, 375, and Biochemistry 369.
12. Eleven additional semester hours of upper-division coursework in the College of Natural Sciences or the Jackson School of Geosciences; a course may not be counted toward this requirement if it does not fulfill major requirements in the department that offers it.
13. Enough additional coursework to make a total of 126 semester hours.

### Option VIII: Teaching

This option is designed to fulfill the course requirements for certification as a middle grades or secondary school science teacher in Texas; the student chooses either composite science certification with biology as the primary teaching field or life science certification. However, completion of the course requirements does not guarantee the student's certification. Information about additional certification requirements is available from the UTeach-Natural Sciences academic adviser.

5. Mathematics 408C and 408D, or 408N and 408S.
6. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N;

- c. Physics 303K, 103M, 303L, and 103N; or
- d. Physics 302K, 102M, 302L, and 102N

Science 360 (Topic 4: *Physics by Inquiry*) and Physics 108 may substitute for Physics 316 and 116L, 317L and 117N, 303L and 103N, or 302L and 102N; Physics 108 is offered on the pass/fail basis.

7. Chemistry 301 or 301H, 302 or 302H, 204, and either Chemistry 320M, 320N, and 220C or 320M and Biochemistry 369.
8. Either Biology 311C, 311D, and 325 or 315H and 325H. These courses must be completed before the student progresses to other upper-division biology courses.
9. At least four laboratory courses in biology. Three of these courses must be upper-division. The student must complete Biology 206L or 208L.
10. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete the following courses:
  - a. Biology 320, 226L, 326R, 370, and either 324 and 124L or 322 and 122L.
  - b. At least three semester hours chosen from the following courses in physiology, neurobiology, and behavior: Biology 322, 122L, 328, 328D, 128L, 329, 129L, 438L, 339, 345, 359J, 359K, 359R, 360K, 160L, 361, 361L, 361T, 365N, 365S, 371L, Neuroscience 365L, 365R.
  - c. One of the following courses with a substantial field component: Biology 321L, 340L, 453L, 455L, 456L, 373L, Marine Science 352D, 354, 354C.
11. One of the following research methods courses: Biology 328D, 337 (Topic 2: *Research Methods: UTeach*), Chemistry 368 (Topic 1: *Research Methods: UTeach*), Physics 341 (Topic 7: *Research Methods: UTeach*).
12. History 329U or Philosophy 329U.
13. One of the following:
  - a. For composite science certification: Biochemistry 369 (to be counted as upper-division biology hours) and six semester hours of coursework in geological sciences. Courses intended for nonscience majors may not be counted toward this requirement. The remaining composite certification content requirements are met by the chemistry, physics, and science courses used to fulfill requirements 7 and 8.
  - b. For life science certification: Biology 373, and three additional semester hours of biology chosen from the courses listed in requirement 11b.
14. Eighteen semester hours of professional development coursework consisting of:
  - a. Curriculum and Instruction 650S.
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350.
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355.
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360.
  - e. UTeach-Natural Sciences 101, 110, and 170.
15. Students seeking middle grades certification must complete the following courses: Educational Psychology 363M (Topic 3: *Adolescent Development*), or Psychology 301 and 304; and Curriculum and Instruction 339E.
16. Enough additional coursework to make a total of 126 semester hours.

## Option IX: Biology Honors

6. Breadth requirement: An honors mathematics course; Biology 315H and 325H; Chemistry 301H and 302H; and one of the following: a

three-hour honors-designated computer science course; a three-hour honors-designated statistics course; Physics 301 and 101L; Physics 315 and 115L; or Physics 316 and 116L. Credit earned by examination may not be counted toward this requirement.

7. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N; or
  - c. Physics 303K, 103M, 303L, and 103N

Courses used to satisfy this requirement may also be counted toward requirement 6.

8. Chemistry 204, 128K, 128L, 328M, and 328N.
9. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete Biology 320 or 344, 349, 370, Neuroscience 365R, and at least twelve additional semester hours of upper-division coursework in biology chosen from a list available in the student's advising office. Six semester hours of thesis coursework may be counted toward the twelve semester hours of upper-division biology.
10. Three upper-division laboratory courses in biology; Biology 377 or 379H may be used as only one of the three required upper-division laboratory courses. Courses used to fulfill this requirement may also be counted toward requirement 9.
11. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
12. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program .
13. Two semesters of Biology 379H.
14. Fifteen additional semester hours of coursework approved by the departmental honors adviser.
15. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
16. Enough additional coursework to make a total of 120 semester hours.

## Option X: Computational Biology

6. Mathematics 408C and 408D, or 408N, 408S, and 408M; Statistics and Data Sciences 329C or Mathematics 340L or 341; Mathematics 362K; and Mathematics 358K or 378K or Statistics and Data Sciences 321 or 325H or 328M.
7. Computer Science 303E; Computer Science 313E or Statistics and Data Sciences 222; and one of the following courses: Computer Science 323E, 323H, 324E, 327E, 329E, 337, 367, Statistics and Data Sciences 329D, 335, 374D, 374E, Mathematics 348, 372K, 376C.
8. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 317K, 117M, 317L, and 117N; or
  - c. Physics 303K, 103M, 303L, and 103N
9. Chemistry 301 or 301H, 302 or 302H, and 204.
10. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; these courses must be completed before the student progresses to other upper-division biology courses.
11. In fulfilling requirement 4 of the Prescribed Work Common to All Options above, the student must complete Biology 321G, 370, and six additional hours of upper-division coursework in biology.
12. Four biology laboratory courses, of which three must be upper-division; Biology 321G and Statistics and Data Sciences 328M may fulfill two of these upper-division requirements.

13. Enough additional coursework to make a total of 126 semester hours.

## Special Requirements

Students in all options must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in *General Information*.

To graduate and be recommended for certification, students who follow the teaching option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 12, and in each of the professional development courses listed in requirement 14 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 15. For information about the portfolio review and additional teacher certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

To graduate under the honors option, students must remain in good standing in the Dean's Scholars Honors Program (<http://cns.utexas.edu/honors/honors-programs-center/deans-scholars>), must submit an honors thesis approved by the departmental honors adviser, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/>.

## Order and Choice of Work

Students begin the Bachelor of Science in Biology degree program with six hours of introductory biology for science majors (Biology 311C and 311D), as well as Chemistry 301 or 301H and 302 or 302H and Mathematics 408C or 408N. The genetics course, Biology 325, is prerequisite to other upper-division biology courses. Students should consult with academic advisers about specific concentrations within biology, about appropriate courses in mathematics and physical sciences, and about course load and the balance between laboratory and nonlaboratory work. Most students select an option by the end of the second year and take at least twenty-one hours of upper-division coursework in the major in the third and fourth years.

## Bachelor of Science in Chemistry

Four degree plans lead to the Bachelor of Science in Chemistry. Option I, chemistry, is intended to prepare students for professional careers as chemists, either upon graduation or after graduate study in chemistry or related fields. Option II, computation, is intended to prepare students for the workplace by giving them opportunities to develop hands-on computation skills. Option III, teaching, is intended to prepare students to enter the teaching profession. Option IV, chemistry honors, is intended to prepare students for academic or research careers. Students who plan to follow option IV must be admitted to the Dean's Scholars Honors Program (p. 536).

The four degree plans may also serve as the basis for work in many areas outside pure chemistry, such as materials science, medicine and other health-related fields, pharmacology, patent law, business, computation, or environmental science. After general chemistry courses, depending on his or her background, the student makes an intensive core study of some of the major areas of chemistry—organic, physical, inorganic, and analytical chemistry. The chemistry coursework in these degree plans culminates in approximately three semesters of advanced work, allowing each student to study more broadly by taking courses in some areas of chemistry not covered in the core courses, such as macromolecular

chemistry, biochemistry, or other areas of physical chemistry, or more deeply by taking advanced special topics courses in areas of special interest and by undertaking research projects. Throughout the curricula, emphasis is placed on laboratory experience—synthesis, separations and analysis, structure identification and determination, measurement of rates of reactions, determinations of energy changes accompanying reactions. Supporting work in mathematics and physics is an integral part of the degree programs. Compared to the program leading to the bachelor of arts degree, the Bachelor of Science in Chemistry degree programs are more thorough and demanding and potentially more rewarding to the student planning a career in chemistry.

## Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Chemistry must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag; one of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. Options I and II: One of the following foreign language/culture choices. Students in options III and IV are exempt from this requirement.
  - a. Second-semester-level proficiency, or the equivalent, in a foreign language.
  - b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour courses in one foreign culture area. The courses must be chosen from an approved list available in the dean's office and the college advising centers.
4. The following courses:
  - a. General chemistry: Chemistry 301 or 301H, 302 or 302H, and 317.
  - b. Organic chemistry: Chemistry 128K, 128L, 328M, and 328N; or 220C, 320M, and 320N.
  - c. Biochemistry: Biochemistry 339F or 369.
  - d. Physical chemistry: Chemistry 353 or 353M, 153K, 154K, and either 354 or 354L.
  - e. Inorganic chemistry: Chemistry 431.
  - f. Analytical chemistry: Chemistry 456 and 376K.
5. Thirty-six semester hours of upper-division coursework.
6. At least twenty-one semester hours of upper-division coursework, including at least twelve semester hours of upper-division coursework in chemistry, must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Chemistry

7. Mathematics 408C and 408D, or 408N, 408S, and 408M; and at least three semester hours of upper-division coursework in mathematics or computer science.
8. One of the following sequences:

- a. Physics 301, 101L, 316, and 116L;
  - b. Physics 303K, 103M, 303L, and 103N; or
  - c. Physics 317K, 117M, 317L, and 117N.
9. Six semester hours chosen from the following courses: Biochemistry 339J, 364C, 364D, 364E, 364F, 369L\*, 370, Chemistry 341\*, 354, 354L, 354S, 367C, 367L, 368, 369K\*, 371K\*, 372C\*, 375K, and 475K. At least three of these six hours must be in a laboratory course; courses marked with an asterisk (\*) may be used to fulfill this laboratory requirement. Chemistry 341 and 368 may be repeated for credit toward this requirement when the topics vary. No more than three semester hours in Chemistry 369K may be counted toward this requirement; three additional hours may be counted as electives. No more than three semester hours in Chemistry 371K may be counted toward this requirement; three additional hours may be counted as electives. No more than three hours in Chemistry 372C may be counted toward this requirement; three additional hours may be counted as electives.
10. Nine additional semester hours of coursework in the College of Natural Sciences (excluding chemistry), the Cockrell School of Engineering, and the Jackson School of Geosciences. Any course designed for science or engineering majors may be counted. With the exception of courses in the Elements of Computing Certificate Program, a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it. No more than six hours of laboratory or field research from the Jackson School or any department in the College of Natural Sciences or the Cockrell School may be counted.
11. Enough additional coursework to make a total of 127 semester hours.

### Option II: Computation

Students who complete option II may simultaneously fulfill some of the requirements of the Certificate in Scientific Computation (p. 541).

- 7. Mathematics 408C and 408D, or 408N, 408S, and 408M; and Statistics and Data Sciences 329C or Mathematics 340L or 341.
- 8. One of the following sequences:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 303K, 103M, 303L, and 103N; or
  - c. Physics 317K, 117M, 317L, and 117N.
- 9. Chemistry 368 (Topic: *Computational Chemistry*).
- 10. At least three semester hours chosen from the following laboratory courses: Biochemistry 369T, Chemistry 341, 369K, and 371K.
- 11. Statistics and Data Sciences 222 and three of the following courses; the student must complete coursework from at least two of the following areas.
  - a. Numerical methods: Chemical Engineering 348, Computer Science 323E, 323H, 367, Mathematics 348, Statistics and Data Sciences 335.
  - b. Statistical methods: Biomedical Engineering 335, Mathematics 358K, 378K.
  - c. Other computing topics: Computer Science 324E, 327E, 329E (approved topics), 377, Mathematics 346, 362M, 368K, 372K, 376C, Mechanical Engineering 367S, Statistics and Data Sciences 329D, 374C, 374D, 374E.

- 12. Enough additional coursework to make a total of 127 semester hours.

### Option III: Teaching

This option is designed to fulfill the course requirements for certification as a middle grade or secondary school science teacher in Texas; the student chooses one of the following areas: composite science certification with chemistry as the primary teaching field; physical sciences certification; or physical science, mathematics, and engineering certification. However, completion of the course requirements does not guarantee the student's certification. Information about additional teacher certification requirements is available from the UTeach-Natural Sciences academic adviser.

- 7. Mathematics 408C and 408D, or 408N, 408S, and 408M.
- 8. History 329U or Philosophy 329U.
- 9. One of the following sequences:
  - a. For students seeking composition science certification: Physics 301, 101L, 316, and 116L; or Physics 303K, 103M, 303L, and 103N; or Physics 317K, 117M, 317L, and 117N. Science 360 (Topic 4: *Physics by Inquiry*) and Physics 108 (Topic: *Physics by Inquiry*) may substitute for Physics 316 and 116L, 317L and 117N, or 303L and 103N. Physics 108 is offered on the pass/fail basis.
  - b. For students seeking either physical sciences certification or, mathematics, physical science, and engineering certification: Physics 301, 101L, 316, 116L, 315, and 115L; or 303K, 103M, 303L, 103N, 315, and 115L.
- 10. The requirements of one of the following certification areas:
  - a. For composite science certification:
    - i. Biology 311C and 311D.
    - ii. Six hours of coursework in geological sciences; courses intended for non-science majors may not be counted toward this requirement.
    - iii. Enough additional approved coursework in biology, geological sciences, or physics to provide the required twelve hours in a second field.
    - iv. Chemistry 368 (Topic 1: *Research Methods: UTeach*) or, with the consent of the UTeach-Natural Sciences academic adviser, an upper-division chemistry course that includes a substantial research component.
    - v. In place of requirements 4c through 4f of the prescribed work above, the following courses, for a total of at least thirty-four semester hours of chemistry: Biochemistry 339F or 369; Chemistry 353; and 455 or 456.
  - b. For physical sciences certification:
    - i. Mathematics 427K and 427L.
    - ii. Chemistry 153K, 354L, and 154K.
    - iii. Chemistry 354 and three hours of upper-division coursework in physics.
    - iv. Chemistry 368 (Topic 1: *Research Methods: UTeach*) or, with the consent of the UTeach-Natural Sciences academic adviser, an upper-division chemistry course that includes a substantial research component.
    - v. In place of requirements 4c through 4f of the prescribed work above, the following courses, for a total of at least thirty-four semester hours of chemistry: Biochemistry 339F or 369; Chemistry 353, and 455 or 456.
  - c. For mathematics, physical science, and engineering certification:
    - i. Mathematics 315C, 360M or 375D (Topic: *Discovery: Introduction to Advanced Study in Mathematics*), 427K, and 333L.

- ii Chemical Engineering 379 (Topic: *Fundamentals of Engineering and Design*), 379 (Topic: *Engineering Energy Systems*), and Mechanical Engineering 379M (Topic: *Design of Machines and Systems*).
  - iii Chemistry 368 (Topic 1: *Research Methods: UTeach*) or, with the consent of the UTeach-Natural Sciences academic adviser, an upper-division chemistry course that includes a substantial research component.
  - iv In place of requirements 4c through 4f of the prescribed work above, the following courses, for a total of at least thirty semester hours in chemistry: Chemistry 353 and 153K, 455, and Biochemistry 369.
11. Eighteen semester hours of professional development coursework consisting of:
    - a. Curriculum and Instruction 650S.
    - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350.
    - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355.
    - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360.
    - e. UTeach-Natural Sciences 101, 110, and 170.
  12. Students seeking middle grades certification must complete the following courses: Educational Psychology 363M (Topic 3: *Adolescent Development*), or Psychology 301 and 304; and Curriculum and Instruction 339E.
  13. Enough additional coursework, if needed, to make a total of 126 semester hours.

## Option IV: Chemistry Honors

7. Breadth requirement: An honors mathematics course, Chemistry 301H and 302H, Physics 301, 101L, 316, and 116L, and a three-semester-hour honors course in biology or computer science. Credit earned by examination may not be counted toward this requirement.
8. Chemistry 317.
9. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
10. A section of Rhetoric and Writing 309S that is restricted to Dean's Scholars.
11. Chemistry 379H and a three-semester-hour upper-division research course approved by the departmental honors adviser, or six hours of Chemistry 379H.
12. Twenty-two additional hours of coursework approved by the departmental honors adviser.
13. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
14. Enough additional coursework to make a total of 120 semester hours.

## Special Requirements

Students in all options must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a University grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in *General Information* (<http://catalog.utexas.edu/general-information>).

To graduate and be recommended for certification, students who follow the teaching option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 7, and each of the professional development courses listed in requirement 10 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 11. For information about the

portfolio review and additional teacher certification requirements, consult the UTeach-Natural Sciences academic adviser.

To graduate under option IV, students must remain in good standing in the Dean's Scholars Honors Program, must earn grades of at least A- in the departmental research and thesis courses described in requirement 10 above, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum may be found on the College of Natural Sciences Web site (<https://cns.utexas.edu/>).

## Order and Choice of Work

Students are strongly recommended to take the chemistry/biochemistry–major sections of the following courses: Chemistry 301 or 301H (if taken), 302 or 302H, 128K, 128L, 328M, and 328N. Students planning a graduate program are strongly recommended to take Physics 301, 101L, 316, 116L, 315, and 115L.

Students in option II should consult the undergraduate adviser each semester regarding order and choice of work; those in option III should consult the UTeach-Natural Sciences academic adviser.

The following order of work is recommended as a typical minimum program for option I. It assumes that the student has high school credit in trigonometry, college algebra, and the first semester of general chemistry; is able to earn credit by examination for Chemistry 301; and is able to score well enough on the ALEKS placement examination to take Mathematics 408C or 408N in the first semester of the freshman year. Many students meet some of the following course requirements by credit by examination.

**First year:** Chemistry 302 or 302H, and 317; Mathematics 408C and 408D, or 408N, 408S, and 408M; Physics 301 and 101L, or 303K and 103M, or 317K and 117M (to be taken after Mathematics 408C or 408N); Rhetoric and Writing 306; six semester hours to fulfill core curriculum requirements.

**Second year:** Chemistry 128K, 128L, 328M, and 328N, or 220C, 320M, and 320N; any coursework needed to meet a core curriculum requirement; three semester hours to be counted toward requirement 4 of the prescribed work; English 316L, 316M, 316N, or 316P; Physics 316 and 116L, or 303L and 103N, or 317L and 117N; an upper-division mathematics course (such as Mathematics 427K) or an upper-division computer science course.

**Third year:** Biochemistry 339F or 369, Chemistry 353, 153K, 354L, 456; six semester hours of American and Texas government; six semester hours of American history; three semester hours of electives; a three-semester-hour course to fulfill a core curriculum requirement; three semester hours to be counted toward requirement 4 of the prescribed work.

**Fourth year:** Chemistry 431, 154K, 376K, and courses to fulfill requirement 3 of the prescribed work. The student must also take enough additional coursework to fulfill requirements 4, 5, 9, and 10 of the prescribed work. It is recommended that the majority of the elective courses taken to fulfill requirements 4 and 9 be chosen from upper-division courses in biology, chemistry, chemical engineering, mathematics, and physics.

## Bachelor of Science in Computer Science

The Bachelor of Science in Computer Science degree program provides a strong technical background for students planning to begin careers upon graduation and for those interested in graduate study in computer

science. This program allows students to take more coursework in computer science and related technical areas than does the bachelor of arts degree program.

In addition to the three options leading to the Bachelor of Science in Computer Science, students may apply to option IV, the Integrated Program, which leads to simultaneous completion of the Bachelor of Science in Computer Science and the Master of Science in Computer Science, the Master of Science in Information Studies, or the Master of Science in Computational Science, Engineering, and Mathematics. The requirements for the Bachelor of Science in Computer Science, option IV, are given below. The requirements for the Master of Science in Computer Science, the Master of Science in Information Studies, and the Master of Science in Computational Science, Engineering, and Mathematics are described in the *Graduate Catalog*.

Students who would like to pursue any of the following options must first be admitted to the degree program. The admission processes for options I, II, and IV are described in The Major in Computer Science (p. 533); the admission process for option III is described in the section Dean's Scholars Honors Program (p. 536).

## Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Computer Science must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. Options I, II, and IV: One of the following foreign language/culture choices. Students in option III and V are exempt from this requirement.
  - a. Second-semester-level proficiency, or the equivalent, in a foreign language.
  - b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour courses in one foreign culture area. The courses must be chosen from an approved list available in the dean's office and the college advising centers.
4. At least forty-two semester hours of upper-division coursework.
5. At least twenty-one semester hours of upper-division coursework in computer science must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Computer Science

6. Mathematics 408C and 408D, or 408N, 408S, and 408M; either 340L or 341 or Statistics and Data Sciences 329C; and Mathematics 362K or Statistics and Data Sciences 321.
7. One of the following sequences of coursework:
  - a. Either Biology 311C and 311D, or Biology 315H and 325H, and Biology 206L or 208L.
  - b. Chemistry 301 or 301H, 302 or 302H, and 204.

- c. Geological Sciences 401 and either 404C or 405.
- d. Physics 303K, 303L, 103M, and 103N.

8. An additional sequence chosen from those in requirement 7 above, or one of the following:
  - a. At least six hours of upper-division coursework in biology approved by the undergraduate adviser.
  - b. Chemistry 128K, 128L, 328M, and 328N, or Chemistry 220C, 320M, and 320N, or at least six hours of upper-division coursework in chemistry approved by the undergraduate adviser.
  - c. Geological Sciences 416K and 426P, or at least six hours of upper-division coursework in geological sciences approved by the undergraduate adviser.
  - d. Physics 315 and at least three hours of upper-division coursework in physics approved by the undergraduate adviser.
  - e. At least six hours of upper-division coursework in mathematics approved by the undergraduate adviser; a course may not be counted toward both requirement 6 and requirement 8.
  - f. Electrical Engineering 313 and 331.
9. The following courses in computer science:
  - a. Theory: Computer Science 311 or 311H, 331 or 331H, and three additional hours from an approved list available in the department.
  - b. Programming: Computer Science 312 or 312H, 314 or 314H, and three additional hours from an approved list in the department.
  - c. Systems: Computer Science 429 or 429H, 439 or 439H, and three additional hours from an approved list available in the department.
  - d. Fifteen additional hours of upper-division courses in computer science.
10. Enough additional coursework to make a total of 127 semester hours.

### Option II: Turing Scholars Honors

6. Mathematics 408C and 408D, or 408N, 408S, and 408M; either 340L or 341 or Statistics and Data Sciences 329C; and Mathematics 362K or Statistics and Data Sciences 321.
7. One of the following sequences of coursework:
  - a. Either Biology 311C and 311D, or Biology 315H and 325H; and Biology 206L or 208L.
  - b. Chemistry 301 or 301H, 302 or 302H, and 204.
  - c. Geological Sciences 401 and either 404C or 405.
  - d. Physics 303K, 303L, 103M, and 103N.
8. An additional sequence chosen from those in requirement 7 above, or one of the following:
  - a. At least six hours of upper-division coursework in biology approved by the undergraduate adviser.
  - b. Chemistry 128K, 128L, 328M, and 328N, or Chemistry 220C, 320M, and 320N, or at least six hours of upper-division coursework in chemistry approved by the undergraduate adviser.
  - c. Geological Sciences 416K and 426P, or at least six hours of upper-division coursework in geological sciences approved by the undergraduate adviser.
  - d. Physics 315 and at least three hours of upper-division coursework in physics approved by the undergraduate adviser.

- e. At least six hours of upper-division coursework in mathematics approved by the undergraduate adviser; a course may not be counted toward both requirement 6 and requirement 8.
  - f. Electrical Engineering 313 and 331.
9. The following courses in computer science:
- a. Theory: Computer Science 311 or 311H, 331 or 331H, and three additional hours from an approved list available in the department.
  - b. Programming: Computer Science 314 or 314H, and three additional hours from an approved list available in the department.
  - c. Systems: Computer Science 429 or 429H, 439 or 439H, and three additional hours from an approved list available in the department.
  - d. Computer Science 178H and 379H.
  - e. Twelve additional hours of upper-division courses in computer science.

The courses the student chooses to fulfill requirements a through c must be approved by the Turing Scholars (<https://www.cs.utexas.edu/turing-scholars>) program director. In addition to Computer Science 178H and 379H, at least four upper-division courses chosen to fulfill requirements a through e must be honors courses. The honors thesis the student completes in Computer Science 379H must be approved by the program director.

10. Enough additional coursework to make a total of 127 semester hours.

### Option III: Computer Science Honors

- 6. Breadth requirement: An honors mathematics course; Computer Science 311H and 314H; one of the following two-semester sequences: Biology 315H and 325H, Chemistry 301H and 302H, Physics 301, 101L, 316, and 116L; and either an additional three hours chosen from these courses or Physics 315 and 115L. Credit earned by examination may not be counted toward this requirement.
- 7. At least six semester hours of upper-division coursework in mathematics.
- 8. Computer Science 429H, 331H, 439H, and twelve additional hours of upper-division coursework in computer science.
- 9. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
- 10. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
- 11. Computer Science 379H and a three-semester-hour upper-division research course approved by the departmental honors adviser.
- 12. Twenty-five additional semester hours of coursework approved by the departmental honors adviser.
- 13. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
- 14. Enough additional coursework to make a total of 120 semester hours.

### Option IV: Integrated Program

- 6. Mathematics 408C and 408D, or 408N, 408S, and 408M; either 340L or 341 or Statistics and Data Sciences 329C; and Mathematics 362K or Statistics and Data Sciences 321.

- 7. One of the following sequences of coursework:
  - a. Either Biology 311C and 311D, or Biology 315H and 325H; and Biology 206L or 208L.
  - b. Chemistry 301 or 301H, 302 or 302H, and 204.
  - c. Geological Sciences 401 and either 404C or 405.
  - d. Physics 303K, 303L, 103M, and 103N.
- 8. An additional sequence chosen from those in requirement 6 above, or one of the following:
  - a. At least six hours of upper-division coursework in biology approved by the undergraduate adviser.
  - b. Chemistry 128K, 128L, 328M, and 328N, or Chemistry 220C, 320M, and 320N, or at least six hours of upper-division coursework in chemistry approved by the undergraduate adviser.
  - c. Geological Sciences 416K and 426P, or at least six hours of upper-division coursework in geological sciences approved by the undergraduate adviser.
  - d. Physics 315 and at least three hours of upper-division coursework in physics approved by the undergraduate adviser.
  - e. At least six hours of upper-division coursework in mathematics approved by the undergraduate adviser; a course may not be counted toward both requirement 6 and requirement 8.
  - f. Electrical Engineering 313 and 331.

- 9. The following courses in computer science:
  - a. Theory: Computer Science 311 or 311H, 331, or 331H, and three additional hours from an approved list available in the department.
  - b. Programming: Computer Science 312 or 312H, 314 or 314H, and three additional hours from an approved list available in the department.
  - c. Systems: Computer Science 429 or 429H, 439 or 439H, and three additional hours from an approved list available in the department.
  - d. Computer Science 353 or 331 or 331H
  - e. Nine additional hours of upper-division courses in computer science.
- 10. Enough additional coursework to make a total of 120 semester hours.

### Option V: Teaching (Senior grades)

- 6. History 329U or Philosophy 329U.
- 7. Mathematics 408C and 408D, or 408N, 408S, and 408M; either 340L or 341 or Statistics and Data Sciences 329C.
- 8. One of the following sequences of coursework:
  - a. Biology 311C and 311D; and Biology 206L or 208L.
  - b. Chemistry 301 or 301H, 302 or 302H, and 204.
  - c. Geological Sciences 401 and either 404C or 405.
  - d. Physics 303K, 303L, 103M, and 103N.
- 9. The following courses in computer science:

- a. Theory: Computer Science 311 or 311H, 331 or 331H, and three additional hours from an approved list available in the department.
  - b. Programming: Computer Science 312 or 312H, 314 or 314H, and three additional hours from an approved list available in the department.
  - c. Systems: Computer Science 429 or 429H, 439 or 439H, and three additional hours from an approved list available in the department.
10. The requirements of one of the following certification areas:
- a. For computer science certification:
    - i Mathematics 362K and Statistics and Data Sciences 321.
    - ii An additional sequence chosen from the following:
      - 1. Biology 325 and 337 (Topic 2: *Research Methods: UTeach*).
      - 2. At least three hours of upper-division coursework in chemistry approved by the undergraduate adviser; and Chemistry 368 (Topic 1: *Research Methods: UTeach*).
      - 3. Physics 315 and 341 (Topic 7: *Research Methods: UTeach*).
    - iii Fifteen additional hours of approved computer science upper-division coursework.
  - b. For computer science and mathematics certification:
    - i Mathematics 315C, 333L, 362K, either 360M or 375D, and Statistics and Data Sciences 321
    - ii Twelve additional hours of approved computer science upper-division coursework.
    - iii Biology 337 (Topic 2: *Research Methods: UTeach*), or Chemistry 368 (Topic 1: *Research Methods: UTeach*), or Physics 341 (Topic 7: *Research Methods: UTeach*).
11. Eighteen semester hours of professional development coursework consisting of:
- a. Curriculum and Instruction 650S.
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350.
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355.
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360.
  - e. UTeach-Natural Sciences 101, 110, and 170.
12. Enough additional coursework to make a total of 127 semester hours.

## Special Requirements

Students in all options must fulfill both the University's general requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in *General Information* ([\[catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average\]\(http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average\)\).](http://</a></p>
</div>
<div data-bbox=)

To graduate and be recommended for certification students who follow the teaching option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 6, and in each of the professional development courses listed in requirement 11 and must pass the final teaching portfolio review. For information about the portfolio review and additional teacher certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

With the exception of Computer Science 312 or 312H, 311 or 311H, and 314 or 314H, all computer science courses that may be counted toward a degree in computer science are restricted to students who have been admitted to the computer science major or have the consent of the undergraduate faculty adviser.

An undergraduate may not enroll in any computer science course more than once without written consent of an undergraduate adviser in computer science. No student may enroll in any computer science course more than twice. No student may take more than three upper-division computer science courses in a semester without written consent of an undergraduate adviser in computer science.

## Additional Requirements for Option II

Students in option II, the Turing Scholars program (<https://www.cs.utexas.edu/turing-scholars>), must maintain a University grade point average of at least 3.30 and a grade point average in computer science of at least 3.30; in rare circumstances, this grade point average requirement will be waived for students whose honors thesis has been judged by the Department of Computer Science Undergraduate Thesis Committee to be truly outstanding. In addition to this grade point average requirement, students in option II must know and abide by the academic and disciplinary policies given in this catalog and in the *General Information* (<http://catalog.utexas.edu/general-information>) *Catalog* (<http://catalog.utexas.edu/general-information>). Those who fail to do so will be considered for academic dismissal from the Turing Scholars program. Under special circumstances and at the discretion of the director, a student will be allowed to continue in the program under academic review. A student who is academically dismissed from the program may enter another computer science program if he or she fulfills the scholastic standards for continuance in the University given in *General Information*. Students in scholastic difficulty should discuss their problems with a Turing Scholars program academic adviser and the director.

## Additional Requirements for Option III

To graduate under option III, students must remain in good standing in the Dean's Scholars Honors Program, must earn grades of at least A- in the departmental research and thesis courses described in requirement 10 above, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/>.

## Additional Requirements for Option IV Satisfactory Progress

Students are expected to make continuous progress toward the degree by completing required computer science coursework each semester. Those who fail to take program coursework two long-session semesters in a row will be removed from the program and re-enrolled in the Bachelor of Science in Computer Science option (I, II, or III) that they were following before admission to the Integrated Program (option IV). Students will be

notified before this action is taken; they must meet with their academic adviser upon being notified.

## Probation

The student is placed on probation if his or her grade point average in required undergraduate computer science courses falls below 3.00. Except with the consent of the undergraduate adviser or the graduate adviser, a student on probation may not take graduate computer science courses.

## Dismissal

The student is dismissed from the Integrated Program if (1) he or she fails to improve his or her academic performance significantly while on probation, or (2) he or she will not achieve a grade point average of 3.00 even by earning grades of *A* in all remaining required undergraduate computer science and graduate courses.

Like all students, those in the Integrated Program must know and abide by the academic and disciplinary policies given in this catalog and in the *General Information Catalog*. Those who fail to do so will be considered for academic dismissal from the program. Under special circumstances and at the discretion of the director, a student may be allowed to continue in the program under academic review. A student who is academically dismissed from the program may enter another computer science program if he or she fulfills the scholastic standards for continuance in the University given in the *General Information* (<http://catalog.utexas.edu/general-information>) *Catalog*. Students in scholastic difficulty should discuss their problems with an academic adviser and the undergraduate faculty adviser.

## Graduation

To receive the Bachelor of Science in Computer Science and Master of Science in Computer Science, Master of Science in Information Studies, or Master of Science in Computational Science, Engineering, and Mathematics degrees through the Integrated Program, a student must have a University grade point average of at least 3.00 in the coursework in the Master of Science Program of Work. He or she must also have a grade point average in graduate computer science and information studies, or computational science, engineering, and mathematics coursework of at least 3.00.

## Order and Choice of Work

The student must consult the faculty adviser each semester regarding order and choice of work.

Note: Computer science courses with numbers ending in *H* are intended for students in option II, the Turing Scholars program, and option III, computer science honors. Students outside these options may enroll in these courses only with the special consent of the honors director.

# Bachelor of Science in Environmental Science

The Bachelor of Science in Environmental Science degree program is designed for students interested in an interdisciplinary scientific perspective on environmental and sustainability issues, analysis, and management. The degree program provides the broad foundation in physical, life, and social sciences needed for a career or graduate study in environmental science and related fields such as climate change, ecology, and conservation. Students who complete the program successfully will be able to assess environmental issues critically from multiple perspectives; to perform field, laboratory, and computer analyses; and to conduct original research. The program is designed to prepare graduates for careers in local, state, and federal government laboratories

and nonprofit agencies, environmental consulting firms, environmental education and outreach agencies, and universities and other research settings. The degree is offered by the Jackson School of Geosciences with a major in geological sciences, by the College of Liberal Arts with a major in geographical sciences, and by the College of Natural Sciences with a major in biological sciences. The degree programs share common prescribed work, but each major has its own specific requirements. Students may earn only one Bachelor of Science in Environmental Science degree from the University.

Students must apply for admission to the degree program after completing prerequisite coursework. To be competitive for admission, students should have a University grade point average of at least 2.75. More information about admission requirements is given in The Bachelor of Science in Environmental Science (p. 534).

The Bachelor of Science in Environmental Science curriculum consists of 126 semester hours of coursework. All students must complete the University's Core Curriculum (p. 20). The specific degree requirements consist of prescribed work and major requirements. In some cases, a course that is required for the degree may also be counted toward the core curriculum.

A course in one prescribed work area may not also be used to fulfill the requirements of another prescribed work area; the only exception to this rule is that a course that fulfills another requirement may also be used to fulfill the writing requirement if the course carries a writing flag.

## Prescribed Work Common to All Options

1. Mathematics: Mathematics 408C, or 408N and 408S.
2. Chemistry: Chemistry 301 or 301H; 302 or 302H; and 204.
3. Physics: Physics 317K and 117M, or another four-hour calculus-based physics sequence.
4. Biological Sciences: Biology 311C and 311D, or 315H.
5. Ecology: Biology 373 and Biology 373L, or Marine Science 320 and either 120L or 152T (Topic: *Marine Ecology*); Marine Science 320 may not be used to satisfy both requirement 5 and requirement 10.
6. Geological Sciences: Geological Sciences 401 or 303, 346C, and an approved geological sciences course in sustainability.
7. Geography: Geography 335N.
8. Field experience: One course from each of the following lists:
  - a. Introductory field seminar: Environmental Science 311.
  - b. Senior field/research experience: Environmental Science 371 or Biology 377 (with prior approval of the faculty adviser).
9. Research Methods: Environmental Science 331.
10. Environmental and sustainability themes: one course in each of the following thematic areas:
  - a. Environmental and sustainability policy, ethics, and history: Geography 334, 336C, 339K, 340D, 342C, 344K, 356C, 356T (approved topics), Marine Science 367K, Philosophy 325C, Sociology 321K.
  - b. Geographic information systems: Geography 360G, 462K, Geological Sciences 327G.
  - c. Climates and oceans: Biology 456L, Geography 333K, 356T (approved topics), Geological Sciences 371C (approved topics), 377P, Marine Science 320, 440, 354Q, 354T, 356; Marine Science 320 may not be used to satisfy both requirement 5 and requirement 10; Marine Science 356 may not be used to satisfy both requirement 10 and requirement 14 in Option I; Marine Science 356 may not be used to satisfy both requirement 10 and requirement 18 in Option II.

- d. Environmental economics, sustainability, and business:  
Economics 304K, 330T.

11. Environmental Science 141 and 151.

## Additional Prescribed Work for Each Option

All students must complete at least fifteen semester hours of upper-division coursework, including one upper-division laboratory/field course in addition to the laboratory/field courses in the prescribed work for the degree. The student must complete Biology 311C, 311D, and 325, or 315H and 325H, with a grade of at least C- in each before progressing to other upper-division biology courses. All students must complete two courses with a writing flag. One of these courses must be upper-division. Courses that meet this requirement are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

### Option I: Biological Science

12. One of the following foreign language/culture choices:
- Second-semester-level proficiency, or the equivalent, in a foreign language.
  - First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
  - Two three-semester-hour courses in one foreign culture area; the courses must be chosen from an approved list available in the dean's office and the college advising centers.
13. Three hours in statistics chosen from Statistics and Data Sciences 328M and 321; with the consent of the undergraduate adviser, an upper-division statistics or probability course may be used to fulfill this requirement.
14. Three hours in conservation and environmental biology chosen from Biology 351, 375, Marine Science 352 (Topic: *Concepts in Marine Conservation Biology*), and 356; Marine Science 356 may not be used to satisfy both requirement 10 and requirement 14.
15. Biology 325 or 325H (for students completing Biology 315H), and 370.
16. One of the following taxon/systems-based diversity courses or pairs of courses: Biology 321L, 324 and 124L, 327 and 127L, 337 (Topic: *Natural History of the Protists*), 340L, 448L, 353F, 453L, 354L, 455L, 364, 369L, 471G, Marine Science 352 (Topic: *Principles of Estuarine Ecology*), 352 (Topic: *Marine Invertebrates*), 352D, 354C, 354E, 354U, 357, Geological Sciences 479M.
17. One of the following physiology, neurobiology, and behavior courses or pairs of courses: Biology 322 and 122L, 328 and 128L, 438L, 339, 345E, 346, 359J, 359K, 359R, 361, 361T, 365S, 371L, Marine Science 355C, Neuroscience 365R.
18. All students must complete two courses with a writing flag, one of which must be upper-division; students must also complete one quantitative reasoning flag. Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.
19. Enough additional coursework to make a total of 126 hours.

### Option II: Biological Sciences Honors

12. To fulfill requirements 1 through 4 of the prescribed work common to all options above, students complete the following breadth

requirement: An honors mathematics course; Biology 315H and 325H; Chemistry 301H and 302H; Physics 301 and 101L; and a designated honors statistics course; Credit earned by examination may not be counted toward this requirement.

13. Chemistry 204.
14. A section of Undergraduate Studies 302 or 303 that is approved by the program adviser or Environmental Science 331.
15. A section of Rhetoric and Writing 309S that is restricted to student in the Dean's Scholars Honors Program.
16. Two semesters of Biology 379H; one semester may be used to fulfill requirement 8b.
17. Biology 370.
18. Three semester hours in conservation and environmental biology chosen from Biology 375, 351, Marine Science 352 (Topic: *Concepts in Marine Conservation Biology*), and 356; Marine Science 356 may not be used to satisfy both requirement 10 and requirement 18.
19. One of the following taxon/systems-based diversity courses or pairs of courses: Biology 321L, 324 and 124L, 327 and 127L, 337 (Topic: *Natural History of the Protists*), 340L, 448L, 353F, 453L, 354L, 455L, 364, 369L, 471G; Marine Science 352 (Topic: *Principles of Estuarine Ecology*), or Marine Science 352 (Topic: *Marine Invertebrates*), 352D, 354C, 354E, 354U, 357; or Geological Sciences 479M.
20. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
21. All students must complete two courses with a writing flag, one of which must be upper-division; students must also complete one quantitative reasoning flag. One of these courses must be upper-division. Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.
22. Enough additional coursework approved by the honors adviser to make a total of 126 semester hours.

## Special Requirements

Students must fulfill both the University's general requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>) *Catalog*.

To graduate under the honors option, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the program honors adviser, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum. More information about the Undergraduate Research Forum is available at <https://cns.utexas.edu/>.

## Bachelor of Science in Human Development and Family Sciences

The Bachelor of Science in Human Development and Family Sciences focuses on the study of human development, individuals in a family

context, relationships, and well-being within the family and the broader social, economic, community, and governmental environment. Students in the program are expected to develop knowledge and understanding about human development and family dynamics through classroom experiences, observation of children and families, and research. They have opportunities to apply their knowledge through practicum experiences in research and placements in the field. The program is designed to give students excellent preparation for graduate training that leads to careers in academia, research, medicine, and other health professions, as well as for employment in a field involving work with children, families, and adults.

Students seeking the Bachelor of Science in Human Development and Family Sciences must choose one of the six options described below. Those who plan to follow option V must be admitted to the Dean's Scholars Honors Program (p. 536) and those who plan to follow option VI must be admitted to the Honors in Advanced Human Development and Family Sciences Program (p. 537).

## Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Human Development and Family Sciences must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag; one of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. Psychology 301; and six semester hours, at least three of which must be upper-division, chosen from courses in economics, social or cultural anthropology, sociology, and psychology; Psychology 304, 333D, and 339 may not be counted toward this degree.
4. At least thirty-six semester hours of upper-division coursework; at least twenty-one semester hours must be completed in residence at the University.
5. Eighteen semester hours in the School of Human Ecology must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Early Childhood

This option is designed to provide the necessary foundation for further study or a career in working with children in applied settings.

6. Statistics and Data Sciences 302; Mathematics 408C, 408N, or Statistics and Data Sciences 332.
7. Chemistry 301 or 301H; Biology 311C; Biology 311D or Chemistry 302 or 302H; and three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for non-science majors may not be counted toward this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.
8. Nine semester hours from an approved list of supporting courses available from the School of Human Ecology. Students should confer with their advisers about courses appropriate to their career goals.

9. Nutrition 306; Human Development and Family Sciences 304, 312, 313, 113L, 315L, and 340; six hours chosen from Human Development and Family Sciences 352, 652F, 352L, 652P, and 355; and three additional hours of coursework in human development and family sciences. Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355 is restricted to students whose practicum applications have been approved. Practicum applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.
10. Human Development and Family Sciences 338 and 378L; and six additional semester hours chosen from Human Development and Family Sciences 342, 345, 351, 358, 362, and 378K (Topic 6: *Introduction to Early Childhood Intervention*).
11. Enough additional coursework to make a total of 120 semester hours.

### Option II: Human Development

This option involves the study of development across the life span.

6. Statistics and Data Sciences 302; Mathematics 408C, 408N, or Statistics and Data Sciences 332.
7. Chemistry 301 or 301H; Biology 311C; Biology 311D or Chemistry 302 or 302H; and three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for non-science majors may not be counted toward this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.
8. Nine semester hours from an approved list of supporting courses available from the School of Human Ecology. Students should confer with their advisers about courses appropriate to their career goals.
9. Nutrition 306; Human Development and Family Sciences 304, 312, 313, 113L, 315L, and 340; six hours chosen from Human Development and Family Sciences 352, 652F, 352L, 652P, and 355; and three additional hours of coursework in human development and family sciences. Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355 is restricted to students whose applications have been approved. Applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.
10. Human Development and Family Sciences 378L; six semester hours chosen from Human Development and Family Sciences 335, 351, and 371; and three additional semester hours chosen from Human Development and Family Sciences 335, 342, 343, 345, 351, 356, 358, 371, and 372K.
11. Enough additional coursework to make a total of 120 semester hours.

### Option III: Families and Personal Relationships

This option involves the study of the formation and maintenance of close relationships, especially couple and family relationships.

6. Statistics and Data Sciences 302; Mathematics 408C, 408N, or Statistics and Data Sciences 332.
7. Chemistry 301 or 301H; Biology 311C; Biology 311D or Chemistry 302 or 302H; and three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for non-science majors may not be counted toward

this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.

- Nine semester hours from an approved list of supporting courses available from the School of Human Ecology. Students should confer with their advisers about courses appropriate to their career goals.
- Nutrition 306; Human Development and Family Sciences 304, 312, 313, 113L, 315L, and 340; six hours chosen from Human Development and Family Sciences 352, 652F, 352L, 652P, and 355; and three additional hours of coursework in human development and family sciences. Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355 is restricted to students whose applications have been approved. Applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.
- Human Development and Family Sciences 337, and either 356 or 372K.
- Six additional semester hours chosen from Human Development and Family Sciences 322, 335, 345, 347, 356, 358, 360, 371, and 372K.
- Enough additional coursework to make a total of 120 semester hours.

### Option IV: Families and Society

This option involves the study of the family and its interactions with larger socioeconomic systems, such as the economy, work, the media, public policy, and government.

- Statistics and Data Sciences 302; Mathematics 408C, 408N, or Statistics and Data Sciences 332.
- Chemistry 301 or 301H; Biology 311C; Biology 311D or Chemistry 302 or 302H; and three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for non-science majors may not be counted toward this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.
- Nine semester hours from an approved list of supporting courses available from the School of Human Ecology. Students should confer with their advisers about courses appropriate to their career goals.
- Nutrition 306; Human Development and Family Sciences 304, 312, 313, 113L, 315L, and 340; six hours chosen from Human Development and Family Sciences 352, 652F, 352L, 652P, and 355; and three additional hours of coursework in human development and family sciences. Registration for Human Development and Family Sciences 352, 652F, 352L, 652P, and 355 is restricted to students whose applications have been approved. Applications are available in the School of Human Ecology advising office; application deadlines are May 1 for enrollment the following spring semester and December 1 for enrollment the following fall semester. If either May 1 or December 1 falls on a weekend or an official University holiday, the application is due the next business day.
- Human Development and Family Sciences 347 and 362; and six additional semester hours chosen from Human Development and Family Sciences 322, 342, 343, 356, 360, and 378K (Topic 6: *Introduction to Early Childhood Intervention*).
- Enough additional coursework to make a total of 120 semester hours.

### Option V: Human Development and Family Sciences Honors

This option is designed to prepare students who have been admitted to the Dean's Scholars program for academic or research careers.

- Breadth requirement: A calculus course and a statistics course, one of which must be a designated honors course; Biology 315H and 325H; Chemistry 301H and 302H; and three additional hours of honors-designated or approved coursework in biology, chemistry, computer science, mathematics, statistics and data sciences, or physics; credit earned by examination may not be counted toward this requirement.
- Human Ecology 115H and 225H.
- Human Development and Family Sciences 304H, 312, 313H, 113L, 315L, and fifteen semester hours chosen from the following: Human Development and Family Sciences 335, 337, 342, 343, 345, 347, 351, 356, 358, 362, 371, 372K, 378L, and approved social science courses.
- A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
- A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
- Human Development and Family Sciences 355H and 379H.
- Twenty-one additional semester hours of coursework approved by the departmental honors adviser.
- Six hours of coursework in the College of Liberal Arts or the College of Fine Arts.
- Enough additional coursework to make a total of 120 semester hours.

### Option VI: Honors in Advanced Human Development and Family Sciences

This option is designed for highly motivated and talented students who are interested in research experience and training.

- A calculus course and a statistics course, one of which must be a designated honors course.
- Chemistry 301 or 301H; Biology 311C; and Biology 311D or Chemistry 302 or 302H.
- Three additional semester hours of coursework in astronomy, biology, chemistry, computer science, geological sciences, mathematics, nutrition (other than Nutrition 306), or physics. Courses designed for nonscience majors may not be counted toward this requirement; students should consult the School of Human Ecology for a list of courses that may be counted.
- Human Development and Family Sciences 304H, 312, 313H, 113L, and 315L; fifteen semester hours chosen from: Human Development and Family Sciences 335, 337, 342, 343, 345, 347, 351, 356, 358, 362, 371, 372K, 378L, and approved social science courses.
- Human Development and Family Sciences 355H and 379H.
- Twenty-one semester hours of additional upper-division coursework approved by the departmental honors adviser.
- Enough additional coursework to make a total of 120 semester hours.

### Special Requirements

Students in all options must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>) *Catalog*.

To graduate under option V, students must remain in good standing in the Dean's Scholars Honors Program, must earn grades of at least A- in the departmental research and thesis courses described in requirement 10 above, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum

(<http://cns.utexas.edu/research-experience/undergraduate-research/undergraduate-research-forum>).

To graduate under option VI, students must remain in good standing with an overall in-residence grade point average of at least 3.30 and an overall grade point average of 3.50 in all human development and family sciences courses. In addition, student research conducted in Human Development and Family Sciences 355H and 379H must be presented in an approved public forum, such as the college's annual Undergraduate Research Forum. Students who fail to maintain the required grade point average may be subject to dismissal from the program. Under special circumstances and at the discretion of the human development and family sciences honors adviser, a student may be allowed to continue under academic review.

## Bachelor of Science in Interdisciplinary Science

### Prescribed Work

All students pursuing an undergraduate degree must complete the University's Core Curriculum (<http://catalog.utexas.edu/undergraduate/undergraduate-studies/academic-policies-and-procedures/#corecurriculum>).

In addition, students seeking the Bachelor of Science in Interdisciplinary Science must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

This degree is designed to fulfill the course requirements for certification in Texas as a middle grades teacher in the composite teaching field of mathematics/science. However, completion of the course requirements does not guarantee the student's certification. For information about additional certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with the following flag: quantitative reasoning.

Courses with flags are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. History 329U or Philosophy 329U.
4. Eighteen semester hours of professional development coursework consisting of:
  - a. Curriculum and Instruction 650S
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350.
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355.
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360.
  - e. UTeach-Natural Sciences 101, 110 and 170.

### Major Requirements

#### Middle Grades Teaching in Mathematics and Science

5. Curriculum and Instruction 339E.
6. Educational Psychology 363M (Topic 3: *Adolescent Development*), or Psychology 301 and 304.
7. The following foundation courses:

- a. Mathematics 408C and 408D, or 408N, 408S, and 408M; and Mathematics 315C, 427K, 333L, and 362K ; students who plan to take physics courses to fulfill requirement 8 must also complete Mathematics 340L or 341.
  - b. Chemistry 301 or 301H , 302 or 302H , and 204.
  - c. Students who plan to use biology or geological sciences courses to fulfill requirement 7 must complete Physics 302K, 102M, 302L , and 102N or an equivalent sequence; those who plan to use chemistry or physics must complete Physics 301, 101L, 316, and 116L.
  - d. Computer Science 303E or the equivalent.
  - e. Biology 311C and Biology 311D and 206L or 208L.
  - f. Three semester hours of coursework in geological sciences.
  - g. Three semester hours of coursework in astronomy or marine science.
  - h. Biology 337 (Topic 2: *Research Methods: UTeach*), Chemistry 368 (Topic 1: *Research Methods: UTeach*), or Physics 341 (Topic: *7 Research Methods: UTeach*).
8. One of the following concentrations:
    - a. Mathematics: Twelve semester hours of coursework chosen from Mathematics 325K or Mathematics 328K; 341 or 340L ; 358K; and either 360M or 375D (Topic: *Discovery: Introduction to Advanced Study in Mathematics*).
    - b. Biology: Twelve hours of coursework chosen from Biology 320, 325, 226L, Biology 326R, 370, 373, either 324 and 124L, or 322 and 122L, and Neuroscience 365R.
    - c. Chemistry: Twelve hours of coursework chosen from Chemistry 220C, 320M , 320N , 353, 455, and Biochemistry 369.
    - d. Geological sciences: Twelve hours of coursework chosen from Geological Sciences 404C or 405, 416K, 416M, 420K or 320L, and 335.
    - e. Physics: Twelve hours of coursework chosen from 315, 115L, 329 , 333, 336K , 338K , 352K , 355, and 373.
  9. Enough additional coursework to make a total of at least 126 semester hours.

### Special Requirements

Students must fulfill both the University's General Requirements (<http://catalog.utexas.edu/undergraduate/the-university/graduation/general-requirements>) for graduation and the college requirements (<http://catalog.utexas.edu/undergraduate/natural-sciences/graduation/#specialrequirementsofthecollege>). They must also earn a grade of at least C- in the supporting course in requirement 2 and in each of the professional development courses listed in requirement 3, 4, and 5. More information about grades and the grade point average is given in *General Information*.

To graduate and be recommended for certification, students must have a University grade point average of at least 2.50 and must pass the final teaching portfolio review. Information about the portfolio review and additional teacher certification requirements is available from the UTeach-Natural Sciences academic adviser.

## Bachelor of Science in Mathematics

As an alternative to the Bachelor of Arts degree, the Bachelor of Science in Mathematics is designed with a twofold purpose: to offer students a more extensive scientific program that may better prepare them for graduate study or employment, and to recognize students who choose to pursue a more demanding program. Students are given the opportunity

to develop greater breadth and depth in their mathematical programs as well as to combine mathematics with a concentration in another scientific discipline.

To accomplish these goals, the minimum number of semester hours is increased and the maximum limit is removed. Specialization in one additional scientific area is encouraged, and the foreign language requirement is shortened by one semester.

Students seeking the Bachelor of Science in Mathematics must select one of six options: actuarial science, applied mathematics, mathematical sciences, pure mathematics, mathematics for secondary teaching, and mathematics honors. Students who choose the option in mathematical sciences must also select a specialization in either scientific computation or statistics, probability, and data analysis. Students who plan to follow option VI, mathematics honors, must be admitted to the Dean's Scholars Honors Program (p. 536).

## Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Mathematics must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. Options I–IV: One of the following foreign language/culture choices:
  - a. Second-semester-level proficiency in a foreign language course.
  - b. First-semester-level proficiency in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour culture courses chosen from one foreign culture category from an approved list in the dean's office and college advising centers. Students in options V and VI are exempt from this requirement.
4. Forty-two semester hours of upper-division coursework. At least twenty-one semester hours of upper-division coursework must be completed in residence at the University.
5. Eighteen semester hours in mathematics must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Actuarial Science

6. Eight semester hours in one of the following areas: astronomy, biology, chemistry, geological sciences, and physics.
7. Mathematics 408C and 408D, or 408N, 408S, and 408M.
8. Actuarial Foundations 329.
9. Economics 304K and 304L.
10. Accounting 310F or both 311 and 312.
11. Finance 357.
12. At least thirty-two semester hours of upper-division coursework in mathematics and supporting areas, consisting of
  - a. One of the following courses: Mathematics 328K, 343K, 361, 361K, 365C, 367K, 373K.

- b. Mathematics 340L or 341.
- c. Mathematics 362K and either 358K or 378K.
- d. Four courses chosen from the following: Mathematics 339J, 339U, 339V, 339D, 339W, 349P, and 349R.
- e. Enough additional coursework to provide a total of at least thirty-two hours. In addition to upper-division mathematics courses, the following courses in supporting areas may be counted toward this requirement: Economics 420K, Finance 354, 367, 377 (Topic 2: *Financial Risk Management*), Legal Environment of Business 320F, 323, Management Information Systems 325, Risk Management 357E, 369K, 377. Courses used to satisfy this requirement may not be counted toward requirement 13.

13. At least six semester hours of upper-division coursework must be outside both mathematics and the fields of study listed in requirement 6.
14. Enough additional coursework to make a total of 126 semester hours.

### Option II: Applied Mathematics

6. Eight semester hours in one of the following areas: astronomy, biology, chemistry, geological sciences, and physics.
7. Mathematics 408C and 408D, or 408N, 408S, and 408M.
8. Computer Science 303E or the equivalent.
9. Thirty-two semester hours of upper-division coursework in mathematics, consisting of the following courses; the student should consult the applied mathematics adviser for information on other courses that may be counted toward this requirement.
  - a. Mathematics 340L or 341.
  - b. Mathematics 427K, 348, 362K, and 374M.
  - c. Mathematics 361 and 365C.
  - d. Mathematics 343K or 373K.
  - e. Enough of the following coursework to provide a total of at least thirty-two hours: Mathematics 346, 365D, 368K, 372K, 376C.
10. At least six semester hours of upper-division coursework must be outside both mathematics and the fields of study listed in requirement 6.
11. Enough additional coursework to make a total of 126 semester hours.

### Option III: Mathematical Sciences

#### Specialization in Statistics, Probability, and Data Analysis

6. Eight semester hours in one of the following areas: astronomy, biology, chemistry, geological sciences, and physics.
7. Mathematics 408C and 408D, or 408N, 408S, and 408M.
8. Computer Science 303E or the equivalent.
9. At least thirty-two semester hours of upper-division coursework in mathematics and related areas, consisting of
  - a. Mathematics 325K .
  - b. Mathematics 427K and 362K.
  - c. Mathematics 340L or 341.
  - d. Mathematics 361K or 365C.
  - e. Mathematics 358K and 378K.
  - f. Mathematics 328K, 343K, 346, or 373K.
  - g. Additional coursework chosen from the following: Computer Science 327E or 347, Economics 341K, 350K (Topic 4: *Advanced Econometrics*), 350K (Topic 6: *Advanced Microeconomic Theory*), 350K (Topic 7: *Applied Economic Analysis*), 354K,

Electrical Engineering 366L, 379K (Topic 15: *Information Theory*), Geography 360G, 360L, Mathematics 339J, 339U, 339V, 343L, 343M, 346, 348, 349P, 349R, 365D, 368K, 373L, 374G, 374M, Mechanical Engineering 366L, 366Q, 366R, 367S, Psychology 325K, Risk Management 357E. Courses used to satisfy this requirement may not be counted toward requirement 10. Most of these courses have substantial prerequisites, sometimes including courses in other departments. Some have restricted enrollment. The student is responsible for meeting prerequisites and other requirements for enrollment in the courses selected to fulfill this requirement. Courses should be chosen in consultation with the specialization adviser to form a coherent program consistent with the student's background and goals.

Educational Psychology 371 may not be counted toward this degree if it is taken after Mathematics 358K or 378K.

10. At least six semester hours of upper-division coursework must be outside both mathematics and the fields of study listed in requirement 6. Philosophy courses in logic, computer science courses in discrete mathematics, engineering courses, and courses counted toward requirement 9g may not be used to fulfill this requirement.
11. Enough additional coursework to make a total of 126 semester hours.

### Specialization in Scientific Computation

Students who complete this specialization may simultaneously fulfill some of the requirements of the Elements of Computing Certificate or the Certificate in Scientific Computation. These certificate programs are described in Transcript-Recognized Certificate Programs (p. 540).

6. Eight semester hours in one of the following areas: astronomy, biology, chemistry, geological sciences, and physics.
7. Mathematics 408C and 408D, or 408N, 408S, and 408M.
8. One of the following sequences: Statistics and Data Sciences 318 and 222; Computer Science 312 and 314; or Computer Science 303E and 313E.
9. At least thirty-two semester hours of upper-division coursework in mathematics and related areas, consisting of
  - a. Mathematics 340L or 341.
  - b. Mathematics 427K, 348, 362K, and 368K.
  - c. Mathematics 361K or 365C.
  - d. Students who fulfill the requirements of the Elements of Computing Certificate or the Certificate in Scientific Computation may count up to six hours of upper-division certificate coursework toward this requirement. Computer Science 323E may not be counted toward this requirement. Courses used to satisfy this requirement may not be counted toward requirement 10.
  - e. Additional coursework chosen from the following: Mathematics 325K or 328K (but not both), 427L, 343K or 373K (but not both), 343L, 346, 358K, 361, 365D, 372K, 374M, 376C, 378K.
10. At least six semester hours of upper-division coursework must be outside both mathematics and the fields of study listed in requirement 6. Philosophy courses in logic, computer science courses in discrete mathematics, engineering courses, and courses counted toward requirement 9e may not be used to fulfill this requirement.
11. Enough additional coursework to make a total of 126 semester hours.

### Option IV: Pure Mathematics

6. Eight semester hours in one of the following areas: astronomy, biology, chemistry, geological sciences, and physics.
7. Mathematics 408C and 408D, or 408N, 408S, and 408M.
8. At least thirty-two semester hours of upper-division coursework in mathematics, consisting of

- a. Mathematics 340L or 341.
  - b. Mathematics 427K, 361, 362K, 365C, and 373K.
  - c. One of the following two-course sequences: Mathematics 427K and 372K, 358K and 378K, 362K and 339J, 348 and 368K, 365C and 365D, 367K and 365G, 367K and 367L, 373K and 373L.
  - d. Additional hours of upper-division coursework in mathematics chosen with the approval of the mathematics adviser. Either Mathematics 343K or 361K may be counted toward this requirement, but not both.
9. At least six semester hours of upper-division coursework must be outside both mathematics and the fields of study listed in requirement 6. Philosophy courses in logic, computer science courses in discrete mathematics, and engineering courses may not be used to fulfill this requirement.
  10. Enough additional coursework to make a total of 126 semester hours.

### Option V: Teaching

This option is designed to fulfill the course requirements for certification as a middle grades or secondary school mathematics teacher in Texas; the student chooses mathematics certification or mathematics, physical science, and engineering certification. However, completion of the course requirements does not guarantee the student's certification. For information about additional certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

Students are encouraged to become familiar with a variety of mathematical software relevant to middle grades or secondary teaching, such as computer geometry systems, spreadsheets, and statistical software. Whenever possible, the student should take courses and sections of courses that use these types of software.

6. History 329U or Philosophy 329U.
7. Mathematics 408C and 408D, or 408N, 408S, and 408M.
8. At least six semester hours of upper-division coursework must be outside mathematics. Philosophy courses in logic, computer science courses in discrete mathematics, and engineering courses may not be used to fulfill this requirement.
9. Mathematics 315C.
10. Biology 337 (Topic 2: *Research Methods: UTeach*), Chemistry 368 (Topic 1: *Research Methods: UTeach*) or Physics 341 (Topic 7: *Research Methods: UTeach*).
11. The requirements of one of the following certification areas:
  - a. For mathematics certification: At least thirty-two semester hours of upper-division coursework in mathematics consisting of:
    - i. Mathematics 340L or 341.
    - ii. Mathematics 325K or 328K, 333L, 358K, and 362K.
    - iii. Mathematics 360M or 375D (Topic: *Discovery: Introduction to Advanced Study in Mathematics*).
    - iv. Mathematics 361K or 365C.
    - v. Mathematics 343K or 373K.
    - vi. Mathematics 427K or 378K.
    - vii. Enough of the following coursework to provide a total of at least thirty-two semester hours: Mathematics 427K, 328K, 339J, 339U, 343K, 343L, 348, 360M, 361, 365C, 365D, 368K, 373K, 373L, 175T (Topic: *Seminar for Prospective Teachers*), 375D (Topic: *Discovery: Introduction to Advanced Study in Mathematics*), 378K. A course used to fulfill requirements 11i through 11vi may not also be counted toward requirement 11vii.
    - viii. A three-semester-hour supporting course that uses mathematics but is in a field other than mathematics. The following courses may be used to fulfill this requirement:

Accounting 310F or 311, Architectural Engineering 323K, Astronomy 307, 352K, 352L, 358, 367M, Chemistry 301 or 301H, 303, Civil Engineering 321, 341, Computer Science 303E and 313E, Economics 420K, Electrical Engineering 302, 366, 366L, Geological Sciences 346C, 354, 476K, Geography 360L, Government 341M, Human Development and Family Sciences 322, Mechanical Engineering 320, 326, 366L, 366Q, 366R, Petroleum and Geosystems Engineering 310, Physics 301, 303K, 303L, Psychology 325K, 332, Sociology 369L. The supporting course may not also be counted toward other requirements in the prescribed work.

- b. For mathematics, physical science, and engineering certification:
  - i Mathematics 325K or 328K, 427K, 333L, 341, 358K, and 362K.
  - ii Mathematics 361K or 365C.
  - iii Mathematics 360M or 375D (Topic: *Discovery: Introduction to Advanced Study in Mathematics*).
  - iv Physics 301, 101L, 316, 116L, 315, and 115L.
  - v Chemistry 301 or 301H, 302 or 302H, and 204.
  - vi Chemical Engineering 379 (Topic: *Fundamentals of Engineering and Design*), 379 (Topic: *Engineering Energy Systems*), and Mechanical Engineering 379M (Topic: *Design of Machines and Systems*).
12. Eighteen semester hours of professional development coursework consisting of:
  - a. Curriculum and Instruction 650S.
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350.
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355.
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360.
  - e. UTeach-Natural Sciences 101, 110, and 170.
13. Students seeking middle grades certification must complete the following courses: Educational Psychology 363M (Topic 3: *Adolescent Development*), or Psychology 301 and 304; and Curriculum and Instruction 339E.
14. Enough additional coursework to make a total of at least 126 semester hours.

### Option VI: Mathematics Honors

6. Breadth requirement: An honors mathematics course; one of the following two-semester sequences: Biology 315H and 325H, Chemistry 301H and 302H, or Physics 301, 101L, 316, and 116L; and nine additional semester hours chosen from the preceding courses, Physics 315 and 115L. Credit earned by examination may not be counted toward this requirement
7. An honors section of Mathematics 427K, and six semester hours of coursework chosen from Mathematics 365C, 367K, and 373K
8. Twenty additional semester hours of upper-division coursework in mathematics approved by the departmental faculty adviser
9. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
10. A section of Rhetoric and Writing 309S that is restricted to students in the Dean Scholars Honors Program.
11. Mathematics 379H.
12. Thirty additional semester hours of coursework approved by the departmental honors adviser.
13. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
14. Enough additional coursework to make a total of 120 semester hours.

## Special Requirements

Students in all options must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in *General Information*.

To graduate and be recommended for certification, students who follow the teaching option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 5 and in each of the professional development courses listed in requirement 11 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 12. For information about the portfolio review and additional teacher certification requirements, students should consult the UTeach-Natural Sciences academic adviser.

To graduate under option VI, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum (<http://cns.utexas.edu/research-experience/undergraduate-research/undergraduate-research-forum>).

## Bachelor of Science in Medical Laboratory Science

The student preparing for a career in medical laboratory science completes at least one hundred hours of academic work at the University. After this work is completed, the student enters an accredited school of medical laboratory science (or clinical laboratory science) for an additional twelve to sixteen months of clinical education. After completion of this education, the student is awarded the Bachelor of Science in Medical Laboratory Science and is eligible for national certifying examinations administered by the American Society for Clinical Pathology (ASCP). Successful completion of these exams results in national certification as a medical laboratory scientist.

The purpose of this degree program is to meet the increasing demand for laboratory professionals in hospital and clinic laboratories, research, industry, public health, education, and laboratory management. Medical laboratory science is also an excellent foundation for graduate study in medicine, dentistry, management, education, and other disciplines.

### Prescribed Work

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Medical Laboratory Science must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. One of the following foreign language/culture choices:
  - a. Second-semester-level proficiency, or the equivalent, in a foreign language.

- b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour courses in one foreign culture area; the courses must be chosen from an approved list available in the dean's office and the college advising centers.
4. Mathematics 408C or 408N, and Statistics and Data Sciences 304 or 328M.
  5. Either Biology 311C, 311D, and 325 or Biology 315H and 325H.
  6. Biology 226L, 326M, 330 or 446L, 353, 337 (Topic: *Fundamentals of Health Information Technology*), 344 or 366R, 360K, 160L, 361, 361L, and 365S.
  7. Chemistry 301 or 301H, 302 or 302H, 204, 220C, 320M, 320N, and Biochemistry 369.
  8. Enough additional elective coursework, if necessary, to make a total of at least 100 semester hours of academic work completed at the University before the clinical education program.
  9. Twelve to sixteen months of clinical education in a program of medical laboratory science (or clinical laboratory science) accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). The student must apply to and be accepted into a clinical education program. The faculty adviser in the Department of Molecular Biosciences and the clinical education program director work closely with each student to ensure his or her success in the program. Upon completion of the clinical education program, the student must submit a letter from the program director verifying completion of coursework and a transcript showing grades in all courses in the program to The University of Texas at Austin, Office of the Dean, College of Natural Sciences, 1 University Station G2500, Austin TX 78712. To be counted toward the degree, the coursework must be approved by the faculty adviser for medical laboratory science in the Department of Molecular Biosciences and the dean. None of the coursework completed in the clinical education program may be used to fulfill in-residence degree requirements, requirements 1 through 8 of the prescribed work above, or the requirements for a second bachelor's degree.

## Special Requirements

Students must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. Students must also earn a grade of at least C- in each course taken in the twelve to sixteen-month clinical education in a program of medical laboratory science (or clinical laboratory science) accredited by the National Accrediting Agency for Clinical Laboratory Sciences (NAACLS). More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

## Order and Choice of Work

The student should consult with his or her academic and faculty advisers each semester regarding order and choice of work and balancing the laboratory load. To complete the program within four years, it may be necessary for the student to take some courses during the summer.

## Bachelor of Science in Neuroscience

The Bachelor of Science degree in Neuroscience provides a strong foundation in the core sciences and related mathematical disciplines,

along with a three-course specialization in one of six areas: biology, chemistry, computer science, mathematics, physics, or psychology. Distinctive features of the program include an emphasis on developing the quantitative, statistical, mathematical, and computational skills required in neuroscience, and meaningful hands-on laboratory experience.

## Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Neuroscience must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. At least twenty-one semester hours of upper-division coursework, including eighteen semester hours in biology and neuroscience, must be completed in residence at the University. All students must complete at least thirty-six semester hours of upper-division coursework.

## Option I: Neuroscience

4. Mathematics 408C and 408D, or 408N, 408S, and 408M; Mathematics 362K or Statistics and Data Sciences 321 or 328M.
5. An eight-semester-hour sequence of coursework in physics chosen from the following:
  - a. Physics 301, 101L, 316, and 116L;
  - b. Physics 303K, 103M, 303L, and 103N; or
  - c. Physics 317K, 117M, 317L, and 117N.
6. Chemistry 301 or 301H, 302 or 302H, and 204.
7. Biology 311C and 311D, or Biology 315H and 325H, and Biology 206L.
8. Three additional majors-level courses selected from one of the following supporting disciplines:
  - a. Biology: Biology 325 or 325H, 320, 344, and 349.
  - b. Chemistry: Chemistry 328M and 128K, 328N and 128L, 353 or 353M, and Biochemistry 369.
  - c. Computer Science: Computer Science 312, 314, Statistics and Data Sciences 335, 374E.
  - d. Mathematics: Mathematics 427K, 427L, 340L or 341, 358K or 378K, Statistics and Data Sciences 329C; students who chose Statistics and Data Sciences 328M for requirement 4, may not also count Mathematics 358K.
  - e. Physics: Physics 345, 338K, 355.
  - f. Psychology: Psychology 301, 323, 353K, 355.
9. Neuroscience 330 or 365R, and Neuroscience 335.
10. Neuroscience 366M.
11. Twelve-semester-hours of laboratory courses chosen from the following: Neuroscience 365L, 366L, 366P, 366S, and 377; the same section of Neuroscience 377, *Undergraduate Research*, may not count toward requirement 13 if used to fulfill this requirement.
12. Six-semester-hours of upper-division neuroscience to be chosen from: Neuroscience 337 (Topic: *Sensory Neuroscience*), 337 (Topic: *Genetic Analysis of Behavior and Disease*), Biology 365N,

Neuroscience 365T, 365W, 366C, 366D, 466G, 366N, 367V, additional approved Neuroscience 337 courses, and Biology 359K, and Neuroscience 365D.

13. Three additional semester hours of either Neuroscience 377 (Undergraduate Research) or Neuroscience 379H (Honors Tutorial Course); the research topic in Neuroscience 377 or 379H must relate to neuroscience and be approved in advance by the faculty adviser.
14. Enough additional coursework to make a total of 120 semester hours.

## Option II: Neuroscience Honors

4. Breadth requirement: An honors mathematics course; Biology 315H and 325H; Chemistry 301H and 302H; and one of the following: Physics 301 and 101L; or Physics 316 and 116L; credit earned by examination may not be counted toward this requirement.
5. Three hours of statistics chosen from the following: Statistics and Data Sciences 321, 325H, or 328M; other statistics courses may be approved by the departmental honors adviser.
6. One of the following: Physics 315 and 115L, Physics 316 and 116L, Physics 338K, 345, 355; courses counted toward requirement 4 may not also be counted toward requirement 6.
7. Chemistry 204.
8. Chemistry 128K, 128L, 328M, and 328N.
9. Biology 320 or 344.
10. Biology 349 and 370.
11. Neuroscience 365R or 330.
12. Neuroscience 335.
13. Nine hours of laboratory courses chosen from: Neuroscience 365L, Neuroscience 366L, Neuroscience 366P, and Neuroscience 366S.
14. Six hours of upper-division neuroscience chosen from: Neuroscience 337 (Topic: *Sensory Neuroscience*), 377 (Topic: *Genetic Analysis of Behavior and Disease*), 365T, 365W, 366C, 366D, 366E, 466G, 366M, 366N, 367F, 367V, additional approved Neuroscience 337 courses, and Neuroscience 365D.
15. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
16. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
17. Two semesters of Neuroscience 379H.
18. Eight additional semester hours of coursework approved by the departmental honors adviser.
19. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
20. Enough additional coursework to make a total of 120 semester hours.

## Special Requirements

Students must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog*.

To graduate under option II, students must remain in good standing in the Dean's Scholars Honors Program, must submit an honors thesis approved by the departmental honors adviser, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum (<http://cns.utexas.edu/research-experience/undergraduate-research/undergraduate-research-forum>).

## Bachelor of Science in Nutrition

Nutrition is an integrative science with the overall objective of improving the health and well-being of individuals and groups. Nutritional inquiry encompasses not only the roles of electrons, atoms, molecules, genes, cells, organs, and complex organisms in biological life processes but also the links between life science and health, behavior, education, population, culture, and economics. The Bachelor of Science in Nutrition degree program includes six options, described below.

For students pursuing careers in dietetics, courses in behavioral and clinical nutrition and food systems management provide the academic preparation required for dietetics practice. The Didactic Program in Dietetics (DPD) meets the coursework requirements that qualify graduates to apply to a dietetic internship, which leads to the Registered Dietitian credential. Completion of the Didactic Program in Dietetics requirements qualifies a graduate to apply for the exam to become a Dietetic Technician, Registered. To be eligible to apply for a dietetic internship or to practice as a Registered Dietetic Technician, additional coursework would be required for students earning a degree in Options II-VI. The Coordinated Program in Dietetics (CPD) includes both the coursework and the supervised practice necessary to be eligible to write the examination to become a registered dietitian. The DPD and CPD are accredited by the Commission on Accreditation of Dietetics Education of the American Dietetic Association (ADA), 120 S. Riverside Plaza, Suite 2000, Chicago IL 60606, (800) 877-1600.

The nutritional sciences option requires courses in science and research in order to prepare students for graduate study or professional school. Graduates may seek employment in private or publicly funded research programs or, upon completion of graduate study, may engage in college or university teaching or nutrition research. This option also allows students to fulfill requirements for postgraduate study in medicine, dentistry, and other health professions. Additional coursework is needed to be eligible to apply for a dietetic internship or to practice as a Dietetic Technician, Registered.

The nutrition and public health option III is designed to prepare students for entry-level positions in public health and nutrition at state and other health departments, in research, and in industry. It will equip them for entry into graduate programs in nutrition or other public health disciplines at schools of public health, at graduate schools in the biomedical sciences, and for entry into medical or other health professional schools as well as for those who pursue health and research careers.

Students who plan to follow option IV must be admitted into the Honors in Advanced Nutritional Sciences Program (p. 537). Students in this option take honors courses in nutrition, research methodology, and writing. In addition, students are encouraged to take honors courses in disciplines outside of nutrition, such as biology, chemistry, and mathematics. Students consult with the departmental honors adviser to develop an individualized and challenging program of study that meets their goals and interests.

Students who plan to follow option V must be admitted to the Dean's Scholars Honors Program (p. 536). In addition to taking a core of research, writing, and seminar courses in the College of Natural Sciences, students in this option consult with the departmental honors adviser to develop a coherent individual program of rigorous and challenging courses from across the University.

Students in the international nutrition option gain firsthand knowledge of nutrition issues in other countries through a study abroad experience. Students combine the study of nutrition with a broad range of courses to prepare for experience studying and practicing nutrition in another culture.

## Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Nutrition must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. At least thirty-six semester hours of upper-division coursework, of which at least twenty-four must be in nutrition. At least twenty-one semester hours of upper-division coursework, including eighteen semester hours in nutrition, must be completed in residence at the University.

## Additional Prescribed Work for Each Option

### Option I: Dietetics

Students in dietetics may select either the Didactic Program in Dietetics (DPD) or the Coordinated Program in Dietetics (CPD). Students who complete the DPD with at least four upper-division nutrition courses completed in residence will receive a verification statement that qualifies them to apply for an accredited dietetic internship. DPD graduates who complete a dietetic internship may become active members of the American Dietetic Association (ADA) and are eligible to write the examination to become a registered dietitian.

Students interested in the Coordinated Program in Dietetics (p. 534) must apply for admission after completing sixty semester hours of prerequisite coursework. Upon completing the CPD, which includes approximately twelve hundred hours of supervised practice, graduates immediately qualify for active membership in the ADA and to write the examination to become a registered dietitian.

Students who are admitted to the CPD should consult the faculty adviser each semester regarding order and choice of work. During the fourth year, the following courses must be taken in the indicated term: *fall semester*: Nutrition 245C; *spring semester*: Nutrition 372C, 372F, 373S; *summer session*: Nutrition 374C and 374P. Because these courses are taught only once a year, a student who does not take them at the indicated time may be unable to complete the program.

4. At least three semester hours chosen from Psychology 301, Sociology 302, Anthropology 302, Economics 304K, 304L, and Human Development and Family Sciences 313 or 313H and 113L.
5. Mathematics 408C, 408N, or Statistics and Data Sciences 332.
6. Three semester hours of statistics chosen from Statistics and Data Sciences 302, 304, 306, 325H, and 328M.
7. Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369.
8. Biology 311C or 315H, 325 or 325H, and 365S.
9. Accounting 310F or 311.
10. The following core nutrition coursework:
  - a. Nutrition 312 or 312H, 112L or 312R, 326, and 126L; students who complete Nutrition 312H and 312R or Biology 315H and 325H are exempt from Nutrition 326 and 126L; students

must complete each course with a grade of at least C- before progressing to other upper-division nutrition courses.

- b. Nutrition 307, 107L, 338W or 338H, 342, and 365 (Topic 1: *Vitamins and Minerals*; Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*); students in the CPD must complete Nutrition 370 or 371 instead of 365.
11. Coursework in nutrition, consisting of the following:
    - a. Behavioral and clinical nutrition:
      - i CPD: Nutrition 315, 218, 118L, 330, 332, 370, and 371.
      - ii DPD: Nutrition 315, 218, 118L, 330, 332, 370, 371, and either Nutrition 337 or 365 (Topic 1: *Vitamins and Minerals*; Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*). The same topic in Nutrition 365 may not count toward both requirement 10b and requirement 11aii.
    - b. Food systems management: Nutrition 334, 234L, and 355M.
    - c. Research:
      - i CPD: Nutrition 373S.
      - ii DPD: One of the following: Nutrition 324 and 124L, 353, 355 or 355H, 366L, 379H, Statistics and Data Sciences 318, 321, 325H, or 352; with the approval of the faculty undergraduate adviser, DPD students may count Nutrition 352 toward this requirement; Statistics and Data Sciences 325H may not be counted toward both requirement 6 and requirement 11cii.
    - d. Professional development:
      - i CPD: Nutrition 245C.
      - ii DPD: Nutrition 162.
  12. Students in the CPD must complete an additional fifteen semester hours of supervised practice: Nutrition 345M, 372C, 372F, 374C, and 374P.
  13. Enough additional coursework to make a total of 126 semester hours.

### Option II: Nutritional Sciences

4. At least six semester hours chosen from Psychology 301, Sociology 302, Anthropology 302, Economics 304K, 304L, and Human Development and Family Sciences 313 or 313H, and 113L.
5. Mathematics 408C, 408N, or Statistics and Data Sciences 332.
6. Three semester hours of statistics chosen from Statistics and Data Sciences 302, 304, 306, 325H, and 328M.
7. Chemistry 301 or 301H, 302 or 302H, 204, 220C, 320M, 320N, and Biochemistry 369.
8. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; and Neuroscience 365R or Biology 446L, and 365S.
9. Complete one of the following:
  - a. Physics 301 and 101L;
  - b. Physics 302K and 102M;
  - c. Physics 303K and 103M; or
  - d. Physics 317K and 117M
10. The following core nutrition coursework:
  - a. Nutrition 312 or 312H, 112L or 312R, 326, and 126L; students who complete Nutrition 312H and 312R or Biology 315H and 325H are exempt from Nutrition 326 and 126L; students must complete each course with a grade of at least C- before progressing to other upper-division nutrition courses.
  - b. One of the following: Nutrition 307 and 107L; Biology 326M and 226L; 326R and 226L; Chemistry 455.
  - c. Nutrition 337, 338W or 338H, 342, and 365 (Topic 1: *Vitamins and Minerals*; Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*).

11. Nine additional semester hours of nutrition, including three hours each from the following areas:
  - a. Nutritional sciences: Nutrition 365 or 370 or 371; the same topic of Nutrition 365 may not be counted both toward this requirement and toward requirement 10c.
  - b. Behavioral and clinical nutrition: Nutrition 315, 218 and 118L, 321, 330, 331, 332, or 370 or 371.
  - c. Research: Three semester hours of coursework chosen from Nutrition 355H, 366L, Biology 325L, 331L, and Biochemistry 369L.
12. Enough additional coursework to make a total of 126 semester hours.

### Option III: Nutrition and Public Health

4. Six semester hours chosen from Anthropology 322M (Topic 12: *Mexican Immigration Cultural History*), Sociology 307M, 319, 354K, and 368D.
5. Three semester hours of Statistics and Data Sciences 302, 304, 306, 325H, and 328M.
6. One of the following courses: Mathematics 408C, 408N, or Statistics and Data Sciences 332.
7. Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369.
8. Biology 311C or 315H, 325 or 325H, and 365S.
9. The following core nutrition coursework:
  - a. Nutrition 312 or 312H, 112L or 312R, 326, and 126L; students who complete Nutrition 312H and 312R or Biology 315H and 325H are exempt from Nutrition 326 and 126L; students must complete each course with a grade of at least C- before progressing to other upper-division nutrition courses.
  - b. Nutrition 337, 338W or 338H, 342, and 365 (Topic 1: *Vitamins and Minerals*; Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*).
10. Three semester hours of research chosen from Nutrition 324 and 124L, 352, 353, 355, 366L, 379H, and Statistics and Data Sciences 318, 321, 325H, or 352; Statistics and Data Sciences 325H may not count toward both requirement 5 and 10.
11. Nine semester hours chosen from Anthropology 432L and 349C, Biology 446L, 361T, and 478L, Classical Civilization 306M, Health Education 352K (Topic 4: *Strategic Health Communication*) and 373, Kinesiology 320 and 324K, and Psychology 332C.
12. Enough additional coursework to make a total of 120 semester hours.

### Option IV: Honors in Advanced Nutritional Sciences

4. At least three semester hours chosen from Psychology 301, Sociology 302, Anthropology 302, Economics 304K, 304L, and Human Development and Family Sciences 313 or 313H and 113L.
5. Mathematics 408C, 408N, Mathematics 408D-AP-H, or Statistics and Data Sciences 332.
6. Three semester hours of statistics chosen from Statistics and Data Sciences 302, 304, 306, 325H, and 328M.
7. Chemistry 301 or 301H, 302 or 302H, 204, 320M, 320N, 220C, and Biochemistry 369.
8. Biology 311C, 311D, and 325 or Biology 315H and 325H; and Biology 365S.
9. Nutrition 312H, 312R, 338H, 342, 365 (Topic 1: *Vitamins and Minerals*; Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*), and fourteen additional semester hours of nutrition or related coursework approved by the departmental honors adviser.
10. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.

11. Nutrition 355H and 379H
12. Ten semester hours of additional coursework approved by the departmental honors adviser.
13. Enough additional coursework to make a total of 120 semester hours.

### Option V: Nutrition Honors

4. Breadth requirement: A calculus course and a statistics course, one of which must be a designated honors course; Biology 315H and 325H; Chemistry 301H and 302H; and three additional hours of honors-designated or approved coursework in biology, chemistry, computer science, mathematics, statistics and data sciences, or physics; credit earned by examination may not be counted toward this requirement.
5. At least three semester hours chosen from Psychology 301, Sociology 302, Anthropology 302, Economics 304K, 304L, and Human Development and Family Sciences 313 or 313H and 113L.
6. Chemistry 204, 320M, and 320N, and Biochemistry 369.
7. Neuroscience 365R and Biology 365S.
8. Nutrition 312H, 312R, 338H, 342, and 365 (Topic 1: *Vitamins and Minerals*; Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*).
9. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
10. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
11. Nutrition 355H and 379H.
12. Ten semester hours of additional coursework in nutrition or related area approved by the departmental honors adviser.
13. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
14. Enough additional coursework to make a total of 120 semester hours.

### Option VI: International Nutrition

Students in this option must participate for one semester or summer session in a study abroad program in nutrition offered by the University. Students must submit a study abroad application. During the study abroad experience, students complete Nutrition 353, Field Experience in International Nutrition. Additional coursework in nutrition or in the language, culture, or history of the country may be available during the international study experience. All study abroad programs in nutrition must be approved in advance by the international nutrition faculty adviser. A list of other study abroad opportunities in nutrition is maintained in the main office of the School of Human Ecology.

4. Economics 304K or 304L, and at least three semester hours chosen from Psychology 301, Sociology 302, and Anthropology 302.
5. Six semester hours chosen from the following: Geography 339K, 357, Mexican American Studies 307, 318, Sociology 335, 354K.
6. Second-semester proficiency in a single foreign language.
7. Mathematics 408C, 408N, or Statistics and Data Sciences 332.
8. Three semester hours of statistics chosen from Statistics and Data Sciences 302, 304, 306, 325H, and 328M.
9. Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369.
10. Biology 311C or 315H, 325 or 325H, and 365S.
11. The following core nutrition coursework:
  - a. Nutrition 312 or 312H, 112L or 312R, 326, and 126L. Students who complete Nutrition 312H and 312R or Biology 315H and 325H are exempt from Nutrition 326 and 126L; students must complete each course with a grade of at least C- before progressing to other upper-division nutrition courses.

- b. One of the following four-semester-hour sequences: Nutrition 307 and 107L; Biology 326M and 226L; 326R and 226L.
  - c. Nutrition 338W or 338H, and 342.
12. Nutrition 316, 218, 118L, 321, 331, and 353.
13. At least nine semester hours, three of which must be upper-division, chosen from one of the following areas:
- a. Health professions: Chemistry 220C, 320N, Biology 206L, 311D, 326M, 346, Nutrition 337, Nutrition 365 (Topic 1: *Vitamins and Minerals*; Topic 2: *Nutrition and Genes*; or Topic 4: *Obesity and Metabolic Health*); Biology 326M may not be counted toward both requirement 11b and requirement 13a.
  - b. Dietetics: Nutrition 315, 330, 332, 370, 371.
  - c. Behavioral science: Human Development and Family Sciences 304 or 304H, 313 or 313H, 113L, Psychology 308, 319K, Sociology 308D, 319, 320K, 324K.
14. Enough additional coursework to make a total of 126 semester hours.

## Special Requirements

Students in all options must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog*.

To graduate under option IV, students must remain in good standing with an overall grade point average of at least 3.30 and an overall grade point average of 3.50 in all nutritional sciences courses. In addition, student research conducted in courses described in requirement 10 must be presented in an approved public forum, such as the college's annual Undergraduate Research Forum (<http://cns.utexas.edu/research-experience/undergraduate-research/undergraduate-research-forum>). Students who fail to maintain the required grade point average may be subject to dismissal from the program. Under special circumstances and at the discretion of the nutritional sciences honors adviser, a student may be allowed to continue under academic review.

To graduate under option V, students must remain in good standing in the Dean's Scholars Honors Program, must earn grades of at least A- in the departmental research and thesis courses described in requirement 10, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum.

### Note:

Nutritional Sciences courses with numbers ending in H are intended for students in option IV, Honors in Advanced Nutritional Sciences and in option V, Nutrition Honors. Students outside these options may enroll in these courses with the consent of the nutritional sciences honors adviser.

To be eligible to apply for a dietetic internship or to practice as a Registered Dietetic Technician, additional coursework would be required for students earning a degree in options II-VI.

## Bachelor of Science in Physics

All aspects of the physical universe are of interest to the physicist, who seeks to understand not only the smallest forms of matter and the rich phenomena present in our everyday lives but also the universe itself. Physics has played a critical role in human technological and intellectual development during the twentieth century. The tools of the physicist—observation, imagination, model building, prediction, and deduction—will enable physics to continue this influence into the new century. The Bachelor of Science in Physics degree program is designed to provide

the skills, understanding, and outlook required for participation in the discovery of new knowledge about nature.

The Bachelor of Science in Physics program is balanced and broad. It is designed to give the student a strong foundation for graduate study or work in physics and, with additional training, for work in a variety of other areas, such as astronomy, astrophysics, biophysics, chemical physics, computer science, engineering, geophysics, mathematics, medicine, physics teaching, and space sciences. Students who end their formal training with the bachelor's degree may seek employment in industry, in national laboratories, or in teaching; they should consider the options in computation, radiation physics, space sciences, biophysics, and teaching, which augment the broad instruction provided by the basic Bachelor of Science in Physics. For those who plan to teach physics in secondary school, the teaching option provides the courses needed for certification.

Students who plan to follow option VI, physics honors, must be admitted to the Dean's Scholars Honors Program (p. 536).

## Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Physics must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

3. Options I–IV and VII: One of the following foreign language/culture choices. Students in options V and VI are exempt from this requirement.
  - a. Second-semester-level proficiency, or the equivalent, in a foreign language
  - b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area
  - c. Two three-semester-hour courses in one foreign culture area; the courses must be chosen from an approved list available in the dean's office and the college advising centers
4. Thirty-six semester hours of upper-division coursework
5. At least twenty-one semester hours of upper-division coursework, including at least twelve semester hours of upper-division coursework in physics, must be completed in residence at the University

## Prescribed Work Common to All Options for Each

### Option I: Physics

This option is designed to give the student a strong foundation for graduate study or work in physics and for further study or work in a variety of other areas.

6. Chemistry 302 or 302H.
7. Six semester hours in biology, geological sciences, or astronomy; a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it.
8. Physics 301, 101L, 316, 116L, 315, and 115L.

9. Mathematics 408C and 408D or the equivalent, 427K and 427L , and six additional semester hours of upper-division coursework in mathematics; the following courses are recommended: Mathematics 340L , 361, and 362K . Only courses at the level of calculus and above may be counted toward the total number of hours required for the degree.
10. Physics 336K , 352K, 353L , 355 , 362K , 362L , 369 , 373, and 474, or their equivalents.
11. Enough additional coursework to make a total of 126 semester hours.

## Option II: Computation

This option is designed to provide the necessary foundation and hands-on skill in computation for the student who plans a career or further study in computational physics or computer science. Students who complete this option may simultaneously fulfill some of the requirements of the Certificate in Scientific Computation (p. 541).

6. Chemistry 302 or 302H.
7. Six semester hours in biology, geological sciences, or astronomy; a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it.
8. Physics 301, 101L, 316, 116L, 315, and 115L.
9. Mathematics 408C and 408D or the equivalent, 427K and 427L, and six additional semester hours of upper-division coursework in mathematics or statistics and data sciences; Statistics and Data Sciences 329C and Mathematics 362K are recommended; only courses at the level of calculus and above may be counted toward the total number of hours required for the degree.
10. Physics 329, 336K, 338K, 352K, 353L, 355, 369, and 373, or their equivalents.
11. One of the following scientific computation options:
  - a. Statistics and Data Sciences 222, Computer Science 303E, and two of the following courses; the student must complete coursework from at least two of the following areas:
    - i Numerical methods: Chemical Engineering 348, Computer Science 323E, 323H, 367, Mathematics 348, Statistics and Data Sciences 335.
    - ii Statistical methods: Biomedical Engineering 335, Mathematics 358K, 378K.
    - iii Other computing topics: Computer Science 324E, 327E, 329E, 377, Mathematics 346, 362M, 368K, 372K, 376C, Mechanical Engineering 367S, Statistics and Data Sciences 329D, 374C, 374D, 374E.
  - b. Twelve semester hours chosen from Electrical Engineering 306, 312, 316, 319K, and 422C.
12. Enough additional coursework to make a total of 126 semester hours.

## Option III: Radiation Physics

This option is designed to provide the necessary foundation for the student who plans a career or further study in nuclear engineering, radiation engineering, or health physics.

6. Chemistry 302 or 302H.
7. Six semester hours in biology, geological sciences, or astronomy; a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it.
8. Physics 301, 101L, 316, 116L, 315, and 115L.
9. Mathematics 408C and 408D or the equivalent, 427K and 427L, and six additional semester hours of upper-division coursework in mathematics; the following courses are recommended: Mathematics 340L, 361, and 362K. Only courses at the level of calculus and above

may be counted toward the total number of hours required for the degree.

10. Twenty-four semester hours of upper-division coursework in physics, including Physics 336K, 352K, 353L, 355, 362L, 369, and 373, or their equivalents.
11. Sixteen semester hours of upper-division coursework in mechanical engineering, consisting of Mechanical Engineering 136N, 337C, 337F, 337G, 361E, and 361F.
12. Enough additional coursework to make a total of 126 semester hours.

## Option IV: Space Sciences

This option is designed to provide the necessary foundation for the student who plans a career or further study in space sciences.

6. Chemistry 302 or 302H.
7. Six semester hours in biology, geological sciences, or astronomy; a course may not be used to fulfill this requirement if it cannot be counted toward major requirements in the department that offers it.
8. Physics 301, 101L, 316, 116L, 315, and 115L.
9. Mathematics 408C and 408D or the equivalent, 427K and 427L, and six additional semester hours of upper-division coursework in mathematics; the following courses are recommended: Mathematics 340L, 361, and 362K. Only courses at the level of calculus and above may be counted toward the total number of hours required for the degree.
10. Physics 329, 336K, 352K, 353L, 355, 362K, 369, and 373, or their equivalents.
11. Either fifteen semester hours of upper-division coursework in aerospace engineering or thirteen hours in aerospace engineering and three additional hours of upper-division coursework in physics.
12. Enough additional coursework to make a total of 126 semester hours.

## Option V: Teaching

This option is designed to fulfill the course requirements for certification as a middle grades or secondary school science teacher in Texas; the student chooses composite science certification with physics as the primary teaching field, physical sciences certification, physics/mathematics certification, or mathematics, physical science, and engineering certification. However, completion of the course requirements does not guarantee the student's certification. For information about additional requirements, students should consult the UTeach-Natural Sciences academic adviser.

6. Physics 301, 101L, 316, 116L, 315, and 115L.
7. Mathematics 408C and 408D or the equivalent, 427K, and 427L.
8. At least eighteen semester hours of upper-division coursework in physics, consisting of Physics 341 (Topic 7: *Research Methods: UTeach*), 353L, 355, and three of the following courses: Physics 329, 333, 336K, 338K, 352K, 373, Science 360 (Topic 4: *Physics by Inquiry*). With the consent of the UTeach-Natural Sciences undergraduate adviser, an upper-division physics course that includes a substantial research component may be substituted for Physics 341.
9. History 329U or Philosophy 329U.
10. The requirements of one of the following certification areas:
  - a. For composite science certification:
    - i Biology 311C and 311D.
    - ii Chemistry 301 or 301H and 302 or 302H.
    - iii Six hours of coursework in geological sciences; courses intended for non-science majors may not be counted toward this requirement.

- iv Enough additional approved coursework in biology, chemistry, or geological sciences to provide the required twelve hours in a second field.
  - b. For physical sciences certification:
    - i Chemistry 301 or 301H, 302 or 302H, 204 or 317, 353, 153K, 154K, 354L, and 455 or 456.
    - ii Three additional hours of upper-division coursework in physics.
  - c. For physics/mathematics certification: Mathematics 315C, 325K, 333L, 341 or 340L, 358K, 362K, 360M or 375D.
  - d. For mathematics, physical science, and engineering certification:
    - i Mathematics 315C, 325K, 333L, 358K, and 362K.
    - ii Chemistry 301 or 301H, 302 or 302H, and 204.
    - iii Chemical Engineering 379 (Topic: *Fundamentals of Engineering and Design*), 379 (Topic: *Engineering Energy Systems*), and Mechanical Engineering 379M (Topic: *Design of Machines and Systems*).
11. Eighteen semester hours of professional development coursework consisting of:
- a. Curriculum and Instruction 650S.
  - b. Curriculum and Instruction 365C or UTeach-Natural Sciences 350.
  - c. Curriculum and Instruction 365D or UTeach-Natural Sciences 355.
  - d. Curriculum and Instruction 365E or UTeach-Natural Sciences 360.
  - e. UTeach-Natural Sciences 101, 110, and 170.
12. Students seeking middle grades certification must complete the following courses: Educational Psychology 363M (Topic 3: *Adolescent Development*), or Psychology 301 and 304; and Curriculum and Instruction 339E.
13. Enough additional coursework to make a total of at least 126 semester hours.

## Option VI: Physics Honors

- 6. Breadth requirement: Biology 315H and 325H, Chemistry 301H and 302H, and Mathematics 427K and 427L; at least one of the math courses must be a designated honors section; credit earned by examination may not be counted toward this requirement.
- 7. Mathematics 340L and 361.
- 8. Physics 301, 101L, 316, 116L, 315, and 115L.
- 9. Physics 336K, 352K, 353L, 355, 362K, 362L, 369, 373, and 474.
- 10. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
- 11. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
- 12. Physics 379H and a three-semester-hour upper-division research course approved by the departmental honors adviser.
- 13. Ten additional semester hours of coursework approved by the departmental honors adviser.
- 14. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
- 15. Enough additional coursework to make a total of 120 semester hours.

## Option VII: Biophysics

- 6. Chemistry 301 or 301H and 302 or 302H.
- 7. Either Biology 311C, 311D, and 325 or Biology 315H and 325H; Biology 206L.
- 8. Physics 301, 101L, 316, 116L, 315, and 115L.

- 9. Mathematics 408C and 408D or the equivalent, 427K and 427L, and six additional semester hours of upper-division coursework in mathematics; the following courses are recommended: Mathematics 340L, 361, and 362K.
- 10. Physics 336K, 345, 352K, 353L, 355, 369, and 373 or their equivalents.
- 11. Either Chemistry 320M or 328M, and Biochemistry 369.
- 12. Complete one of the following areas:
  - a. Cell Biology: Biology 320.
  - b. Microbiology: Biology 326R.
  - c. Developmental Biology: Biology 349.
  - d. Neurobiology: Either Neuroscience 365R or Biology 371M.
  - e. Virology: Biology 330.
  - f. Computation: Statistics and Data Sciences 335 and Biology 337J or Statistics and Data Sciences 339 (Topic: *Computational Biology*) or (Topic: *Computational Chemistry*).

A list of recommended biology laboratory courses that complement the lecture courses listed in 12a through 12e are available in the advising center and the dean's office.

- 13. Enough additional coursework to make a total of 126 semester hours.

## Special Requirements

Students in all options must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog*.

To graduate and be recommended for certification, students who follow the teaching option must have a University grade point average of at least 2.50. They must earn a grade of at least C- in the supporting course in requirement 9 and in each of the professional development courses listed in requirement 11 and must pass the final teaching portfolio review; those seeking middle grades certification must also earn a grade of at least C- in each of the courses listed in requirement 12. Information about the portfolio review and additional teacher certification requirements is available from the UTeach-Natural Sciences academic adviser.

To graduate under option VI, students must remain in good standing in the Dean's Scholars Honors Program, must earn grades of at least A- in the departmental research and thesis courses described in requirement 8 above, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum.

## Bachelor of Science in Public Health

The Bachelor of Science in Public Health prepares graduates for entry-level positions in public health and equips them to pursue certificate and graduate degrees in the field. All of the options offer broad-based training in the five core areas of public health. Option I offers a choice of six areas of specialization.

Students for whom the degree is appropriate include those interested in health careers and in dual graduate degree programs in medicine and public health. The degree is administered by the Department of Molecular Biosciences.

Students who plan to follow option I must be admitted. Students who plan to follow option III must first gain admission to option I, and then apply for admission to option III. Students who plan to follow option II must be

admitted to the Dean's Scholars Honors Program (p. 536). Admission requirements for option I and II are given in The Major in Public Health (p. 534).

## Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Public Health must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Foundation courses:
  - a. Public health: Public Health 317.
  - b. Microbiology: Biology 326M and 226L.
  - c. Nutrition and physiology: Nutrition 312 or 312H and Biology 365S.
  - d. Social and behavioral sciences: One of the following: Economics 304K, 304L, Psychology 301, Sociology 319, 354K.
  - e. Political science/government: Government 358 or Management 320F.
2. Public health core\*:
  - a. Biostatistics: Statistics and Data Sciences 328M.
  - b. Environmental health sciences: Public Health 338.
  - c. Epidemiology: Public Health 354.
  - d. Global health: Public Health 334.
  - e. Health policy and management: Public Health 358D.
  - f. Social and behavioral sciences: Public Health 368D.
3. Two courses with a writing flag. One of these courses must be upper-division.
4. One course with a quantitative reasoning flag.

Courses with flags are identified in the *Course Schedule*. They may be used simultaneously to fulfill other requirements, unless otherwise specified.

5. At least twenty-one semester hours of upper-division coursework must be completed in residence at the University. All students must complete at least thirty-six semester hours of upper-division coursework.

## Additional Prescribed Work for Each Option

### Option I: Public Health

6. Mathematics 408C or 408N.
7. Biology 311C, 311D, and 325 or Biology 315H and 325H. These courses must be completed before the student progresses to other upper-division biology and upper-division public health courses.
8. Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369.
9. At least nine hours from one of the following areas of specialization; courses counted toward requirement 1 may not be used to fulfill this requirement.
  - a. Biostatistics and public health informatics: Biology 321G, 353, 337 (Topic: *Fundamentals of Health Information Technology*), Computer Science 303E, 313E, 327E, 329E (Topic: *Elements of Computing in Society*), Geography 360G, Mathematics 408D, 408M, 408S, 340L, 358K, 362K, 362M, 378K, Public Health 341R, Statistics and Data Sciences 332.
  - b. Environmental health sciences: Biology 373, 373L, 375, Civil Engineering 341, 342, 346, 369L, Geological Sciences 302C, 346C, 476K, 476M, Geography 307C, 334C, 339K, 344K, 357,

360G, Marine Science 307, 320, 354Q, Public Health 341R, Urban Studies 315.

- c. Health policy and management: Economics 304K, 304L, Government 357M (Topic 3: *Supreme Court and Public Policy*; Topic 4: *Civil Liberties*; Topic 7: *Constitutional Structure of Power*; Topic 8: *Structure of Individual Liberties*), 358, 360N (Topic 10: *Introduction to International Relations*), 370L (Topic 23: *Politics of Health Care*), Health and Society 320, 330, Human Development and Family Sciences 362, Management 320F, Philosophy 325L or 325M, 347, Public Affairs 325 (Topic : *Advanced Seminar in Ethical Leadership*), Public Health 341R, Sociology 354K.

Economics 304K and 304L may not count toward both requirement 1d and requirement 8c. Government 358 may not count toward both requirement 1e and requirement 8c. Management 320F may not count toward both requirement 1e and requirement 8c. Sociology 354K may not count toward both requirement 1d and 8c.

- d. Infectious diseases and public health microbiology: Biology 330, 230L, 327D, 336, 347 or 360K, 160L, 361, 361L, 361P, Public Health 341R.
- e. Nutrition: Nutrition 312R, 315, 321, 331, 337, 338W or 338H, 342, 365 (Topic 1: *Vitamins and Minerals*; Topic 4: *Obesity and Metabolic Health*), Public Health 341R.
- f. Social and behavioral sciences: Only one advertising, communication, or public relations course may be counted: Advertising 305, 319, 334, Communication Studies 306M, 315M, 332, 332K, 355K, Health Education 329K, 335, 352K (Topic 2: *Psychological Issues in Women's Health*), 370K (Topic 1: *Foundations of Health Promotion I*; Topic 2: *Adolescent Health Risk Behavior*), 371K, 373, Health and Society 301, 320, Marketing 320F, Pharmacy 350K, Public Health 341R, Public Relations 305, Social Work 310, Sociology 319, 321K (Topic: *Global Health*; Topic: *Sociology of HIV/AIDS*), 329, 336D, 354K, 369K.

Sociology 319 and 354K may not count toward both requirement 1d and requirement 8f.

10. One of the following foreign language/culture choices:
  - a. Second-semester-level proficiency, or the equivalent, in a foreign language.
  - b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour courses in one foreign culture area; the courses must be chosen from an approved list available in the dean's office and the college advising centers.
11. Enough additional coursework to make a total of 126 semester hours.

### Option II: Public Health Honors

6. Breadth requirement: An honors mathematics course; Biology 315H and 325H; Chemistry 301H and 302H; credit by examination may not count toward this requirement.
7. In fulfilling requirement 2a, students must complete an honors statistics course.
8. Chemistry 204, 320M, and Biochemistry 369.
9. A section of Undergraduate Studies 302 or 303 that is approved by the program honors adviser.
10. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
11. Two semesters of Biology 379H.

12. Nine additional hours of coursework approved by the departmental honors adviser.
13. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
14. Enough additional coursework to make a total of 120 semester hours.

### Option III: Advanced Program

This program provides students with a foundation in the natural sciences applied to public health and advanced specialist training in preparation for a leadership position in public health practice. This program leads to the completion of the Bachelor of Science in Public Health and the Master of Public Health, awarded by the School of Public Health at the University of Texas Health Sciences Center at Houston. During the senior year, students complete the first year of the Master of Public Health at the Austin Regional Campus. The second year of the Master of Public Health is completed at one of the five regional campuses in Austin, Brownsville, Dallas, El Paso, Houston, and San Antonio. Upon completion of the first year of the Master of Public Health, coursework is applied toward option III requirements. Option III students may apply to graduate upon completion of the undergraduate degree requirements and prior to the completion of the Master of Public Health, or may apply to graduate to receive both degrees in the same semester.

6. Mathematics 408C or 408N.
7. Biology 311C, 311D, and 325; or 315H and 325H; these courses must be completed before the student progresses to other upper-division biology and upper-division public health courses.
8. Chemistry 301 or 301H, 302 or 302H, 204, 320M, and Biochemistry 369.
9. Eighteen hours of approved upper-division elective coursework in public health; graduate coursework completed at the School of Public Health at the University of Texas Health Sciences Center may be applied toward this requirement\*
10. One of the following foreign language/culture choices:
  - a. Second-semester-level proficiency, or the equivalent, in a foreign language.
  - b. First-semester-level proficiency, or the equivalent, in a foreign language and a three-semester-hour course in the culture of the same language area.
  - c. Two three-semester-hour courses in one foreign culture area. The courses must be chosen from an approved list available in the dean's office and the college advising centers.
11. Enough additional coursework to make a total of 126 semester hours.

\* Graduate coursework may not be applied toward the public health core requirements 2a through 2f.

### Special Requirements

Students must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each foundation course, public health core course, and mathematics and science course required by the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog*.

## Bachelor of Science in Textiles and Apparel

The Division of Textiles and Apparel is a place to get a broad-based education, well suited for career opportunities. Students in the Division of Textiles and Apparel enjoy a wide range of academic programs

and career opportunities. They study the art of design, the science of chemistry and physics, and the application of retail and management principles, through the lens of history. Majors come in three packages: merchandising and consumer sciences; apparel, functional, and technical design; and textile conservation and museum studies. Each program provides hands-on experience with rapidly evolving retail environments, intercultural practices and customs, consumer behavior, apparel and fashion design, computer-aided design, fashion show production and event organization, garment conservation and museum management, and fiber and fabric testing. Capstone retail merchandising and apparel design programs take students to high-profile venues and provide rich opportunities in honors programs. Internships are available to enhance the educational experience and ensure strong career opportunities. Basic research is being conducted in bio-based fibers and specialized fabrics, and 3D technology to address basic human needs. Research is also conducted involving the effects of change and new technologies on the development and distribution of creative textile products. The Division of Textiles and Apparel is a marvelous place to get a broad-based education, well suited for rewarding career opportunities.

### Prescribed Work Common to All Options

All students pursuing an undergraduate degree must complete the University's Core Curriculum (p. 20).

In addition, students seeking the Bachelor of Science in Textiles and Apparel must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Two courses with a writing flag. One of these courses must be upper-division.
2. One course with a quantitative reasoning flag.

Courses that carry flags are identified in the *Course Schedule* (<http://registrar.utexas.edu/schedules>). They may be used simultaneously to fulfill other requirements, unless otherwise specified.

### Prescribed Work for Each Option

#### Option I: Apparel, Functional, and Technical Design

1. Mathematics 408C, 408N or Statistics and Data Sciences 332.
2. One of the following: Mathematics 316, Statistics and Data Sciences 302, 303, 304, 305, 306, or Educational Psychology 371.
3. Chemistry 301 or 301H, 302 or 302H, and 204; and Biology 311C.
4. The following textiles and apparel courses:
  - a. Core Courses: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 328, 331, 260L, and 260M; and two of the following courses: Textiles and Apparel 325L, 325M, and 327.
  - b. Option courses: Textiles and Apparel 316L, 126, 226L, 350, 352D, 355C, 164K (Topics 1: *Flat Pattern*, 2: *Draping*, and 3: *Advanced Apparel Design*), and 264L (Topic 1: *Flat Pattern*, 2: *Draping*, and 3: *Advanced Apparel Design*).
5. Thirty-six semester hours of upper-division coursework, of which at least eighteen must be within at least twelve must be outside the School of Human Ecology. At least twenty-one semester hours of upper-division coursework must be taken in residence at the University.
6. Enough additional coursework to make a total of 126 semester hours.

## Option II: Merchandising and Consumer Sciences

In addition, students following the merchandising option must complete the following degree-level requirements. In some cases, courses that fulfill degree-level requirements also meet the requirements of the core.

1. Mathematics 408C, 408N, or Statistics and Data Sciences 332.
3. One of the following: Mathematics 316, Statistics and Data Sciences 302, 303, 304, 305, 306, or Educational Psychology 371.
4. Chemistry 301 or 301H, 302 or 302H, and 204; and Biology 311C.
5. Economics 304K.
6. The following textiles and apparel courses:
  - a. Core courses: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 328, 331, 260L, and 260M; and two of the following courses: Textiles and Apparel 325L, 325M, and 327.
  - b. Option courses: Textiles and Apparel 316Q, 219C, 119L, 151, 352M, 315K, 355P, 361, 376, and 377.
7. Thirty-six semester hours of upper-division coursework, of which at least eighteen must be within and at least twelve must be outside the School of Human Ecology. At least twenty-one semester hours of upper-division coursework must be taken in residence at the University.
8. Enough additional coursework to make a total of 126 semester hours.

## Option III: Textiles and Apparel Honors

1. Mathematics 408C, 408N, or Statistics and Data Sciences 332.
3. Breadth Requirement: An approved calculus course and an approved statistics course (one of these must be honors); Chemistry 301H and 302H; Biology 315H and 325H. Credit earned by examination may not be counted toward this requirement.
4. A section of Undergraduate Studies 302 or 303 that is approved by the departmental honors adviser.
5. A section of Rhetoric and Writing 309S that is restricted to students in the Dean's Scholars Honors Program.
6. Textiles and Apparel 105L, 205, 327, 328, 260L, and 260M.
7. Twenty-two semester hours selected from the three streams of textiles and apparel courses with at least three semester hours in each of the streams: apparel, technical, and functional design; merchandising and consumer science; and textile conservation and museum studies, as well as Human Development and Family Sciences 322 with consent of the honors adviser.
8. Six hours of textiles and apparel, including Textiles and Apparel 379H. In all cases, students will be required to conduct research and write a thesis. In some cases, this thesis will be accompanied by a portfolio of work.
9. Six additional semester hours from biology, chemistry, computer science, engineering, mathematics or physics. Courses designed for non-science majors may not be counted toward this requirement.
10. Six semester hours of coursework in the College of Liberal Arts or the College of Fine Arts.
11. Thirty-six semester hours of upper-division coursework. At least twenty-one semester hours of upper-division coursework must be taken in residence at the University.
12. Twelve additional semester hours of coursework approved by the departmental honors adviser.

13. Enough additional coursework to make a total of 120 semester hours.

## Option IV: Textile Conservation and Museum Studies

1. Mathematics 408C, 408N, or Statistics and Data Sciences 332.
2. One of the following: Mathematics 316, Statistics and Data Sciences 302, 303, 304, 305,306, or Educational Psychology 371.
3. Chemistry 301 or 301H, 302 or 302H, 204, and 320M.
4. Anthropology 302 and 304.
5. The following textiles and apparel courses:
  - a. Core courses: Textiles and Apparel 301, 205, 105L, 313, 214K, 214L, 328, 331, 260L, and 260M; and two of the following courses: Textiles and Apparel 325L, 325M, and 327.
  - b. Option courses: Textiles and Apparel 219C, 119L, 151, 652C, 354C, 354D, 354E, 354F, and 355D.
6. Thirty-six semester hours of upper-division coursework, of which at least eighteen must be within and at least twelve must be outside the School of Human Ecology.
7. Enough additional coursework to make a total of 126 semester hours.

## Special Requirements

Students must fulfill both the University's General Requirements (p. 17) for graduation and the college requirements (p. 539). They must also earn a grade of at least C- in each mathematics and science course required for the degree, and a grade point average in these courses of at least 2.00. More information about grades and the grade point average is given in the *General Information Catalog* (<http://catalog.utexas.edu/general-information/academic-policies-and-procedures/computation-of-the-grade-point-average>).

To graduate under option III, students must remain in good standing in the Dean's Scholars Honors Program (p. 536) must earn grades of at least A- in the departmental research and thesis courses described in requirement 8 above, and must present their research in an approved public forum, such as the college's annual Undergraduate Research Forum.

## Order and Choice of Work

The student should consult the faculty adviser each semester about order and choice of work and balancing the laboratory load. Students should also check prerequisite requirements carefully.

## Courses

The faculty has approval to offer the following courses in the academic years 2013–2014 and 2014–2015; however, not all courses are taught each semester or summer session. Students should consult the *Course Schedule* (<http://registrar.utexas.edu/schedules>) to determine which courses and topics will be offered during a particular semester or summer session. The *Course Schedule* may also reflect changes made to the course inventory after the publication of this catalog.

A full explanation of course numbers is given in the *General Information Catalog*. In brief, the first digit of a course number indicates the semester hour value of the course. The second and third digits indicate the rank of the course: if they are 01 through 19, the course is of lower-division rank; if 20 through 79, of upper-division rank; if 80 through 99, of graduate rank.

# Natural Sciences

## Natural Sciences: NSC

### Lower-Division Courses

#### NSC 301C. Freshman Seminar.

Restricted to first-semester freshmen. Small-group seminar involving reading, discussion, writing, and oral reports. Introduction to University resources, including libraries, computer and research facilities, and museums. Several sections are offered each semester, with various topics and instructors. Two lecture hours and one discussion hour a week for one semester.

#### NSC 001D. Practicum in Clinical Laboratory Science.

Restricted to clinical laboratory science majors. Students participate in a twelve- to fifteen-month off-campus training program. Forty laboratory hours a week for one semester. Offered on the pass/fail basis only. Prerequisite: Completion of all organized coursework for the Bachelor of Science in Clinical Laboratory Science degree and consent of the program director.

#### NSC 001S. Natural Sciences Seminar.

Restricted to students in special programs in the College of Natural Sciences. Seminars may include study sessions, career and networking events, student and community speakers, and other topics related to issues for students in science. Emphasis on student participation. May be repeated for credit.

#### NSC 302. Texas Interdisciplinary Plan: Critical Thinking Seminar.

Restricted to students in the Texas Interdisciplinary Plan or in the Gateway Program. An examination of fundamental concepts in critical thinking, including the role of intellectual virtues, an analysis of the elements of thought, Socratic thinking, and the application of universal intellectual standards. Three lecture hours a week for one semester, with additional hours to be arranged. Liberal Arts 302 and Natural Sciences 302 may not both be counted. May not be repeated for credit.

#### NSC 306J. Hands-On Science I.

Restricted to applied learning and development majors. The first of an integrated sequence of laboratory-based courses. Subjects include energy and motion, electrical circuits, atomic theory, waves, and sound. Two lecture hours and four laboratory hours a week for one semester. Natural Sciences 306J and 309 (Topic: Science for the Twenty-First Century I) may not both be counted. May not be counted toward a degree in the College of Natural Sciences.

#### NSC 306K. Hands-On Science II.

Restricted to applied learning and development majors. The second of an integrated sequence of laboratory-based courses. Subjects include physical and chemical properties of matter, Earth's building blocks, plate tectonics, landforms, and weathering. Two lecture hours and four laboratory hours a week for one semester. Natural Sciences 306K and 309 (Topic: Science for the Twenty-First Century II) may not both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Natural Sciences 306J with a grade of at least C-.

#### NSC 306L. Hands-On Science III.

Restricted to applied learning and development majors. The third of an integrated sequence of laboratory-based courses. Subjects include properties of life, compartments of living organisms, inheritance, adaptations, variations, and disease. Two lecture hours and four laboratory hours a week for one semester. Natural Sciences 306L and 309 (Topic: Science for the Twenty-First Century III) may not both be

counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Natural Sciences 306J and 306K with a grade of at least C- in each.

#### NSC 306M. Hands-On Science IV.

The fourth of an integrated sequence of laboratory-based courses. Subjects include astronomy and the earth's climate. Two lecture hours and four laboratory hours a week for one semester. Natural Sciences 306M and 309 (Topic: Science for the Twenty-First Century IV) may not both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Natural Sciences 306J and 306K with a grade of at least C- in each.

#### NSC 108, 208, 308, 408, 508, 608, 708, 808, 908. Topics in Natural Sciences.

Restrictions vary with the topic. For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only. Prerequisite: Varies with the topic.

**Topic 1: Capstone Prospectus Seminar.** Restricted to students enrolled in the Evidence and Inquiry Certificate program or in the Health Science Honors Program. Seminar to prepare students for their capstone project by helping them develop a research prospectus, identify faculty mentors, and develop a target list of journals for publication of a report on their research. For each semester hour of credit earned, one lecture hour a week for one semester. Offered on the pass/fail basis only.

**Topic 2: Evidence and Inquiry Proposal Seminar.** Enrollment restricted to the Evidence and Inquiry Certificate program. Development of compelling, cross-disciplinary, and academically feasible questions of interest outside student's major area of study; design a field of study around those questions; and write a field proposal for faculty review. For each semester hour of credit earned, one lecture hour a week for one semester. Offered on the pass/fail basis only.

#### NSC 109, 209, 309. Topics in Natural Science.

Restrictions vary with the topic. For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Varies with the topic.

**Topic 3: Natural Sciences Ethics Seminar.** Offered on the letter-grade basis only.

#### NSC 209P. Topics in Calculus for Emerging Scholars.

Restricted to students in the Emerging Scholars Program. A workshop focusing on ideas more than computation and procedures, where students work in small groups on sets of problems designed to encourage advanced thinking about calculus. Three lecture hours a week for one semester. Mathematics 210T (Topic: Topics for Emerging Scholars) and Natural Sciences 209P may not both be counted. Offered on the pass/fail basis only. Prerequisite: Concurrent enrollment in an approved calculus course.

#### NSC 110E. Internship in the Sciences.

Restricted to students in the College of Natural Sciences. Practical work experience related to the student's area of interest in natural sciences. Internships may be on or off campus, paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. Students work in a professional environment and apply analysis, communication, and other academic skills to practical work. Individual instruction conducted on the Web. May be repeated for credit.

Offered on the pass/fail basis only. Prerequisite: Completion of fifteen semester hours of coursework and consent of instructor.

### **NSC 110H. Topics in Natural Sciences Honors Seminar.**

Restricted to students in honors programs in the College of Natural Sciences. Emphasis on student participation. Format may include student speakers, outside speakers, discussions, visits to laboratories, or other enrichment activities. The equivalent of one lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only.

**Topic 1: Dean's Scholars First-Year Seminar.** Restricted to students in the Dean's Scholars Program. The equivalent of one lecture hour a week for one semester. Offered on the pass/fail basis only.

**Topic 2: Health Science Scholars First-Year Seminar.** Restricted to students in the Health Science Scholars Program. The equivalent of one lecture hour a week for one semester. Offered on the pass/fail basis only.

**Topic 3: Polymathic Scholars First-Year Seminar.** Restricted to students in the Polymathic Scholars Program. The equivalent of one lecture hour a week for one semester. Offered on the pass/fail basis only.

### **NSC 311. Critical Reasoning.**

Restricted to students in the Texas Interdisciplinary Plan program. An examination of the fundamental concepts in critical reasoning, including the analysis of argument, application of intellectual standards, and the role of intellectual virtues. Three lecture hours a week for one semester, with additional hours to be arranged.

### **NSC 115. Women in Natural Sciences Seminar.**

The work and lives of women scientists in a sociocultural context. One lecture hour a week for one semester.

### **NSC 118C, 218C, 318C. Forum Seminar Series.**

Restricted to freshmen and sophomores. Lectures and discussions on various contemporary issues. Emphasis on multidisciplinary perspectives and critical discourse. For 118C, two lecture hours a week for eight weeks; for 218C, two lecture hours a week for one semester; for 318C, three lecture hours a week for one semester, or two lecture hours and one hour of supervised research a week for one semester. May be repeated for credit when the topics vary.

### **NSC 119, 219, 319, 419, 519, 619. International Learning Seminars.**

Restricted to students participating in a Maymester Abroad course. Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Natural Sciences 119, 219, 319, 419, 519, 619 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Varies with the topic.

## **Upper-Division Courses**

### **NSC 120E. Internship in the Sciences.**

Restricted to students in the College of Natural Sciences. Practical work experience related to the student's area of interest in Natural Sciences. Internships may be on or off campus, paid or unpaid, and may include work with nonprofit agencies, government offices, or private corporations. Students work in a professional environment and apply analysis, communication, and other academic skills to practical work. Individual instruction conducted on the Web. May be repeated for credit.

Offered on the pass/fail basis only. Prerequisite: Upper-division standing and consent of instructor.

### **NSC 321. Introduction to Peer Mentoring and Leadership.**

Restricted to students in the College of Natural Sciences. Explores current theory and research related to peer mentoring and leadership within higher education. Includes interactive lectures; and the opportunity for students to identify and work through ethical choices as peer leaders; to study leadership concepts such as conflict resolution, diversity, and group dynamics; to work collaboratively; and to conduct independent research. Three lecture hours a week for one semester. May be repeated for credit. Prerequisite: Consent of instructor.

### **NSC 122, 222, 322, 422, 522, 622, 722, 822, 922. Natural Science Topics.**

Restrictions vary with the topic. For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

### **NSC 123, 223, 323, 423, 523, 623, 723, 823, 923. Natural Sciences Topics.**

Restrictions vary with the topic. For each semester hour of credit earned, one lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Upper-division standing; additional prerequisites vary with the topic.

### **NSC 129, 229, 329, 429, 529, 629. International Learning Seminars.**

Restricted to students participating in a Maymester Abroad course. Discussion of various issues related to the academic, cultural, and personal aspects of completing academic work in international locations. For each semester hour of credit earned, one lecture hour a week for one semester. Natural Sciences 129, 229, 329, 429, 529, 629 and Undergraduate Studies 119 may not both be counted unless the topics vary. May be repeated for credit when the topics vary. Offered on the letter-grade basis only. Prerequisite: Varies with the topic.

### **NSC 371. Capstone Thesis Seminar.**

Restricted course; contact the College of Natural Sciences Honors Center for permission to register. Directed reading, research, and discussion followed by the writing of a substantial thesis. Three lecture hours a week for one semester. Prerequisite: Upper-division standing.

## **Department of Astronomy**

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

## **Astronomy: AST**

### **Lower-Division Courses**

#### **AST 301 (TCCN: ASTR 1303). Introduction to Astronomy.**

General introduction to astronomy for nonscience majors. The solar system, stars, galaxies, and cosmology. Three lecture hours a week for one semester. Only one of the following may be counted: Astronomy 301, 302, 303, 307. May not be counted toward a degree in the College of Natural Sciences.

#### **AST 101L. Astronomy Discovery Laboratory.**

For nonscience majors. Hands-on projects in observational astronomy and related laboratory disciplines. Students work in small groups.

Three laboratory hours a week for one semester. May not be counted by students with credit for Astronomy 103L. Prerequisite: Credit or registration for Astronomy 301.

### **AST 302. Self-Paced Introduction to Astronomy.**

General, self-paced introduction to astronomy for nonscience majors. The solar system, stars, galaxies, and cosmology. Self-paced. Only one of the following may be counted: Astronomy 301, 302, 303, 307. May not be counted toward a degree in the College of Natural Sciences.

### **AST 303. Introduction to Astronomy with Celestial Observations.**

General introduction to astronomy for nonscience majors. The solar system, stars, galaxies, and cosmology. Introduces students to the night sky and includes some observational activities. Three lecture hours a week for one semester. Only one of the following may be counted: Astronomy 301, 302, 303, 307. May not be counted toward a degree in the College of Natural Sciences.

### **AST 103L (TCCN: ASTR 1103). Astronomical Observations.**

For nonscience majors. Observations of the night sky with the naked eye and small telescopes; indoor laboratory activities. Two laboratory hours a week for one semester. May not be counted by students with credit for Astronomy 101L, 302, or 303. Prerequisite: Credit or registration for Astronomy 301 or 307.

### **AST 104. Undergraduate Astronomy Seminar.**

Designed for astronomy majors. Discussions about current astronomical research, with different topics emphasized each semester. One lecture hour a week for one semester. May be repeated twice for credit when the topics vary. Offered on the pass/fail basis only.

### **AST 307. Introductory Astronomy.**

Introduction to astronomy for science and engineering students. The solar system, stars, galaxies, and cosmology. Three lecture hours a week for one semester. Only one of the following may be counted: Astronomy 301, 302, 303, 307. Prerequisite: Mathematics 305G or the equivalent or consent of instructor; high school trigonometry and physics are recommended.

### **AST 309 (TCCN: ASTR 1304). Topics in Astronomy for Nonscience Students.**

Selected topics in modern astronomy: solar system, galaxies, peculiar stars, cosmology, and others. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. May be repeated for credit when the topics vary. Prerequisite: Astronomy 301, 302, 303, or consent of instructor.

**Topic 1: Popular Astronomy.** Survey of topics of greatest interest to the public and the media, including new planets, black holes, dark matter, dark energy, and the origin of the Universe.

### **AST 309G. Popular Astronomy for Nonscience Students.**

Restricted to non-College of Natural Science majors. Survey of topics of interest to the public and the media, including new planets, neutron stars, supernovae, gamma-ray bursts, black holes, dark matter, dark energy, and the origin of the universe. Three lecture hours a week for one semester. Only one of the following may be counted: Astronomy 309 (Topic 1), 309G. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: One of the following: Astronomy 301, 302, 303, or consent of instructor.

### **AST 309L. Search for Extraterrestrial Life.**

For nonscience majors. Origin of life in the solar system, existence of other planetary systems, possibilities and techniques for detection of and

communication with other intelligences. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301, 302, 303, or consent of instructor. Students must register for this course with the coordinator in the department's Student Office.

### **AST 309N. Lives and Deaths of Stars.**

For nonscience majors. How stars live and die; extremes of stars and their life cycles. Exotic objects such as white dwarfs, supernovae, neutron stars, pulsars, and black holes. Specific topics may vary with instructor. Three lecture hours a week for one semester. Astronomy 309N and 309Q may not both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301, 302, 303, or consent of instructor.

### **AST 309P. Astronomy in Science Fiction.**

The use of astronomy and other sciences in science fiction literature. Critical analysis of selected novels as to the validity of the astronomy used. Three lecture hours a week for one semester. Prerequisite: Astronomy 301, 302, 303, or consent of instructor.

### **AST 309Q. Time and the Cosmos.**

For nonscience majors. From the beginning of time in the Big Bang to the end of time in the black hole. Includes the early universe, the formation and evolution of single and double stars, and the supercompact objects they eventually become: white dwarfs, pulsars, and black holes. Three lecture hours a week for one semester. Astronomy 309N and 309Q may not both be counted; Astronomy 309Q and 309R may both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301, 302, 303, or consent of instructor.

### **AST 309R. Galaxies, Quasars, and the Universe.**

For nonscience majors. Galaxies, quasars, giant black holes; cosmic evolution; the origin and future of the universe. Three lecture hours a week for one semester. Astronomy 309Q and 309R may not both be counted. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301, 302, 303, or consent of instructor.

### **AST 309S. The Solar System.**

For nonscience majors. The nature, origin, and evolution of our solar system, including planets, moons, and other bodies. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. Prerequisite: Astronomy 301, 302, 303, or consent of instructor.

### **AST 309T. The Milky Way Galaxy.**

Our spiral system of stars, gas, and dust; star formation. Three lecture hours a week for one semester. Prerequisite: Astronomy 301, 302, 303, or consent of instructor.

### **AST 110C, 210C, 310C. Conference Course in Astronomy.**

Restricted enrollment; contact the department for permission to register. Independent research course with supervision by astronomy faculty member or research scientist. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; hours to be arranged. May be repeated for credit.

### **AST 110K, 210K, 310K. Topics in Astronomy Research.**

Designed for science and engineering majors. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor or adviser.

**AST 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Astronomy.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

**Upper-Division Courses**

**AST 321. Current Problems in Astronomy.**

For nonscience majors. Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing; and Astronomy 301, 302, 303, or consent of instructor.

**AST 324. Origins: The Universe, Stars, Planets, and Life.**

For nonscience majors. Cosmic origins from the Big Bang to life, and the connections among the origins of stars, planets, and life. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and Astronomy 301, 302, 303, or consent of instructor.

**AST 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Astronomy.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Astronomy. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

**AST 350L. History and Philosophy of Astronomy.**

Historical influence of astronomical concepts on social, economic, literary, and scientific life; the place of astronomy in society. Three lecture hours a week for one semester. Prerequisite: Upper-division standing; and Astronomy 301, 302, 303, or consent of instructor.

**AST 351. Astronomical Instrumentation.**

A hands-on course in computer-controlled optical instrumentation. Intended for natural science and engineering students interested in the practical aspects of instrument design and construction. Includes optics and optical design, electronics, machining and mechanical design, and computer interfacing. Students work in groups and as teams to design a computer-controlled optical instrument. The equivalent of three lecture hours a week for one semester. Prerequisite: Upper-division standing in the College of Natural Sciences or the Cockrell School of Engineering, or consent of instructor.

**AST 352K. Stellar Astronomy.**

Properties of stars and starlight: principles of radiation; interpretation of stellar spectra. Observational techniques such as photometry, spectroscopy, and telescopes and detectors; variable stars; binary stars. Three lecture hours a week for one semester. Prerequisite: Physics 316 and 116L.

**AST 352L. Positional, Dynamical, and Kinematical Astronomy.**

Coordinate systems and time; stellar positions and motions; the kinematics and dynamics of star clusters and galaxies. Three lecture hours a week for one semester. Prerequisite: Credit or registration for Mathematics 427K.

**AST 152M. Stellar Astronomy Laboratory.**

An introduction to practical observational techniques in astronomy, designed for astronomy majors or advanced students in a physical science. Exercises on the spectroscopy, photometry, and positions of stars using a sixteen-inch telescope on campus. Three laboratory hours a week for one semester. With consent of instructor, may be repeated for credit. Prerequisite: Physics 316 and 116L; credit or registration for Astronomy 352K is recommended.

**AST 353. Astrophysics.**

Survey of the physics of stellar and nonstellar radiation laws, stellar atmospheres and interiors; high-energy astrophysics. Three lecture hours a week for one semester. Prerequisite: Physics 316 and 116L.

**AST 358. Galaxies and the Universe.**

Our galaxy and its constituents; stars and interstellar matter. Properties of other galaxies; galaxy interactions and mergers; expansion and evolution of the universe. Three lecture hours a week for one semester. Prerequisite: A major in science or engineering, or consent of instructor; and Physics 316 or the equivalent. Astronomy 307 or 352K is recommended.

**AST 364. Solar System Astronomy.**

Modern studies of the solar system, including properties of the planets and smaller bodies, and the origin of planetary systems. Three lecture hours a week for one semester. Prerequisite: Physics 316 and 116L.

**AST 367M. Physical Science: Methods of Astronomy.**

Same as Physical Science 367M. An introductory, self-paced course in the methods of astronomy that emphasizes learning astronomical principles through observations. Six laboratory hours a week for one semester. May not be counted toward the Bachelor of Arts, Plan I, degree with a major in astronomy. Prerequisite: Upper-division standing and nine semester hours of coursework in mathematics and/or science, including one of the following: Physical Science 303, 304, Astronomy 301, 302, 303. Equivalent preparation in mathematics, physics, chemistry, or earth sciences may be substituted with written approval of the instructor.

**AST 175, 275, 375. Topics in Astronomy Research.**

Designed for science and engineering majors. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; hours to be arranged. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor or adviser.

**AST 175C, 275C, 375C. Conference Course in Astronomy.**

Restricted enrollment; contact the department for permission to register. Independent research course with astronomy faculty member or research scientist. For each semester hour of credit earned, the equivalent of one lecture hour a week for one semester; hours to be arranged. May be repeated for credit.

**AST 376. Special Topics in Advanced Astronomy.**

Designed for science majors. Three lecture hours a week for one semester. Up to six semester hours may be counted toward the major requirement for the Bachelor of Arts with a major in astronomy. May be repeated for credit when the topics vary. Prerequisite: Upper-division standing and consent of instructor. Additional prerequisites vary with the topic.

**AST 376R. A Practical Introduction to Research Methods.**

Restricted to science and engineering majors. Practical exercises including analysis of imaging data, visualization, programming exercises with IDL, statistical analyses, and training for papers and oral presentations. Three lecture hours a week for one semester. Astronomy 376 (Topic: Practical Intro to Research) and 376R may not both be

counted. Prerequisite: Upper-division standing, or consent of adviser, or participation in the College of Natural Sciences Freshman Research Initiative program; and Mathematics 305G, or the equivalent, or consent of instructor; prior computing experience and an introductory astronomy course are recommended.

#### **AST 379H. Honors Tutorial Course.**

Restricted to science majors approved to graduate with honors. Research project and thesis for students electing to take the honors program in astronomy. Conference course. May be repeated once for credit. Prerequisite: Consent of the departmental honors adviser.

## **School of Biological Sciences**

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

### **Biology: BIO**

#### **Lower-Division Courses**

##### **BIO 101C, 301C, 401C, 601C. Topics in Biology.**

Topics in biology that are especially relevant to current issues and problems in modern society. For each semester hour of credit earned, one lecture hour a week for one semester. Some topics require one additional discussion hour or three or four additional laboratory hours a week; these are identified in the Course Schedule. May not be counted toward a degree in biology. Some sections are offered on the pass/fail basis only; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

**Topic 1: The Biology of Being Human.** Introductory biology course that covers human evolution, genetics and genomics, behavior, population growth and environmental issues. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 301D. Biology for Business, Law, and Liberal Arts.**

Designed for nonscience majors. The scientific method and the social uses of scientific information. Topics include diet and chronic disease, radiation biology, DNA fingerprinting, the biology of learning, conservation of biotic diversity, and the biology of reproduction. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 301E. Problems in Modern Biology.**

An introduction to major concepts in biology, with emphasis on topics, such as genetics, that are relevant to current issues in the field. Three lecture hours and one discussion hour a week for one semester. Biology 301E and 301L may not both be counted; Biology 301E and 301M may not both be counted. May not be counted toward a degree in biology. Prerequisite: Admission to the Plan II Honors Program.

##### **BIO 301L (TCCN: BIOL 1308). Molecules to Organisms.**

Designed for nonscience majors. Introduction to the structure and function of organisms from the molecular to the organ system level; an integrated approach to cell and molecular biology, genetics, development, and physiology of organisms. Three lecture hours and one discussion hour a week for one semester. Biology 301L and 311C may not both be counted; Biology 301L and 311D may not both be counted. Biology 301E and 301L may not both be counted. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 301M (TCCN: BIOL 1309). Ecology, Evolution, and Society.**

Designed for nonscience majors. Introduction to environmental adaptations, diversity of organisms, species interactions, organization and processes of communities, population growth and limitations, evolution and population genetics, origin of life, and human impact on the environment. Three lecture hours and one discussion hour a week for one semester. Biology 301M and 311D may not both be counted. Biology 301E and 301M may not both be counted. May not be counted toward a degree in the College of Natural Sciences, except for the Bachelor of Science in Human Development and Family Sciences.

##### **BIO 102C, 202C, 302C, 402C. Conference Course.**

Supervised study of selected topics in biology, by individual arrangement with the instructor. Conference course. Some sections are offered on the pass/fail basis only. May be repeated for credit. Prerequisite: Varies with the topic.

##### **BIO 305E. Plants, Environment, and Human Affairs.**

Designed for nonscience majors. Plants and the environment, including basic ecological principles and major issues such as global warming and the biodiversity crisis; plants and society, including foods, beverages, medicines, drugs, and other plant products. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 305F. How Plants Sense and Respond to Stimuli.**

Designed for nonscience majors. Exploration of the ways plants sense information about their environment and adapt their growth accordingly; similarities between plant and animal sensory physiology. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 406D. Native Plants.**

Designed for nonscience majors. Introduction to the flora of central Texas. Involves plant identification, distribution, and consideration of edible and useful wild plants. Two lecture hours and six laboratory hours a week for one semester, including field trips. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 206L (TCCN: BIOL 1106, BIOL 1107). Introductory Laboratory Experiments in Biology.**

The organizing principles of biology (such as molecular and cellular functions, reproduction, development, homeostatic mechanisms, and organismal physiology and behavior) are used within a comparative and evolutionary framework to train students in modern laboratory techniques, bioinformatics, experimental design, and interpretation of results. One lecture hour and four laboratory hours a week for one semester. Prerequisite: Credit or registration for Biology 311C or 311D.

##### **BIO 307D. Biology of AIDS.**

Designed for nonscience majors. Introduction to organs, cells, genes, viruses, infectious diseases, and the immune system. Basic biology of HIV, AIDS, and epidemiology. Three lecture hours and one discussion hour a week for one semester. May not be counted toward a degree in the College of Natural Sciences.

##### **BIO 208L. Field Biology.**

Field projects, laboratory exercises, field trips, and computer simulation exercises to acquaint students with the principles and applications of ecology and some of the experimental and descriptive methods of ecological investigations. One lecture hour and four laboratory hours a week for one semester. Prerequisite: Credit or registration for Biology 311D.

### **BIO 309D. The Human Body.**

Designed for nonscience majors. Introduction to the anatomical systems of the human body, their physiological functions and interrelationships. Three lecture hours and one discussion hour a week for one semester. Biology 309D and 365R may not both be counted. May not be counted by students with credit for Biology 365S. May not be counted toward a degree in the College of Natural Sciences, except for the Bachelor of Science in Human Development and Family Sciences.

### **BIO 309F. Heredity, Evolution, and Society.**

Designed for nonscience majors. An elementary course in human genetics and its social impact. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Biology 309F, 346. May not be counted toward a degree in the College of Natural Sciences, except for the Bachelor of Science in Human Development and Family Sciences.

### **BIO 311C (TCCN: BIOL 1306). Introductory Biology I.**

Introduction to biological energy transformation, cell structure and physiology, and gene expression. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Biology 301L, 211, 311C. Biology 311C and 212 may not both be counted. Prerequisite: Credit or registration for Chemistry 301 or 301H.

### **BIO 311D (TCCN: BIOL 1307). Introductory Biology II.**

Introduction to mechanisms of inheritance, evolution, physiology, and species interactions. Three lecture hours and one discussion hour a week for one semester. Biology 301L and 311D may not both be counted. Biology 301M and 311D may not both be counted. Prerequisite: Biology 311C with a grade of at least C-.

### **BIO 315H. Advanced Introduction to Genetics: Honors.**

Basic principles of genetics and cell biology. Emphasis on gene structure and regulation; transmission of heritable traits; structure and function of cells; bacterial and viral genetics; and recombinant DNA technology. Three lecture hours and one discussion hour a week for one semester. Prerequisite: A score of 5 on the College Board Advanced Placement Examination in Biology and credit or registration for Chemistry 301 or 301H.

### **BIO 317. Introduction to Public Health.**

Same as Public Health 317. Overview and basic principles of public health, including the public health system, concepts and tools for measuring health in populations, the relationship between public health and the medical care system, and the role of law and government in public health. Three lecture hours a week for one semester.

### **BIO 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Biology.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the School of Biological Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **BIO 320. Cell Biology.**

Principles of eukaryotic cell structure and function; macromolecules, energetics, membranes, organelles, cytoskeleton, gene expression, signaling, division, differentiation, motility, and experimental methodologies. Three lecture hours and one discussion hour a week for

one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 320L. Cell Biology Laboratory.**

Explores the complex structures and functions of cells through direct observation and experimentation. Subjects may include regulation of gene transcription and translation, protein sorting, organelles and membrane trafficking, cytoskeletal dynamics, and cell division. Students use a combination of modern molecular biology, biochemistry, and microscopy techniques, with a strong emphasis placed on hypothesis-driven approaches, proper experimental design, and clear scientific writing and presentation. One lecture hour and five laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and credit with a grade of at least C- or registration for Biology 320.

### **BIO 321G. Principles of Computational Biology.**

Introduces computational methods used in molecular, cellular, organismal, and population biology. Subjects include molecular bioinformatics, modeling and simulation, and network analysis. Three lecture hours and two computer laboratory hours a week for one semester. Prerequisite: The following with a grade of at least C-: Biology 325 or 325H; Computer Science 303E, 305J, and 307 or Statistics and Data Sciences 222 (or Statistics and Scientific Computation 222); and Mathematics 408C, or 408K and 408L, or 408N and 408S.

### **BIO 321L. Aquatic Entomology.**

The taxonomy of aquatic insects; the use of aquatic insects in biomonitoring. Two lecture hours and three laboratory hours a week for one semester. Only one of the following may be counted: Biology 321L, 370C (Topic: Applied Aquatic Entomology), 384K (Topic 13: Aquatic Entomology). Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 322. Structure, Physiology, and Reproduction of Seed Plants.**

The principles of structure and functioning of higher plants; special attention to the dynamics of growth and development and reproduction. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, Chemistry 302 or 302H, and concurrent enrollment in Biology 122L.

### **BIO 122L. Structure, Physiology, and Reproduction of Seed Plants Laboratory.**

Observation of structure and reproduction in seed plants and employment of experimental techniques that demonstrate physiological processes, especially processes of growth and development. Two laboratory hours a week for one semester. Prerequisite: Concurrent enrollment in Biology 322.

### **BIO 323L. Laboratory Studies in Cell Biology.**

Research exercises involving light/electron microscopy, image processing, autoradiography, chromatography, fractionation, flow cytometry, spectroscopy, diffraction, antibody labeling, cell growth, and kinetics. One lecture hour and four laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and credit or registration for Biology 320.

### **BIO 324. Survey of the Plant Kingdom.**

Review of the groups of living and fossil plants, emphasizing their organization, reproduction, and evolution. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and concurrent enrollment in Biology 124L.

**BIO 124L. Survey of the Plant Kingdom Laboratory.**

Demonstration of members of various plant groups, using cultures and prepared materials, to emphasize organization, reproduction, and evolution. Two laboratory hours a week for one semester. Prerequisite: Concurrent enrollment in Biology 324.

**BIO 325. Genetics.**

Basic principles of Mendelism, molecular genetics, structure and function of genes and chromosomes, populations and evolution. Three lecture hours and one discussion hour a week for one semester. Biology 325 and 325H may not both be counted. Prerequisite: Biology 311C and 311D with a grade of at least C- in each.

**BIO 325H. Genetics: Honors.**

Basic principles of genetics and evolution. Emphasis on population genetics and natural selection; structure and function of organ systems; behavioral ecology; and mutational analysis of organismal development. Three lecture hours and one discussion hour a week for one semester. Biology 325 and 325H may not both be counted. Prerequisite: Biology 315H with a grade of at least C-.

**BIO 325L. Laboratory Experience in Genetics.**

Experimentation and direct observation in fundamental aspects of transmission genetics. One lecture hour and four laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 325T. Human Genetics.**

Genomics, cancer genetics, identification and analysis of human disease genes, and monogenic and multifactorial traits in humans. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 226L. General Microbiology Laboratory.**

Introduction to microbiology laboratory techniques and experimental demonstration of principles of microbiology. One lecture and three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 326M or 326R (or 226R).

**BIO 326M. Introductory Medical Microbiology and Immunology.**

Designed primarily for nursing and prepharmacy students. Overview of the structure, function, and genetics of bacteria, viruses, and fungi, with emphasis on the interactions between micro-organisms and the human host. Includes principles of microbial pathogenesis, the host's innate and adaptive immune responses to infection, epidemiology, laboratory diagnosis, and antimicrobial chemotherapy and vaccines. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 311C; Biology 325 or 325H with a grade of at least C-; Chemistry 301 with a grade of at least C-; and one of the following with a grade of at least C-: Mathematics 408C, 408K, 408N, 408R, Statistics and Scientific Computation 302.

**BIO 326R. General Microbiology.**

Overview of the major areas of microbiological study, including cell structure and function, genetics, host-microbe interactions, physiology, ecology, diversity, and virology. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Chemistry 302 or 302H with a grade of at least C-.

**BIO 327. General Phycology.**

A general survey of the algae and of their biology. Three lecture hours a week for one semester. Biology 327 and 388J may not both be counted.

Prerequisite: Biology 324, 124L, and 325 or 325H, with a grade of at least C- in each, and concurrent enrollment in Biology 127L.

**BIO 327D. Emerging Infectious Diseases.**

Genomic and proteomic tools used to understand the causes of human infectious diseases. Covers genome sequencing, community sequencing, proteomics, microarrays, and human polymorphism analysis; and how these technologies have been applied to the study of important human viral diseases. Also includes extensive coverage of the molecular and clinical biology of these diseases. Three lecture hours a week for one semester. Biology 327D and 337 (Topic: Emerging Infectious Diseases) may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 327E. Epigenetics.**

A study of epigenetic modifications, the covalent modifications of DNA or histones that cause changes in gene expression. Particular attention is given to how experience or environmental factors epigenetically modify health or behavior in animals. Three lecture hours a week for one semester. Biology 327E and 337 (Topic: Epigenetics) may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 327G. Genomics.**

Genome structure, organization, and function of model organisms; theory and methodology of genetic and physical mapping; sequencing analysis and annotation; genome duplication and evolution; and ethics for biotechnology and cloning. Three lecture hours a week for one semester. Biology 327G and 337 (Topic: Genomics) may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 127L. Laboratory in General Phycology.**

Survey of various algal groups, including direct observations of their biology, exposure to research techniques, and instruction in culture procedures. Three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 327.

**BIO 328. Introductory Plant Physiology.**

General principles of the mineral nutrition, water relations, metabolic activities, growth and development of green plants. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Chemistry 302 or 302H.

**BIO 328D. Discovery Laboratory in Plant Biology.**

Learning methods of experimental design, data gathering, data interpretation, and data presentation, including original experiments relating to questions of current interest in plant physiology. Five lab hours a week for one semester. Biology 328D and 337 (Topic: Discovery Laboratory in Plant Biology) may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

**BIO 128L. Laboratory Experiments in Plant Physiology.**

Introduction to experimental techniques used in the study of the mineral nutrition, water relations, metabolic activities, growth and development of green plants. Three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 328.

**BIO 328M. Biostatistics.**

Introduction to methods of statistical analysis of biological data. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Biology 318M, 328M, Statistics and Scientific Computation 318M, 328M. Prerequisite: Mathematics 408D,

408L, or 408S with a grade of at least C-, and four semester hours of coursework in biology.

### **BIO 329. Medical Mycology.**

A basic introduction to medical mycology and an overview of research involving both the fungal zoopathogen and its host. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R (or 226R) with a grade of at least C-.

### **BIO 129L. Medical Mycology Laboratory.**

Basic techniques for the identification and manipulation of fungi of medical importance. Three laboratory hours a week for one semester. Prerequisite: Biology 126L with a grade of at least C-, and credit with a grade of at least C- or registration for Biology 329.

### **BIO 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Biology.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the student abroad adviser in the School of Biological Sciences. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **BIO 330. Animal Virology.**

Mechanisms by which viruses replicate and kill or transform cells. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R (or 226R) with a grade of at least C-.

### **BIO 230L. Virology Laboratory.**

Basic experimental techniques applied to selected bacteriophages and animal viruses. Four laboratory hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H, and 126L with a grade of at least C- in each, and credit with a grade of at least C- or registration for Biology 330 or 333.

### **BIO 331L. Laboratory Studies in Molecular Biology.**

The methods and principles of molecular biology in a research laboratory context. Students conduct a research project directed by a faculty member. One lecture hour and four and one-half laboratory hours a week for one semester. Prerequisite: Biology 205L, 206L, 208L, or 126L; and Biology 325 or 325H with a grade of at least C-.

### **BIO 332. Yeast Cell Biology.**

Yeast is used as a model to teach some of the more actively researched areas of cell biology, such as chromosome structure, mating type, cell-cell interaction, DNA replication, mitosis, cytoskeletal motors, cell polarity, signal transduction, cell cycle, checkpoints, secretion, protein modification, yeast genetics, and yeast technology. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 126L and 326R (or 226R) with a grade of at least C- in each.

### **BIO 333. Molecular Genetics of Bacteriophages and Plasmids.**

Mechanisms of the phage infection cycle and of plasmid replication and gene expression; transposons and transposition. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R (or 226R) with a grade of at least C-.

### **BIO 334. Global Health.**

Global health issues, including the principles of global health, the burden of morbidity and mortality, health determinants, health care and public

health systems, socioeconomic development, and human rights. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Public Health 354, and Biology 328M or Statistics and Scientific Computation 328M.

### **BIO 335. Introduction to Biochemical Engineering.**

Microorganisms in chemical and biochemical synthesis; genetic manipulation of cells by classical and recombinant DNA techniques. Enzyme technology; design of bioreactors and microbial fermentations; separations of biological products. Three lecture hours a week for one semester. Only one of the following may be counted: Biology 335, Biomedical Engineering 339, Chemical Engineering 339, 379 (Topic: Introduction to Biochemical Engineering). Prerequisite: Biology 311C with a grade of at least C-, and either Chemistry 339K and 339L, or 369.

### **BIO 336. Tumor Biology.**

Natural history and causal mechanisms of cancer; viral and chemical carcinogens. Three lecture hours a week for one semester. Biology 336 and 391M may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 330 or 360K with a grade of at least C-.

### **BIO 137, 237, 337, 437. Selected Topics in Biology.**

Recent developments and research methods in the biological sciences. For each semester hour of credit earned, one lecture hour a week for one semester. Some topics may require additional hours; these are identified in the Course Schedule. Some topics are offered on the pass/fail basis only; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Biology 325 or 325H with a grade of at least C-. Additional prerequisites vary with the topic and are given in the Course Schedule.

**Topic 1: Seminar in Human Biology.** One lecture hour a week for one semester. Only offered as Biology 137. Offered on the pass/fail basis only. Prerequisite: Biology 346 with a grade of at least C-.

**Topic 2: Research Methods: UTeach.** Restricted to students in the UTeach-Natural Sciences program. Students perform independent inquiries and use skills from mathematics and science to solve research problems.

**Topic 3: Natural History of Protists.** A study of protista, a wide variety of eukaryotic organisms which are either unicellular or phylogenetically closely allied to unicellular organisms. Description of the basic taxonomic and ecological groups, and description of the natural history of the major groups of organisms.

**Topic 4: Computational Neuroscience and Neural Networks.**

### **BIO 337J. Computational Biology Laboratory.**

Overview of computational biology, with emphasis on nucleic acid sequence analysis and databases. Class projects and self-learning exercises. Two lecture hours and three computer laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 338. Environmental Health.**

Introduction to the major areas of environmental health, including hazards in the environment, the effects of environmental contaminants, and various approaches to addressing major environmental health problems. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Public Health 354, and Biology 328M or Statistics and Scientific Computation 328M.

### **BIO 438L. Animal Communication.**

Animal communication from a multidisciplinary perspective, with emphasis on quantitative analysis, sensory processing, and evolution of signals. Three lecture hours and three laboratory hours a week for one semester,

with computer laboratory hours as required. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 359K or 370 with a grade of at least C-.

### **BIO 339. Metabolism and Biochemistry of Microorganisms.**

A study of the metabolic processes of microorganisms, using a biochemical approach. Three lecture hours a week for one semester. Biology 339 and 391R may not both be counted. Prerequisite: Biology 326R with a grade of at least C-, and Chemistry 310M and 310N.

### **BIO 339M. Bacterial Behavior and Signaling Mechanisms.**

Advanced studies in how bacteria perceive their environment and communicate with each other. Subjects may include chemotaxis and motility, morphogenesis and development, and secretion and virulence. Taught entirely through reading and discussion of original articles. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R with a grade of at least C-.

### **BIO 340L. Biology of Birds.**

Anatomy, physiology, classification, and ecology of birds. Two lecture hours and three laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 341R. Public Health Research.**

Same as Public Health 341R. Students conduct public health research, mentored by professionals at public health practice agencies or faculty at graduate schools of public health throughout Texas. An average of twelve hours of fieldwork a week for a total of at least 180 hours. May be repeated for credit. Prerequisite: Biology 325 or 325H with a grade of at least C-; students must also submit a proposal to the instructor.

### **BIO 343M. Transmembrane Signaling Mechanisms.**

Mechanisms by which hormones, light, and other stimuli trigger changes in plant and animal cell metabolism. Three lecture hours a week for one semester. Biology 343M and 388C may not both be counted. Prerequisite: Biology 325 or 325H, and Chemistry 339K with a grade of at least C- in each.

### **BIO 344. Molecular Biology.**

Molecular basis of cellular processes: gene structure and function, DNA replication, RNA and protein synthesis, viruses, molecular aspects of immunology and cancer, and recombinant DNA. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 345. Cell Physiology.**

An integrated approach to basic processes in physiology: metabolism, transport, energetics, molecular and cellular control mechanisms. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Chemistry 310M.

### **BIO 345E. Endocrinology.**

Vertebrate endocrinology (primarily mammalian), with a focus on human pathophysiology. Three lecture hours and one discussion hour a week for one semester. Biology 337 (Topic: Endocrinology) and 345E may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 346. Human Biology.**

Introduction to human evolution, genetics, sexuality, senescence, and population growth. Three lecture hours and one discussion hour a week for one semester. Biology 309F and 346 may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 446L. Human Microscopic and Gross Anatomy.**

Designed for students preparing for biomedical research and the health professions. Focuses on microscopic and gross anatomy of human tissues and organs, with an emphasis on structure function relationships. Subjects include the effects of disease and aging in addition to normal human anatomy. Three lecture hours and four laboratory hours a week for one semester. Biology 416K and 446L may not both be counted. Prerequisite: Biology 311C; Biology 325 or 325H with a grade of at least C-; Chemistry 301 with a grade of at least C-; and one of the following courses with a grade of at least C-: Mathematics 408C, 408K, 408N, 408R, Statistics and Scientific Computation 302.

### **BIO 347. Biology and Genetics of Immune Disorders.**

Immune disorders in mammals, including humans, used as models for examining basic immunological and immunogenetic principles; emphasis on immune disorders of vertebrates. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 448L. Invertebrate Biology.**

A study of the diversity and evolution of multicellular invertebrate animals, with emphasis on common themes in animal body construction and function. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 349. Developmental Biology.**

Principles of animal development, with emphasis on developmental mechanisms. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 349L. Experiments in Developmental Biology.**

An investigation of methods and principles of developmental biology in a laboratory context, with emphasis on animal embryology using molecular techniques and microscopy. One lecture hour and six laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-; and credit with a grade of at least C- or registration for Biology 349.

### **BIO 350M. Plant Molecular Biology.**

Fundamentals of plant molecular biology, including structure and expression of the chloroplast and mitochondrial genomes. Three lecture hours a week for one semester. Biology 350M and 388M may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 351. Economic Botany.**

An in-depth analysis of the origin of domesticated plant species, the role in nature of plant products, and the ways natural products have been altered through artificial selection. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 352. Reproductive Biology of Flowering Plants.**

Pollination biology, breeding systems, reproductive strategies, and fruit and seed dispersal from evolutionary and ecological vantage points. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 353. Introduction to Health Informatics.**

Examines the clinical aspects of information science, and the nature of information in healthcare. Subjects include conceptual models of data and information and how data and information are delivered throughout the continuum of healthcare; the information requirements for specific issues in healthcare and how those requirements are addressed; and issues surrounding healthcare data storage, access, and retrieval. Biology

337 (Topic: Introduction to Health Informatics) and 353 may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 353F. Field Entomology.**

A field course on insects, with emphasis on field study techniques, visual identification of species, collecting techniques, and curation in the field. Meets five days a week for one hour a day during a summer-session term; additional fieldwork to be arranged, including extended field trips. Biology 353F and Biology 337 (Topic: Field Entomology) may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 453L. Entomology.**

Characteristics, importance, and biology of the major groups of insects. Two lecture hours and three laboratory hours a week for one semester, with additional fieldwork hours to be arranged. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 354. Epidemiology.**

Introduction to basic principles and concepts in epidemiology, including descriptive epidemiology, association and causation, basic epidemiological study design, evidence-based decision analysis, and applications of epidemiology methods to basic and clinical science. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-; Public Health 317 with a grade of at least B-; and credit or registration for Biology 328M, or Statistics Scientific Computation 328M.

### **BIO 354C. Cell Biology of Human Birth Defects.**

Explores the link between basic cell biology, human genetics, and human birth defects using current scientific literature exposing students to critical thinking and the scientific method, as well as the application of these tools to the study of biology. Three lecture hours a week for one semester. Biology 337 (Topic: Developing Biology) and Biology 354C may not both be counted. Prerequisite: Biology 349 with a grade of at least C-.

### **BIO 354L. Ichthyology.**

Overview of the evolution, biology, and ecology of fishes, emphasizing freshwater fishes. Three lecture hours and three hours of laboratory or fieldwork a week for one semester, with field trips to be arranged. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 455L. Vertebrate Natural History.**

Phylogeny, taxonomy, life histories, habits, and distribution. Two lecture hours and three hours of laboratory or fieldwork a week for one semester, with field trips to be arranged. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 456L. Limnology and Oceanography.**

Same as Marine Science 440. An introduction to the study of the interactions between aquatic organisms and their environments. Two lecture hours and six laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Chemistry 302 or 302H.

### **BIO 357. Evolutionary Ecology.**

Principles of modern ecology, particularly as they relate to natural selection and evolutionary theory. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 359J. Behavioral Ecology.**

Advanced topics in behavioral ecology, with detailed consideration of animal communication, altruism, sexual selection, plant-animal interactions. Three lecture hours and one discussion hour a week for one

semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 359K or 370 with a grade of at least C-.

### **BIO 359K. Principles of Animal Behavior.**

An introduction to the study of animal behavior: descriptive analysis of behavior; physiological basis of behavior; development of behavior; adaptive significance and evolution of behavior; communication and social behavior. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 359R. Animal Sexuality.**

The biology of sexuality, including genetics, morphology, physiology, and psychology of sex. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 360K. Immunology.**

The basic concepts of humoral and cell-associated immune phenomena. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R (or 226R) with a grade of at least C-.

### **BIO 160L. Immunology Laboratory.**

Current techniques in experimental cellular and humoral immunology. Three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 360K.

### **BIO 360M. Molecular Immunology.**

An advanced immunology course with an emphasis on molecular models and medical relevance. Three lecture hours a week for one semester. Biology 337 (Topic: Molecular Immunology) and 360M may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 360K with a grade of at least B-.

### **BIO 361. Human Infectious Diseases.**

Etiology, pathogenesis, diagnosis, and immunobiology of the major microbial diseases, with emphasis on their prevention. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R with a grade of at least C-.

### **BIO 361L. Public Health Bacteriology Laboratory.**

Training in techniques required for independent work in diagnostic and epidemiological bacteriology. Two lecture hours and five laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 126L and 326R (or 226R) with a grade of at least C- in each.

### **BIO 361P. Public Health Internship.**

Students conduct a public health research project off campus at a public health practice agency or a graduate school of public health. The equivalent of twelve lecture hours a week for one semester, with additional hours to be arranged. May be repeated for credit. Prerequisite: The following coursework with a grade of at least B- in each: Biology 226L, and Biology 326M or 326R; and completion of an internship application, available online at the Portal of Public Health page.

### **BIO 361T. Comparative Animal Physiology.**

Physiology of organ systems in animal phyla, with special emphasis on physiological adaptations of organisms to their environment. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 364. Microbial Ecology.**

The ability of microbes to adapt to and change their environment. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R with a grade of at least C-.

### **BIO 364E. Current Topics in Advanced Microbial Ecology.**

Development and structure of microbial communities, microbial phylogeny, endosymbiont and symbiont relationships, biogeochemistry, elemental cycling by microbes, and the microbial ecology of disease. Emphasis on active research areas in these topics. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H, and 364 with a grade of at least C- in each.

### **BIO 365N. Development and Plasticity of the Nervous System.**

An introduction to the principles by which the neural tube (brain and spinal cord) develops during embryogenesis, including regionalization of the brain into forebrain, midbrain, hindbrain, and spinal cord. Particular emphasis will be given to the mechanisms that govern how neurons acquire their identity and form neuronal circuits and synapses. Developmental and congenital diseases and possible therapies, including stem cell based therapy or gene therapy. Three lecture hours a week for one semester. Prerequisite: Biology 349 with a grade of at least C-, and Biology 365R or 371M with a grade of at least C-.

### **BIO 365S. Systems Physiology.**

Overview of human physiology, including body fluids, the cardiovascular system, respiration, digestion, metabolism, and endocrinology. Three lecture hours and one discussion hour a week for one semester. May not be counted by students with credit for Biology 416L. Prerequisite: Biology 311C; Biology 325 or 325H with a grade of at least C-; Chemistry 301 with a grade of at least C-; and one of the following with a grade of at least C-: Mathematics 408C, 408K, 408N, 408R, Statistics and Data Sciences 302, (or Statistics and Scientific Computation 302).

### **BIO 165U. Systems Physiology Laboratory.**

Using an inquiry-based approach, provides students with an opportunity for hands-on experience in human physiology. Students read primary scientific literature; collect, analyze, and present data; and write detailed reports on laboratory activities. Four laboratory hours a week for one semester. May not be counted by students with credit for Biology 416L. Prerequisite: Biology 325 or 325H with a grade of at least C-, and credit or registration for Biology 365S.

### **BIO 366. Microbial Genetics.**

Molecular biology of nucleic acids; biosynthesis of macromolecules, transfer of genetic material from cell to cell, recombination, mutagenesis, and regulatory mechanisms. Three lecture hours a week for one semester. Biology 366 and 391S may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 326R with a grade of at least C-.

### **BIO 366R. Molecular Genetics.**

Techniques used for studying molecular biology and transgenic organisms. Includes advanced genetics and the molecular genetics used in clinical applications. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 367W. Laboratory in Behavioral Neuroscience.**

Behavioral experiments with rodents aimed at elucidating the neural mechanisms of psychological processes such as memory, anxiety, and incentive motivation. One lecture hour and five laboratory hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at

least C-; and Biology 365R, or Neuroscience 330 and 335 with a grade of at least C-.

### **BIO 368L. Techniques in Molecular Genetics.**

Laboratory experience in mutagenesis, transformation, transduction, isolation of plasmid and bacteriophage DNA, in vitro recombinant DNA procedures, and DNA base sequencing. One lecture hour and seven laboratory hours a week for one semester. Biology 368L and 390P may not both be counted. Prerequisite: Biology 325 or 325H, and 126L with a grade of at least C- in each.

### **BIO 369F. Field Herpetology.**

Species identification by sight and sound, and research techniques such as sampling populations, data collection, and analysis. One lecture hour and five laboratory hours a week for one semester, with additional field hours to be arranged. Prerequisite: Biology 325 or 325H with a grade of at least C-; and credit or registration for Biology 369L.

### **BIO 369L. Herpetology.**

Biology of amphibians and reptiles, including evolution, ecology, behavior, physiology, life history, and identification. Three lecture hours and two laboratory hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Biology 325 or 325H, and 370.

### **BIO 370. Evolution.**

Introduction to modern evolutionary biology, focusing on the evolution of molecular, developmental, morphological, and behavioral traits. Genetic and ecological bases of evolutionary changes within populations and of evolutionary divergence in animals and plants. Three lecture hours and one discussion hour a week for one semester. Biology 370 and 385K (Topic 2: Evolution) may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 170C, 270C, 370C, 470C. Conference Course.**

Supervised study of selected topics in biology, by individual arrangement with the instructor. Conference course. Some sections are offered on the pass/fail basis only; these are identified in the Course Schedule. May be repeated for credit when the topics vary. Prerequisite: Biology 325 or 325H with a grade of at least C-. Additional prerequisites vary with the topic and are given in the Course Schedule.

### **BIO 471G. Natural History Museum Science.**

An introduction to curatorial practices in natural history museums. Three lecture hours and one discussion hour a week for one semester; students also complete a twenty- to thirty-hour curatorial project. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 371L. Experimental Physiology.**

Experimental approach to physiological mechanisms by which animals adapt to their environment. One lecture hour, four laboratory hours, and two hours of computer work a week for one semester. Prerequisite: Biology 205L, 206L, 208L, or 126L with a grade of at least C-; and Biology 325 or 325H with a grade of at least C-.

### **BIO 371M. Neuronal Basis of Brain and Behavior.**

The nervous system, with emphasis on vertebrate neurobiology. Three lecture hours and one discussion hour a week for one semester. Biology 365R and 371M may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 472L. Taxonomic Plant Anatomy.**

An advanced course emphasizing those aspects of plant anatomy that are most reliable and useful for systematic purposes. Three lecture hours and two laboratory hours a week for one semester. Biology 472L and 487G

may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 374 and 174L with a grade of at least C- in each.

### **BIO 373. Ecology.**

An introduction to ecology, the study of relationships among organisms and between organisms and their environment; adaptations, population, communities, and ecosystems. Includes both plants and animals and both terrestrial and aquatic ecosystems. Three lecture hours and one discussion hour a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 373L. Ecology Laboratory.**

Intensive field ecology. Includes group field experiment and observation, independent projects, and field trips to other vegetation zones. Students complete weekly write-ups of observation and data analysis, reports of independent projects, and an oral presentation on an independent project. Four laboratory hours and two workshop/lecture hours a week for one semester. Prerequisite: Credit or registration for Biology 373.

### **BIO 374. Plant Anatomy with Histological Techniques.**

Tissue organization and cellular details of stems, roots, and leaves of seed plants, with emphasis on development and function. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and concurrent enrollment in Biology 174L.

### **BIO 174L. Laboratory in Plant Anatomy and Histological Techniques.**

Demonstration of cellular details and tissue systems of plant organs; instruction in the preparation of plant materials for histological examination. Three laboratory hours a week for one semester. Prerequisite: Credit with a grade of at least C- or registration for Biology 374.

### **BIO 375. Conservation Biology.**

Application of principles of ecology to the preservation of wild plant and animal species and to the preservation, management, and restoration of natural and seminatural ecosystems. Emphasis on scientific, biological aspects of issues such as endangered species protection, preserve design, and forest management. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least C-, and Biology 357, 359J, or 373 with a grade of at least C-.

### **BIO 177, 277, 377. Undergraduate Research.**

Laboratory or field research in the various fields of biological science under the supervision of one or more faculty members. Supervised individual research. Up to three semester hours may be counted toward the major requirement for the Bachelor of Arts degree with a major in biology. May be repeated for credit. Prerequisite: Biology 325 or 325H with a grade of at least C-, and written consent of instructor.

### **BIO 478L. Comparative Vertebrate Anatomy.**

Study of vertebrate morphology from developmental anatomy to the function, biomechanics, and phylogenetic relationships of living and fossil taxa. Three lecture hours and four laboratory hours a week for one semester. Biology 478L and Kinesiology 324K may not both be counted. Prerequisite: Biology 325 or 325H with a grade of at least C-.

### **BIO 379G. Advanced Mammalian Genetics.**

Molecular developmental genetics and review of classical genetics. Possible topics include but are not limited to cancer, AIDS, forensic genetics, genomics, and gene therapy. Three lecture hours a week for one semester. Prerequisite: Biology 325 or 325H with a grade of at least B-.

### **BIO 379H, 679H. Honors Tutorial Course.**

Original laboratory or field research project under the direction of a faculty mentor, leading to a thesis or research presentation for students in the honors program in biology. The equivalent of three or six lecture hours a week for one semester. May be repeated for credit, but no more than six hours may be counted toward a degree in biology. Prerequisite: Consent of the student's research supervisor and the departmental honors adviser.

## **Department of Chemistry**

Students seeking the degree of Bachelor of Science in Chemical Engineering, Bachelor of Science in Chemistry, or Bachelor of Science in Physics must take the University of Texas at Austin Test for Credit in Chemistry 301 if they were admitted to the University with high school credit in chemistry. Engineering majors in areas other than chemical engineering are also encouraged to take the test. Students with three semesters or more of high school chemistry that included laboratory experience, or credit for Chemistry 301 or 301H, are encouraged to take the University of Texas at Austin Test for Credit in Chemistry 302. These tests are offered only in Austin. Information about them is available at <http://ctl.utexas.edu/programs-and-services/student-testing-services>.

Each student planning to register for a chemistry course should consult an adviser in his or her major area to determine whether specific courses are required.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

## **Chemistry: CH**

### **Lower-Division Courses**

#### **CH 301 (TCCN: CHEM 1311). Principles of Chemistry I.**

Three lecture hours a week for one semester. Some sections also require one enrichment/discussion hour a week; these are identified in the Course Schedule. Chemistry 301 and 301H may not both be counted. Prerequisite: Credit with a grade of at least C- or registration for one of the following: Mathematics 305G, 408C, 408D, 408K, 408L, 408M, 408N, 408S, Statistics and Scientific Computation 302; and an appropriate score on the ALEKS chemistry placement examination.

#### **CH 301H. Principles of Chemistry I: Honors.**

Three lecture hours a week for one semester. Chemistry 301 and 301H may not both be counted. Prerequisite: Credit with a grade of at least C- or registration for one of the following: Mathematics 408C, 408D, 408K, 408L, 408M, 408N, 408S; an appropriate score on the ALEKS chemistry placement examination; and consent of the departmental honors adviser.

#### **CH 302 (TCCN: CHEM 1312). Principles of Chemistry II.**

Development and application of concepts, theories, and laws underlying chemistry. Three lecture hours a week for one semester. Some sections also require one enrichment/discussion hour a week; these are identified in the Course Schedule. Chemistry 302 and 302H may not both be counted. Prerequisite: Chemistry 301 or 301H with a grade of at least C-; and credit with a grade of at least C- or registration for one of the following: Mathematics 408C, 408D, 408K, 408L, 408M, 408N, 408S.

#### **CH 302H. Principles of Chemistry II: Honors.**

Three lecture hours a week for one semester. Chemistry 302 and 302H may not both be counted. Prerequisite: Chemistry 301 or 301H with a grade of at least C-; credit with a grade of at least C- or registration for

one of the following: Mathematics 408C, 408D, 408K, 408L, 408M, 408N, 408S; and consent of the departmental honors adviser.

### **CH 303. Mathematical Introduction to Theories of Matter.**

Introduction to the quantum theoretic description of atoms, molecules, solids, nuclei, elementary particles, and cosmology. Matrix mechanics and group theory. Three lecture hours a week for one semester. Chemistry 303 may be used instead of either Chemistry 302 or Chemistry 301 and 302 in fulfilling the prerequisites of other chemistry courses, except by students seeking the Bachelor of Science in Chemistry degree. Chemistry 303 may be counted in addition to Chemistry 301 and 302. Not recommended by the Health Professions Office for Medical College Admission Test preparation.

### **CH 204 (TCCN: CHEM 1111, CHEM 1112). Introduction to Chemical Practice.**

Introduction to the techniques of modern experimental chemistry. Designed to provide basic laboratory and analytical skills. May include organic, analytical, and physical chemistry, as well as materials science. Four laboratory hours and one hour of discussion a week for one semester. Some sections may also require one hour of computer laboratory a week. Chemistry 204 and 317 may not both be counted. Prerequisite: Credit or registration for Chemistry 302 or 302H.

### **CH 304K. Chemistry in Context I.**

Designed for nonscience majors. Chemistry 304K and 305 form a two-semester sequence designed to fulfill the science requirement for students not majoring in science or engineering. Issues of contemporary interest and importance, such as ozone depletion and global warming, motivate the discussion; the underlying chemistry is developed as needed. Social, political, economic, and ethical implications of scientific developments and science policy are considered. Chemistry 304K addresses the nature of matter, energy, chemical reactions, and chemical thermodynamics. Not intended as preparation for Chemistry 301. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. May not be counted by students with credit for Chemistry 301 with a grade of at least C-.

### **CH 305. Chemistry in Context II.**

Designed for nonscience majors. Chemistry 304K and 305 form a two-semester sequence designed to fulfill the science requirement for students not majoring in science or engineering. Chemistry 305 addresses water chemistry, acids and bases, elementary organic chemistry, polymers, pharmaceuticals, nutrition, and genetics. Three lecture hours a week for one semester. May not be counted toward a degree in the College of Natural Sciences. May not be counted by students with credit for Chemistry 302 with a grade of at least C-. Prerequisite: Chemistry 301 or 304K.

### **CH 206K. Undergraduate Research.**

Introduction to research practices; supervised individual undergraduate research in chemistry. Six to ten laboratory hours a week for one semester. May be repeated for credit, but no more than four semester hours may be counted toward a degree in chemistry or biochemistry. Hours beyond four must be taken on the pass/fail basis. May be repeated for credit. Prerequisite: Consent of the undergraduate adviser in chemistry.

### **CH 107, 207. Conference Course.**

Supervised study in chemistry. One discussion hour a week for one semester, with additional hours to be arranged. Some sections are offered on the pass/fail basis only; these are identified in the Course Schedule. May not be counted toward a major or minor in chemistry or biochemistry.

May be repeated for credit when the topics vary. Prerequisite: Written consent of instructor.

### **CH 207K. Introduction to Science Outreach in Elementary Schools.**

Developing and presenting level-appropriate science laboratories to students in local elementary schools. A hands-on, discovery learning approach to science is emphasized. The equivalent of five lecture hours a week for one semester, with field hours to be arranged. May be counted as an elective only.

### **CH 207L. Peer Teaching.**

Students act as peer teaching assistants in other University chemistry courses, mainly large general chemistry lecture sections. Two hours of lecture and training a week for one semester, and two to three hours a week leading student group discussions. May not be counted toward any degree in chemistry or biochemistry. Prerequisite: Chemistry 301 and consent of the coordinator of the Peer Teaching Assistant Program.

### **CH 108, 208, 308, 408. Topics in Chemistry.**

For each semester hour of credit earned, one lecture hour a week for one semester; some topics may require additional discussion hours. Some sections are offered on the pass/fail basis only. May not be counted toward a major or minor in chemistry or biochemistry. May be repeated for credit when the topics vary.

### **CH 110K (TCCN: CHEM 2123). Organic Chemistry Laboratory.**

Primarily for premedical, pre dental, life sciences, and pharmacy majors. One lecture hour and three laboratory hours a week for one semester. May not be counted by students with credit for Chemistry 210C. Chemistry 110K and 118K may not both be counted. Prerequisite: Chemistry 302 and 204 with a grade of at least C- in each, and credit or registration for Chemistry 310M.

### **CH 110L (TCCN: CHEM 2125). Organic Chemistry Laboratory.**

Primarily for premedical, pre dental, life sciences, and pharmacy majors. One lecture hour and three laboratory hours a week for one semester. Only one of the following may be counted: Chemistry 210C, 110L, 118L. Prerequisite: Chemistry 310M with a grade of at least C-, 110K, and credit or registration for Chemistry 310N.

### **CH 317. Descriptive Inorganic Chemistry for Chemistry and Biochemistry Majors.**

Synthesis and properties of inorganic, bioinorganic, and organometallic compounds. One lecture hour and six laboratory hours a week for one semester. Chemistry 204 and 317 may not both be counted. Prerequisite: Credit or registration for Chemistry 302 or 302H.

### **CH 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Chemistry.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **CH 220C. Organic Chemistry Laboratory.**

One lecture hour and five laboratory hours a week for one semester. Only one of the following may be counted: Chemistry 210C, 110L, 118L, 220C, 128L. Prerequisite: Credit or registration for Chemistry 310N or 320N; and

the following coursework with a grade of at least C- in each: Chemistry 204 or 317; and 310M, 318M, 320M, or 328M.

### **CH 320M. Organic Chemistry I.**

Primarily for premedical, pre dental, life sciences, and pharmacy majors. Development of organic chemical structure, nomenclature, and reactivity. Three lecture hours a week for one semester. Only one of the following may be counted: Chemistry 610A, 310M, 618A, 318M, 320M, 328M. Prerequisite: Chemistry 302 or 302H with a grade of at least C-, and credit or registration for Chemistry 204 or 317.

### **CH 320N. Organic Chemistry II.**

Primarily for premedical, pre dental, life sciences, and pharmacy majors. The development of organic chemical functional group reactivity, reaction mechanics, with analogous aqueous transformations in biochemical settings. Three lecture hours a week for one semester. Only one of the following may be counted: Chemistry 610B, 310N, 618B, 318N, 320N, 328N. Prerequisite: Credit of registration for Chemistry 210C or 220C; and the following coursework with a grade of at least C- in each: Chemistry 204 or 317; and 310M, 318M, 320M, or 328M.

### **CH 128K. Organic Chemistry Laboratory.**

One lecture hour and three laboratory hours a week for one semester. May not be counted by students with credit for Chemistry 210C or 220C. Only one of the following may be counted: Chemistry 110K, 118K, 128K. Prerequisite: Credit or registration for Chemistry 318M or 328M; and the following coursework with a grade of at least C-: Chemistry 302 or 302H; and 204 or 317.

### **CH 128L. Organic Chemistry Laboratory.**

One lecture hour and three laboratory hours a week for one semester. May not be counted by students with credit for Chemistry 210C or 220C. Only one of the following may be counted: Chemistry 110L, 118L, 128L. Prerequisite: Credit or registration for Chemistry 318N or 328N; and the following coursework with a grade of at least C- in each: Chemistry 118K or 128K; and 318M or 328M.

### **CH 328M. Organic Chemistry I.**

Primarily for chemistry and chemical engineering majors. The development of organic chemical structure, nomenclature, and reactivity. Three lecture hours a week for one semester. Only one of the following may be counted: Chemistry 610A, 310M, 618A, 318M, 320M, 328M. Prerequisite: Credit or registration for Chemistry 118K or 128K; and the following coursework with a grade of at least C- in each: Chemistry 302 or 302H; and 204 or 317.

### **CH 328N. Organic Chemistry II.**

Primarily for chemistry and chemical engineering majors. The development of organic chemical reactivity, with an emphasis on synthesis and polymers. Three lecture hours a week for one semester. Only one of the following may be counted: Chemistry 610B, 310N, 618B, 318N, 320N, 328N. Prerequisite: Credit or registration for Chemistry 118L or 128L; and the following coursework with a grade of at least C- in each: Chemistry 318M or 328M, and 118K or 128K.

### **CH 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Chemistry.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Chemistry and Biochemistry. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in

an affiliated studies program. May be repeated for credit when the topics vary.

### **CH 329W. Cooperative Chemistry/Biochemistry.**

This course covers the work period of chemistry and biochemistry students in the Cooperative Education program, which provides supervised work experience by arrangement with the employer and the supervising instructor. Forty laboratory hours a week for one semester. The student must repeat the course each work period and must take it twice to receive credit toward the degree; at least one of these registrations must be during a long-session semester. No more than three semester hours may be counted toward the major requirement; no more than six semester hours may be counted toward the degree. The student's first registration must be on the pass/fail basis. Prerequisite: Chemistry 310N or 318N with a grade of at least C-, application to become a member of the Cooperative Chemistry/Biochemistry Program, and consent of the Department of Chemistry and Biochemistry undergraduate adviser.

### **CH 431. Inorganic Chemistry.**

Survey of the chemistry of the elements, incorporating both descriptive and theoretical aspects. Open-ended experiments designed to illustrate a variety of synthetic techniques. Three lecture hours and three laboratory hours a week for one semester. Prerequisite: The following courses with a grade of at least C-: Chemistry 302 or 302H, Chemistry 204 or 317, and Chemistry 320M or 328M.

### **CH 341. Special Topics in Laboratory Chemistry.**

Examples of topics are physical measurements techniques; electronics for scientists; advanced synthetic chemistry (organic or inorganic); separation techniques. One lecture hour and six laboratory hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: Eight semester hours of coursework in organic chemistry and consent of the undergraduate adviser.

### **CH 644. Chemical Education: Secondary School.**

Issues and techniques in secondary school teaching of chemical sciences. Three lecture hours a week for two semesters. For students seeking the Bachelor of Science in Chemistry: Teaching Option degree. May not be counted toward any other degree in chemistry or biochemistry. Prerequisite: For 644A, eight semester hours of coursework in organic chemistry and credit or registration for Chemistry 144K; for 644B, Chemistry 644A, 144K, and credit or registration for Chemistry 144L.

### **CH 144K. Chemical Education Laboratory I.**

Development of classroom demonstrations, laboratory experiments, and teaching aids for secondary school teaching of the chemical sciences. Two laboratory hours a week for one semester. For students seeking the Bachelor of Science in Chemistry: Teaching Option degree. May not be counted toward any other degree in chemistry or biochemistry. Prerequisite: Credit or registration for Chemistry 644A.

### **CH 144L. Chemical Education Laboratory II.**

Development of classroom demonstrations, laboratory experiments, and teaching aids for secondary school teaching of the chemical sciences. Two laboratory hours a week for one semester. For students seeking the Bachelor of Science in Chemistry: Teaching Option degree. May not be counted toward any other degree in chemistry or biochemistry. Prerequisite: Credit or registration for Chemistry 644B.

### **CH 353. Physical Chemistry I.**

For chemistry and chemical engineering majors. Equations of state, laws of thermodynamics, ideal and nonideal solutions, phase equilibria, thermodynamics of chemical reactions. Three lecture hours a week for one semester. Chemistry 353 and 353M may not both be counted.

Prerequisite: Mathematics 408C and 408D, or two of the following: Mathematics 408K, 408L, 408M, 408N, 408S; Chemistry 302 or 302H with a grade of at least C-; and Physics 316 and 116L, 303L and 103N, or 317L and 117N.

### **CH 153K. Physical Chemistry Laboratory.**

Three laboratory hours a week for one semester. Prerequisite: Chemistry 353 or 353M with a grade of at least C-.

### **CH 353M. Physical Chemistry I for Life Sciences.**

For biochemistry and biology majors. Thermochemistry and kinetics of reactions in cells, enzyme catalysis, electrical and transport properties of membranes. Three lecture hours a week for one semester. Chemistry 353 and 353M may not both be counted. Prerequisite: Mathematics 408C and 408D, or two of the following: Mathematics 408K, 408L, 408M, 408N, 408S; Chemistry 302 or 302H with a grade of at least C-; and Physics 316 and 116L, 303L and 103N, or 317L and 117N.

### **CH 354. Quantum Chemistry and Spectroscopy.**

Fundamental principles of quantum mechanics, exactly soluble model problems, electronic structure of atoms and molecules, spectroscopy. Three lecture hours a week for one semester. Prerequisite: Mathematics 408C and 408D, or two of the following: Mathematics 408K, 408L, 408M, 408N, 408S; and Physics 316 and 116L.

### **CH 154K. Physical Chemistry Laboratory.**

Three laboratory hours a week for one semester. Prerequisite: Chemistry 353 or 353M with a grade of at least C-, and credit or registration for Chemistry 354 or 354L.

### **CH 354L. Physical Chemistry II.**

Molecular energy levels, statistical thermodynamics (macroscopic thermodynamic functions from molecular input), and physical and chemical kinetics, with emphasis on the molecular viewpoint. Three lecture hours a week for one semester. May be counted toward a biochemistry or chemistry degree. Chemistry 354, rather than this course, is recommended for students planning graduate study in chemistry. Prerequisite: Chemistry 353 or 353M with a grade of at least C-.

### **CH 354S. Elements of Spectroscopy.**

Primarily for chemistry and biochemistry majors. Fundamentals of spectroscopy, with knowledge of elementary quantum mechanics. Separation of electronic, vibrational, rotational and spin quantum states; interaction of radiation and matter; theory and application of different types of spectroscopy including photoelectron, electronic absorption and emission, vibrational (infrared and Raman), rotational and magnetic resonance. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Chemistry 353 or 353M, and 354 or 354L.

### **CH 455. Fundamentals of Analytical Chemistry.**

For biochemistry, engineering, and clinical laboratory science majors. Chemical and instrumental methods in analytical chemistry. Three lecture hours and three laboratory hours a week for one semester. Chemistry 455 and 456 may not both be counted. Prerequisite: Chemistry 302 or 302H, and Chemistry 204 or 317, with a grade of at least C- in each.

### **CH 456. Analytical Chemistry.**

For chemistry majors. Three lecture hours and three laboratory hours a week for one semester. Chemistry 455 and 456 may not both be counted. Prerequisite: Chemistry 302 or 302H with a grade of at least C-, and Chemistry 204 or 317 with a grade of at least C-.

### **CH 367C. Materials Chemistry.**

Restricted to chemistry majors. Introduction to structural and physical properties of materials and synthetic strategies for making new materials in the nanoscale and mesoscale regimes, in addition to covering instrumental methods used to probe materials properties. Some aspects of applications (semiconductor devices, solar and fuel cells, smart and responsive materials) will be covered to illustrate the kinds of material properties that need to be considered in designing novel materials of specific function. Three lecture hours a week for one semester. Prerequisite: Upper-division standing, and Chemistry 302 and 353 with a grade of at least C- in each. Chemistry 431 or 354L with a grade of at least C- is recommended.

### **CH 367L. Macromolecular Chemistry.**

Designed for chemistry and chemical engineering students. Occurrence, preparation, structure, and properties of macromolecular substances. Three lecture hours a week for one semester. Prerequisite: Chemistry 310M and 310N or Chemistry 318M and 318N; Chemistry 210C, or 118K and 118L; and Chemistry 353 or 353M with a grade of at least C-.

### **CH 368. Advanced Topics in Chemistry.**

Three lecture hours a week for one semester. May be repeated for credit when the topics vary. Prerequisite: 310M and 310N or Chemistry 318M and 318N; Chemistry 353 or 353M with a grade of at least C-; and Chemistry 354 or 354L with a grade of at least C-.

**Topic 1: Research Methods: UTeach.** Restricted to students in the UTeach-Natural Sciences program. Students use mathematics and science skills to solve research problems.

### **CH 369K. Techniques of Research.**

Advanced laboratory practice and introduction to research. One lecture hour and six laboratory hours a week for one semester. May be taken for a letter grade no more than twice. No more than six semester hours may be counted toward a degree in chemistry or biochemistry. May be repeated for credit. Prerequisite: Eight semester hours of coursework in organic chemistry; and six semester hours of upper-division chemistry courses approved by the undergraduate adviser's office, or consent of the undergraduate adviser in chemistry.

### **CH 371K. Science Outreach in Elementary Schools.**

Students develop and present level-appropriate science laboratories to students in local elementary schools. Students also plan and create the infrastructure needed to administer the science program in concert with the science curriculum at a specific elementary school. A hands-on, discovery learning approach to science is emphasized. One class hour and six hours of fieldwork a week for one semester. May be taken for a letter grade no more than twice. No more than six semester hours may be counted toward a degree in chemistry or biochemistry. May be repeated for credit. Prerequisite: Upper-division standing, at least six hours of upper-division coursework in the College of Natural Sciences, and consent of the UTeach adviser in the College of Natural Sciences.

### **CH 372C. Chemistry Peer Mentors in Research and Teaching.**

Students work as peer mentors and assistants in the teaching of chemistry, with emphasis on developing instructional materials and laboratories that teach fundamental chemistry with real world data. Students mentor students for at least six hours a week in addition to other weekly meetings. May be taken for a letter grade no more than twice. No more than six semester hours may be counted toward a degree in chemistry or biochemistry. May be repeated for credit. Prerequisite: Chemistry 301 or 301H and 302 or 302H with a grade of at least B in each, and consent of the undergraduate adviser.

### **CH 375K, 475K. Individual Study in Chemistry and Biochemistry.**

Supervised reading or individual tutorial sessions on advanced topics in chemistry and biochemistry. Three or four class hours a week for one semester. No more than six semester hours may be counted toward a degree in chemistry or biochemistry. May be repeated for credit. Prerequisite: Eight semester hours of coursework in organic chemistry, Chemistry 353, and consent of the undergraduate adviser.

### **CH 376K. Advanced Analytical Chemistry.**

Two lecture hours and three laboratory hours a week for one semester. Prerequisite: Chemistry 353 and 456 with a grade of at least C- in each.

### **CH 379H. Chemistry Honors Tutorial Course.**

Laboratory research project in a specific field of chemistry under the supervision of one or more faculty members. Conference course. May be repeated once for credit. Must be taken in addition to the required hours for the Bachelor of Science in Chemistry degree. Students must enter no later than the first semester of the year of graduation. Prerequisite: Consent of the student's research supervisor and the departmental honors adviser.

## **Department of Computer Science**

An undergraduate may not enroll in any computer science course more than once without written consent of an undergraduate adviser in computer science. No student may enroll in any computer science course more than twice. No student may take more than three upper-division computer science courses in a semester without written consent of an undergraduate adviser in computer science.

The information in parentheses after a course number is the Texas Common Course Numbering (TCCN) designation. Only TCCN designations that are exact semester-hour equivalents of University courses are listed here. Additional TCCN information is given in Appendix A (p. 675).

## **Computer Science: C S**

### **Lower-Division Courses**

#### **C S 301K. Foundations of Logical Thought.**

Introductory logic in the context of computing; introduction to formal notations; basic proof techniques; sets, relations, and functions. Three lecture hours a week for one semester. Some sections also require one discussion hour a week; these are identified in the Course Schedule.

#### **C S 302. Computer Fluency.**

An introduction to the fundamental concepts of computing: how computers work, what they can do, and how they can be used effectively. Some programming is required. Three lecture hours or two lecture hours and one discussion hour a week for one semester. Credit for Computer Science 302 may not be earned after a student has received credit for Computer Science 303E, 305J, 307, 312, 312H, 314, or 314H. May not be counted toward a degree in computer science.

#### **C S 303E. Elements of Computers and Programming.**

Problem solving and fundamental algorithms for various applications in science, business, and on the World Wide Web, and introductory programming in a modern object-oriented programming language. The equivalent of three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 303E, 305J, 312, 312H. Credit for Computer Science 303E may not be earned after a student has received credit for Computer Science 307, 314, or 314H. May not be counted toward a degree in computer science.

#### **C S 105. Computer Programming.**

An introduction to programming in a particular computer language. Students design and implement programs. One lecture hour a week for one semester. May be repeated for credit when the languages vary. Prerequisite: Computer Sciences 307, 313E, 314, 314H, or Electrical Engineering 422C (or 322C), with a grade of at least C-.

#### **C S 108. Software Systems.**

Introduction to the use of a particular software system. Students build applications that exploit the system being studied. One lecture hour a week for one semester. May be repeated for credit when the topics vary. Offered on the pass/fail basis only. Prerequisite: Computer Science 307, 313E, 314, 314H, or Electrical Engineering 422C (or 322C), with a grade of at least C-.

#### **C S 109, 209, 309. Topics in Computer Science.**

For each semester hour of credit earned, one lecture hour a week for one semester. Some sections are offered on the pass/fail basis only. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic.

#### **C S 311. Discrete Mathematics for Computer Science.**

Restricted to computer science majors. A focus on discrete mathematical tools of fundamental importance to the working computer scientist. An emphasis is placed on using logical notation to express rigorous mathematical arguments. Topics include proof by induction, introduction to graph theory, recurrences, sets, functions, and an introduction to program correctness. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 311, 311H, 313H, 313K, 336, 336H. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C-: Computer Science 312 or 312H; and Mathematics 408C, 408K or 408N, or registration for Mathematics 408C.

#### **C S 311H. Discrete Mathematics for Computer Science: Honors.**

Restricted to honors computer science majors. A focus on discrete mathematical tools of fundamental importance to the working computer scientist. An emphasis is placed on using logical notation to express rigorous mathematical arguments. Topics include proof by induction, graph theory, number theory, combinatorics, recurrences, sets, functions, an introduction to program correctness, and discrete probability. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 311, 311H, 313H, 313K, 336, 336H. Offered on the letter-grade basis only. Prerequisite: For computer science majors, the following coursework with a grade of at least C-: Mathematics 408C, 408K, or 408N, or registration for Mathematics 408C; for others, consent of instructor.

#### **C S 312. Introduction to Programming.**

First part of a two-part sequence in Java programming. Fundamental concepts of structured programming; procedures and data structures with a focus on problem solving strategies and implementation; introduction to concepts of informal specification, informal reasoning about program behavior, debugging, and ad hoc testing. Three lecture hours and one discussion hour a week for one semester. Only one of the following courses may be counted: Computer Science 303E, 305J, 312, 312H. Credit for Computer Science 312 may not be earned after a student has received credit for Computer Science 314 or 314H. Prerequisite: Credit with a grade of at least C- or registration for Mathematics 408C, 408K, or 408N.

#### **C S 312H. Introduction to Programming: Honors.**

Restricted to computer science majors. First part of a two-part sequence in Java programming. Fundamental concepts of structured programming;

procedures and data structures with a focus on problem solving strategies and implementation; introduction to concepts of informal specification, informal reasoning about program behavior, debugging, and ad hoc testing. Three lecture hours and one discussion hour a week for one semester. Only one of the following courses may be counted: Computer Science 303E, 305J, 312, 312H. Credit for Computer Science 312H may not be earned after a student has received credit for Computer Science 314 or 314H. Prerequisite: Credit with a grade of at least C- or registration for Mathematics 305G, or a passing score on the College of Natural Sciences mathematics placement examination; and consent of the honors director.

### **C S 313E. Elements of Software Design.**

Object-oriented design of software in a modern high-level language, using software library packages. Introduction to elementary data structures and complexity of algorithms. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Prerequisite: Computer Science 303E, 305J, 312, or 312H with a grade of at least C-.

### **C S 314. Data Structures.**

Second part of a two-part sequence in Java programming. Introduction to specifications, simple unity testing, and debugging; building and using canonical data structures; algorithm analysis and reasoning techniques such as assertions and invariants. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Computer Science 307, 314, 314H, 315, 315H. Prerequisite: Computer Science 312 or 312H with a grade of at least C-.

### **C S 314H. Data Structures: Honors.**

Second part of a two-part sequence in Java programming. Introduction to specifications, simple unity testing, and debugging; building and using canonical data structures; algorithm analysis and reasoning techniques such as assertions and invariants. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Computer Science 307, 314, 314H. Only one of the following may be counted: Computer Science 314, 314H, 315, 315H. Prerequisite: Computer Science 312 or 312H with a grade of at least C-, and consent of the honors director.

### **C S 119S, 219S, 319S, 419S, 519S, 619S, 719S, 819S, 919S. Topics in Computer Science.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

## **Upper-Division Courses**

### **C S 120N, 220N, 320N. Topics in Computer Science for Nonmajors.**

For each semester hour of credit earned, one lecture hour a week for one semester. May not be counted toward a degree in computer science. May be repeated for credit when the topics vary. Prerequisite: Varies with the topic and is given in the Course Schedule.

### **C S 321H. Functional and Symbolic Programming: Honors.**

An introduction to functional and symbolic programming and to the use of these concepts throughout computer science. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313K, or 313H; 307, 314, 314H, 315, or 315H; and consent of the honors director.

### **C S 323E. Elements of Scientific Computing.**

Fundamentals of software issues related to scientific computing. Subjects include floating-point computations, numerical computation errors, interpolation, integration, solution of linear systems of equations, optimization, and initial value problems of ordinary differential equations. Implementation of algorithms are investigated using MATLAB for matrix and vector computations. Examples are drawn from a variety of science and mathematics areas. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Computer Science 323E and 323H may not both be counted. Prerequisite: The following coursework with a grade of at least C-: Computer Science 303E and 313E, or Computer Science 307, 312, 312H, 314, 314H, 315, or 315H; Electrical Engineering 322C or 422C; Mathematics 408D, 408M, or 427L; and credit with a grade of at least C- or registration for Mathematics 340L, 341, or Statistics and Scientific Computation 329C.

### **C S 323H. Elements of Scientific Computing: Honors.**

Fundamentals of software issues related to scientific computing. Subjects include floating-point computations, numerical computation errors, interpolation, integration, solution of linear systems of equations, optimization, and initial value problems of ordinary differential equations. Implementation of algorithms are investigated using MATLAB for matrix and vector computations. Examples are drawn from a variety of science and mathematics areas. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Computer Science 323E and 323H may not both be counted. Prerequisite: Computer Science 303E, 305J, 307, 312, 312H, 315, or 315H with a grade of at least C-; credit with a grade of at least C- or registration for Mathematics 340L, 341, or Statistics and Scientific Computation 329C; and consent of the honors director.

### **C S 324E. Elements of Graphics and Visualization.**

Basics of two- and three-dimensional computer graphics systems, modeling and rendering, and selected graphics software APIs. Other topics may include interactive graphics, animation, graphical user interfaces, and the graphical presentation of information. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Prerequisite: One of the following with a grade of at least C-: Computer Science 303E, 305J, 307, 312, 312H, 314, 314H, 315, 315H, Electrical Engineering 322C, or 422C.

### **C S 326E. Elements of Networking.**

Introduction to the principles and basic concepts of the Internet, networking applications and protocols, and simple client/server applications. Other topics may include network technologies and topologies, packet and circuit switching, LANS and WANS, Internet security, and network management. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Prerequisite: One of the following with a grade of at least C-: Computer Science 303E, 305J, 307, 312, 312H, 314, 314H, 315, 315H, Electrical Engineering 322C, or 422C.

### **C S 327E. Elements of Databases.**

A practical introduction to database management systems, with discussion of database administration and management. Survey of logical modeling, database design with a focus on relational databases, SQL query language, and current applications. Subjects may include data integrity, performance, concurrency, transaction processing, recovery, security, and Web applications. Three lecture hours a week for one semester. May not be counted toward a degree in computer science. Prerequisite: One of the following with a grade of at least C-: Computer Science 303E, 305J, 307, 312, 312H, 314, 314H, 315, 315H, Electrical Engineering 322C, or 422C.

### **C S 429. Computer Organization and Architecture.**

Restricted to computer science majors. An introduction to low-level computer design ranging from the basics of digital design to the hardware/software interface for application programs. Includes basic systems principles of pipelining and caching, and requires writing and understanding programs at multiple levels. Four lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Computer Science 310, 310H, 429, 429H. Prerequisite: The following courses with a grade of at least C-: Computer Science 311, 311H, 313H, or 313K; and Mathematics 408C, 408K, or 408N.

### **C S 329E. Topics in Elements of Computing.**

Three lecture hours a week for one semester. May not be counted toward a degree in computer science. May be repeated for credit when the topics vary. Prerequisite: Consent of instructor; additional prerequisites vary with the topic.

### **C S 429H. Computer Organization and Architecture: Honors.**

Restricted to computer science majors. An introduction to low-level computer design ranging from the basics of digital design to the hardware/software interface for application programs. Includes basic systems principles of pipelining and caching, and requires writing and understanding programs at multiple levels. Four lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Computer Science 310, 310H, 429, 429H. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 314, 314H, 315, or 315H; and consent of the honors director.

### **C S 129S, 229S, 329S, 429S, 529S, 629S, 729S, 829S, 929S. Topics in Computer Science.**

This course is used to record credit the student earns while enrolled at another institution in a program administered by the University's Study Abroad Office. Credit is recorded as assigned by the study abroad adviser in the Department of Computer Science. University credit is awarded for work in an exchange program; it may be counted as coursework taken in residence. Transfer credit is awarded for work in an affiliated studies program. May be repeated for credit when the topics vary.

### **C S 329W. Cooperative Computer Science.**

This course covers the work period of computer science students in the Cooperative Education program, which provides supervised work experience by arrangement with the employer and the supervising instructor. Forty laboratory hours a week for one semester. The student must repeat the course each work period and must take it twice to receive credit toward the degree; at least one of these registrations must be during a long-session semester. However, no more than three semester hours may be counted toward the major requirement. The student's first registration must be on the pass/fail basis; the second must be on the letter-grade basis. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; 307, 314, 314H, 315, or 315H; 310, 310H, 429, or 429H; and consent of the undergraduate adviser.

### **C S 331. Algorithms and Complexity.**

An investigation of algorithmic paradigms: divide and conquer, dynamic programming, greedy algorithms, graph algorithms, randomized algorithms, undecidability, NP-completeness, and approximation algorithms. Three lecture hours and one discussion hour a week for one semester. Only one of the following may be counted: Computer Science 331, 331H, 357, 357H, 378 (Topic: Algorithms and Complexity). Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C-: Computer Science 311, or 311H, (or 313H or 313K); Computer Science 314, or 314H, (or 307, 315, or 315H); Computer Science 429, or 429H, (or 310 or 310H); Mathematics 362K, or Statistics

and Data Sciences 321, (or Statistics and Scientific Computation 321); and credit with a grade of at least C- or registration for Mathematics 340L, or Statistics and Data Sciences 329C, (or Statistics and Scientific Computation 329C).

### **C S 331H. Algorithms and Complexity: Honors.**

An investigation of algorithmic paradigms: divide and conquer, dynamic programming, greedy algorithms, graph algorithms, randomized algorithms, undecidability; NP-completeness, approximation algorithm, sorting lower bound, selected topics from amortized analysis, network flow, and linear programming. Three lecture hours and one hour of discussion a week for one semester. Only one of the following may be counted: Computer Science 331, 331H, 357, 357H, 378 (Topic: Algorithms and Complexity). Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C-: Computer Science 311, or 311H, (or 313H or 313K); Computer Science 314, or 314H, (or 307, 315, or 315H); Computer Science 429, or 429H, (or 310 or 310H); Mathematics 362K, or Statistics and Data Sciences 321, (or Statistics and Scientific Computation 321); and credit with a grade of at least C- or registration for Mathematics 340L, or Statistics and Data Sciences 329C, (or Statistics and Scientific Computation 329C); and consent of the honors director.

### **C S 234. Technical Writing.**

Application of techniques and strategies of effective technical writing, and of conventions used in documents such as letters, memos, proposals, abstracts, and reports. Two lecture hours a week for one semester. Computer Science 234 and 178 (Topic: Technical Writing) may not both be counted. May not be counted toward the number of hours in computer science required for the Bachelor of Science in Computer Science degree. Prerequisite: Computer Science 310, 310H, 429, or 429H with a grade of at least C-.

### **C S 337. Theory in Programming Practice.**

Application of program-analysis theory to program design. Methodologies for large-scale program design. Designed to help students bring together theoretical and programming skills. Three lecture hours and one discussion hour a week for one semester. Computer Science 337 and 337H may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Computer Science 331 or 331H; and Mathematics 408C, 408K, or 408N.

### **C S 337H. Theory in Programming Practice: Honors.**

Application of program-analysis theory to program design. Methodologies for large-scale program design. Designed to help students bring together theoretical and programming skills. Three lecture hours and one discussion hour a week for one semester. Computer Science 337 and 337H may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Computer Science 331, 331H, 341, 341H, 357, or 357H; Mathematics 408C, 408K, or 408N; and consent of the honors director.

### **C S 439. Principles of Computer Systems.**

Restricted to computer science majors. An introduction to low-level software abstractions with an emphasis on the connection of these abstractions to underlying computer hardware. Key abstractions include threads, dynamic memory allocation, protection, and IO. Requires writing of synchronized multithreaded programs. Four lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Computer Science 439, 439H, 352, 352H. Only one of the following may be counted: Computer Science 439, 439H, 372, 372H.

Prerequisite: Computer Science 310, 310H, 429, or 429H with a grade of at least C-.

### **C S 439H. Principles of Computer Systems: Honors.**

Restricted to computer science majors. An introduction to low-level software abstractions with an emphasis on the connection of these abstractions to underlying computer hardware. Key abstractions include threads, dynamic memory allocation, protection, and IO. Requires writing of synchronized multi-threaded programs. Four lecture hours and two laboratory hours a week for one semester. Only one of the following may be counted: Computer Science 439, 439H, 352, 352H. Only one of the following may be counted: Computer Science 439, 439H, 372, 372H. Prerequisite: Computer Science 310, 310H, 429, or 429H with a grade of at least C-; and consent of the honors director.

### **C S 341. Automata Theory.**

An introduction to the formal study of automata and of related formal languages with applications in computer science. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 341, 341H, Linguistics 340. Prerequisite: Computer Science 429 or 429H with a grade of at least C-.

### **C S 341H. Automata Theory: Honors.**

An introduction to the formal study of automata and of related formal languages with applications in computer science. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 341, 341H, Linguistics 340. Prerequisite: Computer Science 429 or 429H with a grade of at least C-.

### **C S 342. Neural Networks.**

Biological information processing; architectures and algorithms for supervised learning, self-organization, reinforcement learning, and neuro-evolution; hardware implementations and simulators; applications in engineering, artificial intelligence, and cognitive science. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 408C, 408K, or 408N.

### **C S 342C. Computational Brain.**

An examination of the brain as a computational system composed of different layers of abstraction. Focus on scientific writing, with weekly reviews of relevant scientific papers. Three lecture hours a week for one semester. Computer Science 342C and 378 (Topic: Computational Brain) may not both be counted. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 362K or Statistics and Scientific Computation 321.

### **C S 343. Artificial Intelligence.**

A survey of current artificial intelligence issues, including search, production systems, knowledge representation, knowledge-based systems, planning, natural language processing, and machine learning. Artificial intelligence programming projects are required. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 343, 343H, 378H (Topic: Artificial Intelligence: Honors). Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 362K or Statistics and Scientific Computation 321.

### **C S 343H. Artificial Intelligence: Honors.**

An introduction to the field of artificial intelligence (AI), starting from foundations in search and knowledge representation, and then sampling from major AI topics such as knowledge-based systems, planning, machine learning, probabilistic reasoning, intelligent agents (including for games), natural language processing, robotics, computer vision, and philosophical foundations. Programming projects are required. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 343, 343H, 378H (Topic: Artificial Intelligence: Honors). Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429 or 429H; Mathematics 362K or Statistics and Scientific Computation 321; and consent of the honors director.

### **C S 344M. Autonomous Multiagent Systems.**

An introduction to autonomous agents, with an emphasis on multiagent systems. Students use a robotics simulator. Emphasis on computer science research activities, including speaking, writing, programming, and working in groups. Three lecture hours a week for one semester. Computer Science 344M and 378 (Topic: Autonomous Multiagent Systems) may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313K, or 313H; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 362K or Statistics and Scientific Computation 321.

### **C S 344R. Robotics.**

A survey of methods and techniques important for intelligent robotics. Students work in teams, applying these methods to get intelligent behavior from physical robots. Three lecture hours a week for one semester. Computer Science 344R and 378 (Topic: Robotics) may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 362K or Statistics and Scientific Computation 321.

### **C S 345. Programming Languages.**

Survey of significant concepts underlying modern programming languages, including syntax, functions, expressions, types, polymorphism, assignment, procedures, pointers, encapsulation, classes, and inheritance, with some discussion of implementation issues. Prominent programming paradigms, such as sequential, concurrent, object-oriented, functional, and logic programming. Illustrative examples drawn from a variety of current languages. Three lecture hours a week for one semester. Computer Science 345 and 345H may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 408C, 408K, or 408N.

### **C S 345H. Programming Languages: Honors.**

A survey of significant concepts underlying modern programming languages, including syntax, functions, expressions, types, polymorphism, assignment, procedures, pointers, encapsulation, classes, and inheritance, with some discussion of implementation issues. Prominent programming paradigms, such as sequential, concurrent, object-oriented, functional, and logic programming. Illustrative examples drawn from a variety of current languages. Three lecture hours a week for one semester. Computer Science 345 and 345H may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307,

314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Mathematics 408C, 408K, or 408N; and consent of the honors director.

### **C S 346. Cryptography.**

A theoretical introduction to cryptography. Subjects include private key cryptosystems, public key cryptosystems, digital signatures, secret sharing schemes, and the necessary mathematical background. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Computer Science 331, 331H, 341, 341H, 357, or 357H; Mathematics 408C, 408K, or 408N; and credit with a grade of at least C- or registration for Mathematics 340L or Statistics and Scientific Computation 329C.

### **C S 347. Data Management.**

Concepts of database design and database system implementation. Data models, query processing, database design theory, crash recovery, concurrent control, and distributed databases. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 408C, 408K, or 408N.

### **C S 349. Contemporary Issues in Computer Science.**

An examination of social, professional, and ethical issues involved in the use of computer technology. Subjects may include software engineering ethics, computer safety and reliability, constitutional issues, intellectual property, computer crime, societal impact, emerging technologies, and philosophical issues. Three lecture hours a week for one semester. Computer Science 349 and 378 (Topic: Contemporary Issues in Computer Science) may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; and Computer Science 310, 310H, 429, or 429H.

### **C S 350C. Advanced Computer Architecture.**

Relationships between programming and hardware design, high performance and low power microarchitectures, memory system design, technology and workload constraints on design, special techniques for coding, addressing, and control, and evaluation of design alternatives will be explored. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 350C, 352, 352H. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 307, 314, 314H, 315, or 315H; and Computer Science 439 or 439H.

### **C S 350F. Operating Systems.**

Advanced coverage of core operating systems (virtual memory, file systems, scheduling), and intermediate and advanced operating systems concepts: multiprocessing, multi-core computing, linking, kernel design, virtual machines, and security. Three lecture hours a week for one semester. Only one of the following may be counted: Computer Science 350F, 372, 372H. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 307, 314, 314H, 315, or 315H; and Computer Science 439 or 439H.

### **C S 351. LISP and Symbolic Computation.**

Subjects include symbolic computation for artificial intelligence, such as pattern-matching, unification, frames, flavors, semantic networks, deductive retrieval, rule-based and constraint-based inference. Substantial programming projects in LISP. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer

Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 408C, 408K, or 408N.

### **C S 353. Theory of Computation.**

A survey of the theoretical bases of computation: computational complexity (including the classes P and NP) and formal models of the semantics of programming languages. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Computer Science 331, 331H, 341, 341H, 357, or 357H; and Mathematics 408C, 408K, or 408N.

### **C S 354. Computer Graphics.**

Introduction to techniques for human-machine communication through imagery. Subjects include display hardware, transformations, interactive techniques, geometric modeling, two- and three-dimensional display algorithms, graphics software systems architecture, and hidden-line and surface elimination. Projects are assigned and in-depth exploration is encouraged. Three lecture hours a week for one semester. Prerequisite: The following courses with a grade of at least C-: Computer Science 429 or 429H; Computer Science 105 (Topic: Computer Programming: C++), 371P, 373, or 378 (Topic: Generic Programming in the STL); Mathematics 408D, 408M, or 427L; and Mathematics 340L, 341, or Statistics and Data Sciences 329C (or Statistics and Scientific Computation 329C).

### **C S 354R. Game Technology.**

An examination of major technological components of computer games and their integration, modeling and animation, physics simulation, networking for games, interface and interaction techniques, and special effects. Three lecture hours a week for one semester. Computer Science 354R and 378 (Topic: Game Technology) may not both be counted. Offered on the letter-grade basis only. Prerequisite: Computer Science 354 with a grade of at least C-.

### **C S 354S. Game Development Capstone: Two-Dimensional Games.**

Participation in an interdisciplinary team to gain a thorough understanding of the two-dimensional game development process, through modeling of the environment and practices that are used in game studios. Three lecture hours a week for one semester. Computer Science 354S and 378 (Topic: Game Development Capstone: 2D Games) may not both be counted. Prerequisite: Computer Science 429 or 429H with a grade of at least C-, and consent of instructor.

### **C S 354T. Game Development Capstone: Three-Dimensional Games.**

Participation in interdisciplinary teams to gain a thorough understanding of the three-dimensional game development process, through modeling of the environment and practices that are used in game studios. Three lecture hours a week for one semester. Offered on the letter-grade basis only. Prerequisite: Computer Science 429 or 429H with a grade of at least C-, and consent of instructor.

### **C S 356. Computer Networks.**

Introduction to computer networks, including common terminology, basic design issues, and types of networks and protocols. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Computer Science 439, 439H, 352, 352H, 372, or 372H; and Mathematics 408C, 408K, or 408N.

### **C S 356R. Introduction to Wireless Networks.**

An introduction to basic knowledge in wireless networks ranging from the physical layer to the application layer, and across different types of wireless networks such as WiFi, cellular, and multihop networks. Three lecture hours a week for one semester. Computer Science 356R and 378 (Topic: Introduction to Wireless Networks) may not both be counted. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C-: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 408C, 408K or 408N.

### **C S 361. Introduction to Computer Security.**

An introduction to computer security, both in the abstract and in the context of real systems, including recognizing potential threats to confidentiality, integrity and availability, and developing familiarity with current security-related issues in computer science. Three lecture hours a week for one semester. Computer Science 361 and 378 (Topic: Introduction to Security) may not both be counted. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 408C, 408K, or 408N.

### **C S 361C. Information Assurance and Security.**

Selected subjects from the broad area of information assurance, including computer security, communications security, operations security, and risk assessment. Three lecture hours a week for one semester. Computer Science 361C and 378 (Topic: Information Assurance and Security) may not both be counted. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 408C, 408K, or 408N.

### **C S 361S. Network Security and Privacy.**

An examination of common computer security threats; fundamental techniques for implementing secure software systems and networks; practical experience in attacking and defending networked systems. Three lecture hours a week for one semester. Computer Science 361S and 378 (Topic: Network Security and Privacy) may not both be counted. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 310, 310H, 429, or 429H; Mathematics 408C, 408K or 408N; and two of the following courses with a grade of at least C- in each: Computer Science 346, 356, 361, 375, and 439 or 439H.

### **C S 363D. Introduction to Data Mining.**

Introduction to the topic of data mining: data preprocessing regression, classification, clustering, dimensionality reduction, association analysis and anomaly detection. Three lecture hours a week for one semester. Computer Science 363D and 378 (Topic: Introduction to Data Mining) may not both be counted. Offered on the letter-grade basis only. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Mathematics 362K or Statistics and Scientific Computation 321; and Mathematics 340L or Statistics and Scientific Computation 329C.

### **C S 367. Numerical Methods.**

Subjects include systems of linear equations, numerical integration, ordinary differential equations, and nonlinear equations. Construction and use of large numerical systems. Influence of data representation and computer architecture on algorithm choice and development. Three lecture hours a week for one semester. Only one of the following may

be counted: Computer Science 367, Mathematics 368K, Physics 329. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Mathematics 408D, 408M, or 427L; and Mathematics 340L, 341, or Statistics and Scientific Computation 329C.

### **C S 369. Systems Modeling.**

Introduction to performance modeling, with emphasis on computer systems. Modeling methodology, queueing network models, simulation, analysis of results. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; and Mathematics 362K or Statistics and Scientific Computation 321.

### **C S 370. Undergraduate Reading and Research.**

Supervised study of selected problems in computer science, by individual arrangement with supervising instructor. The equivalent of three lecture hours a week for one semester. No more than three semester hours may be counted toward a degree in computer science. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Mathematics 408C, 408K, or 408N; and consent of the undergraduate adviser.

### **C S 371D. Distributed Computing.**

Investigation of models, principles, and fundamental protocols, including event ordering and global predicate detection, atomic commit, state-machine replication, rollback recovery, primary backup, consensus for synchronous and asynchronous systems, and byzantine fault-tolerance. Three lecture hours a week for one semester. Prerequisite: The following coursework with a grade of at least C- in each: Computer Science 311, 311H, 313H, or 313K; Computer Science 307, 314, 314H, 315, or 315H; Computer Science 310, 310H, 429, or 429H; Computer Science 439, 439H, 352, 352H, 372, or 372H; and Mathematics 408C, 408K, or 408N.

### **C S 371M. Mobile Computing.**
