Catalog 2015-16

About This Bulletin

The *Bulletin* is the catalog of undergraduate courses and degrees, as well as the catalog of the Graduate School of Arts & Sciences, of Washington University in St. Louis. The catalog includes programs, degree requirements, course descriptions, pertinent university policies and faculty for students earning a degree through one of the four undergraduate schools: College of Arts & Sciences; Olin Business School; Sam Fox School of Design & Visual Arts (College of Architecture, College of Art); and School of Engineering & Applied Science. The catalog of the graduate school includes programs, degree requirements, policies and faculty of the Graduate School of Arts & Sciences.

The degree requirements and policies in the *2015-16 Bulletin* apply to students entering Washington University during the 2015-16 academic year.

The *2015-16 Bulletin* is entirely online but may be downloaded in PDF format for printing. Individual pages may be downloaded in PDF format using the "Download This Page as a PDF" option on each page. To download the full PDF, please choose one of the following:

- *Undergraduate Bulletin* (PDF)
- *Graduate School of Arts & Sciences Bulletin* (PDF)

Every effort is made to ensure that the course information, applicable policies and other materials presented in the *Bulletin* are accurate and correct. Washington University reserves the right to make changes at any time without prior notice. Therefore, the electronic version of the *Bulletin* may change from time to time without notice. The governing document at any given time is the then-current version of the *Bulletin*, as published online, and then-currently applicable policies and information are those contained in that *Bulletin*.

More information about the schools may be found by visiting their websites:

About WUSTL

Who We Are Today

Washington University in St. Louis, a medium-sized, independent university, is dedicated to challenging its faculty and students alike to seek new knowledge and greater understanding of an ever-changing, multicultural world. The university is counted among the world's leaders in teaching and research, and draws students from all 50 states, the District of Columbia, Guam, Puerto Rico and the Virgin Islands. Students and faculty come from more than 100 countries around the world.

The university offers more than 90 programs and almost 1,500 courses leading to bachelor's, master's and doctoral degrees in a broad spectrum of traditional and interdisciplinary fields, with additional opportunities for minor concentrations and individualized programs. For more information about the university, please visit: <http://wustl.edu/about/facts>.

Enrollment by School

<http://wustl.edu/about/facts/#students>

Committed to Our Students: Mission Statement

Washington University's mission is to discover and disseminate knowledge, and protect the freedom of inquiry through research, teaching and learning. Washington University creates an environment to encourage and support an ethos of wide-ranging exploration. Washington University's faculty and staff strive to enhance the lives and livelihoods of students, the people of the greater St. Louis community, the country and the world.

Our goals are:

- to welcome students, faculty and staff from all backgrounds to create an inclusive community that is welcoming, nurturing and intellectually rigorous;
- to foster excellence in our teaching, research, scholarship and service;
- to prepare students with attitudes, skills and habits of lifelong learning and leadership thereby enabling them to be productive members of a global society; and
- to be an institution that excels by its accomplishments in our home community, St. Louis, as well as in the nation and the world.

To this end we intend:

- to judge ourselves by the most exacting standards;
- to attract people of great ability from diverse backgrounds;
- to encourage faculty and students to be bold, independent and creative thinkers;

- to provide an exemplary, respectful and responsive environment for living, teaching, learning and working for present and future generations; and
- to focus on meaningful measurable results for all of our endeavors.

Teaching and Learning at Washington University

A Statement of Best Practices and Expectations

Original statement endorsed by the Undergraduate Council, November 10, 1999.

Amended statement endorsed by the Undergraduate Council, February 2, 2010.

All members of the Washington University community share responsibility for creating an atmosphere conducive to learning. A collaborative learning environment involves the active participation of both instructors and students in the classroom and in activities outside the classroom. This environment requires:

- the best effort on the part of both faculty and students to enhance the learning experience for the benefit of all persons involved;
- the recognition that all present play important roles, all participants in the learning experience deserve respect for what they bring to it, and all should be sensitive to the importance of the others in this process;
- an atmosphere in the classroom of mutual respect for all persons regardless of political, ethnic, religious, gender, sexual orientation and disability considerations.

In response to changing classroom dynamics we the Undergraduate Council make the following recommendations:

Expectations and responsibilities of the faculty: The faculty member is involved in several major roles, including those of teacher, scholar-researcher and citizen in the university. For the unimpeded performance of these functions, the faculty member is guaranteed academic freedom. At the same time, the faculty member has clear responsibilities to the students and to the institution, particularly in her or his role as teacher. Instructors should provide the basic outlines for the learning experience and provide guidance as appropriate, generally in the form of a handout or easily accessible electronic document. Such guidance should normally involve:

- the presentation of a syllabus that:
 - (A) clearly identifies the goals of the course and its prerequisites, a schedule of major assignments and examinations, explicit criteria for how student work will be evaluated;

(B) contains a clear articulation of ground rules for classroom interaction and consequences for infringement (How much active participation is expected of the student? Is attendance required? If the course meets over the lunch hour, is it acceptable to eat during class? Is it acceptable to use laptop computers in class?);

- reminding students of the university's standards for academic integrity;
- bringing new perspectives and insights to assigned readings and other text materials;
- regularly meeting class and being punctual in starting and dismissing class;
- prompt and responsible grading, with evaluative comments and opportunities for students to discuss their grades with the faculty member;
- adherence to the announced office hour schedule and offering as many avenues as possible for contact, including by telephone and email;
- the use of appropriate technology as relevant both in and outside the classroom to enhance communication between faculty and students;
- uploading course materials and sending emails in a timely manner;
- the oversight of Teaching Assistants, especially to ensure grading uniformity in large classes;
- facilitation of regular student evaluations of the faculty member's teaching methods and materials, including mid-semester evaluations, as a means of creating an atmosphere of shared responsibility within the classroom;
- when possible, avoiding prohibitive costs when ordering textbooks and other course materials, and making electronic text available;
- adhering to the published final examination schedule to avoid interfering with students' preparation for other classes.

Expectations and responsibilities of the students. Students must take responsibility for their own learning. Students also share with the instructor the responsibility for providing an environment conducive to learning. Students should personally:

- be actively engaged with the material and with the process of education;
- build their own knowledge and skills (faculty guide students to materials and methods, but the learning is up to the student);
- attend all classes, both lecture and discussion sessions, and participate in class discussions; leave class only for emergencies; use streaming video recording of lectures only for review, not as a substitute for class;
- be punctual in completing assignments;
- behave in the classroom in a manner that demonstrates respect for students and faculty;

- share responsibility for the flow of information concerning a course by regularly checking the course web page and university email;
- be familiar with and adhere to matters of academic integrity as identified by their school within the university;
- participate in objective and constructive evaluations of the instructor and of the course (this helps to clarify problems and strengths that will help the instructor to improve the course in subsequent semesters);
- conform to the rules for laptop use stated in the syllabus;
- refrain from the use of texting and cell phones.

Special student concerns. Students should take the initiative in discussing special arrangements with the instructor in a timely manner when for any reason they miss class. Students also should recognize that the collective needs of the faculty and other students in a course may outweigh individual preferences. Faculty should be sensitive to individual student needs for special arrangements:

- to accommodate disabilities, illnesses, family emergencies, or academic or professional opportunities that interfere with usual class attendance or performance;
- when students miss class because of religious holidays.

Responsibilities of the university administration. For its part, the university administration must:

- continue to provide facilities and ensure adequate classroom and laboratory space that is stocked with sufficient appropriate equipment;
- give priority to supporting both faculty and students in teaching and learning;
- be responsive when normal communications between faculty and students break down by providing for a process for discussion and negotiations;
- facilitate communications among various constituents of the university;
- facilitate the flow of visitors to the classroom by notifying faculty of such matters in a timely fashion.

Where to get help

For instructors: The departmental chair, the Teaching Center, colleagues and the relevant dean's office can offer very useful advice on teaching techniques, materials and methods.

For students: The instructor, the TAs and Cornerstone: The Center for Advanced Learning can be counted on for guidance on how best to learn; the Writing Center can be a very helpful resource for all sorts of written assignments.

The general process of a student concern is to:

1. raise it first with the faculty member,
2. go to their four-year adviser, and
3. then to the department chair.

Disagreements that have not been resolved by this process can be addressed to the ombudsperson.

Class Size

More than three-fourths of Washington University's undergraduate classes range from one to 24 students. We believe smaller classes help students learn more through stimulating group discussion. Many classes may be larger at first, but they generally become smaller as students progress in their chosen fields.

Depending on the department, classes may be smaller or larger.

Average Class Sizes by Level

Class Size	L-100	L-200	L-300	L-400
1-10	96	117	197	149
11-24	193	133	189	117
25-39	22	22	46	52
40-64	32	27	55	31
65-100	7	12	21	6
101-200	19	8	5	1
Over 200	14	3	2	0
TOTAL	383	322	515	356

University College

University College is the professional and continuing education division of Arts & Sciences and offers a wide range of courses, including online formats, in a variety of academic departments and interdisciplinary and professional areas of study. Part-time and full-time study in undergraduate degree programs, graduate degree programs, and certificate programs is available. University College operates the Summer School for both day and evening students, including a range of credit programs and noncredit institutes for high school and middle school students. University College provides career workshops for adult learners, and it is home to the Lifelong Learning Institute for senior citizens. University College sponsors special lecture series such as the Master of Liberal Arts (MLA) Saturday Lecture Series and Science Saturdays, co-sponsored with the Department of Physics. For more information, visit <http://ucollege.wustl.edu>.

Trustees & Administration

Board of Trustees

Please visit the Board of Trustees website at <http://boardoftrustees.wustl.edu>.

University Administration

In 1871, Washington University co-founder and then-Chancellor William Greenleaf Eliot sought a gift from Hudson E. Bridge, charter member of the university's Board of Directors, to endow

the chancellorship. Soon it was renamed the "Hudson E. Bridge Chancellorship."

Led by the chancellor, the officers of the university administration are detailed on the university website. Please visit <http://wustl.edu/about/leadership>.

Academic Calendar

Fall Semester 2015

Date	Day	Description
August 24	Monday	Classes begin
September 7	Monday	Labor Day holiday
October 16	Friday	Fall break
November 25	Wednesday	Thanksgiving break begins
November 29	Sunday	Thanksgiving break ends
December 4	Friday	Last day of classes
December 7	Monday	Reading days begin
December 9	Wednesday	Reading days end
December 10	Thursday	Final examinations begin
December 16	Wednesday	Final examinations end

Spring Semester 2016

Date	Day	Description
January 18	Monday	Martin Luther King Jr. holiday
January 19	Tuesday	Classes begin
March 13	Sunday	Spring break begins
March 19	Saturday	Spring break ends
April 29	Friday	Last day of classes
May 2	Monday	Reading days begin
May 4	Wednesday	Reading days end
May 5	Thursday	Final examinations begin
May 11	Wednesday	Final examinations end
May 20	Friday	Commencement

Summer Semester 2016

Date	Day	Description
May 23	Monday	First Summer Session begins
May 30	Monday	Memorial Day holiday
July 4	Monday	Independence Day holiday
August 18	Thursday	Last Summer Session ends

Washington University recognizes the individual student's choice in observing religious holidays that occur during periods when classes are scheduled. Students are encouraged to arrange with

their instructors to make up work missed as a result of religious observance, and instructors are asked to make every reasonable effort to accommodate such requests.

Campus Resources

Student Support Services

Cornerstone: The Center for Advanced Learning. Located on the first floor of Gregg Residence House on the South 40, Cornerstone is the hub of academic support at Washington University. We provide students with help in a variety of forms, including course-specific mentors, study groups, and intensive intersession review programs in gateway courses such as chemistry, physics and calculus. Other services include workshops on study skills, time management, and note-taking, as well as walk-in help desks for fundamental courses like calculus, physics and writing. Cornerstone also offers final exam work sessions and fee-based graduate and professional school entrance exam preparation courses. Additionally, Cornerstone administers TRiO, a federally funded program that offers advising, leadership development, financial assistance, and other support to students who are low-income, the first in their family to go to college, and/or have a documented disability. Take advantage of our Tech Lab, which features learning software and flexible study space, or use our classrooms and lounge to study or relax. Most services are free, and last year, more than 2,000 students participated in one or more of our programs. For more information, visit our website at <http://cornerstone.wustl.edu> or call (314) 935-5970.

Disability Resources. Cornerstone is also home to Disability Resources, the official source for students with disabilities or suspected disabilities. Students may request accommodations and services to ensure equal access to the programs and services of the university. Visit our website at <http://disability.wustl.edu> or call Cornerstone at (314) 935-5970 for more information. We are located within Cornerstone, on the first floor of Gregg Residence House on the South 40.

Office for International Students and Scholars. If a student is joining the university from a country other than the United States, this office can assist him or her through its orientation programs, by issuing certificates of eligibility (visa documents), and by offering special services for non-native English speakers in the English Language Programs. In addition, the office provides personal and cross-cultural counseling and arranges social, cultural and recreational activities that foster international understanding on campus.

The Office for International Students and Scholars is in the Stix International House at 6470 Forsyth Boulevard. For more information, visit the website at <http://oiss.wustl.edu> or call (314) 935-5910.

The Writing Center. The Writing Center, a free service, offers writing advice to all Washington University students. Tutors

will read and discuss any kind of work in progress, including student papers, senior theses, graduate school application materials, and oral presentations. The Writing Center staff is trained to work with students at any stage of the writing process, including brainstorming, developing and clarifying an argument, organizing evidence, and improving style. Rather than editing or proofreading, tutors will emphasize the process of revision and teach students how to edit their own work. Appointments are preferred. Call (314) 935-4981 to make an appointment.

The Writing Center is located on level 1 in Olin Library. For more information, visit the website at <http://writingcenter.wustl.edu>.

Research Affiliations

Washington University is affiliated with the Central Institute for the Deaf, the Donald Danforth Plant Science Center, the Missouri Botanical Garden, the Newberry Library for Medieval and Renaissance Studies in Chicago and the Saint Louis Zoo. The university also owns Tyson Research Center — 2,000 acres located 20 miles west of the campus, which houses additional facilities for biology and physics. The Sam Fox School also houses the Newman Money Museum, a numismatic center.

In addition, the university has two interdisciplinary research institutes — the Division of Biology and Biomedical Sciences and the Center for Computational Biology — plus a number of interdisciplinary research centers on the Danforth and Medical campuses.

Student Health Services

Student Health Services staff members include licensed professionals in Medical Services, Mental Health Services and Health Promotion Services. Please visit us in Dardick House on the South 40, or visit our website at <http://shs.wustl.edu> for more information about each of our services and staff members.

Hours:

Monday, Tuesday and Thursday 8 a.m.–6 p.m.

Wednesday 10 a.m.–6 p.m.

Friday 8 a.m.–5 p.m.

Saturday 9 a.m.–1 p.m.

A nurse answer line is available to answer any medical questions a student may have when SHS is closed. For after-hours care, please call: (314) 935-6666.

Medical Services staff members provide care for the evaluation and treatment of an illness or injury, preventive health care and health education, and nutrition, physical therapy, travel medicine and women's health services. Student Health Services' providers are considered in-network and are participating members of the Washington University in St. Louis Physician's Network. Any condition requiring specialized medical services will be referred to an appropriate community specialist. Student Health Services accepts most health insurance plans and will be able to bill the plan according to plan benefits when care is accessed at SHS. The student health insurance plan requires a referral any time

care is not provided at SHS. Call (314) 935-6666 or visit <http://shs.wustl.edu> to schedule an appointment for medical care, including allergy injections prescribed by your allergist, health consultations, for HIV or other STD testing, or for immunizations.

Appointments also are available for assessment, treatment and referral for students who are struggling with substance abuse.

The SHS pharmacy is available to all WUSTL students and their dependents who participate in the student health insurance plan. The pharmacy accepts most prescription insurance plans; please check with the pharmacist to see if your prescription plan is accepted at the pharmacy.

The SHS lab provides full laboratory services. Approximately 20 tests can be performed in the SHS lab. The remainder of all testing that is ordered by SHS is completed by LabCorp. LabCorp serves as our reference lab and is on the student health insurance plan as a preferred provider. The SHS lab can collect any test ordered by our providers.

All incoming students must provide proof of immunization for two measles, mumps, rubella vaccines after the age of one year old. (A titer may be provided in lieu of the immunizations.) Meningococcal vaccine proof is required. A PPD skin test in the past six months is required for students entering the university from certain countries. This list of countries may be found on our website. We suggest all students also have Tetanus Diphtheria immunization within the past five years, Hepatitis A vaccine series, Hepatitis B vaccine series and Varicella vaccine. Medical History Forms are available online at <http://shs.wustl.edu>. Failure to complete the required forms will delay registration and will prevent entrance into housing assignment. Please visit <http://shs.wustl.edu> for complete information about requirements and deadlines.

Mental Health Services staff members work with students to resolve personal and interpersonal difficulties, including conflicts with or worry about friends or family, concerns about eating or drinking patterns, and feelings of anxiety and depression. Although some concerns are more frequent than others, students' experiences are as varied as the students themselves. Staff members help each person figure out her or his own situation. Services include individual, group and couples counseling; crisis counseling; psychiatric consultation; and referral for off-campus counseling. Call (314) 935-6666 or visit <http://shs.wustl.edu> to schedule an appointment.

Health Promotion Services staff members provide information and resources on issues of interest to WUSTL students including alcohol and other drugs, weight and body image, sexual health, sleep, and stress; customize professional health education programs for groups; and work with groups of students dedicated to educating their peers about healthy decision making. Call (314) 935-7139 for more information.

Important Information About Health Insurance

Washington University has a student health fee designed to improve the health and wellness of the entire Washington University community. This fee supports health and wellness services and programs on campus. In addition, all full-time, degree-seeking Washington University students are automatically enrolled in the Student Health Insurance Plan upon completion of registration. Students may opt out of this coverage if there is proof of existing comprehensive insurance coverage. Information concerning opting out of the student health insurance plan can be found at <http://shs.wustl.edu> after June 1 of each year. Student Health Services does provide billing services to many of the major insurance companies in the United States. Specific fees and co-pays apply to students using Medical Services and Mental Health Services; these fees may be billable to your insurance plan. More information is available at <http://shs.wustl.edu>.

Campus Security

The Washington University campus is among the most attractive in the nation and enjoys a safe, relaxed atmosphere. Your personal safety and the security of your property while on campus is a shared responsibility. Washington University has made safety and security a priority through our commitment to a full-time professional police department, use of closed circuit television, card access, good lighting, shuttle services, emergency telephones and ongoing educational safety awareness programs. The vast majority of crimes that occur on college campuses are crimes of opportunity, which can be prevented.

The best protection against crime is an informed, alert campus community. Washington University has developed several programs to help make your experience here a safe and secure one. An extensive network of emergency telephones, including more than 100 "blue light" telephones, is connected directly to the University Police Department and can alert the police to your exact location. In addition to the regular shuttle service, an evening walking escort service or mobile Campus Circulator is available on the Danforth Campus.

The Campus2Home shuttle will provide a safe ride home for those living in four designated areas off campus — Skinker-DeBaliviere, Loop South, north of The Loop and just south of the campus — from 6:00 p.m. to 4:00 a.m. seven days a week. The shuttle leaves from both the Mallinckrodt Center and the Brookings Drive steps and takes passengers directly to the front doors of their buildings. Shuttle drivers then will wait and watch to make sure passengers get into their buildings safely.

The University Police Department is a full-service organization staffed by certified police officers who patrol the campus 24 hours a day throughout the entire year. The Police Department offers a variety of crime prevention programs including a high-

security bicycle lock program, free personal-safety whistles, computer security tags, personal safety classes for women and men, property inventory services and security surveys. For more information on these programs, check out the police website at <http://police.wustl.edu>.

In compliance with the Campus Crime Awareness and Security Act of 1990, Washington University publishes online an annual report, *Safety and Security on the Danforth Campus — A Guide for Students, Faculty and Staff*, which is available to all current and prospective students on the Danforth Campus and university employees on the Danforth, North and West campuses at <http://police.wustl.edu>. To request a hard copy, contact the Washington University Police Department, Campus Box 1038, One Brookings Drive, St. Louis, MO 63130-4899, (314) 935-9011.

Undergraduate Admission Procedures

Freshman Admission

The admissions committee reviews and assesses each application personally. Admission to Washington University is both selective and competitive. Students who come to Washington University have challenged themselves academically and personally during their high school years and are required to have earned a high school diploma or equivalent. A student's senior-year transcript should show that he or she continues to take demanding courses. Most applicants take advantage of honors, advanced placement and international baccalaureate courses, if offered by their high schools.

Most candidates' transcripts include:

- four years of English
- four years of mathematics (Architecture, Business and Engineering strongly recommend calculus.)
- three to four years of history or social science
- three to four years of laboratory science (Engineering strongly recommends chemistry and physics.)
- at least two years of a foreign language
- both chemistry and physics, as well as the most challenging math programs available, for students who plan to do course work in sciences and/or pre-medicine

Other important parts of a student's application:

- grades and class rank (if the student's school ranks students)
- counselor and teacher recommendations
- essay
- extracurricular and community activities

- standardized test scores (Either SAT or ACT, writing is not required. SAT Subject tests are not required. Test results from any of the student's high school years are acceptable, though we encourage senior-year testing. We consider only the highest individual scores, whenever they occurred.)

Applying for Admission

For a student's application file to be complete, we must receive the following materials by the deadline for the decision plan selected:

- Common Application including Washington University's brief supplemental questions. There is no supplemental essay.
- non-refundable \$75 fee
- All supporting materials, including the personal essay, a teacher recommendation, school report for freshman admission or dean's report for transfer admission, and official transcript.

Decision Plans

Washington University offers a binding Early Decision option, with a deadline of November 15 and notification by December 15 each year, and Regular Decision, with a deadline of January 15 and notification by April 1 each year.

If Washington University is the student's first choice, we encourage the student to apply under Early Decision. Applying under Early Decision signifies a binding commitment that the student will attend Washington University if admitted. This option requires the applicant to submit a nonrefundable enrollment deposit within two weeks of receiving a letter of admission. If admitted, the student must withdraw other applications. A student may apply only to one school under a binding Early Decision plan.

If English Is Not the Student's Primary Language

Either TOEFL (Test of English as a Foreign Language) or IELTS (International English Language Testing System) is required of all international students for whom English is a second language and recommended for U.S. citizens whose second language is English. The tests administered in December of each year will be the last ones accepted for the following admission year.

Portfolios

In addition to the standard application materials mentioned above, applicants for the College of Architecture are encouraged and applicants for the College of Art are required to submit a portfolio of their work. All College of Art students will be considered for the Conway or Proetz Scholarship in art.

Portfolios should be submitted through the SlideRoom function of the Common Application and should include 12 to 15 pieces of recent work, which may include drawings, two- and three-dimensional pieces, or photographs. (If submitting an

architecture portfolio, please do not include CAD drawings or examples of drafting skills.) The applicant may include additional information such as the title, medium, dimensions, and date completed.

Deferred Enrollment

Admitted students, who have submitted the enrollment deposit and wish to begin their studies at a later date, may defer enrollment at Washington University for a period of one year with an option to extend for one additional year. Deferred enrollment is designed for students who wish to travel or work between high school and college. Courses taken during the deferred period normally will not be accepted for credit; the final decision on transferability of credit lies with the dean's office. Deferral should be requested in writing from the Office of Undergraduate Admissions. The Committee on Admissions will review the applicant's case and notify the applicant of its decision. The applicant must reapply for financial assistance during the application cycle immediately preceding the date of desired entry.

Please visit the Admissions website at <http://admissions.wustl.edu>.

Transfer Admission

Transfer admission to Washington University is selective and competitive. The student should apply as a transfer student if he or she meets all of the following requirements:

- 1) The applicant has finished secondary school and completed some college study.
- 2) The applicant would like to be considered for admission with advanced standing at Washington University.
- 3) The applicant is interested in enrolling full-time in an undergraduate degree program with a specific academic focus.
- 4) The applicant has never attended any of Washington University's full-time, degree-granting schools.

Washington University accepts applications for transfer admission in the fall semester. For current application deadlines, please visit <http://admissions.wustl.edu/apply/Transfer-Student-Admission>. In any given year, any academic division may have from zero to a small handful of slots available. With this small number of transfer spots open, we recommend the strongest candidates for admission present proof of a high school diploma or equivalent and proof of a high level of academic success at their current institution. Successful applicants present at *least* a B+ average from a two-year or four-year college in courses across a broad academic curriculum. Some of our academic divisions require specific grades in specific courses. For example, students with interests in engineering, business, or the physical or biological sciences must present a strong background in science and mathematics including calculus. In

addition, applicants must have left their current institution and all previous institutions in good standing and be eligible to return.

If an applicant has been away from a formal academic setting for more than two years, we require the applicant to complete at least one year (30 hours) of work at another college or university before submitting an application for transfer admission.

Applicants who are in their first year of college must present at least one completed semester of full-time college work with an application for transfer admission and submit a completed Mid-Semester Progress Report.

Applicants must submit their high school transcripts, the application, official transcripts of all previous college work, standardized test scores (SAT or ACT taken during high school), a Transfer Academic Evaluation, a Transfer Registrar Report, and the nonrefundable \$75 application fee to the Office of Undergraduate Admissions. For admissions information, please visit the Admissions website at <http://admissions.wustl.edu>.

Applicants who wish to be considered for financial assistance must file the Financial Aid Profile or Washington University's Family Financial Profile (FFP) (<https://sfs.wustl.edu/Pages/Family-Financial-Profile.aspx>). Detailed information on financial support (p. 27) can be found in this *Bulletin*.

Transfer admission information for individual schools is listed as follows.

Transferring into Arts & Sciences

Each year a number of students from other colleges and universities transfer into the College of Arts & Sciences. Upon their admission the transfer student adviser reviews and evaluates their previous academic work. Full credit is normally granted for courses taken at accredited institutions provided that the university offers comparable courses and the student has completed the courses with a grade of C or better (**please note: online course work does not transfer**). In addition, transfer credit may be counted where applicable and upon approval toward major or minor requirements. Transfer students must be enrolled for at least four consecutive full-time semesters to satisfy the residency requirement. They must complete a minimum number of units at Washington University, and a minimum number of units in the College of Arts & Sciences, according to the table found under the heading "Transfer Students" on the Arts & Sciences Degree Requirements (p. 168) page of the Arts & Sciences section of this *Bulletin*.

All transfer students are assigned an academic adviser. When they declare a major, they also meet with an adviser in the major department. The full range of curricular opportunities offered through the College is open to transfer students when prerequisites are satisfied. An applicant should direct specific questions about transfer credit and course sequences at Washington University to the College of Arts & Sciences.

Transferring into Architecture

Places for transfer students are extremely limited and require strong performance in an arts and sciences curriculum, and preferably preparation in the visual arts — in particular, freehand drawing and 3-D design. If transfer applicants have taken studio courses (design, drawing and others) at other schools, their application is best accompanied by a portfolio with samples of that work. Placement into the design studio sequence is determined by portfolio review.

A transfer applicant into the College of Architecture should consult with the associate dean of students of the Sam Fox School of Design & Visual Arts as early as possible to assist in appropriate placement. It is advisable that the transfer applicant have demonstrated experience in 2-dimensional and 3-dimensional design. The applicant's previous work should parallel as closely as possible the course work outlined on the Architecture Degree Requirements (p. 63) page.

Transferring into Art

The number of studio art credits a transfer applicant has already earned, combined with an evaluation of the applicant's portfolio, determines the year and semester level at which the student is admitted. As much as possible, the studio art courses taken at other institutions should correspond to the program at Washington University as outlined on the Art Degree Requirements (p. 121) page.

Portfolio Requirements

1. Applicants submit a digital portfolio, consisting of 12 to 15 pieces of recent work, which may include drawings, 2- and 3-dimensional pieces, or photographs. If preferred, the applicant may include additional information such as title of work, medium, dimension and date completed. Include examples of work from basic drawing and design classes that indicate the applicant's technical and conceptual level of accomplishment — some drawing should be from direct observation. If possible, submit good examples of work in different media to demonstrate a range of art experiences. If applying to the second-year level, some of the work should be in the area of the applicant's intended major.

Portfolio Instructions

1. Portfolios should be submitted through the Slideroom function of the Common Application.
2. Original work can be presented only during a meeting with the associate dean of students in the Sam Fox School.
3. To assist in appropriate placement, an interview with the associate dean of students, while not required, is strongly recommended. The applicant should plan to bring a transcript to the meeting.

Transferring into Business

The Olin Business School offers transfer enrollment in the fall semester. The strongest candidates for admission present a strong academic performance from a two-year or four-year college that mirrors most of our academic requirements for our students at the freshman and sophomore levels. For a sophomore transfer candidate, this would include microeconomics and an equivalent to Calculus II at the college level. For a junior-level transfer candidate, this also would include financial accounting, macroeconomics and perhaps managerial accounting. All transfers to the Olin School must have completed an equivalent to Calculus II at the college level. Students who are admitted to the Olin Business School should expect a written course evaluation from the transfer student adviser within two weeks of receiving their acceptance letter, indicating which courses will be accepted by the Olin School. A maximum of 60 credits will be accepted toward our undergraduate degree. Students must earn at least a C grade in the course for the units to transfer to Washington University. Courses taken online are not accepted as transfer credit. Grades will not transfer to Washington University.

All transfer students are assigned an academic adviser. Transfer students must be enrolled for at least four consecutive full-time semesters to satisfy the residency requirement.

Please see the Degree Requirements (p. 154) for the Bachelor of Science in Business Administration degree.

Transferring into Engineering

Applicants may apply for admission if they have completed a minimum of one year of college work elsewhere. The transfer applicant must demonstrate academic achievement (grade average of B+ or better) with strength in mathematics (calculus) and science (chemistry/physics). Transfer applicants to the School of Engineering & Applied Science should have completed one semester of an English composition course, two semesters of calculus-based physics and sufficient calculus (typically three semesters) to be prepared to take differential equations. Applicants interested in biomedical or chemical engineering also should have completed sufficient chemistry to be prepared to take organic chemistry. Applicants interested in biomedical engineering should have completed an introductory biology sequence on cellular, molecular and developmental biology and genetics. After completing the application process, an evaluation of the applicant's record will be made to determine the transferability of college credit. Grades earned do not transfer, but the applicant must earn a letter grade of C or better for the course credit to transfer. For English composition, a letter grade of B or better is required for the course credit to transfer. Courses taken pass/fail do not transfer.

To be recommended for any bachelor's degree, a transfer applicant must satisfy applicable requirements of the School of Engineering & Applied Science shown under Degree

Requirements (p. 816). Please note that all students earning an undergraduate engineering degree are required to complete a minimum of 60 course units at Washington University.

Pre-matriculation Units

Pre-matriculation units of credit are earned before an applicant's enrollment at Washington University as a first-year student, which can be applied toward a Washington University degree. A maximum of 15 units of pre-matriculation credit may be counted toward any undergraduate degree. These units will count toward graduation but will not meet general education requirements. Sources for pre-matriculation units of credit include Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels, course credit earned by proficiency (e.g., back credit), and college credit earned after the student's junior year in high school. Credits earned via the High School Summer Scholars or High School College Access programs through University College are considered to be pre-matriculation units and are subject to the same regulations.

A student in the College of Arts & Sciences may be awarded up to 15 units of credit from all sources — standardized placement tests and college course work — that were completed prior to enrollment as a first-year student at Washington University. The units of credit awarded from these sources do not apply toward the distribution requirements.

A student earning the Bachelor of Science in Business Administration (BSBA) may apply a maximum of 15 pre-matriculation units to the BSBA degree. The units of credit awarded from these sources do not apply toward the distribution requirements. A transcript notation is made of all pre-matriculation units earned before enrollment in Washington University.

A student in the College of Art may apply a maximum of 15 pre-matriculation units to the Bachelor of Fine Arts (BFA) degree. The units of credit awarded from these sources do not apply toward graduation requirements. A transcript notation is made of all pre-matriculation units earned before enrollment in Washington University.

A student should submit official score reports from AP examinations, College Board Achievement and Aptitude Tests, the International Baccalaureate (higher-level scores) and British A-Level examinations. All appropriate test scores will have course equivalents assigned to them and noted on the transcript. However, a maximum of 15 units of credit will be awarded provided credit has not been already designated as the result of college course work having been transferred as well.

Grades for courses taken at another college or university do not transfer. A maximum of 15 units of credit may be awarded for college course work done prior to matriculation provided no other pre-matriculation credits have been awarded. In the College of Arts & Sciences, Olin Business School, and School of Engineering & Applied Science, course work completed at

another college or university prior to matriculation must meet the following standards:

1. Enrolled in primarily by matriculated college students
2. Taught by college faculty
3. Taught on a college campus
4. Taken after the junior year in high school
5. The course is not on the high school transcript and did not count toward the high school diploma.
6. The course was taken at a fully accredited college or university.

Secondary School Course Work

Washington University does not recognize credit for courses taken in high schools and taught by secondary instructors, even when offered under the aegis of a university. The university accepts credit for courses taken at and taught by faculty of a college or university, provided the course has not been credited toward the high school diploma.

The College of Arts & Sciences accepts credit only for college course work taken after the junior year of high school.

Proficiency and Placement Examinations

Superior results on proficiency and placement examinations allow students to enter advanced courses at the beginning of their college career, to fulfill some requirements for a major or a minor by examination rather than by course work, and to earn credit toward their degree. Students will have all accepted pre-matriculation work noted on their transcript so they may go directly into advanced courses.

Four types of examinations are recognized:

Washington University Placement Examinations. These placement examinations are administered by various departments and have different requirements for advanced placement.

International Baccalaureate. Students who have earned the International Baccalaureate diploma, or have successfully passed examinations in the program, should consult a dean in their undergraduate division of the university about advanced placement and credit. Scores may be used for placement or granting of degree credit, according to the recommendations of the various departments. Subsidiary-level scores are not recognized.

British Advanced (A) Levels. These grades may be used for placement or granting of degree credit, according to the recommendations of the various departments.

Advanced Placement (AP) Examinations. These are used for placement, partial fulfillment of major or minor requirements, and the granting of degree credit, according to the

recommendations of the various departments. Examinations are given by the College Board in May of each year for secondary school students who have been enrolled in a college-level course in the same subject or subjects of the exam. For the most current policy information, visit the website: http://college.artsci.wustl.edu/policies/placement_credit/ap.

Information about these exams may be obtained from the College Board Advanced Placement Examinations, Box 592, Princeton, NJ 08540 or by calling (888) 225-5427.

SAT Subject Tests. These examinations in modern languages are administered by the College Board. They are required for study in certain languages.

College Level Examination Program (CLEP) scores are not accepted for credit or placement.

Washington University Placement Examinations (Back Credit)

EAST ASIAN LANGUAGES

Credit is typically awarded for completing the following courses with a grade of B– or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required.

Chinese

Chinese 211 = 3 units for Chinese 102D
Chinese 360 = 3 units for Chinese 102D and 3 units for Chinese 212

Japanese

Japan 213 = 3 units for Japan 104D
Japan 412 = 3 units for Japan 104D and 3 units for Japan 214

Korean

Korean 217 = 3 units for Korean 118D
Korean 417 = 3 units for Korean 118D and 3 units for Korean 218

FRENCH (L34)

Credit is awarded for the following courses with a grade B or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required. No back credit is awarded for 102 or 301.

French 201D = 3 units for French 102D
French 307D = 3 units for French 201D and 3 units for French 102D
French 308D = 3 units for French 307D and 3 units for French 201D (credit awarded for placement, completion of the course is not required)

GERMANIC LANGUAGES AND LITERATURES (L21)

Students receive the following back credit after successfully completing these courses with a grade of B– or better.

German 210D = 3 units for German 102D
German 301D = 3 units for German 102D and 3 units for German 210D
German 302D = 3 units for German 102D and 3 units for German 210D

GREEK (L09)

Students may be awarded 6 back credits upon completion of a Greek class at the 300 level or above with a grade of B or better.

ITALIAN (L36)

Credit is awarded for the following courses with a grade B or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required. No back credit is awarded for Ital 102 or Ital 301.

Ital 201D = 3 units for Ital 102D
Ital 307D = 3 units for Ital 201D and 3 units for Ital 102D
Ital 308D = 3 units for Ital 307D and 3 units for Ital 201D (credit awarded for placement, completion of the course is not required)

JEWISH, ISLAMIC AND NEAR EASTERN LANGUAGES

Credit is typically awarded for completing the following courses with a grade of B– or better. Native speakers are not eligible for back credit. Evidence of secondary or post-secondary study of the language is required.

Arabic

Arab 207D = 3 units for Arab 108D
Arab 307D = 3 units for Arab 108D and 3 units for Arab 208D

Hebrew

HBRW 213D or HBRW 214D = 3 units for HBRW 106D
HBRW 320D or 322 = 3 units for HBRW 106D and 3 units for HBRW 214D
HBRW 384 or 385 = 3 units for HBRW 106D and 3 for HBRW 214D
HBRW 4010 or HBRW 402 = 3 units for HBRW 214D and 3 units for HBRW 322D

Hindi

Hindi 201 = 3 units for Hindi 111D
Hindi 301 = 3 units for Hindi 111D and 3 units for Hindi 201

LATIN (L10)

Students may be awarded 6 back credits upon completion of a Latin class at the 300 level or above with a grade of B or better. Placement in the appropriate course is determined by examination.

MATHEMATICS (L24)

If a student completes one of the following courses with a grade of C+ or better at Washington University, then he or she is eligible for back credit. Credit is not awarded twice for transfer or AP scores.

Math 132 = 3 units for Math 131
Math 233 = 3 units for Math 131 and 3 units for Math 132
All Other Courses = no credit

RUSSIAN (L39)

Students can receive back credit for up to 6 credits contingent upon successfully completion (C+ or higher) of the next level.

Russ 404, Russ 405 or Russ 431, Russ 432 = 3 units for Russ 322 and 3 units for Russ 324
Russ 322, 324 = 3 units for Russ 211 and 3 units for Russ 212
Russ 211, 212 = 5 credits for Russ 102
Russ 102 = 5 credits for Russ 101

SPANISH (L38)

Credit is awarded for the following courses with a grade B or better. Native speakers are not eligible for back credit, so evidence of secondary or post-secondary study of the language is required. No back credit is awarded for Span 101 or Span 223.

Span 201E = 3 units for Span 102D

Span 202 = 3 units for Span 201E and 3 units for Span 102D
Span 307D* = 3 units for Span 202 and 3 units for Span 201E
Span 308E = 3 units for Span 307D* and 3 units for Span 202 (credit awarded for placement, completion of the course is not required)

*Back credit for Span 307D can only be used for elective credit; it cannot be used toward a Spanish major or minor.

International Baccalaureate

BIOLOGY (L41)

Grade 7, 6: 6 units of credit for Biol 100A (elective credit). Students who plan to major in Biology or who are pre-med normally will enroll in Biol 2960 in the spring of freshman year and Biol 2970 in the fall of sophomore year.

Grade 5, 4, 3, 2, 1: No credit given.

BUSINESS/ORGANIZATION

No credit given.

CHEMISTRY (L07)

Those students who receive a 6 or 7 on the IB test in Chemistry will receive 3 units each of Chem 103 and 104. Receipt of these credits has no bearing on fulfillment of chemistry requirements for pre-medicine or any science major and cannot be used to satisfy prerequisites for Organic Chemistry. All students who wish to pursue a major or a pre-professional preparatory curriculum requiring general chemistry must take Chem 111A and Chem 112A and the associated labs, Chem 151 and Chem 152. Students who wish to exempt either the first or second semester of general chemistry, including the labs, must pass a placement exam administered by the Department of Chemistry during the first week of classes in the fall.

Grade 7, 6: 6 units of credit: 3 units each of Chem 103 and 104. These units do not replace Chem 111A or Chem 112A. Chem 112A must be completed prior to registration in Chem 261 or Chem 401 or any advanced courses in Chemistry.

Grade 5, 4, 3, 2, 1: No credit given.

CLASSICAL GREEK (L09)

No credit awarded. Placement determined by departmental examination. Students who place into Greek 317C may be awarded 6 back credits upon completion of Greek 317C with a grade of B or better.

COMPUTER SCIENCE (E81)

No credit given but a student can take the CSE 131 placement exam. Contact the CSE office at (314) 935-6160 for more information.

ECONOMICS (L11)

Grade 7: 3 units of undergraduate general degree credit, contingent upon completion of Econ 4011 with a grade of B or better. The credit will not count toward the Economics major/minor. Placement into any economics course is permitted (assuming other prerequisites are met); however, bypassing introductory courses may be disadvantageous, and students are strongly encouraged to consult with the department's Academic Coordinator. Bypassing Econ 1011 and/or Econ 1021 requires the completion of additional economics elective credit for the major/minor.

Grade 6, 5, 4, 3, 2, 1: No credit given. Not recommended to bypass Econ 1011 or Econ 1021.

ENGLISH LITERATURE (L14) and WRITING (L13)

Grade 7: 3 units of elective credit (E Comp 0001) contingent upon completing WRIT 100 with a grade of B or better. Please note, no credit is given for Writing or Literature courses.

Grade 6, 5, 4, 3, 2, 1: No credit given.

FRENCH (L34)

No credit awarded. Need to take the departmental placement exam. Students who place into and complete higher-level courses can earn up to 6 units of back credit for preceding courses.

GEOGRAPHY

No credit awarded.

GERMAN A1, GERMAN B (MODERN FOREIGN LANGUAGES) (L21)

Students should take the departmental placement exam. Students who place into and complete these courses with a B- or better will receive the following credit:

German 210D – 3 units for German 102D

German 301D – 3 units for German 102D, and 3 units for German 210D
German 302D – 3 units for German 102D, and 3 units for German 210D

GREEK (L09)

Students may be awarded 6 units of back credit upon completion of a Greek L09 course at the 300 level or above with a grade of a B or better.

HISTORY (L22)

American History

No credit awarded.

European History

No credit awarded.

African History

No credit awarded.

Islamic World History

No credit awarded.

South and Southeast Asia History

No credit awarded.

South Asia and Middle East History

No credit awarded.

ITALIAN (L36)

No credit awarded. Need to take the departmental placement exam. Students who place into and complete higher-level courses can earn up to 6 units of back credit for preceding courses.

LATIN (L10)

Students who place into Latin 301 or above may be awarded 6 units of back credit upon completion of the course with a grade of B or better. Placement at the appropriate level is determined by departmental examination.

MATHEMATICS (L24)

Grade 7, 6: 3 units of credit for Math 131.

Grade 5, 4, 3, 2, 1: No credit awarded.

MUSIC (L27)

Grade 7, 6: 3 units of elective credit for students who do not major or minor in music.

Grade 5, 4, 3, 2, 1: No credit awarded

NORWEGIAN

No credit awarded.

PHILOSOPHY (L30)

Grade 7, 6: 3 units of credit for Phil 125C.

Grade 5, 4, 3, 2, 1: No credit awarded

PHYSICS (L31)

Physics HL: Grade 7: 6 units of credit for Physics 113A and 114A

Grade 6, 5: 3 units of credit for Physics 113A

Grade 4, 3, 2, 1: No credit awarded.

Physics EE: No credit awarded.

PSYCHOLOGY (L33)

Grade 7, 6: Waives the Psych 100B Introduction to Psychology requirement, but no college credit given.

SOCIAL ANTHROPOLOGY (L48)

Credit is evaluated on an individual basis by the Anthropology department.

SPANISH (L38)

No credit awarded. Need to take the departmental placement exam. Students who place into and complete higher-level courses can earn up to 6 units of back credit for preceding courses.

VISUAL/STUDIO ARTS (F20)

Grade 7: 3 units of elective credit

Grade 6, 5, 4, 3, 2, 1: No credit given.

British A-Level

ACCOUNTING (B50)

Advanced Level grades of A, B, C & D to be awarded 3 units of credit for ACCT 2610.

ARABIC (L49)

Please see departmental advanced placement policy (Jewish, Islamic and Near Eastern Languages and Cultures (p. 252)) for more information.

BIOLOGY (L41)

Grades of A or B to be awarded 3 units of credit equivalent to Biol 100A.

BUSINESS STUDIES (B53)

Advanced Level grades of A, B, C & D to be awarded 3 units of management elective credit (B53 0001).

CHEMISTRY (L07)

A grade of A to be awarded 3 units each for the following courses: Chem 103 and Chem 104. A grade of B to be awarded 3 units for the following course: Chem 103.

COMPUTER SCIENCE (E81)

No credit given but a student can take the CSE 131 placement exam. Contact the CSE office at (314) 935-6160 for more information.

ECONOMICS (L11)

3 units of undergraduate general degree credit for students with a grade (on the A-level exam) of A, contingent upon completion of Econ 4011 with a grade of B or better. The credit will not count toward the Economics major/minor. Placement into any economics course is permitted (assuming other prerequisites are met); however, bypassing introductory courses may be disadvantageous, and students are strongly encouraged to consult with the department's Academic Coordinator. Bypassing Econ 1011 and/or Econ 1021 requires the completion of additional economics elective credit for the major/minor.

FRENCH (L34)

A grade of A to be awarded 3 units for French 102D and 3 units of French 201D, with 3 additional units to be awarded contingent upon successful completion of a 300-level course (other than conversation). A grade of B to be awarded 3 units upon successful completion of a 300-level course.

GERMAN (L21)

Student should take the departmental placement exam. Students who place into and complete these courses with a B- or better will receive the following credit:

German 210D = 3 units for German 102D

German 301D = 3 units for German 102D, and 3 units for German 210D

German 302D = 3 units for German 102D, and 3 units for German 210D

GREEK (L09)

Students may be awarded 6 units of back credit upon completion of a Greek (L09) course at the 300 level or above with the grade of a B or better.

HISTORY (L22)

Grades of A or B to be awarded 3 units of elective credit.

LATIN (L10)

Students who place into Latin 301 or above may be awarded 6 units of back credit upon completion of the course with the grade of a B or better. Placement at the appropriate level is determined by departmental examination.

MATHEMATICS (L24)

Advanced level grades of A and B will be awarded 3 units of credit for Math 131 automatically. An Advanced Level grade of C will only receive credit for Math 131 upon successful completion of Math 132 with a grade of C+ or better at Washington University.

MATHEMATICS (Further) (L24)

Advanced Level grades of A and B will be awarded 6 units of credit for Math 131 and Math 132 automatically. An Advanced Level grade of C will only receive credit for Math 131–132 upon successful completion of Math 233, with a grade of C+ or better at Washington University (or credit for Math 131 will be given for completion of Math 132). This course essentially covers all the material in Math 131–132 together with some extra physics and probability statistics.

MUSIC (L27)

A grade of A to be awarded 3 units each for the following courses: Music 102E, Music 103E, Music 104E. A grade of B to be awarded 3 units each for the following courses: Music 101E and Music 102E.

PHYSICS (L31)

A grade of A on the physics A-level exam will earn 3 units of credit for Physics 113A and 3 units of credit for Physics 114A. A grade of B on the physics A-level exam will earn 3 units of credit for Physics 113A.

PSYCHOLOGY (L33)

No credit given.

SPANISH (L38)

Credit is awarded for the following courses with a grade of a B or better. Native speakers are not eligible for back credit, or secondary or post-secondary study of the language is required. No back credit is awarded for Spanish 101 or Span 223.

Span 201E = 3 units for Span 102D

Span 202 = 3 units for Span 201E and 3 units for Span 102D

Span 307D = 3 units for Span 202 and 3 units for Span 201E

Span 308E = 3 units for Span 307D* and 3 units for Span 202 (credit awarded for placement, completion of the course is not required)

*Back credit for Spanish 307D can only be used for elective credit; it cannot be used toward a Spanish major or minor.

WRITING (L13)

No credit or placement given.

Advanced Placement

ART HISTORY (L01) — Test: AHS

Grade 5, 4: 3 units of elective credit (Art-Arch 0001) contingent upon the completion of a 300- or 400-level Art History course with a grade of B or better. Students in the Sam Fox School must complete Art-Arch 113.

Grade 3, 2, 1: No credit given.

BIOLOGY (L41) — Test: BIO

Grade 5, 4: 6 units of credit for Biol 100A (elective credit). Students who plan to major in Biology or who are pre-medicine normally will enroll in Biol 2960 in the spring of freshman year and Biol 2970 in the fall of sophomore year.

Grade 3, 2, 1: No credit given.

CHEMISTRY (L07) — Test: CHE

Those students who receive a 5 on the AP test in Chemistry will receive 3 units each of Chem 103 and 104. Those students who receive a 4 receive 3 units of Chem 103. Receipt of these credits has no bearing on fulfillment of chemistry requirements for pre-medicine or any science major and cannot be used to satisfy prerequisites for Organic Chemistry. All students who wish to pursue a major or a pre-professional preparatory curriculum requiring general chemistry must take Chem 111A and Chem 112A and the associated labs, Chem 151 and Chem 152. Students who wish to exempt either the first or second semester of general chemistry, including the labs, must pass a placement exam administered by the Department of Chemistry during the first week of classes in the fall.

Grade 5: 6 units of credit: 3 units each of Chem 103 and 104. These units do not replace Chem 111A or 112A. Chem 112A must be completed prior to registration in Chem 261 or Chem 401 or any advanced courses in Chemistry.

Grade 4: 3 units of Chem 103. These units do not replace Chem 111A or 112A.

Grade 3, 2, 1: No credit given.

COMPUTER SCIENCE (E81) — A TEST

Grade 5, 4: 3 units of credit for CSE 131, only if the student passes the CSE 131 placement exam.

Grade 3, 2, 1: No credit given but a student can take the CSE 131 placement exam.

ECONOMICS-MICRO (L11) — Test: EMI

For students entering Summer 2012 or later:

Grade 5: 3 units of undergraduate general degree credit, contingent upon completion of Econ 4011 with a grade of B or better. The credit will not count toward the Economics major/minor. Placement into any economics course having an Econ 1011 prerequisite is permitted; however, bypassing introductory courses may be disadvantageous, and students are encouraged to consult with the department's Academic Coordinator. Bypassing Econ 1011 requires the completion of additional economics elective credit for the major/minor.

Grade 4, 3, 2, 1: No credit given. Not recommended to bypass Econ 1011.

ECONOMICS-MACRO (L11) — Test: EMA

Grade 5: 3 units of undergraduate general degree credit, contingent upon completion of Econ 4021 with a grade of B or better. The credit will not count toward the Economics major/minor. Placement into any economics course having an Econ 1021 prerequisite is permitted (assuming other prerequisites are met); however, bypassing introductory courses may be disadvantageous, and students are encouraged to consult with the department's Academic Coordinator. Bypassing Econ 1021 requires the completion of additional economics elective credit for the major/minor.

Grade 4, 3, 2, 1: No credit given. Not recommended to bypass Econ 1021.

ENGLISH LITERATURE (L14) AND WRITING (L13) — Test: ENG

Grade 5: 3 credits of elective credit (E Comp 0001) contingent upon completing WRIT 100 with a grade of B or better. Please note, no credit is given for writing or literature courses.

Grade 4, 3, 2, 1: No credit given.

FRENCH LANGUAGE (L34) — Test: LNF

To receive Advanced Placement credit in French for a score of 3 or 4, the student must complete a 300-level course with a grade of B or better.

Grade 5: 6 units of credit equivalent to French 102D and French 201D. Students may enroll in a 300-level course conducted in the language.

Grade 4: Automatically grants 3 credits for French 102D, and gives another 3 extra credits for French 201D contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.

Grade 3: 6 units of credit equivalent to French 102D and French 201D, contingent upon completion of a 300-level course with a grade of B or better — other than conversation — conducted in the language.

Grade 2, 1: No credit given.

FRENCH LITERATURE (L34) — Test: LNF

To receive Advanced Placement credit in French for a score of 3 or 4, students must complete a 300-level course with a grade of B or better.

Grade 5: 6 units of credit equivalent to French 102D and French 201D. Students may enroll in a 300-level course conducted in the language.

Grade 4: Automatically grants 3 credits for French 102D, and gives another 3 extra credits for French 201D contingent upon satisfactory completion of a 300-level course with a B or better — other than conversation — conducted in the language.

Grade 3: 6 units of credit equivalent to French 102D and French 201D, contingent upon completion of a 300-level

course with a grade of B or better — other than conversation — conducted in the language.

Grade 2, 1: No credit given.

GERMAN (L21) — Test: LNG

Grade 5: 3 units of credit for German 102D and 3 units for German 210D awarded automatically; students may enroll in a 300-level course: German 301D, German 302D, German 313, German 340C (German Literature and the Modern Era and German Tutorial).

Grade 4: 3 units of credit for German 102D awarded automatically; an additional 3 units of credit* for German 210D awarded upon satisfactory completion of German 301D (B– or better). *Please note: Students may receive this credit only if they start their language study at the 300 level.

Grade 3: 3 units of credit for German 102D* and 3 units for German 210D, awarded upon satisfactory completion of German 301D (B– or better). *Please note: Students may receive this credit only if they start their language study at the 300 level.

Grade 2, 1: No credit given. Should take departmental placement exam.

HISTORY (L22)

American History — Test: HSA

(A grade of 5 on the AP exam can fulfill Introductory Course requirements for the History major and minor.) (L22)

Grade 5: 3 units of credit for History 163.

Grade 4: 3 units of elective credit for History 0001.

Grade 3, 2, 1: No credit given.

European History — Test: HSE (A grade of 5 on the AP exam can fulfill Introductory Course requirements for the History major and minor.) (L22)

Grade 5: 3 units of credit for History 102.

Grade 4: 3 units of elective credit for History 0001.

Grade 3, 2, 1: No credit given.

World History — Test: HSW (A grade of 5 on the AP exam can fulfill Introductory Course requirements for the History major and minor.) (L22)

Grade 5: 3 units of credit for History 164.

Grade 4: 3 units of elective credit for History 0001.

Grade 3, 2, 1: No credit given.

LATIN (L10) — Test: LNL

Grade 5, 4: 3 units of credit for Latin 101D and 3 units of credit for Latin 102D upon completion of Latin 301 or higher with

a grade of B or better. Placement at the appropriate level is determined by departmental examination.

Grade 3, 2, 1: No credit or placement given. Placement at the appropriate level is determined by departmental examination.

MATHEMATICS (L24) — Test: MAB

The Mathematics Department gives a placement exam, available online and also during the fall orientation period. We ask that all entering students planning to enroll in a calculus course (except those with an AP score of 4 or 5) take the placement exam. Only an AP score of 5 receives automatic credit.

Grade 5: 3 units of credit for Math 131. The student will be placed into Math 132.

Grade 4: The student will probably be placed into Math 132.

Grade 3: Students with scores of less than 4 should consult with their advisers about placement based on the Math Department Placement Test, SAT scores and high school record. It will be helpful to the adviser if the student brings the title and the author's name of the calculus book used in high school and a photocopy of its table of contents, indicating which chapters were covered.

Grade 2, 1: Students will be placed into Math 131.

MATHEMATICS (L24) — Test: MBC

The Mathematics Department gives a placement exam, available online and also during the fall orientation period. We ask that all entering students planning to enroll in a calculus course (except those with an AP score of 4 or 5) take the placement exam. Only an AP score of 5 receives automatic credit.

Grade 5: 3 units of credit for Math 131 and 3 units of credit for Math 132. The student will be placed into Math 233. *An AB Subscore of 5 will earn 3 units of credit for Math 131.

Grade 4: The student probably will be placed into Math 233.

Grade 3: Students with scores of less than 4 should consult with their advisers about placement based on the Math Department Placement Test, SAT scores and high school record. It will be helpful to the adviser if the student brings the title and the author's name of the calculus book used in high school and a photocopy of its table of contents, indicating which chapters were covered.

Grade 2, 1: Students will be placed into Math 132.

**Any student entering the Calculus 131–132–233 sequence can receive AP credit for earlier courses in this sequence by successful completion, with a grade of C+ or better at Washington University, of the next course in the sequence. In all cases, this assumes that the student does not already have credit for the preceding courses (for example, by transfer from another college or university).

MUSIC LITERATURE/LISTENING (L27) — Test: MUL

Grade 5: 3 units of elective credit for Music 0001.

Grade 4: 3 units of elective credit for Music 0001.

Grade 3, 2, 1: No credit given.

MUSIC THEORY (L27) — Test: MUT

Grade 5: 3 units of elective credit for Music 0001.

Grade 4: 3 units of elective credit for Music 0001.

Grade 3, 2, 1: No credit given.

PHYSICS (L31)

Physics 1 Test — Test: P1

Grade 5: 3 units of elective credit for Physics 113A. This corresponds to the first semester in a two semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 117A or Physics 197 in the fall semester.

Grade 4, 3, 2, 1: No credit or placement given.

Physics 2 Test — Test: P2

Grade 5: 3 units of elective credit for Physics 114A. This corresponds to the second semester in a two semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 118A or Physics 198 in the spring semester.

Grade 4, 3, 2, 1: No credit or placement given.

C Test (Mechanics) — Test: PCM

Grade 5: 4 units of credit for Physics 117. This corresponds to the first semester in a two-semester, calculus-based introductory physics sequence. Students may enroll in Physics 118, the second semester of this introductory calculus-based physics sequence, in the spring semester. Physics majors and students interested in an advanced treatment of introductory physics should enroll in Physics 197 in the fall semester, followed by Physics 198 in the spring semester. Students may not enroll in Physics 198 without first taking Physics 197.

Grade 4: 3 units of elective credit for Physics 113A. This corresponds to the first semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 117 or Physics 197 in the fall semester. Students who plan to major in physics or who have a strong interest in physics are encouraged to enroll in Physics 197.

Grade 3, 2, 1: No credit given.

C Test (Electricity and Magnetism) — Test: PCE

Grade 5: 4 units of credit for Physics 118. This corresponds to the second semester in a two-semester, calculus-based introductory physics sequence. Physics majors and students interested in an advanced treatment of introductory physics

should enroll in Physics 197 in the fall semester, followed by Physics 198 in the spring semester.

Grade 4: 3 units of elective credit for Physics 114A. This corresponds to the second semester in a two-semester, algebra-based introductory physics sequence. Students who require calculus-based physics for course or major requirements should enroll in Physics 117 or Physics 197 in the fall semester.

Grade 3, 2, 1: No credit given.

POLITICAL SCIENCE (L32)

American Politics — Test: POA

Grade 5, 4: 3 units of undergraduate credit, contingent upon completion of an advanced course (300-/400-level) in American Politics with a grade of B or better. The credit will not count toward the Political Science major/minor, but waives the Pol Sci 101B requirement.

Grade 3, 2, 1: No credit given.

Comparative Politics — Test: POC

Grade 5, 4: 3 units of undergraduate credit, contingent upon completion of an advanced course (300-/400-level) in Comparative Politics with a grade of B or better. The credit will not count toward the Political Science major/minor, but waives the Pol Sci 102B requirement.

Grade 3, 2, 1: No credit given.

PSYCHOLOGY (L33)

Grade 5: Waives the Psych 100B Introduction to Psychology requirement, but no college credit given.

Grade 4, 3, 2, 1: No credit or placement given.

SPANISH LANGUAGE (L38) — Test: LNS

All students wishing to enroll in Spanish must take the online placement exam. Class placement is decided solely on the basis of this exam and not by AP scores.

SPANISH LITERATURE (L38) — Test: LNS

All students wishing to enroll in Spanish must take the online placement exam. Class placement is decided solely on the basis of this exam and not by AP scores.

STATISTICS (L24) — Test: STA

Grade 5: Students with a 5 on the AP Statistics Exam will receive 3 units of credit for Math 2200.

Grade 4, 3, 2, 1: No credit given.

STUDIO 2-D DESIGN (F20) — Test: A2D

Grade 5: 3 units of elective credit for Fine Arts 0001.

Grade 4, 3, 2, 1: No credit given.

STUDIO 3-D DESIGN (F20) — Test: A3D

Grade 5: 3 units of elective credit for Fine Arts 0001.

Grade 4, 3, 2, 1: No credit given.

STUDIO DRAWING (F20) — Test: DRW

Grade 5: 3 units of elective credit for Fine Arts 0001.

Grade 4, 3, 2, 1: No credit given.

University Policies

Washington University has various policies and procedures that govern our faculty, staff and students. Highlighted below are several key policies of the university, with which you should be familiar. Web links to key policies and procedures are available on the University Registrar's website at <http://registrar.wustl.edu> and on the university's Compliance and Policies page, available at <http://wustl.edu/policies>. Please note that the policies identified on these websites and in this *Bulletin* do not represent an entire repository of university policies, as schools, offices and departments may implement policies that are not listed. In addition, policies may be amended throughout the year.

Non-Discrimination Statement

Washington University encourages and gives full consideration to all applicants for admission, financial aid and employment. The university does not discriminate in access to, or treatment or employment in, its programs and activities on the basis of race, color, age, religion, sex, sexual orientation, gender identity or expression, national origin, veteran status, disability or genetic information. Applicants with a prior criminal history will not be automatically disqualified from consideration for admission. Inquiries about compliance should be addressed to the university's Vice Chancellor for Human Resources, Washington University in St. Louis, Campus Box 1184, One Brookings Drive, St. Louis, MO 63130.

Policy on Discrimination and Discriminatory Harassment

Washington University is committed to having a positive learning and working environment for its students, faculty and staff. University policy prohibits discrimination on the basis of race, color, age, religion, gender, sexual orientation, gender identity or expression, national origin, veteran status, disability or genetic information. Harassment based on any of these classifications is a form of discrimination and violates university policy and will not be tolerated. In some circumstances such discriminatory harassment may also violate federal, state or local law. A copy of the Policy on Discrimination and Discriminatory Harassment is available on the Human Resources website.

Sexual Harassment

Sexual harassment is a form of discrimination that violates university policy and will not be tolerated. It is also illegal under state and federal law. Title IX of the Education Amendments of

1972 prohibits discrimination based on sex (including sexual harassment and sexual violence) in the university's educational programs and activities. Title IX also prohibits retaliation for asserting claims of sex discrimination. The university has designated the Title IX Coordinator identified below to coordinate its compliance with and response to inquiries concerning Title IX. You may also submit a complaint or inquiry regarding Title IX by contacting the United States Department of Education's Office of Civil Rights at 400 Maryland Avenue, SW, Washington, DC 20202-1100 or by visiting <http://ed.gov> or calling (800) 421-3481. A copy of the Policy on Sexual Harassment (<http://hr.wustl.edu/policies/Pages/SexualHarassment.aspx>) is available on the Human Resources website.

For more information or to report a violation under either the Policy on Discrimination and Discriminatory Harassment or the Sexual Harassment policy, please contact:

Student Health

Drug and Alcohol Policy

Washington University is committed to maintaining a safe and healthful environment for members of the university community by promoting a drug-free environment as well as one free of the abuse of alcohol. Violations of this policy will be handled according to existing policies and procedures concerning the conduct of faculty, staff and students. This policy is adopted in accordance with the Drug-Free Workplace Act and the Drug-Free Schools and Communities Act.

Tobacco-Free Policy

Washington University is committed to providing a healthy, comfortable and productive work and learning environment for all students, faculty and staff. Research shows that tobacco use in general, including smoking and breathing secondhand smoke, constitutes a significant health hazard. The university strictly prohibits all smoking and other uses of tobacco products within all university buildings and on university property, at all times. A copy of our complete tobacco-free policy is available on the Human Resources website.

Medical Examinations

Entering students must provide medical information to Student Health Services. This will include completion of a health history

and a record of all current immunizations. The university strongly recommends appropriate vaccination for meningococcal disease.

If students fail to comply with these requirements prior to registration, they will be required to obtain vaccinations for measles, mumps and rubella at Student Health Services, if there is no evidence of immunity. They will be assessed the cost of the vaccinations. Students will be unable to complete registration for classes until all health requirements have been satisfied.

If students are unimmunized, they may be barred from classes and from all university facilities, including housing units, if in the judgment of the university their continued presence would pose a health risk to themselves or to the university community.

Medical and immunization information is to be given via the <http://shs.wustl.edu> website. All students who have completed the registration process should access the website and create a student profile by using their WUSTL key. Creating a student profile enables a student to securely access the medical history form. Fill out the form and follow the instructions for transmitting it to Student Health Services. Student information is treated securely and confidentially.

Student Conduct

The university Student Judicial Code addresses conduct expectations and discipline procedures for university students. The primary purpose of the behavior expectations set forth in the code is the protection of the campus community and the maintenance of an environment conducive to learning and inquiry.

Disciplinary proceedings are meant to be informal, fair and expeditious. Charges of non-serious misconduct are generally heard by the student conduct officer. With limited exceptions, serious or repeated allegations are heard by the campus-wide University Judicial Board or the University Sexual Assault Investigative Board where applicable.

Complaints against students that include allegations of sexual assault or certain complaints that include allegations of sexual harassment in violation of the Judicial Code are governed by the procedures found in the University Sexual Assault Investigative Board Policy, which is available online at <http://wustl.edu/policies/sexualassault.html> or in hard copy from the Title IX Coordinator or the Judicial Administrator.

Students may be accountable to both governmental authorities and to the university for acts that constitute violations of law and the Student Code.

For a complete copy of the university Student Judicial Code visit <http://wustl.edu/policies/judicial.html>.

Undergraduate Student Academic Integrity Policy

Effective learning, teaching and research all depend upon the ability of members of the academic community to trust one another and to trust the integrity of work that is submitted for academic credit or conducted in the wider arena of scholarly research. Such an atmosphere of mutual trust fosters the free exchange of ideas and enables all members of the community to achieve their highest potential.

In all academic work, the ideas and contributions of others must be appropriately acknowledged, and work that is presented as original must be, in fact, original. Faculty, students and administrative staff all share the responsibility of ensuring the honesty and fairness of the intellectual environment at Washington University.

Scope and Purpose

This statement on academic integrity applies to all undergraduate students at Washington University. Graduate students are governed by policies in each graduate school or division. All students are expected to adhere to the highest standards of behavior.

The purpose of the statement is twofold:

- To clarify the university's expectations with regard to undergraduate students' academic behavior, and
- To provide specific examples of dishonest conduct. The examples are only illustrative, NOT exhaustive.

Violations of this policy include, but are not limited to:

1. Plagiarism

Plagiarism consists of taking someone else's ideas, words or other types of work product and presenting them as one's own. To avoid plagiarism, students are expected to be attentive to proper methods of documentation and acknowledgment. To avoid even the suspicion of plagiarism, a student must always:

- Enclose every quotation in quotation marks and acknowledge its source.
- Cite the source of every summary, paraphrase, abstraction or adaptation of material originally prepared by another person and any factual data that is not considered common knowledge. Include the name of author, title of work, publication information and page reference.
- Acknowledge material obtained from lectures, interviews or other oral communication by citing the source (name of the speaker, the occasion, the place and the date).
- Cite material from the internet as if it were from a traditionally published source. Follow the citation style or requirements of the instructor for whom the work is produced.

2. Cheating on an examination

A student must not receive or provide any unauthorized assistance on an examination. During an examination a student may use only materials authorized by the faculty.

3. Copying or collaborating on assignments without permission

When a student submits work with his or her name on it, this is a written statement that credit for the work belongs to that student alone. If the work was a product of collaboration, each student is expected to clearly acknowledge in writing all persons who contributed to its completion.

Unless the instructor explicitly states otherwise, it is dishonest to collaborate with others when completing any assignment or test, performing laboratory experiments, writing and/or documenting computer programs, writing papers or reports, and completing problem sets.

If the instructor allows group work in some circumstances but not others, it is the student's responsibility to understand the degree of acceptable collaboration for each assignment, and to ask for clarification if necessary.

To avoid cheating or unauthorized collaboration, a student should never:

- Use, copy or paraphrase the results of another person's work and represent that work as his or her own, regardless of the circumstances.
- Refer to, study from or copy archival files (e.g., old tests, homework, solutions manuals or backfiles) that were not approved by the instructor.
- Copy another's work, or to permit another student to copy his or her work.
- Submit work as a collaborative effort if he or she did not contribute a fair share of the effort.

4. Fabrication or falsification of data or records

It is dishonest to fabricate or falsify data in laboratory experiments, research papers or reports or in any other circumstances; to fabricate source material in a bibliography or "works cited" list; or to provide false information on a résumé or other document in connection with academic efforts. It is also dishonest to take data developed by someone else and present them as one's own.

Examples of falsification include:

- Altering information on any exam, problem set or class assignment being submitted for a re-grade.
- Altering, omitting or inventing laboratory data to submit as one's own findings. This includes copying laboratory data from another student to present as one's own; modifying

data in a write-up; and providing data to another student to submit as his or her own.

5. Other forms of deceit, dishonesty or inappropriate conduct

Under no circumstances is it acceptable for a student to:

- Submit the same work, or essentially the same work, for more than one course without explicitly obtaining permission from all instructors. A student must disclose when a paper or project builds on work completed earlier in his or her academic career.
- Request an academic benefit based on false information or deception. This includes requesting an extension of time, a better grade or a recommendation from an instructor.
- Make any changes (including adding material or erasing material) on any test paper, problem set or class assignment being submitted for a re-grade.
- Willfully damage the efforts or work of other students.
- Steal, deface or damage academic facilities or materials.
- Collaborate with other students planning or engaging in any form of academic misconduct.
- Submit any academic work under someone else's name other than his or her own. This includes but is not limited to sitting for another person's exam; both parties will be held responsible.
- Engage in any other form of academic misconduct not covered here.

This list is not intended to be exhaustive. To seek clarification, students should ask the professor or teaching assistant for guidance.

Reporting Misconduct

Faculty responsibility

Faculty and instructors are strongly encouraged to report incidents of student academic misconduct to the academic integrity officer in their school or college in a timely manner, so that the incident may be handled fairly and consistently across schools and departments. Teaching assistants are expected to report instances of student misconduct to their supervising instructors. Faculty members are expected to respond to student concerns about academic dishonesty in their courses.

Student responsibility

If a student observes others violating this policy, he or she is strongly encouraged to report the misconduct to the instructor, to seek advice from the academic integrity officer of the school or college that offers the course in question, or to address the student(s) directly.

Exam proctor responsibility

Exam proctors are expected to report incidents of suspected student misconduct to the course instructor and/or the Disability Resource Center, if applicable.

Procedure

Jurisdiction

This policy covers all undergraduate students, regardless of their college of enrollment. Cases will be heard by school-specific committees according to the school in which the class is listed, not the school in which the student is enrolled. All violations and sanctions will be reported to the student's college of enrollment.

Administrative procedures

Individual undergraduate colleges and schools may design specific procedures to resolve allegations of academic misconduct by students in courses offered by that school, so long as the procedures are consistent with this policy and with the university Student Judicial Code.

Student rights and responsibilities in a hearing

A student accused of an academic integrity violation — whether by a professor, teaching/graduate assistant, academic integrity officer or student — is entitled to:

- Review the written evidence in support of the charge.
- Ask any questions.
- Offer an explanation as to what occurred.
- Present any material that would cast doubt on the correctness of the charge.
- Determination of the validity of the charge without reference to any past record of misconduct.

When responding to a charge of academic misconduct, a student may:

- Deny the charges and request a hearing in front of the appropriate academic integrity officer or committee.
- Admit the charges and request a hearing to determine sanction(s).
- Admit the charges and accept the imposition of sanctions without a hearing.
- Request a leave of absence from the university. The academic integrity matter must be resolved prior to re-enrollment.
- Request to withdraw permanently from the university with a transcript notation that there is an unresolved academic integrity matter pending.

A student has the following responsibilities in resolving the charge of academic misconduct:

- Admit or deny the charge. This will determine the course of action to be pursued.

- Provide truthful information regarding the charges. It is a Student Judicial Code violation to provide false information to the university or anyone acting on its behalf.

Sanctions

If found *not* in violation of the Academic Integrity Policy

If the charges of academic misconduct are not proven, no record of the allegation will appear on the transcript.

If found in violation of the Academic Integrity Policy

If, after a hearing, a student is found to have acted dishonestly, or if a student has admitted to the charges prior to a hearing, the school's academic integrity officer or committee may impose sanctions, including but not limited to the following:

- Issue a formal written reprimand.
- Impose educational sanctions, such as completing a workshop on plagiarism or academic ethics.
- Recommend to the instructor that the student fail the assignment. (A grade is ultimately the prerogative of the instructor.)
- Recommend to the instructor that the student fail the course.
- Recommend to the instructor that the student receive a course grade penalty less severe than failure of the course.
- Place the student on Disciplinary Probation for a specified period of time or until defined conditions are met. The probation will be noted on the student's transcript and internal record while it is in force.
- In cases serious enough to warrant suspension or expulsion from the university, refer the matter to the University Judicial Board for consideration.

Additional educational sanctions may be imposed. This list is not intended to be exhaustive.

Withdrawing from the course will not prevent the academic integrity officer or hearing panel from adjudicating the case, imposing sanctions or recommending grade penalties, including a failing grade in the course.

A copy of the sanction letter will be placed in the student's academic file.

Appeals

If a student believes the academic integrity officer or the committee did not conduct a fair hearing, or if a student believes the sanction imposed for misconduct is excessive, he or she may appeal to the University Judicial Board within 14 days of the original decision. Appeals are governed by Section VII C of the University Student Judicial Code.

Records

Administrative record-keeping responsibilities

It is the responsibility of the academic integrity officer in each school to keep accurate, confidential records concerning academic integrity violations. When a student has been found to have acted dishonestly, a letter summarizing the allegation, the outcome and the sanction shall be placed in the student's official file in the office of the school or college in which the student is enrolled.

Additionally, each school's academic integrity officer shall make a report of the outcome of every formal accusation of student academic misconduct to the Director of University Judicial Programs, who shall maintain a record of each incident.

Multiple offenses

When a student is formally accused of academic misconduct and a hearing is to be held by an academic integrity officer, a committee, or the University Judicial Board, the person in charge of administering the hearing shall query the director of Judicial Programs about the student(s) accused of misconduct. The director shall provide any information in his or her records concerning that student to the integrity officer. Such information will be used in determining sanctions ONLY if the student is found to have acted dishonestly in the present case. Evidence of past misconduct may not be used to resolve the issue of whether a student has acted dishonestly in a subsequent case.

Reports to faculty and student body

School and college academic integrity officers are encouraged to make periodic (at least annual) reports to the students and faculty of their school concerning accusations of academic misconduct and the outcomes, without disclosing specific information that would allow identification of the student(s) involved.

Statement of Intent to Graduate

Students are required to file an Intent to Graduate at WebSTAC prior to the semester in which they intend to graduate. Additional information is available in the dean's office and in the Office of the University Registrar.

Student Academic Records and Transcripts

The Family Educational Rights and Privacy Act of 1974 (FERPA) — Title 20 of the United States Code, Section 1232g, as amended — provides current and former students of the university with specific rights of access to and control over their student record information. In compliance with the statute, appropriate federal regulations and guidelines recommended by the American Association of Collegiate Registrars and

Admissions Officers, the university has adopted procedures that implement these rights.

A copy of the university policies regarding educational records and the release of student record information is available from the Office of the University Registrar and the university website.

Transcript requests may be submitted to the Office of the University Registrar through WebSTAC. Instructions and additional information are available online at <http://registrar.wustl.edu>.

Tuition & Fees

Tuition

Tuition is the major source of income to support the cost of undergraduate education. Most of the remaining cost is generously funded by gifts from the university's alumni and friends and from income from the university's endowment.

In setting the tuition rate, our emphasis is on being able to hire a high-caliber faculty and to offer extensive extracurricular opportunities.

Tuition for the 2015-16 academic year is \$23,650 per semester for full-time study. Full-time study is considered to be 12 to 18 units. If students enroll in more than 21 units per semester, they will pay additional tuition of \$1,971 for each credit unit beyond the 21.

First-year, first-semester students may register over the summer or after arriving on campus in August. For all subsequent semesters, continuing students have the chance to register in April for the fall semester and in November for the spring semester. Students will be billed for tuition in July for the fall semester and in December for the spring semester. Students must pay tuition by the date specified on the bill or they will incur a late fee.

If a student cannot afford to pay the full tuition bill, he or she should explore the university's extensive financial assistance opportunities, which are described in the Financial Support (p. 27) section of this *Bulletin*.

Many families prefer to pay educational expenses on a monthly basis. The interest-free monthly payment plan, TuitionPay, allows students and families to spread all or part of the academic year's expenses over equal monthly payments. The Washington University Partners in Education with Parents (PEP) plan may provide tax savings for some families and offers monthly payment options over a period as long as 10 years at a competitive, fixed-interest rate. The PEP plan is described in the Financial Support (p. 27) section of this *Bulletin*.

A student's family should begin planning for educational costs as soon as possible following the decision to enroll. It is important to allow sufficient time to complete financial arrangements prior to registration.

Fees

Student Activities: The mandatory student activities fee is 1 percent of tuition; for the 2015-16 academic year, it is \$236.50 per semester. This special fee may vary from year to year. You may obtain information about the fee from the Office of Student Involvement and Leadership (<http://studentinvolvement.wustl.edu>).

Student Health and Wellness: Washington University has a student health and wellness fee designed to improve the health and wellness of the entire Washington University community. The fee of \$160 is billed to the student tuition statement each semester. In addition, to protect the health of our entire community, the university requires all full-time degree-seeking students to have health insurance. Students either must purchase the Washington University Student Health Insurance Plan or prove that they have adequate coverage through another plan. The cost of the Washington University Student Health Insurance Plan, as well as instructions for obtaining a waiver through proof of adequate coverage, will be provided to enrolled students.

Late Registration: Students may register for classes through the end of the second week of the semester. If students register after the second week, they must do so in person in the dean's office, and they may be assessed a late registration fee of \$100 per week. A 5 percent late payment fee also may be assessed by the dean's office if payment in full is not made with late registration.

The late registration fee is not applicable to graduate resident and nonresident candidates. Students in University College programs will incur a flat late fee of \$50. For part-time undergraduate and graduate engineering students, the late fee is \$50 per week.

Returned Checks: The university assesses a service charge for handling and processing returned checks.

Enrollment Deposit

First-year students and transfer students are required to pay a deposit upon admission to Washington University. The \$200 enrollment deposit is not credited toward tuition and will be forfeited if the student does not complete one full semester at Washington University. However, after a student graduates, or if a student withdraws for any reason after the first semester, his or her deposit will be refunded (minus any unpaid bills, such as parking or library fines).

Withdrawals from the University and Refunds

The College of Arts & Sciences, the Olin Business School, the Sam Fox School of Design & Visual Arts, and the School of Engineering & Applied Science have similar policies on withdrawals and refunds. During the first two weeks of a

semester, a student may withdraw from all course work via the online registration system or by notifying the dean's office in writing. After the second week of classes, a written request to be withdrawn from courses must be received by the dean's office.

Tuition Refund Schedule (as of Fall 2010)

Refunds are calculated based on the date the student notifies the university of withdrawal.

If a medical condition makes attendance for the balance of the semester impossible or medically inadvisable, the university will make a pro rata tuition refund, as of the date of withdrawal when that date occurs prior to the 12th week and the condition is verified by the Student Health Services or a private physician. The date of withdrawal may correspond to the date of hospitalization or the date on which the medical condition is determined.

If a Federal Title IV aid recipient withdraws from school before the end of the academic semester, Washington University must refund (send loan funds back to the lender) the unearned (amount of time in the academic semester that the student did not attend) amount of Title IV funds. Unearned Title IV funds will be returned to the Title IV program. Students will be responsible for any disbursed but unearned portion of their Title IV funds.

An example of a typical refund calculation can be obtained from Student Financial Services (<https://sfs.wustl.edu>).

Changes in Fees

The university reserves the right to change the fees stated or to establish additional fees at any time without prior written notice. When fee changes or additions are made, they become effective with the next payment due.

Nonpayment of Fees

Nonpayment of tuition or other charges due the university or otherwise affecting the university will prohibit the student from receiving certain services. Students with outstanding financial obligations to the university will not be allowed to register or to obtain transcripts or official verification of enrollment.

Financial Support

Washington University bases most financial assistance on a careful assessment of financial need. The university also offers a limited number of academic scholarships and fellowships based solely on academic merit. Other financing options and innovative plans, such as the university's Partners in Education with Parents and the Installment Payment Plan, the monthly payment plan administered by Higher One, assist students and parents in financing the university's costs.

Eligible Washington University undergraduate students receive need-based financial assistance, which is offered in combinations of scholarships and grants, federal student loans, and part-time on-campus employment.

Applicants' financial circumstances are considered individually in the financial assistance process. In evaluating the extent of each applicant's need, the university considers many factors besides family income, such as the number of people in their family, the number of children in college at the same time, and special financial circumstances. When students apply for need-based financial assistance, they are considered for all types of assistance — grants, federal student loans and part-time employment.

The university strives to make attendance a financial reality for qualified students, even when financial need is great. Information about application procedures may be obtained from Student Financial Services (<https://sfs.wustl.edu>).

Veterans. If applicants are seeking benefits from the Veterans Administration, they should contact the Office of the University Registrar at <http://registrar.wustl.edu>.

Scholarship Funds

Many scholarship funds, which are administered by Washington University, are provided by generous donors to assist the university in supporting financially needy and deserving students. These scholarships are included in financial assistance awards. In addition, merit scholarship funds are available to undergraduates in any school. For scholarship information, please visit the Admissions website at: <http://admissions.wustl.edu/scholarships-financial-aid>.

Army ROTC Scholarships

High school seniors may compete for four-year Army Reserve Officers' Training Corps (ROTC) scholarships. Current students may compete for three- and two-year scholarships. These scholarships are awarded based on merit. Army ROTC scholarships provide the full amount of tuition and mandatory fees for undergraduate study at Washington University. Army ROTC scholarships also include support for textbook purchases and a monthly allowance during the period the student is in school on scholarship status. Some students who receive Army ROTC scholarships also receive stipends from the university for room and board. The source of the student's stipend will be the university; federal or state government; or other scholarships, depending on the student's eligibility for assistance. For more information, write the Military Science Department, Washington University in St. Louis, 700 Rosedale Ave., Suite 1120, St. Louis, MO 63112, or call (314) 935-5521, or visit the Washington University Army ROTC website at <http://rotc.wustl.edu>. The Four-Year Scholarship application may be submitted through the Army ROTC National Headquarters website, <http://goarmy.com/rotc>.

Air Force ROTC Scholarships

High school seniors and current students may compete for two-, three- or four-year AFROTC scholarships, which cover up to full tuition at Washington University, plus a stipend and allowance for books. In College Scholarship Program (ICSP) requirements

vary year to year and require at least one semester of AFROTC participation prior to application. Extensive information and the electronic application portal can be found at <http://afrotc.com>. Informational interviews are required of qualified applicants.

Different types of Air Force ROTC merit-based scholarships are available to students studying at Washington University. However, a scholarship is not required to join ROTC or to successfully earn a commission. For scholarship details, contact AFROTC, Gateway Detachment 207 at (314) 977-8332 or afrotc@slu.edu.

Corporation Awards to Children of Employees

A number of companies have scholarship programs open to children of their employees. Inquiries about such plans should be made through their parents' employer(s).

Loans

Washington University participates in the federal student and parent loan programs. These loans provide reasonable interest rates and long-term repayment schedules.

Partners in Education with Parents (PEP)

Partners in Education with Parents (PEP) is an innovative multiple-option program financed and operated by Washington University to help parents pay university charges — tuition, student activity fee, room and board.

PEP continues Washington University's commitment to a partnership with the families of our students. This partnership includes a variety of choices to make parents' contributions as affordable as possible. Parents may choose the Multiyear Option, Prepayment Option, Combination Option or Annual Option.

The PEP Multiyear Option allows families to borrow one initial amount at the start of the freshman year to cover all, or part of, all four years of tuition, student activity fee, room and board charges. This option freezes the charges covered by PEP at the freshman-year rate, based on the percentage of costs covered by the PEP (participation rate). Families can benefit from the competitive, fixed interest rate and take up to 10 years to repay. There is no penalty for prepayment.

The PEP program also offers the choice to prepay, without borrowing from Washington University, all or part of the tuition, student activity fee, room and board charges for all four undergraduate years at the freshman-year rate. This option, the Prepayment Option, assures families that the prepaid portion of college expenses is covered and will not be subject to later increases in university costs.

Students can also choose the Combination Option, which allows their family to prepay a portion of the charges and borrow the

rest from Washington University. This combination works well for parents who may have saved for a portion or most of their student's college expenses and who want to take advantage of the benefit of increasing their participation rate by using PEP to finance the remaining charges.

If the family prefers to borrow for college costs one year at a time, then the PEP Annual Option might be their best choice. Each year they can borrow an amount up to or equal to that year's tuition, student activity fee, room and board charges and take up to 10 years to repay. There is no penalty for prepayment and they can benefit from the competitive fixed interest rate.

Financing under the Multiyear, Combination or Annual Options requires no security or collateral from participants. A prospective participant must have a good credit rating and provide evidence of being able to meet the required monthly payments to be approved for a loan.

More information about Partners in Education with Parents is available from Student Financial Services, Washington University in St. Louis, Campus Box 1041, One Brookings Drive, St. Louis, MO 63130-4899; (314) 935-4139 or (800) 468-0569, fax (314) 935-4037; e-mail: financial@wustl.edu; or visit the website at <https://sfs.wustl.edu/newlyadmitted/Pages/PEP.aspx>.

Installment Payment Plan (Monthly Payment Plan)

Installment Payment Plan, the monthly payment plan administered by Higher One, provides for the payment of total annual university charges — tuition, fees and room and board — in nine or 10 monthly installments. Information about this plan is provided to all admitted students or may be obtained directly from Student Financial Services. For details, visit <https://sfs.wustl.edu/newlyadmitted/Pages/TuitionPay.aspx>.

Federal Work-Study

If students apply for financial assistance, they are considered for the Federal Work-Study program (FWS). FWS employees work an average of 10 to 12 hours a week on campus and typically earn \$2,500 over the course of the academic year.

University Affiliations

Washington University is accredited by the Higher Learning Commission (<http://ncahlc.org>) or (800) 621-7440. Washington University is a member of the Association of American Universities, the American Council on Education, the College Board and the Independent Colleges and Universities of Missouri.

The College of Arts & Sciences is a member of the Center for Academic Integrity, the Council of Colleges of Arts and Sciences, and the American Association of College Registrars.

The College of Architecture was one of the eight founding members of the Association of Collegiate Schools of Architecture (ACSA) in 1912.

The Graduate School of Architecture & Urban Design's Master of Architecture degree is accredited by the National Architectural Accreditation Board (NAAB). The Sam Fox School of Visual Arts & Design (Art) is a founding member of, and is accredited by, the National Association of Schools of Art and Design (NASAD).

The Olin Business School is a charter member of the Association to Advance Collegiate Schools of Business International (1921).

In the School of Engineering & Applied Science, many of the professional degrees are accredited by the Engineering Accreditation Commission of ABET (<http://abet.org>).

The School of Law is accredited by the American Bar Association.

The School of Medicine is a member of the Liaison Committee on Medical Education.

George Warren Brown School of Social Work is accredited by the Council on Social Work Education and the Council on Education for Public Health.

The University Libraries are a member of the Association of Research Libraries.

The Mildred Lane Kemper Art Museum is nationally accredited by the American Alliance of Museums.

Majors (all schools)

The following is an alphabetical list of all majors from all undergraduate schools.

- Accounting (p. 135)
- African and African-American Studies (p. 179)
- American Culture Studies (p. 194)
- Ancient Studies (p. 313)
- Anthropology (p. 228)
- Anthropology: Global Health and Environment (p. 228)
- Applied Linguistics (p. 383)
- Applied Science (Chemical Engineering) (p. 887)
- Applied Science (Electrical Engineering) (p. 861)
- Applied Science (Mechanical Engineering) (p. 902)
- Applied Science (Systems Science & Engineering) (p. 861)
- Arabic (p. 252)
- Archaeology (p. 257)
- Architecture (p. 37)
- Art (p. 71)
- Art (Painting) (p. 71)
- Art (Photography) (p. 71)
- Art (Printmaking) (p. 71)

- Art (Sculpture) (p. 71)
- Art History and Archaeology (p. 264)
- Biology (p. 284)
- Biology: Biochemistry and Molecular Biology (p. 284)
- Biology: Ecology and Evolution (p. 284)
- Biology: Genomics and Computational Biology (p. 284)
- Biology: Neuroscience (p. 284)
- Biomedical Engineering (p. 825)
- Chemical Engineering (p. 887)
- Chemistry (p. 301)
- Chemistry: Biochemistry (p. 301)
- Chinese Language and Culture (p. 307)
- Classics (p. 313)
- Communication Design (p. 71)
- Comparative Arts (p. 321)
- Comparative Literature (p. 321)
- Computer Engineering (p. 841)
- Computer Science (p. 841)
- Dance (p. 331)
- Development/International Area Studies (p. 566)
- Drama (p. 339)
- Earth and Planetary Sciences (p. 355)
- Earth and Planetary Sciences: Geochemistry (p. 355)
- Earth and Planetary Sciences: Geology (p. 355)
- Earth and Planetary Sciences: Geophysics (p. 355)
- East Asian Studies (p. 367)
- Economics (p. 378)
- Economics and Strategy (p. 135)
- Educational Studies (p. 383)
- Electrical Engineering (p. 861)
- Elementary Teacher Education (p. 383)
- English Literature (p. 397)
- English Literature: Creative Writing (p. 397)
- Entrepreneurship (p. 135)
- Environmental Biology (p. 284)
- Environmental Earth Sciences (p. 355)
- Environmental Policy (p. 701)
- Environmental Studies (p. 416)
- Eurasian Studies/International and Area Studies (p. 568)
- European Studies/International and Area Studies (p. 422)
- Fashion Design (p. 71)
- Film and Media Studies (p. 435)
- Finance (p. 135)
- French (p. 453)
- Germanic Languages and Literatures (p. 467)
- Global Cultural Studies/International and Area Studies (p. 571)
- Health Care Management (p. 135)
- Hebrew (p. 474)
- History (p. 484)
- Individually Designed Major (BS in Engineering) (p. 811)
- Interdisciplinary Project in the Humanities (p. 510)
- International Affairs/International and Area Studies (p. 573)
- International and Area Studies (p. 520)
- Italian (p. 576)
- Japanese Language and Culture (p. 581)
- Jewish, Islamic and Near Eastern Studies (p. 588)
- Latin American Studies (p. 613)
- Leadership and Strategic Management (p. 135)
- Linguistics (p. 628)
- Marketing (p. 135)
- Mathematics (p. 633)
- Mechanical Engineering (p. 902)
- Middle School Teacher Education (p. 383)
- Music (p. 645)
- Operations and Supply Chain Management (p. 135)
- Philosophy (p. 666)
- Philosophy: Law and Policy (p. 666)
- Philosophy: Philosophy of Science (p. 666)
- Philosophy: Research (p. 666)
- Philosophy–Neuroscience–Psychology: Cognitive Neuroscience (p. 678)
- Philosophy–Neuroscience–Psychology: Language, Cognition and Culture (p. 678)
- Physics (p. 692)
- Political Science (p. 701)
- Psychology (p. 723)
- Religious Studies (p. 739)
- Romance Languages and Literatures (p. 751)
- Second Major in Computer Science (p. 841)
- Second Major in Electrical Engineering Science (p. 861)
- Second Major in Systems Science (p. 861)
- Secondary Teacher Education (p. 383)
- Spanish (p. 757)
- Systems Science & Engineering (p. 861)
- Urban Studies (p. 777)
- Women, Gender, and Sexuality Studies (p. 791)

Minors (all schools)

The following is a list of all minors from all undergraduate departments and schools.

- Accounting (p. 140)
- Aerospace Engineering (p. 904)
- African and African-American Studies (p. 179)
- American Culture Studies (p. 195)
- Ancient Studies (p. 314)
- Anthropology (p. 229)
- Anthropology: Global Health and Environment (p. 229)
- Applied Linguistics (p. 386)
- Applied Microeconomics (p. 378)
- Applied Physics & Electrical Engineering (p. 867)
- Arabic (p. 253)
- Archaeology (p. 257)
- Architectural History (p. 37)
- Architecture (p. 37)
- Art History and Archaeology (p. 265)
- Art (p. 72)
- Astrophysics and Astroparticle Physics (p. 693)
- Ballet (p. 332)
- Bioinformatics (p. 843)
- Biology (p. 287)
- Biomedical Physics (p. 693)
- Business Economics (p. 140)
- The Business of Sports (p. 140)
- Chemistry (p. 302)
- Children's Studies (p. 298)
- Chinese Language and Culture (p. 308)
- Classics (p. 314)
- Comparative Arts (p. 322)

- World Music, Dance and Theater (p. 664)
- Writing (p. 806)

Architecture

Sam Fox School of Design & Visual Arts

The Sam Fox School of Design & Visual Arts is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country's finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art, and the Mildred Lane Kemper Art Museum.

Architecture

Throughout history, architects have played a leading role in forming the environment and in interpreting the aspirations of societies in all parts of the world. As a practical and useful art, architecture embraces aesthetic, ethical, social and technical responsibilities. Architecture responds to the way people live and, in turn, influences their lives.

Students considering an architectural education and architecture as a potential career express an excitement about design and building, as well as a commitment to the environment. If students plan to study architecture, they should have artistic ability and a good academic base. Personal interests in such areas as drawing, painting, photography, sculpture, building and the environment suggest a possible aptitude for architecture.

Architecture reflects culture; architects must know their culture deeply. To gain an understanding of all aspects of architecture and to develop the attitudes and skills necessary to deal with them, students must have a broad liberal arts education. This base of cultural understanding and critical thinking is combined with a curriculum that focuses intensely on the study of architecture.

Architecture is an absorbing, fascinating profession. Choosing architecture as a professional career requires a major educational commitment at the undergraduate level and to further study in a professional degree program. With a professional degree in architecture, a graduate may choose to work in small or large architectural firms, in academia, in community or governmental organizations, with development teams, and in a variety of related fields.

Architecture at Washington University

Washington University established the Department of Architecture as part of the School of Engineering and

Architecture in 1902. The School of Architecture became an independent division of the university in 1910.

In 1932, Givens Hall was constructed to house the school as a result of a generous gift in memory of Joseph W. and Kate Abbey Givens. The Art & Architecture Library and the Mildred Lane Kemper Art Museum are in the new Kemper Art Museum building. Steinberg Hall also houses studio and review space.

In 1967, the School of Architecture became one of the first schools in the United States to offer a pioneering six-year joint-degree (Bachelor of Arts and Master of Architecture) program. The 4+2 program now leads to a thorough four-year Bachelor of Science in Architecture degree, followed by two years of graduate study for the accredited professional Master of Architecture degree. In 2005, as part of the formation of the Sam Fox School of Design & Visual Arts, the School of Architecture was reorganized as the College of Architecture and the Graduate School of Architecture & Urban Design.

Equally, the college offers the four-year Bachelor of Design degree with a major in architecture — a strong, flexible undergraduate curriculum that also prepares students for graduate study in architecture, usually for three years. These undergraduate degree programs offer students the opportunity to gradually focus their undergraduate studies within the college and allow them to make an incremental commitment to a career in architecture.

The College of Architecture faculty are nationally and internationally renowned practitioners and researchers who are committed to students' undergraduate experience. As academic advisers, they work with the dean and undergraduate chair to help students build an individualized curriculum, select specific courses and chart plans for their future careers.

Undergraduate Degree Programs

The College of Architecture offers course work leading to two undergraduate degrees: the Bachelor of Science in Architecture and the Bachelor of Design in Architecture. The requirements for both degrees are the same through the junior year.

Students begin with a Sam Fox School foundation drawing course taken with first-year students in the College of Art and two design courses particular to architecture. They take required courses in the College of Arts & Sciences and electives in architecture and the Sam Fox School.

For the Bachelor of Science degree, students continue to study architecture in depth through the senior year. For those in the Bachelor of Design program, the fourth year offers flexibility in studying outside of architecture or pursuing other electives in architecture and art.

Continuing for graduate study years:

Students receiving the Bachelor of Science in Architecture degree can apply to two-year Master of Architecture programs. Students receiving the Bachelor of Design degree with a major

in architecture usually apply to three-year Master of Architecture programs (see Graduate Degree Programs below).

If a student enters the College of Architecture as a first-year student, he or she may complete both the bachelor's and the master's programs in a minimum of six years, in a professional degree structure called the 4+2. Using the Bachelor of Science in Architecture degree as the initial basis, the 4+2 curriculum allows a student to spend four years as an undergraduate and two years as a graduate student in the Master of Architecture curriculum (see the 4+2 Program (p. 63) information).

Further information on the particular requirements and curricular structures of the undergraduate degree programs is listed below.

Combined Studies

Washington University offers students the option to study across disciplines and to take advantage of the wide range of courses available. Students may choose to major in architecture and minor in another subject; major in architecture and choose a second major in another area within the College of Arts & Sciences; or major in architecture and choose a second major in an area from a different undergraduate school.

Special Programs and Resources

Cooperative Program in Architecture

The Graduate School of Architecture & Urban Design has established agreements with a number of primarily undergraduate liberal arts schools in the United States to allow their students to take advantage of the Cooperative Program in Architecture. Cooperative Program students are able to begin their architectural studies at Washington University in their senior year while still enrolled as undergraduates. Their undergraduate degrees will come from the home institution where they reside for three years, yet they include within their four-year baccalaureate degree program one year of study at Washington University. For more information, contact: Cooperative Program in Architecture, Washington University in St. Louis, Campus Box 1079, One Brookings Drive, St. Louis MO 63130. Call (314) 935-6227 or (800) 295-6227 (continental U.S.) or e-mail samfoxschool@wustl.edu.

Study Abroad

Students have an opportunity to study in Florence, Italy, for a semester or over the summer term. These programs are based on a directed curriculum of urban and building analysis and appreciation.

Architecture students are eligible to participate in the university's study abroad programs.

Independent Study

Opportunities for independent study are available to all graduate and undergraduate students. Registration in an independent study course requires sponsorship by an instructor and

permission of the dean. A maximum of 5 units (graduate students), 3 units (juniors and seniors), and 1 unit (freshmen and sophomores) may be taken per semester. Independent study courses cannot replace architectural design studios or other required courses. An independent study proposal sheet approved by a faculty sponsor must be submitted to the Office of the Dean at registration time.

Summer School

The College of Architecture offers a limited number of courses during the summer, primarily ARCH 447A Structures I and ARCH 448A Structures II.

Graduate Degree Programs

The Graduate School of Architecture & Urban Design's degree programs include a range of curricula for students with a variety of educational backgrounds, professional degree needs, and career ambitions.

Most states require that an individual intending to become an architect hold an accredited professional degree. The National Architectural Accrediting Board (NAAB) accredits two types of degrees: (1) the Bachelor of Architecture (not offered by this College of Architecture), which requires a minimum of five years of study, and (2) the Master of Architecture, which requires a minimum of three years of study following an unrelated bachelor's degree or two years of study following a related pre-professional bachelor's degree. These professional degrees are structured to educate those who aspire to registration/licensure as architects.

The graduate school's Master of Architecture degree (MArch 3 and MArch 2 programs) is an NAAB-accredited professional degree. The school's NAAB-accreditation status was evaluated and confirmed in the spring of 2005.

Master of Architecture Degree

Students holding bachelor's degrees in fields other than architecture are invited to apply to the graduate school's accredited professional MArch 3 degree program. Elementary calculus and physics are required as prerequisites for enrollment. While the curriculum typically spans seven semesters, students may complete this professional studies program in a minimum of three years including two summers.

Students with the Bachelor of Arts degree with a major in architecture, including studios at both the 300 and 400 levels, or the equivalent, are placed within the MArch 3 curriculum on the basis of their previous design studio experience and overall academic record.

The Graduate School of Architecture & Urban Design welcomes graduates of other schools with the undergraduate degrees in architecture (Bachelor of Science in Architecture) or the equivalent as candidates for the accredited professional Master

of Architecture degree program (MArch 2). This curriculum typically spans four semesters.

Postgraduate programs, for students already possessing accredited professional degrees (Bachelor of Architecture or the equivalent), include the three-term MArch 1 degree curriculum or the Master of Urban Design degree program.

Master of Urban Design Degree

Students with a professional degree or the equivalent in architecture, urban planning, or landscape architecture may apply for admission to the program leading to the Master of Urban Design degree. This degree is awarded upon completion of a three-term graduate curriculum devoted to urban design in metropolitan conditions.

Master of Landscape Architecture Degree

In the fall of 2010, the college and Graduate School of Architecture & Urban Design at Washington University in St. Louis launched a new graduate program in landscape architecture leading to a professional Master of Landscape Architecture (MLA). Two- and three-year degree options accommodate students with design and other undergraduate degrees. The landscape program further develops cross-disciplinary connections among architecture, urban design, and visual arts in the Sam Fox School of Design to grant MLAUD and MLA/MArch degrees.

This new program in landscape architecture focuses on the three subjects of design, ecology and urbanism. The transformative process of design — linking cultural, historical and technological investigations — forms the pedagogical basis for research. Ecology informs design practice to address a multiplicity of scales and natural systems within the environment. Urbanism serves as a terrain of contemporary landscape practice. As heirs to design, ecological and urban traditions, landscape architects are uniquely suited to articulate a spatial vision for today's environment. This three-pronged approach is geared to develop the students' critical and conceptual abilities, and prepare them to become leaders within professional and academic spheres.

The curriculum is centered on studio teaching supported by instruction in technology, history and theory. Following the core sequence of design studios and classes, students are encouraged to develop their own research interests through advanced design studios and electives. Interdisciplinary and international option studios foster a multiplicity of perspectives leading to a research-based degree project (thesis or independent study). In addition, students have opportunities to further their investigations within and beyond the school through teaching and research assistantships and scholarships.

The landscape architecture program draws on a unique set of institutional, regional and international resources available at the Sam Fox School. St. Louis functions as a laboratory for

understanding and testing ecological and urban theories at the local scale, from brownfield reclamation to urban agriculture systems. Washington University's outstanding programs in environmental studies, environmental engineering, and American Culture Studies expand curricular offerings in ecology, technology and landscape studies, and the internationally renowned Missouri Botanical Garden serves as an exceptional tool of research and teaching. Finally, through the extensive international offerings of the school in Barcelona, Buenos Aires, Helsinki, Seoul and Tijuana, students experience different landscapes, cultures and cultures of practice.

Combined Degree Programs

The Graduate School of Architecture & Urban Design offers the following combined degree programs at the graduate level:

- Master of Architecture — Master of Urban Design
- Master of Architecture — Master of Business Administration
- Master of Architecture — Master of Social Work
- Master of Architecture — Master of Construction Management
- Cooperative 3+4 Program

Information on these combined degree programs can be obtained from the respective school's Office of Graduate Admissions. In all cases, application must be made separately to each graduate or professional program.

Information and Applications

An application to the graduate programs should include a portfolio of student work in the visual arts (drawing, painting, sculpture, etc.) or architectural design work if the applicant has completed architectural design studio courses, along with a transcript or record from the institutions attended, and letters of recommendation. The Test of English as a Foreign Language (TOEFL) is required of international applicants along with verification of availability of funds.

For more information about graduate degree programs and requirements, contact the Director of Graduate Admissions, Graduate School of Architecture & Urban Design, Sam Fox School of Design & Visual Arts, Washington University in St. Louis, Campus Box 1079, One Brookings Drive, St. Louis, MO 63130-4899, or send an e-mail to: samfoxschool@wustl.edu.

Majors

The Major in Architecture

Bachelor of Design Degree

The major requirements for the Bachelor of Design degree, with a major in architecture, are as follows:

ARCH 311	Architectural Design I	6
ARCH 312	Architectural Design II	6
ARCH 3284	Architectural History II: Architecture Since 1880	3
ARCH 333	Case Studies in 20th-Century Architecture	3
ARCH 346	Building Systems I	3
Capstone Course		3

Electives

For additional information on current requirements, please visit the Degree Requirements (p. 63) page.

Bachelor of Science in Architecture Degree

The major requirements for the Bachelor of Science in Architecture degree are as follows:

ARCH 311	Architectural Design I	6
ARCH 312	Architectural Design II	6

ARCH 411	Architectural Design III	6
ARCH 412	Architectural Design IV	6
ARCH 3284	Architectural History II: Architecture Since 1880	3
ARCH 333	Case Studies in 20th-Century Architecture	3
ARCH 346	Building Systems I	3
ARCH 447A	Structures I	3
ARCH 448A	Structures II	3
ARCH 438	Environmental Systems I	3

and completion of at least one architectural elective from the following groups:

- Urban Issues Electives group, or
- Architectural History/Theory Electives group.

For additional information on current requirements, please visit the Degree Requirements (p. 63) page.

Minors

The Minor in Architectural History

Minor Degree Advisor: Seng Kuan, skuan@wustl.edu

The minor in architectural history is open to all students at Washington University in St. Louis, regardless of their major. Students interested in the minor should contact the designated Minor Degree Advisor.

Units required: 18* including:

6 units of architectural history survey:

ARCH 3283	Architectural History I: Premodern Encounters in World Architecture	3
ARCH 3284	Architectural History II: Architecture Since 1880	3

3 units of methodology course work:

ARCH 4xx	Theories and Methods of Historical Research	3
----------	---	---

OR

Another methodology-based course approved by the minor adviser

9 units of architectural history and theory electives (300-level or above):

ARCH 3823	Rethinking Renaissance Visual Culture - Florence Summer Program	3
ARCH 3xx	Elective architectural history and theory courses approved by the minor adviser	3

*12 units must be in the minor only and cannot be double-counted toward another major or minor.

The Minor in Architecture

Minor Degree Advisor: Derek Hoeflerlin, hoeflerlin@wustl.edu

With a new curriculum in place, there will be changes in the minor. Please consult with the Associate Dean of Students for current requirements.

Units required: 18

Required courses:

6 units minimum of introductory design chosen from the following:

ARCH 111	Introduction to Design Processes I	3
ARCH 112	Introduction to Design Processes II	3

3 units minimum of history chosen from the following:

ARCH 3283	Architectural History I: Premodern Encounters in World Architecture	3
ARCH 3284	Architectural History II: Architecture Since 1880	3

Elective courses: 9 units chosen from the following:

ARCH 211B	Introduction to Design Processes III	4.5
ARCH 212B	Introduction to Design Processes IV	4.5
ARCH 302	Freehand Drawing	3
ARCH 333	Case Studies in 20th-Century Architecture	3

Other elective courses as approved by the Associate Dean

The Minor in Landscape Architecture

Minor Degree Advisor: Natalie Yates (nyates@wustl.edu)

The minor in landscape architecture is for students who will be receiving either a Bachelor of Science in Architecture degree or a Bachelor of Arts degree with a major in architecture or a Bachelor of Design with a major in architecture. Students interested in the minor should contact the designated Minor Degree Advisors.

Units required: 18* including:

6 units of design course work:

ARCH 312	Architectural Design II	6
or ARCH 412	Architectural Design IV	

3 units of history course work:

LAND 570	Landscape Architecture: History & Theory I	3
LAND 571	Landscape History II: Prehistory to 1850	3
LAND 572	History of Regional and Urban Planning	3

Or other history/theory courses as approved by the minor adviser

3 units of natural systems course work:

LAND 551	Principles of Ecology	3
----------	-----------------------	---

Or other natural systems elective courses as approved by the minor adviser

6 units of landscape architecture electives:

XCORE 307	Community Building	3
LAND 462	Landscape Materials	1.5
LAND 480	Case, Trace, Displace: Dialogue between River and City	3
LAND 573	Territorial Contexts	3

Or other elective courses in Landscape Architecture as approved by the minor adviser

*12 units must be in the minor only and cannot be double-counted toward another major or minor.

The Minor in Urban Design

Minor Degree Advisor: Patty Heyda, heyda@wustl.edu

The minor in urban design is for students who will be receiving either a Bachelor of Science in Architecture degree or a Bachelor of Arts degree with a major in architecture or a Bachelor of Design with a major in architecture. Students interested in the minor should contact the designated Minor Degree Advisor.

Units required: 18* including:

6 units of foundational course work:

XCORE 307	Community Building	3
ARCH 241	Community Dynamics	3

6 units of design course work:

ARCH 312 /ARCH 412 *Urban Design Focused Studio* (6 units)

6 units of advanced course work:

ARCH 654D	Metropolitan Landscapes	3
ARCH 656	Metropolitan Urbanism	3
Or an approved MUD track elective		3

*12 units must be in the minor only and cannot be double-counted toward another major or minor.

Additional Information

Students should check the current course descriptions carefully to verify their eligibility to enroll in courses that have specific prerequisites.

Courses

X10 XCORE (p. 39): Sam Fox foundation and commons courses

College of Art and College of Architecture majors will have enrollment priority in X10 courses.

A46 ARCH (p. 42): Architecture

A48 LAND (p. 59): Landscape Architecture

Design & Visual Arts — Core (X10)

Visit <https://courses.wustl.edu> to view semester offerings for X10 XCORE.

X10 XCORE 101 Drawing I

An introductory course which teaches students to recognize and manipulate fundamental elements of composition, line, form, space, modeling and color. Emphasis is placed on working accurately from observation, with an introduction to other methodologies. Students work in a variety of media. Demonstrations and illustrated lectures supplement studio sessions and outside projects.

Credit 3 units. EN: H

X10 XCORE 102 Drawing II

Continuing as an introductory course which teaches students to recognize and manipulate fundamental elements of composition, line, form, space, modeling and color. This course is an intensive studio course which builds on the perceptual and conceptual skills and experiences developed in Drawing I. A main objective is to develop a higher level of critical and studio practice.

Prerequisite: X10 XCORE 101.

Credit 3 units. EN: H

X10 XCORE 181 Practices in Architecture + Art + Design

This course offers first-year students in architecture and art an introduction to the subjects, theories and methodologies of the disciplines of art, design, architecture, landscape architecture, and urban studies. Examples, drawn from a range of historical periods as well as contemporary practice, highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap. Part 1 of 2.

Credit 1 unit. EN: H

X10 XCORE 182 Practices in Architecture + Art + Design

This course offers first-year students in architecture and art an introduction to the subjects, theories and methodologies of the disciplines of art, design, architecture, landscape architecture, and urban studies. Examples, drawn from a range of historical periods as well as contemporary practice, highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap. Part 2 of 2.

Credit 1 unit. EN: H

X10 XCORE 301 From Propaganda to Decoration

This is a studio course that is conceptually driven and anchored in the philosophical terrain of the print multiple. The fundamental attributes of the multiple, including its accessibility and repeatability, are from private to public and from political to aesthetic. Given this orientation, we examine the place where the public and private spheres meet. Considering urban communication and social space, reproduction and distribution, gifting and exchange, private practice and public intervention, this course uses the print multiple as a starting point to explore a continuum that runs from propaganda to decoration.

Credit 3 units. EN: H

X10 XCORE 303 Visualizing Information

This project-based studio course brings students from diverse backgrounds in Art, Architecture, and Design together to learn to compose information-rich surfaces. The course explores principles of information design on paper initially, and offers the opportunity to extend some applications to the screen. Course topics include content organization, visual structure, hierarchy, typography, color, sequencing, audience and usability. Students have the chance to select subject and media for some of their projects. Projects are supplemented with readings and lectures about contemporary information design, with some historical references. This course combines the rigor of a disciplinary classroom with the flexibility of a multidisciplinary one. Topics likely to emerge in the interdisciplinary conversation include information in three-dimensional spaces, communicating information with a particular voice or editorial perspective, analytical versus poetic information design, function, audience and programming. All of these are supported, and students develop a set of tools which can be adapted to their own disciplinary work in a meaningful way.

Credit 3 units.

X10 XCORE 304 Data Visualization

In this hybrid lecture/studio course, students learn basic skills to develop data visualizations focusing on clarity, relevance to the user, and visual expression. The course spans several themes within data visualization, including principles of two-dimensional design, storytelling and sequence, and interactivity and user navigation. It is organized into four units, each with a different content focus and data type, including topics as diverse as urban and rural landscapes, conditions in public health, and literary production. Students apply their own areas of interdisciplinary expertise to the final project. Students need a laptop with Adobe Illustrator and may need to acquire inexpensive or free software. This course is appropriate for sophomores through graduate students with or without visual training who are interested in data, information design, user interface, and computer programming. Course counts as a multidisciplinary course in the Sam Fox Commons, an elective course in Communication Design, or a course in the Interdisciplinary Project in the Humanities (IPH).

Credit 3 units. EN: H

X10 XCORE 305 Topics in Visual Culture: Commercial Modernism in America, 1865–1965

This survey course explores contributions to and expressions of visual modernism within the commercial tradition in the United States. Lectures, readings and screenings engage the intertwined histories of commerce, technology, society and aesthetics. Topics include periodical illustration from *Harper's Weekly* to the *Ladies Home Journal*, the newspaper comic strip and the comic book, animation from vaudeville to television, and science fiction and transportation design. Context provided by the advent of industrial image production; modernist art theory and high cultural disdain for mass markets (with resulting effects on the academy); avant-garde and commercial cross-pollination; the social histories of ethnic depiction (i.e., blackface minstrelsy); consideration of women as consumers and producers of commercial images. Students make use of materials in the collections of the Modern Graphics History Library at Washington University. Three animation screenings are required. Attendance at these screenings is required.

Credit 3 units. EN: H

X10 XCORE 306 Commercial Modernism in America 1865–1965

Credit 3 units. EN: H

X10 XCORE 307 Community Building

This course looks at the intersection of the built fabric and the social fabric. Using St. Louis as the starting point, this course takes students out of the classroom and into a variety of neighborhoods — old, new, affluent, poor — to look at the built environment in a variety of contexts and through a variety of lenses. Almost every week for the first half of the semester, students visit a different area (or areas), each trip highlighting some theme or issue related to the built environment (architecture, planning, American history, investment and disinvestment, community character and values, race, transportation, immigrant communities, future visions, etc.). Running parallel to this, students are involved in an ongoing relationship with one particular struggling neighborhood, in which students attend community meetings and get to know and become involved with the people in the community in a variety of ways. Students learn to look below the surface, beyond the single obvious story, for multiple stories, discovering their complexity, contradictions and paradoxes. They also come to consider the complex ways in which architecture and the built environment can affect or be affected by a host of other disciplines. CBTL course.

Credit 3 units. EN: H

X10 XCORE 309 Convergences: Studies in Art & Architecture

This interdisciplinary course examines the convergence of artistic and architectural ideas, techniques, and practices through selected historical and contemporary studies. Emphases range from the figure of the artist/architect (Michelangelo and Leonardo, for example, to Le Corbusier and Libeskind), to critical reflections (Vasari, Gennough, Serra) to boundary-crossing practices (Whiteread, Webster, Irwin, Kin, Judd, Miss) to collaborations and collaborative works (Ando/Kelly/Serra and the Pulitzer Foundation). The course emphasizes empathy and productive work across artistic disciplines. Field trips to the Pulitzer Foundation for the Arts (St. Louis) and the Chinati Foundation (Marfa, Texas) are planned.

Credit 3 units.

X10 XCORE 311 Materials & Mechanisms: Site Specific Design Installation

In this course students are guided to explore the nature of materials and simple mechanisms (mechanically driven kinetics) in the making of art and/or utilitarian objects. This course investigates the qualities of materials and how they might be used thoughtfully to develop a conceptual and physical experience for an audience or user. Specific materials are assigned, at times, yet students have the opportunity to self-select materials based on project needs. Throughout the semester, students balance designing with finding — the process of playfully exploring materials and methods without preconception of a final resolution. Looking for possibilities can lead to unexpected discoveries.

Credit 3 units. EN: H

X10 XCORE 313A Creative Practice and Natural Systems: An Ecology of Art

In this studio course, students learn to use basic ecological principles as a lens through which to investigate and evaluate productive, meaningful and sustainable creative practices. Ecology is community-focused, involving the study of relationships with a given community. It establishes a model by which students can establish a more complete understanding of the inspirations, expectations and ramifications of creative practice. We visit local gardens, parks, farms and neighborhoods while seeking to understand the complexity of our own role in nature and culture. This diverse range of ecological engagement allows for a broad array of creative applications in the studio arts, design and architecture. The class format challenges students with new ways of thinking while allowing them to select materials, specific topics of study, and methods of engagement appropriate to their own developing interests. The course consists of fieldwork, readings and lectures, the content of which is examined through individual and collaborative projects. At midterm students identify opportunities for focused research and production, and the course culminates with the public presentation of this work. College of Architecture and College of Art sophomores have priority. Fulfills Sam Fox Commons requirement.

Credit 3 units. EN: H

X10 XCORE 315 Cycles

Students design and build human-powered vehicles from discarded bicycles. The course collaborates with student mechanics involved with Bicycle Works (Bworks). Bworks collaborates in teams with Washington University students to design and build the work.

Credit 3 units.

X10 XCORE 317 Furniture Design

The seat is an intimate interface between the building and the body. It embodies a complex set of structural conditions, material opportunities and possibilities for expression. Architects, artists and industrial designers covet opportunities to make the chair. The result is that seemingly infinite perfect solutions exist — and still the seat remains a provocative challenge. In this course students design and build a chair. Emergent technologies are combined with traditional techniques of metal fabrication, woodworking and plastic forming in the design and making of the work. The course objective is for students to learn how to work directly with machinery and materials in the realization of their design. It is expected that students have basic shop skills addressed in course prerequisites. Advanced techniques are introduced in this course and students select those most appropriate to their work to build upon. There is a great deal of independent investigation required to excel in this course. Students propose ideas and then develop them using drawings, models and mock-ups in order to realize the best potential for their design.

Credit 3 units. EN: H

X10 XCORE 319 Digital Fabrications: A Primer Course in the Use of Computer Modeling for Art & Design

This course focuses on fabrications both real and virtual. The ubiquity of computers in design, studio art, communications, construction and fabrication demand that professionals become comfortable with their use. It is also important in a group of ever-specializing fields that one knows how to translate between different software and output platforms. This comfort and the

ability to translate between platforms allow contemporary artists and designers to fabricate with ever-increasing freedom and precision. This course introduces students to 3-D software with a focus on 2-D, 3-D, and physical output. Through a series of projects, students learn to generate work directly from the computer and translate it into different types of output. Starting from first principles, the course covers the basics from interface to output for each platform used. The course also familiarizes students with a range of CNC technology and other digital output for both small- and large-scale fabrication. The course is broken into three projects. In the first, students focus on computer-generated geometry and control systems. In the second, students generate physical output and line drawings. The final project focuses on rendering, context and cinematic effects. The software covered includes, but is not limited to, Rhinoceros 3-D, Maya, Illustrator and Photoshop. Additionally, students use the 3-D printer, laser cutter and/or other digital output tools.

Credit 3 units. EN: H

X10 XCORE 321 Mapping Soft Bodies

This course develops digital design skills with conceptual understanding of the transformative process of artistic production. Mapping Soft Bodies investigates artificial objects and industrial products as a basis for inspiration. Through digital modeling and scanning the human body, each student develops a transformation process that analyzes the social and cultural conditions of a new emerging design. New body armatures are modeled through CAD/CAM (laser cutting) and Rapid Prototyping (3-D printing) for physical outputs. The course is for students who are interested in emerging technologies and digital production. This course is for students interested in design, sculpture, architecture and digital media by enhancing 3-D technologies and allows each student to develop abstract thinking and making processes.

Credit 3 units. EN: H

X10 XCORE 325 Global Discourses in Art & Architecture

This course examines art, architecture and urbanism from the perspective of global production, dissemination and reception. It focuses on the global exchange of people and ideas as one of the main vehicles of visual culture, both historical and contemporary. Through a series of focused case studies, the course probes inherent dichotomies within art and architecture driven by their site-specificity, yet also by their constant global displacement across various disciplinary, cultural and geographical boundaries. The course content includes lectures, discussion sessions, readings and textual and visual projects that examine cross-cultural aspects of art and architecture.

*Enrollment limit will be set at zero and students will be enrolled from the waitlist. The course is open to all students at Washington University regardless of their major field of study. Sam Fox School sophomores will have priority.

Credit 3 units.

X10 XCORE 327 Color Systems

This course is a sustained investigation of color. Students study how color is affected by light, by space, by arrangement, by culture, and by commerce. The course aims to deepen the understanding of color's complexity and pervasiveness as a fundamental element of shared visual culture. The course develops both technical and conceptual skills to aid in visual translation. In addition to color-specific inquiry, a goal is to expand ideas of research and enable students to integrate various methods of acquiring knowledge into their art and design practice. Throughout the course, students discuss various

processes of making/constructing, the connection between color/form/concept, and strategies for idea generation and brainstorming. The course allows for much individual freedom and flexibility within varying project parameters.

Credit 3 units.

X10 XCORE 330 Cell Phones, Snapshots and the Social Network

This course is designed around the cell phone camera as a means of art production using blogs, interactive websites, social networking and mass distribution of digital images and videos. Students explore the art-making potential of the cell phone camera as a snapshot camera of the modern age. Students post daily images/videos on blogs and other social media sites. Readings and discussion topics include the culture and aesthetic of the snapshot, the vernacular image, and the role of social networks in image production and distribution. Students are required to design and maintain at least two social networking sites and to supply a cell phone with the ability to upload images to the Internet.

Credit 3 units. EN: H

X10 XCORE 332 Metabolic City: Spaces of Bodily and Environmental Wellness

Metabolic City probes bodily and environmental wellness as intertwined cultural, social, and technological constructs. From the British Archigram Group, to the Japanese Metabolists and the Dutch artist Constant, a number of visionary projects in the 1960s re-imagined our notion of the body, city and the environment. By means of individual and collective gadgets, tools and spaces they bridged the scales of the body and the city, weaving together issues of bodily and environmental performance. Through a combination of texts, discussions and projects, the course engages in a delayed conversation with these projects, proposing the concept of "metabolism" both as a bodily function, but also as an environmental mechanism that operates on a global scale. Some of the key concepts discussed in the class include global citizenry, urban imagination, networks, performance, virus, urban protest and insurgency. The course fulfills the Sam Fox Commons Course requirement and the architectural history/theory elective requirement.

Credit 3 units.

X10 XCORE 336 Urban Books

Since the beginning of the 20th century, art, architecture and urbanism together have investigated the production of images that shape the symbolic dimension of our experience of large cities. The main goal of this course is to critically embrace this tradition through the format of the artist's book. St. Louis is the focus for our observations because it is familiar to our everyday lives and also because it provides key situations for understanding contemporary forms of urbanity and how urban space is produced and imagined. The course bridges the curricular structures of art and architecture by enhancing the collaboration between the practical and scholarly work developed in both schools, with additional support from Special Collections at Olin Library. It combines the reading, lecture, and discussion format of a seminar with the skill building and creative exploration of a studio. This course is divided into three progressive phases of development: the first consists of weekly readings, discussion and responses in the form of artist's books. The second phase focuses on the Derive with physical activities and assignments based on interacting directly with the urban

environment. The third phase focuses on individual research, documentation, and final book design and production.
Credit 3 units.

X10 XCORE 338 Shifting from Lines to Surfaces/Virtual to Empirical

Digital Media Design: Introduction to Exploring Digital and CAD/CAM Technology. This is a course in computing theory and techniques on 2-dimensional digital software and advanced 3-dimensional modeling software. Weekly demonstrations on software operations and individual projects are developed. This course bridges the gap between 2-D computational tools that define lines and the 3-D tools that develop complex surfaces. These surfaces explore the possibilities of creating and articulating the non-linear geometries manipulated on the digital environment. The final project consists of 2-dimensional drawings, digital models, and physical models produced by advanced CAD/CAM technology. By employing alternative techniques and emerging technologies of manufacturing, new forms of objects and perceptions will redefine multiple design processes.

Credit 3 units. EN: H

X10 XCORE 342 Florence Commons

This is a required course for all students in the Florence Study Abroad Program. Content for the course fosters the idea of collaboration, approaching how art, architecture, urbanism and design are related in Italian visual and material culture. All faculty work together to establish a shared semester theme and media and conduct collective introductory activities and reviews, as well as combined field trips. The instructor determines a specific approach to these shared goals. This framework allows for both cross-disciplinary work and increased breadth and focus regarding their semester study topics, a format that is unique to the undergraduate Florence Program. Students will be enrolled by the registrar in a section that best suits their area of study.

Credit 3 units. EN: H

X10 XCORE 343 Digital Filmmaking: City Stories

Digital Filmmaking: City Stories is a cross-university video art course for students interested in making short films through a transdisciplinary and time-based storytelling in both narrative and non-narrative formats. Whether documentary or abstract, individually produced or collaborative, all projects in this course have a required social and urban engagement component. In this course the city becomes a laboratory for experimentation and contribution. Students meaningfully engage St. Louis, and their projects address sites of concern to explore the complex fabric of the city by way of framing and poetic juxtaposition. City Stories merges several arts and humanities disciplines, including experimental cinema and documentary journalism and creates an opportunity for empathic listening and inquiry as students discover stories built from collective as well as individual memories.

Credit 3 units.

X10 XCORE 345 Shopping

This seminar examines shopping as a social and cultural construct that operates at several levels in relation to art, architecture and urban planning. Shopping is the fundamental activity of the capitalist marketplace. It is also inextricably linked with major aspects of public and foreign policy, where national consumerism is closely linked to global tourism, and it is at the core of economic development. Shopping is, as well, a common denominator of popular culture, frequently satirized in contemporary art, film and literature. Participants in the seminar read selections from various writings about shopping and the marketplace. We also view several films examining the shopping environment in narratives of power and desire. Prerequisite is completion of Sam Fox foundations year. Open to sophomores and above.

Credit 3 units.

Architecture

Visit <https://courses.wustl.edu> to view semester offerings for A46 ARCH.

A46 ARCH 212B Introduction to Design Processes IV

Introduction to Design Processes IV engages design through the analysis of human behavior and scale to generate a programmatically complex project within the urban context. Prerequisites: successful completion of ARCH 111, ARCH 112 and ARCH 211B, with a grade of C– or better.
Credit 4.5 units.

A46 ARCH 111 Introduction to Design Processes I

This introductory architectural design studio engages the basic principles of architectural context, composition and experience. Through various fieldwork strategies, students explore architectural context through observation, analysis and invention. The site-specific design processes bridge two-dimensional and three-dimensional work, including drawing, drafting and making. The experiential qualities of architecture are introduced through basic considerations of scale and human interaction. The course work includes studio, work, lectures, presentations by students, readings, writing assignments and field trips.
Credit 3 units.

A46 ARCH 112 Introduction to Design Processes II

This core design studio engages the basic principles of architectural design through iterative processes of drawing and making, using a variety of tools, media and processes. The course work includes studio work, lectures, student

presentations and local field trips. Prerequisite: A grade of C– or better in Arch 111 or co-registration in Arch 111.
Credit 3 units.

A46 ARCH 121 Community Building, Building Community (Hewlett Program)

Credit 3 units.

A46 ARCH 175 Designing Creativity: Innovation Across Disciplines

Via a series of lectures from prominent thinkers and practitioners in the areas of medicine, neuroscience, law, engineering, architecture, human-centered design, business, stage design, and the performing arts, Designing Creativity is a course that covers the study and practice of the creative process across many disciplines. From "Ah-ha" epiphanies to slow-developing discoveries, the creative process is employed by innovators and artists in virtually every corner of the globe. In this course, we explore the study of those processes by hearing from creatives in many fields with practice of those techniques via a LAB component that allows students to explore the development of innovative ideas in collaborative teams followed by project presentations to core faculty and classmates.

Same as InterD 175

Credit 3 units. A&S IQ: HUM

A46 ARCH 209 Design Process

Open to Engineering, Arts & Sciences, Business and Art students at all levels. This studio course engages students in the process of design with an emphasis on creative thinking. Course content relates directly to the interests of engineers as well as arts and science, business and art students who wish to problem solve about positively shaping the texture and quality of the built world. A series of 2-D and 3-D hands-on problem-solving projects introduce students to design concepts as they apply to site (ecosystems and outdoor places), to humanistic place making (personal and small public spaces), to structure and materials (intuitive exploration of structural principles through model building), to environmental issues (effects of climate, light, topography, context and sensible use of natural resources). No technical knowledge or special drawing/model-making skills are required. There are informal group and individual discussions of each person's stages in inquiry. The investigations take the form of study models made of recycled materials. Guest lecturers participate throughout the semester. The concluding project for the semester allows each student to work with their unique academic and personal interests, utilizing the process of lateral thinking.

Credit 3 units. EN: H

A46 ARCH 210 Introduction to Design

A lecture/studio course for students not majoring in design. Lectures on creativity, general issues in design and architecture. Studio work providing hands on exploration of two-dimensional and three-dimensional design ideas related to the lectures as well as discussions of assigned readings. Aimed at providing a broad view of design and the role of the designer. Class meetings for one hour of lecture and three hours of studio discussion each week.

A46 ARCH 211 Introduction to Design Processes III

Introduction to Design Processes III engages design through the lens of perception investigating the relationship between materiality and inhabitable space situated in a natural context.

Credit 3 units.

A46 ARCH 211B Introduction to Design Processes III

Introduction to Design Processes III engages design through the lens of perception investigating the relationship between materiality and inhabitable space situated in a natural context. Prerequisites: successful completion of Arch 111 and 112, with a grade of C– or better; or successful completion of Arch 210, with a grade of C– or better.

Credit 4.5 units.

A46 ARCH 241 Community Dynamics

CBTL course.

Credit 3 units.

A46 ARCH 243 Design as Export

This course introduces students to the contemporary global characteristics of design in the late 20th and 21st century. The marketing, fabrication, distribution and consumption of design is global, yet the cultural and formal identity of most design products are national and regional. How do traditions of design and quality based on centuries of a national and regional design culture react and adapt to a global market? What is the culture of design? What is design identity? Italian design is the primary focus of this course, followed by Japanese and Asian design and manufacturing. Case studies include examples of industrial design, fashion design, communication design and automobile design. The course also includes presentations by design curators and representatives of various international design companies.

Credit 3 units.

A46 ARCH 2661 Semester Abroad Program Seminar

This course prepares students participating in the College of Architecture's Spring Semester Abroad Program in Florence, Italy. The seminar meets eight times over the course of the semester. Attendance is required.

Credit 1 unit.

A46 ARCH 275 Service Learning Course: Environmental Issues

Credit 2 units.

A46 ARCH 302A Advanced Freehand Drawing

Application of the principles presented in ARCH 302 to more ambitious and individualized work. Work can include drawing, color, painting, printmaking, etc. The final target is a suite of independent works that explores a chosen medium or subject and that could constitute a small one-person show, but exploration and growth are given precedence over production. Weekly/bi-weekly critiques. Prerequisite: ARCH 302 or equivalent previous studies.

Credit 3 units.

A46 ARCH 302B Advanced Freehand Drawing (and Painting)

Credit 3 units.

A46 ARCH 303A Drawing on the City

Credit 3 units.

A46 ARCH 308A Digital Fabrications

Credit 3 units.

A46 ARCH 309 Special Topics: Photography for Architecture Students

The scope of this course is to offer both a technical and theoretical understanding of architectural photography. The course also emphasizes 4x5 view camera skill, use of DSLR and digital input, studio lighting as related to model reproduction, discussion of work, and development of individual projects.

Students must provide a digital camera.

Same as ART 309

Same as ART 310

Credit 3 units. EN: H

A46 ARCH 311 Architectural Design I

Prerequisite: ARCH 212B with a grade of C- or better. There is a required weekend, out-of-town field trip.

Credit 6 units.

A46 ARCH 312 Architectural Design II

Prerequisite: satisfactory completion of Arch 311.

Credit 6 units.

A46 ARCH 312A Architectural Design II (Study Abroad)

Prerequisite: Satisfactory completion of Arch 311.

Credit 6 units.

A46 ARCH 317 Architectural Design I (MArch 3)

The first of a three-semester sequence that introduces students to architectural design, focusing on conceptual, theoretical and tectonic principles. First-semester MArch 3 students only.

Credit 6 units.

A46 ARCH 318 Architectural Design II (MArch 3)

The second of a three-semester sequence of design studios. Continues examination of issues raised in ARCH 317. Second-semester MArch 3 students only.

Credit 6 units.

A46 ARCH 323A Architectural Representation I (MArch 3)

Credit 3 units.

A46 ARCH 323B Architectural Representation II (MArch 3)

The course examines the history/theory and practice of representation, specifically the systems of drawing used in architecture. The objective is to develop the requisite discipline, accuracy and visual intelligence to conceptualize and generate a relationship between space and form. The course focuses on two concurrent tasks: first, to outline and analyze the historical development of representational logics and their impact on architectural ideation, and second, to explain the codification and usage of specific geometries, including orthographic and isometric projection, central and parallel perspective, and

architectural axonometric. We see that, rather than a translation of reality, representation operates between perception and cognition as a transcription of reality and is a powerful instrument in the design and making of architecture. The relationship between the drawing forms and the tools used to produce them are brought into focus as manual, digital, photographic and physical applications driven by drawing intentions. This course is organized as a lecture/lab with emphasis on the practice of digital media and physical modeling. Emphasis is on participation and excessive absences are noted. Please note: The second half of the semester focuses on computing, for which each student is required to have a laptop computer.

Credit 3 units.

A46 ARCH 326G Digital Fabrications

Credit 3 units.

A46 ARCH 326J Digital Representations

Digital Representations introduces students to digital modeling and fabrication, parametric workflow, and various 2-D and physical output techniques. Starting from first principles, this course begins with the basics from interface to output for each platform used, developing skills in digital modeling and physical output and serving as a prerequisite for more advanced courses in design scripting and digital fabrication. Students complete a semester-long project divided into three assignments, beginning with developing a detailed digital model of a formal precedent, which introduces students to basic skills in modeling with nurbs, subdivision surfaces, and meshes. Continuing to develop a clear diagrammatic organization and hierarchy, students expand the characteristics of their original formal precedent using Grasshopper to create a set of dynamic, flexible behaviors. Drawing upon their initial understanding and analysis of organizational systems within their formal object, students transfer their observations into the construction of a spatial parametric model that has potential to serve structure, fabrication methods, and material assembly. Finally, students develop their digital model into a geometrically rationalized material system that draws upon their initial precedent, producing a physical model, renderings, and 2-D drawings presented in the format of a final review.

Credit 3 units.

A46 ARCH 3283 Architectural History I: Premodern Encounters in World Architecture

This course explores the history of architecture from its origins until the beginnings of the modern period from a global perspective, focusing on patterns of interaction and exchange between and within both elite and vernacular building cultures. Using selected examples from Eurasia, sub-Saharan Africa and the Americas, the course traces the major elements of change and development in the design of the earth's built environment, including technologies and materials, typology, the organization of labor and capital systems to the profession and the public. Course requirements include a mid-term, final exam and research paper.

Credit 3 units. EN: H

A46 ARCH 3284 Architectural History II: Architecture Since 1880

An introductory survey of the history and theory of architecture and urbanism in the context of the rapidly changing technological and social circumstances of the past 120 years. In addition to tracing the usual history of modern architecture, this course

also emphasizes understanding of the formal, philosophical, social, technical and economic background of other important architectural directions in a global context. Topics range from architects' responses to new conditions in the rapidly developing cities of the later 19th century, through early 20th-century theories of perception and social engagement, to recent efforts to find new bases for architectural interventions in the contemporary metropolis.

Credit 3 units. EN: H

A46 ARCH 333 Case Studies in 20th-Century Architecture

Through a series of analytical, critical and interpretative studies of singular works of architecture in the 20th century, this course focuses on the manifold processes and contexts of their production. Each work is examined as a physical and cultural artifact with precise formal, intellectual and ideological intentions and meanings. The architectural object, understood as a synthesis of multiple criteria and frameworks, is explored from its conception through its realization based on certain principles (fundamental precepts of the discipline of architecture) and a broad range of concepts (abstract ideas understood as the products of speculative and reflective thought).

Credit 3 units.

A46 ARCH 336D Biomimicry: A Biokinetic Approach to Sustain(Able) Design

There is a conceptual similarity between the way an organism and a building engage their respective environments. A biological system responds to the unique condition of its ecosystem; architecture responds to the unique conditions of the site. Building on this principle are the fields of biomimicry, the study of design and process in nature, and biokinetics, the study of movement within organisms, and their ability to address architectural problems with elegant, technologically advanced, sustainable solutions. Biomimicry: A Biokinetic Approach to Sustain(Able) Design focuses on kinetics as an essential element of biomimicry in the context of architecture and employs the study of the kinetic aspects of biological systems — structure, function and movement — to inform the design and engineering of buildings. A systematic approach to researching and translating the kinetic function of organisms leads to a successful bridging of biological and architectural concepts.

Credit 3 units.

A46 ARCH 336E Biomimicry, Teleology and Organic Architecture

This seminar is intended to develop an understanding of the history and evolution of biomimicry as a significant design tool from the emergence of biology as a science in the early 19th century to the present. Biology was the first discipline to confront the problem of teleology, of design in nature. For the past 100 years, biological references and ideas are present in the work of architects and in the writings of architectural theorists. Biomimicry, a term coined by Janine Benyus, has developed into a new discipline that studies well-adapted organisms' designs and processes and then imitates life's genius to design human applications, aiming at a sustainable development. The intent of this seminar is to establish a systematic approach to research and analysis of the history and theory of this biological analogy and its influence on the history of environmental architecture, as seen through the lens of biomimicry. In addition to a historical analysis, students analyze case studies that exemplify the relationship of architecture to biology, focusing not only on built work, but on the writings and the designer's positions in terms

of this relationship. Classes consist of a combination of formal lectures and facilitated discussion periods. In addition, each student chooses a particular architect and, through research and analysis, assesses the influence of biomimicry in his or her work and presents these results in a paper that includes a critical analysis and a proposal on how to advance the architect's work to the highest level of biomimicry.

Credit 3 units.

A46 ARCH 339 Concepts and Principles of Architecture I

This weekly seminar course addresses issues of Western architectural thought through a focused series of readings and discussions. The necessity and role of architectural theory in general is examined. Issues of tectonics, historicism, typology, regionalism, modernism, postmodernism and other critical frameworks for the consideration of architecture are thematic subjects of discussion. Selected readings include Vitruvius, Alberti, Laugier, Semper, Ruskin, Le Corbusier, Gropius, Kahn, Rossi, Venturi, Eisenman, Libeskind and Koolhaas. Weekly reading assignments, attendance, participation, one summary and discussion introduction based on a reading topic, final paper. Required for first-semester MArch 3 students. Fulfills history/theory elective for MArch 2 students.

Credit 3 units.

A46 ARCH 343A Design As Export

This course introduces students to the contemporary global characteristics of design in the late 20th and 21st century. The marketing, fabrication, distribution and consumption of design is global, yet the cultural and formal identity of most design products are national and regional. How do traditions of design and quality based on centuries of a national and regional design culture react and adapt to a global market? What is the culture of design? What is design identity? Italian design is the primary focus of this course, followed by Japanese and Asian design and manufacturing. Case studies include examples of industrial design, fashion design, communication design and automobile design. The course also includes presentations by design curators and representatives of various international design companies.

Same as XCORE 343

Credit 3 units.

A46 ARCH 346 Building Systems I

The first of a two-course building systems sequence. The course progresses from a survey of the physical and structural properties of building materials through an analysis of building assemblies and systems. Structural systems are examined relative to their performance characteristics and issues related to manufacturing and construction. Structural systems in wood, steel and concrete along with masonry systems are reviewed in this class. Additionally, the primary and secondary performance characteristics of enclosure systems are identified and analyzed in this course. This course also covers the design of egress systems and vertical transportation systems in buildings.

Though the course focuses primarily on the underlying principles associated with these building systems, industry standards and building code requirements are an integral part of the review.

Credit 3 units.

A46 ARCH 347 Building Systems II

Building Systems II is a lecture/workshop course. It is the capstone course in the technology sequence. The course is composed of a series of lectures related to technical theory, an analysis of technical precedent, and an integration exercise. The lectures focus on structure and enclosure systems, active and passive climate control systems, natural and artificial lighting systems, mechanical and electrical services for buildings. The lectures take place over the course of the semester. During the first half of the course, students conduct the analysis of technical precedent in architecture exercise. Technical precedents are analyzed relative to their performance characteristics and their relationship to other technologies in the building. During the second half of the semester, students conduct an integration exercise. Technical systems are selected based on architectural issues, performance characteristics and systems integration. Credit 3 units.

A46 ARCH 347A Building Systems II

Credit 3 units.

A46 ARCH 350 Service Learning Course: Environmental Issues

This service learning experience allows Washington University students to bring their knowledge and creativity about the many subjects they are studying to students at the Compton-Drew Middle School, adjacent to the Science Center, in the City of St. Louis. This course is for arts and sciences students of differing majors and minors, business, architecture and art students, and engineering students from all engineering departments. In the first third of the semester students: (1) begin learning the creative process of lateral thinking (synthesizing many variables, working in cycles); (2) work with a teammate to experiment with the design of 2-D and 3-D hands-on problem-solving workshops about exciting environmental issues, for small groups of students at Compton-Drew Middle School; (3) devise investigations for the workshops about environmental issues embracing the sciences, the humanities and the community; (4) work with the professor individually and in their team, as well as seeking advice of faculty from a specific discipline, through the semester in the preparation of their evolving curricular plan. During the last two thirds of the semester, WU students are on-site during the Compton-Drew school day, once a week on each Monday from noon to 1:30 p.m. to teach small group workshops for some of the sixth- and seventh-grade students. There is also a one-hour class meeting on Wednesday at a time to be finalized later. CBTL course. Credit 3 units.

A46 ARCH 355 Interdisciplinary Ecosystems Principles Integration

Credit 1 unit.

A46 ARCH 363 Architectural Photography

This course offers a technical and theoretical understanding of architectural photography. Basic operation and orientation of digital and analog cameras are covered, as well as best practices for photographing interior and exterior spaces with both natural and artificial lighting. Students learn how to document artwork and architectural models/structures for portfolio presentation purposes, preparing them for working relationships with professional photographers in the industry. This course emphasizes 4x5 view camera skill, use of DSLR and digital

input, studio lighting, and development of individual projects. Digital camera required; 4x5 camera provided by photography department.

Same as ART 363

Credit 3 units. EN: H

A46 ARCH 375B STL City Studio Programming: Understanding, Engaging and Organizing Columbus Square Citizenry

This class dedicates itself to designing programs for future community projects in the Columbus Square neighborhood. Programming occurs organically through understanding, engaging and organizing the neighborhood. These projects are cross-disciplinary, not limited to any particular practice or discipline. They are realized in future semesters (or in certain cases, this semester) through the support of STL City Studio. The class builds on relationships established during last year's City Studio design/build project, Learning Landscapes at Patrick Henry Elementary School, a series of gardens at the center of the neighborhood. To define and develop projects, we use narrative to clarify both our own values and the values of the neighborhood. Students regularly visit Columbus Square and its adjacencies, particularly Downtown St. Louis, uncovering visible and invisible stories. We listen to what residents, officials, experts and planners have to tell us about the place and what the place could become. Throughout the semester, students present their findings through narratives, diagrams and other representations. Projects emerge out of this collaborative, narrative-based process. All students, from any discipline or at any level, may take this class.

Credit 3 units.

A46 ARCH 376 Design Thinking for Science, Engineering, Business and the Liberal Arts

This introductory course outlines strategies and methodologies drawn from a wide range of creative design practices, including architecture, landscape architecture, urban design, industrial design and others. The course explores how these ideas and techniques are similar to practices in science, engineering, business and the liberal arts and how they might be applicable to multidisciplinary problem solving. Topics include perception, representation, technology, group intelligence, bio-mimicry and context-based learning, among others. Emphasis is given to the intersection of design thinking with environmental problems and the relationship between design thinking and innovation. The course includes lectures, guest lectures with case studies, and design projects. Open to all undergraduate students.

A46 ARCH 404 Advancing Integrated Sustainability

Do you want to work differently? Toward more effective outcomes? This course is a call to students from all disciplines with the conviction that it is necessary for us to work together while contributing from our specific fields of study to find solutions to challenges in our built environment. Students apply the knowledge base they acquire in this course to formulating ideas for actual community projects in St. Louis. Students learn to integrate and apply a holistic range of social, economic and technical systems inspired and optimized by models in the natural world. A foundation in natural and biomimetic systems is overlaid with analysis of corporate mission, principles and triple bottom-line thinking in order to learn how to build defensible, value-based arguments for implementation of sustainable systems. With the expressed intent of achieving net positive outcomes in the built environment, the following topics are addressed: brownfield property reuse; storm/wastewater management; urban heat island management; air quality; potable water issues and opportunities; material cycles and flows including embedded energy, emissions, toxicity, virgin vs. recycled content and waste diversion; energy efficiency and renewable energy opportunities; transportation, accessibility and mobility choices; vernacular and cultural expression; local and healthy food availability; fitness advocacy and other health issues; education; public outreach and transparency; governance; and the economics of these systems. Lectures, case studies, readings and class discussions support application exercises and experimental projects to propose ideas for improving the built environment at multiple scales. Assignments are reviewed often to assist each student's learning and questions. Complementing leading-edge theory with practical outcomes are provided with the intention that students develop valuable skills to be incorporated in their other academic projects. Please visit <http://samfoxschool.wustl.edu> for work samples and student manifestos from previous classes. Credit 3 units.

A46 ARCH 404A Contemporary Exhibition Studies

Credit 1 unit.

A46 ARCH 404C Topics in Architectural Entrepreneurship

Entrepreneurship has become a very important issue for businesses small and large. What can the profession of architecture learn from these ideas? This course, offered in partnership with the Skandalaris Center for Entrepreneurial Studies, offers students a chance to gain exposure to the entrepreneurial ideas that are innovating the architectural community, and begin to foster a mindset of architectural

entrepreneurship that has the potential to be widely beneficial to the profession. Each week the course welcomes a guest speaker who, as the owner of a firm or innovator of a new business proposal in the design field, provides case studies to show students what type of entrepreneurial ideas are shifting the architectural discipline. From sustainability, to urbanization and localism, to emerging global growth engines, and the future structure of the architectural network, each lecturer brings new insight to what it is to be an architectural entrepreneur. Credit 3 units.

A46 ARCH 404D For Purpose: Art & Design as an Ethics-based Model of Entrepreneurship

Working from the premise that art and design have the ability to enrich and transform lives and communities in a tangible way, students redefine social, environmental and cultural problems as opportunities. Students are encouraged to bring ideas that have the potential to address these problems through the creative processes of art and design. Students work in teams to develop a proposal for a project, product or service-based organization with the potential to address a specific issue. Students draw lessons from researching established individuals, companies and not-for-profit organizations that are involved in the production of culturally significant, creative work that also supports a larger social mission, and students apply this research to their own proposal. Each proposal is developed into a business/sustainability plan that demonstrates the value of the proposal and explains the resources required to meet specific goals. This course introduces students to the uncertainty that is inherent in the entrepreneurial process. Students work to develop skills to evaluate ideas in relation to their personal values, the idea's ability to address a specific problem, and the resources required to implement a sustainable solution. The process helps students to navigate the uncertainty and assess the risk associated with implementing their proposal through morphing the idea concept, seeking advice, and building a coalition of stake holders. This course is open to disciplines outside of architecture. Students in Art, Social Work and Engineering are encouraged to register. CBTL course. Credit 3 units.

A46 ARCH 404E Design: Urban Ecosystem Principles Integration

In today's world, your discipline has grand challenges whose solutions often lay in other realms. How will you train yourself to leverage the interdisciplinary partnerships required to innovatively solve and evolve in a rapidly changing world? The mission of this interdisciplinary course is to "Advance the interrelationships of ecological and human systems toward creating a healthy, resilient, and biodiverse urban environment," and brings together experts and students in ecology, urban design, architecture/landscape architecture, economics, social work, and engineering, drawing from inside and outside the WU community. Building from our knowledge of ecosystem principles and function, a diverse group of leaders in their fields provides lectures, readings, and student project leadership to understand and test Healthy Urban Ecosystems Principles among human and ecological (nonhuman) systems and the range of sociopolitical processes entailed with their implementation. Class content is developed by Washington University leaders in their disciplines as well as external organizations such as the Missouri Botanical Garden, the Field Museum in Chicago, and others. This course builds upon a 1-unit fall seminar (not a prerequisite) that introduces challenges and solutions to achieving healthy urban ecosystems, and

provides students an opportunity to more deeply engage and manipulate the interrelationships of symbiotic urban systems and apply those concepts in multidisciplinary project applications. Projects leverage student-defined challenges in the evolving laboratory of urban St. Louis using Healthy Urban Ecosystems Principles to develop multidisciplinary integrated solutions to challenges encountered in urban areas such as climate change and resilience, security of ecosystem services, social inequity, economic strife, and community vitality. Students present their work in a public forum at semester's end.

Credit 3 units. A&S IQ: SSC EN: S

A46 ARCH 405A Furniture Design for the Architect

Students design and fabricate furniture. The box and chair are used as vehicles to study historic examples of furniture design, structure, fabrications and finishing techniques. Other issues that are addressed are: material awareness and craftsmanship. Evaluation of the final products is based on design, structure, craftsmanship, material use, beauty and finish. CBTL course.
Credit 3 units.

A46 ARCH 405D Furniture Design

The course focuses on the design of tables using wood as the primary material in response to "rational and irrational strategies" (systematic and emotional). Each student designs, develops and builds prototypes of two tables using the same material. One table is the product of a systematic analysis of material qualities, production procedures and other constructivist principles. The other table is the product of more explicitly intuitive, emotional and interpretive responses to the nature of the material and its production. Course limited to 10 students.

A46 ARCH 406W Simple Book Structures

Students investigate the form of the visual book through construction of several different book structures, among them the accordion, the flag book, the tunnel, simplified case binding and a portfolio case. This class investigates the organization of the visual book through the sequencing of images and the structure of the book as a reflection of content. It is hoped that the class permits the student to pursue new approaches to presenting visual information in book form.
Credit 1 unit.

A46 ARCH 406Y The Diagram

The purpose of this workshop is to fully understand how we can exploit the concept and method of the diagram in order to better access ideas, reveal themes, discover underlying processes and relationships, and ultimately, to better represent our final design intentions. The goal of the workshop is: to understand the position of the diagram in the architectural design process by looking at examples of architect's drawings/other diagrams; to understand what diagrams can mean, and specifically how to use them in design; to test methods of drawing and diagramming through a series of targeted exercises; and to be able to further exploit ideas and designs through their representation — skills for the larger context of the architecture studio and for future analyses.
Credit 1 unit.

A46 ARCH 406Z Vertical and Horizontal Structures

Designing with advanced digital modeling and CAD cam output through laser cutting and CNC milling. Students develop complex structural systems through virtual design tools and translate them into physical objects that can be programmed for human interaction.

A46 ARCH 408A Digital Visualization Workshop: 2-D Representation

This workshop is an introduction to basic Auto CAD drawing layout and organization with printing process. The workshop introduces students to importing and exporting into other graphic softwares (Photoshop and Illustrator) allowing a basic understanding of resolution and line types with articulated graphic awareness to develop complex 2-D drawing capabilities. Required for all 317-level MArch 3 students, who are given priority in enrolling. Open to all other architecture students as space allows.
Credit 1 unit.

A46 ARCH 408B Digital Visualization Workshop: Advanced 3-D Modeling

Credit 1 unit.

A46 ARCH 408C Digital Visualization Workshop: Advanced Rendering

This workshop is an introduction to complex digital rendering in Rhino 4.0 with plug-ins Flamingo, V-Ray, Maxwell and Fry Rendering Engines. These skills are needed for sophisticated rendering outputs for more hyper-real visualization. The workshop introduces students to material, lighting, camera and global illumination processes. This workshop is required for all MArch students at the 419 level, who are given priority for registration in this course. Open to other upper-level undergraduate and graduate architecture students as space allows.

A46 ARCH 408D BIM 101 Workshop

Credit 1 unit.

A46 ARCH 408H #technology.today.tomorrow

The design industry is changing and the need to understand this change is critical. Before students graduate, they should make themselves aware of the way technology is impacting the process of delivering projects today and tomorrow. This evening workshop exposes students to various technologies within different parts of the building industry. We review technology used in design and construction with special guests, from leaders in the industry demonstrating how they are using these tools today. We explore technology on the horizon and hear from those developing tools for the future. This workshop is not meant to be a software instruction class, but more of a window into the profession. #BIM #technology #future #AEC #design #construction #cloud #knowledge #parametric #computation #collaboration.

Credit 1 unit.

A46 ARCH 408J Performance Enhancing

The term "performance" has many meanings that are either quantitative, qualitative, or both simultaneously through a range of design professions. The suggested goal of performance is an optimistic enhancement to a designed entity or idea and holds the potential to be highly provocative relative to the method it is deployed when arguing for a particular design procedure or effect. The double entendre suggested by the term performance relates to both how the system technologically improves a functional aspect along with a more theatrical act of performing. Design in both architecture and fashion relies on both interpretations to create a multidimensional discourse necessary to advance conceptual design investigation. The seminar class explores issues of performance of complex surfaces at the scale of the human body. The class consists of lectures, discussions, readings, physical material manipulation, and 3-D digital modeling and digital fabrication. The use of Rhino (with T-splines and/or Grasshopper) or Maya is deployed for the digital design of the skin systems. Material systems are explored initially through manual experimentation and then combined with the digital investigation for the final digital fabrication using tools such as 3-D printing, lasercutting, CNC milling, and thermoforming, resulting in a final garment for the human body. The class is offered to both fashion and architecture students

and the investigations occur in teams of two where ideally one from each discipline is represented.

Credit 3 units.

A46 ARCH 408M Atmospheric Animations

This course explores the capacity of modifying perception, as a way of thinking and making in design process. We recognize the ambient complex environment base on the concept of each element in space as a figure of motion, being sensitive to a specific period of time. Each student begins with selecting a certain way of observing, and developing a method to document and analyze a piece of dynamic perception which is then re-constructed through drawings or models, primarily focusing on one aspect of the experience, such as material performance, light reflections, air flow, etc. Final part of the project is representing the synthetic perception, by creating the atmospheric imagery in motion. Students are introduced to various techniques of recording ocular perceptions with the aid of digital tools, 2-D representation, 3-D modeling and animation rendering throughout the course, both as general workshops and individual project basis.

A46 ARCH 4102 Lively City: Behavioral Studies & Public Space Design

During this three-day masterclass in Berlin, Germany, 20 students have the opportunity to learn about behavioral studies and the design of public spaces. Working alone and in small groups, students acquire new perspectives and skills that put people and their needs at the heart of the creative process of re-imagining and transforming cities. Livability, lively cities, public life and other concepts describing inviting, vibrant and stimulating urban environments are frequently communicated in new visions for the future of cities today. This focus on "urban life" is a direct reaction to the urban realities created in the 20th century, where increases in our standards of living and the associated city building processes have created areas in which large and increasing numbers of people have become isolated from each other, socially and geographically. Despite our new awareness for the need to plan for a shared and intensified urban life in sustainable cities, we continue to have difficulties in understanding exactly what this "urban life" is, how much of it we truly want and need, and how we can reconcile the often conflicting and simultaneous needs of people for privacy and social stimulation. Employing the examples of University City and the Gateway Arch/Archgrounds the class studies behavior in accessing and using defined sections of both urban areas as a way of dealing with complex urban design challenges in St. Louis. Through field studies and observations each student explores cost-effective and culturally sensitive solutions that can improve the integration of these important urban assets in the City of St. Louis. Open to all graduate students, with priority given to MUD studio and seminar students. Visas are required to travel to England, depending on the passport country of the student. Preparation for visa applications begins on the first

day of classes during the spring semester. There is a minimum enrollment of eight by February 1st.
Same as MUD 4102

A46 ARCH 410W Perspective E: Architectural Education and the Public Good

This discussion-based course explores Perspective E of the Five Perspectives from the National Architecture Accreditation Board's Conditions for Accreditation: Architecture Education and the Public Good. Changing the perspective into a question, [What does it mean] "to be active, engaged citizens; to be responsive to the needs of a changing world; to acquire the knowledge needed to address pressing environmental, social and economic challenges through design," ... provides the context for a series of discussions. Discussions include student presentations of case studies in education and practice as well as speculation about how this perspective might be met within the Graduate School of Architecture, Landscape and Urban Design.

A46 ARCH 418P Realizing: Pulitzer Foundation for the Arts

A transdiscipline, material-based workshop providing insight into the process, dedication and collaboration required to realize a signature work of architecture. Design, construction and management team representatives serve as primary sources. Construction of an architectural concrete wall-corner is central to the workshop effort. Attendance and involvement with the associated spring Colloquia is required. Working in conjunction with the Pulitzer Foundation for the Arts, the workshop includes two types of instruction: active participation and topic discourse. A colloquium celebrating the 10-year anniversary of the Pulitzer Foundation's opening divide the workshop's calendar and the two instruction types. An investigation and thorough understanding of the Pulitzer Foundation for the Arts initiates the workshop, followed by the planning, construction and placement of an architectural concrete wall. Required participation in the semester's Lecture Series includes compiling question/answer responses related to profession feedback. The workshop endeavors to provide each student with a sound understanding of current practice methods involving design team, project delivery and material investigation/application. Instruction methods consist of readings, discussions, expert commentary, hands-on construction and site visits. A materials fee is required. Enrollment is limited.

Credit 1 unit.

A46 ARCH 419 Architectural Design III (March 3)

The third of a three-semester sequence of design studios.

Continues examination of issues raised in ARCH 317 and ARCH 318.

A46 ARCH 421J Building a Better World: Architecture and Social Reform in America

Architects, planners and social reformers have addressed urban issues of poverty, crime, delinquency, labor unrest and class and ethnic tensions through activist models of the public library and school, the YMCA, the playground and the model home — or by a retreat from the city in the form of utopian settlements. This seminar examines the history of environmentalist thinking and social reform in the United States and to some extent, Europe, from the Enlightenment to World War II, including the work of Andrew Jackson Downing, Frederick Law Olmstead, Ernest Flagg and Frank Lloyd Wright and critics such as Jane Jacobs and Prince Charles. The class becomes familiar with reform architecture and its context and assesses the effectiveness of this strategy as a solution to social problems. Open to graduate and upper-level undergraduate students. Fulfills history/theory requirement.

Credit 3 units.

A46 ARCH 421K Modern vs. American: Rethinking the Architectural Relationship

What is American about American architecture? Architects, historians and theorists have asked this question throughout our nation's history, but it gains renewed importance in this age of globalization. Can we, should we, continue to apply national labels to our architecture? This seminar examines the architectural culture of the United States in the 20th century, with special attention to the relationship between national identity and the internationalizing forces of modernity, particularly European modernism. Through analysis of theoretical writings, developments in education and practice, and key projects such as the Chicago Tribune Tower Competition, the Illinois Institute of Technology and U.S. embassies around the world, students gain insight into the dynamic between the local and the global in the design of the built environment. Course requirements include in-class presentations, field trips and a substantial research paper. Fulfills history/theory elective requirement.

A46 ARCH 421S American and International Urbanism

This advanced history and urban issues seminar explores the history of urbanism as it developed in the United States in the late 19th and early 20th centuries and trace some of its international outcomes. We examine changing theories of how urban environments should be shaped, placing efforts by designers to transform the built environment within the context of major social, cultural and political changes. These include public urban parks and parkways, City Beautiful neo-Classical

urban environments, regional planning, auto-based planned communities and shopping centers, high-rise hotels, theme parks, and megastructural airports. We explore the relationships between the built environment, social change, political struggle and design theory. We, in addition, track the establishment, professionalization, growth and contests over the fields of architecture, landscape architecture, urban planning and design. We pay close attention to shifting conceptions of, conflicts over, definitions of the urban public, the boundaries of the "public sphere," the relationship between public and private spaces, and the role of government in shaping and policing the urban landscape. By using historical methods to analyze documentary evidence, the course facilitates greater understanding of the complexity and layering of the urban landscape and critical urban design and landscape practices. Fulfills History/Theory and Urban Issues elective requirements.

A46 ARCH 421T Urbanism: Cambridge MA

Credit 3 units.

A46 ARCH 421U Urbanism: Chicago

This design research seminar focuses on the urban infrastructure and associated buildings of central Chicago, in and around the areas near the Loop. The Chicago metropolitan area is the third largest in the United States, and from 1870 until the 1950s, Chicago was America's "second city," surpassed in size only by New York City. It remains the densest and most "urban" of the cities of the Midwest, with many examples of complex interconnections between rail lines, highways, and various kinds of pedestrian-oriented urban environments. This seminar combines historical and field research on some of the many architectural urban design interventions in Chicago. Students choose among several topic areas to produce detailed drawings and digital models of specific urban interventions. There will likely be a publication of the work. Topic areas for digital documentation include the pedestrian relationships between transit lines and various buildings and urban complexes, including the large Millennium Park interventions by SOM and others over the Illinois Central railway lines adjacent to Lake Michigan, and Wacker Drive, a 1920s underground limited access highway along the Chicago River, and other projects. Fulfills History/Theory and Urban Issues elective requirement.
Credit 3 units.

A46 ARCH 422G GIS for Site Design

This course module introduces GIS mapping software and its application to methods used in site planning and design. The focus of this half-semester course is to understand the potential of GIS to analyze, visualize and utilize complex data. Students learn techniques and tools in ArcGIS software and explore how these can be applied to projects specific to individual sites. This course introduces new skills and analytical complexity while building upon previously learned representation techniques. Same as LAND 422
Credit 1.5 units.

Credit 3 units.

A46 ARCH 423 History of Landscape Architecture

This seminar reviews the history of gardening in the Western tradition from the Renaissance to the present and in the Chinese

and Japanese traditions. Park-making, neighborhood design, and the rise of landscape architecture as a profession receive attention, including several classes held at notable St. Louis examples. Course requirements include readings, a design or research project, and a final exam. Fulfills History/Theory elective.

Credit 3 units.

A46 ARCH 423D Videography for Designers

This seminar course examines the practice of capturing, producing and analyzing moving images as a method of inquiry for design. We focus on the analytical and communicative qualities of time-based media (recorded sequences, video, slideshows, animation, simulation, remote sensing, etc.) as a human-landscape intermediary that has the ability to alter understanding and evaluation of the environment. We explore techniques from a range of disciplines — art, design, sociology, anthropology, etc. The course meets weekly for brief lectures/presentations to direct our inquiries, discussion of foundational readings and ideas, media workshops, screenings, local field trips, and/or student presentations of work. Throughout the semester, students generate brief, exploratory work that focuses on methods and techniques, and a larger, final project that engages the themes of the course. Open to all graduate and upper-level undergraduate students, a goal of the course is to blur boundaries between art and design, and to capitalize on their various approaches. No experience with video, animation, or other software is required — only the desire to explore and incorporate time-based methods into individual processes. Same as LAND 423D

Credit 3 units.

A46 ARCH 424L The Chinese City in Historical Perspective

This seminar examines the development of urban centers in China through history. The city is approached from formal, territorial, political, and socio-economic perspectives, situated in the broader landscape of cultural and environmental changes. Key themes are continuity and change, citizenship and public life, urban form and structural transformations, and infrastructure and the hinterland. The course begins with archaeological and textual origins of the earliest cities and ends with the staggering growth and globalization of Chinese cities today.

A46 ARCH 4280 Architectural History I: Antiquity to Baroque

This lecture course introduces major historical narratives, themes, sites and architects from ancient Greece to the end of the Baroque period. We take an extended look at the dawn of the modern period in the 15th and 16th centuries through a global perspective, turning eastward from Renaissance Europe to the Ottoman, Mughal, Chinese and Japanese empires. The great chronological and geographic span of this course is pulled

together around the themes of (1) classicism and its subsequent reinterpretations, and (2) the pursuit of the tectonic ideal. Our aim is to recognize how these ideological pursuits of modern architecture evolved out of longer historical processes. We also pay close attention to major sites of landscape and urban-scale work. Requirements include a mid-term, final exam and a series of short papers.
Credit 3 units.

A46 ARCH 4284 Architectural History II: Architecture Since 1880

An introductory survey of the history and theory of architecture and urbanism in the context of the rapidly changing technological and social circumstances of the past 120 years. In addition to tracing the usual history of modern architecture, this course emphasizes understanding of the formal, philosophical, social, technical and economic background of other important architectural directions in a global context. Topics range from architects' responses to new conditions in the rapidly developing cities of the later 19th century, through early 20th-century theories of perception and social engagement, to recent efforts to find new bases for architectural interventions in the contemporary metropolis. This course is required for all MArch 3 students.
Credit 3 units.

A46 ARCH 4285 Architectural History I: Premodern Encounters in World Architecture

This course explores the history of architecture from its origins until the beginnings of the modern period from a global perspective, focusing on patterns of interaction and exchange between and within both elite and vernacular building cultures. Using selected examples from Eurasia, sub-Saharan Africa and the Americas, the course traces the major elements of change and development in the design on the earth's built environment including technologies and materials, typology, the organization of labor and capital systems, and the codification and transmission of architectural knowledge and symbolism to the profession and the public. Course requirements include a mid-term, final exam and research paper.
Credit 3 units.

A46 ARCH 4286 Architectural History I: Antiquity to the Enlightenment

This course addresses the development of architecture and urbanism from Greco-Roman antiquity to the European Enlightenment, while also paying close attention to contemporary developments in the non-Western world, especially in the Islamic world and East Asia. The course's objective is to set the stage for major ideological pursuits of modern architecture as they developed in the 19th and 20th centuries, examining how these ideas evolved out of longer-term historical processes. We focus on issues of classicism, tectonic culture and historicity, and discuss commonalities and differences toward them across time and cultures in the premodern world.

A46 ARCH 434R Decoding Sustainability

This course engages worldwide conversations regarding current global environmental issues in relation to the production of building materials. Students begin by defining dilemmas faced by designers and architects in the selection of materials, followed by introductory information on biomimicry, natural capitalism, true cost and lifecycle analysis. This course then looks at national, international and industry environmental standards that govern building materials with respect to the triple bottom line: environmental impact, economic impact and social equity. By analyzing specific "certified" building materials, students see how much or how little is being measured and how transparent the certification processes are. Building materials and the environmental standards that govern them will continue to evolve throughout the entirety of a designer's life. Therefore, developing a thinking/filtering process to employ in the selection aids each designer in his or her career. This course seeks to develop design thinking in relation to the environment while developing tools to understand how building materials can be evaluated for sustainability.

A46 ARCH 435C Site Works
Credit 3 units.

A46 ARCH 435D Surface It, With Pieces

The seminar focuses on the in-depth understanding and development of ideas based on the technical, experiential and aesthetic exploration of one material: concrete, into a specific application; pavers. The students design a module and then explore different pattern options. The pattern modules consider the limitations of the material in terms of strength, weight, size, etc. The goal is to make a single piece or pieces that can be lifted by a single person without much effort and combine them in different ways in order to create an artificial topography.

Students learn about the material itself as well as the act of construction, assemblage and mass production, which include methods and technology, ranging from tools to form work. The forms for the concrete pieces are built through a process of CNC milling and/or vacuum-formed plastic. The challenge is to define environmentally sensitive strategies for problem solving, conceptual development and poetic expression at both levels of the design process, conceptual and real. Sustainable principles, such as the use of recycled materials as an aggregate in the concrete mix, are an important consideration for this class. Students also are asked to investigate water run-off in a given area and alter the percentage of open grids as a way to create a pervious, though walkable surface. Construction is the ultimate goal.

Credit 3 units.

A46 ARCH 435E Furnish It, With Pieces

Public space is a key constituent that determines the character of a neighborhood and a city. It is embedded in the urban fabric and it can mediate the relationship between people and their particular surrounding landscape. Urban furniture and hardscape can play an important role in offering a wide range of uses for public spaces. The design of such pieces affects the way people live and experience a particular environment. The ultimate goal of this course is to design, fabricate and install a set of repeatable units to equip a vacant urban lot in order to offer opportunities for social interaction. The seminar focuses on the in-depth understanding and development of ideas based on the technical, experiential and aesthetic exploration of one material: concrete, into one specific application: urban furniture. This seminar builds up on the scope of the Creative Activity Research Grant awarded by the Sam Fox School of Design & Visual Arts where five porous concrete pavers were designed for a vacant plot in North St. Louis. The challenges are: to adapt the given pavers to a new site condition and to propose new urban furniture made out of concrete. It involves the construction of pieces able to equip a gathering space as well as sidewalks that can offer local residents the opportunity to interact with others. This provides not only aesthetic appeal to the residents and visitors, but also allows the possibility of implementing an actual project in an abandon plot in Old North. We will enrich the community with a wide range of training opportunities as each step in the process of making the plaza is used for teaching purposes, from making pavers and other pieces, to salvaging, reusing or repurposing recycled material. Students are asked to design and build concrete urban furniture necessary for the gathering area. The pieces can encompass a wide range of uses: chairs and benches, tables, raised beds, planters, litter bins, modular fencing and mobility-related pieces such as bike racks, bollards and car stoppers. This is an opportunity for hands-on experience. These pieces have to consider the limitations of the material in terms of strength, weight, size, etc.; learning about the material itself as well as the act of construction, assemblage and mass production, which includes methods and technology, ranging from tools to molds. The formwork for the concrete pieces will be built through a process of CNC milling and rubber molds or vacuum formed plastic. The challenges are to define environmentally sensitive strategies for problem solving, conceptual development and poetic expression at both levels of the design process, conceptual and real. Sustainable principles such as the use of recycled materials as an aggregate in the concrete mix are an important consideration. Construction is the ultimate goal of this class. We work in collaboration with Anova, a local manufacturing company dedicated to the design and production of site furnishings. Anova provides some materials and brings their expertise to the project.

Credit 3 units.

A46 ARCH 436 Mapping Soft Bodies/Constructing Complex Objects

Theory and research on digital design and manufacturing. "Body and soul are thus constructed in the same manner, at the intersection of a cluster of radii of curvature. Both are then simply effects of convergence that are constituted in space, on either side of the surface of the work that envelops them. It follows that the body is no less ideal than the mind" (Bernard Cache, *Earth Moves*). This course explores the complex systems of geometries that compose the human body. The students invent techniques of digital-mapping the contours of the soft bodies and define the potential for developing new forms of spatial effects uncovered through the digital representation. The mapping procedures are developed to trace and project the human scale and material interface imposed by the fluctuating movements of the bodies in dynamics. Through the making of these forms, each student manufactures new objects through alternative prototyping techniques.

A46 ARCH 436A Information Modeling and Technology

Credit 3 units.

A46 ARCH 436B BIM in Practice

Building Information Modeling (BIM) is a developing method of creating, sharing and managing project data through a visualized 3-D or 4-D model. While it continues to deliver on an initial promise to increase design consistency and efficiency while minimizing errors, the focus of attention is shifting to the use of BIM to facilitate integrated methods of project delivery. The course explores the use of the BIM platform and the development of data exchange methods in architectural design through a case study and subsequent design project. Students are provided instruction in Revit covering the creation, management and extraction of data from a model, but also look at the technology more broadly, discussing the changes advanced by the deployment of BIM processes in practice.

Credit 3 units.

A46 ARCH 436C Coding Growth: Scripting and Computational Methods for Design

The course covers an array of advanced design techniques using scripting within the rhino/grasshopper environment. Although, thorough knowledge of grasshopper is not required, it helps to ease the transition away from graphic algorithm creation and into the C# scripting language. While C# is slightly more difficult than its technical equal, VB, the language can be used in a wide variety of other programs and applications, such as Processing and the Arduino microcontroller, which students have the opportunity to explore should they feel comfortable in those environments. The foundation of the class is based around three major categories: mathematical systems, agent-based systems and simulated growth. Before covering the base material, a three-week intensive overview of grasshopper covers nearly everything students need to know in order to proceed successfully. We begin basic scripting exercises by duplicating existing grasshopper components and proceed to the advanced categories from there. In the first category,

mathematical systems, students learn how to create and control useful L-Systems such as branching, fractals and generational scaling. We then move into topological algorithms, in order to learn how to sort and search through the scripted results to quantify their success or failure. Once single codes can be executed relatively successfully, the course progresses into agent-based systems. The topic is introduced through simple investigations in basic geometrical relationships such as circle packing and mesh relaxation. We then study the behaviors of birds, ants, fish and termites in order to extract the necessary parameters to mimic their behavior. Building complexity yet again, students investigate the ways in which one can code growth. This ultimately leads to an architectural project at the pavilion scale for which students are asked to design a single unit that will mutate and deform itself iteratively in order to achieve explicit performance criteria that have been laid out for them. Students learn how to use genetic and generative algorithms, (a combination of the previous lessons) to design the building unit and appropriate transformation criteria and, hopefully, by the end of all of this, each student has designed a site-adaptable, feasible pavilion without knowing what that pavilion will look like in any given application.

A46 ARCH 440 Explorations in Structural Principles

This course begins with a series of presentations (lectures) about primary systems in an effort to familiarize students with basic structural principles. This is a non-mathematical exploration of how structures "work" and why. We attempt to become conversant in "the language of structures." Students identify a particular system and do case studies exploring its characteristics and how, where and why the system has been used. These explorations ultimately lead to the development of large-scale (testable) models.

A46 ARCH 452H Tokyo: Destruction and Renewal of Japan's Capital

Tokyo was leveled twice over the course of the 20th century, first by the Great Kanto Earthquake in 1923 and then in the final months of World War II. One of the world's largest and most technologically advanced cities, Tokyo is also an agglomeration of neighborhoods and still manifests the unique heritage of its Edo-past. In this seminar, we examine themes of continuity and change, local and global, through these cycles of destruction and renewal. In addition to the built environment, we also incorporate other visual and artistic media, such as literature and film. Enrollment in the course does not require prior knowledge of Tokyo or the history of modern Japan. Fulfills History/Theory elective requirement.
Credit 3 units.

A46 ARCH 452J Empires in Distress

This seminar examined the processes of modernization to building cultures and cities in the non-Western world, focusing on major imperial regimes such as China, Japan, India and Ottoman and Austro-Hungarian empires. We critique the idea of modern architecture emanating from the West as a hegemonic

phenomenon and identify localized points of resistance and appropriation. Among the themes are nationalism, regionalism, technology, historiography, institutions of the building industry and culture, vernacular and preservation. MArch students should have completed the Architectural History I & II sequence. The course is open to graduate students and advanced undergraduates. Fulfills the History/Theory elective requirement. Fulfills the Methods requirement for the undergraduate minor in History and Theory.
Credit 3 units.

A46 ARCH 452k The Ambiguity of Scale: Japan's Landscape Tradition

Credit 3 units.

A46 ARCH 454A Contemporary Discourses on Public Space

Since the 1980s, public space has been a subject of intense theoretical debate and the key to urban revitalization strategies in cities such as Barcelona, Amsterdam, Berlin, London, Jerusalem, Curitiba, Toronto, New York, etc. Evident from the investigation into this theory and practice is the notion that the design of public space according to the typology of either the 19th century or modern city does not suffice and that the domain of contemporary public space demands a new discourse. This seminar investigates the theoretical framework and practice of various contemporary discourses on public space in order to reveal the implicit intellectual frameworks and practices. Discourses investigated include public space as the mimicry of history to public space as non-place; and from public space as the enclave of fear and marginality to public space as the theater of economic and social exchange. The seminar also situates the design discourse in the broader political, social and philosophical discourses of the public sphere.
Credit 3 units.

A46 ARCH 455A Urban Books

Since the beginning of the 20th century, art, architecture, and urbanism together have investigated the production of images that shape the symbolic dimension of our experience of large cities. The main goal of this course is to critically embrace this tradition through the format of the artist's book. St. Louis is the focus for our observations because it is familiar to our everyday lives and also because it provides key situations for understanding contemporary forms of urbanity and how urban space is produced and imagined. The course bridges the curricular structures of art and architecture by enhancing the collaboration between the practical and scholarly work developed in both schools, with additional support from Special Collections at Olin Library. It combines the reading, lecture, and discussion format of a seminar with the skill building and creative exploration of a studio. This course is divided into three progressive phases of development: the first consists of weekly readings, discussion, and responses in the form of artist's books. The second phase focuses on the Derive with physical activities and assignments based on interacting directly with the urban environment. The third phase focuses on individual research, documentation, and final book design and production. Same as XCORE 336
Credit 3 units.

A46 ARCH 455C DuBois Meets Churchill: Social Justice and the Built Environment

Winston Churchill famously stated, "We shape our buildings and afterwards, our buildings shape us." W.E.B. DuBois equally

famously stated, "The problem of the 20th century is the problem of the color-line." This course is about what happens (and has happened, and perhaps could happen) at the intersection of those two quotes. With the built environment always in the middle of the table, but never in isolation, students in this course consider its role relative to social justice as viewed through a multitude of lenses. Schedules permitting, faculty from other schools in the university also might offer their perspectives on how their respective disciplines touch on issues of social justice and the built environment. There also might be field trips to a few selected locations around St. Louis where some of these issues have played out or are playing out. This course deals with many of the issues that the fall course, Community Building/Building Community, deals with, but in a lecture format. This is partly the result of weather constraints (the spring semester is not as amenable to extensive field trips as the fall semester is), but it also allows students who can only take a spring course to do so, and in a more traditional lecture format, without as many tours and without the community service requirement.
Credit 3 units.

A46 ARCH 456B Way Beyond Bigness...or Toward a Watershed Architecture

2015 marks the 10- and 20-year anniversaries of two seminal events that arguably have questioned the very notion of architecture/art/design: 1) the publishing of the "S, M, L, XL" in October 1995 that featured Rem Koolhaas' manifesto of "Bigness"; and, 2) the landfall of Hurricane Katrina just outside of New Orleans in August 2005 that catapulted fields of design into an unprecedented post-disaster context. Still struggling with both, students reconcile these two disciplinary jolts by negotiating the seemingly incongruous snapshots of history as new models of activism and opportunism. Students propose a mixed-media-manifesto project for a new multidiscipline speculative field that sails uncharted realms of "Way Beyond Bigness." Tentatively coined "Watershed Architecture," this requires the simultaneous submersion and assertion of architecture/art/design within other disciplines; the formulation of alternate modes of representations for emerging practice-based models; the blurring of academic and professional agendas in the urgency of activism; and the integration of multiple scales, interest groups and agendas in ridiculously complex and antagonistic situations.

A46 ARCH 462K Productive Systems: Ecological Articulations in Architecture

Credit 3 units.

A46 ARCH 462L Articulating an Idea

Credit 3 units.

A46 ARCH 462M Pattern Recognition

Interrogates a recent history of architecture replete with pattern. Case studies of patterning in contemporary projects are undertaken through the production of analytical, computational models to reveal an underlying logic of performance and construction. In parallel, the course presents a theoretical survey of related issues in art, psychology, computation and

ecology. In this context, pattern is understood as a performative expression of an ecological system, distinct from historical issues of ornament and representations. Informed by the analysis, students then digitally produce an original pattern, both graphically operative and spatially materialized.
Credit 3 units.

A46 ARCH 463A Emerging (Re)Development Strategies

Credit 3 units.

A46 ARCH 463B Emergent Urbanisms

This course surveys emergent models of urbanization in globalizing cities that thus far defy categorization or exist peripherally in studies of urban form. The goal of the course is to equip students with the theoretical and historical background, the analytical tactics, and the critical awareness necessary to reposition themselves as designers in these increasingly challenging contexts. Through case study examples and supporting readings, the course deciphers the formal, social and environmental effects of particular processes defining new urban spatial configurations in city-regions around the globe. Most of these processes are driven by discourses of "efficiency," such that urban forms are increasingly inflected by economic operating systems as they are subsequently detached from traditional concerns of livability and public interest. Emerging urban assemblages include: massive manufacturing warehouse landscapes or logistical distribution centers and "aerotropolis" transit hubs as well as those spaces left behind by regional restructuring: de-urbanizing (or deliberately erased) environments that contradictorily "enable growth" in other areas (or over the same areas); and the informal settlements that emerge more spontaneously on the margins of mainstream urban policy. Students use their understanding of these spatial and logistical configurations to project creative models for re-direction or engagement. Sources and analytical tactics are drawn from across fields including design, sociology, geography and history. Fulfills Urban Issues elective requirement, MUD-Track elective requirement.
Same as MUD 463B
Credit 3 units.

A46 ARCH 464A Architecture and Photography

Seminar deals with issues raised by use of photography by architects, historians and critics. Seminar confronts the assumption that our knowledge of notable buildings and architectural space is based primarily on the photographic image. Photographs are tacitly accepted as objective facts, and the pervasiveness of photography in magazines, books and exhibits as substitute for direct experiences is rarely questioned. Goal of seminar: to foster a healthy skepticism of photographs, and to investigate the role of photography as a means of record and convey complex spatial conditions by the ordering conventions of the frame. While not technical, the course introduces students to technical aspects of photography that are particularly relevant to architectural photography: parallax, lighting, lens distortion, depth of field, format and grain, cropping, photomontage and point of view. Fulfills history/theory requirement.
Credit 3 units.

A46 ARCH 464E Spatial Representations in Contemporary Culture

The main objective of this seminar is to analyze the crisis of representation in contemporary culture and its relationship to

architecture and the urban landscape, looking for a critique of architecture beyond formal aspects. The framework for the seminar is the transition of modernity into the contested terrain of postmodernity, and the limitations and possibilities faced by architects in the thinking and in the production of space. The activities are mainly organized along the reading and discussion of texts drawn from a multidisciplinary theoretical approach, and by the analysis of examples of representation from films, artworks, architecture and the city.
Credit 3 units.

A46 ARCH 464F Contemporary Theories in Architecture and Urban Practices

Since the 1960s the practice of design in architecture and urbanism has been increasingly associated with a theoretical framework. Theory has both provided support to the investigation of the phenomena related to the built environment and has faced problems in the translation of abstract constructs into the practice of design. This seminar presents examples of relevant contemporary interpretive and critical theory and confronts them with current practices in architecture and urbanism. The purpose of this confrontation is to develop skills to articulate individual critiques of design as a mediation between discourse and practice. Required work: The seminar activities take place in the form of reading and discussion of texts, and analyses of current examples of architecture and urban practices. Each student must investigate an individual case study to be presented in the form of a seminar as well as a final paper. Prerequisite: ARCH 222 or ARCH 223. Fulfills history/theory elective.
Credit 3 units.

A46 ARCH 464G Drawing and Urbanism

Credit 3 units.

A46 ARCH 465C Art, Design and Entrepreneurship: Creative Placemaking Beyond The City

This course invites students from diverse areas of interest to engage with the cultural landscape of Marion County and Hannibal, Missouri — a region that, through the work of Mark Twain, popularly epitomizes both rural life and the allure of the Mississippi River. While a quarter of a million tourists visit this area each year to follow in Tom Sawyer's footsteps, the work of local artists, designers and entrepreneurs are innovating the narrative of this place and opening up room for consideration of African-American experience, local food systems, and the complex series of social and economic connections within life along the Mississippi. This course puts that spirit of collaboration and imagination in the hands of students, challenging them to think beyond the borders of their disciplines to create projects that present new connections between place, community and culture to both rural and urban audiences. The National Endowment for the Arts defines creative placemaking as an opportunity when "public, private, not-for-profit, and community sectors partner to strategically shape the physical and social character of a neighborhood, town, tribe, city, or region around arts and cultural activities." Through fieldwork, research and idea-creation, students collaborate with mentors on the ground to create locally-appropriate projects that address questions of culture and design in the region. Occasional off-campus visits are joined in the classroom to a wide range of readings, case studies, and webstreamed conversations with national leaders across fields. The course concludes with small teams designing a specific plan, event, or project that could later be implemented in the community.

Credit 3 units.

A46 ARCH 467 The Visible and the Invisible

A seminar on philosophy, criticism and architecture providing an intellectual framework for making architecture, by investigating the development of thought and ideas in other disciplines and the effect they have had in the arts. Specific assigned readings are presented and discussed by the class weekly. Emphasis placed on the discussion and the formulation of personal interpretations developed after careful and thoughtful reading. Offers an arena in which theory and practice, often seen as irreconcilable, can be understood as inseparable aspects of the same realm, informing both the author and the work. Fulfills history/theory requirement.
Credit 3 units.

A46 ARCH 469B Appraising the Opaque: Studies of Architectural Opacity

Credit 3 units.

A46 ARCH 470D The Description of Place

The means by which we come to an understanding of a place profoundly effects any subsequent action taken in that place — specifically the action of building. The possibility for place to gather and hold, not only things, but also ourselves, our memories and our imaginations — the event of place — is defined as place becomes concretely defined and choreographed as a static background for action, rather than as a fluid and dynamic action itself. In order to reassert the active reflecting and gathering power of place and, subsequently, of architecture, the process of knowing and describing where we build needs to be reconsidered. This seminar focuses on the potential for visual description to effect alternative readings of place that are otherwise obscured, and speculate regarding the implications of such readings on the making of architecture. The course is divided equally between theory and making. In addition to discussions surrounding assigned readings, students select a specific place of study in St. Louis from which they develop different methodologies for observation and description over the course of the semester. Students have a choice of submitting either a final paper or project, which speculates as to what new understandings have emerged and what possible actions could result from their study.
Credit 3 units.

A46 ARCH 470E Extreme Architecture

Credit 3 units.

A46 ARCH 471A Continuity and Transformation

Throughout history and across cultures, certain ideas, concepts and organizational strategies have persisted in architecture, despite advances in social ideals and technological capabilities. The seminar explores the phenomenon of this continuity with the goal of uncovering the manner in which these ideas and strategies are transformed. Whether classified by use, characteristic form or compositional device, the continuity of these notions is clearly traceable as a body of knowledge waiting to be revealed, understood, assessed and, when valid, built upon. The transformation of ideas and strategies is one of the most fundamental activities of the designer, but relies on careful study. We discover evidence of this phenomenon in vernacular architecture, patterns of settlement and habitation, and in the work on many of our most influential practitioners, such as Le

Corbusier, Kahn, Moneo and Zumthor, as well as in the realm of painting and sculpture including Cubism, Suprematism and Expressionism.

Credit 3 units.

A46 ARCH 475D Landscapes Through Time: The History of St. Louis' Built Environment

Credit 3 units.

A46 ARCH 475E History of the Modern Art Museum

This seminar explores the development of the modern art museum as an architectural type, measured against evolving nature of display objects, curatorial practices, and demands of the viewing public. Since the consolidation of the type in the early 19th century, the art museum has been the primary site where the symbiotic trajectories between artistic and architectural development have played out. Also examined is the importation of this program into non-Western countries, which responded with their own canons and classifications of fine art. The course ends with recent case studies in which architecture has made new, often aggressive, commentaries on objects it is designed to display. The course is open to graduate students and advanced undergraduate Architectural History minors. Fulfills history/theory elective requirement.
Credit 3 units.

A46 ARCH 476 Approach: A Studio in Publication Design

Credit 3 units.

A46 ARCH 477 Contemporary Landscapes

This course examines current practices in landscape architecture and the discourses that shaped the field during the last 20 years. Organized thematically around the topics of ecology, infrastructure and sustainability, the course aims to provide a number of critical perspectives on the relevance of landscape architecture as a cultural practice. Readings and discussions supplement lectures to trace back contemporary ideas to the late 19th and early 20th centuries. The course also incorporates field trips and presentations by visitors, as well as applied research. The seminar is open to all graduate students. Undergraduates can enroll with the instructor's permission. Same as LAND 477

A46 ARCH 480B Mapping the Metropolitan Mississippi

This seminar explores the relationship of city to river through reading, recording and mapping. Students document their research, create proposals and develop simulations and/or prototypes for a site on the St. Louis riverfront. Methods of inquiry combine hand-recording, photography, GIS techniques and DIY devices. The course alternates discussion sessions,

field research and lab. Open to all graduate students; undergraduates require the instructor's approval. Same as LAND 480B
Credit 3 units.

A46 ARCH 484B Notations on Florentine Architecture

This seminar proposes a historical survey of significant buildings and urban spaces in Florence through the graphic documentation and spatial analysis of selected sites and buildings from antiquity to the Renaissance and to modernism. The general framework of our analysis is to understand the relationship between the historic development of the city and its most symbolic architecture. This approach is based on the work of Italian scholars, such as Giulio Carlo Argan, who define the history of architecture as the history of the city. The course is methodically divided into two blocks of exercises. In the first part of the semester, we focus on readings, site visits, sketches, analytical drawings and photos, as well as the mapping of the urban development of Florence. In the second part of the semester, students focus on the tectonic study of specific buildings through the construction of representational and experimental models. Each student's individual work contributes to a collective 2-D and 3-D final project to be presented as an exhibition in the Florence Studio during the spring and to be shown at the College of Architecture in the fall.

A46 ARCH 484F Monte Carlo Seminar: Drawing the Body, Imagining the City

In 1969, Archigram released one of its most iconic, yet probably also most enigmatic projects — Features: Monte Carlo. A mixed-use proposal for a performance and recreational space, it was both a building blueprint and a discursive device that operated on the scale of the human body and the city. It wove together issues of bodily and environmental wellness and performance, critically engaging the complexities of emerging global culture: mass media, entertainment industry and various environmental issues. The seminar revisits these questions through a combination of theoretical texts and projects, challenging the students to unpack the environment as a complex cultural, social and technological construct. The rich cultural history of Monaco serves as a springboard for these conversations — from the projects by Charles Garnier, Le Corbusier, Archigram and Yona Friedman to the wide-reaching experiments in modern art, design and dance of the Ballet Russe, including its avant-garde choreography by Serghei Diaghilev, stage set designs by Pablo Picasso and costume designs by Leon Bakst, Monaco sustained a highly innovative level of cultural production that was often eclipsed by its socioeconomic peculiarities. By unpacking these innovations within a larger historical and theoretical context informed by the texts of Walter Benjamin, Reyner Banham, Dean MacCannell and others, the seminar draws together bodily experiences and global cultures in modern cities. Open to graduate and upper-level undergraduate students. Fulfills history/theory elective requirement.

A46 ARCH 487 American Architectural Culture Since 1945

This seminar focuses on new ways of thinking about American architecture in the postwar period, to develop new conceptual frameworks to better understand American architecture in the postwar years in its larger context of social, political and urbanistic change. Unlike a history survey course, it not only focuses on the canonical works of well-known designers such as Mies van der Rohe or Louis Kahn, but also situates such work within the various new spatial, technological and social directions of the postwar era. It begins by examining how American architecture changed from the neo-Classical- and Arts and Crafts-inspired directions of the prewar years into the more fragmented and complex situation after 1945. This course also considers the complicated ways that American cities in that period were transformed from dense, streetcar-based industrial environments into sprawling suburban metro areas, typically also becoming racially divided in this process. It also looks at some of the complexities within modern architecture itself, some of which developed directly into postmodernism. These included important innovations in spatial organization, environmental planning and new building technologies, as well as fundamental changes in landscape design, campus design and public school design that have since become part of mainstream practice. Important changes in building technology in this era, which have also tended to be undervalued in the shadow of later concerns about building imagery, also are addressed. Open to graduate students and advanced undergraduates in architecture, art, art history and history. Prerequisite: ARCH 4284 Architectural History II or equivalent course taken elsewhere. Fulfills history/theory elective requirement.
Credit 3 units.

A46 ARCH 488 Architecture Service Learning Practicum

The Sam Fox School of Design & Visual Arts, College of Architecture and Graduate School of Architecture & Urban Design give a problem-solving studio workshop about architecture, community and the environment. Fourth- through 10th-grade students from schools in the St. Louis Public School District do 2-D and 3-D hands-on problem-solving projects, use the libraries and computer labs on campus, and be introduced to the field of architecture through lectures and discussions about design projects they undertake. Architecture faculty member Gay Lorberbaum leads the curriculum. Washington University graduate and undergraduate students in architecture participate in the important responsibility of being teaching assistants.
Credit variable, maximum 2 units.

A46 ARCH 490 Architecture Service Learning Practicum

The Sam Fox School of Design and Visual Arts, College of Architecture and Graduate School of Architecture & Landscape Architecture & Urban Design, give a problem-solving studio workshop about architecture, community and the environment. Landscape Architecture

Visit <https://courses.wustl.edu> to view semester offerings for A48 LAND.

A48 LAND 317 Architectural Design I (Landscape)

The first of a three-semester sequence that introduces students to architectural design, focusing on conceptual, theoretical and tectonic principles. First-semester MArch 3 students only. Same as ARCH 317
Credit 6 units.

A48 LAND 401 Landscape Architecture Design Studio I

This core studio explores design principles common to architecture and landscape architecture as well as their own specificity. A series of problems focuses on the relation of component to space through conceptual, analytical, formal and perceptual investigations.
Credit 6 units.

A48 LAND 402 Landscape Architecture Design Studio II

In this core studio course, students develop a spatial understanding of landscape architecture through a series of exercises of varying scale and complexity. Building design skills incrementally, students acquire facility with the manipulation of ground plane and the elaboration of vegetation and material strategies at both site and urban scales. The studio fosters an appreciation of landscape architecture as a systemic construct with formal, ecological and social implications.
Credit 6 units.

A48 LAND 421 Landscape Representation I: Hand Drafting, Drawing and Sketching

The beginning course in the representation sequence introduces students to freehand and mechanical representation as a means for developing and communicating design ideas. Students build a basic understanding of orthographic drawing typologies and traditional drawing materials. Emphasis is placed on development of observational skills, building a design vocabulary, basic drawing skills, and the techniques of landscape architecture and architectural representation.
Credit 3 units.

A48 LAND 422 GIS

This course module introduces GIS mapping software and its application to methods used in site planning and design. The focus of this half-semester course is to understand the potential

of GIS to analyze, visualize and utilize complex data. Students learn techniques and tools in ArcGIS software and explore how these can be applied to projects specific to individual sites. This course introduces new skills and analytical complexity while building upon previously learned representation techniques.
Credit 1.5 units.

A48 LAND 423D Videography for Designers

This seminar course examines the practice of capturing, producing and analyzing moving images as a method of inquiry for design. We focus on the analytical and communicative qualities of time-based media (recorded sequences, video, slideshows, animation, simulation, remote sensing, etc.) as a human-landscape intermediary that has the ability to alter understanding and evaluation of the environment. We explore techniques from a range of disciplines — art, design, sociology, anthropology, etc. The course meets weekly for brief lectures/presentations to direct our inquiries, discussion of foundational readings and ideas, media workshops, screenings, local field trips, and/or student presentations of work. Throughout the semester, students generate brief, exploratory work that focuses on methods and techniques, and a larger, final project that engages the themes of the course. Open to all graduate and upper-level undergraduate students, a goal of the course is to blur boundaries between art and design, and to capitalize on their various approaches. No experience with video, animation or other software is required — only the desire to explore and incorporate time-based methods into individual processes.
Credit 3 units.

A48 LAND 431 Landscape on Structure

This course examines materials and technologies for landscapes on structure — green roofs and vertical gardens, among others. Through a series of case studies, students gain an understanding of the relationships between structure (architecture and infrastructure) and substrate, soil, water and plants. Topics covered include innovative planting and urban streetscape systems, and infrastructural adaptation and reuse. Exercises range from analytical diagrams of construction methods to design concepts for living systems adapted to a variety of structural and environmental conditions. Open to students in architecture, landscape architecture and urban design.
Credit 3 units.

A48 LAND 451 Plants & Environment

Credit 1.5 units.

A48 LAND 452 Planting Design I

Credit 1.5 units.

A48 LAND 452k The Ambiguity of Scale: Japan's Landscape Tradition

Same as ARCH 452k
Credit 3 units.

A48 LAND 453 Advanced Planting Design

This course focuses on both the cultural, environmental, scientific and the technical aspects of planting design. The course is taught in three modular sessions: horticulture and the science of plants; typologies and design such as bosque, grove, glade, allée, meadow, wetlands, hedgerow, etc., and their origins

in productive landscapes, application to contemporary landscape architecture; and the practical hands-on experience in the field with both design documentation to installation techniques. The course offers several field trips to experience urban revitalization, various design typologies, sustainable land use, reclamation and restoration.

Credit 3 units.

A48 LAND 461 Grading + Landform

Credit 1.5 units.

A48 LAND 462 Landscape Materials

Credit 1.5 units.

A48 LAND 465 Landscape Technology

Throughout the world of spatial design, there has been a strong resurgence of interest in landscape methods as a comprehensive and innovative approach toward defining and engineering sites. Techniques of working the land engage dynamic processes, molding conditions and creating forms in order to control erosion, conserve water, and minimize human impacts. As such, landscape methods have created new standards of performance for sites of all sizes and circumstances. Accordingly, this course, intended for students across disciplines, presents an integrated approach to site planning through the intensive study of applied landscape systems. The material covers the spatial and functional systems of designed landscapes and their associated computational and technical aspects: micro- and macrograding, path alignment, and drainage calculation. Through studying these techniques, students learn to implement and quantify water management, microclimate manipulation, and low-impact circulation, parking and servicing. The principles and methods are presented through short lectures and supported by case studies, class workshops and design exercises, tying theory to practical applications.

Credit 3 units.

A48 LAND 477 Contemporary Landscape

This course examines current practices in landscape architecture and the discourses that shaped the field during the last 20 years. Organized thematically around the topics of ecology, infrastructure, and sustainability, the course aims to provide a number of critical perspectives on the relevance of landscape architecture as a cultural practice. Readings and discussions supplement lectures to trace back contemporary ideas to the late 19th and early 20th centuries. The course also incorporates field trips and presentations by visitors, as well as applied research. The seminar is open to all graduate students. Undergraduates can enroll with the instructor's permission.

Credit 3 units.

A48 LAND 480 Case, Trace, Displace: Dialogue between River and City

Credit 3 units.

A48 LAND 480B Mapping the Metropolitan Mississippi

This seminar explores the relationship of city to river through reading, recording and mapping. Students document their research, create proposals and develop simulations and/or prototypes for a site on the St. Louis riverfront. Methods of inquiry combine hand-recording, photography, GIS techniques

and DIY devices. The course alternates discussion sessions, field research and lab. Open to all graduate students; undergraduates require the instructor's approval.

Credit 3 units.

A48 LAND 481A New Landscapes: Current Projects and Practices

This course explores current practice through the examination of built landscapes. Recent projects by leading practitioners are analysed within the context of their own body of work and compared to that of others to identify and evaluate their specific agendas and design signatures. Students learn how to "read" built landscapes in order to identify underlying design intent. New landscape architectural projects in America, Europe and the Asia Pacific are investigated to identify and explain critical concerns of contemporary practice. Recent built projects not only exemplify current practice but also tell us much about contemporary society — the projects have been funded, frequently with the use of public funds. Decision makers, always wary of their responsibility to use funds in a manner acceptable to their constituents, and despite any inclination to be forward-thinking, reflect what society deems "acceptable" design. What is acceptable, however, is rapidly changing as society negotiates new environmental and social challenges. The employment of visual and verbal techniques to clearly, logically and concisely present research is an important component of this course.

Credit 3 units.

A48 LAND 483A Emergence in Landscape Architecture

This course investigates the roles of emergence theory in landscape architectural discourse. For the purposes of the course, emergence is considered as the development of new and/or different conditions as a result of disturbance. Disturbance can take many forms, and the phenomena that are subject to disturbance are many and varied. Landscapes are continually disturbed by social, economic and physical irruptions, but cognitive structures, perceptual frameworks and cultural values are also subject to turbulence that, as with landscape disturbance, often leads to innovation, novelty and resilience. The course explains what emergence theory is, where it comes from, how it relates to environmental design in general, and how it has — or could — change the way we design human and nonhuman inhabitations. Through readings, presentations and discussions, students are able to connect the rise of emergence theory in cultures of contemporary thought to its application in practice. The main theme of the course is the potential for emergence theory to enable us to relate qualitatively different modes of existence (human; nonhuman) to each other and through the connections thus established improve the lifeworlds of all. The structure of the course is based around ten key concepts of emergence, as follows: open systems, situation, initial conditions, assemblage, nature cultures, difference, field theories, disturbance, morphogenesis, formless. Each student investigates one of these concepts and presents their findings to the class.

About Us

The Sam Fox School of Design & Visual Arts is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country's finest

university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art and the Mildred Lane Kemper Art Museum.

The **College of Art**, founded in 1879, was the first professional, university-affiliated art school in the United States. In the 1940s, its broad-based core program helped set the standards for the bachelor of fine arts degree. Faculty over the years have included Max Beckmann, Philip Guston and other internationally known artists.

The **College of Architecture**, established in 1910, was one of eight founding members of the Association of Collegiate Schools of Architecture (ACSA). In 1962, Architecture launched one of the nation's first Master of Urban Design programs. Four winners of the Pritzker Prize, considered architecture's highest honor, have taught at the school.

The **Mildred Lane Kemper Art Museum** dates back to 1881, making it the first art museum west of the Mississippi River. The collection has historically focused on contemporary work. Today the Kemper Art Museum holds roughly 3,500 important paintings, sculptures, photographs and installations by 19th-, 20th- and 21st-century American and European artists, along with significant antiquities and a large number of prints and drawings.

Additional collaborative opportunities are provided by the Department of Art History & Archaeology in Arts & Sciences and the Kenneth and Nancy Kranzberg Art & Architecture Library.

Inquiry, Creativity and Synthesis

The Sam Fox School offers rigorous art and architecture education at both the undergraduate and graduate levels, within the unique context of an independent, nationally prominent research university.

The student body is composed of approximately 300 undergraduate and 50 graduate students in Art, as well as 200 undergraduate and 280 graduate students in Architecture. In all, they represent 17 countries, 47 states and the District of Columbia. Roughly 30 percent of undergraduates pursue combined studies within another university area.

Both core and advanced studios integrate contemporary theory and practice. Among the innovative programs are:

- Multidisciplinary courses co-taught by Art, Architecture, and Art History & Archaeology faculty. Recent seminars have explored the history of illustrated entertainment, combined urban theory with book design and production, and crafted a variety of online publications. Courses in exhibition studies are being offered, and a new program of exhibition studies is under development.

- International studios in Barcelona, Buenos Aires, Florence and Helsinki are taught by Washington University faculty and offer a range of distinctive programs in art and architecture.
- Community projects include the University City Sculpture Series, which funds student-designed public artworks; WashUCity, a mentoring program for local high school artists; and Architecture's Building Community/Community Building, which explores relationships between St. Louis' inner city, nearby municipalities and outlying suburbs.

Uniting Creativity and Scholarship

The Sam Fox School boasts a unique combination of academic and intellectual resources.

The Architecture faculty includes practicing architects, urban designers and landscape architects as well as eminent architectural theorists and historians and a select number of international visitors. The resident, full-time faculty members have won national and regional awards for design excellence and planning, including more than two dozen from the American Institute of Architects alone.

Art's full-time faculty members include prominent painters, sculptors, printmakers and mixed-media artists as well as leading illustrators, graphic designers, fashion designers and photographers. In the past decade, design faculty have won numerous professional honors while fine art faculty have been featured in more than 100 solo exhibitions and 300 group shows on five continents.

The nationally recognized Kemper Art Museum maintains a vital program of exhibitions, publications and educational events. Major thematic shows are drawn from institutions and private collections around the world, while the Contemporary Projects Series highlights nationally and internationally emerging artists. The acclaimed permanent collection includes key works by modern and contemporary artists from Henri Matisse, Pablo Picasso and Jackson Pollock to Christian Boltanski, Candida Hofer and Olafur Eliasson.

Public events include concerts, film screenings, lectures and discussions with distinguished visitors, and museum tours led by student docents. The museum also provides workspace for faculty- and student-curated exhibitions (usually relating to Sam Fox School curriculum). Courses in Art History and Archaeology further complement the critical and practical study of exhibitions while facilitating student involvement in professional curatorial projects.

A Comprehensive Campus

The Sam Fox School is housed in a comprehensive, five-building campus for design and the visual arts. Conceived around a central courtyard, it both reflects and updates Washington University's original campus plan, developed in 1895 by Frederick Law Olmsted, the founder of American landscape architecture.

The architectural centerpiece is prize-winning Japanese architect Fumihiko Maki's new Kemper Art Museum. This elegant, 65,000-square-foot limestone clad structure — a gathering point for scholars and the general public — includes more than 10,000 square feet of exhibition space, art storage facilities, and the Florence Steinberg Weil Sculpture Garden. The museum also houses the new Kranzberg Art & Architecture Library, Art History & Archaeology, and the Newman Money Museum, a state-of-the-art numismatics center.

Adjacent to the Kemper Art Museum is Maki's Earl E. and Myrtle E. Walker Hall. The three-story, 38,000-square-foot building contains painting and sculpture studios and the Nancy Spirtas Kranzberg Studio for the Illustrated Book.

Flanking the new buildings are Bixby and Givens Halls — historic homes to Art and Architecture, respectively — as well as Steinberg Hall, Maki's iconic modernist pavilion. Recent renovations include state-of-the-art computing environments; accessible, light-filled studios; additional workspaces; an auditorium; and a café.

Visiting Artists and Architects

The Sam Fox School invites distinguished academics and professionals to lecture, attend critiques and visit major studios. Recent visitors include:

Degree Requirements

Undergraduate Degree

Students in the College of Architecture select, in consultation with their advisers, a course of study that satisfies the formal degree requirements, addresses their interests and best meets their overall goals.

General

Students will earn either a Bachelor of Science in Architecture or Bachelor of Design in Architecture. The degree program requirements are the same for both degrees through the junior year (300 level). Students then choose which degree program they wish to pursue at the conclusion of the junior level.

College of Architecture Requirements

Students must fulfill the following degree requirements:

A. Requirements

1. Writing I: Every student must demonstrate proficiency in reading and writing the English language and must begin to develop mature skills in framing and revising arguments by completing course work as determined by the Department of English with a grade of C– or better. Transfer students must fulfill the Writing 1 requirement by taking CWP 100 College Writing 1 or by review of a writing portfolio. For more information, visit <http://transferportfolio.artsci.wustl.edu>.
2. Calculus I (Natural Sciences/Math) with a C– or better
3. Physics I (Natural Sciences/Math) with a C– or better
4. Humanities (3 units): Humanities courses examine the human condition as it has been documented and expressed in both past and contemporary times. This area

includes courses from Literature (both in English and other languages), Classics, History, Philosophy, and Religious Studies, as well as some courses in the creative arts such as Dance, Drama, Music and Writing. Courses designated "AR HUM" fulfill a humanities requirement.

5. Social and Behavioral Sciences (3 units): These courses use qualitative and quantitative observation to explore the social environment, relationships with society, and forms of human behavior. This area includes courses from Anthropology, Economics, Education, International and Area Studies, Political Science, and Psychology, and courses from other areas, including interdisciplinary studies. Courses designated "AR SSC" fulfill the Social and Behavioral Sciences requirement.
6. Art History (Art-Arch 113 History of Western Art, Architecture and Design)
7. Art History (Art-Arch 215 Introduction to Modern Art, Architecture and Design)
8. Courses in Arts & Sciences (18 units)*
9. Courses in Architecture, Art, Design; Arts & Sciences; Business; or Engineering (9 units)*

*This excludes physical education, lessons, independent studies, internships, Advanced Placement, International Baccalaureate or transfer credit.

B. Foundation Courses

1. Drawing I
2. Practices: Architecture + Art + Design I, II

C. Sam Fox Commons, Architecture, Art or Design Electives

Every student is required to take at least 6 units of Sam Fox Commons (X10 300-level), Architecture, Art or Design interdisciplinary courses.

D. Major Required Courses: Bachelor of Science in Architecture

ARCH 111	Introduction to Design Processes I	3
ARCH 112	Introduction to Design Processes II	3
ARCH 211B	Introduction to Design Processes III	4.5
ARCH 212B	Introduction to Design Processes IV	4.5
ARCH 311	Architectural Design I	6
ARCH 312	Architectural Design II	6
ARCH 411	Architectural Design III	6
ARCH 412	Architectural Design IV	6
ARCH 3283	Architectural History I: Premodern Encounters in World Architecture	3
or ARCH 3284	Architectural History II: Architecture Since 1880	
ARCH 333	Case Studies in 20th-Century Architecture	3
ARCH 438	Environmental Systems I	3
ARCH 445	Building Systems	3
ARCH 447A	Structures I	3

ARCH 448A	Structures II	3
One History/Theory or Urban Issues elective		3
Electives		3
Total units		63

E. Major Required Courses: Bachelor of Design, Major in Architecture

ARCH 111	Introduction to Design Processes I	3
ARCH 112	Introduction to Design Processes II	3
ARCH 211B	Introduction to Design Processes III	4.5
ARCH 212B	Introduction to Design Processes IV	4.5
ARCH 311	Architectural Design I	6
ARCH 312	Architectural Design II	6
ARCH 3283	Architectural History I: Premodern Encounters in World Architecture	3
or ARCH 3284 Architectural History II: Architecture Since 1880		
ARCH 333	Case Studies in 20th-Century Architecture	3
ARCH 445	Building Systems	3
ARCH 499	Senior Capstone in Architecture	3
Architecture Elective (300 level or above)		3
Electives		21
Total units		63

Typical Freshman and Sophomore Programs for Architecture Students

The following typical programs for the freshman and sophomore years are based on the requirements of the College of Arts & Sciences and on the prerequisite introductory architecture sequences for the undergraduate degrees in architecture:

Freshman Year

ARCH 111	Introduction to Design Processes I	6
& ARCH 112 and Introduction to Design Processes II		
XCORE 101	Drawing I	3
XCORE 181	Practices in Architecture + Art + Design	1
XCORE 182	Practices in Architecture + Art + Design	1
Math 131	Calculus I	3
CWP 100	College Writing 1	3
Art-Arch 113	History of Western Art, Architecture and Design	3
Art-Arch 215	Introduction to Modern Art, Architecture and Design	3
Academic Requirements/Electives		9
Total units		32

Sophomore Year

Physics 117A	General Physics I	4
ARCH 211B	Introduction to Design Processes III	4.5

ARCH 212B	Introduction to Design Processes IV	4.5
ARCH 3283	Architectural History I: Premodern Encounters in World Architecture	3
Academic Requirements/Electives		15
Total units		31

If a student plans to enter the architectural design sequence ARCH 311-ARCH 312 in the fall of the junior year, the student must complete 60 units of academic work by the end of the sophomore year.

Minor in Architecture Requirements

Minor degree candidates are required to complete 18 units including:

1. 6 to 9 units of introductory design, from the following:

ARCH 111	Introduction to Design Processes I	6
& ARCH 112 and Introduction to Design Processes II		
ARCH 211B	Introduction to Design Processes III	9
& ARCH 212B and Introduction to Design Processes IV		

2. 3 units (minimum) of the architectural history survey:

ARCH 3283	Architectural History I: Premodern Encounters in World Architecture	3
ARCH 3284	Architectural History II: Architecture Since 1880	3

3. 3 to 9 units chosen from the following electives:

ARCH 302	Freehand Drawing	3
ARCH 333	Case Studies in 20th-Century Architecture	3
ARCH 336D	Biomimicry: A Biokinetic Approach to Sustain(Able) Design	3
ARCH 404	Advancing Integrated Sustainability	3
ARCH 405A	Furniture Design for the Architect	3
ARCH 434R	Decoding Sustainability	3
ARCH 455C	DuBois Meets Churchill: Social Justice and the Built Environment	3

Additional courses as approved by the associate dean of students or dean.

Additional Requirements

Each undergraduate student shall complete 122 units with a grade of D or better (or credit) and at least 30 units in advanced courses (numbered 300, 400 or 500). The 30 units in advanced courses may include the minimum number of advanced units required by the major areas of concentration. Courses required for the major (see College of Architecture Requirements) must be passed with a grade of C- or better.

Each student shall spend at least three semesters in full-time residence (at least 12 units per semester) at Washington University. Unless excused by the dean of the College of

Architecture, the student must earn the last 30 units at Washington University. The dean of the College of Architecture may waive the full-time residence requirement for students who are employed full-time and have completed at least two years of college.

Regulations

A. No more than eight courses, exclusive of general studies courses, may be taken pass/fail.

B. Students may enroll for credit in only one supervised performance course in any semester. Students may earn a maximum of 12 units toward the degree in supervised performance and/or in group and individual performance courses combined.

The 4+2 Program: Bachelor of Science in Architecture and Master of Architecture

The College of Architecture's Bachelor of Science degree curriculum leads directly into the Graduate School of Architecture & Urban Design's two-year Master of Architecture degree program, providing for the attainment of the accredited professional degree in six years.

Students who have satisfactorily completed, or who are about to complete, the Bachelor of Science requirements can apply to the Graduate School of Architecture & Urban Design's Master of Architecture degree program by submitting an application to the Graduate Admissions Office and by requesting a review of their undergraduate work by the Graduate Admissions Committee. Admission is not automatic, however, and requires approval from the Graduate Admissions Committee. A portfolio is not required for students in the senior year of the Bachelor of Science curriculum at the time of application.

Bachelor of Science in Architecture students thus accepted into the two-year Master of Architecture degree program are required to complete the following courses to fulfill the requirements of the MArch 2 degree:

ARCH 511	Architectural Design V	6
ARCH 512	Architectural Design VI	6
ARCH 538C	Advanced Building Systems	3
ARCH 580	Design Thinking: Research and Design Methods	3
ARCH 611	Architectural Design VII	6
ARCH 616	Degree Project	6
ARCH 646	Professional Practice I	3
Total units		33

Additionally, students entering the two-year Master of Architecture degree program with the college's Bachelor of

Science degree must complete course work not addressed during the Bachelor of Science curriculum, as follows:

1. Completion of both ARCH 438 Environmental Systems I and ARCH 439 Environmental Systems II;
2. Completion of at least one elective course in Architectural History and Theory; and
3. Completion of at least one elective course in Urban Issues.

Students in the MArch 2 degree program have 18 units (six courses) of additional elective credits to complete.

Information

For more information about graduate degree programs and requirements, contact the Director of Graduate Admissions, Graduate School of Architecture & Urban Design, Sam Fox School of Design & Visual Arts, Washington University in St. Louis, Campus Box 1079, One Brookings Drive, St. Louis, MO 63130-4899, or send an e-mail to: samfoxschool@wustl.edu.

Academic Honors & Awards

Dean's List: In recognition of exceptional scholarship, the Office of the Dean compiles, at the end of each academic year, a list of those students whose work has been particularly worthy of commendation. Students will be eligible for the Dean's List if they:

1. Elect to take a minimum of 14 hours of course work per semester on the grade option, and;
2. Achieve a semester grade point average of 3.5 or better.

All undergraduate students electing the grade option are candidates for the Dean's List unless they notify the Office of the Dean in writing that they do not wish to be considered.

Latin Honors: Senior Honors may be awarded to graduating students whose academic performance has been outstanding. To be eligible for Senior Honors, a student must have achieved a cumulative grade point average of 3.5 or above through his or her final semester. A student may be considered for the Bachelor of Design and Bachelor of Science degrees cum laude, magna cum laude or summa cum laude as determined by the dean. Nomination for Senior Honors will ultimately depend on the student's attitude toward learning demonstrated by academic records and faculty recommendations.

Special Awards, Medals and Prizes

Undergraduate

Betty Lou Custer Award. The St. Louis Chapter of the American Institute of Architects presents a book award in memory of Betty Lou Custer, longstanding executive director of the chapter, to an outstanding graduate receiving either undergraduate degree. In recognition of Custer's service to the

profession of architecture, the prize is awarded to a student who has contributed willing service to the College of Architecture.

Faculty Award. The faculty of the College of Architecture offers a book award to an outstanding BDes or BS undergraduate in the college.

Sophomore Book Prize. Presented to an outstanding sophomore who has completed the basic design sequence within the college. Given in honor of Leslie J. Laskey, professor emeritus, whose inspired teaching formed the basis of the basic design program and whose influence is carried on in the lives and work of the students who studied with him.

Graduate

Alpha Rho Chi Medal. Alpha Rho Chi, a national social fraternity in architecture, awards a medal to the graduating sixth-year student who has shown an ability for leadership, has performed willing service for the Graduate School of Architecture & Urban Design, and has given promise of real professional merit.

American Institute of Architects Medal. Each year, the AIA medal is awarded to a member of the graduating class in recognition of scholastic achievement, character and promise of professional ability. The student so honored receives the engraved medal. The runner-up also may be awarded a certificate, depending on the decision of the faculty. The awards are made in the name of the Henry Adams Fund by the AIA.

All School

James Walter Fitzgibbon Prize. Mrs. James Fitzgibbon and friends of the family established a fund to honor Professor Fitzgibbon's memory and to recall his long and distinguished service on the faculty of Architecture. The annual income from this fund provides for the Fitzgibbon Prize, given to a 300- to 600-level student who has the winning solution to a one-day sketch problem.

William Tao Prize. Established by William K.Y. Tao, P.E., alumnus, emeritus trustee and affiliate professor at Washington University, the William Tao Prize provides an annual cash award to students who have demonstrated excellence in the understanding and application of building systems in architecture, including illumination, electrical and mechanical engineering, and energy-efficient design.

Frederick Widmann Prize in Architecture. Through a bequest from the late Frederick Widmann, an annual prize of at least \$1,500 is offered to the best architectural student in the university. The selection is made by the faculty of the architecture college.

Scholarship Funds

Scholarships with Applications

St. Louis Chapter American Institute of Architects

Scholarship Fund. For students from the St. Louis metropolitan area who have completed the first two years of their architectural studies. Inquiries should be addressed to the St. Louis Chapter AIA, 911 Washington Ave., #225, St. Louis, Missouri 63101. Separate application is required.

The James W. Fitzgibbon Scholarship in Architecture.

Awarded to support four years of study leading to either undergraduate architecture degree. The Fitzgibbon Scholar is selected in recognition of outstanding academic performance and promise in the field of architecture. The scholarship is in the amount of full tuition, renewable for a total of four years of undergraduate study. Up to five partial-tuition scholarships are also available. For more information, contact the Office of Undergraduate Admissions. Separate application is required.

Scholars in Architecture

The Scholars in Architecture program provides named scholarship funds that have been donated to the university by individuals or companies specifically for this purpose. Selection is based on financial need and academic achievement. There is no application process. The total amount of the student's financial assistance package does not change.

Loan Fund

Gustel and Edith H. Kelwitt Scholarship Loan Fund.

Academic Regulations

Students in the College of Architecture are required to complete a minimum of 39 academic credits in Arts & Sciences. An additional 9 academic credits can be taken in Architecture, Art, Design, Arts & Sciences, Business or Engineering. These 48 credits exclude University College, physical education, lessons, independent studies, internships, Advanced Placement, International Baccalaureate or transfer credit.

No more than 15 units of pre-matriculation credit from all sources — Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels — will be awarded. The units of credit awarded do not apply toward the 48 credits required in Arts & Sciences.

Attendance

Regular attendance at all classes and studio meetings is expected of each student. If, in the opinion of the instructor, any student has accumulated absences to such an extent as to preclude the possibility of satisfying the course requirements, the student's registration in that course will be canceled, subject to the approval of the dean.

Units and Grades

A unit is the amount of credit given for one hour of lecture or up to three hours of studio work a week for one semester. All students in the College of Architecture may take one nonrequired course on a pass/fail basis each semester. All students in the Graduate School of Architecture & Urban Design may select one of the following two grading options as they register for each semester: (1) grade option or (2) pass/fail option. Under the grade option, a student may take one nonrequired course under pass/fail. Under the pass/fail option, all courses must be taken pass/fail.

Symbols used for both options have the following meanings:

Grade	Points per Unit
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D+	1.3
D	1.0
D-	0.7
F	0.0
P#	Pass
F#	Failing
I	Course work incomplete
W	Withdrawal
R	Repeat
L	Successful audit
Z	Unsuccessful audit
N	No grade submitted

Pluses and minuses are used. Each grade earned for a course taken for credit receives a specified number of grade points, and these points are affected by plus and minus grades as well.

F grades for a semester may be changed only through the last day of classes of the following semester and then only in extraordinary circumstances. The Office of the Dean will approve no changes of F grades after this interval.

In addition to grading under either the regular grade option or the pass/fail option, instructors teaching architectural design courses complete an evaluation form for each student; a copy is made available to the student, and the original is filed in the student's folder in the Office of the Dean.

Auditing a Course

With prior approval from their academic adviser, students may audit an elective course.

Incomplete Grades

Incomplete marks in all architectural design courses (100- to 600-level) must be removed by the first day of classes of the following semester. Failure to remove the incomplete will prevent the student from continuing in another architectural design course.

In all other courses, the grade of I must be removed no later than the last day of classes of the next full semester. On failure to make up an I within the next semester, the student shall automatically receive an F in the course unless explicitly excused by the dean. An F grade, so received, may not be changed. Students will not be allowed to continue in courses requiring prerequisites if the prerequisite has an Incomplete grade. A student who carries more than 9 units of incomplete work may be declared ineligible to re-enroll.

Pass/Fail Option

No more than eight courses, exclusive of general studies, major and minor courses, may be taken pass/fail.

Minimum and Maximum Loads

Freshman and sophomore undergraduates will normally enroll in either 15 or 16 units each semester, although enrollment in up to 18 units is possible. Juniors and seniors in the architecture degree programs are strongly recommended to enroll in no more than 16.5 units each semester in order to maintain focus on the design studio and major requirements. This guideline can only be waived by the dean or undergraduate program chair. The normal load for graduate students is a maximum of 16 units each semester.

An enrollment above 21 units will be charged at the established university rate per hour of the additional credits and must be approved by the dean or undergraduate program chair of the College of Architecture.

Refer to the About WUSTL (p. 6) section of this *Bulletin* that covers tuition and fees (p. 26) for both the annual tuition rate and the per credit hour breakdown applicable to the College of Architecture.

Partial load enrollment is possible when circumstances warrant it and requires the permission of the dean.

Students are expected to proceed at a pace that enables them to finish their degree within the appropriate time limit. For undergraduates, this is usually eight semesters, and for graduates it is established by the letter of admission. Students are expected to complete no fewer than the minimum number of hours set forth in the schedule below:

Undergraduate Program

Semester	Credits
1	10
2	20
3	32
4	45
5	60
6	75
7	97
8	120

Graduate Program

Semester	Credits
1	6
2	12
3	24
4	36
5	48
6	60
7	75
8	90
9	105

Exceptions to these minimum standards may be granted only with the written consent of an academic adviser or the associate dean or dean.

Repeating a Course

When a student retakes a course in which a passing grade has been received, both enrollments will show on the transcript. If the second grade is equivalent to or better than the first grade, the first grade may be changed to R, indicating the re-enrollment upon request of the student and with department approval. If the second grade is lower, both grades will stand. Credit toward the degree will be allowed for only one of the enrollments. When a student retakes a course in which an F has been received, both enrollments for the course will appear on the transcript. If a passing grade is received in the second enrollment, the first enrollment may be changed to R, indicating the re-enrollment upon request of the student and with the approval of the dean.

Academic Warning and Suspension

A student whose semester grade point average is below 2.0 (grade of C) or who falls below a pace of 66 2/3 percent (number of credits earned divided by the number of credits attempted) will be placed on academic probation. If, after the following semester, the semester grade point average is still below 2.0 or the pace is below 66 2/3 percent, the student may be ineligible for normal advancement or may be suspended.

While the College desires to give all students the opportunity to prove themselves, it is not in the best interest of either the student or the College to permit a student to continue indefinitely in educational programs in which they are not producing satisfactory results.

Leave of Absence

A leave of absence for one or two semesters is normally granted to a student when individual circumstances, medical or personal, warrant it. A leave of absence assumes that the student will not be taking any academic work at another institution, and it guarantees re-enrollment at its conclusion. A letter from the dean granting a leave of absence will normally require notification by February 15 or November 15 of the student's intention to re-enroll in the following semester.

Transfer Credit

Students wishing to transfer credit for course work completed at another institution should bring a full description of the course(s) to the associate dean for preapproval. Upon receipt of an official transcript indicating a grade of C or better, courses will be considered for transfer. Grades for transfer courses will not appear on the student's Washington University record and will not figure into the student's grade point average.

Retention of Student Work

The College of Architecture and Graduate School of Architecture & Urban Design reserve the right to retain any student work submitted for course credit. Normally this work will be returned to the student at the end of the semester, except that which has been retained for publications, exhibitions or accreditation reviews. It is highly recommended that students photographically reproduce or electronically store their work in order to keep a record of their work.

Withdrawals

Students wishing to withdraw for any reason from the College of Architecture before the end of the semester should consult in person with the associate dean. No such withdrawal will be official until the request in writing has been approved by the associate dean and the appropriate changes have been made in the student's record.

Academic Integrity

Students and members of the faculty of a university have an obligation to uphold the highest standards of scholarship. Plagiarism or other forms of cheating will not be tolerated. Where a student has violated the integrity of the academic community, an instructor may recommend that the student be brought before the Committee on Academic Integrity. A list of university policies can be found on the website of the University Registrar.

Art

Sam Fox School of Design & Visual Arts

The Sam Fox School of Design & Visual Arts is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country's finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art, and the Mildred Lane Kemper Art Museum.

A Professional Art College Within a University

The College of Art offers students the opportunity to study art or design while taking both required and elective courses through other schools and divisions of the university. The College of Art, which has its own faculty and facilities, has been a degree-conferring division of Washington University since 1879.

Undergraduate students at the College of Art have a wide variety of options from which to choose to meet their individual needs and to satisfy their interests. The Bachelor of Fine Arts (BFA) curriculum has been designed around the philosophy that the study of art has no natural boundaries; all human experience — intellectual, technological and social — can at some point become part of the purposes of an artist or designer. College of Art courses provide a structural base upon which students are able to build.

When students major in art at Washington University, they may choose to study communication design, fashion design, and art with optional concentrations in painting, photography, printmaking or sculpture.

Our diverse student body is composed of young people who have records of high achievement in both art and academic subjects. Because the college provides such a comprehensive learning environment, it is an excellent place for a student to mature as an artist or designer.

Facilities

The College of Art studios are in William K. Bixby Hall, Earl E. and Myrtle E. Walker Hall, Mark C. Steinberg Hall, and Lewis Center. Bixby Hall, located on the university's Danforth Campus, was built for the College of Art in 1926. Walker Hall was completed in the summer of 2006 as part of the Sam Fox School of Design & Visual Arts. The renovation of Steinberg Hall was completed in fall 2007. Lewis Center, located one mile from

the Danforth Campus, offers 28,000 square feet of space for graduate studios.

Resources at the College of Art include the Whitaker Learning Laboratory, which has computers and software for graphics and design, as well as video equipment, and the Nancy Spirtas Kranzberg Studio for the Illustrated Book, located in Walker Hall.

Majors

Bachelor of Fine Arts

First-year students take Drawing I and II, 2-D Design, 3-D Design, and Practices in Architecture + Art + Design I and II.

Second-year studio courses introduce students to the different areas of focus.

A student's last two years include intense study in his or her chosen focus area and a capstone experience. The capstone studio brings together all seniors in the studio areas and separately in the communication design and fashion areas for critical dialogue beyond disciplinary boundaries to guide preparation for a culminating BFA exhibition.

For specific degree requirements, visit the Degree Requirements (p. 121) page for the College of Art.

The Major in Art

Majors are offered in:

- Art — with optional concentrations in:
 - Painting
 - Photography
 - Printmaking
 - Sculpture

- Communication Design
- Fashion Design

The Second Major or Minor

Art students may earn a second major or minor in the College of Arts & Sciences, the Olin Business School, or the School of Engineering & Applied Science (computer science) while completing the requirements for the BFA degree. If students choose to take advantage of these opportunities, they will graduate with a BFA degree with two majors — one in art and one in another school, or a BFA degree with a major in art and a minor in another school.

Students must successfully complete all of the degree requirements for the BFA and all of the requirements for the second major or minor.

The second major and minor option can be completed within four years if careful planning begins during the first year. If a student is interested in these options, he or she should consult with the associate dean of students in the College of Art.

Art Education

Students who wish to teach art at the elementary and secondary levels may obtain Missouri state certification by taking additional credit units of required education courses offered by the university's Department of Education in the College of Arts & Sciences. These courses may be taken as academic electives within the BFA program.

In addition to course work in education, prospective art teachers must complete specific courses in general education (communications, humanities, mathematics, natural sciences and social sciences). For information on general education requirements, students should consult with the associate dean of students (Bixby Hall, Room 1) or the Department of Education (Seigle Hall, Room 107). Missouri state certification normally takes an additional semester of study. Application to enroll in the teacher education program is made through the Department of Education and should be done no later than the beginning of the sophomore year. Part of the application process involves successfully passing College Base, an achievement test focused on general education content. (This test is periodically given on the Washington University campus.) Acceptable scores on the SAT or the ACT also must be submitted. Interested students may also apply for admission to the Master of Education degree program offered by the Education Department.

Minors

A minor requires a total of 15 credits from F10, F20 or X10 courses with a grade of C– or better. Visit the Sam Fox School website for specific requirements.

Minors are offered in:

- Art

- Design

The minor in art allows students to select five Art courses from an approved list. Students are able to take courses from across the Art curriculum or cluster their courses in a single disciplinary area — painting, for example. It becomes the choice of each student to select a narrow or wide-ranging set of courses based on interests and goals.

The minor in design allows students to take approved courses from across Communication Design, Fashion Design, and the Illustrated Book Studio, mixing and matching courses to suit interests and schedules.

For students in the College of Art, the minor in art is available only to students majoring in communication design or fashion design. Students majoring in art may pursue a minor in design.

Students in other undergraduate degree programs at Washington University may pursue a minor in either art or design.

Students may consult with the associate dean of students or the assistant dean/registrar (Bixby Hall, Room 1). Students declare a minor in WebStac.

Courses

F10 Art (p. 76): Art foundation and major studio courses

F20 Art (p. 76): Art elective courses

X10 XCORE (p. 72): Sam Fox foundation and commons courses

College of Art majors have enrollment priority in F10 and F20 courses. College of Art and College of Architecture majors have enrollment priority in X10 courses. Elective (F20) courses may be offered at the 100–400 levels; students must enroll as applicable — 100-level courses are for freshmen, 200-level for sophomores, 300-level for juniors and 400-level for seniors.

Design & Visual Arts — Core (X10)

Visit <https://courses.wustl.edu> to view semester offerings for X10 XCORE.

X10 XCORE 101 Drawing I

An introductory course which teaches students to recognize and manipulate fundamental elements of composition, line, form, space, modeling and color. Emphasis is placed on working accurately from observation, with an introduction to other methodologies. Students work in a variety of media. Demonstrations and illustrated lectures supplement studio sessions and outside projects.

Credit 3 units. EN: H

X10 XCORE 102 Drawing II

Continuing as an introductory course which teaches students to recognize and manipulate fundamental elements of composition, line, form, space, modeling and color. This course is an intensive

studio course which builds on the perceptual and conceptual skills and experiences developed in Drawing I. A main objective is to develop a higher level of critical and studio practice.

Prerequisite: X10 XCORE 101.

Credit 3 units. EN: H

X10 XCORE 181 Practices in Architecture + Art + Design

This course offers first-year students in architecture and art an introduction to the subjects, theories and methodologies of the disciplines of art, design, architecture, landscape architecture, and urban studies. Examples, drawn from a range of historical periods as well as contemporary practice, highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap. Part 1 of 2.

Credit 1 unit. EN: H

X10 XCORE 182 Practices in Architecture + Art + Design

This course offers first-year students in architecture and art an introduction to the subjects, theories and methodologies of the disciplines of art, design, architecture, landscape architecture, and urban studies. Examples, drawn from a range of historical periods as well as contemporary practice, highlight distinct processes of thinking and working in each discipline, as well as areas of intersection and overlap. Part 2 of 2.

Credit 1 unit. EN: H

X10 XCORE 301 From Propaganda to Decoration

This is a studio course that is conceptually driven and anchored in the philosophical terrain of the print multiple. The fundamental attributes of the multiple, including its accessibility and repeatability, are from private to public and from political to aesthetic. Given this orientation, we examine the place where the public and private spheres meet. Considering urban communication and social space, reproduction and distribution, gifting and exchange, private practice and public intervention, this course uses the print multiple as a starting point to explore a continuum that runs from propaganda to decoration.

Credit 3 units. EN: H

X10 XCORE 303 Visualizing Information

This project-based studio course brings students from diverse backgrounds in Art, Architecture, and Design together to learn to compose information-rich surfaces. The course explores principles of information design on paper initially, and offers the opportunity to extend some applications to the screen. Course topics include content organization, visual structure, hierarchy, typography, color, sequencing, audience and usability. Students have the chance to select subject and media for some of their projects. Projects are supplemented with readings and lectures about contemporary information design, with some historical references. This course combines the rigor of a disciplinary classroom with the flexibility of a multidisciplinary one. Topics likely to emerge in the interdisciplinary conversation include information in three-dimensional spaces, communicating information with a particular voice or editorial perspective, analytical versus poetic information design, function, audience and programming. All of these are supported, and students develop a set of tools which can be adapted to their own disciplinary work in a meaningful way.

Credit 3 units.

X10 XCORE 304 Data Visualization

In this hybrid lecture/studio course, students learn basic skills to develop data visualizations focusing on clarity, relevance to the user, and visual expression. The course spans several themes within data visualization, including principles of two-dimensional design, storytelling and sequence, and interactivity and user navigation. It is organized into four units, each with a different content focus and data type, including topics as diverse as urban and rural landscapes, conditions in public health, and literary production. Students apply their own areas of interdisciplinary expertise to the final project. Students need a laptop with Adobe Illustrator and may need to acquire inexpensive or free software. This course is appropriate for sophomores through graduate students with or without visual training who are interested in data, information design, user interface, and computer programming. Course counts as a multidisciplinary course in the Sam Fox Commons, an elective course in Communication Design, or a course in the Interdisciplinary Project in the Humanities (IPH).

Credit 3 units. EN: H

X10 XCORE 305 Topics in Visual Culture: Commercial Modernism in America, 1865–1965

This survey course explores contributions to and expressions of visual modernism within the commercial tradition in the United States. Lectures, readings and screenings engage the intertwined histories of commerce, technology, society and aesthetics. Topics include periodical illustration from *Harper's Weekly* to the *Ladies Home Journal*, the newspaper comic strip and the comic book, animation from vaudeville to television, and science fiction and transportation design. Context provided by the advent of industrial image production; modernist art theory and high cultural disdain for mass markets (with resulting effects on the academy); avant-garde and commercial cross-pollination; the social histories of ethnic depiction (i.e., blackface minstrelsy); consideration of women as consumers and producers of commercial images. Students make use of materials in the collections of the Modern Graphics History Library at Washington University. Three animation screenings are required. Attendance at these screenings is required.

Credit 3 units. EN: H

X10 XCORE 306 Commercial Modernism in America 1865–1965

Credit 3 units. EN: H

X10 XCORE 307 Community Building

This course looks at the intersection of the built fabric and the social fabric. Using St. Louis as the starting point, this course takes students out of the classroom and into a variety of neighborhoods — old, new, affluent, poor — to look at the built environment in a variety of contexts and through a variety of lenses. Almost every week for the first half of the semester, students visit a different area (or areas), each trip highlighting some theme or issue related to the built environment (architecture, planning, American history, investment and disinvestment, community character and values, race, transportation, immigrant communities, future visions, etc.). Running parallel to this, students are involved in an ongoing relationship with one particular struggling neighborhood, in which students attend community meetings and get to know and become involved with the people in the community in a variety of ways. Students learn to look below the surface, beyond the single obvious story, for multiple stories, discovering their

complexity, contradictions and paradoxes. They also come to consider the complex ways in which architecture and the built environment can affect or be affected by a host of other disciplines. CBTL course.

Credit 3 units. EN: H

X10 XCORE 309 Convergences: Studies in Art & Architecture

This interdisciplinary course examines the convergence of artistic and architectural ideas, techniques, and practices through selected historical and contemporary studies. Emphases range from the figure of the artist/architect (Michelangelo and Leonardo, for example, to Le Corbusier and Libeskind), to critical reflections (Vasari, Gennough, Serra) to boundary-crossing practices (Whitread, Webster, Irwin, Kin, Judd, Miss) to collaborations and collaborative works (Ando/Kelly/Serra and the Pulitzer Foundation). The course emphasizes empathy and productive work across artistic disciplines. Field trips to the Pulitzer Foundation for the Arts (St. Louis) and the Chinati Foundation (Marfa, Texas) are planned.

Credit 3 units.

X10 XCORE 311 Materials & Mechanisms: Site Specific Design Installation

In this course students are guided to explore the nature of materials and simple mechanisms (mechanically driven kinetics) in the making of art and/or utilitarian objects. This course investigates the qualities of materials and how they might be used thoughtfully to develop a conceptual and physical experience for an audience or user. Specific materials are assigned, at times, yet students have the opportunity to self-select materials based on project needs. Throughout the semester, students balance designing with finding — the process of playfully exploring materials and methods without preconception of a final resolution. Looking for possibilities can lead to unexpected discoveries.

Credit 3 units. EN: H

X10 XCORE 313A Creative Practice and Natural Systems: An Ecology of Art

In this studio course, students learn to use basic ecological principles as a lens through which to investigate and evaluate productive, meaningful and sustainable creative practices. Ecology is community-focused, involving the study of relationships with a given community. It establishes a model by which students can establish a more complete understanding of the inspirations, expectations and ramifications of creative practice. We visit local gardens, parks, farms and neighborhoods while seeking to understand the complexity of our own role in nature and culture. This diverse range of ecological engagement allows for a broad array of creative applications in the studio arts, design and architecture. The class format challenges students with new ways of thinking while allowing them to select materials, specific topics of study, and methods of engagement appropriate to their own developing interests. The course consists of fieldwork, readings and lectures, the content of which is examined through individual and collaborative projects. At midterm students identify opportunities for focused research and production, and the course culminates with the public presentation of this work. College of Architecture and College of Art sophomores have priority. Fulfills Sam Fox Commons requirement.

Credit 3 units. EN: H

X10 XCORE 315 Cycles

Students design and build human-powered vehicles from discarded bicycles. The course collaborates with student mechanics involved with Bicycle Works (Bworks). Bworks collaborates in teams with Washington University students to design and build the work.

Credit 3 units.

X10 XCORE 317 Furniture Design

The seat is an intimate interface between the building and the body. It embodies a complex set of structural conditions, material opportunities and possibilities for expression. Architects, artists and industrial designers covet opportunities to make the chair. The result is that seemingly infinite perfect solutions exist — and still the seat remains a provocative challenge. In this course students design and build a chair. Emergent technologies are combined with traditional techniques of metal fabrication, woodworking and plastic forming in the design and making of the work. The course objective is for students to learn how to work directly with machinery and materials in the realization of their design. It is expected that students have basic shop skills addressed in course prerequisites. Advanced techniques are introduced in this course and students select those most appropriate to their work to build upon. There is a great deal of independent investigation required to excel in this course. Students propose ideas and then develop them using drawings, models and mock-ups in order to realize the best potential for their design.

Credit 3 units. EN: H

X10 XCORE 319 Digital Fabrications: A Primer Course in the Use of Computer Modeling for Art & Design

This course focuses on fabrications both real and virtual. The ubiquity of computers in design, studio art, communications, construction and fabrication demand that professionals become comfortable with their use. It is also important in a group of ever-specializing fields that one knows how to translate between different software and output platforms. This comfort and the ability to translate between platforms allow contemporary artists and designers to fabricate with ever-increasing freedom and precision. This course introduces students to 3-D software with a focus on 2-D, 3-D, and physical output. Through a series of projects, students learn to generate work directly from the computer and translate it into different types of output. Starting from first principles, the course covers the basics from interface to output for each platform used. The course also familiarizes students with a range of CNC technology and other digital output for both small- and large-scale fabrication. The course is broken into three projects. In the first, students focus on computer-generated geometry and control systems. In the second, students generate physical output and line drawings. The final project focuses on rendering, context and cinematic effects. The software covered includes, but is not limited to, Rhinoceros 3-D, Maya, Illustrator and Photoshop. Additionally, students use the 3-D printer, laser cutter and/or other digital output tools.

Credit 3 units. EN: H

X10 XCORE 321 Mapping Soft Bodies

This course develops digital design skills with conceptual understanding of the transformative process of artistic production. Mapping Soft Bodies investigates artificial objects and industrial products as a basis for inspiration. Through digital modeling and scanning the human body, each student develops a transformation process that analyzes the social

and cultural conditions of a new emerging design. New body armatures are modeled through CAD/CAM (laser cutting) and Rapid Prototyping (3-D printing) for physical outputs. The course is for students who are interested in emerging technologies and digital production. This course is for students interested in design, sculpture, architecture and digital media by enhancing 3-D technologies and allows each student to develop abstract thinking and making processes.

Credit 3 units. EN: H

X10 XCORE 325 Global Discourses in Art & Architecture

This course examines art, architecture and urbanism from the perspective of global production, dissemination and reception. It focuses on the global exchange of people and ideas as one of the main vehicles of visual culture, both historical and contemporary. Through a series of focused case studies, the course probes inherent dichotomies within art and architecture driven by their site-specificity, yet also by their constant global displacement across various disciplinary, cultural and geographical boundaries. The course content includes lectures, discussion sessions, readings and textual and visual projects that examine cross-cultural aspects of art and architecture.

*Enrollment limit will be set at zero and students will be enrolled from the waitlist. The course is open to all students at Washington University regardless of their major field of study. Sam Fox School sophomores will have priority.

Credit 3 units.

X10 XCORE 327 Color Systems

This course is a sustained investigation of color. Students study how color is affected by light, by space, by arrangement, by culture, and by commerce. The course aims to deepen the understanding of color's complexity and pervasiveness as a fundamental element of shared visual culture. The course develops both technical and conceptual skills to aid in visual translation. In addition to color-specific inquiry, a goal is to expand ideas of research and enable students to integrate various methods of acquiring knowledge into their art and design practice. Throughout the course, students discuss various processes of making/constructing, the connection between color/form/concept, and strategies for idea generation and brainstorming. The course allows for much individual freedom and flexibility within varying project parameters.

Credit 3 units.

X10 XCORE 330 Cell Phones, Snapshots and the Social Network

This course is designed around the cell phone camera as a means of art production using blogs, interactive websites, social networking and mass distribution of digital images and videos. Students explore the art-making potential of the cell phone camera as a snapshot camera of the modern age. Students post daily images/videos on blogs and other social media sites. Readings and discussion topics include the culture and aesthetic of the snapshot, the vernacular image, and the role of social networks in image production and distribution. Students are required to design and maintain at least two social networking sites and to supply a cell phone with the ability to upload images to the Internet.

Credit 3 units. EN: H

X10 XCORE 332 Metabolic City: Spaces of Bodily and Environmental Wellness

Metabolic City probes bodily and environmental wellness as intertwined cultural, social, and technological constructs. From the British Archigram Group, to the Japanese Metabolists and the Dutch artist Constant, a number of visionary projects in the 1960s re-imagined our notion of the body, city and the environment. By means of individual and collective gadgets, tools and spaces they bridged the scales of the body and the city, weaving together issues of bodily and environmental performance. Through a combination of texts, discussions and projects, the course engages in a delayed conversation with these projects, proposing the concept of "metabolism" both as a bodily function, but also as an environmental mechanism that operates on a global scale. Some of the key concepts discussed in the class include global citizenry, urban imagination, networks, performance, virus, urban protest and insurgence. The course fulfills the Sam Fox Commons Course requirement and the architectural history/theory elective requirement.

Credit 3 units.

X10 XCORE 336 Urban Books

Since the beginning of the 20th century, art, architecture and urbanism together have investigated the production of images that shape the symbolic dimension of our experience of large cities. The main goal of this course is to critically embrace this tradition through the format of the artist's book. St. Louis is the focus for our observations because it is familiar to our everyday lives and also because it provides key situations for understanding contemporary forms of urbanity and how urban space is produced and imagined. The course bridges the curricular structures of art and architecture by enhancing the collaboration between the practical and scholarly work developed in both schools, with additional support from Special Collections at Olin Library. It combines the reading, lecture, and discussion format of a seminar with the skill building and creative exploration of a studio. This course is divided into three progressive phases of development: the first consists of weekly readings, discussion and responses in the form of artist's books. The second phase focuses on the Derive with physical activities and assignments based on interacting directly with the urban environment. The third phase focuses on individual research, documentation, and final book design and production.

Credit 3 units.

X10 XCORE 338 Shifting from Lines to Surfaces/Virtual to Empirical

Digital Media Design: Introduction to Exploring Digital and CAD/CAM Technology. This is a course in computing theory and techniques on 2-dimensional digital software and advanced 3-dimensional modeling software. Weekly demonstrations on software operations and individual projects are developed. This course bridges the gap between 2-D computational tools that define lines and the 3-D tools that develop complex surfaces. These surfaces explore the possibilities of creating and articulating the non-linear geometries manipulated on the digital environment. The final project consists of 2-dimensional drawings, digital models, and physical models produced by advanced CAD/CAM technology. By employing alternative techniques and emerging technologies of manufacturing, new forms of objects and perceptions will redefine multiple design processes.

Credit 3 units. EN: H

X10 XCORE 342 Florence Commons

This is a required course for all students in the Florence Study Abroad Program. Content for the course fosters the idea of collaboration, approaching how art, architecture, urbanism and design are related in Italian visual and material culture. All faculty work together to establish a shared semester theme and media and conduct collective introductory activities and reviews, as well as combined field trips. The instructor determines a specific approach to these shared goals. This framework allows for both cross-disciplinary work and increased breadth and focus regarding their semester study topics, a format that is unique to the undergraduate Florence Program. Students will be enrolled by the registrar in a section that best suits their area of study. Credit 3 units. EN: H

X10 XCORE 343 Digital Filmmaking: City Stories

Digital Filmmaking: City Stories is a cross-university video art course for students interested in making short films through a transdisciplinary and time-based storytelling in both narrative and non-narrative formats. Whether documentary or abstract, individually produced or collaborative, all projects in this course have a required social and urban engagement component. In this course the city becomes a laboratory for experimentation and contribution. Students meaningfully engage St. Louis, and their projects address sites of concern to explore the complex fabric of the city by way of framing and poetic juxtaposition. City Stories merges several arts and humanities disciplines, including experimental cinema and documentary journalism and creates an opportunity for empathic listening and inquiry as students discover stories built from collective as well as individual memories. Credit 3 units.

X10 XCORE 344 Digital Filmmaking: City Stories

Digital Filmmaking: City Stories is a cross-university video art course for students interested in making short films through a transdisciplinary and time-based storytelling in both narrative and non-narrative formats. Whether documentary or abstract, individually produced or collaborative, all projects in this course have a required social and urban engagement component. In this course the city becomes a laboratory for experimentation and contribution. Students meaningfully engage St. Louis, and their projects address sites of concern to explore the complex fabric of the city by way of framing and poetic juxtaposition. City Stories merges several arts and humanities disciplines, including experimental cinema and documentary journalism, and creates an opportunity for empathic listening and inquiry as students discover stories built from collective as well as individual memories. CBTL course. Credit 3 units. EN: H

X10 XCORE 345 Shopping

This seminar examines shopping as a social and cultural construct that operates at several levels in relation to art, architecture and urban planning. Shopping is the fundamental activity of the capitalist marketplace. It is also inextricably linked with major aspects of public and foreign policy, where national consumerism is closely linked to global tourism, and it is at the core of economic development. Shopping is, as well, a common denominator of popular culture, frequently satirized in contemporary art, film and literature. Participants in the seminar read selections from various writings about shopping and the marketplace. We also view several films examining the shopping environment in narratives of power and desire. Prerequisite is

completion of Sam Fox foundations year. Open to sophomores and above.
Credit 3 units.

Art

Visit <https://courses.wustl.edu> to view semester offerings for F10 ART and F20 ART.

F10 ART 214A Sculpture Studio: Material and Culture

Credit 3 units.

F10 ART 101 Drawing

An introductory course that teaches students to recognize and manipulate fundamental elements of composition, line, form, space and modeling. Emphasis is placed on working accurately from observation, with an introduction to other methodologies. Students work in a variety of media. Demonstrations and illustrated lectures supplement studio sessions and outside projects.

Credit 3 units. EN: H

F10 ART 102 Drawing

An introductory course that teaches students to recognize and manipulate fundamental elements of line, tone, texture, volume and plane with relation to representational drawing. Students work in a wide variety of media and techniques (charcoal, pencil, pastels and wet media) from the model, still life and environment. Demonstrations and illustrated lectures supplement studio sessions and outside projects.

Credit 3 units. EN: H

F10 ART 105 2-D Design

An introduction to basic design principles and their application on a 2-dimensional surface. Investigation of the functions and properties of the formal elements and their organization through the use of relational schemes. Includes an introduction to color and basic color theory. Problems stress systematic approach to visual communication.

Credit 3 units. EN: H

F10 ART 106 2-D Design

An introduction to basic design principles and their application on a 2-dimensional surface. Investigation of the functions and properties of the formal elements and their organization through the use of relational schemes. Includes an introduction to color and basic color theory. Problems stress systematic approach to visual communication.

Credit 3 units. EN: H

F10 ART 107 3-D Design

An introduction to basic design principles and their application to 3-dimensional form and real space and time. The design vocabulary is broadened through exercises that deal with mass, volume, weight, gravity and movement. Students learn to use hand and power tools.

Credit 3 units. EN: H

F10 ART 108 3-D Design

An introduction to basic design principles and their application to 3-dimensional form and real space and time. The design vocabulary is broadened through exercises that deal with mass, volume, weight, gravity and movement. Students learn to use hand and power tools.

Credit 3 units. EN: H

F20 ART 111 Painting

Introduction to painting processes and materials. While there is emphasis on oil painting, students also are introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student's level.

Credit 3 units. EN: H

F20 ART 112 Painting

Introduction to painting processes and materials. While there is emphasis on oil painting, students also are introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student's level.

Credit 3 units. EN: H

F20 ART 113A Sculpture

Explores contemporary sculptural concepts and processes in various media, including latex, plaster, plastics, metal and wood fabrication, with emphasis on development of technical skills at whatever level of advancement is suited to the experience of the student.

Credit 3 units. EN: H

F20 ART 113F Sculpture: Foundry

Same as F20 ART 213F, F20 ART 313F, F20 ART 413F. Freshmen (only) register for F20 ART 113F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: freshman standing or departmental approval.

Credit 3 units. EN: H

F20 ART 113G Sculpture: Wood

Same as F20 ART 213G, F20 ART 313G, F20 ART 413G. Freshmen (only) register for F20 ART 113G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: freshman standing or departmental approval.

Credit 3 units. EN: H

F20 ART 113H Sculpture: Blacksmithing

This course is an introduction to blacksmithing materials, tools and techniques. Students explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for 3-dimensional form. In this class we explore these possibilities and expand our sculptural vocabulary.

Credit 3 units. EN: H

F20 ART 113I Sculpture: Metal Fabrication

Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.

Credit 3 units. EN: H

F20 ART 114A Sculpture

Explores contemporary sculptural concepts and processes in various media, including latex, plaster, plastics, metal and wood fabrication, with emphasis on development of technical skills at whatever level of advancement is suited to the experience of the student. College of Art majors and non-art students pursuing an art minor have priority.

Credit 3 units. EN: H

F20 ART 114F Sculpture: Foundry

Same as F20 ART 214F, F20 ART 314F, F20 ART 414F. Freshmen (only) register for F20 ART 114F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. Prerequisite: freshman standing or departmental approval.

Credit 3 units. EN: H

F20 ART 114G Sculpture: Wood

Same as F20 ART 214G, F20 ART 314G, F20 ART 414G. Freshmen (only) register for F20 ART 114G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. Prerequisite: freshman standing or departmental approval.

Credit 3 units. EN: H

F20 ART 114I Sculpture: Metal Fabrication

Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.

Credit 3 units. EN: H

F20 ART 115 Printmaking

Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.

Credit 3 units. EN: H

F20 ART 116 Printmaking

Students explore various mixed-media approaches to relief printmaking in combination with collagraph, photo lithography and drawing. Relief techniques covered include wood and linoleum cuts using the black line and white line approaches. (Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.)

Credit 3 units. EN: H

F20 ART 1171 Special Topics in Photography: Cell Phones, Snapshots and Social Network

This course is designed around the cell phone camera as a means of art production using blogs, interactive web sites, social networking and mass distribution of digital images and videos. Students explore the art-making potential of the cell phone camera as a snapshot camera of the modern age. Students are expected to post daily images/videos on blogs and other social media sites. Readings and discussions on topics such as the culture and aesthetic of the snapshot, the vernacular image, and the role of social networks in image production occur throughout the semester. Students are required to design and maintain at least two social networking sites and must supply their own cell phone with the ability to upload images to the Internet.

Credit 3 units. EN: H

F20 ART 1181 Photography I

Designed to acquaint students with the fundamentals of camera handling, darkroom and photographic processes and using photography as a means of personal, creative self expression. Course is structured around the use of color transparency and the craft of printing with color negative materials.

Credit 3 units. EN: H

F20 ART 1183 Digital Photography

This introductory-level course explores digital technology for capturing, enhancing and producing still lens-based images. The course addresses basic digital camera operations, the visual language of camera-generated images, computer workflow and the connoisseurship of digital image output. The course assumes no prior knowledge or experience with digital imaging technologies or materials.

Credit 3 units. EN: H

F20 ART 1184 Digital Photo II/Digital Imaging

This course addresses the use of technology and pixel-based software for generating, manipulating and compositing still digital images. The course examines the visual language and poetics of additive lens-based images while providing students with knowledge of software tools, input devices, production techniques, color management strategies and output devices.

Credit 3 units. EN: H

F20 ART 1185 Kinetic Image/Digital Video

This introductory-level course addresses the use of digital technology and software for capturing, editing and producing moving images. The course examines the visual language and poetics of moving images while providing students with foundation knowledge of camera operations, production storyboarding, software tools and presentation strategies. The course assumes no prior knowledge or experience with kinetic imaging technologies or software.

Credit 3 units. EN: H

F20 ART 1186 Black-and-White Photography

Introduction to the fundamentals of black-and-white photography. Emphasis on control of film, paper and black-and-white photographic processes in the classical fine arts tradition. Topics may include portrait, landscape, street photography, the figure and contemporary issues in photography.

Credit 3 units. EN: H

F20 ART 119 Ceramics

An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students are introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.

Credit 3 units. EN: H

F20 ART 120 Ceramics

An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students are introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.

Credit 3 units. EN: H

F20 ART 123D Fashion Design 2-D

Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.

Credit 3 units. EN: H

F20 ART 123E Fashion Design 3-D

Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design and appreciation of the processes involved in the design and manufacturing of apparel.

Credit 3 units. EN: H

F20 ART 123G Fashion: Textile Design

Same as F20 ART 223G, F20 ART 323G, F20 ART 423G. Freshmen (only) register for F20 ART 123G. Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen,

dyeing and printing. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: freshman standing or departmental approval.
Credit 3 units. EN: H

F20 ART 124D Fashion Design 2-D

Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.
Credit 3 units. EN: H

F20 ART 124E Fashion Design 3-D

Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design and appreciation of the processes involved in the design and manufacturing of apparel.
Credit 3 units. EN: H

F20 ART 124I Fashion: Textile Design

Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.
Credit 3 units. EN: H

F20 ART 127A History of Photography

Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influences on the medium.
Credit 3 units. EN: H

F20 ART 128A History of Photography

Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.
Credit 3 units. EN: H

F20 ART 133 Basic Illustration

An introduction to concepts, media techniques and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented.
Credit 3 units. EN: H

F20 ART 134 Basic Illustration

Same as F20 Art 233, F20 Art 333, F20 Art 433. Freshmen (only) register for F20 Art 133. An introduction to concepts, media techniques and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented.
Credit 3 units. EN: H

F20 ART 135F Interactivity and Web Design

This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.
Credit 3 units. EN: H

F20 ART 135G The Licensed Image: Development and Distribution

An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students.
Credit 3 units. EN: H

F20 ART 135I Communication Design I

An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing.
Credit 3 units. EN: H

F20 ART 135J Introduction to Animating in Three Dimensions

This course addresses the fundamental principles of designing and constructing the 3-dimensional modeled world for film and video. Students progress from an overview of the 3-D animation process to defining and implementing filmic ideas using their own modeled creations. Sketches are imported into modeling software (Maya), which is used to build and animate characters, create environments and produce effects. Three-dimensional animation is created in its own virtual space and is navigated by cameras much like a traditional film studio or sound stage. Therefore, cinematic shot design and camera navigation within the virtual world are examined in depth. An animated 3-D short is produced to convey a simple story in a model environment.
Credit 3 units. EN: H

F20 ART 135L Communication Design and Business

This course provides an introduction to business communications in a visual environment. Subjects addressed include visual organization, introductory typography, basic identity development, message construction and business presentation development.
Credit 3 units. EN: H

F20 ART 1361 Advertising 1

Same as F20 ART 2361, F20 ART 3361, F20 ART 4361 - Freshmen (only) register for F20 ART 1361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to

create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary. Credit 3 units. EN: H

F20 ART 1362 Advertising I

Credit 3 units. EN: H

F20 ART 1363 Advertising in the Digital Age

Same as F20 ART 2363, ART 3363, ART 4363 - Freshmen (only) register for F20 ART 1363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study "game changing" developments in advertising communications; changing dynamics in audience behavior — including the ability to "opt out"; the advertising industry's adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one. Credit 3 units. EN: H

F20 ART 1364 Advertising in the Digital Age

Credit 3 units. EN: H

F20 ART 1365 History of Advertising

Same as F20 2365, F20 3365, F20 4365 - Freshmen (only) register for F20 1365. The historical, cultural and technological development of advertising in America from the colonial period to the present. This course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects. Credit 3 units.

F20 ART 1366 History of Advertising

Same as F20 2366, F20 3366, F20 4366 - Freshmen (only) register for F20 1366. The historical, cultural and technological development of advertising in America from the colonial period to the present. This course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects. Credit 3 units.

F20 ART 136F Interactivity and Web Design

This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development. Credit 3 units. EN: H

F20 ART 136G The Licensed Image: Development and Distribution

An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of

Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students. Credit 3 units. EN: H

F20 ART 136I Communication Design I

An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing. Credit 3 units. EN: H

F20 ART 136J Introduction to Animating in Three Dimensions

This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 Art 101 Drawing or equivalent or permission of instructor. Credit 3 units. EN: H

F20 ART 1386 The Art of Advertising

This course introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. The course consists of lectures and visiting instructors, brief essay quizzes and a series of exercises designed to acquaint each student with administrative and creative processes and various disciplines within the advertising field. Major emphasis is upon the creative disciplines. Credit 3 units. EN: H

F20 ART 138J Advanced Animation

Credit 3 units. EN: H

F20 ART 1481 The Illustrated Book: Design and Production

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, "virtual" media. Certain projects may require a second semester of study to complete. Credit 3 units. EN: H

F20 ART 1482 The Illustrated Book: Design and Production

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress, engraving and intaglio, offset lithography and digital ("virtual") media. Certain projects may require a second semester of study to complete.
Credit 3 units. EN: H

F20 ART 171 Introduction to Letterpress Printing

This class serves as an introduction to printing with the Vandercook handpress. Through a series of assignments students learn a systematic approach to planning, arranging and printing type on a page. The students receive a basic introduction to typography, history of letterforms and history of the book. The mechanics of relief printing with the cylinder proof press, ink composition and resolution of the typographic image also are explored. As an exploration of the publishing process, students produce a chapbook of a short literary work. The class primarily focuses on typographic composition, but one assignment employs a combination of word and image.
Credit 3 units. EN: H

F20 ART 1713 Introduction to Book Binding

Same as F20 Art 2713, F20 Art 3713, F20 Art 4713. Freshmen (only) register for F20 ART 1713. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the gothic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings. Freshmen only.
Credit 3 units. EN: H

F20 ART 1714 Introduction to Book Binding

This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the gothic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings. Prerequisite: none. Freshmen only.
Credit 3 units. EN: H

F20 ART 196 Design, Artisanry and Sustainability as Cultural Catalyst

This course investigates the ways in which artisanry is a stimulus to design thinking and innovation. The prerequisite to the course is a 16-day trip to India over winter break in which students work closely with leading Indian designers of

textiles, products and architecture as well as accomplished artisans working with methods both ancient and modern. We discuss how craft informs design and how design acts as a force in entrepreneurship and job creation. A major focus of our research is investigating how craft and design are catalysts for innovation in a sustainable use of materials and water. For more information, contact Belinda Lee at Lee@samfox.wustl.edu. Students should obtain a visa on their own.
Credit 3 units. EN: H

F10 ART 203B Anatomy/Figure Structure

A rigorous drawing course focusing on human anatomy (muscular and skeletal systems), various proportional systems, as well as bio/psycho/social/political conditions having influenced figural representations. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.
Credit 3 units. EN: H

F10 ART 204B Anatomy/Figure Structure

A rigorous drawing course focusing on human anatomy (muscular and skeletal systems), various proportional systems, as well as bio/psych/social/political conditions having influenced figural representations. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.
Credit 3 units. EN: H

F20 ART 211 Painting

Introduction to painting processes and materials. While there is emphasis on oil painting, students also are introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student's level.
Credit 3 units. EN: H

F20 ART 2115 Intensive Intermediate Painting

Same as F20 ART 3115, F20 ART 4115. Sophomores (only) register for course F20 ART 2115. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve at oil painting in its traditional 20th-century use and gain some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments as well as a few reading assignments. This is a very structured course, designed to develop a student's strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor.
Credit 3 units. EN: H

F20 ART 2116 Intensive Intermediate Painting

Same as F20 ART 3116, F20 ART 4116. Sophomores (only) register for course F20 ART 2116. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students

improve at oil painting in its traditional 20th-century use and gain some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments as well as a few reading assignments. This is a very structured course, designed to develop a student's strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor. Credit 3 units. EN: H

F20 ART 211B Painting II

Same as F20 ART 311B, F20 ART 411B. Sophomores (only) register for F20 ART 211B. Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner's familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course. Prerequisite: a beginning painting elective or permission of instructor. Credit 3 units. EN: H

F20 ART 212 Painting

Introduction to painting processes and materials. While there is emphasis on oil painting, students also are introduced to watercolor and acrylic paints and a wide variety of painting surfaces. Subject matter is varied, beginning with still-life material and ending with direct painting from the model. Technical skills and content are dealt with at the individual student's level. Credit 3 units. EN: H

F20 ART 2122 Special Topics in Painting

Credit 3 units. EN: H

F20 ART 212B Painting II

Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner's familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: a beginning painting elective or permission of instructor. Credit 3 units. EN: H

F10 ART 213 Introduction to Sculpture

This course introduces students to the materials, processes and concepts specific to sculpture. Students develop an understanding of, and dexterity with, multiple materials and modes of production ranging from additive, assembled, molded, modeled, to subtractive or carved. This course promotes independent working and problem solving in regard to content and intention. Students engage in discourse about their work through critical analysis and explorations of historical and cultural precedent. This course involves lectures, material and process demonstrations, and assigned readings along with creative and technical explorations. Students in the classes of 2015 and later must complete either F10 ART 213 or ART 214 as

an introduction to the sculpture major. The course is open to nonmajors and minors as space permits. Credit 3 units. EN: H

F10 ART 213A Sculpture Studio: Material and Culture

Explores contemporary sculptural concepts and processes in various media, including latex, plaster, plastics, metal and wood fabrication, with emphasis on development of technical skills at whatever level of advancement is suited to the experience of the student. Credit 3 units. EN: H

F20 ART 213F Sculpture: Foundry

Same as F20 ART 113F, F20 ART 313F, F20 ART 413F. Sophomores (only) register for F20 ART 213F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: sophomore standing or departmental approval. Credit 3 units. EN: H

F20 ART 213G Sculpture: Wood

Same as F20 ART 113G, F20 ART 13G, F20 ART 413G. Sophomores (only) register for F20 ART 213G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: sophomore standing or departmental approval. Credit 3 units. EN: H

F20 ART 213H Sculpture: Blacksmithing

This course is an introduction to blacksmithing materials, tools and techniques. Students explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for three-dimensional form. In this class we explore these possibilities and expand our sculptural vocabulary. Credit 3 units. EN: H

F20 ART 213I Sculpture: Metal Fabrication

Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools. Credit 3 units. EN: H

F10 ART 214 Introduction to Sculpture

This course introduces students to the materials, processes and concepts specific to sculpture. Students develop an understanding of, and dexterity with, multiple materials and modes of production ranging from additive, assembled, molded, modeled, to subtractive or carved. This course promotes

independent working and problem solving in regard to content and intention. Students engage in discourse about their work through critical analysis and explorations of historical and cultural precedent. This course involves lectures, material and process demonstrations, and assigned readings along with creative and technical explorations. Students in the classes of 2015 and later must complete either F10 ART 213 or ART 214 as an introduction to the sculpture major. The course is open to nonmajors and minors as space permits.

Credit 3 units. EN: H

F20 ART 214F Sculpture: Foundry

Same as F20 ART 114F, F20 ART 314F, F20 ART 414F. Sophomores (only) register for F20 ART 214F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. Prerequisite: sophomore standing or departmental approval.

Credit 3 units. EN: H

F20 ART 214G Sculpture: Wood

Same as F20 ART 114G, F20 ART 214G, F20 ART 414G. Sophomores (only) register for F20 ART 214G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. Prerequisite: sophomore standing or departmental approval.

Credit 3 units. EN: H

F20 ART 214I Sculpture: Metal Fabrication

Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.

Credit 3 units. EN: H

F20 ART 215 Introduction to Printmaking

Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.

Credit 3 units. EN: H

F10 ART 215A Printmaking Studio: Material and Culture

This is the first course in the sequence for those pursuing a BFA in Art with a concentration in printmaking and is open to others as space permits. It introduces printmaking as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Relief, intaglio, digital, and planographic processes are introduced alongside theoretical frameworks that help guide students through directed and self-determined projects. The resulting work will generate

critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students pursuing the printmaking concentration must complete either F10 ART 215A (fall) or ART 216A (spring). Prerequisites: X10 ART 101 and ART 102, F10 ART 105 or ART 106, F10 ART 107 or ART 108 or permission of instructor.

Credit 3 units. EN: H

F20 ART 216 Introduction to Printmaking

Students explore various mixed-media approaches to relief printmaking in combination with collagraph, photo lithography and drawing. Relief techniques covered include wood and linoleum cuts using the black line and white line approaches. (Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.)

Credit 3 units. EN: H

F10 ART 216A Printmaking Studio: Material and Culture

Credit 3 units.

F10 ART 217 Introduction to Photography

This course introduces photography as a dialogue between material and cultural histories, personal experience, tradition and contemporary practice. Students gain full manual control of the digital camera apparatus, learn how to import and edit raw images, and print according to fine art professional standards. The resulting work fosters critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students must provide a fully manual digital camera capable of capturing RAW images. Students in the classes of 2015 and later must complete either F10 ART 217 or ART 218 as an introduction to the Art major or minor. The course is open to nonmajors and minors as space permits.

Credit 3 units. EN: H

F10 ART 217B Photography Studio: Material and Culture

This is the first course in the sequence for those pursuing a BFA in Art with a concentration in photography and is open to others as space permits. It introduces photography as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Students gain full manual control of the digital camera apparatus, learn how to import and edit raw images, and print according to fine art professional standards. The resulting work will foster critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Student must provide a fully manual digital camera capable of capturing RAW images. Students pursuing the photography concentration must complete either F10 ART 217B (fall) or ART 218B (spring). Prerequisites: X10 ART 101 and ART 102, F10 ART 105 or ART 106, F10 ART 107 or ART 108 or permission of instructor.

Credit 3 units. EN: H

F20 ART 217I Advanced Photography Seminar

Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large format photography.

Credit 3 units. EN: H

F20 ART 217J Alternative Process Photography

(Formerly Non-Silver Photography). *Same as F20 ART 317J, F20 ART 417J.* Sophomores (only) register for F20 ART

217J. An exploration into the use of non-silver and alternative photographic processes. The use of such processes as blue and brown printing and gum printing explored, as well as photomechanical processes such as photocopying and color photocopying. Prerequisite: F20 ART 1186 Black-and-White Photography or permission of instructor.
Credit 3 units. EN: H

F10 ART 218 Introduction to Photography

This course introduces photography as a dialogue between material and cultural histories, personal experience, tradition and contemporary practice. Students gain full manual control of the digital camera apparatus, learn how to import and edit raw images, and print according to fine art professional standards. The resulting work fosters critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students must provide a fully manual digital camera capable of capturing RAW images. Students in the classes of 2015 and later must complete either F10 ART 217 or ART 218 as an introduction to the Art major or minor. The course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F20 ART 2182 Photography II

Introduction to the fundamentals of black-and-white photography. Emphasis on control of film, paper and black-and-white photographic process in the classical fine arts tradition. Course adds to the experience of Photography I. Topics may include portrait, landscape, street photography, the figure and contemporary issues in photography. Prerequisite: F10 ART 2181 Photography I or permission of department. College of Art students and Art minors have priority.
Credit 3 units. EN: H

F10 ART 218B Photography Studio: Material and Culture

Credit 3 units.

F20 ART 218I Advanced Photography Seminar

Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large format photography.
Credit 3 units. EN: H

F20 ART 219 Ceramics

An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students are introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.
Credit 3 units. EN: H

F20 ART 220 Ceramics

An introduction to the design and making of functional pottery as well as sculptural objects. Students learn basic forming processes of the wheel, coil and slab construction. While the emphasis is on high-fired stoneware, students are introduced to Raku and soda firing. Content and advanced processes and skills are encouraged according to the individual's level.
Credit 3 units. EN: H

F10 ART 221 Introduction to Painting

This studio course introduces painting as a dialogue between material and cultural histories, personal experience, tradition and contemporary practice. Students employ a variety of oil and water-based media in this concept-driven approach to new and established methodologies. The resulting work generates critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students in the classes of 2015 and later must complete either F10 ART 221 or ART 222 as an introduction to the painting major. The course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 221A Painting Studio: Material and Culture

This is the first course in the sequence for those pursuing a BFA in Art with a concentration in painting and is open to others as space permits. It introduces painting as a dialogue between material and cultural histories, personal experience, tradition, and contemporary practice. Students employ a variety of oil and water-based media in this concept-driven approach to new and established methodologies. The resulting work will generate critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students pursuing the painting concentration must complete either F10 ART 221A (fall) or ART 222A (spring). Prerequisites: X10 ART 101 and ART 102, F10 ART 105 or ART 106, F10 ART 107 or ART 108 or permission of instructor.
Credit 3 units. EN: H

F10 ART 222 Introduction to Painting

This studio course introduces painting as a dialogue between material and cultural histories, personal experience, tradition and contemporary practice. Students employ a variety of oil and water-based media in this concept-driven approach to new and established methodologies. The resulting work generates critical evaluations of form, content and intention. In addition to studio production, this course includes lectures, readings and discussions. Students in the classes of 2015 and later must complete either F10 ART 221 or ART 222 as an introduction to the painting major. The course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 222A Painting Studio: Material and Culture

Credit 3 units.

F20 ART 223D Fashion Design 2-D

Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.
Credit 3 units. EN: H

F20 ART 223E Fashion Design 3-D

Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel.
Credit 3 units. EN: H

F20 ART 223G Fashion: Textile Design

Same as F20 ART 123G, F20 ART 323G, F20 ART 423G.
Sophomores (only) register for F20 ART 223G. Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: sophomore standing or departmental approval.

Credit 3 units. EN: H

F20 ART 224D Fashion Design 2-D

Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.

Credit 3 units. EN: H

F20 ART 224E Fashion Design 3-D

Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel.

Credit 3 units. EN: H

F20 ART 224I Fashion: Textile Design

Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.

Credit 3 units. EN: H

F10 ART 225 Artist and Self

A course that investigates the self-portrait from both the studio/visual aspect as well as the psychodynamic. Through assignments, readings and in-class discussions, students examine the motivations and implications of the portrait from internal as well as external descriptions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F10 ART 226 Artist and Self

A course that investigates the self-portrait from both the studio/visual aspect as well as the psychodynamic. Through assignments, readings and in-class discussions, students examine the motivations and implications of the portrait from internal as well as external descriptions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F20 ART 227A History of Photography

Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.

Credit 3 units. EN: H

F20 ART 228A History of Photography

Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.

Credit 3 units. EN: H

F20 ART 229F Tale of Two Cities: Documenting Our Divides

The metropolitan St. Louis area has become the nation's symbol of modern segregation erupting into urban unrest and violence foiled against non-violent direct-action interventions, youth driven social protests and grassroots revitalization. With the assistance of a faculty seed grant from the Divided City Initiative, in partnership with the Center for the Humanities in Arts & Sciences and the Mellon Foundation, Tale of Two Cities: Documenting Our Divides brings together students working in trans-disciplinary teams to create documentary videos of street events, meetings and interviews that capture the immediacy of this historical moment. Students partner and engage with a local nonprofit organization, grassroots movement or religious institution. Topics can include personal and/or institutional issues of a "divided city" that are exacerbated by race, gender, economic status, sexual orientation or geography. Successful completion of this course involves researching and creating a short video with a distinctive perspective and point of view that draws upon the team's collaborative voices from history, performing arts, economics, law, social work, African-American studies, architecture and art. Skills are developed in the fundamentals of story development, video and audio-capture in the field, editing with Adobe Premier, and archival preservation. No prerequisites. This course is open to all undergrad and grad students.

Credit 3 units. EN: H

F10 ART 231 Introduction to Fashion Design

A structured discourse on fashion designers of the 20th and 21st centuries for study of the body as site and inspiration for apparel design. Class discussions and projects engage concept, materials and process. Through exploration of shapes, forms and their role in the development of 3-dimensional ideas, the student learns the fundamentals of fashion design. Students in the classes of 2015 and later must complete either F10 ART 231 or ART 232 as an introduction to the fashion design major. This course is open to nonmajors and minors as space permits.

Credit 3 units. EN: H

F10 ART 232 Introduction to Fashion Design: Materials, Volume and the Body

A structured discourse on fashion designers of the 20th and 21st centuries for study of the body as site and inspiration for apparel design. Class discussions and projects engage concept, materials and process. Through exploration of shapes, forms and their role in the development of three-dimensional ideas, the student learns the fundamentals of fashion design. Students in the classes of 2015 and later must complete either F10 ART 231 or ART 232 as an introduction to the fashion design major. This course is open to nonmajors and minors as space permits.

Credit 3 units. EN: H

F20 ART 233 Basic Illustration

An introduction to concepts, media techniques and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented.

Credit 3 units. EN: H

F10 ART 234 Basic Illustration (also F20)

Same as F20 ART 134, F20 ART 334, F20 ART 436.

Sophomores (only) register for F20 ART 234. An introduction to concepts, media techniques and problem-solving approaches within contemporary illustration. Emphasis on individual solutions to the problems presented.

Credit 3 units. EN: H

F20 ART 235A Interaction Design: Applications for Public Health

Through a blend of presentations from practitioners, classroom lectures, readings, discussion and hands-on exercises, this class engages principles and methods of interaction design within the context of health challenges. Broadly defined, interaction design is the practice of designing products, environments, systems, and services with a focus on behavior and user experience. We take on an in-depth challenge in an area such as transportation or community health resources and work in cross-disciplinary design teams with an external partner organization. Students gain experience in planning and executing a human-centered design process featuring research, ideation, synthesis, concept development, prototypes and a final presentation, which may include visual design, animation, and sound. Students work in teams to develop several intermediate project deliverables, such as prototypes and sketches. No prior course work is necessary, though experience with Adobe Photoshop, Illustrator and InDesign are helpful. No prerequisites. Open to sophomores through graduate-level students across the university.

Credit 3 units. EN: H

F20 ART 235F Interactivity and Web Design

This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.

Credit 3 units. EN: H

F20 ART 235G The Licensed Image: Development and Distribution

An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors and students outside the College of Art interested in developing visual products, including business students.

Credit 3 units. EN: H

F20 ART 235I Communication Design I

An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual,

aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing. Credit 3 units. EN: H

F20 ART 235J Introduction to Animating in Three Dimensions

This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 ART 101 Drawing or equivalent or permission of instructor.

Credit 3 units. EN: H

F20 ART 235L Communication Design and Business

This course provides an introduction to business communications in a visual environment. Subjects addressed include visual organization, introductory typography, basic identity development, message construction and business presentation development.

Credit 3 units. EN: H

F10 ART 236 Textile Design

Credit 3 units. EN: H

F20 ART 2361 Advertising 1

Same as F20 ART 1361, F20 ART 3361, F20 ART 4361 - Sophomores (only) register for F20 ART 2361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary.

Credit 3 units. EN: H

F20 ART 2362 Advertising I

Credit 3 units. EN: H

F20 ART 2363 Advertising in the Digital Age

Same as F20 ART 1363, ART 3363, ART 4363 - Sophomores (only) register for F20 ART 2363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study "game changing" developments in advertising communications; changing dynamics in audience behavior — including the ability to "opt out"; the advertising industry's adaptation to digital technologies; and finally, we speculate

on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one. Credit 3 units. EN: H

F20 ART 2364 Advertising in the Digital Age

Credit 3 units. EN: H

F20 ART 2365 History of Advertising

Credit 3 units.

F20 ART 2366 History of Advertising

Same as F20 1366, F20 3366, F20 4366 - Freshmen (only) register for F20 2366. The historical, cultural and technological development of advertising in America from the colonial period to the present. This course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects.

Credit 3 units.

F20 ART 236F Interactivity and Web Design

This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.

Credit 3 units. EN: H

F20 ART 236G The Licensed Image: Development and Distribution

An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors and students outside the College of Art interested in developing visual products, including business students.

Credit 3 units. EN: H

F20 ART 236I Communication Design I

An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. Credit 3 units. EN: H

F20 ART 2384 Special Topics in Visual Communications: Presenting a Visual Business Case

Learn firsthand what it takes to sell a new idea to business decision makers. Work with executives and entrepreneurs to build a compelling business case. Help create visual presentations designed to take the target audience through a step-by-step value proposition. Learn how to make things happen in business by working with executives at Charter Communications; Rivervest, an \$89 million biotech venture fund; and others. Course taught by Dave Gray, founder and CEO of XPLANE Corp.

Credit 3 units. EN: H

F20 ART 2385 The Art of Advertising

The Art of Advertising elective introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. The course consists of lectures and visiting instructors, brief essay quizzes and a series of exercises designed to acquaint each student with administrative and creative processes and various disciplines within the advertising field. Major emphasis is placed upon the creative disciplines.

Credit 3 units. EN: H

F20 ART 2386 The Art of Advertising

Same as F20 ART 1386, F20 ART 3386, F20 ART 4386.

Sophomores (only) register for F20 ART 2386. This course introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. Credit 3 units. EN: H

F10 ART 238B Word and Image I

This course centers on the creation of word-image relationships. It focuses on intensive visual methodology and clear communication. Students make illustrations, explore typography and bring visual elements together into a unified whole. Projects take the form of posters, image sets, books, icons, maps, labels, infographics, etc. As the course progresses, the student works to narrow his or her focus within the field of visual communications by selecting particular projects from a suite of offerings. Required for the communication design major. Prerequisite: Digital Studio

(F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). The course is open to nonmajors and minors as space permits.

Credit 3 units. EN: H

F10 ART 238C Typography I

This course introduces the language and standards of typography. Through a series of exercises and projects, students explore type as a vehicle for conveying information and as an expressive and interpretive tool. Required for the communication design major. Prerequisite: Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). The course is open to nonmajors and minors as space permits.

Credit 3 units. EN: H

F20 ART 238J Advanced Animation

Credit 3 units. EN: H

F10 ART 241 Digital Studio

This course introduces students to basic digital tools to aid in conceptual and technical development of artwork. Students become familiar with pixel, vector, and moving-image software within a context of visual thinking and artmaking. Students must complete either Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243). This course is strongly recommended for BFA in Art majors and students anticipating concentrations in painting, printmaking and sculpture.

Credit 3 units. EN: H

F10 ART 242 Digital Studio

This course introduces students to basic digital tools to aid in conceptual and technical development of artwork. Students become familiar with pixel, vector and moving-image software within a context of visual thinking and artmaking. Students in the classes of 2015 and later must complete either Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). This course is strongly recommended for painting, printmaking and sculpture majors.

Credit 3 units. EN: H

F10 ART 243 Digital Design

Students are introduced to digital tools in the context of applied design thinking for graphic design, surface design and image-making. Students pursue projects using Adobe Photoshop, Adobe Illustrator and Adobe InDesign. This course engages software learning in the service of design thinking. Students in the classes of 2015 and later must complete either Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). This course is strongly recommended for communication design, fashion design and photography majors.

Credit 3 units. EN: H

F10 ART 244 Digital Design

Students are introduced to digital tools in the context of applied design thinking for graphic design, surface design and image-making. Students pursue projects using Adobe Photoshop, Adobe Illustrator and Adobe InDesign. This course engages software learning in the service of design thinking. Students in the classes of 2015 and later must complete either Digital Studio (F10 ART 241 or ART 242) or Digital Design (F10 ART 243 or ART 244). This course is strongly recommended for communication design, fashion design and photography majors.

Credit 3 units. EN: H

F20 ART 2481 The Illustrated Book: Design and Production

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, "virtual" media. Certain projects may require a second semester of study to complete.

Credit 3 units. EN: H

F20 ART 2482 The Illustrated Book: Design and Production

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, "virtual" media. Certain projects may require a second semester of study to complete.

Credit 3 units. EN: H

F10 ART 250 Independent Study (also F20)

Designed for sophomores fulfilling art minor requirements. Prerequisites: Permission of instructor and submission of a written proposal to the associate dean of students (Room 1, Bixby Hall).

Credit variable, maximum 3 units. EN: H

F10 ART 261 Issues in Pictorial Space

A drawing course that examines spatial systems, traditions and contemporary usages; students develop artwork using traditional and experimental techniques. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 ART 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F10 ART 262 Issues in Pictorial Space

A drawing course that examines spatial systems, traditions and contemporary usages; students develop artwork using traditional and experimental techniques. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F20 ART 2643 Italian Level II

This course is a continuation of the conversational Italian course required for study abroad students. Taught entirely in Italian, this class concentrates on conversational Italian. There is an emphasis on class participation accompanied by readings and writing. The student develops facility speaking the language on an everyday basis.

Credit 5 units. EN: H

F20 ART 2644 Italian Level II

This course is a continuation of the conversational Italian course required for the Study Abroad students. Taught entirely in Italian, this class concentrates on conversational Italian. There is an emphasis on class participation accompanied by readings and writing. The student develops facility speaking the language on an everyday basis. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy.

Credit 5 units. EN: H

F20 ART 2646 Italian Language

This course covers Italian grammar and conversation for study abroad students in Florence. Taught entirely in Italian. There is an emphasis on class participation accompanied by readings and writings. The student develops facility speaking the language on an everyday basis.

Credit 5 units.

F20 ART 2648 Italian Language

Credit 3 units.

F10 ART 265 Conceptual Methods in Drawing

Communication of conceptual content through the invention of systems of signification related to language structure. Equates drawing with the primary formation of concepts — anthropological models, serial structures, symbolic languages, spatial systems. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F10 ART 266 Conceptual Methods in Drawing

Communication of conceptual content through the invention of systems of signification related to language structure. Equates drawing with speech in the primary formation of concepts — anthropological models, serial structures, symbolic languages, spatial systems. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F20 ART 2661 Semester Abroad Program Seminar

This course prepares students participating in the Sam Fox School's Semester Abroad Programs. The seminar meets eight times over the course of the semester. Attendance is mandatory for students going abroad. Prerequisite: College of Art and College of Architecture students selected for the Sam Fox School Abroad Programs.

Credit 1 unit. EN: H

F20 ART 2662 Semester Abroad Program Seminar

This course prepares students participating in the College of Art's Semester Abroad Program in Florence, Italy. The seminar meets eight times over the course of the semester. Attendance is required. Prerequisite: students selected for the Semester Abroad Program only.

Credit 1 unit. EN: H

F10 ART 267 Dimension Studies

An investigation of surface and volume. Production of objects carried out in relation to the motivating idea of dimensional forms as evolved choices. Exploration of tension and movement between two and three dimensions. Prerequisites: F10 ART 101 or X10 CORE 101, F10 ART 102 or X10 CORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F10 ART 267A Pattern, Repetition and Accumulation

The exploration of excessiveness with materials, images and/or gestures. Students investigate the relationships between such issues as part/whole, order/chaos, seen/secrets, permanence/ephemerality, formalism/meaning. Studio and site-specific work is open to 2-, 3-, and 4-dimensional solutions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F10 ART 268 Dimension Studies

An investigation of surface and volume. Production of objects carried out in relation to the motivating idea of dimensional forms as evolved choices. Exploration of tension and movement between two and three dimensions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108, or permission of instructor.

Credit 3 units. EN: H

F10 ART 268A Pattern, Repetition and Accumulation

The exploration of excessiveness with materials, images and/or gestures. Students investigate the relationships between such issues as part/whole, order/chaos, seen/secrets, permanence/ephemerality, formalism/meaning. Studio and site-specific work is open to 2-, 3- and 4-dimensional solutions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.

Credit 3 units. EN: H

F20 ART 271 Narrative, Sequence and Seriality

The investigation of narrative structure and strategy, both implied and explicit. The definition of narrative extends to purely formal issues of sequence and arrangement. Relationships between visual and verbal structures, attention to the architecture of stories. Consideration of historical and contemporary visual narratives; exploration of personal and public forms. Studio production; open to 2- and 3-dimensional solutions.

Credit 3 units. EN: H

F20 ART 2713 Introduction to Book Binding

Same as F20 ART 1713, F20 ART 3713, F20 ART 4713. Sophomores (only) register for F20 ART 2713. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion

and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings.

Credit 3 units. EN: H

F20 ART 2714 Introduction to Book Binding

Same as F20 ART 1714, F20 ART 3714, F20 ART 4714. Sophomores (only) register for F20 ART 2714. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings.

Credit 3 units. EN: H

F10 ART 272 Narrative, Sequence and Seriality

The investigation of narrative structure and strategy, both implied and explicit. The definition of narrative extends to purely formal issues of sequence and arrangement. Relationships between visual and verbal structures, attention to the architecture of stories. Consideration of historical and contemporary visual narratives; exploration of personal and public forms. Studio production; open to 2- and 3-dimensional solutions. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F10 ART 273 Time Arts

This course explores media not found in the traditions of painting and sculpture. Rather, it uncovers the mysteries behind the 20th-century phenomenon of Performance Art. "Performance" explores the interrelationship between numerous aesthetic approaches, a few of which are: time observation, duration works, four-dimensional works, body art and monologue. Students become facilitators of events. Four-dimensional structures of sequence, narrative and compilation become the constructs for investigation. Under this heading, hands-on experience with film making, video production, sound recording and performance art are explored. Students work independently, choosing from a menu of options. Students gain conceptual strategies, historical perspective and technical skills relating to each media and their interplay. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108 or permission of instructor.

Credit 3 units. EN: H

F10 ART 273A Durational Systems

Investigation of duration as a mode of artistic production. Explores time-based objects and events. Open to digital, 3-D and 4-D solutions. Students harness the power of new media to interpret concepts such as time, distance, collaboration and interactivity through traditional, digital and web-based platforms. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.

Credit 3 units. EN: H

F10 ART 274 Time Arts

This course explores media not found in the traditions of painting and sculpture. Rather, it uncovers the mysteries behind the 20th-century phenomenon of Performance Art. "Performance" explores the interrelationship between numerous aesthetic approaches, a few of which are: time observation, duration works, four-dimensional works, body art and monologue. Students become facilitators of events. Four-dimensional structures of sequence, narrative and compilation become the constructs for investigation. Under this heading, hands-on experience with film making, video production, sound recording, and performance art are explored. Students work independently choosing from a menu of options. Students gain conceptual strategies, historical perspective and technical skills relating to each media and their interplay. F10 ART 2783 Special Topics in Core — Florence, Italy

Studies in special subjects. Topics vary from semester to semester. Consult *Course Listings*. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy.
Credit 3 units. EN: H

F10 ART 2784 Special Topics in Core — Florence, Italy

Study abroad in Florence, Italy. Studies in special subjects. Topics vary from semester to semester. Consult *Course Listings*. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy.
Credit 3 units. EN: H

F10 ART 2787 Visiting Faculty Workshops — Florence, Italy

Students participate in month-long workshops with visiting faculty from the College of Art. This course provides students with the opportunity to examine different artistic disciplines. The course can be modified to accommodate the student's experience abroad. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy.
Credit 3 units. EN: H

F10 ART 2788 Visiting Faculty Workshops — Florence, Italy

Students participate in three month-long workshops with visiting faculty from the College of Art. This course provides students with the opportunity to examine different artistic disciplines. The course can be modified to accommodate the student's experience abroad. Prerequisite: College of Art sophomores in the Study Abroad Program in Florence, Italy.
Credit 3 units. EN: H

F10 ART 279 Recognition, Construction and the Found

In this course students juxtapose, combine and edit found objects, imagery and text to create 2- and 3-dimensional artwork. Historical precedents such as assemblage, collage and installation are examined. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 280 Recognition, Construction and the Found

In this course students juxtapose, combine and edit found objects, imagery and text to create 2- and 3-dimensional artwork. Historical precedents such as assemblage, collage and installation are examined. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.

F10 ART 283 Typography and Letterform: The Design of Language

As an investigation of the formal qualities of familiar objects, letters, this is an introductory-level course in design thinking using families of letterforms as our focus. Students explore design strategies required to make individual forms into a family of types through exercises in tracing, drawing, letterpress printing and collage. Particular emphasis is devoted to the concept of modularity, including an assignment to design and print a modular typeface. Students in the class of 2015 and later must complete either F10 ART 295, ART 296, ART 283 or ART 284 or other F10 200-level introductory studio as an introduction to the communication design major. Prerequisites: X10 XCORE 101, X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. This course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 284 Typography and Letterform: The Design of Language

As an investigation of the formal qualities of familiar objects, letters, this is an introductory-level course in design thinking using families of letterforms as our focus. Students explore design strategies required to make individual forms into a family of types through exercises in tracing, drawing, letterpress printing and collage. Particular emphasis is devoted to the concept of modularity, including an assignment to design and print a modular typeface. Students in the class of 2015 and later must complete either F10 ART 295, ART 296, ART 283 or ART 284 or other F10 200-level introductory studio as an introduction to the communication design major. Prerequisites: X10 XCORE 101, X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. This course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 285 Color Systems

A sustained experience in color which includes the study of optical, theoretical and cultural issues. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F20 ART 286 Special Topics

A sustained experience in color which includes the study of optical, theoretical and cultural issues. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 287 Material Systems

Investigates object making via materials and various processes to explore visual and physical metaphor. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 288 Material Systems

Investigates object making via materials and various processes to explore visual and physical metaphor. Prerequisites: F10 ART

101 or X10 CORE 101, F10 ART 102 or X10 CORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 291 Core New Topic

Studies in special subjects. Topics vary from semester to semester. Consult *Course Listings*. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 292 Core New Topic

Studies in special subjects. Topics vary from semester to semester. Consult *Course Listings*. Prerequisites: F10 ART 101 or X10 CORE 101, F10 ART 102 or X10 CORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 294 Core New Topic

Studies in special subjects. Topics vary from semester to semester. Consult *Course Listings*. Prerequisites: F10 ART 101 or X10 CORE 101, F10 ART 102 or X10 CORE 102, F10 ART 105 or F10 ART 106 and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 295 Pictures for Communication

Students investigate the realm of functional pictures through pictograms, comic strips, diagrammatic maps, visual metaphors and narratives. Each project focuses on a particular aspect of conceptual and formal clarity. Significant attention is paid to aesthetics. Students use a variety of media and are introduced to Adobe Illustrator. Students in the class of 2015 and later must complete either F10 ART 295, ART 296, ART 283 or ART 284 or other F10 200-level introductory studio as an introduction to the communication design major. Prerequisites: X10 XCORE 101, X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. This course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F20 ART 296 Pictures for Communication

Students investigate the realm of functional pictures through pictograms, comic strips, diagrammatic maps, visual metaphors and narratives. Each project focuses on a particular aspect of conceptual and formal clarity. Significant attention is paid to aesthetics. Students use a variety of media and are introduced to Adobe Illustrator. Students in the class of 2015 and later must complete either F10 ART 295, ART 296, ART 283 or ART 284 or other F10 200-level introductory studio as an introduction to the communication design major. Prerequisites: X10 XCORE 101, X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor. This course is open to nonmajors and minors as space permits.
Credit 3 units. EN: H

F10 ART 297 Studio Methods

There are many methods for making decisions in the practice of making art. This course investigates different strategies and structural devices for examining and enhancing your making

process and the visual impact of the product. The product is open ended. The process is particular and specific. The challenge is to maximize the conditions for effective and efficient decision making. The course is organized around individual works as analyzed and evaluated through such systems as Bloom's taxonomies, inductive and deductive reasoning, analogous thinking systems, hypothesis and visual evidentiary argument, and emergence theory. Substantial reading and writing are included as complimentary to the making process. Studies in special subjects. Topics vary from semester to semester. Consult *Course Listings*. Prerequisites: F10 ART 101 or X10 XCORE 101, F10 ART 102 or X10 XCORE 102, F10 ART 105 or F10 ART 106, and F10 ART 107 or F10 ART 108, or permission of instructor.
Credit 3 units. EN: H

F10 ART 301A Drawing: Art Practice

Prerequisites: Drawing I (X10 CORE 101), Drawing II (X10 CORE 102), and junior standing. Open to BFA students who have taken the prerequisites, and others, including minors, with consent of instructor.
Credit 3 units. EN: H

F10 ART 302A Drawing: Art Practice

Credit 3 units. EN: H

F20 ART 3080 Art/Architecture and Social Practice

This seminar brings together several different disciplines and methodologies to look at the practice of the arts in the context of community. The seminar combines hands-on work and observation, theoretical analysis and reflection, and specific proposals. For our case studies, we concentrate on several programs and places currently existing or developing in the St. Louis region. We discuss both ends and means, and systems of evaluation that draw on, among other things, art, architecture, social work, and community development.
Same as ARCH 5080
Credit 3 units.

F20 ART 309 Special Topics: Photography for Architecture Students

The scope of this course is to offer both a technical and theoretical understanding of architectural photography. The course also emphasizes 4x5-view camera skill, use of DSLR and digital input, studio lighting as related to model reproduction, discussion of work, and development of individual projects. Students must provide a digital camera.
Credit 3 units. EN: H

F20 ART 310 Special Topics: Photography for Architecture Students

The scope of this course is to offer both a technical and theoretical understanding of architectural photography. The course also emphasizes 4x5-view camera skill, use of DSLR and digital input, studio lighting as related to model reproduction, discussion of work, and development of individual projects. Students must provide a digital camera.
Credit 3 units. EN: H

F20 ART 311 Painting

Advanced study in painting with individualized criticism, lectures and seminars, leading toward the development of personal idioms.

Credit 3 units. EN: H

F20 ART 3115 Intensive Intermediate Painting

Same as F20 ART 2115, F20 ART 4115. Juniors (only) register for course F20 ART 3115. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve at oil painting in its traditional 20th-century use and gain some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments as well as a few reading assignments. This is a very structured course, designed to develop a student's strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor.

Credit 3 units. EN: H

F20 ART 3116 Intensive Intermediate Painting

Same as F20 ART 2116, F20 ART 4116. Juniors (only) register for course F20 ART 3116. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve at oil painting in its traditional 20th-century use and gain some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments as well as a few reading assignments. This is a very structured course, designed to develop a student's strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor.

Credit 3 units. EN: H

F10 ART 311A Painting: Art Practice

Prerequisite: Introduction to Painting (ART 221 or ART 222).

Credit 3 units. EN: H

F20 ART 311B Painting II

Same as F20 ART 411B. Juniors (only) register for F20 ART 311B. Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner's familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course. School of Art majors and non-art students pursuing an art minor have priority. Prerequisites: junior standing and a beginning painting elective or permission of instructor.

Credit 3 units. EN: H

F10 ART 311D Painting: Art Practice

Prerequisite: Introduction to Painting (F10 ART 221 or ART 222). Open to BFA students who have taken the prerequisite and others, including minors, with consent of instructor.

Credit 3 units. EN: H

F20 ART 312 Painting

Advanced study in painting with individualized criticism, lectures and seminars, leading toward the development of personal idioms.

Credit 3 units. EN: H

F10 ART 312A Painting: Art Practice

This major course of study for juniors and seniors expands the dialogue between material and cultural histories, personal experience, tradition and current practice in contemporary painting. The learning sequence consists of comprehensive investigations of painting processes and materials through assigned and self-directed projects, leading to the development of a unique body of work. Critical assessment of work produced occurs in discussion with faculty and peers. In addition to studio production, this course includes level-specific seminars and visits to galleries and museums. Required for painting majors. Prerequisites: F10 ART 221 or ART 222; F10 ART 311A.

Credit 3 units. EN: H

F20 ART 312B Painting II

Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner's familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: a beginning painting elective or permission of instructor.

F10 ART 312D Painting: Art Practice

Credit 3 units. EN: H

F10 ART 312E Painting: Art Practice

Credit 3 units. EN: H

F20 ART 313A Sculpture

Exploration of advanced concepts and techniques. Involvement with larger scale, environmental relationships and architectural considerations. Processes and materials include construction in a large variety of materials, firing, plaster mold making, direct plaster work, wood and stone carving, foundry, plastics laminations, soft sculpture, welding, soldering, brazing, metalwork.

Credit 3 units. EN: H

F10 ART 313D Sculpture: Art Practice

Contemporary practice in sculpture exists in plural modes at the intersection of diverse cultural traditions, material and process applications, and ideological positions. In this studio, students explore sculpture through sustained investigations in concept, material, media and process. Juniors and seniors participate in demonstrations, workshops and level-specific seminars that focus on individual topical research. Juniors expand their studio activity to include public art projects as part of a long-running program in University City. Seniors build a portfolio of work and prepare to enter the professional field. Critique structures are geared toward intellectual development, oral presentation

and writing skills as they relate to studio practice. Required for sculpture majors. Prerequisite: F10 ART 213 or ART 214.
Credit 3 units. EN: H

F20 ART 313F Sculpture: Foundry

Same as F20 ART 113F, F20 ART 213F, F20 ART 413F. Juniors (only) register for F20 ART 313F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: junior standing or departmental approval.
Credit 3 units. EN: H

F20 ART 313G Sculpture: Wood

Same as F20 ART 113G, F20 ART 213G, F20 ART 413G. Juniors (only) register for F20 ART 313G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: junior standing or departmental approval.
Credit 3 units. EN: H

F20 ART 313H Sculpture: Blacksmithing

This course is an introduction to Blacksmithing materials, tools and techniques. Students explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for 3-dimensional form. In this class we explore these possibilities and expand our sculptural vocabulary.
Credit 3 units. EN: H

F20 ART 313I Sculpture: Metal Fabrication

Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.
Credit 3 units. EN: H

F20 ART 314A Sculpture

Exploration of advanced concepts and techniques. Involvement with larger scale, environmental relationships and architectural considerations. Processes and materials include construction in a large variety of materials, firing, plaster mold making, direct plaster work, wood and stone carving, foundry, plastics lamination, soft sculpture, welding, soldering, brazing, metalwork.
Credit 3 units. EN: H

F10 ART 314D Sculpture: Theory and Practice

Contemporary practice in sculpture exists in plural modes at the intersection of diverse cultural traditions, material and process applications, and ideological positions. In this studio, students

explore sculpture through sustained investigations in concept, material, media and process. Juniors and seniors participate in demonstrations, workshops and level-specific seminars that focus on individual topical research. Juniors expand their studio activity to include public art projects as part of a long-running program in University City. Seniors build a portfolio of work and prepare to enter the professional field. Critique structures are geared toward intellectual development, oral presentation and writing skills as they relate to studio practice. Required for sculpture majors. Prerequisite: F10 ART 213 or ART 214; F10 ART 313D.

Credit 3 units. EN: H

F20 ART 314F Sculpture: Foundry

Same as F20 ART 114F, F20 ART 214F, F20 ART 414F. Juniors (only) register for F20 ART 114F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. Prerequisite: junior standing or departmental approval.

Credit 3 units. EN: H

F20 ART 314G Sculpture: Wood

Same as F20 ART 114G, F20 ART 214G, F20 ART 413G. Juniors (only) register for F20 ART 314G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. Prerequisite: junior standing or departmental approval.

Credit 3 units. EN: H

F20 ART 314I Sculpture: Metal Fabrication

Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.

Credit 3 units. EN: H

F10 ART 314J Photography: Art Practice

Credit 3 units. EN: H

F20 ART 315 Printmaking

Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.

Credit 3 units. EN: H

F10 ART 315A Printmaking/Drawing

A comprehensive investigation of both traditional and experimental drawing and printmaking techniques. Students are encouraged to explore large-scale mixed-media processes

with an emphasis on the development of individual images and marking styles. Students have facilities available in papermaking and printmaking with capabilities for computer and photographic techniques.

Credit 8 units. EN: H

F10 ART 315B Printmaking: Art Practice

Students explore the spectrum of print media and culture, find points of intersection with other media and disciplines, and develop and individual, sustained investigation as an artist. Advanced techniques and concepts are imparted through participatory workshops, focusing on sets of skills such as silkscreen, etching and monotype around strategies in the field of printmaking and contemporary art. Juniors and seniors participate in level-specific seminars that are focused on topical research and critique structures, and are geared toward intellectual development, oral presentation and writing skills as they relate to studio practice. Required for printmaking majors. Prerequisite: F10 ART 215 or ART 216.

Credit 3 units. EN: H

F20 ART 316 Printmaking

Students explore various mixed-media approaches to relief printmaking in combination with collagraph, photo lithography and drawing. Relief techniques covered include wood and linoleum cuts using the black line and white line approaches. (Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.)

Credit 3 units. EN: H

F20 ART 3162 Special Topics in Printmaking

Same as F20 ART 1162, F20 ART 2162, F20 ART 4162. Juniors (only) register for F20 ART 3162.

Credit 3 units. EN: H

F10 ART 316A Printmaking/Drawing

A comprehensive investigation of both traditional and experimental drawing and printmaking techniques. Students are encouraged to explore large-scale mixed-media processes with an emphasis on the development of individual images and marking styles. Students have facilities available in papermaking and printmaking with capabilities for computer and photographic techniques.

Credit 8 units. EN: H

F10 ART 316B Printmaking: Art Practice

Students explore the spectrum of print media and culture, find points of intersection with other media and disciplines, and develop and individual, sustained investigation as an artist. Advanced techniques and concepts are imparted through participatory workshops, focusing on sets of skills such as silkscreen, etching and monotype around strategies in the field of printmaking and contemporary art. Juniors and seniors participate in level-specific seminars that are focused on topical research and critique structures, and are geared toward intellectual development, oral presentation and writing skills as they relate to studio practice. Required for printmaking majors. Prerequisites: F10 ART 215 or ART 216; F10 ART 315B.

Credit 3 units. EN: H

F10 ART 316F Printmaking: Art Practice

Credit 3 units. EN: H

F10 ART 317 Photography

Refining methods, materials and techniques of photography, as well as developing working knowledge of chemistry, film and paper. Assignments challenge students' insights into their own portfolios of photographs as well as those of other photographers.

Credit 8 units. EN: H

F20 ART 3173 Photography III

This class is designed for the student who is seeking to explore advanced issues in photography using a broad range of photographic practices and media. In addition to further mastering of technique and craft, students, through readings and class discussion, place their work within a context of contemporary issues in photographic image making, theory and criticism.

Credit 3 units. EN: H

F10 ART 317A Digital Imaging and Photography

Refining methods, materials and techniques of photography, as well as developing a working knowledge of chemistry, film and paper. Assignments challenge the students' insight into their own portfolio of photographs as well as those of other photographers.

Credit 8 units. EN: H

F20 ART 317B Photography II (Black-and-White)

Course adds to the experience of Photography I (Black-and-White). Students investigate phenomena relative to the camera and photography. Students develop the vision necessary to take intelligent and articulate photographs, as well as establish the notion of high craft in terms of the negative and the print. Topics may include portrait, landscape, street photography, the figure and the photo story.

Credit 3 units. EN: H

F20 ART 317E Color Photography II

The use of color negative materials and the development of a technical and aesthetic vocabulary with color materials. Use of color analyzers, masking systems, and alternatives within negative color systems.

Credit 3 units. EN: H

F10 ART 317G Photography: Art Practice

In a rigorous multi-level peer critique environment, students incorporate discourse and personal experience to create formal and conceptual intent with the photograph. Through assignments and individual projects, students experiment with narrative and non-narrative approaches intrinsic to series and installation-based photography. Investigation of various materials, venues, and means distribution is complemented by praxes on their contemporary manifestations and discussed through multiple writing formats. Image capture through camera-less, digital SLR, medium and large format camera systems is covered in detail as well as advanced analog to digital scanning, editing and printing techniques. Required for photography majors. Prerequisite: F10 ART 217 or 218.

Credit 3 units. EN: H

F10 ART 317H Photography: Art Practice

Prerequisite: Introduction to Photography (F10 ART 217 or ART 218). Open to BFA students who have taken the prerequisite and others, including minors, with consent of instructor.

Credit 3 units. EN: H

F20 ART 317I Advanced Photography Seminar

Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large-format photography.

Credit 3 units. EN: H

F20 ART 317J Alternative Process Photography

(Formerly Non-Silver Photography). Same as F20 ART 217J, F20 ART 317J. Juniors (only) register for F20 ART 317J. An exploration into the use of nonsilver and alternative photographic processes. The use of such processes as blue and brown printing and gum printing is explored, as well as photomechanical processes such as photocopying and color photocopying. Prerequisite: F10 ART 1186 Black-and-White Photography or permission of instructor.

Credit 3 units. EN: H

F10 ART 318 Photography

Refining methods, materials and techniques of photography, as well as developing working knowledge of chemistry, film and paper. Assignments challenge students' insights into their own portfolios of photographs as well as those of other photographers.

Credit 8 units. EN: H

F20 ART 3183 Photography III

This class is designed for the student who is seeking to explore advanced issues in photography using a broad range of photographic practices and media. In addition to further mastering of technique and craft, students, through readings and class discussion, place their work within a context of contemporary issues in photographic image making, theory and criticism.

Credit 3 units. EN: H

F20 ART 3184 Photography III

This class is designed for the student who is seeking to explore advanced issues in photography using a broad range of photographic practices and media. In addition to further mastering of technique and craft, students, through readings and class discussion, place their work within a context of contemporary issues in photographic image making, theory and criticism.

Credit 3 units. EN: H

F20 ART 3185 Intermediate Photography

This class is designed for the student who is seeking to explore issues in photography using a broad range of photographic practices and media. In addition to further mastering of technique and craft, students, through readings and class discussion, place their work within a context of contemporary issues in photographic image-making, theory and criticism. In addition to completing all assignments, a series of thematic works is completed and presented at the end of the semester. Open to all photographic medias and formats. Prerequisites: Black and

White Photography or Digital Photography I or permission of instructor.

Credit 3 units. EN: H

F20 ART 318A Digital Imaging and Photography

Refining methods, materials and techniques of photography, as well as developing working knowledge of chemistry, film and paper. Assignments challenge the students' insight into their own portfolios of photographs as well as those of other photographers.

Credit 3 units. EN: H

F20 ART 318B Photography II (Black-and-White)

Course adds to the experience of Photography I (Black-and-White). Students investigate phenomena relative to the camera and photography. Students develop the vision necessary to take intelligent and articulate photographs, as well as establish the notion of high craft in terms of the negative and the print. Topics may include portrait, landscape, street photography, the figure and the photo story.

Credit 3 units. EN: H

F20 ART 318E Color Photography II

This course adds to the experience of Color Photography I. Students expand their knowledge and handling of color negative materials and begin to learn the basics of color printing with transparency films and reversal printing. Some advanced printing and shooting techniques covered. Emphasis on developing a personal color sensibility and producing a cohesive body of work that represents that vision.

Credit 3 units. EN: H

F10 ART 318G Photography: Art Practice

In a rigorous multi-level peer critique environment, students incorporate discourse and personal experience to create formal and conceptual intent with the photograph. Through assignments and individual projects, students experiment with narrative and non-narrative approaches intrinsic to series and installation-based photography. Investigation of various materials, venues, and means distribution will be complemented by praxes on their contemporary manifestations and discussed through multiple writing formats. Image capture through camera-less, digital SLR, medium and large format camera systems will be covered in detail as well as advanced analog to digital scanning, editing and printing techniques. Required for photography majors.

Prerequisite: F10 217 or 218; F10 317G.

Credit 3 units. EN: H

F10 ART 318H Photography: Art Practice

Credit 3 units. EN: H

F20 ART 318I Advanced Photography Seminar

Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large-format photography.

Credit 3 units. EN: H

F10 ART 318J Painting: Art Practice

Credit 3 units. EN: H

F20 ART 319 Ceramics

Advanced ceramics/glass study focuses on the student acquiring working knowledge of a variety of available materials and technologies to develop a personal direction and pursue self-determined goals. Experimentation is encouraged in both glass and clay. This may involve working in traditional or contemporary, vessel or sculptural concepts. Available to students is a variety of materials, equipment and technical information. Ceramics, porcelain, stoneware, terra-cotta and low-temperature clays are used in conjunction with extensive study of glazing and firing technology. Students explore and develop skills in Raku, low-temperature, oxidation, reduction, electric, high-temperature and pit firings.

Credit 3 units. EN: H

F20 ART 320 Ceramics

Advanced ceramics/glass study focuses on the student acquiring working knowledge of a variety of available materials and technologies to develop a personal direction and pursue self-determined goals. Experimentation is encouraged in both glass and clay. This may involve working in traditional or contemporary, vessel or sculptural concepts. Available to students is a variety of materials, equipment and technical information. Ceramics, porcelain, stoneware, terra-cotta and low-temperature clays are used in conjunction with extensive study of glazing and firing technology. Credit 3 units. EN: H

F10 ART 323 Fashion Design

A creative approach to fashion design, with flat pattern and draping skills used in the development of original sample garments. Construction techniques and industrial methods are presented and applied to specific structured design problems. Students work with visiting designer-critics. Garments are reviewed by a professional jury in the spring semester and selected for the annual student fashion show.

Credit 8 units. EN: H

F10 ART 323A Three-Dimensional Fashion Design Foundation

Study of fundamental apparel design issues. Students begin with basic draping methods and explore evolution and craft, decoration and adornment for apparel. Research for class exercises is based upon the most elementary forms of historical and contemporary dress.

Credit 3 units. EN: H

F10 ART 323B Two-Dimensional Fashion Design Foundation

Review and practice of applicable material from Fashion Illustration: Visualizing Apparel (F10 ART 234) course for presenting the figure in garment design. Students explore a variety of media for expressive fashion communication and learn to combine page elements with compelling design strategies. Research and study of landmark and innovative illustrators are conducted as well as application of their ideas in practice. Additionally, the course covers incorporation of technical drawings, text and textile swatches with illustration style to convey design vision for fashion presentation.

Credit 3 units. EN: H

F10 ART 323C Digital Fashion and Textile Design

Review of practice of introductory material from Fashion Illustration: Visualizing Apparel (F10 ART 234). In depth exploration of vector-based illustration for garment and textile schematics. Establishment of strategies for designing apparel, wovens, knits, prints and patterns using universal and industry software.

Credit 3 units. EN: H

F20 ART 323D Fashion Design 2-D

Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.

Credit 3 units. EN: H

F20 ART 323E Fashion Design 3-D

Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel.

Credit 3 units. EN: H

F20 ART 323G Fashion: Textile Design

Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.

Credit 3 units. EN: H

F10 ART 324 Fashion Design

A creative approach to fashion design, with flat pattern and draping skills used in the development of original sample garments. Construction techniques and industrial methods are presented and applied to specific structured design problems. Students work with visiting designer-critics. Garments are reviewed by a professional jury in the spring semester and selected for the annual student fashion show.

Credit 8 units. EN: H

F20 ART 324D Fashion Design 2-D

Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.

Credit 3 units. EN: H

F20 ART 324E Fashion Design 3-D

Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel.

Credit 3 units. EN: H

F20 ART 324I Fashion: Textile Design

Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.

Credit 3 units. EN: H

F20 ART 327A History of Photography

Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.

Credit 3 units. EN: H

F20 ART 328A History of Photography

Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.

Credit 3 units. EN: H

F10 ART 328D Illustrating for Licensed Products

In this studio course, students research, concept and create images that are appropriate for application to products in the licensing field. Students work toward developing icons/motifs, a mainstay in licensing, through deepening their skill sets in shape based illustration, design elements of composition and hierarchy and thoughtfully considered color. Class content includes the development of collections and images, patterns, and exploration of the visual content, artists, audiences and trends in a fluid marketplace. Projects for this course are drawn from the gift and home decor markets, fabric design and stationery products. Prerequisite: Image & Story or Editorial Illustration or permission of instructor. Please email Linda Solovic at lsolovic@mindspring.com for more information. This course is appropriate for juniors in the Communication Design major.

Credit 3 units.

F10 ART 329C Time-Based Media: Art Practice

Prerequisite: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor.

Credit 3 units. EN: H

F20 ART 329E Tale of Two Cities: Documenting Our Divides

The metropolitan St. Louis area has become the nation's symbol of modern segregation erupting into urban unrest and violence foiled against non-violent direct-action interventions, youth driven social protests and grassroots revitalization. With the assistance of a faculty seed grant from the Divided City Initiative, in partnership with the Center for the Humanities in Arts & Sciences and the Mellon Foundation, Tale of Two Cities: Documenting Our Divides brings together students working in trans-disciplinary teams to create documentary videos of street events, meetings and interviews that capture the immediacy of this historical moment. Students partner and engage with a local nonprofit organization, grassroots movement or religious institution. Topics can include personal and/or institutional issues of a "divided city" that are exacerbated by race, gender, economic status, sexual orientation or geography. Successful completion of this course

involves researching and creating a short video with a distinctive perspective and point of view that draws upon the team's collaborative voices from history, performing arts, economics, law, social work, African-American studies, architecture and art. Skills are developed in the fundamentals of story development, video and audio-capture in the field, editing with Adobe Premier, and archival preservation. No prerequisites. This course is open to all undergrad and grad students.

Credit 3 units.

F20 ART 329F Tale of Two Cities: Documenting Our Divides

F10 ART 330C Time-Based Media: Art Practice

Credit 3 units.

F20 ART 333 Visual Communication: Graphic Design

Offered as emphasis with the Communication Design major, the course employs intensive projects in graphic design, typography and production to extend the student's capacity for conceptual and visual thinking. Along with orientation toward professional standards and practices, students are encouraged to identify and develop their special talents and interests. Fundamentals in computer-assisted design are covered.

Credit 3 units. EN: H

F20 ART 334 Visual Communication: Graphic Design

Continuation of F10 Art 333. Offered as an emphasis within the Communication Design major, the course employs intensive projects in graphic design, typography and production to extend the student's capacity for conceptual and visual thinking. Along with orientation toward professional standards and practices, students are encouraged to identify and develop their special talents and interests. Fundamentals in computer-assisted design are covered.

Credit 3 units. EN: H

F20 ART 3352 Commercial Modernism in America 1865–1965

This course explores contributions to and expressions of image-based visual modernism in the commercial tradition. We focus on periodical illustration, the comic strip and animated film. Content addresses the birth and expansion of industrial image production; the history of relevant technologies; modernist art theory and the experience of modernity; the parallel but culturally distinct traditions of illustration and cartooning; issues of race and gender in the production and reception of these works. A sampling of practitioners considered: E.W. Kemble, Howard Pyle, Jessie Willcox Smith, Elizabeth Shippen Green, N.C. Wyeth, Winsor McCay, J.C. Leyendecker, Norman Rockwell, Chester Gould, Milton Caniff, Al Parker, Robert Weaver, Mary Blair, Saul Bass, Paul Rand, Ezra Jack Keats, and Jack Kirby. Three required film screenings are scheduled during the semester. Images from the commercial tradition typically fall into a cultural and academic blind spot. They exist outside the realm of art history as traditionally defined and receive primarily textual analyses in culture studies contexts. As a result, many careers and works which would otherwise attract interest remain effectively invisible. This course seeks to integrate the close study of objects associated with art history and the embrace of the embedded in culture studies. We draw on the collections of the recently founded Modern Graphic History Library at Washington University.

Credit 3 units. EN: H

F20 ART 335A Interaction Design: Applications for Public Health

Through a blend of presentations from practitioners, classroom lectures, readings, discussion and hands-on exercises, this class engages principles and methods of interaction design within the context of health challenges. Broadly defined, interaction design is the practice of designing products, environments, systems and services with a focus on behavior and user experience. We take on an in-depth challenge in an area such as transportation or community health resources and work in cross-disciplinary design teams with an external partner organization. Students gain experience in planning and executing a human-centered design process featuring research, ideation, synthesis, concept development, prototypes and a final presentation, which may include visual design, animation and sound. Students work in teams to develop several intermediate project deliverables, such as prototypes and sketches. No prior course work is necessary, though experience with Adobe Photoshop, Illustrator and InDesign are helpful. No prerequisites. Open to sophomores through graduate-level students across the university.

Credit 3 units. EN: H

F20 ART 335D Prototyping the Responsive Dynamic Media Wall

Same as Arch 326D.
Credit 3 units. EN: H

F20 ART 335F Interactivity and Web Design

This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.

Credit 3 units. EN: H

F20 ART 335G The Licensed Image: Development and Distribution

An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students.

Credit 3 units. EN: H

F20 ART 335I Communication Design I

An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing.

Credit 3 units. EN: H

F20 ART 335J Introduction to Animating in Three Dimensions

This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 ART 101 Drawing or equivalent or permission of instructor.

Credit 3 units. EN: H

F20 ART 335L Communication Design and Business

This course provides an introduction to business communications in a visual environment. Subjects addressed include visual organization, introductory typography, basic identity development, message construction and business presentation development.

Credit 3 units. EN: H

F20 ART 3361 Advertising 1

Same as F20 ART 1361, F20 ART 2361, F20 ART 4361 - Juniors (only) register for F20 ART 3361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary.

Credit 3 units. EN: H

F20 ART 3362 Advertising I

Credit 3 units. EN: H

F20 ART 3363 Advertising in the Digital Age

Same as F20 ART 1363, ART 2363, ART 4363 - Juniors (only) register for F20 ART 3363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study "game changing" developments in advertising communications; changing dynamics in audience behavior-including the ability to "opt out"; the advertising industry's adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one.

Credit 3 units. EN: H

F20 ART 3364 Advertising in the Digital Age

Credit 3 units. EN: H

F20 ART 3365 History of Advertising

Credit 3 units.

F20 ART 3366 History of Advertising

Same as F20 1366, F20 2366, F20 4366 - Freshmen (only) register for F20 3366. The historical, cultural and technological development of advertising in America from the colonial period to the present. This course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects.

Credit 3 units.

F20 ART 336F Interactivity and Web Design

This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.

Credit 3 units. EN: H

F20 ART 336G The Licensed Image: Development and Distribution

An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students.

Credit 3 units. EN: H

F20 ART 336I Communication Design I

An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students

considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing.

Credit 3 units. EN: H

F20 ART 336J Introduction to Animating in Three Dimensions

This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings, and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 Art 101 Drawing or equivalent or permission of instructor.

Credit 3 units. EN: H

F20 ART 336K Communication Design II

This course continues the elements of communication design in a more professional context. Students advance their understanding of concept development and visual execution. They also examine contemporary professional work in the field and are introduced to the business of the profession, including work with clients. Course work integrates fundamental design skills with business presentations and team-based projects. The final course assignment comes from an external firm. Students work in groups and make a professional presentation to the client.

Credit 3 units. EN: H

F10 ART 336M Special Topics in Communication Design

Credit 3 units. EN: H

F10 ART 337B Communication Design: Word and Image Studio I

This course centers around the study of word-image relationships. It values intensive visual exploration and clear communication. Students are challenged to make illustrations, explore typography, and bring visual elements together into a unified whole. Projects take the form of posters, image sets, books, icons, maps, labels, infographics, etc. As the course progresses, the student works to narrow his or her focus within the field of visual communications by selecting particular projects from a suite of offerings. Prerequisite: junior standing, College of Art majors only. Students also must enroll in F10 ART 337C and F10 ART 337D.

Credit 3 units. EN: H

F10 ART 337C Communication Design: Typography I

This course examines typography as a vehicle for conveying information across contexts and as an expressive and interpretive medium. Students complete a series of exercises and projects. Prerequisite: junior standing, College of Art majors only. Students also must enroll in F10 ART 337B and F10 ART 337D.

Credit 2 units. EN: H

F10 ART 337D Communication Design: Digital Adventure

Students are introduced to the digital tools of graphic design and image making. Through content-driven design projects, supplemented by in-class exercises, students explore and learn Adobe Illustrator, Photoshop and InDesign. Prerequisite: junior standing, College of Art majors only. Students also must enroll in F10 ART 337B and F10 ART 337C.

Credit 3 units. EN: H

F10 ART 337E Communication Design: Word and Image II

This course continues Communication Design: Word and Image I (F10 ART 238B), presenting design and illustration projects simultaneously. It focuses on methodologies for a range of problems. It emphasizes the development of content, illustration, typography, sequential narrative and information design.

Students are expected to become self-directed about their synthesis of word and image and select an area of emphasis within design and illustration for deeper study. Prerequisite: Word and Image I. Required for Communication Design majors; open to Sam Fox School students as space permits.

Credit 3 units. EN: H

F10 ART 337F Communication Design: Typography II

This course builds on the typographic principles introduced in Typography I (F10 ART 238C). Students generate typographic systems and expressions relevant to professional practice. Prerequisite: Typography I. Required for Communication Design majors; open to Sam Fox School students as space permits.

Credit 3 units. EN: H

F10 ART 337G Communication Design: Introduction to Motion and Interactivity

This course explores screen-based design. It uses the language of cinema as a tool for examining narrative. Provides an introductory experience with interactivity, using both digital and analog technologies. Prerequisite: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Required for Communication Design majors; open to Sam Fox School students as space permits.

Credit 3 units. EN: H

F10 ART 337H Communication Design: Interaction Design I

This course is a hands-on application of interaction design for digital media (primarily browser-based). Participants learn and apply the fundamentals of HTML and CSS, explore how user-interaction adds bidirectionality to communication, examine the intricacies of seemingly-simple digital interactions, and become familiar with the attributes of digital device as "canvas." Students work both independently and collaboratively to design interactive solutions for a selection of communication challenges. Prerequisites: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Required for Communication Design majors; open to Sam Fox School students as space permits.

Credit 3 units. EN: H

F10 ART 337I Communication Design: Interaction Foundations

This course is a hands-on application of interaction design for digital media (primarily browser-based). Participants learn and apply the fundamentals of HTML and CSS, explore how user-interaction adds bidirectionality to communication, examine the intricacies of seemingly-simple digital interactions, and become familiar with the attributes of digital device as "canvas."

Students work both independently and collaboratively to design interactive solutions for a selection of communication challenges. Prerequisite: Digital Design (F10 243) or Digital Studio (F10 242) or permission of instructor. Required for Communication Design majors; open to students outside the Communication Design major as space permits.

Credit 3 units. EN: H

F20 ART 3386 The Art of Advertising

This course introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. The course consists of lectures and visiting instructors, brief essay quizzes and a series of exercises designed to acquaint each student with administrative and creative processes and various disciplines within the advertising field. Major emphasis is placed upon the creative disciplines.

Credit 3 units. EN: H

F10 ART 338B Communication Design: Word and Image II

This course continues the study of word-image relationships from Word and Image I. It focuses on methodologies for realizing clear communication across a range of problems, including the construction of narrative, messaging, poster design and information design. Students are expected to become self-directed about their own synthesis of word and image and select an area of emphasis within design and illustration for deeper study in the senior year. Prerequisites: Word and Image I, junior standing, College of Art majors only. Students also must enroll in F10 ART 338C and F10 ART 338D.

Credit 3 units. EN: H

F10 ART 338C Communication Design: Typography II

This course builds on the basic typographic principles introduced in Typography I. Course work examines typography as a vehicle for conveying information across contexts and as an expressive and interpretive medium. Students complete a series of projects relevant to the development of professional practice in communication design. Prerequisites: Typography I, junior standing, College of Art majors only. Students also must enroll in F10 ART 338B and F10 ART 338D.

Credit 3 units. EN: H

F10 ART 338D Communication Design: Introduction to Motion and Interactivity

This course explores screen-based experiences and uses the language of cinema as a tool for thinking about sequential narratives. The class provides a beginning experience with interactivity, using both digital and analog technologies. Students complete a series of projects. Prerequisite: Digital Adventure. Junior standing, College of Art majors only. Students also must enroll in F10 ART 338B and F10 ART 338D.

Credit 2 units. EN: H

F10 ART 338H Comm. Design: Interaction Design II

Credit 3 units. EN: H

F10 ART 338J Comm. Design: Illustration Projects (also F20)

Credit 3 units. EN: H

Credit 3 units. EN: H

F20 ART 339A History of Communication Design
Historical development of communication design based on a survey of significant artists and designers and the ideas, styles, movements, forces and individuals who influenced their work. This course is a component of the Communication Design major.
Credit 3 units. EN: H

F20 ART 343X Digital Filmmaking: City Stories
Same as XCORE 343
Credit 3 units.

F20 ART 345 Topics in the History of Book Illustration: The Book as Subject

Within the past half-century, the book has moved from periphery to center, becoming the subject of an expanding body of work by writers and artists. Its formal qualities and physical processes, its habitual means of organizing, its strengths, its limitations and the meanings we attach to them, have become the subject of seemingly self-conscious, inward-looking books. Postmodern as if by definition, playfulness and irony attend these works and their complexities and subtleties often prove elusiveness a virtue. They command a reshaping of our sense of how books, texts and illustrations react to and interact with one another and how a reader/viewer experiences and makes sense of them. We look at work by Vladimir Nabokov, Julio Cortazar, Italo Calvino, William H. Gass, Samuel Beckett, Jasper Johns, Tom Phillips, Anselm Kiefer, Susan Baron, Peter Greenaway and others. This seminar explores aspects of the history of image and text conjoined in the western book, at once an object and a concept, a thing experienced and a conduit, a means of transmission. Utilizing a variety of analytical and critical approaches-psychoanalytical, deconstructive, New Historicist — we examine the ways in which texts and images make and unmake meanings. Students are asked to write two papers, one brief (six to eight pages), the other more extended (12 to 20 pages) and to give one in-class presentation.
Credit 3 units. EN: H

F20 ART 346 Topics in the History of Book Illustration: Technologies and Empires: The Book in the Age of Victoria
Credit 3 units. EN: H

F20 ART 347 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress, engraving and intaglio, offset

lithography, and digital, "virtual" media. Certain projects may require a second semester of study to complete.
Credit 3 units. EN: H

F20 ART 348 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress, engraving and intaglio, offset lithography, and digital, "virtual" media. Certain projects may require a second semester of study to complete.
Credit 3 units. EN: H

F20 ART 3481 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, "virtual" media. Certain projects may require a second semester of study to complete.
Credit 3 units. EN: H

F20 ART 3482 The Illustrated Book: Design and Production
An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, "virtual" media. Certain projects may require a second semester of study to complete.
Credit 3 units. EN: H

F10 ART 350 Independent Study (also F20)
Designed for juniors fulfilling art minor requirements. Prerequisites: permission of instructor and submission of a written proposal to the associate dean of students (Room 1, Bixby Hall).
Credit variable, maximum 3 units. EN: H

F10 ART 361 Time-Based Media: Art Practice
This course explores the body as a time-based medium and a vehicle of expression that interacts with cinematic and sound technologies, undergoing gradual semantic, virtual and visceral transformations. Students create performance-based video and sound works that are mediated with electronic/digital technology and performed or screened in public. Collaborative, individual political and poetic actions and happenings are encouraged. Students focus on the production of conceptually rigorous and technically convincing work that embodies their performative, experimental and individually designed ideas. Projects are informed by readings in media theory, writing assignments, and active participation in critiques of works by contemporary media

artists. Prerequisite: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor.

Credit 3 units. EN: H

F20 ART 363 Architectural Photography

This course offers a technical and theoretical understanding of architectural photography. Basic operation and orientation of digital and analog cameras are covered, as well as best practices for photographing interior and exterior spaces with both natural and artificial lighting. Students learn how to document artwork and architectural models/structures for portfolio presentation purposes, preparing them for working relationships with professional photographers in the industry. This course emphasizes 4x5 view camera skill, use of DSLR and digital input, studio lighting, and development of individual projects. Digital camera required; 4x5 camera provided by photography department.

Credit 3 units. EN: H

F20 ART 3644 Italian Level II

Credit 5 units. EN: H

F20 ART 371 Introduction to Letterpress Printing

This class serves as an introduction to printing with the Vandercook handpress. Through a series of assignments students learn a systematic approach to planning, arranging and printing type on a page. The students receive a basic introduction to typography, history of letterforms, and history of the book. The mechanics of relief printing with the cylinder proof press, ink composition, and resolution of the typographic image also are explored. As an exploration of the publishing process students produce a chapbook of a short literary work. The class primarily focuses on typographic composition, but one assignment employs a combination of word and image.

Credit 3 units. EN: H

F20 ART 3713 Introduction to Book Binding

Same as F20 ART 1713, F20 ART 2713, F20 ART 4713. Juniors (only) register for F20 ART 3713. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings.

Credit 3 units. EN: H

F20 ART 3714 Introduction to Book Binding

Same as F20 ART 1714, F20 ART 2714, F20 ART 4714. Juniors (only) register for F20 ART 3714. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations.

Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers, and produce a variety of decorated papers to be used in their bindings.

Credit 3 units. EN: H

F20 ART 3715 Hybrid Studio

Same as F20 ART 4715. Juniors (only) register for F20 ART 3715. Hybrid Studio is an opportunity for undergraduate and graduate students from across the campus to engage the book as a truly interdisciplinary subject and object. This course combines equal parts seminar and applied studio experience. Historical models of the book as framework for ideas and physical artifact are studied and modeled. The intention of this course is to combine work in allied disciplines, supporting students in the integration of their chosen major areas of study and incorporating photography, painting, sculpture, design, architecture, engineering and writing and history. The class moves between group discussions and individual mentoring with regularly scheduled demonstrations of book studio equipment. Limited to junior-level and above only. Prior experience in book studio courses is recommended, but not required. Undergraduates must have permission from faculty to miss major studio time on Friday afternoon to take this course. Credit variable, maximum 3 units. EN: H

F20 ART 3716 Hybrid Studio

Hybrid Studio is an opportunity for undergraduate and graduate students from across the campus to engage the book as a truly interdisciplinary subject and object. This course combines equal parts seminar and applied studio experience. Historical models of the book as framework for ideas and physical artifact are studied and modeled. The intention of this course is to combine work in allied disciplines, supporting students in the integration of their chosen major areas of study and incorporating photography, painting, sculpture, design, architecture, engineering and writing and history. The class moves between group discussions and individual mentoring with regularly scheduled demonstrations of book studio equipment. Limited to junior-level and above only. Prior experience in book studio courses is recommended, but not required. Undergraduates must have permission from faculty to miss major studio time on Friday afternoon to take this course. Credit 3 units. EN: H

F10 ART 371A Book Arts: Art Practice

This course investigates various forms of visuality as primary content in the book format, with a focus on the construction of non-textual narratives. Through lectures and demonstrations, students explore topics such as page format, book design, serial and sequential structures and approaches toward binding. The primary project is the production of a printed book. Students work with letterpress and intaglio printing, bookbinding and photopolymer plate making. Prerequisite: Introduction to Printmaking (F10 ART 215 or F10 ART 216) or Introduction to Letterpress or Introduction to Book Binding. Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor. Credit 3 units. EN: H

F10 ART 372B Content to Cover: the Design of Books

This studio course considers the design of books in their totality, from the smallest typographic details of text pages, to designing

the page grid, and the selection of images, type, materials, and color of the binding and cover. Students produce two books from texts assigned to them. The first is a text-based book of prose; the second, larger project, includes body text, images, captions, footnotes. Beginning with a thorough discussion of the landscape of the two-page spread, students complete a short research project based upon a complex illustrated book in the library. Discussion of print production and binding options in industry is enhanced by a visit to a local offset printer and to Olin Library Special Collections. Students deepen their skill base in typographic applications, the use of Indesign as a multi-page document tool, a range of imaging techniques offered in the Book Studio, and bookbinding technique, as well as building their design criticism vocabulary. This course is appropriate for juniors in the Communication Design major.
Credit 3 units.

F10 ART 381 Public Practice: Art Practice

Students examine, critically explore and execute work in the public sphere. Readings, discussions and presentations generate a framework for understanding historical, theoretical and practical considerations for creating artwork in relation to the material/social conditions of public space. Projects may respond to any number of approaches in the contemporary field, including public sculpture, participatory art and ephemeral art practices. Students learn the discipline of proposal development and present final projects that are adjudicated by an outside jury. Students whose work is selected by the jury must enroll in the spring semester course From Design to Realization. Open to BFA students with junior-level standing and others, including minors and MFA students, with consent of instructor.
Credit 3 units. EN: H

F10 ART 3822 Art Practices Florence: Present/Past/Past/ Present

Credit 3 units. EN: H

F20 ART 3823 The Italian Renaissance in the City of Florence

This course encompasses the Renaissance from Giotto through the High Renaissance. Students are able to examine firsthand the works they are studying.
Credit 3 units. EN: H

F10 ART 3824 Methods and Context II (Florence) (also F20)

Required for BFA in Art majors. This team-taught course expands on methodologies encountered in Methods and Contexts I and related courses. Students are encouraged to take charge of their artistic process through faculty-supported and self-directed creative investigation. Through lectures, class discussions and critiques, students critically engage the evolving manner in which visual culture is produced and distributed. Students learn how to best present their work and incorporate discourse inherent to and generated by their practice. The goal of this course is to ensure a strong Capstone experience by helping students develop their artistic position within the public realm and contemporary contexts.
Credit 3 units. EN: H

F20 ART 383 Special Topics

Credit 3 units. EN: H

F10 ART 3830 Strategies: Working On-Site

Sketchbook in hand, how does one respond to the overwhelming complexity of a specific environment? There are multiple correct answers to this question. Many possible answers are explored through specific exercises and open-ended assignments. Much of the studio's class time is spent on location, exploring interior and exterior environments, and the transitional spaces between them. A specific sketchbook, purchased in Florence, is required. Students are able to work in a wide variety of media, including photography and digital. This course is appropriate for juniors in the Communication Design major, or Fashion majors as an elective.

Credit 3 units.

F10 ART 3832 Mapping the Unfamiliar

Credit 3 units. EN: H

F10 ART 3834 Making Meaning

Credit 3 units. EN: H

F10 ART 3836 Methods: Verbal to Visual

Do different types of text and their meanings require different approaches for image making? Maybe. A variety of different texts are assigned, each accompanied by a different image-making methodology. There also are a variety of applications for the resulting images. Students are able to explore a wide range of media and image making. The goal is to assist students in understanding and developing their own approaches to this complex process. This course is appropriate for juniors in the Communication Design major.

Credit 3 units.

F10 ART 3838 Experimental Typography

In this studio course, students learn to challenge typography's role as a tool for communication through alternative methods in mark-making and redefining what or how it is communicating. In addition, students learn to develop a process that leads to thoughtful typographic solutions applicable to all areas of design. Prerequisite: Type 2. This course is appropriate for juniors in the Communication Design major.

Credit 3 units.

F10 ART 3840 Branding & Identity

Students learn about brands as an 1) identity; a shorthand for a company or product, 2) as an image; where an individual perceives a brand as representing a particular reality, and 3) as a relationship; where an individual reflects an experience through a product or service. To learn from their research, students concept, design and implement a brand, challenging them to realize the full breadth of a brand's reach.

Credit 3 units.

F10 ART 391 Methods and Contexts I

Required for those pursuing the Bachelor of Fine Arts in Art majors. This team-taught course integrates and synthesizes knowledge resulting from Theory and Practice and related courses. Supported by lectures, class discussions and student critiques, this course fosters a creative environment and critical discourse surrounding artistic practices. Students are guided through the art-making process, from conceptualization to resolution, emphasizing experimentation with various methods of production and distribution. The goal of this course is to help students contextualize their own artistic interests within the contemporary art field by promoting critical analysis skills necessary for initiating, interpreting and evaluating artistic production. Credit 3 units. EN: H

Credit 3 units. EN: H

F20 ART 394 New Topic (Sam Fox School)
Credit 3 units. EN: H

F20 ART 396 Design, Artisanry and Sustainability as Cultural Catalyst

This course investigates the ways in which artisanry is a stimulus to design thinking and innovation. The prerequisite to the course is a 16-day trip to India over winter break where students work closely with leading Indian designers of textiles, products and architecture as well as accomplished artisans working with methods both ancient and modern. We discuss how craft informs design and how design acts as a force in entrepreneurship and job creation. A major focus of our research is investigating how craft and design are catalysts for innovation in a sustainable use of materials and water. For more information, contact Belinda Lee at Lee@samfox.wustl.edu. Students should obtain a visa on their own. Credit 3 units. EN: H

F20 ART 396A From Design to Realization
Credit 3 units. EN: H

F10 ART 401A Drawing: Art Practice

Prerequisites: Drawing I (X10 CORE 101), Drawing II (X10 CORE 102), and junior standing. Open to BFA students who

have taken the prerequisites, and others, including minors, with consent of instructor. Credit 3 units. EN: H

F20 ART 404A Contemporary Exhibition Studies: Maya Lin's Systematic Landscapes
Same as ARCH 404A
Credit 1 unit.

F20 ART 4080 Art/Architecture and Social Practice

This seminar brings together several different disciplines and methodologies to look at the practice of the arts in the context of community. The seminar combines hands-on work and observation, theoretical analysis and reflection, and specific proposals. For our case studies, we concentrate on several programs and places currently existing or developing in the St. Louis region. We discuss both ends and means, and systems of evaluation that draw on, among other things, art, architecture, social work, and community development. Same as ARCH 5080
Credit 3 units.

F20 ART 411 Painting

Continuation of ART 311-ART 312. Advanced study in painting with individualized criticism, lectures and seminars, leading toward the development of personal idioms. Credit 3 units. EN: H

F20 ART 4115 Intensive Intermediate Painting

Same as F20 ART 2115, F20 ART 3115. Seniors (only) register for course F20 ART 4115. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve very much at oil painting, both in its traditional 20th-century use and in gaining some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments, as well as a few reading assignments. This is a very structured course, designed to develop a student's strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor. Credit 3 units. EN: H

F20 ART 4116 Intensive Intermediate Painting

Same as F20 ART 2116, F20 ART 3116. Seniors (only) register for course F20 ART 4116. In this course we explore the genres of painting from the inside-out. We focus on process and technical skill as well as the political and social underpinnings of several painting genres. As the course progresses, students improve very much at oil painting, both in its traditional 20th-century use and in gaining some technical and conceptual experience with its contemporary manifestation. Our main focus is on perceptual studies, although we also work with notions of abstraction in painting. There are weekly homework assignments, as well as a few reading assignments. This is a very structured course, designed to develop a student's strengths and abilities as a painter and to further his or her conceptual understanding of the medium. Prerequisite: painting elective or permission of instructor. Credit 3 units. EN: H

F10 ART 411A Painting: Art Practice

This major course of study for juniors and seniors expands the dialogue between material and cultural histories, personal experience, tradition and current practice in contemporary painting. The learning sequence consists of comprehensive investigations of painting processes and materials through assigned and self-directed projects, leading to the development of a unique body of work. Critical assessment of work produced occurs in discussion with faculty and peers. In addition to studio production, this course includes level-specific seminars and visits to galleries and museums. Required for painting majors. Prerequisites: F10 ART 221 or ART 222; F10 ART 311A and ART 312A.

Credit 6 units. EN: H

F20 ART 411B Painting II

Same as F20 ART 311B. Seniors (only) register for F20 ART 411B. Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner's familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course. School of Art majors and non-art students pursuing an art minor have priority. Prerequisites: senior standing and a beginning painting elective or permission of the instructor.

Credit 3 units. EN: H

F10 ART 411D Painting: Art Practice

Prerequisite: Introduction to Painting (F10 ART 221 or ART 222). Open to BFA students who have taken the prerequisite and others, including minors, with consent of instructor.

Credit 3 units. EN: H

F20 ART 412 Painting

Continuation of ART 311-ART 312. Advanced study in painting with individualized criticism, lectures and seminars, leading toward the development of personal idioms.

Credit 3 units. EN: H

F20 ART 412B Painting II

Intermediate painting focuses on the processes and concepts of oil painting. It is a structured course with an emphasis on perceptual studies as well as an overview of historical and contemporary painting issues. Students are expected to possess good drawing skills and a beginner's familiarity with oil painting techniques. Critical readings and homework assignments are an important part of the course. College of Art majors and non-art students pursuing an art minor have priority.

Credit 3 units. EN: H

F10 ART 412E Painting: Art Practice (Language of Abstraction)

This course examines strategies of abstraction and non-objective image-making that originate in the painting studio, including those that are driven by concept, material, space and/or process. Readings and discussion examine the evolution and history of abstraction and its present applications within a contemporary studio practice. The course engages students in both assigned and self-directed work that enables them to experiment with a broad visual vocabulary while understanding the relationship

between form and content. Prerequisite: Introduction to Painting. Open to BFA students who have taken the prerequisite, and others, including minors and MFA students, with consent of instructor.

Credit 3 units.

F20 ART 413A Sculpture

Continuation of ART 313A-ART 314A. Exploration of advanced concepts and techniques. Involvement with larger scale, environmental relationships and architectural considerations. Processes and materials include construction in a large variety of materials, firing, plaster mold making, direct plaster work, wood and stone carving, foundry, plastics laminations, soft sculpture, welding, soldering, brazing, metalwork.

Credit 3 units. EN: H

F10 ART 413D Sculpture: Art Practice

Required for sculpture majors. Prerequisite: ART 213 or ART 214.

Credit 3 units. EN: H

F20 ART 413F Sculpture: Foundry

The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required.

Credit 3 units. EN: H

F20 ART 413G Sculpture: Wood

Same as F20 ART 113G, F20 ART 213G, F20 ART 313G. Seniors (only) register for F20 ART 413G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: senior standing or departmental approval.

Credit 3 units. EN: H

F20 ART 413H Sculpture: Blacksmithing

This course is an introduction to blacksmithing materials, tools and techniques. Students explore the fundamental techniques of hand-forged metal. Metal can be manipulated as a plastic material and offers enormous possibilities for 3-dimensional form. In this class we explore these possibilities and expand our sculptural vocabulary.

Credit 3 units. EN: H

F20 ART 413I Sculpture: Metal Fabrication

Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.

Credit 3 units. EN: H

F20 ART 414A Sculpture

Continuation of ART 313A-ART 314A. Exploration of advanced concepts and techniques. Involvement with larger scale, environmental relationships and architectural considerations. Processes and materials include construction in a large variety of materials, firing, plaster mold making, direct plaster work, wood and stone carving, foundry, plastics lamination, soft sculpture, welding, soldering, brazing, metalwork.

Credit 3 units. EN: H

F20 ART 414F Sculpture: Foundry

Same as F20 ART 114F, F20 ART 214F, F20 ART 314F. Seniors (only) register for F20 ART 414F. The focus of this course is to introduce students to the basic principles of bronze and aluminum casting according to the lost wax method. Students learn mold making, direct organic burnout, ceramic shell investment, metal chasing and patination in order to create finished sculpture. In addition to metal casting, students use other materials such as plaster, resin, steel, wood, rubber, plastic and foam to create a mixed-media project that explores a specific idea or theme. Additional work outside the regularly scheduled class time is required. Prerequisite: senior standing or departmental approval.

Credit 3 units. EN: H

F20 ART 414G Sculpture: Wood

Same as F20 ART 114G, F20 ART 214G, F20 ART 314G. Seniors (only) register for F20 ART 414G. The focus of this course is to introduce students to the basic principles of wood sculpture with an emphasis on furniture making. Prerequisite: senior standing or departmental approval.

Credit 3 units. EN: H

F20 ART 414I Sculpture: Metal Fabrication

Metal is the backbone of our modern world and a viable medium for self-expression. It can be employed as structure or as surface, it can be deformed plastically to create compound shapes, or it can be connected to most any other material. Students explore the creative potential of this material in the fabrication of sculptural forms. Students learn to weld using both gas and electric arc machines and learn the safe operation of drilling, grinding and finishing tools.

Credit 3 units. EN: H

F10 ART 414J Photography: Art Practice

Credit 3 units.

F20 ART 415 Printmaking

Survey of printmaking covering basic processes in intaglio, lithography, relief and monotype. Emphasis on mixed-media and experimentation with a foundation in traditional, historical and philosophical aspects of printmaking. Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.

Credit 3 units. EN: H

F10 ART 415A Printmaking/Drawing

Continuation of F10 ART 315A-ART 316A. A comprehensive investigation of both traditional and experimental drawing and printmaking techniques. Students are encouraged to explore large-scale mixed-media processes with an emphasis on the development of individual images and marking styles. Students

have facilities available in papermaking and printmaking with capabilities for computer and photographic techniques.

Credit 10 units. EN: H

F10 ART 415B Printmaking: Art Practice

Students explore the spectrum of print media and culture, find points of intersection with other media and disciplines, and develop and individual, sustained investigation as an artist. Advanced techniques and concepts are imparted through participatory workshops, focusing on sets of skills such as silkscreen, etching and monotype around strategies in the field of printmaking and contemporary art. Juniors and seniors participate in level-specific seminars that are focused on topical research and critique structures, and are geared toward intellectual development, oral presentation and writing skills as they relate to studio practice. Required for printmaking majors. Prerequisites: F10 ART 215 or ART 216; F10 ART 315B and ART 316B.

Credit 3 units. EN: H

F20 ART 416 Printmaking

Students explore various mixed-media approaches to relief printmaking in combination with collagraph, photo lithography and drawing. Relief techniques covered include wood and linoleum cuts using the black line and white line approaches. (Students are encouraged to work at a level suited to their individual technical skills and conceptual interests.)

Credit 3 units. EN: H

F10 ART 416A Printmaking/Drawing

Continuation of ART 315-ART 316, ART 415A. A comprehensive investigation of both traditional and experimental drawing and printmaking techniques. Students are encouraged to explore large-scale mixed-media processes with an emphasis on the development of individual images and marking styles. Students have facilities available in papermaking and printmaking with capabilities for computer and photographic techniques.

Credit 10 units. EN: H

F10 ART 416F Printmaking: Art Practice (Extra Dimensional Printmaking)

This course explores the printed image as storyteller, educator, political tool, and narrative. Historical precedents and contemporary examples of political prints, graphic novels, posters, and narrative suites are examined as possible models for self-directed projects. Readings and discussions include strategies for drawing and appropriating imagery. Students have the opportunity to produce a thematically unified body of work while gaining technical expertise in woodcut, etching and lithography. Prerequisite: Introduction to Printmaking. Open to BFA students who have taken the prerequisite, and others, including minors and MFA students, with consent of instructor.

Credit 3 units.

F10 ART 417 Photography

Courses deal with the establishment of the student's personal vision and the presentation of that vision. Weekly critiques and in-class discussions are primary format, in conjunction with visiting artists and professionals. The class assists students in preparing their portfolios and provides the necessary support material to enter the post-academic environment.

Credit 10 units. EN: H

F20 ART 417A Digital Imaging and Photography

Courses deal with the establishment of the student's personal vision and the presentation of that vision. Weekly critiques and in-class discussions are primary format, in conjunction with visiting artists and professionals. The class assists students in preparing their portfolios and provides the necessary support material to enter the post-academic environment.

Credit 3 units. EN: H

F20 ART 417B Photography II (Black-and-White)

Course adds to the experience of Photography I (Black-and-White). Students investigate phenomena relative to the camera and photography. Students develop the vision necessary to take intelligent and articulate photographs, as well as establish the notion of high craft in terms of the negative and the print. Topics may include portrait, landscape, street photography, the figure and the photo story.

Credit 3 units. EN: H

F20 ART 417E Color Photography II

The use of color negative materials and the development of a technical and aesthetic vocabulary with color materials. Use of color analyzers, masking systems and alternatives within negative color systems.

Credit 3 units. EN: H

F20 ART 417G Color Photography I (F10)

Introduction to the use of a wide range of color photographic materials. Students learn the fundamentals of working with color negative films and the craft of making color prints from negatives. Emphasis on camera work with color materials and on beginning to develop a personal color vision.

Credit 3 units. EN: H

F10 ART 417H Photography: Art Practice

Prerequisite: Introduction to Photography (F10 ART 217 or ART 218). Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor.

Credit 3 units. EN: H

F20 ART 417J Alternative Process Photography

(Formerly Non-Silver Photography). *Same as F20 ART 217J, F20 ART 317J.* Seniors (only) register for F20 ART 417J.

An exploration into the use of non-silver and alternative photographic processes. The use of such processes as blue and brown printing and gum printing explored, as well as photomechanical processes such as photocopying and color photocopying. Prerequisite: Black-and-White Photography or permission of instructor.

Credit 3 units. EN: H

F20 ART 4183 Digital Photography

Only graduate students register for F20 4183. Undergraduate students register for F20 1183. This introductory-level course explore digital technology for capturing, enhancing and producing still lens-based images. The course addresses basic digital camera operations, the visual language of camera-generated images, computer workflow and the connoisseurship of digital image output. The course assumes no prior knowledge or experience with digital imaging technologies or materials. Students must provide a digital camera.

Credit 3 units. EN: H

F20 ART 4186 Black-and-White Photography

Only graduate students register for F20 4186. Undergraduate students register for F20 1186. Introduction to the fundamentals of black and white photography. Emphasis on control of film, paper and black and white photographic processes in the classical fine arts tradition. Topics may include portrait, landscape, street photography, the figure and contemporary issues in photography.

Credit 3 units. EN: H

F20 ART 418A Digital Imaging and Photography

Courses deal with the establishment of the student's personal vision and the presentation of that vision. Weekly critiques and in-class discussions are primary format, in conjunction with visiting artists and professionals. The class assists students in preparing their portfolios and provides the necessary support material to enter the post-academic environment.

Credit 3 units. EN: H

F20 ART 418B Photography II (Black-and-White)

Course adds to the experience of Photography I (Black-and-White). Students investigate phenomena relative to the camera and photography. Students develop the vision necessary to take intelligent and articulate photographs, as well as establish the notion of high craft in terms of the negative and the print. Topics may include portrait, landscape, street photography, the figure and the photo story.

Credit 3 units. EN: H

F20 ART 418E Color Photography II

This course adds to the experience of Color Photography I. Students expand their knowledge and handling of color negative materials and begin to learn the basics of color printing with transparency films and reversal printing. Some advanced printing and shooting techniques covered. Emphasis on developing a personal color sensibility and producing a cohesive body of work that represents that vision.

Credit 3 units. EN: H

F20 ART 418G Color Photography I

Introduction to the use of color photographic materials using 35mm transparency and reversal printing processes, with emphasis on camera work with color materials and developing a personal color vision.

Credit 3 units. EN: H

F20 ART 418I Advanced Photography Seminar

Designed for non-art students fulfilling Art minor requirements. Topics covered include studio lighting and large format photography.

Credit 3 units. EN: H

F10 ART 418J Painting: Art Practice

Credit 3 units.

F20 ART 419 Ceramics

Continuation of F10 ART 319-ART 320. Advanced ceramics/glass study focuses on the student acquiring working knowledge of a variety of available materials and technologies to develop

a personal direction and pursue self-determined goals. Experimentation is encouraged in both glass and clay. This may involve working in traditional or contemporary, vessel or sculptural concepts. Available to students in a variety of materials, equipment and technical information. Ceramics, porcelain, stoneware, terra-cotta and low-temperature clays are used in conjunction with extensive study of glazing and firing technology. Students explore and develop skills in Raku, low-temperature, oxidation, reduction, electric, high-temperature and pit firings.

Credit 3 units. EN: H

F20 ART 420 Ceramics

Continuation of F10 ART 319-ART 320. Advanced ceramics/glass study focuses on the student acquiring working knowledge of a variety of available materials and technologies to develop a personal direction and pursue self-determined goals. Experimentation is encouraged in both glass and clay. This may involve working in traditional or contemporary, vessel or sculptural concepts. Available to students is a variety of materials, equipment and technical information. Ceramics, porcelain, stoneware, terra and low-temperature clays are used in conjunction with extensive study of glazing and firing technology. Students explore and develop skills in Raku, low-temperature, oxidation, reduction, electric, high-temperature and pit firings.

Credit 3 units. EN: H

F10 ART 423 Fashion Design

Original design concepts are developed in sketch, pattern and muslin stages, prior to constructing each garment. Senior Design Studio is professionally equipped, affording the student an opportunity to work in design room setting. Fashion drawing develops techniques and skills necessary for preparing a senior portfolio. Designer-critics work with students on specific design problems in the development of a senior collection. Garments are reviewed by a jury in the spring semester and selected for the annual student fashion show — a professional showcase for student work.

Credit 10 units. EN: H

F10 ART 423A Capstone 1: Fashion Design (Pre-Collection Studio)

Same as F20 ART 123A, F20 ART 223A, F20 ART 323A. Seniors only register of F20 ART 423A. Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.

Credit 3 units. EN: H

F10 ART 423B Apparel Strategy

The study and analysis of the apparel collection and its functional components in an effort to merchandise ideas for groups, seasonal deliveries, and lines. Thoughtful synthesis of the spectrum of knowledge and skills acquired through prior fashion design course work. Development of design and marketing strategies for specific customer profiles and specialty markets. Open to senior Fashion Design majors only.

Credit 3 units. EN: H

F10 ART 423C Patternmaking and Digital Labs

This lab, offered concurrent with the preliminary study for the creation of both 3-D and 2-D culminating work by senior majors. Resolution of patternmaking, technical drawing, and digital illustration problems are addressed. Additionally, patternmaking and digital skills are enhanced as appropriate. Open to senior Fashion Design majors only.

Credit 1.5 units. EN: H

F10 ART 423D Fashion Design 2-D

Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.

Credit 1.5 units.

F20 ART 423E Fashion Design 3-D

Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel.

Credit 3 units. EN: H

F20 ART 423G Fashion: Textile Design

Same as F20 ART 123G, F20 ART 223G, F20 ART 323G. Seniors (only) register for F20 ART 423G. Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing. College of Art majors and non-art students pursuing an art minor have priority. Prerequisite: senior standing or departmental approval.

Credit 3 units. EN: H

F10 ART 424 Fashion Design

Original design concepts are developed in sketch, pattern and muslin stages, prior to constructing each garment. Senior Design Studio is professionally equipped, affording the student an opportunity to work in design room setting. Fashion drawing develops techniques and skills necessary for preparing a senior portfolio. Designer-critics work with students on specific design problems in the development of a senior collection. Garments are reviewed by a jury in the spring semester and selected for the annual student fashion show — a professional showcase for student work.

Credit 10 units. EN: H

F10 ART 424A Capstone 2: Fashion Design

Credit 3 units.

F10 ART 424B Professional Practices: Portfolio in Fashion Design

Students work toward establishment of necessary construction, crafts skills, and signature illustration style required for completion of capstone project. Each student draws together and organizes evidence of vision and skill into a coherent presentation representative of his or her abilities as an emerging

design professional. Work from this course is submitted for outside professional review. Prerequisite: Completion of junior year in Fashion major. Enrollment required of and limited to senior fashion design majors.
Credit 3 units.

F10 ART 424C Patternmaking and Digital Labs

Credit 1.5 units.

F20 ART 424D Fashion Design 2-D

Designed to familiarize students with techniques and materials used in drawing flats, floats, croquis, specs and illustrations for fashion design. Design problems associated with designing groups, collections and lines of apparel for popular and selected consumption are included.

Credit 3 units. EN: H

F20 ART 424E Fashion Design 3-D

Designed to familiarize students with the equipment and technology peculiar to a career in fashion design. Emphasis on increased awareness of the capabilities of the materials and equipment. Development of skills peculiar to apparel design, and appreciation of the processes involved in the design and manufacturing of apparel.

Credit 3 units. EN: H

F20 ART 424I Fashion: Textile Design

Introductory study of textiles, beginning with study of the basic fibers used in textile production, through weaving, knitting, dyeing, printing and finishing. Class format includes lectures, field trips, garment study and a variety of creative projects that replicate current textile production techniques such as weaving, silkscreen, dyeing and printing.

Credit 3 units. EN: H

F20 ART 427A History of Photography

Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.

Credit 3 units. EN: H

F20 ART 428A History of Photography

Survey of the history of photography and a look at the medium from the camera obscura to contemporary developments. Social and technological developments examined in terms of their influence on the medium.

Credit 3 units. EN: H

F10 ART 429C Time-Based Media: Art Practice

Prerequisites: Digital Design (F10 ART 243) or Digital Studio (F10 ART 242). Open to BFA students who have taken the prerequisite and others, including minors and MFA students, with consent of instructor.

F20 ART 429F Tale of Two Cities: Documenting Our Divides

The metropolitan St. Louis area has become the nation's symbol of modern segregation erupting into urban unrest and violence foiled against non-violent direct-action interventions, youth driven social protests and grassroots revitalization. With the assistance of a faculty seed grant from the Divided City Initiative, in partnership with the Center for the Humanities in Arts & Sciences and the Mellon Foundation, Tale of Two Cities: Documenting Our Divides brings together students working in trans-disciplinary teams to create documentary videos of street events, meetings and interviews that capture the immediacy of this historical moment. Students partner and engage with a local nonprofit organization, grassroots movement or religious institution. Topics can include personal and/or institutional issues of a "divided city" that are exacerbated by race, gender, economic status, sexual orientation or geography. Successful completion of this course involves researching and creating a short video with a distinctive perspective and point of view that draws upon the team's collaborative voices from history, performing arts, economics, law, social work, African-American studies, architecture and art. Skills are developed in the fundamentals of story development, video and audio-capture in the field, editing with Adobe Premier, and archival preservation. No prerequisites. This course is open to all undergrad and grad students.

Credit 3 units. EN: H

F10 ART 430C Time-Based Media: Art Practice (New Media in Art)

Prerequisite: Digital Design or Digital Studio. Open to BFA students who have taken the prerequisite, and others, including minors, with consent of instructor.

Credit 3 units.

F20 ART 430D Special Topics: Beyond Words, Beyond Images: Representation After History

Credit 3 units. EN: H

F10 ART 431 Visual Communication: Advertising Design

Continuation of F10 ART 331 and F10 ART 332 Visual Communication: Advertising Design, with advanced projects in advertising design and the development of a professional portfolio. Options within the major include History of Graphic Design, a senior studio working with actual clients, and internships.

Credit 10 units. EN: H

F10 ART 432A Professional Practices in Design

Credit 3 units. EN: H

F10 ART 432B Professional Practices in Advertising

Credit 3 units. EN: H

F10 ART 432C Professional Practices in Illustration

Credit 5 units. EN: H

F10 ART 432D Professional Practices in Fashion: Portfolio Development

Credit 3 units.

F20 ART 433 Visual Communication: Graphic Design

Continuation of F10 Art 333 and F10 Art 334 Visual Communication: Graphic Design, with advanced projects in graphic design, a senior thesis project, and the development of a professional portfolio. Options within the major include History of Graphic Design, senior design studio working with actual clients, and internships.

Credit 3 units. EN: H

F10 ART 433C Capstone in Design 1: Research Methods (Form and Function)

This course explores the development of compelling and refined visual vocabularies to respond to a wide variety of narrative and interactive contexts. Students hone their methods for brainstorming and visual iteration with emphasis on composition, type, color, and word and image relationships. An expansive approach-making to visual work is then linked to a set of ideas about design function and user response, ultimately providing students with tools to develop wide-ranging design artifacts that perform specific kinds of "work." Some projects are done in collaborative groups; all projects have components that students create individually. Artifacts may include books, maps, apps and presentations. Permission of instructor. Senior standing; College of Art majors only.

Credit 3 units. EN: H

F10 ART 433D Capstone in Design 1: Research Methods (Form and Interaction)

This course helps students to develop and refine methodologies for making strong and varied visual work in the context of interactive products. Specific deliverables may include apps, websites, presentations, and user research studies. Permission of instructor. Senior standing; College of Art majors only.

Credit 3 units. EN: H

F10 ART 433E Capstone in Illustration 1: Research Methods Image and Story

Required for senior majors in Communication Design with an emphasis in illustration. An advanced course in image-making for functional contexts. Students develop projects which isolate issues of approach, production, distribution and market in the landscape of illustration and cartooning today. Targeted research questions are posed in response to individual student work. Successful completion of the course requires the development of and commitment to an aesthetic and creative position within the fields of illustration and cartooning. Readings address the history and culture of illustration, comics and animation. The course anticipates the work of Capstone Studio 2.

Credit 3 units. EN: H

F10 ART 433J Interaction Design: Advanced Applications

This course allows students to hone and apply visual skills to interaction projects, with some emphasis on technical development. Specific deliverables may include websites across platforms, apps and other digital applications. Permission of instructor. Senior standing; College of Art majors only.

Credit 3 units.

F10 ART 433K The Illustrator's Sketchbook

The sketchbook has long been seen as the artist's personal playground. In this course, students are making images that explore concepts and visual narratives — but the raw materials for these illustrations come from exploration inside the pages of their sketchbooks. This course develops a discipline of daily drawing. In addition to sketchbook work, project assignments include both conceptual and applied projects like illustrated book jackets and short stories. Significant time is spent in media exploration, development of technique, and professional practices. Senior standing, College of Art majors only.

Credit 3 units. EN: H

F20 ART 434 Visual Communication: Graphic Design

Continuation of F10 ART 333, F10 Art 334 and F10 Art 433 with advanced projects in graphic design, a senior thesis project, and the development of a professional portfolio. Options within the major include History of Visual Communication, senior design studio working with actual clients, and internships.

F20 ART 4352 Commercial Modernism in America

Credit 3 units. EN: H

F20 ART 4354 Readings in Post-war American Visual Culture: 1945–1965

This course explores the interpretation of visual artifacts from the post-war period in America, including book and periodical illustration, animation design in film and television, and package design for music and consumer products. A basic grounding in visual modernism is established. Readings include John Updike's *Rabbit Run*, Betty Friedan's *The Feminine Mystique*, David Halberstam's *The Fifties*, Ben Shahn's *The Shape of Content*, and other works. Students draw on the resources of the Modern Graphic History Library at Washington University to view, read and explicate primary materials from the period. One research report and a major paper are required.

Credit 3 units. EN: H

F20 ART 4355 Drawing Conclusions

When *Harper's Weekly* published its first issue in 1857, not a single image appeared on the front page. Within five years, wood-engraved pictures dominated the publication. In the process, a new profession was created: that of the artist-correspondent. Baudelaire called such people flaneurs, or passionate observers. Others saw them as visual stenographers. This course addresses the artist-correspondent as a cultural figure, shifting conceptions of the press, and modes of visual reportage. The course focuses primarily on illustration, but also touches upon photojournalism, newsreels, television news

and contemporary social media. We draw on the periodical illustration collections of the Modern Graphic History Library. The student selects a research topic and presents findings to the seminar, culminating in a substantial paper/project. NOTE: The illustrated newspaper was an international phenomenon from the mid-19th century to the turn of the 20th century. Such publications provided a first chapter in the development of global visual culture. Research projects which focus on international publications are supported if sufficient language skills and subject knowledge can be established.
Credit 3 units. EN: H

F20 ART 435A Interaction Design Workshop: Introduction to Research About People

A deep understanding of people with an emphasis on behavior is central to contemporary design, as IDEO's Tim Brown explained in the *Harvard Business Journal* in 2008. This workshop introduces students from all disciplines across the university to ethnography data communication and synthesis as a way to begin the process of designing effective and innovative interactive tools.
Credit 3 units. EN: H

F10 ART 435B Interaction Design Workshop: Introduction to (Rapid) Prototyping

Students learn a broadly relevant process for generating ideas and prototypes quickly, based on user and context insight. This workshop is open to students from all disciplines across the university.
Credit 1 unit. EN: H

F10 ART 435C Interaction Design Workshop: Visualizing Data

Information visualization has permeated much of online media. This workshop challenges Communication Design majors to create an interactive data visualization. Senior standing; College of Art majors only.
Credit 1 unit. EN: H

F10 ART 435D Interaction Design Workshop: Building a Mobile App

Communication Design majors work in groups to develop a prototype application for a mobile device, targeted to a particular, universal challenge. Prerequisites: F10 ART 435A, ART 435B and ART 435C; senior standing; College of Art majors only.
Credit 2 units. EN: H

F10 ART 435E Interaction Design Workshops

Credit 2 units. EN: H

F10 ART 435F Interaction Design Workshops (also F20)

This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.
Credit 3 units. EN: H

F20 ART 435G The Licensed Image: Development and Distribution

An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and

the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students.
Credit 3 units. EN: H

F20 ART 435I Communication Design I

An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing.
Credit 3 units. EN: H

F20 ART 435J Introduction to Animating in Three Dimensions

This course explores 3-D animation in the short film format. Students move from an overview of the process and visual vocabulary of animation to defining filmic ideas, the visual gag and character-driven content. Cinematic shot design, timing, character design and sound design are studied for determining the most effective means of communicating desired content. Hand-drawn sketches are imported into a 3-D animation program as the basis to model and animate characters, create settings and add special effects. An animated sequence is produced to show evidence of personal inquiry and level of expertise. Prerequisite: F10 Art 101 Drawing or equivalent or permission of instructor.
Credit 3 units. EN: H

F20 ART 435L Communication Design and Business

This course provides an introduction to business communications in a visual environment. Subjects addressed include visual organization, introductory typography, basic identity development, message construction and business presentation development.
Credit 3 units. EN: H

F10 ART 435M Special Topics in Communication Design: Design for Social Impact

Designers are capable of creating transformative social change by engaging in socially conscious design practices. Throughout this course, consequently, students learn how to utilize appropriate design research methods and tools to prioritize the needs of the end users and their local contexts. Students conduct design research, analyze data, and discover innovative solutions to issues in the community while also working collaboratively. Senior standing, College of Art majors only.
Credit 3 units.

F20 ART 4361 Advertising 1

Same as F20 ART 1361, F20 ART 2361, F20 ART 3361 - Seniors (only) register for F20 ART 4361. This hybrid studio/lecture course introduces students to the field of advertising by defining its role in American culture and economy and engaging students, hands-on, in the processes of professional

practice. The course consists of presentation and discussion of contemporary work, and provides students with opportunities to create advertising campaigns across broad product and service categories and a range of media. Major emphasis is placed upon the creative disciplines of advertising design and copywriting. Experience in copywriting and design is not necessary.
Credit 3 units. EN: H

F20 ART 4362 Advertising I

Credit 3 units. EN: H

F20 ART 4363 Advertising in the Digital Age

Same as F20 ART 1363, ART 2363, ART 3363 - Seniors (only) register for F20 ART 4363. This course examines advertising as a powerful force in contemporary culture, and explores the increasing ways consumers experience branded communication through digital technologies. We identify and study "game changing" developments in advertising communications; changing dynamics in audience behavior-including the ability to "opt out"; the advertising industry's adaptation to digital technologies; and finally, we speculate on the future of advertising in an era of mobile computing. Advertising in the Digital Age builds on The History of Advertising. It is recommended, but not required, that students have completed the first course before enrolling in this one.
Credit 3 units. EN: H

F20 ART 4364 Advertising in the Digital Age

Credit 3 units. EN: H

F20 ART 4365 History of Advertising

Credit 3 units.

F20 ART 4366 History of Advertising

Same as F20 1366, F20 3366, F20 4366 - Freshmen (only) register for F20 2366. The historical, cultural and technological development of advertising in America from the colonial period to the present. This course examines, through various media forms, key advertisements and campaigns, the creatives who made them, the technologies used to create them and changes in our culture that advertising both influences and reflects.
Credit 3 units.

F10 ART 436A Visual Journalism and Reportage Drawing

This course combines studio practice, work in the field, subject reporting and nonfiction writing to explore a rich tradition that dates to the mid-19th century. The "special artists" who reported on the American Civil War, the urban observers of the Ashcan School and the "New Journalism" illustrators of the 1950s, '60s and '70s brought vision and force to their work as reporters. Today, the reportage tradition is being re-invigorated in online outlets and periodicals. Students produce a series of works documenting observations of contemporary people, sites and events, culminating in a zine designed for print and/or a digital slideshow with supporting text. This course provides plentiful drawing experience. Supplemented by historical material in the collections of the Modern Graphic History Library. This course is appropriate for juniors in the Communication Design major. (Students with an interest in visual journalism grounded in street photography and visually engaged writers may be admitted to the course by permission of instructor.)
Credit 3 units.

F20 ART 436F Interactivity and Web Design

This course combines investigations of image construction and editing, typography and basic issues in interactivity to explore the world of interface design and beginning web development.
Credit 3 units. EN: H

F20 ART 436G The Licensed Image: Development and Distribution

An introduction to the concept of image development, design, market distribution and methodology for creating licensed products. Projects involve product idea development, market and the development of image-driven products using images, design and writing. Traditional drawing skills not required. Students may work by hand or on the computer. Ideal course for College of Art students whose work focuses on images, Design minors, and students outside the College of Art interested in developing visual products, including business students.
Credit 3 units. EN: H

F20 ART 436I Communication Design I

An introduction to the field of communication design, combining principles from the fields of graphic design, advertising and illustration/image construction. Through studio exercises and lectures, students are exposed to the broad range of conceptual, aesthetic and strategic issues inherent to the field. Additionally, the similarities, differences and points of overlap within the three areas are discussed. Strongly recommended for students considering the Communication Design major. An excellent introduction to the subject as a tool for business and marketing.

Credit 3 units. EN: H

F10 ART 437B Communication Design: Visual Information: What? Why? How?

This course explores the function of information in visual design in a wide variety of contexts. Students develop multiple kinds of information (from analytic to poetic) and employ a variety of approaches for conceptual and visual realization. Deliverables include books, maps and presentations; motion graphics optional. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.

Credit 5 units. EN: H

F10 ART 437C Communication Design: Voice

Type and image work together to foment social awareness and political change. Poster, magazine, book, newspaper, flyer, advertising design and the web are all media that directly influence public opinion, alter our perceptions and expose social and political ills. This course integrates research, writing and design to voice perspectives on current issues. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.

Credit 5 units. EN: H

F10 ART 437D Communication Design: Vision (and the Brain)

Studying the physical and cognitive function of the visual stream is an important step in understanding the many factors influencing interpretation of visual design. Students conduct directed research on one aspect of the visual processing stream, design fundamental visual models and author a chapter based upon their research which is part of a publication produced by the class. Emphasis on research, authorship and publication design. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.

Credit 5 units. EN: H

F10 ART 437E Communication Design: Editorial Illustration

This class focuses entirely on the professional practice of conceptual illustration for editorial venues. We practice the methodology of creating visual metaphors, visualizing concise ideas and working under short deadlines. The projects cover the range of editorial image making in the professional world today including portraiture, multiple images, working with text/layouts, time and color restrictions, Op-Ed and difficult art direction. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.

Credit 5 units. EN: H

F10 ART 437F Communication Design: Motion Graphics II

Students are introduced to motion applications taken from various contexts of graphical motions and computer-animated information. Channels for this course include public interest motion, i.e. title sequence design, animated logos/brands, mobile phone graphic applications and kiosk/museum display graphics. Students develop kinetic and informational sequences for the screen to explore the public interest motion, applying methodological guidelines that articulate motion grouping principles to influence interpretation and that ensure efficient communication of expressive content. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.

Credit 5 units. EN: H

F10 ART 437G Communication Design: Visual Worlds: Image Development for Illustrators and Cartoonists

All professional cartoonists and illustrators must bring a coherent vision and reliable approach to their work. Each successful practitioner builds his/her own world, guided by a set of conceptual and visual "rules" that emerge over time. This course poses a series of problems designed to identify the visual themes, formal properties and conceptual patterns present in the work of every student. Shared studio projects yield to directed assignments. Focused research, methodological experimentation and class critique play important roles in the course. Students should be well advanced toward the definition and development of an appropriate individualized visual signature in pictorial work. Applicable to anticipated career directions in illustration, comics, visual development for animation and image licensing. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.

Credit 5 units. EN: H

F10 ART 437H Communication Design: Illustrating Texts

Most illustration is in service of a verbal concept, typically a form of text. Using different applied outcomes — nonfiction and fiction illustration, including graphic novels/mini comics and advertising — this studio introduces different strategies for visualizing texts. Students should have a coherent set of methodologies to draw upon when setting the communication goals for their illustrations. Along with producing illustrations, students write both analyses of assigned texts and are responsible for creating and writing their final project. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.

Credit 5 units. EN: H

F10 ART 437I Design Methods: Image and Story

Through a series of shared projects yielding to an increasingly tutorial format, students explore means, media and methodologies for isolating critical visual concerns in the broad realm of image construction and iconographic development. Designed to cultivate and focus visual expertise in pictorial design for illustrators, cartoonists and graphic designers. An early focus on image design shifts to an animating concern with graphic narrative and storytelling. Culminating project is expected to demonstrate professional competence and emerging orientation within the field. Students must enroll in any two courses numbered F10 ART 437x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only.

Credit 5 units. EN: H

F20 ART 4386 The Art of Advertising

This course introduces students to the field by defining the role of advertising in American culture and economy. It begins by exploring the evolving and devolving aspects of American advertising and the forces that both compel and repel consumer audiences. The class explains the processes and criteria that, when properly utilized, elevate advertising and validate it as an art form. The course consists of lectures and visiting instructors, brief essay quizzes and a series of exercises

designed to acquaint each student with administrative and creative processes and various disciplines within the advertising field. Major emphasis is placed upon the creative disciplines. Credit 3 units. EN: H

F10 ART 438B Communication Design: Designer as Author

What are the principles of authorship? How do we set out to develop content for publication? What role could a designer have in shaping that content? Can design itself function as content? These questions and others are confronted and challenged in a semester-long capstone project. Each student produces a project, ambitious in scope, in which they act as both author and designer. The work may be either print or screen-based, but must have a rationale for being one or the other. This course is appropriate for developing graphic designers, writers, visual journalists, art directors and students seeking to enter the publishing industry. Topic definition occurs before the winter break in consultation with the professor. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438C Communication Design: Information Design-Building Sets

Students investigate subject areas drawing on a body of data provided by the instructor, which may include material from the fields of health, culture studies and the sciences. Two projects are assigned to enable students to create contemporary visual products from the source data. Students choose from a menu of formats: print or online journalism; maps; multiframe animations; touch-screen or product/service designs; and other such visualizations. This course emphasizes content development, targeted visual exploration, and the development of a system of designs across multiple-media forms and modes. This course is appropriate for developing information designers, graphic designers, content developers, visual journalists and art directors. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438D Communication Design: Illustrated Fiction — A Sustained Investigation

Students select a work of fiction [a poetry collection, a novel, a short story collection, a children's tale or mythological narrative] of sufficient length and depth to accommodate a minimum of 15 story illustrations, including one double page spread and three additional images for cover, title page and dedication — making a total of 18. Text and image relationships are addressed and considered, leading to a final project that includes both. This course is appropriate for developing illustrators, writers, art directors and students seeking to enter the publishing industry. Topic definition occurs before the winter break in consultation with the professor. Students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438E Communication Design: Nonfiction Illustrated for Page and Screen

This course is devoted to the development and production of a visual book or screen-based illustrated work which communicates nonfictional content. Project content is produced in one of two ways: onsite social observation and reportage (example: the culture of amateur wrestling), or the presentation of preexistent factual material (e.g., the evolution of hominids). In the latter case, the student is expected to present evidence of substantial subject knowledge before the project begins. Screen-based texts may be typeset or delivered through the use of a soundtrack. This course is appropriate for developing illustrators, writers, visual journalists, story artists and designers for image-driven contexts. Topic definition occurs before the winter break in consultation with the professor. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438F Communication Design: Exhibition Design

This course exposes students to the fundamental principles of exhibition design. We begin through the translation of a 2-dimensional design to one that is 3-dimensional. Issues of scale, line, shape and form in space, and the translation of typographic material to human scale make up the focus of the first assignment. The second assignment focuses on how space may be used expressively to translate a historic, social or scientific event into a more visceral experience for the viewer. The final project is based on subject matter of the student's choice. Final designs are presented as Illustrator drawings: to scale elevations and plan views, along with rough working models. Photography is used as a design tool. The class takes a field trip (required) to Washington, D.C., as part of the work of the course. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438G Communication Design: The Narrative Sketchbook

The sketchbook has long been seen as an artist's greatest internal resource. In this course, students make images that explore visual narratives — but the raw materials for these stories come from exploration inside the pages of their sketchbook. This course develops the vital discipline of daily drawing. The assignments include both conceptual and applied projects such as illustrated book jackets and short stories. Significant time is spent in media exploration, technical mastery and professional practices. Co-requisites: Students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438H Communication Design: Motion/Web Design — Visualizing Information in Time

In this class, we explore motion, sound and interactivity to produce dynamic visual information for the screen. The first assignment reviews differences and similarities

between print-based media and motion design. The second assignment creates a real-time production using interactivity and concurrency. The final project includes theme development, self-running (synchronized) diagrams and animation. Incorporating sound effects and/or music is required for all projects. We intend to gather and upload all three projects for a website. For example, the first assignment is used for a banner, the second assignment is used for an optional link, and the final project is used as the main information of the website. Software for this course includes Illustrator and Photoshop; Flash and/or After Effects for motion, and Dreamweaver for web editing. This course focuses more on the quality of ideas and the structuring of visual information in time than on software instruction. Corequisites: students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438I Communication Design: Visual Identities and Symbols

This course builds on previously learned graphic design principles including a continued investigation of typography and its application. Students explore the representation of abstract ideas in the form of symbols for the purpose of building identity. The class focuses on the development of visual identity through a systems approach to design with application to various printed collateral. This course prepares students to design a symbol, a logotype, stationery system, and collateral products, keeping the identity consistent and intact throughout the process. Students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F20 ART 438J Advanced Animation

Credit 3 units. EN: H

F10 ART 438K Communication Design: Informational Books

Students enrolled in InfoBooks select a subject and create a single or set of books. The project moves from content development and research to concept, visual development, and final execution and craft. Emphasis is placed on clear communication of the content through a mix of complementary visual languages (typographic, information design, photographic, illustrated, etc.). Appropriate for students who are interested in pursuing professional work in publishing, book design, information design, and brand/print collateral literature. Students must enroll in any two courses numbered F10 ART 438x at times that do not conflict. Prerequisites: F10 ART 337B, ART 337C, ART 337D, ART 338B, ART 338C, ART 338D; senior standing; College of Art majors only. Credit 5 units. EN: H

F10 ART 438N Special Topics in Communication Design

Credit 5 units. EN: H

F20 ART 439A History of Communication Design

Historical development of communication design based on a survey of significant artists and designers and the ideas, styles, movements, forces and individuals who influenced their work. This course is a component of the Communication Design major.

Credit 3 units. EN: H

F20 ART 445 Topics in the History of Book Illustration: The Book as Subject

Within the past half-century, the book has moved from periphery to center, becoming the subject of an expanding body of work by writers and artists. Its formal qualities and physical processes, its habitual means of organizing, its strengths, its limitations, and the meanings we attach to them, have become the subject of seemingly self-conscious, inward-looking books. Postmodern as if by definition, playfulness and irony attend these works, and their complexities and subtleties often prove elusiveness a virtue. They command a reshaping of our sense of how books, texts and illustrations react to and interact with one another, and how a reader/viewer experiences and makes sense of them. We look at work by Vladimir Nabokov, Julio Cortazar, Italo Calvino, William H. Gass, Samuel Beckett, Jasper Johns, Tom Phillips, Anselm Kiefer, Susan Baron, Peter Greenaway and others. This seminar explores aspects of the history of image and text conjoined in the Western book, at once an object and a concept, a thing experienced and a conduit, a means of transmission. Utilizing a variety of analytical and critical approaches — psychoanalytical, deconstructive, New Historicist — we examine the ways in which texts and images make and unmake meanings. Students are asked to write two papers, one brief (six to eight pages), the other more extended (12 to 20 pages), and to give one in-class presentation. Special topics rotate from semester to semester. Credit 3 units. EN: H

F20 ART 446 Topics in the History of Book Illustration: Technologies and Empires: The Book in the Age of Victoria

The history of 19th-century book illustration is the story of the search for an ever more perfect and more direct medium of reproduction, gradually eliminating the layers of artisans between the artist and the finished page, from the steel engravings of Cruikshank and Phiz early in the century through the reemergence of wood cut in the form of wood engraving to lithography and chromolithography to the increasing use of photography. By century's end, the photograph offered what seemed to some the perfect, nearly unimpeding medium for artistic expression, eliminating the intercessions of engravers and artisans: the eye's triumph over the hand. In photography, the artist's "pure vision" could be discovered and, perhaps more importantly, readily reproduced within a text, as advances made it possible to produce typographically compatible plates, merging text and image into a single reproductive process. Yet technology ran counter to the developing aesthetic theories and to the unfolding trends of high art and low. In an ever more mechanized age, the hand-crafted, the unique, the anciently done underwent a renaissance, a reevaluation. Both Pater and the Arts and Crafts Movement set themselves against the new age, reclaiming for a luxuriant market processes that had once been commonplace for all production. Aesthetics experienced itself as nostalgia, and merged a hatred of industrialized life and its cheapened products with the moral injunction to purity and simplicity. This seminar explores aspects of the history of image and text conjoined in the Western book, at once an object and a concept, a thing experienced and a conduit, a means of transmission. Utilizing a variety of analytical and critical approaches — psychoanalytical, deconstructive, New Historicist — we examine the ways in which texts and images make and unmake meanings. Students are asked to write two papers, one brief (six to eight pages), the other more extended (12 to

20 pages), and to give one in-class presentation. Special topics rotate from semester to semester.

Credit 3 units. EN: H

F20 ART 447 The Illustrated Book: Design and Production

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress, engraving and intaglio, offset lithography, and digital, "virtual" media. Certain projects may require a second semester of study to complete.

Credit 3 units. EN: H

F20 ART 4472 Topics in the Illustrated Book: Advanced Topics in the Book

This class is intended for students who have taken "Special Topics in the Illustrated Book: Design and Production" and desire to do advanced work. This course is a further examination of the book structure and relationship of content to form. Special attention is paid to integration of text and image and to a variety of compositional techniques with image as well as text. Students are expected to begin the semester with a concept for an advanced book project and spend the semester in consultation with the instructor and in intensive investigation of the book form. Demonstrations of advanced techniques accompany lectures. Primary modes of production include letterpress and computer applications, among others.

Credit 3 units. EN: H

F20 ART 448 The Illustrated Book: Design and Production

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, "virtual" media. Certain projects may require a second semester of study to complete.

Credit 3 units. EN: H

F20 ART 4481 The Illustrated Book: Design and Production

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, "virtual" media. Certain projects may require a second semester of study to complete.

Credit 3 units. EN: H

F20 ART 4482 The Illustrated Book: Design and Production

An investigation of text, image, design and production within the broad realm of illustrated books. A series of exploratory exercises in the beginning of the semester yields to a single

sustained project proposed and developed by the student. Project emphases may include visual narrative, textual interpretation, creative writing, typography, structure and sequencing, and material investigation. Production methods may include relief and letterpress; engraving and intaglio; offset lithography; and digital, "virtual" media. Certain projects may require a second semester of study to complete.

F10 ART 450 Independent Study (also F20)

Designed for seniors fulfilling art minor requirements. Permission of instructor and submission of a written proposal to the associate dean of students (Room 1, Bixby Hall).

Credit variable, maximum 3 units. EN: H

F20 ART 455A Urban Books: Imag(en)ing St. Louis

Since the beginning of the 20th century, art, architecture and urbanism together have investigated the production of images that shape the symbolic dimension of our experience of large cities. This seminar critically embraces this tradition and brings together different methodologies for the visual analysis and representation of contemporary urban phenomena, using St. Louis as a focal point. The goal is to design and produce individual books as a result of research, visual documentation, readings and discussions in a seminar and workshop structure. Each student selects and develops a theme related to the urbanization of St. Louis that is organized into books that present how this metropolitan area has been conceived through images. The course is divided into three parts combining readings, research, and design activities, each of which culminates in the presentation of an individual project; a total of two study books; and a final book. The outcome of the course will be a collection of student-produced books that will be presented in an exhibition titled "Imag(en)ing St. Louis" to take place consecutively at Olin Library and the Art and Architecture Library. Fulfills Urban Issues elective requirement.

Same as XCORE 336

Credit 3 units.

F10 ART 461 Capstone Studio I

Required for majors in painting, photography, printmaking and sculpture, beginning with the class of 2015. This is an advanced course in studio art conceptualization and production. Students develop creative concepts, objects and gestures; successful completion of the course entails the development of, and commitment to, an artistic position, evidenced by studio production, presentation and writing. Responsibilities include preparation of drawings, models, maquettes and other documentation. This course anticipates the work of Capstone Studio II, which culminates in a senior exhibition. This course includes practice, critique and occasional museum/gallery visits. Corequisite: must be taken concurrently with F10 ART 411A, ART 413D, or ART 415B.

Credit 3 units. EN: H

F10 ART 462 Capstone Studio II

Continuation of Capstone Studio I. Required for majors in painting, photography, printmaking and sculpture, beginning with the class of 2015. Course participants design, prepare and complete a body of materially and conceptually resolved work for the spring Capstone exhibition. The course fosters an intellectual dialogue among seniors making the transition from studio to artist. Completion of a body of work is accompanied by intensive critical analysis of the ideas and methods from which it arises.

Course includes practice, critique and occasional museum/gallery visits. Corequisite: must be taken concurrently with F10 ART 412A, ART 4143D, ART 416B or ART 418G.
Credit 3 units. EN: H

F20 ART 471 Introduction to Letterpress Printing

This class serves as an introduction to printing with the Vandercook handpress. Through a series of assignments students learn a systematic approach to planning, arranging and printing type on a page. The students receive a basic introduction to typography, history of letterforms and history of the book. The mechanics of relief printing with the cylinder proof press, ink composition and resolution of the typographic image also are explored. As an exploration of the publishing process, students produce a chapbook of a short literary work. The class primarily focuses on typographic composition, but one assignment employs a combination of word and image.
Credit 3 units. EN: H

F20 ART 4713 Introduction to Book Binding

Same as F20 ART 1713, F20 ART 2713, F20 ART 3713. Seniors (only) register for F20 ART 4713. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings.
Credit 3 units. EN: H

F20 ART 4714 Introduction to Book Binding

Same as F20 ART 1714, F20 ART 2714, F20 ART 3714. Seniors (only) register for F20 ART 4714. This class serves as an introduction to the book as artifact of material culture. A variety of traditional and nontraditional book structures are explored. Students learn from historical approaches to constructing the codex form, including the single signature pamphlet, the multisignature case binding, the coptic and the medieval long stitch. Students learn Japanese binding and its many variations. Several contemporary variations are introduced, including the tunnel, the flag book, the accordion and the carousel. Students explore the visual book using found imagery and photocopy transfers and produce a variety of decorated papers to be used in their bindings.

F20 ART 4715 Hybrid Studio

Same as F20 ART 3715. Seniors (only) register for F20 ART 4715. Hybrid Studio is an opportunity for undergraduate and graduate students from across the campus to engage the book as a truly interdisciplinary subject and object. This course combines equal parts seminar and applied studio experience. Historical models of the book as framework for ideas and physical artifact are studied and modeled. The intention of this course is to combine work in allied disciplines, supporting students in the integration of their chosen major areas of study and incorporating photography, painting, sculpture, design, architecture, engineering and writing and history. The class moves between group discussions and individual

mentoring with regularly scheduled demonstrations of book studio equipment. Limited to junior-level and above only. Prior experience in book studio courses is recommended, but not required. Undergraduates must have permission from faculty to miss major studio time on Friday afternoon to take this course.
Credit variable, maximum 3 units. EN: H

Credit 3 units. EN: H

F10 ART 472B Content to Cover: the Design of Books

This studio course considers the design of books in their totality, from the smallest typographic details of text pages, to designing the page grid, and the selection of images, type, materials, and color of the binding and cover. Students produce two books from texts assigned to them. The first is a text-based book of prose; the second, larger project, includes body text, images, captions, footnotes. Beginning with a thorough discussion of the landscape of the two-page spread, students complete a short research project based upon a complex illustrated book in the library. Discussion of print production and binding options in industry is enhanced by a visit to a local offset printer and to Olin Library Special Collections. Students deepen their skill base in typographic applications, the use of Indesign as a multi-page document tool, a range of imaging techniques offered in the Book Studio, and bookbinding technique, as well as building their design criticism vocabulary. This course is appropriate for juniors in the Communication Design major.

F20 ART 484D Space, Society and the Digital

Same as ARCH 484D
Credit 3 units.

F10 ART 485A Public Practice: Art Practice

Students examine, critically explore and execute work in the public sphere. Readings, discussions and presentations generate a framework for understanding historical, theoretical and practical considerations for creating artwork in relation to the material/social conditions of public space. Projects may respond to any number of approaches in the contemporary field, including public sculpture, participatory art and ephemeral art practices. Students learn the discipline of proposal development

and present final projects that are adjudicated by an outside jury. Students whose work is selected by the jury must enroll in the spring semester course "From Design to Realization." It is highly recommended that students who wish to concentrate in sculpture enroll in this course. Open to BFA students with senior-level standing and others, including minors, with consent of instructor. Credit 3 units. EN: H

F20 ART 496 Design, Artisanry and Sustainability as Cultural Catalyst

This course investigates the ways in which artisanship is a stimulus to design thinking and innovation. The prerequisite to the course is a 16-day trip to India over winter break where students work closely with leading Indian designers of textiles, products and architecture as well as accomplished artisans working with methods both ancient and modern. We discuss how craft informs design and how design acts as a force in entrepreneurship and job creation. A major focus of our research is investigating how craft and design are catalysts for innovation in a sustainable use of materials and water. For more information, contact Belinda Lee at Lee@samfox.wustl.edu. Students should obtain a visa on their own. Credit 3 units. EN: H

About Us

The Sam Fox School of Design & Visual Arts is a unique collaboration in architecture, art and design education, linking professional studio programs with one of the country's finest university art museums in the context of an internationally recognized research university.

The Sam Fox School is composed of the College of Architecture, the Graduate School of Architecture & Urban Design, the College of Art, the Graduate School of Art and the Mildred Lane Kemper Art Museum.

The **College of Art**, founded in 1879, was the first professional, university-affiliated art school in the United States. In the 1940s, its broad-based core program helped set the standards for the bachelor of fine arts degree. Faculty over the years have included Max Beckmann, Philip Guston and other internationally known artists.

The **College of Architecture**, established in 1910, was one of eight founding members of the Association of Collegiate Schools of Architecture (ACSA). In 1962, Architecture launched one of the nation's first Master of Urban Design programs. Four winners of the Pritzker Prize, considered architecture's highest honor, have taught at the school.

The **Mildred Lane Kemper Art Museum** dates back to 1881, making it the first art museum west of the Mississippi River. The collection has historically focused on contemporary work. Today the Kemper Art Museum holds roughly 3,500 important paintings, sculptures, photographs and installations by 19th-

20th- and 21st-century American and European artists, along with significant antiquities and a large number of prints and drawings.

Additional collaborative opportunities are provided by the Department of Art History & Archaeology in Arts & Sciences and the Kenneth and Nancy Kranzberg Art & Architecture Library.

Inquiry, Creativity and Synthesis

The Sam Fox School offers rigorous art and architecture education at both the undergraduate and graduate levels, within the unique context of an independent, nationally prominent research university.

The student body is composed of approximately 300 undergraduate and 50 graduate students in Art, as well as 200 undergraduate and 280 graduate students in Architecture. In all, they represent 17 countries, 47 states and the District of Columbia. Roughly 30 percent of undergraduates pursue combined studies within another university area.

Both core and advanced studios integrate contemporary theory and practice. Among the innovative programs are:

- Multidisciplinary courses co-taught by Art, Architecture, and Art History & Archaeology faculty. Recent seminars have explored the history of illustrated entertainment, combined urban theory with book design and production, and crafted a variety of online publications. Courses in exhibition studies are being offered, and a new program of exhibition studies is under development.
- International studios in Barcelona, Buenos Aires, Florence and Helsinki are taught by Washington University faculty and offer a range of distinctive programs in art and architecture.
- Community projects include the University City Sculpture Series, which funds student-designed public artworks; WashUCity, a mentoring program for local high school artists; and Architecture's Building Community/Community Building, which explores relationships between St. Louis' inner city, nearby municipalities and outlying suburbs.

Uniting Creativity and Scholarship

The Sam Fox School boasts a unique combination of academic and intellectual resources.

The Architecture faculty includes practicing architects, urban designers and landscape architects as well as eminent architectural theorists and historians and a select number of international visitors. The resident, full-time faculty members have won national and regional awards for design excellence and planning, including more than two dozen from the American Institute of Architects alone.

Art's full-time faculty members include prominent painters, sculptors, printmakers and mixed-media artists as well as leading illustrators, graphic designers, fashion designers and photographers. In the past decade, design faculty have won

numerous professional honors while fine art faculty have been featured in more than 100 solo exhibitions and 300 group shows on five continents.

The nationally recognized Kemper Art Museum maintains a vital program of exhibitions, publications and educational events. Major thematic shows are drawn from institutions and private collections around the world, while the Contemporary Projects Series highlights nationally and internationally emerging artists. The acclaimed permanent collection includes key works by modern and contemporary artists from Henri Matisse, Pablo Picasso and Jackson Pollock to Christian Boltanski, Candida Hofer and Olafur Eliasson.

Public events include concerts, film screenings, lectures and discussions with distinguished visitors, and museum tours led by student docents. The museum also provides workspace for faculty- and student-curated exhibitions (usually relating to Sam Fox School curriculum). Courses in Art History and Archaeology further complement the critical and practical study of exhibitions while facilitating student involvement in professional curatorial projects.

A Comprehensive Campus

The Sam Fox School is housed in a comprehensive, five-building campus for design and the visual arts. Conceived around a central courtyard, it both reflects and updates Washington University's original campus plan, developed in 1895 by Frederick Law Olmsted, the founder of American landscape architecture.

The architectural centerpiece is prize-winning Japanese architect Fumihiko Maki's new Kemper Art Museum. This elegant, 65,000-square-foot limestone clad structure — a gathering point for scholars and the general public — includes more than 10,000 square feet of exhibition space, art storage facilities, and the Florence Steinberg Weil Sculpture Garden. The museum also houses the new Kranzberg Art & Architecture Library, Art History & Archaeology, and the Newman Money Museum, a state-of-the-art numismatics center.

Adjacent to the Kemper Art Museum is Maki's Earl E. and Myrtle E. Walker Hall. The three-story, 38,000-square-foot building contains painting and sculpture studios and the Nancy Spirtas Kranzberg Studio for the Illustrated Book.

Flanking the new buildings are Bixby and Givens Halls — historic homes to Art and Architecture, respectively — as well as Steinberg Hall, Maki's iconic modernist pavilion. Recent renovations include state-of-the-art computing environments; accessible, light-filled studios; additional workspaces; an auditorium; and a café.

Visiting Artists and Architects

The Sam Fox School invites distinguished academics and professionals to lecture, attend critiques and visit major studios. Recent visitors include:

Degree Requirements

To receive the Bachelor of Fine Arts degree, a student must meet the requirements of the College of Art and take academic courses with other undergraduates. Work in art can be combined with studies in architecture, business, humanities, natural and social sciences, and the other arts. Students may take these

courses for educational and intellectual enrichment or in direct correlation with their primary interests.

The specified number of credit units in courses in the areas listed below are required for the BFA, in addition to the Studio Art and additional art elective requirements. (Specific courses that meet these requirements are listed in the College of Arts & Sciences section.)

Writing: (C– or better) is required in the first year. Transfer students must fulfill the Writing 1 requirement by taking CWP 100 College Writing 1 or by review of a writing portfolio. For more information, visit <http://transferportfolio.artsci.wustl.edu>.

Humanities: Humanities courses examine the human condition as it has been documented and expressed in both past and contemporary times. This area includes courses from Literature (both in English and other languages), Classics, History, Philosophy, and Religious Studies, as well as some courses in the creative arts such as Dance, Drama, Music and Writing. Courses designated "FA HUM" fulfill a humanities requirement.

Natural Sciences or Mathematics: These courses seek to understand the natural and physical world, using objective and empirical observation and controlled experimentation. This area includes courses from Biology, Chemistry, Environmental Biology or Policy, Earth & Planetary Sciences, Math and Physics as well as some courses from departments such as Anthropology and Psychology. Courses designated "FA NSM" fulfill a natural sciences or mathematics requirement.

Social and Behavioral Sciences: These courses use qualitative and quantitative observation to explore the social environment, relationships with society, and forms of human behavior. This area includes courses from Anthropology, Economics, Education, International and Area Studies, Political Science, Psychology, and courses from other areas, including interdisciplinary studies. Courses designated "FA SSC" fulfill the Social and Behavioral Sciences requirement.

Art History: Two one-semester introductory courses (Art-Arch 113 and Art-Arch 215) and three additional courses (or related courses with permission of the associate dean of students). Courses designated "FA AH" fulfill an art history requirement.

Students must fulfill the following degree requirements:

Required	Units
Writing I	3
Humanities	3
Natural sciences or mathematics	3
Social and behavioral sciences	3
History of Western Art, Architecture & Design	3

Introduction to Modern Art, Architecture & Design	3
Additional art history	9
Courses in Arts & Sciences*	12
Courses in Architecture, Art, Design; Arts & Sciences; Business; or Engineering*	9
Total	48

Sam Fox Foundation Sequence	
Drawing I	3
Drawing II	3
2-D Design	3
3-D Design	3
Practices: Art + Architecture + Design I	1
Practices: Art + Architecture + Design II	1
Total	14

Major Area Requirements	
Sophomore Studios	
Major Area Studios	
Capstone	
Total	42

Sam Fox Commons OR Architecture, Art or Design electives	9
Courses in Architecture, Art, Design; Arts & Sciences; Business; or Engineering	15
Total Credit Units Required	128

*Courses in Architecture, Art, Design; Arts & Sciences; Business; and Engineering except physical education, lessons, independent study, internships, Advanced Placement, International Baccalaureate or transfer credit.

This curriculum includes the Sam Fox Foundation Sequence and the Capstone studio for all seniors in the College of Art. The Capstone studio brings together all seniors in the studio areas and separately in the Communication Design and Fashion areas for critical dialogue beyond disciplinary boundaries and to guide preparation for each area's culminating BFA exhibition.

Academic Honors & Awards

Dean's List: In recognition of exceptional scholarship, first-year, sophomore, junior and senior art students who have completed at least 14 credit hours (excludes courses taken P/F or Audit)

with a semester grade point average of 3.5 or higher during a semester will be cited on the Dean's List.

Latin Honors: A student may be considered for the Bachelor of Fine Arts degree cum laude, magna cum laude or summa cum laude as determined by the dean.

Senior Honors: An undergraduate art student may be named an Eliot Scholar if his or her academic performance has been outstanding, with a cumulative grade point average of 3.5 or higher through the final semester.

Prizes and Awards

The Scholars in Art Program provides named scholarship funds that have been donated to the university by individuals or companies specifically for this purpose. Selection is based on financial need and academic achievement. There is no application process.

Academic Scholarships

The College of Art offers one full-tuition and up to five partial-tuition scholarships each year solely on the basis of merit. Applicants for this award may also qualify for scholarship aid based on need and will be considered for this as well. The full-tuition Conway or Proetz Scholarship is awarded to an entering first-year student whose artistic and academic potential is judged outstanding by a faculty selection committee. The scholarship is supported by two endowed funds. The Fred Conway Scholarship was established in memory of a distinguished professor of painting in the College of Art. The Arthur and Esther Proetz Scholarship was established to honor the commitment and dedication to the arts of these two individuals.

Competition is national in scope, with finalists invited each year to visit the College of Art at the college's expense. At this time, one student is chosen to receive the full-tuition scholarship, and the other finalists are awarded partial scholarships. These are renewable for each year of undergraduate study, assuming continued academic and artistic excellence.

To be eligible, an applicant must be a high school senior who meets the following criteria:

1. Ranks high in the senior class.
2. Has SAT or ACT scores in the upper range.

To enter the competition, the applicant must follow the usual admission application procedures by completing a Washington University freshman application and sending a digital portfolio of art work. Portfolios should be submitted through the Slideroom function of the Common Application.

Awards and Prizes

Several awards are made each year to art students who are selected by the faculty. These awards and prizes include the following:

The Paul Edward Birdsall Award in Visual Communications

The Susan Sanders Block Silver Ripper Award in Fashion Design

The Belle Cramer Award in Printmaking

The Eda L. and Clarence C. Cushing Memorial Prize in Painting

The Anne Fuller Dillon Prize in Graphic Communications

The Mary Cowan Harford Award in Watercolor

The Marsha Hertzman Blasingame Award in Printmaking

The Morris M. Horwitz Award in Photography

The Hazel H. Huntsinger Memorial Prize in Painting

The Caroline Risque Janis Prize in Sculpture

The Nancy Spirtas Kranzberg Illustrated Book Award

The John J. and Marjory B. Lewin Photography Prize

The Peter Marcus Prize in Printmaking

The Dominic Michael Silver Scissors Designer of the Year Award

The John T. Milliken Foreign Travel Award

The Al Parker Award for Excellence in Illustration

The Jayne Ball Rousseau Memorial Prize in Graphic Communications

The Margo Trump Memorial Award

The Jeffrey Frank Wacks Scholarship Award

The Herb Weitman Prize in Photography

Academic Regulations

To receive the Bachelor of Fine Arts degree, students must meet the requirements of the College of Art and take academic courses with other undergraduates. Work in art can be combined with studies in architecture, business, humanities, natural and social sciences, and the other arts. Students may take these courses for educational and intellectual enrichment or in direct correlation with their primary interests. Courses in University College do not count toward degree requirements.

No more than 15 units of pre-matriculation credit from all sources — Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels — will be awarded.

Students wishing to transfer credit for course work completed at another institution must bring a course description to the associate dean of students for review. Grades for transfer courses will not appear on the student's Washington University record and will not figure into the student's grade point average.

Attendance

The College of Art allows the professor of each course to decide how many absences a student may have and still pass the course. Professors are expected to give reasonable consideration to unavoidable absences and to the feasibility of making up work that has been missed. Students are expected to explain to their professors the reasons for any absences and to discuss with them the possibility of making up missed assignments.

Units and Grades

In the College of Art, one semester unit of credit is assigned for every two hours of work completed in class and one hour of work completed outside of class per week for one semester. A student's undergraduate grade point average is determined by dividing the number of grade points earned by the number of semester units for which grades of A, B, C, D or F have been recorded. Grades of P and F received for courses taken on the pass/fail option are not figured into the grade point average. A grade of C– or better must be received in major classes during the second, third and fourth year to count toward degree requirements. Students must maintain a minimum 2.0 cumulative grade point average to graduate.

A grade point is a measure of quality assigned to units according to the following system:

Grade	Points per Unit
A+	4.0
A	4.0
A–	3.7
B+	3.3
B	3.0
B–	2.7
C+	2.3
C	2.0
C–	1.7
D+	1.3
D	1.0
D–	0.7
F	0.0
P#	Pass (P/F option)
F#	Failing (P/F option)
I	Course work incomplete
W	Withdrawal
R	Repeat
L	Successful audit
Z	Unsuccessful audit
N	No grade submitted

X	Examination not taken
---	-----------------------

Grades of I, X and N will become grades of F if the deficiency is not made up within the next two semesters of residence. For a course repeated, students earn credit and grade points based on the second grade received.

Auditing a Course

A student must get permission from the associate dean of students or the assistant dean/registrar in the College of Art before auditing a class.

Incomplete Grades

If, following the last day for withdrawal from courses, a student experiences medical or personal problems that make satisfactory completion of course work unlikely, he or she may request a grade of I (incomplete) from one or more instructors and should take the following steps:

1. Discuss the request with the instructor before the final critique or portfolio review.
2. With the instructor's consent, complete an Incomplete Grade Petition signed by both the instructor and the student.
3. Return the signed petition to the associate dean of students for final approval.

Pass/Fail Option

A student may take one non-art course per semester on a pass/fail basis (exclusive of courses that must be taken pass/fail).

Any additional courses taken pass/fail in a given semester will not be counted toward the degree. All courses with an F10, F20 and X10 department number must be taken for credit, unless otherwise noted. CWP 100 College Writing 1 also must be taken for credit.

Repeating a Course

If a student retakes a course, both registrations will show on the transcript. The symbol R will appear next to the grade for the first enrollment; the grade and units in the second enrollment will be used to calculate the GPA. No student may use the retake option to replace a grade received as a sanction for the violation of the Academic Integrity Policy. A retaken course must be taken for the same grade option as the original course. Courses completed at institutions other than Washington University are not applicable under this policy.

Academic Probation and Suspension

Students are expected to proceed at a pace which enables them to finish their degree within the appropriate time limit. For the Bachelor of Fine Arts, this is usually eight semesters.

A student whose semester grade point average is below 2.0 (grade of C) or who falls below a "pace" of 66 2/3 percent (number of credits earned divided by the number of credits attempted) will be placed on academic probation. If, after the following semester, the semester grade point average is still below 2.0, or if the pace is below 66 2/3 percent, the student may be ineligible for normal advancement or may be suspended. While the college desires to give all students the opportunity to prove themselves, it is not in the best interest of either the students or the college to permit students to continue indefinitely in educational programs in which they are not producing satisfactory results.

Major Declaration and Transfer

A student declares an art major simply by registering for one using the university's online registration system (WebSTAC). Once the student has selected and registered for a major in the College of Art, he or she must obtain written permission to change to another major within the College. Students requesting a transfer of major must be in good academic standing. Major Transfer Request forms are available in Bixby Hall, Room 1, and must be filed before the course drop deadline of the semester in which they wish to transfer. Credit transfers between majors are at the discretion of the accepting major faculty.

Study Abroad

The Sam Fox School and Washington University offer a wide range of undergraduate study abroad programs. For more information, visit <http://samfoxschool.wustl.edu/node/4133>.

Leave of Absence

A student may request a leave of absence from the college for one semester at a time, up to one year. If this is granted, the student may re-enroll at the end of that time without going through further admission or readmission procedures. A Request for Leave of Absence form, available in Bixby Hall, Room 1, must be completed before a leave of absence will be granted. In the case of a medical leave of absence, a letter of clearance is required from the director of Student Health Services before the student will be permitted to re-enroll.

Digital Technologies

Technology plays a critical role in the educational experience. The College of Art is committed to the integration of relevant technology into the curriculum. Students entering the sophomore year are required to have an advanced computer and software. Supplemental purchases (monitors, scanners, tablets, etc.) may be necessary as students advance and declare a major. Information is available at <http://samfoxschool.wustl.edu/node/6747>.

Retention of Student Work

The College of Art reserves the right to hold a student's work(s) for exhibition purposes and holds reproduction rights of any work(s) executed in fulfillment of course requirements.

Administration

College of Art/Graduate School of Art

Heather Corcoran
Director, College and Graduate School of Art

Majors (directory)

Below is a list of majors offered by the College of Art. Visit the following pages to view more information about a specific major.

- Art — with optional concentrations in:
 - Painting (p. 71)
 - Photography (p. 71)
 - Printmaking (p. 71)
 - Sculpture (p. 71)
- Communication Design (p. 71)
- Fashion Design (p. 71)

Minors (directory)

Below is a list of minors offered by the College of Art. Additional details about these minors can be found on the following pages:

- Art (p. 72)
- Design (p. 72)

Visit the Sam Fox School website for specific requirements.

Business

About Olin Business School

Students have many reasons to choose Olin Business School, starting with freshman entry, which allows them to begin studying business while considering other interests and career options. Not only does this build a strong business foundation, it often leads to the pursuit of double majors and minors, both inside Olin and with other Washington University schools. Olin School students take 40 percent of their classes outside the business school, giving them a chance to explore passions and create their own path.

The Olin Business School is a welcoming community where everyone values teamwork and collaboration in addition to personal achievement. Faculty members, well known for their thought leadership and dedication to teaching, genuinely care about student success in the program. It's the kind of place where students form lifelong relationships, both personal and professional.

Students will find many opportunities to apply what they've learned in class to real-world situations on campus, in St. Louis, and around the globe. These experiential learning opportunities — study abroad programs, practicums, internships, entrepreneurial studies and more — prepare students to compete in a constantly changing, global marketplace.

An Olin School undergraduate degree teaches students critical-thinking skills that enable them to solve the right problems and to make decisions quickly and confidently. It's an exceptional launching pad for success, whatever career path a student chooses to take after graduation.

Bachelor of Science in Business Administration (BSBA)

Olin Business School offers a full-time Bachelor of Science in Business Administration (BSBA) degree program of instruction. Undergraduate students at the Olin School may choose to major in one or two professional fields in business as part of their degrees. Our BSBA students enroll in business courses in their freshman year. The curriculum covers the core functional areas of business. At least one major course of study in a field of business and at least 40 percent of the course work must be in nonbusiness fields — from fine arts to science — allowing students to pursue individual careers and ensuring a well-rounded educational experience.

Majors

BSBAs are offered the option to focus their studies in a specific field of business. While a business student is not required to declare a business major, almost all our business students earn

at least one professional major. A student may pursue one or two majors from the list below:

- Accounting
- Economics and Strategy
- Entrepreneurship
- Finance
- Health Care Management
- Leadership and Strategic Management
- Marketing
- Operations and Supply Chain Management

Specific requirements for each major can be found on the Majors (p. 135) page.

Combined Majors

Business students have the option to major in more than one field of study. BSBA students can earn a total of two majors either both in business or one in business and one outside of the Olin School. For example, a student could earn a BSBA degree with a major in finance and a major in English literature from the College of Arts & Sciences. Students must complete the specific courses required for the second major, but they are not required to complete the general requirements for the second degree. Students should consult with their academic advisers for additional information. Upon completion, the student's transcript would show a BSBA degree along with the earned second major. A diploma is awarded for the degree, with reference to any major(s) on the official transcript.

Minors

Many departments and schools in the university offer minors. Business students also can pursue a minor outside of Olin Business School in any recognized academic discipline offered within the university by satisfactorily completing all the requirements for both the BSBA degree and the minor. Required courses for a minor outside of business may range from 15 to 27 units, depending on the specific regulations of the academic department. A business student who applies for a minor and completes all of the requirements will have the award of the minor noted on the official transcript. A student must be approved for admission to a minor program by the department offering the minor.

Business students typically may not minor in a business subject. However, BSBA students may choose our business of sports minor or the international business minor offered through the Olin Business School. Additional information is listed on the Minors (p. 140) page.

Students from other schools of Washington University can read about business minors on the Minors (p. 140) page.

Combined Degrees

A student also can earn two undergraduate degrees simultaneously — a BSBA degree and another undergraduate degree offered at the university. The student must be admitted to the other degree-granting program, and he or she must meet specific degree requirements for both schools. Typically, this option requires additional time to complete all requirements. For example, if a student combines a business degree with a degree from the College of Arts & Sciences, the student must complete a minimum of 150 units between the two disciplines. Of the 150 units, at least 90 units must be from the College of Arts & Sciences and at least 54.5 units from Olin Business School. Some courses may be used to satisfy both degree requirements simultaneously. Because requirements for a second degree vary from discipline to discipline, students should talk with their primary adviser to plan their program.

Joint Undergraduate and Business Master's Degrees

Master of Business Administration (MBA)

A special five-year program combining an undergraduate degree with the Master of Business Administration degree is available to a select number of undergraduates. Often referred to as the 3+2 program, it combines three years of undergraduate study and two years of MBA study for completion of both degrees in five years. Joint programs include: the AB/MBA degrees offered with the College of Arts & Sciences, the BS/MBA degrees offered with the School of Engineering & Applied Science, and the BSBA/MBA degrees offered through Olin Business School.

Admission to the 3+2 program is extremely competitive. The student must have a superior academic record, an outstanding performance on the Graduate Management Admission Test (GMAT) or Graduate Record Exam (GRE) and substantive summer internship experience in a related field.

Students apply during the winter of their junior year and begin the full-time MBA program in the fall semester. They must complete at least 90 units of undergraduate course work before entering Olin's MBA program and then complete an additional 66 units of graduate-level courses. Students should consult their academic adviser during their sophomore year regarding specific degree requirements. If a student's undergraduate major is in the School of Engineering & Applied Science or the College of Arts & Sciences, up to 15 units of remaining undergraduate courses will apply toward the 66 units required in the MBA program. If a student's undergraduate major is in Olin Business School, up to 6 units of remaining undergraduate course work will apply toward the 66 units required in the MBA program. Visit the MBA website page on joint degrees for more information, including additional requirements for Arts & Sciences candidates.

In addition, an MBA student can earn a second graduate degree concurrently in one of the following disciplines:

- Master of Architecture (MBA/MArch), Master of Urban Design (MBA/MUD)
- Master of Science in Biomedical Engineering (MBA/MS-BME)
- Master of Arts in East Asian Studies (MBA/MA)
- Juris Doctorate (MBA/JD)
- Master of Social Work (MBA/MSW)
- Master of Public Health (MBA/MPH)
- Master of Engineering in Energy, Environmental and Chemical Engineering (MBA/MEng-EECE)

To apply contact the Graduate Programs Office in Knight Hall, Room 310, or send an email to mba@olin.wustl.edu.

Specialized Master's Programs

A specialized master's degree is highly concentrated and singular in focus, providing intensive education in one business discipline. Olin Business School offers a variety of specialized master's programs. Visit <http://olin.wustl.edu/SMP> for details. Further information is available in the Graduate Programs Office in Knight Hall, Room 310, or by emailing the programs using the contact information below.

If students are interested in pursuing a specialized master's degree, it is recommended that they contact the Graduate Programs Office in advance to discuss the BSBA/SMP.

Combined Program General Principles and Guidelines as follows:

1. Only students who have attained senior status in their undergraduate studies (as measured by degree credit hours earned) will be allowed to register for graduate-level courses. There are two paths to securing approval for these registrations.
 - a. Students accepted to an SMP program, working with their SMP adviser, will select and register for the relevant and approved courses together.
 - b. Senior undergraduate students who are endorsed by the BSBA program as having a hardship or undue burden in completing their BSBA requirements may be granted special permission to register for a course(s). Registrations will be approved by the Graduate Programs Office according to an established procedure.
2. Undergraduate students should apply to an SMP program during their junior year (as defined by credit hours) in order to allow sufficient lead time for an admissions decision and for academic planning.
3. Undergraduate students will be limited to taking a maximum of 18 graduate credit hours during their senior year while still officially coded as an undergraduate student.

4. Students will enroll for at least one full-time semester (fall, spring or summer) coded and registered as a graduate student.
5. Tuition for the graduate semester will be applied at the full-time graduate program rate for the specific degree program the student is pursuing.
6. If the student needs additional course work beyond the immersive graduate semester, they will be charged the full-time or part-time graduate tuition rate — whichever applies based on the number of credit hours.

For students at Washington University, the GMAT/GRE requirement and \$100 application fee are waived.

Master of Accounting (MACC)

Whether a person's career interests lie in public or corporate accounting, consulting or financial services, the Olin School's Master of Accounting (MACC) program will prepare him/her for an exciting and challenging future. This program requires 33 graduate-level credit units in addition to the course work requirements for an undergraduate degree. Course work is included to help meet eligibility requirements to sit for the CPA exam in states with the "150-hour rule." It is expected that students will have completed Intermediate Financial Accounting before beginning the program.

Visit the MACC website or email maccinfo@wustl.edu.

Master of Science in Customer Analytics (MSCA)

The MSCA program will provide a student with the tools to become an analytics-driven business manager, well-versed to guide firms in the emerging era of big data and data-driven decision-making. Washington University's Olin Business School, School of Engineering, and the College of Arts & Sciences have partnered with business technology industry leader IBM to create a curriculum that will help a student formulate and implement analytics-driven approaches to marketing.

Completion of the degree requires a minimum of 30.5 credits of graduate-level (500-level) structured course work, in addition to the course requirements for an undergraduate degree. MEC 5200 and one-day courses in SPSS programming and R programming are taught in August and are required as foundations courses. A student must maintain a minimum GPA of 3.0. Applicants to the MSCA program should have taken at least two courses in calculus or equivalent course work and one course in statistics.

Visit the MSCA website or email mscainfo@wustl.edu (MSCAInfo@wustl.edu).

Master of Science in Finance (MSF)

Graduates of the Olin School's Master of Science in Finance (MSF) develop highly targeted skills by selecting the curriculum track best suited to their career aspirations. These rigorous and

comprehensive graduate programs offer in-depth training in securities research, asset management, derivative pricing, fixed income and corporate finance for students pursuing specialized finance careers:

- The Corporate Finance and Investments track requires 30.5 graduate-level credit units in addition to the course requirements for an undergraduate degree. It prepares students for careers in asset management, sales and trading, industry finance and consulting.
- The Quantitative Finance track requires 39 graduate-level credit units in addition to the course requirements for an undergraduate degree. It prepares students for careers in credit risk analysis, derivative pricing, risk management modeling and financial software development.
- The Accelerated MSF track requires 30 graduate-level credit units in addition to the course requirements for an undergraduate degree. The program format allows students to begin their degree during the summer following their junior year of undergraduate study and complete the degree during the summer upon graduation from their undergraduate program of study. Courses focus on investment theory and practice.

Applicants to the MSF program must have taken microeconomics, statistics and calculus.

Visit the MSF website or email msfinanceinfo@wustl.edu (MSFinanceInfo@wustl.edu).

Global Master of Finance Program (GMF)

To meet demand for graduates with global financial expertise, Olin Business School offers programs that feature study at the campuses of prestigious international universities.

- Master of Science in Applied Finance degree from Singapore Management University (SMU) and MS in Finance from Washington University. Students take classes in four sessions: a summer at Olin Business School, two academic semesters at SMU, and a final summer at Olin.
- Global MBA degree from Yonsei University (YSB) and MS in Finance degree from Washington University. Students take courses in five sessions: a summer at Olin Business School; fall, winter, and spring academic semesters at YSB; and a final summer at Olin.
- Certificate in innovation and entrepreneurship from IDC Herzliya (IDC) and MS in Finance degree from Washington University. Students take classes in three sessions: a summer at Olin Business School, fall academic semester at IDC, and an extended spring academic semester at Olin.

Applicants to the Global Master of Finance Dual Degree program should have taken microeconomics, statistics and calculus.

Visit the GMF website or email globalfinance@wustl.edu.

Master of Science in Supply Chain Management (MS/SCM)

Exceptional management of the production and delivery of a firm's products and services — its supply chain — is essential. The Master of Science in Supply Chain Management degree equips graduates to stand out in this challenging and critically important career field. This program provides students with comprehensive preparation in all areas relevant to sophisticated management of a company's supply chain, whether the company is engaged in manufacturing or in the delivery of complex services.

Completion of the degree requires a minimum of 36 graduate-level credit hours in addition to the course requirements for an undergraduate degree.

Visit the MSSCM website or email msscminfo@wustl.edu (MSSCMInfo@wustl.edu).

Special Opportunities

Center for Experiential Learning

The Center for Experiential Learning (CEL) is an educational center located in the Olin Business School. The CEL is focused on creating innovative learning opportunities with meaningful impact in the business and nonprofit communities. Visit <http://olin.wustl.edu/cel> for more information. Courses available to undergraduate students include:

- The CEL Practicum engages students in real-world, team-based consulting projects. Through a semester-long experience, students apply and enhance their critical thinking skills through work with business leaders in organizations ranging from start-ups to Fortune 500 companies.
- Taylor Community Consulting Program (TCCP) connects students with agencies in the local nonprofit sector for a six-week consulting project. Through team-based, applied learning projects, students enable positive change in the St. Louis community.
- CEL Entrepreneurial Consulting Team (CElect) delivers impact to the St. Louis start-up community in a semester-long experience. Through a partnership with the T-Rex Incubator, students work with local entrepreneurs, applying their critical thinking skills to early-stage business challenges in marketing, resource management and strategy.

Entrepreneurship

Olin School offers both a major and minor in entrepreneurship, a business plan course known as the Hatchery, and the CEL Entrepreneurial Consulting Team (described above). There are also many university-wide resources including the Skandalaris Center for Interdisciplinary Innovation and Entrepreneurial Studies. Read about entrepreneurship opportunities on the BSBA website.

Independent Study

Independent study under the direction of a faculty member is available on a selective basis. The purpose of independent study is to provide an opportunity for students to pursue subject matter beyond the specific course offerings found in the Olin School. Projects may be done for 1 to 6 units, but normally no more than 3 units will be granted in any one semester. For more information, please refer to the Olin School's *Undergraduate Student Handbook*.

Students may apply a maximum of 6 units of independent study in business and 6 units outside of the Olin School toward the 120-unit degree requirement.

Internship for Credit Opportunities

Olin Business School freshmen and sophomores who have a summer internship can enroll in MGT 450A for academic credit. This online course is designed to deepen a student's overall learning gained from an internship. Students enroll in this 1.5-credit course on a Pass/Fail basis. While this course will be listed on a student's academic transcript, it will not count toward the 120 units needed for graduation.

Olin Business School juniors or seniors who have completed the core requirement and one advanced elective in the appropriate major field may apply to receive credit for internship experience. Students must work under the direction of a faculty member to complete an academic paper/project. The Internship Petition Form must be submitted to the student's academic adviser by the end of the second week of the academic semester. A maximum of 6 units of internship course work may be applied toward the BSBA degree.

Management Communication Center

Olin students benefit from free, personalized coaching and practice opportunities with communication consultants that complement a range of required and elective communication courses. Consultants help students expand their ability to craft succinct, precise communications. Students develop strategies through coaching, rehearsals, web-based information, and critique sessions. Located in Simon Hall, the Center includes private consultation rooms, computer kiosks and a boardroom with an LCD screen, laptop and recording equipment. Visit <http://olin.wustl.edu/mcc> for more information.

Study Abroad

A business student has the opportunity to participate in various study abroad programs. Students may choose to (1) apply to one of the Olin School's International Internship Programs, (2) apply to participate in a semester study abroad program, or (3) apply to participate in one of the study abroad programs sponsored by the Office of International and Area Studies in the College of Arts & Sciences. Detailed information is available at <http://sa.wustl.edu> or in the BSBA Programs office.

International Internship Programs

Our International Internship Programs offer students the opportunity to combine classroom learning with an internship in Herzliya/Tel Aviv, Germany, London, Sydney or Paris. Students earn 15 units of academic credit in any of these programs by completing:

- A total of 15 units of academic credit in business or language/cultural studies.
- Full-time internship placement of approximately 10-12 weeks (in Herzliya/Tel Aviv, London, Paris, Sydney or Germany) for credit.
- A significant research project in conjunction with the internship experience.
- European Study Tour for programs in Europe, and Colloquium/Study Tour Series for programs outside of Europe, for credit.

The International Internship Programs are open to all Olin Business School juniors and seniors who have completed the equivalent of five semesters of course work (75 units) and the specific prerequisites for the particular program of study. Second majors in business also may be eligible to apply. There is a minimum GPA requirement of 3.0 in the student's overall course work and 3.0 in the student's professional course work. Eligibility requirements are subject to change.

Other Study Abroad Opportunities through Olin Business School

Olin Business School students may participate in study abroad programs at Chinese University of Hong Kong or Hong Kong University of Science and Technology in Hong Kong; Bocconi University in Milan, Italy; the University of Melbourne in Australia; ESCP Business School in Paris, France; Carlos III University of Madrid, Spain; Singapore Management University in Singapore; WHU in Vallendar, Germany; FGV in São Paulo, Brazil, or Fudan University in Shanghai, China. Students may participate in any of these programs and take course work that allows them to continue their studies toward their Olin School degree without interruption.

The Olin School also offers several summer programs lasting from two to eight weeks for 3 to 6 credits. Visit <http://sa.wustl.edu> for more information.

Israel Summer Business Academy (ISBA)

Olin Business School students may participate in the Israel Summer Business Academy (ISBA), administered by Washington University in St. Louis but open to students from all institutions. This unique opportunity, open to undergraduate students of all faiths and beliefs, allows students to study and immerse themselves in the Israeli business environment. Students will learn about entrepreneurship, innovation, and start-up consulting through course work, speakers, company visits, and consulting while earning 6 units of academic credit. ISBA

is a collaboration between Olin Business School at Washington University in St. Louis and the Interdisciplinary Center (IDC) in Herzliya, Israel. This program offers a chance for students from all kinds of backgrounds to learn firsthand about business in Israel, a country that has built itself around entrepreneurship. For more information please visit <http://sa.wustl.edu>.

Undergraduate Teaching Assistantships

In this challenging program, outstanding students are chosen to assist various professors with their course development work or research efforts. Students may conduct library research, perform computer programming, develop new learning materials for class, assist other students with their writing skills, or tutor in various areas of the curriculum.

Participation in the Undergraduate Teaching Assistantship (UTA) program is voluntary and may begin as early as the first year. As a participant, students are paid the going rate for student assistants. UTA experience also impresses company recruiters.

Academic Support Services

Academic Advising

Olin Business School provides students with expert academic advising and support. BSBA Student Services has nine academic advisers who serve as professional advisers to all undergraduate students on procedural matters, course planning, registration and other academic matters.

The Olin School Peer Ambassadors

In this program, undergraduate business students who are familiar with the university and with the Olin School's programs and policies help incoming students make a smooth transition to the university by providing informal peer advising services throughout their first year here.

Weston Career Center

To provide students with personalized career planning and job search services, Olin Business School operates its own career center in Knight and Bauer Halls. The Weston Career Center (WCC) delivers a variety of career management programs and services to Olin Business School students pursuing their BSBA, MBA, Master of Accounting, MS Customer Analytics, MS Supply Chain Management and MS Finance degrees. Services include: one-on-one advising and consultation with a functional career specialist, workshops and professional development seminars, company information sessions, mock interviews, self-assessments, résumé and cover letter writing, and networking — all the tools needed for an effective job search.

On-campus interviews take place in the Knight and Bauer Hall Interview Suite or Danforth Center throughout the academic year. Business students are encouraged to meet with the center's staff early in the school year to discuss career and professional goals. The WCC also maintains an extension office in Simon Hall for quick questions and technical support. For

more information, visit <http://olincareers.wustl.edu>, or contact the Weston Career Center by phone at (314) 935-5950 or e-mail at wcc@olin.wustl.edu.

Majors

Majors for BSBA Degree Candidates

In addition to the 42.5 core professional units (listed on the Degree Requirements (p. 154) page of this *Bulletin*), a BSBA degree candidate must complete at least 17.5 professional elective units. Students may apply these professional electives toward a specific professional major. Majors in the business curriculum are offered as an option to focus their studies in a specific field of business. All major courses must be taken in residence. Course work from an approved Washington University study abroad program will count as in-residence work. However, only one course per major may be taken through a study abroad experience.

Students may select a major from the following disciplines:

- Accounting (p. 135)
- Economics and Strategy (p. 136)
- Entrepreneurship (p. 136)
- Finance (p. 136)
- Health Care Management (p. 136)
- Leadership and Strategic Management (p. 137)
- Marketing (p. 137)
- Operations and Supply Chain Management (p. 137)

The Major in Accounting

Total units required: 15

- Accounting Core: 6 units
 - ACCT 3610 Intermediate Financial Accounting Theory I
 - ACCT 3620 Intermediate Financial Accounting II

- Accounting Elective Choices: 9 units

ACCT 464	Auditing	3
ACCT 466	Financial Statement Analysis	3
ACCT 467	Income Tax Fundamentals	3
ACCT 4680	Advanced Financial Accounting Problems	3

The Major in Economics and Strategy

Total units required: 12

- Economics and Strategy Core: 12 units

MEC 370	Game Theory for Business	3
MEC 400K	Research Analysis in Industry	3
MEC 470	Market Competition and Value Appropriation	3
MEC 471	Empirical Techniques for Industry Analysis	3

The Major in Entrepreneurship

Total units required: 15

Entrepreneurship Core: 6 units

MGT 421	Introduction to Entrepreneurship	3
MGT 424	Business Planning for New Enterprises (The Hatchery)	3

Entrepreneurship Electives: 9 units (must select 3 units from each category)

- Industry Elective Choices: (at least 3 units required)

CSE 131	Computer Science I	3
Econ 335	Money and Banking	3
FIN 549H	Special Topics: Real Estate Finance	1.5
INTL 320	Business, Innovation and Entrepreneurship in Israel	3
MEC 460	Economics of Entertainment	3
MGT 320	Olin Grand Rounds: The Business and Practice of Medicine	3
MGT 380	Business Strategy	3
MGT 440	Sports Management	1.5
MGT 500T	Social Entrepreneurship	3
MKT 465	Retail Management	3

- Experiential Elective Choices: (at least 3 units required)

MGT 450C	Venture Consulting	3
MGT 501	MANAGEMENT CENTER PRACTICUM (if an entrepreneurial project)	3
MGT 520	Taylor Community Consulting Project	1.5

MGT 550X	CEL Entrepreneur Consulting Team	3
----------	----------------------------------	---

- Skills Elective Choices: (at least 3 units required)

ACCT 466	Financial Statement Analysis	3
ARCH 376	Design Thinking for Science, Engineering, Business and the Liberal Arts	1
CSE 104	Web Development	3
CSE 330S	Rapid Prototype Development and Creative Programming	3
MEC 370	Game Theory for Business	3
MEC 380	Competitive Industry Analysis	3
MEC 470	Market Competition and Value Appropriation	3
MGT 301	Legal Environment of Business Management	3
MKT 378	Marketing Research	3
MKT 400F	Brand Management	3
MKT 478	New Product Management	3
OB 461	Negotiation	3

The Major in Finance

Total units required: 12

Finance Core: 9 units

FIN 441	Investments	3
FIN 448	Advanced Financial Management	3
FIN 451	Options, Futures and Derivative Securities	3

Finance Elective Choices: 3 units

FIN 400G	Financial Markets and Instruments	3
FIN 400I	Mergers and Acquisitions	1.5
FIN 428	Investments Praxis	3
FIN 443	International Finance	3
FIN 447	Information, Intermediation and Financial Markets	3
FIN 470A	Research Methods in Finance	3

The Major in Health Care Management

Total units required: 15

Health Care Management Core: 12 units

MGT 320	Olin Grand Rounds: The Business and Practice of Medicine	3
MGT 321	Health Economics and Policy	3
MGT 322	Health Care Management	3
MGT 420	Research in Health Care Management	3

Health Care Management Elective Choices: 3 units

Anthro 260	Topics in Health and Community	1
Anthro 3283	Introduction to Global Health	3

Anthro 333	Culture and Health	3
Anthro 3621	Anthropology of Human Birth	3
Anthro 3626	Adventures in Nosology: The Nature and Meaning of Disease	3
Anthro 3875	Pharmaceutical Personhood	3
Anthro 4134	The AIDS Epidemic: Inequalities, Ethnography and Ethics	3
Anthro 4883	The Political Economy of Health	3
Biol 224	Infectious Diseases: Past, Present and Future	2
Biol 2651	MedPrep Program — Experience in Life Sciences	1
Biol 2652	Pediatric Emergency Medicine Research Associates Program: Experiences in Life Sciences	3
Biol 3183	History of Genetics in the 20th Century	3
Biol 348	Emerging Infectious Diseases	2
Biol 472	Behavioral Ecology	4
WGSS 316	Contemporary Women's Health	3
WGSS 343	Understanding the Evidence: Provocative Topics of Contemporary Women's Health and Reproduction	3

The Major in Leadership and Strategic Management

Total units required: 12 units

Leadership Group A Elective Choices: (at least 3 units from Group A required)

MGT 450V	Defining Moments: Lessons in Leadership and Character From the Top	1.5
OB 400C	Women in Leadership	1.5
OB 400D	Thinking Creatively and Leading Creative Teams	1.5
OB 461	Negotiation	3
OB 462	Leadership in Organizations	3

Leadership Group B Elective Choices: (at least 3 units from Group B required)

MEC 380	Competitive Industry Analysis	3
MGT 380	Business Strategy	3
MGT 450R	Business and Government: Understanding and Influencing the Regulatory Environment	1.5
MGT 460G	Critical Thinking and Complex Problem Solving for Business	1.5
MGT 460H	Corporate and Global Strategy	3

Leadership Group C Elective Choices: (recommended for HR/HR Consulting)

HRM 325A	Personnel/Human Resources Management	3
----------	--------------------------------------	---

MEC 391	Economics of Human Resource Management	3
---------	--	---

The Major in Marketing

Total units required: 12

Marketing Core: 3 units

MKT 378	Marketing Research	3
---------	--------------------	---

Marketing Electives: 9 units

- Group A Marketing Elective Choices: (at least 6 units from Group A required)

MKT 377	Consumer Behavior	3
MKT 400F	Brand Management	3
MKT 400G	Digital Marketing and Customer Analytics	3
MKT 470E	Pricing Strategies	3
MKT 478	New Product Management	3
MKT 480	Marketing Strategy	3

- Group B Marketing Elective Choices:

MKT 465	Retail Management	3
MKT 477	International Marketing	3
or MKT 477S	International Marketing Sydney	

The Major in Operations and Supply Chain Management

Total units required: 12 units

Group A OSCM Elective Choices (at least 6 units from Group A required)

OSCM 400C	Analytics for Operational Excellence	3
OSCM 400D	Supply Chain Management	3
OSCM 458	Operations Planning and Control	3

Group B OSCM Elective Choices

MEC 380	Competitive Industry Analysis	3
MGT 380	Business Strategy	3
MGT 460H	Corporate and Global Strategy	3
MKT 378	Marketing Research	3
MKT 465	Retail Management	3

Class of 2019 Degree Requirements:

For a comprehensive view of our degree program, please review the requirements on our website.

Academic Options for Non-BSBA Degree Students

A student in another undergraduate division of the university may choose to complete a second major or a minor in a business discipline.

Second Majors

Any non-BSBA degree student may earn a second major in a specific major discipline offered through Olin Business School. This opportunity allows students to combine their academic interests between two schools. If students wish to pursue a second major in business, they are required to follow the degree requirements for their primary school/major along with a set of core business requirements and 12–15 units of professional electives.

Core Business Requirements:

ACCT 2610	Principles of Financial Accounting	3
ACCT 2620	Principles of Managerial Accounting	3
Math 132	Calculus II	3
MGT 100 or MGT 380 or MEC 380	Individual in a Managerial Environment Business Strategy Competitive Industry Analysis	3
MEC 290 or Econ 4011	Microeconomics Intermediate Microeconomic Theory	3
MEC 292 or Econ 1021	Global Economy Introduction to Macroeconomics	3
QBA 120	Managerial Statistics I *	3
QBA 121 or Econ 413 or Math 439	Managerial Statistics II Introduction to Econometrics Linear Statistical Models	3
Total units		24

*Second majors may substitute Math 2200, Math 3200, ESE 326 or Pol Sci 363 for QBA 120.

Students may select a second major from the following disciplines:

- Accounting (p. 138)
- Economics and Strategy (p. 138)
- Entrepreneurship (p. 138)
- Finance (p. 139)
- Health Care Management (p. 139)
- Leadership and Strategic Management (p. 139)
- Marketing (p. 140)
- Operations and Supply Chain Management (p. 140)

Regulations:

1. Second majors are required to complete a minimum of 24 business units through Olin School.
2. All courses for any business major must be taken for a grade.
3. An overall 2.0 average must be achieved in course work taken as part of the business major.
4. All major courses must be taken in residence. Course work from an approved Washington University study abroad

program will be considered as satisfying this residency policy. However, only one course per major may be taken through a study abroad experience.

5. Students may not count one course toward two majors.
6. University College courses will not count toward any business major.
7. AP credit for Math 2200 will not serve as a substitute for our QBA 120 requirement. All second majors must complete QBA 120.
8. Students must declare their second major online through Webstac by the end of their junior year. A second major will not be awarded to a student unless proper declaration is made.

Non-BSBA degree students may choose to pursue one major from the areas below:

The Second Major in Accounting

Total units required: 15

Accounting Core: 6 units

ACCT 3610 Intermediate Financial Accounting Theory I

ACCT 3620 Intermediate Financial Accounting II

Accounting Elective Choices: 9 units

ACCT 464	Auditing	3
ACCT 466	Financial Statement Analysis	3
ACCT 467	Income Tax Fundamentals	3
ACCT 4680	Advanced Financial Accounting Problems	3

The Second Major in Economics and Strategy

Total units required: 12

Economics & Strategy Core: 12 units

MEC 370	Game Theory for Business	3
MEC 400K	Research Analysis in Industry	3
MEC 470	Market Competition and Value Appropriation	3
MEC 471	Empirical Techniques for Industry Analysis	3

The Second Major in Entrepreneurship

Total units required: 12

Entrepreneurship Core: 6 units

MGT 421	Introduction to Entrepreneurship	3
MGT 424	Business Planning for New Enterprises (The Hatchery)	3

Entrepreneurship Electives: Choose at least one course from two of the three following tracks for a total of 6 elective units.

• Industry Elective Choices:

CSE 131	Computer Science I	3
Econ 335	Money and Banking	3
FIN 340	Capital Markets and Financial Management	3
INTL 320	Business, Innovation and Entrepreneurship in Israel	3
MEC 460	Economics of Entertainment	3
MGT 320	Olin Grand Rounds: The Business and Practice of Medicine	3
MGT 380	Business Strategy	3
MGT 440	Sports Management	1.5
MKT 370	Principles of Marketing	3
MKT 465	Retail Management	3

• Experiential Elective Choices:

MGT 450C	Venture Consulting	3
MGT 550X	CEL Entrepreneur Consulting Team	3

• Skills Elective Choices:

ACCT 466	Financial Statement Analysis	3
ARCH 376	Design Thinking for Science, Engineering, Business and the Liberal Arts	1
CSE 104	Web Development	3
CSE 330S	Rapid Prototype Development and Creative Programming	3
MEC 370	Game Theory for Business	3
MEC 380	Competitive Industry Analysis	3
MEC 470	Market Competition and Value Appropriation	3
MGT 301	Legal Environment of Business Management	3
MKT 378	Marketing Research	3
MKT 400F	Brand Management	3
MKT 478	New Product Management	3
OB 461	Negotiation	3

The Second Major in Finance

Total units required: 15

Finance Core: 12 units

FIN 340	Capital Markets and Financial Management	3
FIN 441	Investments	3
FIN 448	Advanced Financial Management	3
FIN 451	Options, Futures and Derivative Securities	3

Finance Elective Choices: 3 units

FIN 400G	Financial Markets and Instruments	3
FIN 400I	Mergers and Acquisitions	1.5
FIN 428	Investments Praxis	3
FIN 443	International Finance	3

FIN 447	Information, Intermediation and Financial Markets	3
FIN 470A	Research Methods in Finance	3

The Second Major in Health Care Management

Total units required: 15

Health Care Management Core: 12 units

MGT 320	Olin Grand Rounds: The Business and Practice of Medicine	3
MGT 321	Health Economics and Policy	3
MGT 322	Health Care Management	3
MGT 420	Research in Health Care Management	3

Health Care Management Elective Choices: 3 units

Anthro 260	Topics in Health and Community	1
Anthro 3283	Introduction to Global Health	3
Anthro 333	Culture and Health	3
Anthro 3621	Anthropology of Human Birth	3
Anthro 3626	Adventures in Nosology: The Nature and Meaning of Disease	3
Anthro 3875	Pharmaceutical Personhood	3
Anthro 4134	The AIDS Epidemic: Inequalities, Ethnography and Ethics	3
Anthro 4883	The Political Economy of Health	3
Biol 224	Infectious Diseases: Past, Present and Future	2
Biol 2651	MedPrep Program — Experience in Life Sciences	1
Biol 2652	Pediatric Emergency Medicine Research Associates Program: Experiences in Life Sciences	3
Biol 3183	History of Genetics in the 20th Century	3
Biol 348	Emerging Infectious Diseases	2
Biol 472	Behavioral Ecology	4
WGSS 316	Contemporary Women's Health	3
WGSS 343	Understanding the Evidence: Provocative Topics of Contemporary Women's Health and Reproduction	3

The Second Major in Leadership and Strategic Management

Total units required: 15

Leadership Core Requirement: 3 units

OB 360	Organization Behavior Within the Firm	3
--------	---------------------------------------	---

Leadership Electives: 12 units

- Leadership Group A Elective Choices: (choose at least 3 units from Group A)

MGT 450V	Defining Moments: Lessons in Leadership and Character From the Top	1.5
OB 400C	Women in Leadership	1.5
OB 400D	Thinking Creatively and Leading Creative Teams	1.5
OB 461	Negotiation	3
OB 462	Leadership in Organizations	3

- Leadership Group B Elective Choices: (choose at least 3 units from Group B)

MEC 380	Competitive Industry Analysis	3
MGT 380	Business Strategy	3
MGT 450R	Business and Government: Understanding and Influencing the Regulatory Environment	1.5
MGT 460G	Critical Thinking and Complex Problem Solving for Business	1.5
MGT 460H	Corporate and Global Strategy	3

- Group C Leadership Elective Choices: (recommended for HR/HR Consulting)

HRM 325A	Personnel/Human Resources Management	3
MEC 391	Economics of Human Resource Management	3

The Second Major in Marketing

Total units required: 15

Marketing Core: 6 units

MKT 370	Principles of Marketing	3
MKT 378	Marketing Research	3

Marketing Electives: 9 units

- Group A Elective Choices: (at least 6 units from Group A required)

MKT 377	Consumer Behavior	3
MKT 400F	Brand Management	3
MKT 400G	Digital Marketing and Customer Analytics	3
MKT 470E	Pricing Strategies	3
MKT 478	New Product Management	3
MKT 480	Marketing Strategy	3

- Group B Elective Choices:

MKT 465	Retail Management	3
MKT 477	International Marketing	3
or MKT 477S	International Marketing Sydney	

The Second Major in Operations and Supply Chain Management

Total units required: 15 units

OSCM Core: 6 units

QBA 200A	Analytics and Modeling for Business Decisions	3
OSCM 356	Operations Management	3

OSCM Electives: 9 units minimum with at least 6 units from Group A

- OSCM Group A Elective Choices: (at least 6 units required)

OSCM 400C	Analytics for Operational Excellence	3
OSCM 400D	Supply Chain Management	3
OSCM 458	Operations Planning and Control	3

- OSCM Group B Elective Choices:

MEC 380	Competitive Industry Analysis	3
MGT 380	Business Strategy	3
MGT 460H	Corporate and Global Strategy	3
MKT 378	Marketing Research	3
MKT 465	Retail Management	3

Minors

Minors for Non-BSBA Degree Candidates

Non-BSBA degree students are eligible to pursue a minor in one of the specific fields of business listed below:

- Accounting (p. 141)
- Business Economics (p. 141)
- The Business of Sports (p. 141)*
- Entrepreneurship (p. 141)
- Finance (p. 141)
- General Business (p. 141)
- Health Care Management (p. 142)
- International Business (p. 142)*
- Leadership (p. 142)
- Marketing (p. 142)
- Operations and Supply Chain Management (p. 142)
- Strategy (p. 143)

*Any undergraduate day division student (which includes BSBA students) can earn the business of sports or the international business minor as part of their undergraduate degree.

Prerequisites for the Business Minor:

The following prerequisites are required for all minors:

Math 132 Calculus II

Math 2200 Elementary Probability and Statistics or
Math 3200 Elementary to Intermediate Statistics and Data
Analysis or
ESE 326 Probability and Statistics for Engineering or
Pol Sci 363 Quantitative Political Methodology or
QBA 120 Managerial Statistics I*

Econ 1011 Introduction to Microeconomics or MEC 290
Microeconomics**

QBA 121 is also a prerequisite for minors in marketing,
finance, and general business.

ACCT 2610 is a prerequisite for the OSCM minor.

*AP Credit for Math 2200 will satisfy this prerequisite. This
exemption applies only to non-BSBA students earning a
business minor.

**Managerial economics minors and strategy minors must
take MEC 290 as Econ 1011 is not a prerequisite for
MEC 370.

The Minor in Accounting

Total units required: 15

Required courses: Five courses including:

ACCT 2610	Principles of Financial Accounting	3
ACCT 2620	Principles of Managerial Accounting	3
ACCT 3610	Intermediate Financial Accounting Theory I	3

Plus two chosen from the following:

ACCT 3620	Intermediate Financial Accounting II	3
ACCT 464	Auditing	3
ACCT 466	Financial Statement Analysis	3
ACCT 467	Income Tax Fundamentals	3
ACCT 4680	Advanced Financial Accounting Problems	3

The Minor in Business Economics

Total units required: 15

Required courses: Five courses including:

MEC 290	Microeconomics	3
MEC 370	Game Theory for Business	3
MEC 400K	Research Analysis in Industry	3
MEC 470	Market Competition and Value Appropriation	3
MEC 471	Empirical Techniques for Industry Analysis	3

The Minor in the Business of Sports

Total required units: 15

Required courses: Five courses including:

MGT 100	Individual in a Managerial Environment	3
---------	--	---

MGT 440	Sports Management	1.5
MGT 460F	Contemporary Issues in Sports Business	1.5
MGT 450G	The Business of Sports	3
MKT 370	Principles of Marketing	3

Electives: At least 3 credits from the following:

FIN 448	Advanced Financial Management	3
MEC 460	Economics of Entertainment	3
MEC 471	Empirical Techniques for Industry Analysis	3
MKT 378	Marketing Research	3
MKT 400F	Brand Management	3

For a non-BSBA student minoring in the business of sports,
15 additional units would be required to earn two business
minors, as double counting is not allowed.

For a BSBA minoring in the business of sports:

- Student may not double count more than one course (3
units) toward his or her business major.
- Student must take QBA 120 since AP credit for Math 2200 is
not a substitute for QBA 120.

The Minor in Entrepreneurship

Total units required: 15

Required courses: Five courses including:

ACCT 2610	Principles of Financial Accounting	3
MGT 100	Individual in a Managerial Environment	3
MGT 301	Legal Environment of Business Management	3
MGT 421	Introduction to Entrepreneurship	3
MGT 424	Business Planning for New Enterprises (The Hatchery)	3

The Minor in Finance

Total units required: 15

Required courses: Five courses including:

ACCT 2610	Principles of Financial Accounting	3
FIN 340	Capital Markets and Financial Management	3
FIN 441	Investments	3
FIN 448	Advanced Financial Management	3

Plus a 3-credit Finance elective.

The Minor in General Business

Total units required: 15

Required courses: Five courses including:

ACCT 2610	Principles of Financial Accounting	3
-----------	------------------------------------	---

Choose one course from the following:

MEC 380	Competitive Industry Analysis	3
MGT 380	Business Strategy	3

Choose three courses from the following options:

MKT 370	Principles of Marketing	3
FIN 340	Capital Markets and Financial Management	3
OSCM 356	Operations Management	3
HRM 320A or OB 360	Managing People in Organizations Organization Behavior Within the Firm	3

The Minor in Health Care Management

Total units required: 15

Required courses: Five courses including:

MGT 100	Individual in a Managerial Environment	3
MGT 320	Olin Grand Rounds: The Business and Practice of Medicine	3
MGT 321	Health Economics and Policy	3
MGT 322	Health Care Management	3
MGT 420	Research in Health Care Management	3

The Minor in International Business

Total units required: 15

Required courses: Five courses including:

MGT 100	Individual in a Managerial Environment	3
MGT 308	Introduction to International Business	3

A course taken on an approved immersive overseas experience

Elective course choices: at least 3 units from the following:

FIN 400G	Financial Markets and Instruments	3
FIN 443	International Finance	3
INTL 320	Business, Innovation and Entrepreneurship in Israel	3
MGT 405S	International Business Environment — Sydney	3
MGT 418	International Business: A Euro Perspective	3
MGT 450C	Venture Consulting	3
MGT 460H	Corporate and Global Strategy	3
MKT 477 or MKT 477S	International Marketing International Marketing Sydney	3

Interdisciplinary Elective: at least 3 units with course approval from the Director of International Programs

For a BSBA minoring in international business:

- Student may not double count more than one course (3 units) toward his or her business major.
- Student must take QBA 120 since AP credit for Math 2200 is not a substitute for QBA 120.

The Minor in Leadership

Total units required: 15

Required courses: Five courses including:

MGT 100	Individual in a Managerial Environment	3
OB 360	Organization Behavior Within the Firm	3
OB 461	Negotiation	3
OB 462	Leadership in Organizations	3

Plus 3 units from the following:

HRM 320A	Managing People in Organizations	3
MGT 201	Management Communication	3
MGT 450V	Defining Moments: Lessons in Leadership and Character From the Top	1.5
OB 400C	Women in Leadership	1.5
OB 400D	Thinking Creatively and Leading Creative Teams	1.5

The Minor in Marketing

Total units required: 15

Required courses: Five courses including:

MKT 370	Principles of Marketing	3
MKT 378	Marketing Research	3

Plus three courses chosen from the following:

MKT 377	Consumer Behavior	3
MKT 400F	Brand Management	3
MKT 400G	Digital Marketing and Customer Analytics	3
MKT 465	Retail Management	3
MKT 470E	Pricing Strategies	3
MKT 477 or MKT 477S	International Marketing International Marketing Sydney	3
MKT 478	New Product Management	3
MKT 480	Marketing Strategy	3

The Minor in Operations and Supply Chain Management

Total units required: 15

Required courses: Five courses including:

QBA 121	Managerial Statistics II	3
QBA 200A	Analytics and Modeling for Business Decisions	3

OSCM 356	Operations Management	3
OSCM Electives: at least two courses from the following:		
OSCM 400C	Analytics for Operational Excellence	3
OSCM 400D	Supply Chain Management	3
OSCM 458	Operations Planning and Control	3

The Minor in Strategy

Total units required: 15

Required courses: Three courses including:

MGT 100	Individual in a Managerial Environment	3
MGT 380	Business Strategy	3
MEC 380	Competitive Industry Analysis	3

Strategy Electives: at least two courses from the following:

MGT 450R	Business and Government: Understanding and Influencing the Regulatory Environment	1.5
MGT 460G	Critical Thinking and Complex Problem Solving for Business	1.5
MGT 460H	Corporate and Global Strategy	3
OB 462	Leadership in Organizations	3

Fulfilling the Business Minor

All non-BSBA students pursuing any business minor must:

- declare their minor online through Webstac no later than the end of their sixth semester;
- satisfy all prerequisites;
- take all five required courses at Olin Business School. It is preferred that prerequisites be completed at Washington University. Courses taken in University College or at another university do not satisfy any of the five required courses;
- take all five required courses for grades, i.e., no pass/fail;
- achieve no less than a 2.0 GPA average in all business minor course work;
- receive permission from their academic adviser and the Olin Business School to declare a second business minor.

Courses

Courses include:

- B50 ACCT (Accounting) (p. 143)
- B52, B62 FIN (Finance) (p. 144)
- B56 HRM (Human Resources Management) (p. 145)
- B99 INTL (International Business) (p. 145)
- B53, B63 MGT (Management) (p. 146)
- B54 MEC (Managerial Economics) (p. 150)
- B55 MKT (Marketing) (p. 151)
- B58 OSCM (Operations and Supply Chain Management) (p. 153)

- B66 OB (Organizational Behavior) (p. 153)
- B59 QBA (Quantitative Business Analysis) (p. 154)

Accounting

Visit <https://courses.wustl.edu> to view semester offerings for B50 ACCT.

B50 ACCT 2610 Principles of Financial Accounting

Provides an overview of the financial accounting reporting process, with a primary focus on the analysis of economic events and their effect on the major financial statements (balance sheet, income statement and statement of cash flows). Prerequisite: second semester freshman standing.

Credit 3 units.

B50 ACCT 2620 Principles of Managerial Accounting

Emphasis on the accumulation and analysis of data for internal decision makers. Introduces the vocabulary and mechanics of managerial accounting and accounting techniques used by internal managers in planning, directing, controlling and decision-making activities within their organizations. Prerequisite: ACCT 2610.

Credit 3 units.

B50 ACCT 3610 Intermediate Financial Accounting Theory I

The first of a two-course sequence in corporate financial reporting. Examines the environment of financial accounting, the standards-setting process and the conceptual framework that underlies financial accounting in the United States. Topics: review accounting basics, events and transactions that impact financial statements, comprehension of corporate financial reports, and examination of political and economic factors influencing accounting policy. Prerequisite: ACCT 2610.

Credit 3 units.

B50 ACCT 3620 Intermediate Financial Accounting II

Continuation of ACCT 3610. Focus on the accounting and reporting of various stakeholders' claims against the corporate entity. Claims of shareholders, long-term creditors, employees and governmental bodies are examined. An in-depth understanding of applicable generally accepted accounting principles is developed by examining the strengths and weaknesses of these principles and alternative accounting practices. Prerequisite: ACCT 3610.

Credit 3 units.

B50 ACCT 464 Auditing

This course deals with the professional service industry of auditing. The auditing industry provides the service of objectively obtaining, evaluating, and communicating evidence regarding managerial assertions about economic events. Specifically, auditing ascertains the degree of correspondence between managerial assertions and established criteria. The course is organized around the basic categories of: (1) the economic role of external corporate auditing in securities markets, (2) the composition of the firms in the auditing industry, (3) the regulatory environment of auditing, (4) litigation issues facing the accounting/auditing industry, and (5) the requirements for conducting audits. Topics included in the last area include a consideration of the scope and application of Generally Accepted

Auditing Standards (GAAS) and the general technology of auditing which are some general auditing topics typically covered on the CPA exam. Grading is based on homework, a group-based project, and two exams. Prerequisite: ACCT 3620. Same as B60 564
Credit 3 units.

B50 ACCT 466 Financial Statement Analysis

Designed to enhance students' understanding of the process of evaluating financial statement information. Requires a basic familiarity with financial accounting and the assumptions underlying measurements reported in financial statements, an understanding of the economic and regulatory forces underlying corporate disclosure of financial statement information and their effects on financial statement information, and familiarity with data sources and analytical tools to extract and evaluate this data. Objectives are to develop familiarity with this type of analysis and to gain an appreciation for its limitations. Topics: profitability and risk analysis, credit risk models, forecasting and valuation. Prerequisite: ACCT 3610.
Credit 3 units.

B50 ACCT 467 Income Tax Fundamentals

This course provides an introduction to federal income taxation with primary emphasis on the tax implications of business transactions. The objectives of the course are to develop a basic understanding of federal income tax laws and to provide a framework for integrating income tax planning into the decision-making process. The course is of value to all students who need to recognize the important tax consequences of many common business transactions and is not intended solely for accounting majors or those students interested in becoming tax specialists. Prerequisite: ACCT 2610.
Same as B60 567
Credit 3 units.

B50 ACCT 4680 Advanced Financial Accounting Problems

Examination of the nature and financial reporting aspects of various business transactions: corporate acquisitions, mergers and the formation of other strategic alliances. Topics: accounting for business combinations and consolidations, joint ventures and foreign currency translation, accounting and financial reporting issues facing government entities. Prerequisite: ACCT 3620.
Credit 3 units.

Finance

Visit <https://courses.wustl.edu> to view semester offerings for B52 FIN. For B62 FIN (p. 145), please see the course listed below.

B52 FIN 340 Capital Markets and Financial Management

Students learn how the decisions of a company affect shareholder value and what decisions can increase it. To understand the perspectives of shareholders, we study basic principles of investing: time value of money, valuation of debt and equity securities, discounted cash flow as a foundation for stock prices, the impact of diversification and leverage on portfolio risk, the relationship between risk and expected return in securities markets, and capital market efficiency. We use these principles to analyze capital investment decisions by estimating cash flows and discounting them at the appropriate cost of capital. We also study how shareholder value is affected

by a firm's financing decisions, such as the choice of using debt or equity capital. Prerequisites: Math 132, ACCT 2610, MEC 290 or Econ 1011, and completion or concurrent enrollment in QBA 121.

Credit 3 units. EN: S

B52 FIN 343 Personal Finance

Examines issues underlying decision making regarding personal investments. Topics: present value concepts, financial markets and instruments, portfolio theory, bond and equity valuations, mutual funds, mortgages, taxes and personal financial planning. Intended for nonbusiness students who are not second majors in Finance. Students may not receive credit for both this course and Fin 340. BSBA students may take this course but it will not count toward their degree requirements. Prerequisite: junior standing.
Credit 3 units.

B52 FIN 400I Mergers and Acquisitions

This course focuses on identifying ways to increase firm value through mergers and acquisitions (M&A) and corporate restructurings. We survey the drivers of success (and failure) in M&A transactions and develop skills in the design and evaluation of such transactions. Specific topics we address in the course are the valuation of companies, the motivations underlying mergers, structuring of transactions, deal tactics and strategy, leveraged buyouts, corporate restructuring through divestitures, spin-offs, carve-outs and acquisitions of private firms. We also delve into issues of law, accounting and tax and how they affect the outcome of M&A transactions. Why is M&A an important component of any corporate finance professional toolset? It lays the foundation for effective work in a wide range of fields including corporate development, investment banking, consulting and strategy advising senior management. The presentations, class discussions, case analyses and readings are designed to help students master these important career skills. Prerequisites: FIN 340 and FIN 448.
Credit 1.5 units.

B52 FIN 428 Investments Praxis

Students serve as managers of a portfolio, the Investment Praxis Fund, which is owned by the university. Students analyze investment opportunities in various industries and present recommendations to the class for possible purchases or sales of stocks, consistent with the style and objectives of the fund. Valuation tools, financial statement analysis and investment techniques are emphasized as part of a thorough analysis. The course focus is on developing and implementing investment ideas. Prerequisites: FIN 441, and FIN 448 or FIN 451.
Credit 3 units.

B52 FIN 441 Investments

Introduces the theory and practice of investments from the point of view of an investment/portfolio manager. We begin with a review of asset classes, financial history and preferences for risk. Next, we have a brief review of statistics and finance, and we review matrix algebra. We then apply these tools to examine the trade-off between risk and return and to develop and implement Modern Portfolio Theory. The major topics covered include the Capital Asset Pricing Model (CAPM), Markowitz optimization, performance evaluation, market efficiency, and Arbitrage Pricing Theory (APT). The last portion of the course is devoted to fixed income securities including interest rates, bond valuation and bond immunization. Prerequisites: FIN 340, QBA 120, QBA 121,

Math 132, and either MEC 290 or Econ 1011, and completion or concurrent enrollment QBA 200A.
Credit 3 units.

B52 FIN 443 International Finance

Provides a framework for making financial decisions in an international context. Topics include: relevant features of financial markets and instruments (such as foreign exchange, currency futures and options, swaps); exchange rates; corporate risk management; international investing and capital budgeting issues. Prerequisites: FIN 340 and FIN 448.
Credit 3 units. BU: IS

B52 FIN 447 Information, Intermediation and Financial Markets

Examines the organization and function of financial markets from the corporate perspective with an emphasis on investment banking activities. Topics: design, issuance and trading of corporate securities, risk management and corporate control transactions. Develop familiarization with current practices while building a conceptual framework for understanding and anticipating change in the institutions that make up the financial markets. Prerequisites: FIN 340 and FIN 451 are required. FIN 441 and FIN 448 recommended.
Credit 3 units.

B52 FIN 448 Advanced Financial Management

Advanced study of corporate financial management. A major focus is the relationship between the internal decisions of the corporation and the valuation of the firm in the capital market. Topics: capital budgeting systems, capital structure, debt policy, cash and working capital management, short- and long-term financial planning. Prerequisite: FIN 340 and completion or concurrent enrollment QBA 200A.
Credit 3 units.

B52 FIN 451 Options, Futures and Derivative Securities

Examines the theory and practical application of derivative securities such as futures, options and swaps. Central to the theory of derivative security pricing is arbitrage and payoff replication. In practice, derivative securities provide a principal route to manage and, in particular, hedge financial risk. Futures, options and swaps on different types of underlying assets are examined with emphasis on pricing and application. Prerequisite: FIN 340.
Credit 3 units.

B52 FIN 470A Research Methods in Finance

The course is designed to prepare students for independent research in finance by exploring methods and techniques in a manner that allows the students to implement them correctly and efficiently. The curriculum emphasizes practical applications of empirical methods used in financial research and how to implement them. Students in the course learn empirical methods in corporate finance and asset pricing; obtain basic knowledge and familiarity of the databases used in common finance research; get exposure to recent research in finance which applies the methods covered; and learn how to implement the methods covered using relevant programming languages.
Same as FIN 560A
Credit 3 units.

B62 FIN 549H Special Topics: Real Estate Finance

This course provides a broad introduction to real estate finance and investments. Topics include both equity and debt. We begin with an overview of real estate markets in the United States. On the equity side students are introduced to the fundamentals of real estate financial analysis, including pro forma analysis and cash flow models, and elements of mortgage financing and taxation. Ownership structures, including individual, corporate, partnerships and REITS also are covered. On the debt side, we examine a number of financing tools in the context of the evolution of the secondary mortgage market, both residential and commercial. Those wishing to pursue more advanced topics in real estate finance could follow this course with Fixed Income and Mortgage-Backed Securities.
Credit 1.5 units.

Human Resources Management

Visit <https://courses.wustl.edu> to view semester offerings for B56 HRM.

B56 HRM 320A Managing People in Organizations

Managerial and behavioral concepts as applied to the management and supervision of people in organizational settings. Emphasis is placed on integrating insights from organizational behavior and the behavioral sciences with traditional and current concepts and practices of management and the managerial process. Case method of instruction is used for applications of concepts and development of decision-making skills. Prerequisite: junior standing.
Credit 3 units.

B56 HRM 325A Personnel/Human Resources Management

Emphasis on development of attitudes and skills of managers and supervisors in solving human problems and in building and maintaining effective employer-employee relations. Major topic areas include: selection and placement, training, and compensation. Other topics include legal aspects of employment policies, labor relations, and other aspects of human resources management. Prerequisite: junior standing.
Credit 3 units.

International Business

Visit <https://courses.wustl.edu> to view semester offerings for B99 INTL.

B99 INTL 300A Planning for International Learning

A mini-B course required of all students participating in Olin semester abroad programs that focuses on planning, assessment, the theory of global competency, cross-cultural communication skills, the structure of a research paper, and other pre-departure information that enhance the student learning experience while abroad. Prerequisite: Permission of instructor.
Credit 1 unit.

B99 INTL 300B Applying International Experiences

A mini-B course required of all students who participated in an Olin semester abroad program that includes a research symposium to showcase work from abroad, and which focuses on reentry issues, post-program assessment, how to articulate transferable skills, and other post-departure information that allow returnees to translate their abroad experiences into the working world. Prerequisite: Permission of instructor.

Credit 0.5 units.

B99 INTL 320 Business, Innovation and Entrepreneurship in Israel

Israel is an innovation and entrepreneurial hub with more listings on the NASDAQ than any country other than the U.S., more patents per capita and more entrepreneurial events occurring in Israel in both the commercial and social arena than anywhere else in the world. Students learn about the Israeli economy, different industries, Israeli culture and politics along with the critical business challenges and opportunities that face Israel. This course includes a required immersion to Israel during spring break and contains an additional lab fee for the immersion.

Credit 3 units.

B99 INTL 420 Business Research Internship

This is the capstone course for overseas internship programs where students learn to apply rigorous statistical and analytical approaches to research questions in business, but not limited to questions relating to marketing, management, finance and economics, operations and policy. Students identify a research topic and present this topic to faculty supervisors for approval. The goal is to capitalize on the practical knowledge gained while interning abroad and apply that to a research question in the area in which a student is interning. Students are required to review the current literature on their topic, formulate their own research questions, identify potential data sources they can use to address these questions, and make recommendations to add to the body of knowledge on their chosen subject. Prerequisite: admission to one of Olin's International Internship Programs.

Credit variable, maximum 12 units.

Management

Visit <https://courses.wustl.edu> to view semester offerings for B53 MGT. For B63 MGT (p. 150), please see the courses listed below.

B53 MGT 100 Individual in a Managerial Environment

An introduction to the foundations of business. The course covers four major themes: (1) how markets work; (2) motivating and managing people; (3) business strategy and firm performance; (4) ethics and corporate social responsibility. In the fall semester, MGT 100 is only open to incoming freshmen, and students must be concurrently enrolled in MGT 150A. Spring semester enrollments are open to any freshman and sophomore.

Credit 3 units. EN: S

B53 MGT 150A Foundations of Business

Provides first-semester business students with an introduction to each of the functional areas of business as well as the entrepreneurial function. As they work to design their own enterprise, students build skills in teamwork, communication, critical thinking, and an understanding of the complex interplay

of business functions. Prerequisites: In the fall semester, MGT 150A is only open to incoming business freshmen, and students must be concurrently enrolled in MGT 100.

Credit 2 units.

B53 MGT 200A Business Fundamentals and Professional Competencies for Non-Business Students

This course is intended to help successfully position arts and sciences, engineering, and design majors for careers in organizations such as nonprofits, entrepreneurial ventures, and corporations, among others. Students learn key technical and professional skills that are valued and often required by employers. Topics addressed include working in teams, data-driven decision making, financial and business analysis, concepts for organizational strategy, professional communication, and career strategies. The course uses a combination of lectures, exercises, projects and cases to introduce participants to these topics. The class is designed for Washington University undergraduates in Arts & Sciences, Engineering, and Design and Visual Arts who are preparing for internships or jobs. Recommended for sophomores and juniors. Business students cannot receive credit.

Credit 3 units.

B53 MGT 201 Management Communication

Managers who write and speak effectively excel in business leadership. Persuasive and authentic communication is not only useful in advancing a business career; business employers also consider communication skills to be the most important attribute in people they hire. Effective communication involves more than mastering technical writing and presentation skills. Successful communicators use critical thinking to assess business scenarios and the audience who will hear or read a message; they craft communication in order to attain targeted results. This course gives students the opportunity to become more polished communicators as they work toward the following goals: applying rhetorical principles to management communication; using critical thinking to analyze the audience, the organizational environment and problems before choosing communication strategies; implementing principles of plain language and effective design; collaborating with colleagues to create effective group projects; representing a company or product in a "crisis communication" press conference. Priority for enrollment is given to BSBA students. CBTL course.

Credit 3 units.

B53 MGT 260 Building Your Career Foundation — Techniques & Strategies

MGT 260 is designed to introduce students to topics integral to their career development. The course takes an integrated approach with each session building on the previous class material. Lectures and class activities look at the career planning process through discussions on self exploration and assessment, industry/company/job research, writing strong resumes and other business communication, networking, interviewing skills and techniques for getting internships and jobs. Expected enrollment is fall of sophomore year. This is a requirement for all BSBA degree students.

Credit 1.5 units.

B53 MGT 301 Legal Environment of Business Management

Surveys the various areas of law that make up the legal environment of business. Develops a basic understanding of law as it relates to business, with traditional emphasis on private

law and business transactions. This study of the micro law of business reviews the detailed substantive rules in the areas of contracts, sales, product liability, agency, corporations and partnership. In addition, a summary review of contemporary legal problems such as insider trading, discrimination in employment, sexual harassment and ethics may be discussed, if time permits. Case studies are analyzed in order to give the student an understanding of how various laws apply to actual situations. Prerequisite: sophomore standing. Credit 3 units.

B53 MGT 308 Introduction to International Business

Focus on the aspects of management of a business enterprise that are necessary to compete in the global marketplace. The course begins with a survey of the environmental context in which international companies operate (economic systems and cultural factors). This is followed by a review of International Trade Theory and Economics. This forms a basis for concentration in the second half of the course on strategies and structure for global operations. The course deals with the situations in Europe, Japan, Latin America and China through case studies and discussion of current topics and their relation to the fundamental aspects of global business management. Prerequisite: junior standing or permission of instructor. Credit 3 units. BU: IS

B53 MGT 320 Olin Grand Rounds: The Business and Practice of Medicine

Grand rounds in medical schools are a forum for presenting new and challenging clinical problems and cases. The goal of Olin Grand Rounds is to focus on the challenges and solutions facing the business of medicine. The course therefore provides an introduction to the current issues facing the health care sector that integrates management tools and clinical knowledge. The objective is to provide students new insights into how modern management tools can be combined with scientific and clinical knowledge to manage health care organizations more efficiently and practice medicine more effectively. Credit 3 units. EN: S

B53 MGT 321 Health Economics and Policy

The basic tenets of health economics are covered. This course places a unique emphasis on incorporating materials from three broad source categories: textbook elements, "lay" press and media, and academic journal publications with the aim to foster application of rigorous, critical thought to media presentations of health care economics and policy issues. Credit 3 units. EN: S

B53 MGT 322 Health Care Management

The goal of the course is to develop facility in applying basic tenets of general management to actual situations and dilemmas that might be faced by health care managers, consultants, financiers, investors, innovators or providers in the course of their work. Issues addressed include but are not limited to financial issues, management challenges and conduct of operations. The first phase covers the basic background on the structure and financing of the health care industry to include very brief reviews of critical topics such as insurance and government-provided health care. A few basic frameworks are then developed for students to apply to course topics moving forward, such as cost/benefit analysis and evaluation of risk. The remainder of the course involves critical analyses of health care

cases involving varied subjects and management challenges. Sessions emphasize student-led discussions. Credit 3 units. EN: S

B53 MGT 380 Business Strategy

This course adopts the perspective of the general manager — an individual charged with developing and implementing the long-term strategy of a business. The course develops basic tools and concepts in strategy formulation, including competitive advantage, value creation and capture, industry analysis, capability assessment, and competitive positioning. The course is designed to develop students' skills in both analyzing observed strategies and in formulating and implementing new ones. A key feature of the course is a business simulation in which student teams interactively formulate and execute strategy for a simulated firm. Prerequisite: MEC 290. Credit 3 units. EN: S

B53 MGT 402 Ethical Issues in Managerial Decision Making

Focuses on ethical issues in management and surveys a number of ethical standards or levels by which managers make decisions involving most functional areas of business. Course emphasis on class discussion of cases and problem situations which confront managers and for which ethical dimensions are a significant part of the business choices. Prerequisite: senior standing. Same as MGT 502. Credit 1.5 units.

B53 MGT 405S International Business Environment — Sydney

The aim of this course is to internalize and develop multicultural competency applied within personal, organizational and business contexts. Reaching this goal includes developing personal awareness, understanding of important concepts and developing multicultural skills. The ability to recognize and overcome common pitfalls that prevent people from operating effectively within, and actually benefiting from, multicultural contexts are explored. Prerequisite: admission to the Sydney Internship Program. Credit 3 units.

B53 MGT 405T Australian Study Tour

Individual and team research, writing, presentation and participation in Olin's Australian Study Tour. Includes required attendance and expected professional contributions to all corporate and government visits and briefings and other required individual and group activities. Prerequisite: admission to the Sydney Internship Program. Credit 1.5 units.

B53 MGT 418 International Business: A Euro Perspective

Examines the economic and institutional setting of Europe from a general business perspective. The economic and political structures of major countries are studied. The role of the European Economic Community examined as well as that of some major international organizations such as GATT and OECD. The primary emphasis is with countries of western Europe. Other topics: theory of customs, unions, monetary and economic integration, and multicountry policy integration. Opportunities for and problems of doing business in Europe examined from both an overall strategic perspective and from the perspective of the different functional areas. Credit 3 units. BU: IS

B53 MGT 420 Research in Health Care Management

This is the capstone course for the Health Management major where students learn to apply rigorous statistical and analytical approaches to research questions in health services, but not limited to questions relating to management, finance and economics, operations and policy. Faculty identify several available research project options and present these options in class. The goal is to capitalize on the strength of the university medical school and affiliated medical centers, in addition to capitalizing on existing relationships between Olin and health care firms to identify the student research projects. Students also are encouraged to formulate their own research questions and to identify potential data sources they could use to address these questions, if they so desire. Students work in teams of 3-4, using the approach developed for the Practicum and Hatchery courses.

Credit 3 units.

B53 MGT 421 Introduction to Entrepreneurship

Through case studies, frequent guest speakers and the professor's own experience, the real world of entrepreneurship is brought into the classroom to provide a context for students to learn the fundamentals of founding, operating and exiting a start-up business. Students learn new perspectives that teach them to think like an entrepreneur. Those who are interested in the general study of entrepreneurship, those who want to be entrepreneurs, and those who would like to leverage entrepreneurial principles in other career paths are all good candidates for the course. Prerequisites: junior or senior standing in any school or college.

Credit 3 units. EN: S

B53 MGT 424 Business Planning for New Enterprises (The Hatchery)

In this course, student teams pursue their own business idea or support outside entrepreneurs by researching, writing and pitching business plans for new commercial or social ventures. Enrolled students can recruit a team to work on their own business idea, or they can join a team working on another's idea. Outside entrepreneurs and scientific researchers wishing to recruit student teams must apply in advance to be considered for student selection. Most of the work is done outside the classroom with the support of mentors, advisers and the instructor. Classes are held once per week for the first half of the semester. Workshops and rehearsals are required in the second part of the term. Students make final presentations to a panel of outside judges including venture capitalists, angel investors, entrepreneurs and people involved with early stage ventures. Prerequisites: Introduction to Entrepreneurship (MGT 421 or MGT 521), Social Entrepreneurship (MGT 500T or S50 5060) or permission of the instructor. CBTL course.

Same as MGT 524

Credit 3 units.

B53 MGT 440 Sports Management

This course examines business and management issues involved in the sports industry. This industry is very diverse, ranging from global sports events (such as the Olympic Games, World Cup Soccer, etc.) to major national competitions (such as the National Football League, Major League Baseball, etc.). Engaged in this industry are many different players, including franchises, governing leagues, sponsors, media, stadium owners, government, fans, and so forth. This course

takes a practical look at the world of sports management and administration, with an eye on extracting key lessons for corporate management and administration.

Credit 1.5 units.

B53 MGT 450A Internship in Business

This is an online course designed to deepen the overall learning students gain from an internship. By completing structured assignments that relate to both the work completed during the internship and to elements of the broad-based Olin Business School curriculum, the value of the internship is markedly increased for both students and employers. Internship in Business is a 1.5-credit Pass/Fail course for business school undergraduates. The course, credit, and pass/fail grading are transcript notations, but the hours earned for MGT 450A do not count toward the 120 hours minimum needed for graduation. Prior to enrolling in this course, the student must consult with and get approval from the Weston Career Center (WCC) to ensure the internship meets certain requirements. Questions? Contact the Weston Career Center at (314) 935-5950 or wccbsba@olin.wustl.edu.

Credit 1.5 units.

B53 MGT 450C Venture Consulting

Students who complete the course gain a deep understanding of the issues of both operational management and investment management of start-up firms. Students learn of the fundamental strategies and tactics employed by private equity and venture capital firms as well as aid in the development of business strategies for the companies in which they invest. Additionally, students learn how to take into account the macroeconomic, political, and cultural issues that affect start-up businesses that are both operating internationally and raising capital internationally. Furthermore, students learn of the subtleties in the complex relationship between the investment firm and the entrepreneur and will understand both their shared and disparate motivations and objectives. Students who complete the course develop competency in the research and writing of professional consulting reports and gain a more sophisticated understanding of both venture capital and entrepreneurship management and strategy. Students will better understand the interpersonal dynamics between the relevant stakeholders, become proficient in the terminology of private equity investing, and learn how to create structure to unstructured problems thus improving their ability for critical thinking. Participants are given the opportunity to apply their efforts beyond their basic functional business skills and toward issues of relationship management and strategy. Prerequisites: MBA core and Introduction to Entrepreneurship.

Same as MGT 550T

Credit 3 units.

B53 MGT 450D Honors Thesis I: Research and Analysis

The Olin BSBA Honors Thesis challenges motivated students to move beyond traditional course work and apply critical thinking skills to an academic business thesis. Senior BSBA degree students in good standing with a cumulative grade point average of 3.70 or higher have the opportunity to develop an intensive research project, which extends far beyond the limits of the material in a single course during a single semester. In the two-semester honors thesis sequence, research and analysis are the foci of the first semester and, upon successful progress, the student writes, presents and defends the research in the subsequent semester. Prerequisites: senior standing and faculty permission.

Credit 3 units.

B53 MGT 450E Honors Thesis II: Writing and Presentation

The Olin BSBA Honors Thesis challenges motivated students to move beyond traditional course work and apply critical thinking skills to an academic business thesis. Senior BSBA degree students in good standing with a cumulative grade point average of 3.70 or higher have the opportunity to develop an intensive research project, which extends far beyond the limits of the material in a single course during a single semester. In the two-semester honors thesis sequence, research and analysis are the foci of the first semester and, upon successful progress, the student writes, presents and defends the research in the subsequent semester. Prerequisite: MGT 450D.

Credit 3 units.

B53 MGT 450G The Business of Sports

This course provides an overview of the major aspects of the sports business industry, including but not limited to (1) the primary revenues and expenditures of pro and college sports (2) collective bargaining agreements (3) sports media rights (4) facility financing (5) sports sponsorships and athlete endorsements (6) the role sports commissions play within communities and (7) current events impacting the growth and evolution of the sports business industry.

Credit 3 units.

B53 MGT 450I International Internship in Business

The online course deepens the overall learning a student gains from an international internship. By completing structured assignments that relate to both the work completed during the internship and to elements of the broad-based Olin business curriculum, the value of the internship increases markedly — for student and employers. Prerequisite: admission to one of Olin's International Internship Programs.

Credit 1.5 units.

B53 MGT 450L Ethics and Integrity in Law and Business

This course examines complex ethical issues in contemporary business operations and decisions. Students learn to recognize ethical implications of business issues and develop models and decision techniques useful to analyzing and resolving problems.

Credit 3 units.

B53 MGT 450R Business and Government: Understanding and Influencing the Regulatory Environment

The United States as well as many of the world's governments has entered a new episode with respect to the interaction of business and government. Now, more than ever, government regulations are attempting to spur job growth and the economy on one hand, but also is intruding into many aspects of business and the markets on the other hand. Business students must not only understand the shifting business government landscape, but also how to engage government officials and legislators to help shape policies that affect their firms and industries. In this introductory course, student learn from business and government leaders how to interact with and affect the processes of regulation.

Credit 1.5 units.

B53 MGT 450T Strategy and Social Responsibility

In the modern world, large corporations have come to dominate many parts of economic life. Managers in large corporations face a challenging set of trade-offs about (1) how to balance value creation for present and future generations and (2) how to coordinate the distribution of this value among shareholders, customers, suppliers, employees and the communities in which they operate. The supremacy of shareholders among these constituencies has led some groups to fear that they will be exploited when shareholders' interests conflict with their own. In this course, we examine different perspectives on the role of corporate self-interest, changing social values, NGOs and government regulation in addressing this apparent conflict. In particular, the course examines how pro-social business practices affect the relationships between for-profit corporations and customers, employees, suppliers, investors, regulators and non-governmental organizations. We explore how these practices can be integrated into a firm's operating strategy, and how they can be employed to enhance a firm's competitive position. Prerequisites: MGT 100 and MEC 290 or permission of instructor.

Credit 1.5 units.

B53 MGT 450V Defining Moments: Lessons in Leadership and Character From the Top

Most successful leaders can point to a handful of "defining moments" in their careers — key choice points that defined the trajectory of their character, their career, and/or their company. How can aspiring business leaders prepare themselves to face these defining moments with insight and integrity? How do leaders achieve business performance without sacrificing character or integrity? This course examines these questions by learning from notable leaders who exemplify both business excellence and personal character. Top executives from leading companies sit down with us to talk about their defining moments and to engage with us in considering these questions. These conversations are supplemented with contemporary cases and readings on leadership and character. Prerequisite: senior standing or juniors with permission of instructor.

Credit 1.5 units.

B53 MGT 450Z European Study Tour

Individual and team research, writing, presentation and participation in Olin's European Study Tour (EST), including Mock Parliament. Includes required attendance and expected professional contributions to all EST corporate and government visits and briefings and other EST individual and group activities.

Credit 1.5 units.

B53 MGT 460F Contemporary Issues in Sports Business

This course involves a series of class sessions each organized around a particular sports management topic and jointly taught by the instructor and a different guest speaker (or speakers) each week. Each session includes a mini-case or real-time business example facing the sports management professionals at that time. Overarching objective is to provide students with contemporary and experiential opportunities in the sports business industry. Prerequisite: MGT 450G The Business of Sports.

Credit 1.5 units.

B53 MGT 460G Critical Thinking and Complex Problem Solving for Business

The course introduces students to rigorous techniques for critical and strategic thinking, problem formulation and problem solving, advancing their ability to provide valuable advice to organizations and preparing them for management consulting company interviews by exploring methods to engage in case analysis, various cognitive biases that can emerge as a problem is being formulated and analyzed, such as the use of inappropriate analogies, confirmation bias, self-serving bias, conflation of correlation and causation, etc.

Credit 1.5 units.

B53 MGT 460H Corporate and Global Strategy

Business-level strategy involves a firm's choices regarding how to compete in a particular single industry or market. Corporate strategy, on the other hand, involves choices about which sets of different industries or markets to compete in, and how to do so. It also involves choices about which kinds of activities to undertake within the firm, and which to organize through contracts or alliances with other firms. Global strategy is a particular type of corporate strategy that involves choices about which geographic regions or national markets to compete in and how.

Credit 3 units.

B53 MGT 490 Honors Seminar I

The first of a two-course honors seminar. Students have the opportunity to investigate current issues in business using an interdisciplinary approach to their research. Seminar content varies from year to year. Prerequisites: senior standing and faculty invitation.

Credit 3 units.

B53 MGT 491 Honors Seminar II

The second of a two-course honors seminar. Students have the opportunity to investigate current issues in business utilizing an interdisciplinary approach to their research. Seminar content varies from year to year. Prerequisite: MGT 490.

Credit 3 units.

B63 MGT 500T Social Entrepreneurship

Registration for this course is done administratively. Students will be put on waitlist and enrollment will be processed once division distribution is determined. The course is designed for students who are interested in understanding the field of social entrepreneurship. It studies the entrepreneurial concepts and practices that are integral to successful innovation. This course emphasizes the social and policy context of venture development and the unique role of evaluation in this growing field. Even if a student is not interested in starting a venture of his or her own, understanding the entrepreneurial process will enhance productivity for other programs and organizations. All students are encouraged to enroll. Prerequisite for SW students: S15-5038.

Same as S50 5060

Credit 3 units. EN: S

B63 MGT 501 Management Center Practicum

Students work in four-person teams on consulting projects, applying insights from their course work to real-world business problems under faculty supervision. Each student is expected to spend about 150 hours on the project. Grades are based on the quality of the final written and oral reports, as determined by the faculty supervisor. Students are paid a small gratuity, with the amount dependent on the quality of the work. Students are only eligible to participate in 1 Practicum Course per semester, if selected. Prerequisites: Students must apply for Practicum projects. Students are notified when projects are available.

Credit 3 units. EN: S

B63 MGT 520 Taylor Community Consulting Project

This course is designed to provide business assistance and expertise to St. Louis area non-profit agencies. Applications available in the Center for Experiential Learning, Simon Hall, Room 100. Open to MBA students, upper-level BSBA students, and MSW students. CBTL course.

Credit 1.5 units.

B63 MGT 550X CEL Entrepreneur Consulting Team

Early stage companies provide a unique environment for students to make a meaningful impact on the future trajectory of a growing organization. CELElect is an experiential learning course that matches teams of Washington University students with St. Louis area start-up ventures to perform defined management consulting projects. In addition to the required day-long orientation and concluding sessions taught at the T-REX incubator downtown, students work directly with the professor and with their client company on a consistent, but variable, schedule depending on the project needs over the course of the semester. In addition to being embedded on a project for an early stage company, students have the opportunity to engage with other entrepreneurship support organizations such as local accelerators, venture capital firms, and incubators. Law Students: Prerequisite/corequisite: Corporations. This course is cross-listed with the Business School, B63-550X, and is co-taught by Profs. Clifford Holekamp and Hillary Sale. Grading for Law Students is modified pass/fail: HP (3.94), P, LP (2.98), F (2.50). Interested students should apply/register by adding their names to the waitlist in WebSTAC, and then sending their resumes to Prof. Sale (c/o Beth Mott, emott@wulaw.wustl.edu). They will be notified soon as to whether they got in or not. Once accepted, students may not drop this class. Enrollment is limited. CBTL course.

Credit 3 units.

Managerial Economics

Visit <https://courses.wustl.edu> to view semester offerings for B54 MEC.

B54 MEC 290 Microeconomics

Provides a rigorous analysis of the behavior of consumers and firms in competitive and monopoly markets; oligopoly markets are introduced. Consumer topics include preferences and utility, budget constraints, consumer optimal choice and demand curves. Firm topics include technology, cost minimization and profit maximization. The course concludes with price determination in monopoly and competitive markets, and an introduction to oligopoly and game theory. The focus of the course is on microeconomics as a decision making tool for consumers and managers. Prerequisite: Math 131.

Credit 3 units. EN: S

B54 MEC 292 Global Economy

Introduces the fundamentals of international economic analysis. Provides an economic foundation to the analysis of business decisions and strategies in the global setting. Topics include: introduction to the global economy; comparative advantage as the basis for international trade and sources of comparative advantage; economies of scale and imperfect competition as the basis for international trade; tariffs and other instruments of trade policy; political, legal and institutional factors influencing international trade; balance of payments; exchange rates and the foreign exchange market; international capital flows; national competitive advantage and industrial policies; global economic competition and business strategy. Prerequisites: QBA 120; and MEC 290 or Econ 1011.

Credit 3 units. BU: IS EN: S

B54 MEC 370 Game Theory for Business

Provides students with a methodological framework to analyze strategic business situations. Building on a background in microeconomics and statistics, this course includes such topics as the following: modeling strategic problems, games with sequential moves, games with simultaneous moves, strategies and the derivation of strategic forms, general classes of games, uncertainty and information, strategy and voting, auctions, bargaining. Prerequisite: MEC 290.

Credit 3 units. EN: S

B54 MEC 380 Competitive Industry Analysis

Uses economics and game theory to analyze strategy and industry dynamics. Focus is split between evaluating the competitive environment within industries and developing competitive strategies that are responsive to specific competitive forces facing individual firms. Topics typically covered include models of price and quantity competition, barriers to entry, commitment strategies and credible threats, product differentiation, vertical integration, research and development, and patenting strategies. Prerequisite: MEC 290.

Credit 3 units.

B54 MEC 391 Economics of Human Resource Management

Key to a firm's success is whether it can develop a firm organization and a human resource management system that reinforce the firm's strategic position. This course covers topics in managing work forces and organizations that are of fundamental importance to all managers, and teaches how organizational design and human resource policies interact with the firm's market strategy and production environment. We look at how management can motivate executive and employee performance, screen and attract appropriate workers, and improve the way information is processed and decisions are made within organizations. This course combines economic

analysis with case discussions to address topics including hiring policy, turnover, training, variable pay, promotions, evaluation, job design, teams, worker empowerment, hierarchy, and organizational structure like centralization and decentralization.

Prerequisite: MEC 290.

Credit 3 units.

B54 MEC 400K Research Analysis in Industry

Research Analysis in Industry builds on the materials taught in MEC 370 (Game Theory for Business), MEC 470 (Market Competition and Value Appropriation), and MEC 471 (Empirical Techniques for Industry Analysis), integrating them with methods of industry analysis used in practice and applying them to companies. Prerequisite: MEC 370, MEC 470 and MEC 471.

Credit 3 units.

B54 MEC 460 Economics of Entertainment

This course focuses on the unusual economics of the entertainment industry and the associated management challenges. The sessions cover the basic economics of entertainment, then focus specifically on the music and movie industries, plus one other that varies from year to year. Classes consist of lecture and discussion, as well as speakers from the relevant industries. The primary student deliverable is a twenty minute documentary-style production in which student teams present findings of their research into specific industries within the broader industries studied in class, e.g., rock, classical or rap within music, blockbusters within music, etc. Prerequisite: MEC 290 or Econ 4011.

Credit 3 units.

B54 MEC 470 Market Competition and Value Appropriation

Provides students with frameworks and capabilities for making intelligent decisions in evolving markets. Course begins with general game theory concepts, which form the basis for two main topics: models of competition in markets and value appropriation. Students learn the basic framework and apply it in the context of a detailed industry study. Specific topics may include firm interactions in stable and evolving market environments, industry life cycles, the evolution of new product markets, and strategic decision-making in developing markets. Prerequisite: MEC 370.

Credit 3 units.

B54 MEC 471 Empirical Techniques for Industry Analysis

Students learn how to use data to answer a wide variety of questions regarding the incentives and behavior that generate market activity. We emphasize inference about the strategic decisions of firms and consumers. Students are introduced to new statistical and econometric tools by examining the application of these tools to current research in economics. Among the topics considered are the empirical implications of: strategic bidding in auctions, price discrimination and dispersion, differences across products, and the internal organization of firms. Prerequisite: MEC 470.

Credit 3 units.

Marketing

Visit <https://courses.wustl.edu> to view semester offerings for B55 MKT.

B55 MKT 370 Principles of Marketing

Marketing is the window to the customer, making the function a critical component of any successful organization. Through a mixture of lectures, case discussions and classroom exercises, this course gives students an overview of the best theories and practices in marketing management today. Specific topics include: how to segment the customer base and choose target markets, how to create perceived value both from an economic and psychological perspective, how to differentiate a product or service from a competitor's offering, how to build and maintain a strong brand, and how to employ different marketing tools such as advertising, pricing, product design, service and location. The class also provides students with some basic tools for evaluating the financial impact of marketing activities. Prerequisites: sophomore standing and MEC 290 or Econ 1011 or MGT 100. Credit 3 units. EN: S

B55 MKT 377 Consumer Behavior

Psychological, sociological and social psychological principles as they apply to consumer response to product offerings, media communications, personal influence and other environmental factors. Consumer buying behavior is analyzed from theoretical, empirical and applied perspectives. Current applications of concepts employed by marketers are discussed in the context of both consumer and industrial marketing situations. Prerequisite: MKT 370.

Credit 3 units. EN: S

B55 MKT 378 Marketing Research

The four P's of marketing are product, place, price and promotion. Using these decision variables, firms seek to maximize profits. Making these decisions requires market information. Marketing research is the process of actively collecting, assimilating, and analyzing market information to support management decision making. Teaches the nuts and bolts of market research. Prerequisites: MKT 370, QBA 120 and QBA 121 or concurrent enrollment in QBA 121.

Credit 3 units.

B55 MKT 400F Brand Management

A brand is a promise, and this promise is often the most valuable asset of a firm. In this class, students examine the creation and building of brand equity to create long-term profit for the firm. The class examines what we know about brand management and brand theory from years of rigorous scientific research in the area. While learning the foundations of brand management, students develop the skills needed to create a meaningful brand, position a brand, develop brand names and logos, promote a brand, leverage brand equity, extend a brand, and communicate brand meaning via traditional and social media. Students learn some of the day-to-day skills performed by brand managers and interact with brand managers via guest speakers from top branding firms. Prerequisite: MKT 370.

Credit 3 units.

B55 MKT 400G Digital Marketing and Customer Analytics

The aim of this course is to provide a rigorous and comprehensive introduction to technology and methods of conducting marketing activities online and analyzing the data that inform and result from those activities. Prerequisite: MKT 370.

Credit 3 units.

B55 MKT 465 Retail Management

Explores the fundamental factors that are critical to the success of most retailers; merchandising, store design and display, personal selling, advertising and promotion, pricing and location. A wide variety of retailers — department stores, specialty stores, wholesale clubs, direct marketers, franchisers, food retailers, discounters and others — are studied. Through case methodology, the role that managers play in problem solving and development of strategies are studied. Topics include: positioning for success; retailing organizations; retail economics; pricing strategy; and entrepreneurial retailing. Prerequisite: MKT 370.

Credit 3 units.

B55 MKT 470E Pricing Strategies

This course equips students with the concepts, techniques, and latest thinking on assessing and formulating pricing strategies. Through lectures, in-class discussions, case studies, group project/presentations, and pricing simulation games, students learn to use the fundamental analytical tools, theories and conceptual frameworks to formulate proactive pricing strategies improving the firm's profitability. Topics of discussion include incremental contribution analysis, EVC analysis, segmentation and price customization, competitive pricing strategy, pricing innovative products, price promotion, psychological/behavioral issues in pricing, dynamic pricing, pricing and market making on the Internet, and pricing of digital products and services. Prerequisite: MKT 370.

Credit 3 units.

B55 MKT 477 International Marketing

Addresses three fundamental decisions confronting a company whose operations extend beyond the domestic market: (1) choosing which foreign markets to penetrate; (2) determining the mode of market entry; and (3) devising the international marketing plan. Topics include: global marketing planning; environmental and cultural influences on international marketing decisions; organizational and control issues in international marketing decisions; global marketing intelligence; foreign risk and feasibility studies; and issues of ethics in other countries. Prerequisite: MKT 370.

Credit 3 units. BU: IS EN: S

B55 MKT 477S International Marketing Sydney

Many companies, large and small, prepare a business environmental analysis for each country in which they do business. The analysis assesses the (consumer, industrial or organizational) demand in a particular country for merchandise like the company markets as well as the company's ability and willingness to supply that merchandise to that country. Students prepare a marketing environmental analysis for some merchandise (either a new or existing service or product) of their choice from a company of their choice in Australia. Prerequisites: MKT 370 and admission to the Sydney Internship Program.

Credit 3 units. BU: IS

B55 MKT 478 New Product Management

In a rapidly changing business environment where product life cycles are shortening and competition is intensifying, creating new products has become the most significant and most risky activity within a firm. This course aims to develop an understanding of the "state of the art" strategies, processes and methods used in developing new products. This course focuses on key new product issues including generation and assessment

of ideas, value creation in competitive markets, the impact of disruptive technologies on mainstream industries, the diffusion of innovative new products and services, business model innovation, marketing mix (4P's) decisions for new products, concept and market testing, first mover dis/advantage, and expanding the product portfolio. This is a case-based course, where students participate in a dynamic and interactive group environment to develop the capacity to use the information learned to make informed new product decisions. Prerequisite: concurrent enrollment in MKT 473.
Credit 3 units.

B55 MKT 480 Marketing Strategy

Successful business plans are dependent on well-defined and carefully crafted marketing strategies. In this course, students explore the interconnections between business strategy and marketing strategy through a series of lectures, case discussions, and participation in an online marketing simulation exercise. The course also places heavy emphasis on the discussion of topical marketing issues faced by companies in the current environment. Students are required to read the relevant business press and bring real world issues into the class for brainstorming and interactive discussion. Through this process, students become astute observers of the strategic trends in marketing across a variety of industries. Prerequisite: MKT 370.
Credit 3 units.

Operations and Supply Chain Management

Visit <https://courses.wustl.edu> to view semester offerings for B58 OSCM.

B58 OSCM 356 Operations Management

Introduces a variety of common operations issues that are frequently dealt with in both manufacturing and service industries and that affect other functions of the business. Specific topics include: process design and control; quality; waiting line models; inventory systems; and supply chain management. Prerequisites: ACCT 2610, MEC 290 and completion or concurrent enrollment in OSCM 230.
Credit 3 units.

B58 OSCM 400C Analytics for Operational Excellence

This course provides advanced modeling and analytic tools to analyze operational processes, identify key drivers for business performance, and prescribe action plans to improve operational excellence. The emphasis is on modeling tools that are widely used in diverse industries and functional areas, including operations, finance and marketing. Applications include service capacity planning, advertising planning, revenue management, portfolio optimization, corporate risk management, environmental policy modeling, among others. Prerequisite: OSCM 356.
Credit 3 units.

B58 OSCM 400D Supply Chain Management

A supply chain is a network of all firms and relationships that get a product to market, including the original acquisition of raw materials, production of the item at a manufacturing facility, distribution to a retailer, sale of the finished item to the customer, and any installation, repair, or service activities that follow the sale. How to effectively manage the supply chain is a central

issue for all levels of management, regardless of industry. More demanding customers, the Internet and digital technology, growing competitive pressures, and globalization create new opportunities and challenges on how supply chains should be configured and managed. Many innovations and new business models have emerged, arising from application of information technology and reconfiguration of the supply chain network. Prerequisite: OSCM 356.
Credit 3 units.

B58 OSCM 458 Operations Planning and Control

Examines the concepts and techniques essential for effective operations planning and control in various manufacturing and service organizations. The course builds on the knowledge and skills acquired in core operations management and quantitative method courses, and covers key topics including inventory management, linear and nonlinear programming, aggregate planning, Markov chain models. The course introduces students to the major trade-offs and issues in operations planning and control, as well as important tools and techniques available for helping operations managers to make analysis and decisions. Prerequisite: OSCM 356.
Credit 3 units.

Organizational Behavior

Visit <https://courses.wustl.edu> to view semester offerings for B66 OB.

B66 OB 360 Organization Behavior Within the Firm

Provides a toolbox of analytical and interpersonal skills that are necessary to be an effective manager. Learn how these skills can have a significant impact on profitability. Objectives: (1) understanding research conclusions through explaining the dimensions of individual differences and how they impact motivation, job satisfaction and ultimately organizational effectiveness; explaining group dynamics and how they determine effectiveness; identifying organizational implications of research; evaluating organizational structure and job design; evaluating organizational culture and identifying methods of culture management; and identifying the steps and roadblocks in the process of organizational change; (2) developing management skills by writing effective reports to senior management that analyze individual, group and organizational effectiveness in actual organizations; and applying your understanding of individual, group and organizational dynamics to improve your team's effectiveness on group projects. Prerequisite: MGT 100 or sophomore standing.
Credit 3 units. EN: S

B66 OB 400C Women in Leadership

In this course we take a multifaceted approach to learning about women and leadership to better prepare students to lead in organizations. To do this we learn from notable leaders who share their experiences and advice with the class. These conversations are supplemented with cases and readings of women leaders pulled from a range of organizations as well as a review the current state of empirical evidence about the status of women as leaders. Finally, there is time to engage in deep reflection about what students expect from their careers, as well as a chance to consider the pathways they must take to become effective and inclusive leaders in increasingly diverse organizations.

Credit 1.5 units.

B66 OB 400D Thinking Creatively and Leading Creative Teams

This course is designed for students who want to improve their ability to develop creative solutions to tough business problems and to be able to inspire creativity in others. In a world of rapid change and increasing complexity, existing approaches simply won't do it anymore — at least not for long. Thus, the ability not only to update and refresh existing products and services but also to generate ideas for new-to-the world offerings becomes indispensable. Students who have mastered the skills of creative thinking and doing and can foster those skills in others are therefore in a position to add tremendous value to their firms and, ultimately, to society. This course is designed to help students understand and begin to master those skills. Prerequisite: OB 360.

Credit 1.5 units.

B66 OB 461 Negotiation

Skillful negotiation is an important aspect of management. Designed to improve a student's skills in analyzing and conducting negotiations in a variety of settings. Topics include two-party bargaining, multiparty bargaining, arbitration and coalition formation. Prerequisite: OB 360.

Credit 3 units.

B66 OB 462 Leadership in Organizations

This course is designed to fulfill three broad objectives for students. The first is to provide a useful overview of the primary leadership perspectives, focusing on how each framework links individual leadership to organizational outcomes. The second objective involves students in self-assessment of strengths and weaknesses in relation to the abilities and skills that are predictive of leadership effectiveness. Third, the course is designed to enable participants to articulate an effective strategic plan for individual leadership development. Course topics include perspectives on individual leadership effectiveness, leadership and motivation, developing subordinates, leading groups and teams, leading the resolution of conflict, and leading organizational change. Prerequisite: sophomore standing.

Credit 3 units.

Quantitative Business Analysis

Visit <https://courses.wustl.edu> to view semester offerings for B59 QBA.

B59 QBA 120 Managerial Statistics I

The first of a two-course sequence in business applications of statistics, focused on descriptive statistics, probability and distributions, inferential statistics, and linear regression. Approximately the first quarter of the course is about descriptive statistics and applications of covariance. The second quarter is devoted to probability: basic rules, conditional probabilities, Bayes' theorem, expected values, and probability distributions. This work is followed by an introduction to sampling distributions and inferential statistics. Confidence intervals and hypothesis testing are introduced to make inferences about parameters. The last one-fourth of the course focuses on simple linear regression. Throughout the course, functions, data analysis, VBA, and solver

features of Excel are introduced. Prerequisite: completion or concurrent enrollment in Math 132.

Credit 3 units.

B59 QBA 121 Managerial Statistics II

The second of a two-course sequence in business applications of statistics, focused on forecasting. The course is devoted to the use of linear regression models in business, and ways to deal with problems of collinearity, outliers, non-linear relationships, and heteroscedasticity. Advanced topics, including time series regression and logistic models, are covered as time permits. There are quizzes and group projects in addition to a midterm and final. Prerequisites: QBA 120 or approved equivalent; Math 132; and MEC 290 or Econ 1011.

Credit 3 units.

B59 QBA 200A Analytics and Modeling for Business Decisions

Help students become effective problem solvers, smart consumers of data and, finally, intelligent business decision makers in various management situations. The course utilizes a structured problem-solving approach heavily relying on data for defining the problem, uncovering useful relationships between critical variables and outcomes, defining measures for evaluating alternatives, modeling all underlying conceptual relationships and constraining resources, and proposing via rigorous search process of exploration and exploitation "best fitting and robust" solutions for the given environment and its underlying uncertainties. Prerequisite: QBA 121.

Credit 3 units.

Degree Requirements

BSBA Degree Requirements

The Bachelor of Science in Business Administration degree is awarded to students by recommendation of the faculty. Standards established by the faculty for recommendation are:

1. Satisfactory completion of requirements regarding required and elective courses, accumulation of a minimum of 120 units of course work, and satisfactory fulfillment of other requirements established in accordance with the rules and regulations of the Olin Business School.
2. Completion of the last 30 units in residence at Washington University for entering freshmen. Transfer students must complete a minimum of 60 units in residence at Washington University.

General Requirements (a minimum of 48 units)

Each student must complete a minimum of 48 units outside of the Olin School to include the following specific requirements:

A. College Writing (3 units): Students must demonstrate proficiency in reading and writing the English language by satisfactorily completing CWP 100 with a grade of C– or better.

B. Calculus (3–6 units): Students must complete Math 131–Math 132 or other calculus courses approved by the Olin Business School.

C. Distribution Requirements (18 units): Students must complete 3 units of physical and life sciences, 3 units of humanities, 6 units of international studies, 3 units of behavioral analysis and 3 units of ethics and values. Approved course selections are available in the university's *Course Listings*.

D. Advanced Electives (12 units): Students must complete at least 12 graded units of advanced course work. Advanced electives are defined as any course numbered 300 or above that is offered as any day division course. Advanced electives also may satisfy a distribution requirement.

Professional Requirements (a minimum of 60 units)

A. Core Requirements (42.5 units):

ACCT 2610	Principles of Financial Accounting	3
ACCT 2620	Principles of Managerial Accounting	3
MEC 290	Microeconomics	3
MEC 292	Global Economy	3
or Econ 1021	Introduction to Macroeconomics	
MGT 100	Individual in a Managerial Environment *	3
MGT 150A	Foundations of Business	2
MGT 201	Management Communication	3
MGT 250A	Building Your Career Foundation — Techniques and Strategies	1.5
FIN 340	Capital Markets and Financial Management	3
MKT 370	Principles of Marketing	3
OB 360	Organization Behavior Within the Firm	3
OSCM 356	Operations Management	3
QBA 120	Managerial Statistics I	3
QBA 121	Managerial Statistics II	3
QBA 200A	Modeling of Business Decision Making	3
Total units		42.5

*Transfer students entering Olin Business School must take one of the following: MGT 100, MGT 380 or MEC 380 to satisfy this requirement.

B. Professional Electives (a minimum of 17.5 units)

Professional electives are nonrequired business courses offered by the Olin Business School that may or may not lead toward a specific business major. Additional information about the specific requirements for each business major is available on our Majors (p. 135) page.

Electives (units will vary)

Students must take enough electives to earn the minimum of 120 units.

Typical Four-Year Curriculum for a BSBA Student

Typically, students must earn 30 units a year to stay on target with a four-year graduation plan.

120 credits minimum

Freshman Year	Units		Units
Fall		Spring	
MGT 100	3	MEC 290	3
Math 131 or higher*	3	QBA 120	3
English Composition**	3	Math 132 or elective	3
MGT 150A	2	Electives	6
Electives	3–6		

Sophomore Year

QBA 121	3	QBA 200A	3
ACCT 2610	3	Core requirement(s)	3-6
MGT 250A	1.5	Electives	6-9
Core requirement(s)***	0-3		
Electives	6-9		

Junior Year

Core/ Professional requirements	6-12	Core/ Professional requirements	6-12
Electives	3-9	Electives	3-9

Senior Year

Professional electives	6	Professional electives	6
Electives	9	Electives	9

Notes:

*Students may enroll in a higher level of calculus providing their academic preparation suggests a different level of calculus.

**BSBA students are assigned to enroll in their Writing course in either fall or spring semester of their freshman year. Some students may start at a different level of English preparation and may take their Writing course as late as sophomore year.

***BSBA students are assigned to enroll in MGT 201 in either fall or spring semester of their sophomore year.

Additional Requirements

A. Students must complete a minimum of 120 units including 48 units outside of the Olin School and 60 units from the Olin School. Students who substitute a nonbusiness course for a business requirement will still be required to enroll in another business course, as a minimum of 60 credits must be earned in Olin Business School.

B. Students must earn a minimum of 2.0 overall grade point average (GPA) and 2.0 GPA in all professional course work taken at Olin Business School.

C. Students must earn the final 30 units (60 units for an external transfer) toward the degree at Washington University.

D. Students must be recommended by the Olin Business faculty for degree confirmation by the Board of Trustees.

Regulations

A. A maximum of 15 units of pre-matriculation credit may be counted toward graduation. Pre-matriculation sources include Advanced Placement (AP), International Baccalaureate (IB), British Advanced (A) Levels and college courses taken after the junior year in high school. These units will count toward the 120 credits but will not satisfy any distribution, statistics or advanced education requirements. If a student takes a course in residence in which AP credit has already been awarded, the AP credit will be removed from the student's record.

B. BSBA students may earn a maximum of two majors to include two professional majors or one professional major and one major outside of the Olin School.

C. BSBA students may earn one or two minors, depending on the number of majors they pursue. The options are two majors and one minor or one major and two minors. Most of our minors are offered outside of Olin Business School.

D. Distribution requirements and advanced general electives (12 credits) must be taken for a grade. However, if a student completed a distribution/advanced course on a pass/fail basis prior to transferring to Olin Business School, then this course would count toward that requirement.

E. All business courses must be taken for a grade with the exception of MGT 450A.

F. BSBA students may enroll in one physical education course per semester.

G. BSBA students may enroll in one pass/fail course each semester. These credits will count only as general education electives.

H. BSBA students may enroll in one University College course per semester. However, these credits will not count toward the

120 units needed for their BSBA degree. The grade from this course will not be factored into the GPA.

I. The Olin School does not accept any online course work for transfer credit.

J. BSBA students may transfer up to 6 credits per summer toward their BSBA degree requirements.

K. BSBA students must complete 54 of the 60 professional units in residence. Course work taken on an approved Washington University international program will satisfy this residency policy.

L. BSBA students must complete all professional courses for each business major in residence. Course work taken on an approved Washington University international program will satisfy this residency policy.

M. BSBA students may double count only one course in a business major. For example, if a BSBA student is majoring in both marketing and entrepreneurship, he or she could not count MKT 363 and MKT 465 toward both majors.

N. Students are obligated to requirements and policies at the time of matriculation into the BSBA Program. However, faculty has and reserves the right to make changes to degree requirements, policies and procedures, including modifying or adding new requirements, policies and procedures at any time.

Academic Honors & Awards

Scholars in Business Program: The Scholars in Business program allows alumni, corporations and friends of Olin Business School to provide scholarship funds to students of high academic promise who require financial support to attend the university. Students are considered for this award when they apply for financial aid in the fall of each year. Donors and students meet each other at the annual Scholars in Business dinner.

Dean's List: Dean's List honors are awarded to undergraduates who have completed a minimum of 14 graded units and achieved a semester grade point average of 3.6 or above. No incomplete or "N" grades may be outstanding as part of the student's semester record.

Beta Gamma Sigma Honor Society: The top 7 percent of the junior class and the top 10 percent of the senior class are eligible for invitation to Beta Gamma Sigma, the national business society. The student must have completed a minimum of 30 units at Washington University to be eligible.

Latin Honors: Graduating seniors in the top 5 percent of the class, based on overall university academic records, graduate summa cum laude. Seniors in the top 6 to 15 percent of the class graduate magna cum laude. These designations are recorded on the official university transcripts. All candidates for the BSBA degree in August, December or May will be considered as one group for purposes of final honors. Honors are determined in May for all graduates.

Honors in Management: The Honors in Management (HIM) Seminar is a two-semester sequence course that gives students the opportunity to work with senior-level faculty in a specialized format. In the fall semester, the HIM course will be team taught with various faculty members. For the spring semester, students will form teams to develop substantial research projects under the direction of one of the participating faculty for the remainder of the academic year. HIM students also must have a total of 126 credits of academic work (including MGT 490 and MGT 491) in order to receive the Honors in Management designation at graduation.

Honors Thesis: The Olin BSBA Honors Thesis challenges students to move beyond traditional course work and apply critical thinking skills to an academic business thesis. The Honors Thesis is a two-semester sequence in which the student engages in research and analysis in the first semester and upon successful progress, the student writes, presents and defends his or her research in the subsequent semester. Students must apply and be approved to participate in this experience. All applicants must be senior BSBA degree students in good standing with a cumulative GPA of 3.7.

Academic Regulations

Attendance

Olin Business School allows each instructor of a course to decide how many absences the student may have and still pass the course. The Olin Business School expects faculty to give reasonable consideration to unavoidable absences and to the feasibility of making up work that has been missed. Students are expected to explain to their instructors the reasons for any absences and to discuss with them the possibility of making up missed assignments.

Enrollment

BSBA students must be enrolled in a minimum of 12 units to a maximum number of 21 units each semester. Olin undergraduates will be assessed a full-time tuition charge for their course of study through eight semesters of enrollment.

Units and Grades

A unit is a measure of quantity given for one hour of lecture or recitation course a week for one semester. A grade point is a measure of the quality of work done in the course. The Olin Business School employs the following grading system in evaluating student performance:

Grade	Points Per Unit
A	4.0
A-	3.7
B+	3.3
B	3.0

B-	2.7
C+	2.3
C	2.0
C-	1.7
D+	1.3
D	1.0
D-	0.7
F	0.0
P#	Pass
F#	Failing
I	Course work incomplete
W	Withdrawal
R	Repeat
L	Successful audit
Z	Unsuccessful audit
N	No grade submitted

Grade points per course are calculated by multiplying the number of units of a course by the grade points earned. A student may retake a course if a higher grade is required or desired. The initial grade received in the course remains on the student's record, along with an R to indicate that the course was repeated. Credit is given only once for taking the course, and only the higher grade is used in computing the student's grade point average.

Auditing a Course

Students may not audit a business course. However, a student may take nonbusiness courses for audit with the approval of the professor. An audited course does not count toward the student's degree requirements. A grade of L indicates satisfactory completion of an audit; unsatisfactory completion results in a grade of Z. Fees for auditing a course are assessed at the same rate as for all other courses.

Incomplete Grades

A student may be given an I (incomplete) when extenuating circumstances preclude the satisfactory completion of course work during the semester in which a particular course is taken. While an incomplete grade is sometimes appropriate, a student should make every effort to avoid the accumulation of incomplete grades. Incomplete grades are expected to be finished. Failure to finish an incomplete grade by the following semester will result in a failing grade.

Pass/Fail Option

A student may take a maximum of one course per semester on a pass/fail basis. A grade of P# (pass) indicates that credit has been awarded, but the work was not subject to finer evaluation. No required or business course work may be taken on a pass/fail option. This option is provided so that a student may take

nonbusiness courses in subject areas with which he or she may have little familiarity.

Minimum and Maximum Course Loads

In Olin, business students are required to enroll in a minimum of 12 units to a maximum of 21 units each semester here at Washington University. A minimum 2.0 grade point average in all course work taken at the university and a 2.0 in all professional course work taken at Olin must be achieved to satisfy BSBA graduation requirements.

Repeating a Course

A student may retake a course if a higher grade is required or desired. The initial grade received in the course remains on the student's record, along with an R to indicate that the course was repeated. Credit is given only once for taking the course, and only the higher grade is used in computing the student's grade point average.

Academic Probation and Suspension

Approximately three weeks following the end of a semester, the Academic Review Committee reviews the record of each enrolled student. Students must attain and maintain a minimum 2.0 grade point average in professional (business) and general courses to be in "good academic standing." Failure to achieve minimum standards may result in the student being placed on academic probation or becoming ineligible for future registration in the Olin Business School. Failure on the part of a student to meet the conditions of probation in the following semester may result in dismissal from the school.

Another cause for probationary action or dismissal is failure on the part of a student to complete professional requirements within a reasonable time period. Students who fall behind in completing requirements should make an appointment to see their primary adviser to work out a plan for making up the work at the earliest possible time. Registration is restricted to a maximum of 15 credits for students on academic probation.

Leave of Absence Process

If a student is an undergraduate in good standing at the completion of a term, he or she is eligible to apply to take a leave of absence from the Olin Business School. The student should first contact his or her academic adviser to discuss the situation. Students must submit a request for a Leave of Absence to their four-year academic adviser. A student on an approved leave of absence should submit a Reinstatement Form by March 1 for a fall semester return or October 1 for a spring semester return.

A student wishing to take a medical leave of absence (MLOA) should first talk with a representative from Student Health Services. Then, the student should submit the MLOA petition

to his or her business school adviser. A student's request for the MLOA or re-enrollment from an approved MLOA will be reviewed by the BSBA officer once the recommendations from Student Health Services are received. The decision on whether or not to grant the request for a medical leave of absence or re-enrollment will be communicated to the student by the BSBA Programs Office. A student considering a medical leave of absence should first contact Student Health Services to initiate this leave.

In either case, the student must complete the Leave of Absence or the Medical Leave of Absence form and submit it to his or her four-year academic adviser.

Students who leave the university without filing either a Leave of Absence or a Medical Leave of Absence will be considered officially withdrawn from the university. In this instance, a student must re-apply for admission if he or she wishes to return the university.

Transfer Credit

Students who are enrolled at Olin and wish to receive transfer credit for course work subsequently taken at another institution must receive approval from their adviser prior to the time the course is to be taken. General guidelines are as follows:

- The institution must meet accreditation requirements.
- No course work may be taken at a two-year institution after a student has accumulated 60 credit hours of work.
- Credit will not be given for course work taken at another institution during a student's last 30 credit hours.
- A catalog description for each course must be submitted with the petition for review.
- No credit will be granted for course work taken online through another university.
- A maximum of 6 units may be taken during a summer program from another university.
- No transfer credit will be accepted for courses taken while a student is suspended from Washington University for violations of the University Student Judicial Code or Academic Integrity policy.

The Olin School expects that all business courses be taken at Washington University. Under certain circumstances, permission may be granted for a student to take a business course from another university with accreditation by AACSB—International (Association to Advance Collegiate Schools of Business). In order for consideration to be given, a syllabus showing text used must be submitted. However, a BSBA student must still complete 54 of their 60 business units in residence. Any course counting toward a business major must be taken in residence also.

No transfer credit (including course work taken through a Washington University approved study abroad program) will be accepted with less than a C grade.

University College Courses

BSBA students may enroll in one University College course per semester. However, these units will not count toward the 120 units needed for the BSBA degree nor toward a student's GPA.

Pre-matriculation Units

Pre-matriculation units are earned before the student's enrollment at Washington University as a first-year student. These units would include Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels and college credit earned after the student's junior year in high school. These units will be noted on the student's transcript. The maximum number of pre-matriculation units awarded is 15. These pre-matriculation credits will transfer as general elective course work and will not satisfy any distribution requirement. All BSBA students and second majors will be required to take QBA 120 Managerial Statistics I even when AP credit is earned for Math 2200 Elementary Probability and Statistics.

Majors (directory)

Below is a list of majors offered by the Olin Business School. Visit the following sections of this *Bulletin* to view more information about a specific major:

- Accounting (p. 135)
- Economics and Strategy (p. 135)
- Entrepreneurship (p. 135)
- Finance (p. 135)
- Health Care Management (p. 135)
- Leadership and Strategic Management (p. 135)
- Marketing (p. 135)
- Operations and Supply Chain Management (p. 135)

Minors (directory)

Non-BSBA students are eligible to pursue a minor in one of the specific fields of business listed below. Visit the following sections of this *Bulletin* to view more information about a specific minor:

- Accounting (p. 140)
- Business Economics
- The Business of Sports (p. 140)
- Entrepreneurship (p. 140)
- Finance (p. 140)
- General Business (p. 140)
- Health Care Management (p. 140)
- International Business
- Leadership (p. 140)
- Marketing (p. 140)
- Operations and Supply Chain Management (p. 140)
- Strategy (p. 140)

College of Arts & Sciences

The College of Arts & Sciences is the largest undergraduate program at Washington University, offering students the most diverse range of courses in more than 50 different fields, ranging from anthropology and biochemistry to mathematics and performing arts.

The college draws on the rich and varied resources that this distinguished university has to offer — a creative and internationally recognized faculty, a diverse and able student body, a superior library, and excellent opportunities for advanced study. As the center of intellectual life on the campus, the College of Arts & Sciences benefits from and contributes to the studies of architecture, art, business, engineering, law, medicine and social work.

Of central importance to the life of the college is the quality of teaching. Undergraduate students have the opportunity to learn from and work beside stimulating teacher-scholars who are leaders in their fields. Our nationally recognized faculty, which numbers more than 500, is made up of artists, biologists, chemists, economists, historians, philosophers and poets, all of whom bring the excitement and diversity of new ideas into the classroom.

Governance

The College of Arts & Sciences is bound by the charter of the university and is ultimately responsible to the University Board of Trustees, which delegates to the chancellor the administration of the university. In turn, the chancellor delegates to the deans and faculty of the College of Arts & Sciences responsibility for its internal governance.

Because the college is continually reassessing its objectives and policies, faculty and students alike may take the initiative in proposing changes in curriculum and policies. New programs or proposed modifications are reviewed by committees whose members represent the diverse points of view of the academic community.

By action of the Faculty of Arts & Sciences in January 1969, revised in May 1971, the ArtSci Council shares joint responsibility with the faculty for college-wide degree requirements, the grading system, and those policies that directly affect the lives of students. The ArtSci Council appoints representatives to various standing and ad hoc college committees.

The Curriculum

The College of Arts & Sciences fosters in its students the quintessential qualities of a liberal arts education: a heightened spirit of inquiry, an ability to organize and synthesize information,

skills in written and oral expression, and a familiarity with the ways in which thoughtful men and women discover those commitments and values that make life worthwhile. By incorporating the college's manifold intellectual resources — people, libraries, laboratories, studios — Arts & Sciences students "learn how to learn," developing both the flexibility and the habits of thought necessary to the ever-evolving worlds of work and global citizenship.

The college's academic program has two principal objectives. First, it provides students with an understanding of the range of human knowledge and attainment by developing an appreciation of the characteristic problems, achievements and limitations of the various fields of human endeavor. The curriculum works to ensure this understanding by requiring a minimum amount of study (9 units/three courses) in each of three broad areas of study — the Humanities; Natural Sciences & Mathematics; and Social & Behavioral Sciences — and three to four courses (9–12 units) in a fourth area, Language & Cultural Diversity. Collectively, these area requirements make up approximately one-third of the units needed to graduate.

Second, the college's academic program gives students the opportunity to study a subject or area in a sustained, intensive way. After a period of initial investigation (typically two to three semesters) during which students explore the richness inherent in the various fields of study, a student declares an area of concentration, the major. The college offers more than 30 traditional subject majors, such as chemistry, English and music, and more than 20 interdisciplinary majors, such as American culture studies; international and area studies; and women, gender, and sexuality studies. Students also may develop an individualized special major.

In all departments, students are encouraged to proceed as their strengths and interests lead them. Placement examinations are used in many departments to enroll undergraduates in courses at the levels their previous training warrants; in other departments, proficiency examinations are available (visit the Proficiency and Placement Examinations (p. 11) section of this *Bulletin*, or the college's placement website: http://college.artsci.wustl.edu/policies/placement_credit).

The degree requirements and policies in the 2015–16 *Undergraduate Catalog (Bulletin)* apply to students entering Washington University during the 2015–16 academic year. To view catalogs from prior years, choose "Prior Bulletins" from the navigation menu.

Academic Advising

To assist students with their undergraduate planning, the college provides a closely coordinated academic advising program. Matriculating students have a specially selected four-year academic adviser with whom they will meet regularly during the first year to help with the transition into the university and to help select courses for the fall and spring semesters. After the first

year, students meet each semester with their four-year academic advisers prior to registration to discuss interests, goals and academic course work. Students are encouraged to consult with their four-year academic advisers any time they need assistance throughout the school year.

Upon declaring a major, students are also assigned a major adviser in the department of their principal area of study. The extent of the adviser's assistance depends on a student's individual needs and wishes. Consultation with a major adviser, in addition to the four-year academic adviser, is required each time a student prepares to register for courses.

Students with problems or questions related to academic issues are invited to visit the College Office at any time. One of the deans is available every day on a walk-in basis to answer questions or to provide references to an appropriate source of help. Important among these sources are individual faculty members with particular specialties who may be able to answer the student's questions. In addition, the Writing Center, Career Center, Student Health Services, and Cornerstone: The Center for Advanced Learning provide a wide range of services, including individual and group instruction, interest tests and advice, individual sessions with trained counselors about educational and personal problems, and the improvement of learning skills.

Pre-matriculation Credit

Students may earn pre-matriculation credit for college-level courses completed before enrollment at Washington University as a first-year student. Sources for pre-matriculation credit include Advanced Placement (AP) examinations, International Baccalaureate (IB), British Advanced (A) Levels, course credit earned by proficiency (e.g., back credit), and college credit earned after the junior year of high school that was not applied to high school graduation. (Credits earned via the High School Summer Scholars or High School College Access programs through University College are considered to be pre-matriculation units and are subject to the same regulations). Although all accepted pre-matriculation work is noted on the transcript so that the student may go directly into advanced courses, the maximum number of pre-matriculation units of credit awarded is 15. Pre-matriculation course work does not fulfill distribution requirements, but it may fulfill requirements for majors and minors. If a student enrolls in and completes a course equivalent to that for which pre-matriculation credit has been granted, the pre-matriculation units for the course in question will be removed from the student's record. For more information, see the section titled "Pre-matriculation Units" on the Admissions Procedures (p. 11) page of this *Bulletin*.

Academic Programs for Entering Students

First-year students may choose one of the following programs that provides a basic structure for their course selection. Each

option provides an effective means of discovering personal and intellectual interests.

Focus Program

Focus is a one-year program of linked seminars designed to bring students with similar intellectual interests into a close mentoring relationship with members of the faculty. A number of Focus programs are offered every year, each built around a seminar topic reflecting the professor's particular area of expertise. Students in each Focus program also may attend a "companion" course chosen to encourage exploration of the seminar topic from varying perspectives. The Focus program provides a coherent, group-oriented learning experience, while still allowing time for electives (visit the Focus (p. 446) page for more information).

Biotech Explorers Pathway

A two-year program exploring the science of technology and the realization of discovery, Biotech Explorers is an interdisciplinary program drawing on biology, chemistry, engineering, physics, computer science, management, public policy and law. The Biotech Explorers Pathway (BEP) introduces students to the fundamental science behind biotechnology and what it takes to move discoveries from the laboratory into the real world. The BEP aims to build connections between sciences, business, technology and engineering at the start of undergraduate studies; to highlight how scientific discoveries lead to useful applications; and to engage curiosity through team-based inquiry that guides students from examples toward idea generation and project development. The first-year courses are a portal to the second-year project development and transition to capstone fellowships for the summer between the sophomore and junior years.

Global Citizenship Program

Through this year-long program, selected first-year students acquire fundamental skills relevant to International and Area Studies (IAS). The program consists of two courses, one taught each semester, and a weekly, one-credit workshop that runs the entire academic year. The Global Citizenship program examines what it means to be a citizen of the world while challenging its participants to engage both demanding texts and real-life scenarios. The fall semester seminar provides students with a useful theoretical framework for their second semester practicum. The practicum may consist of case studies, proposals and field research. Students work together and with recognized experts in a variety of professions to produce substantive case proposals and action-based documents. As part of the weekly workshop, students collaborate with their peers to produce well-researched and nuanced events geared toward the Washington University community, greater St. Louis, and Internet publication.

The Mind, Brain and Behavior Program

The Mind, Brain and Behavior Program is a two-year program that introduces students to the key ideas about the mind-brain interaction by examining attention, memory and language — three central mental abilities that are primary areas of research in cognitive science. Professor-led discussion groups explore questions such as: What is the relation between attention and consciousness? Why do we misremember past experience? When the brain is damaged, why are only certain functions lost? In the second year, students engage in hands-on research under the guidance of a faculty mentor (see Mind, Brain and Behavior).

Medicine and Society

The Medicine and Society Program is an exciting opportunity for undergraduate students in Arts & Sciences to address the important social and cultural foundations of health and illness in human societies, with a specific emphasis on service and research opportunities in health-related sites in St. Louis. Students who are accepted into the Medicine and Society Program are enrolled in a year-long freshman seminar on culture, health and society in the Department of Anthropology. This seminar provides the academic foundation for future community health work in St. Louis.

Beginning in the sophomore year, students identify and select a local community health site for their internship. Internship sites may include the St. Louis city and county health departments, various nongovernmental health aid agencies, sites for delivery of clinical care and research, and health-related philanthropic foundations.

The final requirement for the Medicine and Society Program is the Rivers Project, a fourth-year paper, thesis, or other project designed to demonstrate the student's mastery of essential concepts and ideas in health and wellness. This experience provides an excellent foundation for future study in medicine and public health, as well as any of the allied health professions (see Medicine and Society (p. 640)).

Pathfinder Program

The Pathfinder Program in Environmental Sustainability gives participating students a chance to engage in interactive study of the environment with a small group of motivated undergraduates and a senior faculty member. Through case studies and field trips, students examine the issues surrounding environmental sustainability and the preservation of the environment for future generations. While participating in the Pathfinder Program, students may pursue a major in biology, chemistry, earth and planetary sciences, environmental studies, mathematics, or physics in the College of Arts & Sciences, or pursue a major within the School of Engineering & Applied Science. The Pathfinder Program supports the concept that taking interrelated courses and learning both analytical and technical skills not only positions students to undertake a senior-year capstone research

experience but also prepares them for their future careers or graduate studies (see Pathfinder).

Text and Tradition Program

This two-year program explores many of the fundamental texts and concepts of Western history, which have served as both foundations and obstacles for the development of some of the most significant cultural, moral and political institutions of modern society. Through close reading, critical analysis and frequent writing, two seminars each term explore texts by such writers as Homer, Plato, Machiavelli, Cervantes, Locke and Marx. The discovery of the self, the origin of ideas such as liberty and property, and the impact of the scientific revolution are some of the themes examined. The program's professors serve as participating students' academic advisers. Text and Tradition courses serve as introductory courses for many of the humanities departments and programs in Arts & Sciences; they also provide a foundation for students interested in pursuing an interdisciplinary major in the humanities under the auspices of the Interdisciplinary Project in the Humanities (see Interdisciplinary Project in the Humanities).

Standard Program

Although encouraged, Focus and multiyear programs are not required. Students who have already made a firm commitment to a particular discipline in the humanities, natural sciences, and social sciences, or who are uncertain about what they would like to pursue, also have a rich array of academic choices throughout their college careers. The course schedule can be either widely exploratory or oriented toward a particular objective such as pre-health studies. Such students are strongly encouraged to consider enrolling in a freshman seminar when selecting courses in consultation with their four-year academic advisers.

Major Fields of Study

At a minimum, a major consists of 18 advanced (300-level and above) units, all letter-graded and completed with at least a C-. Individual departments may specify additional units or stricter minimum-grade requirements. Students should refer to the department program pages in this *Bulletin* for program-specific requirements.

A student graduating with a Bachelor of Arts may receive no more than a total of two majors and a minor or one major and two minors.

Major declaration is initiated online through WebSTAC. The relevant department or interdisciplinary committee will receive notification of the student's request to declare the major. The declaration of major will not be processed until the student completes any action required by the department as indicated in the WebSTAC application. When the declaration of major is complete, the new major will appear in the Current Programs section of the student's Major Programs page in WebSTAC, and an adviser for the new major will be assigned by the department.

Second Majors

Students may complete more than one major, including a second major in the Olin Business School or in the School of Engineering & Applied Science. A second major is not required to earn the degree.

For students matriculating pre-2015: If a student has two majors, each major must have 18 upper-level units of credit independent of the other. Individual academic departments may enforce a stricter rule regarding double-counting of courses between majors, second majors and minors.

For students matriculating 2015 and beyond: If a student has two majors, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both majors. All advanced (300- and 400-level) courses must be unique to each major; i.e., no advanced course may "double-count" for the course work needed to fulfill the minimal requirements for either major. Should both major programs require the same course, a departmentally-sanctioned elective must be chosen to replace the course in one of the programs.

Students in business, engineering, architecture or art may choose to pursue a second major in the College of Arts & Sciences. These students will receive one degree, a BS or BFA, with two majors — one in the professional school and one in the College of Arts & Sciences.

Minor Fields of Study

Students developing a significant interest in one or more fields of study beyond the major may choose to pursue a minor in those fields. A minor is not required to earn the degree. Minors may be fulfilled in an area closely related to the major or, to add more breadth to the student's educational program, in a very different area of study. A minor typically comprises 15 to 21 units of credit, all letter-graded and completed with a grade of C– or better. At least 9 of these units of credit must be at the 300-level or above and at least half of the courses must be completed in residence at Washington University. Specific course requirements for a minor are determined by each department or program and are detailed in the department program pages in this *Bulletin*.

For students matriculating pre-2015: If a student has a major and a minor, the major must have 18 upper-level units independent of the minor. The minor must have 12 units independent of the major. If a student has two minors, each minor must have 12 units independent of the other.

For students matriculating 2015 and beyond: If a student has a major and a minor or has two minors, only introductory (100- and 200-level) courses may be counted, when relevant, toward the requirements of both programs. All advanced (300- and 400-level) courses must be unique to each program; i.e., no advanced course may "double-count" for the course work needed to fulfill either program's minimal requirements. Should

a student's major/minor programs require the same course, a departmentally-sanctioned elective must be chosen to replace the course in one of the programs.

In addition to pursuing the broad array of minor programs offered through the college, students may undertake minors in architectural studies, art, and business as well as computer science, electrical engineering, and systems engineering in the School of Engineering & Applied Science.

Minor declaration is initiated online through WebSTAC. The relevant department or interdisciplinary committee will receive notification of the student's request to declare the minor. The declaration of minor will not be processed until the student completes any action required by the department as indicated in the WebSTAC application. When the declaration of minor is complete, the new minor will appear in the Current Programs section of the student's Major Programs page in WebSTAC.

The Special Major and Special Minor

On some occasions, a student's interests may fall in the intersection of two or more formally organized major programs, in which case a student may propose a special major that brings the related course work together. Students who propose a special major should be prepared to undertake honors-level work, as all special majors must complete a capstone project of 3 to 6 units the senior year.

Students interested in creating a special major or minor must confer with the dean charged with coordinating this program. After consultation, students must submit to the coordinator a formal proposal consisting of: (1) a description of the program of study, including an explanation of the program's integrating idea; (2) a list of courses to be taken; (3) a letter of support from the proposed academic adviser; and (4) a letter of support from a faculty member in a second, related department who has approved the proposal.

A proposal for a special major or minor must be submitted no later than the fifth semester of undergraduate enrollment. The Committee on the Special Major and Minor is responsible for final action on proposals.

Special Academic Options

Overseas Study Programs

The guiding principle of international study through the College of Arts & Sciences is to encourage students to acquire the broad cultural knowledge, the languages and the practical skills to enable them to participate fully in a global society.

For information about the 100-plus study abroad programs offered in more than 50 countries, visit <http://overseas.wustl.edu> or the web pages of specific departments and programs.

Individual and Group Performance

Opportunities for individual and group performance include participation in various musical organizations sponsored by the Department of Music (such as symphony orchestra, wind ensemble and mixed choir) and in courses offered in physical education. To encourage students to pursue such physical, social and creative activities, the college allows up to 12 units of credit toward the bachelor's degree for successful completion of enrollment in individual and group performance. Exceptions to the minimums can be made for students majoring in departments requiring a large number of performance courses, such as dance, drama and music.

Internships

Students participating in internships that contribute to their academic or professional development may earn credit for unpaid internships. Registration in an internship for credit shall be conditional on satisfactory completion of the "Learning Agreement" form provided by the Career Center and the approval of this completed form by the Career Center and the internship sponsor.

Credit awarded for an internship shall correspond to the time spent in work activities. The student is expected to work 60 hours of internship experience over a period of six to eight weeks for each unit of credit. Registration for 1 to 3 units of credit is possible.

Students may complete the work for an internship over the summer and receive credit during the subsequent semester. Any internship completed this way, however, must satisfy all requirements stated here. The learning agreement must be submitted and approved prior to beginning work at the internship site.

Internship courses shall be offered for credit/no credit grades only and therefore count toward the maximum of 24 credit/no credit units that may be applied toward graduation requirements. Internships do not count toward the advanced units requirement and may count toward the major only with departmental approval. Students may not receive more than 3 units of internship credit in any semester and may count no more than 6 units of internship credit toward the 120 units required for graduation. (These regulations, along with all others governing the AB degree, are detailed on the Arts & Sciences Academic Regulations page (p. 172).)

Part-Time Study: Nontraditional Students

The university recognizes that for certain students with high educational goals, full-time study may not be feasible or appropriate. Employment in demanding positions, extensive family responsibilities or other obligations may prevent an otherwise serious and competent student from completing the bachelor's degree at a rate of 15 units a semester. With their

varied experiences outside the university, such students make valuable contributions to the classroom environment as they pursue programs of study suitable to their special circumstances. Please contact University College at (314) 935-6700 for more information about part-time study.

Tuition Reduction

Students who have completed eight full-time semesters in the College of Arts & Sciences and paid full tuition for eight semesters may seek reduced tuition for a ninth or subsequent semester, provided that they have fewer than 12 units to complete. Students must petition the Dean's Office, College of Arts & Sciences, Cupples II Hall, Room 104. Students who successfully petition for tuition adjustment for the ninth or subsequent semester will pay only for the units of credit that they attempt (proportionate to the full-time standard for tuition).

Combined Undergraduate Degree Opportunities

Students may work toward the Bachelor of Arts degree in the College of Arts & Sciences while simultaneously earning another undergraduate degree in business, engineering, architecture or art. Students undertaking this "Dual Degree" program must earn 150 units, 90 of which must be in the College of Arts & Sciences; fulfill the requirements for a major in each of the two schools; and complete the distribution requirements for both schools. Interested students should contact both a dean in the college and the designated dean in the appropriate professional school as early as possible in the undergraduate career.

Majors Across Schools

Students may earn an AB degree with a first major in the College of Arts & Sciences and a second major in business or engineering by fulfilling all the distribution requirements for the AB degree and completing the requirements both for the first major in Arts & Sciences and for the second major in business or engineering. With careful planning, this can be accomplished within the 120 units required for the AB degree although students should keep careful count to ensure that they complete at least 90 units of credit in the College of Arts & Sciences. For further information on second majors in business, visit <http://olin.wustl.edu>, and for further information on the second major in engineering, visit <http://engineering.wustl.edu>.

The Accelerated AB/AM Program

Exceptional students who bring to the university a definite commitment to a field of study in the College of Arts & Sciences and a demonstrated capacity for intensive work may be able to complete a Master of Arts (AM) degree in a one-year accelerated program after completing the AB degree. This accelerated program, which begins each year in the fall semester, is open exclusively to students graduating in the immediately preceding December, May or August. Applications may be submitted anytime during the senior year through August

1st, and Graduate Record Examination (GRE) scores are not required. The application for admission must be made to the department, which forwards the application and recommendation for admission to the Graduate School of Arts & Sciences. Application forms are available on the graduate school's website: <http://graduateschool.wustl.edu/accelerated-AB-AM-program>.

Some departments may not participate in this program, and some departments that do not otherwise offer a master's degree may provide this opportunity to Washington University undergraduates. Contact the relevant department for more specific information about its admission policies and requirements. Students admitted to the program will be regular, full-time graduate students enrolled in the Graduate School of Arts & Sciences at Washington University.

Most AM degrees in Arts & Sciences require 36 credits. The accelerated program allows Washington University undergraduates to complete a master's degree in one academic year by applying up to five 3-credit courses or four 4-credit courses (a maximum of 16 units), taken as an undergraduate at the 400 level or above, toward the master's degree requirements. For master's programs requiring fewer than 36 units, three courses at the 400 level or above (9–12 units) may be applied toward the AM degree. These undergraduate courses must be in an appropriate discipline, approved by the department, and completed with a grade of B or higher.

The AB and Master's Degrees in the Professional Schools

The College of Arts & Sciences, in conjunction with the Olin Business School, the School of Engineering & Applied Science, and the George Warren Brown School of Social Work, offers joint (3-2) degree programs. If accepted into a 3-2 degree program, a student may work toward the AB degree during the initial three years at Washington University and the professional degree during the fourth and fifth years. A student electing to do a 3-2 program must complete a combined 150 academic units to earn both the AB degree and the professional degree.

Prior to entry into a 3-2 program, a student in the College of Arts & Sciences must complete:

1. At least 90 academic units of course work offered in the College of Arts & Sciences;
2. All distribution requirements;
3. All requirements for an Arts & Sciences major; and
4. At least 18 of the 30 required units in upper-level course work.
5. A transfer student who seeks the AB degree under this plan must also complete at least four semesters in full-time residence in the College of Arts & Sciences at Washington University.

Thirty units of graduate academic credit taken during the fourth year will complete the 120 academic units required for the AB

degree. The professional degree is earned when 150 combined academic units and all degree requirements for the professional school are completed. A student must be recommended by the faculty of the professional school to the Dean of the College of Arts & Sciences in order to receive the combined degree.

Students interested in a joint 3-2 degree program should: (1) discuss degree options with a dean in the College of Arts & Sciences and with a dean in the professional school; (2) request the Eligibility Certification Form in the College of Arts & Sciences; and (3) submit the completed Eligibility Certification Form with the application for the 3-2 program to the professional school early in the spring semester of the junior year.

AB joint master's degree students are formally admitted into the graduate program of the professional school as a joint program for the fourth year. Students accepted into 3-2 joint programs will be prime in their undergraduate division for the fourth year; the professional school program will not become prime until after the eighth semester of study as an undergraduate (or after early graduation with a bachelor's degree). In the fifth year, the professional program will become prime.

Students in 3-2 programs will pay the standard full-time undergraduate tuition rate for the fourth year except for the MBA program which charges a premium above the undergraduate tuition rate. Students will receive financial aid for the fourth year based upon their eligibility for undergraduate financial aid awards, including Pell grants.

There is no commitment for undergraduate financial aid beyond the fourth year of study; students in 3-2 programs may apply to the professional programs (Social Work, MBA) for graduate student financial aid for study in the professional program beyond the fourth year.

This policy applies to the current 3-2 programs involving bachelor's/master's programs in Arts & Sciences, Engineering, Social Work and Business, and to any future WUSTL 3-2 programs.

For the 2015–16 academic year, students who applied to 3-2 programs under prior policies can be grandfathered in to honor cost expectations based upon communications at the time they applied. Many students will benefit from the new policy and most programs have elected to put the new policy into place beginning fall 2015. By fall 2016, all 3-2 programs will be consistent with the new policy.

Olin Business School

A five-year program combining an undergraduate degree and a master's degree is available to a select number of students. (For more information on the Olin Business School 3+2 Program, visit <http://www.olin.wustl.edu/academicprograms/BSBA/Pages/CombinedStudyOptions.aspx>.)

School of Engineering & Applied Science

A student may apply for the AB/MS program that leads to both a Bachelor of Arts and a Master in Computer Science. For further information visit <http://cse.wustl.edu>.

Social Work

This 3-2 program leads to an AB degree from the College of Arts & Sciences and an MSW degree from the George Warren Brown School of Social Work. Interested students should apply to the George Warren Brown School of Social Work during the first semester of the junior year. Applicants to 3-2 will be evaluated on the same basis as students applying with an undergraduate degree. All applicants must have completed at least 30 units in the social sciences (anthropology, economics, political science or psychology) and must have maintained at least a B+ average in all undergraduate work.

After the fourth year of study, students in this program complete the AB degree and earn the MSW at the end of five years.

Undergraduate Pre-professional Preparation

Students planning to pursue pre-professional studies should refer to the general recommendations given below. For more specific recommendations, visit the appropriate web pages.

Architecture

See the College of Architecture (p. 33) section in this *Bulletin*.

Business Administration

Students in the College of Arts & Sciences are welcome to consult with the associate dean for the undergraduate program in the Olin Business School concerning any aspect of preparation for careers in business. For more information, visit the Olin Business School's website: <http://olin.wustl.edu>.

Law

The two most significant factors law schools use in determining whom to admit for legal study are the undergraduate GPA (taking into consideration the difficulty of courses attempted and the breadth of study) and the score on the Law School Admission Test (LSAT). Admission to law school requires a bachelor's degree.

There is no required set of courses for pre-law study at the undergraduate level. Many law school applicants have majors in economics, English, history, philosophy and political science, but law schools also seek students with undergraduate majors in science, business, engineering and other disciplines. Whatever area(s) pre-law students choose to emphasize in their undergraduate studies, they should take courses that require significant amounts of writing, that develop analytic thinking skills, that encourage application of principles or theories to new situations, and that require original writing and revision of written

work in response to comment and critique. It is also important to learn to read and analyze complex written material and to develop sound research skills.

Economics, history, philosophy and political science courses can help to develop an understanding of the traditions behind and the development of the U.S. legal system. Logic, statistics and accounting courses also provide valuable background for legal study and the practice of law.

The pre-law advisers in the College of Arts & Sciences are available to help plan a course of study and prepare a strategy for applying for admission to law school. For more information, visit the pre-law website: http://college.artsci.wustl.edu/pre_law.

Medicine

Pre-medical students in the College of Arts & Sciences of Washington University complete the bachelor's degree before admission to a medical school. In addition to fulfilling the requirements for the AB, pre-medical students must fulfill the entrance requirements of the medical schools to which they plan to apply. Specific requirements, which may vary, are summarized in the *Medical College Admission Requirements* handbook, published annually online by the Association of American Medical Colleges.

Pre-medical students must demonstrate high academic achievement and must possess the character, responsibility and level of commitment suitable for a career in medicine. While requirements for specific medical schools are increasingly varied, most schools have traditionally required at least one year each of English, general biology, inorganic chemistry, organic chemistry and physics, with laboratory components traditionally required for all of the core science courses; additionally, students preparing to take the Medical College Admissions Test (MCAT) should take one semester each of biochemistry, psychology and sociology. Medical schools also encourage applicants to develop a broad intellectual background that includes the humanities, the social and behavioral sciences, and a demonstrated understanding of and appreciation for social and cultural diversity.

Students interested in the health professions may choose a major in any field — the humanities, the social sciences or the natural sciences — as long as they complete the pre-medical requirements. Any student planning to apply to MD–PhD programs is strongly advised to major in one of the natural sciences and to begin gaining bench research experience no later than the beginning of the sophomore year. Research opportunities are available both on the Danforth Campus and at the School of Medicine and are open to both science and nonscience majors. Health-related volunteer opportunities are also widely available.

Students entering the university planning to apply to medical school should, with the aid of their advisers, structure their course of study to include the medical school requirements.

There is no one right or best sequence of courses: there are numerous pathways to medical school. Because each student's pathway is different, students interested in a career in the health professions are encouraged to consult the pre-health deans in the college in addition to their academic advisers. Additional information can be found at the pre-health website.

Physical Therapy

Students interested in pursuing a career in physical therapy must complete a bachelor's degree before entering the Doctor of Physical Therapy (DPT) program.

Prerequisites for the DPT vary from school to school but generally include the following course work:

- 8 units in general biology
- 8 units in chemistry with laboratories
- 8 units in physics with laboratories
- 3 units in anatomy (human, vertebrate, comparative or anatomical kinesiology)
- 3 units in physiology (human physiology preferred)
- 3 units in trigonometry (calculus is acceptable)
- 3 units in statistics
- 6 units in psychology (to include abnormal psychology)
- 6 units in English (to include English composition or an upper-level writing course)
- 6 units in social sciences or the humanities

DPT programs also require applicants to take the Graduate Record Examination (GRE) and to demonstrate competence in medical terminology. Admission factors include grade point average, GRE scores, letters of recommendation and written essays.

Interested students will find additional information about Washington University School of Medicine's Program in Physical Therapy at <http://physicaltherapy.wustl.edu>.

University College

Students in the college may enroll in course work offered by University College as long as they do not exceed one course a semester and a maximum of 24 units. University College courses are subject to the degree requirement stipulating that only 30 units from other schools in the university may be applied to the Bachelor of Arts degree. University College courses do not fulfill distribution requirements and can only count for a major or minor with approval from the relevant department. Students in the College of Arts & Sciences do not receive credit for online courses offered by University College.

Degree Requirements

The faculty of the College of Arts & Sciences believes each student should strive toward breadth and depth of study, as represented in the formal requirements. The faculty also

believes that primary responsibility for selection of an academic program rests with the student, in consultation with academic advisers. This freedom of choice carries with it a corresponding responsibility for the consequence of such choices, and students are therefore expected to familiarize themselves with and meet the requirements detailed below.

Planning

The degree requirements for the Bachelor of Arts degree in Arts & Sciences are designed to provide students with strong and sustained training in writing and numerical applications; to enable students to construct a coherent program in which courses reinforce each other in challenging and productive ways; and to take advantage of two distinctive features of the academic environment at Washington University — the strong tradition of cooperation among faculty working in different disciplines and the fact that teaching and learning at Washington University draw energies from an environment of vigorous and creative research.

The College of Arts & Sciences regards active student engagement in curricular planning as central to successful student learning. Each semester, students' advisers will help them project a personalized academic plan that responds to what they have already learned — about the university, about the structure and aims of intellectual disciplines, and about themselves.

By the end of the sophomore year, students must have declared a major and constructed and nominated a preliminary online curricular plan that will satisfy all the following General Education requirements:

Basic Skills

A. College Writing I (3 units): Students demonstrate proficiency in reading and writing English and begin to develop mature skills in framing and revising arguments by completing course work determined by The College Writing Program with grades of C– or better. This requirement should be completed in the freshman year.

B. Applied Numeracy (3 units): Students develop their skills in numerical applications by completing one of an approved list of "AN" courses with a grade of C– or better. Students often find that there is an AN course in their major field of interest. This course may also satisfy other degree requirements.

C. Social Differentiation (3 units): Students take one course that substantially engages in the analysis of such forms of social differentiation as race, class, ethnicity and gender. This course, which may be taken credit/no credit, must be selected from an approved list of "SD" courses; it may also satisfy other requirements.

D. Writing-Intensive Course (3 units): To consolidate their written communication skills, students must take a writing-intensive course, preferably in their major field. The

course, selected from an approved list of "WI" courses, must be completed with a C– or better; it may also satisfy other requirements.

Area Requirements

A. Students must complete course work in each of the following academic areas:

1. Humanities (HUM): three courses totaling at least 9 units
2. Natural Sciences and Mathematics (NSM): three courses totaling at least 9 units
3. Social Sciences (SSC): three courses totaling at least 9 units
4. Linguistic and Cultural Diversity (LCD): in this area, students take either three sequenced courses of at least 3 units each in a single foreign language, or at least four courses designated "LCD" of at least 3 units each

Up to 12 units of the area requirements may be taken credit/no credit.

B. To achieve depth and coherence, students must complete three integrations in at least two of the four areas of study (HUM, NSM, SSC, LCD). There are four types of integrations:

- Majors, second majors and minors
- Focus and other multisequence first-year programs
- Designated study away programs
- Integrated inquiries

For a detailed list of Integrations, visit the Course Listings website.

The Major

Students must complete a major of no fewer than 18 units of courses numbered 300 or above with a grade of C– or better. Degree completion is based on the primary major of record. At least half of the units for the major must be completed in residence. Students are strongly encouraged to complete a capstone experience in their major as a way of culminating their undergraduate education.

For more details regarding majors — including information on second majors, special majors, and majors across schools — visit the main Arts & Sciences (p. 161) section of this *Bulletin*. For more information regarding specific departments' major requirements, visit the Majors pages (p. 175) of this *Bulletin*.

Additional Requirements

A. Students must complete 120 units with at least 30 units in advanced courses (numbered 300-level and above). The 30 units in advanced courses may include the number of advanced units required for the major.

B. Students must have an overall GPA of at least 2.0.

C. Students must earn the final 30 units toward the degree at Washington University, enrolled in the College of Arts &

Sciences. Students pursuing 3-2 degrees should follow the requirements laid out by their master's programs.

D. Students must be recommended by the College of Arts & Sciences to the Board of Trustees.

Regulations

A. No more than 24 units may be earned using the credit/no credit option, and no more than 12 of the 24 credit/no credit units may be for area distribution requirements.

B. No more than 15 units of pre-matriculation credit may be counted toward the degree. Pre-matriculation sources include Advanced Placement (AP), International Baccalaureate (IB), British Advanced (A) Levels, course credit earned by proficiency (i.e., back credit), and college courses taken after the junior year in high school but not applied toward the high school diploma. Credits earned via the High School Summer Scholars or High School College Access programs through University College are considered to be pre-matriculation units and are subject to the same regulation.

C. Students may not earn more than 12 units toward the bachelor's degree in group and/or individual performance courses. Exceptions may be made for students majoring in departments requiring a large number of performance courses for the major, such as dance, drama and music.

D. No more than 12 units of work may be taken outside the College of Arts & Sciences during the first and sophomore years. Thereafter, additional work may be taken with the approval of the adviser, provided that the student earns at least 90 units of credit in Arts & Sciences course work.

E. No more than 18 units of credit in independent study may be applied to the AB; no more than 6 units of independent study may be attempted in a single semester.

F. No more than 6 units of internship credit may be applied to the AB; no more than 3 units of internship credit may be attempted in a single semester.

G. A student may receive no more than a total of two majors and one minor or one major and two minors.

Transfer Students

Transfer students matriculating in the academic year 2015–16 will follow the requirements of the Integrated Inquiry Curriculum, outlined above. Where appropriate, previous course work may be applied to the distribution requirements based on the following guidelines:

A. Transfer students who have not taken a college writing course at their prior school will take College Writing 1 in their first year at Washington University. Students who have taken such a course may be eligible to submit a writing portfolio to the College Writing Program for evaluation. The program director will review the portfolio to determine if the College Writing 1 requirement has

been satisfied or if the student must complete additional writing course work.

B. The transfer advisers will evaluate a student's transcript on an individual basis. Generally speaking, a student transferring after one year at another school may count the other institution's course work toward the college's area requirements; however, the three required integrations must be completed through courses taken in residence.

C. Transfer students must be enrolled for at least four consecutive full-time semesters to satisfy the residency requirement. They must complete a minimum number of units at Washington University and a minimum number of units in the College of Arts & Sciences, according to the following table. No more than 3 units per semester may be taken on a credit/no credit basis.

Semesters in Residence	A&S Units in Residence	Total WUSTL Units in Residence
7 semesters	78 units	105 units
6 semesters	69 units	90 units
5 semesters	57 units	75 units
4 semesters	45 units	60 units

Finalization of the Transcript

Conferral of the degree finalizes the student's academic record at Washington University. No changes can be made to the student's academic record after May 31 for a spring degree, October 31 for a summer degree, or January 31 for a fall degree. All students are strongly advised to obtain a copy of their final transcript, available for order from the Office of the University Registrar via WebStac.

Academic Honors & Awards

Dean's List: At the end of each semester, in recognition of exceptional scholarship, the college compiles a list of those students whose work has been particularly worthy of commendation. Students will be cited on the Dean's List if they complete a minimum of 14 units of graded work while achieving a grade point average of 3.6 for the semester. No incomplete or "N" grades may be outstanding as part of the semester record. All work must be completed and grades posted by the first day of the following semester in order to be considered for Dean's List. For spring semester courses, all work must be completed by the beginning of Summer Session II (typically mid-June).

College Honors: Upon assessment by the College Office, the AB with College Honors will be awarded to any student who achieves college-wide academic excellence as measured by a cumulative grade point average of 3.6 or better throughout eight semesters and who does not receive Latin Honors.

Latin Honors: To be eligible for Latin Honors, the student must have maintained a 3.65 grade point average through the

sixth semester and must be accepted for candidacy by the relevant department or program. Latin Honors candidates must enroll in such courses as their department or program may require, satisfactorily complete a significant project appropriate to the nature of the discipline, and pass such written and/or oral examinations as the department or program may set. To earn such honors, candidates must also have maintained the minimum 3.65 grade point average through the final semester.

Upon certification by the department that the Honors program has been satisfactorily completed, the student may be awarded the AB cum laude, magna cum laude, or summa cum laude according to the following proportions: the top 15 percent in overall grade point average of the full cohort of Latin Honors candidates who complete the necessary requirements of their major departments will graduate summa cum laude; the next 35 percent magna cum laude; the next 50 percent cum laude.

To be eligible for Latin Honors, transfer students must have earned a minimum of 48 letter-graded Washington University units prior to the final semester. Grades earned at other institutions do not figure in the calculation of minimum averages required for eligibility for Latin Honors.

Phi Beta Kappa: For more than 200 years, election to Phi Beta Kappa has been a distinctive recognition of intellectual accomplishment in the liberal arts and sciences. The Washington University chapter, Beta of Missouri, established in 1913, strives to enhance worthy intellectual endeavors and to recognize individual achievement.

Candidates for Phi Beta Kappa should have demonstrated both superior scholarship and breadth and depth of interest in the liberal arts. Study of a foreign language and of mathematics, while not required, strongly enhances candidacy. Extensive study in pre-professional fields detracts from candidacy.

Students do not apply for Phi Beta Kappa; rather, each year the Washington University chapter elects students into membership from the College of Arts & Sciences. The chapter also gives the annual Burton M. Wheeler Book Award for distinguished achievement in the first year. Selection committees are composed of Washington University faculty who are members of Phi Beta Kappa.

Departmental Prizes and Awards

Several departments recognize the superior achievement of graduating seniors with election to the honor societies of their major fields. These honor societies include Sigma Gamma Epsilon for earth and planetary sciences students, Omicron Delta Epsilon for economics students, Delta Phi Alpha for German students, Phi Alpha Theta for history students, Sigma Iota Rho for international and area studies students, Pi Mu Epsilon for mathematics students, Mu Phi Epsilon for music students, Pi Sigma Alpha for political science students, and Psi Chi for psychology students.

Departments may recognize work a student has accomplished within the major by awarding the major with highest distinction, high distinction, or distinction.

In a number of academic fields, special recognition is given to students whose accomplishments have been exceptionally noteworthy. The majority of such awards carry modest monetary prizes and include the following, listed alphabetically by department:

- Best essay on any subject related to African-American culture and life in the United States (African and African-American Studies)
- Henry Hampton Prize for Best Civil Rights Essay
- James Baldwin Essay Prize for Best Essay on African-American Culture and Life in the U.S.
- Julius Nyerere Essay Prize for Best Essay on African Culture and Life
- Louis Lomax Journalism Prize in African and African-American Studies
- Ralph Bunche Prize for Best Political Science Essay about Africans or African Americans
- Sylvia Wynter Essay Prize for Best Essay on African Culture and Life Outside of the U.S.
- Lynne Cooper Harvey Undergraduate Writing Prize in American Culture Studies
- John W. Bennett Prize to the Outstanding Graduating Senior in Anthropology
- Mark S. Weil Prize for Distinction in Art History and Museum Practice
- Murphy Family Prize for Outstanding Honors Thesis in Art History and Archaeology
- Yale Book Prize for Distinction in Art History and Archaeology
- Harrison D. Stalker Prize in Biology
- Marian Smith Spector Prize for Outstanding Graduate in Biology
- John C. Snowden Prize for Outstanding Senior in Chemistry
- The Hemholtz Award in Chemistry
- The Lipkin Award in Chemistry
- The Wahl Award in Chemistry
- The Weissman Award in Chemistry
- Stanley Spector Memorial Award for Outstanding Paper in East Asian Languages and Cultures
- Ansehl Prize for Excellence in Chinese
- Yukiko Takahashi Prize for Excellence in Japanese
- Carl Conrad Prize for Excellence in Classical Studies
- Eugene Tavenner Prize for Excellence in the Study of Classics
- Edward Weltin Award for Excellence in the Study of Ancient History
- Liselotte Dieckmann Prize for Excellence in Comparative Literature
- William H. Matheson Prize for Excellence in Comparative Literature
- A.E. Hotchner Playwriting Competition Award
- Annelise Mertz Memorial Award for Outstanding Achievement in Modern Dance
- Ian D.W. Cramer Prize for Outstanding Achievement in Dance
- John J. Jutkowitz Memorial Prize for Outstanding Contributions in Performing Arts
- Margaret Ewing Memorial Prize for Outstanding Achievement in Acting
- Stephen H. Duncan Prize for Outstanding Achievement in Design and Technical Theatre
- Courtney Werner Memorial Prize for Outstanding Academic Achievement in Earth and Planetary Sciences
- Ernest L. Ohle Jr. Award for Outstanding Potential in Earth and Planetary Sciences
- Margaret E. Bewig Memorial Field Camp Award for Academic Merit in Earth and Planetary Sciences
- Adam Smith Prize for Excellence in Economics
- Hyman P. Minsky Prize for Excellence in Economics
- Olin Prize for Excellence in Economics
- Howard Nemerov Award Prize in Poetry
- James Merrill Prize for Poetry
- Julia Viola McNeely Prize for Poetry
- Norma Lowry Memorial Prize in Poetry
- Roger Conant Hatch Prize for Lyric Poetry
- F. Ward Denys Prize for Critical Prose
- Herbert E. Metz Prize for Literary Criticism
- Leanna Boysko Prize for Best Essay in English Literature
- Admussen Prize for Outstanding Senior Honors Thesis in French
- Cecilia L. Hospes Scholarship for Study Abroad in Germany
- David Bronsen Prize for Excellence in German Studies
- Raoul Wallenberg Prize for Excellence in Swedish Studies
- J. Walter Goldstein Prize for Best Senior Thesis in History
- Rowland T. Berthoff Award in History
- Shirley McDonald Wallace Prize in History
- Madeleine Albright Scholarship for Special Scholarly Achievement in International and Area Studies
- Outstanding Senior Honors Thesis in International and Area Studies
- The International and Area Studies Portfolio Prize
- Stone Prize for Excellence in International Studies Research
- Paul and Silvia Rava Prize for Excellence in Italian Studies

- David and Sarah Visenberg Prize for Outstanding Thesis in Jewish Studies
- Steven S. Schwarzschild Prize for Overall Excellence in Jewish Studies
- Martin Silverstein Award for Outstanding Student in Mathematics/Statistics and Probability
- Putnam Examination Prize for Mathematics
- Ross Middlemiss Prize for Outstanding Mathematics Major
- Antoinette Frances Dames Award for Productive Scholarship in Music
- Clare M. Westmont Award in Music
- The Friends of Music Award
- Lewis B. Hilton Award in Music
- Helen Stenner Memorial Essay Prize in Philosophy
- Nishi Luthra Prize for Outstanding Graduate in Philosophy
- Greg Delos Prize for Undergraduate Research in Physics
- Robert N. Varney Prize for Excellence in Introductory Physics
- Antoinette Frances Dames Prizes for Lower-Division Paper in Political Science
- Antoinette Frances Dames Prizes for Upper-Division Paper in Political Science
- Antoinette Frances Dames Prizes for Best Senior Honors Thesis in Political Science
- Arnold J. Lien Prize for Outstanding Graduate in Political Science
- Grossman-Alexander Prize for Outstanding Graduate in American Politics
- Robert H. Salisbury Prize for Initiative, Leadership, and Service in Political Science
- Todd Lewis Friedman Memorial Prize for Outstanding Work in Comparative or International Politics
- William Benton Parshall Prize for Outstanding Paper on Women in Politics
- Hyman Meltzer Memorial Award for Undergraduate Research in Psychology
- John A. Stern Award for Undergraduate Research in Psychology
- Louis G. Zelson Prize for Study Abroad in Spain
- Sherman Eoff Prize for Excellence in Spanish
- Helen Power Women, Gender, and Sexuality Studies Award for Scholarship and Service

Academic Regulations

Attendance

Successful education at the college level depends to a large extent on regular attendance at classes and laboratories. The College of Arts & Sciences has no fixed rules for "cuts" or "excused absences" but leaves to the judgment of each

department or instructor the number of absences of any kind a student may have and still expect to pass a course. The faculty expects each instructor to give reasonable consideration to unavoidable absences and to the feasibility of making up missed work. The student is expected to explain to instructors the reasons for such absences and to discuss the possibility of completing missed assignments.

Units and Grades

The grading system used by the College of Arts & Sciences assumes that evaluation is useful to effective learning and that grades provide an indicator of accomplishment to the student, to advisers and the College Office, to graduate and professional schools, and to employers to whom the student chooses to submit them. Grades are symbols of achievement in a particular endeavor and should not be confused either with achievement itself or with personal worth.

Grades are important, particularly for students with pre-professional interests, but the student whose concern for grades is primary may lose sight of the total educational process.

Grade	Points per Unit
A+	4.0
A	4.0
A-	3.7
B+	3.3
B	3.0
B-	2.7
C+	2.3
C	2.0
C-	1.7
D+	1.3
D	1.0
D-	0.7
F	0.0
CR	Credit awarded, work not given finer evaluation
NCR	No credit awarded due to unsatisfactory work
I	Course work incomplete
W	Withdrawal
R	Repeat
L	Successful audit
Z	Unsuccessful audit
N	No grade submitted
S	Satisfactory thesis work
U	Unsatisfactory thesis work

Grades earned in physical education courses are not included in calculating the student's GPA.

Auditing a Course

Students may register for a specific course as an auditor, which entitles them to all the privileges of a regularly enrolled member of the class. Audit courses do not count toward the degree. Consult the instructor on the requirements of a successful audit, as unsatisfactory performance results in a grade of Z. A successful audit results in a grade of L.

Incomplete Grades

If a student experiences medical or personal problems that make satisfactory completion of course work difficult or unlikely, he or she may request a grade of Incomplete (I) from one or more instructors. In such a situation, the student should take the following steps:

1. Meet with the instructor before the final examination or due date for the final paper to discuss the request.
2. If the instructor consents, agree on the work remaining to complete the course and on a date when it will be submitted.

If these steps are not followed, the instructor is under no obligation to award a grade of I. Failure to submit completed work by the last day of classes of the next full semester will result in the I grade being changed automatically to a grade of F. For spring semester courses, this will be the last day of summer classes, typically mid-August.

By action of the faculty of the College of Arts & Sciences and the ArtSci Council, the college limits the number of accrued grades of Incomplete (I). The policy is intended to protect the student from building an overwhelming burden of unfulfilled course work. The regulation reads as follows: "Students who accrue three or more Incompletes will not be permitted to enroll for any subsequent semester until the number is reduced to two or fewer." Should students have too many Incompletes, they will be declared ineligible for subsequent semesters until they have complied with the regulation. Compliance is normally achieved by the posting of grades online, but it also may be achieved by a note from the professor(s) to the College Office confirming that the student has turned in all requisite assignments for the relevant class(es).

Pass/Fail Option

To encourage students to enroll in courses they might not otherwise take, the faculty has established the credit/no credit option under which a student may register in courses and receive a grade of credit (CR) or no credit (NCR). In any semester, a full-time student may enroll in one course under the credit/no credit option. A maximum of 24 units earned under this option may be applied toward the AB degree. Students must designate which course is to be taken under the credit/no credit option each semester at the time of registration. No change into or out of the option may be made after the dates designated in the dates and deadlines calendar, published online in Course Listings each semester.

No more than 12 of the 24 units allowed for the credit/no credit option may be applied to area distribution requirements.

It is the student's responsibility to discuss with the faculty member what constitutes a successful pass/credit in a particular course. Although the general pass mark is a C-, instructors have the discretion to set the pass mark higher in their individual courses.

The first-year writing course, the writing-intensive course, the applied numeracy course, and courses in the major and minor are excluded from the credit/no credit option. Pre-professional and prospective graduate students should also consider seriously the strong probability that professional schools may seek more definite grades than CR in courses that are required or strongly recommended for admission to professional or graduate study.

A few courses particularly designated by departments may require enrollment on a credit/no credit basis. When so required, students are permitted to elect an additional course to be taken credit/no credit but should consider carefully the consequences of that choice.

Reading Days and Final Examination Period

When registering for classes at Washington University, students commit to all course requirements including the examination procedures chosen and announced by the course instructor. In selecting courses, students are advised to take note of all final exam information. Students anticipating conflicts in their final examination schedule should seek to resolve them with the relevant instructors before enrolling. Students should not register for courses that result in three or more final examinations on one day. If a student does so, the instructors are not obligated to offer an alternative exam.

Final exam days and times are subject to change. The most current final exam schedule information can be found on the Course Listings website.

Minimum and Maximum Course Loads

The average course load necessary to fulfill the required 120 units for the bachelor's degree in a timely fashion is 15 units — typically five courses — in each semester. Except for reasons of health or other special circumstances, students must take a minimum of 12 units to be considered full-time. Students may not enroll for more than 21 units without permission and an additional per-unit tuition charge. Any enrollment between 12 and 18 units is considered typical.

Courses in the college that require more preparation and class time than average — foreign languages, mathematics and science — may carry 4 or 5 units of credit. When enrolled in these and other demanding courses, students should consider

taking fewer than 15 units of academic work in a particular semester, then balancing such intensive semesters with modest increased units in subsequent semesters.

Repeating a Course

Students whose performance in a course has not met their expectations are permitted to retake the course, receive a second grade, and have the letter R, denoting the retake, placed next to the grade for the first enrollment. All registrations will show on the transcript; however, only the grade and units of the final enrollment will be used to calculate the GPA.

Please note: This procedure is not pedagogically sound and should be avoided in all but serious cases, such as a grade of D in a course required for the major.

Regulations: While courses initially taken credit/no credit (pass/fail) may be retaken for a letter grade, courses initially taken for a letter grade **must** be retaken for a letter grade. Credit earned in the original enrollment will not be revoked should a failing grade be earned in the second or subsequent enrollments. Except in the case of a retake of an unsuccessful audit, the retake policy will not be invoked if the grade option for any of the enrollments is audit.

No student may use the retake option to replace a failing course grade received as a sanction for violation of the Academic Integrity Policy.

Academic Probation and Suspension

Students are expected to maintain the highest level of scholarship during their time at Washington University. At a minimum, however, students must meet the standards set by the faculty as well as those mandated by the U.S. Department of Education. Those who do not complete at least 12 units or achieve a semester grade point average of 2.0 or better for each semester are subject to probation or, in extreme cases of poor academic performance, suspension. In certain cases, students who have completed at least 12 units and have a semester grade point average of at least 2.0 for each semester may still be placed on academic warning or probation if the Committee on Academic Progress identifies areas of significant concern about a student's progress.

Students must make acceptable progress toward meeting degree requirements. Students must be on pace to complete their program by attempting no more than 150 percent of the credits required. Anytime students fall below completing 2/3 or fewer of the credits they have attempted overall, they are considered to not be achieving satisfactory academic progress (SAP). The College will work with those students to develop a plan to help them achieve acceptable pace within a set period of semesters. Additionally, if it is determined that a student cannot complete his or her program within the 150 percent maximum

credits, the student may not continue their program of study at Washington University.

In the event of an academic warning or probation, or failure to meet SAP, the student will be matched with a progress counselor for the following semester. The student must complete an academic agreement with the progress counselor to map out how improvement will be achieved. Failure to establish these guidelines with the progress counselor by the deadline the Committee provides may result in the termination of the student's enrollment for that semester. Furthermore, should a student agree to, but persistently fail to abide by, the terms established in the agreement, suspension may be invoked during the semester.

In order to be eligible for a return to good academic standing, a student on warning or probation must complete at least 12 units of credit and earn no single grade of C– or lower. Students who do not meet this standard may be subject to academic suspension from the college. Students suspended for academic deficiency are not eligible for readmission to the College of Arts & Sciences until they demonstrate, under the conditions set for each individual case, a capacity to work productively at the level required by the college curriculum.

Leaves of Absence

For certain students, time spent away from the academic setting is of great value in discovering objectives and gaining experiences not available within the academic community. Undergraduates in good standing at the completion of a term are eligible to take a leave of absence (LOA) upon petition to the College Office. Students on an LOA are assured reinstatement for the next two years. Before returning, students are asked to notify the College Office and submit a Reinstatement Form at least six weeks prior to the beginning of the appropriate term.

A student wishing to take a medical leave of absence (MLOA) must have a recommendation from Student Health Services submitted to the appropriate dean in the College Office prior to leaving and prior to re-enrollment. Upon reviewing the recommendations from Student Health Services and the student's file, the dean in the College Office will decide whether or not to grant the request for the MLOA and/or for re-enrollment.

Transfer Credit

With preapproval, courses from accredited colleges and universities can be transferred to Washington University and will count toward a student's 120 units required for the Bachelor of Arts degree; such courses may also serve as prerequisites to advanced courses and may count, with prior departmental approval, toward a student's major or minor. They do not, however, substitute in Integrations or count toward other Arts & Sciences distribution requirements. No transfer credit will be accepted for courses taken while a student is suspended from Washington University for violations of the University Student Judicial Code or Academic Integrity Policy.

For further information pertaining to transfer credit, matriculating freshmen should visit the Pre-matriculation Credit (p. 161) section in this *Bulletin*; transfer students, visit the Transfer Students (p. 168) section in this *Bulletin*.

University College Courses

Students in the College may enroll in course work offered by University College as long as they do not exceed one course a semester and a maximum total of 24 units. University College courses are subject to the degree requirement that stipulates only 30 units from any of the other schools of the university may be applied to the Bachelor of Arts degree. University College courses do not fulfill distribution requirements and can only count for a major or minor with approval from the relevant department. Students in the College of Arts & Sciences do not receive credit for online courses offered by University College.

African and African-American Studies

The program in African and African-American Studies offers opportunities for students to explore the social, political and intellectual history as well as the literature, culture and artistic life of various peoples in the world who are African or of African descent.

The program examines a wide spectrum of experiences and issues and is both multidisciplinary and interdisciplinary in its approach. Courses are offered in the humanities, the social sciences and the performing arts. Main areas of concentration are East, West and Central Africa; the United States; and the Caribbean.

Students who major in the program are encouraged to design a course of study that focuses on either a particular area of interest or a more comprehensive examination of black culture and life. Students also have opportunities to do research with faculty or to take internships with organizations such as the Missouri Historical Society. Our summer programs in Kenya and Senegal as well as study abroad in other African countries can further enrich the student experience.

Courses in the program are numbered to assist students to progress from introductory courses (100-/200-level), to intermediate courses (300-level or higher), to advanced courses (400-level). The program also regularly sponsors lectures on topics of interest in all areas of the black experience. In many cases, lecturers participate in classes by giving special lectures within the classroom setting.

Departmental Prizes: The program also sponsors writing competitions that include monetary awards. They include the James Baldwin Prize for the best essay on any aspect of black culture and life in the United States; the Julius Nyerere Prize for the best essay on any aspect of black culture and life in Africa; the Sylvia Wynters Prize for the best essay on any aspect of black culture and life in the Caribbean, Central America, South America or North America (outside of the United States); the Henry Hampton Prize for the best essay on the civil rights movement or any book by the Rev. Dr. Martin Luther King Jr.; and the Ralph Bunche Prize for the best essay related to Africans or people of African descent and political science.

Majors

The Major in African and African-American Studies

Total units required: 27 credits

Required courses:

AFAS 208B	African-American Studies: An Introduction	3
AFAS 209B	African Studies: An Introduction	3
AFAS 401	Senior Seminar	3

Elective courses: 18 units in advanced classes from the selections within our course offerings

Additional Information

Co-Curricular Requirements for Majors: The program regularly sponsors lectures and events, such as plays, film festivals, exhibits, field trips, and panels and speakers, which focus on contemporary or perennial topics of interest in all areas of the black experience. In many cases, guest lecturers and artists visit classes and interact directly with students. These program-sponsored events are, in part, designed to foster a vibrant social and intellectual community within the program and

to give majors and minors a sense of identity of what it means to be part of the African and African-American Studies community. Majors must attend a minimum of six (and at least two per year) and minors must attend a minimum of three (and at least one per year) such African and African-American Studies-sponsored events to fulfill the program's co-curricular requirement. (African and African-American Studies subsidizes events that require admission fees.)

Senior Honors: If a student maintains an overall grade point average of at least 3.65 and a major grade point average of 3.50 by the second semester of her or his junior year, she or he may be eligible to conduct a Latin Honors thesis with a core faculty member in the program in African and African-American Studies. Completed application forms for Honors should be submitted to the honors program director as early as possible, preferably before May 1 of the junior year.

Minors

The Minor in African and African-American Studies

Units required: 18

Required courses:

AFAS 208B	African-American Studies: An Introduction	3
AFAS 209B	African Studies: An Introduction	3

Elective courses: 12 units at the 300 level or above. Courses should be selected in consultation with the adviser.

Additional Information

Co-Curricular Requirements for Minors: The program regularly sponsors lectures and events, such as plays, film festivals, exhibits, field trips, and panels and speakers, which focus on contemporary or perennial topics of interest in all areas of the black experience. In many cases, guest lecturers and artists visit classes and interact directly with students. These program-sponsored events are, in part, designed to foster a vibrant social and intellectual community within the program and to give majors and minors a sense of identity of what it means to be part of the African and African-American Studies community. Majors must attend a minimum of six (and at least two per year) and minors must attend a minimum of three (and at least one per year) such African and African-American Studies-sponsored events to fulfill the program's co-curricular requirement. (African and African-American Studies subsidizes events that require admission fees.)

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L90 AFAS.

L90 AFAS 1002 Foundations in African and African-American Studies

Designed to introduce the student to issues in African and African-American Studies and how students with AFAS degrees utilize their knowledge in graduate and professional programs or the working world. Particular attention is paid to the discipline of African and African-American studies, which engages with the artistic, cultural, historical, literary and theoretical expressions of the peoples and cultures of Africa and the African Diaspora. Faculty members as well as St. Louis professionals give one-hour lectures on their particular disciplinary approach, their research or their professional lives. Students are required to attend three outside lectures or performances. May be taken before declaring major, and may be taken by non-majors. Credit 1 unit. A&S: TH A&S IQ: HUM Arch: HUM Art: HUM EN: H

L90 AFAS 103D Beginning Swahili I

A beginning language course emphasizing acquisition of reading, writing and conversational skills in Swahili language. Through video and other multimedia presentations, students also are introduced to the culture of Swahili-speaking communities living in more than a dozen African countries. Five hours a week including culture and language laboratory hours. This course is strongly recommended for students participating in the Summer in Kenya Program. CBTL course. Credit 5 units. A&S: LA A&S IQ: LCD, LS Art: LNG BU: IS

L90 AFAS 1045 Wolof Language and Culture

This course introduces students to Wolof language and culture. Wolof is a West African language spoken in Senegal and the Gambia. It is also spoken on a smaller scale in Mauritania, Mali, French Guinea and in the migrant communities in the United States and France. This is the first course of a beginning-level of a Wolof program. In order to acquire a basic proficiency, students practice speaking, reading, writing and listening. Each module begins with a thematic and practical dialogue from which we can study vocabulary, aspects of grammar as well as a cultural lesson. Interactive material, including texts, images, videos, films and audio, are provided. Its aim is to provide students with knowledge of the basic structures of the language and the ability to communicate. Students also learn important aspects of life and culture of the Wolof. Credit 3 units. A&S: LA A&S IQ: LCD Art: LNG BU: IS EN: H

L90 AFAS 1046 Wolof Language and Culture II

This course continues the introductory study of Wolof language and culture. Wolof is a West African language spoken in Senegal and the Gambia. It is also spoken on a smaller scale in Mauritania, Mali, French Guinea and in the migrant communities in the United States and France. In this second course of a beginning level of a Wolof program, students practice speaking, reading, writing and listening. Each module begins with a thematic and practical dialogue from which we can study vocabulary, aspects of grammar as well as a cultural lesson. Interactive material, including texts, images, videos, films and audio, are provided. The course's aim is to provide students with knowledge of the more advanced structures of the language and the ability to communicate. Students learn important aspects of life and culture of the Wolof. Credit 3 units. A&S: LA A&S IQ: LCD Art: LNG BU: IS EN: H

L90 AFAS 104D Beginning Swahili II

Second-semester Swahili language course emphasizing conversational competence and knowledge of Swahili-speaking

cultures of East Africa. In addition to learning grammar and vocabulary sufficient to allow a student to perform basic survival tasks (asking for directions, buying a ticket for travel, checking into a hostel, ordering food) in Swahili, students also are introduced to authentic Swahili texts including plays, short stories and newspapers. Students have an opportunity to practice their acquired language skills by interacting with Swahili-speakers in the St. Louis region. Prerequisite: AFAS 103D. CBTL course. Credit 5 units. A&S: LA A&S IQ: LCD, LS Art: LNG BU: IS EN: H

L90 AFAS 1096 Ragtime

Same as Music 109
Credit 2 units. A&S: LA A&S IQ: HUM BU: HUM

L90 AFAS 111 Freshman Seminar: Race and Ethnicity on American Television

This course presents a historical overview of the forms that racial and ethnic representations have taken in American television. The course charts changes in public perception of racial and ethnic difference in the context of sweeping cultural and social transformations. The course examines notions of medium and ponders the implications for these identities of the contemporary practice of "narrowcasting." Required Screening. Same as Film 110
Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD Art: HUM, HUM BU: BA EN: H

L90 AFAS 1181 Freshman Seminar: Beats and Rhymes — Hip-Hop in American Culture

On its surface, hip-hop is fundamentally about making music: a creative combination of beats, flow, samples and rhymes. And yet, beneath the surface lies so much more. Although hip-hop culture writ large (lyrics, fashion, dance and lifestyle) influences many on a global level, this class explores the meaning of hip-hop primarily from African-American informed social and political perspectives. In what ways does hip-hop intersect with American culture, specifically on the fields of race, ethnicity, class, gender and sexuality? Without a doubt, it does so in intriguing, contested and often problematic ways. Credit 3 units. A&S: TH A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 1201 Freshman Seminar: Race and Performance

What does it mean to "act black"? What about "acting Jewish"? This course looks at performances of racial and ethnic identity, mostly in the United States, mostly in the 20th century. We examine novels (such as Nella Larsen's *Passing*), plays (such as Anna Deavere Smith's *Fires in the Mirror*), and performances of everyday life (such as "Cowboys and Indians") to investigate the performance of race in public. Once we begin to explore the social and cultural performance of race, will it all turn out to be "only" an act? Same as Drama 120
Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD BU: BA EN: H

L90 AFAS 127 Popular Music in American Culture

American popular music from 1800s to the present, with emphasis on technology, social and political contexts, and popular music as a realm of interracial encounter. Musics covered include early jazz, classic blues, swing, classic pop, rock and roll, soul, disco, hip hop and the changing relationship between popular music, film, and television.

Same as Music 1022
Credit 3 units. A&S: LA, SD A&S IQ: HUM, SD BU: HUM EN: H

L90 AFAS 1277 Musics of the World

This course provides an introduction to the field of ethnomusicology as well as a survey of selected musics from around the world. We investigate not only musical sound itself but how music interacts with other cultural domains, such as religion/cosmology, politics, economics and social structure. The course uses case studies from regions around world (such as Indonesia, India, the Middle East, Sub-Saharan Africa and Latin America) to illustrate the conceptual problems and methodologies raised by the cross-cultural study of music, as well as acquaint students with the rich variety of music around the globe.

Same as Music 1021
Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: HUM EN: H

L90 AFAS 136 Freshman Seminar: The Concept of Race in Black Thought

Although many people now believe that the idea of biologically distinct human races is a socially constructed fiction, the color of one's skin can play a major role in determining such aspects of life as where one lives, the quality of one's education, and one's access to health care. Clearly, perceptions of race still hold a great deal of power, whether or not they are based upon scientifically sound reasoning. Therefore, we must attempt to understand how notions of race emerged and where they seem to be headed. In this course, we examine the role of race in American life, past and present.

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 162 Freshman Seminar: Contextualizing Problems in Contemporary Africa

Africa is typically presented in the United States and international media as a continent in constant turmoil. This freshman seminar challenges this simplistic and common myth by exploring the historical and global roots of key issues facing contemporary Africa. Case studies include the 1994 genocide in Rwanda; post-Apartheid violence in South Africa; HIV/AIDS in Africa; oil and corruption in Nigeria; the legacy of colonialism; the quest for modernity; refugees and forced migration; and commercial sex work. In each of these cases students explore how the issue emerged within a specific historical, social and global context. We investigate the implications of various forms of inequalities (e.g., between the global north and global south, within Africa, and among generations and genders) in shaping each topic and how differently situated people within Africa understand, respond to and cope with everyday realities. Readings include anthropological and historical analysis, African literature, journalist's accounts and popular articles. By the end of the course, students should be able to critically assess the value of using a contextual analysis in understanding problems in contemporary Africa. This class is a discussion-based seminar and students are expected to actively participate. Students are graded on a series of analytical essays, a final project and in-class participation.

Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC BU: IS EN: S

L90 AFAS 178 Imagining and Creating Africa: Youth, Culture, and Change

The goal of this course is to provide a glimpse into how youth reshape African society. Whether in North Africa with the Arab Spring, in West Africa with university strikes, or in East Africa through a linguistic full bloom, youth have been shaping social responses to societies for a long period. In this course, we study social structures, including churches, NGOs, and developmental agencies as well as learn about examples of Muslim youth movements and the global civil society. The course explores how youth impact cultural movements in Africa and how they influence the world. In particular, we examine hip-hop movements, sports, and global youth culture developments that center on fashion, dress, dance, and new technologies. By the end of the course, students will have enriched ideas about youth in Africa and ways to provide more realistic comparisons to their counterparts in the United States.

Credit 3 units. A&S: CD A&S IQ: LCD Art: HUM BU: IS EN: H

L90 AFAS 188 Freshman Seminar: Self and Identity in African-American Literature

For whom should the black author write? In this seminar we consider how African-American literature examines the meaning of African-American identity, the individual's relationship with the community, and the often vexed relationship of the black author to the American mainstream. We read classic authors as well as some less familiar ones. W.E.B. Du Bois, Nella Larsen, James Baldwin and Octavia Butler are just some of the possibilities. Class participation and regular reading logs are required. Freshmen only.

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA, ETH EN: H

L90 AFAS 195C Introduction to African-American Images in Film: A Freshman Seminar

This seminar for freshmen introduces students to an array of films depicting African Americans at different points in the history of filmmaking, as well as the relevance of these films to the advancement of civil rights in America and, by extension, the world. Students are introduced to elementary documentary film production in collaboration with Washington University library staff and hands-on utilization of the Henry Hampton Archive. The course provides a balanced introduction to various civil rights topics that are relevant to African Americans, their depiction in film, and knowledge of how documentary film production can be used to overcome past discrimination.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM EN: H

L90 AFAS 196C Images of Africa in Literature and Art, ca. 1800 to Present Day

This course examines representations of Africa, African peoples and African cultures from the early 19th-century to the present day. Drawing on a wide variety of African and colonial source materials — including novels, photographs, art, advertising and movies — we critically explore the ways in which historical developments and cultural products helped to shape conceptions of African identities and ethnicities. Among other issues, we address the legacy of the slave trade; gender and the construction of cultural "traditions"; colonial society, nationalist resistance and the rise of pan-Africanism; and South African Apartheid. Emphasis is placed on critical engagement with the

source materials through written assignments and participation in class discussion. Freshmen only.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Arch: HUM Art:
HUM BU: HUM EN: H

L90 AFAS 203D Intermediate Swahili III

Enhanced acquisition of language fundamentals acquired in first-year Swahili through performance, reading and writing. Students gain skills performing role-plays such as asking for directions, booking a bus ticket, ordering food in a restaurant, etc. Students read more authentic Swahili texts including plays, short stories, newspapers and poems. Prerequisite: AFAS 103D(Q) –104D(Q) or the equivalent. CBTL course.

Credit 3 units. A&S: LA A&S IQ: LCD, LS Art: LNG BU: HUM, IS

L90 AFAS 204D Intermediate Swahili IV

Fourth-semester Swahili language course emphasizes the development of the ability to discuss a wide range of cultural and literary topics with native speakers of the language. These topics are introduced by reading authentic Swahili texts such as plays, novels, poems and newspapers. Students enhance their writing skills and creativity in the language through group-writing projects. Prerequisite: AFAS 103D(Q), 104D(Q) and 203 D(Q). CBTL course.

Credit 3 units. A&S: LA A&S IQ: LCD, LS Art: LNG BU: IS

L90 AFAS 208B African-American Studies: An Introduction

Lectures, readings, films and discussions reflect a range of academic approaches to the study of African-American people. Course materials drawn from literature, history, archeology, sociology and the arts to illustrate the development of an African-American cultural tradition that is rooted in Africa, but created in the Americas. Required for the major.

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Arch: HUM Art:
HUM BU: HUM EN: H

L90 AFAS 209B African Studies: An Introduction

This course introduces students to a variety of approaches to the study of Africa by considering the ways that scholars have understood the African experience. It exposes students to the history, politics, literary and artistic creativity of the continent. Emphasis is placed on the diversity of African societies, both historically and in the present, and explore Africa's place in the wider world. Required for the major.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Arch: HUM Art:
HUM BU: IS EN: H

L90 AFAS 210 The Linguistic Legacy of the African Slave Trade in Interdisciplinary Perspective

This course explores the linguistic consequences of the African slave trade, and in so doing introduces students to basic concepts in linguistic science that are relevant to human language development and controversial educational theories that are based on race. Anthropological, linguistic and psychological dimensions of African-American culture are embedded within complementary evaluations of educational controversies surrounding the teaching of (standard) English to American slave descendants, including the Ebonics controversy and its relevance to larger questions of social efficacy, and the affirmative action debate that has consumed the nation. Students work individually or in groups to produce a major intellectual artifact (e.g., a term paper, a scholarly web page or a project)

pertaining to the linguistic plight of citizens within this African Diaspora. Students are introduced to foundational African-American studies in anthropology, education, English, linguistics and psychology.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Arch: SSC Art:
SSC BU: BA EN: S

L90 AFAS 2155 Introduction to Comparative Practice

This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers and/or exams.

Same as Comp Lit 215C

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Arch: HUM Art:
HUM BU: BA EN: H

L90 AFAS 2230 The African Diaspora: Black Internationalism Across Time and Space

This course is an introduction to the history of the African diaspora. It engages the following questions: What constitutes a diaspora and what is the African diaspora in particular? Where is it? What were the conditions that led to the dispersal of Africans throughout the world? How have Africans in the diaspora constructed cultural and political identities across time and space? What were the circumstances that led to the dispersal of Africans? When the dispersal resulted from conditions of inequality, as was the case when the transatlantic slave trade led to the forced migration of Africans to the "new world," what were the legacies of that inequality? How has the African presence transformed the societies in question? Though the course focuses on readings from the United States, the Caribbean and South America, students also are exposed to the African diaspora as a series of dispersals, with a view to placing the African diaspora in the "new world" within the historic context of a longer history of African dispersal.

Credit 3 units. A&S: TH A&S IQ: HUM BU: IS EN: H

L90 AFAS 2231 Cross-Cultural Women Playwrights

Same as Drama 223

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Art: HUM BU: BA

L90 AFAS 2250 Freshman Seminar: African-American Women's History: Sexuality, Violence and the Love of Hip-Hop

Black women, much like their male counterparts, have shaped the contours of African-American history and culture. Still, close study of African-American women's history has burgeoned only within the past few decades as scholars continue to uncover the multifaceted lives of Black women. This course explores the lived experiences of Black women in North America through a significant focus on the critical themes of violence and sexuality. We examine African-American women as the perpetrators and the victims of violence and as the objects of sexual surveillance and we explore a range of contemporary debates concerning

the intersections of race, class and gender, particularly within the evolving hip-hop movement. We take an interdisciplinary approach through historical narratives, literature, biographies, films and documentaries.

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 2300 Topics in Urban America: Exploring Urban Change

Same as AMCS 230
 Credit 3 units. BU: BA

L90 AFAS 251 Topics: The Ebonics Controversy

This course examines the controversy regarding the status of Ebonics and its role in education. Ebonics is the term often used to describe the distinct speech of 85 percent of the African-American population. The controversy reached the national limelight in 1996 and 1997 due to a resolution by the Oakland (California) School Board, which identified Ebonics as a legitimate form of speech that should be respected. The arguments about Ebonics are multifaceted and highlight significant linguistic as well as educational and political issues. There is the basic question of just what is Ebonics: Is it a separate language, a dialect, slang, bad grammar, broken English or really not a distinct entity? There are issues related to the term Ebonics as evidenced by the various names that academicians have used for the speech of African Americans, i.e., African-American (vernacular) English and African-American Language. Its origins and history also have been debated: Is it a variant of Southern English or are its origins traceable to the language systems of Africa? Further, there is a fundamental, practical question of how to approach the education of African-American children whose home speech is Ebonics: Should a goal in the education of these children be the purging of Ebonics so that it does not interfere with the mastery of Standard English, or should Ebonics be used as a vehicle for learning Standard English? This course examines these and other issues, such as the portrayal of Ebonics in the popular media as well as its use within African-American communities, through readings, films, small and large group discussions, writing assignments and lectures.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Arch: SSC Art: SSC EN: S

L90 AFAS 2674 Sophomore Seminar: Slavery and Memory in American Popular Culture

Sophomores receive priority registration. The history of slavery has long created a sense of unease within the consciousness of many Americans. Recognizing this continued reality, this seminar examines how slavery is both remembered and silenced within contemporary popular culture. Although slavery scholarship continues to expand, how do everyday Americans gain access to the history of bondage? Moreover, how does the country as a whole embrace or perhaps deny what some deem a "stain" in American history? Taking an interdisciplinary approach to these intriguing queries, we examine a range of sources: literature, public history, art/poetry, visual culture, movies and documentaries, as well as contemporary music including reggae and hip hop. The centerpiece of this course covers North American society, however, in order to offer a critical point of contrast, students are challenged to explore the varied ways slavery is commemorated in other parts of the African Diaspora.

L90 AFAS 3002 Feminist Fire!: Radical Black Women in the 20th Century

Black women have been at the forefront of the Black radical tradition since its inception. Often marginalized in both the scholarship and popular memory, there exists a long unbroken chain of women who have organized around the principles of anti-sexism, anti-racism, and anti-capitalism. Frequently critical of heterosexist projects as well, these women have been the primary force driving the segment of the Black radical tradition that is commonly referred to as Black Feminism. Remaining cognizant of the fact that Black Feminist thought has also flourished as an academic enterprise — complete with its own theoretical interventions (i.e., standpoint theory, intersectionality, dissemblance, etc.) and competing scholarly agendas — this course thinks through the project of Black Feminism as a social movement driven by activism and vigorous political action for social change. Focusing on grassroots efforts at organizing, movement building, consciousness raising, policy reform, and political mobilization, Feminist Fire centers Black Feminists who explicitly embraced a critical posture toward capitalism as an untenable social order. We prioritize the life and thought of 20th-century women like Claudia Jones, Queen Mother Audley Moore, Frances Beal, Barbara Smith, Audre Lorde, Angela Davis, and organizations like the Combahee River Collective, Chicago's Black Women's Committee, and the Third World Women's Alliance. At its core, the course aims to bring the social movement history back into the discourse around Black Feminism.

L90 AFAS 301 A History of African-American Theater

A survey of African-American theater from post-Civil War "coon" shows and reviews to movements for a national black theater, such as Krigwa, Lafayette and Lincoln, and the Black Arts Movement. Early black theater and minstrels; black theater movement and other ethnic theater movements in America. Critical readings of such plays as Amiri Baraka's *Dutchman*, Lorraine Hansberry's *A Raisin in the Sun*, and Langston Hughes and Zora Neale Hurston's *Mule Bone*. Also works by August Wilson, Ed Bullins, Charles Fuller, Georgia Douglas Johnson. Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Arch: HUM Art: HUM BU: HUM EN: H

L90 AFAS 3015 Speaking Truth to Power: The Black Prophetic Voice in America

To comprehend the origins and development of the Black prophetic voice, one must first understand the religious history of African Americans. As such, this course investigates how African Americans have historically employed Christianity as a vessel of protest and empowerment. To illustrate how African Americans practiced faith has ultimately become a platform for speaking out against their oppression, students engage some of the following questions: What makes Black Christianity so distinct, if at all? What is the so-called "prophetic voice"? And how have African Americans used this prophetic voice to bring attention to various issues of social, political and economic concern? Ultimately students decide for themselves what Black prophetic voice is and if it is still a viable part of the American fabric.

L90 AFAS 3062 Islam, Culture and Society in West Africa

This course explores the introduction of Islam into West Africa beginning in the 10th Century and explores its expansion and development in the region, placing emphasis on the 19th century to present day. It focuses on the development of West African Muslim cultural, social, religious and political life, to understand not only how the religion affected societies, but also how West African local societies shaped Islam. The course also aims to introduce students to a critical understanding of Islamic writing in West Africa. It also examines the organization of Muslim Sufi orders in West Africa through time and space. The course is organized around a series of lectures and readings, as well as print and visual media.

L90 AFAS 3071 Caribbean Literature in English

Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course surveys literature and culture from these islands, looking both at and beyond this tourists' paradise. It aims to introduce students to the region's unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands' contemporary situation formed. Along the way we encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever to have a Rastafarian as its hero, to more contemporary considerations of the region's uncertain place in a U.S.-dominated world. Toward the end of the course, we also look at important films like *The Harder They Come* as well as discussing the most globally famous cultural product of the contemporary Caribbean: reggae music. The course involves readings from multiple genres and covers authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid, and Caryl Phillips.

L90 AFAS 3080 Picturing the Nation: Race and Visual Culture in Africa and the African Diaspora

This course examines the relationship between race, nation, and visual culture by interrogating the ways in which citizenship in Western nations is racially defined. Through the semester,

we focus specifically on South Africa and African diaspora communities in the U.S., Britain, Canada, Germany, and the Caribbean. People from Africa and the African diaspora have historically been excluded from the national imaginary and have sought other forms of belonging that challenge the limitations of the nation-state. First, this course examines the role of visual culture in reifying the relationship between race and nation. Collectively through readings, film screenings, and by engaging with other visual arts practices (photography and fine art), we interrogate the following questions: What is the relationship between early cinema and photography and how have these visual technologies contributed to contemporary understandings of race, particularly blackness and Africanness? What is the relationship between early cinema, race, and nation? How has cinema been used by black communities to signal the emergence of modern black life? How does Africa figure in the African diasporic imaginary through visual art? After establishing the long history of the intimate relationship between race, nation, and visual culture we then interrogate the manner in which artists of the African diaspora and South Africa have employed the visual technologies of cinema and photography to contest dominant representations (stereotypes) of blackness. We engage with the manner in which these artists have and continue to challenge, critique, and offer new ways to think through the relationship between race, nation, and visual culture. Throughout the course we examine how other vectors of power like class, gender, and sexuality are central to formations of race and nation. By engaging with contemporary visual artists of South African and the African diaspora we examine how cultural production, for example, can and does serve as one means through which people imagine their lives, often resisting and revising forms of oppression to create alternative community and cultural formations.

L90 AFAS 3101 "Give Up the Mic": Black Feminism in the United States

It is a mistaken, but widely held, assumption that black feminism in the United States emerged from the second-wave women's movement of the 1960s. This course offers a different view: the black feminist movement has a long history with roots in the slavery era. This course charts the historical evolution of black feminist theory and praxis from the 19th century to the present through reading texts from a variety of black feminists including abolitionists, anti-lynching advocates, clubwomen, blues artists, unionists, communists, civil rights and black power movement activists, poets, leaders of formal feminist organizations, and hip-hop feminists. We examine essays and books that articulate the complexity of black American women's demand for social, economic and political equality as well as the desire for a vision of liberation based on historical and ongoing struggles against race and gender oppression. We identify the central concerns of black feminist thought, salient theoretical models such as the intersection of race, gender, sexuality and class, and how the movement changed over time.

L90 AFAS 3113 Culture, Politics, and Society in Francophone Africa

France and Africa have a long historical relationship, dating back to the early Euro-Mediterranean empires, the first explorers, long-distance traders, Christian missionaries, colonialists, and today's French West and North African communities. In this course, we delve into this long process of interaction between France and its colonies of Africa. During the first half of the semester, we explore these historical relationships and examine the scientific constructs of race in the 19th and early 20th century. We touch on themes that defined the colonial encounter, including the development of the Four Communes in Senegal, the Negritude movement, and French Islamic policies in Africa. The curriculum for this course includes articles, films, and monographs, to explore these themes and includes writers and social activists living in France and the African diaspora. The second half of the course examines Francophone Africa after independence. Here the course explores the political and cultural (inter) dependence between France and its Francophone African partners. In addition, we examine the challenges of many African states to respond to their citizen's needs, as well as France's changing immigration policies in the 1980s, followed by the devaluation of the West and Central African Franc (CFA).

L90 AFAS 3242 Introduction to African-American Psychology

This course provides an introduction to the experiences of African Americans from a psychological perspective. Throughout the course, we consider a range of theoretical and methodological approaches that scholars have developed to conceptualize the thoughts, styles and behaviors of African Americans. The course begins with an overview of these theories, methodologies and frameworks. The second part of the course is devoted to exploring psychological research around pertinent topics in the field such as racism and discrimination, gender, achievement and schooling, kinship and family, racial identity, religion and spirituality, and mental health. Finally, we conclude the course with discussions of current topics, controversies and recent advances in African-American psychology. Prerequisite: Psych 100B or permission of instructor.

L90 AFAS 326 Literature of the Color Line

In 1903's *The Souls of Black Folk*, W.E.B. DuBois wrote "for the problem of the 20th century is the problem of the color-line." This literature course includes texts written by African-American authors to examine the ways African Americans came to be portrayed in American literature and culture by writers of color, paying special attention to the changing concept of race and African-American citizenship as influenced by American political thought at a time when many of the gains made by African Americans during the period of Reconstruction were repealed. We read fiction, poetry, essays and pamphlets by African-American writers writing through the late 19th and early 20th century, including but not limited to Charles Chesnutt, W.E.B. DuBois, Booker T. Washington, Ida B. Wells-Barnett, Pauline Hopkins, Frances E.W. Harper, Paul Laurence Dunbar. In addition to the texts, students are asked to briefly examine portrayals of African Americans in other forms of media, such as visual culture and film.

L90 AFAS 3282 Sexuality in Africa

An examination of various themes of African sexuality, including courtship, marriage, circumcision, STDs and AIDS, polygamy, homosexuality, child marriages, and the status of women. Course materials include ethnographic and historical material, African novels and films, and U.S. mass media productions. Using sexuality as a window of analysis, students are exposed to a broad range of social science perspectives such as functionalist, historical, feminist, social constructionist, Marxist and postmodern.
Credit 3 units. A&S: SS, CD Art: SSC BU: BA

L90 AFAS 330 Topics in Linguistics: The American Languages

Our perceptions about language are shaped by our linguistic backgrounds and practices as well as our social and political ideologies. This course examines the history of American languages in the U.S. and explores the social, educational, and political issues that surround them. Four types of languages are studied: Native American, colonial, immigrant, and new languages (e.g., Hawaiian Pidgin and American Sign Language). We also take a special look at the history and structure of African-American Language which challenges linguistic categorizations as well as language policy and education. Among the major questions discussed in this course are: what makes American languages distinct in terms of their history and social status; what do they all have in common beyond the simple geographic classification of being "American." In addressing these questions we also study the politics of

language, the history of language policy and education in the U.S., as well as issues of current debate, such as indigenous language reclamation, the "Ebonics controversy," bilingual education, and the official English movement.

L90 AFAS 3351 Experts, Administrators, and Soldiers: Governance and Development in Post-Colonial Africa

Between 1957 and 1975, one African territory after another made the transition from European colony to independent nation state. Widespread optimism that these "transfers of power" would bring a new era of prosperity and dignity dissipated quickly as the new nations struggled with political instability, military coups, social unrest and persistent poverty. This course traces the origins of African governance and economic development from their imperial origins into the independence era. By exploring nation-building, economic planning and public administration from the perspective of political elites, foreign experts and ordinary people, the class takes an intimate look at how colonies became nation-states. This course is designed for first and second year students with an interest in African studies and international public administration.

L90 AFAS 3405 For Freedom's Sake: The Civil Rights Movement in America

This course provides an introduction to the period of struggle in American history known as the Civil Rights Movement. Our primary task is to survey the major historical figures, organizations, locations, strategies and ideas that coalesce to make the history of the movement. The course broadly covers the years of the Black Freedom Struggle between 1945 and 1971, with a sharper focus on the pivotal years of 1954-1965. By placing the movement within a broader context, the course seeks to identify the historical developments and social realities that made the movement necessary and possible. The class also looks at the years following the movement, and the general transition from Civil Rights to Black Power.

Credit 3 units. A&S: TH A&S IQ: HUM Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 343 Capitalism, Exchange and Inequality in Africa

This course explores issues of power and inequality related to exchange and the emergence of market economies in Africa. Case studies include examinations of cattle and bride wealth among pastoralists in Sudan, welfare policies in contemporary

South Africa, and sex work in West Africa. In each of these cases there is a complex balance between the value placed on maintaining social relationships and accumulating private property. We investigate the implications of this balance for the production of local and international forms of inequality. The course also introduces students to key ideas in economic anthropology such as the formalist-substantivist debate, rational choice theory and neo-Marxist approaches to power and stratification. By the end of the course, students should be able to critically assess the value of these theories in understanding day-to-day economic activities in Africa. This class is a discussion-based seminar and in-class participation is highly encouraged. Students are graded on a series of analytical essays, a final paper and in-class participation.

L90 AFAS 3447 Visualizing Blackness: Histories of the African Diaspora Through Film

The African Diaspora and, more importantly, variations of blackness, black bodies, and black culture have long captured the imagination of audiences across the globe. Taking a cue from exciting trends in popular culture, this course bridges the world of history, film and culture to explore where and how historical themes specific to African-descended peoples are generated on screen (film and television). Fusing the film world with digital media (i.e., online series and "webisodes") this class allows students to critically engage diasporic narratives of blackness that emerge in popular and independent films not only from the United States but other important locales including Australia, Brazil, Britain and Canada. Moving across time and space, class discussions center on an array of fascinating yet critical themes including racial/ethnic stereotyping, gender, violence, sexuality, spirituality/conjuring and education. Students should be either of junior- or senior-level and have taken at least one AFAS course. Permission of the instructor is required for enrollment.

L90 AFAS 3582 Race, Class and Writing in the United States and the Caribbean, 1900–1950

This is a comparative course that focuses on African-American literature and Anglophone Caribbean literature during the period from 1900 to 1950. The cultures of the United States and the Caribbean both have been profoundly shaped by the relationship between race and power, yet the intersection of these forces has affected the societies and their writers in distinct ways. Studying fictional texts from the first half of the 20th century, we discuss the differences in literary tradition that arose from the divergent social, racial and educational milieux of the United States and the West Indies. For example, we compare the racial and class concerns of the Beacon Group in Trinidad with those of the Harlem Renaissance. We also study writers, such as Claude McKay and C.L.R. James, whose consciousness of the African diaspora problematized the national and regional identities to which literature contributed.
Same as E Lit 3582

L90 AFAS 359 (Re)Writing Slavery

This special topics course considers black-authored texts ranging from the 18th to the 21st century to examine the ways slavery has been discussed in American literature and culture. We pay attention to the role of slavery in creating the African diaspora, the contribution of slave narratives to the Abolitionist movement, and how the structures of American slavery did not disappear after the Civil War. We look at the ways Civil Rights-era and contemporary African-American writers such as Margaret Walker, Toni Morrison, and Charles Johnson have appropriated the slave narrative to engage and critique present day concerns. Their works are read against 19th century slave narratives by ex-slaves such as Frederick Douglass and Harriet Jacobs. In addition to the texts, students are asked to consider how slavery and its aftereffects have been portrayed in film and other forms of media.

Credit 3 units. Art: HUM BU: BA

L90 AFAS 3601 Beyond Sea, Sunshine and Soca: A History of the Caribbean

This course examines major themes in the history of the Caribbean from the 15th to the 20th century. The first half of the course focuses on the 15th to the 19th century, exploring issues such as indigenous societies, European encounter and conquest, plantation slavery, the resistance of enslaved Africans and emancipation. The remainder of the course focuses on aspects of the cultural, economic, political and social experiences of Caribbean peoples during the 20th century. Major areas of inquiry include the labor rebellions of the 1930s, decolonization, diasporic alliances, Black Power, identity construction and the politics of tourism. While the English-speaking Caribbean constitutes the main focus, references are made to other areas such as Cuba and Haiti. Additionally, the Caribbean is considered in a multilayered way with a view to investigating the local (actors within national boundaries), the regional (historical events that have rendered the region a unit of analysis) and the global (larger globalizing forces such as capitalism, colonialism, migration and slavery that have made the Caribbean central to world history).

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: IS EN: H

L90 AFAS 361 Culture and Environment

L90 AFAS 363 Mapping the World of "Black Criminality"

Ideas concerning the evolution of violence, crime and criminal behavior have been framed around many different groups. Yet, what does a typical criminal look like? How does race — more specifically blackness — alter these conversations, inscribing greater fears about criminal behaviors? This course taps into this reality, examining the varied ways people of African descent have been and continue to be particularly imagined as a distinctly criminal population. Taking a dual approach, students consider the historical roots of the policing of black bodies alongside the social history of black crime while also foregrounding where and how black females fit into these critical conversations of crime and vice. Employing a panoramic approach, students examine historical narratives, movies and documentaries, literature, popular culture through poetry and contemporary music, as well as the prison industrial complex system. Prerequisite: AFAS 3880 (Terror and Violence in the Black Atlantic) and/or permission from the instructor, which is determined based on a student's past experience in courses that explore factors of race and identity. Enrollment limit: 20.

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA EN: H

L90 AFAS 3651 Black Women Writers

When someone says "black woman writer," you may well think of Nobel Prize winner Toni Morrison. But not long ago, to be a black woman writer meant to be considered an aberration. When Thomas Jefferson wrote that Phillis Wheatley's poems were "beneath the dignity of criticism," he could hardly have imagined entire Modern Language Association sessions built around her verse, but such is now the case. In this class we survey the range of Anglophone African-American women authors. Writers likely to be covered include Phillis Wheatley, Harriet Wilson, Nella Larsen, Lorraine Hansberry, Octavia Butler and Rita Dove, among others. Be prepared to read, explore, discuss and debate the specific impact of race and gender on American literature.

L90 AFAS 3670 The Civil Rights Movement

The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically, and thematically. It pays special attention to struggles fought

in the North, West and Southwest; it seeks to question binaries constructed around “confrontational” and “accommodationist” leaders; it reveals how Latinos, Native Americans, and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

L90 AFAS 3672 Medicine, Healing and Experimentation in the Contours of Black History

Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, we examine the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus extends toward the underpinnings of race and gender in the medical treatment allocated across time and space — the U.S., Caribbean and Latin America — to give further insight into the roots of contemporary practice of medicine.

L90 AFAS 370 Youth, Generation and Age in Africa

It is estimated that children and youth constitute more than 60 percent of the population in Africa. In a context of economic decline associated with neoliberal policies of structural adjustment, many of these young people will face extreme difficulty in finding work, supporting families, and taking on the social responsibilities of adults. In recent years, disaffected African youth have been increasingly blamed for political and social instability. This course examines the condition of youth in contemporary Africa. The course begins with classic anthropological texts on generation, youth, and the life cycle in Africa. Readings address the implications of colonialism, education, wage labor, and urbanization for relations between generations. The second half of the course examines recent research concerning the position of African youth in a context of economic and cultural globalization.

L90 AFAS 372C Law in American Life: 1776 to Present

Among the many contradictions of American history, none has been more recurrent than the tension of justice and law — of aspiration and reality — as Americans have sought to make good on the promises of the Revolution. Although we pride ourselves as a nation devoted to the principle of “equal justice under the law,” the terms “equal” and “justice” have prompted bitter debate, and the way we place them “under law” has divided Americans as often as it has united them. This course examines the many and conflicting ways in which Americans have sought to use “law” to achieve the goals of the republic established in 1776. Viewing “law” as the contested terrain of

justice, cultural construction, social necessity and self-interest, this course pays close attention to the way Americans have used, abused or evaded "law" throughout their national history. Same as History 372C

L90 AFAS 3766 Women, Men and Gender in African Societies Since 1800

This course explores the ways in which gender has been produced, reproduced and transformed through the everyday actions and activities of African women and men. The focus of the course is both on agency and on structures of power, as we move from a consideration of gender relations after the 19th-century jihad of Uthman dan Fodio to the problems of love and marriage in the late 20th-century Ghana.

L90 AFAS 3838 African-American Poetry From 1950–Present

Beginning with the year in which Gwendolyn Brooks became the first African American to win the Pulitzer Prize, we examine the tradition of African-American poetry and the ways in which that tradition is constantly revising itself and being revised from the outside. We focus in particular on the pressures of expectation — in terms of such identity markers as race, gender and sexuality — and how those pressures uniquely and increasingly affect African-American poetry today.

L90 AFAS 388 African-American Literature: African-American Writers Since the Harlem Renaissance

African-American literature in the 20th and 21st centuries grows from a Harlem Renaissance into a world-shaping institution. Guggenheim, Pulitzer and Nobel prize winners; card-carrying Communists, rock-ribbed Republicans and Black Power nationalists; Broadway playwrights, Book-of-the-Month Club novelists and even a U.S. President are among the many whose fictions and memoirs we study with special attention to the intimate links between black writing and black music. The syllabus thus features authors ranging from poet Alice Dunbar Nelson (born 1875) to satirist Colson Whitehead (born 1969), with more than a dozen stops in between. Written assignments may include two papers and two exams. Prerequisite: none, but related classes such as E Lit 215 and/or AFAS 208 are suggested. Satisfies the American literature requirement in English, and/or one 300-level elective requirement in AFAS. Same as E Lit 388

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD

L90 AFAS 3880 Terror and Violence in the Black Atlantic

From the period of bondage through the 21st century, terror and racialized violence have consistently been used as a form of social control. This course is constructed to explore the historical foundations of extreme threats of violence inflicted among populations of African descent. The fabric of American culture has given birth to its own unique brand of terrorism, of which this

class spends considerable time interrogating. Yet, in recognizing that these practices are commonly found in other parts of the Black Atlantic, students are encouraged to take a comparative view to better tease out the wider strands of violence operative in places like England, the Caribbean and Latin America. Within this course, we explore the varied ways in which music, films, newspapers and historical narratives shed light on these often life-altering stories of the past. Some of the themes touched upon include: the use of punishment/exploitation during the era of slavery, lynching, sexual violence, race riots, police brutality, motherhood, black power and community activism.

L90 AFAS 388C African-American Literature: African-American Writers Since the Harlem Renaissance

African-American literature in the 20th century moves from a renaissance into an institution. Guggenheim, Pulitzer and Nobel prize winners; Communist and Conservative Party sympathizers; Black Power advocates, inaugural poets, Broadway playwrights, Book-of-the-Month Club novelists, along with writers whose allusive and elliptical pages may never win them legions of fans, are among the many whose works we discover together. Written assignments may include two papers and two exams. Prerequisites: none, but related classes such as E Lit 215 and/or AFAS 208 are suggested. Satisfies the American literature requirement in English, and/or one 300-level elective requirement in AFAS.

L90 AFAS 392 Blacks, Latinos and Afro-Latinos: Constructing Difference and Identity: Writing-Intensive Seminar

Dominant discourses on Black-Latino relations focus on job competition, while a few others celebrate the future of an America led by "people of color." What is at stake in these narratives? How did we come to understand what is "black" and "Latino?" Students taking this course examine the history of African Americans' and Latinos' racialization under British, Spanish, and American empires, paying attention to both the construction of the racial "Other" by European elites, the reclaiming of identities by the racially marginalized through the Black and Brown liberation movements of the 1960s and 1970s, and the movements' impacts on black-Latino electoral and grassroots coalitions, mass incarceration of youth, and Afro-diasporic productions of hip hop.

L90 AFAS 400 Independent Study

Permission of the director of the African and African-American Studies Program and an African-American Studies instructor required *prior* to registering.

Credit variable, maximum 6 units.

L90 AFAS 4001 Interrogating Health, Race and Inequalities: Public Health, Medical Anthropology and History

Interrogating Health, Race and Inequalities is intended for graduate students in the School of Social Work and in Arts & Sciences as well as advanced undergraduates in Arts & Sciences who have previous course work in medical anthropology, public health or urban policy. The fundamental goal of the course is to demonstrate that health is not merely a medical or biological phenomenon but more importantly the product of social, economic, political and environmental factors. To meet this goal the course is designed to examine the intersection of race/ethnicity and health from multiple analytic approaches and methodologies. Course readings draw from the fields of public health, anthropology, history and policy analysis. Teaching activities include lectures, group projects and presentations, videos, and discussions led by the course instructors. These in-class activities are supplemented with field trips and field-based projects. By the end of the course, students are expected to have a strong understanding of race as a historically produced social construct as well as how race interacts with other axes of diversity and social determinants to produce particular health outcomes. Students gain an understanding of the health disparity literature and a solid understanding of multiple and intersecting causes of these disparities.

Same as InterD 4001
Credit 3 units.

L90 AFAS 4002 Urban Education in Multiracial Societies

This course offers students an analysis of the historical development and contemporary contexts of urban education in English-speaking, multiracial societies. It examines legal decisions, relevant policy decisions and salient economic determinants that inform urban systems of education in Western societies including, but not limited to, the United States, Canada, Great Britain and South Africa. The course draws on quantitative, qualitative and comparative data as an empirical foundation to provide a basis for a cross-cultural understanding of the formalized and uniform system of public schooling characteristic of education in urban settings. Given the social and material exigencies that shape urban school systems in contemporary societies, special attention is given in this course to the roles of migration, immigration urbanization, criminal justice, industrialism, de-industrialism and globalization in shaping educational outcomes for diverse students in the aforementioned settings. Prerequisite: junior standing or permission of instructor.

L90 AFAS 4005 Video Microanalysis: Methods and Tools

The purpose of this course is to explore video microanalysis as a methodological tool for studying and valuing unconscious aspects of culturally diverse settings. Utilizing social cultural theoretical lens, this type of analysis reveals fleeting actions, subtle movements, peripheral events, and nonverbal communication that are not easily identified in real time viewing. Specifically we may look at facial expressions, direction of gaze, hand movements, body position, and use of material resources as micro techniques to expand our capacity to explore minute aspects and alternative interpretations of social interactions.

Same as Educ 4033

L90 AFAS 4006 Internship in Interrogating Health, Race and Inequalities

Internship in Interrogating Health, Race and Inequalities is intended for advanced undergraduates who are enrolled in the course Anthro 4003 and who have previous course work in (medical) anthropology, public health, urban policy, or African and African-American Studies. The internship experience is designed to facilitate students' familiarity with research and evaluation strategies that *both* address structural factors shaping health outcomes and are sensitive to community needs and sociocultural contexts. The internship experience contributes to students' in-class understanding of the ways that race as a historically produced social interacts with other axes of diversity and social determinants to produce particular health outcomes. Prerequisite: permission from the instructor. Corequisite: Anthro 4003.

Same as InterD 4002
Credit 1 unit.

L90 AFAS 401 Senior Seminar

This capstone seminar is required for students who are majoring in African and African-American Studies.

L90 AFAS 403 Advanced Swahili

This course aims to help students gain skills in reading and appreciating selected readings in Swahili literature. Although the course primarily focuses on plays, novels and poetry, students also are introduced to Swahili songs, comic books and other forms of popular literature in an attempt to understand the growth and development of contemporary Swahili literature. Prerequisites: permission of instructor and successful completion of AFAS 103D, 104D, 203D and 204D or equivalent experience. Credit 3 units. A&S: TH A&S IQ: HUM, LCD, LS, LS Arch: HUM Art: HUM

L90 AFAS 4031 Advanced Readings in Swahili Literature

Course designed with instructor. Permission of instructor required.

Credit 3 units. A&S: TH A&S IQ: LS Arch: HUM Art: HUM

L90 AFAS 4041 Beginning Graduate-Level Swahili

A beginning language course for graduate students emphasizing acquisition of reading, writing and conversational skills in Swahili language. Through video and other multimedia presentations, students also are introduced to the culture of Swahili-speaking communities living in more than a dozen African countries.

Credit 3 units. A&S: LA A&S IQ: LCD, LS EN: H

L90 AFAS 4042 Beginning Graduate-Level Swahili II

Second-semester graduate-level Swahili language course emphasizing conversational competence and knowledge of Swahili-speaking cultures of East Africa. Introduction to elementary-level Kenyan and Tanzanian Swahili texts, grade school readers, newspapers and government educational material. Prerequisite: AFAS 4041.

Credit 3 units. A&S: LA A&S IQ: LCD, LS EN: H

L90 AFAS 4043 Intermediate Graduate-Level Swahili III

Enhanced acquisition of language fundamentals acquired in first-year graduate-level Swahili through performance, reading and writing. Students gain skills performing role-plays such as asking

for directions, booking a bus ticket, ordering food in a restaurant, etc. Students read more authentic Swahili texts including plays, short stories, newspapers and poems. Prerequisite: AFAS 4041, 4042 or permission of instructor.

Credit 3 units. A&S: LA A&S IQ: LCD, LS EN: H

L90 AFAS 406 Sexual Health and the City: A Community-Based Learning Course

In this community-based learning course students partner with a St. Louis AIDS service organization (ASO) or sexual health agency to explore how the interrelationships among gender, class, race/ethnicity and sexual identity shape sexual health decisions, outcomes and access to services. Students also examine the complex relationship between men's and women's life goals and constraints, on the one hand, and the public health management of sexual health, on the other. In collaboration with their community partner and its clients, students develop a project that addresses an identified need of the organization and the community it serves. Course readings draw from the fields of anthropology, public health, feminist studies and policy making. Prerequisite: PHealth 4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics or permission from the instructor, which is determined based on past student's experience in the fields of medical anthropology or sexual/reproductive health. CBTL course.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Arch: SSC EN: S

L90 AFAS 409 Gender, Sexuality and Change in Africa

This course considers histories and social constructions of gender and sexuality in sub-Saharan Africa during the colonial and contemporary periods. We examine gender and sexuality both as sets of identities and practices and as part of wider questions of work, domesticity, social control, resistance and meaning. Course materials include ethnographic and historical materials and African novels and films. Prerequisite: graduate students or undergraduates with previous AFAS or upper-level anthropology course.

Credit 3 units. A&S: SS, SD, WI A&S IQ: SSC, SD, WI Arch: SSC Art: SSC EN: S

L90 AFAS 410 Capitalism, Marxism, and the Black Freedom Movement

We explore Marxist philosophy and activism as they relate to the struggle for black liberation in the United States. Beginning with the Russian Revolution of 1917 and concluding with World War II, the course focuses most closely on the 1930s. The onset of the Great Depression led the Communist Party to turn its attention south, to where the majority of African Americans resided. Pointing to a teetering capitalist economy, the Communist International predicted immediate, worldwide revolution and that black workers would play an important role in the American movement. The Party's Black Belt Thesis posited that African Americans living in the black belt counties of the Deep South constituted an oppressed nation with the right to secede from the United States. In the era of Jim Crow segregation, Communists advocated for full racial equality, including for the legal right to interracial marriage. The course investigates the relationship between these political positions and consider how Marxism fits in with the broader black freedom movement in the U.S. We examine histories such as Robin Kelley's *Hammer and Hoe: Alabama Communists during the Great Depression*, as well as the writings of revolutionaries from the period.

L90 AFAS 4121 Rainbow Radicalisms!: Ethnic

Nationalism(s), the 1960s and the Politics of the New Left

The Black Panther Party remains one of the most iconic groups of the 1960s and 1970s. Perhaps one of the most understudied aspects of the Panthers' legacy is their radical influence upon other American racial and ethnic groups, including Asian Americans, Mexican Americans, Puerto Ricans and American Indians, among others. This seminar considers the emergence of ethnic and racial nationalism among these various groups, as a result of their contact and relationship(s) with the Black Panther Party. Considering the politics of groups like the Red Guard, the Brown Berets, the Young Lords and the American Indian Movement, this course charts the rise and fall of rainbow radicalism as a general offspring of the Black Power Movement and part and parcel of what is commonly referred to as "the New Left." It also considers these groups in relation to the state by probing the dynamic push and pull between repression and democracy. Ultimately, this course grants insight into the contemporary racial domain and current political landscape of America as we discuss how these groups helped to shape modern identity formations, discourses on multiculturalism and definitions of "minority," "diversity" and "equality."

Credit 3 units. A&S: TH A&S IQ: HUM Arch: HUM Art: HUM EN: H

L90 AFAS 4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics

In the year 2000, HIV became the world's leading infectious cause of adult death, and over the next 10 years, AIDS killed more people than all wars of the 20th century combined. As the global epidemic rages on, our greatest enemy in combating HIV/AIDS is not knowledge or resources, but global inequalities and the conceptual frameworks with which we understand health, human interaction and sexuality. This course emphasizes the ethnographic approach for cultural analysis of responses to HIV/AIDS. Students explore the relationship between local communities and wider historical and economic processes, and theoretical approaches to disease, the body, ethnicity/race, gender, sexuality, risk, addiction, power and culture. Other topics include the cultural construction of AIDS and risk, government responses to HIV/AIDS, origin and transmission debates, ethics and responsibilities, drug testing and marketing, the making of the AIDS industry and "risk" categories, prevention and education strategies, interaction between bio-medicine and alternative healing systems, and medical advances and hopes. Same as Anthro 4134

L90 AFAS 417 Topics in African History: Middle Passages: African Americans and South Africa

This upper-division seminar explores the fascinating transnational relationship between African Americans and black South Africans during the 20th century. These two populations became intimately familiar with each other as African-American missionaries, sailors, musicians, educators and adventurers regularly entered South Africa while black South African students, religious personnel, political figures, writers and entertainers found their way to America. This course details why these two populations gravitated toward each other, how

they assisted each other in their respective struggles against racial segregation and apartheid, and how these shared histories influence their relationship today. Readings for this course draw from key books, articles and primary documents within this exciting new field of intellectual inquiry.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Arch: HUM BU: BA

L90 AFAS 4213 Sufism and Islamic Brotherhoods in Africa

Muslim societies are prevalent in Africa — from the Horn, the North, the East to the West, with smaller conclaves in Central and South Africa. Islam has played an influential role in these diverse societies, particularly through its Sufi form. Even though Sufism originated in the Arabian Peninsula, it has fit well with African beliefs and cultures. This course aims to explore Sufi beliefs, values and practices in Africa. It reconsiders the academic constructions of "African Islam" by exploring education, intellectual life, economics, gender roles, social inequalities and politics. The goal is to show that Africa is a dynamic part of the Muslim world and not a peripheral one, as it is most often portrayed by the international media or historically, through travelers and colonial accounts. African Muslim brotherhoods have served as political mediators between countries and people (i.e., the role of the Tijaniyya in the diplomatic rivalry between Morocco and Algeria, or its role in reconciliation of clan rivalries in Sudan). In addition, the course pays attention to hierarchy in particular tariqa. Finally, the course examines how African Sufi orders have shaped their teachings to fit transnational demands over the 20th and 21st century. We explore these issues through readings, current media, lectures and special guest speakers.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L90 AFAS 421A From Mammy to the Welfare Queen: African-American Women Theorize Identity

How do representations of identity affect how we see ourselves and the world sees us? African-American women have been particularly concerned with this question, as the stories and pictures circulated about black female identity have had a profound impact on their understandings of themselves and political discourse. In this course we look at how black feminist theorists from a variety of intellectual traditions have explored the impact of theories of identity on our world. We look at their discussions of slavery, colonialism, sexuality, motherhood, citizenship, and what it means to be human.

L90 AFAS 438 Islam, Transnationalism and the African Diaspora

This course is designed for students who are interested in religion among African immigrants and African diaspora communities living mostly, but not exclusively, in Europe and North America, especially during waves of migration to the Americas. We begin in the days of the transatlantic slave trade, where we examine how interactions, bricolage, and influences of Christianity, Judaism, African indigenous religions, and Islam have impacted the African Diaspora living in the Americas. We equally examine how Islam served as a means of resistance to slavery and provided a spiritual connection with the motherland.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L90 AFAS 4433 Who's Afraid of Post-Blackness?: The Spectrum and Specter of Blackness in Post-Racial America

In 2001, Thelma Golden, the director and chief curator of the Studio Museum in Harlem, boldly claimed that a new generation of African Diasporic artists had officially heralded a new day in "post-Black art." Six years later a young presidential candidate, born of a white mother from Kansas and a Kenyan father, motivated a Black writer for Time magazine to ask, "Is Obama Black enough?" Since 2001, and in the wake of America's first Black president, both public and scholarly discourse on Blackness has virtually exploded. New terms and ideas about the "end of Blackness" — as conservative Debra Dickerson put it — seem to enter the popular and scholarly lexicon everyday. It is now quite common to hear the phrases "disintegration," "post-racial," "biracial," "post-Blackness," and even "the end of Black politics." This course explores this expanding discourse and attempt to pinpoint what scholars, pundits and cultural critics mean when they employ these terms. It also unpacks the socio-historical context that has given birth to these terms, asking "why now?" Has the social and political landscape of America changed so much that we are indeed living in a "post-racial society?" Or does the specter of "Blackness" still loom large, haunting American politics, popular culture, sexuality, media discourse, punitive measures, political economy and our

understanding of "Africa" in "African-American" and "African diaspora"? Through the use of fictional texts, history, cultural essays and films this course explores the intraracial spectrum that characterizes Black America, while paying particular attention to issues of class, sexuality, ethnicity, ancestry, diaspora formation and global migration.

L90 AFAS 448 Race Politics in 19th- and 20th-Century America

This course explores the efforts of black Americans to use the political processes to claim civil rights and economic improvements in the 19th and 20th centuries. It tracks the aims, ideals and organizing strategies of African-American leaders and of grass-roots organizers. Readings and research highlight the ways African Americans debated agendas, fought over strategies and worked to mobilize voters. We study the ways various groups of people — in rural and urban America — argued over priorities, set agendas for their communities, produced a political language, came together with neighbors to fight for civil rights and economic necessities, and, in short, established a dynamic and conflicted political culture.

L90 AFAS 4601 Topics in African-American Studies: Health in the Black Community: A Social Science Perspective

Health matters for every facet of social life. In this course, we use a critical sociological perspective to explore the dynamic nature of health and health care experiences amongst Blacks in the United States. We draw upon core concepts in Sociology, the Sociology of Health, Illness, and Care as well as Critical Race Theory and Social Epidemiology to guide our discussions throughout the semester. Using contemporary, real-world examples, we examine the causes and consequences of racial health disparities that too often situate Blacks in positions of disadvantage. We use the work of scholars such as Patricia Hill Collins, David Williams, and Dorothy Roberts to explore topics ranging from racism in the health care system to the Black immigrant health advantage to health and hip hop. We consider how poor health and health care outcomes among Blacks in the

United States matter on a global scale. Throughout the course, we consider practical policy and programmatic interventions that can be implemented to eliminate poor health in Black communities.

American Culture Studies

American Culture Studies (AMCS) is a multidisciplinary program that provides both a broader context for study in different fields and a deeper understanding of American culture in all of its complexities. AMCS students explore culture-related topics and issues that demand multiple perspectives and methodologies. They also consider the mutual relevance of various disciplines

to any single object of study in American culture — a place, an event, a work of art, a political institution and so on — while developing the knowledge and skills necessary to study a wide array of cultural objects.

The program offers a major and a minor, coordinating offerings across the disciplines so that students from any field or school can explore an array of ideas and approaches as they complete their course work. Pairing the major with a second major in a complementary discipline is an enriching model of cultural study, and AMCS will work closely with students to ensure that double-majoring works well.

The program offers especially attentive advising, helping students to have a cohesive experience and to pursue their specific interests within a diverse curriculum.

Contact Person: Máire Murphy, Academic Coordinator

Phone: (314) 935-7262

E-mail: amcs@wustl.edu

Departmental website: <http://amcs.wustl.edu>

Faculty

The American Culture Studies program is enriched by its diverse community of faculty, lecturers, students and staff. Please visit our AMCS Directory page (<http://amcs.wustl.edu/people>) for a description and list of our teaching and affiliated faculty and other important members of our community.

Majors

The Major in American Culture Studies

Total units required: 30-39 credits, 24 of which must be 300-level or above. A suitable second program of study may be used toward the Disciplinary Foundations course work (9 credits) requirement.

Visit our Course Listings web page for a complete list of courses, by semester, that count toward the AMCS major. For more information about the major, including past examples of projects, leadership opportunities, and an FAQ, please visit our AMCS undergraduate page (<http://amcs.wustl.edu/undergraduate>).

Requirements:

- **"Introductory Course"** (3 credits) as designated by American Culture Studies, which recently have included AMCS 220 Topics in American Culture Studies: Introduction to American Culture Studies, AMCS 206 "Reading" Culture, and AMCS 202 The Immigrant Experience. Visit our Course Listings web page for additional offerings by semester.
- AMCS 375A American Culture: Methods and Visions (3 credits)

- **Fieldwork Experience** (3 credits): a multidisciplinary field-based project (independent design or placement-based project) or completion of an approved fieldwork-focused course such as AMCS 479: On Location: Exploring America.
- **Concentration Area course work** (9 credits): three (3) courses on American subjects in a single concentration area, two (2) of which must be at the 300 level or higher. See below for a list of established concentrations (students may also propose their own).
- **Distribution course work** (9 credits): either three (3) courses on American subjects in a second concentration area, **or** three (3) courses in three (3) different disciplines; in either case, at least two (2) of these courses must be at the 300 level or higher.
- **Disciplinary Foundations course work** (9 credits): three (3) courses with heavy methodological content and approved by the student's adviser/the program, at least two (2) of which must be in a single discipline and two (2) of which must be at the 300 level or higher. A suitable second program of study may be applied toward this requirement.
- **Senior Capstone Project** (3 credits): a multidisciplinary project culminating the course work and past fieldwork study. Proposed during the spring of the junior year, this 3-credit independent design project is granted academic credit through either AMCS 4011 Independent Study in the fall semester or through AMCS 4004/AMCS 4005 if the Senior Honors Thesis option is approved. For more information on the Capstone Project and proposal process, including important dates, please visit our website.
- At least **two (2) multidisciplinary (MD) courses**, taken as part of the above major requirements and designated by AMCS (this does not usually require additional course work). Students are encouraged to take MD courses that connect to the subjects or issues in their concentration area.

Additional Information

Established Concentration Areas

These areas reflect areas of longstanding student interest. Majors are welcome to propose new concentrations or to tailor an established one to suit their interests. AMCS currently has nine established Concentration Areas:

- 20th-century America
- Early America
- The Construction of Race and Ethnicity in American Life
- Policy-making in American Society
- Popular Culture
- A Sense of Place: Community, Region & Landscape
- Social Thought and Social Problems
- Visual, Material and Digital Cultures in the United States
- War and Peace

AMCS gives majors considerable freedom in defining their course of study, allowing them to learn how cultural study is done in multiple fields and periods even as they define concentration areas in ways that suit their specific interests. Pairing the AMCS major with a second major in a complementary discipline is an especially enriching model of cultural study, and AMCS will work closely with students to ensure that double-majoring works well.

Study Abroad: Majors intending to study abroad should consult with the AMCS Study Abroad Advisor well in advance to plan a course of study and discuss its impact on their work in the major (including their fieldwork and capstone projects). For further information, please visit the Study Abroad page on our undergraduate page or review the AMCS approved programs on the Study Abroad web page (<http://overseas.wustl.edu/programs>), searching for "American Culture Studies" as the approved department under the "Search for a Program" option.

Senior Honors: Writing an AMCS honors thesis is one way to fulfill the Capstone Project requirement. It allows students to complete an extended study of a cultural topic with the input of faculty from more than one discipline, and it provides both a support system and an audience of peers for that study. For more information on the honors thesis and Capstone Project process, including important dates and criteria, please visit our Senior Honors Thesis web page (<http://amcs.wustl.edu/undergraduate/curriculum-features/honors-thesis>).

Minors

The Minor in American Culture Studies

Units required: 15 credits, at least 9 of which must be 300-level or above.

Requirements:

- **"Introductory Course"** (3 credits): Courses designated as such by American Culture Studies have recently included AMCS 220 Topics in American Culture Studies: Introduction to American Culture Studies, AMCS 206 "Reading" Culture, and AMCS 202 The Immigrant Experience. Visit our Course Listings web page for the full listing by semester.
- **Distribution course work** (9 credits): at least three courses on American subjects (two of which must be upper-level) either in a single established Concentration Area (see below for a list of established concentrations, or students may propose their own) — **or** — in three distinct disciplines outside the student's major.
- One additional AMCS course (3 credits).
- At least **two multidisciplinary (MD) courses**, taken as part of the above minor courses and designated by AMCS. Minors who opt to do a concentration are encouraged to take at least one MD course that connects to the subjects or issues in the chosen concentration area. AMCS 375A

American Culture: Methods and Visions (a junior-level methods seminar) also is encouraged and may count as an MD course. Visit our Course Listings web page for a complete list of general and MD courses that count toward the AMCS major.

Additional Information

Established Concentration Areas

These reflect areas of longstanding student interest. Minors are welcome to propose new concentrations or to tailor an established one to suit their interests. AMCS currently has nine established Concentration Areas:

- 20th-century America
- Early America
- The Construction of Race and Ethnicity in American Life
- Policy-making in American Society
- Popular Culture
- A Sense of Place: Community, Region & Landscape
- Social Thought and Social Problems
- Visual, Material and Digital Cultures in the United States
- War and Peace

Visit our online undergraduate page (<http://amcs.wustl.edu/undergraduate>) for more information about the minor requirements and concentration areas, as well as other resources and announcements for AMCS students.

L98 AMCS 1012 Introduction to Urban Studies

Same as URST 101
Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L98 AMCS 101B American Politics

This course provides an overview of the politics of the American system of government. Among the topics to be covered are the historical developments of American politics, federalism, political participation (voting, interest groups, parties), institutions (congress, the courts, the president), and public opinion. A theme underlying our examination of these and other topics is the fact that political actors are purposive in their strategic pursuit of various objectives. We explore the many ways in which this aspect of political behavior impacts institutions and the interactions between political actors throughout the American political system.

L98 AMCS 111 Freshman Seminar: Race and Ethnicity on American Television

This course presents a historical overview of the forms that racial and ethnic representations have taken in American television. The course charts changes in public perception of racial and ethnic difference in the context of sweeping cultural and social transformations. The course examines notions of medium and ponders the implications for these identities of the contemporary practice of "narrowcasting." Required screening.

Same as Film 110

L98 AMCS 1162 Freshman Seminar: Bruce Springsteen's USA

This course examines the career and work of Bruce Springsteen as songwriter, singer, rock musician, pop star, and public figure. Conducted in seminar format, the primary course materials are Springsteen's recordings and videos, as well as the many interviews he has given. Selections from the vast body of popular and academic scholarship on Springsteen also inform class discussions. The course is limited to freshmen.

Same as Music 1162

L98 AMCS 120 Social Problems and Social Issues

Survey of social problems and social issues in contemporary American society, such as racism, poverty, sexism, crime and war.

Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC BU: BA, ETH EN: S

L98 AMCS 1201 Freshman Seminar: Race and Performance

What does it mean to "act black"? What about "acting Jewish"? This course looks at performances of racial and ethnic identity, mostly in the United States, mostly in the 20th century. We examine novels (such as Nella Larsen's *Passing*), plays (such as Anna Deavere Smith's *Fires in the Mirror*), and performances of everyday life (such as "Cowboys and Indians") to investigate the performance of race in public. Once we begin to explore the social and cultural performance of race, will it all turn out to be "only" an act?

L98 AMCS 130 Freshman Seminar: Cahokia: Perspectives on a Mississippian Ritual Center

The purpose of this class is to engage and challenge freshman students in an open discussion about the prehistoric Mississippian community of Cahokia. The focus of this course is two-fold. The first is to study the way in which the archaeological evidence has been interpreted. The second is to examine other perspectives on Cahokia, especially from the Native American descendants who consecrated this landscape nearly a millennium ago. An underlying tenet of this seminar in understanding Cahokia can also be achieved through the traditions and literature of Native Americans. In the end we want to understand the basis for Cahokia's organization as a prehistoric Native American community, and the role that ritual and religion played in the rather dramatic and dynamic history of this community and the surrounding region.

L98 AMCS 163 Freedom, Citizenship and the Making of American Culture from the Colonial Era to the Present

This course offers a broad survey of American history from the era before European settlement of North America to the late 20th century. The course explores the emergence and geographic expansion of the United States and addresses changes in what it meant to be an American during the nation's history. Tracing major changes in the nation's economic structures, politics, social order and culture, the course chronicles, among other issues, changes in the meanings of freedom, citizenship and American identity. Introductory course to the major and minor.

L98 AMCS 202 The Immigrant Experience

This course explores the history and politics of immigrant groups in the 19th- and 20th-century United States. Topics include legislation, patterns of migration, comparisons of different waves of immigration, and changing social attitudes. This course is a core requirement for the ethnic studies concentration in American Culture Studies.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: ETH, HUM

L98 AMCS 2055 Forever War: American Literature and Culture from Vietnam to Afghanistan

You have now lived more of your life since 9/11 than before it. How does your personal and generational experience help us to define and interact with such an impenetrable concept as war, let alone the "forever" war of contemporary memory? The term itself is relatively recent. Indeed, if you search "forever war" in the library catalog, you will get two hits: a 1974 sci-fi novel *The Forever War* written by veteran Joe Haldeman that fictionalizes his experiences with the endless futility of the Vietnam War (but in outer space); and a 2008 nonfiction book *The Forever War* by Pulitzer Prize-winning journalist Dexter Filkins that chronicles Iraq, Afghanistan, and the long history of the War on Terror. In line with Haldeman's and Filkins' fatigue over modern war's interminability, this course studies the literature and culture of contemporary American war from Vietnam to Afghanistan. Because this is an introductory course to American Culture Studies, we pay particular attention to how our strategies for interpreting the culture of contemporary warfare connects with our understanding of contemporary culture more broadly.

Credit 3 units. A&S: TH A&S IQ: HUM BU: ETH EN: H

L98 AMCS 206 "Reading" Culture

L98 AMCS 2101 The Linguistic Legacy of the African Slave Trade in Interdisciplinary Perspective

This course explores the linguistic consequences of the African slave trade, and in so doing introduces students to basic concepts in linguistic science that are relevant to human language development and controversial educational theories that are based on race. Anthropological, linguistic, and psychological dimensions of African-American culture are embedded within complementary evaluations of educational controversies surrounding the teaching of (standard) English to American slave descendants, including the Ebonics controversy and its relevance to larger questions of social efficacy, and the affirmative action debate that has consumed the nation. Students work individually or in groups to produce a major intellectual artifact (e.g., a term paper, a scholarly web page, or a project pertaining to the linguistic plight of citizens within this African Diaspora). Students are introduced to foundational African-American studies in anthropology, education, English, linguistics, and psychology.

Same as AFAS 210

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Arch: SSC Art:
SSC BU: BA EN: S

L98 AMCS 2120 Archaeological Fantasies and Hoaxes

American popular culture is saturated with pseudoscientific and fictionalized accounts of archaeological discoveries and interpretations. How can students of the past distinguish between fraud, fantasy, hype, and valid archaeological research? What potential merit do films, TV-oriented documentaries, and historical fiction offer? What role has racism played in attempts to deny indigenous peoples credit for their past achievements? This course looks at the popular culture of archaeology, providing tools for critical evaluation as well as lifetime enjoyment of the field as it is frequently sold to both the informed and the unwary public. Anthropology majors and non-majors are all welcome as are sophomores and motivated first-year students who have not yet declared majors.

Same as Anthro 212

Credit 3 units. A&S: SS A&S IQ: LCD, SSC Arch: SSC Art: SSC

HUM BU: BA EN: H

L98 AMCS 215D Introduction to Comparative Practice I

This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy, and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers, and/or exams.

Same as Comp Lit 215C

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L98 AMCS 220 Topics in American Culture Studies:

Introduction to American Culture Studies

This course introduces students to the different approaches and methodologies within the American Culture Studies field, including those represented by literature, history, sociology and political science; at the same time, they learn key concepts within the field that inform their future work. These are presented in a semester-specific topic of focus; please see *Course Listings* for a description of the current offering. The course is ideal for AMCS majors and minors, but others are welcome. This course fulfills the introductory course requirement for AMCS majors and minors.

Credit 3 units. A&S: TH A&S IQ: HUM Arch: HUM Art: HUM BU:
HUM EN: H

L98 AMCS 220S Social Inquiry: An Introduction to Sociology

Sociologists possess a secret knowledge that allows them to dissect subjects ranging from how class, race, gender and sexual orientation affect educational outcomes, family life and crime to apparently trivial issues such as why people cross-dress, are attracted to cults, or become pot smokers. Sociology illuminates the connection between private concerns and public issues. Inspired by this approach, the mission of this course is to first understand what is sociology — its methods and its theories, and then use this foundation to explore issues of class, inequality, race, gender, culture, power, social engagement and activism. Required readings consist of three(ish) articles or chapters per class. Grades are based on three in-class short-answer exams, three workshop and applied assignments, and enthusiastic participation.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Art: SSC EN: S

L98 AMCS 222 Sophomore Research Project in American Culture Studies

L98 AMCS 2250 Freshman Seminar: African-American Women's History: Sexuality, Violence and the Love of Hip-Hop

Black women, much like their male counterparts, have shaped the contours of African-American history and culture. Still, close study of African-American women's history has burgeoned only within the past few decades as scholars continue to uncover the multifaceted lives of Black women. This course explores the lived experiences of Black women in North America through a significant focus on the critical themes of violence and sexuality. We examine African-American women as the perpetrators and the victims of violence, as the objects of sexual surveillance, as well as explore a range of contemporary debates concerning the intersections of race, class and gender, particularly within the evolving hip hop movement. We take an interdisciplinary approach through historical narratives, literature, biographies, films and documentaries.

Same as AFAS 2250

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Arch: HUM Art: HUM BU: BA EN: H

L98 AMCS 226 Sociological Approaches to American Health

The major objective of the course is to provide beginning students with the theoretical (conceptual) and empirical tools necessary to understand how health and illness and health care delivery in the United States are significantly influenced by the social structure in which they are embedded. Students demonstrate this understanding through designing and implementing a research project grounded in sociological theory and sound methodological strategies for collecting and analyzing data. Working in teams, students produce a research report suitable for a poster presentation or newsletter to a variety of audiences.

L98 AMCS 230 Topics in Urban America

This course foregrounds the interpretive and analytical approaches used in the study of American cities. The city is a crucial frame for understanding the nation's cultural, economic, social, political and ecological concerns and evolution. Employing multiple perspectives, we interpret urban space as a product of culture, explore the city's importance in shaping American society, and investigate the ongoing evolution of the

built environment. This course lays the basis for interdisciplinary thinking and research in American culture studies. The topic varies by semester. Please see *Course Listings* for a description of the current offering. The course is ideal for AMCS majors and minors, but others are welcome. This course fulfills the introductory course requirement for AMCS students.

Credit 3 units. BU: BA

Same as RelPol 235

Credit 3 units. A&S IQ: HUM BU: BA

L98 AMCS 236 Cultural History of the American Teenager

This course explores the recent history of the teenager in the United States, from the rise of teen culture in the 1950s to the current state of adolescence in the new century. Why have so many novels and films memorialized adolescence? How has the period of development been portrayed in books and film? How have depictions and attitudes toward teen culture changed over the past sixty years? In our consideration of teen culture, we take a multidisciplinary approach when tackling a variety of materials — including historical readings, literary fiction, Young Adult fiction, comic books, popular films, and popular music — in an attempt to come to a better understanding of how the notion of the American teenager has evolved over the past sixty years. We begin with J.D. Salinger's classic novel of adolescence alienation, *The Catcher in the Rye*, a book that in many ways helped initiate the rise of the youth movement in the 1950s and '60s. Our readings focus on the middle decades of the 20th century, when teen culture moved to the forefront of American life, but we end the semester by considering how teen life has recently been imagined in such novels as *The Hunger Games*. Our class also discusses a few films, such as *Rebel Without a Cause* and *American Graffiti*, which have helped shape our conception of the American teenager. Ultimately, we question what these depictions of teen culture can tell us about larger trends and concerns in American life. As this course serves as an introduction to American Culture Studies, we focus on the different methods that we can employ when attempting to interpret and analyze American culture.

Credit 3 units. A&S: TH A&S IQ: HUM BU: BA EN: H

L98 AMCS 239 Performance and Culture

What does putting on a play have to do with having a wedding? What's the difference between St. Louis sports fans and primates at the Saint Louis Zoo? What does the "Mr. WashU" pageant say about the Washington University community? How is a dance concert like a Native American Pow Wow? In this course we explore the vocabulary and concepts of performance studies to address these and other questions. We bring the vital lens of performance to focus on an array of cultural activities through readings, field trips and activities. Three short essays, a mid-term and a take-home final are required.

Same as Drama 239

Credit 3 units. A&S: LA A&S IQ: HUM BU: BA EN: H

L98 AMCS 244 War, Rebellion and the Formation of American Identity, 1754–1865

This course surveys the United States' experiences with rebellion and organized armed conflict from the origins of the American Revolution until the Civil War. Though the class deals with war, its focus is not on military tactics or the outcome of battles - indeed several of the conflicts it considers were entirely bloodless. Rather, the course utilizes war and rebellion as

a prism through which to view the ways in which Americans conceived of themselves. Students address a number of questions: How and why did people in North America conceive of themselves as distinct from Europeans? Did war lead to more inclusive or exclusive views of who was considered "American?" How did people of different backgrounds view violent conflict? Why did some wars become central to American myth and others largely forgotten? Did war and rebellion promote a newly formed nationalism or did they help lead to sectionalism and the Civil War? Readings consist of secondary materials from a range of disciplines and primary documents that include novels, speeches, newspaper articles, letters, memoirs, editorial cartoons, and paintings.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L98 AMCS 245 Images of Disability: Portrayal in Film and Literature

This course critically examines the portrayal of persons with disabilities in literature and film, exploring how those images either shape or mimic general public impressions. We discuss the implications of messages from the media on American responses to people with disabilities, as well as formulating strategies for promoting positive, inclusive messages. Perspectives from social science, health care, communications and other fields provide frameworks for analysis. Literature includes fiction, biography and autobiography in books, essays, drama, poetry and short stories. Selections from fictional, educational and documentary films are reviewed during the semester. We also investigate images in newspapers, magazines and advertising.

Same as GeSt 249

Credit 3 units. BU: BA

L98 AMCS 246 Introduction to Film Studies

How do film images create meaning? What are the tools the film artist uses to create images? This course introduces students to basic techniques of film production and formal methodologies for analyzing film art. Students learn the essential components of film language — staging, camera placement, camera movement, editing, lighting, special effects, film stock, lenses — to heighten perceptual skills in viewing films and increase critical understanding of the ways films function as visual discourse. The course is foundational for the major in Film and Media Studies. Required screenings.

L98 AMCS 248 Latino/a Experiences in the United States

Identity is a term that begins to give humans a sense of understanding who we are. In terms of the Latino/a diaspora in the United States, issues of ethnicity, gender, nation, class, sexuality and race are key theoretical categories that aid us in theoretical and practical understandings of identity. In this course we analyze and discuss the concept of order to understand the constructions and varied meanings of the term. There is a special emphasis placed on anthropological, historical and social science literatures of the Caribbean, Latin America and the United States as they pertain to deeper understandings of identity. Prerequisite: membership in the Annika Rodriguez Program.

L98 AMCS 252 Introduction to Latino/a Studies: Exploring Memory

The course is an interdisciplinary introduction to Latino Studies, a discipline that studies the experiences and conditions of U.S. Latinos drawing from both the Social Sciences and Humanities. The course presents and analyzes works that include methodological strategies and analytical approaches to learning about U.S. Latinos. We analyze the social, political, and cultural forces that have affected the experiences of Latinos/as with particular attention to the ways in which historical, collective, family, and personal memories have shaped and continue to shape these experiences. We explore the intersections of history, place, and identity through a selection of works, including literary and media studies, in order to understand the principle questions and concerns in the major fields of interest to U.S. Latino Studies.

L98 AMCS 2590 Freshman Seminar: From the "City on a Hill" to 9/11: Religion and Social Justice in America

From the Puritans' search to build the "city on a hill," to the growing conflation of Islam with terrorism, Americans have long nurtured a self-identity as "God's chosen people," an idea that has helped them justify and normalize a theology of both conquest and suffering. This course analyzes how religion served to both buttress and contest notions of social domination, punishment, reform, and revolution in the U.S. from the colonial era to the present. Attention is paid to the voices of established religious leaders for whom the Church was their home, as well as religious dissidents who were often outcast as lunatics. Topics include the American Jeremiad, abolitionism, slave rebellions, Native American Catholicism, Fundamentalism, the Catholic Worker Movement, Pacifism, the Black Freedom Struggle, the Moral Majority, and Post-9/11 military and gender interventions with the Islamic world.

L98 AMCS 261 The Cultural Lives of Things: An Introduction to American Material Culture

American culture is so often defined by its obsessive attachment to material things — the iPhones, coffee cups, favorite t-shirts and Harley-Davidson motorcycles that fill our everyday lives. This course explores our contradictory relationship to such objects — the possessions that serve practical functions and give us a sense of identity, meaning and power, but just as often come to possess or control us. How do things take hold of us? What gives them potency, value and cultural significance? What psychological, social, economic and political purposes

do they serve? Do Americans have a distinct relationship (or a dysfunctional attachment) to their possessions? In answering such questions, we consider objects of all kinds, from the mundane and utilitarian to the strange, rare and often-fetishized. We explore their histories, their participation in regimes of commodification and power, their everyday and symbolic functions — in short, the twists and turns of their rich cultural lives. The course introduces different strategies for interpreting objects as cultural evidence, drawing upon work in anthropology, art history, sociology, literature and museum studies, as well as theorists (Marx, Freud, Baudrillard and others) who have influenced modern conceptions of material life. Students should also look forward to some in-the-field analysis of different historic, museum, and personal objects around St. Louis (field trips!). Attendance required the first week of classes.
Credit 3 units.

L98 AMCS 2674 Sophomore Seminar: Slavery and Memory in American Popular Culture

Sophomores receive priority registration. The history of slavery has long created a sense of unease within the consciousness of many Americans. Recognizing this continued reality, this seminar examines how slavery is both remembered and silenced within contemporary popular culture. Although slavery scholarship continues to expand, how do everyday Americans gain access to the history of bondage? Moreover, how does the country as a whole embrace or perhaps deny what some deem a stain in American history? Taking an interdisciplinary approach to these intriguing queries, we examine a range of sources: literature, public history, art/poetry, visual culture, movies and documentaries, as well as contemporary music including reggae and hip-hop. The centerpiece of this course covers North American society, however, in order to offer a critical point of contrast, students are challenged to explore the varied ways slavery is commemorated in other parts of the African Diaspora.

L98 AMCS 297 Undergraduate Internship in American Culture Studies

Students receive credit for a faculty-directed and approved internship. Registration requires completion of the Learning Agreement which the student obtains from the Career Center and which must be filled out and signed by the Career Center and the faculty sponsor prior to beginning internship work. Credit should correspond to actual time spent in work activities, e.g., 8-10 hours a week for 13 or 14 weeks to receive 3 units of credit; 1 or 2 credits for fewer hours. Students may not receive credit for work done for pay but are encouraged to obtain written evaluations about such work for the student's academic adviser and career placement file.
Credit variable, maximum 3 units.

L98 AMCS 298 Directed Fieldwork in American Culture Studies

Fieldwork under the direction of an AMCS-affiliated faculty. All proposals for study must be submitted for review and approved by the AMCS adviser. See the AMCS website for the appropriate form. By permission of instructor.
Credit variable, maximum 3 units.

L98 AMCS 299 The Study of Cities and Metropolitan America

This course serves as the introductory course analyzing the forces shaping America's cities and surrounding metropolitan areas. It examines, as well, strategies for dealing with many of the profound social issues affecting urban/metropolitan America. Emanating from an historical perspective, it examines the ways in which industrialization and deindustrialization shaped Northern American cities and the consequences of deindustrialization on urban citizenry. It further surveys the demographic and spatial transformation of American cities, examining the consequences of urban transformation on federal, state and local politics, on society and on her institutions. Similarly, the course focuses on the origin and societal changes and emerging goals of urban development, gentrification and evolving patterns of metropolitanism and the necessity for central city as well as neighborhood reconstruction. The dynamics of racial residential segregation, crime and punishment, issues of academic achievement and under-achievement, the social cleavages of urban marginalized communities, family structure, urban homelessness, urban sprawl, and health care, among others, are viewed from the perspective of social justice by exploring social, political, economic, racial and ethnic factors that impact on access, equity and care. Various theoretical perspectives and philosophies are introduced that have dominated the discourse on race and urban poverty. A field-based component complements the course work, and is designed to build interest, awareness and skills in preparation for outreach to urban communities. Prerequisite: sophomore standing.

L98 AMCS 3015 Topics in Popular Culture: End of the Century: American Culture during the 1990s

Starting with Allan Bloom's *The Closing of the American Mind*, a book that helped re-ignite the Culture Wars, this course considers the debates and problems that pervaded American culture during the 1990s. From the end of the Cold War to the sexual scandals that rocked Bill Clinton's presidency, from the emergence of the Internet to the rise of grunge and rap, the 1990s were a time of vast change in American culture. It was a period when we, as a nation, reconsidered the legacy of the 1960s, the Reagan revolution, and the end of the Cold War, a time of economic expansion and cultural tension. In our consideration of the 1990s, we consider a variety of materials — ranging from news reports and political essays, literary fiction (Philip Roth's *The Human Stain* and Jonathan Franzen's *The Corrections*) and popular films (Spike Lee's *Do the Right Thing* and The Cohen brothers' *The Big Lebowski*), to the music of Nirvana and Public Enemy — in an attempt to come to a better understanding of our recent history. By examining a wide variety of texts, we not only explore the cultural and political questions that Americans faced in the years between the fall of the Berlin Wall and the terrorist attacks of September 11, 2001, but also come to a better understanding of how cultural studies can be performed.

L98 AMCS 3026 Home, Bittersweet Home: Histories of Housing and Homeownership in America since 1850

The idea of owning one's own home has been central to realizations of the American dream or the "good life." By 1931, Herbert Hoover called the idea "a sentiment deep in the heart of our race and of American life." While the dream continues, the reality of homeownership has been elusive or fraught with struggle and sacrifice for many Americans. If home ownership is such a central part of American identity, why have so many generations of Americans struggled to achieve it? In this course, we explore the histories of different versions of home and homeownership by touching down in different locations at pivotal moments in order to investigate the varied meanings of housing and homeownership in the context of a particular place and time in American history. Using a case-study approach, the course travels across time and space to explore diverse forms of housing, including the following: the big house and slave house in the south under slavery, the immigrant tenement in New York City, the company town in south Chicago, the Midwest homestead, the planned postwar suburban neighborhood, high rise public housing and gated communities. This format exposes students to the important role of federal and local policies as well as themes of housing including: homes as private and domestic realms; housing as a commodity and the largest form of American debt; housing as an icon and encoder of social status; housing as exclusionary and inclusionary; housing as racial or socio-economic discrimination; the suburbs and their discontents; and the recent housing crisis.

L98 AMCS 3028 Music of the 1960s

The music of the 1960s played a significant and widely noted role in an era of global political and social upheaval. This course surveys a broad range of music produced during the decade, spanning the world but with emphasis on Anglo-American popular music. While a music course traditionally deals with a

single genre such as "world music," classical or jazz, this course analyzes several genres together to show how each influenced the others and how all were informed by broader social and cultural concerns. The course thus both familiarizes students with diverse musical traditions and introduces them to a new way of thinking about music and culture. Topics discussed include the transnational music industry; the contested concept of "folk" and "traditional" music; music and political protest; music and migration; and music's relation to ethnic and class identity.

L98 AMCS 3042 Making Sex and Gender: Understanding the History of the Body

This course provides an overview of the history of the body from antiquity to modern times using an interdisciplinary approach. By exploring selections from medical texts, literature, fashion, art, accounts of "new world" exploration, legal records, self-help books and contemporary media representations of human bodies, we consider the changing historical perception of the body. The intersection of gender, race and class factor significantly in our discussions of how the body has been construed historically and how it is currently being constructed in contemporary American culture. This course also provides an introduction to feminist/gender methodologies that apply to understanding the history of the body. This course is not open to students who have taken WGSS 204. Prerequisite: any 100- or 200-level Women, Gender, and Sexuality Studies course or permission of instructor.

L98 AMCS 3070 Politics and Policymaking in the American States

The American federal system is often overlooked in discussions about politics in the United States; however, state governments unquestionably touch the lives of Americans everyday. As such, an education in American politics is not complete without serious examination of state governments and their political institutions. This course illuminates the importance of the American states in U.S. politics and policy making by critically examining topics such as: intergovernmental relations; the historical evolution of American federalism; the organization and processes associated with state legislative, executive and judicial branches; state elections; political parties; interest groups; and specific state policy areas including budgeting, welfare, education and the environment. L98 AMCS 3075 The American Radical Novel: Literature Versus Inequality

Intended to help students reckon knowledgeably, imaginatively and articulately with our era of escalating social inequality, this class is a writing-intensive study of representative American radical novels stretching from the 19th-century abolitionism of Harriet Beecher Stowe's *Uncle Tom's Cabin* to the 21st-

century dystopianism of Gary Shteyngart's *Super Sad True Love Story*. Its main goals are two: (1) to introduce students to the long history and current significance of efforts to pit American literature against American inequality; and (2) to improve the quality of advanced student writing in the related fields of American Culture Studies and English literature. The first goal is pursued through close analysis of both radical novels and the contemporary political documents that inform them, juxtaposing such texts as Upton Sinclair's *The Jungle* and Karl Marx's *Communist Manifesto*, Alice Walker's *Meridian* and Martin Luther King Jr.'s "Nonviolence and Racial Justice." The second goal is pursued through hands-on analysis of successful rhetorical strategies sampled from *The Hodges Harbrace Handbook* and, more importantly, from the scholarly writing of students themselves.

L98 AMCS 308 Cracks in the Republic: Discontent, Dissent and Protest in America During the 1960s and 1970s

This course examines the rise and impact of several major political, social and cultural protest movements in the United States during the middle part of the 20th century. It focuses on the Beats, Civil Rights, New Left, Anti-Vietnam War, Counter-Culture, Black Nationalism, Ethnic Consciousness, Women's Liberation and Gay/Lesbian Liberation, and contextualizes these movements within major national and international developments including Jim Crow and de facto segregation, middle-class ennui, and the Cold War. We pay special attention to the role of youth activism and the methods of dissent and protest used to challenge the status quo. Throughout the course we ask and seek answers to the following questions: What was the nature of these movements? What were their differences and similarities? How was the United States changed significantly during this period and what remained relatively the same? Were those engaged in activism unrealistic in their assumptions, discontent, dissent and protest, or was it a time when many Americans, even those who were passive or who opposed the protesters, reflected upon issues of privilege and political, economic and social power?

L98 AMCS 3081 City on a Hill: The Concept and Culture of American Exceptionalism

This course examines the concept, history and culture of American exceptionalism: the idea that America has been specially chosen or has a special mission to the world. First, we examine the Puritan sermon that politicians quote when they describe America as a "city on a hill." This sermon has been called the "ur-text" of American literature, the foundational document of American culture; learning and drawing from multiple literary methodologies, we re-investigate what that sermon means and how it came to tell a story about the Puritan origins of American culture — a thesis our class reassesses with the help of modern critics. In the second part of this class, we broaden our discussion to consider the wider (and newer) meanings of American exceptionalism, theorizing the concept while looking at the way it has been revitalized, redefined and redeployed in recent years. Finally, the course ends with a careful study of American exceptionalism in modern political rhetoric, starting with JFK and proceeding through Reagan to the current day. In the end, students gain a firm grasp of the long history and continuing significance — the pervasive impact — of this concept in American culture.

L98 AMCS 3131 Topics in English and American Literature

Called the "Age of Revolution," the Romantic Age of British literature, 1770-1830, witnessed the birth of new lyric forms, the effacement of traditional strictures on style and taste, and produced through poetic voice (and its quaverings and multiplications) what might be called, over simply, the modern subject. Within a developing discourse of human rights and personal freedom, this growing assertion through poetry of individual expressivity allowed William Blake to construct in a single work a visual and verbal "Jerusalem." It encouraged William Wordsworth to write a pathbreaking investigation of the sources of his own creativity that challenged conventional restraints on what topics can, and cannot, be confessed in poetry. Beginning with these two poets, we consider the historical contexts, and the sometimes competing histories of ideas, that shaped the five major British Romantic poets: Blake, Wordsworth, Samuel Taylor Coleridge, Lord Byron, and John Keats. We follow an anthology for much of the poetry, including the poems and prose of influential contemporaries (female as well as male) who included the political philosopher Edmund Burke and Mary Wollstonecraft. Texts also assigned include Mary Shelley's *Frankenstein* and Byron's *Don Juan*. Same as E Lit 313

L98 AMCS 316F Rediscovering the Child: Interdisciplinary Workshops in an Urban Middle School

It is said that at this time in history the entire country must make a commitment to improve the positive possibilities of education. We must work to lift people who are underserved; we must expand the range of abilities for those who are caught in only one kind of training; and we must each learn to be creative thinkers contributing our abilities to many sectors of

our society. In this course, we expand our views about learning by experimenting with the creative process of lateral thinking. In the first six weeks of the semester, we learn about learning by meeting with exceptional people with many scholarly, professional, and civic engagement accomplishments. We also learn by working in teams to develop an exciting set of 2-D/3-D, hands-on, problem-solving workshops for middle-schoolers from economically disadvantaged urban families; the workshop curriculum is based upon students' knowledge and passion as well as their interests. During the last eight weeks, we deliver these workshops once a week to students at Compton-Drew Middle School (adjacent to the Science Center in the city of St. Louis). In this course we celebrate the choices of studies we each pursue, and expand our experience by learning from each other's knowledge bases and creativity. The course is open to students from all disciplines and schools, freshmen through seniors, and meets the multidisciplinary fieldwork requirement for AMCS majors. CBTL course.

L98 AMCS 323C Children and War

This course considers 20th century representations of war in American children's literature. Our scope stretches from the run-up to World War II in the 1930s through the current conflicts in Iraq and Afghanistan. This period produced texts that debated not only the role of war in childhood development but also the role of the child in war's development. Genres include picture and comic books, career and adventure fiction, science fiction, and childhood memoir.

L98 AMCS 3255 Development of the American Constitution

The practical meaning of the Constitution has changed since 1787, not only as a result of normal amendments and court interpretations, but also through normal politics and unconventional transformations. After initial discussion of the nature of the Constitution and of constitutional interpretation, the course examines important instances of such change processes. These have resulted in important reformulations, usually gradual but occasionally sudden, of executive branch powers, the judicial system, the electoral system, federalism, economic regulation, and civil rights. The course then devotes special attention to several present-day issues of constitutional politics, such as presidential war powers, the use and misuse of secret agencies, the "unitary executive theory," and the special constitutional significance of the Justice Department. Prerequisites: Pol Sci 101B American Politics. Formerly Pol Sci 3254 Constitutional

Politics in the U.S.: Students who have taken that class are not eligible.

L98 AMCS 3263 Introduction to Research Design

The purpose of this course is to introduce students to a range of research designs found in the social sciences. We work on ways to ask and operationalize research questions as well as examine appropriate research designs and strategies. We begin the course with the problem of developing informed research questions, the accompanying hypotheses and developing them around a so-called scientific method. We concern ourselves with understanding the role and importance of literature reviews and then examine sources of data and four types of research strategy through cases that use them: ethnomethodology, an historical methodology, a quantitative approach, and a hybrid of quantitative and qualitative approaches.

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L98 AMCS 327 Public Opinion and American Democracy

This course is about the salience of public opinion and its influence on American Politics. Topics covered include many of the theories developed to explain how public opinion is formed, if and why it changes, and the relationship between public opinion and the political behavior of citizens and elites. Therefore, the course describes and analyzes many of the factors that influence the formation, structure and variation in public opinion: information processing, education, core values, racial attitudes, political orientation (ideology and party identification), political elites, social groups, the media and religion. Additional topics include presidential approval, congressional approval, and the relationship between public opinion and public policy. The course also trains students in several concepts of statistical analysis (assuming no prior knowledge) so that students can use these tools as part of their own research projects. Prerequisites: previous course work in American politics or communications. Same as Pol Sci 3211

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA

L98 AMCS 3270 Comics, Graphic Novels and Sequential Art

This course traces the evolution of comics in the America from the "comic cuts" of the newspapers, through the development of the daily and Sunday strips, into the comic book format, and the emergence of literary graphic novels. While not a uniquely American medium, comics have a specifically American context that intersects with issues of race, class, gender, nationalism, popular culture, consumerism and American identity. Comics have repeatedly been a site of struggle in American culture; examining these struggles illuminates the way Americans have

constructed and expressed their view of themselves. The way comics have developed as a medium and art form in this country has specific characteristics that can be studied profitably through the lens of American Culture Studies.

L98 AMCS 3272 The Superhero in American Culture

The superhero is an American cultural figure that enjoys great metaphoric resonance in contemporary America and about contemporary America, much as the Western did during the Cold War. But this metaphoric resonance has existed since the genre came into being with Superman in 1938 as part of the nation's response to modernity, and predates the creation of the genre through the hero figures that contributed tropes to the superhero genre. Through a cultural historical and transmedia approach, this course examines the superhero and the superhero genre as a myth medium and contested site for portraying and shaping ideas about American identity, masculinity, modernism, race, class, gender and humanity. The prehistory of the superhero is examined in 19th- and early 20th-century frontier stories, science fiction and pulp fiction. The definition of the superhero and the genre's evolution in comics, film, television, and fan-produced works are examined, with a focus on how the genre has served and mediated the conflicting needs of creators and audiences.

L98 AMCS 3273 American Graphic Storytelling and Identity

From editorial cartoons presenting African Americans in racist caricature during the Civil War and Reconstruction, to the appearance of the "Yellow Kid" in the comic strip "Hogan's Alley," to graphic narratives that reinforce (or challenge) racial and gender stereotypes in the late 20th century, comics in the United States have long been preoccupied with identity. In this course we trace the development of identity as a major preoccupation in the comics medium.

L98 AMCS 3283 Introduction to Global Health

This course provides a general introduction to the field of public health. It examines the philosophy, history, organization, functions, activities, and results of public health research and practice. Case studies include infectious and chronic diseases, mental health, maternal and reproductive health, food safety and nutrition, environmental health, and global public health. Students are encouraged to look at health issues from a systemic and population level perspective, and to think critically about health systems and problems, especially health disparities and health care delivery to diverse populations. No background in anthropology or public health is required.

L98 AMCS 3295 Beautiful Losers: The French in North America, 1500-1850

Adventurous fur-traders, fun-loving carnival-goers, magnanimous noblemen, simple but goodhearted Catholic peasants: the portrait of the French in the Americas rarely goes beyond these time-honored stereotypes. The French have usually been treated as quaint remnants of a bygone age, vanquished first by the British army, and then by the march of modernity. This class seeks to rescue these historical actors from the typecasting to which we often condemn them. Through this examination of the French presence in the Americas, we rethink and revisit the familiar stories of British North America, stories of slavery, commerce, property, piety and migration. The contrasted differences also allow us to reflect on the nature of colonialism and question some ready-made understandings about colonial British America and the Early Republic. Modern, Transregional. Prerequisite: none.

L98 AMCS 3296 Race & Ethnic Relations in the United States

This course is designed to explore relations within and between the racial and ethnic groups of the United States. We examine the social, economic and political similarities and differences of African Americans, Asian Americans, Latinos, and New Immigrants that distinguish their American experience. Of particular interest are their respective experiences in relation to one another and the majority population for understanding the origins of conflict and unanimity within and between the different groups. We pay specific attention to events in Ferguson, Missouri, and the tensions between political leaders, policing and minorities more generally, the disproportionate levels of poverty experienced by African Americans and Mexican Americans, and the vilifying of certain minorities by the majority population.

L98 AMCS 3325 Topics in Politics: Constitutional Politics in the United States

The principal purpose of this course is to introduce students to the politics of constitutional interpretation. We first discuss the origins of the constitution, the structure operation and work of courts, and judicial decision-making. Afterward, we examine various areas of the law relating to institutional powers and constraints (e.g., federalism, presidential powers, Congressional authority). In so doing, we develop an understanding for the legal doctrine in each area of the law and also examine explanations for the legal change we observe.

L98 AMCS 336C The Cultural History of the American Teenager

This course explores the recent history of the teenager in the United States, from the rise of teen culture in the 1950s to the current state of adolescence in the new century. Why have so many novels and films memorialized adolescence? How has the period of development been portrayed in books and film? How have depictions and attitudes toward teen culture changed over the past fifty years? We begin with J.D. Salinger's classic novel of adolescence alienation, *The Catcher in the Rye*, a book that in many ways helped initiate the rise of the youth movement in the 1950s and '60s. From there, we read a series of novels and historical studies that trace the changes in teen culture that have occurred over the past half century. Our class also considers a few films, such as *Rebel Without a Cause* and *Dazed and Confused*, which have helped shape our conception of the American teenager. Ultimately, we question what these depictions of teen culture can tell us about larger trends and concerns in American life. Readings include Judy Blume's *Forever*, Stephanie Meyer's *Twilight*, and Colson Whitehead's *Sag Harbor*.

Credit 3 units.

L98 AMCS 3370 Music and Performance

In his 1998 book, *Musicking*, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography, and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater and rock. We examine artists whose work blurs the line between "music" and "theater," including George Clinton, Taylor Mac, and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.

L98 AMCS 3422 Americans and Their Presidents

How have Americans understood what it means to be President of the United States? This seminar uses that question as a point of departure for a multidisciplinary cultural approach to the presidency in the United States, examining the shifting roles of the chief executive from George Washington through Barack Obama. In addition to a consideration of the President's political and policymaking roles, this course examines how the lived experiences of presidents have informed the ways Americans have conceived of public and private life within a broader political culture. In the process, this course uses the presidency as a means to explore topics ranging from electioneering to gender, foreign policy to popular media. Readings are drawn from a broad range of fields.
Credit 3 units. A&S: TH A&S IQ: HUM BU: BA EN: H

L98 AMCS 344 Courts and Civil Liberties

This course focuses on constitutional law principles in the Bill of Rights, and examines how Supreme Court decisions influence these principles in everyday life. We explore how the courts, and particularly the Supreme Court, have interpreted these rights in light of changing times and emerging issues. Topics include the First Amendment; free exercise of religion and the establishment clause; freedom of speech, assembly and association; freedom of the press; the Fourth Amendment and the rights of those accused and convicted of crimes; the right to privacy, including reproductive freedom and the right to die; equal protection and civil rights, including race, gender, sexual orientation; immigrants' rights and voting rights; and civil liberties after September 11. Recommended for the Liberal Arts and Business (LAB) Certificate.

L98 AMCS 3450 Sexual Politics in Film Noir and Hardboiled Literature

Emerging in American films most forcefully during the 1940s, film noir is a cycle of films associated with a distinctive visual style and a cynical worldview. In this course, we explore the sexual politics of film noir as a distinctive vision of American sexual relations every bit as identifiable as the form's stylized lighting and circuitous storytelling. We explore how and why sexual paranoia and perversion seem to animate this genre and why these movies continue to influence "neo-noir" filmmaking into the 21st century, even as film noir's representation of gender and sexuality is inseparable from its literary antecedents, most notably, the so-called "hard-boiled" school of writing. We read examples from this literature by Dashiell Hammett, James Cain, Raymond Chandler and Cornell Woolrich, and discuss these novels and short stories in the context of other artistic and cultural influences on gendered power relations and film noir. We also explore the relationship of these films to censorship and to changing post-World War II cultural values. Films to be screened in complete prints or in excerpts include many of the following: *The Maltese Falcon*, *Double Indemnity*, *Murder My Sweet*, *Phantom Lady*, *Strangers on a Train*, *The Big Sleep*, *The Killers*, *Mildred Pierce*, *The High Wall*, *Sudden Fear*, *The Big Combo*, *Laura*, *The Glass Key*, *The Big Heat*, *Kiss Me Deadly*, *The Crimson Kimono*, *Touch of Evil*, *Alphaville*, *Chinatown*, *Taxi Driver*, *Devil in a Blue Dress*, *The Bad Lieutenant*, and *Memento*. L98 AMCS 3482 Rethinking the "Second Wave": The History of U.S. Feminisms, 1960-1990

The U.S. women's movement has been called "the 20th century's most influential movement," but until recently assessments of its origins, characteristics and impact have been largely impressionistic and subjective, left to movement participants and popular culture. Building on a recent explosion of historical studies of American feminism, this course examines the history of the so-called "second wave" of the women's movement from its origins in the early 1960s to its alleged demise in the late 1980s. Topics to be covered include the origins of feminist activism; the traditional history of the women's movement and recent revisions; how race and class shaped the feminist movement; how feminist ideas and organizing transformed American society; feminism and individual experience; and responses to the women's movement. In this discussion-based course, we read scholarly analyses of the women's movement as well as memoirs, popular essays, and many primary documents from the period.

L98 AMCS 3504 A Cultural History of Conservatism In The United States Since World War II

Beginning with Hayek's *The Road to Serfdom* and Buckley's *God and Man at Yale*, this course examines some of the major conservative writers and thinkers in the United States since World War II. The course includes readings by Russell Kirk, Richard Weaver, Barry Goldwater, Phyllis Schlafly, Irving Kristol, Newt Gingrich, and Pat Buchanan as well younger conservatives like Mark Steyn, Jonah Goldberg, Ramesh Ponnuru, S.E. Cupp, and Kevin Williamson. Several classes are devoted to black conservatives including Thomas Sowell, Shelby Steele, and Walter Williams. We try to answer the questions: What is conservatism and who are its adherents? Can we speak of conservatism in the singular or are there several types of conservatism? Are the various forms of conservatism politically and intellectually compatible? How has conservatism changed since Reagan and the 1980s? What inroads has conservatism made in the cultural and political life of the United States? Is the United States essentially a conservative nation? Time permitting, we may also watch a few Hollywood movies by conservative filmmakers.

Credit 3 units. A&S: TH A&S IQ: HUM BU: HUM EN: H

L98 AMCS 3507 Legal Conflicts in Modern American Society

Thousands of lawsuits are filed daily in the state and federal courts of the United States. The disputes underlying those lawsuits are as messy and complex as the human, commercial, cultural and political dynamics that trigger them, and the legal processes for resolving those disputes are expensive, time-consuming and, for most citizens, seemingly impenetrable. At the same time, law and legal conflict permeate public discourse in the United States to a degree that is unique in the world, even among the community of long-established democracies. The overarching objective of the course is to prepare our undergraduate students to participate constructively in that discourse by providing them with a conceptual framework for understanding both the conduct and resolution of legal conflict by American legal institutions, and the evolution of — and values

underlying — the substantive law American courts apply to those conflicts. This is, at core, a course in the kind of legal or litigation "literacy" that should be expected of the graduates of first-tier American universities. Some of the legal controversies that are used to help develop that "literacy" include those surrounding the permissible use of lethal force in self-defense, the constitutionality of affirmative action in university admissions, contracts that are unconscionably one-sided, sexual harassment in the workplace, the duty of landlords to prevent criminal assaults on their tenants, groundwater pollution alleged to cause pediatric cancers, and warrantless searches of cellphone locator data by police.

L98 AMCS 351 History of Electronic Media

This course traces the history of electronic media as they have become the dominant source for entertainment and information in contemporary culture, starting with over-the-air broadcasting of radio and television through to cable and the "narrowcasting" achieved by digital technologies. While some attention is paid to other national industries, the chief focus of the course is on electronic media in the United States to determine, in part, the transformative role they have played in the cultural life of the nation. The course explores the relationship of the electronic media industries to the American film industry, determining how their interactions with the film industry helped mutually shape the productions of both film and electronic media. Required screenings.

L98 AMCS 3551 The Welfare State and Social Policy in America

How can we understand the recent debate about fundamental health care reform? Should social security be partially or wholly privatized? Was the 1996 welfare reform a success? Contemporary political questions frequently focus on the American welfare state and the social policies that comprise

it. The first half of this course describes the American welfare state broadly construed, places it in a comparative context, and elucidates major political science explanations for the size and scope of American social policy. We touch on several areas of social policy while constructing the generalized lenses through which particular political outcomes can be understood. The second part of the course then focuses on three major aspects of the American welfare state: health care, old age pensions, and policies related to work, poverty and inequality.

Credit 3 units. A&S: SS A&S IQ: SSC BU: BA EN: S

L98 AMCS 3561 Women and the Law

We explore the development of women's legal rights by examining the ways in which social constructions of gender, race, class and sexuality have shaped American legal concepts within the limited bounds of traditional legal reasoning. We begin by placing our current legal framework, and its gender, race and other societal assumptions, in an historical and Constitutional context. We then examine many of the critical questions raised by feminist theory, feminist legal thought and other critical perspectives. For example, is the legal subject gendered as male, and if so, how effectively can women use the law to gain greater social equity? What paradoxes have emerged in areas, such as employment discrimination, family law or reproductive rights, as women have sought liberal equality? What is the equality/difference debate about and why is it important for feminists? The course is thematic, but we spend time on key cases that have influenced law and policy, examining how they affect the everyday lives of women.

L98 AMCS 3570 Quality Television and the "Primetime Novel"

Over the past four decades, the cultural status of television in the United States has been reconfigured and complicated with changes in industrial structures, audience formations, regulatory presumptions, and production techniques and strategies. This course examines these interrelated forces, particularly as they have fostered a set of programs and practices often hailed as Quality Television. The class surveys the institutional paradigms that gave rise to particular generations of programming celebrated as "quality" and analyze the systems of distinction and cultural value that make the label socially and industrially salient. We critically investigate the role of audiences and the conceptions of viewer choice at play in these developments. In addition, the course analyzes the textual features that have come to signify narrative complexity and aesthetic sophistication. We examine foundational historical examples of this phenomenon from *The Mary Tyler Moore Show* to *Hill Street Blues*, and *Cagney & Lacey* to *Northern Exposure*, as well as more contemporary broadcast and cable fiction such as *LOST*, *The Wire*, and *Mad Men*. In addition, students are expected to watch a complete series, chosen in consultation with the instructor, as part of their final research project. Required screening. Prerequisite: Film Studies 220 or Film Studies 350 or consent of instructor.

L98 AMCS 3575 US Foreign Policy: Theory and Practice

In this class we focus on the procedures and institutions that shape U.S. foreign policy decisions. This is neither a course on international relations theory nor a history of U.S. foreign policy. Rather, this course examines the domestic politics surrounding U.S. foreign policy decisions. How do public opinion, electoral politics, and interest groups shape foreign policy? Which branch controls foreign policy — the president, Congress, the courts? Or is it ultimately the foreign affairs bureaucracy that pulls the strings? We examine these topics through reading and writing assignments, class discussion, and simulations to promote deeper understanding and build practical skills.

L98 AMCS 358 Law, Politics and Society

This course is an introduction to the functions of law and the legal system in American society. The course material stresses the realities of the operation of the legal system (in contrast to legal mythology), as well as the continuous interaction and feedback between the legal and political systems. There are four specific objectives to the course: (1) to introduce students to legal concepts and legal theories; (2) to analyze the operation of the appellate courts, with particular emphasis on the U.S. Supreme Court; (3) to analyze the operation of American trial courts, especially juries and the criminal courts; and (4) to examine the linkages between culture and law.

L98 AMCS 3581 Scribbling Women: 19th-Century American Women Writers

In 1855, Nathaniel Hawthorne wrote to his publisher, William Tichnor, that "America is now wholly given over to a damned mob of scribbling women and I should have no chance of success while the public taste is occupied with their trash." In this class, we examine works of those scribbling women of the 19th century. We read one of the best-selling novels of the century, one that created a scandal and ruined the author's literary reputation, along with others that have garnered more attention in our time than their own. In addition to focusing on these women writers, we also explore questions about the canon and American literature: What makes literature "good"? What constitutes American literature? How does an author get in the canon and stay there? Finally, in this writing intensive course, there are frequent writing assignments and a strong emphasis on the essential writing process of drafting and revising.

L98 AMCS 361A Women and Social Movements: Gender and Sexuality in U.S. Social Movements

This course examines the history of grassroots activism and political engagement of women in the U.S. Looking at social movements organized by women or around issues of gender and sexuality, class texts interrogate women's participation in, and exclusion from, political life. Key movements organizing the course units include, among others: the Temperance Movement, Abolitionist Movements, the Women's Suffrage Movements, Women's Labor Movements, Women's Global Peace Movements, and Recent Immigration Movements. Readings and discussion pay particular attention to the movements of women of color, as well as the critiques of women of color of dominant women's movements. Course materials analyze how methods of organizing reflect traditional forms of "doing politics," but also strategies and tactics for defining problems and posing solutions particular to women. Prerequisites: any 100- or 200-level Women, Gender, and Sexuality Studies course or permission from the instructor.

L98 AMCS 3621 Colonial America to the Revolution

This course examines the history of the North American British colonies, up to the American Revolution. We pay particular attention to the political, economic and cultural differences separating colonial regions — New England; the Mid-Atlantic; the Chesapeake; and the southern colonies of Georgia and the Carolinas — while also examining their shared British identity. Drawing from readings consisting of both primary texts and scholarly readings, we also examine how colonists' place on the periphery of the British empire shaped their vision of what it meant to be "British," and what role that vision played in shaping the colonial response to British rule, and eventually, their decision to fight for Independence.

L98 AMCS 3632 Mapping the World of "Black Criminality"

Ideas concerning the evolution of violence, crime and criminal behavior have been framed around many different groups. Yet, what does a typical criminal look like? How does race — more

specifically blackness — alter these conversations, inscribing greater fears about criminal behaviors? This course taps into this reality examining the varied ways people of African descent have been and continue to be particularly imagined as a distinctly criminal population. Taking a dual approach, students consider the historical roots of the policing of black bodies alongside the social history of black crime while also foregrounding where and how black females fit into these critical conversations of crime and vice. Employing a panoramic approach, students examine historical narratives, movies and documentaries, literature, popular culture through poetry and contemporary music, as well as the prison industrial complex system. The prerequisite for the course is AFAS 3880 (Terror and Violence in the Black Atlantic) and/or permission from the instructor, which will be determined based on a student's past experience in courses that explore factors of race and identity. Enrollment limit: 20.

L98 AMCS 366 The Civil War and Reconstruction: 1848–1877

This course is a survey of American history from 1848-1877, focusing on the Civil War and Reconstruction. The bloody conflict, and its causes and consequences, are explored from multiple perspectives. Those of individuals such as Lincoln, McClellan, Davis, Douglass, and Lee, who made momentous choices of the era; of groups such as the Radical Republicans and the black freed people that helped shape the actions of individuals; and of the historians, novelists, filmmakers and social movements that have struggled to define the war's legacy for modern America.

L98 AMCS 367 Modern America, 1877–1929

This course explores dramatic changes in American society during the half-century from the Civil War to the end of WWI. We discuss industrialization; mass immigration from Europe, Asia and Latin America; the vast movement of rural people to cities; the fall of Reconstruction and rise of Jim Crow; the expansion of organized labor; birth of American Socialism; and the rise of the American empire in the Caribbean and the Philippines. The course, in addition, analyzes the many and varied social reform efforts of the turn of the 20th century, from women's suffrage to anti-lynching campaigns; from trust-busting and anti-immigrant crusades to the settlement house movement.

L98 AMCS 3671 The Long Civil Rights Movement

The Civil Rights Movement is known as a southern movement, led by church leaders and college students, fought through sit-ins and marches, dealing primarily with non-economic

objectives, framed by a black and white paradigm, and limited to a single tumultuous decade. This course seeks to broaden our understanding of the movement geographically, chronologically, and thematically. It pays special attention to struggles fought in the North, West and Southwest; it seeks to question binaries constructed around "confrontational" and "accommodationist" leaders; it reveals how Latinos, Native Americans, and Asian Americans impacted and were impacted by the movement; and it seeks to link the public memory of this movement with contemporary racial politics.

L98 AMCS 367H Medicine, Healing and Experimentation in the Contours of Black History

Conversations regarding the history of medicine continue to undergo considerable transformation within academia and the general public. The infamous Tuskegee syphilis experiment serves as a marker in the historical consciousness regarding African Americans and the medical profession. This course taps into this particular evolution, prompting students to broaden their gaze to explore the often delicate relationship of people of African descent within the realm of medicine and healing. Tracing the social nature of these medical interactions from the period of enslavement through the 20th century, this course examines the changing patterns of disease and illness, social responses to physical and psychological ailments, and the experimental and exploitative use of black bodies in the field of medicine. As a history course, the focus is extended toward the underpinnings of race and gender in the medical treatment allocated across time and space — the United States, Caribbean and Latin America — to give further insight into the roots of contemporary practice of medicine.

L98 AMCS 369 American Horrors

Horror movies. Fright films. Scream marathons. Blood and gore fests. Why should we want to look at movies that aim to frighten us? What is the attraction of repulsion? Is there an aesthetics of ugliness? Except for some early prestige literary adaptations like *Dr. Jekyll and Mr. Hyde*, the horror film began as a low class genre, a notch above exploitation movies. In the 1970s-1980s, it became the dominant commercial genre by offering increasingly graphic images of violence and mayhem. The horror film had arrived: lavish budgets, big stars, and dazzling special effects

in mainstream major studio films competed with low-budget, no frills productions that helped establish artistically ambitious and quirky filmmakers like George Romero and David Cronenberg. By a chronological survey of the American horror film, this course explores how differing notions of what is terrifying reflect changing cultural values and norms. Throughout, we consider the difficult questions raised by horror's simple aim of scaring its audience. In addition to weekly screenings, work for the course includes analytical and theoretical essays on the horror film. Written analyses of films with a close attention to visual style are required. Prerequisite: Film 220. Required screenings. Same as Film 370

L98 AMCS 3711 The History of Popular Culture in the United States

This course surveys major developments in the history of popular culture in America, stretching from the mid-19th century to the present. It explores topics such as literature, drama/theater, dance halls, movies, radio, advertising, television, music and the Internet; it covers different types of popular culture such as printing, performance, image and audio; it looks at how popular culture has been depicted in terms of icons, myths, stereotypes, heroes, celebrities and rituals; it addresses the rise of mass production and consumption; it examines the ways in which race, class, gender, ethnicity and sexuality have been perceived and are portrayed in popular culture; and it illustrates how the content of popular culture shapes and reflects our personal, social, political and intellectual beliefs and values. L98 AMCS 372C History of Law in American Life II: 1776 to the Present

Among the many contradictions of American history, none has been more recurrent than the tension of justice and law — of aspiration and reality — as Americans have sought to make good on the promises of the Revolution. Although we pride ourselves as a nation devoted to the principle of "equal justice under the law," the terms "equal" and "justice" have prompted bitter debate, and the way we place them "under law" has divided Americans as often as it has united them. It is the purpose of this course to examine the many and conflicting ways

in which Americans have sought to use "law" to achieve the goals of the republic established in 1776. Viewing "law" as the contested terrain of justice, cultural construction, social necessity and self-interest, this course pays close attention to the way Americans have used, abused or evaded "law" throughout their national history.

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD BU: ETH, IS

L98 AMCS 373 Making War

This course examines the cinematic representation of war. Using World War II as a case study, students examine a series of combat pictures, documentaries, and "home front" films from the 1940s to the present. Several key questions guide the class discussion: How do war films respond to and shape the political worlds in which they are produced? How do these films confront the aftermath of war and the soldier's homecoming? Where is the line between the home front and the front line? More broadly, what does it mean to portray the violence and suffering that war inevitably brings? At the close of the semester, students partake in an in-class symposium presenting their research on the cinematic treatment of other conflicts, from the Civil War to the "War on Terror." Films include: *The Boat, Saving Private Ryan, The Thin Red Line, Why We Fight*, and *Mrs. Miniver*. Readings include works by Susan Sontag, Kaja Silverman, and W.G. Sebald. Required screenings.

L98 AMCS 3742 Social Landscapes in a Global View

From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as "landscapes." This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We

cover various urban landscapes, rural landscapes, nomadic landscapes (and others) and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world and trace the global currents of your social landscape!

L98 AMCS 3755 Disability, Quality of Life and Community Responsibility

The increasing prevalence of disability presents major challenges for American society. Social participation can be a challenge for people with disabilities, while resources to address these needs tend to be limited. This course begins by critically analyzing concepts of disability, quality of life, health and social participation. We construct a framework for examining social participation and community resources across the lifespan. Public health, educational and environmental theories and methods are applied to programs and services that aim to enhance quality of life with disabilities. We analyze ecological approaches to enhancing social participation. Upon completion of this course, students are equipped to analyze challenges and prioritize resources for individual and population health.

L98 AMCS 375A American Culture: Methods and Visions

What does it mean to study American culture? How should we go about doing this work? In this methods seminar, students explore different approaches to American culture, focusing on a specific topic and a corresponding set of cultural objects especially suited to multidisciplinary investigation. (The particular topic, and associated cultural objects, may vary from semester to semester, and are specified by the instructor in advance; see *Course Listings* for further details.) Drawing upon their training in different fields, students engage with the many questions, materials and strategies of cultural study, and find new perspectives on work in their "home" discipline. Much of this work focuses on primary sources and ways of interpreting them. The course is shaped by discussions about research methodologies and preparatory work for a final project (which, if appropriate, may become part of an AMCS web-project). As a writing-intensive course, AMCS 375A also serves as an occasion for students to think about matters of argument and presentation, and to develop ideas and models for future research. This course is intended for students at the junior level or higher. Preference given to AMCS majors and minors.

L98 AMCS 3778 Another Country: Land, Diaspora, and the Vernacular Beyond the Cities

The history of aesthetic and cultural modes of modernity is often told with an urban inflection, omitting a narrative of mobility, artistic experimentation, and social change found in

the space beyond the 20th-century city. This course applies a broad interdisciplinary perspective to consider the historical contexts of these diverse rural cultures, their intersections with technology and global economies, and the ways in which these communities and their modes of expression commute between the rural and the urban — writing, speaking, and singing in a vernacular that documents and dramatizes their modern condition. From Mississippi hill country blues to the agricultural essays of Wendell Berry, from emerging forms of American landscape design to Sherman Alexie's postmodern Indian reservation, the American rural emerges as neither a pastoral nor a wasteland, but as a richly complex and diverse patchwork. These cross-cultural narratives are connected through a number of mediums: field recordings, online archives, poems, fiction, critical essays, film, and interdisciplinary fieldwork. The confluence of these artistic and scholarly practices guide robust classroom discussion and inform inventive research projects that conclude the semester's work.

L98 AMCS 3785 Photography in America

This course considers the practice and use of photography in America from its invention up to the present, offering various ways of thinking about the medium and its relation to society and culture. Students come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We discuss famous practitioners such as Matthew Brady, Jacob Riis, Lewis Hine, Walker Evans, and Robert Frank. We consider not only the social and public uses of the medium through such episodes as the New Deal/FSA and photojournalism, but also the private explorations of "fine art" photographers, and the everyday practices of the snapshot. Prerequisites: Intro to Western (Art-Arch 112) or Intro to Modern (211), or one course in American History, American Cultural Studies, or permission of the instructor.

L98 AMCS 379 Banned Books

Why would anyone want to burn a book? Under what circumstances would you support censorship? Several years ago a Russian student was exiled to Siberia for possessing a copy of Emerson's *Essays*; today, school boards in the United States regularly call for the removal of *Huckleberry Finn* and *The Catcher in the Rye* from classrooms and library shelves. Actions like these dramatize the complex interconnections of literature and society, and they raise questions about what we read and the way we read. The course explores these issues by looking closely at several American and translated European texts that have been challenged on moral, sociopolitical or religious grounds to determine what some readers have found so threatening about these works. Possible authors: Goethe, Voltaire, Rousseau, Defoe, Hawthorne, Flaubert, Twain, Chopin,

Brecht, Salinger, Aldous Huxley, Ray Bradbury. Brief daily writing assignments.

L98 AMCS 3880 Terror and Violence in the Black Atlantic

From the period of bondage through the 21st century, terror and racialized violence have consistently been used as a form of social control. This course is constructed to explore the historical foundations of extreme threats of violence inflicted among populations of African descent. The fabric of American culture has given birth to its own unique brand of terrorism, of which this class spends considerable time interrogating. Yet, in recognizing that these practices are commonly found in other parts of the Black Atlantic, students are encouraged to take a comparative view to better tease out the wider strands of violence operative in places like England, the Caribbean and Latin America. Within this course, we explore the varied ways in which music, films, newspapers and historical narratives shed light on these often life altering stories of the past. Some of the themes touched upon include: the use of punishment/exploitation during the era of slavery, lynching, sexual violence, race riots, police brutality, motherhood, black power and community activism.

L98 AMCS 3884 Modern Design and Modern Culture

This course explores key issues of modernity (industrialization, consumerism, mass culture, nationalism, etc.) through the study of material culture. Focusing primarily on modern design in Europe and North America from William Morris to Charles Eames and Aleksander Rodchenko to Bruce Mau, we examine major developments in design thinking and practice as both reactive to and generative of broader political, economic and social concerns. The course is organized around important and influential exhibitions, from World's Fairs to storefront shows, where design professionals, institutions and publics came together to reflect on topics of urgency, identify alternatives, and imagine the implications of design on everyday life. Wherever possible, class discussions/lectures and assignments make use of objects and archives in area collections. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215) or permission of instructor.

L98 AMCS 38B9 Understanding Lincoln: Writing-Intensive Seminar

This course explores the life, art (political and literary) and historical significance of Abraham Lincoln. It focuses first on how he understood himself and foregrounds his inspired conception of his own world-historical role in the Civil War. The course also traces how the larger world furnished the contexts of Lincoln's career, how his consciousness, speeches and writings, and presidential decisions can be understood against the backdrop of the revolutionary national democratic upheavals of the 19th century. Finally the course investigates how the 16th president, so controversial in his day, has remained a site of cultural contestation, with historians, novelists, poets, cartoonists, filmmakers, advertisers and politicians struggling over his memory and meaning, to the present.

L98 AMCS 394 Urban Development and the Global Economy

This course is designed to familiarize students with the urban effects of economic globalization and to provide students with tools that enable them to engage in scholarly and practical debates on economic growth and the city. Students are exposed to a variety of theoretical statements comparative studies, and case-specific research focusing on cities and the global economy. Topics include: industrial reorganization and its connection to the urban form, the ability of "dead" cities to adapt to economic change; how economic innovation is encouraged or suppressed within cities; growth coalitions and urban politics; networks and culture in relation to capitalist commitment to urban space; and the role of the arts and entertainment in new development versus production-based paradigms.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L98 AMCS 395 American Indians and American Empire

Through readings of historical and contemporary texts drawn from American Indian testimonial, scholarship and literature; anthropology; and history, we explore past struggles for cultural and political survival and contemporary politics of self-determination of indigenous peoples. We consider these issues alongside American "Empire": the past and present politics of nation-building, expansion and rule that characterize the United States. Topics include race, anthropology and 19th-century imperialism; education, the Indian and American democracy; sovereignty and tribal self-determination; Indian political movements; and the contemporary politics of energy, resources and Indian lands.

L98 AMCS 3950 Topics in Religion and Politics: Islam and Muslims in the United States

This course examines the history of Islam and Muslims in the United States, from the earliest days of the country's founding to the contemporary everyday life of Muslims in the U.S. From the arrival of West African Muslims to the Americas during the Atlantic slave trade and the Founding Fathers' discussion of a Muslim president to Malcolm X, the Nation of Islam, Muslim Students Associations, and grocery stores, the course traces individual, communal, and institutional histories of American Muslim encounters and experiences. Studies of religion, history and anthropology are examined with literature, music, films and new media toward an interdisciplinary investigation of how Islam as a religion and worldview is represented, practiced and lived, intersecting with race, gender, class, sexuality, diaspora, politics and citizenship in an American and global landscape.

L98 AMCS 3975 Wolves of Wall Street: American Business and Popular Culture

America's perceptions about Big Business and the Free Enterprise system have evolved and changed over time from

the 1920s to the present. During the 1980s, for example, Oliver Stone's *Wall Street* seemed to endorse the notion that "greed is good." Today, however, the topic of rising income inequality has been connected with the collapse of prestigious Wall Street firms, the "housing bubble," a declining middle class, and widespread fear about the future of "The American Dream." This course examines a variety of artistic, ethical and historical perceptions about American Business as depicted in popular culture and the arts over the past hundred years. How have America's foremost artists (among them F. Scott Fitzgerald, Eugene O'Neill, Arthur Miller, Martin Scorsese), dealt with questions of conspicuous consumption, the acquisition of capital for its own sake, and the disparity between rich and poor? We survey several artistic genres and artistic forms, including American tragic works like *The Great Gatsby* and *Death of a Salesman*, to popular musicals such as *How to Succeed in Business without Really Trying* and *The Producers*.

L98 AMCS 39SL Blacks, Latinos and Afro-Latinos: Constructing Difference and Identity: Writing-Intensive Seminar

Dominant discourses on Black-Latino relations focus on job competition, while a few others celebrate the future of an America led by "people of color." What is at stake in these narratives? How did we come to understand what is "black" and "Latino"? Students taking this course examine the history of African Americans' and Latinos' racialization under British, Spanish, and American empires, paying attention to both the construction of the racial "Other" by European elites, the reclaiming of identities by the racially marginalized through the Black and Brown liberation movements of the 1960s and 1970s, and the movements' impacts on black-Latino electoral and grassroots coalitions, mass incarceration of youth, and Afro-diasporic productions of hip hop.

L98 AMCS 4008 Senior Seminar on the Presidency

This is a research seminar that begins with a series of common readings, after which students constitute themselves into research teams that explore the current state of the presidency in broad cultural perspective. Research topics may include: a survey of the books on the presidential family; media interpretations of the administration and the political process; the political uses of information technology, specifically the Web and social media; continuities and changes in voter behavior; the shifting powers of the presidency. This course is designed as a complement to Focus on the Presidency, and Focus 200 is a prerequisite for this course.

L98 AMCS 4020 The Legal Landscape in a Changing American Society

This course is designed to examine the qualitative relationship between transformations in law in America and the structure of American values and behavioral patterns and in the institutions and culture of American law. The materials cover the structural aspects of the legal system and its place in American society

and not the law's doctrinal features (i.e., the specific substantive areas of the law). Rather the course examines how the organization and functioning of the law incorporates the values and changes in the American society. To achieve this, the course topics include: (a) Americans' perceptions of their legal institutions and agents; (b) changing links between law and the mass media; (c) concerns about the jury system; (d) the use (and abuse?) of litigation and its alternatives (ADR); (e) inequalities in access to the legal system; and (f) the transformations within the legal profession, both in law firms and in the careers of attorneys.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L98 AMCS 4023 Models of Social Science

What distinguishes the social sciences from the natural sciences? What goals and assumptions do they share? Does studying "humans" with free will pose any problems for applying the methods of the natural sciences to the study of society? How do various social sciences — in particular anthropology, economics and political science — differ from one another? And where did the social sciences (both the disciplines and the conceptual issues) come from historically? These are the animating questions of this course. This class explores these questions in historical and contemporary perspective, as they relate to the rise of the social sciences as a set of academic disciplines. We set out the theoretical structure of the scientific method, paying particularly close attention to the relationships between theory and evidence, inference and hypotheses. Next we consider four problems and methods of the social sciences. These include questions of (1) treating human beings as a rational actors; (2) attributing causal forces other than a person's own will to human behavior; (3) empirical observations and inference; and (4) the role of interpretation. In all four cases, we are interested in asking: Toward what solutions have these problems lead social scientists, and what other sets of difficulties do their solutions raise? We also pay particularly close attention to the role that concepts play in social analysis.

L98 AMCS 403 Culture and History of the Southwestern United States

This course integrates archaeological, historical, and early ethnographic dimensions of American Indian societies in the southwestern United States and northwest Mexico, a region famous for its challenging environment, cultural diversity, and the contributions made by its Native inhabitants. Emphasis is placed on the development of sophisticated desert agriculture and on the rise of regionally integrated cultures including Chaco Canyon and Mesa Verde. The impact of Spanish, Mexican, and American colonization are explored. Ethnographies of Tohono O'odham (Papago), Hopi, Zuni, Rio Grande Pueblo, and Navajo societies are discussed.

L98 AMCS 4030 Political Theory of Education

This course explores issues of authority, legitimacy, citizenship, freedom, and equality through contemporary readings in the political theory of education. What is to be done when parents, citizens, and educational experts make conflicting judgments about the proper education of children? When should the state defer to parental judgments and what are the grounds for legitimately refusing to do so? How should public schools aim to equip their students for the responsibilities of citizenship

in a diverse liberal democratic state? What do the concepts of equality and equality of opportunity mean in the context of education, and (how) should governments pursue these values through education policy? We shall explore these issues through contemporary works of political theory as well as through considering a number of important U.S. court cases, including those dealing with the schooling of children from minority religious and cultural groups, affirmative action in university admissions, and school desegregation plans. Prerequisite: one previous course in political theory or political philosophy. Same as Pol Sci 4030

L98 AMCS 4036 Children of Immigrants: Identity and Acculturation

This seminar examines two sub-groups: child immigrants and the native-born children of immigrants. It interrogates cultural/ethnic identity, cultural adaptation, bilingualism and biculturalism, and challenges and achievements of this young generation through ethnography, literature, and sociological accounts. We aim to scrutinize the studies of the "1.5" generation and the second generation, and theories such as "segmented assimilation," across a wide range of ethnic groups, from people of East Asian origins to those with Latin American ancestries, by mainly focusing on their experiences in the United States.

L98 AMCS 407 Democracy and the Rhetorical Society

The growth of democracy around the world has placed renewed focus on the practice of democracy and the conditions under which democracy can work effectively as a method of cooperation and decision-making. In this seminar we step back and reflect on what it means to communicate, interact and govern together in a democratic society. With special emphasis on the role of rhetoric in democratic practice, we study a variety of classic and contemporary texts to see what is at stake in making democracy work in the 20th century.

L98 AMCS 4120 Rainbow Radicalisms!: Ethnic

Nationalism(s), the 1960s and the Politics of the New Left

The Black Panther Party remains one of the most iconic groups of the 1960s and 1970s. Perhaps one of the most understudied aspects of the Panther's legacy is their radical influence upon other American racial and ethnic groups, including Asian Americans, Mexican Americans, Puerto Ricans and American Indians, among others. This seminar considers the emergence of ethnic and racial nationalism among these various groups, as a result of their contact and relationship(s) with the Black Panther Party. Considering the politics of groups such as the Red Guard, the Brown Berets, the Young Lords and the American Indian Movement, this course charts the rise and fall of rainbow radicalism as a general offspring of the Black Power Movement and part and parcel of what is commonly referred to as "the New Left." It also considers these groups in relation to the State by probing the dynamic push and pull between repression and democracy. Ultimately, this course grants insight into the contemporary racial domain and current political landscape of America as we discuss how these groups helped to shape modern identity formations, discourses on multiculturalism and definitions of "minority," "diversity" and "equality."

L98 AMCS 4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics

In the year 2000, HIV became the world's leading infectious cause of adult death, and in the next 10 years, AIDS is expected to kill more people than all wars of the 20th century combined.

As the global epidemic rages on, our greatest enemy in combating HIV/AIDS is not knowledge or resources, but global inequalities and the conceptual frameworks with which we understand health, human interaction and sexuality. This course emphasizes the ethnographic approach for cultural analysis of responses to HIV/AIDS. Students explore the relationship between local communities and wider historical and economic processes, and theoretical approaches to disease, the body, ethnicity/race, gender, sexuality, risk, addiction, power and culture. Other topics covered include the cultural construction of AIDS and risk, government responses to HIV/AIDS, origin and transmission debates, ethics and responsibilities, drug testing and marketing, the making of the AIDS industry and "risk" categories, prevention and education strategies, interaction between bio-medicine and alternative healing systems, and medical advances and hopes.

L98 AMCS 4203 Civic Scholars Program Semester Four: Civic Engagement across the Lifespan

This is the fourth-semester course for students in the Civic Scholars Program of the Gephardt Institute for Civic and Community Engagement. This culminating course provides students with the opportunity to integrate the Civic Scholars experience, explore civic engagement opportunities post-college, and discuss ethics and civic engagement. Through group discussions, readings, lectures and guest speakers, students (1) understand civic engagement over the life course; (2) discuss ethics and civic engagement; and (3) develop a one-, five-, 10-, and 20-year civic vision. This 1-credit course meets weekly for one hour during the spring semester. Students are expected to take an active role in their learning through sharing their experiences, engaging with reading material, and participating in reflection exercises. Prerequisites: AMCS 3202, AMCS 3203 and AMCS 4202.

L98 AMCS 4209 New Media Literacy and Popular Culture in Education

At the closing of the 20th century, the "digital turn" began to shape how individuals learn, communicate and interact with one another. Current and emerging media technologies have continued to change how individuals (youth and adults alike) gather information; consume, produce and disseminate texts; and participate in both local and global communities through print- and screen-based platforms such as email, blog, podcast and mash-ups, among others. In this course, we explore what we mean by technology, the various types and uses of technology and the relationship of technology to literacy and education. We begin with characteristics of "new media" and consequences of the digital revolution. Then, we examine conceptualizations of literacy in a historical context — from literacy as reading and writing to literacy as multimodality, convergence and participation. Finally, we shift our inquiry to investigate how new media literacies and technologies are shaping (and are shaped by) different forms of popular culture in U.S. and international contexts, including parts of Asia, Australia, Europe, Africa, and North and South American. We make explicit the connections to education and explore possible directions for research and practice, including copyright and fair use issues present in educational settings. Readings, discussions and activities online and in actual communities culminate in individual- and class-based new media productions. Prerequisite: at least junior standing or permission of the instructor.

L98 AMCS 4214 From Mammy to the Welfare Queen: African-American Women Theorize Identity

How do representations of identity affect how we see ourselves and the world sees us? African-American women have been particularly concerned with this question, as the stories and pictures circulated about black female identity have had a profound impact on their understandings of themselves and political discourse. In this course we look at how black feminist theorists from a variety of intellectual traditions have explored the impact of theories of identity on our world. We look at their discussions of slavery, colonialism, sexuality, motherhood, citizenship, and what it means to be human.

L98 AMCS 4224 The 1904 St. Louis World's Fair: German and Austrian Art Exhibited

The St. Louis World's Fair of 1904 (The Louisiana Purchase Exposition) was one of the greatest events of its time. At the beginning of the course, we deal with the historical development that led to the purchase of the Louisiana Territory in 1803 and have a look at the grand dimensions of the World's Fair (connected with the Olympic Games). Of central importance are the Art Exhibits from Germany and Austria with their cultural-political implications. The German Emperor had a hand in selecting the German paintings to be sent to St. Louis, and his opposition against modern movements like Impressionism caused opposition in Germany. Austria was different: In their Art Nouveau Pavilion they included secessionists (Hagenbund). The Wiener Werkstaetten (Vienna's Workshops) attracted a lot of attention. Different from the paintings, German Arts and Crafts represented avant-garde movements. We visit libraries, archives and museums in St. Louis that have World's Fair holdings. The seminar is for advanced undergraduate students but beginning graduate students can take it with permission of the instructor.

L98 AMCS 4241 Topics in American Literature II

This course offers an advanced introduction to both the literature and the concept of Modernism, the "ism" used to mark the experimental verve of early 20th-century writing and to grasp its ties to modernity, or the modern social world. As the course title suggests, we devote most of our time to the career of modernism in the United States, a place imagined as both the modernist nation par excellence and the desert modernism escaped to be born. Three groups of primary texts — early modernist experiments, 1920s modernist landmarks and Great Depression revisions — illuminate the grand ambitions of eccentric literary forms and sequestered avant-garde movements; the public disputes and buried alliances between "high" expatriate and Harlem Renaissance modernisms; and the influential Depression-era reinterpretation of modernism as reactionary self-indulgence. The syllabus features fiction, poetry and drama by old and new literary celebrities: Djuna Barnes,

John Dos Passos, T. S. Eliot, F. Scott Fitzgerald, Mike Gold, Ernest Hemingway, Nella Larsen, Meridel LeSueur, Claude McKay, Clifford Odets, Tillie Olsen, Ezra Pound, Jean Toomer and Richard Wright. A shorter list of critical essays highlight Modernism's tendency to theorize itself while introducing 21st-century perspectives from the "New Modernist Studies." Satisfies the American requirement. For undergraduates, junior or senior standing is required.

L98 AMCS 4243 The Plundered Past: Archaeology's Challenges in the Modern World

The public imagination thrills at the fantastic adventures of Indiana Jones and Laura Croft, Tomb Raider; but the reality of modern archaeology is more complex, ethically challenging and interesting than a simple treasure hunt. In the U.S. and Canada, our science museums and museums of anthropology still display artifacts that are regarded as sacred and culturally definitive by Indian nations, although such holdings are now subject to negotiation and repatriation. Art museums in Europe and the U.S. are still stocked with looted ancient masterpieces that are revered as vital heritage by the nations from which they were stolen. We display looted art alongside a much smaller number of legitimately excavated artifacts of masterpiece quality, so it is no surprise that our popular images of archaeologists as avid and undiscerning collectors raise little concern. But modern archaeologists are not extractors of art or even of scientific information, from places as passive and inert as the museums' objects ultimately occupy. Archaeologists work with living people inhabiting societies and states that care deeply about their pasts and the relics of it. They are active agents engaged with many other people in the production of knowledge about the past. In our rapidly shrinking world, educated sensitivity to the many ancient cultural legacies that shape the values of modern global society is more than a moral imperative; it is a basic form of collaboration in the common project of survival. Archaeologists are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites, and information they occupy.

L98 AMCS 4289 Neighborhoods, Schools and Social Inequality

A major purpose of the course is to study the research and policy literature related to neighborhoods, schools and the corresponding opportunity structure in urban America. The course is informed by theoretical models drawn from economics, political science, sociology, anthropology, education and law. A major focus is to gain greater understanding of the experiences and opportunity structure(s) of urban dwellers, in general, and urban youth, in particular. While major emphasis is placed on data derived from the interface of urban environments and the corresponding institutions within them, the generational experiences of various ethnic groups complement the course foci.

L98 AMCS 4370 Music and Performance

In his 1998 book, *Musicking*, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography, and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater, and rock. We examine artists whose work blurs the line between "music" and "theater," including George Clinton, Taylor Mac, and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.

L98 AMCS 441 In the Field: Ethnographic and Qualitative Methods

This course provides an introduction to ethnographic and qualitative research. Ethnography is the study of culture and social organization primarily through participant observation and interviewing. Ethnographic research provides descriptive and interpretative analyses of the routine practices of everyday life. Ethnographic accounts represent different ways people live and make sense of their experiences and describe the types of social organization (for example, gender relations, class systems, racial divisions or cultural contexts) that, in part, serve to structure or pattern social behavior. Students conduct a small-scale qualitative research project, and in the process they gain skills in various qualitative research methods. This course is suitable for both undergraduate and graduate students. One purpose of the course is to help students plan for subsequent thesis research, independent study projects, or dissertation research.

L98 AMCS 442 Oil Wars: America and the Cultural Politics of Global Energy

This seminar explores the historical, cultural and political relationship between America and global energy, focusing specifically on oil and natural gas. Our central objective is to examine how oil and natural gas shape our own lives and entangle us in the cultural, political and economic lives of the rest of the world. We ask what anthropological and social science approaches might contribute to our understanding of a situation that has become, in most popular terms, a national "crisis" of global dimensions.

L98 AMCS 4510 American Television Genres

Questions of genre are central to any exploration of television's texts, whether they are being analyzed as craft, commerce, or cultural phenomenon. Genre has been used by critics and historians to ascribe "social functions" to groups of programs and to diagnose cultural preoccupations, while

genre has been used industrially to manage expectations among audiences, advertisers, programmers, producers, and creative professionals. Investigating genres ranging from the soap opera to the western, workplace situation comedies to sports, and game shows to cop shows, this course explores the role of genre in the production, distribution and reception of American television. Students gain a critical understanding of genre theory and key arguments about the form and function of television texts and develop a set of tools for analysis of televisual narrative and style, the social uses and meanings of genre, the institutional practices and presumptions of the American television industry, and the persistence of textual forms and audience formations in the face of structural changes such as deregulation, media convergence, and globalization. Required screenings.

Credit 3 units. A&S: TH A&S IQ: HUM BU: BA EN: H

L98 AMCS 451B Controversies in Criminal Law and Criminal Justice: Homicide

Seminar investigates current controversies surrounding the homicide laws. Topics include the definitions of homicide and claims of self-defense, the controversies about admissions of evidence at various stages of prosecution, and the debates about the use of capital punishment (including the capital punishment of youths). Includes general academic readings, readings of recent court opinions, and guest discussants from the legal community. Prerequisite: senior standing.

Credit 3 units. A&S: SS, WI A&S IQ: SSC, WI EN: S

L98 AMCS 452 Race, Ethnicity and Culture: Qualitative Inquiry in Urban Education

Drawing on traditional and recent advances in the field of qualitative studies, this course is the first in a series to examine ethnographic research at the interlocking domains of race, ethnicity, class, gender, and culture. The emphasis in this course is on how these concepts are constructed in urban educational institutions. The course includes a field component that involves local elementary and/or middle schools.

L98 AMCS 453 Sociology of Education

How does society shape schools and schools shape society? An examination of cultural, political and economic factors and their relationship to the structure of our educational institutions; how control is exercised in classrooms; how knowledge and learning are defined, and basic values about equality, gender and social justice are shaped by teachers' educational decisions. Students analyze their own schooling experience, visit at least two schools, interview teachers and students, and consider what changes are needed to make schools more responsive to students and communities. Prerequisite: sophomore standing.

Same as Educ 453B

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Art: SSC BU: BA, ETH, IS

L98 AMCS 454 Environmental Policy

This course examines the relationship between environmental economics and environmental policy. The course focuses on air pollution, water pollution, and hazardous wastes, with some attention given to biodiversity and global climate change. The course examines critically two prescriptions that economics usually endorses: (1) "balancing" of benefits against costs (e.g., benefit-cost analysis) and the use of risk analysis in evaluating policy alternatives; (2) use of market incentives (e.g., prices, taxes or charges) or "property rights" instead of traditional command-and-control regulations to implement environmental policy. Prerequisite: Econ 1011.

Same as Econ 451

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA, ETH

L98 AMCS 4540 American Film Melodrama and the Gothic

American film melodrama has been considered both the genre of suffering protagonists, incredible coincidences, and weeping spectators as well as a mode of action, suspense, and in-the-nick-of-time rescues. In this course, we examine American film melodrama as a dialectic of sentiment and sensation which draws heavily on Gothic tropes of terror, live burial, and haunted internal states. We trace the origins of film melodrama and the cinematic Gothic to their literary antecedents, the horrors of the French Revolution, and classical and sensational stage melodramas of the 19th century. In addition to the 1940s Gothic woman's film cycle, we excavate the Gothic in the maternal melodrama, the suspense thriller, film noir, domestic melodrama, the slasher film, and the supernatural horror film. Required screenings.

Same as Film 454

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L98 AMCS 4551 Seminar in Political Economy

This research seminar introduces the student to recent work on the political economy of democracy. We start with a historical account of the development of democratic institutions in Britain and the United States, and then continue with recent work on modeling elections. We compare elections in countries that make use of proportional electoral systems, such as Israel, with those like the United States and Britain that are highly majoritarian. Finally we discuss the forces of democratization and globalization. The required work for the seminar is a research paper approximately 20pp (double spaced) in length. Same as Pol Sci 4551

L98 AMCS 456 Topics in American Politics: Supreme Court

This seminar has two purposes: to introduce students to the state of the art in studies of the Supreme Court and to cover a series of particular topics with emphasis on the major controversies within the field of law and the courts.
Same as Pol Sci 451
Credit 3 units. A&S: SS

L98 AMCS 457 American Film Genres

By close examination of three or four specific types of film narratives, this course explores how genre has functioned in the Hollywood mode of production. Students gain an understanding of genre both as a critical construct as well as a form created by practical economic concerns, a means of creating extratextual communication between film artist/producers and audience/consumers. Genres for study are chosen from the western, the gangster film, the horror movie, the musical, screwball comedy, science fiction, the family melodrama, the woman's film, and others. In addition to film showings, there are readings in genre theory as well as genre analyses of individual films. Required screenings.

L98 AMCS 470 American Intellectual History Since 1865

This course concentrates on social, cultural, philosophical and political thought since the end of the Civil War, and investigates how American thinkers have responded to the challenge of modernity. After an examination of the end of the old religious order and the revolt against Victorianism, it analyzes the subsequent rise of pragmatism, progressivism, literary modernism, radical liberalism, political realism, protest movements and the New Left, neo-conservatism and the New Right, and the current state of intellectuals in post-911 America. The format combines mini-lectures with in-depth discussions of primary texts by Harold Frederic, Charlotte Perkins Gilman, Jane Addams, Henry Adams, George Santayana, Charles Peirce, William James, John Dewey, Walter Lippmann, W.E.B. Du Bois, Randolph Bourne, Malcolm Cowley, Edmund Wilson, Richard Wright, Sidney Hook, Reinhold Niebuhr, Hannah Arendt, Daniel Bell, C. Wright Mills, James Baldwin, Betty Friedan, Noam Chomsky and Christopher Lasch, among many others.
Same as History 469
Credit 3 units. A&S: TH A&S IQ: HUM

L98 AMCS 472 American Art and Culture, 1945–1960

The rise and "triumph" of Abstract Expressionism has long dominated the story of American art following World War II. This seminar puts Abstract Expressionism into context with parallel developments in the arts, photography and film. Among the topics we consider: the conversation between émigré artists and American culture during and after the war; the emergence of a "noir" aesthetic in film and literature; the early work of Jasper Johns and Robert Rauschenberg and the so-called "aesthetic

of indifference" in relation to Abstract Expressionism; artistic collaborations at Black Mountain College; New York school photography and photojournalism; and the cultural impact of the A-bomb. Prerequisites: a 300-level course on 20th-century art, photography or history, or permission of the instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L98 AMCS 474 Americans and Their Presidents

How have Americans understood what it means to be President of the United States? This seminar uses that question as a point of departure for a multidisciplinary cultural approach to the presidency in the United States, examining the shifting roles of the chief executive from George Washington through Barack Obama. In addition to a consideration of the president's political and policy-making roles, this course examines how the lived experiences of presidents have informed the ways Americans have conceived of public and private life within a broader political culture. In the process, this course uses the presidency as a means to explore topics ranging from electioneering to gender, foreign policy to popular media. Readings are drawn from a broad range of fields.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L98 AMCS 4744 TransAmerica: The US and Mexico between the Wars

Many areas of 20th century U.S. culture between World Wars I and II were inspired by post-revolutionary Mexico. The Mexican Revolution (1910–1917) profoundly reoriented modern Mexico, introducing new cultural and aesthetic forms and historical themes over subsequent decades. Mexican artists contributed to a new national consciousness drawing on indigenous Mexico and on the new politics of workers and peasants, given monumental expression in mural painting. The bidirectional exchange between U.S. and Mexican artists was of great importance for the cultural revitalization of the New Deal and after in the U.S. Among artists, writers, anthropologists and tourists, the vogue for things Mexican was fed by many sources, including increasing travel, diplomatic exchange, and a yearning for alternatives to U.S. modernity. The seminar supports travel to Mexico City, funded by the Art History and Archaeology department. Must be a graduate student, or an undergraduate major or minor in Art History and Archaeology. Recommended courses: one 300- or 400-level course in 20th-century U.S. art or history; or one relevant course in Latin American Studies program.

Same as Art-Arch 4744

L98 AMCS 476 The City in American Arts and Popular Culture

Using visual media — painting; prints and illustration; film and animation — along with studies of vaudeville and other forms of popular and mass entertainment, this seminar analyzes the presence of the city as a theme that registers a range of cultural attitudes toward the modern. Through close readings of visual and verbal texts, we consider such issues as the relationship between work and leisure, and between high culture and popular arts. We look at critiques and celebrations as well as at how the popular arts help the ordinary man and woman to negotiate the challenges of the new mechanized and overscaled urban environment. Prerequisites: 300-level course in American 20th-century cultural history, American art, literature, or permission of instructor.

L98 AMCS 4946 "The Federalist" Papers — Ideas and Politics in the Creation of the American Republic

An intensive examination of the debates generated over the ratification of the United States Constitution. At the center of the debate were the 85 Federalist essays composed by Alexander Hamilton, James Madison and John Jay under the collective pseudonym of "Publius." Though of limited impact at the time, The Federalist essays framed the agenda for continuing debate and have become a foundation of American political thought. Their support of an unprecedented national plan of an entirely revamped system of national government raised issues of politics, philosophy, economics and human psychology. For that reason, this course title announces that we study the interaction of political philosophy and the practical realities of politics.

L98 AMCS 49PK The Founding Fathers' Government in an Electronic Age

This is a research seminar that examines how Americans sought to translate their notions of government into a realistic set of priorities and a functioning set of public institutions. Extending from 1789 through the 1820s, this course investigates how the federal government came into being, what it did, and who populated the civilian and military rank of American officialdom. This is also a course in digital history. Students create new knowledge through their own contributions to an ongoing digital project that seeks to reconstitute the early federal workforce. In the process, students learn a variety of digital techniques, ranging from encoding languages to electronic systems to software packages.

Same as History 49PK
Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L98 AMCS 49SA Advanced Seminar: Slavery in America: The Politics of Knowledge Production

This course focuses on the long history of black chattel slavery in America, from origins to emancipation. The course foregrounds the struggles over power, life and death, that were at the heart of slavery's traumatic and grotesquely violent two-hundred-fifty year career in North America, with attention to hemispheric

context.. At the same time, it highlights the fiercely contested historical battleground where scholars have argued about how to define American slavery--as a system or site of labor, reproduction, law, property and dispossession, racial and gender domination, sexual abuse and usurpation, psychological terror and interdependency, containment and marooning, selfhood and nationality, agency, revolutionary liberation and millennial redemption.

Same as History 49SA
Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD EN: H

L98 AMCS 479 On Location: Exploring America

Every summer, AMCS travels to a new location to explore fundamental questions of national identity and meaning through the study of the interdependent relationship between culture and place. By visiting landmarks, historic sites, museums, memorials, etc. — sites best understood through direct engagement with consideration of their rich material, historical, political, and social meanings — students become in-the-field observers and learn from local experts and faculty. Past On Location destinations have included: California, Hawaii, New York City, Washington D.C., the "Industrial Southwest," and American Indian landmarks. For more information and description of past travel sites, please visit http://amcs.wustl.edu/courses/on_location.

Anthropology

Anthropology offers the opportunity to study human existence in the present and the past and to explore how and why humans vary in their behaviors, cultures and biology. Students choose to study anthropology because they want to understand some of the most intriguing and troubling issues faced by modern society: the origin and meaning of ethnic and gender differences; the role of institutions in social, political and economic life; learned vs. innate behavior; the similarities and differences among human societies; and the meaning of religion, community and family.

The Department of Anthropology offers courses in the four subfields of anthropology: archaeology, biological anthropology, sociocultural anthropology and linguistics.

The faculty in the anthropology department are active in research around the world and bring a diversity of experiences to their teaching.

- Faculty research expertise in archaeology includes the origins of food production; the cultures of prehistoric North, Central and South America; African and Central Asian prehistory; environmental archaeology; geographic information systems (GIS).
- Biological anthropology faculty focus on the evolution of humans and on the ecology, behavior and evolution of nonhuman primates.
- Sociocultural faculty conduct research on a wide range of topics, including states, societies and beliefs; political ecology, demography, fertility and population;

sociolinguistics; medical anthropology and public health;
bodies, gender and sexuality; science and technology, mind
and cognition; and religion and politics.

Majors

The Major in Anthropology

- Students should register under the L48 code for any courses that will count toward the major or minor.
- Courses taken pass/fail and courses in which a student earned less than a C– do not fulfill the major or minor requirements.
- Anthropology courses taken in University College (U69) can be counted toward the major or minor. Required courses and courses listed as electives for the GHE track that are offered in University College can be counted toward the GHE track major or minor.

Total units required: 34 units

- **Required courses:** 10 units

Anthro 150A	Introduction to Human Evolution	3
Anthro 160B	Introduction to Cultural Anthropology	3
Anthro 190B	Introduction to Archaeology	3
Anthro 397	Proseminar: Issues and Research in Anthropology	1
Total units		10

- **Elective courses:** 24 advanced units (300-level or higher) of which 9 units must be at the 400 level.

Optional Anthropology Major Track: Global Health and Environment

Anthropology majors may choose an optional track within the major called Global Health and Environment if the students' interests lie primarily within this area of anthropology. The Global Health and Environment major track provides strong training for professional and graduate study. Students enrolled in the Global Health and Environment track must complete the anthropology major required courses and the Global Health and Environment required and elective courses as outlined below.

Total units required: 34 units

- **Required courses:** 16 units

Departmental requirements: 10 units

Anthro 150A	Introduction to Human Evolution	3
Anthro 160B	Introduction to Cultural Anthropology	3
Anthro 190B	Introduction to Archaeology	3
Anthro 397	Proseminar: Issues and Research in Anthropology	1
Total units		10

Global Health and Environment Track requirements: 6 units

Anthro 3283	Introduction to Global Health	3
Anthro 361	Culture and Environment	3

- **Elective courses:** 18 advanced units (300-level or higher) of which 9 units must be at the 400 level — taken from the approved list of GHE electives.

Students may petition to have up to 6 study abroad credits count toward the electives in the GHE major track. Students should contact Prof. David Browman (dlbrowma@wustl.edu), study abroad coordinator for the anthropology department, to discuss the requirements for study abroad credit.

Students also must petition to count a thesis course (either Anthro 4951 or Anthro 4961), independent study course (either Anthro 490 or Anthro 491), or internship (Anthro 300) toward the major. Please contact Kirsten Jacobsen (kjacobsen@wustl.edu) for a petition form.

Additional Information

NOTE: Students who entered Washington University before fall 2012 and want to major in anthropology fall under the 28-credit major requirements. For information about the 28-credit anthropology major visit the department website.

Internships: Anthropology majors can gain pre-professional experience and earn up to 3 units of credit by taking part in supervised internships in businesses, cultural institutions and community agencies. Students must have department approval

for an internship and must work with an anthropology faculty sponsor during the fall or spring semesters.

Research: Many anthropology courses include research components and final projects. Majors also can take part in research and gain credit through approved independent study with faculty who have ongoing research projects. Research opportunities in anthropology labs include projects in archaeology, paleoethnobotany, geoarchaeology, zooarchaeology, genetic studies, GIS, human osteology, human ecology and primate studies.

Senior Honors: Students who wish to conduct a research project for Latin Honors and who have the minimum GPA of 3.65 and the approval of a faculty adviser may be enrolled in the honors program. Latin Honors involves both demonstration of acquired knowledge (based in part on GPA) and a report on an original research project. Two courses, Anthro 4951 and Anthro 4961, are available to allow students to receive credit for the extra research involved in the honors thesis. Students may count one of these courses toward their 400-level course requirement for the major.

Study Abroad: The department recognizes and accepts courses from a number of semester or year abroad programs. Specific information on study abroad policies is available on the anthropology department website at <http://anthropology.arts.wustl.edu/undergraduate/major/global-education> or by consultation with the study abroad coordinator.

Transfer Credit: Students who wish to transfer credits from other institutions, including those abroad, must have approval from the curriculum coordinator.

Minors

The Minor in Anthropology

- Students should register under the L48 code for any courses that will count toward the major or minor.
- Courses taken pass/fail and courses in which a student earned less than a C– do not fulfill the major or minor requirements.
- Anthropology courses taken in University College (U69) can be counted toward the major or minor. Required courses and courses listed as electives for the GHE track that are offered in University College can be counted toward the GHE track major or minor.

Total units required: 18 units

- **Required courses:** 6 units

Minimally, two of the following three courses; recommended that all three be taken:

Anthro 150A	Introduction to Human Evolution	3
Anthro 160B	Introduction to Cultural Anthropology	3
Anthro 190B	Introduction to Archaeology	3

- **Elective courses:** 12 additional units, at least 9 of which must be at the 300 level or higher.

Optional Anthropology Minor Track: Global Health and Environment

Anthropology minors may choose an optional track called Global Health and Environment if the student's interests lie primarily within this area of anthropology. The Global Health and Environment minor track provides a solid foundation for those who might be interested in professional and graduate study but who do not choose to major in anthropology. Students enrolled in the Global Health and Environment minor track must complete the anthropology minor requirements listed below as well as elective courses as outlined.

Total units required: 18 units

- **Required courses:** 9 units

Departmental requirement: 3 units

Any 100-level introductory anthropology course from the following list:

Anthro 150A	Introduction to Human Evolution	3
Anthro 160B	Introduction to Cultural Anthropology	3
Anthro 190B	Introduction to Archaeology	3

Global Health and Environment Track requirement: 6 units

Anthro 3283	Introduction to Global Health	3
Anthro 361	Culture and Environment	3

- **Elective courses:** 9 units taken from the approved list of GHE electives.

Courses

L48 Anthro 100 Earth's Future: Causes and Consequences of Global Climate Change

Earth's Future: Causes and Consequences of Global Climate Change examines 1) the physical basis for climate change; 2) how climates are changing and how we know and assess that climates are changing; and 3) the effects of climate change on natural and human systems. The course is team-taught and involves participation by scholars across the university with expertise in specific subjects. This is a broad, introductory course for first year students and presumes no special subject matter knowledge on the part of the student.

Same as InterD 101

Credit 3 units. A&S: NS A&S IQ: NSM

L48 Anthro 130 Freshman Seminar: The Ritual Landscape of Cahokia: Perspectives on the Politics of Religion and Chiefly Power

The purpose of this class is to engage and challenge freshman students in an open discussion about the prehistoric

Mississippian community of Cahokia. The focus of this course is two-fold. The first is to study the way in which the archaeological evidence has been interpreted. The second is to examine other perspectives on Cahokia, especially from the Native American descendants who consecrated this landscape nearly a millennium ago. An underlying tenet of this seminar in understanding Cahokia also can be achieved through the traditions and literature of Native Americans. In the end we want to understand the basis for Cahokia's organization as a prehistoric Native American community, and the role that ritual and religion played in the rather dramatic and dynamic history of this community and the surrounding region.

Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC BU: HUM

L48 Anthro 132 Freshman Seminar: Past Tense, Future Imperfect: The Rise and Fall of Societies and Global Civilization

The past history of humanity is littered with the stories of societies whose peoples experienced prosperity and fluorescence followed by decline and catastrophe. In the present, an age of information and rapid change, public intellectuals offer broad and detailed visions of what took place in the past, what is happening now, and what the trends suggest for the future. This course looks at the efforts of two prominent public intellectuals, economist Lester Brown and geographer Jared Diamond. In this course we look at Brown's work in its latest incarnation, Plan B 4.0. We discuss this in light of current events. We then look at Jared Diamond's book *Collapse, How Societies Choose to Fail or Succeed* and critical response to that book by experts. The professor includes a personal perspective as an archaeologist working with the ancient Maya civilization. The Maya are famous for the 9th century ad collapse of their Classic civilization. The readings provide the basis for discussion of the challenges we face in understanding the life histories of societies and discerning what we can conclude about the future from their experiences.

L48 Anthro 141 Medicine and Society

This course provides the basic foundation in medical anthropology and cultural anthropology for students enrolled in the Medicine and Society Program. The purpose of the course is to introduce students to the central themes and theoretical approaches employed by medical anthropologists to study health and illness in cross-cultural perspective. Topical areas include analyses of disease, illness and sickness at micro and macro levels; impact of personal and interpersonal factors on health; health effects of social, political and economic factors; relationship of anthropology to biological and social science approaches; ecology of health and development; and cross-cultural health studies of language, gender and race/ethnicity. Note: Content for this course overlaps with and replaces Anthro 160 for students enrolled in the Medicine and Society Program. Open only to students enrolled in the Medicine and Society Program. CBTL course.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 142 Medicine and Society

This course is the required second-semester sequence of the introduction to medical anthropology and cultural anthropology for students enrolled in the Medicine and Society Program.

The course builds upon material introduced in Anthro 141 and provides greater ethnographic context for the cross-cultural study of health and illness. Topical areas include analyses of disease, illness and sickness at micro and macro levels; impact of personal and interpersonal factors on health; health effects of social, political and economic factors; relationship of anthropology to biological and social sciences approaches; ecology of health and development; and cross-cultural health studies of language, gender and race/ethnicity. CBTL course. Credit 3 units. A&S: SS, CD, SD A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 150A Introduction to Human Evolution

A survey of the fossil evidence for human evolution. The course includes discussion of the genetics of human variation and evolution, the study of living non-human primates, and the fossil record and its interpretation. An evolutionary perspective is used in an attempt to understand modern humans from the naturalistic point of view.

L48 Anthro 170D Introduction to Linguistics

Language is one of the fundamental capacities of the human species, and there are many interesting and meaningful ways in which it can be studied. This course explores the core components of linguistic theory: speech sounds (phonetics and phonology), word formation (morphology), sentence structure (syntax), and meaning (semantics). It also provides an overview of interdisciplinary ideas and research on how language is acquired and processed, its relation to the mind-brain and to society, and the question of whether the essential properties of language can be replicated outside the human mind (specifically, in chimpanzees or computer programs).

Credit 3 units. A&S: LA A&S IQ: SSC BU: BA, HUM EN: S

L48 Anthro 174 Medicine East and West: Comparing Healthcare in the U.S. and China

This course provides a foundational introduction to comparative health studies by examining the health care systems of the United States and China. Using the tools and interpretive frameworks of the field of medical anthropology, students in this course are exposed to a broad range of topics dealing with health and health care in Eastern and Western contexts. These include the study of medical pluralism, meaning of illness, health care financing, preventive care, political-economic perspectives, and sociobehavioral perspectives on health and wellness. Students taking this class are prepared to understand and address ongoing health care concerns affecting U.S. and Chinese society.

Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC EN: S

L48 Anthro 190B Introduction to Archaeology

Archaeology plays a critical and unique role in understanding the human past. Through study of the methods and theories of archaeology, and a survey of important firsts in the human past, this course introduces students to the way archaeologists use

material culture to reconstruct and understand human behavior. Chronologically ordered case studies from around the globe are used to look at social, ecological and cultural issues facing humans from the earliest times to the present. Students gain practice reconstructing the past through hands-on participation in two one-hour labs focusing on lithics and animal bones. By the end of the course, students are expected to be able to think critically about how the past is presented and why, and the importance of the past as it relates to the present and future. Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 209C World Archaeology: Global Perspectives on the Past

If we carefully peer beneath the earth's surface, we discover a hidden world that is being rediscovered by archaeologists. A considerable amount of excitement is generated by the discovery of lost civilizations and societies. Archaeologists from every corner of the earth come to Washington University to share their experiences as they use the most sophisticated technology to rediscover those forgotten and sometimes embarrassing aspects of our human past. Same as ARC 200C
Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: IS

L48 Anthro 212 Archaeological Fantasies and Hoaxes

American popular culture is saturated with pseudoscientific and fictionalized accounts of archaeological discoveries and interpretations. How can students of the past distinguish between fraud, fantasy, hype and valid archaeological research? What potential merit do films, TV-oriented documentaries and historical fiction offer? What role has racism played in attempts to deny indigenous peoples credit for their past achievements? This course looks at the popular culture of archaeology, providing tools for critical evaluation as well as lifetime enjoyment of the field as it is frequently sold to both the informed and the unwary public. Anthropology majors and nonmajors are all welcome, as are sophomores and motivated first-year students who have not yet declared majors.
Credit 3 units. A&S: SS A&S IQ: LCD, SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 2151 Language, Culture and Society

This course explores the relationships between linguistic practice and other social and cultural processes. Among the topics discussed are language and social identity, language and thought, language and gender, multilingualism and language shift as well as the connections between language and the identity of ethnically or nationally defined communities. The course format alternates between "classic" theoretical readings and ethnographic case studies on the interplay between linguistic practice and ideology as well as cultural and social processes.
Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC BU: BA

L48 Anthro 2653 Health Care Challenges in Modern China

As the most populous country in the world, China has many challenges regarding medicine, health and health care delivery. In this course several major health care challenges facing China are explored. Students have the opportunity to learn not just from published research and class discussion but also from the perspectives of those who spend their lives studying the social, political, and cultural dynamics of these issues as well as those who devote their careers to the practice of health care in China. Must be enrolled in the study abroad program at Fudan University in Shanghai, China.
Credit 1 unit. A&S: SS A&S IQ: SSC BU: IS EN: S

L48 Anthro 290 Independent Study

Designed to give undergraduates research experience in the various subdisciplines of Anthropology. May be taken more than once for credit. Prerequisite: consent of the faculty member under whom the research is done.
Credit variable, maximum 3 units.

L48 Anthro 300 Internships in Anthropology

Anthropology majors may acquire professional experience outside the classroom by participating in a faculty-sponsored internship. Before work begins, the student and faculty sponsor must agree on a final written project, which is then approved by the Anthropology Academic Coordinator. Students are evaluated by the faculty sponsor on the basis of the written project and input from the internship supervisor. Course may be taken only one time. Prerequisites: 9 hours of anthropology and permission of department.
Credit 3 units.

L48 Anthro 302B Peoples and Cultures of the Middle East

This course introduces the cultural diversity and unity of the peoples of the Middle East. The emphasis is on historical and ethnological relationships, social and political structure, religious pluralism and contemporary youth issues. We explore the lived experiences of the peoples in the modern nation-states of Egypt, Lebanon, Syria, Jordan, Israel, the Palestinian Territories, Turkey, Saudi Arabia and the countries of the Arabian Peninsula, Iraq and Iran. We access this material through short stories, poetry, biographies, essays, videos, blogs and political and anthropological reports.
Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: IS

L48 Anthro 3036 Migration and Modernity: Human Mobility, Identity and State Formation — Russian/Soviet/post-Soviet Context

Same as IAS 384

L48 Anthro 3051 Anthropology of Tibet and the Himalayas

This course is an anthropological and historical examination of Tibetan societies inhabiting the Tibetan Plateau and the highlands of Nepal. In addition to providing basic ethnographic descriptions of Tibetan societies, the course explores the changing nature of relations between Tibet and China, and between Tibet and the West. Guiding concepts include adaptation (both social and ecological), the politics of ethnicity and identity, and processes of culture change.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: IS EN: S

L48 Anthro 3053 Nomadic Strategies and Extreme Ecologies

This course explores the archaeology and anthropology of nomadic pastoral societies in light of their ecological, political and cultural strategies and adaptation to extreme environments (deserts, mountains, the arctic). The aim of the course is to understand both the early development of pastoral ways of life and how nomads have had an essential role in the formation and transfer of culture, language and power from prehistoric time to the current era.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA, IS EN: S

L48 Anthro 3055 Contemporary Chinese Culture and Society

This course provides an introduction to emerging trends in Chinese culture and society. We explore processes of change and continuity in the People's Republic, examining the complexity of social issues and the dynamics of cultural unity and diversity. While we focus on the post-Mao reform era (1978 to the present), we consider how contemporary developments draw upon the legacies of the Maoist revolution as well as the pre-socialist past. The course provides an overview of anthropological approaches to the study of contemporary China, introducing students to key concepts, theories and frameworks integral to the analysis of Chinese culture and society. Readings, lectures and discussions highlight not only macro-level processes of social change and continuity but also the everyday experiences of individuals involved in these processes. We pay particular attention to issues of family life, institutional culture, migration, religion, ethnicity, gender, consumption and globalization.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Art: SSC BU: IS EN: S

L48 Anthro 3056 Material Culture in Modern China

In this course, we explore change and continuity from late imperial to postsocialist China through an analysis of everyday material culture. Drawing upon material objects, historical texts, ethnographic studies and films, we investigate values, beliefs and attitudes toward the material world in modern Chinese life. Readings, lectures and discussions focus on how political, ethnic, regional, religious and gender identities have been constructed and shaped by the use and production of material artifacts ranging from household goods and tomb objects to built forms and bodily dispositions. Case studies include foot-binding, opium use, fashion, tea culture, fast food consumption, sports

and nation building, contemporary art markets, the privatization of housing, and worker discipline in transnational factories.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC EN: S

L48 Anthro 306B Africa: Peoples and Cultures

An anthropological survey of Africa from the classic ethnographies to contemporary studies of development. Emphasis on the numerous social and economic changes African peoples have experienced from precolonial times to the present.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC BU: HUM, IS

L48 Anthro 307A Human Variation

A survey of human biological diversity, considering its adaptive and taxonomic significance from the perspective of origins and distribution of traits and adaptation. Prerequisite: Anthro 150A or introductory biology.

Credit 3 units. A&S: NS, SD, QA A&S IQ: NSM, AN, SD Art: NSM BU: SCI

L48 Anthro 3092 Indigenous Peoples and Movements in Latin America

This course focuses on the contemporary lives and political struggles of Indigenous Peoples in Latin America, with specific focus on Ecuador, Peru, and Bolivia. Through course lectures, ethnographic texts, and four in-depth case studies, we explore how the politics of Indigeneity articulate with political and economic processes including (neo)colonialism, global capitalism, state transformation and social movement struggle. Themes include: demands for territory and autonomy; environmentalism and natural resource exploitation; gender and economic inequality; race, racism and political violence; language and education; and the complexities of building multicultural or "plurinational" democracies.

Credit 3 units. A&S: SS, CD, SD A&S IQ: LCD, SSC Art: SSC BU: IS

L48 Anthro 3093 Anthropology of Modern Latin America

A survey of current issues in the anthropological study of culture, politics and change across contemporary Latin American and the Caribbean. Topics include machismo and feminismo, the drug war, race and mestizaje, yuppies and revolutionaries, ethnic movements, pop culture, violence, multinational business, and the cultural politics of U.S.–Latin American relations. Attention is given to the ways that anthropology is used to understand complex cultural and social processes in a region thoroughly shaped by globalization.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: IS EN: S

L48 Anthro 310C Ancient Civilizations of the New World

An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico, through the inquiry into the roots, development, form and evolutionary history of pre-Colombian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments are presented and discussed.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: AH BU: HUM

L48 Anthro 3122 From Country to Heavy Metal: Ancient Civilizations of the Old World

This course explores the archaeology of Europe, the Near East and Central Asia from approximately 10,000 years ago to classical times (ending before Ancient Greece). This prehistoric epoch saw major developments among various civilizations of the Old World, such as the introduction of agriculture, animal domestication, the growth of cities, and technological developments such as pottery, metallurgy and horse-riding. A major focus is the trajectory of cultural innovations of regional populations through time, and the complexity of their social, political and ritual practices. We also investigate the variation in human adaptive strategies to various environmental and social contexts, from hunter-gatherers to early Neolithic farmers, to the interactions between nomadic populations and larger scale, urban societies in the Bronze and Iron Ages.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: IS EN: S

L48 Anthro 3142 Topics in AMCS: Twenty Thousand Years on Turtle Island: A Deep History of North America

The topic of this course varies from semester to semester. Please see Course Listings for a description of the current offering.

Same as AMCS 336

L48 Anthro 3154 Indian Barbie, Asian Tigers and IT Dreams: Politics of Globalization and Development in South Asia

Same as IAS 315

Credit 3 units. A&S: SS, CD, SD A&S IQ: LCD, SSC BU: IS EN: S

L48 Anthro 3156 Topics in Chinese Social Development at Fudan

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 3158 South Asian Religious Traditions

In this course, we take a considered look at the diverse religious traditions that have shaped and enriched life on the Indian subcontinent and beyond. India, Pakistan, Nepal, Bangladesh, and Sri Lanka are home to Hindu, Islamic, Buddhist, Jain, Christian and Sikh traditions of learning and practice, among others. This course provides an in-depth survey of the traditions of South Asia, while attending to the borrowings and contestations which have blurred and defined the boundaries between traditions over time. We explore the central teachings, practices and debates of these traditions as we explore mythology, poetry and narrative; ritual and performance; social relations and political life at selected moments in the history of South Asia.

Same as Re St 312

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: IS EN: H

L48 Anthro 3163 Archaeology of China: Food and People

China is a country with a large population, diverse landscapes, and unique food. This course explores the origins of Chinese food in the context of the formation of Chinese societies. During the last two decades, the archaeology of China has become a fast-moving subject with advances in methods, theories and changes of key perceptions. In this context, the beginning and spread of food production in China has become one of the key questions in current archaeology. We focus on the process of domestication of plants and animals in various regions of China during the Holocene. We explore how those processes relate to other sectors of the Old World, such as those of South and Southwest Asia. This course pursues answers to the following questions: Why are the Chinese ways of living and eating different from those in the West? How were production and consumption in China shaped by food globalization in prehistory?

Credit 3 units. A&S: SS, CD A&S IQ: SSC BU: IS EN: S

L48 Anthro 3182 Ancient Africa: Social Mosaics and Environmental Challenges

This class introduces students to the basics of the archaeological record of humans in Africa from 3.6 million years ago to 1000 years ago. The first third of the course focuses on early humans, the origins of meat eating, expansion of diet and cuisine, technical and cultural responses to changing environments. The second section of the course emphasizes African rock art, socioeconomic variability among hunter-gatherers, the origins of African pastoralism, mobile responses to climate change and African contributions to world food supply including domestication of sorghum, also coffee. The last third of the course is devoted to the complex urban societies of ancient Africa, Egypt, Axum, Great Zimbabwe and Jenne Jenno. Course format is lecture and discussion. There are two mid-terms and students are expected to participate in interactive stone tool use, rock art creation and discussion of ethnographic and archaeological data on pastoral decision-making in times of drought and war and of issues surrounding the purchase of African antiquities and conservation of cultural heritage.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC BU: IS EN: S

L48 Anthro 3201 Gender, Culture and Madness

This course explores the relationships among gender constructs, cultural values and definitions of mental health and illness. Understandings of the proper roles, sensibilities, emotions and dispositions of women and men are often culturally and morally loaded as indicators of the "proper" selves permitted in a given context. Across cultures, then, gender often becomes an expressive idiom for the relative health of the self. Gender identities or presentations that run counter to these conventions are frequently identified as disordered and in need of fixing. In this course, we take up these issues through three fundamental themes: the social and cultural (re)production of gendered bodies and dispositions; the normalization of these productions and the subsequent location of "madness" in divergent or dissonant experiences of embodiment; and the situation of discourses of "madness" within debates of resistance and conformity, selfhood and agency.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Art: SSC BU: BA, ETH EN: S

L48 Anthro 3206 Global Gender Issues

This course compares the life experiences of women and men in societies throughout the world. We discuss the evidence regarding the universal subordination of women, and examine explanations that propose to situate women's and men's personality attributes, roles and responsibilities in the biological or cultural domains. In general, through readings, films and lectures, the class provides a cross-cultural perspective on ideas regarding gender and how gendered meanings, practices, performances serve as structuring principles in society.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: BA, IS EN: S

L48 Anthro 3215 Food, Culture, and Power

What should I eat today? This seemingly simple question transects the fields of health, environmental studies, economics, history, anthropology, religion, and many others. The foods we eat, the way we get them, the way we produce them, and the way in which we eat them speak volumes about our beliefs, our technology, our understanding of how the world works, and our ability to function within it. That is, food is an excellent way to explore culture. No actions are more deserving of critical attention than those that we do regularly, without much critical thought, and most of us eat at least two or three times a day. In this class we explore how this food came to be here, why we like it, and what that says about us. This class is reading and discussion heavy, with a midterm paper based on the readings and a final paper based on a topic of the students' choosing.

Credit 3 units. A&S: SS A&S IQ: SSC BU: BA EN: S

L48 Anthro 3271 Becoming Human: Archaeology of Human Origins

Humanity, before the advent of agriculture and cities, evolved a series of behaviors that enabled them to survive as hunter-gatherers in diverse environments with complex cultural systems. These behaviors included hunting, control of fire, shelters and clothing, elaborate tools of diverse materials, burials, jewelry and representational art. These characteristics emerged over more than 2 million years of the Pleistocene across several species of humans, to coalesce into what we would recognize as modern human foragers 30,000 years ago. This course traces that emergence of what it means to be human, through the Paleolithic archeological record in its context of past environments and past human forms.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 3283 Introduction to Global Health

This course provides a general introduction to the field of public health. It examines the philosophy, history, organization, functions, activities and results of public health research and practice. Case studies include infectious and chronic diseases, mental health, maternal and reproductive health, food safety and nutrition, environmental health, and global public health. Students are encouraged to look at health issues from a systemic and population level perspective, and to think critically about health systems and problems, especially health disparities and health care delivery to diverse populations. No background in anthropology or public health is required.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: IS EN: S

L48 Anthro 3284 Public Health Research and Practice

In-depth exploration of current theory and methods involved in public health research and practical applications. Emphasis on fundamentals of epidemiology, which forms the scientific rationale for public health assessment, assurance and policy development. Survey of current public health practice and research areas including biological foundations of public health, social and behavioral interventions, maternal-child health and environmental health. Relationships among public health, medicine, nursing, social work and related disciplines.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3293 Religion and Society

We take a broad and practice-oriented view of "religion," including uttering spells, sacrificing to a god, healing through spirit possession, as well as praying and reciting scripture. We consider religious practices in small-scale societies as well as those characteristic of forms of Judaism, Islam, Christianity and other broadly based religions. We give special attention to the ways religions shape politics, law, war, as well as everyday life in modern societies.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: ETH EN: S

L48 Anthro 3295 Secular and Religious: A Global History

Recent years have seen a dramatic rethinking of the past in nearly every corner of the world as scholars revisit fundamental questions about the importance of religion for individuals, societies and politics. Is religion as a personal orientation in decline? Is Europe becoming more secular? Is secularism a European invention? Many scholars now argue that "religion" is a European term that doesn't apply in Asian societies. This course brings together cutting-edge historical scholarship on Europe and Asia in pursuit of a truly global understanding. Countries covered vary but may include Britain, France, Turkey, China, Japan, India and Pakistan.

Same as History 3921

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD BU: IS EN: H

L48 Anthro 330 Experimental Archaeology

Experiments are an extremely important part of the scientific process. Although archaeology is often treated as an historical science, the nature of the material record does provide an opportunity to use experimentation as an important way of interpreting what we excavate. The class works with the most tangible materials recovered from archaeological contexts, that is, stone and pottery. After reviewing the history of experimentation in archaeological investigations, we turn to the material record. This is followed in our initial weeks of setting up the experiments and how they are used to compare with available data sets derived from archaeological contexts. As part of the class we take several field trips to areas where materials exist in a natural setting. Each class member selects a specific material for the focus of their experiments. In the end students produce several experiments using different materials, document their experiments in written reports, and finally present their results to the class for discussion and evaluation.

Credit 3 units.

L48 Anthro 3304 Bones to Behavior: Undergraduate Research in the Lab and at the Zoo

We undertake zooarchaeological study of equid skeletons in the zooarchaeology laboratory at Washington University,

and in collaboration with the Saint Louis Zoo, participate in a behavioral study of the courtship and breeding behavior of the ancestor of the domestic donkey — the African wild ass. The research questions that we focus on are how the biology and behavior of the African wild ass influenced the domestication of the donkey by prehistoric African herders or ancient Egyptians and how the behavior of the African wild ass continues to affect prospects for conservation of this highly endangered animal. During the first half of the semester, we meet once a week for 2.5 hours in the zooarchaeology laboratory. In the second half of the semester, we no longer meet in the lab, and each student spends two mornings of their choice per week at the Saint Louis Zoo conducting observations of the wild ass. Students may choose two days that fit their schedule. Saturdays and Sundays are included as choices of days. Permission of instructor is required.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: BA

L48 Anthro 3305 Bones to Behavior II

In this class, students undertake zooarchaeological research on skeletal material in the zooarchaeology laboratory at Washington University and/or preparation of animal skeletons for comparative study and, in collaboration with the Saint Louis Zoo, participate in behavioral studies of the ancestor of the donkey — the African wild ass. Collections housed in the zooarchaeological laboratory for study include ancient food-remains from African sites. These collections bear on questions regarding cultural and climate change in the Horn of Africa 2,000 to 12,000 years ago and include animals ranging from African antelopes to domestic camels. During the first half of the semester, students meet once a week for 2.5 hours in the zooarchaeological laboratory. In the second half of the semester, we meet twice a week in the laboratory or at the zoo. Location depends on projects selected for study. Permission of instructor is required. May be repeated for credit.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 3310 Health, Healing and Ethics: Introduction to Medical Anthropology

A cross-cultural exploration of cultures and social organizations of medical systems, the global exportation of biomedicine, and ethical dilemmas associated with medical technologies and global disparities in health.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: ETH EN: S

L48 Anthro 3313 Women and Islam

An anthropological study of the position of women in the contemporary Muslim world, with examples drawn primarily from the Middle East but also from Asia, Africa, Europe and the United States. Students examine ethnographic, historical and literary works, including those written by Muslim women. Topics having a major impact on the construction of gender include Islamic belief and ritual, modest dress (veiling), notions of marriage and the family, modernization, nationalism and the nation-state, politics and protest, legal reform, formal education, work, and Westernization. The course includes a visit to a St. Louis mosque, discussions with Muslim women, and films.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: BA

L48 Anthro 3322 Brave New Crops

This course introduces students to the major issues surrounding the development and use in genetically modified (GM) crops. Its focus is international, but with particular focus on the developing world. A variety of experts, available locally or through the Internet, contribute perspectives. The course also includes field trips. For further information, see artsci.wustl.edu/~anthro/courses/3322.

Credit 3 units. A&S: SS A&S IQ: SSC Art: NSM BU: ETH

L48 Anthro 333 Culture and Health

This course explores culture and health, with a focus on global health. Assigned readings explore cross-cultural perspectives on health, healing, and the body, as well as important concepts in medical anthropology. Through class discussions and close examination of ethnographies of health and illness, students develop an understanding of how cultural and political-economic forces articulate with the emerging field of global health.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA

L48 Anthro 3331 Anthropology of Clothing and Fashion

This course takes clothing as a starting point for examining broad themes in anthropology, including gender and sexuality, race and the body, history and colonialism. We look at the ritual significance of clothing and other practices of bodily adornment in traditional societies and the role of style in constituting contemporary social movements and identity categories. We investigate the globalization of the apparel industry, from production and circulation to marketing and branding, in order to understand the relationship between citizenship and consumption, labor and power in the global economy. The course encourages students to reflect on their relationship to the wider society and economy as producers and consumers of material culture through the lens of clothing and fashion.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3351 The Ancient Maya: Archaeology and History

This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico are considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their many forms of art. The combination of glyphic texts, art and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: IS EN: S

L48 Anthro 3373 Law and Culture

We live in an age when social policy is increasingly displaced into the realm of law, when justice and equality are matters of courtroom debate rather than public discussion. Legal language has become a key resource in all kinds of struggles over livelihood and ways of life. In this course, we study the cultural dimensions of law and law's changing relationship to state power, the global economy, social movements and everyday life. We approach law as a system of rules, obligations and procedures, but also a cultural practice, moral regime

and disciplinary technique. How are relationships between legal, political and economic realms structured and with what consequences? How does law provide tools for both social struggle and social control? What does anthropology contribute to research on these issues? In exploring these questions, we combine readings from classical legal anthropology with recent ethnographic work from around the globe.

Credit 3 units. A&S: SS A&S IQ: LCD, SSC Art: SSC BU: BA, ETH EN: S

L48 Anthro 3386 Language, Culture and Society

Although this is an introductory course, students who have taken Linguistics 170D Introduction to Linguistics benefit from knowledge of phonology, morphology, syntax and semantics. The primary content of this course explores the relationship between linguistic practice and other social and cultural processes. Anthropological linguistics, including alternative approaches to fieldwork and data collection are introduced, along with various studies of language usage in social and cultural contexts that consider language and thought, language and identity, language and gender, as well as multilingualism and other forms of language contact. The ethnography of speaking and communication are central to this course, as is conversation analyses, which introduces a combination of qualitative and quantitative linguistic research methods.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC BU: BA EN: S

L48 Anthro 3391 Economies as Cultural Systems

Many contemporary approaches to economics downplay or bracket the importance of culture in the workings of economic systems. In this class we focus on approaches to distribution and exchange in which culture and social institutions figure prominently, if not pre-eminently. We sample a diverse array of economies, from gift exchange to the ceremonial destruction of wealth, from Melanesia to Wall Street, in order to evaluate some of the assumptions that undergird market capitalism. These assumptions include the perception of market actors exclusively as calculative, maximizing individuals. Topics covered include the Industrial Revolution; utilitarianism; economic anthropology; the formal vs. substantivist debates; ethnography of finance; and Marxist sociology.

L48 Anthro 3461 Native Americans at Westward Expansion

Issues precipitated by Euro-American contact, colonization and expansion between 1492 and 1810 across Eastern North America, the Plains and the Rocky Mountains. Impacts of exploration and settlement and responses by native peoples: epidemics; population loss; breakdown of Southeastern chiefdoms; resistance; relocation; and shifts in economic strategies. Perspectives and policies of Native Americans as well as Europeans and non-Indian Americans, including Lewis and Clark.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: HUM

L48 Anthro 3472 Global Energy and the American Dream

This lecture course explores the historical, cultural and political relationship between America and global energy, focusing on oil, coal, natural gas, biofuels and alternatives. Through case studies at home and abroad, we examine how cultural, environmental, economic and geopolitical processes are entangled with changing patterns of energy-related resource extraction, production, distribution and use. America's changing position as global consumer and dreamer is linked to increasingly violent contests over energy abroad while our fuel-dependent dreams of boundless (oil) power give way to uncertainties and new possibilities of nation, nature and the future. Assuming that technology and markets alone will not save us, what might a culturally, politically and socially minded inquiry contribute to understanding the past and future of global energy and the American dream?

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA, ETH, IS EN: S

L48 Anthro 347B Ancient Mound Builders of the Mississippi Valley

Study of the peoples in North America who built mounds and other earthen structures beginning more than 4000 years ago; why they erected earthworks; what the structures were used for; how they varied through time and across space; and what significance they had to members of society.

Credit 3 units. A&S: SS, CD BU: BA

L48 Anthro 3582 Anthropology of the Human Face

A survey of the human face, including both an evolutionary perspective on why our faces changed to look the way they do today and a theoretical perspective on how we create and maintain self-image through body modification. Comparative and cross-cultural approaches are used to understand modern human craniofacial and cultural diversity. The course includes discussions of how perceptions of biological variation inform social interactions and of how sociocultural norms pattern body modification, both presently and historically. Most importantly, students learn how information obtained with archaeological, sociocultural, and biological methods is integrated to address anthropological questions.

Credit 3 units. A&S: SS A&S IQ: SSC BU: BA EN: S

L48 Anthro 361 Culture and Environment

An introduction to the ecology of human culture, especially how "traditional" cultural ecosystems are organized and how they change with population density. Topics include foragers, extensive and intensive farming, industrial agriculture, the ecology of conflict, and problems in sustainability.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: ETH

L48 Anthro 3612 Population and Society

This review of population processes and their social ramifications begins with an introduction to the basic terminology, concepts and methods of population studies, followed by a survey of human population trends through history. The course then investigates biological and social dimensions of marriage and childbearing, critically examines family planning policies, deals with the social impacts of epidemics and population aging, and looks at connections between population movements and

sociocultural changes. The overall objective of the course is to understand how population processes are not just biological in nature, but are closely related to social, cultural, political and economic factors.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: IS EN: S

L48 Anthro 3617 Past and Present Cultural Environments

Human societies are situated within and interact with their ecological and environmental systems. Even social relationships within and between groups imply spatial relationships and geographic orientation, advantages, influence and limitations. Beyond subsistence, environment and the "natural world" play an integral role in how humans pattern the landscape, structure society, develop their world view, and, in turn, alter and adapt the world in which they live. This upper-division undergraduate and graduate seminar course introduces students to anthropological conceptions of human-environmental relationships, past and present. Topics include environmental and landscape archaeology; historical, political, and human behavioral ecology; world view and conceptualizations of nature; human adaptation, resilience theory, and niche construction; anthropological case studies; the intersections of humans, animals and the environment; and end with environmental politics.

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 362 The Biological Basis of Human Behavior

Infidelity, marriage customs, inner-city violence, infanticide, intelligence. Are the behavioral patterns we see genetically fixed and racially variable? What is the evolutionary and biological basis of human behavior? This course offers a critical evaluation of these from an anthropological perspective.

Credit 3 units. A&S: NS, CD, SD A&S IQ: LCD, NSM, SD Art: NSM BU: BA

L48 Anthro 3620 Anthropological Perspectives on the Fetus

Where do we come from? How do we get here? When does "life" begin? Is the fetus a "person" or something else? How could we decide? This course integrates biological, medical, philosophical and cross-cultural perspectives to examine how various societies (including our own) understand the nature of the human fetus. The course examines basic human embryology, beliefs about conception and fetal development, ideas about the moral status of the fetus, controversies surrounding prenatal care and antenatal diagnostic testing (including sex selection and genetic screening tests), current controversies about fetal medicine and surgery, and the problem of abortion in cross-cultural perspective.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3621 Anthropology of Human Birth

This course examines the interaction between human biology and culture in relation to childbirth. Emphasis is placed on understanding the cultural challenges posed by the physiology of human reproduction, the ways various cultures have attempted to meet those challenges, and the resultant consequences that this has had for women's lives. The course draws on material from human anatomy and embryology, paleoanthropology, clinical obstetrics, public health, social anthropology, the history of medicine and contemporary bioethics.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: ETH EN: S

L48 Anthro 3625 The Female Life Cycle in Cross-Cultural Perspective

This course examines the biology of the female reproductive cycle — menarche, menstruation and menopause — and its cultural interpretation around the world. Topics covered include the embryology of human sexual differentiation; and the biology of the menstrual cycle and how it influences or is influenced by various disease states, contraception, infertility, cultural taboos and beliefs about menstruation and menopause, etc. The course utilizes materials drawn from human biology, clinical gynecology, ethnography, social anthropology and the history of medicine and examines the interplay between female reproductive biology and culture around the world.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L48 Anthro 3626 Adventures in Nosology: The Nature and Meaning of Disease

What is a "disease" and how do you diagnose one? What are "medicines" and how, when, and for what purpose should they be used? These questions reflect universal human concerns, but the answers given to these questions have varied enormously in different times and places. The course considers the nature of health, illness, disease and its treatment, beginning with a detailed examination of the traditional ethnomedical system of the Hausa people of northern Nigeria. Using this West African medical system as a baseline for comparison, the course then explores the nature of "nosology" (the classification of diseases) and the underlying logic of different therapeutic systems in different times and cultures, including our own. The course draws on ethnography, the history of medicine, bioethics and human biology to understand how these questions are asked and answered in different societies, times and places.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: HUM, SSC BU: SCI EN: S

L48 Anthro 3628 The Anthropology of Health Disparities

This course approaches the subjects of race, ethnicity, gender, sexuality and class-related health disparity epidemiologically and anthropologically. Students in this course explore these cultural categories both as factors that contribute to systematic differences in health status and outcomes and as dynamic frameworks through which those systematic differences can be examined and understood. The grounding assumptions of this course are 1) that race, ethnicity, gender, sexuality and class are cultural constructs employed by humans in an effort to account for observed physical, dispositional and behavioral group-level diversity; 2) that disparity, and particularly health disparity, is meaningfully associated with diversity but is not caused by it; and 3) that because humans are the product of two dynamic, complex systems (biology and culture), health disparities are most usefully engaged as conditions of process and interconnectedness.

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 365 Human Growth and Development

This course focuses on the life-history of humans from birth to death. Through a series of lectures we consider how humans grow and change both biologically and psychologically over the course of our lives. Topics include: human growth curves, sex-differences, adolescence and puberty, nutrition, environment, growth disorders, death, and the evolution of human growth.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA

L48 Anthro 3656 Behavioral Ecology of the Great Apes

This course introduces undergraduate students to the behavioral ecology of great apes. Lectures and readings provide an overview of the distribution, feeding ecology, social system and behavior of African and Asian apes. The main objective of this class is to examine variation in behavioral ecology with and between ape species. The comparative content within each lecture gradually increases throughout the course, and students are asked to synthesize this material in their final exam. Readings mainly consist of book chapter assignments from three recent texts on the ecology, behavior and geographic variation observed in great apes.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 3661 Primate Biology

This course takes a multifaceted introductory approach to the primates, the closest relatives of human beings, by investigating anatomy, growth and development, reproduction, behavioral adaptations, ecology, geographic distribution, taxonomy and evolution. Emphasis is placed not only on the apes and monkeys, but also on the lesser-known lemurs, lorises, bushbabies, tarsiers and many others. The importance of primate biology to the discipline of anthropology is discussed. Intended for students who have already taken Anthro 150A and recommended for students who wish to take the more advanced 400-level courses on primates. Prerequisite: Anthro 150A or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L48 Anthro 3662 Primate Conservation Biology

This class focuses on the ecological diversity of primates and how these and other traits are related to their present day abundance and distribution. In addition, the biological, abiotic and anthropogenic factors related to extinction risk are examined. It also reviews the endangered species of primates; case histories of conservation programs; and management practices in Asia, Africa, South America and Madagascar.

Prerequisite: Anthro 150 or Biol 2970, or permission of instructor.
Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L48 Anthro 3665 Observing Animal Behavior at the St. Louis Zoo

This course is an introduction to methods for the collection of behavioral data in studies of animal behavior. Students are trained in the design of research projects and the analysis and interpretation of behavioral data. Students learn how different methods are used to answer specific questions in animal behavior research. Research is conducted at the Saint Louis Zoo.

Credit 3 units. A&S: NS Art: NSM

L48 Anthro 3666 Comparative Primate Socioecology

This course focuses on the interface between the behavior and ecology of non-human primates and its applications to primate conservation. We examine how the basic principles of animal ecology can help us understand primate behavior. We look at a wide range of primates from a comparative perspective as we explore primate habitats, diets, life histories and communities, social relationships, and much more. Because most primate species are threatened, endangered or even facing extinction, we also focus on how various aspects of ecology are used in the conservation of primates. We draw heavily on field studies and particular research projects of primates and emphasize their behavior in natural environmental and social settings. The

objectives of the course are: 1) to gain an understanding of principles of animal behavior by using primates as a model, 2) to understand variation in behavior and how ecology influences this variation in living primates, 3) to use the comparative approach to better understand why primate societies differ, and 4) to understand how we address and answer questions about primate behavior through field research

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 367 Paleoanthropology

The prehistoric Pliocene and Pleistocene evidence for human emergence and evolution. The emphasis is on the human fossil record and its interpretation in functional and behavioral terms. This is placed in the context of the Paleolithic archaeological record and issues regarding the biological relationships between various human groups. Prerequisite: Anthro 150 or equivalent.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L48 Anthro 3693 Anthropology of Death, Mourning and Burial

This course offers anthropological analysis of death, mourning and burial. It draws on data and theoretical explanations from different sub-disciplines of anthropology (archaeology, cultural anthropology and physical anthropology). In addition to theoretical conceptualization of mortuary practices, specific case studies are used to address a wide range of topics. The course covers cross-cultural comparison of burial among hunter-gatherers, pastoralists and complex societies. Mortuary practices also is conceptualized based on religion and secularity, social organization and biological approaches (eg. paleodiet, paleodemography, disease). Ethical and legal issues of using human remains worldwide also are addressed. This course helps train and stimulate academic enquiry into ancient and modern societal treatment of death around the globe. The time covered in this course ranges from the Lower Palaeolithic to the contemporary world.

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 372 Geoarchaeology

Geoarchaeology involves the application of analytical techniques, concepts and field methods from the earth sciences to help solve archaeological problems. Issues explored in this course include human and environmental processes involved in archaeological site formation; the sedimentary context of archaeological remains, soils and sediments relevant to archaeology; and the relationship between past settlement and landscape evolution, paleoclimatic reconstruction, human impacts on the environment, geological sourcing of artifact proveniences, and remote sensing of the physical environment. Several field trips to local archaeological/geological sites provide an opportunity to understand how geoarchaeology is applied to specific research problems.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 373 Introduction to GIS for Anthropologists

Use of GIS is rapidly becoming standard practice in anthropological research. This course introduces students to the basic theories and techniques of GIS. Topics include the application of GIS in archaeological survey and ethnographic research, as well as marketing, transportation, demographics and urban and regional planning. This course enables students to become familiar not only with GIS software such as ArcGIS but also the methodologies and tools used to collect and analyze spatial data.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 374 Social Landscapes in Global View

From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as “landscapes.” This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We cover various urban landscapes, rural landscapes, nomadic landscapes (and others), and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon, and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world, and trace the global currents of your social landscape.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 376 Warriors, Merchants, Monks and Courtesans: Ancient Narratives of Globalization in Google Earth

This introductory seminar-style course examines the history of globalization through the narrative accounts of those who lived along some of the great trade routes of the Old World. Through a combination of in-class discussion and hands-on tutorials and projects in Google Earth, we examine how day-to-day local interactions and the experiences of individuals contributed to broader cultural exchanges and the shaping of ancient cosmopolitan centers. We use a bottom-up approach to understand the process of globalization, and why it is not only a phenomenon of the modern world. This course covers a large geographic and temporal span, but it is not about memorizing lists of dates and places or putting dots on a map — it is about learning how to interpret multiple strands of knowledge and put them together into a cohesive narrative of history. The course covers four broad anthropological themes related to Old World history and globalization in conjunction with weekly lessons in Google Earth; there are no prerequisites for either. The knowledge and skills gained in the course lead to a final independent research project consisting of a short paper and an interactive digital map that can be shared online through the Google Earth community.

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 3773 Culture and Society in East Asia

This course presents an overview of cultures and contemporary social/political changes in East Asia. In Western society, East Asia often has been viewed as a place of enduring cultural identities, but it also has been a region of one of the world's most dynamic and rapid transformations. In this course, we examine both the continuity and change of cultural and social patterns in this region. Students compare anthropological and ethnographic studies of the Peoples' Republic of China, Taiwan, South Korea and Japan, supplemented by selected research from sociology,

history and political science. The course focuses on specific areas of cultural and social change in each society, including kinship and family; gender; ethnicity; economic and political development; and health and social policy.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 3775 Ancient Eurasia and the New Silk Roads

This course explores the rise of civilization in the broad region of Eurasia, spanning from the eastern edges of Europe to the western edges of China. The focus of the course is the unique trajectory of civilization that is made evident in the region of Central Eurasia from roughly 6000 BC to the historical era (ca. AD 250). In addition to this ancient focus, the course aims to relate many of the most historically durable characteristics of the region to contemporary developments of the past two or three centuries. Fundamentally, this course asks us to reconceptualize the notion of “civilization” from the perspective of societies whose dominant forms of organization defied typical classifications such as “states” and “empires” and, instead, shaped a wholly different social order over the past 5,000 years or more. This class provides a well-rounded experience of the geography, social organization and social interconnections of one of the most essential and pivotal regions in world history and contemporary political discourse.

Credit 3 units. A&S: SS, CD, SD A&S IQ: LCD, SSC, SD Art: SSC BU: IS EN: S

L48 Anthro 379 Meltdown: The Archaeology of Climate Change

This course examines the temporal, geographical and environmental aspects of past climate changes, and by using specific examples, explores how climate changes may have affected the evolution of human culture and the course of human history. Archaeological and documentary examples from the Americas, Africa, Asia, Europe and the Near East are used to explore if or how significant events in human history have been influenced by changes in climate.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 380 Applications in GIS

This introductory course in Geographic Information Systems (GIS) is designed to provide basic knowledge of GIS theory and applications using the existing state-of-the-art GIS software. The course is taught using a combination of lectures, demonstrations and hands-on, interactive tutorials in the classroom. The first weeks of the course provide a broad view of how you can display and query spatial data and produce map products. The remainder of the course focus on applying spatial analytical tools to address questions and solve problems. As the semester develops, more tools are added to your GIS toolbox so that you can complete a final independent project that integrates material learned during the course. Students are encouraged to design individualized final projects using their own or other available data; however, some already prepared final projects also are available.

Credit 3 units. A&S: NS A&S IQ: NSM

L48 Anthro 3822 From McDonald's to K-Pop: New Movements in East Asia

This course aims to help students to obtain competent knowledge about contemporary East Asian cultures and societies. We explore a broad set of topics in a transregional

setting, from gender, filial piety, and kinship to the upsurge of new waves, including consumer and pop cultures, the "cuteness" culture, and individualization. Our interrogation examines cultural variables, transregional dynamism, local receptions of "Western" influences, and the global impact of cultural movement in East Asia.

Same as IAS 3822

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: IS EN: H

L48 Anthro 3832 Music and Healing

In this course, we broadly consider issues of music and healing, drawing from the fields of medical ethnomusicology, medical anthropology, music therapy, and psychology. Our case studies are multi-sited, as we interrogate musical healings and healing music from diverse global and historical perspectives. We approach our study of musical practices with the understanding that the social, cultural and political contexts where "music" and "healing" are themselves created inform the sounds of the music and its various — and often conflicting — interpretations and meanings. We read a variety of academic literature and use media texts and listening examples to develop interdisciplinary and cross-cultural analyses of music and healing. Issues of national consciousness, post/colonialism, gender, sexuality, race, ethnicity, class, religion, dis/ability and the role of history/memory remain central to our explorations of music and healing.

Same as Music 3031

Credit 3 units. A&S: CD A&S IQ: LCD EN: H

L48 Anthro 3833 Performance and Healing: The Politics of Health Representation

The purpose of this course is to bridge the disciplines of medical anthropology, global public health, and medical humanities through deep consideration of how variegated knowledge about health, healing and illness is produced and performed in a variety of public forums. Students explore the ways in which knowledge is produced about particular global health topics through representation in text, image, sound, film/television, and live performance art. Using interdisciplinary theory and methods, this course answers the following questions: Why are these representation modalities important, and how do we analyze them in practice? Drawing on the fields of medical anthropology, media studies, global public health, and performance studies, this course elucidates the relationships between knowledge production, representation, discourse, health and power through three case studies. Case study topics include: HIV/AIDS, Heroin Injection Use, and Domestic and Sexual Violence. Although the course provides an interdisciplinary perspective for understanding and analyzing different ways of representing illness and healing, it is also deeply grounded within the political-economy of health framework of critical medical anthropology. The following topics are central to our analyses in this class: gender, sexuality, the body, class, ethnicity and language.

Credit 3 units. A&S: SS A&S IQ: SSC BU: BA EN: S

L48 Anthro 3851 History and Theory of Anthropology

This course examines the history of anthropology and the major theoretical frameworks of the field to the present. Key theorists discussed in this class include Geertz, Foucault, Marx, Mead and Weber, as well as the deep roots of anthropology in strands of philosophy and social thought running back centuries. Ethnographic case studies from around the world are read in order to keep the theories palpable and grounded. Key themes discussed in the class include the concept of culture, how and why societies change and evolve, ways that meanings and

identities are made, the role of history in the present, diverse forms of power and experience, and issues of diversity amid contemporary global life.

Credit 3 units. A&S: SS A&S IQ: SSC BU: BA EN: S

L48 Anthro 3874 International Public Health

This course explores current topics in international public health using a case-study-based approach, emphasizing public health issues affecting low- and middle-income countries; introduction to the tools and methods of international public health research and programs; in-depth examination and critique of the roles of local and national governments, international agencies and third-party donors in international public health work; and the contributions of anthropology to the international public health agenda.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 3875 Pharmaceutical Personhood

This course examines sociocultural dimensions of pharmaceutical production and consumption in the contemporary world. Pharmaceuticals have brought remarkable promises. Their consumption also reflects various social inequalities and substantial transformations in human experience that demand critical attention. We examine the history and global reach of the pharmaceutical industry, the content of pharmaceutical advertising, and pharmaceutical use in the treatment of various kinds of illness, including common mental disorders, post-traumatic experience, chronic illness, eating disorders and lifestyle disorders. Case studies are drawn from diverse societies. We also explore various angles of public criticism about the pharmaceutical industry. No background in anthropology is required.

Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC BU: ETH EN: S

L48 Anthro 3876 Darwin and Doctors: Evolutionary Medicine and Health

Back pain, diabetes, obesity, colds, even morning sickness. These are all common human health problems. But have you ever wondered why we have these and other health conditions? In this class, we investigate this question — and others — specifically using evolutionary theory to inform current understandings of contemporary health problems.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L48 Anthro 3882 Psychological Anthropology

The objective of this course is to introduce students to the central topics and methods of psychological anthropology. Psychological anthropology is concerned with the interplay of psychology and culture on both the individual and group levels. We look cross-culturally at such topics as child and adolescent development; religious experience; illness and healing; self and identity, gender and sexuality; reasoning and symbolism; and psychopathology. This class draws upon a range of sources, including ethnographies, psychoanalytic theory, contemporary critical theory and cross-cultural materials.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA EN: S

L48 Anthro 393 Introduction to Archaeological Field Techniques

Introduction to archaeological fieldwork. Includes a variety of techniques employed by archaeologists, the underlying purpose of excavations, and the manner in which they are used to explore past societies. Field mapping and testing an archaeological site near Cahokia Mounds links this project to ongoing excavations with other institutions and relates it to the "Redefining Cahokia" project.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 3932 An Introduction to Archaeological Site Survey

The study and interpretation of the archaeological record begins in most instances with an archaeological survey. The purpose of this course is to provide students with an introductory level, hands-on experience to archaeological survey as practiced in eastern North America. This involves an introduction in the field to the various methods employed in the identification and mapping of archaeological sites. Students spend Saturdays in the field mapping and recording archaeological sites, including the mapping of monumental earthworks such as those at the prehistoric site of Cahokia or nearby mound centers.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 3951 Topics in Religion and Politics

This course examines the history of Islam and Muslims in the United States, from the earliest days of the country's founding to the contemporary everyday life of Muslims in the U.S. From the arrival of West African Muslims to the Americas during the Atlantic slave trade and the Founding Fathers' discussion of a Muslim president to Malcolm X, the Nation of Islam, Muslim Students Associations, and grocery stores, the course traces individual, communal, and institutional histories of American Muslim encounters and experiences. Studies of religion, history and anthropology are examined with literature, music, films and new media toward an interdisciplinary investigation of how Islam as a religion and worldview is represented, practiced and lived, intersecting with race, gender, class, sexuality, diaspora, politics and citizenship in an American and global landscape.

L48 Anthro 397 Proseminar: Issues and Research in Anthropology

Designed to introduce the student to current issues in Anthropology and to research being carried out by faculty. Topics vary each year. Each departmental member addresses issues in his or her particular specialty. Required of all majors; may be taken before declaring major, and may be taken by nonmajors.

Credit 1 unit. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 399 Undergraduate Teaching Assistant

Open to advanced undergraduates only. Usual duties of teaching assistant in laboratory or other selected courses. Prerequisite: permission of instructor.

Credit 3 units.

L48 Anthro 3999 Class Mentor

Classroom instructional assistance through mentoring activities assigned by instructor. Limited to advanced undergraduates only. Permission of instructor required.

Credit variable, maximum 3 units.

L48 Anthro 4002 Internship in Interrogating Health, Race and Inequalities

Internship in Interrogating Health, Race and Inequalities is intended for advanced undergraduates who are enrolled in the course Anthro 4003 (Interrogating Health, Race and Inequalities) and who have previous course work in (medical) anthropology, public health, urban policy, or African and African-American Studies. The internship experience is designed to facilitate students' familiarity with research and evaluation strategies that *both* address structural factors shaping health outcomes and are sensitive to community needs and sociocultural contexts. The internship experience contributes to students' in-class understanding of the ways that race as a historically produced social construct interacts with other axes of diversity and social determinants to produce particular health outcomes. Prerequisite: permission of the instructor. Corequisite: Anthro 4003.

Same as InterD 4002

Credit 1 unit.

L48 Anthro 4003 Interrogating Health, Race and Inequalities: Public Health, Medical Anthropology and History

Interrogating Health, Race and Inequalities is intended for graduate students in the School of Social Work and in Arts & Sciences as well as advanced undergraduates in Arts & Sciences who have previous course work in medical anthropology, public health or urban policy. The fundamental goal of the course is to demonstrate that health is not merely a medical or biological phenomenon but more importantly the product of social, economic, political and environmental factors. To meet this goal the course is designed to examine the intersection of race/ethnicity and health from multiple analytic approaches and methodologies. Course readings draw from the fields of public health, anthropology, history and policy analysis. Teaching activities include lectures, group projects and presentations, videos, and discussions led by the course instructors. These in-class activities are supplemented with field trips and field-based projects. By the end of the course students are expected to have a strong understanding of race as a historically produced social construct as well as how race interacts with other axes of diversity and social determinants to produce particular health outcomes. Students gain an understanding of the health disparity literature and a solid understanding of multiple and intersecting causes of these disparities.

Same as InterD 4001

Credit 3 units.

L48 Anthro 401 Evolution of Non-Human Primates

Discussion and analysis of primate evolution with emphasis on comparative and functional anatomy and primate paleontology. Prerequisite: permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4011 Popular Culture and Consumption in Modern China

This writing-intensive seminar explores transformations in popular culture and everyday life in Chinese society since 1949 through an analytical focus on political economy and material culture. Drawing upon ethnographic texts, films and material artifacts, we investigate how the forces of state control and global capitalism converge to shape consumer desires and everyday habits in contemporary China. Case studies include eating habits, fashion standards, housing trends, entertainment, sports and counterfeit goods. Prerequisite: previous course in China studies (anthropology, economics, history, literature, philosophy or political science) required. Enrollment by instructor approval only.

L48 Anthro 4021 The Meaning of National Security in the 21st Century

The 21st century has brought with it new challenges to national security. Standard assumptions about nations and the borders that separate them have been brought into question, and one of the results of this is that the very meaning of national security is undergoing change. Instead of threats to security coming from outside national boundaries, they now often exist within and across borders. This course focuses on contemporary ideas about these issues. It includes a brief overview of current discussions of national security, but it is primarily devoted to examining the conceptual resources we have for making sense of national security in a new world.

Same as IAS 402

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 4022 Transnational Reproductive Health Issues: Meanings, Technologies, Practices

This course covers recent scholarship on gender and reproductive health, including such issues as reproduction and the disciplinary power of the state, contested reproductive relations within families and communities, and the implications of global flows of biotechnology, population and information for reproductive strategies at the local level. We also explore how transnational migration and globalization have shaped reproductive health, the diverse meanings associated with reproductive processes, and decisions concerning reproduction. Reproduction serves as a focus to illuminate the cultural politics of gender, power and sexuality.

Credit 3 units. A&S: SS, CD, SD A&S IQ: LCD, SSC, SD Art: SSC BU: BA EN: S

L48 Anthro 403 Archaeology and Early Ethnography of the Southwest

This course integrates archaeological, historical and early ethnographic dimensions of American Indian societies in the southwestern United States and northwest Mexico, a region famous for its challenging environment, cultural diversity and the contributions made by its Native inhabitants. Emphasis is placed on the development of sophisticated desert agriculture and on the rise of regionally integrated cultures including Chaco Canyon and Mesa Verde. The impact of Spanish, Mexican and American colonization are explored. Ethnographies of Tohono O'odham (Papago), Hopi, Zuni, Rio Grande Pueblo and Navajo societies are discussed.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC EN: S

L48 Anthro 4033 Culture, Illness and Healing in Asia

This course examines the place of health, illness and healing in Asian societies. We explore how people experience, narrate and respond to illness and other forms of suffering — including political violence, extreme poverty and health inequalities. In lectures and discussions we discuss major changes that medicine and public health are undergoing and how those changes affect the training of practitioners, health care policy, clinical practice and ethics. The course familiarizes students with key concepts and approaches in medical anthropology by considering case studies from a number of social settings including China, India, Indonesia, Japan, Korea, Taiwan, Tibet, Thailand, Vietnam and Asian immigrants in the United States. We also investigate the sociocultural dimensions of illness and the medicalization of social problems in Asia, examining how gender, ethnicity, socioeconomic status, disability and other forms of social difference affect medical knowledge and disease outcomes. This course is intended for anthropology majors, students considering careers in medicine and public health, and others interested in learning how anthropology can help us understand human suffering and formulate more effective interventions.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC EN: S

L48 Anthro 4034 Family Change in East Asia

This course explores the process of family transformations in contemporary East Asia, focusing on China, Japan, Korea, Hong Kong and Taiwan, from an anthropological perspective. Topics covered in this course include traditional mainstream East Asian family systems, childbearing, the experience of coming of age, romance and courtship, marriage and family relations, the experience of aging and old-age support, divorce, singlehood and same-sex partnership, family separation and reunion, cross-boarder marriages, and transnational adoption. Alternative family systems among ethnic minorities in East Asia also are addressed.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4041 Islam and Politics

Blending history and ethnography, this course covers politics in the Islamic world in historical and contemporary times. Topics include history of Islam; uniformity and diversity in belief and practice (global patterns, local realities); revolution and social change; women and veiling; and the international dimensions of resurgent Islam. Geographical focus extends from Morocco to Indonesia; discussion of other Muslim communities (Bosnia, Chechnya, sub-Saharan Africa, United States) is included.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: IS

L48 Anthro 4042 Islam Across Cultures

In this seminar, we examine the variety of historical and contemporary ways of interpreting and practicing Islam, with special attention to issues of ritual, law and the state, and gender. Cases are drawn from Asia, Europe, Africa and the Middle East, and students engage in fieldwork or library research projects.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC

L48 Anthro 406 Primate Ecology and Social Structure

Survey of the ecology and individual and social behavior, adaptations and interactions of the major groups of primates. Emphasis on studies designed to examine the relationships among ecology, morphophysiology and behavior. Methods used

in collecting data on primates in the field. Prerequisite: Anthro 150A or one 100-level biology course.
Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4062 The Art of Borrowing: The "West" in Japanese Life

This course aims to examine Western influences in Japan and Japan's reconceptualizing the "West" in various aspects of popular culture, including cuisine, sports, music, language, advertising, entertainment and domesticity. It is primarily an anthropological survey with historical references on Japan's turn to Western civilization in the modern era. The course explores Japanese perceptions of the "West," and how Japanese consume the "West" by attaching meanings to "Western" symbols and practices, and making them part of Japanese culture and life. Rather than explicating Japan's relationship with the West, the course scrutinizes the "West" constructed within Japanese discourse, as both a racial/ethnic other and a cultural fantasy. Course assignments include a round table discussion on specific topics relating to cultural integration and internationalization, and globalization and localization.

L48 Anthro 4102 Latin America and the Rise of the Global South

The rise of the global south — and the reordering of global geopolitics, economics and cultural imaginaries — is characterized by progressive change and intense conflict. Economic growth coincides with the impacts of global warming, the assault on natural resources, the rise of new consumers and the entrenchment of deep inequalities. We also see the emergence of cultural and political formations that range from the horrific to the inspiring. Latin America is a central node of the new global south. Here history takes unpredictable turns in the face of declining U.S. hegemony, the economic growth of Brazil, legacies of militarism and political violence, a feverish attack on nature, resurgent economic nationalism, and defiant "anti-globalization" movements. Through close reading of contemporary ethnographies of Latin America we explore emergent cultural and political-economic processes in the region; we consider south-south articulations (theoretical, cultural, political-economic) between Latin America, China, Africa and India; and we reflect on the changing role, meaning and relationships of the United States in the region.
Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC EN: S

L48 Anthro 4103 African Art: A User's Guide

This seminar offers an introduction to the methodologies of African art history, exploring a range of approaches to objects from an examination of their original contexts; accessed through oral and archival sources; to their lives in a Western context, including collecting histories and market valuation over time. It considers new means of knowing African objects through methods such as CT scanning and algorithm-based databases and poses the question: Of what value is this corpus outside of art history or African studies? Through course meetings and projects, students are introduced to various

research methodologies, including the production of oral history records for the St. Louis Art Museum, provenance research, and valuation. The course culminates in a final paper and presentation based on an object in SLAM's African collection. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.
Same as Art-Arch 4103
Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L48 Anthro 4105 Power, Authority and Spirituality in Oceanic Art

Focusing on the material culture of the Pacific, this seminar considers the similarities and differences in political and spiritual power and authority throughout Polynesia, Melanesia and Micronesia. The seminar examines how material forms embodied the immaterial divine and spiritual power associated with gods and ancestors and considers how objects understood to contain these powers were used in local contexts and with neighboring communities and Westerners. Included in the discussions are objects (both ritual and utilitarian), body modification and decoration/ornamentation, dress, architecture, religion/ritual, warfare and exchange. We consider what the materials used in these categories tell us about local concepts of ancestral or divine power, about indigenous understandings of the local environment and its importance, and also how objects were understood as mediators of the relationships between humans and ancestors or divine beings. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in Art History preferred; or permission of instructor.
Same as Art-Arch 4105
Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L48 Anthro 4112 Body and Flesh: Theorizing Embodiment

This seminar explores a wide range of readings on "the body" as a site of theoretical analysis in social scientific and humanistic inquiry. Issues include: How do we think about the body as simultaneously material (flesh and bone) and constructed in and through social and political discourse? How do we think about the relationship between these contingent bodies and subjective experiences of "self" in various contexts? The course focuses upon the different ways in which these questions have been posed and engaged, and the implications of these formulations for the theorizing of human experience. Prerequisite: Anthro 3201 or permission of instructor.
Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4113 Advanced Psychological Anthropology

This seminar examines the intersection of psychological and anthropological theories and methods and their utility in the study of culture and human experience. This course is an in-depth exploration of some of the key theorists and theoretical domains that have defined the field of psychological anthropology and beyond, including Bakhtin, Bateson, Chodorow, D'Andrade, Ewing, Freud, Goffman, Hallowsell, Holland, Irigaray, Kleinman, Kohut, Lacan, Lutz, Rosaldo, Strauss, Sapir, Schepher-Hughes and Vygotsky, among others. By the end of the course, students have a solid grounding in linguistic, psychoanalytic, cognitive, symbolic, developmental, interactionist and critical approaches within psychological anthropology. Prerequisites: at least one of the following: Anthro 3201, Anthro 3882, graduate standing or permission of instructor.
Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4114 Anthropology and Existentialism

This course examines what it means to be human. Drawing on existentialist philosophy and ethnography, this course is about appreciating the richness, the deep emotional tone, and also the dangers of human experience. Case studies look at profound aspects of existence, such as suffering, healing, mercy and hope, across diverse cultures. Specific themes covered include the ordinary life, how we perceive the world around us, the feeling of being at home and senses of place, how we experience pain, what makes our bodies powerful or vulnerable, why things really matter, and how communities cope with trauma and violence. This course is especially relevant for students interested in medical anthropology and social dimensions of health and illness. No background in anthropology or philosophy is required.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: ETH EN: S

L48 Anthro 4115 Anthropology of Deviance

This course provides an anthropological perspective on notions of "deviance" as social, psychological, moral and medical mechanisms of control and regulation. Students learn to critically engage and evaluate dominant etiological theories of deviance, local and global contexts of deviance, and social responses to deviance as cultural processes through which communities make (and unmake) meaningful human relationships. Through academic texts, ethnographic accounts, clinical case materials and firsthand accounts, students explore multiple dimensions of what it means to be "deviant" or "normal" in a given social or cultural context. Sample topics include: historical trajectories of deviance, deviance and criminology, social class and inequality, prison cultures, deviance and resistance, deviant personalities, forensic psychiatry, deviant vs. socially sanctioned violence, and stigma.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Art: SSC EN: S

L48 Anthro 4116 Anthropology and Experiment

In recent years, many cultural anthropologists have described their work as "experimental." On the surface, the notion of experimentation leads something of a double life. On the one hand, in its ideal form, it stands for rigidly held methodological tenets aimed at answering questions in rigorous ways. This kind of experimentation is the hallmark of "scientific" inquiry. On the other hand, experimentation implies something of openness, of tentative and flexible exploration. Through an examination of works on experiments, as well as purportedly experimental ethnographies, we pursue the question: What is an experimental mode of inquiry in cultural anthropology, and how does it square with the two idealized meanings of experimentation? We examine the links and resonances between different notions of what experiments do, what they describe in terms of both form and method, how they begin and end, how they are assessed as successes or failures, and what sort of knowledge they produce. This course involves reading across cultural anthropology, science studies and the philosophy of science to better understand different approaches to experiments across domains of research and writing. Can we learn something about what anthropologists do in experimental works from the wealth of thoughtful scholarship on experiments in other fields? Is there something common to experimentation in cultural anthropology and experimentation elsewhere in the social sciences and beyond?

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4117 Nature/Culture

What do we mean by "nature" or by designating something as "natural"? How do we distinguish nature from culture and where does such a distinction break down, become political or controversial? Is the distinction between nature and culture itself universal, or does it emerge from a particular history and reflect particular preconceptions and understandings? And how do new technologies reconfigure this distinction? In this course, we explore such questions, paying special attention to the ways anthropology, as a discipline, has relied on, reinforced, and legitimated this great divide.

Credit 3 units. A&S IQ: SSC Arch: SSC Art: SSC

L48 Anthro 411W Anthropology and Existentialism — Writing-Intensive Seminar

This course examines what it means to be human. Drawing on existentialist philosophy and ethnography, this course is about appreciating the richness, the deep emotional tone, and also the dangers of human experience. Case studies look at profound aspects of existence, such as suffering, healing, mercy and hope, across diverse cultures. Specific themes covered include the ordinary life, how we perceive the world around us, the feeling of being at home and senses of place, how we experience pain, what makes our bodies powerful or vulnerable, why things really matter, and how communities cope with trauma and violence. This course is especially relevant for students interested in medical anthropology and social dimensions of health and illness. No background in anthropology or philosophy is required. This is the writing-intensive version of Anthro 4114.

Credit 3 units. A&S: SS, CD, WI EN: S

L48 Anthro 4123 Argumentation Through Ethnography

Ethnography is the traditional mainstay of anthropological academic writing. Through ethnography, anthropologists do more than simply describe a culture or a group of people; rather, they organize and present their field materials in particular ways in order to make intellectual, theoretical and sometimes even political arguments. This seminar explores the different ways anthropologists have used ethnography to make intellectual claims and frame theoretical or practical arguments. The aim of the course is to help students develop critical reading skills for engaging ethnographic materials as well as to explore the ways in which ethnography, when done well, can be a persuasive and engaging means of academic argumentation. This course is intended as a sequel to Anthro 472. Prerequisite: Anthro 472 or permission of instructor.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4134 The AIDS Epidemic: Inequalities, Ethnography and Ethics

In the year 2000, HIV became the world's leading infectious cause of adult death, and in the next 10 years, AIDS was expected to kill more people than all wars of the 20th century combined. As the global epidemic rages on, our greatest enemy in combating HIV/AIDS is not lack of knowledge or resources, but global inequalities and the conceptual frameworks with which we understand health, human interaction and sexuality. This course emphasizes the ethnographic approach for cultural analysis of responses to HIV/AIDS. Students explore the relationship between local communities and wider historical and economic processes, and theoretical approaches to disease, the body, ethnicity/race, gender, sexuality, risk, addiction, power and culture. Other topics covered include the cultural construction

of AIDS and risk, government responses to HIV/AIDS, origin and transmission debates; ethics and responsibilities; drug testing and marketing; the making of the AIDS industry and "risk" categories; prevention and education strategies; interaction between biomedicine and alternative healing systems; and medical advances and hopes.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Art: SSC EN: S

L48 Anthro 4135 Tobacco: History, Culture, Science and Policy

This course examines tobacco's important role in shaping the modern world over the course of the last five centuries, from indigenous uses of tobacco in the New World to the politics of smoking in the 20th century. Through in-depth historical and anthropological case studies, tobacco provides a window into broad trends in government, law, economy and society, including changing social meanings of gender, race, individualism, risk, responsibility and health in the United States and worldwide. This course also introduces students to public health approaches to noncommunicable disease prevention and healthy lifestyle promotion. No background in anthropology or public health is required.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4136 Sexual Health and the City: A Community-Based Learning Course

Same as AFAS 406

L48 Anthro 419 Primate Behavior

Discussion and analysis of recent research on the social behavior of nonhuman primates. Data from both field and laboratory study. Prerequisite: Anthro 406 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4191 Primate Cognition

This course investigates historical and current views regarding the cognitive capacities of non-human primates, and the extent to which these abilities are shared with humans. Topics for this class include: social cognition, problem-solving, tool use, culture, communication, theory of mind, deception, self-recognition, imitation and numerical cognition. The classes involve discussion and critical evaluation of theory and methods in this challenging and exciting area of primate cognitive research.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4202 Anthropological Genetics

This course examines the principles of evolutionary genetics as applied to complex characters such as morphology, behavior, life history and disease. Mathematical models of quantitative inheritance and evolution are discussed. Special topics include kin selection, sexual dimorphism and conservation genetics. Prerequisite: Anthro 150A or introductory biology.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4211 Paleoethnobotany and Ethnobotany

Interrelationships between plants and people, especially in past societies. Recovery and analysis of plant remains from archaeological sites; interpreting subsistence and vegetation changes; medicinal, ritual and technological uses of plants; plant domestication and agricultural intensification. Modern efforts to

understand and preserve threatened traditional ethnobotanical practices. Prerequisite: Anthro 190BP or an introductory botany course, or permission of instructor.

Credit 3 units. A&S: SS, WI A&S IQ: SSC, WI Art: SSC

L48 Anthro 4212 Advanced Methods in Paleoethnobotany

Advanced analytical techniques for the study of archaeological plant remains. Tools and methods for micromorphological recognition, including electron microscopy. Photomicroscopy at low magnification, management, tabulation and reporting of data. Prerequisite: Anthro 4211 or permission of instructor.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 4214 The Archaeology of Food and Drink

Studies of past human diets have moved beyond analyses of animal bones and seeds to encompass new theoretical goals and innovative analytical techniques. In this seminar-style course, students explore methods of understanding food-related social interactions such as evidence including residues, ancient DNA, isotopes and trace elements, along with more traditional artifacts and archaeobotanical and zooarchaeological remains. By examining case studies from around the world, we evaluate the current state of research attempting to integrate the biological and cultural aspects of eating and drinking.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4215 Anthropology of Food

The rising interest in food research crosscuts various academic disciplines. This seminar focuses on aspects of food of particular interest in anthropology. The first two-thirds of the course is reading-intensive and discussion-intensive. Each student writes short review/response papers for major readings. For the final third, we still are reading and discussing, but the reading load is lighter (and we have a field trip) as students devote more time to their research papers. The research paper is a major effort on a topic discussed with and approved by the professor. In most cases it has to deal with cultural and historical aspects of a food, set of foods, form of consumption or aspect of food production. Papers are critiqued, assigned a provisional grade, revised and resubmitted.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4240 The Plundered Past: Archaeology's Challenges in the Modern World

The public imagination thrills at the fantastic adventures of Indiana Jones and Lara Croft, Tomb Raider, but the reality of modern archaeology is more complex, ethically challenging and interesting than a simple treasure hunt. In the United States and Canada, our science museums and museums of anthropology still display artifacts that are regarded as sacred and culturally definitive by Indian nations, although such holdings are now subject to negotiation and repatriation. Art museums in Europe and the U.S. still are stocked with looted ancient masterpieces that are revered as vital heritage by the nations from which they were stolen. We display looted art alongside a much smaller number of legitimately excavated artifacts of masterpiece quality, so it is no surprise that our popular images of archaeologists as avid and undiscerning collectors raise little concern. But modern archaeologists are not extractors of art or even of scientific information, from places as passive and inert as the museums' objects ultimately occupy. Archaeologists work with living people inhabiting societies and states that care deeply about their pasts and the relics of it. They are active agents engaged with many other people in the production of knowledge about the past. In

our rapidly shrinking world, educated sensitivity to the many ancient cultural legacies that shape the values of modern global society is more than a moral imperative; it is a basic form of collaboration in the common project of survival. Archaeologists are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites and information they occupy.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM EN: H

L48 Anthro 4253 Researching Fertility, Mortality and Migration

Students undertake research projects centering on the most fundamental demographic processes — fertility, mortality and migration. The first section covers basic demographic methodology so that students understand how population data is generated and demographic statistics analyzed. Then, course readings include seminal theoretical insights by anthropologists on demographic processes. Meanwhile, students work toward the completion of a term paper in which they are expected to undertake some original research on a topic of their choice (e.g., new reproductive technologies; cross-cultural adoption; ethnicity and migration). Each assignment in this course is a component of the final term paper. Prerequisite: Anthro 3612 Population and Society or permission of instructor.

Credit 3 units. A&S: SS, WI A&S IQ: SSC, WI Art: SSC EN: S

L48 Anthro 4254 The Anthropology of Maternal Death

No other commonly recorded health indicator shows such great disparities between rich and poor nations as does maternal mortality. More than 500,000 women die each year around the world from complications of pregnancy and childbirth, but 99 percent of these deaths occur in impoverished, non-industrialized countries. This course examines the reasons for this stunning discrepancy, looking at the biological, social, political and economic factors involved in maternal death. The course is conducted as a seminar based on detailed readings of relevant journal articles, group discussion, case studies and class presentations. Prerequisite: Anthro 3621.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4264 The Myth of Race

This course describes the history of the myth of race and racism from the Spanish Inquisition to modern times. Since race is not a biological term but a cultural term, it is important for students to understand the origins and connections of ideas of race and racism from its beginnings in western thought to its current usage. The historical and literature connections can be seen throughout the writings and behavior of the Spanish Inquisition, to the Renaissance, though colonization and slavery, to the reconstruction, to the late 19th century, to the early 20th century, to modern times. In fact, the early history of anthropology can be traced through racist history.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD EN: S

L48 Anthro 4282 Political Ecology

An exploration of how the interactions between culture and environment are mediated by local, national and global politics. Topics include “overpopulation,” agricultural intensification, Green Revolution, biotechnology, corporate agriculture, green movements and organic farming. Each student prepares an in-depth research paper that may be presented to the class. Prerequisites: graduate standing, Anthro 361 or permission of instructor.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4285 Environmental Archaeology

This course intends to introduce students to lines of evidence used in the interpretation of past landscapes, how we can conceptualize the changing human ecological relations and how we can identify human influence on their environment. Special emphasis is placed on the human-animal-plant relations, with case studies from around the world. Combining both lecture and seminar sessions, this course aims to ensure that students are aware of several of the basic methods of bio-archaeological and palaeo-environmental reconstruction, and the application of these methods to the interpretation of past landscapes and human impacts on them.

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 4311 Biocultural Perspectives on Obesity and Nutrition

From pink slime to red wine, causes and treatments for obesity are constantly in the headlines. With more than 35 percent of Americans currently obese, this is a tremendous biological and social issue in the United States. Obesity rates also are increasing globally despite billions of dollars spent on diets and public health interventions. Why is this happening and what can be done to change this? Why are humans fat and prone to obesity? How do we interpret appropriate body size? These are some of the questions we investigate in this class, specifically looking at the important physiological functions of adipose tissue and how both biological and cultural factors shape our perceptions of body image, health and the obesity epidemic.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4321 History of Physical Anthropology

The history of physical (or biological) anthropology are traced from Darwin's time to the present. Factors that influenced major theories and subfields of physical anthropology are discussed along with current directions.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4322 Brave New Crops

This course introduces students to the major issues surrounding the development and use in genetically modified (GM) crops. Its focus is international, but with particular focus on the developing world. A variety of experts, available locally or through the internet, contribute perspectives. The course also includes field trips. For further information, see artsci.wustl.edu/~anthro/courses/3322.

Same as Anthro 3322

L48 Anthro 434 Behavioral Research at the St. Louis Zoo

Students conduct research at the St. Louis Zoo. Training in designing of projects and analysis and interpretation of data. May be repeated for credit. Prerequisite: permission of instructor.

Credit variable, maximum 6 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM BU: BA

L48 Anthro 4363 Sex, Gender and Power

This seminar explores various ways anthropologists have conceptualized the intersection of sex, gender and power in their ethnographies. Key questions revolve around the processes through which biological categories of sex become socially significant, and interact with various regimes of power

such as the state, family, religion, medicine, the market and science in everyday life. We examine how the social processes and regulatory mechanisms associated with gender and sexuality create systems of hierarchy, domination, resistance, meaning, identity and affection. Course materials are primarily ethnographies, supplemented with articles. The aim of the course is to develop students' critical reading, discussion and writing skills. Prerequisite: upper-level Anthro or Women, Gender and Sexuality Studies courses, or permission of instructor. Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Art: SSC EN: S

L48 Anthro 4366 Europe's New Diversities

Since the late 1980s, three major upheavals have transformed European senses of identity. The demise of the Soviet Union has forced citizens of new "post-socialist" nations to forge new senses of belonging and new strategies of survival. The rise of a new public presence of Islam, and the growth of children of Muslim immigrants to adulthood, have challenged notions that Europe is a secular or post-Christian space. Finally, the heightened authority of European institutions has challenged the nation-state from above, and by granting new forms of subnational autonomy to regions and peoples, from below. The new Europe is increasingly constituted by way of regional identifications and transnational movement(s), and by umbrella European legal and political organizations; these new realities occasion new rhetorics of secularism, nationalism and ethnic loyalties. We examine these forms of diversity, movement and debate by way of new works in anthropology, sociology and political science.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4367 Culture, Power, Knowledge

We often think of knowledge as universal and objective. But anthropologists have long studied ways in which knowledge varies in different cultural settings. In this course, we ask: What is knowledge, how does it arise, and what does it do? Is there such a thing as universal validity or is knowledge always tied to specific cultural practices? What happens when knowledge travels and how does knowledge figure in relations of power? We approach these questions through works in anthropology, philosophy and science studies.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: ETH EN: S

L48 Anthro 4392 Capitalism and Culture

Capitalism is perhaps the most important historical and social phenomenon in the modern world. In tribal settings and major cities alike, its complex impacts are evident. Through rich case studies of how capitalism touches down in diverse cultures, this course provides an introduction to anthropological perspectives on the economy and economic development. Themes covered include the history of capitalism and globalization, the cultural meanings of class and taste, the relationship between capitalism and popular culture, major artistic responses to capitalism, social movements such as environmentalism, and the field of international development. No background in anthropology or economics is required.

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Art: SSC EN: S

L48 Anthro 4393 The Archaeology of Trade and Exchange

Studies of trade and exchange are fundamental to our past, as cultures in contact result in new imaginings of self, communities, and place in the world. This course engages in archaeological and anthropological discussions about the interconnectedness that results from trade. This seminar concentrates on the

discourse of material trade and the mechanisms for exchange, redistribution, dependency and resistance. It also examines the immaterial exchange of ideas, perceptions and values that alter concepts of identity, space and time. Globalization, political economies, and power are also addressed, along with ideas about territory, value, and social and political consequences of trade.

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 4408 Trauma and Memory

A thorough investigation of the effects of trauma on memory in both individuals and collective groups. Topics include flashback memories, forgetting and repression, post-traumatic stress and memory, and effects of trauma on individual and group identity. Prerequisites: Psych 100B + 6 units of advanced-level Psychology or Anthropology course work.

Same as Psych 4408

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 4452 In the Field: Ethnographic and Qualitative Methods

Same as AMCS 441

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4453 Studying the City: Approaches to Social Research

Same as URST 418

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 4454 Cultures of Science and Technology

This seminar explores questions of theory, method and ethics in the anthropology of science and technology. How is biomedicine changing what it is to be human? How can technologies and scientific practices be studied ethnographically? How are the politics of difference linked to the production of scientific knowledge? Through close reading of ethnographic texts and fieldwork experience both on- and offline, we investigate how scientific practice and technological innovation reorganize various aspects of human life on both global and local scales. Topics include the social construction of knowledge, the reproduction of racial categories in genomics, the cultures of cyberspace, the commodification of bodies in medical science, and the ways in which various technoscientific projects reshape natural and political orders in diverse locales.

Credit 3 units. A&S: SS, WI A&S IQ: SSC, WI Art: SSC EN: S

L48 Anthro 4455 Ethnographic Fieldwork

This is a practice-based course in ethnographic fieldwork. Using a local case study (the cultural politics of schooling), we examine ethnographic fieldwork as an academic instrument and public social action. The course prepares students for independent research in academic or professional fields developing skills in critical thought, thesis and question development, background and internet research, perspective and empathy, social and political-economic analysis, observation, interviewing, oral histories, note-taking, data analysis, cultural interpretation, and writing. Student work contributes to the ongoing "St. Louis Schools' Ethnographic Documentation Project."

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 448 Contemporary Issues in Cultural Anthropology

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4481 Writing Culture

Different ways of writing about people, culture and society in past and present times. Readings include anthropological works as well as works of fiction that represent people and the times, places and circumstances in which they live. Students conduct and write about their own ethnographical observations.

Credit 3 units. A&S: SS, WI A&S IQ: SSC, WI Art: SSC

L48 Anthro 4517 Anthropology and Development

The Bolivia-Brazil Project. This writing-intensive seminar examines the cultural politics of global "development" through an in-depth focus on Bolivia and Brazil. Brazil, a rising giant, has taken a central place in global energy and agroindustry and leads the Global South on the world stage. Bolivia, rich with natural gas, fuels Brazil and suffers collateral resource conflicts, yet inspires many through indigenous struggles to rethink economy, nature and society. Both countries express changing global geopolitics repositioning Latin American economies along east-west (China-India-Africa) — as well as north-south (U.S./ Europe) — axes. In this course we consider how global political economies linking Bolivia and Brazil are interwoven with change in public cultures, territorial orders and flows, environmental dislocations, nationalism and identity, and how social movement struggles gendered inequalities, poverty, racism, indigeneity and democracy. Students acquire a foundation in anthropological approaches to development theory and ethnography and in-depth knowledge of Bolivia and Brazil. Through independent case studies tied to the instructor's "Bolivia-Brazil Project," students gain skills in research and writing on the cultural, social and political complexities of this thing we call "development." Knowledge of Spanish and/or Portuguese and some prior knowledge of Latin America is encouraged, though not required.

Credit 3 units. A&S: SS, WI A&S IQ: SSC, WI BU: ETH EN: S

L48 Anthro 4561 Ceramic Analysis

Method, techniques and models for analyzing prehistoric ceramics. Students conduct hands-on analyses of collections from Cahokia Mounds and the St. Louis region. Prerequisite: Anthro 314, graduate standing or permission of instructor.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 4562 Artifact Analysis: Mississippian Cultures

The purpose of this course is to provide students with an introductory, hands-on experience of the methods employed in the analysis of archaeological materials common to the Mississippian culture. Students conduct class projects based on collections from Cahokia Mounds and the St. Louis region. Prerequisite: Anthro 314 or equivalent, or graduate standing, or permission of instructor.

Credit 3 units. A&S: SS A&S IQ: SSC

L48 Anthro 4564 Archaeobotanical Analysis

Advanced laboratory and analytical techniques. Prerequisite: Anthro 4211 or permission of instructor.

Credit 3 units. A&S: SS EN: S

L48 Anthro 4565 Biomolecular Archaeology: Are You What You Eat?

A revolution is underway in archaeology. Working at the cutting edge of isotopic and genetic technologies, researchers have been probing the building blocks of ancient proteins, life-DNA, fats and microfossils to rewrite our understanding of the past. Their discoveries and analyses have helped revise the human genealogical tree and answer such questions as: Are you what you eat? How different are we from the Neanderthals? Who first domesticated plants and animals? What was life like for our ancestors? In this class, we address those fundamental issues to understanding human nature. Here is science at its most engaging.

Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC EN: S

L48 Anthro 4581 Principles of Human Anatomy and Development

This course is designed for both undergraduate and graduate students in the anthropological, biological and/or premedical sciences who wish to learn about human anatomy from various evolutionary, functional, developmental and clinical perspectives. Lectures emphasize the organizational and developmental principles of various organ systems of the human body. The course also makes use of our extensive anatomy museum of labeled dissected human specimens as well as our cast collections of numerous specimens from the human fossil record where appropriate. Frequent use of X-rays, CT and MRI scans also are used to help students visualize human anatomy from a number of different imaging modalities. Prerequisite: undergraduate or graduate students in the anthropological, biological and/or premedical sciences must have had at least one course in physical anthropology and/or biology, or consent of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4582 Human Life History Theory

Life history theory postulates that organisms must allocate finite time and finite resources between growth, maintenance and reproductive effort. This balance necessitates trade-offs in specific traits related to body size and energy allocation between competing functions across the life of the organism. In this class, we start from this broad theory and look at the specific application of life history theory within anthropology. Humans, in particular, present unique and unusual life history characteristics, which we discuss in depth.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 459 Human Osteology

Analysis of skeletal material recovered in human paleontological and archaeological excavations. The development of bone and major diseases that affect skeletal structure. Prerequisite: permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4591 Human Functional Morphology

A detailed consideration of the biological basis for variation in recent and past human skeletal anatomy as a framework for the interpretation of prehistoric human skeletal and fossil remains. Emphasis is placed on the structure, development and degeneration of bones and joints, the soft tissues which impinge upon individual bones; and the biomechanical patterns relating to bone and joint structures. Prerequisite: Anthro 3661, Anthro 459 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4595 Developmental Plasticity and Human Health

A look at how early life — gestation plus infancy and childhood — contributes to the establishment of long-term physiology, variation and individual health from an anthropological perspective. The course includes current disease models of developmental origins, combined with evolutionary and adaptive perspectives on developmental plasticity and the construction of human health.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4596 Biomarkers: Measuring Population Health, Reproductive and Social Endocrinology

How do we study contemporary human biology and population-level health? How do we investigate individual differences in health within a larger population? In this course, we specifically address these questions by looking at how anthropologists, nutritionists and public health workers investigate individual and population-level health. This is done through the study of biomarkers collected from individuals. In this class, we discuss the theory behind the use of biomarkers, the underlying biology and physiology of the human body reflected in these data, and the methods used in collection and analyses of biomarkers. Finally, we discuss how biomarkers can be integrated into studies of population and individual-level health.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4601 Topics in African-American Studies: Health in the Black Community: A Social Science Perspective

Health matters for every facet of social life. In this course, we use a critical sociological perspective to explore the dynamic nature of health and health care experiences amongst Blacks in the United States. We draw upon core concepts in Sociology, the Sociology of Health, Illness, and Care as well as Critical Race Theory and Social Epidemiology to guide our discussions throughout the semester. Using contemporary, real-world examples, we examine the causes and consequences of racial health disparities that too often situate Blacks in positions of disadvantage. We use the work of scholars such as Patricia Hill Collins, David Williams, and Dorothy Roberts to explore topics ranging from racism in the health care system to the Black immigrant health advantage to health and hip hop. We consider how poor health and health care outcomes among Blacks in the United States matter on a global scale. Throughout the course, we consider practical policy and programmatic interventions that can be implemented to eliminate poor health in Black communities.

Same as AFAS 4601

Credit 3 units. A&S: SS, SD A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L48 Anthro 4623 Art and Science of Inferential Statistics

This course examines the historical roots, the scholarly development and the current applications of inferential statistics in a research context. The emphasis is on how social and natural variables are distributed, framing testable research questions, and choosing appropriate statistical tests. This course covers the testing of univariate, bivariate and multivariate hypotheses using parametric, non-parametric and re-sampling methods. Requires students to undertake statistical analyses of their own on real data sets. Familiarity with descriptive

statistics is assumed. Designed for graduate students and advanced undergraduates. Permission of instructor is required for undergraduate enrollment.

Credit 3 units. A&S: SS, QA A&S IQ: SSC, AN Art: NSM EN: S

L48 Anthro 4655 New Advances in Archaeology

Archaeological research is moving at an increasingly rapid pace, with advances in archaeological methods and theory propelling new interpretations and understandings of archaeological findings. In this course we focus on contemporary developments in archaeology, with an emphasis on current trends in theory, method and discovery. The objectives of the course are to place emerging trends in archaeological research in a historical context, to understand new methods and to explore how various theoretical approaches influence the conduct of archaeological research around the globe.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4661 Historical Archaeology

This course focuses upon the methods and techniques employed in historical archaeology. We include methods of integration of written records through contextual studies, discussion of specific artifact type identification techniques, and seminar-type treatments of other aspects of the field. The class includes some hands-on lab work, working primarily with materials from the first American fort west of the Mississippi (Fort Belle Fontaine) and two Civil War period mansions. Prerequisite: 3 credits of archaeology or permission of instructor.

Credit 3 units. A&S: TH, CD, WI A&S IQ: HUM, LCD Art: HUM

L48 Anthro 4682 Ethnoarchaeology

Theories, methods and techniques applied by archaeologists to contemporary societies and materials to aid their understanding of extinct societies. Analysis of ethnographic research in both the Old and New Worlds. Participation with Professors Watson, Browman and Fritz is included in relevant topics. Prerequisites: Anthro 160B or 190BP, and permission of instructor.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM EN: H

L48 Anthro 472 Social Theory and Anthropology

A seminar on social theory and its ethnographic implications.

Course combines major works of modern social theory, including Marx, Weber and Durkheim, with current work by contemporary anthropologists, such as Clifford Geertz, Eric Wolf, Marshall Sahlins and Fredrik Barth, and ethnographers from related disciplines, such as Pierre Bourdieu and Paul Willis. Prerequisite: previous anthropology course work or permission of instructor.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 474 National Narratives and Collective Memory

This course examines how national narratives shape the ideas of nation-states about themselves and others. It considers cultural, psychological and political aspects of narratives used to interpret the past and understand the present. In addition to reviewing conceptual foundations from the humanities and social sciences, particular national narratives are considered as case studies.

Same as IAS 474

Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L48 Anthro 4761 The Pleistocene Peopling of Eurasia

The paleolithic archaeology, human paleobiology and paleoecology of the geographical expansions and adaptations of

Eurasian humans through the Pleistocene. Prerequisite: Anthro 150A or 190B.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 4771 Out of the Wild: Domestication and Socioeconomic Diversity in Africa

The reason for the beginnings and spread of food production during the early Holocene in so many parts of the world is one of the most interesting questions in archaeology. It now seems likely that there are many different pathways to domestication. In Africa, there is a record of up to several million years of human existence as hunter-gatherers before some human populations adopted food production. Domestication of plants and animals about 10,000 years ago resulted in fundamental changes in human societies. It provided the basis for the increase in settlement densities, specialization and social stratification, and general decrease in mobility and dietary diversity characteristic of non-hunter-gatherer societies in the modern world. In this seminar, the class explores the phenomenon of domestication and the spread of food production, surveying the evidence for manipulation and domestication of plant and animal species by prehistoric peoples in Africa. We focus on how and why domestication occurred and factors that influenced its spread; interactions between late hunter-gatherers and early pastoralists; and intersections with complex societies of the Nile. We also look at the contributions of Africa to understanding pathways to food production world wide.

Credit 3 units. A&S: SS, WI A&S IQ: SSC, WI Art: SSC EN: S

L48 Anthro 4791 Archaeological Study of Social Complexity

A hallmark of anthropological theory is the idea that human societies evolve toward greater complexity or higher levels of organization through time. Yet accurately defining complexity or organization is such a difficult and frustrating undertaking that many people give up and fall back on an intuitive understanding, similar to Supreme Court Justice Potter Stewart's famous definition of pornography: "I know it when I see it." But what exactly does it mean to be socially complex? How does complexity in human societies emerge and how is it perpetuated? How can we infer social complexity from the archaeological record? In this seminar we examine theoretical and methodological aspects of social complexity as investigated by archaeologists. By means of case studies drawn from around the globe and ranging from the earliest humans to the recent past, we seek to define, describe and understand the concept of social complexity and its manifestations in diverse societies at different times.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4792 The Many Paths Leading Toward the Creation of the Ancient City

The purpose of this class is to examine the emergence of the Ancient City across the globe. We want to begin with the concepts of urbanism, city and metropolis. These are words whose derivation are to be found in the classical languages of the Mediterranean. Is there any means to reach an understanding of how other civilizations and societies characterized these special places on the landscape? In the past, many scholars have argued that market economies and state-level societies are essential to their existence. Such arguments reflect issues of sustainability in terms of the economy and the effective control of large populations through state-level institutions. While we want to understand the role of the economy and the level(s) of political integration involved in

the process of urbanism, are there other cultural institutions such as religion that play a much larger and more significant role? Do these places reflect the "citizens" perception of the cosmos?

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4803 Advanced GIS Modeling and Landscape Analysis

The aim of this course is to learn to analyze archaeological data in terms of its spatial layout, geography, ecology, and temporal dynamics, using Geographic Information Systems and associated computer modeling techniques. A focus is placed on the relationship between natural environments, cultural geography, and the mapping of archaeological landscapes, and on the archaeologist's ability to accurately recover, reconstruct and analyze this relationship in a virtual environment.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 481 Zooarchaeology

Methods and techniques of analysis of faunal remains recovered in archaeological context, including aging, sexing, and the study of cultural modification of archaeological faunas.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L48 Anthro 4851 Topics in Jewish Studies: Critical Issues in the Study of Popular Music

Consult Course Listings for current topic. Prerequisite: permission of instructor.

Same as JINE 485

Credit 3 units. A&S: TH EN: H

L48 Anthro 4881 Medicine and Anthropology

Explores the fundamental relationship of anthropology to the art and science of medicine. Emphasis on the impact of anthropology on current modes of biomedical research; alternative systems of health and healing; role of anthropologist in biomedicine and public health; critical medical anthropology; anthropology and epidemiology. Prerequisite: junior standing.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 4882 Anthropology and Public Health

Anthropological approaches to public health practice and research; role of anthropology in public health systems; cross-cultural public health research; community vs. institutional bases of public health advocacy.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: ETH

L48 Anthro 4883 The Political Economy of Health

This course reviews social science contributions to understanding health as a function of political and economic influences. Considers the ways in which personal health is affected by macrosocial processes. Examines effects of globalization, international development and political instability on the health of individuals. Examples drawn from the United States and international contexts. Prerequisite: junior standing or above.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 4884 Anthropology of Sexually Transmitted Infections

Sexually transmitted infections (STIs) continue to exert a major toll on developed and developing countries alike. Systems for

STI surveillance, control and prevention help limit the spread of these infections, but they are often incompletely implemented due to political or financial barriers. This seminar addresses the biological, cultural and political dimensions of STIs in local, national and global contexts. Issues include viral vs. bacterial STIs, chemotherapy and prophylaxis, sociocultural factors of STI epidemiology, structural aspects of partner management, and transnational STI control and prevention. Prerequisite: prior course work in medical anthropology, graduate standing or permission of the instructor.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4885 Senior Seminar: Medicine and Society

This course provides a forum for graduating seniors in the Medicine and Society Program to reconvene for a semester of facilitated discussion about issues related to illness, healing and culture. Prerequisites: Students must be seniors in good standing in the Medicine and Society Program.

Credit 1 unit. A&S IQ: SSC EN: S

L48 Anthro 489 Seminar: Pathways to Domestication

Survey of the evidence of the domestication of plants and animals, focusing on processes leading to domestication, and on the recognition of pristine features of domestication in the archaeological record. Prerequisite: one 300- or 400-level course in archaeology.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 4892 Hunter-Gatherer Socioeconomic Variation

This class explores the nature and extent of variation in hunter-gatherer socioeconomic systems as documented in the literature on recent hunter-gatherers, and in the archaeological record of the past 20,000 years. We discuss Woodburn's concept of delayed return hunter-gatherers, Testart's writing on hunter-gatherer socioeconomic organization, and archaeological concepts of simple and complex hunter-gatherers. We examine case studies of both delayed and immediate return hunter-gatherers from the Americas, Asia, Africa and Australia and emphasize understanding underlying reasons for differences between groups, and implications of differences for patterns of cultural change, including the adoption of food production.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 489W Seminar: Pathways to Domestication

The origins of agriculture led to one of the most important transitions in human history, continuing to fascinate anthropologists and all who depend on farmers for food. We examine evidence for the development and spread of settled and mobile farming systems in diverse regions of the world. We discuss old and new theoretical approaches and apply increasingly sophisticated methods for recovering and interpreting the evidence. Recent research puts us in a better position than ever before to understand the preconditions, processes, and possibly the causes of domestication and the spread of food production. This course is the WI version of Anthro 489 Seminar: Pathways to Domestication.

Credit 3 units. A&S: SS, WI A&S IQ: SSC, WI EN: S

L48 Anthro 490 Anthropological Research

Designed to give undergraduates research experience in various subdisciplines of Anthropology. May be taken more than once for credit. Prerequisite: permission of faculty member under whom the research will be done.

Credit variable, maximum 3 units. A&S: SS A&S IQ: SSC Art: SSC

L48 Anthro 491 Advanced Anthropological Research

Limited to those students who have successfully completed Anthro 490 and have a qualifying continuing research project. Prerequisites: Anthro 490 and permission of the faculty member supervising the continuing research project.

Credit variable, maximum 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L48 Anthro 4911 Methods in Molecular Anthropology

We learn techniques used in molecular genetics and their application to studying the evolution and adaptation of human and nonhuman primates. This course covers DNA extraction from biological materials (e.g., buccal cells from cheek swabs, potentially also fecal samples from the primates at the zoo), primer design and polymerase chain reaction (PCR) to amplify a region of interest (student lead, with guidance) from isolated DNA. Use of gel electrophoresis to visualize and purify PCR products and sequencing reactions to view nucleic acid structure also are conducted. We also have a lecture on introductory bioinformatics. Throughout the course, we discuss the mechanisms underlying these techniques, why they work and how to troubleshoot problems. Students are expected to submit lab reports and to engage in peer review of others' lab reports. Finally, we discuss how molecular methods inform anthropological research. Students are also expected to take online safety training modules through EH&S.

Credit 3 units. A&S: NS A&S IQ: NSM

L48 Anthro 4951 Senior Honors Research

Limited to students who have qualified for the Anthropology honors program and who are conducting research for an honors thesis. Prerequisites: permission of the Anthropology faculty member supervising the honors research, and concurrent filing of notification with the Anthropology senior honors coordinator. Credit variable, maximum 3 units.

L48 Anthro 4961 Senior Honors Thesis

Limited to students who have qualified for the Anthropology honors program and who are actively engaged in writing a senior honors thesis. Prerequisite: permission of the Anthropology senior honors coordinator.

Credit variable, maximum 3 units.

L48 Anthro 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories

Same as Art-Arch 4975

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L48 Anthro 4999 Capstone Experience

The Department of Anthropology offers several options for completing a capstone experience, which is recommended by the College of Arts & Sciences. One option is for students in any 400-level course in the department to secure permission of the instructor to simultaneously enroll in Anthro 4999. The instructor and student develop an individualized plan for expanding the normal content of the selected 400-level course into a capstone experience. Prerequisite: junior or senior standing. Enrollment requires permission of the department and the instructor.

Credit 1 unit.

Arabic

The Department of Jewish, Islamic and Near Eastern Languages and Cultures offers a major and a minor in Arabic. As majors in Arabic, students can expect to gain proficiency in the language, study the area's literary and cultural landmarks, and gain familiarity with Near Eastern history and civilizations.

Language Placement: Placement tests are required for all students entering our language programs. Students may be eligible for up to 6 units of back credit based on advanced placement and successful completion of the recommended course. Native speakers are not eligible for back credit; evidence of secondary or post-secondary study of the language is required. Any units received from back credit cannot be counted toward the major or minor.

Phone: (314) 935-5110 or (314)
935-8567

E-mail: artsci-jinelc@wustl.edu

Departmental website: <http://jinelc.wustl.edu>

Faculty

For a list of affiliated faculty, please visit the Department of Jewish, Islamic and Near Eastern Languages and Cultures (p. 586) faculty page.

Majors

The Major in Arabic

Prerequisites

- Arabic language study: Beginning Arabic I (Arab 107D), Beginning Arabic II (Arab 108D), Intermediate Arabic I (Arab 207D), Intermediate Arabic II (Arab 208D) — whether by course work or placement

Required courses (30 Units)

- Introduction to Islamic Civilization (JINE 210C)
- History, Text and Identity: Introduction to Jewish Civilization (JINE 208F)
- 12 units from 300- or 400-level Arabic language courses
- 6 units from 300- or 400-level courses in Islamic studies and Arabic literature and culture
- 3 additional elective units at the 300 or 400 level in Jewish, Islamic and Near Eastern Studies
- Arab 4001 Capstone Seminar

Senior honors

- Arab 488, Arab 489 + thesis. (A student must take capstone even when writing a senior honors thesis).

Additional Information

Regulations for language and culture majors

- Two semesters of the field language must be taken at Washington University.
- 300- or 400-level courses of a language may be counted toward the major.
- A maximum of 12 units from 300- or 400-level language courses can be counted toward the major.
 - Note that 300- or 400-level courses that include the study of texts in the original language may be considered courses about history, literature or religious studies rather than language courses.
- Back credit granted for language courses does not count for the major.
- Students enrolled in WUSTL study abroad programs (during the regular academic semester) can earn a maximum of 9 units subject to review by adviser and DUS. Summer programs and transfer courses can be granted as much as 6 units subject to review by adviser and DUS. However, a limit of 9 units in total can be applied to the major, whether the units are earned in study abroad, summer programs, or transfer courses.
- No credit will be given for courses taken outside the department other than those which are cross-listed.
- A minimum of 27 units is required for the major; 21 of those must be from 300- or 400-level courses.
- Double counting courses: A maximum of 3 units used for the major can be counted toward another major or minor.
- To be eligible for Senior Honors a student must maintain a GPA of 3.65 through the sixth semester.
- A Capstone Seminar may be taken in junior or senior year.
- Students have to maintain an average of B in all courses for the major. A grade of B– must be earned in each language course in order to advance to the next level.
- No pass/fail course can count toward either prerequisites or major.

Study Abroad: Students majoring in Arabic are encouraged to participate in the Washington University Study Abroad program. The university currently sponsors preapproved programs of study at the Hebrew University in Jerusalem, the University of Haifa, Aalim Arabic Program in Morocco, Boğaziçi University in Istanbul, and the American University of Cairo. Students may enroll in summer programs anytime at their discretion; however, semester abroad is usually during the junior year and after a minimum of one year of language study at Washington University.

Senior Honors: Jewish, Islamic and Near Eastern Studies majors who have a cumulative GPA of 3.65 or higher after six semesters are eligible to apply for candidacy for departmental senior honors. Once they receive departmental approval,

candidates must satisfactorily complete a senior honors thesis in order to be considered for departmental honors. Please visit the department web page for further information and requirements at <http://jinelc.wustl.edu/undergraduate/senior-honors-guidelines-and-evaluation-form>.

Minors

The Minor in Arabic

Prerequisites

- Beginning Arabic I (JINE 107D), Beginning Arabic II (JINE 108D) — whether by course work or placement

Required courses (18 Credits)

- Introduction to Islamic Civilization (JINE 210C)
- 9 units from 200-, 300-, or 400-level courses in Arabic language
- 6 units from 300- or 400-level courses in Islamic studies and Arabic literature and culture.

Additional Information

Regulations for all language and culture minors

- Two semesters of the language must be taken at Washington University.
 - No more than 12 credit units can be from language courses.
 - Note that 300- or 400-level courses that include the study of texts in the original language may be considered courses about history, literature or religious studies rather than language courses.
- Preapproved WUSTL study abroad programs during the regular academic semester, summer programs, and transfer courses can earn a maximum of 3 credits subject to review by adviser and DUS.
- Back credit granted for language courses does not count for the minor.
- No credits will be given for courses taken outside the department other than those which are cross-listed.
- A minimum of 18 credits is required for the minor.
- Double counting courses: A maximum of 3 credits used for the minor can be counted for another major or minor.
- Students have to maintain an average of B for the minor. A grade of B– must be earned in each language course in order to advance to the next language course.
- No pass/fail course can count toward either prerequisites or the minor.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L49 Arab.

L49 Arab 107D Beginning Arabic I

Introduction to modern Arabic; concentrates on rapidly developing basic skills in reading, writing, speaking and understanding. Five class hours, including one culture hour and additional drill or laboratory hours. Students with previous Arabic language background must take a placement examination. Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L49 Arab 108D Beginning Arabic II

Continuation of Arab 107D. Emphasis on enhancing skills in reading, writing, speaking and aural comprehension of modern Arabic. Prerequisite: grade of B– or better in Arab 107DQ or placement by examination. Five class hours a week with additional drill or laboratory hours arranged by instructor. Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L49 Arab 207D Intermediate Arabic I

Study of grammar of literary Arabic and reading of annotated classical and modern prose texts; elementary composition; practice in speaking and comprehending modern Arabic. Prerequisite: grade of B– or better in Arab 108DQ or placement by examination. Five class hours a week with additional drill or laboratory hours set by instructor. Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L49 Arab 208D Intermediate Arabic II

Continuation of Arab 207D. Study of grammar of literary Arabic and reading of annotated classical and modern prose texts; elementary composition; practice in speaking and comprehending modern Arabic. Prerequisite: grade of B– or better in Arab 207D or placement by examination. Five class hours a week with additional drill or laboratory hours arranged by instructor. Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L49 Arab 210F Introduction to Islamic Civilization

A historical survey of Islamic civilization in global perspective. Chronological coverage of social, political, economic and cultural history are balanced with focused attention to special topics, which include: aspects of Islam as religion; science, medicine and technology in Islamic societies; art and architecture; philosophy and theology; interaction between Islamdom and Christendom; Islamic history in the Middle East, South Asia, Southeast Asia, and Central Asia as well as Africa; European colonialism; globalization of Islam and contemporary Islam. Same as JINE 210C
Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM BU: ETH, IS

L49 Arab 3062 Islam, Culture and Society in West Africa

This course explores the introduction of Islam into West Africa beginning in the 10th Century and explores its expansion and development in the region, placing emphasis on the 19th century to present day. It focuses on the development of West African Muslim cultural, social, religious and political life, to understand not only how the religion affected societies, but also how West African local societies shaped Islam. The course also aims to introduce students to a critical understanding of Islamic writing in West Africa. It also examines the organization of Muslim Sufi orders in West Africa through time and space. The course is organized around a series of lectures, readings, as well as print and visual media.
Same as AFAS 3062

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Arch: SSC Art:
SSC BU: IS EN: S

L49 Arab 307D Advanced Arabic I

Continuation of Arab 208D. Competence in reading, writing, speaking, listening and culture is developed through intensive exposure to classical and modern standard Arabic in its written and audiovisual forms. Prerequisite: grade of B- or better in Arab 208D or placement by examination. Three class hours a week with one additional laboratory hour as assigned by instructor. Credit 4 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS EN: H

L49 Arab 308D Advanced Arabic II

A continuation of Arab 307D. Continued integration of language development through reading, writing, speaking and listening activities centered on advanced authentic material. This semester proves critical for making the transition from Modern Arabic to Classical Arabic, including Qur'anic Arabic. Continued development of colloquial Arabic. Prerequisite: Arab 307D or equivalent. Credit 4 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L49 Arab 313C Islamic History: 600-1200

The cultural, intellectual, and political history of the Islamic Middle East, beginning with the prophetic mission of Muhammad and concluding with the Mongol conquests. Topics covered include: the life of Muhammad; the early Muslim conquests; the institution of the caliphate; the translation movement from Greek into Arabic and the emergence of Arabic as a language of learning and artistic expression; the development of new educational, legal and pietistic institutions; changes in agriculture, crafts, commerce and the growth of urban culture; multiculturalism and inter-confessional interaction; and large-scale movements of nomadic peoples. Same as History 313C

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: IS

L49 Arab 3149 The Late Ottoman Middle East

This course surveys the Middle East in the late Ottoman period (essentially the 18th and 19th centuries, up to the First World War). It examines the central Ottoman state and the Ottoman provinces as they were incorporated into the world economy, and how they responded to their peripheralization in that process. Students focus on how everyday people's lived experiences were affected by the increased monetarization of social and economic relations; changes in patterns of land tenure and agriculture; the rise of colonialism; state efforts at modernization and reform; shifts in gender relations; and debates over the relationship of religion to community and political identity.

Same as History 3149

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD BU: IS EN: H

L49 Arab 325 Introduction to Arabic Literature

A survey of the major genres and themes in Arabic literature from the pre-Islamic era to the modern period. Texts include pre-Islamic, classical and Sufi poetry, as well as popular tales and critical prose from the Umayyad and Abbasid empires and Andalusia. The modern sections of the course interrogate political commitment in Arabic literature and introduce students to feminist and magical realist novels from North Africa and the Levant. All readings are in English translation.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L49 Arab 329C Middle Eastern Islamic Literatures in Translation

This course studies, in English translation, several great works of Islamic literature that still influence or reflect the ways in which we perceive Islamic culture today. We critically consider great and disparate literary works, originally written in a variety of languages including Arabic, Turkish and Persian and stretched from Spain to India, that share the common backdrop of an urban and educated milieu in which they were produced, widely read and circulated. The course aims at exploring the literary cultures in their historical and social context. Possible themes include court literature, politics, Sufi literature, history, theology and literature of romance. All readings are in English.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L49 Arab 352 Iraqi Literature

This course introduces students to major works in Iraqi literature in the 20th and 21st centuries, with a focus on the post-World War Two period up to the present day.

Credit 3 units. A&S: TH A&S IQ: HUM BU: IS EN: H

L49 Arab 355C The Flowering of Islamic Literature, 500-1200

Same as Comp Lit 355C

Credit 3 units. A&S: TH, CD Art: HUM BU: HUM

L49 Arab 361 City of Peace: Baghdad in Medieval Times (ca. 762-1250)

Same as JINE 361

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L49 Arab 395 Topics in Religion and Politics: Islam and Muslims in the United States

This course examines the history of Islam and Muslims in the United States, from the earliest days of the country's founding to the contemporary everyday life of Muslims in the U.S. From the arrival of West African Muslims to the Americas during the Atlantic slave trade and the Founding Fathers' discussion of a Muslim president to Malcolm X, the Nation of Islam, Muslim Students Associations, and grocery stores, the course traces individual, communal, and institutional histories of American Muslim encounters and experiences. Studies of religion, history and anthropology are examined with literature, music, films and new media toward an interdisciplinary investigation of how Islam as a religion and worldview is represented, practiced and lived, intersecting with race, gender, class, sexuality, diaspora, politics and citizenship in an American and global landscape.

Same as RelPol 395

Credit 3 units. A&S: TH A&S IQ: HUM Arch: HUM Art: HUM EN: H

L49 Arab 4001 Capstone Seminar

The capstone course for Jewish, Islamic, & Near Eastern Studies majors, Arabic majors, and Hebrew majors. The course content is subject to change.

Same as JINE 4001

Credit 3 units. A&S IQ: HUM

L49 Arab 4041 Islam and Politics

Blending history and ethnography, this course covers politics in the Islamic world in historical and contemporary times. Topics include history of Islam, uniformity and diversity in belief and practice (global patterns, local realities), revolution and social change, women and veiling, and the international dimensions of resurgent Islam. Geographical focus extends from Morocco to Indonesia; discussion of other Muslim communities is included (Bosnia, Chechnya, sub-Saharan Africa, U.S.). Same as Anthro 4041

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC BU: IS

L49 Arab 405 Colloquial Arabic

The aim of this course is to introduce the students to colloquial Arabic through their knowledge of Modern Standard Arabic (MSA). We focus on the main differences between colloquial and MSA so that the students can use the colloquial form for practical purposes in everyday life. Prerequisite: Arab 208D or instructor's permission.

Credit 3 units. A&S: LA A&S IQ: LCD BU: IS EN: H

L49 Arab 407 Fourth-Level Arabic I

Focused reading and discussion of classical and modern texts centered on selected topics in Arabic literature, poetry and media. Continued development of oral, aural and writing skills. Students' interests are taken into consideration before finalizing the selection of texts. Practice in writing and grammar. Prerequisite: grade of B- or better in Arab 308D or placement by examination.

Credit 3 units. A&S: LA A&S IQ: LCD, LS Art: HUM BU: IS EN: H

L49 Arab 408 Fourth-Level Arabic II

Readings and discussion in Arabic of selected classical texts. Students' interests are taken into consideration before finalizing the selection of texts. Practice in writing and grammar. Continued development of colloquial Arabic.

Credit 3 units. A&S: LA A&S IQ: LCD, LS Art: HUM BU: IS EN: H

L49 Arab 450 Topics in Classical Arabic Literature and Culture

Exploration of medieval Arabic Belles-Lettres (Adab). All texts read in Arabic. Prerequisite: senior standing.

Credit 3 units. A&S: TH Arch: HUM Art: HUM BU: IS

L49 Arab 451 Topics in Modern Arabic Literature and Culture

Credit 3 units. A&S: TH A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: HUM

L49 Arab 464 Arabic Textual Analysis

This course introduces the advanced student of Arabic to a variety of prose narratives in the modern language. Readings, which include literary texts and topical essays on aspects of Arabic society and culture, reflect the needs and interests of the enrolled students.

Credit 3 units. A&S: TH A&S IQ: HUM, LCD, LS Art: HUM EN: H

L49 Arab 465 Topics in Arabic

This course is an in-depth study of a particular segment of Arabic literature and/or culture.

Credit 3 units. A&S: TH A&S IQ: HUM, LCD Arch: HUM Art: HUM EN: H

L49 Arab 4675 Beyond the Harem: Women, Gender and Revolution

This course examines the history and current situations of women in Middle Eastern societies. The first half of the course is devoted to studying historical changes in factors structuring women's status and their socio-political roles. The second half of the course focuses on several case studies of women's participation in broad anti-colonial social revolutions and how these revolutions affected the position of women in those societies. Evaluation of students encourages their participation, analytical engagement, and improvement throughout the term. Same as History 4675

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD BU: BA EN: H

L49 Arab 470 Topics in Classical Arabic Literature in Translation

Various themes in Arabic religious literature and Belles-Lettres (Adab), e.g., the intertwining of religion and politics, court culture and fashions, social critiques, gender roles, etc., are read in English.

Credit 3 units. Arch: HUM Art: HUM BU: ETH

L49 Arab 471 Topics in Modern Arabic Literature in Translation

Modern Arabic narratives read in English translation foregrounding themes such as the conflict between tradition and modernity, civil war, poverty, alienation, religion and politics, and changing gender roles.

Credit 3 units. A&S: TH A&S IQ: HUM, LCD Arch: HUM Art: HUM BU: ETH

L49 Arab 488 Independent Work for Senior Honors

This course to be taken in the fall semester. Prerequisites: senior standing, eligibility for honors, and permission of the department. Credit 3 units.

L49 Arab 489 Independent Work for Senior Honors

This course to be taken in the spring semester. Prerequisite: senior standing, eligibility for honors, and permission of the department.

Credit 3 units.

L49 Arab 497 Guided Readings in Arabic

Prerequisites: senior standing and permission of instructor and department chair.

Credit variable, maximum 5 units. A&S: LA

L49 Arab 498 Guided Readings in Arabic

Prerequisites: senior standing and permission of the instructor and the department chair.

Credit 3 units. A&S: LA

Archaeology

Archaeology provides the opportunity to investigate the material remains of past societies and cultures and the methods by which they are recovered, analyzed, interpreted and reconstructed.

Archaeologists investigate the entire human past from the first evidence of tool use 2.5 million years ago to historical studies as recent as the 20th century. To provide a comprehensive understanding of archaeology, the department emphasizes two approaches: the humanistic, which is represented by classical archaeology, and the social scientific, which is represented by anthropological archaeology.

Archaeology students will encounter a range of specialties within the field, from topical studies, such as prehistoric pastoralism, hunter-and-gatherer societies, Mayan archaeology, or Greek and Roman archaeology, to methodological approaches such as historical archaeology, ethnoarchaeology, zooarchaeology, paleoethnobotany, geoarchaeology, geographic information systems (GIS) and radiometric dating. A strength of this institution in anthropological archaeology is the focus upon biologically based studies (paleoethnobotany, zooarchaeology and GIS) to investigate such questions as the origins of food production or complex societies. The strength of the classical archaeological program capitalizes on ancient documents in investigating the more recent Eurasian human past.

While acquiring basic training in archaeology, students may choose to concentrate on a specific region, such as the Eastern Woodlands of the United States, the Andes, Mesoamerica, Africa, Central Asia, China or the Mediterranean world. Ancient and/or modern languages, as well as history and art, are essential for some areas of study. Students, in conjunction with their advisers, can identify a specialized set of courses that meet their goals.

Washington University archaeology faculty members are involved in research projects in many regions, such as Central Asia, Northern Africa, Greece, the Andes, the Mayan area, New Mexico and the Mississippi River valley. With a degree in archaeology, a graduate can work in academia, private consulting firms, government conservation and compliance agencies, and museums. Academic and museum positions generally require graduate-level training.

Majors

The Major in Archaeology

Total units required: 27

Required courses:

ARC 190B	Introduction to Archaeology	3
ARC 200C	World Archaeology: Global Perspectives on the Past	3

Elective courses:

The major requires 21 advanced (300-/3000- or 400-/4000-level) units in addition to the two introductory courses. These 21 advanced units should be distributed from the offerings in anthropological and classical archaeology. All majors must complete a supervised archaeological field school of six weeks or the equivalent, approved by the departmental director.

Additional Information

Internships/Research: The hands-on experience of archaeological fieldwork is particularly attractive to many students. Undergraduate majors in archaeology will complete at least one supervised field project, which is selected to best meet the student's long-term goals. Most field research projects are small, which allows students to work closely with faculty and staff. Recently, students have worked at excavations in such diverse areas as Ireland, France, Kazakhstan, Greece, Israel, China, Japan, Guatemala, Bolivia, the U.S. Southwest, and Cahokia, Illinois. Students focusing on North American archaeology often take an internship at one of the local private firms to gain experience in contract archaeology. Undergraduate participation in research is encouraged particularly for students working on Senior Honors theses.

Senior Honors: Archaeology majors are encouraged to work for Senior Honors, for which students may apply in the junior or senior year. Acceptance into the program is based on previous academic performance, a proposal accepted by an archaeology faculty member who agrees to supervise the honors research, and approval of the Archaeology program director. The Honors thesis will be evaluated by a three-member faculty committee.

Study Abroad: In addition to field schools in the summer, many students also opt to take a semester abroad, particularly those focusing in classical archaeology.

Minors

The Minor in Archaeology

Units required: 15

Required courses: The minor in the interdisciplinary program in Archaeology requires completion of 15 course credits. The minor should include one of the two introductory courses (ARC 190B Introduction to Archaeology and ARC 200C World Archaeology:

Global Perspectives on the Past), and at least 12 advanced units from 300- and 400-level courses.

Additional Information

The archaeology minor is usually fulfilled by a concentration in either the humanistic or in the social science areas. Thus, the minor will satisfy the Textual and Historical Studies distribution area or the Social Sciences distribution area, depending on which courses the minor includes.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L52 ARC.

L52 ARC 130 Freshman Seminar: The Ritual Landscape of Cahokia: Perspectives on the Politics of Religion and Chiefly Power

The purpose of this class is to engage and challenge freshman students in an open discussion about the prehistoric Mississippian community of Cahokia. The focus of this course is two-fold. The first is to study the way in which the archaeological evidence has been interpreted. The second is to examine other perspectives on Cahokia, especially from the Native American descendants who consecrated this landscape nearly a millennium ago. An underlying tenet of this seminar in understanding Cahokia can also be achieved through the traditions and literature of Native Americans. In the end we want to understand the basis for Cahokia's organization as a prehistoric Native American community, and the role that ritual and religion played in the rather dramatic and dynamic history of this community and the surrounding region.

Same as Anthro 130

Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC BU: HUM

L52 ARC 190B Introduction to Archaeology

Archaeology plays a critical and unique role in understanding the human past. Through study of the methods and theories of archaeology, and a survey of important firsts in the human past, this course introduces students to the way archaeologists use material culture to reconstruct and understand human behavior. Chronologically ordered case studies from around the globe are used to look at social, ecological and cultural issues facing humans from the earliest times to the present. Students gain practice reconstructing the past through hands-on participation in two one-hour labs focusing on lithics and animal bones. By the end of the course, students are expected to be able to think critically about how the past is presented, and why, and the importance of the past as it relates to the present and future.

Same as Anthro 190B

Credit 3 units. A&S: SS A&S IQ: SSC Arch: SSC Art: SSC BU: BA EN: S

L52 ARC 200C World Archaeology: Global Perspectives on the Past

If we carefully peer beneath the earth's surface, we discover a hidden world that is being rediscovered by archaeologists. A considerable amount of excitement is generated by the discovery of lost civilizations and societies. Archaeologists from every corner of the earth come to Washington University to share their

experiences as they use the most sophisticated technology to rediscover those forgotten and sometimes embarrassing aspects of our human past.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: IS

L52 ARC 212 Archaeological Fantasies and Hoaxes

American popular culture is saturated with pseudoscientific and fictionalized accounts of archaeological discoveries and interpretations. How can students of the past distinguish between fraud, fantasy, hype, and valid archaeological research? What potential merit do films, TV-oriented documentaries, and historical fiction offer? What role has racism played in attempts to deny indigenous peoples credit for their past achievements? This course looks at the popular culture of archaeology, providing tools for critical evaluation as well as lifetime enjoyment of the field as it is frequently sold to both the informed and the unwary public. Anthropology majors and non-majors are all welcome as are sophomores and motivated first-year students who have not yet declared majors.

Same as Anthro 212

L52 ARC 3053 Nomadic Strategies and Extreme Ecologies

This course explores the archaeology and anthropology of nomadic pastoral societies in light of their ecological, political and cultural strategies and adaptation to extreme environments (deserts, mountains, the arctic). The aim of the course is to understand both the early development of pastoral ways of life, and how nomads have had an essential role in the formation and transfer of culture, language and power from prehistoric time to the current era.

Same as Anthro 3053

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA, IS EN: S

L52 ARC 310C Ancient Civilizations of the New World

An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico, through the inquiry into the roots, development, form, and evolutionary history of pre-Columbian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments are presented and discussed.

L52 ARC 3163 Archaeology of China: Food and People

China is a country with a large population, diverse landscapes, and unique food. This course explores the origins of Chinese food in the context of the formation of Chinese societies. During the last two decades, the archaeology of China has become a fast-moving subject with advances in methods, theories and changes of key perceptions. In this context, the beginning and spread of food production in China has become one of the key questions in current archaeology. We focus on the process of domestication of plants and animals in various regions of China during the Holocene. We explore how those processes relate to other sectors of the Old World, such as those of South and Southwest Asia. This course pursues answers to the following questions: Why are the Chinese ways of living and eating different from those in the West? How were production and consumption in China shaped by food globalization in prehistory?

Same as Anthro 3163

Credit 3 units. A&S: SS, CD A&S IQ: SSC BU: IS EN: S

L52 ARC 3182 Ancient Africa: Social Mosaics and Environmental Challenges

This class introduces students to the basics of the archaeological record of humans in Africa from 3.6 M.Y. to 1000 years ago. The first third of the course focuses on early humans, the origins of meat eating, expansion of diet and cuisine, technical and cultural responses to changing environments. The second section of the course emphasizes African rock art, socio-economic variability among hunter-gatherers, the origins of African pastoralism, mobile responses to climate change and African contributions to world food supply including domestication of sorghum, also coffee. The last third of the course is devoted to the complex urban societies of ancient Africa, Egypt, Axum, Great Zimbabwe, and Jenne Jenne. Course format is lecture and discussion. There are two mid-terms and students are expected to participate in interactive stone tool use, rock art creation, and discussion of ethnographic and archaeological data on pastoral decision-making in times of drought and war and of issues surrounding the purchase of African antiquities and conservation of cultural heritage.

L52 ARC 334 Roman Art and Archaeology

The art and archaeology of the Romans, with emphasis on the late Republic and the Imperial period. Major monuments of sculpture and architecture, as well as town planning, domestic architecture, and the minor arts are used as evidence for reconstructing ancient life.

Same as Art-Arch 334
Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM

L52 ARC 3351 The Ancient Maya: Archaeology and History

This course focuses on the ancient Maya civilization because there are many exciting new breakthroughs in the study of the Maya. The Olmec civilization and the civilization of Teotihuacan in the Valley of Mexico are considered as they related to the rise and development of the Maya civilization. The ancient Maya were the only Pre-Columbian civilization to leave us a written record that we can use to understand their politics, religion and history. This course is about Maya ancient history and Maya glyphic texts, combined with the images of Maya life from their many forms of art. The combination of glyphic texts, art and archaeology now can provide a uniquely detailed reconstruction of ancient history in a New World civilization.

Same as Anthro 3351

L52 ARC 3617 Past and Present Cultural Environments

Human societies are situated within and interact with their ecological and environmental systems. Even social relationships within and between groups imply spatial relationships and geographic orientation, advantages, influence and limitations. Beyond subsistence, environment and the "natural world" play an integral role in how humans pattern the landscape, structure society, develop their world view, and, in turn, alter and adapt the world in which they live. This upper-division undergraduate and graduate seminar course introduces students to anthropological conceptions of human-environmental relationships, past and present. Topics include environmental and landscape archaeology; historical, political, and human behavioral ecology; world view and conceptualizations of nature; human adaptation, resilience theory, and niche construction; anthropological case studies; the intersections of humans, animals and the environment; and end with environmental politics.

Same as Anthro 3617
Credit 3 units. A&S: SS A&S IQ: SSC EN: S

L52 ARC 3693 Anthropology of Death, Mourning and Burial

This course offers anthropological analysis of death, mourning and burial. It draws on data and theoretical explanations from different sub-disciplines of anthropology (archaeology, cultural anthropology, and physical anthropology). In addition to theoretical conceptualization of mortuary practices, specific case studies are used to address a wide range of topics. The course covers cross-cultural comparison of burial among hunter-gatherers, pastoralists and complex societies. Mortuary practices also are conceptualized based on religion and secularity, social organization and biological approaches (e.g., paleodiet, paleodemography, disease). Ethical and legal issues of using human remains worldwide also are addressed. This course helps train and stimulate academic enquiry into ancient and modern societal treatment of death around the globe. The time covered in this course ranges from the Lower Palaeolithic to the contemporary world.

L52 ARC 372 Geoarchaeology

Geoarchaeology involves the application of analytical techniques, concepts, and field methods from the earth sciences to help solve archaeological problems. Issues explored in this course include human and environmental processes involved in archaeological site formation, the sedimentary context of archaeological remains, soils and sediments relevant to archaeology, the relationship between past settlement and landscape evolution, paleoclimatic reconstruction, human impacts on the environment, geological sourcing of artifact proveniences, and remote sensing of the physical environment. Several field trips to local archaeological/geological sites provide an opportunity to understand how geoarchaeology is applied to specific research problems.

L52 ARC 374 Social Landscapes in Global View

From the beginning of the human campaign, societies have socialized the spaces and places where they live. This socialization comes in many forms, including the generation of sacred natural places (e.g., Mt. Fuji) to the construction of planned urban settings where culture is writ large in overt and subtle contexts. Over the past two decades or so, anthropologists, archaeologists and geographers have developed a wide body of research concerning these socially constructed and perceived settings — commonly known as "landscapes." This course takes a tour through time and across the globe to trace the formation of diverse social landscapes, starting in prehistoric times and ending in modern times. We cover various urban landscapes, rural landscapes, nomadic landscapes (and others) and the intersection of the natural environment, the built environments and the symbolism that weaves them together. Chronologically, we range from 3000 BCE to 2009 CE and we cover all the continents. This course also traces the intellectual history of the study of landscape as a social phenomenon, and investigates the current methods used to recover and describe social landscapes around the world and through time. Join in situating your own social map alongside the most famous and the most obscure landscapes of the world and trace the global currents of your social landscape!

L52 ARC 376 Warriors, Merchants, Monks and Courtesans: Ancient Narratives of Globalization in Google Earth

This introductory seminar-style course examines the history of globalization through the narrative accounts of those who lived along some of the great trade routes of the Old World. Through a combination of in-class discussion and hands-on tutorials and projects in Google Earth, we examine how day-to-day local interactions and the experiences of individuals contributed to broader cultural exchanges and the shaping of ancient cosmopolitan centers. We use a bottom-up approach to understand the process of globalization, and why it is not only a phenomenon of the modern world. This course covers a large geographic and temporal span, but it is not about memorizing lists of dates and places or putting dots on a map — it is about learning how to interpret multiple strands of knowledge and put them together into a cohesive narrative of history. The course covers four broad anthropological themes related to Old World history and globalization in conjunction with weekly lessons in Google Earth; there are no prerequisites for either. The knowledge and skills gained in the course lead to a final independent research project consisting of a short paper and an interactive digital map that can be shared online through the Google Earth community.

L52 ARC 3775 Ancient Eurasia and the New Silk Roads

This course explores the rise of civilization in the broad region of Eurasia, spanning from the eastern edges of Europe to the western edges of China. The focus of the course is the unique trajectory of civilization that is made evident in the region of

Central Eurasia from roughly 6000 BC to the historical era (ca. AD 250). In addition to this ancient focus, the course aims to relate many of the most historically durable characteristics of the region to contemporary developments of the past two or three centuries. Fundamentally, this course asks us to reconceptualize the notion of "civilization" from the perspective of societies whose dominant forms of organization defied typical classifications such as "states" or "empires" and, instead, shaped a wholly different social order over the past 5000 years or more. This class provides a well-rounded experience of the geography, social organization, and social interconnections of one of the most essential and pivotal regions in world history and contemporary political discourse.

L52 ARC 379 Feast or Famine: Archaeology and Climate Change

This course examines the temporal, geographical and environmental aspects of past climate changes, and by using specific examples, explores how climate changes may have affected the evolution of human culture and the course of human history. Archaeological and documentary examples from the Americas, Africa, Asia, Europe and the Near East are used to explore if or how significant events in human history have been influenced by changes in climate.

L52 ARC 3932 Introduction to Archaeological Field Survey

The study and interpretation of the archaeological record begins in most instances with an archaeological survey. The purpose of this course is to provide students with an introductory level, hands-on experience to archaeological survey as practiced in eastern North America. This involves an introduction in the field to the various methods employed in the identification and mapping of archaeological sites. Students spend Saturdays in the field mapping and recording archaeological sites including the mapping of monumental earthworks such as those at the prehistoric site of Cahokia or nearby mound centers.

L52 ARC 403 Culture and History of the Southwestern United States

This course integrates archaeological, historical, and early ethnographic dimensions of American Indian societies in the southwestern United States and northwest Mexico, a region famous for its challenging environment, cultural diversity, and the contributions made by its Native inhabitants. Emphasis is placed on the development of sophisticated desert agriculture and on the rise of regionally integrated cultures including Chaco

Canyon and Mesa Verde. The impact of Spanish, Mexican, and American colonization are explored. Ethnographies of Tohono O'odham (Papago), Hopi, Zuni, Rio Grande Pueblo, and Navajo societies are discussed.

L52 ARC 420 Plundered Past: Archaeology's Challenges in the Modern World

The public imagination thrills at the fantastic adventures of Indiana Jones and Laura Croft, Tomb Raider; but the reality of modern archaeology is more complex, ethically challenging and interesting than a simple treasure hunt. In the U.S. and Canada, our science museums and museums of anthropology still display artifacts that are regarded as sacred and culturally definitive by Indian nations, although such holdings are now subject to negotiation and repatriation. Art museums in Europe and the U.S. are still stocked with looted ancient masterpieces that are revered as vital heritage by the nations from which they were stolen. We display looted art alongside a much smaller number of legitimately excavated artifacts of masterpiece quality, so it is no surprise that our popular images of archaeologists as avid and undiscerning collectors raise little concern. But modern archaeologists are not extractors of art or even of scientific information, from places as passive and inert as the museums' objects ultimately occupy. Archaeologists work with living people inhabiting societies and states that care deeply about their pasts and the relics of it. They are active agents engaged with many other people in the production of knowledge about the past. In our rapidly shrinking world, educated sensitivity to the many ancient cultural legacies that shape the values of modern global society is more than a moral imperative; it is a basic form of collaboration in the common project of survival. Archaeologists are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites, and information they occupy.

L52 ARC 426 Ancient Athens

Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agora (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of her material culture. These buildings and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. The course concentrates on the physical setting and monuments of Athens, as revealed by both archaeology and texts, and how they functioned within the context of Athenian civic and religious life. Prerequisite: Classics 345C, Classics 350 or permission of instructor.

L52 ARC 4285 Environmental Archaeology

This course intends to introduce students to lines of evidence used in the interpretation of past landscapes, how we can conceptualize the changing human ecological relations and how we can identify human influence on their environment. Special emphasis is placed on the human-animal-plant relations, with case studies from around the world. Combining both lecture and seminar sessions, this course aims to ensure that students are aware of several of the basic methods of bio-archaeological and palaeo-environmental reconstruction, and the application of these methods to the interpretation of past landscapes and human impacts on them.

L52 ARC 4393 The Archaeology of Trade and Exchange

Studies of trade and exchange are fundamental to our past, as cultures in contact result in new imaginings of self, communities, and place in the world. This course engages in archaeological and anthropological discussions about the interconnectedness that results from trade. This seminar concentrates on the discourse of material trade and the mechanisms for exchange, redistribution, dependency and resistance. It also examines the immaterial exchange of ideas, perceptions and values that alter concepts of identity, space and time. Globalization, political economies, and power are also addressed, along with ideas about territory, value, and social and political consequences of trade.

L52 ARC 4771 Out of the Wild: Domestication and Socioeconomic Diversity in Africa

The reason for the beginnings and spread of food production during the early Holocene in so many parts of the world is one of the most interesting questions in archaeology. It now seems likely that there are many different pathways to domestication. In Africa, there is a record of up to several million years of human existence as hunter-gatherers before some human populations adopted food production. Domestication of plants and animals about 10,000 years ago resulted in fundamental changes in human societies. It provided the basis for the increase in

settlement densities, specialization and social stratification, and general decrease in mobility and dietary diversity, characteristic of non-hunter-gatherer societies in the modern world. In this seminar, the class explores the phenomenon of domestication, and the spread of food production, surveying the evidence for manipulation and domestication of plant and animal species by prehistoric peoples in Africa. We focus on how and why domestication occurred, and factors that influenced its spread, and interactions between late hunter-gatherers and early pastoralists, and intersections with complex societies of the Nile. We also look at the contributions of Africa to understanding pathways to food production world wide.
Same as Anthro 4771
Credit 3 units. A&S: SS, WI A&S IQ: SSC, WI Art: SSC EN: S

L52 ARC 4791 Archaeological Study of Social Complexity

A hallmark of anthropological theory is the idea that human societies evolve toward greater complexity or higher levels of organization through time. Yet accurately defining complexity or organization is such a difficult and frustrating undertaking that many people give up and fall back on an intuitive understanding, similar to Supreme Court Justice Potter Stewart's famous definition of pornography: "I know it when I see it." But what exactly does it mean to be socially complex? How does complexity in human societies emerge and how is it perpetuated? How can we infer social complexity from the archaeological record? In this seminar we examine theoretical and methodological aspects of social complexity as investigated by archaeologists. By means of case studies drawn from around the globe and ranging from the earliest humans to the recent past, we seek to define, describe and understand the concept of social complexity and its manifestations in diverse societies at different times.

L52 ARC 489W Seminar: Pathways to Domestication

The origins of agriculture led to one of the most important transitions in human history, continuing to fascinate anthropologists and all who depend on farmers for food. We examine evidence for the development and spread of settled and mobile farming systems in diverse regions of the world. We discuss old and new theoretical approaches and apply increasingly sophisticated methods for recovering and interpreting the evidence. Recent research puts us in a better position than ever before to understand the preconditions, processes, and possibly the causes of domestication and the spread of food production. This course is the WI version of Anthro 489 Seminar: Pathways to Domestication.

L52 ARC 498 Intensive Writing Course: Archaeology

Designed for majors who have not satisfied their college writing requirement in another fashion. This course ordinarily is taken in tandem with another 300- or 400-level course in Archaeology, with the required permission to enroll granted by the instructor in that course. The student prepares a portfolio of papers, which undergo revision and rewriting, as assigned by that course instructor. In some cases, this writing-intensive course may be taken as an independent study course with one of the Archaeology professors. This latter option requires permission of both the department and the instructor. When the course is integrated with another 300- or 400-level course, credit is limited to 1 unit. If taken as an independent study course, credit is no more than 3 units. Permission of instructor required; limited to juniors and seniors.

Credit variable, maximum 3 units. A&S: SS, WI A&S IQ: SSC, WI Art: SSC EN: S

Art History and Archaeology

Art history provides the opportunity to explore the fine arts, architecture and visual culture, as well as the social, aesthetic and personal values that help shape it.

Students are introduced to the study of art history and archaeology through general introductory courses that focus on European, Asian and American art, as well as world archaeology. In more advanced courses, students enjoy studying original works of art owned by the Washington University Mildred Lane Kemper Art Museum, the Saint Louis Art Museum, the Pulitzer Foundation, and local private collectors. Students also are invited on annual field trips organized by the faculty to visit cities with major museum collections.

A variety of career paths are available to majors in art history and archaeology. Many graduates earn advanced degrees in both related and unrelated fields and work in museums or academia or for art publishers, commercial art galleries, auction houses, nonprofit organizations, and other arts-related organizations.

Majors

The Major in Art History and Archaeology

Total units required: 30 (33 for those students undertaking Senior Honors)

Required courses:

Art-Arch 111	Introduction to Asian Art (spring)	3
Art-Arch 113	History of Western Art, Architecture and Design (fall)	3

Total units **6**

*A score of 4 or 5 on the AP Art History exam may be substituted for Art-Arch 113. To substitute a 4 or 5 on the AP Art History exam, a student must earn at least a B in a related upper-division departmental course.

Elective credits:

24 upper-level (300-level or above) art history credits. (Students may substitute one 200-level course for one upper division course). One course at the 300-level or above is required in *three of the five* distribution areas: Ancient/Medieval, Renaissance/Baroque, European and American Modern, non-Western, and Architecture. Students undertaking honors complete 3 additional credits of independent study in the second semester of their senior year. All courses for the major must be taken for a letter grade.

Majors are encouraged to acquire a good reading knowledge of French, Italian or German. For a concentration in ancient Mediterranean art and archaeology or Medieval art, either Greek, Latin or both will be useful. Similarly, Chinese, Japanese, Hindi or Arabic, for example, will be useful for a concentration in non-Western art. Majors also are encouraged to take studio courses in art and/or architecture in the Sam Fox School of Design & Visual Arts.

Prerequisites: Students should have the proper prerequisites before enrolling in 300- or 400-level courses. Courses in other departments (including courses in the Sam Fox School of Design & Visual Arts) do not count for the major unless they are cross-listed as Art History and Archaeology courses.

Additional Information

Internships: Internships in the curatorial and education departments of local museums, arts organizations or commercial galleries are available to undergraduate art history and archaeology majors. Students may enroll in up to 6 credit hours of a voluntary internship, or secure a paid internship for no credit. Such internships provide invaluable experience and may help lead to employment opportunities after graduation. Internship credit may not be applied to the major but does count toward graduation.

Study Abroad: Students are encouraged to participate in a variety of international programs available in a number of overseas locations. Although students are strongly encouraged to acquire and use foreign languages, programs based in English also are available in most countries. Students may work with the department's Study Abroad adviser to find the program that best meets the student's particular interests and needs.

Senior Honors: Exceptional students who hold a 3.65 grade point average or better in advanced courses (300-level or higher) and an overall GPA of 3.65 may apply to work toward honors in the department. Honors are awarded to students for maintaining their GPA during their senior year and writing an honors thesis (enrolling in Art-Arch 499 each semester of the senior year), which is defended before at least two full-time faculty members,

who are both usually from the department. Students completing the thesis accrue 33 (rather than the usual 30) course credits in the major.

Minors

The Minor in Art History and Archaeology

Units required: 18

Required courses:

Art-Arch 111	Introduction to Asian Art (spring)	3
Art-Arch 113	History of Western Art, Architecture and Design (fall)	3

Total units **6**

*A score of 4 or 5 on the AP Art History exam may be substituted for Art-Arch 113. To substitute a 4 or 5 on the AP Art History exam, a student must earn at least a B in a related upper-division departmental course.

Elective courses:

Four courses at the 300 level or above must be from at least two of the following areas:

1. AM: Ancient Mediterranean and Medieval Art and Archaeology
2. RB: European Renaissance and Baroque Art
3. MEA: Modern European and American Art
4. NW: Non-Western Art and Archaeology (such as Asian, Islamic, Oceanic or African)
5. A: Architecture

Each of these upper-level courses must be taken for a letter grade.

Additional Information

One L01 (Art History and Archaeology) course at the 200-level counts toward the minor. Courses in the colleges of Architecture or Art *do not count for the minor*. Students should have the proper prerequisites before enrolling in 300- or 400-level courses. Courses in other Arts & Sciences departments do not count for the minor unless they are cross-listed as L01 (Art History and Archaeology) courses at the 300 level or above. At least two of the 300-level courses must be completed in residence at Washington University. Space in 400-level seminars is limited, and majors will be given priority over minors, even from wait lists. Internship credit may not be applied to the minor but does count toward graduation.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L01 Art-Arch.

L01 Art-Arch 106 Freshman Seminar: Van Gogh and the Avant-Garde

This freshman seminar focuses on the art and career of Vincent Van Gogh, and his relationship to artists of the 1880s in France. We explore his art in connection to the movements of Impressionism, Japonism and Symbolism. We examine the avant-garde world of Paris, and Van Gogh's relationship to such figures as Gauguin, Bernard and Toulouse-Lautrec. The larger current of fin-de-siècle nostalgia for the countryside informs our study of his work in the south of France. Van Gogh's life and the critical reception of his art offer an excellent opportunity to study how the legends of modern art are formed. Visits to the St. Louis Art Museum complement our study. Readings include the artist's letters, critical studies and biographies of Van Gogh and key figures in his circle. No prerequisite, but either Art-Arch 112 or co-enrollment with Art-Arch 211 is recommended.
Credit 3 units. A&S: LA Art: AH BU: HUM

L01 Art-Arch 107 Freshman Seminar: Public Art/Art and Its Publics in St. Louis

The course considers the history and functions of public art, with special attention to public art in St. Louis. Part of our investigation is to inquire into the conditions that seem to be necessary for visual art to be considered public. So we consider not only the obvious forms of public art in urban sculpture and murals, but also less traditional intersections of art and public in such sites as video and the internet. We also examine the operations of institutions — national and local arts agencies, international exhibitions, nonprofit centers and the like — that foster a public engagement with contemporary art. After studying aspects of the history of public art, we proceed to selected case studies today, many of them in St. Louis, including projects for Arts in Transit (the MetroLink), the Regional Arts Commission, Grand Center, and Missouri SOS (Save Outdoor Sculpture). This leads us, finally, to theorize the function of public art in a variety of contemporary forms. Local field trips to study important public art; visiting speakers from arts agencies; student projects proposing a work of public art in St. Louis, which acquaint students with procedures in arts administration.
Credit 3 units. A&S: TH Art: AH BU: HUM EN: H

L01 Art-Arch 1075 Freshman Seminar: What's New? Contemporary Art in St. Louis and Beyond

Freshman Seminar. This course introduces a broad range of practices within the field of contemporary art (art of the last two to three decades), paying particular attention to museum collections and exhibitions in St Louis (Kemper Art Museum, St Louis Art Museum, Contemporary Art Museum, the Pulitzer Foundation for the Arts, and the Museum of Contemporary Religious Art). Works in both new and traditional media are discussed (ranging from photography and sculpture to installation, performance, film and mixed media). Readings include artists' statements, theoretical texts, art criticism, and art historical essays. Students with little or no background in art history are encouraged to register. Class meetings are complemented by local field trips and some visits to artists' studios. No prerequisite.

L01 Art-Arch 113 History of Western Art, Architecture and Design

A history of the visual arts, including architecture, sculpture, painting and design, from the ancient world to the present with emphasis on the relationship of art to society and to political and cultural events.
Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 1135 Freshman Seminar: The World of Cleopatra

Cleopatra — the last queen of ancient Egypt — captivated her contemporaries and has fascinated the Western world ever since her famous suicide by asp in 31 BCE. She was a woman of contrasts: Pharaoh of Egypt and Greco-Macedonian queen; seductive woman and shrewd political strategist; a ruthless monarch using every means available to consolidate her position in the face of the encroaching power of the Roman Empire. Through texts and material culture, the seminar seeks to understand Cleopatra in the context both of her native Egypt and of the wider Mediterranean world. We thus examine the traditions of Pharaonic Egypt; the historical events that brought Egypt under the control of the Macedonian Ptolemies (Cleopatra's dynasty); the wider stage of East-West tension and conquest in which Cleopatra struggled to maintain her power; her relationships (political and personal) with famous men of her day (Caesar, Herod, Mark Antony); her capital city of Alexandria, the largest metropolis of its day; Cleopatra's brilliant court and its luxury arts; and finally the many Cleopatras that have populated art and literature of later times. We emerge with a sense of Cleopatra, both as a unique individual and as a product of her time.

L01 Art-Arch 116 Pompeii: Uncovering the Past

This course examines the Roman city of Pompeii from archaeological, art historical and literary perspectives. Topics include the city's public spaces and religious sanctuaries, its grand mansions and common houses, its political systems and leisure activities. Class discussions probe the problems inherent in the interpretation of a city captured in a moment of crisis, and how ancient literary tropes have affected our understanding of the archaeological remains. Students also investigate modern interpretations of the site in the form of novels, exhibitions and documentaries. Freshmen and sophomores only. No prerequisites.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 120 Majors' Colloquium

This one-credit course provides students the chance to explore opportunities available to majors in the history of art and archaeology both during their time at Washington University and post-graduation. It was developed in response to the suggestion of past graduating seniors, who requested more formal guidance in professional development. Topics discussed include, among others: securing internship and fieldwork experience; preparing for an honors thesis; applying to graduate school in art history and archaeology; preparing for careers

in museum, gallery and academic fields; and transferring the undergraduate degree to graduate programs in business, law and medicine. Guest speakers from the university and from the St. Louis community attend various sessions to provide current professional perspective on relevant topics. Prerequisite: a declared major in the Art History and Archaeology. Other students with a strong interest in Art History and Archaeology are admitted at the discretion of the instructor.

Credit 1 unit. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 131 Art and War at the Dawn of Civilization

War is evil and has caused great harm to society. Contrary to commonly held belief, war — as opposed to strife — is neither a natural state of mankind nor has it always been a necessary evil. This course explores the origins, development and impact of warfare by examining works of art. Warfare emerged during the Bronze Age and was documented not in historical treatises but in various works of art and architecture that need art historical interpretation. In this class, we analyze normal strife as documented in pre-dynastic Egypt and the more normal state of affairs in pre-dynastic Mesopotamia where there was no war whatsoever but the society was instead completely matriarchal. We then witness how the discovery of metallurgy ca. 3000 BCE quickly brought about warfare in Mesopotamia and follow the extraordinary developments of warfare in the ancient world that gradually made it the necessary evil we know today. No prerequisites.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 146 Freshman Seminar: Beijing and the Forbidden City

The Forbidden City has been the heart of Beijing for nearly six hundred years, and continues to influence both China and its capital today. Through art, architecture and urban design, this seminar examines the intertwined relationship of the palace and its surrounding city: their origins and constructions, the coded symbolisms of their plans, their most influential characters, their modern identities as the backdrops to major political events, and their roles in contemporary art and the Olympics. This discussion-based seminar also aims to help students develop their skills in writing and critical analysis as a foundation for future classes. No previous experience with art history or Asian studies required.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: IS EN: H

L01 Art-Arch 160 Focus: Going Dutch: Art, Science and Discovery in Amsterdam and Beyond

The Netherlands, despite its geographical scale, was once the most powerful and culturally thriving country in Europe. In the 17th century, the great metropolis of Amsterdam and the surrounding cities of Leiden, Delft, and Haarlem burgeoned as sites of global trade, scientific innovation, and unprecedented achievements in art. The paintings of Rembrandt van Rijn, Frans Hals, Johannes Vermeer and many others embody the fascinating contradictions of a culture caught between Calvinist morals and licentiousness, lucrative commerce and fears of worldly vanity, botanical learning and the tulip craze. The remarkable invention that characterized the Dutch Golden Age led also to the microscope, the fire engine, modernized anatomical dissection, even the founding of New York City. This course surveys the history of the 17th-century Netherlands through the lens of its art and intellectual achievements, ultimately reflecting upon its legacy today.

L01 Art-Arch 170 The Color of Modern Life

Color is crucial to modern life. Drawing from a range of disciplines including art history, literature, and history of science, we examine the different meanings and functions of color across the visual arts and architecture, in retail, and even in medicine. We consider different technologies and theories of color developed during the 19th and 20th centuries in Europe and the United States. What industrial developments have influenced chromatic possibilities and varieties? In what ways has color's impact on the senses been articulated and experienced? How has it been used to transform or to critique economic, political, and social activity? How did modern technology and thought transform color and its uses and how has color transformed modern life?

L01 Art-Arch 180 Freshman Seminar: The American Landscape in Painting and Practice

The art of landscape, including painting, gardening, and contemporary land art, has been particularly bound up with issues of national identity in the United States. For this reason, there has been a rich body of writing about the landscape that provides the source material for this course. By analyzing major examples by artists like Thomas Cole, Frederick Law Olmsted, and Nancy Holt and the works of landscape writers like Nathaniel Parker Willis, Susan Fenimore Cooper, and William Cronon, participants in this freshman seminar learn to analyze not only texts and images but also the messages that the physical landscapes around us convey. Regular use of museum collections and the eloquent built landscapes of St. Louis provide a chance to apply these skills beyond the classroom's walls. No prerequisites.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: AH, HUM

L01 Art-Arch 190B Introduction to Archaeology

Archaeology plays a critical and unique role in understanding the human past. Through study of the methods and theories of archaeology, and a survey of important finds in the human past, this course introduces students to the way archaeologists use material culture to reconstruct and understand human behavior. Chronologically ordered case studies from around the globe are used to look at social, ecological and cultural issues facing humans from the earliest times to the present. Students gain practice reconstructing the past through hands-on participation in two one-hour labs focusing on lithics and animal bones. By the end of the course, students are expected to be able to think critically about how the past is presented, and why, and the importance of the past as it relates to the present and future. Same as Anthro 190B

L01 Art-Arch 215 Introduction to Modern Art, Architecture and Design

An introduction to major developments in modern art, architecture and design in Europe, the Americas and across the globe from the mid-19th century to the present. Focus is be on the history and theories of modernism and its international legacies, and the relationship of the visual arts, architecture and visual culture more generally to the social, cultural and political contexts of the modern era. While the precise topics covered may vary from one instructor to another, foundational movements and trends discussed typically include Beaux-Arts style, the Arts and Crafts Movement, Impressionism, Symbolism, Art Nouveau, Cubism, Dada, Surrealism, Purism, Art Deco, the Bauhaus, the International Style, Abstract Expressionism, Pop Art, Minimalism and Postmodernism. Cross-currents in various media are emphasized as we seek to understand the origins and complexity of modern visual forms in relation to political and cultural history and to critical theory. Students engage a wide range of readings in historical sources, theories composed by artists, architects and designers, critical responses to the arts, and secondary critical literature.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 225 Matisse and Picasso

These artists are considered individually, and in relation to such artistic movements as Cubism, Fauvism and Surrealism. Examines work in all media (painting, sculpture, decorative arts, theater and printmaking). Explores response to the political environment of modern France, including the two World Wars. Weekly class meetings, plus several required visits to the exhibit and to special lectures at the Saint Louis Art Museum. Class limited to 10. Prerequisite: Art-Arch 112 or 211, or permission of instructor.

Credit 3 units. A&S: TH Art: AH BU: HUM

L01 Art-Arch 260 Introduction to the Arts of Oceania

Covering one third of the earth's surface, the Pacific Ocean is home to hundreds of different island groups and cultures. The diversity of these islands and their peoples has resulted in an astounding array of cultural traditions, languages, art forms and material culture. This lecture course offers an introduction to the arts of Oceania, which includes Polynesia, Melanesia, Micronesia and Australia. We consider the initial settlement of the Pacific followed by the Western "discovery" of these islands. Art forms and cultural practices from Polynesia and Micronesia are considered, followed by Melanesia, and finally Australia. Each section surveys artistic and cultural practices of the material culture of island groups. Thematic considerations include carving traditions, body ornamentation/wrapping, animal iconography, trade and exchange of objects, warfare, funerary/mortuary displays, manifestations of power and religious/ritual objects and displays.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Arch: HUM Art: AH EN: H

L01 Art-Arch 270 Women, Art and Culture: Early Modern to Contemporary

In this lecture and discussion course, we analyze the broad theme of women in the arts — as architects, artists, designers and patrons — in order to expand our ideas of what art can be and who can make it. Setting the stage with medieval

craftswomen, we begin in earnest with female artists during the Renaissance and Baroque periods, when the idea of the male artist-genius emerged. As we survey periods leading up to the contemporary art of the present, we examine a wide range of creative production by diverse women. Artists include: Artemisia Gentileschi, Judith Leyster, Elisabeth Vigée-Lebrun, Rosa Bonheur, Mary Cassatt, Paul Modersohn-Becker, Georgia O'Keeffe, Frida Kahlo, Faith Ringgold, Lorna Simpson, Cindy Sherman and Shirin Neshat. Of particular interest is how women have responded to and reinvented stereotypical images of women in art and in the media.

L01 Art-Arch 307 Northern Renaissance Art

A survey of the major artistic developments in Northern Europe, ca. 1400–1575. The course looks at the production of painting, sculpture, printmaking, drawing, manuscript illumination and architecture in social, political and religious contexts. The major artists covered include Jan van Eyck, Rogier van der Weyden, Albrecht Durer, Hans Holbein, Hieronymus Bosch and Pieter Bruegel the Elder.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

L01 Art-Arch 311C Ancient Civilizations of the New World

An examination of the Inca empire in Peru, and the Maya and Aztec empires in Mexico, through the inquiry into the roots, development, form, and evolutionary history of pre-Colombian civilization in each region from its earliest times to the rise of the classic kingdoms. Examples of respective artistic accomplishments are presented and discussed.

Same as Anthro 310C

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: AH BU: HUM

L01 Art-Arch 3161 Special Topics in Printmaking: History and Practice of Printmaking

This course focuses on the history and creation of prints. We examine the specificities of the medium, historically and in the present, that contribute to its particular meaning, and that render it distinct from other forms of visual culture. Ideas of expression, interpretation and ideological investment are seen on the continuum that ranges from the highly personal relationship of a print to its maker, to the commodification of the print within popular culture. Weekly lectures on the history of prints complement the studio sessions, as do field trips to studios of St. Louis artists, and visits to local museums. We look at prints in their historical role as reproductions in a pre-photographic age, as representations of shared religious and social values, and as vehicles of social or political critique. Artists discussed include, among others, Durer, Rembrandt, Daumier, Degas, Gauguin, Kirchner, Kollwitz, Warhol, Spero, Rauschenberg, Gonzales-Torres and Kiki Smith. All students make prints, and all write critical and historical analyses. Prerequisite: Art-Arch 112 or Art-Arch 113.

Credit 3 units. A&S: TH Art: AH, GFAH BU: HUM EN: H

L01 Art-Arch 331 Greek Art and Archaeology

A survey of the artistic achievements and material culture of the Greeks in the first millennium BCE (Iron Age through the Hellenistic period). Development of architecture, sculpture, and painting, as well as minor arts and utilitarian objects, with emphasis on the insights they offer into Greek society and interactions with the wider Mediterranean world.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH, GFAH BU: HUM

L01 Art-Arch 3330 Greek and Roman Painting

This course provides a survey of the major achievements of ancient Greek and Roman painting, broadly understood and encompassing wall painting, panel painting, painted pottery, and mosaic. We study monuments ranging over a millennium in time and located throughout the ancient Mediterranean. Particular attention is paid to the social, political, and religious aspects of ancient Greco-Roman painting, and to questions of innovation in artistic practice. Special emphasis is placed on students' cultivation of the tools of art-historical analysis, and of the presentation of that analysis in written form. Readings appear in the course textbook or are supplied as PDFs; extracts of primary sources are occasionally distributed as photocopies in class. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215) or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 334 Roman Art and Archaeology

The art and archaeology of the Romans, with emphasis on the late Republic and the Imperial period. Major monuments of sculpture and architecture, as well as town planning, domestic architecture and the minor arts are used as evidence for reconstructing ancient life.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 3412 Japanese Art

Surveying the arts of Japan from prehistory to present, this course focuses especially on early modern, modern, and contemporary art. Emphasizing painting, sculpture, architecture and print culture, the course also explores the tea ceremony, fashion, calligraphy, garden design and ceramics. Major course themes include collectors and collecting, relationships between artists and patrons, the role of political and military culture or

art, contact with China, artistic responses to the West, and the effects of gender and social status on art.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L01 Art-Arch 3415 Early Chinese Art: From Human Sacrifice to the Silk Road

This course examines Chinese art and material culture from the prehistoric period through the end of the medieval Tang dynasty, when the Chinese capital boasted a cosmopolitan population of more than 1 million people. Topics covered include Neolithic ceramics and jades, the bronzecasting tradition, funerary art and architecture, the Terracotta Army, the origins of Chinese brush arts, Buddhist painting and sculpture, and the varied exotica of the Silk Road. Each class teaches recent works together with the ancient to demonstrate how the origins of Chinese art and architecture continue to influence contemporary works. Prerequisite: Art-Arch 111 Introduction to Asian Art or permission of instructor.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: AH BU: IS EN: H

L01 Art-Arch 3422 Art of the Islamic World

This course surveys the art and architecture of societies where Muslims were dominant or where they formed significant minorities from the 7th through the 20th centuries. It examines the form and function of architecture and works of art as well as the social, historical and cultural contexts, patterns of use, and evolving meanings attributed to art by the users. The course follows a chronological order, by which selected visual materials are treated along chosen themes. Themes include the creation of a distinctive visual culture in the emerging Islamic polity; the development of urban institutions; key architectural types such as the mosque, madrasa, caravanserai, palace and mausoleum; art objects and the arts of the illustrated book; cultural interconnections along trade and pilgrimage routes; Westernization and modernization in art and architecture.

Credit 3 units. A&S: TH A&S IQ: HUM, LCD Art: AH EN: H

L01 Art-Arch 3425 Classical to Contemporary Chinese Art

Surveying Chinese art and architecture from the 10th century through today, this course examines classical and imperial works as the foundation for modern and contemporary art. Engaging with the theoretical issues in art history, we also pay particular attention to questions of gender, social identity, cultural politics and government control of art. No prerequisites.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 3426 20th-century Chinese Art

This course explores the ways in which Chinese artists of the 20th century have defined modernity and tradition against the complex background of China's history. Through examining art works in different media along with other documentary materials, we engage with the theoretical issues in art history, such as modernity, cultural politics, and government control of art.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: AH EN: H

L01 Art-Arch 3442 Tradition and Innovation: Chinese Painting from the 4th to 20th Centuries

This course examines the representative works by Chinese painting masters from the 4th to 20th centuries, with special emphasis on landscape paintings by scholar painters. We explore the innovations the masters created with the visual traditions from previous artists, to represent the development

of Chinese painting in the history of 1,800 years. The course also traces the influence of Western masters on the different genres of modern Chinese paintings from the early 20th century to contemporary period. Readings and discussions cover Chinese traditional ink painting and Chinese oil painting. The development of specific iconographies and issues of Chinese painting masters also are discussed. Prerequisites: Art-Arch 111 Introduction to Asian Art or one course in East Asian Studies recommended.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: AH EN: H

L01 Art-Arch 353 History of Ancient Architecture

A survey of architectural history in ancient Greece and Italy. Selected groups of monuments illustrate the development of religious and secular buildings during the Minoan-Mycenaean, classical, Hellenistic and Roman periods. Prerequisite: Art-Arch 112 or 113, or permission of the department.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 3545 The Art and Architecture of Ancient Mesoamerica: Objects of Ritual, Places of Power

This course examines the artistic and architectural achievements of the civilizations of ancient Mesoamerica, a cultural region covering most of modern-day Mexico, Guatemala, Belize and Honduras. From the emergence of complex societies in the second millennium BC through the rise of the spectacular cities of the Maya and ending with the violent fall of the Aztec Empire in the 16th century AD, rulers of ancient Mesoamerica relied on a consistent set of themes, images and media to proclaim their religious and political authority. This class explores how artists, farmers, priests, elites, kings and other community members created a vast array of images and objects that expressed cultural ideals, political and religious narratives, and distinct ethnic and civic identities. Prerequisites: Art-Arch 112, ARCH 200, Anthro 335 or permission of the instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 360 Renaissance Architecture

The modern concept of the architect as creator and genius began with Filippo Brunelleschi, the great innovator of 15th-century Florentine art. The course explores the spread of architecture and architectural theory as it begins in the hands of the innovator and is expressed and changed by other men of genius such as Leon Battista Alberti, Donato Bramante, Michelangelo Buonarroti and Andrea Palladio.

Credit 3 units. A&S: TH Art: AH BU: HUM

L01 Art-Arch 361 Art of Early Italian Renaissance

A survey of Italian Renaissance art from its origins to the end of the 15th century, examining artists such as Giotto, Masaccio, Donatello, Botticelli and Leonardo da Vinci. Prerequisite: Art-Arch 112 or 113.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 362 High Renaissance Art

A general survey focusing on such outstanding figures of the period as Leonardo da Vinci, Michelangelo and Raphael. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 3620 Mannerism in Italy

This course surveys the various embodiments of Mannerism, "maniera," or what has been called the "stylish style," in Italian art following in the wake of the High Renaissance. The nature of this self-conscious response to the achievements of the Raphael, Michelangelo and the revival of the antique has resisted easy classification both in contemporary writings and modern scholarship. The works of the "maniera" have been framed both in terms of decadence and refinement. The period was also a time of great social and religious upheaval, leading some to define Mannerism as a style of crisis. On the other hand, the deliberate elegance and grace that characterizes so many works responded to the tastes of court society. The course addresses the conflicting definitions of Mannerism by analyzing the works of art themselves and placing them in their social and cultural contexts.

Credit 3 units. A&S: TH Art: AH BU: HUM

L01 Art-Arch 3632 Renaissance Bodies: Art, Magic, Science

Against the notion of ideal classical form commonly associated with Early Modern art, this course pursues the complex and often contradictory conception of Renaissance bodies at the intersection of aesthetic ideal, empirical study and superstition. Topics include anatomical illustration, pornographic prints, bodily metaphors for the artist, and the corporeal representation of sin, holiness and savagery. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215, or permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 3633 Game of Thrones: Art and Power at the Renaissance Court

Dragons, dwarves and incest: Were they really part of life at the courts of the Renaissance? How was power won and lost among the European nobility? The current HBO show *Game of Thrones* and George R.R. Martin's bestselling series *A Song of Ice and Fire*, on which the show is based, are the most recent manifestation of popular culture's longstanding obsession with the medieval and Renaissance court, but to what extent do they reflect the visual and historical reality of the cultural institution they portray? This course uncovers the actual scandals, modes of decorum, dynastic struggles, and decadent practices that characterized the court culture of early modern Europe through close study of its art and material culture, including paintings, goldsmith work, tapestry, "dragon" eggs, and the works of artists from Jan van Eyck to Diego Velázquez. Knowledge of the *Game of Thrones* series welcome but not required. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215) or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 365 Baroque Art

A survey of the development of painting and sculpture in 17th-century Europe. Emphasis on the works of Caravaggio, Bernini, Poussin, Rubens, Rembrandt and Velázquez. Prerequisite: Art-Arch 112 or permission of the department.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 3653 Physicality, Spirituality and Emotion: Mastering the Messages of Baroque Art

Baroque Art, that is artwork made in Europe between 1580 and 1700, encompasses some of the most moving images ever created, made by artists who were consciously and unconsciously expanding the expressive repertoire available

for visual communication. This course examines how artists approached artistic production, ranging from multi-room extravaganzas commissioned by ecclesiastical dignitaries to personal portraits and genre scenes intended for intimate contemplation within a domestic environment. The achievements of personalities such as Michelangelo Merisi da Caravaggio, Gentileschi, Guercino, Rubens, Rembrandt, and Velazquez are discussed and analyzed, together with the accomplishments of lesser-known painters whose contributions are not always acknowledged. Visits to the Saint Louis Art Museum enable students to experience paintings firsthand in order to understand how pictures work. Classroom and museum sessions explore how 17th-century artists combined technical innovation with iconographical invention as they responded to their patrons' wishes and to the social and political contexts in which they worked. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 3671 Michelangelo: Painter, Sculptor, Architect

An examination of his life, his work and his time. A consideration of the artist's painting, sculpture and architecture in relation to his contemporaries and to the broad historical, political and artistic currents of his day. Prerequisite: Art-Arch 112.

Credit 3 units. A&S: TH Art: AH BU: HUM

L01 Art-Arch 3681 Rembrandt's Amsterdam: Piety, Profit, Prostitution

Drugs and prostitution may be its catchwords today, but in the 17th century Amsterdam was the most powerful and culturally thriving city in Europe. Rembrandt van Rijn — Amsterdam's most famous citizen — embodies in his art and biography the fascinating contradictions of a city caught between Calvinist morals and licentiousness, lucrative global trade and fears of worldly vanity. This course surveys the history of Amsterdam and the Dutch Golden Age through the lens of Rembrandt's works as well as the those of Johannes Vermeer, Frans Hals and other contemporaries.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 370 The American West: The Image In History

Examines representations of the American West and of the frontier encounter between Euro-American and Native American cultures, from the early 19th to the early 20th centuries. We consider travel accounts, fiction painting, ledger drawings, photography and film in order to analyze the ways in which historical circumstances have shaped artistic and literary representations. At the same time, we look at how images and texts have shaped formative myths about the West that in turn leave their impact on history.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: AH BU: HUM

L01 Art-Arch 371 American Art to 1900

A survey of broad social, cultural and nationalist themes in the visual arts from European contact with the New World to 1900. Topics include the encounter of New World cultures with European colonizers and the ongoing relationship between America and Europe; the changing image of the artist; the role of art in the formation of national identity. Prerequisite: Art-Arch 113 or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: BA EN: H

L01 Art-Arch 3712 Art and Culture in America's Gilded Age

Developments in American culture from the end of the Civil War to the turn of the century: novels, buildings, images, public and private spaces of this transitional period — a time of new class formation, of unparalleled social diversity, and of new urban forms. The connections between art, literature and social experience. Representative figures include Henry James, Henry Adams, Louis Sullivan, Stanford White, Thomas Eakins, Louis Tiffany.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: BA

L01 Art-Arch 372 American Art to 1980

From the beginnings of modernism in the visual arts of the United States, around 1900, to Abstract Expressionism and the Beat aesthetic. Focus on the cultural reception and spread of modernism, native currents of modernist expression, from organicism to machine imagery, the mural movement and the art of the WPA, the creation of a usable past, abstraction and figuration, regionalism and internationalism, photography and advertising.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 376 American Modernism, 1900–1940

American modernism: what is it? What is the nature of its encounter with mass culture? What happened to modernism as it migrated from its "high" European origins to its "middlebrow" version in America between the turn of the century and the eve of World War II? What was the rhetoric of modernism in everyday life — its impact on design, photography, advertising? In addition to the fine arts, we look at popular media, film and photography. Lecture/discussion. Prerequisite: Art-Arch 211 Introduction to Modern Art or permission of the instructor.

Credit 3 units. A&S: TH, WI A&S IQ: HUM, WI Art: AH BU: ETH

L01 Art-Arch 3762 American Modernisms, 1900–1940

American modernism: what is it? What is the nature of its encounter with mass culture? What happened to modernism as it migrated from its "high" European origins to its "middlebrow" version in America between the turn of the century and the eve of World War II? What was the rhetoric of modernism in everyday life — its impact on design, photography, advertising? In addition to the fine arts, we look at popular media, film and photography. Lecture/discussion. Prerequisite: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 3782 Modern Art 1905–1960

This course investigates topics in European painting, sculpture, architecture, photography and film. Lectures and readings address major artistic developments, including Cubism, De Stijl, Futurism, Expressionism, Dadaism, Constructivism, Surrealism, the Bauhaus and Art Brut. Prerequisite: Art-Arch 211 Introduction to Modern Art or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 3783 The Modernist Project: Art in Europe and the United States, 1905–1980

The course surveys major tendencies in painting and sculpture from Fauvism in France and Expressionism in Germany to the beginnings of Postmodernism in photo-based work in the U.S. About two-thirds of the course treats European art, about one-third treats American art. Photography, architecture and work

in other forms are considered selectively when pertinent to the individual class topics. Within the lecture topics, emphasis is on avant-garde innovation; the tension in modernist art between idealism and critique; reaction by artists to current events; relationship between art and linguistics, philosophy, literature, economics and science; the role of geopolitics in art production; intersections of art and society; the role of mass culture; issues of race and gender in the production and reception of art; the challenge to the concept of authorship and creativity posed by Postmodernism at the end of this period. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 3785 Photography in America

This course considers the practice and use of photography in America from its invention up to the present, offering various ways of thinking about the medium and its relation to society and culture. Students come to understand the ways photographic practices shape public perceptions of national identity, ethnicity and gender, nature, democratic selves, and a host of other concerns. We discuss famous practitioners such as Matthew Brady, Jacob Riis, Lewis Hine, Walker Evans, and Robert Frank. We consider not only the social and public uses of the medium through such episodes as the New Deal/FSA and photojournalism, but also the private explorations of "fine art" photographers, and the everyday practices of the snapshot. Prerequisites: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art or one course in American History, American Cultural Studies, or permission of the instructor. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH, GFAH BU: HUM EN: H

L01 Art-Arch 3822 City and Country in Late Impressionism 1880–1905

This course considers the relationship between the Parisian art world and the avant-garde painters who retreated to the countryside between 1880 and 1900 to paint rural landscapes, provincial life and exotic locales. We consider the artistic dialectic of city and country through examining the art and careers of Van Gogh in Provence, Gauguin in Brittany and Tahiti, Cézanne in Aix and Monet in Giverny, among others. We consider such themes as artist colonies, the market for landscape, rural escape as a critique of bourgeois urbanism; and the connections between tourism and the nostalgia for the provincial and the exotic. Credit 1 unit. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 3831 Art in the Age of Revolution: 1789–1848

European painting, sculpture and printmaking from the French Revolution to the mid-19th century; French, English, German and Spanish artists discussed in social and aesthetic context, with a focus on links between art and ideology in times of political turmoil. The styles of classicism and romanticism, the rise of history painting, and the development of realism in both landscape and genre painting. Prerequisite: Art-Arch 112 or permission of the instructor. Credit 3 units. A&S: TH Art: AH BU: HUM

L01 Art-Arch 3833 Realism and Impressionism

An examination of the development of European art from approximately 1848 to the mid-1880s, with a focus on the development of Realism and Impressionism in England and

France. Issues explored include the breakdown of academic art, the rise of landscape and naturalist themes, the emergence of alternative exhibition spaces and new dealer systems, and the relationship between gender and avant-garde practice. Prerequisite: Art-Arch 112 or Art-Arch 211 or permission of instructor. Credit 3 units. A&S: TH Art: AH BU: HUM

L01 Art-Arch 3835 The Art Museum: History, Theory and Design

The course studies the conceptual basis of the institution of the art museum in the United States and Europe, including its history, theoretical foundations, design and cultural function. We begin with the origins of the modern museum in the 18th century and earlier; trace the development in the 19th century of the earliest national art museums in the U.S. and Europe; consider the opportunities and problems of museums of modern and contemporary art in the 20th century; address the question of appropriate architectural strategies for art museums of the past and the present; and consider a variety of developments in the art museum today. We study and visit art museums in St. Louis and take a field trip to selected art museums in Davenport and Des Moines. Prerequisite: Art-Arch 211 Introduction to Modern Art or ARCH 2284/ARCH 4284 Architectural History II or permission of instructor. Students in the College of Architecture may register for this course under the assigned College of Architecture course number. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 3838 Modern Art in Fin-de-Siècle Europe, 1880–1907

This course examines artistic production at the turn of the century in France, Belgium, England and Scandinavia. Beginning with the re-evaluation of impressionism and naturalism in France, we examine Neo-Impressionism (Seurat and Signac) and Symbolism (Moreau, Van Gogh, Gauguin, the Nabis, Rodin, Munch), as well as later careers of Impressionists (Cassatt, Monet, Degas, Renoir). Considers cross-national currents of Symbolism in Belgium and Scandinavia; the Aesthetic Movement in Britain; the rise of expressionist painting in French art (particularly with the Fauvism of Matisse and Derain), and the juncture of modernist primitivism and abstraction in early Cubism (Picasso). Prerequisite: Art-Arch 112 or permission of the instructor. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM

L01 Art-Arch 3862 The Mediterranean and French Modernism

This course surveys the development of the Mediterranean region as an important site of modernist artistic practice. Among the artists considered are Pierre-Auguste Renoir, Henri Matisse, Pablo Picasso, Marc Chagall and Yves Klein. Excursions to museums and other artistic sites. Credit 1 unit. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 3875 Rejecting Reason: Dada and Surrealism in Europe and the United States

In this multimedia, interdisciplinary course, we consider the history, theory and practice of Dada and Surrealism, from its Symbolist and Expressionist roots at the end of the 19th and the beginning of the 20th centuries through its late expressions in Beat culture and Pop art of the 1950s and 1960s. Dada's emergence in Zurich and New York in the midst of World War

I set the tone for its stress on irrationality as an oppositional strategy. Surrealist research into the domain of the unconscious continued this extreme challenge to dominant culture, but in a revolutionary spirit that proposed new possibilities for personal and collective liberation. The international character of the movements, with substantial cross-transmission between Europe and the United States, are emphasized. Prerequisite: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: HUM EN: H

L01 Art-Arch 3877 Cubism and Its Global Legacies

During the early 20th century, Cubism marked a radical break in the European representation of three-dimensional space in painting through a bold reconsideration of atmospheric and linear perspective. Early Cubists such as Pablo Picasso achieved this formal breakthrough in part through studying African and Oceanic art. Between the summer of 1908, when Braque and Picasso developed the style collaboratively in France, and the advent of WWI in summer 1914, Cubism became the most influential style in the international art world. This course examines the development of Cubism in France, and analyzes how artists throughout Europe and the world adapted Cubism for their own purposes. Of particular interest is how artists from outside Europe and the U.S. have responded to Cubism's appropriation of non-Western art. Class format is lecture and discussion. Prerequisites: L01 Art-Arch 113 Introduction to Western Art or L01 Art-Arch 215 Introduction to Modern Art, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM BU: HUM EN: H

L01 Art-Arch 388 Contemporary Art

A survey of global contemporary art from 1970 to the present. Topics: happenings, minimalism, body art and neo-expressionism, placed in their social and political contexts. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH BU: IS

L01 Art-Arch 3884 Modern Design and Modern Culture

This course explores key issues of modernity (industrialization, consumerism, mass culture, nationalism, etc.) through the study of material culture. Focusing primarily on modern design in Europe and North America from William Morris to Charles Eames and Aleksander Rodchenko to Bruce Mau, we examine major developments in design thinking and practice as both reactive to and generative of broader political, economic, and social concerns. The course is organized around important and influential exhibitions, from World's Fairs to storefront shows, where design professionals, institutions, and publics came together to reflect on topics of urgency, identify alternatives, and imagine the implications of design on everyday life. Wherever possible, class discussions/lectures and assignments make use of objects and archives in area collections. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215) or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 3888 Museum Theory and Practice

This course explores the history of fine art museums and related debates on the nature of collecting and modes of display. Using historical and theoretical texts as well as select case studies, we focus on how the evolving structure and mission of the museum impact our understanding of art. Topics include

the Renaissance "cabinet of curiosities," the Salon controlled by the French Academy, the rise of the modern art museum, and the proliferation of contemporary curatorial strategies in today's global art world. In addition to the study of the history of exhibitions and the role of the museum, the course also investigates the various jobs and responsibilities that people hold within museums. Guest speakers include members of the curatorial, publications, registration, education and installation staff at the Mildred Lane Kemper Art Museum. We also take advantage of the distinct art institutions in St. Louis, exploring exhibitions and permanent collection displays at the Kemper Art Museum, Saint Louis Art Museum, the Pulitzer Foundation for the Arts, and the Contemporary Art Museum. Prerequisite: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH, GFAH EN: H

L01 Art-Arch 3889 The Architectural Imaginary: Dialogues Between Art and Architecture in the 20th Century

The 20th century introduced new ways of thinking about architecture that fired the imaginations of artists. Modern ideas on space, community and city formed a shared architectural imaginary, the site of diverse new encounters between art and architecture. This course explores how architectural concepts and ideas about the built environment inspired artistic production, and how, in turn, concerns originating in vanguard artistic practice informed architecture, throughout the 20th century and into the present. Projects to be addressed include collaborations between artists and architects; conceptual design practices and utopian or "paper" architectures; artistic movements guided by spatial or environmental concepts; and artists who explore buildings and urban spaces. Prerequisites: L01 Art-Arch 113 Introduction to Western Art, Architecture and Design, or L01 Art-Arch 215 Introduction to Modern Art, Architecture and Design, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 3892 Modern Sculpture: Canova to Koons

This course surveys sculpture in Europe and the United States from about 1800 to the present, with an emphasis on the period 1890–1980. A rapid traverse of Neoclassicism, Realism and the rage for statuary in the later 19th century take us to the work of Rodin and a more systematic exploration of developments in sculpture of the 20th century. Particular emphasis also is given to the work of Brancusi, Picasso, Matisse, Duchamp, Giacometti, Oppenheim, David Smith, Serra, Morris, Judd, Hesse and Bourgeois. An important theme running through the course as a whole, from an age of nationalism and manufacturing to our own time of networks and information, is the changing definition of sculpture itself within its social and political context. We also explore various new artistic practices — video, performance, installations and body art, for instance — and interrogate their relationship to sculptural tradition and innovation. Prerequisite: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 3972 Alterna-Art

Can contemporary art be truly alternative? What does the term even mean, when the channels for distributing art are available to all? This course presents a survey of art created outside of institutions and official channels. Students are exposed to a variety of different media, from graffiti and muralism to performance and Internet art. The course also deals with

questions of agency, "authenticity," and co-optation of street art by commercial means. Classes consist of a hybrid lecture/discussion format with weekly readings. Prerequisites: Intro to Western, Intro to Modern or permission of the instructor.
Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 3973 New Media, New Technologies

In summer of 2013, Random International's *Rain Room* was installed at the Museum of Modern Art in New York. Lines to experience the sensation of being rained on without getting wet ranged up to seven hours at times. This merging of new technology with the gallery space proved irresistible, but also raises questions as to the uses of technology in contemporary art, and whether or not this could be much more than a gimmick. As one Yelp reviewer put it, "The *Rain Room* is definitely an experience. Let's be honest... I'm mostly upset that I didn't get a cool, new Facebook profile pic out of it." This course considers technological developments in modern and contemporary art, from photography, video and new media, digital and Internet art, as well as forays into new technology that blur the lines between art and science. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; or permission of the instructor.
Credit 3 units. BU: HUM

L01 Art-Arch 3975 Art and Activism

This course examines political and social activism in art and visual culture, focusing on the role that visual representation has played in social movements and how artists/activists have employed visual media to challenge and resist dominant visual representations and political formations. We explore key theoretical developments in activist discourse, as well as the role of art practices and aesthetic commitments in these developments. This course seeks to represent the development of the relation of art and activism in its broadest intellectual and cultural context within the 20th century and encourage an appreciation of the complex array of disciplinary perspectives that are implicated in this development. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215, or permission of instructor.
Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4000 Topics in Art History and Archaeology

Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.
Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4002 The Decorative Aesthetic in Modernism, 1860–1960

In the criticism of modern art, decoration and decorative have often been used as pejorative terms, designating art that has no intellectual basis but is merely pleasing, intended to fill space and delight the eye. But in the late 19th century, these terms carried important cultural value, and opened the door to significant experiments in abstraction. Moreover, the decoration of a public space or surface may have political implications. This course investigates decoration and theories of "the decorative" in modern art in Europe and the United States, with special attention to the evolution of ideas of modernism in both 2-dimensional and 3-dimensional environments. We also consider some of the political meanings that may be borne by both public mural painting and domestic decoration, as well as easel painting that aspires to conditions of the decorative. Key figures include Puvis de Chavannes, Morris, the Nabis, Van de Velde,

Monet, Matisse, the Mexican muralists, Pollock and Shapiro. Prerequisite: Art-Arch 211 Introduction to Modern Art, or any 300-level course in art history, or permission of instructor.
Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 4015 Theories of Modern Art and Architecture

The course presents theories of art and architecture from the 19th to the 21st century in their historical contexts through a set of in-depth investigations of selected topics. Some knowledge of history and theory is integral to contemporary understandings of the disciplines of art, art history and architecture. To foster a historical understanding of theories of modern art and architecture, we discuss a selection of key texts, divided into three sections: theoretical sources of modern art and architectural history in the 19th century; theories of modernism, from the formalist to the Marxist; postmodern critiques of modernism, in such areas as feminist theory and poststructuralism. Class visits to Sullivan and Adler's Wainwright Building (1890–91), Saarinen's Arch at the Jefferson National Expansion Memorial (completed 1964), Ando's Pulitzer Foundation for the Arts (2001), and Maki's Kemper Museum of Art (2006) are integral to the work of the course. Prerequisite: Either Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art and any 300-level course in art history; or permission of instructors.
Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4103 African Art: A User's Guide

This seminar offers an introduction to the methodologies of African art history, exploring a range of approaches to objects from an examination of their original contexts; accessed through oral and archival sources; to their lives in a Western context, including collecting histories and market valuation over time. It considers new means of knowing African objects through methods such as CT scanning and algorithm-based databases and poses the question: Of what value is this corpus outside of art history or African studies? Through course meetings and projects, students are introduced to various research methodologies, including the production of oral history records for the St. Louis Art Museum, provenance research, and valuation. The course culminates in a final paper and presentation based on an object in SLAM's African collection. Prerequisites: Intro to Western Art (L01 113) or Intro to Modern Art (L01 215); one 300-level course in art history preferred; or permission of instructor.
Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L01 Art-Arch 4105 Power, Authority and Spirituality in Oceanic Art

Focusing on the material culture of the Pacific, this seminar considers the similarities and differences in political and spiritual power and authority throughout Polynesia, Melanesia and Micronesia. The seminar examines how material forms embodied the immaterial divine and spiritual power associated with gods and ancestors and considers how objects understood to contain these powers were used in local contexts and with neighboring communities and Westerners. Included in the discussions are objects (both ritual and utilitarian), body modification and decoration/ornamentation, dress, architecture, religion/ritual, warfare and exchange. We consider what the materials used in these categories tell us about local concepts of ancestral or divine power, about indigenous understandings of the local environment and its importance, and also how objects were understood as mediators of the relationships between

humans and ancestors or divine beings. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L01 Art-Arch 4240 The Plundered Past

The public imagination thrills at the fantastic adventures of Indiana Jones and Laura Croft, Tomb Raider; but the reality of modern archaeology is more complex, ethically challenging and interesting than a simple treasure hunt. In the U.S. and Canada, our science museums and museums of anthropology still display artifacts that are regarded as sacred and culturally definitive by Indian nations, although such holdings are now subject to negotiation and repatriation. Art museums in Europe and the U.S. are still stocked with looted ancient masterpieces that are revered as vital heritage by the nations from which they were stolen. We display looted art alongside a much smaller number of legitimately excavated artifacts of masterpiece quality, so it is no surprise that our popular images of archaeologists as avid and undiscerning collectors raise little concern. But modern archaeologists are not extractors of art or even of scientific information, from places as passive and inert as the museums' objects ultimately occupy. Archaeologists work with living people inhabiting societies and states that care deeply about their pasts and the relics of it. They are active agents engaged with many other people in the production of knowledge about the past. In our rapidly shrinking world, educated sensitivity to the many ancient cultural legacies that shape the values of modern global society is more than a moral imperative; it is a basic form of collaboration in the common project of survival. Archaeologists are ethically charged to advance that project through education about the complex contemporary arena of artifacts, sites, and information they occupy.

Same as Anthro 4240

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM EN: H

L01 Art-Arch 428 The Invention of the Image: From Classical Art History to Modern Visual Studies

The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we also carry out an historiographical survey of the major works in Image/Visual Studies, thereby gaining an appreciation for the wide range of methods of inquiry employed in this important field of research. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 430 Topics in Northern Renaissance Art

Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 4321 Ancient Coins

The seminar is designed to research the rich world of Greek and Roman coinage by using the university's own resource, the J.M. Wulff collection of coins. Emphasis on coin typology, works of art or buildings illustrated on our coins, and the history of coinage. We use actual coins in the gallery. Due to the delicate nature of the material, the course is by permission of the instructor only.

Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 4375 Ancient Greek Sculpture in Context

Sculpture counts among one of the greatest artistic achievements of ancient Greece, and one that has had the greatest impact on the art of later periods. This course focuses on original works of art of the Archaic and Classical periods (600–300 BCE), placing emphasis on how study of their contexts — the places in which they were produced, displayed and found — contributes to our understanding of their place in the ancient world. Background material, which is covered at the beginning of the semester, includes the origins of monumental Greek sculpture at the beginning of the Archaic period (late 7th to early 6th century BCE), and the stylistic development of the Archaic and Classical periods. We then proceed to discussion of various types of sculpture (architectural, cult statue, votive, commemorative, funerary) and how these works functioned within the context of the Panhellenic sanctuary, the city sanctuary, the secular center of the city, and the necropolis. In a different view of context, we also consider sculpture recovered from ancient shipwrecks, looted art on its way to the ancient Roman art market. Prerequisite: Art-Arch 331 or permission of the instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4376 Pictorial Illusion in the Ancient Mediterranean

Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane. The purpose of the course is to explore the material, stylistic and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course investigates trans-historical connections between vision, visibility and methods of representation. Prerequisites: one of Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.

Credit 3 units.

L01 Art-Arch 439 Greek Art in Rome: Discourse, Dedication and Reflection

Throughout the modern period, Ancient Greek art has been perceived of as a genuinely original and creative tradition, in which both individual artists and regional schools made some of the most significant advances in the long development of European art. Roman art, by contrast, has been seen as derivative and secondary; Johann Joachim Winckelmann, the founder of modern art history, classified it among the "style of

the imitators." But this traditional dichotomy rests in large part on the Romans' own reactions to their encounters with the arts of Greece. Through the analysis of textual sources, architecture, statuary and painting, this course investigates the status and influence of Greek art in the city of Rome from the third-century BCE until the late Imperial period, and seeks to understand how Roman responses to and uses of Greek art have come to shape the modern perception of both traditions. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 444 The Forbidden City

Home to 24 emperors of the Ming and Qing dynasties (1368–1911), the Forbidden City today occupies the heart of Beijing and comprises the largest ensembles of premodern architecture in China. This seminar examines the origins of the palace, its construction in early Ming, the coded symbolisms of its plan and decoration, the rituals of court, and the lives of its denizens, from emperors (including Pu Yi, the "last emperor") to concubines, from Jesuit missionaries to eunuchs. The course also considers the 20th-century identity of the site as a public museum and the backdrop to major political events, as well as its role in the urban design and contemporary art of 21st century Beijing. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S IQ: HUM, LCD Art: AH EN: H

L01 Art-Arch 4482 Japanese Prints: Courtesans, Actors and Travelers

Woodblock prints of the 18th and 19th centuries and their relationship to literature and popular culture. Topics include the life of the pleasure quarters, sexuality and the "erotic," parody, kabuki theater and the representation of women. Prerequisite: 3 units in Japanese painting, or permission of instructor. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4489 The Three Emperors: Redefining Chinese Art in the Golden Age

Ruling imperial China during its last Golden Age, the Qing emperors Kangxi, Yongzheng and Qianlong patronized the arts during an unprecedented period of prosperity and international exchange. Many of the works they commissioned are now icons of Chinese culture, but in their time these three Manchus redefined Chinese art with ideas and styles from Baroque Europe, Tibet, Mongolia and even Islamic Central Asia. This seminar focuses on the ethnically and culturally diverse art, architecture and material culture patronized by these three emperors to examine how they and their multi-ethnic empire changed the definition of Chinese art during the long 18th century. Prerequisites: Art-Arch 111 Introduction to Asian Art; or one 300-level course in Asian art history, history or literature; or permission of instructor. Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD

L01 Art-Arch 4494 East, Meet West: Cross-Cultural Aesthetics in Chinese and Japanese Art

This seminar grounded in cross-cultural aesthetics examines East Asian visual responses to European art and science from the 16th through 19th centuries. First introduced by Jesuit missionaries, continued by merchants, and culminating with colonial enterprises, the same Western ideas and works left

very different impressions on China and Japan. An introduction to cross-cultural aesthetics from both Western and East Asian perspectives lays the theoretical foundation to engage these works of art, before proceeding thematically through time to cover painting, cartography, woodblock prints, ceramics and photography within transregional and transcultural contexts. Prerequisites: at least one course in Asian art or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4615 Caricature: The Culture and Politics of Satire

This course examines the golden age of caricature. Beginning with the prints of William Hogarth, we look at the caricatural traditions in France and England from the late 18th-century through the early 20th century. Special emphasis is placed on visual satire as a vehicle for social and political critique, on theories of humor (particularly Baudelaire and Bakhtin), and the development of a mass market for this imagery. Other figures discussed include Rowlandson, Cruikshank, Daumier, Gavarni, Philpott, and Gil. We take advantage of a major collection of French caricature in the Mildred Lane Kemper Art Museum at Washington University, as well as collections available for study in Olin Library and at the St. Louis Art Museum. Prerequisites: Art-Arch 112 or Art-Arch 211, or a 300-level course in modern European history or literature, or permission of the instructor. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4621 Leonardo da Vinci

Leonardo da Vinci is universally recognized to be one of the greatest artists of all time. But who was Leonardo? Artist or scientist? Master, magus or myth? This seminar explores the reality and fiction of a fascinating, yet enigmatic genius, as well as placing this unique individual in the contexts of Renaissance Italy and the modern imagination. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH

L01 Art-Arch 4624 Michelangelo

An examination of the life and works of Michelangelo. The most important developments in his architecture, painting and sculpture; with special attention to his assistants, friends, family and contemporaries. Prerequisite: permission of instructor. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH

L01 Art-Arch 4625 Venice

A seminar focusing on the art of Venice, in particular on Bellini, Giorgione and Titian. Special attention to the international reputations of these three artists and to problems of patronage, connoisseurship and interpretation. Prerequisite: Art-Arch 361 or 362, or permission of the instructor. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH

L01 Art-Arch 4626 The Renaissance and the Ancient World

Few topics in Renaissance cultural studies have attracted as much attention as the encounter with and "revival" of the arts and learning of classical antiquity. Recent scholarship shows, however, that antiquity for Renaissance Italians was neither a historical period nor a monolithic concept, but was an ever-shifting construct which served a variety of agendas. This seminar explores Renaissance conceptions of the ancient world in their many guises, from antiquarian study, artistic style, antiquities collections, forgery and imitation, as well as notions of artistic time and place. Focusing on the major cultural centers

of Rome, Florence and Venice, we also consider how regional and civic identity influenced attitudes toward ancient history and monuments. "Antiquity" is defined broadly — as it was during the Renaissance — encompassing the diverse civilizations of Egypt, Greece, Rome and Etruria, as well as Early Christianity and Byzantium. Prerequisites: Art-Arch 112 Introduction to Western Art, one 300-level course in art history preferred, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4627 Nature and the Non-Human Renaissance Art

The competition between art and nature became a driving obsession of Renaissance artists from the 16th century onward as the plant and animal world came to hold as much fascination as human form and anatomy. The nascent fields of zoology and botany together with the emergence of the collector's cabinet as a necessary pursuit for any sophisticated connoisseur motivated a flurry of new scientific illustrations and some of the most splendid nature illuminations and curiosities in the history of art. This course explores how artists from Albrecht Dürer to painters of the Dutch Golden Age found in the vibrant non-human world a means not only to display their virtuosic skill but also to convey messages of morality, wisdom, and the divine. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 4628 Cross-Cultural Exchange in Renaissance Art

The study of cross-cultural artistic exchange in Renaissance art has long been impeded by persistent notions of "exoticism" and "influence," both of which presume the superiority of one culture over another. We problematize this hegemonic model and pursue instead the intersection of competing aesthetic, political and religious ideals in the encounters between Renaissance Europe, the Americas, Africa and the Muslim world at large. Topics include visual representations of race, physiognomy and human civilization. Admission to this seminar, which has a required field trip sponsored by the department over the weekend before the semester starts, is granted only through an application made directly to Professor Bass. Please sign up on the wait list, and contact her if you are interested in the course.

Credit 3 units. A&S: CD A&S IQ: LCD Art: AH EN: H

L01 Art-Arch 4643 Art in Crisis: The Protestant Reformation from Durer to Michelangelo

How do artists respond when art is forbidden? Or when it is destroyed before their eyes? This course explores the visual impact of the Protestant Reformation through the history of iconoclasm, propaganda prints, censorship and the exploration of new religious iconographies in 16th-century Renaissance art. Artists to be discussed include Albrecht Dürer, Hans Baldung Grien, Lucas Cranach the Elder, Hans Holbein and Michelangelo.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 4662 Michelangelo the Architect

When, why and how did the great Renaissance sculptor, painter and poet Michelangelo Buonarroti become an architect? This seminar surveys Michelangelo's built and unbuilt architecture, his methods and extant drawings, and the process and influence of his creations.

L01 Art-Arch 467 Topics in Baroque Art

Credit 3 units. Art: AH

L01 Art-Arch 4678 Bosch and Bruegel

Humor, monstrosity, violence and vernacular culture pervade the oeuvres of Hieronymus Bosch and Pieter Bruegel the Elder, two of the most seminal artists of the Northern Renaissance. This course addresses the complexity of their oeuvres and the methodological problems raised in the interpretation of their enigmatic imagery, with a particular focus on the dissemination of their artistic personas in print. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4721 American Art and Culture, 1945–1960

The rise and "triumph" of Abstract Expressionism has long dominated the story of American art following World War II. This new seminar puts Abstract Expressionism into context with parallel developments in the arts, photography and film. Among the topics we consider: the conversation between émigré artists and American culture during and after the war; the emergence of a "noir" aesthetic in film and literature; the early work of Jasper Johns and Robert Rauschenberg and the so-called "aesthetic of indifference" in relation to Abstract Expressionism; artistic collaborations at Black Mountain College; New York school photography and photojournalism; and the cultural impact of the A bomb. Prerequisite: a 300-level course on 20th-century art, photography or history; or permission of the instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 473 Art and Culture in Fin-de-Siècle America

The particular climate of the fin-de-siècle and its expression in art, architecture and letters. Concurrent development in Vienna, Paris and London as basis for comparison. Themes include new theories of mind and perception, the fate of rationalism, the "crisis in bourgeois values," and redefinitions of gender.

Prerequisite: permission of instructor.

Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 474 Topics in American Art

Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 4743 Imagining the West

The historical, visual, literary and scientific encounter of Europeans and European-Americans with the North American frontier. Examines how the West as myth and reality was assimilated into, and imaginatively colonized by, both Europe and America from the pre-discovery period through the end of the 19th-century. Images of the first encounter, cultural dynamics of the colonization process, cultural resistance of native Americans. Field trips, guest lectures. Prerequisite: 100-, 200- or 300-level courses in art history; or 300-level courses in European or American 19th-century comparative literature, history; or permission of instructors.

Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 4744 TransAmerica: The US and Mexico between the Wars

Many areas of 20th century U.S. culture between World Wars I and II were inspired by post-revolutionary Mexico. The Mexican Revolution (1910–1917) profoundly reoriented modern Mexico, introducing new cultural and aesthetic forms and historical themes over subsequent decades. Mexican artists contributed to a new national consciousness drawing on indigenous Mexico and on the new politics of workers and peasants, given monumental expression in mural painting. The bidirectional exchange between U.S. and Mexican artists was of great importance for the cultural revitalization of the New Deal and after in the U.S. Among artists, writers, anthropologists and tourists, the vogue for things Mexican was fed by many sources, including increasing travel, diplomatic exchange, and a yearning for alternatives to U.S. modernity. The seminar supports travel to Mexico City, funded by the Art History and Archaeology department. Must be a graduate student, or an undergraduate major or minor in Art History and Archaeology. Recommended courses: one 300- or 400-level course in 20th century U.S. art or history; or one relevant course in Latin American Studies program.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L01 Art-Arch 475 The City in American Arts and Popular Culture, 1910–1940

Using visual media—painting; prints and illustration; film and animation — along with studies of vaudeville, and other forms of popular and mass entertainment — this seminar analyzes the presence of the city as a theme that registers a range of cultural attitudes toward the modern. Through close readings of visual and verbal texts, we consider such issues as the relationship between work and leisure, and between high culture and popular arts. We look at critiques and celebrations as well as at how the popular arts help the ordinary man and women to negotiate the challenges of the new mechanized and overscaled urban environment. Prerequisites: 300-level course in American 20th-century cultural history, or American art or literature; or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH

L01 Art-Arch 4770 Cosmopolitan and Native Modernisms: The U.S. and Europe between the Wars

This seminar focuses on two contrasting currents within American and European modernism between the two world wars: native and cosmopolitan. Alternating between the United States and France, it begins in the years before World War I and concludes with the rise of virulent forms of cultural nationalism in the late 1930s. We consider the subjects, personalities, aesthetic strategies, and political and social investments associated with these alternative modernisms, linked to a search for roots, on the one hand, and on the other, to a desire for forms of spatial and social mobility. Comparing "homegrown" and expatriate experience, we consider divergent attitudes toward identity, gender, nation, time and nature, analyzing these two fundamental responses to modernity in relation to one another. Prerequisites: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art; one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4771 Gender in 19th-Century Art

An examination of the representation of gender, i.e. the construction of male and female identities through images,

and the role of gender in artistic practice. Readings and class discussion focus on American, French and English art. Prerequisite: Survey of modern art; any 300-level course in 19th-century American/European art or culture; or permission of instructor.

Credit 3 units. A&S: TH, SD Art: AH

L01 Art-Arch 4776 Art and Culture in 1930s America

An interdisciplinary look at the production of culture in the United States during the Depression years between the stock market crash and the nation's entry into World War II. Focus on the evolving dialogue between aesthetic concerns and political commitment. We consider the role of the state as an agent of culture, the relationship between leftist politics and modernism, regionalism and internationalism, debates over the nature of documentary photography, and attitudes toward the past in New Deal art, among other topics. Prerequisite: 300-level course in European or American 20th-century art or cultural history, concurrent enrollment in Art-Arch 372, or permission of the instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH

L01 Art-Arch 4782 Modern Architecture in St. Louis

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4785 Art and Culture in 1920s America

This interdisciplinary seminar examines the relationship between art and 1920s culture in the United States: how artists and critics thought about the nature of our cultural heritage — its rich possibilities and its limitations; the potential of technology and urbanization as well as the threats they pose to older cultural values; the nature of a multicultural society and the contributions of minority traditions to the evolution of American culture; the lure of the Southwest; early criticism of popular media; and the conversation between popular culture and high art. Prerequisite: Art-Arch 112 or permission of instructor.

Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 481 Topics in Modern Art

The sources, styles, influences and content of the art of such artists as Gauguin and Cézanne examined in the context of contemporary movements in art and literature. Prerequisite: art history major or permission of instructor.

Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 4816 Art and Culture in Fin-de-Siècle Europe

An examination of painting, photography and the decorative arts in France during the period between the two World's Fairs of 1889 and 1900. Artistic movements include Symbolism (Van Gogh, Gauguin, Redon), later Impressionism (Monet and Morisot), Neo-Impressionism (Seurat and Signac) and Art Nouveau. Thematics include urban leisure and cafe culture; the agrarian ideal; the promises and threats of science and technology; the lure of the primitive; and the impact of nationalism and feminism on the arts. Prerequisites: Art-Arch 211; any 300-level course in 19th-century art, literature or history; or permission of instructor.

Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 4817 Paris ca. 1900: Art, Leisure and Spectacle

Paris at the turn of the 20th century was a vibrant international center for the development of the visual arts, including painting, photography, film, and the graphic arts, particularly in the

exploding domains of posters and illustrated journals. In this seminar, we study the period 1880 to 1910, and examine how diverse modes of urban visuality were at the heart of the development of French modern art. The place of graphic arts in promoting popular entertainments such as ballet, opera, and café concerts is considered. Another focus is the powerful role of Parisian satirical journals and caricature in debating matters of class, race and national identity. We examine diverse modes of displaying and selling the visual arts, particularly in the spheres of World's Fairs, annual salons, and in the avant-garde spaces of gallery and café exhibitions. Theoretical and historical readings include Bourdieu, Debord and Simmel; artists of central concern include Lautrec, Chéret, Mucha, Degas, Pissarro, the Nabis, Vallotton, and early filmmakers such as the Lumière brothers and Méliès. Special focus is given to works owned by the Kemper Art Museum and other local collections, in preparation for a possible exhibition in two years. Prerequisites: L01 Art-Arch 215 or permission of instructor; one 300-level course in modern art history, or a course in modern French history or literature preferred. French language reading skills not required. Credit 3 units. A&S IQ: HUM

L01 Art-Arch 4818 Matisse and Modernisms

Certain artists generate enormous interest during their lifetimes and long after. Over time the work of such artists is subjected to a variety of interpretive approaches in light of changing trends in art criticism and art history; the influence of contemporary art; the ebb and flow of interest in different aspects of the artist's production; changes in the political landscape; and the changing sense of how the artist's work intersects with contemporary cultural developments. This set of intersecting concerns is especially fluid in the modern period, when there is no single dominant idea of the role of art in society. The variety of interpretive strategies developed from and applied to the work of Henri Matisse demands a critical reading of the extensive literature on the artist, as well as an understanding of the variety of modernisms through which to assess his artistic project. Students gain a thorough familiarity with the work of one of the most influential artists of the 20th century; engage aspects of the historiography of 20th-century art through a survey of developments in the Matisse literature; and develop a specific topic in Matisse's art, or the writing about his art, into a class presentation and research paper. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4819 The Century of Picasso

The art of Pablo Picasso (1881-1973) spanned three-quarters of the 20th century, and posthumous critical response to his work shows no sign of abating. Picasso was a leading figure in the European primitivist trends at the beginning of the last century, and with Georges Braque, he developed the aesthetic system of Cubism, which rewrote the rulebook of artistic representation. Although he was not an activist, his art routinely engaged momentous political events. Toward the end of his career, he strove to shape his legacy through artistic dialogues with artists of the past by appropriating their styles or subjects, and making them his own. Such eclectic activity, coupled with his creativity and prolific output, has ensured his place among the most influential artists of his century. Prerequisites: one 300-level course in modern art or permission of instructor; junior, senior or graduate standing. Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 4854 Gauguin in Polynesia: The Late Career

This seminar focuses on the late career of Paul Gauguin, in Tahiti and the Marquesas. This course examines closely the colonial context of fin-de-siècle French Polynesia, Gauguin's response to indigenous culture, his ongoing interests in European currents of theosophy and anarchism, the development of his primitivist style in response to the French avant-garde, and Gauguin's legacy to modern art and culture in the early 20th century. Readings range from primary texts (literature and journals read by the artist, his letters, his satirical articles and caricatures produced for a Tahitian newspaper, his treatises on religion), to postcolonial theory and recent critiques of primitivism. French reading skills are useful, but not required for the course. We visit the Saint Louis Art Museum to view both the Oceanic collection, and prints and paintings by Gauguin. Prerequisite: at least one upper-level course in modern art history, or permission of the instructor. Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4856 French Art and Politics in the Belle Epoque

This interdisciplinary seminar addresses the rich intersection of politics, fine arts and visual culture in modern France from the Franco-Prussian War to World War I (1870–1914). We study the political trends, historical events and cultural conditions of the era and their direct influence on the production and reception of a wide range of visual arts, ranging from official paintings and monuments to popular culture such as tourist and documentary photography, commercial posters and political caricature. We also examine the question of what it meant in the Belle Epoque to be an avant-garde artist and how such artists expressed political sentiment in their work. Prerequisite: permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4859 Visualizing Orientalism: Art, Cinema and the Imaginary East 1850-2000

This seminar examines film and modern art within the framework of "Orientalism." Reading foundational texts by Said, and incorporating theory and historical discourse concerned with race, nationalism and colonialism, we explore artistic practice in European photography, painting and decorative arts from 1850 to recent times, and European and Hollywood film. We study how power and desire have been inscribed in western visual culture across the bodies of nations and peoples through conventions such as the harem, the odalisque, the desert, and the mysteries of ancient Egypt. To that end, we look at artists such as Delacroix, Ingres, Gérôme, Beardsley, and Matisse and screen films such as *The Sheik*, *The Mummy*, *Salome*, *Cleopatra*, *Pepe le Moko*, *Naked Lunch*, *Shanghai Gesture*, *Thief of Bagdad*, *Princess Tam Tam* and *The Sheltering Sky*. Subjects include the representation of gender, sexuality, desire, race and identity as well as the cultural impact of stereotype and "exotic" spectacle. Students study methods of visual analysis in film studies and art history. All students must attend film screenings.

Same as Film 485

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD EN: H

L01 Art-Arch 4861 Paul Gauguin in Context

An examination of the art and career of Paul Gauguin (1848–1903) and the artistic, social and political milieu in which he worked in France and Polynesia. Readings include the artist's writings; studies of avant-garde culture and primitivism

in fin-de-siècle France; and postcolonial theory. Special emphasis is given to the relationship of the artist and his work to indigenous Polynesian and French colonial cultures of the 1890s. Prerequisite: Art-Arch 211 or any 300-level course in art history, or permission of instructor. Reading knowledge of French useful, but not required.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH

L01 Art-Arch 4863 The Photographic Muse: The Modern Artist and the Camera

An examination of the interplay of photography with painting and sculpture in European art from 1850 to World War I, with an emphasis on the fin-de-siècle. Readings address the history of the medium; the critical debates (starting with Baudelaire) over photography as a tool of science or of art; the rise of ethnographic photography; the Symbolist ambivalence toward technology; and the development of Pictorialism at the turn of the century. Artists studied include Nadar, Moreau, Degas, Rodin, Steichen, Gauguin, Munch, the Nabis, Brancusi and Picasso. Prerequisite: graduate standing.

Credit 3 units. A&S: TH Art: AH

L01 Art-Arch 4864 Exoticism and Primitivism in Modern Art

An interdisciplinary investigation of the development of exoticism and primitivism in European and American art from the Enlightenment to World War II. Topics include exoticist representations of non-Western cultures; the links between colonialism and orientalism; the intersection of discourses on race and gender with exoticism; and the anti-modernist impulse of fin-de-siècle primitivism. Sample artists and authors include Delacroix, Flaubert, Gauguin, LaFarge, Picasso and Matisse. Prerequisites: any 300-level course in art history and permission of the instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4867 The Impressionist Landscape: Style, Place and Global Legacies 1870–1920

We consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but soon expanded into an avant-garde style that objectified sensation and emotion in the name of truth in representation. We examine the place of individual perception, the physiology of sight, and theories of the natural in the development of the Impressionist landscape, through the consideration of style, genre, artistic theory and these artists' investment in particular sites. Furthermore, the social, commercial and critical networks that supported the movement are analyzed. Particular attention is given to Monet, and a special exhibition of his water lily paintings on view at the Saint Louis Art Museum. Other key artists include Degas, Morisot, Renoir and Cassatt. We also discuss the relationship of the Impressionist landscape to the development of modernist abstraction, and the aesthetic and nationalist motivations for its appropriation across the globe. Prerequisite: Art-Arch 112 Introduction to Western Art, Art-Arch 211 Introduction to Modern Art, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM, LCD Art: AH EN: H

L01 Art-Arch 4868 Impressionism and the Nation in France and Beyond: Painting and Photography 1860-1920

We consider Impressionism as a dominant style of the Parisian art world, first undertaken as an extension of Barbizon naturalism, but expanded into an avant-garde style that

objectified sensation and emotion in the name of truth in representation. Our central question is the relationship of individual perception, the physiology of sight, and theories of the natural in relation to the importance of place — both region and nation — in the political imagination of the era. We also address the relationship of the Impressionist landscape to the development of modernist abstraction, and the aesthetic and nationalist motivations of its adaptation as a modernist style around the globe. Particular attention is focused around an exhibition "Impressionist France: Visions of Nation" at the St. Louis Art Museum. This seminar has a required travel component to see related works of art in Kansas City and on the east coast; students' expenses are covered. Prerequisite: senior major in art history, or graduate student standing and permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 4877 Critical Studies in Portraiture, Ancient to Contemporary

To study portraiture is to confront the complexity of human identity. The central theoretical question of this course is how identity can be expressed in a portrait. Following consideration of theories of portraiture, identity and artistic representation, we treat specific historical and cultural instances of portraiture-making, from ancient Greece to the present. Non-Western cultural examples broaden the scope beyond the conventional conceptions of portraiture. We conclude by trying to understand the continuing allure of the portrait today as digital media challenge our conventional ideas of visibility, and perhaps even the urgency of portraiture in the post-human age.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4878 Cold War Cultures, United States and Europe, ca. 1945–1955

This seminar examines the art worlds that emerged in France and Germany after the end of World War II, and the ensuing dialogue with the United States, newly established as the most influential center for art and culture. We consider the social and political conditions of the post-war years, along with the aesthetic, cultural and philosophical reactions to the devastating consequences brought about by World War II. We pay particular attention to the intellectual and ideological debates that would — by 1949 — give rise to the extreme polarities between East and West, democracy and communism — in short, the confrontations that distinguish the Cold War. Artists such as Jackson Pollock and Willem de Kooning in the United States, Hans Hartung and K.O. Götz in Germany, and Jean Fautrier and Alberto Giacometti in France are examined, as well as the broader artistic movements that are known under such labels as Abstract Expressionism, Informel, Tachisme or Un art autre. Prerequisites: Art-Arch 112 Introduction to Western Art, Art-Arch 211 Introduction to Modern Art, or Art-Arch 215 Introduction to Modern Art, Architecture and Design; one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4900 Independent Study and Research

L01 Art-Arch 4905 Greenberg Curatorial Study

The Arthur Greenberg program offers students the experience of curating an exhibition. A small team (of two or three) are selected through a competitive application process the year before they enroll in the course. Students sign up for 3 credits

in the fall semester, and one credit in the spring. Under the supervision of a faculty mentor in the Art History & Archaeology Department and a curator in the Mildred Lane Kemper Art Museum, students plan and curate an exhibition for the museum's Teaching Gallery. They also research and write a short brochure, prepare educational materials, and offer related programs for the exhibition which usually opens in April. Fall three-unit course fulfills a departmental capstone requirement for the major.

Credit variable, maximum 4 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 4918 Obscene as Cancer: Modern War in Art

Art and war have always been intertwined, whether in glory or revulsion. But modern art and modern war are qualitatively different from their counterparts in the past in ways that ensured that their relationship would become more problematic and oppositional. The challenge of finding new artistic languages to express the new conditions of mechanized combat led many artists to explore abstraction, fragmentation, absurdity or arbitrariness to convey the energy, impersonality and nihilism of modern war. Special emphasis is placed on World War I and its artistic legacy owing to the ongoing centenary recognitions of that war, including the special exhibition to be held at WU's Kemper Art Museum: World War I: War of Images, Images of War. When the British soldier and poet Wilfred Owen (1893–1918) wrote of the human devastation of World War I as "obscene as cancer, bitter as the cud," he strained for metaphorical language appropriate to its magnitude. We consider the same challenge to visual artists throughout the modern period. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM

L01 Art-Arch 4921 Theory for Art History: Modernism/Modernity/Postmodernism

This course introduces key modern theories. Considering diverse thinkers, this seminar focuses on concepts that have framed and re-framed the study and interpretation of aesthetic modernism and postmodernism over the past century. We read and discuss primary theories and probe their application through close visual readings of individual works of art. Discussions seek a better understanding of the role and meaning of the aesthetic object within a variety of theoretical contexts, extending from an investment in the universalist modern artistic subject, to the shifting role of the contingent viewer within modernity to an expansion of the traditional boundaries of the discipline of art history into visual studies. Prerequisites: advanced undergraduate standing, permission of the Instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4922 From the Death of the Author to the Birth of YouTube: Identity in Contemporary Art

What constitutes an artist today, when anyone can upload his or her musings to the entire world? Is the question even relevant? This course introduces students to the construction of artistic identity in contemporary art. Students consider major themes governing the production of contemporary art. We cover such topics as the death of the author and the end of art, identity politics and "authenticity," and the effects of new media on the construction of artistic persona. This course assumes a basic familiarity with the methods of art history, as well as general knowledge of art history before 1960. Prerequisites: Introduction

to Western Art or Introduction to Modern Art and one 300-level course in art history, or permission of the instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 4923 Globalization and Contemporary Art

What does globalization mean for contemporary art? And what do we even mean when we use the term? This upper-level seminar course considers recent art (1985–present) in the context of theories of development, postcolonialism and globalization. We focus on the tensions between the global and the local, as well what it means for an artist to be national or international. We also consider the impact of neoliberal economic policies on art production and the art market, as well as the role museums play in this international context. Finally, we consider the Internet and social networks as globalizing influences that affect the production and distribution of contemporary art. Prerequisites: Introduction to Western Art or Introduction to Modern Art and one 300-level course in art history, or permission of the instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 4924 1968 and its Legacy

The events of 1968, including the May riots in Paris, the Tucuman Arde exhibition in Argentina, the Tlatelolco Massacre in Mexico City, and the Prague Spring (and Russian winter) in the Czech Republic, just to name a few, ushered in a new political and social imperative for artists. This class starts with 1968 and traces its legacy to the social and cultural movements of the 1980s, 1990s and early 2000s. We seek to understand the historical underpinnings of contemporary activist art and determine the roles of socially-motivated art in the current political and intellectual climate. Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 4925 The Persona of the Artist: Contemporary Visual Artists and their Writings

An art movement is located as much in the writing that "surrounds" it as in the body of objects that apparently "comprise" it. In the art world today, it is generally accepted that artists are also artist-writers. This course explores this phenomenon by examining the writings of late 20th- and early 21st-century visual artists. In addition to studying social and political contexts, we analyze the various modes of writing that artists employ, look for specific points of intersection between their art and writing, consider the circumstances and venues of the writings' publication, study how the writings figure into the contemporary reception of the artists' visual practices, and evaluate art historians' uses of artists' writings. In exploring a range of case studies, we contemplate the motivations and critical function of writing versus or in combination with art-making as well as the role that the practice of writing plays in forming the identity of the contemporary artist-subject. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S IQ: HUM

L01 Art-Arch 4975 Collecting Cultures: Taste, Passion and the Making of Art Histories

This seminar examines the theory and the cultural history of the collecting of art objects and artifacts from a range of cultures and periods, considering how and why both individuals and

institutions create collections. What social and psychological factors drive this passion? What are the various cultural, political and aesthetic priorities that have driven this practice historically? How is cultural patrimony defined, and how do law, the art market and cross-cultural ethics impact the placement, study and display of a culture's material heritage? We build the seminar around the history of collecting in America, with a focus on Midwestern examples, and particularly, important case studies in St. Louis. We, for example, consider the significant local collections built by Joseph and Emily Rauh Pulitzer (modern art), and Morton May (modern and oceanic art), as well as the histories of both modern and non-Western collections now owned by the St. Louis area museums. This course is complemented by various local field trips (SLAM, Pulitzer, Kemper and Cahokia). Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211 or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 4976 The American Trauma: Representing the Civil War in Art, Literature and Politics

This seminar is an interdisciplinary examination of how Americans represented the Civil War during and after the titanic conflict, with special attention given to the period between 1865 and 1915. The course explores how painters, novelists, photographers, sculptors, essayists, journalists, philosophers, historians and filmmakers engaged the problems of constructing narrative and reconstructing national and individual identity out of the physical and psychological wreckage of a war which demanded horrific sacrifice and the destruction of an enemy that could not be readily dissociated from the self. Thomas Eakins, Walt Whitman, Herman Melville, the Jameses (William and Henry), Mark Twain, Augustus St. Gaudens, Kate Chopin, W.E.B. Du Bois, Frederick Douglass, Henry Adams, Mary Chesnut, Charles Chesnut, George Barnard and Alexander Gardner are some of the figures considered.

Same as History 4976

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L01 Art-Arch 4982 Public Art: History, Practice, Theory

The course considers the history and functions of public art, with special attention to public art in St. Louis. We survey not only the obvious forms of public art in urban sculpture and mural painting, but also less traditional intersections of art and public in such sites as the internet. We also examine the operations of institutions — national and local arts agencies, international exhibitions, nonprofit centers and the like — that foster a public engagement with contemporary art. Finally, we consider new priorities and projects in public art, especially socially oriented and environmentally sustainable initiatives. Prerequisites: Art-Arch 112 Introduction to Western Art or Art-Arch 211 Introduction to Modern Art; one 300-level course in art history preferred, or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L01 Art-Arch 499 Honors Art History and Archaeology

A major research paper acceptable to the department. Prerequisite: permission of the department. Max. 6 units.

Credit 3 units. A&S: TH Art: AH EN: H

Biology

Biology is an exciting, diverse field ranging from the molecular biology of individual cells to interactions among entire populations of organisms. Members of the biology faculty are recognized internationally for their research and bring a variety of strengths and teaching styles into the classroom. The major program in biology provides a thorough education in the history of scientific discovery in biology, the logical and statistical procedures used to formulate and to test biological hypotheses, and technical skills needed for conducting contemporary biological research. The biology major program emphasizes the hierarchical nature of biological complexity and the major structures and functions that emerge at the molecular, cellular, organismal, populational and ecosystem levels. Each student masters at least one dimension of contemporary research in sufficient detail to describe the major hypotheses currently being tested and to demonstrate techniques used to test those hypotheses. Mastery of this material is evident in a student's ability to critique published data, identifying ambiguities and uncertainties in conclusions drawn from those data, and to evaluate the societal importance of the research. Biology majors are prepared to make creative contributions to biology.

The biology major program provides a wide range of research opportunities. Because more than 400 faculty members conduct research in biology and biomedical sciences at Washington University, it is easy to find a project that suits a student's main interests. Many students complete their research projects at the Washington University School of Medicine, one of the top-ranked medical schools in the country. Summer research fellowship programs are available, funded by sources including the Howard Hughes Medical Institute, Children's Discovery Institute, National Science Foundation, and the Washington University Office of Undergraduate Research. Visit <http://www.nslc.wustl.edu/courses/Bio500/bio500.html> for detailed information on finding a research mentor. The biology department publishes a handbook that describes relevant careers in the biotechnology industries, agriculture, science communication, academic research and teaching, and health-related areas such as medicine, veterinary medicine, dentistry and genetic epidemiology (visit <http://www.nslc.wustl.edu/handbook/handbook.pdf>).

Majors

The Major in Biology

Total units required: 58–67

Required courses:

Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Math 132	Calculus II	3
Math 2200	Elementary Probability and Statistics	3
or Math 233	Calculus III	
or Math 3200	Elementary to Intermediate Statistics and Data Analysis	
Physics 117A	General Physics I	4

or Physics 197 Physics I

Physics 118A General Physics II 4

or Physics 198 Physics II

Students may substitute Chem 401 Physical Chemistry I for Chem 262 Organic Chemistry II with Lab. Students who plan to take physical chemistry must take Math 233 Calculus III. Math 2200 Elementary Probability and Statistics, required for tracks in ecology and evolution and in genomics and computational biology, and Math 322 Biostatistics are valuable, particularly for students interested in research. Students who have taken Math 233 may take Math 3200 Elementary to Intermediate Statistics and Data Analysis rather than Math 2200 Elementary Probability and Statistics for a more advanced treatment of statistics.

At least 18 units in advanced biology courses (numbered 300 or above) are required. These 18 units may not include Biol 303A, Biol 307A, Biol 374, Biol 387, Biol 388, Biol 393, Biol 429, Biol 487, Biol 488; cross-listed courses originating in other departments (except Biol 360, Biol 4202, Biol 4810 and Biol 4820, which count as biology major credit despite external origins); courses in University College; or more than 3 units of history-of-science courses. Majors are required to take at least one course from each of these three areas:

Area A: Cellular and Molecular Biology

Biol 3041	Plant Biology and Genetic Engineering	4
Biol 334	Cell Biology	3
Biol 3371	Eukaryotic Genomes	4
Biol 349	Microbiology	4
Biol 4025	Current Approaches in Plant and Microbial Research	4
Biol 424	Immunology	4
Biol 451	General Biochemistry	4
Biol 4810	General Biochemistry I	3
Biol 4820	General Biochemistry II	3

Area B: Organismal Biology

Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3411	Principles of the Nervous System	3
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains and Behavior	3
Biol 4023	How Plants Work: Physiology, Growth and Metabolism	3
Biol 4030	Biological Clocks	3
Biol 4071	Developmental Biology	3

Area C: Evolution, Ecology and Population Biology

Biol 3501	Evolution	4
Biol 381	Introduction to Ecology	3

Biol 4170	Population Ecology	3
Biol 4181	Population Genetics (and Microevolution)	3
Biol 4182	Macroevolution	3
Biol 4183	Molecular Evolution	3
Biol 419	Community Ecology	4
Biol 4202	Evolutionary Genetics	3
Biol 472	Behavioral Ecology	4

Majors also must take an advanced laboratory course from the following list:

Biol 3110	Vertebrate Structure Laboratory	4
Biol 3491	Microbiology Laboratory	3
Biol 3492	Laboratory Experiments with Eukaryotic Microbes	3
Biol 360	Biophysics Laboratory	3
Biol 373	Laboratory on the Evolution of Animal Behavior	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4193	Experimental Ecology Laboratory	4
Biol 4241	Immunology Laboratory	3
Biol 4342	Research Explorations in Genomics	4
Biol 434W	Research Explorations in Genomics (Writing-Intensive)	4
Biol 437	Laboratory on DNA Manipulation	4
Biol 4520	Protein Function in Model Cellular Systems	3
Biol 4522	Laboratory in Protein Analysis, Proteomics and Protein Structure	3
Biol 4523	Mutagenesis and Enzyme Analysis	4

All courses to be counted toward a major in biology must be taken for a letter grade if a letter grade is offered. A grade of C– or better must be earned in all of these courses.

In special cases, students may earn credit for graduate courses offered by the Division of Biology and Biomedical Sciences.

Optional Biology Major Tracks

A student majoring in biology may choose one of four optional tracks within the major if the student's interests lie primarily within one of these subfields of biology. A track provides strong training for graduate study in its subfield. *All tracks require completion of the biology major requirements as stated above* but provide concentrated study in one of the four subfields.

The Major in Biology: Ecology and Evolution Track

Additional requirements include Math 2200 or Math 3200. Students whose main interest is ecology must take at least two ecology electives and one evolution elective; students whose main interest is evolution must take at least two evolution

electives and one ecology elective (evolution electives: Biol 3501, Biol 4181, Biol 4182, Biol 4183, Biol 4202; ecology electives: Biol 381, Biol 4170, Biol 419, Biol 472). Also required are one elective in analytical methodology (CSE 131, CSE 424 or Math 322) and one elective in earth and planetary sciences (EPSc 201, EPSc 323 or EPSc 418). The course used to fulfill the advanced laboratory requirement for the major must be Biol 373, Biol 4193, Biol 437, Biol 4342 or Biol 434W.

The Major in Biology: Genomics and Computational Biology Track

Additional requirements include Biol 3371 (or Biol 4183 or Biol 548), Math 2200 or Math 3200, and two outside electives (CSE 131, CSE 241). The course used to fulfill the advanced laboratory requirement for the major must be Biol 3492, Biol 4342, Biol 434W or Biol 437. Biology courses recommended for students in this track include Biol 334, Biol 3422, Biol 349, Biol 4030, Biol 4181, Biol 4183 and Biol 4810. Recommended electives outside biology include CSE 240, CSE 447T, Math 217 and Math 309.

The Major in Biology: Biochemistry and Molecular Biology Track

Additional requirements include both Biol 4810 and Biol 4820; and either Biol 334, Biol 3371 or Biol 349. The advanced laboratory course used to fulfill major requirements must be one of the following: Biol 3491, Biol 3492, Biol 4342/Biol 434W, Biol 437, Biol 4520, Biol 4522 and Biol 4523. Additional biology courses recommended for students in this track include Biol 3041, Biol 4023, Biol 4183, Biol 4832 and Biol 5312.

The Major in Biology: Neuroscience Track

Biology major requirements must be met with the following courses: Biol 3058, area A (Biol 334, Biol 451, Biol 4810 or Biol 4820), area B (Biol 3411), any course in area C, and advanced laboratory (Biol 360 or Biol 404). Students must select at least one biology elective (Biol 3110, Biol 3151, Biol 328, Biol 3371, Biol 3421, Biol 3422, Biol 4030, or Biol 437) and one outside elective either in physics (Physics 350, Physics 352, Physics 355 or Physics 360) or in psychology (Psych 330, Psych 360, Psych 3604 or Psych 4604). Math 2200 (or Math 3200) is recommended.

See also related majors in biomedical engineering (p. 825), philosophy–neuroscience–psychology (PNP) (p. 678) and philosophy of science (p. 666).

The Major in Environmental Biology

Students interested in environmental biology typically take Biol 2950 Introduction to Environmental Biology during fall of the freshman year, although it may be taken later. A 400-level class to be required for Latin honors in environmental biology will be introduced. All other courses required for the environmental biology major are currently listed.

Required courses:

Biol 2950	Introduction to Environmental Biology	3
Biol 2960	Principles of Biology I (lecture and lab)	4
Biol 2970	Principles of Biology II (lecture and lab)	4
Biol 381	Introduction to Ecology	3
Chem 111A & Chem 151	General Chemistry I and General Chemistry Laboratory I (lecture and lab)	5
Chem 112A & Chem 152	General Chemistry II and General Chemistry Laboratory II (lecture and lab)	5
EPSc 201	Earth and the Environment (lecture and lab)	4
Math 131	Calculus I	3
Math 132	Calculus II	3
Physics 117A or Physics 197	General Physics I Physics I	4

One of the following Chemistry courses:

Chem 261	Organic Chemistry I with Lab	4
EPSc 323	Biogeochemistry	3

One of the following courses in Statistics, GIS:

Math 2200	Elementary Probability and Statistics	3
Math 3200	Elementary to Intermediate Statistics and Data Analysis	3
EnSt 380	Applications in GIS	3

One upper-level Biology lab course:

Any course that fulfills the advanced laboratory requirement of the biology major is acceptable; we recommend: Biol 4193 Experimental Ecology Laboratory (4 credits, writing intensive).

One of the following Biol 300+ courses (Area A and B in Biology):

Biol 3041	Plant Biology and Genetic Engineering	4
Biol 334	Cell Biology	3
Biol 349	Microbiology	4
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 3411	Principles of the Nervous System	3

Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains and Behavior	3
Biol 4023	How Plants Work: Physiology, Growth and Metabolism	3
Biol 4025	Current Approaches in Plant and Microbial Research	4
Biol 4030	Biological Clocks	3
Biol 451	General Biochemistry	4
Biol 4810	General Biochemistry I	3

One of the following Biol 300+ courses (Area C in Biology):

Biol 3501	Evolution	4
Biol 4170	Population Ecology	3
Biol 4181	Population Genetics	3
Biol 4182	Macroevolution	3
Biol 419	Community Ecology	4
Biol 472	Behavioral Ecology	4

One additional Biol 300+ major-track course (may include Biol 500):

- See [Biology Course Listings](#)

One of the following EPSc 300+ courses:

EPSc 323	Biogeochemistry (only if not already taken for chemistry requirement)	3
EPSc 352	Earth Materials	5
EPSc 353	Earth Forces	4
EPSc 385	Earth History	3
EPSc 408	Earth's Atmosphere and Global Climate	3
EPSc 409	Surface Processes	4
EPSc 413	Introduction to Soil Science	3
EPSc 422	Sedimentary Geology	4
EPSc 428	Hydrology	3
EPSc 443	Methods in Biogeochemistry	3
EPSc 444	Environmental Geochemistry	3
EPSc 448	Microbial Geochemistry	3

Additional Information

Research: Research opportunities are available in the student's first or second year through Biol 200; such opportunities are available in the third and fourth years through Biol 500. A research emphasis in the major requires at least 6 credits (two semesters) of Biol 500 research and an approved senior thesis on this research. The research emphasis is acknowledged on the degree either by Latin honors or by a research milestone (for students who do not meet the GPA requirements for Latin honors as described below).

Senior Honors: Biology majors are encouraged to work for senior honors, which requires a 3.30 grade point average in biology, a 3.30 average in nonbiological sciences (mathematics,

chemistry and physics courses) and a 3.65 overall grade point average at the time of graduation. Also required are 6 units of Biol 500 research and an approved thesis from this work. Students interested in Senior Honors should begin Biol 500 no later than spring of the junior year.

The Biology department awards the Marian Smith Spector Prize to an undergraduate who has an excellent academic record and submits an outstanding honors thesis. It also awards the Harrison D. Stalker Prize to a graduating senior whose college career is distinguished by scholarship, service and breadth of interest.

Minors

The Minor in Biology

Units required: 18 units of biology and 14 units of chemistry

Required courses:

Biol 2960	Principles of Biology I (prerequisite Chem 111A)	4
Biol 2970	Principles of Biology II (prerequisite Chem 112A)	4
Chem 111A & Chem 151	General Chemistry I and General Chemistry Laboratory I	5
Chem 112A & Chem 152	General Chemistry II and General Chemistry Laboratory II	5
Chem 261	Organic Chemistry I with Lab	4

Total units **22**

Elective courses:

The minor requires 10 advanced units in biology selected from the following:

Biol 3041	Plant Biology and Genetic Engineering	4
Biol 3058	Physiological Control Systems	2
Biol 3100	R Workshop in Biology	1
Biol 3110	Vertebrate Structure Laboratory	4
Biol 3151	Endocrinology	3
Biol 328	Principles in Human Physiology	4
Biol 334	Cell Biology	3
Biol 3371	Eukaryotic Genomes	4
Biol 3411	Principles of the Nervous System	3
Biol 3421	Introduction to Neuroethology	3
Biol 3422	Genes, Brains and Behavior	3
Biol 349	Microbiology	4
Biol 3491	Microbiology Laboratory	3
Biol 3492	Laboratory Experiments with Eukaryotic Microbes	3
Biol 3501	Evolution	4
Biol 360	Biophysics Laboratory	3

Biol 373	Laboratory on the Evolution of Animal Behavior	3
Biol 381	Introduction to Ecology	3
Biol 4023	How Plants Work: Physiology, Growth and Metabolism	3
Biol 4025	Current Approaches in Plant and Microbial Research	4
Biol 4030	Biological Clocks	3
Biol 404	Laboratory of Neurophysiology	4
Biol 4071	Developmental Biology	3
Biol 4170	Population Ecology	3
Biol 4181	Population Genetics	3
Biol 4182	Macroevolution	3
Biol 4183	Molecular Evolution	3
Biol 419	Community Ecology	4
Biol 4193	Experimental Ecology Laboratory	4
Biol 4202	Evolutionary Genetics	3
Biol 424	Immunology	4
Biol 4241	Immunology Laboratory	3
Biol 427	Problem-Based Learning in Biomedical Sciences	3
Biol 4331	Algae: Cell Biology and Molecular Evolution	2
Biol 4342	Research Explorations in Genomics	4
Biol 434W	Research Explorations in Genomics (Writing-Intensive)	4
Biol 437	Laboratory on DNA Manipulation	4
Biol 451	General Biochemistry	4
Biol 4520	Protein Function in Model Cellular Systems	3
Biol 4522	Laboratory in Protein Analysis, Proteomics and Protein Structure	3
Biol 4523	Mutagenesis and Enzyme Analysis	4
Biol 472	Behavioral Ecology	4
Biol 4810	General Biochemistry I	3
Biol 4820	General Biochemistry II	3
Biol 4830	Bioenergy	2
Biol 4832	Molecular Mechanisms of Photosynthesis and Respiration	3

Additional Information

All courses utilized for the biology minor must be taken for a letter grade. A grade of C– or better must be earned in all of these courses.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L41 Biol.

L41 Biol 112 Introduction to Problem-based Learning in Biology

Small groups of students take responsibility for their own active learning in their team with guidance from an instructor. Each group in rotation considers four problems of biological importance such as rainforest destruction, coral reefs, laboratory diagnoses, sleep, high altitude, deafness, infertility, modern epidemics, clinical cases, genetic engineering and cloned animals. Students find the background information by library searches and integrate this knowledge in group discussions. Enrollment limited. Intended for but not limited to prospective biology majors. Prerequisite: high school biology, preferably an AP class. For freshmen only.

Credit 3 units. A&S: NS A&S IQ: NSM Arch: NSM Art: NSM BU: SCI

L41 Biol 171 Neuroscience Futures 1: How do we learn about the brain?

In this seminar course for first-year students, students learn about how neurobiologists conduct and communicate research. We focus our discussion on primary research papers written by WUSTL neurobiologists, who visit the class to present their work. Discussion then focuses on the formulation of scientific questions, evaluation of evidence and interpreting data within the context of a broader field. Students meet neuroscience colleagues in two joint class periods with participants in a neurobiology seminar for 2nd, 3rd and 4th year students.

Credit 1 unit. Arch: NSM

L41 Biol 1770 Genetics and Behavior of Dog Breeds

This freshman seminar uses the topic of dog behavior and genetics to teach fundamental scientific tools and to engage students in contributing to the building of an online public resource that summarizes the scientific literature on breeds. Our first task is learning to read and dissect primary scientific literature. We parse out the difference between scientific questions, hypotheses and predictions through a guided case-study exercise. We then apply the experience to outlining primary research articles, identifying the key components of the author's arguments, and summarizing the results and implications. The second half of the semester is spent searching the scientific literature, sorting information into the new dog breed resource, and presenting results to peers around the seminar table.

Credit 1 unit.

L41 Biol 181 Freshman Seminar in Biology

A lecture course intended for first-year students that focuses on the practice and culture of biomedical research. Active researchers describe the biological context of their research, the specific questions formulated, the means by which they pursue the answers, and their data and conclusions. The focus is on process: how biologists pursue their profession in a research setting. Additional topics of clinical and contemporary interest are often included. Students are expected to attend all lectures. Must be taken credit/no credit.

Credit 1 unit. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 1810 Freshman Seminar in Imaging Sciences

An introduction to the breadth and depth of imaging sciences across the schools of Arts & Sciences, Medicine and Engineering, on topics from radiology to cell biology. Seminars are presented by experts in these fields to acquaint

undergraduate students with advances in imaging sciences and research opportunities in these areas. No prerequisites, primarily for freshmen and sophomores, but open to all students.

Credit 1 unit. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 191 Phage Hunters

A research-based laboratory class for freshmen. Students join a national experiment organized by HHMI, with the goal of isolating and characterizing bacteriophage viruses found in the soil in the St. Louis area. Laboratory work includes isolation and purification of the student's own phage, DNA isolation and restriction mapping, and EM characterization of student's phage. Several WUSTL phage are selected for genome sequencing over winter break, and are annotated in the spring in Biol 192, Phage Bioinformatics. Students who successfully isolate and annotate a phage may become co-authors on a scientific paper. Prerequisites: high school courses in biology and chemistry, at least one at the AP or International Baccalaureate level; permission of the instructor. Limited to 40 students. One hour lecture, one hour discussion, and three hours lab per week. Same as Focus 1910

Credit 3 units. A&S: NS A&S IQ: NSM BU: SCI

L41 Biol 192 Phage Bioinformatics

A research-based laboratory class for freshmen. Students join a national experiment organized by HHMI, with the goal of genomic characterization of a local phage. Laboratory work focuses on learning computer-based tools for genome analysis followed by annotation and comparative analysis of the genome of a phage (bacterial virus) that was isolated fall semester at WUSTL and sequenced over winter break. Prerequisites: high school courses in biology, chemistry and physics, at least one at the AP or International Baccalaureate level; permission of the instructor. Limited to 40 students; preference given to those completing Biol 191 Phage Hunters. One hour lecture, one hour discussion and three hours lab per week.

Same as Focus 1920

Credit 3 units. A&S: NS A&S IQ: NSM BU: SCI

L41 Biol 193 Investigating Eukaryotic Genomes

An introduction into the world of genes and genomes in higher organisms (eukaryotes). An exploration of genes and genomes, their organization, evolution and function, considering genetic disabilities and the ethics of genetic testing in the context of ongoing genomic research. The course is a combination of lecture/discussion of genes and genomes, including societal issues, and computer based analysis of particularly interesting regions of the genome of the fruit fly *Drosophila melanogaster*, providing an introduction to bioinformatics. All enrolled students contribute to the ongoing analysis of *Drosophila* dot chromosomes, becoming eligible to be co-authors on the resulting publication. Prerequisites: Students should have a good grounding in science and math, including high school biology and chemistry, with at least one science course at the AP or IB level. Letter grade. Class meets 5 hours/week (1 hour lecture, 1 hour discussion, 3 hour lab). Open to freshmen and sophomores. Fall semester.

Credit 3 units. A&S IQ: NSM

L41 Biol 200 Introduction to Research

An introduction to laboratory and field research in biology for first- and second-year students. Students work under the supervision of a sponsor in a setting of established, ongoing research. Prerequisite: permission of sponsor and

the department. For online enrollment instructions see: <http://nslc.wustl.edu/courses/Bio500/bio500.html>. Students are registered by the department after approval is granted. Registration may not appear in Webstac until mid-semester. Credit variable, maximum 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 2010 The Science of Biotechnology

Biotechnology is truly interdisciplinary with a myriad of pieces from biology, chemistry, engineering, physics, computer sciences, management, public policy and law that apply the scientific process to societal challenges. This course introduces topics for science and engineering majors with an interest in biotech and teaches scientific concepts to business students considering careers in biotech management and entrepreneurship. Students completing Biol 2010 understand key science concepts, how discoveries lead to applications addressing global challenges, effectively use a variety of resources to explore connections between science and biotech business, synthesize information from different fields, exhibit strong teamwork skills, and communicate information in written and oral forms. This course also provides a gateway for students interested in the two-year Biotech Explorers Program (BEP). The first two weeks of the course introduce students to the history of biotechnology, the BEP, and the use of case studies. The remainder of the course uses a series of four 3-week units that combine lecture material, in-class group assignments, and readings to introduce the science and scope of biotechnology. For each unit, student teams also develop short case studies of St. Louis biotech companies and present their findings to the class. A series of site-visits introduces students to the vibrant St. Louis biotech community. Limited to 20 students. Credit 3 units. A&S: NS A&S IQ: NSM

L41 Biol 2020 Biotechnology Entrepreneurs Seminar

Although the biotech industry is science-based, the risks of product and technology development, legal issues, and market pressures make the landscape full of uncertainty. Lectures and textbooks fall short of delivering true insight about the process and challenges of bringing ideas to real-world products. This second semester freshman seminar course is designed to develop an appreciation of how biotech companies achieve their goals by engaging students through interactions with experienced executives and entrepreneurs, whose shared knowledge and stories add depth and context to the learning process. This 1-credit seminar course introduces students to the basics of innovation and entrepreneurship as a framework for marketable discoveries; builds an appreciation of how biotech companies start, obtain funding, and navigate intellectual property; provides an overview of career options in biotech, and insight on the hiring process. Prerequisite: Students need to have completed Biol 2010: The Science of Biotechnology for enrollment in this course and must be currently enrolled in Biol 2960: Principles of Biology I. Limited to 20 students. Same as L61 Focus 2020. Credit 1 unit.

L41 Biol 2342 Wilderness First Aid

The National Outdoor Leadership School (NOLS) has developed a comprehensive curriculum to instruct individuals in backcountry first aid. This curriculum is the main content taught in the course. After successfully completing this detailed 18 hour NOLS Wilderness First Aid course, students are required to write-up a full assessment and treatment plan (5-7 page minimum)

for one of the wilderness casualties described in Peter Stark's *Last Breath*. Students meet for a half-day seminar during which each presents their case, assessment, underlying physiology, and treatment plan to the group. They receive feedback from one another, and from the instructor, about their assessment, explanation of the relevant physiology, and action of their proposed intervention.

Credit 1 unit. A&S: NS A&S IQ: NSM

L41 Biol 2431 Focus: Missouri's Natural Heritage

Missouri's Natural Heritage is a multidisciplinary two-semester Freshman Focus course. The first semester of the sequence focuses on Missouri geology, climate, archaeology, and native megafauna. This provides a foundation on which to examine the ecology, restoration and management of our diverse habitats (prairie, forest, glade and stream) and the biology of our diverse plant and animal wildlife (arthropods, mollusks, fish, salamanders, lizards, birds and mammals) in the second semester. We also introduce basic concepts in biodiversity and resource management with attention to resolution of conflicts of interest. In addition to weekly lecture and discussion, students in this class visit sites across the state during three weekend camping trips and a longer camping trip during winter break. Attendance on field trips is an essential component of the course and grade. Lab fee of \$480 covers transportation and meals for all field trips.

Same as Focus 2431

Credit 3 units. A&S IQ: NSM BU: SCI

L41 Biol 265 Experience in the Life Sciences

Section 01: Earn credit for nonclassroom learning in the life sciences in a variety of activities: accompany a physician on rounds and prepare a paper on an organ system or disease; participate in a clinical or applied ecological study and report on it; participate in science outreach teaching, etc. Participants must meet regularly with a supervisor and commit at least 140 hours over two semesters. A work plan is approved prior to registration. A progress report is due after one semester and a final paper after two semesters. Does not count toward the major. Credit: 1.5 units per semester, contingent upon completion of two semesters. Visit <http://nslc.wustl.edu/research.html>. CBTL course. Credit/no credit only. **Section 02:** Participate in teaching anatomy and physiology, exercise science (fitness education) and/or nutrition in the St. Louis area. Students serve the community by offering knowledge-based teaching assistance, including development of educational materials, to a diverse population of students and/or adults. Participants spend at least 72 hours per semester as a classroom teaching assistant and/or as a health educator during community health fairs. Mandatory seminars include readings relevant to the semester plan. A class schedule and a contract for successful completion of the course is reviewed and approved by the course coordinator (Ruth Clark, P.T., PhD), high school instructor (TBD) and individual student. Permission of course coordinator required via interview. Prerequisites: minimum 6 credits of college-level anatomy and/or physiology course work, minimum science GPA of 3.2. Does not count toward the major. Credit: 2-3 credits/semester; Credit/no credit only. **Section 03:** Conduct a clinical research project with an emergency-medical faculty member. Activities may include screening/enrolling patients, chart reviews, collecting and analyzing data, and clinical shadowing time. Goals include submitting an abstract for a national research meeting and coauthoring a manuscript for publication. Prerequisite: Biol 2652 or Biol 2653. Does not count toward the major. Credit: 1.5 units

per semester, contingent upon completion of two semesters.
CBTL course. Credit/no credit only.
Credit 1.5 units. Art: NSM

L41 Biol 2651 MedPrep Program — Experience in Life Sciences

MedPrep I is a unique lecture series taught by a physician, medical school Course Master and member of the Committee on Admissions for the School of Medicine. Through a weekly two-hour lecture, this course gives students accurate, honest and detailed information regarding every step of the application and admissions process to medical school and the educational process and life of a physician. MedPrep I is particularly useful for freshmen and sophomores in that it reviews the common pitfalls encountered by unsuccessful applicants to medical school. There is no outside course work and no exam. Attendance at all classes is required. Registration for Biol 2651 is done through the MedPrep website at <http://medprep.wustl.edu>. Registration is NOT done through WebStac.
Credit 1 unit.

L41 Biol 2652 Pediatric Emergency Medicine Research Associates Program: Experiences in Life Sciences

The Pediatric Emergency Medicine Research Associates Program (PEMRAP) offers undergraduate pre-medical students an opportunity to participate in clinical, patient-oriented research projects in a hospital setting. Students have the opportunity to work in the St. Louis Children's Hospital Emergency Department, a nationally recognized pediatric emergency medicine and trauma care facility. A number of research projects are currently underway in various areas of pediatric emergency medicine. Credit/No Credit Research Associates are expected to work two 4-hour shifts per week in the St. Louis Children's Hospital Emergency Department and to attend a weekly 2-hour lecture on Tuesdays in conference room 10A of the Northwest Tower Building (across from Children's Hospital) from 1:30–3:30 p.m. Weekly meetings include lectures given by Emergency Department faculty members. This program offers students the unique opportunity to be a vital part of the ED research team. In addition, the RA's experience in the ED may help him or her determine if medicine is truly the career path he or she wishes to choose. May not be taken concurrently with Biol 2654: MedPrep II. CBTL course.
Credit 3 units.

L41 Biol 2654 MedPrep II — Experience in the Life Sciences

MedPrep II offers students a real world, behind-the-scenes experience of a life in medicine. For three hours every other week, students shadow physicians in the Charles F. Knight Emergency and Trauma Center of Barnes-Jewish Hospital, the main teaching hospital of the Washington University School of Medicine. A weekly one-hour class is also held on the Danforth Campus for group discussion regarding the clinical experiences of the students. There is no outside course work and no exam. Attendance at all classes is required. Because of the orientation material covered, students must be present at the first class to take this course. Registration for Biol 2651 is done through the new MedPrep website at <http://medprep.wustl.edu>, not through WebStac. Prerequisite: Successful completion of Biol 2651 is required to take Biol 2654.
Credit 1 unit.

L41 Biol 2656 Introduction to Health Professions:

Occupational Therapy, Physical Therapy and Audiology

This course provides students interested in health professions with an overview of occupational therapy, physical therapy and audiology. Students gain a better understanding of the scope of practice, markets and skills required to succeed in these professions. Students learn about graduate and professional education options and how to build a competitive application for these programs. Finally, students are introduced to field experiences in each area and culminate their study with an inter-professional education session illustrating the role of each of the professions in a single case. Students finish the course with a better understanding of whether a career in health professions is right for them.

Credit 1 unit.

L41 Biol 2950 Introduction to Environmental Biology

This course introduces students to our major environmental problems, and gives examples about how research in biology, chemistry, physics and math is necessary to solve these problems.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 2960 Principles of Biology I

The course provides an introduction to cellular, molecular and developmental biology. An understanding of cellular architecture and the properties of biological macromolecules is integrated with discussion of the flow of genetic information within cells. The final section of the course covers investigation and manipulation of genetic information by molecular genetic technologies, as well as developmental strategies employed by multicellular eukaryotes. Weekly labs reinforce concepts from lectures and explore common laboratory techniques and computer-based resources. Prerequisites: Chem 111 and Chem 112 (concurrently). Three hours of lecture and two hours of lab per week.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 2961 Collaborative Phage Bioinformatics

A research-based laboratory for those enrolled in Biol 2960, this class provides an opportunity to join a research team with the goal of genomic characterization of a locally isolated phage (a virus that infects a bacterial host). Similar to Biol 192, but using a condensed format and a larger team to tackle each phage. Lab work focuses on learning computer-based tools for genome analysis, followed by careful annotation of several genes from your phage, and in-depth investigation of one gene. Requires concurrent enrollment in Biol 2960 Principles of Biology I; not open to students enrolled in Biol 192. One 2-hour pre-class online review/preparation session, nine 2-hour laboratory sessions, and a final poster presentation. (Lab does not meet in weeks with a scheduled Biol 2960 midterm.) May be taken for a letter grade or Credit/No Credit.

Credit 1 unit. A&S: NS A&S IQ: NSM

L41 Biol 2970 Principles of Biology II

A broad overview of genetics, including Mendelian assortment, linkage, chromosomal aberrations, variations in chromosome number, mutation, developmental genetics, quantitative genetics, population genetics, mechanisms of evolution, and phylogenetics. Three lectures and one laboratory period each week. Does not fulfill the laboratory requirement of the biology major. Students must sign up for a lab during preregistration. Prerequisite: Biol 2960 or permission of instructor. Examination

schedule: tests, at which attendance is required, are given on specific Wednesday evenings to be announced.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 303A Human Biology

How did Elvis, Socrates and Babe Ruth die? How did David Letterman and Dick Cheney survive? In this course we work toward understanding the biology behind human health and disease. We examine cases from the news, literature and history. We work like detectives to understand how and why the characters were affected and healed or died. This course is designed for students who do not plan to major in science, and no prior science background is expected. Prerequisite: sophomore standing or permission of instructor. A student may not receive credit for both Biol 303A and Biol 100A, 2960, 2970, or UCollege B320, B3201, B321, B3211.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3041 Plant Biology and Genetic Engineering

A 4-credit lecture course that provides an introduction to plant development, genetics, physiology and biochemistry with emphasis on processes that can be manipulated or better understood through genetic engineering. The course is divided into three sections. The first section of the course discusses basic plant biology, development and genetics. The second part emphasizes gene structure, expression and cloning as well as methods for introducing foreign DNA into plant cells and regenerating fertile plants in tissue culture. During the third part of the course we discuss a variety of examples of genetically engineered traits, including: herbicide resistance; fruit ripening; pathogen and/or insect resistance; and the use of plants for production of industrial and pharmaceutical compounds. Friday discussion sections focus on critical reading of the primary literature related to the material covered in lecture. Prerequisites: Biol 2960 and Biol 2970.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3058 Physiological Control Systems

Systems physiology with emphasis on human physiology. Prerequisites: Biol 2960 and Chem 112A.

Credit 2 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 307A Human Variation

A survey of human biological diversity, considering its adaptive and taxonomic significance from the perspective of origins and distribution of traits and adaptation. Prerequisite: Anthro 150A or introductory biology.

Same as Anthro 307A

Credit 3 units. A&S: NS, SD, QA A&S IQ: NSM, AN, SD Art: NSM BU: SCI

L41 Biol 3100 R Workshop in Biology

Biologists in all areas increasingly find that they have the need and opportunity to work with large data sets. The goal of this 1-credit course is to provide students with an opportunity to gain skills in data analysis and presentation using R, a free software environment for statistical computing and graphics (<http://www.r-project.org>). Topics include an introduction to basic programming in R, data types and manipulation, graphics, hypothesis testing and statistics, and applications to various fields of biology ranging from ecology to genomics. The course consists of ten 2-hour workshops that include a brief introduction to key concepts in R and applications in biology, followed by

interactive, hands-on tutorials. Prerequisites: concurrent or prior course in statistics (Math 2200 or Math 3200 recommended) or permission of instructor.

Credit 1 unit. A&S: NS

L41 Biol 3110 Vertebrate Structure Laboratory

A lecture/laboratory course designed to provide an integrative framework for how vertebrate form and function evolved. Weekly lectures emphasize development and the relationship between the structural and functional design of organ systems, the importance of these relationships in maintaining homeostasis while providing opportunity for adaptation, and examples of how vertebrate organ systems communicate to accomplish functional and physiological integration. 1.5 hour lecture and 5 hours lab each week. Prerequisite: Biol 2970.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3151 Endocrinology

An overview of mammalian endocrine systems with an emphasis on human physiology and development. The interplay between systemic, local cell and tissue interactions as well as the cell and molecular events associated with hormone action are discussed. Examples of endocrine evolution and pathological conditions related to endocrine imbalances also are included. Prerequisite: Biol 2970.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 328 Principles in Human Physiology

This course is designed to provide students with an understanding of the function, regulation and integration of the major organ systems of the body. Course content includes neural and hormonal homeostatic mechanisms, and study of the circulatory, respiratory, digestive, urinary, musculoskeletal, nervous, endocrine, immune and reproductive organ systems. Mechanisms of exercise physiology are integrated throughout the course. Prerequisite: Biol 3058 or equivalent.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 334 Cell Biology

Eukaryotic cell structure and function viewed from the perspective of modern cell biology. Lectures cover such topics as membrane transport; endocytosis and secretion; intracellular trafficking; hormones and signal transduction; extracellular matrix and tissue formation; cytoskeleton and motility; and cell cycle, apoptosis and the cellular basis of disease. Prerequisite: Biol 2970.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3371 Eukaryotic Genomes

An advanced exploration of the structure and function of DNA within the eukaryotic nucleus. Lecture and discussion cover topics of chromatin and chromosome structure, control of gene transcription, RNA processing, and DNA replication and repair. The relevance of these topics to the genetic basis of human disease is discussed. Throughout, the experimental data that shape our current understanding are emphasized. Course grades based on exams, problem sets and short papers. Lecture three hours per week plus required discussion section meeting every other week. Prerequisites: Biol 2970, Chem 251 (may be taken concurrently). Offered every other fall in even-numbered years.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3411 Principles of the Nervous System

The basic anatomical, physiological and chemical organization of the nervous system; how nerve cells communicate with each other, the ionic basis of nerve signals, the function and properties of chemical agents in the nervous system, the development of neural circuitry, and how neurons interact to produce behavior. Prerequisite: Biol 2960, Biol 2970 recommended, Biol 3058 recommended or Psych 3401 and permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3421 Introduction to Neuroethology

The neural mechanisms of animal behavior from an evolutionary and ecological perspective. Topics include: contributions of model systems to understanding fundamental properties of nervous system structure and function; electrical signals of sensory cells, neurons and muscle; neural processing of sensory input; neural control of behavioral output; anatomy and physiology of sensory and motor systems; learning and memory; evolution of neural circuits. Prerequisite: one of the following courses: Biol 3058, Biol 3411 or Psych 3401.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3422 Genes, Brains and Behavior

Genetic studies of physiological systems underlying animal behavior, including the genetic basis for normal and abnormal behaviors in animals and humans. Topics include: history of behavioral genetics; the ongoing debate about "nature vs. nurture"; contributions of genetic model systems including the nematode *Caenorhabditis elegans*, the fruit fly *Drosophila melanogaster*, zebrafish, the mouse *Mus musculus* and other animal models; molecular mechanisms underlying the evolution of behavioral phenotypes; the emerging role of epigenetics in regulating nervous-system functions and behavior; the use of genetic and genomic analyses in studies of human behavior and psychiatric disorders. Prerequisite: Biol 2970.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 349 Microbiology

This 4-credit lecture course focuses on the molecular biology of bacteria, archaea and viruses. Topics include: the bacterial cell cycle, gene regulation, stress response, cell-cell communication, viral and bacterial pathogenesis, microbial ecology, and metabolic diversity. Friday tutorials stress analysis of the primary literature with an emphasis on current research related to material covered in lecture. Prerequisites: Biol 2960 and 2970, or permission of instructor.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 3491 Microbiology Laboratory

After introducing students to the basics of bacterial growth and maintenance, this laboratory class employs genetics, cell biology and genomics to explore various aspects of bacterial physiology, identification, gene structure and mutational analysis of physiological pathways. Prerequisite: Biol 349 required; may be taken concurrently. One-hour lecture and five hours of laboratory per week. Fulfills the upper-level laboratory requirement for the biology major.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 3492 Laboratory Experiments with Eukaryotic Microbes

This research-intensive course provides an introduction to diverse molecular and cell biology techniques used in model experimental organisms to explore fundamental biological questions. Experiments are performed using selected fungi and protozoans commonly used in major research efforts. Emphasis is placed on choosing the appropriate organism for the question posed using the most current technologies. Each semester, one cellular process is studied in detail and original research is carried out. Prerequisites: Biol 2960 and 2970 and permission of instructor — contact early to ensure enrollment. One hour of lecture and six hours of laboratory a week. Fulfills the upper-level laboratory requirement for the biology major. Enrollment limited to 12.

Credit 3 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L41 Biol 3501 Evolution

A general survey of organic evolution covering both micro and macroevolution. Topics include natural selection, adaptation, evolution of pathogens, formation of species and phylogeny. Prerequisite: Biol 2970.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 360 Biophysics Laboratory

This laboratory course consists of "table-top" experiments in biological physics that are designed to introduce the student to concepts, methods and biological model systems in biophysics. Most experiments combine experimentation with computer simulations. The list of available experiments includes electrophysiology, human bioelectricity, optical tweezers, ultrasonic imaging, mass spectrometer, and viscosity measurements. Prerequisites: prior completion of Physics 117A-118A, Physics 197-198 or permission of instructor. Same as Physics 360

Credit 3 units. A&S: NS A&S IQ: NSM, AN Art: NSM

L41 Biol 373 Laboratory on the Evolution of Animal Behavior

This course explores the costs, benefits and constraints that drive the evolution of animal behavior. It is divided into four modules: a brief overview of basic statistics, a lab on agonistic behavior, a lab on animal communication, and a lab on sexual selection by female choice. Laboratory modules are hands-on and student driven. They begin with an overview of relevant literature and a discussion of key questions that have been addressed experimentally in that field. Students are then encouraged to apply these concepts into the design, execution and analysis of a research project aimed at answering a question of their own choosing through the use of house crickets as a study system. A majority of class time is devoted to active learning through the collection and analysis of data (each lab module lasts four weeks). In addition, the course includes weekly presentations by the instructor and class discussions on topics that help place the students' work into the broader context of evolutionary theory. Prerequisites: Biol 2970 and Psych 100B or permission of instructor

Credit 3 units. A&S IQ: NSM

L41 Biol 374 Drugs, Brain and Behavior

This course reviews information pertaining both to medications used to treat psychiatric disorders and to psychoactive drugs of abuse. By learning principles of pharmacology and mechanisms

of action of these agents, students develop an enhanced knowledge of the brain mechanisms underlying abnormal human behavior. Prerequisites: Psych 100B and one of the following: Psych 354 or 3401 or 344.

Same as Psych 374

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 381 Introduction to Ecology

This course explores the science of ecology, including factors that control the distribution and population dynamics of organisms, the structure and function of biological communities, how energy and nutrients flow across ecosystems, and what principles govern ecological responses to global climatic and other environmental changes. The class format includes lectures, discussions and small group exercises. Assignments include quantitative data analysis, ecological modeling and scientific writing.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 387 Undergraduate Teaching

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/no credit only.

Credit variable, maximum 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4023 How Plants Work: Physiology, Growth and Metabolism

This course introduces students to the fundamentals of how plants grow, metabolize and respond to their environment. Topics covered include the conversion of light energy into chemical energy through photosynthesis and carbon fixation, nitrogen assimilation, water and mineral uptake and transport, source-sink relationships and long-distance transport of carbon and nitrogen, cell growth and expansion, hormone physiology and physiological responses to a changing environment.

Prerequisite: Biol 2970 or permission of instructors.
Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4025 Current Approaches in Plant and Microbial Research

This course is designed to introduce graduate students and upper-division undergraduates to contemporary approaches and paradigms in plant and microbial biology. The course includes lectures, in-class discussions of primary literature and hands-on exploration of computational genomic and phylogenetic tools. Evaluations include short papers, quizzes, and oral presentations. Over the semester, each student works on conceptualizing and writing a short NIH-format research proposal. Particular emphasis is given to the articulation of specific aims and the design of experiments to test these aims, using the approaches taught in class. Students provide feedback to their classmates on their oral presentations and on their specific aims in a review panel. Fundamentals of Biology II (Biol 2970) or permission of the instructor.

Credit 4 units. A&S: NS A&S IQ: NSM

L41 Biol 4030 Biological Clocks

Biological clocks are the endogenous oscillators that coordinate physiological and behavioral rhythms in nearly all organisms. This course examines how these rhythms are generated and regulated. The material includes molecular, cellular and systems physiology and the relevance of biological timing to ecology and health in everything from protozoans to plants to people.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 404 Laboratory of Neurophysiology

Neurophysiology is the study of living neurons. Students record electrical activity of cells to learn principles of the nervous system including sensory transduction and coding, intercellular communication and motor control. The course meets for 9 hours each week. Students may leave the lab for up to 2 hours. Prerequisites: Biol 3411 or Psych 4411 and permission of Student Coordinator, Erin Gerrity. Biol 3411 may be taken concurrently.

Credit 4 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L41 Biol 4071 Developmental Biology

An introduction to the molecular and cell biology and biomechanics of animal development. The course is divided into thirds, which cover (1) an introduction to the major cell-cell signaling systems used during development and their study in model organisms, (2) molecular studies of early vertebrate development, and (3) application of the principles of solid mechanics to understanding events in tissue and organ morphogenesis including gastrulation, cardiac looping and brain folding. Prerequisites: Biol 2970 Principles of Biology II and Math 132 Calculus II.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4170 Population Ecology

This course examines the ecological factors that cause fluctuation and regulation of natural populations and emphasizes the utility of mathematical models to assess the dynamics of populations. The course includes lecture, discussions and computer labs using the programming language MATLAB. Emphasis is placed on principles as applied to conservation and management. Topics include assessing extinction risk of rare species, invasion dynamics of exotic species, demographic and environmental stochasticity, metapopulation dynamics, structured populations, the role of species interactions, and microevolutionary processes. Prerequisites: Calculus (Math 131 and 132), and at least one of the following: Biol 2970, EnSt 295.

Credit 3 units. A&S: NS, QA A&S IQ: NSM, AN Art: NSM

L41 Biol 4181 Population Genetics

An introduction to the basic principles of population and ecological genetics. Mechanisms of microevolutionary processes; integrated ecological and genetic approach to study the adaptive nature of the evolutionary process. Prerequisite: Biol 2970.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4182 Macroevolution

An advanced introduction to the study of macroevolutionary patterns and processes with emphasis on the systematic methodology employed. Topics: theories of classification, phylogenetic reconstruction, testing of historical hypotheses, hierarchy theory, adaptation, extinction, speciation,

developmental mechanisms of organismal evolution, biogeography. Prerequisite: permission of instructor. Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4183 Molecular Evolution

A rigorous introduction to the study of evolution at the molecular level. Topics include the origin, amount, distribution and significance of molecular genetic variation within species, and use of molecular data in systematics and in testing macroevolutionary hypotheses. Prerequisite: Biol 2970 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 419 Community Ecology

Basic principles of community ecology, including species interactions, spatial and temporal patterns of biodiversity, and ecosystem functioning. Analytical theory, statistical patterns and experimental approaches are emphasized. Intended for students wanting a rigorous overview of ecological principles. Prerequisites: at least one of the following courses: Biol 3501, Biol 372, Biol 381, Biol 4170, Biol 4193, EnSt 370 or permission of instructor.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4193 Experimental Ecology Laboratory

Design and interpretation of ecological experiments, with an emphasis on hypothesis testing, sampling methodology and data analyses. Sessions address fundamental ecological questions and include field, greenhouse and laboratory (microcosm) studies on a variety of taxa and ecosystems. Generally work is done before dark (5 to 6 p.m.), although occasionally goes as late as 7 p.m. Includes occasional required Saturday field trips to local sites (e.g., forests, wetlands, prairies, streams) for in-depth study. Assignments are primarily several written assignments, including final projects and in-class participation. Fulfills the upper-level laboratory requirement for the biology major. One hour of lecture and four hours of laboratory per week. Prerequisites: permission of instructor and at least one of the following: Biol 381 Introduction to Ecology, Biol 372 Behavioral Ecology, EnSt 370 Biological Conservation, Biol 4170 Population Ecology, Biol 419 Community Ecology or Biol 3501 Evolution. Credit is not awarded for both Biol 4191 and 4193. Enrollment is limited to 15 students.

Credit 4 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L41 Biol 4202 Evolutionary Genetics

This course examines the principles of evolutionary genetics as applied to complex characters such as morphology, behavior, life history and disease. Mathematical models of quantitative inheritance and evolution are discussed. Special topics include kin selection, sexual dimorphism and conservation genetics. Prerequisite: Anthro 150A or introductory biology.

Same as Anthro 4202

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 424 Immunology

Basic molecular and cellular aspects of the vertebrate immune system with emphasis upon the interrelationships of nonspecific and specific host defense against disease, the nature of immunological specificity and its underlying molecular biology. Includes complement systems, immunochemistry and immunoassay, systems, the nature of cellular activation and effector generation, immunodeficiency, tolerance, tissue

transplantation, hypersensitivity, immune regulation and specific diseases illustrative of the successes and failures of the immune system. Prerequisites: Biol 2970 and Chem 252.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4241 Immunology Laboratory

The Immunology Laboratory introduces students to a variety of common, broadly useful immunological techniques and then allow each student to employ most of the learned techniques in addressing a current research question. Experiments employ mouse cells in vitro and emphasize quantitative analysis of the data. Prerequisites: Biol 424 and permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 427 Problem-Based Learning in Biomedical Sciences

Groups of five to eight students are presented with medical case studies that are then researched and discussed under faculty guidance. Students take major responsibility for their own learning within their team. Enrollment limited to 30 students. Prerequisites: Biol 3050 and some experience in molecular biology. A biology or science background is required.

Credit 3 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L41 Biol 429 Cellular Transformations

Cellular Transformations is a course developed for students interested in using emerging technologies and cross-disciplinary approaches in design production and implementation. This course allows each student to develop abstract thinking and learn modern design and fabrication processes including digital media and 3-D technologies. In this course, students learn the basic principles underlying biological architecture, with a particular emphasis on structures and processes responsible for complex architectures within cells. Students then use biological design principles as inspiration for their individual projects. Through digital modeling and scanning of biological structures, each student develops a transformation process that analyzes the performative aspects of a new emerging design. These designs are modeled through CAD/CAM (laser cutting) and Rapid Prototyping (3-D Printing) for physical outputs. Prerequisites: Biol 2970 or Biol 334.

Credit 3 units. A&S: NS A&S IQ: NSM

L41 Biol 4331 Algae: Cell Biology and Molecular Evolution

Algae are ubiquitous and highly diverse photosynthetic organisms: They are prokaryotic (cyanobacteria) and eukaryotic, unicellular and multicellular, and central to soil, fresh water, and marine ecosystems. This course considers their molecular taxonomy and evolution, specific lineage adaptations (e.g., silicon in diatoms), life cycles, cell cycle and cell-division mechanisms, light and nutrient acquisition, storage products, cell and cell-wall organization, ecological habitats and symbioses (e.g., lichens), and commercial applications (e.g., carotene, omega-3 fatty acids and other nutraceuticals; biodiesel). A course for upper-level biology and bioengineering undergraduates and graduate students. Tu/Th 3:30-5:30 until spring break, where a second course, Biol 4830, is highly recommended as a sequel. Assigned readings of research literature pertaining to each lecture topic; final take-home exam covering lecture and reading material. Prerequisite: Biol 334 or Biol 4810 or instructor's permission.

Credit 2 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4342 Research Explorations in Genomics

A collaborative laboratory investigation of a problem in genomics, involving generation of a large data set (either genomic sequence or microarray analysis of gene expression) and computer analysis of the data. Class meets at the WU Genome Sequencing Center during the first half of the semester and in the Biology Department the second half of the semester. Prerequisites: Biol 297A, Chem 111/112 and Chem 151/152 and permission of the instructor. While Biol 3371 or Biol 437 and some familiarity with computers would be advantageous, this is NOT required. Fulfills the upper-level laboratory requirement for the biology major.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 434W Research Explorations in Genomics (Writing-Intensive)

Content equivalent to Biol 4342. Students electing the writing option are required to revise each of three papers (on finishing of their fosmid; gene finding in a human/chip comparison; and annotating their fosmid) at least once.

Credit 4 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L41 Biol 437 Laboratory on DNA Manipulation

This course provides investigation-driven research on experimental manipulation of DNA and RNA molecules. This includes the construction, isolation and analysis of plasmids, RNA, PCR products and DNA sequencing. Molecular cloning (genetic engineering), gene knockouts (mutants), RNA isolation, RT-PCR and microarray projects are performed. Prerequisites: Biol 2960 and Biol 2970. One hour of lecture and eight hours of laboratory each week. This course fulfills the upper-level laboratory requirement for the biology major. Enrollment is limited to 12. A laboratory fee is required for students who are not full-time Washington University undergraduates.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 451 General Biochemistry

A study of structure-function relationships as applied to carbohydrates, proteins and lipids; intermediary metabolism of principal cellular components; and general aspects of regulation. Prerequisites: Biol 2970 and Chem 252 and permission of department. Recommended for students who have achieved grades of B or better in the prerequisites. Students may not receive credit for both Biol 4801 and Biol 451. Small class.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L41 Biol 4520 Protein Function in Model Cellular Systems

The goal of this 3-credit laboratory course is to train students in the scientific method. Throughout this course, they study a protein involved in a cellular process. Students, working in small groups, use bioinformatics to identify this protein in a number of species, then use this information to hypothesize which residues of the protein are important for its function. Over the course of the semester, students test their hypotheses in two model systems for studying cellular function — the unicellular eukaryote *Saccharomyces cerevisiae* and the multicellular eukaryote *Physcomitrella patens*. The weekly lecture gives students the background necessary to understand and perform their experiments, including information on a variety of bioinformatics tools, phylogeny, protein structure, molecular techniques, cell biology, and microscopy. In addition, students use primary literature to understand the role their assigned protein plays in their cellular process. Prerequisites: Biol 2960 and Biol 2970.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4522 Laboratory in Protein Analysis, Proteomics and Protein Structure

In this laboratory course, students learn principles and methods of protein quantitation, protein purification, assessment of purity using SDS-polyacrylamide gel electrophoresis, separation of complex protein mixtures by 2-dimensional gel electrophoresis, definition of units of enzymatic activity, and identification of proteins using antibodies and/or mass spectrometry. The final part of the course introduces students to concepts of structural biology including protein crystallization, X-ray crystallography and computer modeling of protein structures. Fulfills the upper-level laboratory requirement for the biology major. Prerequisites: Chem 252 and either Biol 451 or Biol 4501/Chem 456. Permission of instructor required. Limit: eight students. Eight hours of laboratory/lecture per week.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4523 Mutagenesis and Enzyme Analysis

Molecular Methods in Enzyme Analysis. Understanding enzyme structure and function is essential in many important drug design projects. This course focuses on common methods used to investigate enzyme active sites to elucidate binding interactions between small molecules and enzymes. Students use 3-D protein viewing software to design and model modifications to an enzyme active site, then perform those modifications using recombinant DNA technology and site-directed mutagenesis. This course also introduces other commonly used methods to assay active-site metals, characterize inhibitors, over-express and purify proteins, and use UV spectroscopy to analyze enzyme activity. This is an investigative course in which students perform collaborative research projects in small groups. Fulfills the upper-level laboratory requirement for the generic biology major and the biochemistry track; intended for students who have no other courses that fulfill these requirements. Prerequisite: Biol 2970. Limit 12.

Credit 4 units. A&S IQ: NSM Arch: NSM

L41 Biol 472 Behavioral Ecology

This course examines animal behavior from an evolutionary perspective and explores the relationships between animal behavior, ecology and evolution. Topics include mating systems, sexual selection, parental care, kin selection, and cooperation. There is a strong active learning component. Prerequisite: Biol 2970 or permission of instructor.

Credit 4 units. A&S: NS A&S IQ: NSM

L41 Biol 4810 General Biochemistry I

Topics include the properties and structures of biomolecules, including amino acids, nucleotides, lipids, carbohydrates, proteins and nucleic acids. Additional topics include enzyme kinetics and mechanisms, membrane structure and properties, protein folding, an introduction to metabolism, oxidative phosphorylation and photosynthesis. This course is the first semester of an integrated two-semester sequence. The second course is Chem 482. Prerequisites: Biol 2970, Chem 262. Same as Chem 481

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4820 General Biochemistry II

Continuation of General Biochemistry I. Topics include carbohydrate, lipid and amino acid metabolism, signal

transduction, transport across membranes, DNA replication and repair, transcription and translation, molecular motors, mechanisms of drug action and natural products biosynthesis. Prerequisite: Chem 481 or Biol 481.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4830 Bioenergy

A broad overview of the flow of energy, captured from sunlight during photosynthesis, in biological systems and current approaches to utilize the metabolic potentials of microbes and plants to produce biofuels and other valuable chemical products. An overall emphasis is placed on the use of large-scale genomic, transcriptomic and metabolomic datasets in biochemistry. The topics covered include photosynthesis; central metabolism; structure and degradation of plant lignocellulose; and microbial production of liquid alcohol, biodiesel, hydrogen and other advanced fuels. Course meets during the second half of the spring semester. Prerequisite: Biol 4810 or permission of instructor.

Credit 2 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4832 Molecular Mechanisms of Photosynthesis and Respiration

Photosynthesis is a biological process whereby the Sun's energy is captured and stored by a series of events that convert the pure energy of light into the free energy needed to power life. Respiration is a biological process that extracts energy in a usable form from high-energy compounds produced by photosynthesis. This course examines these essential biological processes at the molecular level in both bacterial and eukaryotic organisms. Emphasis is on chemiosmotic principles as well as the structure and mechanism of action of the protein complexes that carry out photosynthesis and respiration. Additional topics include the assembly and regulation of these protein complexes and the origin and evolution of these processes. Prerequisite: Chem 482, Biol 4820 or Biol 451 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM

L41 Biol 487 Undergraduate Teaching

Exceptional undergraduates serve as teaching assistants for laboratory and/or discussion sections in departmental courses. Normally 2 or 3 units are given per semester, subject to the approval of the instructor and the department. Credit may not be counted toward fulfilling the biology major; application form in Department of Biology Student Affairs office. Prerequisite: permission of instructor. Credit/no credit only.

Credit variable, maximum 3 units. A&S: NS Art: NSM

L41 Biol 493 Seminar in Advanced Biology

In special cases, credit may be given for individual study. Topics of study and credit must be arranged with a faculty sponsor and approved by the department.

Credit variable, maximum 4 units. A&S: NS A&S IQ: NSM Art: NSM

L41 Biol 4933 Molecular Biology on the Cutting Edge

Recent biomedical discoveries have been greatly advanced through the development of innovative, state-of-the-art techniques. For example, Nuclear Magnetic Resonance (NMR) has proved to be an invaluable tool in both efforts to determine the atomic structure of proteins and small molecules, as well as in clinical settings, as MRI to identify tumors that would otherwise go unnoticed. This course introduces students to a variety of

cutting-edge laboratory techniques, and discusses the impact of these techniques on biology and medicine. Students have the unique opportunity to learn from graduate students employing these approaches in their doctoral studies. Topics to be covered include: high-throughput sequencing of genetic disorders, x-ray crystallography, and single molecule force spectroscopy by AFM. Weekly classes consist of a 30-45 minute presentation on a particular technique, followed by a 60-minute discussion of the assigned readings. Prerequisites: Biol 2960 and 2970 and at least one semester of Biol 500 or equivalent research experience approved by the course master.

Credit 2 units. A&S: NS A&S IQ: NSM

L41 Biol 4934 Neuroscience Futures 2

Students in this course engage with the neuroscience community both at WUSTL and beyond by attending, summarizing and discussing neuroscience seminars on campus throughout the semester. Specifically, students are expected to attend three neuroscience seminars over the course of the semester and submit summaries of each seminar. Students meet twice during the semester, in week 5 and week 11, for guided discussion of the science in the seminars they attended. Additionally, students in this seminar attend two combined classes with Neuroscience Futures 1 during the first and last weeks of the semester. In both meetings, students have an opportunity to give brief presentations on their own research. The last class combines short student presentations with a keynote address from an invited speaker from within or outside the WUSTL neuroscience community.

Credit 1 unit.

L41 Biol 4935 Undergraduate Research Perspectives

The purpose of this course is for undergraduates to acquire a broad perspective on their hands-on research. What are your big questions? How will you communicate your discoveries? How do your results fit with what has gone before? Each semester has a focus, which might be science communication, statistics or critical reading, for example. Required activities may include weekly writing, participation in the undergraduate poster session, research, presentations and attendance. Enrollment is by permission only from Joan Strassmann. This course is required for undergraduates conducting research in the Queller/Strassmann laboratories and is open to other students involved in research. 1-3 units. Joan Strassmann, David Queller, and selected postdoctoral fellows.

Credit variable, maximum 3 units. A&S: NS

L41 Biol 500 Independent Work

Students work under the supervision of a mentor in a setting of established ongoing research. Prerequisites: junior or senior standing and permission of sponsor and the department.

Credit/No Credit only. Credit to be determined in each case, usually 3 units/semester. Maximum of 6 units may be applied toward upper-level credits required for the major. If work is to be submitted for Honors, see section on senior Honors in the Handbook for Biology Majors. Registration is best completed prior to the semester for which credit is sought. Students expecting to achieve honors in Biology must complete 6 units of Biol 500 and often begin in the spring of the junior year. This is especially important for those planning fieldwork. For detailed information on the Biology department's expectations

and guidance in finding a mentor, please consult the Biol 200/500 Home Page. For online enrollment instructions visit: <http://nslc.wustl.edu/courses/Bio500/bio500.html>. Credit to be determined in each case. Students will be registered by the department after approval is granted. Credit variable, maximum 6 units.

Center for the Humanities

The Center for the Humanities offers two different types of undergraduate programs: its interdepartmental minors and its Merle Kling Undergraduate Honors Fellowship. The Kling Fellowship is a research and writing cohort for juniors and seniors in Arts & Sciences who apply to the program as second-semester sophomores and work with a WUSTL faculty mentor to conduct independent research in the humanities and humanistic social sciences. The writing-intensive Kling Fellowship Seminar course is restricted to Kling Fellows.

In 2006, the Center for the Humanities launched its first interdepartmental minor in children's studies. In the children's studies minor, students learn about children and childhood while drawing on the expertise of departments and programs from across Arts & Sciences, especially Education, English, and Psychology. Children's studies minors will develop a sophisticated interdisciplinary understanding of childhood and the issues surrounding the treatment and status of children throughout history. The minor combines social science courses that measure and analyze how children mature and how institutions have affected children with courses in the humanities that examine how children are portrayed and constructed in art, literature and film. Thus, a minor in children's studies will supplement students' majors while exposing them to an interconnected set of ideas about children as objects and subjects in a variety of essential disciplines.

Beginning in 2015, the Center for the Humanities will also offer a second interdepartmental minor in medical humanities. The minor approaches health, disease and medical care as culturally embedded human experiences that vary across time and place. In addition to exploring health, disease and medical care as core human experiences, the program of study is designed to provide a solid grounding in the textual-historical approach essential to all humanities scholarship. The minor combines disciplinary diversity with thematic unity to engage students with a set of tightly related "big" topics and issues, including the contested meanings of health and disease; the ethical dimensions of medicine; illness narratives; debates over health and development; the role of medicine in war, empire and nation building; the relationship between religion and medicine; exchange and friction between biomedicine and other healing traditions; and the burden of disease as it relates to gender, race and class. Students will emerge from the minor able to apply the insights and critical methods of literature, philosophy, history and the arts to subjects often left solely to the natural and

social sciences. The minor's goal is to demonstrate the enduring relevance of humanistic inquiry to understanding a basic realm of human experience.

Majors

The Center for the Humanities does not offer a major. Please visit the Minors section (p. 298) of this *Bulletin* for information about Washington University's minor in children's studies and the minor in medical humanities, both of which are housed in the Center.

Minors

The Minor in Children's Studies

Requirements for students entering WUSTL in fall 2014 and after:

Units required: 16

Required courses (4 units):

ChSt 300	Interdisciplinary Introduction to Children's Studies	3
ChSt 499	Senior Seminar in Children's Studies - open to juniors and seniors, to be offered beginning in AY 2016-17	1

Core courses (6 units):

ChSt 236	Cultural History of the American Teenager (transitioning to ChSt 318 in FL15)	3
ChSt 313B	Education, Childhood, and Society	3
ChSt 321	Developmental Psychology	3
ChSt 334	A History of the Golden Age of Children's Literature	3

Six additional units from either the core list or from elective courses, including but not limited to:

ChSt 178	Imagining and Creating Africa: Youth, Culture, and Social Change	3
----------	--	---

ChSt 301C	The American School	3
ChSt 304	Educational Psychology	3
ChSt 316F	Rediscovering the Child: Interdisciplinary Workshops in an Urban Middle School	3
ChSt 316W	Girls' Fiction From Little Goody Two-Shoes to Nancy Drew	3
ChSt 325	Psychology of Adolescence	3
ChSt 3270	Comics, Graphic Novels, and Sequential Art	3
ChSt 331	Topics in Holocaust Studies: Children in the Shadow of the Swastika	3
ChSt 341	Children and Childhood in World Religions	3
ChSt 342	Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World	3
ChSt 3620	Anthropological Perspectives on the Fetus	3
ChSt 381	Banned Books	3
ChSt 385	Narratives of Childhood	3
ChSt 3ABR	Children's Studies Coursework Completed Abroad	up to 3
ChSt 400	Independent Work in Children's Studies	up to 3
ChSt 4036	Children of Immigrants: Identity and Acculturation	3
ChSt 4046	Developmental Neuropsychology	3
ChSt 4289	Neighborhoods, Schools, and Social Inequality	3
ChSt 453B	Sociology of Education	3
ChSt 4591	The Development of Social Cognition	3
ChSt 4608	The Education of Black Children and Youth in the United States	3
ChSt 481	History of Education in the United States	3

Requirements for students entering WUSTL before fall 2014:

Units required: 15

Required course (3 units):

CFH 300a	Interdisciplinary Introduction to Children's Studies	3
----------	--	---

Core courses (6 units):

CFH 100B	Introduction to Psychology	3
CFH 321	Developmental Psychology	3
CFH 334	History of Golden Age of Children's Literature	3
CFH 313A	Education Childhood and Society	3

Plus **6 additional units** from either the core list or from elective courses (see above for a list of recently offered electives).

Additional Information

The most up-to-date list of approved electives (applying to both pre- and post-2014 matriculants) is located on the children's studies minor website (<http://cenhum.artsci.wustl.edu/academics/minor>). Courses not on that list may be used to fulfill the requirements of the minor only if they have been approved by the student's minor adviser and/or by the Academic Coordinator.

Under Arts & Sciences policy, all courses taken for the minor must be independent of any other majors or minors. A maximum of 3 units of course work completed at another university, whether in the United States or abroad, may be applied toward the children's studies minor. Credit will be awarded only to those courses that have been approved by the student's minor adviser and/or by the Academic Coordinator.

The Minor in Medical Humanities

Units required: 18

Gateway courses (at least 3 units):

History 1640	Health and Disease in World History	3
CFH 130	The Art of Medicine	3

Other core courses (at least 9 units must be at the 300 level or above) include:

Anthro 4033	Culture, Illness and Healing in Asia	3
Art-Arch 3632	Renaissance Bodies: Art, Magic, Science	3
Classics 4361	Topics in Ancient Studies (when taught as "Science and Medicine in Ancient Greece and Rome")	3
Classics 4647	Ancient Madness	3
E Lit 312W	Topics in English and American Literature: Literature of Consolation (when taught as "The Body In Pain")	3
French 447	The Medieval Literary Arts (when taught as "Body and Disability in Medieval Literature")	3
History 301R	Historical Methods — European History (when taught as "The Black Death and the Plague in Europe")	3
History 3672	Medicine, Healing and Experimentation in the Contours of Black History	3
History 4990	Advanced Seminar: History of the Body	3
Music 3031	Music and Healing	3
Phil 233F	Biomedical Ethics	3
Phil 3001	Philosophy of Medicine: Introduction to Philosophy of Clinical Medicine	2
Span 353	Medical Spanish	3
WGSS 3041	Making Sex and Gender: Understanding the History of the Body	3
WGSS 310	History of Women's Health Care in America	3
WGSS 316	Contemporary Women's Health	3

WGSS 360	Trans* Studies	3
WGSS 414	Gender, Religion, Medicine and Science	3
Writing 3112	Exposition: Writing and Medicine	3

Please note: The 9 credits of advanced medical humanities core courses (at the 300 level or above) must also come from at least **two** different disciplinary categories (Art History, Classics, History, Languages/Literature/Culture, Music, Philosophy, WGSS).

Complementary courses (no more than 3 units) include:

AMCS 226	Sociological Approaches to American Health	3
Anthro 3201	Gender, Culture and Madness	3
Anthro 3283	Introduction to Global Health	3
Anthro 3310	Health, Healing and Ethics: Introduction to Medical Anthropology	3
Psych 399	Living, Dying and Death: A Biopsychosocial Approach to Understanding the End of Life	3

Additional Information

The minor is available beginning with the WUSTL class of 2018. Interested students may apply for the medical humanities minor after a minimum of three semesters of course work. The minor will require a written application and a brief interview, with the aim of accepting 15–20 students per graduating class.

The Center will provide an up-to-date list of medical humanities core and complementary courses online beginning in fall 2015. (In particular, the "core courses" list above does not include some courses that will be offered for the first time in spring 2016.)

Courses

Under the Center for the Humanities (L56) designation, our courses include:

CFH 130	The Art of Medicine	3
CFH 400W	Merle Kling Undergraduate Honors Fellowship Seminar	3

Under the Children's Studies (L66) designation, our courses include:

ChSt 178	Imagining and Creating Africa: Youth, Culture, and Social Change	3
ChSt 236	Cultural History of the American Teenager (transitioning to ChSt 318 in FL15)	3
ChSt 299	Internship in Children's Studies	up to 3
ChSt 300	Interdisciplinary Introduction to Children's Studies	3
ChSt 301C	The American School	3
ChSt 304	Educational Psychology	3

ChSt 313B	Education, Childhood, and Society	3
ChSt 314	Children's Literature Since World War II: From E.B. White to J.K. Rowling	3
ChSt 316F	Rediscovering the Child: Interdisciplinary Workshops in an Urban Middle School	3
ChSt 316W	Girls' Fiction From Little Goody Two-Shoes to Nancy Drew	3
ChSt 321	Developmental Psychology	3
ChSt 323	Children and War	3
ChSt 325	Psychology of Adolescence	3
ChSt 3254	African Americans and Children's Literature	3
ChSt 3270	Comics, Graphic Novels, and Sequential Art	3
ChSt 331	Topics in Holocaust Studies: Children in the Shadow of the Swastika	3
ChSt 334	A History of the Golden Age of Children's Literature	3
ChSt 341	Children and Childhood in World Religions	3
ChSt 342	Childhood, Culture, and Religion in Medieval Europe and the Mediterranean World	3
ChSt 3525	A History of the Boy's Book	3
ChSt 3620	Anthropological Perspectives on the Fetus	3
ChSt 381	Banned Books	3
ChSt 385	Narratives of Childhood	3
ChSt 3ABR	Children's Studies Coursework Completed Abroad	up to 3
ChSt 400	Independent Work in Children's Studies	up to 3
ChSt 4036	Children of Immigrants: Identity and Acculturation	3
ChSt 4046	Developmental Neuropsychology	3
ChSt 4280	History of Urban Schooling in the United States	3
ChSt 4289	Neighborhoods, Schools, and Social Inequality	3
ChSt 453B	Sociology of Education	3
ChSt 4591	The Development of Social Cognition	3
ChSt 4608	The Education of Black Children and Youth in the United States	3
ChSt 461B	The Construction and Experience of Black Adolescence	3
ChSt 481	History of Education in the United States	3

Chemistry

For students interested in discovering insights into nature and exploring new ways to meet the needs of our technological

society and new methods for creating novel compounds and useful materials, chemistry is an excellent major to pursue.

Chemistry is a multifaceted science that extends into biology, medicine, physics, mathematics, business and commerce. Studying chemistry provides the opportunity to explore the structure and constitution of the microworlds of atoms and molecules, the chemical and physical transformations that occur, and the principles that govern these changes.

Our program provides a strong foundation in the core areas of chemistry: organic, physical, inorganic, nuclear, theoretical. Special emphases in the department include such emerging interdisciplinary fields as organometallic, bioorganic, biophysical, macromolecular, polymer, environmental and materials chemistry. The department has close research ties with the departments of Physics; Earth and Planetary Sciences; Biology; Biomedical Engineering; Energy, Environmental & Chemical Engineering; Mechanical Engineering & Materials Science; and with departments at the Washington University School of Medicine.

Undergraduate majors in chemistry study chemistry with renowned scientists, who are teacher-scholars dedicated to the students' learning experience. The department is small, and it has world-class instruments and facilities, which allows students to receive individualized instruction and to participate in cutting-edge science. Each student works closely with a faculty member to design and carry out an original research project. Students also may participate in interdisciplinary research at the School of Medicine or the School of Engineering & Applied Science. Research internships at local companies also can be arranged.

A variety of creative and productive careers are available to graduates with a degree in chemistry. Graduates may pursue a career in chemistry or such related professions as biochemistry, medicine and chemical engineering. Most students continue in graduate or medical school, and some go on to business or law school. Positions in government, industry and education are also available.

Majors

The Major in Chemistry

Total units required: 53-62

Required courses: To prepare for a major in chemistry, students will take:

Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Physics 117A	General Physics I	4
or Physics 197	Physics I	
Physics 118A	General Physics II	4
or Physics 198	Physics II	
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Total units		35

Majors in chemistry must take a minimum of 18 units in advanced courses in chemistry or biochemistry, among which must be included:

Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 461	Inorganic Chemistry	3
Total units		9

plus 9 units in chemistry at the 300 level or above (not all in the same chemistry subdiscipline and not including Chem 490 Introduction to Research or Chem 495 Advanced Undergraduate Research in Chemistry).

At least 3 of these 9 advanced units must be in a laboratory course, chosen from:

Chem 358	Organic Chemistry Laboratory II	4
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3
Chem 470	Inorganic Chemistry Laboratory	3

Also, Physics 217 Introduction to Quantum Physics and additional mathematics courses are recommended. Chem 181 Freshman Seminar in Chemistry, a seminar to introduce first-year students to research activities in the department, is optional. A working knowledge of computer programming and a foreign language, such as German or Russian, is encouraged but not required.

Students have the advantage of planning their course program with their adviser in accordance with personal interests. Some graduate courses also are available to seniors.

All chemistry course work must be taken in residence at Washington University to be eligible to earn a chemistry major.

The Major with Concentration in Biochemistry

Chemistry majors with a concentration in biochemistry should add Biol 2960 Principles of Biology I and Biol 2970 Principles of Biology II as prerequisites to the major and specify a minimum of 18 units in advanced courses in biology and chemistry, among which must be included:

Biol 334	Cell Biology	3
or Biol 349	Microbiology	
Chem 481	General Biochemistry I	3
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Chem 461	Inorganic Chemistry	3
Total units		15

and at least one advanced lab chosen from:

Chem 358	Organic Chemistry Laboratory II	4
Chem 435	Nuclear and Radiochemistry Lab	3
Chem 445	Instrumental Methods: Physical Chemistry	3
Chem 470	Inorganic Chemistry Laboratory	3
Biol 437	Laboratory on DNA Manipulation	4
Biol 4522	Laboratory in Protein Analysis, Proteomics and Protein Structure	3

All chemistry course work must be taken in residence at Washington University to be eligible to earn a chemistry major.

Additional Information

Latin Honors for the Major in Chemistry: To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses in chemistry or biochemistry, among which must be included Chem 401 Physical Chemistry I, Chem 402 Physical Chemistry II, Chem 461 Inorganic Chemistry; two additional advanced courses in chemistry; and two additional laboratories: one synthetic laboratory course (either Chem 358 Organic Chemistry Laboratory II or Chem 470 Inorganic Chemistry Laboratory) and one physical chemistry laboratory course (Chem 435 Nuclear and Radiochemistry Lab or Chem 445 Instrumental Methods: Physical Chemistry). Neither Chem 490 Introduction to Research nor Chem 495 Advanced Undergraduate Research in Chemistry can be used to satisfy the advanced laboratory requirements, but Chem 495 can be used to satisfy an elective.

Latin Honors for the Major in Chemistry with Concentration in Biochemistry: To qualify for Latin Honors, students must complete a minimum of 21 units in advanced courses and have one laboratory course in advanced chemistry or biology chosen from Chem 358 Organic Chemistry Laboratory II, Chem 435 Nuclear and Radiochemistry Lab, Chem 445 Instrumental Methods: Physical Chemistry, Chem 470 Inorganic Chemistry Laboratory, Biol 437 Laboratory on DNA Manipulation, or Biol 4522 Laboratory in Protein Analysis, Proteomics and Protein Structure, and both biochemistry courses, Chem 481 General Biochemistry I and Chem 482 General Biochemistry II.

Departmental Honors for the Majors in Chemistry and Chemistry with a Concentration in Biochemistry: To graduate "with distinction," a student must maintain a Chemistry GPA of 3.5 and complete at least one semester of Chem 490 research. To graduate "with high distinction," a student must maintain a Chemistry GPA of 3.65 and complete at least two semesters of chemistry research, one of which must be Chem 495. To graduate "with highest distinction," a student must maintain a Chemistry GPA of 3.8 and complete at least two semesters of chemistry research, one of which must be Chem 495. Chemistry research is defined as a research project performed under the direction of a Chemistry faculty member, or a research project approved by the Chemistry Department Undergraduate Work Committee. A Chemistry GPA is calculated from the grades received in chemistry courses and chemistry prerequisites. The level of Departmental Honors a student achieves will appear on the student's final transcript.

Minors

The Minor in Chemistry

Units required: 27 in chemistry; 17 in math and physics

Required courses:

Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 233	Calculus III	3
Physics 117A	General Physics I	4
or Physics 197	Physics I	
Physics 118A	General Physics II	4
or Physics 198	Physics II	
Total units		35

Elective courses:

9 units of chemistry encompassing three courses in at least two subdisciplines. Courses must be 300-level or above, but Chem 490 Introduction to Research is specifically excluded.

All chemistry course work must be taken in residence at Washington University to be eligible to earn a chemistry minor.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L07 Chem.

L07 Chem 111A General Chemistry I

Systematic treatment of fundamental chemical principles and their applications. Particular reference to the concept of energy and its uses, gas laws, kinetic molecular theory, atomic and molecular structure, chemical bonding, and the periodic classification of the elements. Prerequisites: two years of high school algebra and one of high school chemistry, or permission of instructor.

Credit 3 units. A&S: NS, QA A&S IQ: NSM, AN Art: NSM BU: SCI

L07 Chem 112A General Chemistry II

Introduction to the principles of chemical equilibrium and to ionic solutions. Topics: ionic equilibria, galvanic cells, elementary chemical thermodynamics and kinetics, and molecular structure of coordination compounds. Three lecture hours and a problem-solving subsection hour. Sign-up for subsections is conducted during the first two weeks of the semester. Prerequisite: Chem 111A or permission of instructor.

Credit 3 units. A&S: NS, QA A&S IQ: NSM, AN Art: NSM BU: SCI

L07 Chem 151 General Chemistry Laboratory I

This course provides an introduction into basic laboratory techniques, the experimental method, and the presentation of scientific data, as well as direct experience with chemical principles and the properties and reactions of substances.

The course is designed to be taken concurrently with the first semester of the general chemistry lecture series (Chem 111A). Students attend a lab lecture every Monday and perform experiments during their scheduled lab section every week. The first lab lecture is scheduled on August 24. However, students with less extensive chemistry backgrounds are strongly encouraged to attend an extra lecture on Friday, August 28 at 3 p.m. Lab starts on the week of September 8–September 12. Students should pay careful attention to the fall calendar for special events such as religious holidays, athletic activities and other travel when selecting a laboratory section. A mid-term examination at which attendance is required will be given from 6:30–8:30 p.m. on Wednesday, October 14. Prerequisite: concurrent enrollment in Chem 111A or permission of the instructor.

Credit 2 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 152 General Chemistry Laboratory II

This course provides an introduction to basic laboratory techniques, the experimental method, and the presentation of scientific data as well as direct experience with chemical principles and the properties and reactions of substances. The topics and experiments in this course complement the material covered in the Chem 112A lecture course. Students attend one four-hour laboratory session and one one-hour laboratory lecture every other week. Prerequisite: concurrent enrollment in Chem 112A or permission of the instructor.

Credit 2 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 181 Freshman Seminar in Chemistry

A weekly lecture by a chemistry faculty member or other scientist from academia or industry on the lecturer's current research activities. The goal is to provide students with a sampling of current research activities dealing with fundamental applied problems in science and society that are being approached from a chemical point of view. Students see how fundamental chemical principles can be obtained from experiment and theory and used to both better understand and make better the world we live in. Each week a different scientist presents a lecture or offers an additional activity. Intended primarily for freshman who anticipate majoring in science, but interested upperclass students also should find the lectures interesting and stimulating. Students are expected to attend all lectures and associated activities during the semester. Enrollment is limited. Credit/no credit only.

Credit 1 unit. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 182 Current Challenges in Energy and the Environment

This course is designed to provide an overview of chemistry as it relates to problems in environmental science, energy and related topics. It is constructed such that all students, irrespective of their major area of study, can learn about chemistry in these contexts. The course is intended to be highly interdisciplinary; therefore, it covers subjects including chemistry, physics, engineering, geology, biology, environmental policy and others.

Credit 1 unit.

L07 Chem 261 Organic Chemistry I with Lab

The first part of a two-semester survey of organic chemistry. The course includes an introduction to organic structures, reactions and reaction mechanisms. The laboratory meets on alternate weeks and include an introduction to laboratory methods in organic chemistry, including separation and methods

of purification of organic compounds. Prerequisites: Chem 112A, Chem 152.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L07 Chem 262 Organic Chemistry II with Lab

A course covering certain areas of organic chemistry in more detail than the prerequisite course, with special emphasis on the mechanisms and the synthetic applications of organic reactions and on the organic chemistry of biological compounds. The laboratory meets eight times and includes organic synthesis and spectroscopic techniques. Required course for chemistry majors. Prerequisite: Chem 261.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 290 Freshman and Sophomore Research

Introduction to laboratory research for first- and second-year students. Students work under supervision of a faculty sponsor. Prerequisite: permission of the sponsor and the Department of Chemistry. Credit/no credit only.

Credit variable, maximum 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 299 Chemical Laboratory Safety

An overview of current laboratory safety, regulatory and compliance practices. Safety and compliance issues that impact chemical, biological and materials research is covered through a series of lectures, demonstrations, activities and laboratory exercises.

Credit 0.5 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L07 Chem 358 Organic Chemistry Laboratory II

Initially, problem solving in organic chemistry is emphasized through an introduction to the methods of qualitative organic analysis, including the use of chromatographic and spectroscopic techniques. Each student then selects an independent synthetic project to perform. Prerequisite: Chem 262. Six laboratory hours per week. Lectures held three hours a week for the first half of the semester.

Credit 4 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L07 Chem 400 Physical Science in 12 Problems

Exercises related to general chemistry, classical mechanics, quantum mechanics, statistical mechanics, thermodynamics and kinetics, are solved with numerical software. Each exercise is accompanied by a lecture, a software template solving a problem and a related take-home problem. The software allows us to focus on, and treat in a transparent fashion, physical problems without the unwieldy idealizations and contrivances found in textbooks. Prerequisites: Chem 111A Chemistry I, concurrent enrollment with Chem 401 and prior or concurrent enrollment in Physics 117A Physics I.

Credit 1 unit. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L07 Chem 401 Physical Chemistry I

Introduction to quantum chemistry (with applications to elementary spectroscopy) and kinetics. Prerequisites: Chem 111A-Chem 112A, Math 233; prior completion of Physics 117A and Physics 118A is strongly encouraged (but concurrent enrollment in Physics 117A is accepted); or permission of instructor. Required course for all Chemistry majors.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L07 Chem 402 Physical Chemistry II

Introduction to chemical thermodynamics, statistical mechanics and transport phenomena. Required course for all Chemistry majors. Prerequisites: Chem 111A-Chem 112A, Chem 401, Math 233, prior completion of Physics 117 and 118 is strongly encouraged (but prior completion of Physics 117 and concurrent enrollment in Physics 118 are accepted); or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L07 Chem 403 Chemical Kinetics

This lecture course provide an introduction to the kinetics of chemical reactions for graduate and upper-level undergraduate science and engineering students. Bulk and molecular level considerations are discussed and provide a foundation for the understanding of chemical reaction mechanisms and the techniques used for their study. Students gain an understanding of the importance and significance of the rate laws of reactions and in particular the reaction rate constant. Details of how the environment in which reactions occur (e.g., gas phase, solution phase and surface reactions) and molecular structure are reflected in the rate constant are discussed. Examples such as catalytic loss cycles in the atmosphere, enzyme catalysis, combustion systems, chain reactions and explosions are presented in detail to illustrate how the fundamental principles of chemical kinetics can be applied to predict reaction rates, chemical reactivity and the outcomes of particular processes.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 430 Simulation in Chemistry and Biochemistry

This course explores a wide range molecular modeling techniques and applications of computational chemistry to problems in chemistry and biochemistry. Topics include ab initio quantum mechanics, semi-empirical MO theory, molecular mechanics, molecular dynamics simulation, coarse-grained models, electrostatic methods and biomolecular structure prediction. A major component of the course is weekly laboratory sessions using common software programs in the field, including Spartan, Q-Chem, Gaussian, VMD, TINKER, APBS, AutoDock, SDA7 and others. Many of the lab exercises target proteins, nucleic acids and other biological structures. As a final lab experience, students complete an independent project using tools covered in the course.

Credit 3 units. A&S: NS A&S IQ: NSM

L07 Chem 435 Nuclear and Radiochemistry Lab

Application of radiochemical techniques to problems in chemistry, physics and nuclear medicine. Prerequisites: 3 units of physical chemistry and permission of instructor. One lecture hour and five hours of laboratory a week.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 436 Radioactivity and Its Applications

Introduction to the production and decay of radioactive nuclides, the structure and properties of nuclei, and the applications of nuclear and radiochemical techniques to current scientific problems. Prerequisites: one year each of chemistry, mathematics and physics.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 437 Radioactivity and Radiation Safety

The following topics are discussed: (a) general properties of nuclei; (b) laws of radioactive decay; (c) interaction of radiation

with matter; (d) radiation detectors; (e) radiation dosimetry; (f) biological effects of radiation exposure; (g) radiation safety, safety test, regulations; (h) basics of radioisotope production. Credit 1 unit. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 445 Instrumental Methods: Physical Chemistry

A course providing direct hands-on experience with the principles of physical chemistry (thermodynamics, quantum, kinetics) and associated experimental methods and instrumentation, including optical, infrared, and nuclear and electron spin resonance, electrochemistry, calorimetry, laser kinetics, and basic electronics. Prerequisite: Chem 401 or concurrent enrollment in Chem 402.

Credit 3 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L07 Chem 451 Organic Chemistry III

A lecture course that builds on the material in Chem 261 and Chem 262, covering in more detail certain topics in those courses while also introducing new topics. A transition to graduate-level study in organic chemistry; recommended for chemistry, biochemistry and biology majors. Prerequisite: Chem 262.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 453 Bioorganic Chemistry

The focus of this course is an overview of modern medicinal chemistry from the selection of a therapeutic target through the FDA-approval process. Each aspect is exemplified by examples of drugs currently in clinical use or in late-stage development. One aspect of particular interest to synthetic chemists is the underlying development chemistry that often determines the competitive success of a product. Topics covered include peptidomimetic HIV protease inhibitors, topoisomerase inhibitors, HMGCoA-reductase inhibitors (Lipitor, etc.), receptor tyrosine-kinase inhibitors (Gleevec, etc.), a synthetic mimetic of superoxide dismutase, and several others depending on the interests of the participants. Students are responsible for presenting to the class the synthetic routes developed for the discovery and commercialization of these drugs focusing on development chemistry. Prerequisite: Chem 262.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 458 Chemical Reaction Mechanism Journal Club

This seminar meets for one hour each week. During the meetings, student participants are responsible for presenting topics from the current literature. The format of the presentation varies from informal talks to student-authored problem sets. Attendance at meetings is strongly recommended for all students who are currently taking the organic cumulative examinations. Prerequisite: Chem 262.

Credit 1 unit. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 459 Organometallic Chemistry

Survey of organometallic compounds with discussion of their synthesis, structure, spectroscopy and reactivity. Prerequisite: Chem 252.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 461 Inorganic Chemistry

Introduction to modern inorganic chemistry; emphasis on relation of structure and bonding to the chemical and physical properties of compounds. Prerequisite: Chem 401 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 464 Inorganic Biochemistry

A class in biological chemistry that emphasizes the role of metals in electron transfer and enzymatic catalysis. After a brief survey of essential concepts from biology, coordination chemistry and spectroscopy, topics include: electron transfer systems; oxygen transport and activation; metal ion acquisition, transport and homeostasis; enzymes catalyzing atom transfer reactions and radical-mediated processes. Prerequisites: Chem 252; Chem 461 recommended but not required.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 465 Solid-State and Materials Chemistry

The course begins with basic crystallography and common inorganic structure types. With the aid of computer modeling, students learn to analyze, index and refine X-ray powder-diffraction data. Students are then taught to use phase diagrams to assess the compositions and microstructures of materials produced by various synthetic or processing methods. Crystal nucleation and growth, defects, and ion-conduction mechanisms also are introduced. The course concludes with an analysis of the mechanical properties of materials from a chemistry perspective. What makes some materials strong, stiff and resistant to fracture? Prerequisites: Chem 111A-Chem 112A.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 470 Inorganic Chemistry Laboratory

A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises introduce novel synthetic techniques such as high-temperature synthesis and vacuum line manipulations. Compounds are spectroscopically characterized by UV-visible, gas-phase infrared, and multinuclear and dynamic NMR spectroscopy. Measurements of electrochemical behavior, magnetic susceptibility and electrical conductivity are performed. Prerequisite: Chem 461 or consent of the instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 470W Inorganic Chemistry Laboratory — Writing Intensive

A laboratory course emphasizing both the synthesis of inorganic compounds and the study of their physical properties. Laboratory exercises introduce novel synthetic techniques such as high-temperature synthesis and vacuum line manipulations. Compounds are spectroscopically characterized by UV-visible, gas-phase infrared, and multinuclear and dynamic NMR spectroscopy. Measurements of electrochemical behavior, magnetic susceptibility and electrical conductivity are performed. Prerequisite: Chem 461 or consent of the instructor. This course satisfies the writing-intensive requirement.

Credit 3 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L07 Chem 475 Chemical Biology

This course is a survey of modern chemical biology focusing on the application of a broad array of chemical tools to biological problems. The course is roughly divided into four sections; biopolymers; computational methods and bioinformatics; tools for chemical biology; and applications of chemical biology. A mandatory discussion section accompanies the course and is used to review current and classical literature in the field. Prerequisites: Chem 262 and Biol 2970, or permission of the instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 477 Modern Medicinal Chemistry

The focus of this course is an overview of Modern Medicinal Chemistry from the selection of a therapeutic target through the FDA-approval process. Each aspect is exemplified by examples of drugs currently in clinical use, or in late-stage development. One aspect of particular interest to synthetic chemists is the underlying development chemistry that often determines the competitive success of a product. Topics covered include peptidomimetic HIV protease inhibitors, topoisomerase inhibitors, HMGCoA-reductase inhibitors (Lipitor, etc.), receptor tyrosine-kinase inhibitors (Gleevec, etc.), a synthetic mimetic of superoxide dismutase, and several others depending on the interests of the participants. Students are responsible for presenting to the class the synthetic routes developed for the discovery and commercialization of these drugs focusing on development chemistry. Prerequisite: Chem 262 or permission of the instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 478 Molecular Modeling

A survey of a wide range of techniques and applications in molecular modeling and computational chemistry, including "ab initio" quantum mechanics, semi-empirical MO theory, molecular mechanics, molecular dynamics simulation, coarse-grained models, electrostatic methods and biomolecular structure prediction. In addition to traditional lectures, students gain hands-on experience with a variety of computer modeling programs, and are expected to complete an individual project in their particular area of interest. Prerequisites: previous course experience in physical chemistry at the level of Chem 401–Chem 402, or permission of the instructor. Some familiarity with computer basics (text editing, simple scripting and using the "command line" in either Linux, Windows or Mac OS X) is recommended.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 479 Computational Chemistry and Molecular Modeling

Lectures cover the background, practice and applications of computational chemistry to the modeling of the structures and chemical reactions of organic molecules. Different levels of calculation are presented, from molecular mechanics calculations and Hückel molecular orbital theory, through semi-empirical and ab initio self-consistent field calculations with correlation energy corrections, and density functional theory. Hands-on experience performing calculations is an important element in this course.

Credit 3 units. A&S: NS, WI A&S IQ: NSM, WI

L07 Chem 481 General Biochemistry I

Topics include the properties and structures of biomolecules, including amino acids, nucleotides, lipids, carbohydrates, proteins and nucleic acids. Additional topics include enzyme kinetics and mechanisms, membrane structure and properties, protein folding, an introduction to metabolism, oxidative phosphorylation, and photosynthesis. This course is the first semester of an integrated two-semester sequence. The second course is Chem 482. Prerequisites: Biol 2970, Chem 262.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 482 General Biochemistry II

Continuation of General Biochemistry I. Topics include carbohydrate, lipid and amino acid metabolism, signal transduction, transport across membranes, DNA replication and repair, transcription and translation, molecular motors, mechanisms of drug action and natural products biosynthesis. Prerequisite: Chem 481 or Biol 481.

Same as Biol 4820

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 488 Modern Spectroscopy

This course focuses on the fundamental principles and methodologies associated with numerous optical spectroscopy techniques that are commonly utilized in physical and life sciences research laboratories. In order to develop a solid understanding of the material as well as best practices, and the strengths and limitations of the techniques, this course combines lectures with laboratory experiments. Students also learn how to analyze and interpret data and succinctly describe their results. During one lecture each week the underlying principles of a specific type of spectroscopy are presented. The second lecture each week is spent covering the general details of the instrumentation and methods for acquiring spectra on different types of samples. The students then acquire spectra using the spectroscopic methods presented during the laboratory session. The students independently analyze the data and write brief reports of their findings. During the last two weeks of class, pairs of students are given an unknown, and they need to identify and characterize the sample. Students then write and submit a final report describing this independent research and their findings.

Credit 3 units. A&S: NS A&S IQ: NSM

L07 Chem 490 Introduction to Research

Advanced laboratory work on a selected topic in chemistry. Prerequisite: permission of the department. Credit/no credit only. If this course is to be submitted for Honors, the student must file the Honors form available at the chemistry department office before the end of junior year. Arrangements for registration should be completed during the preregistration period.

Credit variable, maximum 6 units. A&S: NS A&S IQ: NSM Art: NSM

L07 Chem 495 Advanced Undergraduate Research in Chemistry

The student conducts research supervised by a chemistry department faculty member. At the end of the semester, the chemistry supervisor chairs a faculty committee to evaluate an oral public presentation and/or a concise written report, and a letter grade is assigned. The committee members and completion requirements must be approved by the supervisor prior to registration. This course may provide a Capstone Experience but does not fulfill the Writing-Intensive requirement. The units earned may be applied as elective advanced credits toward a chemistry major with Latin honors eligibility. Course may be taken only once for credit. Prerequisite: Chem 490 and/or other advanced electives or research experience specified by the supervisor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

Chinese

The Department of East Asian Languages and Cultures (EALC) offers a major and a minor in Chinese language and culture. As a major in Chinese, a student can expect to gain proficiency in the language and acquire a firm foundation in Chinese literature, history and culture from earliest times to the present. All students majoring in Chinese must complete the fourth-level modern language course or its equivalent. They also must complete a prerequisite 200-level foundational course, at least one semester of Classical Chinese, and the two-semester literature survey as well as additional courses in Chinese literature and culture. In addition, all prime majors must complete the required EALC Capstone Experience. The department strongly encourages overseas study of Chinese language and culture. All majors and minors are expected to maintain at least a B– average in all departmental courses.

Language Placement: Placement tests are required for all students entering our language programs, with the exception of those students who have had no previous exposure to the language and wish to enroll in the first semester of the first year of instruction. Students who test into second-year Chinese and satisfactorily complete (with a grade of B– or better) at least one semester of language study may petition for 3 units of retroactive credit; students who test into third year or above and satisfactorily complete (with a grade of B– or better) at least one semester of language study may petition for 6 units of retroactive credit. Credit is limited to 3 units for testing into second year and 6 units for testing into third year or above. Please note that students with native language proficiency as determined by the Chinese language section, as well as students who enroll in courses below their placement level, are ineligible for retroactive credit units. Students who misrepresent their language proficiency so as to gain entrance into a course at the elementary or intermediate level will be dropped from that course.

Phone: (314) 935-4448
E-mail: ealc@wustl.edu
Departmental website: <http://ealc.wustl.edu>

Faculty

For a list of affiliated faculty, please see the Department of East Asian Languages and Cultures faculty (p. 364) page.

Majors

The Major in Chinese Language and Culture

Units required: 27 upper-level (300-level or above) units, no more than 12 of which may be in language.

Prerequisites:

1. First- and second-level Modern Chinese or the equivalent
2. Chinese 227C Chinese Civilization

Requirements:

1. Chinese 427 Fourth-level Modern Chinese I and Chinese 428 Fourth-level Modern Chinese II or the equivalent
2. A minimum of one semester of Traditional Literary Chinese (Chinese 410 Introduction to Traditional Literary Chinese I or Chinese 411 Introduction to Literary Chinese II) or the equivalent. Chinese 410 can only be counted as a language course; Chinese 411 may be counted as either a language or a literature course.
3. Chinese 341 Early and Imperial Chinese Literature and Chinese 342 Modern and Contemporary Chinese Literature
4. Three additional upper-level courses in Chinese literature and/or culture
5. Senior Capstone Experience. Chinese prime majors may satisfy their capstone requirement in one of two ways, both of which require a presentation at the EALC Senior Symposium in the spring.
 - a) Successful completion of a senior honors thesis. This option, which also entitles the student to Latin Honors, requires a minimum of a 3.65 GPA. The thesis is researched and written over two semesters, for a total of 6 units, which are *in addition* to the 27 upper-level units required for the major.
 - b) Successful completion of an approved 400-level seminar course, to be taken in the senior year. (This course may be *included* among the three additional required upper-level courses for the major.)

Additional Information

1. Students must earn at least a B– in language courses in order to continue to the next level. They must also maintain at least a B– average in all required courses for the major. Students who do not meet this requirement may either repeat the course(s) in question or earn at least a B– in an approved equivalent course or courses (either during the summer or in a study abroad program).
2. Courses for the major may not be taken Credit/No Credit.
3. Normally, no more than 6 units of transfer or study abroad non-language courses may be applied to the major.
4. Normally, no more than 3 units of Independent Study may be counted toward the required upper-level 27 units.
5. EALC awards Departmental Honors to majors as an acknowledgment of exemplary work in the major.

Minors

The Minor in Chinese Language and Culture

Units required: 18 units, no more than 12 of which may be in language.

Requirements:

- At least two years of modern Chinese or the equivalent
- At least 9 units must be 300-level or above
- And the following courses:

Chinese 227C	Chinese Civilization	3
Chinese 341	Early and Imperial Chinese Literature	3
or Chinese 342	Modern and Contemporary Chinese Literature	

Additional Information

- Students must earn at least a B– in their language courses in order to continue to the next level. They must also maintain at least a B– average in all courses taken to fulfill the minor requirements. Students who do not meet this requirement may either repeat the course(s) in question or successfully complete an approved equivalent course or courses (either during the summer or in a study abroad program).
- Students who place out of our language courses, in consultation with their adviser, must enroll in Traditional Literary Chinese and/or additional content courses that are home-based in EALC to meet the required total units for the minor.
- Courses for the minor may not be taken Credit/No Credit.
- Normally, no more than 3 units of transfer or study abroad non-language courses may be applied to the minor.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L04 Chinese.

L04 Chinese 101D First-level Modern Chinese I

Introduction to the modern spoken and written national language of China. Five regular hours and additional drill or laboratory sessions as assigned by instructor. Students with some previous Chinese language background must take placement examination.

Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L04 Chinese 102D First-level Modern Chinese II

Continuation of 101D. Prerequisite: grade of B– or better in 101D, or placement by examination. Five regular hours and additional drill or laboratory sessions as assigned by instructor.

Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L04 Chinese 106 Beginning Chinese for Heritage Speakers I

This course is designed for students who have basic speaking and listening skills and some background in writing or reading.

Three class hours plus one additional hour are required.

Prerequisite: placement by examination.

Credit 3 units. A&S: LA A&S IQ: LCD, LS BU: HUM

L04 Chinese 107 Beginning Chinese for Heritage Speakers II

Continuation of 106. Emphasis on improving basic reading and writing skills. Three class hours plus one additional hour are required. Prerequisite: grade of B– or better in Chinese 106 or placement by examination.

Credit 3 units. A&S: LA A&S IQ: LCD, LS BU: HUM

L04 Chinese 206 Intermediate Chinese for Heritage Speakers I

Designed for students who have either completed Chinese 107 or who have basic speaking and listening skills and mastery of at least 300 written characters. Three class hours plus one additional drill hour. Prerequisite: grade of B– or better in Chinese 107, or placement by examination.

Credit 3 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L04 Chinese 207 Intermediate Chinese for Heritage Speakers II

Designed for students who have either completed Chinese 206 or who have basic speaking and listening skills and mastery of at least 800 written characters. Four class hours a week. Prerequisite: grade of B– or better in Chinese 206, or placement by examination.

Credit 3 units. A&S: LA A&S IQ: LCD, LS BU: HUM

L04 Chinese 211 Second-level Modern Chinese I

The standard second-year level of instruction in modern Chinese. Students learn both long and short forms of characters. Prerequisite: grade of B– or better in Chinese 102D or placement by examination. Five hours a week, plus drill and laboratory sessions as required by instructor.

Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L04 Chinese 212 Second-level Modern Chinese II

The standard second-year level of instruction in modern Chinese. Students learn both long and short forms of characters. Prerequisite: grade of B– or better in Chinese 211 or placement by examination. Five hours a week, plus drill and laboratory sessions as required by instructor.

Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L04 Chinese 227C Chinese Civilization

An introduction to Chinese culture through selected topics that link various periods in China's past with the present. Ongoing concerns are social stratification, political organization, the arts, gender relationships and the rationales for individual behavior, and the conceptions through which Chinese have identified their cultural heritage. Our readings include literary, philosophical and historical documents as well as cultural histories. Regular short writing assignments; take-home final. No prerequisites.

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD BU: BA, IS EN: H

L04 Chinese 303 The Taoist Tradition

This course offers an introduction to the ethical aspects of the Taoist tradition through the study of a select number of literary and philosophical texts ranging from ca. 300 BCE through the

present day. We explore questions regarding the relationship between nature and culture, conceptions of the self, and ideas about the good life.

Same as Re St 303

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: ETH EN: H

L04 Chinese 3055 Contemporary Chinese Culture and Society

Same as Anthro 3055

Credit 3 units. A&S: SS, SD A&S IQ: SSC, SD Art: SSC BU: IS EN: S

L04 Chinese 306 Advanced Chinese for Heritage Speakers I

This course is designed for heritage students who have studied at least two years of Chinese (or equivalent) with grade B– or better to achieve greater proficiency in the oral and written use of the language through reading, listening, speaking and writing.

Credit 3 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS EN: H

L04 Chinese 307 Advanced Chinese for Heritage Speakers II

Continuation of Chinese 306.

Credit 3 units. A&S: LA A&S IQ: LCD, LS BU: IS EN: H

L04 Chinese 3162 Early Modern China

This course examines political, socioeconomic and intellectual-cultural developments in Chinese society from the middle of the 14th century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368–1644) and Qing (1644–1911). Thematically, the course emphasizes such early modern indigenous developments as increasing commercialization, social mobility and questioning of received cultural values.

Same as History 3162

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM BU: IS EN: H

L04 Chinese 3163 Historical Landscape and National Identity in Modern China

This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campus, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory and changing over time are an important concern of this course.

Same as East Asia 3163

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: IS EN: H

L04 Chinese 330 Topics in Chinese Literature and Culture

A topics course on Chinese literature and culture; topics vary by semester.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: IS

L04 Chinese 3310 19th-century China: Violence and Transformation

This course traces the history of China over the course of the 19th century, with an emphasis on social and cultural history. This was one of the most tumultuous centuries in Chinese history, during which China faced threats from abroad in the form of Western and Japanese imperialism, and from within, in the form of environmental degradation and rebellions resulting in an unprecedented loss of human life. The 19th century has thus often been portrayed as a period of sharp decline for China. At the same time, we explore the ways in which the origins of the dynamic society and economy found in China today, as well as the worldwide influence of overseas Chinese, can be traced to this century of turmoil.

Same as History 331

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD

L04 Chinese 3352 China's Urban Experience: Shanghai and Beyond

Same as East Asia 3352

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L04 Chinese 341 Early and Imperial Chinese Literature

An introduction to important genres and themes of Chinese literature through the study of major writers. Brief lectures on the writers' personal, social, intellectual and historical contexts; most class time is devoted to student discussions of masterworks as an avenue for understanding Chinese culture during selected historical periods. Required for all Chinese majors, and recommended for all Japanese and East Asian Studies majors. No prerequisites; all readings available in English translation.

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD Art: HUM BU: HUM EN: H

L04 Chinese 3415 Early Chinese Art: From Human Sacrifice to the Silk Road

Same as Art-Arch 3415

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: AH BU: IS EN: H

L04 Chinese 342 Modern and Contemporary Chinese Literature

An introduction to the major writers and works of Chinese literature from the turn of the 20th century to the present, including fiction, poetry and film. We look at these works in their relevant literary, sociopolitical and cultural contexts (including Western influences). Required for all Chinese majors, and recommended for all Japanese and East Asian Studies majors. No prerequisites; all readings in English translation.

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD Art: HUM BU: ETH

L04 Chinese 3425 Classical to Contemporary Chinese Art
Surveying Chinese art and architecture from the 10th century through today, this course examines classical and imperial works as the foundation for modern and contemporary art. Engaging with the theoretical issues in art history, we also pay particular attention to questions of gender, social identity, cultural politics and government control of art. No prerequisites.
Same as Art-Arch 3425
Credit 3 units. A&S: TH A&S IQ: HUM Art: AH EN: H

L04 Chinese 3426 20th-century Chinese Art
This course explores the ways in which Chinese artists of the 20th century have defined modernity and tradition against the complex background of China's history. Through examining art works in different media along with other documentary materials, we engage with the theoretical issues in art history, such as modernity, cultural politics, and government control of art.
Same as Art-Arch 3426
Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: AH EN: H

L04 Chinese 360 Third-level Modern Chinese I
Emphasis on improving speaking, listening, reading and writing skills. Texts include Chinese newspapers and modern literary texts. Open to undergraduates only. Prerequisite: grade of B– or better in Chinese 212 or placement by examination.
Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L04 Chinese 361 Third-level Modern Chinese II
Continuation of advanced work in reading Chinese newspapers and modern literary texts. Open to undergraduates only. Prerequisite: grade of B– or better in Chinese 360 or placement by examination.
Credit 5 units. A&S: LA A&S IQ: LCD, LS BU: HUM, IS

L04 Chinese 376 Topics in Comparative Literature
Same as Comp Lit 375
Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Art: HUM

L04 Chinese 382 Writing Women of Imperial China: Writing-Intensive Seminar
Women writers can be found throughout most of China's imperial history, and from the 16th century on, there were an extraordinary number of women writing and publishing their poetry collections. Despite this fact, only a very few writings by women were included in the traditional literary canon and until recently, they were not considered worthy of scholarly attention. Fortunately, there is now a growing body of critical studies on, and translations of, these women writers. In this course, we explore the writings of Chinese women from the first through to the early 20th centuries, and discuss the changing historical and social contexts within which these women wrote and the obstacles of both genre and gender that had to be overcome in order to ensure that their voices were heard. Prerequisite: at least one course in Chinese literature or culture, or instructor's permission.
Credit 3 units. A&S: TH, CD, WI A&S IQ: HUM, LCD, WI BU: HUM EN: H

L04 Chinese 399 Undergraduate Independent Study
Prerequisite: permission of instructor and section head.
Credit variable, maximum 6 units.

L04 Chinese 401 Popular Culture and Consumption in Modern China
This writing-intensive seminar explores transformations in popular culture and everyday life in Chinese society since 1949 through an analytical focus on political economy and material culture. Drawing upon ethnographic texts, films and material artifacts, we investigate how the forces of state control and global capitalism converge to shape consumer desires and everyday habits in contemporary China. Case studies include eating habits, fashion standards, housing trends, entertainment, sports and counterfeit goods. Prerequisite: previous course in China studies (anthropology, economics, history, literature, philosophy or political science) required. Enrollment by instructor approval only.
Same as Anthro 4011
Credit 3 units. A&S: SS, CD, WI A&S IQ: LCD, SSC Art: SSC EN: S

L04 Chinese 403 Topics in East Asian Religion and Thought
Same as Re St 403
Credit 3 units. A&S: TH, CD A&S IQ: HUM EN: H

L04 Chinese 410 Introduction to Traditional Literary Chinese I
Selected readings in premodern Chinese texts. Required of all majors in Chinese and students in fields of specialization where knowledge of literary Chinese is normally expected. Prerequisite: grade of B– or better in Chinese 427 or instructor's permission.
Credit 3 units. A&S: LA A&S IQ: LCD, LS Art: HUM BU: HUM, IS

L04 Chinese 411 Introduction to Literary Chinese II
Selected readings in premodern Chinese texts. Required of all majors in Chinese and students in fields of specialization where knowledge of literary Chinese is normally expected. Prerequisite: grade of B– or better in Chinese 410 or instructor's permission.
Credit 3 units. A&S: LA A&S IQ: LCD, LS Art: HUM

L04 Chinese 414 Readings in Classical Chinese Philosophy
In this course we study Chinese philosophical texts from the classical period (ca. sixth–third centuries BCE). We read selections from the Analects, the Mengzi, the Xunzi, the Zhuangzi, the Daodejing, and the Hanfeizi, in addition to commentaries on these primary texts. The readings are in classical Chinese with occasional supplemental readings in English and modern Chinese. The aim of the course is to familiarize students with the language and grammar of Chinese philosophical texts, introduce students to the tradition of scholarly commentary, and explore a set of influential Chinese texts in the original language. Prerequisite: Chinese 411 or instructor's permission.
Credit 3 units. A&S: TH, CD EN: H

L04 Chinese 416 Advanced Composition in Chinese II
This course is a continuation of Chinese 413. Students continue to work to improve their ability to write letters, essays, reports and other types of compositions in Chinese. This course is conducted entirely in Chinese.
Credit 3 units. A&S: LA A&S IQ: LCD EN: H

L04 Chinese 418 Gender and Sexuality in East Asian Religions

In this course we explore the role of women in the indigenous religious traditions of China, Japan and Korea (Confucianism, Daoism, Shamanism and Shinto), as well as Buddhism, Christianity and Islam. We begin by considering the images of women (whether mythical or historical) in traditional religious scriptures and historical or literary texts. We then focus on what we know of the actual experience and practice of various types of religious women — nuns and abbesses, shamans and mediums, hermits and recluses, and ordinary laywomen — both historically and in more recent times. Class materials include literary and religious texts, historical and ethnological studies, biographies and memoirs, and occasional videos and films. Prerequisites: This class is conducted as a seminar, with minimal lectures, substantial reading and writing, and lots of class discussion. For this reason, students who are not either upper-level undergraduates or graduate students, or who have little or no background in East Asian religion or culture, need to obtain the instructor's permission before enrolling. Same as Re St 418

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD EN: H

L04 Chinese 427 Fourth-level Modern Chinese I

Readings in advanced texts covering a wide variety of fields in social sciences and humanities. Prerequisite: grade of B– or better in Chinese 361 or 421, or placement by examination.

Credit 3 units. A&S: LA A&S IQ: LCD, LS BU: IS

L04 Chinese 428 Fourth-level Modern Chinese II

Readings in advanced texts covering a wide variety of fields in social sciences and humanities. Required of all students desiring subsequent tutorial assistance from the department. Prerequisite: grade of B– or better in Chinese 427 or placement by examination.

Credit 3 units. A&S: LA A&S IQ: LCD, LS

L04 Chinese 4489 The Three Emperors: Redefining Chinese Art in the Golden Age

Same as Art-Arch 4489

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD

L04 Chinese 449 Topics in Comparative Literature

Topics in Comparative Literature. Subject matter varies from semester to semester.

Same as Comp Lit 449

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM

L04 Chinese 460 Fifth-level Modern Chinese I

This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports, and other types of compositions in Chinese. The reading material is composed of a variety of authentic texts, including newspapers, short stories and essays. This course is conducted entirely in Chinese. Required of all students desiring subsequent tutorial assistance from the department. Prerequisite: grade of B– or better in Chinese 428 or 411, by result of the placement examination, or by instructor's permission.

Credit 3 units. A&S: LA A&S IQ: LCD, LS EN: H

L04 Chinese 461 Fifth-level Modern Chinese II

This course is designed for advanced students wishing to improve their skills in conversation, reading and writing of letters, essays, reports, and other types of compositions in Chinese. The reading material is composed of a variety of authentic texts, including newspapers, short stories and essays. This course is conducted entirely in Chinese. Prerequisite: grade of B– or better in Chinese 428 or 411, by result of the placement examination, or by instructor's permission.

Credit 3 units. A&S: LA A&S IQ: LCD, LS EN: H

L04 Chinese 4631 Business Chinese I

In the present globalization, China has been fertile ground for foreign joint business ventures, and this course focusing specifically on business Chinese attests to that fact. This course aims at teaching Chinese business communication using a series of case studies to involve and challenge the students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts, from resolving contract disputes, to developing a business strategy, to establishing a franchise overseas. The course is designed to simulate real business environments where students interact with Chinese businesspeople in business settings and are motivated to achieve business goals. Prerequisite: grade of B– or better in Chinese 428 or instructor's permission.

Credit 3 units. A&S: LA A&S IQ: LCD EN: H

L04 Chinese 4632 Business Chinese II

Continuation of Business Chinese 4631. This course uses a series of case studies to involve and challenge students as they refine their Mandarin Chinese language skills in a wide range of applied business contexts.

Credit 3 units. A&S: LA A&S IQ: LCD EN: H

L04 Chinese 467 The Chinese Theater

Survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China, Taiwan and Hong Kong. Background in either China studies or theater in other cultures recommended.

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD

L04 Chinese 470 Readings in Chinese Literature

Selected literary masterpieces in Chinese, including examples of poetry and prose. All readings and discussion in Chinese. Open to both graduate and undergraduate students. Prerequisite: permission of instructor.

Credit 3 units. A&S: TH Art: HUM

L04 Chinese 4711 Topics in Religious Studies: Gender and Religion in China

In this course, we explore the images, roles and experience of women in Chinese religions: Confucianism, Daoism, Buddhism, and so-called "popular" religion. Topics to be discussed include: gender concepts, norms and roles in each religious tradition; notions of femininity and attitudes towards the female body; biographies of women in Confucian, Daoist and Buddhist literature; female goddesses and deities; and the place of the Buddhist and Daoist nun and laywoman in Chinese society. All readings are in English or in English translation. Prerequisite: senior/graduate standing. Students with no

previous background in Chinese religion, literature or culture need to obtain instructor's permission before enrolling.
Same as Re St 4711
Credit 3 units. A&S: TH A&S IQ: HUM

L04 Chinese 476 Reading Seminar in Chinese Traditional Fiction

Extensive readings in major critical works in Chinese and English concerning fiction of imperial China, with emphasis on vernacular fiction of the Ming and Qing periods. Weekly discussions and short reading reports. Knowledge of Chinese language and literature normally required, but arrangements can be made for graduate students in such programs as East Asian Studies and Comparative Literature.
Credit 3 units. A&S: TH A&S IQ: HUM, LCD Art: HUM

L04 Chinese 477 Reading Seminar in Chinese Traditional Poetry

A seminar on Chinese traditional poetry with varying topics. Prerequisite: instructor's permission.
Credit 3 units. A&S: TH A&S IQ: HUM, LCD Art: HUM EN: H

L04 Chinese 479 Reading Seminar in Modern Chinese Literature

A seminar on modern Chinese literature with varying topics. Prerequisite: instructor's permission.
Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM

L04 Chinese 480 Reading Seminar in Chinese Popular Literature and Culture

A seminar on Chinese popular literature and culture with varying topics. Prerequisite: instructor's permission.
Credit 3 units. A&S: TH Art: HUM EN: H

L04 Chinese 481 Reading Seminar in Religion and Chinese Literature

A seminar on religion and Chinese literature with varying topics. Prerequisite: instructor's permission.
Credit 3 units. A&S: TH A&S IQ: HUM, LCD Art: HUM

L04 Chinese 482 Reading Seminar in Gender and Chinese Literature

A seminar on gender and Chinese literature with varying topics. Prerequisite: Chinese 341 or instructor's permission.
Credit 3 units. A&S: TH A&S IQ: HUM, LCD Art: HUM EN: H

L04 Chinese 486 Independent Work for Senior Honors

This course is taken in the fall semester. Prerequisites: senior standing, eligibility for honors and permission of the department.
Credit 3 units.

L04 Chinese 487 Independent Work for Senior Honors

This course is taken in the spring semester. Prerequisites: senior standing, eligibility for honors, and permission of the department.
Credit 3 units.

L04 Chinese 489 Topics in Modern Chinese Literature

A topics course on modern Chinese literature; topics vary by semester. Prerequisite: permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM, LCD Art: HUM

L04 Chinese 4891 Topics in Chinese Literature and Culture

A topics course on Chinese literature and culture; topics vary by semester. Prerequisite: instructor's permission.
Credit 3 units. A&S: SS A&S IQ: LCD, SSC Art: HUM EN: S

L04 Chinese 490 Topics in Chinese Literature and History

A topics course on Chinese literature and history; topics vary by semester. Prerequisite: permission of the department.
Credit variable, maximum 3 units. A&S: TH A&S IQ: HUM, LCD Art: HUM EN: H

L04 Chinese 498 Guided Readings in Chinese

Prerequisites: graduate standing and permission of the instructor and the graduate adviser. Course normally taken after successful completion of Chinese 428. May be repeated once for credit.
Credit variable, maximum 3 units. A&S: LA

Classics

Classics is the study of all aspects of the rich cultures handed down by the ancient Greeks and Romans: their language, history, literature, thought and material culture, as well as their important influence on later societies, including our own. The Classics department offers two options for students interested in studying Greek and Roman antiquity: the classics major and the ancient studies major. The major in classics focuses on study of the Latin and/or ancient Greek languages. The major in ancient studies is for students who want to explore the whole spectrum of the classical world with little or no work in the ancient languages. Resources on campus supporting the study of classics include a substantial library collection of materials related to the ancient world, collections of Greek papyri and art, and the Wulffing Coin Collection, one of the largest collections of ancient coins owned by an American university.

Majors

The Major in Classics

Total units required: 24

Required courses:

A minimum of 24 credits, with at least 18 credits in advanced courses. The specific program will be determined by the student and the adviser, according to the student's interests. Courses may be chosen from among Greek, Latin and Classics offerings, but all majors **must** include in their programs a minimum of 12 advanced credits in Greek or Latin, **at least 6 of them at the 400 level**. Those who are able to enter the program at the advanced level because of previous language study will normally take 15 or more advanced credits in language. Competence in more than one language, though strongly encouraged and necessary for those planning to go on to graduate study in classics, is not required. Majors, especially those planning graduate work, should enter the Honors Program if time permits.

The Major in Ancient Studies

Total units required: 24

Required courses:

24 units drawn from courses in the Department of Classics and those in related departments. Of these, 18 units must be at the advanced level, including 6 units at the 400 level. Greek 102D and Latin 102D and above may be substituted for a 200-level course in translation. In this major, students are encouraged to develop a certain depth in one special field of interest (e.g., literature, art, history or philosophy). Therefore, at least 9 of the 18 advanced units of the major should be taken in one such specific area.

Certain courses in related departments may be used in partial fulfillment of the requirements for a major in classics or ancient studies, including:

Art-Arch 331	Greek Art and Archaeology	3
Art-Arch 334	Roman Art and Archaeology	3
Phil 451	Plato	3
Phil 452	Aristotle	3

Additional Information

Study Abroad: Study abroad for a semester in Rome or Athens is an option many classics majors select. Washington University is a member of the Intercollegiate Center for Classical Studies (ICCS) consortium, and many majors attend the one-semester ICCS program in Rome. A knowledge of Latin or Greek to at least the intermediate level is required for admission to the Rome program. Students interested in studying at the Intercollegiate Center in Rome should consult Professor Tim Moore. Students interested in the College Year in Athens Program should consult Professor William Bubelis.

Senior Honors: Students who are planning to pursue graduate work should enter the honors program. To apply, a student must have junior standing, an average of A- or better in courses numbered 300 or above in Greek and/or Latin (for classics majors) or in Classics (for ancient studies majors), an overall GPA of 3.65 or above, and permission of the chair. A formal application should be submitted in May of the junior year. A thesis of substantial nature and length is prepared and written under the direction of a member of the department, beginning in the fall semester of the senior year. A final draft is submitted to the director no later than February 1, a final copy to the full thesis committee before March break. Credit of 6 units is awarded upon presentation of an acceptable thesis. These will be in addition to the 24 credits of the major; those who complete senior honors will therefore graduate with a total of 30 credits in the major.

Minors

The Minor in Classics

Units required: 15

Required courses:

Greek 317C	Introduction to Greek Literature	3
Greek 318C	Introduction to Greek Literature	3
OR		
Latin 3171	Survey of Latin Literature: The Republic	3
Latin 3181	Survey of Latin Literature: The Empire	3

Elective courses:

Three other adviser-approved courses (9 units) in Greek, Latin or Classics. These must include at least one Greek or Latin course at the 300 or 400 level. No more than one course may be at the 200 level, and Classics 225D may not be counted.

The Minor in Ancient Studies

Units required: 15

Required courses:

At least two of the following:

Classics 341C	Ancient History: The Roman Republic	3
Classics 342C	Ancient History: The Roman Empire	3
Classics 345C	Greek History: The Dawn of Democracy	3
Classics 346C	Greek History: The Age of Alexander	3

Elective courses:

Students need three other courses in the culture of Greece and Rome, the selection to be mutually agreeable to the department adviser and to the student. No more than two courses may be at the 200 level. Classics 225D may not be counted.

L08 Classics 1135 Freshman Seminar: The World of Cleopatra

Cleopatra, the last queen of ancient Egypt, captivated her contemporaries and has fascinated the Western world ever since her famous suicide by asp in 31 BCE. She was a woman of contrasts: Pharaoh of Egypt and Greco-Macedonian queen; seductive woman and shrewd political strategist; a ruthless monarch using every means available to consolidate her position in the face of the encroaching power of the Roman Empire. Through texts and material culture, the seminar seeks to understand Cleopatra in the context both of her native Egypt and of the wider Mediterranean world. We thus examine the traditions of Pharaonic Egypt; the historical events that brought Egypt under the control of the Macedonian Ptolemies

(Cleopatra's dynasty); the wider stage of East-West tension and conquest in which Cleopatra struggled to maintain her power; her relationships (political and personal) with famous men of her day (Caesar, Herod, Mark Antony); her capital city of Alexandria, the largest metropolis of its day; Cleopatra's brilliant court and its luxury arts; and finally the many Cleopatras that have populated art and literature of later times. We emerge with a sense of Cleopatra, both as a unique individual and as a product of her time.

Credit 3 units. A&S: TH, CD A&S IQ: HUM Art: AH BU: IS EN: H

L08 Classics 1137 Freshman Seminar: Wining and Dining in the Classical World

The focus of this course is food culture in Greek and Roman societies from the Archaic to the late Roman period. However, foodways from adjacent contemporary cultures also are briefly examined. Sources include textual evidence, as well as ethnographic studies of ancient people, iconographic and archaeological evidence, specifically osteological and botanical remains from archaeological sites. Experimental studies are conducted in class to augment the learning experience of students.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L08 Classics 114 Freshman Seminar: Eros through the Ages: Love and Lust in the Greco-Roman World

From a cosmic god of love to a complex emotion, eros is a seminal concept shaping a range of mythological, literary and artistic works of antiquity. Sappho described eros as "sweet-bitter," neatly capturing its paradoxical position at the intersection of pleasure and pain, love and hate. In this seminar, we unpack the varied ways eros played out across poetry, philosophy, politics and art in the ancient Greek and Roman world and how these ancient definitions of love still inform our own modern understanding of the term.

Credit 3 units. A&S IQ: HUM, LCD

L08 Classics 116 Freshman Seminar: Magicians and Witches in Greco-Roman Literature

This course examines the representation of "magicians" and "witches" in ancient Greek and Roman literature. The starting point is Apuleius' *Metamorphoses* (or *The Golden Ass* as St. Augustine dubbed it), written in the second century CE. This work of narrative prose collects several tales of witches, magical transformations and religious revelation. From there, we examine other tales of magicians and witches, paying particular attention to the role of gender in these representations and the conflict between magic and religion. The goal is to understand how these representations function within their particular society, what anxieties they reveal, and how they relate to the archaeological evidence we have for these practices.

L08 Classics 1165 Freshman Seminar: Pompeii: Uncovering the Past

This course examines the Roman city of Pompeii from archaeological, art historical and literary perspectives. Topics include the city's public spaces and religious sanctuaries, its grand mansions and common houses, its political systems and leisure activities. Class discussions probe the problems inherent in the interpretation of a city captured in a moment of crisis, and how ancient literary tropes have affected our understanding of

the archaeological remains. Students also investigate modern interpretations of the site in the form of novels, exhibitions and documentaries. Freshmen and sophomores only. No prerequisites.

L08 Classics 137 Freshman Seminar: The Emperor Nero: Prince, Monster, Artist

The destructive, scandal-ridden career of the Roman emperor Nero (mid-first century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the "Bad Emperors," and seen as a symbol of the decline of Rome itself — especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the *Life of Nero* by Suetonius (second century CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.

Credit 3 units. A&S: TH A&S IQ: HUM, LCD Art: HUM EN: H

L08 Classics 176 Freshman Seminar: Power and Persuasion: The Courts and Laws of Ancient Athens

In ancient Athens, each citizen had the power to prosecute others for wrongs committed not only against him but also against society as a whole. Each citizen defended himself without aid of lawyers and judges. This system depended upon an intensely democratic structure of jury courts and laws, and upon the development of rhetoric as an artful speech by which to persuade fellow citizens to find one way or the other. Nearly one hundred speeches survive from Athenian courts and they provide a remarkable window into Athenian society, politics and law. In addition to reading translations of many of these speeches, we examine the physical setting of Athenian courts and explore the manner in which this legal system was integral to Athens' democracy.

L08 Classics 200C World Archaeology: Global Perspectives on the Past

If we carefully peer beneath the earth's surface, we will discover a hidden world that is being rediscovered by archaeologists. A considerable amount of excitement is generated by the discovery of lost civilizations and societies. Archaeologists from every corner of the earth come to Washington University to share their experiences as they use the most sophisticated technology to rediscover those forgotten and sometimes embarrassing aspects of our human past.

L08 Classics 228 Theater Culture Studies I: Antiquity to Medieval

Required of the drama major. An examination of ancient, medieval, and Renaissance theater and performance. Close reading of dramatic texts written by such authors as Aeschylus, Sophocles, Euripides, Aristophanes, Plautus, Marlowe, Shakespeare, and Jonson, with attention also given to the collaborative theaters of the medieval period (the Corpus Christi play) and the Italian Renaissance. In tandem with the close study of dramatic literature, we study theater history (playing spaces, costumes, actors, etc.) and performance (ritual, performances of everyday life, etc.) from antiquity to the Renaissance.

L08 Classics 240 Not Members of This Club: Women and Slaves in the Greco-Roman World

Both the Athenian Democracy and the Roman Senatorial Oligarchy were societies in which political power was the exclusive property of free, citizen males. With very few exceptions, the astounding accomplishments of those societies were also the creations of free, citizen males. This course examines the lives of two disparate but comparable groups of outsiders within Greek and Roman society. The status, rights and accomplishments of Athenian and Roman women are explored and placed in the context of other premodern societies. Likewise, the institution of slavery in Greece and Rome is explored and compared with other slave-holding societies, ancient and modern.

L08 Classics 301C Greek Mythology

The myths of ancient Greece are not only inherently interesting, but they are an incomparable starting point for the study of the ancient world, and they have offered numerous images and paradigms to modern poets, artists and theorists. This course provides an introduction to the content of the major Greek myths, the historical and social background of the myths, the role of the myths in literature and art, and modern ways of interpreting and using myths. We examine as well the Near Eastern background to Greek myths and the adaptations of the myths in Roman and modern cultures.

L08 Classics 3330 Greek and Roman Painting

This course provides a survey of the major achievements of ancient Greek and Roman painting, broadly understood and encompassing wall painting, panel painting, painted pottery and mosaic. We study monuments ranging over a millennium in time and located throughout the ancient Mediterranean. Particular attention is paid to the social, political and religious aspects of ancient Greco-Roman painting, and to questions of innovation in artistic practice. Special emphasis is placed on students' cultivation of the tools of art-historical analysis, and of the presentation of that analysis in written form. Readings appear in the course textbook or are supplied as PDFs; extracts of primary sources occasionally are distributed as photocopies in class. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215) or permission of instructor. Same as Art-Arch 3330

L08 Classics 3831 Magicians, Healers and Holy Men

Magic is perhaps not one of the first words one associates with Greco-Roman antiquity. Yet for most individuals living in the ancient Mediterranean, including philosophers, businessmen and politicians, magic was a part of everyday life. Casting spells, fashioning voodoo dolls, wearing amulets, ingesting potions, and reading the stars are just some of the activities performed by individuals at every level of society. This course examines Greco-Roman, early Christian and Judaic "magical" practices. Students read spell-books which teach how to read the stars, make people fall in love, bring harm to enemies, lock up success in business, and win fame and the respect of peers. Students also look at what is said, both in antiquity and in contemporary scholarship, about magic and the people who practiced it, which helps illuminate the fascinating relationship between magic, medicine and religion.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L08 Classics 386 Old Jokes: Laughter in the Greco-Roman World

An exploration of the theory and practice of comedy in the Greco-Roman world. Readings include examples of iambic (mocking) poetry, comic theater, satiric verse and prose fiction, as well as philosophical discussions of the relationship of humor and laughter to human behavior and values. As comedy in all contexts engages and shapes cultural values just as much as "serious" literature does, its history and reception raise major social and aesthetic issues. Critical topics include: how ancient thinkers imagined comedy's historical "birth," how public comic performances may have encouraged either social cohesion or disruption, how communities defined "beneficial" and "offensive" humor, and how ancient elite writers and readers felt about the often lowbrow and obscene content of "classic" comic literature. Combination of lectures and discussions.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L08 Classics 389C The Ancient Novel

Many modern readers are familiar with the mythological and dramatic literature of Greco-Roman antiquity, but fewer are aware that the same cultures developed a tradition of prose fiction concerned with romance, human psychology and sexuality, exotic travel and adventure, and religious experience. The European tradition of extended fictional narrative begins with the Greeks, and their novels, along with Apuleius' *Golden Ass* and Petronius' *Satyricon*, had a formative influence on later narrative traditions. Students read and analyze all the surviving examples of the Greco-Roman novel, including some fragmentary works, with the goal of throwing light on the history and conventions of the genre, its appeal and its influence.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L08 Classics 391 History of Classical Political Thought: Justice, Virtue and the Soul

This course offers a critical introduction to the main issues and debates in western political theory, including but not limited to the topics of justice, legitimacy, equality, democracy, liberty, sovereignty, and the role of history in the political and social world. This course is designed to be the first in a three-semester sequence on the history of political thought, and students are encouraged, but not required, to take the courses in chronological sequence. The first semester begins with ancient Greek political thought, and follows its development up to the early 16th century.

L08 Classics 426 Ancient Athens

Athens was one of the great cities of antiquity. From lavishly decorated marble temples on the Acropolis, to public office buildings and inscriptions in the Agora (civic center), to the houses of the living and the monuments for the dead, the city has left a rich record of her material culture. These buildings and objects, together with an exceptionally large number of literary and historical texts, make it possible to paint a vivid picture of the ancient city. The course concentrates on the physical setting and monuments of Athens, as revealed by both archaeology and texts, and how they functioned within the context of Athenian

civic and religious life. Prerequisite: Classics 345C, Classics 350 or permission of instructor.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: AH BU: HUM

L08 Classics 428 The Invention of the Image: From Classical Art History to Modern Visual Studies

The scholarly field of Image or Visual Studies has developed in response to the widespread proliferation of images, both still and moving, in contemporary life. It distinguishes itself from traditional art history by examining visual representations of all types, not only works of high art, and by concentrating on the role those representations play in the formation of culture. Though most of the scholarship produced in this field focuses on the modern world, it depends upon ideas first developed in Mediterranean antiquity. This course has two primary goals. We conduct an historical examination of practices and theories of image making from Near Eastern antiquity to modernity. In so doing, we also carry out an historiographical survey of the major works in Image/Visual Studies, thereby gaining an appreciation for the wide range of methods of inquiry employed in this important field of research. Prerequisites: Intro to Western Art (L01 Art-Arch 113) or Intro to Modern Art (L01 Art-Arch 215); one 300-level course in Art History preferred; or permission of instructor.

L08 Classics 4350 Hellenistic Philosophy

The Hellenistic Age, traditionally dated from the death of Alexander and his (Macedonian) Empire at 323 BCE to the birth of Augustus' (Roman) Empire in 31 BCE, gave the West three of its most innovative and influential schools of philosophy: Epicureanism, Skepticism, and Stoicism. This course investigates the central features of their thought. Special attention is paid to the still-relevant debates between the Stoics and Skeptics about the possibility of knowledge, to the disagreements among all three schools about the issues of freedom, responsibility, and determinism, and to their ethical theories. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

L08 Classics 4376 Pictorial Illusion in the Ancient Mediterranean

Among the many accomplishments in the history of Greco-Roman art, ancient writers especially valued the development

of pictorial illusion. Pictorial illusion refers to the techniques of reproducing or approximating aspects of the visual perception of the material world on a two-dimensional surface. These include foreshortening, the application of highlights, and the indication of multiple points of depth in space relative to the picture plane. The purpose of the course is to explore the material, stylistic and technical history of illusionistic painting practices in the ancient Mediterranean world from Classical Greece to Late Antique Rome and to seek to understand the cultural and social significance of those practices. In addition to examining specific historical questions in the development of ancient painting, the course investigates trans-historical connections between vision, visibility and methods of representation. Prerequisites: One of L01 Art-Arch 112, L01 Art-Arch 113, L01 Art-Arch 211, or L01 Art-Arch 215; one 300-level course in Art History preferred; or permission of instructor.

Same as Art-Arch 4376

Credit 3 units.

L08 Classics 439 Greek Art in Rome: Discourse, Dedication and Reflection

Throughout the modern period, Ancient Greek art has been perceived of as a genuinely original and creative tradition, in which both individual artists and regional schools made some of the most significant advances in the long development of European art. Roman art, by contrast, has been seen as derivative and secondary; Johann Joachim Wincklemann, the founder of modern art history, classified it among the "style of the imitators." But this traditional dichotomy rests in large part on the Romans' own reactions to their encounters with the arts of Greece. Through the analysis of textual sources, architecture, statuary and painting, this course investigates the status and influence of Greek art in the city of Rome from the third century BCE until the late Imperial period, and seeks to understand how Roman responses to and uses of Greek art have come to shape the modern perception of both traditions. Prerequisites: Art-Arch 112, Art-Arch 113, Art-Arch 211, or Art-Arch 215; one 300-level course in art history preferred; or permission of instructor.

L08 Classics 442 The Later Roman Empire: From Constantine to Justinian

Covers the period from ca. 300 through the reign of Justinian. Focus on legal developments and codification of law, social changes, rise of Christianity and fall of the Roman Empire in the west. Prerequisite: Classics 342C or permission of instructor.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L08 Classics 443 The Age of Nero: Writing, Performance and Politics at the End of a Dynasty

This course examines the reign of Nero (54–68 CE) as a distinct and remarkable period of literary and artistic production in ancient Rome and its empire. We study the career of the emperor himself, learning about imperial politics and policies during his reign, his own artistic career (his "fiddling while Rome burned," literary endeavors and notorious stage tour), and the violent end of his rule and dynasty. We examine the literature, philosophy, satire and other writings of the period, both those that take the emperor himself as their subject and those that treat other aspects of history, myth and culture from a "Neronian" perspective. We also examine art (both public and private), public entertainment (the amphitheater, the circus and the

stage), and other cultural achievements and issues associated with the last Julio-Claudian emperor.

Credit 3 units. A&S: TH EN: H

L08 Classics 450 Topics in Classics

The topic for this seminar differs every year. Previous topics have included Pilgrimage and Sacred Space in Antiquity, Religion in a Global Context, and Engendering Religion. The seminar is offered every spring semester and is required of all Religious Studies majors, with the exception of those writing an Honors thesis. The class is also open, with the permission of the instructor, to other advanced undergraduates with previous course work in Religious Studies.

Credit 3 units. EN: H

Credit 3 units. A&S: TH, WI A&S IQ: HUM, WI EN: H

L08 Classics 451 Plato

An examination of some of Plato's most important dialogues, typically including the *Gorgias*, *Phaedo*, and *Republic*, with the aim of grasping the development of Plato's most influential thoughts in ethics and in metaphysics and epistemology. In order to provide both historical understanding and philosophical evaluation, attention is paid to the context and structure of the dialogues and to the best of recent secondary literature. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Same as Phil 451

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM

L08 Classics 452 Aristotle

This course offers a maximally full and detailed introduction to the works of Aristotle. His logic, natural philosophy, psychology, metaphysics, ethics, and political philosophy are discussed, and stress is laid on the interpretive problems facing contemporary philosophers seeking to understand Aristotle's achievement. Prerequisites: one course in Philosophy at the 300 level, graduate standing, or permission of the instructor.

Same as Phil 452

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM

L08 Classics 462 Ancient Greek and Roman Music

Music played a vital role in Ancient Greece and Rome. New resources and perspectives now allow us to appreciate the ancients' music better than ever before. This course addresses the nature of ancient music (instruments, melody and rhythm, modes), ancient attitudes toward music, and its contribution to public and private life. The focus throughout is on our ancient sources, both literary and archaeological.

Credit 3 units. A&S: TH A&S IQ: HUM, LCD EN: H

L08 Classics 4647 Ancient Madness

In this course we ask what madness meant in Greek and Roman culture. We find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating, and categorizing people treated as mad. While we concentrate on literary (particularly tragic and epic), philosophical and medical texts, we also look at visual representations and evidence from ritual and cult. An important part of our project

involves tracing the afterlife of classical ideas. The history of melancholia grounds this aspect of the course. We then consider how antiquity informs psychoanalysis, and how ancient madness might partake in a critique of contemporary understandings of what it means to be mentally ill.

Latin

For Latin courses, see the Latin (p. 610) page of this Bulletin.

Comparative Literature

Comparative Literature examines literature across national, cultural and linguistic boundaries. The broad perspective of Comparative Literature generates sustained critical thinking about what literature is and does; how literature relates to other fields and kinds of writing; how literary texts produce meaning; and the ethical valence of literature in a globalized world. Advanced knowledge of a foreign language is essential for understanding and appreciating a given literature and culture. Therefore, all majors study a foreign language and literature at an advanced level. Moreover, the study of works in translation, especially those originally written in non-European languages, facilitates cross-cultural comparisons and helps prepare students for a multilingual, pluralistic and global world. Comparison of literature to other arts, media and other modes of writing develops one's understanding of literature and culture, as well as of technologies and aesthetic forms of mediation and transmission of world views, values and critiques.

Comparative Literature offers students:

- A high degree of flexibility in their course selection and in their chosen program.
- A rich array of courses spanning national, temporal or medial boundaries organized by genre (e.g., postmodern narrative, comedy, the novel, lyric poetry); cultural issues (e.g., exile, diaspora, cross-cultural encounters); themes (e.g., memory, obsession in the novel, mysticism in poetry); period (Romanticism, the Renaissance); and transnational region (e.g., Middle Eastern literature, African literature).
- Courses that instruct the student in the central practices, approaches and theories of the discipline: an entry-level course titled "World Literature," "Introduction to Comparative Arts," and courses on literature, literary theory and translation.
- Preparation for life in a global, multicultural and pluralistic world. The critical thinking developed in all of our courses can help students succeed in law and other professional schools. Many of our graduates have gone on to careers in secondary or higher education. With the help of our major and the semester or year abroad that we encourage, some graduates have pursued careers in international affairs, teaching English as a second language abroad, and international humanitarian programs such as the Peace Corps.

Comparative Literature and the Arts & Sciences Curriculum

Comparative Literature offers freshman seminars, writing-intensive courses and various capstone experiences, including

directed research, creative projects and internships appropriate to a student's field.

Majors

The Major in Comparative Literature

Units required: 27

Required courses:

- 27 units of Comparative Literature courses, which include:
 - Comp Lit 211 World Literature (3 units)
 - Comp Lit 3050 Literary Modernities (3 units)
 - Seven additional courses in Comparative Literature at both the 300 and 400 levels (21 units). With permission of the Director of Undergraduate Studies, the student may substitute up to 6 units of appropriate foreign literature courses at the 300 or 400 level.
- The major also requires completion of a capstone experience. Students who are double majoring may elect to complete their capstone in the other major.
- Students in Comparative Literature are also expected to have had substantial college-level experience of foreign language study as demonstrated by completion of either one 400-level foreign language course or two 300-level courses.

The Major in Comparative Arts

Units required: 27

Required courses:

- 21 units in Comparative Literature courses, which include:
 - Comp Lit 211 World Literature (3 units)
 - Comp Lit 313E Introduction to Comparative Arts (3 units)
 - Five additional courses at both the 300 and 400 levels (15 units) including one course on interrelations between literature and other art forms. With permission of the Director of Undergraduate Studies, the student may substitute up to 6 units of appropriate foreign literature courses at the 300 and 400 level.
- 6 units advanced study (300-level or above) in theoretical or historical courses in aesthetics, art history, dance, drama, film or music. (Students with minors or majors in one of these fields may elect to substitute 6 units in Comparative Literature).
- The major also requires completion of a capstone experience. Students who are double majoring may elect to complete their capstone in the other major.
- Students of Comparative Arts are also expected to have had substantial college-level experience of foreign language study as demonstrated by the completion of either one 400-level foreign language course or two 300-level courses. They

are also expected to pursue work in an applied art form — music, fine arts, drama, dance or creative writing — for four semesters. This course work need not be conducted at the 300 or 400 level.

**Students should be aware that courses satisfying the major requirements in another department cannot also be counted in satisfaction of the major requirements in Comparative Literature or Comparative Arts.*

Additional Information

Senior Honors: To be considered for honors, a student must have a 3.65 GPA by the end of the sixth semester and must be approved by either the Director of Comparative Literature or the Director of Undergraduate Studies to write a Senior Honors thesis. Honors courses (Comp Lit 497 Independent Work for Senior Honors and Comp Lit 498 Independent Work for Senior Honors) supplement the major and do not satisfy any of the above requirements.

Minors

The Minor in Comparative Literature

Units required: 15

Required courses: 15 units of study distributed as follows:

- Comp Lit 211 World Literature (3 units)
- Comp Lit 3050 Literary Modernities (3 units)
- Three additional Comparative Literature courses at the 300 or 400 level

Minors in comparative literature are also expected to have had substantial college-level experience of foreign language study as demonstrated by completion of either one 400-level foreign language course or two 300-level foreign language courses.

The Minor in Comparative Arts

Units required: 15

Required courses: 15 units of study, distributed as follows:

- 6 units in Comparative Literature, which include:
 - Comp Lit 211 World Literature (3 units)
 - Comp Lit 313E Introduction to Comparative Arts (3 units)
- One more Comparative Literature course at the 300 or 400 level
- 6 units of advanced study (300-level or above) in theoretical or historical courses in music, art history, drama, dance, film or aesthetics. (Students with majors or minors in one of these fields may elect to substitute 6 units in Comparative Literature.)
- Minors in comparative arts are also expected to have had substantial college-level experience of foreign language

study as demonstrated by completion of either one 400-level foreign language course or two 300-level foreign language courses.

Courses

L16 Comp Lit 1024 Mozart

Wolfgang Amadeus Mozart is one of the most recognized composers of "classical" music. A child prodigy of astonishing precocity, he has come to symbolize genius for Western culture — a composer whose music embodies superhuman, even utopian beauty and perfection. In this course, we learn that there was more to Mozart. Mozart was a lover of codes and puzzles who delighted in the science of music, a sampler of non-Western music, and a musical humorist whose comedies make provocative statements — ranging from cynical to poignant — about politics, gender and morality. Our focus works include Mozart's symphonies, piano music, string quartets, and such comedies as *The Magic Flute* and *The Marriage of Figaro*. We also explore Mozart's afterlife — how his music has figured in film, literature and popular culture. This course is open to all undergraduates — no previous musical course work or experience is required.

L16 Comp Lit 115 Freshman Seminar

A variety of topics in comparative literature, designed for first-year students — no special background is required — to be conducive to the investigation and discussion format of a seminar.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 137A Freshman Seminar

The destructive, scandal-ridden career of the Roman emperor Nero (mid-1st century CE) almost defies belief. From his assumption of power as a teenager to his suicide after a military revolt, Nero flouted political and cultural conventions left and right. His inspiring debut notwithstanding, he killed off his family and mentor, held wild parties, poured money into extravagant projects, and neglected state business to pursue a career on stage. He came to be labeled one of the "Bad Emperors," and seen as a symbol of the decline of Rome itself — especially by sympathizers of the Christians he persecuted. Yet Nero as an emperor and a literary character was also a creation of his time. The figure of Nero is examined in his context. The central text is the *Life of Nero* by Suetonius (2nd c CE), a dense and colorful text read first in its entirety and then more carefully in pieces. Supplementary readings are from the abundant other sources on and interpretations of Nero, both ancient and modern. Discussions and writing assignments are varied and designed to develop analytical and writing skills.

L16 Comp Lit 1511 The Birth of Venus

This course examine the art, politics and history of Renaissance Florence, Venice, Ferrara and Rome. We study how love, beauty, religion and politics were intertwined in these cities. We consider how the flourishing of the arts occurred along with the

oppressive rule of the Church; why, for one out of two women in upper-class families, the choice was the convent rather than marriage; the rise of courtesan culture and pornography; conspicuous consumption; healing as a matter of faith and a matter of science. Professor Wallace presents the great artists who worked in these cities, including works by Donatello, Masaccio, Brunelleschi, Botticelli, Michelangelo, Leonardo and Vasari. Professor Stone examines Sarah Dunant's trilogy of best-selling historical novels: *The Birth of Venus*, set in Florence; *In the Company of the Courtesan*, set in Venice; and *Sacred Hearts*, set in Ferrara. Ms. Dunant, who is a visitor to the University during part of the semester, introduces the class to historical documents that she used in creating her novels. Guest lecturer Professor Monson (Music Department) explores connections between nuns who make both music and magic. Open to freshmen and sophomores only.

L16 Comp Lit 201A Classical to Renaissance Literature: Text and Tradition

As we study some of the most influential of ancient works we address the basic questions of liberal education. Why ought the classics be read in the first place? How is it that Western culture has come to value certain fundamental questions, even to the point of encouraging opposition? Texts include selections from the Old Testament, Homer, Aeschylus, Sophocles, Virgil, Ovid, Petrarch, Montaigne and Shakespeare. Preference given to Text and Tradition and IPH students.

L16 Comp Lit 204 Crossing Borders: An Introduction to Comparative Literature

An introduction to some of the ideas and practices of literary studies at the beginning of the 21st century. This course is designed for majors and prospective majors in comparative literature and comparative arts — and other students interested in reading literature from many parts of the world and exploring issues in literary studies including questions of epistemology and representation, the cultural biases of readers, semiotics, translation theory and Orientalism. Plays, novels and poems by writers including Euripides, Vergil, Racine, Rilke, Henry James, Borges, Mellah and Murakami, and closely related short excerpts by theorists from Aristotle to Bhabha. Prerequisite: sophomore standing or permission of the instructor.
Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 206 Opera

Opera combines media like no other art form: music, drama, visual spectacle, and virtuosic vocal performance. In this course,

we ask such enduring questions as: Why sing stories and not merely speak them? Why have so many cultures turned to musical theater to portray iconic narratives and characters? By exploring works ranging from Baroque opera to Broadway musicals (including Monteverdi, Mozart, Donizetti, Verdi, Bizet, Sondheim, and Adams), students gain a panoramic view of this tradition and develop the skills to understand and interpret the rich interaction of music, text and drama at the heart of opera. No previous musical experience required.

L16 Comp Lit 215C Introduction to Comparative Practice I

This course permits the close examination of a particular theme or question studied comparatively, that is, with a cross-cultural focus involving at least two national literatures. Topics are often interdisciplinary; they explore questions pertinent to literary study that also engage history, philosophy and/or the visual arts. Although the majority of works studied are texts, the course frequently pursues comparisons of texts and images (painting, photography, film). Requirements may include frequent short papers, response papers and/or exams.
Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 219C Topics in Comparative Literature

An examination of how life, suffering and hope are reflected in stories by major Israeli and Arab writers of the 20th century. Themes examined: war, sacrifice, modernity, the erosion of religious faith. Short stories by Ben Ner, Yehoshua, Agnon, Mahfouz, Idris, Habibi and others are discussed. Analysis focuses on differences and similarities in society, culture and national concerns.

L16 Comp Lit 3040 Introduction to Digital Humanities:

Introduction to Digital Humanities: Cultural Analysis

It is a truism that computers have changed our lives and the way we think and interact. But in fact systematic efforts to apply current technologies to the study of history and culture have been rare. This course enable students to consider how these technologies might transform the humanities. We explore the various ways in which ideas and data in the humanities can be represented, analyzed and communicated. We also reflect on how the expansion of information technology has transformed and is continuing to transform the humanities, both with regard to their role in the university and in society at large. Readings and classwork are supplemented by small assigned digital projects culminating in a project chosen by the students themselves.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM EN: H

L16 Comp Lit 3050 Literary Modernities

The course examines the various facets of modernity in major works of European, Eurasian and, sometimes, American literature from the early 17th century to the 1920s, starting with *Don Quixote*. We explore, among other things, the eruption of the novel, the secularization of autobiography, the literary discovery of the city, the rise of literary and aesthetic criticism that takes literature and art seriously as political and social institutions. In addition to literary works, the course engages with two or three important models of critical practice, e.g., Wollstonecraft's *Vindication of the Rights of Women*, Marx's *German Ideology*, Freud's *The Interpretation of Dreams*, T.S. Eliot's *Tradition and the Individual Talent*, or perhaps that great work of fictionalized literary criticism, Borges' "Pierre Menard, Author of the Quixote."

L16 Comp Lit 306 Modern Jewish Writers

What is Jewish literature? While we begin with — and return to — the traditional question of definition, we take an unorthodox approach to the course. Reading beyond Bellow, Ozick and Wiesel, we look for enlightenment in unexpected places: Egypt, Latin America, Australia. Recent works by Philip Roth, Andre Aciman, Simone Zelitch and Terri-ann White are supplemented by guest lectures, film, short stories and significant essays. We focus on issues of language, memory and place. Background knowledge is not required, though it is warmly welcomed.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM BU: HUM EN: H

L16 Comp Lit 3071 Caribbean Literature

Rum! Fun! Beaches! Sun! This is the image of the Caribbean in America today. This course surveys literature and culture from these islands, looking both at and beyond this tourists' paradise. It aims to introduce students to the region's unmistakably vibrant tradition of multicultural mixture, while keeping an eye on the long history of slavery and rebellion out of which the islands' contemporary situation formed. Along the way we encounter a wide variety of texts, from the earliest writing focused on life in urban slums, to the first novel ever to have a Rastafarian as its hero, to more contemporary considerations of the region's uncertain place in a U.S.-dominated world. Toward the end of the course, we also look at important films like *The Harder They Come* as well as discussing the most globally famous cultural product of the contemporary Caribbean: reggae music. The course involves readings from multiple genres and covers authors such as C.L.R. James, Derek Walcott, Jean Rhys, V.S. Naipaul, Jamaica Kincaid, and Caryl Phillips.

L16 Comp Lit 307A The Writing of the Indian Subcontinent

The Indian subcontinent has in recent years yielded a number of writers, expatriate or otherwise, whose works articulate the postcolonial experience in the "foreign" English tongue. This course is designed to be an introductory survey of such writing, drawing on select subcontinental writers. Covering both fiction and nonfiction by several authors including R.K. Narayan, Salman Rushdie, Anita Desai, Amitav Ghosh, Sara Suleri, Micheal Ondaatje and Romesh Gunsekera, we discuss such issues as the nature of the colonial legacy, the status of the English language, problems of translation (linguistic and cultural), the politics of religion, the expatriate identity and the constraints of gender roles.

L16 Comp Lit 3132 Romantic Revolutions in European Music and Culture

The early 19th century in Europe witnessed sweeping changes in social, political, and cultural life, but some of the most fascinating happened in music. This course considers intersections between Romantic thinking about music — which inspired an idealistic vision of the art form as a source of quasi-spiritual experience — and other contemporary "revolutions." To what extent was Romantic music a "holy art" that offered a refuge from the world? In what ways was it a worldly participant in larger currents in society and culture? By exploring these questions and more, students develop the skills and framework needed to incorporate works of music into their investigation of enduring issues in history and the humanities. Although this course requires listening and viewing of musical works, it is designed for students with intellectual curiosity but without prior musical background. We also require weekly readings, occasional presentations, three short papers, and spirited class discussion.

L16 Comp Lit 331C Tragedy

What is the relationship between freedom and luck? How do men and women respond to large forces beyond their control? Is character a struggle against outside events, or is it a submission to destiny? What happens when two ethical principles, taken absolutely, collide together? What is the nature of evil, and how does good respond to it? In ancient Greece, Renaissance England, 17th-century Europe, modern Europe and postcolonial Africa, the form of tragedy has grappled with these questions, generating both a rich body of imaginative literature and equally compelling philosophical reflections about tragedy. This course explores great works of tragic literature by authors such as Homer, Aeschylus, Sophocles, Shakespeare, Racine, Ibsen, Dostoevsky, Miller and Soyinka, and examines philosophers such as Plato, Aristotle, Hegel, Kierkegaard, Nietzsche, Weil and Arendt in order to explore the questions raised by tragedy.

L16 Comp Lit 332C Comedy

This comparative course examines and enjoys the substances and forms of humor and comedy in different times and places. Some attention to jokes, gags and comics precedes a wide-ranging examination of literary comedy. A study of various plays and comic texts illuminates different forms of comedy, such as farce, satire, romantic comedy, comedy of manners, absurdist comedy and contemporary political comedy. Authors include Aristophanes, Plautus, Rabelais, Shakespeare, Molière, Fielding, Gogol, Wilde, Stoppard and Dario Fo.

Credit 3 units. A&S: TH Art: HUM BU: HUM

L16 Comp Lit 334 Love in the Novel/Love of the Novel

Our focus is our own pleasure in reading. How do we assure that this pleasure survives into the next century now that the visual, the sound bite, the video clip permeate our lives? We attempt to answer this question by rediscovering one of the great love stories of all times, Leo Tolstoy's *Anna Karenina*. Daniel Pennac's *Reads Like A Novel*, a recent work about the pleasures of reading for pleasure, guides us as we isolate elements of Tolstoy's story that compel us, that teach us about our own needs and desires as readers. The class considers novels whose love stories are molded by the characters' own reading: Austen's *Northanger Abbey*, Flaubert's *Madame Bovary* (1856), Proust's *Swann In Love*, Skarmet's *Burning Patience*, Bernhard Schlink's *The Reader*. Far from being immune to or eclipsed by history and politics, the pleasure of reading is shown to reflect the reader's appreciation of the larger fabric of society, where passion is set against war, prostitution, mental illness, adultery and prejudice.

Credit 3 units. A&S: TH Art: HUM BU: HUM

L16 Comp Lit 338C Postmodern Fiction and Graphic Novels

Genre as a comparative laboratory. A close examination of the nature, function and pleasures of given literary genres, such as epic or postmodern narrative.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 340A American Literature, 1914–1945

An introduction to major American works and writers from the later 19th century through the mid-20th century. Writers studied include Twain, James, Crane, Fitzgerald, Hemingway, Faulkner,

Frost, Eliot and Stevens. The course assumes no previous acquaintance with the material and is directed toward a broad range of majors and non-majors with a serious but not scholarly interest in the subject. Students with little or no background in literature might be advised to take E Lit 213C (Chief American Writers), while English majors looking to do advanced work should consider the 400-level American literature sequence. Students who have taken E Lit 213C should not enroll in this course.

Same as E Lit 340

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 349A Yidishkayt

This course traces the emergence, development, flourish and near-decline of Yiddish literature, beginning with some of the earliest writings to appear in Yiddish in the late middle ages and early modern period, continuing with 19th-century attempts to establish a modern Yiddish literature and the 20th-century emergence of both a classical canon and a literary avant-garde, and ending with post-Holocaust attempts to retain a Yiddish literary culture in the near absence of Yiddish-speaking communities. Focusing on the role of Yiddish as the "national" language of Ashkenaz, the course examines the ways in which Yiddish literature has responded to the social conditions of European Jewish life, exploring among others the relationship between Yiddish and the non-Jewish cultures in which it existed, the tensions between secular trends versus religious tradition, life in the shtetl and in the metropolis, immigration from the old world to the new, and Yiddish literary responses to the Holocaust.

L16 Comp Lit 3520 Introduction to Postcolonial Literature and Theory

At its zenith, the British Empire encompassed almost a quarter of the globe, allowing the diminutive island nation unprecedented economic, military and political influence upon the rest of the world. This course introduces some of the foundational responses to this dominance, both literary and theoretical, by the colonized and their descendants. We examine important critiques of colonialism by theorists such as Frantz Fanon, Aimé Césaire, Edward Said, Homi Bhabha, and Gayatri Spivak, as well as literary works that reflect a postcolonial critique by authors such as V.S. Naipaul, George Lamming, Doris Lessing, and N'gugi wa Thiong'o. The course interrogates how literature could be said to help consolidate Empire as well as ways in which it might function as rebellion against imperial power, with a view toward teasing out the problematics of race, gender, language, nationalism and identity that postcolonial texts so urgently confront.

L16 Comp Lit 355C The Flowering of Islamic Literature 500–1200

Exploration of the multilingual (Arabic, Persian, Turkish) literary cultures of a civilization that stretched from Spain to India. Themes and genres include early court patronage, Bedouin odes, wine poetry, social satire, mystical poetry, national epic and the literature of love and romance. Comparisons to contemporaneous Hebrew and ancient and medieval Western literatures. Readings in English.

Credit 3 units. A&S: TH, CD Art: HUM BU: HUM

L16 Comp Lit 358C Modern Near Eastern Literatures

Literary expressions of the struggle for love, self-realization and liberation. Romanticism, realism and the surreal. A comparative, team-taught approach to selected genres, authors or themes in two or more Near Eastern literatures (Arabic, Hebrew, Persian, Turkish) in English translation.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 360A Women and Contemporary European Cinema

What binds society together? One of the most influential answers to this question was offered by French anthropologist Claude Lévi-Strauss. He argued that the fabric of a society is formed by a network of exchanges among kinship groups, which circulate three kinds of objects: economic goods, linguistic signs and women. In this course, we inquire into the place of women in this argument. We trace rudiments of the traditional marriage system (a father figure still "gives away" the bride in the marriage ceremony), its range of displacements in a global economy (transnational wives, nannies and domestic servants), the role of new media in the formation of new systems of trafficking (internet brides), and the place of the debate on gay marriage within the larger conversation. We read texts by Friedrich Engels, Sigmund Freud, Marcel Mauss, Claude Lévi-Strauss, Gayle Rubin, Luce Irigaray, Judith Butler, Barbara Ehrenreich and Arlie Russell Hochschild; and we watch a number of films that dramatize the traffic in women in the context of contemporary Europe: Coline Serreau's *Chaos*, Lukas Moodisson's *Lilja 4-ever*, Cristian Mungiu's *Occident*, Nilita Vachani's *When Mother Comes Home for Christmas*, Fatih Akin's *Head-on*, Jean-Pierre and Luc Dardenne's *The Silence of Lorna*.

L16 Comp Lit 3751 In the Beginning: Creation Myths of the Biblical World

This course studies myths and epic literature from the Bible, ancient Egypt, the ancient Near East and ancient Greece about the birth of the gods, the creation of the world and of humanity, and the establishment of societies. These masterpieces of ancient literature recount the deeds of gods and heroes and humanity's eternal struggle to come to terms with the world, supernatural powers, love, lust and death. This course examines how each culture borrows traditions and recasts them in a distinct idiom. The course further examines different approaches to mythology and to the study of ancient cultures and the Bible. Same as JINE 3751

L16 Comp Lit 386 The Literary 1960s: Years of Hope/Days of Rage

Taking its subtitle from the one used by Todd Gitlin for his monumental sociological study of the 1960s, this course focuses on the diverse and exciting literature of this often chaotic, always fascinating period. Readings include popular and influential books by Peter Weiss, Robbe-Grillet, Ken Kesey, Tom Wolfe, Germaine Greer, Eldridge Cleaver and Joan Didion. Attention is paid not only to important new artistic, political and social movements, as seen by these writers, but also to films and music of the time.

L16 Comp Lit 394 Worldwide Translation: Language, Culture, Technology

This course considers the crucial role played by translation across the world today: from new technologies and digital media, to the global demands of professionals working in fields as diverse as literature, law, business, anthropology, and health care. We begin our exploration of the concept of translation as a key mechanism of transmission between different languages by looking at works of literature and film. Students then examine how different cultures have historically required translation in their encounter with each other, studying how translation constitutes a necessary transcultural bridge both from a colonial and postcolonial point of view. The course also analyzes from practical and real-world perspectives whether concepts such as war, human rights, democracy or various deadly illnesses have the same meaning in different societies by considering the diverse frames of reference used by linguists, lawyers, anthropologists, and medical doctors across the world. Finally, we focus on translation from a technological perspective by examining various modes of transfer of information required for the functioning of digital media such as Google Translate, Twitter or various iPhone applications. Readings include works by Jorge Luis Borges, Talal Asad, Lawrence Venuti, Michael Cronin, Emily Apter and Gayatri Spivak, among others. This course offers students an optional CBTL (Community Based Teaching and Learning) component in collaboration with a St. Louis-based community partner. Prerequisite: none.

L16 Comp Lit 396 Lyric Poetry

A study of the sounds, forms, devices, voices and pleasures of lyric poetry from international and comparative points of view. Attention to theories of lyric, formal devices and problems of translation. The study of various lyric forms such as the ode, the elegy and the sonnet, generates comparisons across time and space.

Credit 3 units. A&S: TH, WI Art: HUM

L16 Comp Lit 402 Introduction to Comparative Literature

An introduction to the discipline and practice of Comparative Literature, this course explores the concepts most frequently discussed and the methods most successfully practiced. We study what texts reveal when they are examined cross-culturally. Students consider the various differences that emerge between texts when themes and genres are followed across more than one national literature. The course includes a short history of the discipline and recent debates about the nature and scope of the field. Topics discussed include genres and forms, influence and intertextuality, translation, world literature, exile and cross-cultural encounter.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L16 Comp Lit 405A Theory and Methods in the Humanities

Since the Enlightenment, humanists have taken special pains to reflect on the theoretical underpinnings of their analytic practice, explicitly considering such concepts as language, narrative, psychology, ideology, group identity, race, class and gender. In this course, students read a number of key theorists (e.g., Marx, Freud and Saussure) whose work continues to influence humanistic discourse. This spring's iteration of the course gives special emphasis to the various frameworks through which scholars, critics and image-producers have understood the conception, fabrication and circulation of images.

Same as IPH 405

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L16 Comp Lit 406 Translation

This course looks at the practice and theory of literary translation. While the main focus is on the literary and linguistic processes involved in translating a text from one language to another, we spend much time exploring the cultural significance of translation in an increasingly interconnected world. Translation is one of the best ways to make the world accessible to us.

Successful translation requires in-depth knowledge of the social and cultural conditions in which the original text is produced. It is equally important to be aware of the expectations of the readers who read the translated version. To balance these theoretical discussions with practical matters, we invite translators to the class to speak about their published works. The requirements include translation projects to add experience to the analysis carried out in class. Prerequisite: fluency in a language other than/in addition to English.

L16 Comp Lit 409C Beyond Geography: The Meaning of Place in the Middle East

This course considers the importance of place in the Middle East with particular reference to Jewish and Islamic traditions. Topics covered include the creation of holy sites, the concept of sacred space, the practice of pilgrimages, and the tropes of exile and return. Texts range from analytical essays to novels, memoirs and films by authors such as Edward Said, Naguib Mahfouz, Taher Ben Jelloun, Elif Shafak, A.B. Yehoshua, Shulamit Hareven, and Hanan Al-Shaykh. Requirements include participation, short assignments, and a seminar paper. This course fulfills the capstone requirement for students majoring in Jewish, Islamic and Near Eastern Languages and Cultures, but is open to advanced undergraduates and graduate students. Prerequisites: course work in JINES and senior standing or permission of instructor.

L16 Comp Lit 419 Feminist Literary and Cultural Theory

This course is intended to acquaint students with basic ideas and issues raised by a diversity of voices in contemporary feminist and cultural theory. Readings cover a wide range of approaches and tendencies within feminism, among them: French feminism, Foucauldian analyses of gender and sexuality, lesbian and queer theories, Third World/postcolonial feminism, and feminism by women of color. Given that feminist theories developed in response to and in dialogue with wider sociopolitical, cultural and philosophical currents, the course explores feminist literary and cultural theory in an interdisciplinary context. Note: This course is in the core curriculum for the Women, Gender and Sexuality Studies graduate certificate. Prerequisites: advanced course work in WGSS or in literary theory (300-level and above) or permission of the instructor required.

Same as WGSS 419

Credit 3 units. A&S: TH A&S IQ: HUM

L16 Comp Lit 4204 Film Theory

This course is an introduction to both classical and contemporary film theory. Beginning with the earliest attempts to treat cinema as a new and unique art form, the course initially reviews the various ways in which film theory attempted to define cinema in terms of its most essential properties. The course then examines more contemporary developments within film theory, more specifically its attempt to incorporate the insights of other critical and analytical paradigms, such as semiotics, psychoanalysis, feminism, queer theory and postmodernism. Throughout the course, we consider questions regarding the ontology of cinema, its relation to spectators, and the various ways in which its formal properties create meaning. Readings for the course include the major works of Sergei Eisenstein, Andre Bazin, Christian Metz, Laura Mulvey and Fredric Jameson. Required screenings.

L16 Comp Lit 4224 The 1904 St. Louis World's Fair: German and Austrian Art Exhibited

The St. Louis World's Fair of 1904 (The Louisiana Purchase Exposition) was one of the greatest events of its time. At the beginning of the course, we deal with the historical development that led to the purchase of the Louisiana Territory in 1803 and have a look at the grand dimensions of the World's Fair (connected with the Olympic Games). Of central importance are the Art Exhibits from Germany and Austria with their cultural-political implications. The German Emperor had a hand in selecting the German paintings to be sent to St. Louis, and his opposition against modern movements like Impressionism caused opposition in Germany. Austria was different: In their Art

Nouveau Pavillon they included secessionists (Hagenbund). The Wiener Werkstaetten (Vienna's Workshops) attracted a lot of attention. Different from the paintings, German Arts and Crafts represented avant-garde movements. We visit libraries, archives and museums in St. Louis that have World's Fair holdings. The seminar is for advanced undergraduate students but beginning graduate students can take it with permission of the instructor. Same as IAS 4224

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM

L16 Comp Lit 425A Humanities by the Numbers

Every time Google guesses the next word we are about to type, Amazon recommends books we might like to read, or the iPhone's "Siri" answers a question, they draw on the massive advances that have been made in the application of computational techniques to language over the last few years. However, can such technologies help us to read literary texts in new ways? If literature can be thought of as unusual and distinctive uses of language, to what extent can computational techniques that draw on statistical patterns and quantification assist us in literary analysis? This course juxtaposes the typically human scale of the close reading to the "inhuman" and massive scales at which computers can count, quantify and categorize texts. How can we translate what we as human readers care about in these literary works — the things that make them valuable, rather than things that are easy to count? What nuance is lost in this translation between "close" and "distant" readings and what insights are gained? While this class introduces students to basic statistical and computational techniques, no prior experience with technology is required.

L16 Comp Lit 430 Narrative Theory

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM EN: H

L16 Comp Lit 436 Seminar in Dramatic Theory

The course begins with Plato's critique of mimesis and Aristotle's defense, as we read *The Poetics* as a response to Plato. We take some of Aristotle's basic concepts, such as mimesis, plot, character and thought, and attempt to apply them to drama up to the present day. We also consider fundamental elements of both the dramatic text and the dramatic production, such as space, time, dialogue, narrative devices and perspective. Brecht's theory of "epic drama" forms the other conceptual pole in the course, opposing Aristotle. Besides these two theorists, other figures include Ben Jonson, Corneille, Dryden, Diderot, Schiller, Hegel, Zola, Artaud and Grotowski. The course, then, has both chronological and thematic axes. Three papers and one oral presentation.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM EN: H

L16 Comp Lit 444C Psychoanalysis and Its Literary Cultures

This course examines interactions between texts from the domains of literature and psychoanalysis. We read theory and literature side by side, in order to ask the following questions: Does the relationship between literary text and theory necessarily entail the subjection of literature to analysis, or can one, as Pierre Bayard asks, apply literature to psychoanalysis? What can psychoanalytic readings tell us more broadly about the act of reading? How can psychoanalysis enrich our sense of the ethical import of reading and writing, and how can literature challenge psychoanalytic goals and values? In terms of psychoanalytic authors, we focus on Freud, Lacan, Klein, Winnicott and Bayard. In terms of literature, we range widely from Sophocles to Henry James.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM

L16 Comp Lit 450A Topics in the Humanities

This course examines the genre of historical fiction in both its "classic" phase and in its recent resurgence in contemporary literature. "Historical fiction" is, on the face of it, a paradox. The study of history requires evidence from primary sources, the evaluation of facts and testimony, and reference to actual persons and events. Fiction, on the other hand, is neither tied to the disciplinary restrictions and subjects of historical research nor to a particular time period. So what does history offer to fiction and fiction to history? Why do writers and readers keep returning to a form which for most of the 20th century, at least, fell out of favor with the advent of postmodern skepticism about the "real"? The course considers the importance of historical fiction in the development of the genre of the novel and its relation to the modern discovery of history itself. Among the works we read are Penelope Fitzgerald's *The Blue Flower*, Edward P. Jones's *The Known World*, Walter Scott's *Waverley*, and Dickens's *A Tale of Two Cities*. We always bear in mind a practitioner's perspective, and students have the option to respond to the literature in part through researching and writing their own historical fiction.

L16 Comp Lit 4561 Marxism After Marx: Philosophy and Radicalism in the 20th Century

As claims around the supposed "post-modernity" of our contemporary situation have ebbed, so scholars have returned once more to perhaps the defining philosophical and political voice of modernity, Karl Marx. This course prepares students to engage in current debates in the humanities over the nature of the political, the dynamics of class, the relative importance of the economy to "culture," and the historical situatedness of philosophical knowledge, all through close readings of the Western Marxist philosophical tradition. That tradition, developing in Continental Europe and later the United States, sought to revitalize Marx's account of historical development through attention to art, literature and the broader Western philosophical canon, often with the intention of accounting for the failures of Soviet Communism. The course begins with a condensed primer to Marx's original ideas, before turning to the extension of Marxist philosophy in the ideas of Lenin, Lukács, the Frankfurt School, Louis Althusser, the British New Left, Lucio Colletti and Antonio Negri, before addressing more contemporary authors including Fredric Jameson and Alain Badiou.

L16 Comp Lit 4647 Ancient Madness

In this course we ask what madness meant in Greek and Roman culture. We find reading strategies that are sensitive both to ancient evidence and to the ethical demands of talking about, evaluating and categorizing people treated as mad. While we concentrate on literary (particularly tragic and epic), philosophical and medical texts, we also look at visual representations and evidence from ritual and cult. An important part of our project involves tracing the afterlife of classical ideas. The history of melancholia grounds this aspect of the course. We then consider how antiquity informs psychoanalysis, and how ancient madness might partake in a critique of contemporary understandings of what it means to be mentally ill.

Dance

Students may select dance as a major through the Performing Arts Department. (p. 662) This course of study combines intensive studio work in technique and theory of modern dance, ballet and composition with seminars examining dance as a global phenomenon with forms reflecting culturally specific historical, aesthetic and anthropological features. The program also includes a broad range of courses such as stagecraft, music resources, improvisation, anatomy for dancers, pedagogy, dance therapy, musical theater dance, world dance forms, jazz and tap. Students also may choose to minor in modern dance; ballet; or world music, dance and theater. The interdisciplinary minor in world music, dance and theater encourages students already interested in the performing arts to explore those outside Euro-American traditions. A certificate program in somatic studies is offered through the University College division of Arts & Sciences.

Students who study dance at Washington University learn from faculty members who have both professional experience and academic degrees. Students also have the opportunity to study with guest artists in residence who teach master classes and set choreography.

The department also offers many opportunities for students to perform and present their work. Washington University Dance Theatre holds annual auditions, and selected students will appear in faculty- and guest artist-choreographed concerts in Edison Theatre. Additionally, dance students particularly interested in performance may, with the approval of its director, rehearse and perform with The Slaughter Project, Washington University's dance company in residence. Every spring, student choreographers can audition their work for Young Choreographers Showcase (a department sponsored event) or

for Student Dance Showcase, directed and produced by WUSTL dance students. Students also have the annual opportunity to attend the regional American College Dance Conference to perform and take master classes. Students may also participate in departmental drama productions as well as student work in choreography and theater.

Contact Person: Mary-Jean Cowell

Elective Courses	Units
UCollege Dance 305 Structured Improvisation for Dance	1
UCollege Dance 328 Dance of West Africa	2
UCollege Dance 335 Bharata Natyam as Movement Narrative	1
UCollege Dance 363 Dunham Dance Technique	2
UCollege Dance 370 Dance for Camera	3
UCollege Dance 411 Teaching Creative Movement to Children	2
UCollege Dance 423 Dance/Movement Therapy	2
UCollege Dance 430 Applied Anatomy for the Performer	2
UCollege Dance 440 Curriculum and Instruction in Dance	3
UCollege Dance 454 Seminar in Arts Management	3

The dance major must take at least one upper-level course in both ballet and modern dance technique and theory. Course work in at least one of the following is strongly recommended: West African Dance, Classical Indian Dance, Dunham Technique, Musical Theater Dance, Jazz Dance.

Additional Information

Study Abroad: Study abroad opportunities for dance students include the summer program MADE (Movement and Design in Europe) in France, an innovative, five-week course integrating dance and design that meets for two weeks in Paris, featuring museum outings and the viewing of dance performances, and then goes to the French countryside (Normandy) for a three-week period of training and performance workshops coordinating dance and design. The program is taught by seasoned professors in dance and design from Washington University and Connecticut College, and enhanced by master classes with European artists. Dance majors may substitute 6 credits from MADE for upper-level courses in composition and modern dance technique. Washington University students can pursue dance studies abroad during the academic year at the University of Auckland, New Zealand; University of Ghana, Legon; and Roehampton University, London.

Minors

The Minor in Ballet

Total units required: 15-18

Required courses: 7-9 units

Option 1

Dance 203	Composition I (3 units) AND 2-3 units of modern dance technique (OR choose a modern technique class as the corequisite for Dance 203)	5-6
-----------	---	-----

OR

Option 2

Dance 208	Composition and Technique (with modern dance as the technique requisite. Dance 208 technique may be ballet if the modern dance requirement is fulfilled in a separate course as in Option 1.)	4
-----------	---	---

Also required with Option 1 or Option 2:

Dance 316E	From Romantic to Postmodern Dance	3
or Dance 340	Ballet as Ethnic Dance and Classical Art	

Choose 6 units from among the following:

Dance 222	Fundamentals of Classical Ballet	2
Dance 321	Classical Ballet: Intermediate I	2
Dance 3221	Classical Ballet: Intermediate II	2
Dance 415	High Intermediate Ballet I	2
Dance 416	High Intermediate Ballet II	2
Dance 4281	Classical Ballet III	2
Dance 4291	Classical Ballet IV	2

Electives: choose at least 2 units from among the following:

Dance 305Z	Music Resources for Dance	2
Dance 312	Accompaniment Techniques for Dance	2
Dance 315	Dance Spectrum	3
Dance 316E	From Romantic to Postmodern Dance (if not taken as required course)	3
Dance 3224	Intermediate Pointe Technique	1
Dance 342	Critical Thinking in Western Theatrical Dance: Questioning Meets Creative Thinking and Collaboration	3
Dance 418	Variations in the Ballet	1
Dance 423	Pointe Technique	1
Dance 424	Pointe Technique	1
Dance 4281	Classical Ballet III (If not taken as part of required 6 units)	2
Dance 4291	Classical Ballet IV	2
UCollege Dance 430:	Applied Anatomy for the Performing Arts	3

At least 1 unit of pointe work is recommended for women.

The Minor in Modern Dance

Total units required: 16-17

Required courses:

Dance 301	Theory and Technique of Modern Dance III	3
Dance 3021	Theory and Technique of Modern Dance IV	3
Dance 303	Composition II	3
or Dance 361	MADE in France II : Choreography and Construction Collaborations	
Dance 316E	From Romantic to Postmodern Dance	3

AND: a 2-unit ballet class at the level appropriate for the student; level to be determined.

Elective courses: Choose 2–3 units from among the following courses:

Dance 305Z	Music Resources for Dance	2
Dance 311	Modern Dance and the African-American Legacy	2
Dance 312	Accompaniment Techniques for Dance	2
Dance 315	Dance Spectrum	3
Dance 328	Contemporary Dance and the Michio Ito Method	2

The Minor in World Music, Dance and Theater

For the world music, dance and theater minor, visit the Performing Arts (p. 664) page.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L29 Dance.

L29 Dance 104 Body Conditioning

A complete body conditioning program designed to increase strength and flexibility. Uses some floor barre and Pilates-related floor exercises.

Credit variable, maximum 2 units.

L29 Dance 106E Introduction to Dance as a Contemporary Art Form

Introduction to dance as a creative art form. Through practical work in the studio, students gain an understanding of the human body as an instrument of expression and of motion as the medium of dance. Technique, analysis and creative work. Not open to majors. May be repeated once for credit.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 111 Contemporary Dance for the Male Dancer

For men who may have athletic or other physical and kinesthetic skills, but little to no formal dance training. This course is designed to meet the specific needs of the male body in its capacity for dynamic, aesthetic, expressive movement. Introduction to dance as a creative art form using the body as the instrument of expression and motion as the medium of dance. Technique, analysis and creative work.

Credit 2 units. A&S: LA

L29 Dance 120 Yoga and Relaxation Techniques

Systematic introduction to the methods and theory of yoga as a means of stretching, strengthening, energizing and relaxing the body. Incorporates meditation, massage and other release techniques to help sharpen both body and mind. Students should wear comfortable clothing permitting freedom of movement and bring a mat or towel. Related readings assigned.

Credit 1 unit.

L29 Dance 200 Tutorial

Supplementary work at the low intermediate level in ballet and modern dance at times to be announced. Prerequisites: sophomore standing and permission of the Coordinator of the Dance Division. Credit to be determined in each case.

Credit variable, maximum 6 units. A&S: LA A&S IQ: HUM Art: HUM

L29 Dance 201E Theory and Technique of Modern Dance I

Fundamental theory and techniques of American modern dance. Studio work investigating the expressive potential of human movement and developing individual rhythmic and kinesthetic awareness, coordination and breadth of movement vocabulary. Related reading and video expand on theory embodied in the class work and give an historical overview of modern dance in the United States. Attendance of two to three performances required. Prerequisite: some previous dance training or permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 202 Theory and Technique of Modern Dance II

A course for students familiar with the basic concepts and technique of modern dance. Emphasis on expanding individual movement versatility with increasing difficulty of choreographic phrase materials. Related readings and videos, some focused on American postmodern dance. Attendance at two to three performances required. Prerequisite: Dance 201 or permission of the instructor.

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 203 Composition I

Finding personal movement and transforming it into dance. Through a series of class projects the formal elements of composition are introduced. Prerequisite: Dance 201 or

permission of the instructor; concurrent registration in a technique class required.

Credit variable, maximum 3 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 208 Composition and Technique

Introduction to dance composition supported by two modern or ballet technique classes each week at the level appropriate to the individual student. Work on composition assignments outside of class is expected. Prerequisite: Dance 201E or permission of instructor.

Credit 4 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 211 Yoga and Relaxation Techniques II

A more vigorous yoga discipline incorporating flow series and held postures. This class concentrates on the movement and distribution of energy throughout the body. Prior yoga experience recommended.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM EN: H

L29 Dance 212E Introduction to Theater Production

An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovations series and the Performing Arts Department.

Same as Drama 212E

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM

L29 Dance 213 Improvisation I

This course explores the process and art form of creative, expressive, spontaneous dance making. Students learn to move and respond simultaneously in the moment, developing skills of communication, observation, performance and composition in the language of movement. Open to dancers of all levels. Light reading; in class and out-of-class projects.

Credit 1 unit. A&S: LA Art: HUM BU: HUM

L29 Dance 221 Fundamentals of Classical Ballet

Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on American Ballet Theatre as a repository for classical and modern ballet repertoire of both American and European choreographers. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary. Prerequisite: none.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 222 Fundamentals of Classical Ballet

Designed for dancers with no previous training or knowledge of the development of ballet in America, a systematic introduction to the ballet technique, including traditional terminology, and introductory readings on New York City Ballet as a repository for the choreography of George Balanchine. Attention to basic anatomical concerns and body alignment as well as to the classical movement vocabulary.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 226 Tap Dance: Beginning

Instruction in basic tap steps and rhythms. Development of varied tap dance styles. Primarily a studio course with some assigned reading. No prerequisite dance training required.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM EN: H

L29 Dance 2340 Classical Dances of India

An introduction to the classical dance of South India in its cultural context. Students learn to appreciate the Bharata Natyam style and to perform its basic movements. May be repeated once for credit.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM EN: H

L29 Dance 257 Dance Theater Production

Experience in technical production. Required stage work includes two studio dance productions supervised by faculty. Prerequisite: Dance 212E.

Credit 1 unit. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 272 Introduction to American Musical Theater

Students are taught basic interpretation of musical theater repertoire. The student learns to analyze and perform songs with regard to melody and musical form. Acting techniques are developed through lyric interpretation. Students also are introduced to basic audition practice and etiquette. Prerequisite: permission of instructor. \$25.00 lab fee.

Same as Drama 272

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L29 Dance 280 Hip-Hop Jazz

Hip-hop jazz and music video dance combine in this exciting, high-energy course. Students learn elements from each of these dance styles and focus on how they have been adapted into pop culture choreography. This course is designed for students with at least one year of dance training. It is expected that by the end of the course, students have a greater knowledge of dance and dance terminology and an increased ability to perform set choreography. Primarily a studio course; some related reading assigned.

Credit 2 units. Art: HUM

L29 Dance 296 Internship

Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is agreed upon between the student and faculty sponsor before work begins, and is evaluated by the faculty sponsor at the end of the internship.

Credit variable, maximum 3 units. A&S: LA A&S IQ: HUM Art: HUM EN: H

L29 Dance 297 Fundamentals of Jazz Dance

This course introduces the basic principles and vocabulary of traditional jazz dance as influenced by American social dances and its relationship to the rise in popularity of jazz music. Both are unique to America and are rooted in African-American and European-American culture. Prerequisite: one year of training in ballet technique or modern dance.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM EN: H

L29 Dance 300 Jazz Dance II

Intermediate to advanced work in jazz dance technique, including choreographic phrases emphasizing stylistic clarity and more complex rhythmic structure. Variable content; may be repeated once for credit in a subsequent semester. Preference given to students registering for the first time. Prerequisite: Dance 297 or permission of instructor.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 301 Theory and Technique of Modern Dance III

Technique and related concepts for the intermediate-level student. Greater emphasis on the ability to accurately replicate or individually interpret choreographic material. Related reading and video assignments on contemporary dance developments and attendance at two to three performances required. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: Dance 202 and permission of the instructor.

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 3021 Theory and Technique of Modern Dance IV

Continuation of Dance 301. Variable content; may be repeated for credit in a subsequent semester. Prerequisite: Dance 301 and permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 303 Composition II

A workshop for students with experience in choreography. Study of approaches to dance composition with related improvisation problems. Work outside of studio hours expected. Prerequisites: Dance 203 or 208 and permission of the instructor; concurrent registration in a technique course required.

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM

L29 Dance 305Z Music Resources for Dance

Analysis of Western (Europe, America), world (Africa, India, Indonesia) and global popular musics. Emphasis on rhythm/form, style/genre, instrumentation and function/context. Basic music theory: notation, time signatures, subdivisions and polyrhythms. Major composers for dance (Lully, Tchaikovsky, Debussy, Ravel, Stravinsky, Cage, etc.). Introduction to percussion techniques for dance accompaniment using hand drums, drumset and hand-held instruments. Introduction to basic studio techniques including microphones, recording and editing equipment, and the use of synthesizer and drum machines. Prerequisites: for dance students at the intermediate or advanced level.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 3071 19th- and 20th-century Costume Design and History II

Same as Drama 3071

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM

L29 Dance 307A Stage Costumes: Prehistoric to 1800

Basic presentation of costume design from conception through final renderings, development of drawing and painting techniques for the costume plate, and the history of stage costume in the principal periods and styles of drama from prehistoric periods through 1800.

Same as Drama 307

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM

L29 Dance 308 Dance Composition Projects

Choreography juried by dance faculty or supervised choreography on themes assigned by the instructor or formulated by the student and approved by the instructor. Prerequisite: minimum of one semester course work in composition or permission of the instructor.

Credit variable, maximum 3 units. A&S: LA A&S IQ: HUM

L29 Dance 309 Composition and Technique II

Continuing work in dance composition supported by two technique classes each week at the level appropriate to the individual student. Work on composition assignments outside of class are expected. Prerequisite: Dance 201, Dance 203 or permission of instructor.

Credit 4 units. A&S: LA A&S IQ: HUM BU: HUM

L29 Dance 310 Dance Improvisation II

Continuation of Dance 213. Prerequisites: Dance 213 or permission of instructor; concurrent registration in a dance technique course at the 300 level or higher is required. May be repeated once for credit.

Credit 1 unit. A&S: LA A&S IQ: HUM BU: HUM

L29 Dance 3101 Dance Improvisation: Spontaneous Composition and Performance Techniques

Dance improvisation is a cumulative, integrative practice, applying every skill the performer can bring to the spontaneous present in which creative process and performance is simultaneously one and the same. In this course, students learn and create processes for improvising dance/performance art, with an aim toward developing integrated skill in: dance technique, intuitive movement invention, partnered dancing, collaborative process, performance presence/expressivity and compositional form. Applications include improvising compositions for theatrical stage, site-specific venues and for camera-based artistic mediums. Meets requirement for dance major. Prerequisite: students must be qualified at 300 level in any genre of dance technique, or obtain special permission of instructor. Though not prerequired, this course is optimal for students who have previously taken Dance Composition (Dance 203/208/303/309), and/or Contact Improvisation (UCollege Dance 212). May be repeated once for credit.

Credit 1 unit. A&S: LA A&S IQ: HUM EN: H

L29 Dance 311 Modern Dance and the African-American Legacy

This course examines the works of several African-American choreographers and their contributions to the field of modern dance in America. These works, considered modern-day classics, depict important historical events and reveal cultural influences that people of African descent have impressed upon our society. Through the medium of dance aided by discussions, video and class reading assignments, the choreographers' works are analyzed for form, content and social relevance.

Studio work includes technique to support learning the repertory. Prerequisite: one to two years training in modern, jazz or ballet.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L29 Dance 312 Accompaniment Techniques for Dance

A wide variety of percussion instruments and techniques are studied to determine what makes effective dance

accompaniment. The course includes: examples and discussion of dance musics from Western and non-Western cultures; basic notation of rhythm and form; demonstrations of musical styles and discussion of social contexts. Students have opportunities to assist in accompanying modern dance classes. Minimum of two to three hours a week of individual practice and/or listening to recordings expected.

Credit 2 units. A&S: LA A&S IQ: HUM Art: HUM EN: H

L29 Dance 315 Dance Spectrum

Introductory consideration of dance as a human activity with culturally specific forms and functions. The course material is multicultural and organized both thematically and chronologically. Topics include: dance as ritual and art, dance and politics, dance as reflection and subversion of gender norms, classical Asian dance forms, and a brief overview of the development of Euro-American theatrical dancing, especially ballet and modern dance. Seminar format with emphasis on discussion based on reading and extensive video materials.

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: HUM

L29 Dance 316E From Romantic to Postmodern Dance

An overview of European and American theatre dance from the early 19th century to the present. Topics include: Isadora Duncan's work as transition and revolution, Orientalism in early modern dance and the Diaghilev Ballets Russes, the "reconstruction" of the dancer's body, gender issues in movement vocabulary, choreographic content and professional working conditions, the emergence of modernism and postmodernism in dance. Seminar format emphasizing discussion of reading and dance videos.

Credit 3 units. A&S: TH A&S IQ: HUM Art: AH

L29 Dance 319 Stage Lighting

Same as Drama 310

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM EN: H

L29 Dance 320 Alexander Technique

Students of the Alexander Technique learn to recognize and change counter-productive habits. This skill enables dancers to take correction more effectively and to overcome stumbling blocks in technique and performance. Learning to allow natural postural reflexes to work improves length, balance and flexibility, providing a strong basis for dance technique. The result is the relief of excess tension, enhanced range of expression and the ability to have more choices about how one moves.

Credit 2 units.

L29 Dance 321 Classical Ballet: Intermediate I

A course designed for those with a solid foundation in the fundamentals of ballet technique. Related reading and video assignments; attendance at one to two ballet performances. Variable content; may be repeated in a subsequent semester. Prerequisites: permission of the instructor and B+ or better in Dance 221 and 222.

Credit 2 units. A&S: LA A&S IQ: HUM

L29 Dance 3221 Classical Ballet: Intermediate II

Special emphasis on the development of adagio, allegro and turn sequences. Variable content; may be repeated in a subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 221 and 222.

Credit 2 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 3224 Intermediate Pointe Technique

This course is designed for dancers with a basic foundation and understanding of pointe technique. The focus of the course is the strengthening of the overall presentation of the pointe technique while additionally developing the performance quality of the dancer. Variable content: may be repeated for credit in a subsequent semester. Prerequisites: concurrent registration in Dance 3221, 416 or 4291, and permission of the instructor.

Credit 1 unit. A&S: TH A&S IQ: HUM EN: H

L29 Dance 323 Topics in Theater

Same as Drama 321

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 328 Contemporary Dance and the Michio Ito Method

Primarily a studio course of classes combining contemporary modern dance technique, some balletic barre work and instruction in the Michio Ito method. Inspired by elements in his own training at the Dalcroze Institute, Ito preceded Martha Graham in developing a systematized approach to modern dance that reflected the artist's individual aesthetic preferences and that played a role in his choreography. The course examines similarities and contrasts between contemporary modern dance training and the Ito method, which emphasizes development of musicality, coordination and performing presence. Some reading and video material and one final project with both written and movement components. Prerequisite: upper-level placement in modern dance, ballet or jazz.

Credit 2 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 332 Mind-Body: Integral Practices

The mind and the body are not only connected, they are a fundamental unity, always functioning in a coordinated state. Whether or not we coordinate them well or badly is a choice we make, whether we are conscious of choosing or not. Many so-called "physical" exercises, activities and arts suffer from a lack of adequate skills of sensation, attention, perception and conscious control. Conversely, many so-called "mental" activities lack adequate awareness of the bodily underpinnings of thought. Like a person learning to play a musical instrument, one's ability to coordinate the mental and physical aspects of Self toward one's best personal potential is a skill requiring study of strategies and techniques for good practice in "being well." Such ideas and methods are not "new age," but can be traced back through more than a century in the work of investigators such as F.M. Alexander, progressive educator John Dewey, anthropologist Raymond Dart, and many others. Through direct experience and related readings, this class introduces students to "somatic," or "integral" practices — activities that are inherently more effective at developing the aspects of Self in a coordinated and authentically holistic manner. We then learn to apply our understanding to all kinds of activities, both mental and physical, from chores to exercise, from arts to sports, from hobbies to vocations. Some kind of prior movement training (e.g., athletics, martial arts, dance, etc.) is preferable but not required.

Credit 2 units. A&S: LA EN: H

L29 Dance 340 Ballet as Ethnic Dance and Classical Art

This course examines the origins and major developments in ballet theory, technique and production practice, emphasizing their relationship to concepts of ethnicity and classicism. Issues considered include: the influence of classic Greco-Roman theater on the themes, aesthetic ideals and theorization of ballet; analysis of ethnic content not only in thematic material but in ballet movement vocabulary and training process; the conscious reformulation in the United States of European ballet as an equally American art form; the expansion of Euro-American "classical ballet" in the work of Balanchine and Tudor; the appropriation of ballet by non-Western countries (such as China and Japan) and its impact on native dance genres; typical construction of the ballet dancer's body and movement, including gender definition, in relationship to a specific ethnic community context. Seminar format with lectures, discussion and video materials. Three five- to seven-page papers and final. No prerequisites.

Credit 3 units. A&S: TH, SD, WI A&S IQ: HUM, SD, WI BU: HUM

L29 Dance 342 Critical Thinking in Western Theatrical Dance: Questioning Meets Creative Thinking and Collaboration

This is a course designed to introduce the student to the intersections of creative, collaboration and critical thinking in Western Theatrical Dance. This course begins with a review of the literature on creativity, creative collaboration, the process of creating Western Theatrical Dance, and critical thinking. The course continues as an overview of these issues while presenting the intersection and interaction of these elements, which form the creative collaboration of Western Theatrical Dance. The students read from both texts and articles on creativity, creative collaboration, the process of creating Western Theatrical Dance in the 20th and 21st centuries, and critical thinking.

Credit 3 units. A&S: TH A&S IQ: HUM BU: HUM EN: H

L29 Dance 343 West African Music and Dance in Context

A West African dance course specifically focused on the Ivorian dance traditions of the Baule, Bete Dan, Lobi, Makinke, and Senuo peoples. The course addresses the relationship between music and dance as well as their social and cultural significance. We include study of myths, art, costumes and masks as they relate to various dances and musics. A studio course with related reading material.

Credit 2 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 360 MADE in France I: Old Paris/New Europe

Students are introduced to the city's rich artistic history as well as the world of contemporary movement arts in Europe through two weeks of dramaturgical field research in Paris. With a diversified sampling of performances, museum visits and discussions animated by program faculty, students experience hands-on the rich history Paris has on display. Museums visited include the Musée du Louvre, Musée de la Mode et du Costume, Musée d'Orsay, Centre Georges Pompidou, Musée des Arts et Métiers, Musée Cluny, and the Rodin Museum. Museums and live performances serve as our main "books" for this intensive hands-on course. Museum visits and performances are supplemented by readings and assignments on a chosen theme and performance history and regular seminars with the specific aim of investigating a variety of dramaturgical approaches that contemporary European directors employ when considering the use of objects, props, costume design, sound design, lighting

design and movement. Additionally, students attend several contemporary dance theater performances.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 361 MADE in France II : Choreography and Construction Collaborations

Continuing upon the field research carried out in Paris, student work groups begin to concretize their creative projects at a rural retreat center for artists in Normandy, France. Beginning with a day of intensive introduction to design and construction principles in accordance with the program theme, the design faculty helps students prepare for the "Imagination Fair" presentations that mark the midway point and serve to launch each group's creative process collaboration. After these presentations, students get to work on realizing their choreography and construction projects: the collaborative creation of dances (solos, duos and trios) using a variety of found objects, props, costumes and/or instruments created by dancers and designers for the final production. Each year, in addition to the U.S. teaching faculty, a number of European artists active in their profession offer valuable master classes that coincide with the program theme and help prepare students for their final projects. Work hours are interspersed with French-language meals during which students are encouraged to speak French with the host family and with their peers and teachers. Additional field trips are organized to introduce students to the rich cultural and agricultural heritage of the Normandy region. Prerequisite: Dance 360 MADE in France I: Old Paris/New Europe.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 372 Advanced American Musical Theatre

Same as Drama 372

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L29 Dance 400 Dance Production Projects

Students may receive credit for work on special dance-related production projects conceived by students and supervised by faculty. Contracts must be signed by the student, faculty supervisor, and the coordinator of Dance 400 before work on the project commences. Students should register for this course after work is completed. Prerequisite: permission of the dance faculty.

Credit variable, maximum 3 units. A&S: LA A&S IQ: HUM

L29 Dance 401 Theory and Technique of Modern Dance V

Emphasis on versatility in movement vocabulary and on more complex and intensive technical work with discussion of theory inherent in the studio work. Related reading and projects. Variable content: may be repeated for credit in a subsequent semester. Prerequisite: Dance 302 or permission of the instructor. Students with class conflicts may, with the permission of the instructor, enroll for 2 rather than 3 units.

Credit variable, maximum 3 units. A&S: LA A&S IQ: HUM

L29 Dance 4021 Theory and Technique of Modern Dance VI

Continuation of Dance 401 with emphasis on more complex and intensive technical work. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: Dance 401 and permission of the instructor. Students with class conflicts may, with the permission of the instructor, enroll for 2 rather than 3 units.

Credit variable, maximum 3 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 403 Jazz III

This contemporary jazz class combines the embodied movement traditions of jazz dance styles with the principles of modern dance and ballet techniques. The primary focus of the class is on increased technical proficiency. The studio work introduces exercises and movement phrases that challenge the dancer's skill level, and encourage a personal exploration that further enhances the dancer's individual expression and style. Studio work is supported by individual research in the field of jazz dance. Prerequisites: advanced training in jazz dance technique and permission of the instructor.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 404 Composition IV

The exploration of choreographic problems in small and large groups. Prerequisite: completion of Dance 303, senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended.

Credit variable, maximum 3 units.

L29 Dance 4041 Composition III

The exploration of choreographic problems for small and large groups. Prerequisite: senior standing or permission of instructor. Previous or concurrent registration in Dance 401 or 4021 recommended.

Credit variable, maximum 3 units. A&S: LA A&S IQ: HUM

L29 Dance 407 Topics in Dance Techniques and Somatic Practices: Ito Training for the Contemporary Dancer

This course introduces upper-level dancers to a training system unique in the contemporary dance world. Ito technique demands replication of specific movement patterns (typical in much dance training) but also cultivates somatic awareness in execution of the movement. Each class includes contemporary modern dance work, a brief personally focused period of improvisation, a short balletic barre, and practice of the Ito gesture system and the style it supports. Attention to specific integration of breathing with the Ito gestures heightens attention to the importance of breath in supporting the vivid performance of any movement. Upper-level dancers can use this training to develop presence and add to their movement vocabulary. Students also learn some of the Ito repertoire and create short choreographies utilizing the gestural material in individual ways. Primarily a studio course, with some short reading assignments, some videos, and a final movement project.

Credit variable, maximum 3 units. A&S IQ: HUM EN: H

L29 Dance 413 Modern Dance and the African American Legacy II

This course focuses on works by 2-3 renowned African-American choreographers. The selected choreographers are chosen for their contributions to the field of American modern dance based primarily on their explorations regarding the process and dynamics of building community — the sense of community as experienced through the lens of African-American cultural values and aesthetics as it pertains to the creative process. Therefore, the course focuses on viewing the body as a site for the exchange of ideas concerning humanity. Students investigate these choreographers through learning excerpts of their choreography and choreographing personal responses, as well as through related readings, videos and independent research.

Credit 2 units. A&S IQ: HUM EN: H

L29 Dance 414 Advanced Stage Lighting

An advanced-level continuation of Drama 310. Emphasis is placed on design aesthetics and their application in a laboratory setting. Students explore color theory, lightboard programming and design analyses as well as execute a variety of finished projects. These projects cover a wide range of production styles and performance venues. Prerequisite: permission of instructor. Same as Drama 410

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 415 High Intermediate Ballet I

A course designed as preparation for the advanced level. Emphasis on vocabulary review and individual technique assessment, including placement, movement quality and musicality. Related readings and video assignments; attendance at and critical analysis of one to two ballet performances. Variable content; may be repeated in a subsequent semester. Prerequisites: B+ or better in Dance 221, 222, 321, 322 and/or permission of instructor.

Credit 2 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 416 High Intermediate Ballet II

A course designed for the high intermediate dancer in preparation for Dance 4281/429. Emphasis on placement, movement quality and musicality. Related readings and projects supplement the classical vocabulary. Prerequisites: B+ or better in Dance 221, 222, 321, 322 and/or permission of instructor.

Credit 2 units. A&S: LA A&S IQ: HUM

L29 Dance 418 Variations in the Ballet

Introduces classical choreography within various ballets. Prerequisites: Dance 321 or Dance 4281 with some pointe training, and permission of instructor.

Credit 1 unit. A&S: LA A&S IQ: HUM

L29 Dance 423 Pointe Technique

Designed for dancers with a basic foundation in pointe work. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: concurrent registration in Dance 321 or 4281 and B+ or better in Dance 221, 222, 321, 322 and/or permission of instructor.

Credit 1 unit. A&S: LA A&S IQ: HUM

L29 Dance 4234 Performing Knowledge: Arts Integration Pedagogy in Theory and Practice

Same as Drama 4234

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 424 Pointe Technique

Designed for dancers with a basic foundation in pointe work. Prerequisites: concurrent registration in Dance 321, 322, 4281 or 4291, and permission of instructor.

Credit 1 unit. A&S: LA A&S IQ: HUM

L29 Dance 4281 Classical Ballet III

Designed for dancers with a solid foundation in beginning and intermediate ballet technique. Related reading, research paper/discussion, video assignments; attendance at one to two ballet performances. Variable content; may be repeated for credit in a

subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 3221 and Dance 415 or Dance 416.
Credit 2 units. A&S: LA A&S IQ: HUM

L29 Dance 4291 Classical Ballet IV

A course designed for dancers with a solid foundation in beginning and intermediate ballet technique. Variable content; may be repeated for credit in a subsequent semester. Prerequisites: permission of instructor and B+ or better in Dance 3221 and Dance 416.
Credit 2 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 457 Dance Repertory

Under the direction of an experienced choreographer, students rehearse and perfect repertory concert dances. All students perform or understudy the choreographies. May be repeated for credit. Enrollment by audition. Prerequisite: concurrent registration in a technique class required.
Credit 1 unit. A&S: LA A&S IQ: HUM

L29 Dance 458 Dance Repertory

Under the direction of an experienced choreographer, students rehearse and perfect repertory concert dances. May be repeated once for credit. Enrollment by audition. Concurrent registration in a technique class is required.
Credit 1 unit. A&S: LA A&S IQ: HUM

L29 Dance 478 The Eye of the Mask: A Multicultural History of the Theater through Mask Making and Design

Same as Drama 478
Credit 3 units. A&S: TH A&S IQ: HUM BU: HUM EN: H

L29 Dance 479 Fundamentals of Sound Design

Encompassing both creative and technical aspects of sound in the performing arts, the course gives theoretical knowledge of, and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, "training" of the ear and basic techniques of sound montage. Students are expected to participate in a variety of conceptual and research oriented exercises as well as complete several lab projects. Sound-related work on Performing Arts Department productions may be required. Prerequisite: Drama 212 and permission of instructor. Same as Drama 479
Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L29 Dance 493 Senior Project

Specialized project in a selected area in dance. The student works individually under the supervision of a faculty member. Prerequisite: permission of the coordinator of the Dance Division.
Credit variable, maximum 3 units.

L29 Dance 499 Study for Honors

An honors thesis or performance and thesis project designed by the student, and supervised and assessed by a faculty committee. Prerequisites: senior standing; grade point average of 3.5 and 3.5 in dance classes; and permission of the coordinator of the dance division.
Credit variable, maximum 6 units.

L29 Dance 4990 Independent Work

Prerequisite: senior standing and permission of the coordinator of the dance division.
Credit variable, maximum 10 units.

Drama

Students may select drama as a major through the Performing Arts Department (p. 662). This major combines the historical, cultural and literary study of theater and performance with a full array of courses regarding theatrical production, including acting, directing, performance art, design (set, costume, lighting, sound) and playwriting. The Performing Arts Department strongly believes in the mutually beneficial relationship between the study and the practice of theater. A major in drama provides an academically rigorous course of study — with a strong grounding in theater history, dramatic literature, performance studies and dramatic theory — that also develops students' knowledge of theater by means of practice.

The rigorous three-semester Theater Culture Studies sequence provides a solid background in history, literature and performance, and students take an additional three courses in theater and performance studies. Within theater arts, students with their advisers may design their own course of study or be guided by diverse "paths" of study in acting, directing, playwriting or design. Our theater arts courses, regularly drawing from playwrights such as Shakespeare, Chekhov and Beckett, are based on a liberal arts, rather than a conservatory, model.

We also offer two special programs that can be credited toward the major. Since 1991, we have been holding a national summer program at Shakespeare's Globe in London, which consists of a 3-unit course on acting Shakespeare and a 3-unit course on Shakespeare studies, in addition to several master classes taught by Globe personnel. We also offer an intensive semester-long playwriting program in New York City held at Primary Stages, one of Off-Broadway's leading producers of new works and home of the Einhorn School of Performing Arts.

Majors

The Major in Drama

Total units required: 39

The major requires six courses in Theater and Performance Studies and seven courses in Theater Arts.

Theater and Performance Studies Component

A minimum of six theater and performance studies courses must be taken for the major. The specific requirements are:

- Three courses, preferably taken in order, in the Theater Culture Studies sequence:

Drama 228C	Theater Culture Studies I: Antiquity to Renaissance	3
Drama 229C	Theater Culture Studies II: From Renaissance to Romanticism	3
Drama 365C	Theater Culture Studies III: Melodrama to Modernism	3
- Two electives, 300-level or above, including courses in non-western/minority theater, theory and performance studies. It is strongly recommended that one of these two courses be a writing-intensive course taken in the junior year.
- The senior drama capstone, taken in the fall semester of the senior year: Drama 4452.

Theater Arts Component

A minimum of seven theater arts courses must be taken for the major. The specific requirements are:

Drama 212E	Introduction to Theater Production	3
------------	------------------------------------	---

All majors must take **one** of the following:

Drama 240E	Acting I: Fundamentals of Acting	3
Drama 307	Stage Costumes: Prehistoric to 1800	3
Drama 310	Stage Lighting	3
Drama 311M	Scenic Design	3

For the five remaining courses students may choose from four suggested paths or, with the help of an adviser, students may develop their own path within the major:

Directing Path

Drama 227	Playwriting	3
or Drama 307	Stage Costumes: Prehistoric to 1800	
or Drama 310	Stage Lighting	
or Drama 311M	Scenic Design	

AND

Drama 341	Acting II	3
Drama 343	Fundamentals of Directing	3
Drama 403	Dramaturgical Workshop	3
Drama 444	Directing II	3

Acting Path

Drama 314	Voice-Speech Laboratory	3
-----------	-------------------------	---

or Drama 340 Topics in Stage Movement

AND

Drama 341	Acting II	3
Drama 342	Acting III	3
Drama 343	Fundamentals of Directing	3
Drama 440	Acting IV	3

Playwriting Path

Drama 227	Playwriting	3
-----------	-------------	---

(See also Writing 224 Playwriting)

Drama 343	Fundamentals of Directing	3
Drama 403	Dramaturgical Workshop	3
Drama 473	Advanced Playwriting	3

AND

Drama 4990	Independent Work	1-6
------------	------------------	-----

or

Drama 4995	Literature, Theory, Criticism	1-3
------------	-------------------------------	-----

Design Path

- One Introduction to Design course: Drama 307, Drama 310 or Drama 311M
- Two electives, 300-level or above, or an independent study in mainstage design (Drama 4993)

AND

Drama 343	Fundamentals of Directing	3
or Drama 460	The Creative Impulse	

AND

Drama 410	Advanced Stage Lighting	3
or Drama 416	Period Style and Design History	
or Drama 421	Costume Construction and Design	
or Drama 450	Advanced Scene Design	

Additional Information

Study Abroad: Since 1991, the Performing Arts Department and Globe Education (London) have been running a national summer program held at Shakespeare's Globe in London. This four-week program includes a 3-unit course on the textual, historical and cultural study of Shakespeare; a 3-unit course on acting Shakespeare (with particular attention to acting on the Globe stage); master classes taught by Globe personnel; playgoing in London and Stratford; and more.

MADE in France (Movement Arts and Design in Europe) offers a hands-on historical survey of European art, dance and design. Courses are developed to stimulate collaborative engagement between young choreographers, designers (costume/scenic/sound), actors, experimental musicians and visual artists wishing to learn more about multi-disciplinary performance involving choreography. Participants collaborate directly with European

artists and scholars. This summer program splits time and study between Paris and Normandy.

Study Away: The Performing Arts Department offers an intensive semester-long playwriting program in New York City, called PS[NYC], held at Primary Stages, one of Off-Broadway's leading producers of new works and home of the Einhorn School of Performing Arts. Six courses in playwriting, American dramatic literature and American theatre production are available through the PS[NYC] program.

Minors

The Minor in Drama

Units required: 18

Required courses:

Drama 212E	Introduction to Theater Production	3
6 units from the Theater Culture Studies Sequence:		
Drama 228C	Theater Culture Studies I: Antiquity to Renaissance	3
Drama 229C	Theater Culture Studies II: From Renaissance to Romanticism	3
Drama 365C	Theater Culture Studies III: Melodrama to Modernism	3

Elective courses:

At least 9 credit units at the 300 level or above. No more than 3 units may be production credits.

The Minor in World Music, Dance and Theater

For the world music, dance and theater minor, visit the Performing Arts (p. 664) page.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L15 Drama.

L15 Drama 115 Freshman Seminar: What is Art?

Great works of literature, cinema, painting, drama, music and dance provide us with new, provocative and sometimes completely unexpected methods of perceiving reality. In this Freshman Seminar, we examine the meanings of art by looking at works that have radically altered or challenged the ways in which people saw the world around them — along with works that are doing the same today. In addition to analyzing texts in a classroom setting, this course also incorporates meetings with artists and directors practicing their crafts, and attendance at theatrical performances and museums both on and off campus. Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM EN: H

L15 Drama 120 Freshman Seminar: Race and Performance

What does it mean to "act black"? What about "acting Jewish"? This course looks at performances of racial and ethnic identity, mostly in the United States, mostly in the 20th century. We examine novels (such as Nella Larsen's *Passing*), plays (such as Anna Deavere Smith's *Fires in the Mirror*), and performances of everyday life (such as "Cowboys and Indians") to investigate the performance of race in public. Once we begin to explore the social and cultural performance of race, will it all turn out to be "only" an act?

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD BU: BA EN: H

L15 Drama 135 Freshman Seminar Ideation: Idea Generation

Ideation exists at all phases of a creative process: brainstorming, idea generation, innovation, prototyping, development and actualization. But Ideation is less like a line and more like a loop from observing to reflecting to making — and back again. It is a rarely understood but essential part of any creative or design process. Through collaboration and conversations with classmates, readings on the topic and group exercises, Ideation is a course that strives to define and demystify what we mean by "creativity," help students identify their creative strengths and weaknesses, encourage artistic experimentation of new ideas, establish methods of design thinking and make it clear that collaboration among varied backgrounds and disciplines is the key to coming up with creative solutions for complex problems. Successful companies such as IDEO led by visionaries in the form of Tim Brown and David Kelley have pioneered the notion of Design Thinking. "Design thinking" is defined as "the ability to combine empathy for the context of a problem, creativity in the generation of insights and solutions, and rationality to analyze and fit solutions to the context." This course encourages students to explore their collaborative talents in new ways that they find apply to virtually any discipline and career path: from A to Z.

Credit 3 units. A&S: TH A&S IQ: HUM BU: HUM EN: H

L15 Drama 175 Designing Creativity: Innovation Across Disciplines

Via a series of lectures from prominent thinkers and practitioners in the areas of medicine, neuroscience, law, engineering, architecture, human-centered design, business, stage design, and the performing arts, Designing Creativity is a course that covers the study and practice of the creative process across many disciplines. From "Ah-ha" epiphanies to slow-developing discoveries, the creative process is employed by innovators and artists in virtually every corner of the globe. In this course, we explore the study of those processes by hearing from creatives in many fields with practice of those techniques via a LAB component that allows students to explore the development of innovative ideas in collaborative teams followed by project presentations to core faculty and classmates.

Same as InterD 175

Credit 3 units. A&S IQ: HUM

L15 Drama 200 Theater Projects

Independent study. Students may contract with a faculty supervisor for credit for their work on theatrical productions or research. Contracts must be signed by the student, the faculty supervisor and the coordinator of Drama 200 before the student's work on the project commences. Credit and grade option are determined in each case.

Credit variable, maximum 3 units.

L15 Drama 2001 Acting

Independent study.
Credit variable, maximum 3 units.

L15 Drama 2002 Directing

Independent study.
Credit variable, maximum 3 units.

L15 Drama 2003 Technical Theater

Independent study.
Credit variable, maximum 3 units.

L15 Drama 2004 Voice, Speech

Independent study.
Credit variable, maximum 3 units.

L15 Drama 2005 Literature, Theory, Criticism

Independent study.
Credit variable, maximum 3 units.

L15 Drama 201 Black Theater Workshop

Credit variable, maximum 3 units. BU: HUM

L15 Drama 212E Introduction to Theater Production

An introductory study of the major elements involved with mounting a theatrical production. Utilizing guest speakers in both theater arts and theater studies, the course addresses such topics as scenic, costume, lighting and sound design; production management and procedures; and the history and culture of theatrical space and design. Students are required to serve as a crew member on one departmental production and attend productions of the Edison Theatre Ovations series and the Performing Arts Department.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM

L15 Drama 214 Public Speaking: Embodied Communication

The ability to speak well and to communicate effectively in the public forum is an essential skill for all students. This course aims to offer a comprehensive and wide-ranging approach to developing the skills of the contemporary speaker. While acknowledging and utilizing traditional approaches to public speaking, this course expands its reach to include applicable techniques from the world of the Performing Arts — especially theater and dance. The course does not intend to train the student as a dancer or actor, but it maintains that the successful speaker would do well to harness some of the transferable skill sets from these disciplines. The speaker, like the performer, must stand before an audience with an objective to communicate something well. Both should be dedicated advocates for the message. They share the common ground of requiring a strong voice for a sure delivery of the material, and an expressive physicality willing to fully embody and serve the message.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L15 Drama 223 Cross-Cultural Women Playwrights

This course provides an introductory survey of the work of African-American, Caribbean-American, Asian-American and Native American women playwrights. We explore the playwrights' strategies for creating work that is by turns beautiful, fascinating, humorous, moving and occasionally terrifying as they chart for contemporary theater the intersection of race and

gender in performative terms. Playwrights addressed include Adrienne Kennedy, Ntozake Shange, Suzan-Lori Parks, Anna Deavere Smith, Diana Son, Jessica Hagedorn, Cherie Moraga, Wakako Yamauchi, Migdalia Cruz, Spiderwoman Theatre, Marga Gomez and Velina Hasu Houston.

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Art: HUM BU: BA

L15 Drama 227 Playwriting

An introductory course in playwriting. Limited to eight students. Prerequisite: Writing 1 and permission of the instructor.

Same as Writing 224

Credit 3 units. A&S: LA A&S IQ: HUM Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 228C Theater Culture Studies I: Antiquity to Renaissance

Required of the drama major. An examination of ancient, medieval, and Renaissance theater and performance. Close reading of dramatic texts written by such authors as Aeschylus, Sophocles, Euripides, Aristophanes, Plautus, Marlowe, Shakespeare, and Jonson, with attention also given to the collaborative theaters of the medieval period (the Corpus Christi play) and the Italian Renaissance. In tandem with the close study of dramatic literature, we study theater history (playing spaces, costumes, actors, etc.) and performance (ritual, performances of everyday life, etc.) from antiquity to the Renaissance.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L15 Drama 229C Theater Culture Studies II: From Renaissance to Romanticism

This course provides a survey of theater history from the early 17th through mid-19th centuries, covering plays, theories of drama and acting, and the material conditions of theatre production. We explore events in Asia, the Americas and Europe with particular attention to the Baroque era, Sentimentalism and Romanticism. The central objectives of the course are 1) to teach students to analyze plays in complex and creative ways, and 2) to cultivate understanding of the ways theater and performance practices reflect the philosophical ideas, aesthetic values, and sociopolitical realities of their historical context — even as these practices sustained and challenged such ideas, values and realities.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L15 Drama 230 Topics in Theater

Explores a variety of special interest topics in theater not included in the Theater Culture Studies sequence. Consult the *Course Listings*.

Credit 3 units. A&S: LA

L15 Drama 239 Performance and Culture

What are Lady Gaga & Beyonce doing? How do young men and women in poverty use performance for survival? Why do we create performance and for whom? In this class we apply the vocabulary and concepts of Performance Studies to social and theatrical worlds, understanding performance broadly: from popular culture to everyday life to theatre. To understand performance, we look closely at ethnographies, plays and literature. Subjects span a range of topics: racial impersonation, drag/house balls, celebrity culture, reality television, black-latino theatre, and slam poetry. Key course questions: How does performance inform everyday culture? How does culture inform popular culture and theatrical performance? This course takes

seriously the "doing" and the "undoing" of things — as culture shifts, transforms and adjusts as bodies engage in the art of performance.

Credit 3 units. A&S: LA A&S IQ: HUM BU: BA EN: H

L15 Drama 240E Acting I: Fundamentals of Acting

This course offers an opportunity to investigate the nature of the theater by way of performance. Students study a variety of theatrical texts in the most direct and experiential way, by acting in them. The course is designed for those who want to understand the interpretive work of the actor. Students are introduced to the practical work of building a character for the stage, and they also gain an understanding of how dramatic texts work both on the page and on the stage. Textual analysis, movement work and vocal production skills are developed using monologues, scene work and exercises. These skills also should provide significant benefits outside the confines of the class itself, in the professional and personal lives of the students taking this class.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM

L15 Drama 250 Topics in Stage Movement

This is a rotating topics course on movement for actors.

Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 2503 Introduction to Performance Art

The focus of this course is on the history, theory and practice of performance art and performance theater. The class engages in exercises that generate text, movement, sound and performance scores. Students create original performances that incorporate contemporary critical concepts. Performance production is supplemented by readings and videos that introduce the history and theory of experimental performance and work by specific performance artists.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM

L15 Drama 256 Contemporary Comedy: Stand-up, Sketch and Improv

The U.S. is in the midst of a second comedy boom. The first boom, during the 1980s, turned stand-up comedy into a major force in American entertainment, creating stars like Jerry Seinfeld, Eddie Murphy and Ellen DeGeneres. The second, defined in part by new social media, podcasting, and online digital video, is remaking the way comedians find their voices and their audiences. But even as Louis C.K., Natasha Leggero, Aziz Ansari, Rob Delaney and others chart new paths through a dynamic media landscape, live performance is still the heart of the modern comedy universe. This class is a detailed survey of the contemporary American comedy scene, in select historical context. Pioneering artists from vaudeville and the 1970s are introduced, the stand-up boom of the 1980s is presented as a formative force in today's comedy business, and modern philosophical perspectives on comedy are read and discussed (though we studiously avoid explaining jokes). Topics include alt-comedy, "blue collar" comedy, anti-comedy, heckling, joke theft, twitter, podcasting, the "scenes" of New York, L.A., San Francisco, and major clubs and festivals. Sketch unit covers *The State*, *Mr. Show*, *Tim and Eric*, and *Key & Peele*; Improv unit covers Del Close, Groundlings and Upright Citizens Brigade.

Credit 3 units. A&S: TH A&S IQ: HUM BU: HUM EN: H

L15 Drama 257 Dance Theater Production

Experience in technical production. Required stage work includes two studio dance productions supervised by faculty. Prerequisite: Dance 212E.

Same as Dance 257

Credit 1 unit. A&S: LA A&S IQ: HUM Art: HUM BU: HUM

L15 Drama 272 Introduction to American Musical Theater

Students are taught basic interpretation of musical theater repertoire. The student learns to analyze and perform songs with regard to melody and musical form. Acting techniques are developed through lyric interpretation. Students also are introduced to basic audition practice and etiquette.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L15 Drama 285 Theater Arts Workshop

The focus of this class is to give students a technical introduction to different theater arts disciplines including acting, directing and scenic design. During the 14-week course students apply these newly acquired skills in developing plays written by the student playwrights. General Theater Studies' students occasionally meet in this workshop with the First Draft Playwriting Students.

Credit 4 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L15 Drama 290 Exploring the Boundaries of Playwriting

The objective of this class is to teach writers the art of playwriting, including: character, relationships, conflict, scene structure, style, language and dramatic arc. Students analyze a variety of texts in class and at home as examples of the weekly lessons or discussion. In-class exercises are part of the lessons in order to develop a practical understanding of each week's topic of discussion. The students present scenes in class on a bi-monthly basis: half of the class shares work for discussion on alternating weeks.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L15 Drama 295 Portfolio Review

This course is intended as a one-hour credit to meet every Friday for two contact hours. While the main focus of this course is to dedicate time to learning and preparing a solid professional portfolio, resume and web page, this class also trains the students how to interact and conduct themselves through the interview process. We review numerous résumés from industry professionals, develop our own, develop both physical and digital portfolios consisting of students' academic and professional work, and culminate in building a strong and evocative web page. Upon completion, the student has a solid understanding of the theater job market and be ready to face the world.

Credit 1 unit. A&S: LA A&S IQ: HUM EN: H

L15 Drama 296 Internship

Students may receive up to 3 units of credit for an approved internship with an organization where the primary objective is to obtain professional experience outside the classroom. Students must file a Learning Agreement with the Career Center, a faculty sponsor and the site supervisor. This must be approved by all three constituencies before proceeding. A final written project is agreed upon between the student and faculty sponsor before work begins, and is evaluated by the faculty sponsor at the end of the internship.

Credit variable, maximum 3 units.

L15 Drama 300 Production Practicum

Practicum experience in technical theater. Available positions include stage manager; publicist; assistant designer for costumes, scenery or lighting; or crew head of props, sound and makeup design.

Credit variable, maximum 2 units.

L15 Drama 3003 Sanctuaries and Spectacle in the Greek World

Study of selected topics in Classics. This is a Writing-Intensive Course.

Same as Classics 3003

Credit 3 units. A&S: TH, WI A&S IQ: HUM, WI EN: H

L15 Drama 3011 History of African-American Theater

A survey of African-American theater from post-Civil War "coon" shows and reviews to movements for a national black theater, such as Krigwa, Lafayette and Lincoln, and the Black Arts Movement. Early black theater and minstrels; black theater movement and other ethnic theater movements in America.

Critical readings of such plays as Amiri Baraka's *Dutchman*, Lorraine Hansberry's *A Raisin in the Sun*, Langston Hughes and Zora Neale Hurston's *Mulebone*. Also works by August Wilson, Ed Bullins, Charles Fuller, Georgia Douglas Johnson.

Same as AFAS 301

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD Arch: HUM Art: HUM BU: HUM EN: H

L15 Drama 304 Makeup for the Stage

Introduction to techniques for the alteration of the face through makeup to create convincing illusions of character. Individualized selection and personal application of makeup appropriate to the actor's face. Students are required to purchase a makeup kit.

Credit 2 units. A&S: LA A&S IQ: HUM

L15 Drama 307 Stage Costumes: Prehistoric to 1800

Basic presentation of costume design from conception through final renderings, development of drawing and painting techniques for the costume plate, and the history of stage costume in the principal periods and styles of drama from prehistoric periods through 1800.

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM

L15 Drama 3071 19th- and 20th-Century Costume Design and History II

Basic presentation of costume design from initial conception through final renderings. Development of drawing and painting techniques on design projects taken from plays set in the 19th and 20th centuries. History of costume and fashion silhouette is illuminated through slide and video presentation of primary and secondary source materials.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM

L15 Drama 3072 Designing for Theater and Fashion

One of the most thrilling things students learn in costume and fashion design is pattern making. It provides students with the tools to design garments without the restrictions of commercial patterns. It's essential knowledge for any designer who wants to be able to create his or her art. Much of what students learn in this class is of special use for historic costume design.

Credit 3 units. A&S: LA

L15 Drama 309 Stage Technology

Practical study of technical theater procedures and scene shop; production techniques. Course outline includes lectures, demonstrations of equipment, production assignments and research-oriented project work. Prerequisite: Drama 212E or permission of instructor.

Credit 3 units. A&S: LA

L15 Drama 310 Stage Lighting

This course places an emphasis in the aesthetic practice of lighting design through the understanding of technology as it relates to time and space. Early on the student learns how to properly use and apply designer's tools and then through reading, research and experimentation explore the limitless boundaries of color and texture. This culminates in a stage design in collaboration with directing or dance class. Upon completion of the course, the student is able to speak eloquently on design theory and be able to move on to further design study in Drama 410 Advanced Lighting Design.

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM BU: HUM EN: H

L15 Drama 311M Scenic Design

An introduction to the process of scene design, as it relates to aesthetics, dramatic literature, collaboration and production. Projects involve design conceptualization, documentation, graphics and realization. Prerequisite: Drama 212E or permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM

L15 Drama 314 Voice-Speech Laboratory

Fundamentals of speech for the stage focusing on breath support, resonance, articulation and speech as an expression of an individual's needs. The course includes an introduction to stage dialects. Preference given to majors.

Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 3201 Concepts in Theater Architecture and Performance Space

Can a cloakroom or a stairwell become a theater? How do site and placement affect the meaning potential of performance? How does contemporary environmental staging conjure a world different from that of the modern box set, the baroque perspective stage or Shakespeare's Globe? We engage such questions by drawing on theory, history and hands-on creation to examine historical, actual and potential performance spaces. Readings in architectural and dramatic theory, theater history, performance studies and philosophy provide both a critical descriptive vocabulary and a conceptual repertoire for use in creative class assignments — both informing students' investigations of actual theaters or other performance — ready spaces and provoking their creation of experimental performance spaces. Readings cover semiotic, materialist and situationist approaches to space, as well as concepts including site specificity, space vs. place, framing, perspective, miniature, the door, the curtain, the cloakroom and the monument.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L15 Drama 321 Topics in Theater

Explores a variety of special interest topics in theater. Consult the *Course Listings*.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 3212 Topics in Theater

Rotating topics course.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L15 Drama 3221 Traditions of Italian Theater

Same as Ital 322

Credit 3 units. A&S: TH A&S IQ: HUM, LCD BU: HUM EN: H

L15 Drama 323 Topics in American Drama

A rotating topics course on various subjects relating to the history and theatrical practice of modern American drama.

Credit 3 units. A&S: TH A&S IQ: HUM BU: HUM EN: H

L15 Drama 3301 Performing Gender

This course investigates an array of contemporary performances to explore manifestations of and challenges to gender norms in American culture. An initial reading of crucial performance theories by Judith Butler, Jill Dolan and others help set the stage for our examination of a diverse collection of contemporary texts, including plays, solo performances, stand-up and pop culture phenomenon. We raise questions about feminist performance strategies, butch/femme performance, camp, cross-dressing, feminist spectatorship, multimedia performances and the representation of lesbian desire. Prerequisite: Any 100-level Women, Gender, and Sexuality Studies course.

Credit 3 units. A&S: LA, SD A&S IQ: HUM, SD BU: BA EN: H

L15 Drama 331C Tragedy

What is the relationship between freedom and luck? How do men and women respond to large forces beyond their control? Is character a struggle against outside events, or is it a submission to destiny? What happens when two ethical principles, taken absolutely, collide together? What is the nature of evil, and how does good respond to it? In ancient Greece, Renaissance England, 17th-century Europe, modern Europe and postcolonial Africa, the form of tragedy has grappled with these questions, generating both a rich body of imaginative literature and equally compelling philosophical reflections about tragedy. This course explores great works of tragic literature by authors such as Homer, Aeschylus, Sophocles, Shakespeare, Racine, Ibsen, Dostoevsky, Miller and Soyinka, and examines philosophers such as Plato, Aristotle, Hegel, Kierkegaard, Nietzsche, Weil and Arendt in order to explore the questions raised by tragedy. Same as Comp Lit 331C

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L15 Drama 332 Comedy

An exploration of the theory and practice of comedy in the Greco-Roman world. Readings include examples of iambic (mocking) poetry, comic theater, satiric verse and prose fiction, as well as philosophical discussions of the relationship of humor and laughter to human behavior and values. As comedy in all contexts engages and shapes cultural values just as much as "serious" literature does, its history and reception raise major social and aesthetic issues. Critical topics include: how ancient thinkers imagined comedy's historical "birth," how public comic performances may have encouraged either social cohesion or disruption, how communities defined "beneficial" and "offensive" humor, and how ancient elite writers and readers felt about the often lowbrow and obscene content of "classic" comic literature. Combination of lectures and discussions.

Same as Classics 386

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L15 Drama 3372 Music and Performance

In his 1998 book, *Musicking*, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography, and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater and rock. We examine artists whose work blurs the line between "music" and "theater," including George Clinton, Taylor Mac and Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.

L15 Drama 338 Physical Theater: An Exploration of Viewpoints and Suzuki Training

In this course students study two very different but complementary styles of movement training. Developed by the Saratoga International Theatre Institute, this method of actor training combines the improvisational exploration of time and space through "Viewpoints" with the rigid structure and physical demands of the Suzuki method. This combined approach is designed to develop heightened awareness and acute focus in the performer. In addition, it fosters greater impulsiveness and freedom in the moment while maintaining discipline and control. Students gain flexibility and strength and enhance their creative potential by balancing these seemingly opposing methods.

Prerequisite: Drama 341 Acting II Fundamentals of Movement or Dance 106E Introduction to Dance as a Contemporary Art Form.

Credit 3 units. A&S: LA

L15 Drama 340 Topics in Stage Movement

Exploration of a variety of theatrical and movement concepts with emphasis on process rather than product. Concentrates on developing the expressive flexibility of the body and linking the imaginative impulse with physical movement. Preliminary work in relaxation and efficient self-use. Prerequisite: Drama 240E or permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM

L15 Drama 341 Acting II

Fundamental scene study using texts with emphasis on integration of voice and body and the playing of actions. Students are encouraged to precede this course with Drama 207C. Prerequisite: Drama 240E. Preference given to majors.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L15 Drama 3412 Acting II — Acting Styles in Theory and Practice: Modern

This 5-unit class fulfills both one theater studies and one theater arts requirement for the major. It combines fundamental actor training with dynamic, performance-oriented study of the stylistic foundations of modern acting. Text-based scene study that emphasizes the integration of voice and body and playing of actions is paired with units on contemporary and historical acting styles that give context to modern acting practice. Class units cover practical aesthetics and tactical choices for actors interpreting texts, as well as theories of the body in performance ranging from early modern notions of electric and vital passions, to oratorical gesture, Stanislavski, biomechanics, Brechtian alienation, and postmodern practices including documentary theater and cross-media mimesis. Since it fulfills both the Acting II requirement and a Theatre Studies requirement for the major, the class incorporates research, writing and critical thinking assignments. However, in keeping with the notion that performance constitutes a type of research outcome, student research projects involve kinetic elements. Acting styles are researched in archival sources and embodied in studio exercises and creative student projects.

Credit 5 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L15 Drama 342 Acting III

Emphasis on characterization while working with a diversity of playwriting styles. Prerequisites: Drama 341, either Drama 207C or 208C, and permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM

L15 Drama 343 Fundamentals of Directing

The process of play directing from the selection of a script through production. Prerequisites: Drama 212E and 240E and permission of instructor. Preference given to Drama majors.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM

L15 Drama 347 Shakespeare Globe Program: Acting

This Acting Shakespeare course is paired with Drama 3472 as part of a four-week summer intensive program held at the Shakespeare's Globe Education Centre in London. This course, as well as the companion Text and History course (Drama 3472), is taught by a Washington University faculty member, and the program also draws heavily on British theater professionals and educators from Globe Education, who teach a set of short courses on movement, voice, textual analysis, historical context, monologue performance and stage combat. Frequent access to the Globe stage allows actors to work in a spatial configuration very similar to that once used by Shakespeare's company itself. The course culminates with performances of scenes and monologues on the Globe stage. Application process must initiate through the Performing Arts Department office.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 3473 Shakespeare and Early Modern Performance

Paired with Drama 347 Shakespeare Globe Program: Acting, this course uses the resources of London and the Globe Theatre as departure points for an examination of Shakespearean performance in its historical and cultural context. We pay close attention to the dramatic text: meter, style, metaphorical language, dramatic composition, rhetoric, genre, etc. We consider such topics as Shakespeare's playing spaces, the actor-audience relationship in the Globe Theatre, acting,

movement, original rehearsal practices, the boy actor, costumes, sound, music, props and the culture of the Bankside (bear-baiting, taverns, violence, prostitution, etc.).

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L15 Drama 3491 Media Cultures

This course is an introduction to the interdisciplinary field of cultural and media studies. Through a focus on television and new media, it analyzes current theoretical ideas and debates about culture. Main topics include the relationship between new technologies and everyday life and popular culture; analysis of media messages and images; how media help construct new identities and mark differences between groups; analysis of the globalization of the production and circulation of media culture; the rise of multimedia cultural industries; and the role of the audience. Required screenings.

L15 Drama 361 Stage Management

A practical approach to the study of theater stage management focusing on organizational and communication skills.

Workshops, lectures and discussion; guest speakers and field trips covering the pre-production, rehearsal and performance periods; labor relations/performing arts unions; career opportunities; and supporting the vision of the artistic team. Prerequisites: Drama 212E and Drama 240E.

Credit 3 units. A&S: LA

L15 Drama 365C Theater Culture Studies III: Melodrama to Modernism

The third of three historical survey courses in theater and performance studies, this course traces the origins of the modern theater. Beginning with Romanticism's self-conscious break with the past, we study the rise of bourgeois melodrama with its intensely emotional rendering of character and spectacular visual effects. We consider how those effects were made possible by advances in industrial stage technology which reproduced the everyday world with unprecedented realism, and how playwrights responded to those technologies by calling for the theatre to become either a "total work of art" which plunged its spectators into a mythical realm, or a petri dish which analytically presented the struggles of the modern individual within his or her modern milieu. Exploring a range of aesthetic modes (including melodrama, Realism, Naturalism, Aestheticism, Symbolism, Expressionism, the Epic theatre, and the Theatre of the Absurd), we read classic plays by modern playwrights such as Ibsen, Chekhov, Shaw, Pirandello, Brecht, and Beckett to consider how the modern theatre helped its audiences understand as well as adapt to the rapidly changing conditions of modernity.

ETH

L15 Drama 367 Introduction to Drafting for the Theater

This course provides the student with a basic understanding of all of the various types of technical drawings needed to successfully execute a scenic design. Throughout the course the student masters all the technical and aesthetic skills needed to produce clean and effective draftings for the theater. In order to successfully complete this class, the student is required to purchase a drafting board and related drafting materials.

Credit variable, maximum 3 units. A&S: LA

L15 Drama 368 Black Theater Workshop III

A performance-oriented course that explores the black experience through acting, directing and playwriting. Students develop through classroom improvisation short performance pieces during the semester. They also are required to attend three to five plays. Each student must participate in a final performance which is in lieu of a written final examination. Credit 3 units. A&S: LA, SD A&S IQ: HUM, SD Art: HUM EN: H

L15 Drama 372 Advanced American Musical Theater

This course focuses on developing the acting, singing and dancing techniques required for performing in musical theater. The student develops group pieces and participates in scenes that explore character within a musical theater context. The class culminates in a workshop performance. Prerequisites: Drama 221 and permission of instructor, by audition. Repeatable 1 time for credit.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L15 Drama 373 Issues in Theater and Performance Studies

Explores a variety of special interest topics in theater and performance studies. Consult the *Course Listings*.

Credit 3 units. A&S: LA, WI A&S IQ: HUM, WI EN: H

L15 Drama 374 Theories of Modern Drama

What makes modern drama "modern?" How does it differ from the drama of other cultural movements? When does the modern period begin? This course takes up such fundamental questions in order to examine not only the influential plays that have come to define the "canon" of modern drama, but the various theories that have been proposed as a way of understanding them in relation to the history of Western culture. From Friedrich Nietzsche's *The Birth of Tragedy* to Walter Benjamin's thesis on the Trauerspiel to Emile Zola's *Manifesto on Naturalism* in the theater, we start by considering when modern drama begins and what constitutes its defining features. With such provisional definitions in place, we then engage the responses of fellow modernists such as Richard Wagner, William Archer, T. S. Eliot, Bertolt Brecht, Georg Lukacs and Theodor Adorno. We also consider whether so-called postmodern drama has broken with the modern period to introduce something altogether new, and how recent debates concerning interculturalism, the ideology of form and performance invite new ways of understanding the cultural function of modern drama and its legacy in our own historical moment.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM EN: H

L15 Drama 379 Expressionism in Theater and Film

This course is designed as an advanced introduction to the aesthetic movement of Expressionism as it appeared in Germany and the United States in the media of theater and film. Characterized by stylized settings that "ex-press" the internal spiritual/emotional/psychological state of its central character, Expressionism is usually discussed as a reaction to Realism, given its overt symbolism, telegraphic diction and episodic action. Beginning with a brief general introduction to the movement (including its manifestation in the visual arts), we consider its cultural, political and critical history, while exploring more recent scholarly investigations into the significance of its performance dimensions.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM EN: H

L15 Drama 3801 Producing New American Plays

This class focuses on all aspects of the business of producing theater. Weekly lectures and discussion include visiting artists who currently work as producers, critics, actors, casting directors, press representatives and designers in New York productions.

Credit 2 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 3804 Modern American Plays and Playwrights

The objective of this course is to provide student playwrights with historical and aesthetic contexts regarding the development of New York (and national) playwriting in the later half of the 20th century. The primary focus is on the burgeoning Off Broadway movement, which gathered momentum in the 1950s and led to significant achievements in new writing and in the growth of not-for-profit theater in New York and throughout the United States. Although study is focused on the years after 1950, texts (and contexts) that planted seeds for the Off Broadway movement are examined in the early work of the Susan Glaspell, Eugene O'Neill, Sophie Treadwell, and Clifford Odets and the Group Theatre. These early writers (and movements) reacted against then-pervasive stage realism to explore the possibilities of constructing alternative perspectives on consciousness and identity.

Credit 3 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L15 Drama 3806 First Draft Playwriting

The primary focus of this class is the creation of a new first draft of a play. The class is modeled after our highly successful Dorothy Strelsin New American Writers' Group. Students bring in 10 pages each week sequentially to be read aloud by other members of the class. Students have their material workshopped, and participate in the feedback process of their own work, and that of others. Students bring their work into the Theater Arts Lab at the end of the semester, so that they can see their plays performed and staged by student actors and directors.

Credit 4 units. A&S: LA A&S IQ: HUM BU: HUM EN: H

L15 Drama 381 MADE in France I: Old Paris/New Europe

Students are introduced to the city's rich artistic history as well as the world of contemporary movement arts in Europe through two weeks of dramaturgical field research in Paris. With a diversified sampling of performances, museum visits and discussions animated by program faculty, students experience hands-on the rich history Paris has on display. Museums visited include the Musée du Louvre, Musée de la Mode et du Costume, Musée d'Orsay, Centre Georges Pompidou, Musée des Arts et Métiers, Musée Cluny, and the Rodin Museum. Museums and live performances serve as our main "books" for this intensive hands-on course. Museum visits and performances are supplemented by readings and assignments on a chosen theme and performance history and regular seminars with the specific aim of investigating a variety of dramaturgical approaches that contemporary European directors employ when considering the use of objects, props, costume design, sound design, lighting design and movement. Additionally, students attend several contemporary dance theater performances.

Same as Dance 360

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 382 MADE in France II: Choreography and Construction Collaborations

Continuing upon the field research carried out in Paris, student work groups begin to concretize their creative projects at a rural retreat center for artists in Normandy, France. Beginning with a day of intensive introduction to design and construction principles in accordance with the program theme, the design faculty helps students prepare for the "Imagination Fair" presentations that mark the midway point and serve to launch each group's creative process collaboration. After these presentations, students get to work on realizing their choreography and construction projects: the collaborative creation of dances (solos, duos and trios) using a variety of found objects, props, costumes and/or instruments created by dancers and designers for the final production. Each year, in addition to the U.S. teaching faculty, a number of European artists active in their profession offer valuable master classes that coincide with the program theme and help prepare students for their final projects. Work hours are interspersed with French-language meals during which students are encouraged to speak French with the host family and with their peers and teachers. Additional field trips are organized to introduce students to the rich cultural and agricultural heritage of the Normandy region. Prerequisites: L29 Dance 360 MADE in France I: Old Paris/New Europe.

L15 Drama 3975 Wolves of Wall Street: American Business and Popular Culture

America's perceptions about Big Business and the Free Enterprise system have evolved and changed over time from the 1920s to the present. During the 1980s, for example, Oliver Stone's *Wall Street* seemed to endorse the notion that "greed is good." Today, however, the topic of rising income inequality has been connected with the collapse of prestigious Wall Street firms, the "housing bubble," a declining middle class, and widespread fear about the future of "The American Dream." This new course examines a variety of artistic, ethical and historical perceptions about American Business as depicted in popular culture and the arts over the past hundred years. How have America's foremost artists (among them F. Scott Fitzgerald, Eugene O'Neill, Arthur Miller, Martin Scorsese), dealt with questions of conspicuous consumption, the acquisition of capital for its own sake, and the disparity between rich and poor? We survey several artistic genres and artistic forms, including American tragic works like *The Great Gatsby* and *Death of a Salesman*, to popular musicals such as *How to Succeed in Business without Really Trying* and *The Producers*.

L15 Drama 403 Dramaturgical Workshop

A laboratory course that investigates dramaturgy from four vantage points: New Play Dramaturgy, Institutional Dramaturgy, Dramaturgy of Classics and Dramaturgical Approaches to Nontraditional and Devised Theater. This is a "hands-on" course where student dramaturges not only pursue the study of dramaturgy, but work actively and collaboratively with playwrights, actors and each other. Prerequisite: Drama 343.

Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 4031 Black and White in American Drama

This course addresses the complex issue of race in America through the 19th and 20th centuries as dramatized by American playwrights, black and white. Authors include Countee Cullen, Lillian Hellman, Eugene O'Neill, Jean Toomer, Langston Hughes

and Arthur Miller. Prerequisites: junior standing, two 300-level courses or better.

Same as E Lit 403

Credit 3 units. A&S: TH Art: HUM

L15 Drama 404 Topics for Writers: Beckett

Waiting for Godot, *Happy Days*, *Krapp's Last Tape*: These are but three of Samuel Beckett's revolutionary texts for theater. The complete canon of plays are examined for structure and compositional elements. Students undertake exercises in dramatic composition and perform a chamber presentation of *Endgame*. Course is intended for writers with some experience of the dramatic form. Intending students MUST interview with instructor Nov. 12-14.

Same as E Lit 404

Credit 3 units. A&S: LA Art: HUM

L15 Drama 4081 Theater for Social Change

Drawing upon the principles and teachings of Brazilian director Augusto Boal, students explore ways of effecting positive social change in a theatrical context. Students study the aesthetic of Boal's *Theatre of the Oppressed* and learn various games and exercises designed to mine issues of social (in)justice. Using Boal's techniques of "image" and "forum" theater, students then create and perform plays focused on these issues. This public performance is an interactive event offered for and with the university community. No prior performance training or experience is required for this course.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 4082 Advanced Theater for Social Change

This course is a continuation of exploration begun in Drama 4081, Theater for Social Change: a prerequisite for this advanced course. Students expand from exploring their own experience with oppression to facilitating that exploration with others. Students are introduced to the "Joker" system, developed by Brazilian director Augusto Boal. The Joker is the director of a forum theater event. He leads both the exploration and playmaking phases of the process. In preparation for stepping into this role, students read Paulo Freire's *Pedagogy of the Oppressed* which gives them a foundation in the power and efficacy of collaborative educational techniques. In addition, students read *Theatre for Living*, Canadian director David Diamond's book detailing his application of Boalian techniques in a less overtly oppressive society. Students begin their practical exploration by first working with one another, learning how to lead exercises and games, followed by an exploration of playmaking and the facilitation of an interactive forum theater event. The course culminates in an outside project in which each student is placed with a St. Louis area school or social organization. The student applies skills he or she has acquired throughout the semester by serving as the "Joker" of the workshop. In this role, the student leads the entirety of the workshop process with a selected group exploring ways of effecting positive social change in a theatrical context. He or she facilitates exercises with the group that mine a chosen area of oppression with which the group is grappling. The student guides playmaking with the group that highlights this area of oppression. The resulting plays are presented then to the larger school or organization community. This culminating event is an interactive forum theater presentation that the student leads as "Joker."

Credit 3 units. A&S: TH, SD A&S IQ: HUM, SD EN: H

L15 Drama 409 The Modernist Revolution in the Arts

What is/was Modernism? How did this worldwide phenomenon impact the arts in every genre and medium from the turn of the 20th century to the present? Do we still live in the age of Modernism, or should we consider ours a new, Postmodern age? This course examines these and other questions as they relate to the theater, prose, poetry and the visual arts. Our investigation focuses on most of the major literary and artistic movements, including Naturalism, Impressionism, Symbolism, Surrealism and Expressionism. We examine literary manifestoes that help to illuminate the periods under discussion, as well as look at individual works themselves. Central to our approach in the course is an interdisciplinary perspective. Among the luminaries whose work is considered are Ibsen, Strindberg, Chekhov, Hemingway, Dali, Picasso, Stravinsky, Artaud, Kafka and Beckett.

Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM

L15 Drama 410 Advanced Stage Lighting

An advanced-level continuation of Drama 310. Emphasis is placed on design aesthetics and their application in a laboratory setting. Students explore color theory, lightboard programming and design analyses as well as execute a variety of finished projects. These projects cover a wide range of production styles and performance venues. Prerequisite: permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 4101 Lighting Technology

Lighting Technology is an extremely hands-on approach to learning how the top industry designers create major shows and concerts with the most state-of-the-art equipment. We spend a considerable amount of time learning how to use and program robotic/moving lights, LED fixtures and video integration for use in drama, dance, musical and concert settings. The student gains intensive training in the use and programming of the ETC Express, ETC Ion and GrandMA 2 Light consoles with a full range of Vari*Lite robotic fixtures. In addition, the student receives training in Isadora, a very powerful video design program. Due to the amount of programming time required outside of class, this is a 4-credit lab course. Prerequisites: Drama 212 and Drama 310.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 412 Advanced Practicum in Technical Theater

Independent Study. Intensive practical experience in scenic design building and painting; lighting design and installation; costume design, coordination and construction; makeup; and audio production. Prerequisites: Drama 212E, credits on at least two productions, and permission of staff.

Credit variable, maximum 3 units. A&S: LA EN: H

L15 Drama 4121 Advanced Practicum in Technical Theater: Scene Painting

Exploration of the skills and traditions of theatrical scene painting in a laboratory setting. Projects involve color theory, basic surface treatment techniques, representational depiction and advanced problems. Realized paint work on Performing Arts production is part of the course. Prerequisite: permission of instructor.

Credit 3 units. A&S: LA EN: H

L15 Drama 413 Costume Rendering and Design

An exploration of media and rendering techniques used in producing an effective costume design. Basic figure drawing, proportion, color, concepts, exaggeration and period style. Drawing and painting materials are provided by student.
Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 416 Period Style and Design History

Examination of period styles as they relate to theatrical design and history. Study of architecture, furniture and props from Greek to contemporary periods. Prerequisite: Drama 212E.
Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM

L15 Drama 421 Costume Construction and Design

Practical techniques in theatrical costume construction, including patternmaking, cutting and draping, and execution of design concepts. Research and design projects culminate in finished period garments and related accessories. Topics explored include corsetry and foundation garments, millinery, mask making, and dyeing and painting. Prerequisite: Drama 307 or permission of instructor.
Credit 3 units. A&S: LA A&S IQ: HUM Art: HUM EN: H

L15 Drama 422A Film Stardom, Performance and Fan Culture

This course focuses on the Hollywood star system. We explore stars in relation to celebrity and consumerism, especially how "stardom" is created by a system that seeks to create effects in film viewers whether conceived as audiences, fans or spectators. We examine the performance element of stardom and its relationship to genre, style and changing film technology. Also of concern is how stars and the discursive construction of stardom intersect with gender representation, race, ideology, sexuality, age, disability, nationality and other points of theoretical interest to and historical inquiry in contemporary film studies. While emphasis is placed on mainstream commercial U.S. cinema, students are encouraged to pursue questions beyond this framework within their own research. Required screenings. Same as Film 422
Credit 3 units. A&S: LA A&S IQ: HUM BU: BA EN: H

L15 Drama 4234 Performing Knowledge: Arts Integration Pedagogy in Theory and Practice

This course invites students interested in the performing arts to apply their talents to the K-12 classroom through a service-learning component that allows them to develop and implement an arts-integrated curriculum grounded in current research in the cognitive sciences. Divided into four units, the course begins with a survey of recent research in cognitive science that traces the effects of arts-related activities on brain development. The second unit builds upon that theoretical grounding, focusing on a model of arts-integrated pedagogy developed through Harvard University's Project Zero. The third and fourth units are practice-based, with students developing a lesson plan in a core subject area that incorporates the performing arts. Then — in consultation and collaboration with an Interchange artist-in-residence and a master teacher in the St. Louis or Normandy Public Schools — students implement their curriculum in a K-12 classroom, testing its efficacy as well as the theoretical assumptions upon which it is based. This course is open to all students across campus who have a strong interest and/or background in the arts, and who wish to explore opportunities in service learning.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 431 English Drama Exclusive of Shakespeare to 1642

Studies of selected major plays against a background of change and tradition in English drama from its beginnings to the closing of the theaters.
Same as E Lit 431
Credit 3 units. A&S: TH Art: HUM

L15 Drama 432 Topics in Renaissance Drama

A study of Elizabethan and Jacobean theatrical culture — the plays, players, playwrights and audiences of public theaters, private theaters and banqueting halls. Study includes the plays of Lyly, Kyd, Marlowe, Jonson, Chapman, Ford, Beaumont, Fletcher, Marston, Middleton, Webster and Shakespeare.
Same as E Lit 432
Credit 3 units. A&S: TH Art: HUM

L15 Drama 435 Expressionism in the Arts

A close study of expressionism as an international phenomenon in the arts, from the anti-naturalist movements of the 1890s to Hitler's condemnation of expressionism as decadent. The evolution of expressionist theater from Wedekind to Toller and Kaiser and such composers as Schoenberg and Berg; in the visual arts, such groups as Der blaue Reiter and Die Brucke, such independents as Kokoschka; in cinema, such figures as Pabst, Murnau, Von Sternberg and Lang. Prerequisite: Drama 208E, Drama 336 or permission of instructor.
Credit 3 units. A&S: TH Art: HUM

L15 Drama 436 Seminar in Comparative Drama

The course begins with Plato's critique of mimesis and Aristotle's defense, as we read *The Poetics* as a response to Plato. We take some of Aristotle's basic concepts, such as mimesis, plot, character and thought, and attempt to apply them to drama up to the present day. We also consider fundamental elements of both the dramatic text and the dramatic production, such as space, time, dialogue, narrative devices and perspective. Brecht's theory of "epic drama" form the other conceptual pole in the course, opposing Aristotle. Besides these two theorists, other figures include Ben Jonson, Corneille, Dryden, Diderot, Schiller, Hegel, Zola, Artaud and Grotowski. The course, then, has both chronological and thematic axes. Three papers and one oral presentation.
Same as Comp Lit 436
Credit 3 units. A&S: TH Art: HUM

L15 Drama 4370 Music and Performance

In his 1998 book, *Musicking*, Christopher Small asserts that music is not a thing but an activity — something that people do. Starting from this premise, this course explores musical performance as a live event, one in which additional aspects of performance — dramatic enactments, costume, choreography and stage design — also come into play. While recorded music plays an important role in our investigations, we focus on musical events that take place before and with live audiences. Exploring the choices of performers and the expectations of audience members in settings from gospel churches to Radio City Music Hall, this course moves through a wide variety of musical genres, including cabaret, blues, opera, protest song, musical theater and rock. We examine artists whose work blurs the line between "music" and "theater," including George Clinton, Taylor Mac and

Gertrude Stein, as well as everyday people, such as the singers of the Civil Rights Movement, who used the power of live musical performance to change the course of human history. We also attend performances around St. Louis, guided by the interests of the class. Students with an interest in music, theater, dance, cultural history, American studies, and African-American studies are especially welcome.

Same as AMCS 4370

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L15 Drama 440 Acting IV

Acting IV synthesizes the student's performance training; creative and scholarly writing skills; and knowledge of dramatic literature. The advanced acting student is encouraged to develop and articulate his/her own aesthetic convictions. The course includes intensive solo performance projects, including writing and performing original monologues. Also, significant emphasis is placed on preparing the student for the work of professional acting, including workshops on audition monologues, head shots, résumés and economic issues. In addition, the students become familiar with various American theater cities, the regional theater system, and prominent working theater artists. The course closes with a public performance of the original, scripted and audition material developed over the semester. Prerequisite: Drama 342.

Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 444 Directing II

Further study in the fundamentals of directing. Emphasis on the director's work with actors, designers and a realized metaphorical concept. Prerequisites: Drama 343 and permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 445 Seminar

Rotating upper-level seminar. Senior seminar normally offered each semester and meant to satisfy the 400-level requirement for the drama major.

Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 4452 Senior Drama Capstone: Manifesto Now

This capstone course invites students to synthesize their critical, historical and theoretical studies of theater and performance by exploring in-depth the theatrical manifesto. Theater history is littered with declarations of theatrical vision, from the Italian Futurists of the early 20th century to the feminist collectives of the 1970s to the 21st-century drag queen and music theater innovator, Taylor Mac. Together, we explore the manifesto as both form and performance, as well as their competing visions of the roles and responsibilities of the theater artist to the society in which he or she works and lives. Naturally, we also attempt our own manifestos, putting into words our own deep convictions about the theater and its importance in our contemporary world.

Credit 3 units. A&S IQ: HUM Arch: HUM Art: HUM EN: H

L15 Drama 446 Meta-Theatre: Theatre Which Reflects Itself

The notion that works may be self-reflection is a familiar one to the student of the postmodern in the arts. Nevertheless, the concept is not a new one and may be found frequently in the history of the theatre from the Elizabethan to the present day. In this course we identify and examine the history and significance of the term "meta-theatre" in a number of important dramatic works from Shakespeare to Tom Stoppard. Along the way we

consider examples of the "play-within-the-play" such as *Hamlet* and *A Midsummer Night's Dream*, works that use the theatre itself and the art of the stage as a focal point (Pirandello's *Six Characters*, Stoppard's *Rosencrantz and Guildenstern Are Dead*, Michael Frayn's *Noises Off*, Ronald Harwood's *The Dresser*, David Mamet's *A Life in the Theatre*), and plays which focus their energies on the act of scripting one's life such as Shepard's *True West* or Shaffer's *Gift of the Gorgon*. In addition to the above, our investigation also considers examples from other literary genres and especially the visual arts which are explicitly self-referential in nature. Prerequisite: one 300-level drama literature course or permission of the instructor.

Credit 3 units. A&S: TH Art: HUM

L15 Drama 448 The History of Theater Design

Survey course covering the history of the performance space and the scenic design elements contained within that space. The visual elements and theater architecture of each period are examined in relationship to the art and technology of the time. Prerequisites: Drama 207C or Drama 208C, and Drama 212E.

Credit 3 units. A&S: TH Art: HUM

L15 Drama 449 Seminar in Dramatic Theory

This course is an in-depth exploration of core works of dramatic theory from the ancient world to the present, and studies texts that enunciate what theater is, has been, and should be. We study authors' expressions of theater's role in society, their articulations of and responses to anti-theatrical prejudice, and their negotiations of the contradiction of putting "the real" on stage. Other significant themes include: accounting for the aesthetic pleasures of drama and theater; theater as a means of educating the citizen; and the relationship between dramatic form and social and political revolution. Moving chronologically, we begin with foundational documents of the ancient world, including Aristotle's *Poetics*, Bharata's *Natyasastra*, and Horace's *Ars Poetica*. The course then progresses through the Middle Ages, the Neoclassical and Romantic eras, and the explosion of fin de siècle avant-gardes. We also read key texts from beyond the European tradition, including works of dramatic theory written in medieval Japan (Zeami), postcolonial Nigeria (Soyinka), and the millennial, multicultural U.S. (Parks). Along these same lines, we also are attuned to transnational exchange and influence, particularly as it appears in the 20th-century theories of Bertolt Brecht, Antonin Artaud, and Konstantin Stanislavsky. Though focused on efforts to describe and prescribe theories of drama, dramatic genre, and theatrical pleasure, the course also positions play scripts alongside the theoretical treatises that guide or are guided by them.

Credit 3 units.

L15 Drama 450 Advanced Scene Design

Advanced projects in scene design including drafting, rendering, model building and conception. Prerequisite: Drama 311M or permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 4505 Playwright's Workshop

This course offers an organized independent study for advanced students in playwriting. The class is structured by the participants. Prerequisites: Drama 227 Playwriting, Drama 473 Advanced Playwriting and permission of instructor.

Credit 3 units.

L15 Drama 451 Topics in Period Style: Baroque Opera and Neoclassical Style

An exploration of the dynamic interplay between high Baroque culture and the perceived style of the ancient Greeks and Romans. Primary sources used are paintings, sculpture and renderings for Baroque operas, as well as rare artifacts which exist from that time as these sources relate to classical evidence extant in that period. Secondary sources are journal articles and records of fully staged productions of intervening years. Primary interest is retracing the thought processes of the designers of Baroque opera. Focus is on Purcell's *Dido and Aeneas*, looking at the libretto and its relationship to source texts, both ancient and contemporary, and also its place within the cultural history of the theatre. Projects include: in-class presentations and a research paper or fully realized design project.

Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 453 American Drama

Topics in American Drama.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM EN: H

L15 Drama 455 Practicum in Arts Management

Assigned work and projects under faculty supervision in Washington University's Edison Theatre or off-campus cooperating institutions. Prerequisite: permission of instructor. Credit variable, maximum 3 units.

L15 Drama 456 A Madman in the Theater: The History of Insanity on Stage from Sophocles to Shaffer

The image of the madman and the theme of insanity have been extraordinarily captivating to theater artists from the Greeks to the present. In this course we consider some of the most remarkable examples from the classical period, including Sophocles' *Ajax* and Euripides' *Medea* and *The Bacchae*, and the Renaissance (*Hamlet*, *Othello*, *The Spanish Tragedy*, *The Duchess of Malfi*, *Life is a Dream*). We investigate these works both for what they tell us about the image of the madman in the historical period and culture in which they were written as well as in order to closely examine the texts themselves. We also examine plays from the 19th and 20th centuries, including Buchner's *Woyzeck*, O'Neill's *Emperor Jones*, Anouilh's *The Madwoman of Chaillot*, Miller's *Death of a Salesman* and Shaffer's *Equus*. Finally, the course makes extensive use of the Performing Arts Department's production of Peter Weiss' extraordinary work *Marat/Sade* and incorporate theoretical writings such as Michael Foucault's *Madness and Civilization* into discussions.

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM BU: HUM

L15 Drama 459 The Filmed Stage Play

Close textual analyses of stage plays and their film adaptations, examining structural parameters such as space, time point of view, spectator position and performance in the two art forms. Prerequisite: permission of the instructor.

Credit 3 units. A&S: TH

L15 Drama 460 The Creative Impulse

Developed with the director and designer in mind, this course encourages imaginative theater making by developing the student's own sense of creative confidence and ability, by expanding the source options for artistic inspiration, by recognizing and valuing the synergistic properties of transcendent theater making, and by strengthening the

collaborative skills essential to the art. The course includes creativity exercises, comprehensive forms of text analysis, exploration of other art forms, cooperative conceptual projects, and field trips to area productions and museums. Students is expected to complete several individual projects, presentations and research papers, as well as intensive small-group projects. Prerequisite: one of the following courses: Drama 307, 310, 311 or 343.

Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 465 The Chinese Theater

Survey of the performance and literary traditions of the Chinese theater from their pre-Tang origins to the present day. The course focuses on three forms: 14th-century zaju plays, 16th- and 17th-century chuanqi plays, and recent films from China, Taiwan, and Hong Kong. Background in either China studies or theater in other cultures recommended.

Same as Chinese 467

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD

L15 Drama 469 Topics in Shakespearean Production

This course examines Shakespeare's comedies in performance. Combining scene work and production history, students gain access to the world of the comedies from a hands-on, theoretical and historical perspective. Prerequisites: Drama 395C or permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 4691 Shakespeare and Early Modern Performance

Credit 3 units.

L15 Drama 471 Millinery Design and Construction

A practical course exploring the basic techniques and different methods of constructing hats and accessories. Students work with a variety of materials including buckram, straw, felt and wire that they purchase. Research and design projects culminate in the construction of several projects in class. Prerequisite: Drama 307 or 421 or permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 473 Advanced Playwriting

This course explores the tendencies and relationship between each individual student writer and the page. Exercises dispel any lingering doctrine that presupposes a certain style of writing. A large part of the class centers around collaborations. The writers write scenes as a final project for an acting class, and also work with two professional actors in an extended writing project that culminates in a script-in-hand presentation. The informal moments between collaborations look at the process beyond the first draft — i.e., the playground of language, nonverbal options, and the maintaining of "the work" through rewrites, readings, workshops and productions. Prerequisite: Drama 227.

Credit 3 units. A&S: LA A&S IQ: HUM

L15 Drama 474 Acting Theories

This course explores in depth the major theoretical texts on acting and performance theory. Pertinent philosophical texts, dramatic theories, acting systems and methodologies are studied. The survey operates chronologically from early documents on acting (Greek, Roman, Italian Renaissance) through to modern and contemporary documents that inform

acting and acting training today (Stanislavsky, Brecht, Grotowski, Meisner, Spolin, Suzuki). Methodologies and practices of select major stage actors are explored as well. In some cases, directing theories that have had major influence on acting theory are examined.

Credit 3 units. A&S: TH A&S IQ: HUM

L15 Drama 478 The Eye of the Mask: A Multicultural History of the Theater through Mask Making and Design

An exploration of the history of masks used in the theater. Topics include drama of ancient Greece, the ancient No Theater of Japan, the Italian theater of commedia dell'arte, the dance drama of Bali, the Venetian and Mardi Gras Carnival celebrations, and ritual and ceremonial masks of other cultures: Africa, Latin America and Asia, using the instructor's extensive collection of masks as primary research subjects. Projects include: an in-class presentation and research paper with three to five fully realized mask designs are constructed within class and at an additional lab time discussed on the first day.

Credit 3 units. A&S: TH A&S IQ: HUM BU: HUM EN: H

L15 Drama 479 Fundamentals of Sound Design

Encompassing both creative and technical aspects of sound in the performing arts, the course gives theoretical knowledge of and practical experience in the following areas: fundamental rules of physics and electronics related to sound, use of standard digital recording studio equipment, "training" of the ear, and basic techniques of sound montage. Students are expected to participate in a variety of conceptual and research-oriented exercises as well as complete several lab projects. Sound-related work on Performing Arts Department productions may be required. Prerequisites: Drama 212 and permission of instructor.

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 487 Theater Culture Studies Seminar

Rotating upper-level topics course. Topics come from Theater Culture Studies sequence.

Credit 3 units. A&S: TH, WI A&S IQ: HUM, WI

L15 Drama 492 Performing and Fine Arts in Progress

The objective of this course is to provide a total immersion into the live theater and arts experience in New York City, offering students the opportunity to see at least two fully produced plays per week over the course of the 14-week semester. Students attend professionally presented readings in the New York theater community, providing an insider's look at the development of plays. Students attend group retreats to MOMA, the Guggenheim, the Metropolitan Museum of Art, and galleries. They attend weekly forums to discuss different aspects of the production, focusing on design, concept, direction, performance, execution and the text/material. They also examine how they might do things differently, putting their own artistic vision to use. Students also discuss current events in the arts community at the weekly meetings and occasionally, there are guest artists from the shows and readings we have seen. Students are required to keep a journal filled with their experiences and reflections that are graded monthly by instructors. Students attend performance at theaters including but not limited to: BAM, St. Ann's Warehouse, Manhattan Class Company, the New Group, Lincoln Center, La Mama, Classic Stage Company, Manhattan Theatre Club, Roundabout, on Broadway, Playwright's Horizons, Second Stage, Cherry Lane, PS122, the Vineyard, American Ballet Theatre, the Metropolitan Opera and others.

Credit 2 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 493 Senior Project

Specialized study in a selected area in drama. Required of all drama majors not taking Drama 499. Prerequisite: 15 units of advanced work in drama at the 300 or 400 level.

Credit 3 units.

L15 Drama 497 Performance Theory

This course introduces students to contemporary theories of performance, with "performance" understood as both metaphor and event. From a multi-disciplinary perspective, students consider how cultures produce meanings — and, indeed, perform those meanings — to create and/or disrupt their own social coherence. Theories likely to be studied include: J.L. Austin's speech-act theory and its engagement by John Searle and Jacques Derrida; Victor Turner's analysis of ritual as social process and Richard Schechner's use of it to transform "theater studies" into "performance studies;" Erving Goffman's sociology of the self and its relation to a post-structuralist model of subjectivity; Michael Fried's screed against minimalist art and its relation to Happenings, Body Art, Fluxus, and other mid- to late-20th century examples of "performance art;" and Judith Butler's influential revision of Austin's performative in her theory of queer "performativity."

Credit 3 units. A&S: LA A&S IQ: HUM EN: H

L15 Drama 499 Study for Honors

Prerequisites: senior standing, a cumulative and a major GPA of 3.5, and permission of the chair of the Performing Arts Department.

Credit variable, maximum 6 units.

L15 Drama 4990 Independent Work

Students may contract with a faculty supervisor for credit for their work on theatrical productions or research. Contracts must be signed by the student and the coordinator of Drama 500 before the student's work on the project commences. Credit and grade option to be determined in each case. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 6 units.

L15 Drama 4991 Acting

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 3 units.

L15 Drama 4992 Directing

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 3 units.

L15 Drama 4993 Technical Theater

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 3 units.

L15 Drama 4994 Voice, Speech

Independent study.

Credit variable, maximum 3 units.

L15 Drama 4995 Literature, Theory, Criticism

Independent study. In order to enroll for this course, students must complete a contract and submit it to the Performing Arts Department office.

Credit variable, maximum 3 units.

Earth and Planetary Sciences

For students interested in studying the world beneath their feet, or worlds farther away, the Department of Earth and Planetary Sciences provides the tools for understanding the processes that shaped our planet and other bodies within our solar system. Understanding the Earth system is also the key to addressing many environmental challenges, including climate change, water supply and energy issues. An Earth scientist is uniquely poised to help solve some of society's most pressing problems. Because planets are complex systems, Earth and planetary sciences is by necessity an interdisciplinary field. It applies biology, chemistry, physics, and math to the investigation of topics such as early life on Earth, the structure of the Earth's deep interior, the nature of contaminant transport, and the evidence for water on Mars.

For a student who has developed a passion for the basic sciences and is looking for a way to study these sciences outside traditional disciplinary boundaries, Earth and planetary sciences is an ideal choice of major. The department offers majors and minors in Earth and planetary sciences (EPS) and in environmental Earth sciences (EES). Both the EPS and EES majors offer a range of customization that allows students to focus on topics with the greatest relevance to their academic interests and career plans.

All students in the major have the opportunity, but are not required, to participate in faculty research programs. Many of our students take advantage of these varied research opportunities, providing them with valuable experience for future employment or for graduate school. Each year, several scientific papers and scientific abstracts are co-authored by undergraduates, and undergraduates have presented papers at national science meetings.

Department Policies for Majors and Minors

Minimum grade performance: A grade of C- (C for summer field camp) is the minimum acceptable performance for each unit of credit for each required course, including those in mathematics, chemistry and physics. Courses with grades of D may fulfill the college's 120 total hours requirement, but they do not meet the departmental requirements. A grade of C- is also the minimum acceptable performance for each unit of credit for

any course required as a prerequisite to enrolling in advanced or sequential courses.

Transfer Credits and University College: Course work completed at another college or university must have prior approval of the department to be used to fulfill requirements for the EPS major. Courses taken at the University College (evening school) normally may not be substituted for the courses required for an EPS major. Written consent from the Director of Undergraduate Studies is required for any such substitutions to apply and must be sought before the course is taken.

Graduate-level courses: All EPS graduate courses (course numbers 500 and above) are open to advanced undergraduates with permission of the undergraduate adviser and the specific course instructor.

Majors

There are two majors in this department: **EPS (Earth and Planetary Sciences)** and **EES (Environmental Earth Sciences)**.

All students completing the EPS or EES majors are required to complete a Capstone Experience. Information regarding the capstone experience can be found on our website: http://eps.wustl.edu/capstone_experiences.

The Major in Earth and Planetary Sciences

For the most current information visit our website: <http://eps.wustl.edu/undergraduate>

The major in Earth and planetary sciences (EPS) focuses on the application of chemistry, biology and physics to Earth and planetary sciences, and on the nature of planets, their resources and their relationships to human activity. The

curriculum is broad, and the requirements are flexible enough to accommodate diverse needs and interests. Many courses present hands-on, problem-oriented experiences, including ample opportunity for fieldwork, laboratory work, and the use of state-of-the-art computational facilities and research instrumentation.

There are three tracks to the EPS major — geology, geophysics and geochemistry — each of which includes course offerings in both Earth science and planetary science. Students, in consultation with their major adviser, are encouraged to concentrate on one of these tracks.

Earth and Planetary Sciences Major: Geology Track

Geology addresses the formation processes, spatial organization and tectonic origins, age and chemistry of rocks on Earth and other planets. In addition to other requirements, geology track students take EPSc 437 Introduction to Petrology and a 6-credit field camp.

Core courses: EPSc 201 Earth and the Environment, EPSc 352 Earth Materials, EPSc 353 Earth Forces, and EPSc 437 Introduction to Petrology

Electives: At least four courses must be selected from those listed below, with at least three in Geology and one in Geophysics or Geochemistry.

Geology: EPSc 385 Earth History, EPSc 409 Surface Processes, EPSc 413 Introduction to Soil Science, EPSc 422 Sedimentary Geology, EPSc 430 Environmental Mineralogy, EPSc 460 Introduction to Structural Geology, EPSc 473 Planetary Geology

Geochemistry: EPSc 323 Biogeochemistry, EPSc 401 Earth Systems Science, EPSc 441 Introduction to Geochemistry, EPSc 443 Methods in Biogeochemistry, EPSc 444 Environmental Geochemistry, EPSc 445 Organic Geochemistry, EPSc 446 Stable Isotope Geochemistry, EPSc 474 Planetary Geochemistry

Geophysics & Remote Sensing: EPSc 319 Physical Oceanography, EPSc 407 Remote Sensing, EPSc 408 Earth's Atmosphere and Global Climate, EPSc 410 Earth Remote Sensing Methods and Instrumentation, EPSc 428 Hydrology, EPSc 452 Introduction to Seismology, EPSc 453 Interior of the Earth, EPSc 454 Exploration and Environmental Geophysics, EPSc 459 Geodynamics

Field camp: Students must complete an approved geology field camp worth at least 6 units of credit. The field camp must be attended during the summer, after either the junior or the senior year. It is important to take the appropriate courses (usually listed by the camp) before attending field camp.

Prerequisites: Chem 111A, Chem 112A (or a score of 4 or 5 on the AP Chemistry Exam); Math 131, Math 132, Math 233; Physics 117A, Physics 118A (or Physics 197, Physics 198).

Optional: Senior Honors Thesis is required for Senior Honors (visit "Senior Honors and Research Distinction" at <http://eps.wustl.edu/undergraduate/honors>).

Recommended writing-intensive courses: The department offers two courses that satisfy the college writing-intensive requirement, EPSc 498 Undergraduate Research Seminar and EPSc 404 Ideas and Controversies In the Geosciences. These courses are recommended to students majoring in EPS.

Earth and Planetary Sciences Major: Geophysics Track

Geophysics uses methods of physics to understand the structure and evolution of the Earth and other planets. In addition to other requirements, geophysics track students must take courses in differential equations and matrix algebra. These are prerequisites for the advanced-level geophysics courses that are available to the geophysics track students. Field camp is not required.

Core courses: EPSc 201 Earth and the Environment, EPSc 352 Earth Materials, and EPSc 353 Earth Forces.

Electives: At least four courses must be selected from those listed below, with at least three in Geophysics & Remote Sensing and one in Geology or Geochemistry.

Geology: EPSc 385 Earth History, EPSc 409 Surface Processes, EPSc 413 Introduction to Soil Science, EPSc 422 Sedimentary Geology, EPSc 430 Environmental Mineralogy, EPSc 437 Introduction to Petrology, EPSc 460 Introduction to Structural Geology, EPSc 473 Planetary Geology

Geochemistry: EPSc 323 Biogeochemistry, EPSc 401 Earth Systems Science, EPSc 441 Introduction to Geochemistry, EPSc 443 Methods in Biogeochemistry, EPSc 444 Environmental Geochemistry, EPSc 445 Organic Geochemistry, EPSc 446 Stable Isotope Geochemistry, EPSc 474 Planetary Geochemistry

Geophysics & Remote Sensing: EPSc 319 Physical Oceanography, EPSc 407 Remote Sensing, EPSc 408 Earth's Atmosphere and Global Climate, EPSc 410 Earth Remote Sensing Methods and Instrumentation, EPSc 428 Hydrology, EPSc 452 Introduction to Seismology, EPSc 453 Interior of the Earth, EPSc 454 Exploration and Environmental Geophysics, EPSc 459 Geodynamics, EPSc 553 Geophysical Data Analysis, EPSc 558 Advanced Geodynamics, EPSc 561 Advanced Seismology, EPSc 570 Planetary Geophysics & Dynamics.

Prerequisites: Chem 111A, Chem 112A (or a score of 4 or 5 on the AP Chemistry Exam); Math 131, Math 132, Math 233, Math 217, Math 309; Physics 117A, Physics 118A (or Physics 197, Physics 198).

Optional: Senior Honors Thesis is required for Senior Honors (visit "Senior Honors and Research Distinction" at <http://eps.wustl.edu/undergraduate/honors>).

Recommended writing-intensive courses: The department offers two courses that satisfy the college writing-intensive requirement, EPSc 498 Undergraduate Research Seminar and EPSc 404 Ideas and Controversies In the Geosciences. These courses are recommended to students majoring in EPS.

Earth and Planetary Sciences Major: Geochemistry Track

Geochemistry uses methods of chemistry to understand the chemical composition of the Earth and other planets. In addition to other requirements, geochemistry track students take EPSc 441 Introduction to Geochemistry and one additional math course either in differential equations, matrix algebra, or probability & statistics. These are prerequisites for the advanced-level geochemistry courses that are available to the geochemistry track students. Field camp is not required.

Core courses: EPSc 201 Earth and the Environment, EPSc 352 Earth Materials, EPSc 353 Earth Forces, and EPSc 441 Introduction to Geochemistry.

Electives: At least four courses must be selected from those listed below, with at least three in Geochemistry and one in Geology or Geophysics & Remote Sensing.

Geology: EPSc 385 Earth History, EPSc 409 Surface Processes, EPSc 413 Introduction to Soil Science, EPSc 422 Sedimentary Geology, EPSc 430 Environmental Mineralogy, EPSc 437 Introduction to Petrology, EPSc 460 Introduction to Structural Geology, EPSc 473 Planetary Geology

Geochemistry: EPSc 323 Biogeochemistry, EPSc 401 Earth Systems Science, EPSc 443 Methods in Biogeochemistry, EPSc 444 Environmental Geochemistry, EPSc 445 Organic Geochemistry, EPSc 446 Stable Isotope Geochemistry, EPSc 474 Planetary Geochemistry, EPSc 511 Minerals in Aqueous Environments, EPSc 544 Methods of Geochemistry, EPSc 545 Radiogenic Isotope Geochemistry, EPSc 569 Thermodynamics & Phase Equilibria, EPSc 571 Meteorites

Geophysics & Remote Sensing: EPSc 319 Physical Oceanography, EPSc 407 Remote Sensing, EPSc 408 Earth's Atmosphere and Global Climate, EPSc 410 Earth Remote Sensing Methods and Instrumentation, EPSc 428 Hydrology, EPSc 452 Introduction to Seismology, EPSc 453 Interior of the Earth, EPSc 454 Exploration and Environmental Geophysics, EPSc 459 Geodynamics

Prerequisites: Chem 111A, Chem 112A (or a score of 4 or 5 on the AP Chemistry Exam); Math 131, Math 132, Math 233, and either Math 217 or Math 309 or Math 2200 or Math 3200; Physics 117A, Physics 118A (or Physics 197, Physics 198).

Optional: Senior Honors Thesis is required for Senior Honors (visit "Senior Honors and Research Distinction" at <http://eps.wustl.edu/undergraduate/honors>).

Recommended writing-intensive courses: The department offers two courses that satisfy the college writing-intensive requirement, EPSc 498 Undergraduate Research Seminar and EPSc 404 Ideas and Controversies In the Geosciences. These courses are recommended to students majoring in EPS.

The Major in Environmental Earth Sciences

For the most current information visit our website: <http://eps.wustl.edu/undergraduate>

The environmental Earth sciences (EES) major is designed to enable students to delve deeply into the interdisciplinary study of critical environmental topics. Student understanding of environmental science is fostered both by a broad base of course work across the natural sciences, and by the unique perspective earth science provides on the context and complexity of environmental systems.

The major consists of four components: 1) required courses for all majors, 2) Tier 1 science electives, 3) elective classes in a focus area or theme, and 4) a capstone experience. A senior thesis is optional but required for senior honors. For a specific list of courses in these areas, see the tables below.

Required classes: Because environmental science is a fundamentally interdisciplinary endeavor, all students, at the beginning of their course of study, complete introductory classes in earth and planetary sciences, biology, math, chemistry and philosophy (ethics) in order to acquire the basic skills and knowledge required to address environmental problems. It is also critical for students to be able to apply and communicate what they have learned both outside the classroom and in an interdisciplinary fashion. Therefore, after the student has reached junior standing, we require a capstone consisting of 3 credits of an environmentally-related field school, internship or independent research project.

Tier 1 science electives: Through Tier 1 science electives, students begin to build a depth in environmental earth sciences (three courses in the EPSc department). They also obtain grounding in environmental engineering, and/or build on the foundation they gained in math, chemistry, biology and physics by completing their required courses (an additional two courses).

Themes: A theme consists of five courses, at least three in the natural sciences and up to two in the social sciences. Students may choose these classes from established theme areas or may design their own theme (subject to faculty approval). The list of courses within each focus is designed to foster an interdisciplinary understanding of the topic at hand. Current foci are: "climate and energy," "human-altered environments," and "life in its environment." These themes, and the list of courses

involved in each theme, are expected to evolve as the faculty changes.

Substituting classes into a theme or designing your own theme: Students may, within reason, petition to substitute courses into the non-EPSc Tier 1 science electives or into a theme (visit "Proposal for Course Substitution" at <http://eps.wustl.edu/resources>). Students should discuss these substitutions initially with their major adviser; if the adviser approves, the petition should be forwarded to the Director of Undergraduate Studies, who must also approve the petition. Petitions to substitute or utilize more than two social science courses in themes will not be considered. If a student wishes to substitute more than two courses into a theme, the student should instead design his or her own theme (see below).

If a student wishes to focus in a topical area other than those defined, the student may design his or her own theme (visit "Proposal for a Student Defined Theme" at <http://eps.wustl.edu/resources>). Themes may have no more than two courses outside the natural sciences/mathematics/engineering and should be easily recognizable as important areas within environmental earth sciences. Students should develop this proposal with their adviser and then forward the completed proposal to the director of undergraduate studies.

Capstone experiences in EES: By the end of the spring semester of the junior year, the student must submit and have a capstone proposal accepted (visit "Capstone Proposal Form" at <http://eps.wustl.edu/resources>).

Optional: Senior Honors Thesis is required for Senior Honors (visit "Senior Honors and Research Distinction" at <http://eps.wustl.edu/undergraduate/honors>).

Recommended writing-intensive courses: The department offers two courses that satisfy the college writing-intensive requirement, EPSc 498 Undergraduate Research Seminar and EPSc 404 Ideas and Controversies In the Geosciences. These courses are recommended to students majoring in EES.

Required classes

EPSc 201	Earth and the Environment	4
Math 131	Calculus I	3
Math 132	Calculus II	3
Chem 111A	General Chemistry I	3
Chem 112A	General Chemistry II	3
Physics 117A	General Physics I	4
Biol 2950	Introduction to Environmental Biology	3
EPSc 498	Undergraduate Research Seminar	3
Pol Sci 2010 or Phil 235F	Introduction to Environmental Policy Introduction to Environmental Ethics	3

A score of 4 or 5 on the Chemistry AP exam may be used instead of Chem 111A/112A.

Tier 1 Science Electives

Choose three of :

EPSc 323	Biogeochemistry	3
EPSc 336	Minerals and Rocks in the Environment	3
EPSc 352	Earth Materials ((counts as 2 courses))	5
EPSc 353	Earth Forces	4
EPSc 401	Earth Systems Science	3
EPSc 413	Introduction to Soil Science	3
EPSc 428	Hydrology	3
or EPSc 429	Environmental Hydrogeology	
EPSc 444	Environmental Geochemistry	3
EPSc 445	Organic Geochemistry	3
EPSc 454	Exploration and Environmental Geophysics	4
EPSc 385	Earth History	3

Choose two of:

Physics 118A	General Physics II	4
or Physics 198	Physics II	
Math 233	Calculus III	3
Math 217	Differential Equations	3
Math 2200	Elementary Probability and Statistics	3
Math 3200	Elementary to Intermediate Statistics and Data Analysis	3
Math 309	Matrix Algebra	3
Chem 151	General Chemistry Laboratory I	2
Chem 152	General Chemistry Laboratory II	2
Chem 261	Organic Chemistry I with Lab	4
Chem 262	Organic Chemistry II with Lab	4
Chem 401	Physical Chemistry I	3
Chem 402	Physical Chemistry II	3
Biol 381	Introduction to Ecology	3
Biol 2960	Principles of Biology I	4
Biol 2970	Principles of Biology II	4
EECE 210	Introduction to Environmental Engineering	3
EECE 531	Environmental Organic Chemistry	3

Themes

- Choose one specialization and take five courses total. No more than two social sciences/humanities allowed.
- Students may propose substitution of relevant classes for those listed here or design their own theme (subject to approval).
- Courses may not double-count for a theme and a Tier 1 elective.
- EnSt 539 and EECE 590 count as a social science.
- No more than two social science classes can be taken in a theme area.

- Pathfinder students may substitute Path 201/Path 202 for one of the non-required courses in each theme.

Visit the department website (<http://eps.wustl.edu/undergraduate/eesmajor>) for examples of themes: Climate and Energy, Life in its Environment, Human-altered Environments.

Minors

The Minor in Earth and Planetary Sciences

For more information please contact: Phil Skemer at pskemer@wustl.edu (Director of Undergraduate Studies)

Because the Earth and planetary sciences have natural links with many other disciplines, an EPS minor is an attractive option for students majoring in a variety of other fields, such as biology, chemistry, economics, engineering, mathematics and physics. The growing national concern for the natural environment and natural resources means that an EPS minor is also valuable professionally to students who intend to pursue these and other fields including law and architecture. Furthermore, students in other disciplines who are also interested in the planetary sciences may find an EPS minor of interest. The diversity of the Earth and Planetary Sciences facilitates the selection of a set of courses with an emphasis tailored to the student's particular interests.

Requirements

A minor in Earth and planetary sciences consists of at least 16 units of EPS courses, including EPSc 201 Earth and the Environment, EPSc 352 Earth Materials, and EPSc 353 Earth Forces. At least one additional EPS course numbered 300 or above, not including EPSc 390 Independent Study and EPSc 490 Independent Study, is required.

A faculty adviser is assigned to each student at the time that the minor is declared. Minor programs must be approved by the student's minor adviser. The grades and performance policy for the EPS major applies to all course work required for the EPS minor program. The department requirements also meet those for a minor as defined by the College of Arts & Sciences.

The Minor in Environmental Earth Sciences

For more information please contact: David Fike at dfike@wustl.edu (Director of EES programs)

The minor in environmental Earth sciences is an attractive option for students majoring in a variety of other fields. The growing national concern for the natural environment and natural resources means that an EES minor is also valuable professionally to students who intend to pursue these and other fields including law and architecture. Following the philosophy of

the EES major, the minor combines interdisciplinarity with a solid grounding in earth science.

Requirements

A minor in environmental Earth sciences consists of three core courses, EPSc 201 Earth and the Environment, Biol 2950 Introduction to Environmental Biology, and Pol Sci 2010 Introduction to Environmental Policy, and at least three elective courses from the following list:

EPSc 308	Topics in Environmental Sustainability	3
EPSc 323	Biogeochemistry	3
EPSc 336	Minerals and Rocks in the Environment	3
EPSc 352	Earth Materials (5 credits, counts as 2 courses)	5
EPSc 353	Earth Forces	4
EPSc 401	Earth Systems Science	3
EPSc 413	Introduction to Soil Science	3
EPSc 428	Hydrology	3
EPSc 429	Environmental Hydrogeology	3
EPSc 430	Environmental Mineralogy	4
EPSc 443	Methods in Biogeochemistry	3
EPSc 444	Environmental Geochemistry	3
EPSc 454	Exploration and Environmental Geophysics	4
EPSc 441	Introduction to Geochemistry	3

A faculty adviser is assigned to each student at the time that the minor is declared. Minor programs must be approved by the student's minor adviser. The grades and performance policy for EPS and EES majors applies to all course work required for the EES minor program. The department requirements also meet those for a minor as defined by the College of Arts & Sciences.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L19 EPSc.

L19 EPSc 103A Oceanography

Emphasis on geological, chemical and physical oceanography. Topics: topography and origin of ocean basins; origin and composition of sea water; effect of compositional variations on biological productivity; dynamics of water movements, including coastal processes.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 106 Freshman Seminar: Earth and Planetary Sciences

Each week a different faculty member presents a lecture or laboratory demonstration relating to recent discoveries in geology and the planetary sciences, or about general topics dealing with volcanism, earthquakes, plate tectonics, geological hazards, fossil life or earth history. Prerequisite: freshman standing or sophomore standing with permission of instructor.

Credit/no credit only. Students attend all lectures and write a short summary of each.

Credit 1 unit. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 108A Oceans and the Atmosphere

Basic concepts of the evolution and physical structures of the Earth's oceans and the atmosphere. Dynamic aspects of the oceans (waves, tides, tsunamis) and atmospheric circulation (weather). Role of biological processes (including anthropogenic) in defining the present oceans and atmosphere. Global climate issues discussed in EPSc 111.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 109A Quantitative Reasoning in Environmental Science

Introduction to practical mathematical methods for understanding environmental aspects of our planet, particularly how the environment changes with time through human interactions. Emphasis on intuitive approaches in devising simple relationships for understanding quantitative outcomes of natural processes. Introduction to basic statistical methods, including hypothesis testing, and how statistics can be applied to environmental problems.

Credit 3 units. A&S: NS, QA A&S IQ: NSM, AN Art: NSM BU: SCI

L19 EPSc 111 Introduction to Global Climate Change in the 21st Century

Global climate and global climate change and their impacts on life and civilization. Integrated view of global climate and the diverse forces that can alter global climate. Historical and potential future consequences of global climate change on human life, our industrial civilization, and its sustainability.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 112 Freshman Seminar: Engineering the Climate

Geoengineering, the deliberate manipulation of the Earth's climate, may be part of a solution to the predicted future global warming. Is this advisable, or even possible? Discussions, lectures and readings used to learn how earth's climate works. Examination of some proposals for altering the climate. Past attempts for deliberate human alteration of natural systems discussed and evaluated. Consideration of geoengineering as an ethical issue. Prerequisite: first-year undergraduate status.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 116A Resources of the Earth

Introduction to major resources of the Earth: rocks, minerals, water, soil, air. Basics of geology presented so that origin, supply and uses of resources can be better understood. Environmental awareness stressed. Field trip required.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 118A Geology of National Parks

Survey of geologic processes occurring at the Earth's surface and its interior using national parks and monuments as the prime venue for presentation. Volcanism and mountain-building; the work of streams, glaciers and wind; lake and coastline development; stratigraphy and sedimentation; and Earth history. Material presented in a geographic context, with emphasis on landforms and landscape evolution, relating geology to the development and settlement of the U.S.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 131 Natural Disasters

Examination of the effects of natural hazards on landscapes of the Earth in general, as well as on populated areas specifically, through numerous case studies. Social, economic and political consequences of natural disasters. Locations, particularly in the United States, where disasters are likely to occur in the future. Nature of the hazards and what preparations are possible to minimize damage and the number of casualties.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 140 Freshman Seminar: Geology and Human Health

This course explores the connections between human health and geological processes. Key concepts in geology are introduced as well as the pathways through which natural systems affect human health. A series of case studies are presented, each describing a specific health hazard and its geological origin. The first set of studies focuses on human health effects associated with wind-borne exposure to harmful materials, including volcanic emissions, asbestos, dust and aerosols, and the products of coal combustion. The course then uses the topic of mercury, which is emitted into the atmosphere and then accumulates in aquatic systems, to transition to water and soil-borne pathways of exposure. This is followed by case studies exploring water availability and quality, arsenic in groundwater, with a special emphasis on widespread arsenic poisoning in South and Southeast Asia, lead in mining areas and urban soils, and radon and radioactive materials. Students conduct team risk assessment projects as well as an individual project.

Credit 3 units. A&S: NS A&S IQ: NSM Arch: NSM BU: SCI

L19 EPSc 171A The Solar System

Survey of the planets and satellites of our solar system. Includes results from Apollo manned missions to the Moon and spacecraft missions to the planets and their major satellites. Present ideas about the age, formation and early history of the sun, Earth and meteorites.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 201 Earth and the Environment

Introduction to the study of the Earth as a dynamic, evolving planet. Emphasis on how internal and surface processes combine to shape the environment. Themes: Earth's interior as revealed by seismic waves; Earth history and global tectonics shown by changes to ocean floors, mountain-building, formation of continents, earthquakes and volcanism; climate history and global biogeochemical cycles, influenced by circulation of atmosphere and oceans, ice ages and human activity. Composition and structure of rocks and minerals. Part of the introductory sequence of courses for all Earth and Planetary Sciences and Environmental Studies majors. Three class hours and one two-hour lab a week.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 203S Critical Earth Issues

The course is a presentation of the critical issues currently facing humanity and its sustainability on Earth. Humans have always had a dualistic relationship with Earth, both relying upon it for its many natural resources and fearing it for its natural hazards. In addition, humans are now in the position of being

the largest agent of geologic change on the planet's surface. This course focuses on current and relevant topics that are of significant societal importance: energy resources, such as coal and natural gas; water and mineral availability; natural hazards, such as hurricanes and earthquakes; human impacts to different Earth systems; and changing climates. The course takes an Earth Systems Science approach to the content, emphasizing the interconnections and feedbacks between the geosphere, hydrosphere, atmosphere, biosphere and anthroposphere.

Credit 3 units. A&S: NS A&S IQ: NSM BU: SCI

L19 EPSc 219 Energy and the Environment

Examination of the topic of energy from many human-relevant perspectives. Humans use an enormous amount of energy, at the rate of 18 terawatts. Where does this energy come from? How long will it last? What are the consequences? Examination of energy resources and consumption from scientific, social, economic and political viewpoints. Relationship of energy to concepts such as heat, work and power. Energy use by society. Energy sources, pros and cons of use, availability now and in the future. Types, abundance, advantages, challenges of renewable energy sources. Prerequisite: one year of high school physics or chemistry.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 221A Human Use of the Earth

Examination of the impacts of a growing population on the Earth, including habitat destruction, resource depletion, and air and water pollution. Population growth, landscape change, and the distribution and uses of the water, mineral and energy-producing resources of the Earth.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 308 Topics in Environmental Sustainability

Mathematical sustainability models; ocean, atmospheric, wetland, agricultural, hydrological, and energy sustainability; depletion of non-renewable resources; effects of pollution, human population, urban environment. Prerequisite: Chem 111A and Chem 112; or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 319 Physical Oceanography

Ocean circulation, El Niño, dynamical tides, tsunami, coastal ocean, enclosed seas, paleo-ocean, sedimentation, ice-atmosphere-ocean interaction, biology-carbon cycle. Prerequisites: Chem 111A, Chem 112A, Physics 117A, Physics 118A, Math 132, Math 133; or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 323 Biogeochemistry

Survey of biogeochemical interactions among Earth's crust, oceans and atmosphere, including perturbations due to human activities. Carbon, nitrogen, phosphorus and sulfur biogeochemical cycles. Greenhouse warming of atmosphere from carbon dioxide and chlorofluorocarbons; effects of inorganic and organic wastes in groundwater systems. Introductory course for students of environmental science and nonscience majors. Prerequisite: permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 336 Minerals and Rocks in the Environment

Combined rock and mineral course with focus on environmental issues and applications. Introduction to mineralogical and

petrologic concepts relevant to environmental geoscience pursuits. Foundations of mineralogy and crystallography, key mineral groups, foundations of igneous, sedimentary, and metamorphic rock systems. Mineralogy of environmental systems such as soils, marine environments, aerosols, mines and radioactive wastes. Overview of analysis methods used for environmental geoscience applications. One full-day field trip required. Prerequisites: EPSc 201, Chem 111A or AP Chem score of 4; or permission of instructor. Both EPS 336 and EPS 352 may be taken for credit, but only one may count toward the EPS or EES majors and minors.

Credit 3 units. A&S: NS A&S IQ: NSM BU: SCI

L19 EPSc 352 Earth Materials

Fundamental principles of crystal chemistry; symmetry and structure of crystals (minerals); X-ray analysis of crystalline materials; information on the important mineral groups (definition of the groups; composition, structure, physical properties, occurrence and usage of major mineral species); optical mineralogy. Geological and environmental aspects of earth materials. Prerequisites: EPSc 201 (may be taken concurrently) and Chem 112A (or AP Chem score of 4); or permission of instructor. Both EPS 352 and EPS 336 may be taken for credit, but only one may count toward the EPS or EES majors or minors. Three class hours, one two-hour laboratory, and one two-hour discussion period a week.

Credit 5 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 353 Earth Forces

Basic concepts regarding the forces that act upon the Earth, how geological materials react to these forces, and the time scale over which they respond. Emphasis on physical concepts needed to understand the geodynamical behavior of the Earth over a broad range of length and time scales. Application and interpretation of geophysical methods to probe the interior of the Earth. Prerequisites: EPSc 201 (may be taken concurrently), Physics 117A (or Physics 197) and Math 131, or permission of instructor. Three class hours and one two-hour laboratory a week.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 385 Earth History

Introduction to the concept of "deep time" and the parallel biological evolutionary and environmental changes that have occurred throughout Earth history. Topics include early evolution of life, rise of atmospheric oxygen, global glaciation, mass extinctions. Prerequisite: EPSc 201 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 390 Independent Study

Independent study for undergraduates, to be supervised by a faculty member. Prerequisite: permission of instructor. Credit to be determined.

Credit variable, maximum 3 units. Art: NSM

L19 EPSc 400 Topics in the Geosciences

The content of this course varies each time it is offered, as announced by the department. With permission of the adviser, this course may be repeated for credit. Prerequisite: permission of instructor.

Credit variable, maximum 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 401 Earth Systems Science

Quantitative introduction to physical and chemical interactions among the atmosphere, oceans and solid earth. Use of the geologic record to infer how such interactions varied over geologic time. Prerequisite: EPSc 352 or permission of instructor or the graduate adviser.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 404 Ideas and Controversies In the Geosciences

Great ideas and controversies in the geological sciences and how ideas change and become accepted in science. The format is part lecture, part discussion. Writing and oral presentation are emphasized. Students read primary sources, as well as books, journals and Web-based historical accounts and interpretations. Among the topics addressed are: continental drift and plate tectonics, development of the geological time scale, age of the earth, mass extinctions and the Snowball Earth hypothesis. Prerequisites: EPSc 352 and EPSc 353 (may be taken concurrently) or permission of instructor.

Credit 3 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L19 EPSc 407 Remote Sensing

Use of different parts of the electromagnetic spectrum (visible, ultraviolet, infrared and radio wavelengths) for interpretation of physical and chemical characteristics of the surfaces of Earth and other planets. Digital image systems and data processing. Prerequisite: Physics 117A and Physics 118A (or Physics 197 and Physics 198), or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 408 Earth's Atmosphere and Global Climate

Structure and dynamics of Earth's atmosphere. Basic factors controlling global climate of Earth. Quantitative aspects of remote sensing of atmosphere. Remote sensing instrumentation. Prerequisites: Math 233 and Physics 117A (or Physics 197), or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 409 Surface Processes

How do landscapes evolve? Examination of chemical and physical processes that modify earth's surface. Introduction to soil formation. Focus on modern systems, particularly fluvial, karst and desert terrains. Brief discussion of coastal and glacial systems. Human agency in geomorphic change. Lab covers survey techniques for acquisition of topographic data and use of geographic information systems for geomorphic and hydrologic analysis. Field trips required. Prerequisite: EPSc 352 or permission of instructor. Three class hours and one three-hour lab a week.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 410 Earth Remote Sensing Methods and Instrumentation

Detection of electromagnetic radiation reflected, scattered or emitted by components of the Earth system. Spectroscopy of remote sensing. Interpretation of received radiation via radioactive transfer within a context of real measurements. Theory of instruments and detectors. Comparison of realized equipment to theoretical models. Prerequisite: Physics 118A, Chem 112A (or AP Chem score of 4), Math 233, or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 413 Introduction to Soil Science

Physical, chemical and biological processes that occur within soil systems. Types of soils and how these relate to soil formation. Major components of soil, including soil water, minerals, organic matter and microorganisms. Soils in wetlands and arid regions. Cycling of nutrients and contaminants in soils. Soil quality, conservation and sustainability. Two one-day field trips required. Prerequisite: EPSc 323 or Chem 112A (or AP Chem score of 4), or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 422 Sedimentary Geology

Survey introduction to sedimentary processes and materials, including description, formation and interpretation. Sedimentary materials account for most of the Earth's crust, and much of our understanding of Earth history comes from their examination. Many of our economic resources, such as coal, oil and natural gas, and many environmental problems, are related to or derive from sediments. Goals: understanding and identifying sediments and processes and using them to interpret stratigraphic, paleoenvironmental and tectonic information; obtaining the understanding of sedimentology that is relevant to environmental issues; increasing scientific literacy and critical thinking.

Prerequisites: EPSc 201 or permission of instructor. Three class hours and one two-hour lab a week. Mandatory field trips.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 425 Invertebrate Paleontology

Study of fossil invertebrates with emphasis on morphology of hard parts, geochronological and geographical distribution, and taxonomy. Comparison of fossil taxa with living representatives and interpretation of paleobiological patterns. Two class hours and one two-hour lab a week. Prerequisite: EPSc 200A or permission of instructor.

Credit 3 units. A&S: NS Art: NSM

L19 EPSc 428 Hydrology

Survey of principles that govern the flow of water in river and groundwater systems in deep geologic environments. Basic equations of fluid flow, dynamics and the characteristics of drainage basins, rivers, floods and important aquifers. Exploitation of groundwater systems. Prerequisites: EPSc 353, Physics 117A (or Physics 197) and Math 233, or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 429 Environmental Hydrogeology

Introduction to principles that govern the flow and geochemistry of water in river and shallow groundwater systems. Characteristics of drainage basins, rivers, floods and important aquifers. Anthropogenic impact on fresh water systems and efforts to remediate damaged systems. Prerequisite: EPSc 201 or permission of instructor. Fulfills the Natural Systems elective requirement for Master of Landscape Architecture students. Both EPSc 428 and EPSc 429 may be taken for credit, but only one may count toward the EPS or EES majors and minors.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 430 Environmental Mineralogy

Topics connected with environmental mineralogy, some selected by students. Topics may include: mineral dust such as asbestos; containment materials for nuclear waste disposal; environmental

ramifications of the processing and use of phosphate fertilizers; lead in the environment; acid mine drainage; microbial mediation of sulfide oxidation; minerals in the human body; weathering of building materials; materials engineering; and engineering of materials for more effective recycling. Three class hours and one two-hour laboratory a week. Participation in discussions, term paper, two field trips required. Most readings from primary sources. Prerequisite: EPSc 352 or permission of instructor.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 437 Introduction to Petrology

Classification, origin, mineralogy and geological occurrence of major igneous and metamorphic rocks. Laboratory emphasis on identification of rocks and minerals in hand specimens and in thin sections. Prerequisite: EPSc 352 or permission of instructor. Three class hours and one two-hour laboratory a week.

Credit 4 units. A&S: NS A&S IQ: NSM

L19 EPSc 441 Introduction to Geochemistry

Application of the principles of nuclear and physical chemistry to problems of the composition and differentiation of the Earth. Introduction to nucleosynthesis of the elements, stellar evolution, the periodic properties of the elements, chemical bonding and ionic substitution, geochronology and stable isotope geochemistry, and the age and composition of the Earth, moon and meteorites. Prerequisites: EPSc 201 and Chem 112A (or AP Chem score of 4), or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 443 Methods in Biogeochemistry

Lab-based course to provide theoretical understanding of, and practical experience in, biogeochemistry tools and techniques. Topics introduced through lecture and discussion of classic scientific papers. Hands-on experience applying techniques in the laboratory. Research project, based on data collected using these techniques, required. Students develop understanding of tools used for modern and ancient biogeochemistry research. Hands-on experience with sample preparation, operation of gas source mass spectrometers, and data analysis. Prerequisite: EPSc 323 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM

L19 EPSc 444 Environmental Geochemistry

Introduction to the geochemistry of natural waters and the processes that alter their composition. Key principles of aqueous geochemistry and their application to describe the main controls on the chemistry of pristine and polluted soil, surface and groundwater environments. Acids and bases; mineral solubility; carbonate chemistry; chemical speciation; redox reactions adsorption and ion exchange; and the speciation, mobility and toxicity of metals. Prerequisite: EPSc 201 and Chem 112A (or AP Chem score of 4), or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM BU: SCI

L19 EPSc 445 Organic Geochemistry

Introduction to the composition and analysis of organic material in the environment and geological record. Molecular to global-level perspective of organic matter cycling, reactivity and fluxes; formation and classification of organic matter, its preservation potential, diagenesis, catagenesis and kerogen formation; coal, petroleum, and gas formation and accumulation; biomarkers in Earth history; genetics and phylogeny of biomarker compounds; overview of analytical techniques including both structural

and isotopic aspects; oceanographic and paleoenvironmental applications of organic biomarkers; contaminants and residue analysis. Prerequisites: EPSc 201 and Chem 112A; or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM

L19 EPSc 446 Stable Isotope Geochemistry

Applications of equilibrium and kinetic isotope fractionation and material balance principles to the distribution of oxygen and hydrogen isotopes in natural systems. Geothermometry and paleotemperatures, mass spectrometry, isotope hydrology and ice cores, fluid-rock interaction, igneous rocks and meteorites. Prerequisites: EPSc 441 and Math 233, or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 452 Introduction to Seismology

Introduction to earthquake and exploration seismology. Seismic wave propagation, data analysis and processing, earthquake mechanisms, seismic constraints on the structure of the Earth, relationship of seismicity to plate tectonics. Prerequisites: EPSc 353 and Math 217, or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 453 Interior of the Earth

Composition and temperature of Earth's mantle and core, determined by geophysical methods. Inferences about mantle and core dynamics, especially interactions. Current understanding and history of interior in fields of seismology, geomagnetism, mineral physics, geodynamics. Prerequisite: EPSc 353 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 454 Exploration and Environmental Geophysics

Basic geophysical techniques used in exploration and environmental geophysics, emphasizing seismic and electromagnetic methods. Basic theory, field procedures and interpretation of data. Use of geophysical instruments on field trips, followed by reduction and analysis of acquired data. Prerequisites: EPSc 353, Physics 117A (or Physics 197), Math 131 and Math 132, or permission of instructor. Two class hours and one two-hour laboratory a week and approximately four one-day field trips during the semester.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 459 Geodynamics

Fundamental physical processes necessary to understand plate tectonics and a variety of geological phenomena. Heat flow, gravity, elasticity and flexure, rheology of Earth materials. Prerequisites: EPSc 353 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM

L19 EPSc 460 Introduction to Structural Geology

Stress, strain, rheology, ductile and brittle deformation processes and structures from microscale to macroscale. Applications to tectonics and whole Earth structure. Labs cover stress/strain analysis, experimental rock deformation, field techniques, interpretation of geologic maps and cross sections. Prerequisites: EPSc 352 and EPSc 353 or permission of instructor. Three hours of lecture and one two-hour laboratory a week.

Credit 4 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 473 Planetary Geology

Discussion of the evolution of the terrestrial planets and the outer-planet satellites as evidenced by the geologic records left on the surfaces of these bodies. Focus on major processes affecting planetary surfaces: impact cratering, volcanism, tectonism, and erosion and sedimentation by wind and water. Prerequisites: EPSc 352 and EPSc 353, or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 474 Planetary Geochemistry

A survey of the geochemistry of the planets and their satellites using data from Earth-based, Earth-orbital and spacecraft observations. Prerequisite: EPSc 352 or permission of instructor.

Credit 3 units. A&S: NS A&S IQ: NSM Art: NSM

L19 EPSc 490 Independent Study

Independent study for advanced undergraduates or for graduate students, supervised by a faculty member. Prerequisite: permission of instructor.

Credit variable, maximum 12 units.

L19 EPSc 492 Field Camp

Practical methods of data collection and interpretation in Earth and Planetary Sciences. Content may include field-based geologic mapping or laboratory-based studies emphasizing particular analytical tools. Prerequisite: permission of major adviser.

Credit variable, maximum 6 units. A&S: NS A&S IQ: NSM

L19 EPSc 493 Internship

Internship experience in Earth and Planetary Sciences, providing learning opportunities with future careers and employers. Direct supervision by approved partner, with oversight by Earth and Planetary Sciences faculty. Prerequisite: permission of major adviser.

Credit variable, maximum 6 units.

L19 EPSc 494 Study Abroad

Studies related to Earth and Planetary Sciences conducted with external institutions. Prerequisite: permission of Department Study Abroad Coordinator.

Credit variable, maximum 6 units.

L19 EPSc 496 Undergraduate Field Experience

Capstone experience that allows students to synthesize classroom knowledge in a field setting. Hands-on experience in the application of geoscience knowledge and techniques to modern and ancient environments, including to a range of igneous, sedimentary and metamorphic strata. Development of student ability to deconstruct and analyze complex geologic and environmental settings. Attendance at extended field trip at an international site during spring break required. Prerequisite: EPSc or EES major with junior or senior standing and permission of instructor.

Credit 3 units.

L19 EPSc 498 Undergraduate Research Seminar

Provides an opportunity for advanced undergraduates to synthesize many of the diverse subdisciplines of Earth and Planetary Sciences while focusing on a research topic. Subject

changes each offering. Each subject is unique and timely, but broad enough to encompass wide-ranging interests among students. Students conduct original research, make written reports of the results, and make oral presentations of their projects in class. Prerequisite: senior standing or permission of instructor.

Credit 3 units. A&S: NS, WI A&S IQ: NSM, WI Art: NSM

L19 EPSc 499 Honors Research

Independent work for undergraduate Honors, supervised by a faculty member. Prerequisites: senior standing, eligibility for Honors and permission of instructor.

Credit 3 units. A&S: NS Art: NSM

East Asian Languages and Cultures

The Department of East Asian Languages and Cultures (EALC) offers programs in the study of East Asian languages, literatures and cultures, including both the traditional and modern periods of their development. Our majors in Chinese and Japanese offer a solid preparation for graduate study in these areas. They also open up career opportunities in diplomacy, business, law, journalism and higher education.

The majors in Chinese and Japanese require completion of a minimum of 27 upper-level units. Specific requirements include one 200-level foundational course, four years of modern language study, one course in the classical language, and two or more courses in the relevant literary tradition. In addition, prime majors are required to fulfill the EALC capstone requirement and participate in the EALC Senior Symposium. Students who are double majoring must keep in mind that the Chinese and Japanese majors require 27 units of advanced course work unique to the major. Second majors are encouraged to participate in the EALC Senior Symposium.

The minors in Chinese, Japanese and Korean require the completion of 18 units, 9 of which must be at the 300 level or above. Specific requirements normally include the equivalent of two years of modern language study and one or more courses in the relevant literary tradition. All 18 units must be unique to the minor.

Majors

With a major in one of the East Asian languages and cultures, a student can expect to gain proficiency in Chinese or Japanese, study the area's literary and cultural landmarks, and gain familiarity with Asian history and civilizations.

The Majors

For information on the major in Chinese language and culture, visit the Chinese (p. 307) page of this *Bulletin*.

For information on the major in Japanese language and culture, visit the Japanese (p. 581) page of this *Bulletin*.

There is no major in Korean at this time.

For students interested in the major in East Asian studies, visit the East Asian Studies (p. 367) page of this *Bulletin*.

Minors

For information on the minor in Chinese language and culture, visit the Chinese (p. 308) page of this *Bulletin*.

For information on the minor in Japanese language and culture, visit the Japanese (p. 582) page of this *Bulletin*.

For information on the minor in Korean language and culture, visit the Korean (p. 608) page of this *Bulletin*.

For students interested in the minor in East Asian studies, visit the East Asian Studies (p. 367) page of this *Bulletin*.

Courses

For East Asian Studies courses, visit the East Asian Studies (p. 368) page of this *Bulletin*.

For Chinese courses, visit the Chinese (p. 308) page of this *Bulletin*.

For Japanese courses, visit the Japanese (p. 582) page of this *Bulletin*.

For Korean courses, visit the Korean (p. 608) page of this *Bulletin*.

East Asian Studies

The major in East Asian studies (EAS) entails the comprehensive study of the cultures and societies of East Asia in an interdisciplinary program that encompasses language, literature, history, anthropology, art history, film, philosophy and religious studies. All majors and minors are expected to maintain at least a B– average in all EAS courses.

Washington University is one of the nation's oldest centers for the study of China and Japan. The program offers an impressive range of courses in modern Chinese, Japanese and Korean through the advanced level in addition to classical language study in Chinese and Japanese. Our teacher-scholars are dedicated to mentoring undergraduates with an interest in East Asia.

The EAS course of study is broad and flexible, and students can easily arrange for a double major within the College of Arts & Sciences or a dual major with another school in the university.

Given the importance of East Asia in the global economy, career possibilities are expanding dramatically. Our broad-based curriculum prepares students for East Asia-focused careers in academia, diplomacy, business, education and law, among others.

Majors

The Major in East Asian Studies

Units required: 24 upper-level units (300-level or above), no more than 9 of which may be in language.

Prerequisites: Two of the following courses:

East Asia 223C Korean Civilization	3
East Asia 226C Japanese Civilization	3
East Asia 227C Chinese Civilization	3

Requirements:

1. At least two semesters of Chinese, Japanese or Korean beyond the second-year level. (Up to 9 units of advanced language, including classical language, may be used to fulfill the upper-level requirements for the major.) Native speakers who place out of all available courses in their native language may fulfill this requirement either with a second East Asian language or, with the approval of their major adviser, by completing 9 additional units (any level) in non-language EAS courses.
2. Up to 24 upper-level units selected from at least three different disciplines (anthropology, art history, film, history, literature, philosophy, religious studies or, when available, economics, political science, sociology, etc.) and at least two different areas of East Asia (e.g., Korea and Japan, China and Korea, China and Japan). Please note that at least one of these courses must focus on the premodern period.
3. Senior Capstone Experience. EAS prime majors may satisfy their capstone requirement in one of two ways, both of which require a presentation in the Senior Symposium in the spring.
 - a) Successful completion of a senior honors thesis. This option, which also entitles the student to Latin Honors, requires a minimum of 3.65 GPA. The thesis is researched and written over two semesters, for a total of 6 units, which are *in addition to* the 24 required for the major.
 - b) Successful completion of an approved 400-level course, to be taken in the senior year. (This course may be *included* as one of the required upper-level courses for the major.)

Additional Information

- Students must maintain a B– average or higher in all courses taken to fulfill the requirements of the major. Students who do not meet this requirement may either repeat the course(s) in question or earn at least a B– in an approved equivalent course or courses (either during the summer or in a study abroad program).
- If a student has a major and a minor (e.g., a Chinese major and an East Asian studies minor), the major must have 18 upper-level units independent of the minor, and the minor must have 12 units independent of the major.
- Courses for the major may not be taken Credit/No Credit.
- Normally, no more than 6 units of transfer or study abroad non-language courses may be applied to the major.
- Normally, no more than 3 units of Independent Study may be counted toward the required upper-level 24 units for the major.
- EAS awards Departmental Honors to majors as an acknowledgment of exemplary work in the major.

Minors

The Minor in East Asian Studies

Units required: a minimum of 12 upper-level (300-level or above) units, no more than 3 of which may be in language.

Requirements:

1. One of the following courses:
 - East Asia 227C Chinese Civilization (3 units)
 - East Asia 226C Japanese Civilization (3 units)
 - East Asia 223C Korean Civilization (3 units)
2. At least two semesters of Chinese, Japanese or Korean language beyond the first-year level. Native speakers who place out of all available courses in their native language may fulfill this requirement by taking the courses in a second East Asian language or, with the approval of their minor adviser, completing 6 additional units (any level) in non-language EAS courses.
3. At least 12 upper-level units selected from at least two different disciplines (e.g., anthropology and literature, art history and political science) and two different areas (e.g., China and Japan, Korea and China).

Additional Information

- Students must maintain a B– average or higher in all courses taken to fulfill the requirements of the minor. Students who do not meet this requirement may either repeat the course(s) in question or earn at least a B– in an approved equivalent

course or courses (either during the summer or in a study abroad program).

- If a student has a major and a minor (e.g., a Chinese major and an East Asian studies minor), the major must have 18 upper-level units independent of the minor, and the minor must have 12 units independent of the major. If a student has two minors, each must have 12 units independent of one another.
- Courses for the minor may not be taken Credit/No Credit.
- Normally, no more than 3 units of transfer or study abroad non-language courses may be applied to the minor.
- Normally, Independent Study units may not be used to fulfill the requirement for the minor.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L03 East Asia.

L03 East Asia 111 Introduction to Asian Art

Beginning with the birth of the Buddha and continuing through the present, this course introduces the most influential art and architecture from all across Asia. Each class covers both historic and modern works to emphasize the continuing dialogue between past and present in Asian art today. Classroom lectures; smaller, bi-weekly discussion sections. No prerequisite. Same as Art-Arch 111

Credit 3 units. A&S: LA, CD A&S IQ: HUM, LCD Art: AH BU: HUM, IS EN: H

L03 East Asia 119 Freshman Seminar: Anime as Popular Culture

In the contemporary media landscape, film, television, games, publishing and merchandizing are increasingly connected and help distribute cultural products across the globe. Japanese animation is one of the earliest and most successful examples of this powerful strategy. This course examines the global franchising industry of Japanese anime to explore basic questions about media and popular culture: How do we define a medium? How do consumer practices shape media and popular culture? What is the impact of globalization on media, and global media on national culture? Our investigations of Japan "cool" and its avid consumer cultures cover: animation aesthetics and technology; media convergence; anime fan cultures; science-fiction and remaking the body, history, and identity through global media. No prerequisites. Enrollment limited to 15 college freshmen. In addition to class meetings, there is a mandatory weekly scheduled screening.

Credit 3 units. A&S IQ: HUM, LCD BU: IS EN: H

L03 East Asia 140 East Asia in the World

This course covers the geopolitical history of 20th-century East Asia, from its colonial constellation through its transformation into cold war nation-states. We then use an interdisciplinary approach to investigate contemporary problems accompanying the emergence of regional economies and institutions. We grapple with the question of when people in East Asia — China, Taiwan, the Koreas and Japan — act as members of a transnational region and when they act in ideological, national

or local terms. We evaluate different disciplinary approaches in order to understand the combination of knowledge and skills necessary for drawing meaningful research conclusions. In reading articles produced by a range of scholars and institutions, the course is also an introduction to the politics of the production of knowledge about East Asia. This course is restricted to freshmen in the Global Citizenship Program.

Same as IAS 140

Credit 3 units. A&S: TH, CD A&S IQ: LCD BU: IS EN: H

L03 East Asia 180 Freshman Seminar in Religious Studies

This course is for freshman only. Topics vary from semester to semester. Recent topics include Miracles; and The Self in Chinese Thought.

Same as Re St 180

Same as Japan 221

Credit 3 units. A&S: TH A&S IQ: HUM, LCD BU: IS EN: H

L03 East Asia 223C Korean Civilization

A comprehensive introduction to the study of Korea. Following a historical survey, the course examines key cultural themes and social institutions and explores aspects of Korea's relationship with its East Asian neighbors. Attention also is paid to contemporary issues, social problems and cultural trends.

Same as Korean 223C

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD BU: IS EN: H

L03 East Asia 226C Japanese Civilization

The development of Japanese culture from antiquity to the present: an overview of Japanese cultural history, focusing on the interplay of crucial aspects of contemporary Japanese society and Japanese social psychology.

Same as Japan 226C

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD BU: IS EN: H

L03 East Asia 227C Chinese Civilization

An introduction to Chinese culture through selected topics that link various periods in China's past with the present. Ongoing concerns are social stratification; political organization and the arts; gender relationships and the rationales for individual behavior; and the conceptions through which Chinese have identified their cultural heritage. Our readings include literary, philosophical and historical documents as well as cultural histories. Regular short writing assignments: take-home final. No prerequisites.

Same as Chinese 227C

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD BU: BA, IS EN: H

L03 East Asia 236F Introduction to East Asian Religions

This course offers a taste of the rich, varied and inter-related religious traditions of East Asia. Through a study of sacred texts and thinkers, we explore the ways in which religious thinkers from East Asia have imagined the self and the world around them. We approach our studies by focusing on a number of themes: sacred space, cultivation of the self, the role of women,

rituals and death. The aim of the course is three-fold: Primarily, to give a general introduction to East Asian religions. Second, to examine particular religious themes. And third, to explore the ways in which the comparative study of religious traditions enlarges and enhances our understanding of ourselves and of religion in general. From among the world's religious traditions, we select and study examples of Confucianism, Daoism, Buddhism, Shinto and Islam as they have developed in China, Japan, Korea and Tibet.

Same as Re St 236f

Credit 3 units. A&S: TH, CD BU: ETH

L03 East Asia 303 The Taoist Tradition

This course offers an introduction to the ethical aspects of the Taoist tradition through the study of a select number of literary and philosophical texts ranging from ca. 300 BCE through the present day. We explore questions regarding the relationship between nature and culture, conceptions of the self, and ideas about the good life.

Same as Re St 303

L03 East Asia 3112 Buddhist Traditions

This course examines the historical development of Buddhism from its origins in South Asia in the sixth to fifth century BCE, through the transmission of the teachings and practices to East Asia, Southeast Asia and Tibet, to contemporary transformations of the tradition in the modern West. In the first third of the course, we focus on the biographical and ritual expressions of the historical Buddha's life story, the foundational teachings attributed to the Buddha, and the formation and development of the Buddhist community. In the second third, we examine the rise of the Mahayana, the development of the Mahayana pantheon and rituals, and the spread of Mahayana in East Asia. In the final third, we explore the Theravada tradition in Sri Lanka and Thailand, then Tantric Buddhism in India, Tibet and East Asia. We close the course with an overview of Buddhism in the modern West.

Same as Re St 311

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: ETH EN: H

L03 East Asia 312C Japan Since 1868

For some, "Japan" evokes Hello Kitty, animated films, cartoons and sushi. For others, the Nanjing Atrocity, "Comfort Women,"

the Bataan Death March, and problematic textbooks. For still others, woodblock prints, tea ceremony, and cherry blossoms, or Sony Walkmans and Toyotas. Still others may hold no image at all. Tracing the story of Japan's transformations, from a pre-industrial peasant society managed by samurai-bureaucrats into an expansionist nation-state and then to its current paradoxical guise of a peaceful nation of culture led by conservative nationalists, provides the means for deepening our understandings of historical change in one region and grappling with the methods and aims of the discipline of history.

Same as History 320C

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM BU: IS

L03 East Asia 3162 Early Modern China: 1350–1890

This course examines political, socioeconomic and intellectual-cultural developments in Chinese society from the middle of the 14th century to 1800. This chronological focus largely corresponds to the last two imperial dynasties, the Ming (1368–1644) and Qing (1644–1911). Thematically, the course emphasizes such early modern indigenous developments as increasing commercialization, social mobility and questioning of received cultural values.

Same as History 3162

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM BU: IS EN: H

L03 East Asia 3163 Historical Landscape and National Identity in Modern China

This course attempts to ground the history of modern China in physical space such as imperial palaces, monuments and memorials, campuses, homes and residential neighborhoods, recreational facilities, streets, prisons, factories, gardens and churches. Using methods of historical and cultural anthropological analysis, the course invests the places where we see with historical meaning. Through exploring the ritual, political and historical significance of historical landmarks, the course investigates the forces that have transformed physical spaces into symbols of national, local and personal identity. The historical events and processes we examine along the way through the sites include the changing notion of rulership, national identity, state-building, colonialism and imperialism, global capitalism and international tourism. Acknowledging and understanding the fact that these meanings and significances are fluid, multiple, contradictory and changing over time is an important concern of this course.

L03 East Asia 3202 Japan from Earliest Times to 1868

A survey of the history of the Japanese archipelago from prehistory to the Meiji Restoration of 1868, this course is designed to acquaint students with pre-industrial Japanese society and the discipline of history. In addition to tracing

political, social, and cultural narratives across time, we focus on three themes: the emergence of a centralized state and the subsequent transition from aristocratic to warrior to commoner rule; interactions with the world beyond Japan's borders; and issues of gender and sexuality.

Same as History 3202

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD BU: IS EN: H

L03 East Asia 324 A User's Guide to Japanese Poetry

This course introduces the art and craft of Japanese poetry, one of the world's great literary traditions. Exploring the many styles of traditional verse — the poetic diary, linked verse, haiku and others — and their historical contexts, we gain insights into Japanese aesthetics and study the unique conventions of Japanese poetic production that have evolved over a span of some 1500 years. The course also incorporates a "haiku workshop," where we engage in group-centered poetry writing and critiquing. No prior knowledge of Japanese is required.

Same as Japan 324

Credit 3 units. A&S: LA A&S IQ: LCD BU: HUM EN: H

L03 East Asia 3260 Samurai, Rebels and Bandits: The Japanese Period Film

Tales of heroism, crime, revolt and political intrigue. Bloody battles, betrayal, madness and flashing swords. This is the world of jidaigeki eiga, the Japanese period film. In this course, we analyze the complex (and often flamboyant) narrative, visual and thematic structures of films about the age of the samurai. We discuss jidaigeki representations of violence and masculinity, self-sacrifice and rebellion, and the invention of tradition as well as critical uses of history. In addition to the historical content of the films, we study the historical contexts that shaped jidaigeki film production and discuss relevant transformations in Japanese cinema and society. Period films have been shaped by and exert strong influences on Japanese theater, oral storytelling, popular literature, comics, and international film culture, all of which are helpful for understanding the films. As we track changes in jidaigeki style and subject matter, the course introduces theories for interpreting narrative structure, genre repetition and innovation, intertextuality, and representations of "the past." All readings are in English. No knowledge of Japanese required. No prerequisites. Required screenings Tuesdays at 7 p.m.

Same as Film 326

L03 East Asia 3310 19th-century China: Violence and Transformation

This course traces the history of China over the course of the 19th century, with an emphasis on social and cultural history. This was one of the most tumultuous centuries in Chinese history, during which China faced threats from abroad in the form of Western and Japanese imperialism, and from within, in the form of environmental degradation and rebellions resulting in an unprecedented loss of human life. The 19th century has thus

often been portrayed as a period of sharp decline for China. At the same time, we explore the ways in which the origins of the dynamic society and economy found in China today, as well as the worldwide influence of overseas Chinese, can be traced to this century of turmoil.

Same as History 331

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD

L03 East Asia 332C Japanese Literature: Beginnings to 19th Century

This survey of Japanese literature covers antiquity to the early 19th century. Emphasis on the ideological and cultural contexts for the emergence of a variety of traditions, including poetry, diaries, narrative and theater. Required of all Japanese majors and recommended for all Chinese majors. No knowledge of Japanese language is required. Sophomore standing and above recommended.

Same as Japan 332C

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM BU: HUM

L03 East Asia 333C The Modern Voice In Japanese Literature

This survey explores the emerging modern voice in Japanese literature, with emphasis on prose fiction. After a brief introduction to earlier centuries, we focus on the short stories and novels of the 20th century. Among the authors considered are Natsume Soseki, Nagai Kafu, Tanizaki Jun'ichiro, and Nobel laureates Kawabata Yasunari and Oe Kenzaburo. Discussions center on issues of modernity, gender, and literary self-representation. Required of all Japanese majors and recommended for all Chinese majors. No knowledge of Japanese language required.

Same as Japan 333C

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD Art: HUM BU: ETH

L03 East Asia 3352 China's Urban Experience: Shanghai and Beyond

The course studies the history of Chinese cities from the mid-19th century to the late 20th century. It situates the investigation of urban transformation in two contexts: the domestic context of modern China's reform and revolution and the global context of the international flow of people, products, capitals, and ideas. It chooses a local narrative approach and situates the investigation in one of China's largest, complex, and most dynamic and globalized cities - Shanghai. The experience of the city and its people reveals the creative and controversial ways people redefined, reconfigured, and reshaped forces such as imperialism, nationalism, consumerism, authoritarianism, liberalism, communism, and capitalism. The course also seeks to go beyond the "Shanghai model" by comparing Shanghai with other Chinese cities. It presents a range of the urban experience in modern China.

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L03 East Asia 3361 The Floating World in Japanese Literature

Same as Japan 336

Credit 3 units. A&S: TH, CD, SD A&S IQ: HUM, LCD, SD Art: HUM

L03 East Asia 3411 Early and Imperial Chinese Literature

An introduction to important genres and themes of Chinese literature through the study of major writers. Brief lectures on the writers' personal, social, intellectual and historical contexts; most class time is devoted to student discussions of masterworks as an avenue for understanding Chinese culture during selected historical periods. Required for all Chinese majors, and recommended for all Japanese and East Asian Studies majors. No prerequisites; all readings available in English translation.

L03 East Asia 3412 Japanese Art

Surveying the arts of Japan from prehistory to present, this course focuses especially on early modern, modern and contemporary art. Emphasizing painting, sculpture, architecture and print culture, the course also explores the tea ceremony, fashion, calligraphy, garden design, and ceramics. Major course themes include collectors and collecting, relationships between artists and patrons, the role of political and military culture or art, contact with China, artistic responses to the West, and the effects of gender and social status on art.

L03 East Asia 3425 Classical to Contemporary Chinese Art

Surveying Chinese art and architecture from the 10th century through today, this course examines classical and imperial works as the foundation for modern and contemporary art. Engaging with the theoretical issues in art history, we also pay particular attention to questions of gender, social identity, cultural politics and government control of art. No prerequisite.

L03 East Asia 352 Literature of Modern and Contemporary Korea

This undergraduate course surveys the major writers and works of 20th-century Korean literature. During the 20th century, Korea went through a radical process of modernization. From its colonization by Japan, to its suffering of a civil war within the cold war order, to its growth into a cultural and economic powerhouse, Korea's historical experience is at once unique and typical of that of a third-world nation. By immersing ourselves in the most distinctive literary voices from Korea, we examine how the Korean experience of modernization was filtered through its cultural production. In class discussion, we pay special attention to the writers' construction of the self and the nation. How do social categories such as ethnicity, class, gender and race figure in the varying images of the self? And how do these images relate to the literary vision of the nation? Along the way, we observe the prominent ideas, themes and genres of Korean literature. This class combines discussion with lecture with students strongly encouraged to participate. All literary texts are in English translation, and no previous knowledge of Korean is required.

L03 East Asia 382 Writing Women of Imperial China

Women writers can be found throughout most of China's imperial history, and from the 16th century on, there were an extraordinary number of women writing and publishing their poetry collections. Despite this fact, only a very few writings by women were included in the traditional literary canon and, until recently, they were not considered worthy of scholarly attention. Fortunately, there is now a growing body of critical studies on, and translations of, these women writers. In this course, we explore the writings of Chinese women from the 1st through to the early 20th centuries, and discuss the changing historical and social contexts within which these women wrote, and the obstacles of both genre and gender that had to be overcome in order to ensure that their voices were heard. Prerequisite: at least one course in Chinese literature or culture, or instructor's permission.

L03 East Asia 3822 From McDonald's to K-Pop: New Movements in East Asia

This course aims to help students to obtain competent knowledge about contemporary East Asian cultures and societies. We explore a broad set of topics in a transregional setting, from gender, filial piety and kinship to the upsurge of new waves, including consumer and pop cultures, the "cuteness" culture, and individualization. Our interrogation examines cultural variables, transregional dynamism, local receptions of "Western" influences, and the global impact of cultural movement in East Asia.

L03 East Asia 386 Empires and Aftermaths (WI)

An introduction to how historians and anthropologists incorporate theoretical insights into their work, this course first "reverse engineers" the main arguments in several insightful books and articles on empire in Asia, all of which are informed by the work of Michel Foucault. Retaining our theoretical knowledge, we then focus on the more empirical aspects of the Japanese empire in Korea, including settler colonialism, the colonial economy, representations of colonialism and the long-term ramifications of empire. We conclude with a general assessment of the history of empire. In these ways, this course seeks to equip students with a knowledge of empire in East Asia in the late 19th and 20th centuries while simultaneously investigating the nature of that knowledge.

L03 East Asia 4011 Popular Culture and Consumption in Modern China

This writing-intensive seminar explores transformations in popular culture and everyday life in Chinese society since 1949 through an analytical focus on political economy and material

culture. Drawing upon ethnographic texts, films and material artifacts, we investigate how the forces of state control and global capitalism converge to shape consumer desires and everyday habits in contemporary China. Case studies include eating habits, fashion standards, housing trends, entertainment, sports, and counterfeit goods. Prerequisite: previous course in China studies (anthropology, economics, history, literature, philosophy or political science) required. Enrollment by instructor approval only.

L03 East Asia 4033 Culture, Illness and Healing in Asia

This course examines the place of health, illness and healing in Asian societies. We explore how people experience, narrate and respond to illness and other forms of suffering — including political violence, extreme poverty and health inequalities. In lectures and discussions we discuss major changes that medicine and public health are undergoing and how those changes affect the training of practitioners, health care policy, clinical practice and ethics. The course familiarizes students with key concepts and approaches in medical anthropology by considering case studies from a number of social settings including China, India, Indonesia, Japan, Korea, Taiwan, Tibet, Thailand, Vietnam and Asian immigrants in the United States. We also investigate the sociocultural dimensions of illness and the medicalization of social problems in Asia, examining how gender, ethnicity, socioeconomic status, disability and other forms of social difference affect medical knowledge and disease outcomes. This course is intended for anthropology majors, students considering careers in medicine and public health, and others interested in learning how anthropology can help us understand human suffering and formulate more effective interventions.

Credit 3 units. A&S: SS, CD A&S IQ: LCD, SSC Art: SSC EN: S

L03 East Asia 4034 Family Change in East Asia

This course explores the process of family transformations in contemporary East Asia, focusing on China, Japan, Korea, Hong Kong and Taiwan, from an anthropological perspective. Topics covered in this course include traditional mainstream East Asian family systems, childbearing, the experience of coming of age, romance and courtship, marriage and family relations, the experience of aging and old-age support, divorce, singlehood and same-sex partnership, family separation and reunion, cross-boarder marriages, and transnational adoption. Alternative family systems among ethnic minorities in East Asia also are addressed.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L03 East Asia 4062 The Art of Borrowing: The "West" in Japanese Life

This course aims to examine Western influences in Japan and Japan's reconceptualizing the "West" in various aspects of popular culture, including cuisine, sports, music, language, advertising, entertainment and domesticity. It is primarily an anthropological survey with historical references on Japan's turn

to Western civilization in the modern era. The course explores Japanese perceptions of the "West," and how Japanese consume the "West" by attaching meanings to "Western" symbols and practices, and making them part of Japanese culture and life. Rather than explicating Japan's relationship with the West, the course scrutinizes the "West" constructed within Japanese discourse, as both a racial/ethnic other and a cultural fantasy. Course assignments include a round table discussion on specific topics relating to cultural integration and internationalization, and globalization and localization.

Same as IAS 4062

Credit 3 units. A&S: TH, CD A&S IQ: HUM, LCD EN: H

L03 East Asia 4180 Gender and Sexuality in East Asian Religions

In this course we explore the role of women in the indigenous religious traditions of China, Japan and Korea (Confucianism, Daoism, Shamanism and Shinto), as well as Buddhism, Christianity and Islam. We begin by considering the images of women (whether mythical or historical) in traditional religious scriptures and historical or literary texts. We then focus on what we know of the actual experience and practice of various types of religious women — nuns and abbesses, shamans and mediums, hermits and recluses, and ordinary laywomen — both historically and in more recent times. Class materials include literary and religious texts, historical and ethnological studies, biographies and memoirs, and occasional videos and films. Prerequisites: This class is conducted as a seminar, with minimal lectures, substantial reading and writing, and lots of class discussion. For this reason, students who are not either upper-level undergraduates or graduate students, or who have little or no background in East Asian religion or culture, need to obtain the instructor's permission before enrolling.

Same as Re St 418

L03 East Asia 425 Zen Buddhism

This course is designed as an exploration of the history, teachings, practices and literature of Zen Buddhism in China (Chan), Korea (Sôn), Japan (Zen), and the United States. We discuss how Zen's conception of its history is related to its identity as a special tradition within Mahayana Buddhism, as well as its basic teachings on the primacy of enlightenment, the role of practice, the nature of the mind, and the limitations of language. We also look at Zen Buddhism and its relation to the arts, including poetry and painting, especially in East Asia. Finally, we briefly explore the response of Zen teachers and practitioners to questions of war, the environment and other contemporary issues. Open to seniors and graduate students. Prerequisites: Re St 311 Buddhist Traditions or instructor's permission.

Same as Re St 425

Credit 3 units. A&S: TH A&S IQ: HUM EN: H

L03 East Asia 4310 Renegades and Radicals

In 1960, the major studio Shochiku promoted a new crop of directors as the "Japanese New Wave" in response to declining theater attendance, a booming youth culture, and the international success of the French Nouvelle Vague. This course provides an introduction to those iconoclastic filmmakers, who went on to break with major studios and revolutionize oppositional filmmaking in Japan. We analyze the challenging politics and aesthetics of these confrontational films for what they tell us about Japan's modern history and cinema. The films

provoke as well as entertain, providing trenchant (sometimes absurd) commentaries on postwar Japanese society and its transformations. Themes include: the legacy of WWII and Japanese imperialism; the student movement; juvenile delinquency; sexual liberation; and Tokyo subcultures. Directors include: Oshima Nagisa, Shinoda Masahiro, Terayama Shuji, Masumura Yasuzo, Suzuki Seijun, Matsumoto Toshio and others. No knowledge of Japanese necessary. Mandatory weekly screening: Tuesdays at 7 p.m.

L03 East Asia 4492 Modern Japanese Women Writers: WI

Japanese women have been scripted by Western (male) imagination as gentle, self-effacing creatures. From their (re)emergence in the late 19th century to their dominance in the late 20th, Japanese women writers have presented an image of their countrywomen as anything but demure. Struggling to define their voices against ever-shifting expectations and social contexts, the women they create in their fiction are valiant, if not at times violent. This course examines the various manifestations of the female image in female-authored modern Japanese fiction. Writers considered are Higuchi Ichiyo, Hirabayashi Taiko, Uno Chiyo, Enchi Fumiko, Yamada Eimi, and others. A selection of novels and shorter fiction is available in English translation, and students need not be familiar with Japanese. Prerequisite: 6 units of literature/women's studies and junior standing, or permission of the instructor. Writing-intensive course.

L03 East Asia 4911 Modern Japan and the Invention of Tradition

A discourse of "uniqueness" has been a prominent feature of Japanese culture in the 20th century, both before and after the Pacific War. This course explores the domain of nativist expression in modern Japan. While focusing on literary texts by writers such as Kawabata and Tanizaki, we also consider a range of artistic, cinematic and cultural production. Considerable attention is paid to "Nihonjinron," an important — and best-selling — genre of "Japanese uniqueness" writing. Our goal is to make sense of the complex intersection of traditionalism and modernism in 20th-century Japan, and to consider the larger question of modern nationhood and the construction of national identity. Credit 3 units. A&S: TH A&S IQ: HUM EN: H

Economics

The Economics program explores the problems of a modern economy and introduces the methodological tools economists use. It emphasizes the development of analytical models and their application to important economic, social and political issues such as inflation, unemployment, taxation, poverty, pollution, government decision-making and regulation. Our faculty, which is made up of leading teacher-scholars, includes specialists in: economic history, game theory, microeconomics, industrial organization, macroeconomics, monetary economics, political economy and public finance.

The study of economics contributes to a broad liberal arts education and helps students develop superior problem-solving skills. It is an excellent course of study to pursue, whether students plan to enter the workforce after graduation or are considering graduate work in law, engineering or the social sciences. Economics also provides exceptional preparation for careers in business, either immediately following graduation

or after completing master's-level graduate work in business (e.g., MBA, MS Finance). In addition to the introductory and intermediate economic theory courses, courses that have particular relevance for business include: Econ 335, Econ 413, Econ 4151, Econ 428, Econ 451, Econ 452 and Econ 467. Economics students with business interests should strongly consider completing at least one internship (academic credit for unpaid internships is available via Econ 299) to obtain practical business experience, and they should discuss with their advisers the possibility of taking courses such as accounting in the Olin Business School.

Majors

The Major in Economics

Total units required: 37–39

Required courses:

Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Math 131	Calculus I	3
Math 132	Calculus II	3
Math 2200	Elementary Probability and Statistics (or an alternative statistics course, which must be approved by the department)	3
Econ 493 or Math 233	Mathematical Economics Calculus III	1-3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3
Econ 413	Introduction to Econometrics	3

Total units **25-27**

Elective courses:

Four advanced economics electives (12 units), at least two of which must have an Econ 4011 or Econ 4021 prerequisite.

Additional Information

Majors must complete the Econ 4011, Econ 4021 and Econ 4011/Econ 4021 prerequisite electives in residence during the fall or spring semesters.

The 21 upper-level units (300- and 400-level) required for the major must be independent of other majors or minors (i.e., upper-level economics course work required for the major may not be double-counted for another major or a minor).

Senior Honors: Students are invited (in the second semester of the junior year) to participate in the honors program during their senior year if they meet certain academic requirements.

More information on the major, the minors, course offerings and the honors program are in the Economics Undergraduate Guide, available at <http://economics.wustl.edu> and from the

department. Students also are encouraged to contact the Academic Coordinator (dottie@wustl.edu) with any questions.

Minors

The Minor in General Economics

Economics Units required: 15

Required courses:

Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3
Econ 4021	Intermediate Macroeconomic Theory	3

Total units **12**

Elective course: One elective having at least Econ 1011 and/or Econ 1021 as a prerequisite course.

Prerequisites: The prerequisite courses for Econ 4011 are Econ 1011 and Math 132. In addition, Econ 493 or Math 233 must be taken prior to, or concurrent with, enrollment in Econ 4011. The prerequisite courses for Econ 4021 are Econ 1021 and Econ 4011.

The Minor in Applied Microeconomics

Economics units required: 15

Required courses:

Econ 1011	Introduction to Microeconomics	3
Econ 1021	Introduction to Macroeconomics	3
Econ 4011	Intermediate Microeconomic Theory	3

Total units **9**

Elective courses:

- One economics elective having Econ 4011 as a prerequisite course.
- One economics elective having at least Econ 1011 and/or Econ 1021 as a prerequisite course.

Prerequisites: The prerequisite courses for Econ 4011 are Econ 1011 and Math 132. In addition, Econ 493 or Math 233 must be taken prior to, or concurrent with, enrollment in Econ 4011.

Courses

Visit <https://courses.wustl.edu> to view semester offerings for L11 Econ.

L11 Econ 1011 Introduction to Microeconomics

Determination of prices; distribution of national income; theory of production. For a thorough introduction to economics, Econ 1021 also should be taken.

Credit 3 units. A&S: QA A&S IQ: SSC, AN EN: S

L11 Econ 1021 Introduction to Macroeconomics

Business fluctuations: inflation and recession; monetary and fiscal policy; economic development. For a thorough introduction to economics, Econ 1011 also should be taken.

Credit 3 units. A&S: SS, QA A&S IQ: SSC, AN EN: S

L11 Econ 202 The Great Economists

Examination of the great economic thinkers, the problems they sought to solve, the historically conditioned assumptions that they bring to their work, and the moral issues they raise. The class reads from the works of Adam Smith, Ricardo, Malthus, Marx, Veblen, Keynes, Schumpeter, Galbraith and others as well as commentary from Heilbroner. These readings are paired with selected texts on the social and moral issues of their times. Open only to participants in Text and Tradition.

Same as IPH 201B

Credit 3 units. A&S: TH A&S IQ: HUM Art: HUM EN: H

L11 Econ 2391 Economies as Cultural Systems

Many contemporary approaches to economics downplay or bracket the importance of culture in the workings of economic systems. In this class we focus on approaches to distribution and exchange in which culture and social institutions figure prominently, if not pre-eminently. We sample a diverse array of economies, from gift exchange to the ceremonial destruction of wealth, from Melanesia to Wall Street, in order to evaluate some of the assumptions that undergird market capitalism.

These assumptions include the perception of market actors exclusively as calculative, maximizing individuals. Topics to be covered include the Industrial Revolution; utilitarianism; economic anthropology; the formal vs. substantivist debates; ethnography of finance, and Marxist sociology.

Same as Anthro 3391

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: ETH EN: S

L11 Econ 299 Internship

Students may receive up to 3 units of credit for an unpaid internship. The internship must be approved by the Career Center and supervised by a faculty member. Note: See Career Center for further information. This course does not count toward the major or minor in Economics.

Credit variable, maximum 3 units.

L11 Econ 326 American Economic History

Basic theoretical concepts applied to analyze the changing structure and performance of the American economy from colonial times to the present. Prerequisites: Econ 1011 and 1021.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: BA EN: S

L11 Econ 335 Money and Banking

Money and the monetary system; money creation by the banking system; central bank functions; monetary theory and economic policy. Prerequisites: Econ 1011 and Econ 1021.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L11 Econ 348 Economic Realities of the American Dream

Exploration of the realities of economic life in the United States and how they correspond to the American Dream. Interdisciplinary perspectives from economics, sociology and

other areas of social inquiry. Emphasis on the consistency between empirical data and different concepts of the American Dream. Specific topics to include sources of economic growth and changing living standards, unemployment, impact of globalization on U.S. citizens, economic mobility, poverty and inequality, and social justice. Prerequisites: Econ 1011 and Econ 1021, or consent of the instructors.

Credit 3 units. A&S: SS A&S IQ: SSC BU: BA EN: S

L11 Econ 3501 Political Economy

The course introduces students to the field of political economy. The approach is to apply the economic theory and concepts to political actors and behavior. Students are expected to learn: how economic and political forces may shape the incentives and constraint of political actors (e.g., voters and policy makers); the role of institutions in shaping both political behavior and policy outcomes. Prerequisite: Econ 1011.

Credit 3 units. A&S: SS EN: S

L11 Econ 352 Health Economics

Analysis of consumer demand for health care, medical technology and the role of health insurance. Emphasis placed on behavior of the physician (whether he acts as an agent for the consumer or on his own behalf); on the use of paramedics, preventive care, outpatient care and the general market organization of the health industry. The major concern is the rising cost of health care and appropriate public policy responses. Prerequisite: Econ 1011.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC

L11 Econ 3761 International Economics

This course provides an analysis of the international economy, the economic theories that help explain it, and analysis of important current issues of international economic policy. The course covers both trade and monetary issues. Prerequisites: Econ 1011 and Econ 1021.

Same as IAS 376

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC BU: IS

L11 Econ 380 Labor and the Economy

Economic analysis of labor markets. Theory and policy applications of labor supply and labor demand; explanations of wage and income differentials; migration and immigration; discrimination; labor unions; unemployment. Prerequisite: Econ 1011.

Credit 3 units. A&S: SS A&S IQ: SSC Art: SSC EN: S

L11 Econ 4011 Intermediate Microeconomic Theory
