

The Historical Preservation Society is pleased to announce that the Rails and Trails project has begun! When completed, the trails will wander through over 70 miles of pristine wilderness and open farmland. The system of trails follows the path of the old K&T rail line. Where possible, rail overpasses and bits of the original railroad bed will be maintained so that hikers, bikers, and horseback riders will get a feel for the heritage in which they are sharing.

Join us on the journey!
