Typically Offered: Fall.

ECO 690. Essentials of Economic Theory. 3 Credit Hours.

An economic study of the environment in which the decision making process takes place in management and the functional areas. Structured especially for students without an undergraduate background in economics. Credit not applicable toward 36-credit professional MBA component.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 691. Managerial Economics. 3 Credit Hours.

Application of economic analysis to the formulation and solving of management problems and the determination of business policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 695. Global Economics. 2 Credit Hours.

This is a course in global economics with focus on economic policies and country risk. We study the aggregate behavior of macroeconomics variables that are relevant for business decisions. We take into account the interaction of the national economy with the rest of the world. In other words, we do global economics and study the roles of monetary and fiscal policies in an open economy, foreign direct investment, and the exchange rate.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ECO 698. Selected Topics. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of ECO 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Finance Courses

FIN 602. Fundamentals of Finance. 3 Credit Hours.

This is a core MBA course in our executive MBA program, devoted primarily to the area of finance. No prior background in finances is assumed. The course objective is to provide students with a conceptual framework for appreciating and understanding the problems facing the financial manager.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 603. Advanced Corporate Finance. 3 Credit Hours.

Applications in corporate finance. This class builds on the core MBA courses in our executive MBA program, especially Fundamentals of Finance (Finance 602). Topics include working capital management, financial planning, basic option valuation, agency theory, capital structure management, mergers and acquisitions, liabilities management and leasing. Note: required for Finance concentration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 613. Intermediate Corporate Finance and Investments. 4 Credit Hours.

Prerequisite: BUS 640.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 614. International Finance, Valuation, & Financial Statement Analysis. 4 Credit Hours.

Prerequisites: BUS 640, FIN 613.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 615. Financial Decision Making. 4 Credit Hours.

Prerequisites: BUS 640, BUS 613, FIN 614.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 616. Advanced Corporate Finance. 4 Credit Hours.

Prerequisites: BUS 640, BUS 613, FIN 614.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 617. Derivatives and Financial Modeling. 4 Credit Hours.

Prerequisites: BUS 640, BUS 613, FIN 614.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 620. Investment Analysis. 3 Credit Hours.

This course deals with theory and application of investment analysis.

Topics include general stock trading, portfolio and risk-return theory, models of stock valuation, portfolio diversification, market efficiency, options and futures, bond valuation and bond portfolio strategy, general commodity investing, and personal financial planning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 621. Portfolio Construction and Management. 3 Credit Hours.

The evolution of portfolio theory and practice and its role in modern investment management. Individual constraint models within the general capital market theory are included as well as empirical evidence, theoretical discussion, and practical exercises.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 622. Financial Options and Futures. 3 Credit Hours.

Study of the theoretical development of models for pricing contingent claims in the field of finance. Application of theoretical results to the hedging of current and future assets and liabilities and to speculative strategies for the risk-averse, profit-maximizing entity are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 630. International Finance. 3 Credit Hours.

The financing of international trade and capital placements. Restrictions on capital retrieval and problems of international liquidity related to the U.S. and non-U.S. firms is discussed as well as current developments in international banking, theory, and policy. Cases involving foreign capital commitments and transactions, especially Latin America are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 631. International Financial Management. 3 Credit Hours.

Sources and uses of long and short term capital for international business applications and foreign currency markets. Financial decisions associated with international cash and capital budgeting, capital repatriation and taxation strategies, capital exposure and coverage, and multinational firm financial strategies are discussed. Lectures and cases are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 641. Valuation and Financial Decision Making. 2 Credit Hours.

Basic financial valuation. This is one of the core classes in finance for our regular MBA program. Topics include the financial environment; the time value of money; capital market efficiency; basic security valuation; risk, return and asset pricing; cost of capital; and an introduction to capital budgeting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 642. The Financial Environment. 2 Credit Hours.

A continuation of FIN 641. Topics include an introduction to the global securities markets and foreign exchange, basic derivatives, real options, the securities trading process, fixed income securities markets, the term structure, investment banking, and short-term financial management and planning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 643. Quantitative Finance & Market Microstructure. 2 Credit Hours.

This course exposes students to the fast growing field of market microstructure. Students will learn about different trading mechanisms encountered in financial markets today, how information affects prices and liquidity, what algorithms practitioners use to implement their trading strategies, and some basic models of market microstructure. The course ends with a brief description of several common quantitative trading strategies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 644. Real Estate Investment and Appraisal. 2 Credit Hours.

This course will introduce students to the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 645. Real Estate Finance. 2 Credit Hours.

This course will introduce you to the theoretical concepts and analytical techniques used to make a decision to loan money for the purchase or development of a commercial real estate project.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 647. Introduction to ARGUS. 1 Credit Hour.

ARGUS software is used extensively in the development, financing and management of commercial real estate, especially in the office, industrial and retail sectors. The introduction to ARGUS class exposes the student to the basic concepts and terminology in the commercial real estate market and to the typical inflows and outflows an owner who invests in real estate faces over the life of the investment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 648. Advanced ARGUS. 1 Credit Hour.

At the end of the Advanced ARGUS class the student will be able to assess the viability of detailed rent and operating expense assumptions, make decisions about the impact of financing on investor returns and critically evaluate the investment potential of leveraged office and retail property.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 650. Financial Investment. 2 Credit Hours.

This course builds on FIN 641 and FIN 642 to provide a more advanced knowledge of the field of investments, particularly the fixed income markets, portfolio construction, asset pricing, and behavioral biases affecting financial decisions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 651. Advanced Topics in Investments. 2 Credit Hours.

This course is about applying finance theory to the practice of investments. Topics include building a term structure model, building a fixed income portfolio, performance standards and measurement, and the role of futures and options in portfolios.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 653. Alternative Investments. 2 Credit Hours.

The course provides an advanced theoretical and practical understanding of various alternative investment strategies, with a specific focus on derivatives (e.g., interest rate and credit derivatives), venture capital and private equity investments, and real estate investments. The course also examines how macro-economic, technological, labor market, taxes and regulatory issues affect specific investment decisions. In addition, the students learn about valuation, investment and risk management strategies of sophisticated investors and recent chronology of events that affect market participants.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 655. Smif Fund Analyst I. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 656. Smif Fund Analyst II. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 657. Smif Fund Portfolio Manager I. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 658. Smif Fund Manager II. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 660. International Finance. 2 Credit Hours.

Finance 660 builds on Finance 641 and 642, and introduces students to the concepts that are important in today's dramatically changing global economy. The course covers the international monetary system; the interrelationship between national economies through the balance of payments; the economic relationships that determine a currency's value relative to other currencies and real goods; the markets and instruments of international finance; currency crises and contagion; the hedging of international risk exposure; and international portfolio investment. Requisite: Master in International Business Studies Students Only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 661. Advanced Topics in International Finance. 2 Credit Hours.

This course builds directly on Finance 660 and on the MBA core classes, Finance 641 and 642, using a variety of techniques, including group projects and class discussion. A number of special topics are covered including measuring and managing the many additional risk exposures faced by a multi-national enterprise, investment decisions in a global framework, and financing the multi-national firm.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 663. Advanced Topics in International Finance. 3 Credit Hours.

Components: LEC.

Grading: GRD.

FIN 670. Corporate Finance. 2 Credit Hours.

This course builds on Finance 641 and 642 and focuses on financial decision making from a corporation's perspective. Issues addressed include capital structure, management of corporate liabilities, leasing and other asset-based financing techniques, advanced treatment of capital budgeting and some of the complex issues involved, and corporate mergers and acquisitions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 671. Advanced Topics in Corporate Finance. 2 Credit Hours.

This course builds directly on Finance 670 and on the MBA core classes, Finance 641 and Finance 642, and relies mainly on the analysis and vigorous class discussion of a variety of real-world cases. The cases cover a broad range of topics, including short- and long-term financing, capital budgeting decisions, corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, and other current issues in corporate finance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 674. Financial Analysis of Mergers and Acquisitions. 2 Credit Hours.

This course is designed to develop an understanding of (1) the economic and financial issues involved in the acquisition of a company; (2) the analytical valuation tools used to evaluate an acquisition; and (3) potential and empirical stock market reaction to an acquisition. Students are then asked to apply their understanding of the issues to analyze cases involving various aspects of acquisition.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 679. Private Equity and Venture Capital. 2 Credit Hours.

In this course, you will learn about the private equity (PE) industry, composed of both venture capital (VC) and buyouts (BO). The focus is on how PE investors evaluate, select, value, and structure deals. The course will improve your understanding of corporate finance by applying central concepts and tools to a new and increasingly important industry. The course will also introduce you to the institutions of the PE industry. This involves examining, for example, how contracts are structured to reduce asymmetric information problems and agency costs that are endemic to any PE investment. In addition, the students will learn about the valuation process used by PE investors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 681. Financial Institutions. 2 Credit Hours.

Finance 681 builds on Finance 641 and 642 and focuses on the management of financial institutions, such as banks. Topics include risk management, deposits and deposit insurance, liquidity, reserve requirements, capital adequacy, liability management, investment interest rate risk, and current issues connected with financial institutions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 683. Financial Modeling. 2 Credit Hours.

This course takes a variety of finance topics and implements them using practical spreadsheet models. Students will use the intent and financial databases to obtain input data for their models. Students will learn Visual Basic for Applications (VBA) to design functions and macros that will enhance their models. In addition to class time, this course will meet in a "computer lab" (a classroom) for hands-on instruction. Students are presumed to have a working knowledge of Windows and Excel.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 685. Mathematics of Financial Derivatives. 2 Credit Hours.

This course builds on Finance 650 and 670. This course provides an in-depth mathematical treatment of derivatives and is divided into three parts: (1) options; (2) futures and forwards; and (3) other derivative instruments, which include options on futures, foreign currency derivatives, swaps, exotic options, and financial engineering. The emphasis is placed on equity instruments, although there is also some coverage of short- and long-term interest bearing instruments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 686. Financial Decision Making. 2 Credit Hours.

The goal of this course is to use decision-making theory to better understand why investors, money managers, and corporate managers often make suboptimal economic and financial decisions. The first part of the course focuses on the basic techniques and models that a manager or an investor can use to make effective financial decisions. The second part of the course focuses on the psychological, social, and cultural determinants of suboptimal investor and managerial behavior. In addition, the course examines the impact of those mistakes for financial markets (e.g., price bubbles) and the overall economy. The course should be useful to individuals who work in a corporate setting or at a money management firm (mutual funds, hedge funds, pension funds, etc.).

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 698. Selected Topics in Finance. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 699. Directed Readings and Study. 1-3 Credit Hours.

Individually supervised research or reading projects in selected fields. Evaluation of project and subject by the supervising professor is required at the time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 705. Theory of Corporate Finance. 3 Credit Hours.

The aim of this course is to expose students to some of the important papers that constitute the theoretical foundations of corporate finance. The course will try to give you a working understanding of the key papers and give you a flavor of the techniques for setting up and solving models, which you could possibly apply in your own research. The later part of the course leans more towards empirical work and discusses the connections and gaps between theoretical and empirical corporate literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 706. Empirical Methods in Finance. 3 Credit Hours.

The objective of this course is to give you an introduction to empirical research in finance. This class is not designed like an econometrics class where the emphasis is the statistical specification of tests and the derivation of underlying asymptotics. The focus in this class is the understanding of the technique and the actual implementation in finance. The goal is to provide you with a toolbox of techniques that you can use to answer empirical questions in corporate finance and asset pricing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 707. Financial Economics I. 3 Credit Hours.

This course is an introductory Ph.D. level course on the fundamental theories of asset pricing. Specifically, it consists of three parts. The first part focuses on individual choice under uncertainty. The second part develops equilibrium asset pricing theories, which include mean-variance efficiency and the Capital Asset Pricing Model (CAPM), as well as the Arbitrage Pricing Theory (APT). The third part reviews recent development in asset pricing by introducing some stylized facts and new theories.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 708. Financial Economics II. 3 Credit Hours.

This is a second course on asset pricing. The class is divided in two independent modules. The first module covers discrete time asset pricing models with frictions. These frictions include, among others, asymmetric information, slow-moving capital, delegated portfolio management, and short-sale constraints. The second module is an introduction to continuous time finance. Topics include introduction to stochastic calculus, derivative pricing and hedging, optimal portfolio choice, and equilibrium asset pricing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 709. Behavioral Finance. 3 Credit Hours.

This course will cover selected topics from the field of behavioral finance. Issues related to both asset pricing and corporate finance will be discussed. The main objective of the course is to help you identify a few interesting research ideas and execute one of these ideas into a completed paper, which could be part of your dissertation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 830. Pre-Dissertation Research. 1-6 Credit Hours.

Components: LEC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

Management Courses

MGT 600. Managing Responsible Behavior in Organizations. 3 Credit Hours.

For Executive MBA students only. Course covers organizational behavior and utilizes cases and lectures to explore topics such as personality, motivation, leadership, group processes, organizational structure/design, and social responsibility.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MGT 602. Human Resource Management. 3 Credit Hours.

Modern personnel administration: job analysis and design, evaluation and appraisal, recruitment and interviewing, training and development, wages and benefits, and health and safety. Unionization, regulation of wages, hours and working conditions, financial security for workers, job anti-discrimination legislation, and manpower planning is also discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 603. Leading Teams. 3 Credit Hours.

The objectives of this course are to develop interpersonal communication and conflict management skills necessary to work in teams and/or exercise leadership in teams. Topics include team development, decision making, and diagnosing team process issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 617. Leading Across Cultures. 2 Credit Hours.

This course examines what constitutes "effective" leadership across cultures. Skills and behaviors that are perceived as effective leadership in one culture are not necessarily those that will be effective in a different culture. By exploring the ways in which specific cultural values and leadership prototypes are seen across different cultures, students will be prepared for cross-cultural adjustment and effective leadership. These skills may be applied to work assignments in a culture that is not their own or to leading diverse followers in their home country. The goal of the course is to help prepare students for leadership in multicultural environments.

Prerequisites: MGT 600 or MGT 620 or MGT 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 618. Leading Change In Organizations. 2 Credit Hours.

Charles Darwin aptly noted, "It is not the strongest species that survive, not the most intelligent, but the ones who are most responsive to change." The primary goal of this course is to help you learn how to lead and manage the challenges associated with organizational change processes. Together we will identify the opportunities that require change programs; discuss ways to overcome the inevitable obstacles to change; learn how to build successful coalitions to support change efforts; analyze strategies for implementing change; and examine ways to consolidate the results of such efforts to ensure that changes are sustainable over time.

Prerequisites: MGT 600 or MGT 620 or MGT 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 619. Leading With Power And Influence. 2 Credit Hours.

One of the realities of organizational life is that people continually attempt to control the actions of others and to successfully influence their behavior. This reality leads to a wide array of organizational activities aimed at enhancing one's own or one's group's personal agendas. This course focuses on preparing graduates for the challenges and "realities" they will ultimately face as leaders. Given that most students will eventually be leading the efforts of others, it is essential that they understand how to acquire power and, within ethical bounds, exercise influence.

Prerequisites: MGT 600 or MGT 620 or MGT 651.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 620. Managing Through People. 2 Credit Hours.

This core course in the MBA program introduces students to some of the key behavioral topics necessary to manage oneself and others in organizations. Specifically, the topics covered include individual attributes (personality, perception, motivation, relationship building), group processes (norms, roles, and team basics), leadership views, and organizational culture/change. An understanding of the relationship between each of these areas and organizational outcomes is enhanced through lecture, cases, and interactive exercises.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 621. High Performance Leadership. 2 Credit Hours.

Leadership skills are critical for high performing organizations. Course utilizes lecture, cases, exercises, self-assessments, and contemporary reading materials to present leadership approaches that both motivate and enable employees to perform beyond normal or ordinary expectations. Topics include followership and organizational culture, power, influence, rewards and punishments, path-goal and exchange theories, participation and empowerment, charismatic and transformational leadership, and contingency and cognitive resources theory.

Requisite: Master of Science in Management Studies Students Only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 622. High Performance Teams. 2 Credit Hours.

This elective course highlights how to manage and construct effective teams to achieve strategic goals. Team-based organizations have been created to enhance organizational performance. The benefits of effective team leadership are performance beyond expectations and enhancement of learning for employees. Topics covered include team decision-making, team leadership, diversity in teams, conflict resolution, and team creativity.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 623. Human Resource Systems. 2 Credit Hours.

Leaders must manage their human resource assets effectively to achieve high performance organizations. Course topics include recruitment and selection of high performance employees, designing performance appraisal systems, implementing policies to satisfy legal issues impacting human resources, and instituting training/development systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 624. Negotiation Strategies. 2-3 Credit Hours.

This course is a skills-based approach to learning the art and science of negotiation. Negotiation is a core management competency; these skills are increasingly necessary for leaders in business, non-profits, small businesses and other organizations. This course will cover preparation, and negotiation skills such as establishing trust and relationship-building. Topics covered include power, persuasion, creativity and problem-solving, ethics and cross-cultural negotiation. Skills and self-insight will be acquired through self-assessment, role-play negotiation exercises and case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 625. Entrepreneurship: Creating New Ventures. 2 Credit Hours.

This is a two-credit course for MBA students (only). The course is designed to help students understand the basic essentials for creating a new venture. Among some of the topics covered will be: preparation of a business plan, securing sources of capital, choosing and creating appropriate distribution channels, and understanding the complexities of selecting a management team. Students will be required to critique and develop business plans as a key evaluation component for this course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 628. Global Entrepreneurship. 4 Credit Hours.

This seminar-type course is an advanced elective specially designed for graduate students either interested in starting their own firms or developing the skills with which to submit business plans within the corporate world (i.e., corporate entrepreneurship) in today's global, interdependent economy. Students will learn to assess the new venture opportunities that he/she may have considered and choose the one that seems most attractive and viable and develop a unique business model which enhances the plan's viability in the short term, and ensures the development of sustainable advantages in the long term. Each student will draft a comprehensive business plan after working on its functional components (e.g., marketing, finance, human and intellectual capital plans) to be developed throughout nine classes and several individual meetings along the program's academic calendar. At the end, students will present their business plans to a panel of new venture investors who will assess all projects, give individual feedback, and choose the best project(s).

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

MGT 643. Principles of Operations Management. 2 Credit Hours.

Introduction to operations management, forecasting, process analysis, aggregate planning, capacity management, waiting line management, system design, quality management, and inventory management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 645. Principles of Supply Chain Management. 2 Credit Hours.

Course introduces students to the business discipline of Supply Chain Management (SCM) which centers on concepts and techniques that enables firms to better coordinate material and information flows, and non-material activities associated with logistical and marketing processes that occur within and across organizations. Course also discusses concepts and recent influential innovations in SCM (e.g., Cross-Docking, Vendor Managed Inventory (VMI), Third-Party Logistics (3PL), Efficient Consumer Response (ECR), and Quick Response (QR)).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 651. Behavioral and Organizational Systems. 3 Credit Hours.

Exploration of relevant concepts, research findings, and pragmatic implications of the behavioral sciences for the management of complex socio-technical systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 653. Operations Management. 3 Credit Hours.

Introduction to major managerial problems and decision processes of operations management. Topics include the design of operations, planning, scheduling, quality control, systems analysis and evaluation, resource allocation, materials requirement planning, and integration of operations management with the other functional areas.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 654. Sel Top In Oper Mgt. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 655. Research Methods. 3 Credit Hours.

Course addresses the fundamentals of research in business including exploratory designs, correlational and multivariate designs, experimental and non-experimental studies, measurement theory, internal and external validity considerations, and ethical requirements in conducting organizational research.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 656. Seminar: Organizational Behavior. 3 Credit Hours.

Seminar addresses the current research and theoretical foundations in organizational behavior. Topics include individual attributes, job attitudes, leadership, motivation, and group processes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 658. Strategic Management. 3 Credit Hours.

The formulation and implementation of strategy, from a domestic and international perspective, is explored through cases, readings, and decision simulation. An integration of all the core areas of business is emphasized. This core course is required of all MBA students.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 659. Management of Multinational Enterprise. 3 Credit Hours.

Analysis of the management tasks confronting managers operating in the international arena presented from both an environmental and an operational perspective. Alternatives for overall corporate policy and strategy that accommodate global operations is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 660. Leadership and Motivation in Organizations. 3 Credit Hours.

Selected topics pertaining to leadership, motivation, and individual processes are surveyed through selected readings, class discussions, and a guided research project. Students' ability to conceptualize, integrate, and apply diverse approaches to the leadership and motivation of people in organizations is emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MGT 661. Influence, Power and Politics in Organizations. 3 Credit Hours.

One of the basic realities of organizational life is that people continually attempt to control the actions of others and to successfully influence their behavior. This reality leads to a wide array of organizational politics aimed at enhancing one's own or one's group's personal agendas. This course focuses on preparing graduate business students for the challenges and "realities" they will ultimately face as managers. Given that most business students will eventually be leading the efforts of others, it is essential that they understand how to acquire power and exercise power within ethical bounds.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 675. Business Policy and Strategy. 2 Credit Hours.

The objectives of the course are to improve the student's ability to think strategically and to provide an intellectual framework that enhances understanding of the MBA program. The course focuses on relationships among the firm, its strategy, and its environment; why firms choose certain businesses; which business strategies are successful; and how firms can change in response to a dynamic environment. Models for strategic formulation, implementation, and control are developed that facilitate an integrated understanding of the courses that comprise the MBA curriculum. Readings and lectures illustrate strategic management theories and frameworks while case discussions, experiential exercises, and team projects provide opportunities for application.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 677. Corporate Strategy and Organization. 2 Credit Hours.

This capstone course focuses on the perspective and skills of the general manager. Its purpose is to provide practice in diagnosing and identifying realistic solutions to complex strategic and organizational problems.

Course builds on previous coursework by providing an opportunity to integrate various functional areas by providing a total business perspective. Since the course focus is on pragmatic, action-oriented general management skills, the course is taught primarily through the case method and requires both written analyses and case presentations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 679. Merger and Acquisition Strategies. 2.00 Credit Hours.

This course examines the merger and acquisition growth of two sets of actors. First, it focuses on "financial buyers" (hedge funds, leveraged buy-out groups, private equity funds) that acquire with the intention of divesting the asset at a profit in the near or medium term. Second, it focuses on "strategic buyers" (corporations or companies) that acquire with the intention of operating the acquired asset as a stand-alone business or by integrating it into an on-going operation or set of businesses. The course utilizes lectures, case discussions, presentations, and guest speakers to examine issues of strategy formulation and subsequent execution.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

MGT 680. Doing Business In China. 2 Credit Hours.

THIS COURSE EXPLORES VARIOUS BUSINESS AND MANAGEMENT ISSUES FACED BY INTERNATIONAL EXECUTIVES WHO ARE INTERESTED OR ACTIVE IN VARIOUS INDUSTRIES AND MARKETS IN CHINA, AIMING TO IMPROVE THEIR UNDERSTANDING OF THIS LARGEST EMERGING MARKET IN THE WORLD. SEVERAL CASE STUDIES OF BUSINESS ORGANIZATIONS AND INDUSTRIES ARE USED THROUGHOUT THE COURSE. EMPHASIS OF THE COURSE MATERIAL AND CLASS DISCUSSION IS ON CRITICAL THINKING, SOLUTIONS TO PROBLEMS, AND EVALUATING DIFFERENT OPTIONS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 681. Essentials of Health Care Management and Policy. 3 Credit Hours.

This course develops an understanding of the basic elements of the health services industry in the United States. A systems approach will be used utilizing a historical perspective as a basis and moving on to current and potential future system dynamics. The various components of the health care system will be examined, including physician services, hospital and hospital systems, long-term care providers, mental health services, and pharmaceutical services. Various elements associated with the financing of health services will be examined as well as indemnity insurance, capitation, and the role of managed care and consumer driven health care in theory and practice. The role of government and its impact on our health care system will be explored as well.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 682. Issues in Health Care Administration. 3 Credit Hours.

A seminar on current problems and issues in health care administration.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 684. Analysis of Health Care Delivery and Policy. 3 Credit Hours.

This course examines theoretical and operational incentive structures which guide health care consumers, providers and health care organization toward decisions both efficient and inefficient.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

MGT 685. Economic Models in Operations and Supply Chain Management. 3 Credit Hours.

In this course we will study the academic literature that is based on analytical models of supply chain and channel management. In particular we will be concerned with models that capture the economics that govern the interaction among the firms in a supply chain/distribution channel. Since this topic is of interest to both the marketing and operations management communities, we will draw upon readings from both areas. One of our objectives will be to identify opportunities for building bridges between these two bodies of knowledge.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 686. Optimization Models For Operations And Supply Chain Management. 3 Credit Hours.

This course is designed primarily for advanced graduate students who are interested in research on supply chain and operations management, focusing on the study of (deterministic) optimization models to support system design, planning, and operational decisions. The course complements other related doctoral courses such as those on economic models for supply chain and operations management.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 687. Health Care Organization, Economics, and Ethics. 3 Credit Hours.

Course provides the student insight into organizational and behavioral aspects of the various sectors and agents within the health care industry and understanding of how such aspects in turn affect performance measured in terms of both economic and ethical criteria.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 688. Individual and Interpersonal Processes. 3 Credit Hours.

Basic Overview of many topics relevant to studying individuals and dyads in organizations. Course will introduce students to a variety of topics related to individual and interpersonal differences, processes, and behaviors in organizations. Students will begin to see how to link research designs with a theoretical framework for empirical testing.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 689. Doctoral Seminar in Leadership and Group Processes. 3 Credit Hours.

This seminar examines the theory and research that focuses individual leadership and examines implications for individual and group behaviors as well as bridging the micro-macro divide. You will perform a critical in-depth examination of the primary research literature, focusing on appropriateness of design, analysis, interpretation, contribution and future research directions.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 690. Sustainable Business Operations: Value Creation & Environmental Considerations. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MGT 691. International Management. 2 Credit Hours.

Course is designed to provide an overview of management problems and issues for organizations and executives operating internationally. Students learn how multinational enterprises are different, why they behave as they do, and how to apply management principles to problem-solving in such contexts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 692. Theories in Management and Organization. 3 Credit Hours.

This course provides an in-depth review of major theories in the broad field of management and organization. It covers a multitude of management and organization theories that are derived not only from general management but from economics, sociology, ecology, and the like. The course will use several techniques, including lectures, article presentations and discussions, theory development, research project, and manuscript preparation. By the end of the term, students are expected to understand the central notions of each theory being discussed, comment on various arguments in these theories, improve the skills in applying these theories to their specific research questions, and sharpen their ability to develop theoretical models.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MGT 693. Theories and Research in Global Strategic Management.. 3 Credit Hours.

This course is designed to provide doctoral students an in-depth review of major theories, paradigms, and perspectives in global strategy and international business. We'll also explore how to apply existing theories and perspectives to new contextual settings, such as emerging markets and outsourcing. Furthermore, we'll do all this while reading and critiquing the major branches and works within the strategic management and international business literature. The course is intended for doctoral students in business or related fields. There are no formal prerequisites for the course although some basic knowledge of global business is expected.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MGT 694. Ph.D Seminar in Strategic Management. 3 Credit Hours.

This course is designed to provide doctoral students an in-depth review of major theories, perspectives, and methods in strategic management. The course is intended for doctoral students in business or related fields.

Components: LEC.

Grading: SUS.

Typically Offered: Spring.

MGT 695. Ph.D Seminar in Emerging Market Research. 3 Credit Hours.

This course is designed to provide doctoral students an in-depth review and study of major theories, perspectives, methods, findings, and future research issues in business and management involving emerging economies. It encompasses both macro- (e.g., strategic management, international business, entrepreneurship), and micro- (e.g., culture, human resources management, leadership, and organizational behavior) levels.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MGT 698. Selected Topics. 1-6 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MGT 699. Directed Study. 1-6 Credit Hours.

Individually supervised research project in selected field of management. Approval of supervising professor of the topic/scope of work/evaluation is required prior to registration.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MGT 825. Comprehensive Test Preparation. 1-3 Credit Hours.

Doctoral students who are preparing for their qualifying examinations may use this course designation. Enrolled students must develop, with the approval of their advisor, a "Plan of Study" for these credits.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MGT 830. Doctoral Dissertation. 1-12 Credit Hours.

Course is required of all candidates for the Ph.D. The student enrolls for credit as determined by his/her advisor.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Management Science Courses

MAS 601. Applied Regression Analysis. 3 Credit Hours.

Theory and practical application of regression modeling and analysis. Computer control language, text editing, data base manipulation, and use of various data scales are covered. Understanding the role and responsibility of a statistician is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 610. Statistical Analysis for Managerial Decision Making. 3 Credit Hours.

Data analysis, probability concepts, distributions, sampling, estimation, hypothesis testing, simple and multiple regression and correlation analysis. Required of all MBA students unless satisfied by a waiver examination or equivalent undergraduate course or courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 611. Principles of Quality Management. 3 Credit Hours.

The definition of quality management, its history, and comparison of various schools of thought. An introduction to the theories of systems, variation, knowledge, and psychology as they relate to quality management. Deming's fourteen points for management are studied through examples and cases.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 612. Advanced Quantitative Analysis. 3 Credit Hours.

The application of probability theory to the formulation and analysis of mathematical models for decision making. Applications are taken from inventory control, forecasting, waiting lines, quality control, production, and operations management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 629. SAS Programming for Business Analytics. 2 Credit Hours.

SAS (Statistical Analysis System) is considered a world leader in business analytics software. This course provides the student with the tools necessary to program in SAS at an intermediate level necessary for data scientists in many Fortune 500 companies in the pharmaceutical, financial, manufacturing and health care industries. The course begins with an introduction to Base SAS software, including the reading, manipulation and transformation of data. Techniques for restructuring data files, merging and concatenating data sets, creating summary reports as well as the utilization of basic statistical procedures will comprise the first half of the course. The middle of the course will focus on intermediate SAS skills for Data Management. The topics include error checking, report generation, date and time processing, PROC SQL, SAS Graph, SAS Macros, and the ODS (Output Delivery System) for production quality output. The last third of the course will include SAS statistical procedures most often utilized by data analysts and covered in the SAS Certified Statistical Business Analyst Credential.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 630. Quality Management in Practice. 3 Credit Hours.

This course presents administrative systems necessary for an organization or an individual to pursue quality management. The course presents a functional model for quality management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 631. Statistics for Managerial Decision Making. 2 Credit Hours.

This course aims to familiarize the student with statistical theory, tools, and methods required for business systems analysis and improvement. Topics include descriptive methods, elementary probability, random variables and the distributions, hypothesis testing, confidence intervals, statistical modeling, and regression.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 632. Management Science Models for Decision Making. 2 Credit Hours.

This course aims to familiarize the student with Management Science tools for business systems analysis and improvement. The coverage includes linear and integer programming models, project management, simulation, queuing, and decision analysis. Some widely used software are illustrated through examples and case studies derived from business applications.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 633. Introduction to Quality Management. 2 Credit Hours.

Introduction to the major elements of Dr. Deming's theory of management, including Dr. Deming's System of Profound Knowledge and Fourteen Points for Management. Additionally, participants are introduced to "Six Sigma" tools and methods. These tools and methods have been adopted with great success by many of the largest organizations in the world, for example, General Electric, Allied Signal, Dupont, American Express, and J.P. Morgan. Additionally, the course is a prerequisite for the "Six Sigma" Green Belt certification examination. Requisite: Master of Science in Business Analytic Students Only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 634. Administrative Systems for Quality Management. 2 Credit Hours.

This course presents a model to pursue quality management (QM). It features administrative systems and structures necessary for Quality Management. The administrative systems and structures presented in this course are required to sit for the Six Sigma Management "Green Belt" certification examination.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 635. Design of Experiments. 2 Credit Hours.

This course presents tools and methodology useful in conducting experiments that provide valid answers to questions of interest to the experimenter. The course discusses an overall approach to obtaining and analyzing experimental data, the advantages of using structured multi factor experiments to screen for important factors, ways of minimizing the amount of data points needed to obtain desired information, and how to identify values of experimental factors that optimize the value of measured responses. Factorial designs, fractional factorial designs, screening designs, and response surface designs are presented. Emphasis is placed on the knowledge required for proper application of these methods through many examples in business and quality management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 636. Statistical Process Control and Reliability. 2 Credit Hours.

This course aims to introduce some fundamental concepts of statistical process control and reliability with an emphasis on business applications. The first part of the course focuses on control charts and other tools that are used to monitor and improve business processes. The second part of the course introduces some basic ideas of reliability models and presents methods used in identifying failure modes in products and in business systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 637. Applied Regression Analysis and Forecasting. 2 Credit Hours.

This course aims to familiarize the student with statistical prediction. It covers simple and multiple regression methods as well as time series and forecasting models in business. Instead of theoretical development, the course emphasizes the application of these methods in business systems analysis and improvement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 638. Management Science Consulting. 2 Credit Hours.

The purpose of this course is to enhance students' consulting skills in management science. In addition to skills of modeling and choosing appropriate tools for analysis, these include the communication skills of presenting quantitative and analytical material in business settings. The course is structured around a set of case studies that are based on real applications of management science models and methods discussed in MAS 631 and MAS 632.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 639. Data Acquisition, Preparation And Visualization. 2 Credit Hours.

This course teaches using statistical computing software to get a better understanding of what problems can occur (and what solutions exist) when dealing with a variety of data types and sources. It will also discuss how to address data visualization and how to leverage current methods and software to best communicate with results and decision with stakeholders.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 640. Applied Time Series Analysis and Forecasting. 2 Credit Hours.

Time series data occur when a single experimental unit or process is observed repeatedly over time. Data of this type are common in finance and economics. Statistical methods that assume independence are inappropriate for time series data. This course will provide the students with the basic theory and tools for the statistical analysis and interpretation of time series data. Broadly, the methods may be categorized into time-domain and frequency-domain methods. Time-domain methods develop explicit models for the evolution of a process over time. Frequency-domain methods equivalently model the correlation structure of the time series. Other topics include methods for model-based estimation, model selection, diagnostics, forecasting, and computing as they relate to time series analysis.

Prerequisites: MAS 637 or MAS 601.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MAS 641. Operations Research Models in Management. 3 Credit Hours.

The application of Operations Research techniques in Management. Topics include linear programming, PERT/CPM, queuing theory, forecasting, inventory models, statistical quality control, decision theory, and Simulation.

Prerequisites: MAS 631, MAS 632, MAS 637, MAS 639 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 647. Computer Simulation Systems. 3 Credit Hours.

Introduction to discrete-event computer simulation and hands-on development of simulation models. Topics include introduction to queuing theory, input and out put analysis, random number generation, and variance reduction techniques. Students practice their modeling skills using commercial state-of-the-art simulation software. Assigned readings of real-life simulation projects complement the material learned in the classroom. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MAS 648. Data Mining and Knowledge Acquisition. 3 Credit Hours.

This course provides an introduction to the principles and techniques of data mining. Topics covered include the data mining process, data preprocessing, data mining techniques and data mining evaluation. The course will involve a combination of lectures, labs, projects and case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 650. Management Science Internship. 1-3 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Permission of department chair is required prior to registration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 663. Project Management and Modeling. 2 Credit Hours.

This course considers the various methods, techniques, and software tools of project management and modeling with special emphasis on real estate projects and development. Topics include: project selection and strategy, risk assessment, conflict and negotiation, budgets, costs, and resource allocation, monitoring and information systems, project control and auditing, and project closure. The course is designed to show the integration of the various roles of owners, developers, builders, architects, and engineers in the project management process.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 680. Spatial Statistics. 3 Credit Hours.

Prerequisite: ECO 520.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MAS 691. Topics in Management Science. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 692. Topics in Management Science. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MAS 693. Directed Study in Operations Research. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 695. Directed Study in Operations Research. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 696. Directed Study in Statistics. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 699. Directed Study. 1-3 Credit Hours.

Offered by special arrangement.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 720. Research in Residence. 0 Credit Hours.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MAS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 725. Continuous Registration--Master's Study. 0 Credit Hours.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MAS 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: LEC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

MAS 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MAS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: LEC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

MAS 850. Research in Residence. 0 Credit Hours.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: LEC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

Marketing Courses

MKT 639. Marketing Honors Research Project. 3 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Marketing.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 640. Foundations of Marketing Management. 2 Credit Hours.

Course introduces students to the analytical concepts and tools of marketing management. Special emphasis is placed on the relationships between marketing and overall company strategy, the development of a customer orientation, the integration of marketing throughout the organization, and the implementation of systems for planning and controlling the marketing effort. Students consider problems of consumer analysis, product planning, integrated communication, distribution, and pricing. The discovery and application of marketing management skills are developed through the use of readings, case exercises, and class discussions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 641. Marketing Research. 2 Credit Hours.

The objective of the course is to allow students to understand functional analysis of consumer and market behaviors utilizing statistical tools. The course will cover topics of secondary sources of data, sampling, questionnaire design, and analysis and interpretation of data. Project and case analysis methods will be used for instruction.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 642. Pricing And Value Management. 2 Credit Hours.

Pricing decisions require a synthesis of economic and marketing principles, an appreciation of legal and ethical constraints, and the ability to use accounting, financial, and market research data. This course is designed to teach students how to price goods and services by providing a framework for understanding pricing strategies and tactics. While pricing strategies are taught under the rubric of many diverse disciplines, we will take an integrative approach, combining strategic, economic, marketing, and psychological considerations. Topics covered include economic value and break-even analysis, price elasticity, markup and profit margin, price bundling, among others.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 644. Services Marketing. 2 Credit Hours.

Course develops skills necessary to manage companies in an increasingly service-oriented and technology-driven economy and to gain sustainable competitive advantage through delivering superior quality services. Course covers the special marketing challenges posed by the unique characteristics of services and discusses their managerial implications. The need and strategies for synergistic management of operations, systems, and people to satisfy customers in order to achieve marketing excellence and superior financial performance are also included.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 645. International Marketing. 2 Credit Hours.

Course analyzes the theories and practice of international marketing management. Course allows students to understand markets and aid in the development of marketing plans based on the nature of national as well as international markets. Issues of globalization, standardization, intermarket segments, trading blocks, global marketing strategies, local branding, global branding in the context of customer movements, product development, pricing, distribution, communication, and segmentation in global markets are also discussed.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 646. Consumer Behavior. 2 Credit Hours.

This course provides an overview of psychological and normative principles of consumer decision-making and judgment by focusing on underlying behavioral research and theory. How people process information, make decisions involving risk and uncertainty, conflicting objectives, and imperfect information are some of the main topics discussed. The implications of consumer behavior on a marketing strategy are highlighted.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 647. Advertising and Communications Management. 2 Credit Hours.

Billions of dollars are wasted every year on ineffective advertising and communication campaigns. This problem is due to an absence of a compelling strategy to serve as a foundation for developing creative executions and media plans. The course provides a balanced analysis of strategy and execution of integrated marketing communication campaigns. The effectiveness of existing and emerging communication vehicles to attain strategic marketing goals is assessed. Special emphasis is placed on advertising, sales promotions, and online communications. Current and historical campaigns are also reviewed. Course requirements include case reports, projects, and class participation.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 648. New Product Development. 2 Credit Hours.

This course enables students to appreciate the systematic approach that goes into the creation and marketing of new products. Practical aspects of developing and marketing new products are included through two assignments and one class project.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKT 649. Strategic Brand Marketing. 2 Credit Hours.

More and more firms have come to realize that their brands are among their most valuable assets. The goal of this course is to teach students the strategic significance of brands in creating shareholder value.

Students should develop fluency with the core principles associated with branding including: an understanding of how to develop a brand's positioning; managing total brand experience; how to manage the brand relevancy over time; familiarity with the various qualitative and quantitative methodologies that are used to evaluate brand equity; how to achieve growth through brand extension; brand design and brand messaging. The basic philosophy for this course is to blend theory and practice of brand management. Branding is both an art and a science. Few branding situations have a definitive, unqualified "right" answer as to what is the best approach. However, when armed with relevant and comprehensive theories, appropriate frameworks and models, familiarity with past successful and unsuccessful branding strategies, managers can make better and more informed decisions that are more likely to yield successful implementation.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKT 650. Strategic Marketing. 2 Credit Hours.

Course develops the skills necessary to strategically manage business-unit level marketing activities in a multi-brand firm. This necessitates examining all marketing mix elements, R&D, financial and production considerations simultaneously in the context of the many markets, products, and services that may concern a typical firm. The emphasis is placed on understanding internal capabilities, market competitors, and customers. Market simulation exercise, cases, and readings are utilized.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 660. Foundations of Marketing Management. 3 Credit Hours.

Marketing problems experienced by top executives are examined and fundamental problem-solving concepts are developed. Students consider problems of consumer needs, product planning, promotion, distribution and pricing. The discovery and application of marketing management skills are developed through the use of cases and a major planning project.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 665. International Marketing. 3 Credit Hours.

Analysis of major U.S. foreign markets, marketing policies, and techniques are discussed.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 672. Services Marketing. 3 Credit Hours.

Course develops the skills necessary to manage services marketing and compete through delivering quality service. The unique characteristics of services and their managerial implications are examined. Importance of the synergistic management of operations, environment, systems and people to satisfy the customer is highlighted.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKT 675. Marketing Analytics. 2 Credit Hours.

More and more firms now consider data is one of their key strategic assets. This has made analytics an important subject for business majors. One area where firms find analytics useful is marketing. Today firms use analytics to identify profitable customers, continuously track brands, calculate optimal price promotions, test commercials and optimize media budgets across online and offline channels. The goal of this course is to give you hands-on experience with data and analytics and teach you how to draw strategic marketing insights from data.

Prerequisites: MKT 640 or MKT 660.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 686. Behavioral Decision Theory in Consumer Research.. 3 Credit Hours.

The objective of this seminar is to acquaint students with important theories and findings regarding consumer behavior and to stimulate research. Students will learn how to identify important research problems, ask interesting research questions, develop theories and hypotheses, and design experiments.

Requisite: Must be registered Doctoral Student.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

MKT 687. Marketing Strategy. 3 Credit Hours.

Marketing Strategy is a vast, exciting and exploding literature that almost defies classification. However, despite this difficulty one common theme unifies and distinguishes this stream of research: it is marketing as seen through the eyes of a manager. Is it worth fighting for market share? How do we analyze competitors? Is it more profitable to introduce a new product or enter a new market? Should we build on existing relationships or seek new customers? Does loyalty management pay? Do consumers understand product quality? Can we quantify the effects of advertising and promotions? What metrics should we use to evaluate the effectiveness of marketing effort? Can we run policy simulations before committing to marketing action? These are some of the questions that marketing managers need to address. Often the questions are very broad and complex, reflecting the bewildering range of techniques that have been used to address those questions. The seminar will try to impart an appreciation of how to define and solve research problems in a marketing strategy.

Requisite: Must be registered Doctoral Student.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKT 688. Ph.D. Seminar in Consumer Behavior and Decision Making. 3 Credit Hours.

This course is designed to provide students with a background regarding a wide set of topics in consumer behavior focusing on theoretical models. In addition to developing a knowledge base in several extant consumer behavior literatures, this course has several additional goals. Students will: 1) become familiar with the content and style of consumer behavior research published within the marketing field, 2) develop an understanding of many methodologies and paradigms that can be used to investigate theoretical issues, 3) have several opportunities to explicate research ideas that they will hopefully be able to pursue in the remainder of the program or early in their careers, and 4) learn to critically evaluate the research of others to aid in strengthening their thinking and ultimately their own research activities.

Requisite: Must be registered Doctoral Student.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

MKT 695. Topics In Marketing. 1-3 Credit Hours.

Topics in selected areas of Marketing.

Requisite: Must be registered Doctoral Student.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 696. Topics In Marketing. 1-3 Credit Hours.

Topics in selected areas of Marketing.

Requisite: Must be registered Doctoral Student.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 697. Topics In Marketing. 1-3 Credit Hours.

Topics in selected areas of Marketing.

Requisite: Must be registered Doctoral Student.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 698. Topics In Marketing. 1-3 Credit Hours.

Topics in selected areas of Marketing.

Requisite: Must be registered Doctoral Student.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 699. Directed Study. 1-6 Credit Hours.

Individually supervised readings or research projects. Restricted to students with superior academic records. Approval of supervising professor as to topic and evaluation of project required at time of registration.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

MKT 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of MKT 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Communication

<http://www.com.miami.edu>

Departments

The School of Communication offers:

- the Master of Arts in the Department of Communication Studies (MA in Communication Studies),
- the Master of Arts in the Department of Journalism and Media Management (MA in Journalism), and
- the Master of Arts in the Department of Strategic Communication (MA in Public Relations), and
- the Master of Fine Arts in the Department of Cinema and Interactive Media (MFA in Motion Pictures and MFA in Interactive Media).

The School also offers a Ph.D. in Communication.

Admission Requirements

Admission to Graduate Studies at the Master's Level

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Master of Arts or Master of Fine Arts degree in Communication:

- A baccalaureate degree from an accredited institution
- The School's official application
- A \$65.00 non-refundable application fee
- Three letters of recommendation
- 500 word typed statement of academic and professional goals.
 - Note: for the Interactive Media MFA, please visit <http://com.miami.edu/interactive-media-mfa> for specific instructions about the statement
- Official transcripts of all college work, both undergraduate and graduate
 - Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers your degree, with English translation for all degrees earned.
 - Note: All transcripts must be the original document, forwarded directly from the university; Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
 - Note: Only for international applicants
- Copy of current passport
 - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.
- Official Graduate Record Examination (GRE) scores
 - Note: Required for MA applicants
 - Note: Interactive Media MFA applicants may send GRE scores or a portfolio
 - Note: Not required for Motion Pictures MFA applicants
- Portfolio
 - Note: Required for Motion Pictures MFA applicants

- Note: Interactive Media MFA applicants may send a portfolio or GRE scores

Contact the Office of Graduate Studies, 305-284-5236 or socgrad@miami.edu, for information.

Admission to Graduate Studies for the Juris Doctor/ Master of Arts in Communication Joint Degree

Requirements for admission to graduate studies for the Juris Doctor/ Master of Arts in Communication joint degree are:

- Students must be admitted to the Law School first, prior to enrollment in the School of Communication, checking a box on their application indicating their interest in the joint degree program. Once accepted to the Law School, the student's law school application including LSAT score, undergraduate transcript, and letters of recommendation (two of them required for the JD program) will be sent to the School of Communication for review. The student will then receive notification from the School of Communication regarding his/her admission to the joint degree program.
- The LSAT score may be submitted in lieu of the GRE score.

General notes

- Students will be admitted to the Law School JD program and the School of Communication (SoC) master's program separately.
- Students in this joint degree program must commence law study first.
- Students who have already commenced work on the SoC MA are not eligible for the joint program.

Admission to Graduate Studies at the Doctoral Level

The following is a list of the required conditions as well as the required documents/fees for your application for admission to the Doctor of Philosophy in Communication program:

- A master's degree in communication or another appropriate field. The degree must be in addition to a bachelor's degree. All degrees must be from accredited institutions.
- The School's official application
- A \$65.00 non-refundable application fee
- Three letters of recommendation
- Official transcripts of all college work, both undergraduate and graduate
 - Note: In addition, international applicants must send an official copy of their diploma for all degrees earned, and all documentation that confers your degree, with English translation for all degrees earned.
 - Note: All transcripts must be the original document, forwarded directly from the university; Xerox copies, true copies, notarized copies and other types of copies are not acceptable.
- Official TOEFL or IELTS scores
 - Note: Only for international applicants
- Copy of current passport
 - Note: Only for international applicants. The name entered on the graduate application must exactly match your name as it appears on your passport.

- Official Graduate Record Examination (GRE) scores
- Current Curriculum Vitae (CV)
- 500-word typed statement of your academic and professional goals, research area you want to pursue and why, and how your background has prepared you for this. A copy of the completed master's thesis or comparable scholarly work if a master's thesis has been completed. If the master's thesis is in progress, submit completed chapters. If a thesis is not required by your master's program, submit comparable scholarly work.

Degree Programs

The School of Communication offers graduate programs leading to the Master of Arts, Master of Fine Arts, and the Doctor of Philosophy degrees.

Communication Studies (M.A.)

COMMUNICATION STUDIES (M.A.) is a program designed to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. The 30 credit hour thesis track program emphasizes the student's development of research skills. The 36 credit hour non-thesis track program focuses on a theoretical foundation with emphasis on applied communication. Students have the option to concentrate in Communication Studies, Health Communication, or Intercultural Communication.

Journalism (M.A.)

JOURNALISM (M.A.) is an intensive program of academic study and hands-on practice designed to develop competitive, high-level, cross-platform digital media skills appropriate for today's media landscape. Students take a common core of courses designed to provide a foundation in all aspects of contemporary journalism (e.g., writing, reporting, multimedia, data visualization, broadcasting, media law and ethics). In addition, students have the opportunity to focus their work in various areas of study, including broadcast journalism, news and feature writing and various aspects of multimedia journalism. Through a combination of journalism courses and related courses offered by other programs, students may also concentrate some of their work in particular areas of interest (e.g., sports reporting and, travel and features). The program begins in the fall semester and lasts for 18 months. No prior training or experience in journalism is required.

Public Relations (M.A.)

PUBLIC RELATIONS (M.A.) offers two tracks. The 30 credit hour thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second 36 credit hour, coursework-only non-thesis track program builds from a foundation of public relations and communication courses.

Joint Degree Juris Doctor (J.D.)/M.A. in Communication

JOINT DEGREE JURIS DOCTOR (J.D.)/M.A. IN COMMUNICATION. A powerful background in law and in communication can be a launching pad for a career in law, business, entertainment or government. For this reason, the University of Miami School of Law and School of Communication have brought together these two dynamic fields to offer a joint degree program. Through this joint program, students can acquire a law degree and a master's degree in communication in less time (3

to 3½ years). The joint degree program is intended for students with a variety of goals including students who plan to practice professionally in a communication field such as journalism or strategic communication with a law-related emphasis. Graduates of these programs may also work as in-house counsel for new communication technology companies, or serve with government agencies concerned with communication law or with law firms practicing in that field. This program also provides a solid foundation for future journalists who wish to report on legal affairs, and offers ideal preparation for the rapidly growing field of public affairs management, in which practitioners work in business, government and non-profits to communicate with key audiences.

The School of Communication M.A. degree programs participating in the joint J.D. program are:

- Communication Studies (Communication Studies, Health Communication, Intercultural Communication)
- Public Relations
- Journalism

Motion Pictures (M.F.A.)

MOTION PICTURES (M.F.A.) The Motion Picture graduate program provides a student-centered, learning experience within a globally diverse moving image context. The M.F.A. curriculum emphasizes the relationship between theory and practice and encourages both creative collaboration and independent thinking as it prepares motion picture professionals and artists. M.F.A. candidates are expected to follow a set sequence of courses during the first two semesters of their studies. During the second year of studies, candidates are strongly encouraged to explore not only a primary but also a secondary area of specialization in the program and develop a minimum of two creative projects consistent with their areas of primary interest and secondary specialization. A minimum of 6 credit hours in each area of specialization is required. Under faculty committee supervision, students will develop one or two creative projects in the third year of their studies. This three-year program culminates with a thesis portfolio that demonstrates, not only skillful execution of craft, but strong conceptual development rooted in collaborative work and innovative uses of technology.

Graduate students are encouraged to pursue independent and critical thinking, research and creative work as appropriate to the fulfillment of the requirements of their degree. In addition, the graduate program seeks to support innovative approaches and ideas and to aid in the pursuit of relevant scholarly and creative endeavors.

Interactive Media (M.F.A.)

INTERACTIVE MEDIA (M.F.A.) The Interactive Media graduate program aims to prepare a new generation of innovators and leaders in the field of interaction design. The M.F.A. curriculum emphasizes exploration of the use of technology, design, and human behavior, to impact, augment, and influence how people communicate. The multidisciplinary curriculum brings together students from different backgrounds to learn about interaction design, gaming, mobile, data visualization, human computer interaction, and other emerging technologies. The program trains students to research, prototype, design, and build projects in business, social, academic, and cultural contexts.

Communication

COMMUNICATION (Ph.D.) provides students with the theory and research skills required to use communication to make positive change in society, community, and individuals. Possible areas of specialization, within this overarching framework of social and behavioral change, include health communication (broadly defined), intercultural communication, organizational communication, international communication, advocacy, and journalism studies and accompanying new/digital media foundations and skills.

Cinema and Interactive Media

The Cinema and Interactive Media Department offers a complete curricular experience in critical understanding and effective creation of contemporary moving image media and interactive design. With two programs, the M.F.A. in Motion Pictures and the M.F.A. in Interactive Media, our mission is to explore the creative uses of narrative, documentary, technology, design and human behavior in order to entertain, impact, augment, and influence how people communicate. We prepare a new generation of innovators, storytellers and leaders in the fields of cinema, transmedia and interaction design.

The M.F.A. in Motion Pictures program requires that students complete a minimum of 66 credit hours. At least 24 of these credit hours must be at or above the 700-level. At least 12 credit hours must be earned at the 800-level for thesis work. Motion Picture students must maintain an overall minimum GPA of 3.0 or above for all courses. By the end of the second year, students are required to achieve a minimum 3.0 score on the program's film and television literacy test.

Students in the Motion Picture program are strongly encouraged to explore not only a primary but also a secondary area of specialization and develop a minimum of 2 creative projects in consultation with their faculty advisory committee. The 3 year program culminates in a thesis portfolio. Students need to work closely with their primary advisor and committee to ensure they are fulfilling their degree expectations, which typically include a short motion picture project abroad and a summer internship.

The M.F.A. in Interactive Media program requires that students complete a minimum of 45 credit hours at the graduate level with an average of "B" and no grade lower than a "C-". Prior written approval is required from both the chair of the CIM department and the director of graduate studies for transfer of credit hours, for course substitutions, as well as for taking a course at another university.

Interactive Media students are required to register for a capstone project seminar. To register for this course, students must complete all courses with a standing of 3.0 GPA. The capstone course is designed to help students define and execute their final projects. To graduate, students must complete and present a fully articulated capstone project and related documentation. Students must complete all degree requirements within 6 years.

Masters

Masters Programs in Cinema and Interactive Media

	or COM 602 Methods of Communication Research	
CIM 693	Dynamic Data: Building Database Driven Websites	
Health Design		
CIM 693	Dynamic Data: Building Database Driven Websites	
COS 651	Survey Of Health Communication	
COS 652	Culture And Health	
	or COS 653 Organizations, Communication Health	
COS 655	Health Communication Interventions	
Electives		9
Students will be able to take 12 elective credits (four classes) of their choice under guidance of their advisor.		
Capstone		
CIM 691	Capstone	3
Total Credit Hours		45

M.F.A. in Motion Pictures

Students must complete a minimum of 66 credit hours with the approval of the faculty advisor. Of the 66 credit hours, at least 24 must be at or above the 600-level, and 12 credit hours at the 700-level must be earned for thesis work. Motion Picture students must maintain an overall minimum GPA of 3.0 for all courses.

M.F.A. candidates are expected to follow a set sequence of courses during the first two semesters of their studies. Several courses are required during the second year of studies. Candidates are strongly encouraged to explore not only a primary but also a secondary area of specialization in the program and develop a minimum of two creative projects consistent with their areas of primary interest and secondary specialization. A minimum of 6 credit hours in each area of specialization is required. Under faculty committee supervision, students will develop one or two creative projects in the third year of their studies.

All M.F.A. students must demonstrate deeper, critical understanding of motion picture practice in diverse social and cultural contexts. To this purpose, and during their first year of studies, students are expected to produce a short motion picture project abroad. Students are also encouraged to participate in an internship during the summer of the first year or second year of studies.

By the end of the second year, students must complete a film and television literacy test, based on a list of 150 culturally and historically significant titles compiled by the faculty. The list is circulated to each student upon entrance into the program. The test is administered annually in the spring semester. Students are required to earn 85/100% on the test in order to complete the degree.

This three-year program culminates with a thesis portfolio that demonstrates, not only skillful execution of craft, but strong conceptual development rooted in collaborative work and innovative uses of technology.

First Year		
Fall		Credit Hours
CIM 601	Principles of Aesthetics and Analysis	3
CIM 611	Writing the Short Film	3

Required course work:		
CIM 694	Motion Picture Marketing and Distribution	3
CIM 815	MFA Thesis	1-6
Term Credit Hours:		9
Total Credit Hours:		66

No more than 9 credit hours will be allowed for graduate internships and advanced projects and directed research. Courses may be taken, with

program director approval, from other programs or departments within the University of Miami.

Communication Studies

Two programs are offered in Communication Studies.

- The thesis program emphasizes the student's development of research skills under faculty supervision (30 credit hours).
- The non-thesis program focuses on a theoretical foundation with emphasis on applied communication (36 credit hours).

Students will be prepared for leadership positions in public or private organizations at the national or international level, or pursue advanced degrees.

Thesis students must complete a minimum of 30 credit hours at the graduate level with the approval of a faculty advisor or department chair. Of the 30 credit hours, 15 credit hours must be at or above the 600-level. Non-thesis students must complete a minimum of 36 credit hours at the graduate level with the approval of a faculty advisor or department chair. Of the 36 credit hours, 18 credit hours must be at or above the 600-level. Communication Studies students must maintain an overall minimum GPA of 3.0 for all courses. Core courses must be completed during the first year of study, or by completion of 18 credit hours. No more than 6 credit hours will be allowed for advanced projects and directed research. Only one intercession course (3 credit hours) can be counted towards the degree. Electives credits must be chosen with prior approval of a Communication Studies advisor.

Masters

Masters Programs in Communication Studies

- M.A. in Communication Studies - Communication Studies Track (p. 471)
- M.A. in Communication Studies - Health Communication Track (p. 472)
- M.A. in Communication Studies - Intercultural Communication Track (p. 472)
- M.A. in Communication Studies - Organizational Communication Track (p. 473)

M.A. in Communication Studies - Communication Studies Track

The goals of the Master of Arts program in Communication Studies are to provide students with a rigorous educational experience, to develop an advanced understanding of the human communication process, to increase awareness of the interdisciplinary nature of the communication field, and to develop oral, written, critical thinking, and research skills. Students may complete coursework in persuasion, and interpersonal, intercultural, organizational, and health communication together with research methods applicable to these areas. Two programs are offered.:

- The thesis track emphasizes student development of research skills under faculty supervision (30 credit hours).
- The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credit hours).

A maximum of 9 credit hours non-thesis track may come from outside the School of Communication. Elective credits must be chosen with prior approval of a Communication Studies advisor.

M.A. in Communication Studies - Health Communication Track

Health Communication is an emerging specialty in the field of communication. This graduate program is designed to provide a broad introduction to human communication in a health-care context. Career opportunities in this area include public health leaders, practitioners, and researchers who design, evaluate, and disseminate health communication messages for private and governmental organizations, advertising, public relations and marketing agencies, and journalists. Students will explore the roles of patients and caregivers, social and cultural issues, communication in health organizations, and the role of mass media. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credit hours). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credit hours).

M.A. in Communication Studies - Organizational Communication Track

Organizational Communication is designed to provide students with a comprehensive and advanced understanding of communication in the organizational environment. Courses are designed to extend oral, written, and critical thinking skills through application of concepts using practical challenges in organizations. Students have the opportunity to explore essential areas of organizational communication, presentational skills, leadership styles, interpersonal and small group interaction, decision making, persuasion, conflict management, and diversity training. Two programs are offered. The thesis track emphasizes student development of research skills under faculty supervision (30 credits). The non-thesis track emphasizes a theoretical foundation based on application of communication courses (36 credits).

Doctor of Philosophy in Communication

The doctoral program is designed to provide students with the requisite foundation in theory as well as research skills for using communication to make positive change at the societal, community, and individual levels. The program allows learning across content and creative areas, methodological orientations, and platforms of expression for engaged scholarship and immersive experience, globally and locally. You will engage with communication theory, research, and practice using advocacy and storytelling, with particular attention to new and social media for social and behavioral change. This will be your niche: conducting research, engaging in immersive experience, and translating these into evaluation-based practice for the well being of community, society and the world.

The program includes field research experience and the teaching, writing, and media skills necessary for a career in higher education, research institutions, non-profits, government organizations, media, business, and industry. You may choose from health, environmental, international, intercultural and organizational communication as well as from journalism studies and media development to create an appropriate combination for your career goals.

For the doctoral program, students must complete 57 credit hours of course work beyond the master's degree; 24 credit hours must be in courses at the 600-level. No transfer credit hours may count toward these 24 credit hours, and 12 of the 57 credit hours must be dissertation credit hours. Doctoral students cannot take intersession courses. The case for exceptions should be made by department chair/adviser and student to the Graduate Admissions and Curriculum Committee.

Required Core Courses		
COM 601	Theories of Communication	3
COM 602	Methods of Communication Research	3
COM 603	Qualitative Research Methodologies	3
COM 604	Advanced Communication Research Methods and Statistics	3
COM 609	Special Topics in Communication ¹	3
COM 695	Directed Readings ¹	1-3
COM 698	Independent Research ¹	3
School of Communication Electives		9-12
Courses outside the School of Communication		12-15
Dissertation Credits		
COM 830	Doctoral Dissertation	1-12
Total Credit Hours		58-60

¹ Students must take a total of 9 credit hours in COM 609 and/or COM 695/COM 698 or any combination of the three. Students are allowed to take up to 6 credit hours of Directed Readings/Independent Research in total.

Qualifying Examinations

All School of Communication Ph.D. students will take written and oral qualifying examinations following the conclusion of all course work prior to being admitted to candidacy for the Ph.D. degree. A student who fails the exam is given one opportunity to retake it with the permission of the exam committee and must pass it within one calendar year of failing the first exam. To be admitted to candidacy, students must have successfully completed qualifying exams and received approval from the department chair, have a minimum GPA of 3.0, and have submitted all original transcripts and standardized test results. Any student who fails to be admitted to candidacy for the degree within this one-year period will be dismissed from the program. A qualifying exams committee consists of a minimum of four members including the chair. All members must hold a Ph.D. degree or its equivalent.

Dissertation

The dissertation committee may be the same as the student's qualifying exams committee. The guidelines for the composition of the dissertation committee are the same as those for the qualifying exams committee. Students must complete 12 dissertation credit hours. These credit hours begin after students have successfully completed their qualifying exams. Students are required to defend a dissertation proposal to the dissertation committee. Students may proceed with the dissertation once the proposal has been approved by the committee and accepted by the director of graduate studies. The dissertation must be an investigation of a substantial scholarly topic and must be defended orally in the presence of the dissertation committee. Students should note that they cannot

conduct human subjects research without approval from the University of Miami's Institutional Review Board.

J.D./M.A. in School of Communication

This program allows students to earn a J.D. and an M.A. in Communication in 3 to 3½ years. The three School of Communication programs participating in the joint J.D./M.A. program are Communication Studies, Public Relations, and Journalism. This joint degree program will allow 9 J.D. credit hours to be applied to the M.A. degree and 6 M.A. credit hours to be applied to the J.D. degree, saving the student 15 credit hours between the two programs.

In the J.D. program, students will complete 82 credit hours in the School of Law. Additionally, 6 credit hours from the School of Communication program will be applied to their Law School transcript, for a total of 88 required J.D. credit hours. In the M.A. program, students will complete 27 credit hours in the School of Communication. Additionally, 9 law school credit hours will be applied toward their master's degree, for a total of 36 required M.A. credit hours. As defined above, 15 credit hours will be counted toward both degrees: 6 credit hours from the School of Law and 9 credit hours from the School of Communication. During the first year of the joint program, students will be required to attend the J.D. program full-time. Students will be able to take courses in the School of Communication beginning in the fall of their 2L year. Students must complete all J.D. requirements and all M.A. requirements as defined by their programs. Participants in the joint J.D./M.A. program are not required to complete the M.A. capstone project. The thesis-track is not open to students in the J.D./M.A. joint program without specific approval of the School of Communication. Students may take summer law courses, which may reduce the length of the joint degree program by up to one semester. Students may not take more than 16 credit hours each semester, excluding summer sessions. 17 credit hours per semester may be taken with permission from the Associate Dean, Academic Affairs, School of Law.

Law School Requirements

9 Law School credit hours should come from the following courses:

- Administrative Law
- Communications law
- Constitutional Law II
- Copyright Law
- First amendment Law
- Intellectual Property Law
- Internet Law
- Mass Media Law

Additional law courses to be considered (depending on the student's particular area of interest) are: Antitrust, Art and the Law, Bankruptcy Law, BA, Civil Procedure, Commercial Law, Consumer Law, Corporate Finance, Criminal Law, Cultural Property & Heritage, Elder Law, Election Law, Employment Law, Environmental Law, EU Law, Evidence, Family Law, Financial Regulation, Florida Con Law, Florida Criminal Procedure, Immigration Law, International Finance, International Human Rights, International Law, Latin American Law, Law & Economics, Law & Medicine, Legal Research Techniques, Media & the Law, Mortgage Law, National Security Law, Press Freedoms in the Americas, Public Education

Law, Race and the Constitution, Securities Regulation, Sports Law, State & Local Government, Substantive Criminal Law, and Trademark Law.

The Law School will accept 6 credit hours from the following School of Communication courses: (the courses selected will depend on the specific program, e.g., Journalism, Public Relations or Communication Studies, though following consultation with, and approval by, a faculty advisor, substitutions may be allowed)

J.D./M.A. in Communication Studies

Communication Studies (M.A.)

The program has four tracks, each with 9 credits of required courses and 27 credits of elective courses but students in the joint program take 18 credits of electives and transfer 9 credit from the School of Law to make 27 credits. Communication Studies students must receive a "B" or higher in core courses (COM 601, COM 602, and COM 603), as well as maintain an overall minimum GPA of 3.0 for all courses. Core courses must be completed during the first year of study, or by completion of 18 credits.

Communication Studies Track - Non-Thesis

This program focuses on developing a theoretical foundation with emphasis on applied communication.

Required Communication Core Courses		
COM 601	Theories of Communication	3
COM 602	Methods of Communication Research	3

Journalism and Media Management

Journalism (M.A.)

Journalism is an intensive program of academic study and hands-on practice designed to develop competitive, high-level, cross-platform digital media skills appropriate for today's media landscape. Students take a common core of courses designed to provide a foundation in all aspects of contemporary journalism (e.g., writing, reporting, multimedia, data visualization, broadcasting, media law and ethics). In addition, students have the opportunity to focus their work in various areas of study, including broadcast journalism, news and feature writing and various aspects of multimedia journalism. Through a combination of journalism courses and related courses offered by other programs, students may also concentrate some of their work in particular areas of interest (e.g., sports reporting and, travel and features). The program begins in the fall semester and lasts for 18 months. No prior training or experience in journalism is required.

Masters

Masters Program in Journalism and Media Management

- M.A. in Journalism (p. 478)

M.A. in Journalism

The Journalism M.A. program is designed to prepare students for professional participation in a number of digital and multimedia news environments, including television, online, mobile, magazine, and newspaper. Coursework stresses journalistic values, critical thinking, and storytelling, combined with the digital and technical skills to create content in the context of today's dynamic and evolving media landscape. In consultation with faculty advisors, students are strongly encouraged to develop areas of special interest, and are required to complete an individually produced, in-depth Qualifying Project.

Journalism M.A. students must complete a minimum of 36 credit hours at the graduate level with the approval of the Chair of the Department of Journalism and Media Management or Director of the Graduate Program in Journalism. Of the 36 credit hours, all must be at or above the 600 level. Students with strong prior experience in a particular area may request a written waiver of a required course from the department chair, upon the demonstration of sufficient expertise in that subject.

Required Communication and Journalism Core Courses		
COM 605	Theories and Methods for Mass Communication Research	3
JMM 606	Multimedia Design	3
JMM 614	Media Law and Ethics Seminar	3
JMM 622	Infographics And Data Visualization	3
JMM 628	Seminar in Visual Storytelling	3
JMM 637	The Business Of Modern Journalism	3
Electives		15
Electives are chosen with the approval of a faculty advisor. These courses may come from either within or outside the School of Communication. It is highly recommended that students consider pursuing a professional internship for one of these electives.		
Select five of the following:		
JMM 609	Internship In Journalism And Media Management	
JMM 610	Comparative Media Systems	
JMM 611	Newswriting and Reporting Seminar	
JMM 613	Computer-Assisted Reporting	
JMM 617	Television News Reporting

JMM 699	Advanced Projects and Directed Research	
JMM 725	Journalism Internship	
CIM 645	Managing Interactive Media Projects	

Final Qualifying Project

Students, in consultation with a faculty committee of their choosing, will complete a final reporting project that reflects in-depth knowledge and analysis of a subject and professional competence in reporting and presenting it for the appropriate medium.

JMM 715	Multimedia Project	1-6
Total Credit Hours		36

Strategic Communication

Public Relations (M.A.)

The program offers two tracks. The 30-credit thesis track program provides an opportunity to supplement a working foundation and knowledge with pertinent theory and research methodologies. A second 36-credit, coursework-only non-thesis track program builds from a foundation of public relations and communication courses.

Masters

Masters Programs in Strategic Communication

- M.A. in Public Relations (p. 478)

M.A. in Public Relations

Thesis Track

This program includes a thesis. Students must complete a minimum of 30 credit hours at the graduate level with the approval of a faculty advisor. Of the 30 credit hours, 15 credit hours must be at or above the 600 level. No more than 6 credit hours will be allowed for advanced projects and directed research (699). 6 credit hours will be earned for thesis work. Public Relations students must receive a "B" or higher in core courses (COM 601, STC 620, STC 621, COM 602 OR COM 603).

- Teaching and Learning (TAL)

Degree Programs

Doctor of Philosophy in Education (Ph.D.)

The Doctor of Philosophy degree with a major in education is designed to develop personnel competent to conduct research in a particular field of education or behavioral sciences. Concentrations are offered in:

- Exercise physiology (KIN)
- Community well-being (EPS)
- Counseling psychology (EPS)
- Language and literacy learning in multilingual settings (TAL)
- Science, technology, engineering and mathematics (TAL)
- Special education (TAL)
- Research, measurement, and evaluation (EPS)

Doctor of Education (Ed.D.)

The Doctor of Education degree is designed to develop personnel in education competent to utilize the results of research in practical situations. The Ed.D. program offers a concentration in higher education leadership (EPS).

Specialist in Education (Ed.S.)

The Specialist in Education degree is an advanced terminal, practice-oriented degree that is designed to prepare recipients to assume positions of leadership within educational and affiliated settings. Concentrations are offered in:

- Advanced professional studies (TAL)
- Early childhood/special education (TAL)
- Reading education (TAL)
- STEM education (TAL)

Master of Science in Education (M.S.Ed.)

The Master of Science in Education degree is a practice-oriented degree that is designed to prepare its recipients to assume professional positions that require advanced course work and post-graduate degrees. Concentrations are offered in:

- Advanced professional studies (TAL)
- Community and social changes (EPS)
- Counseling: Marriage and family therapy (EPS)
- Counseling: Mental health (EPS)
- Early childhood, special education (TAL)
- Education and social change (TAL)
- Exercise physiology: Clinical and applied exercise physiology (KIN)
- Exercise physiology: Nutrition for health and human performance (KIN)

- Exercise physiology: Strength and conditioning/Fitness entrepreneurship (KIN)
- Higher education: Enrollment management (EPS)
- Higher education: Institutional research and policy analysis (EPS)
- Higher education: Student life and development (EPS)
- Reading (TAL)
- Research, measurement and evaluation (EPS)
- Sport administration (KIN)
- Sports medicine (KIN)
- STEM education (TAL)

NOTE: The School of Education and Human Development's graduate programs are governed by the rules, regulations and policies of the larger University and Graduate School. In places where what appears in the following is judged to be in conflict with these other policies, the University and/or Graduate School's policies will take precedence.

Application Requirements

Admission to all graduate-degree concentrations in the School of Education and Human Development is based on the recommendation of the faculty. Admissions decisions are based on faculty review of the following general requirements that apply to **all** Graduate Programs in the School as well as specific documents listed under each concentration. Applicants must:

- achieve acceptable scores on the Graduate Record Exam (GRE) taken within the past five years. International applicants whose native language is not English or applicants whose degrees are from a non-U.S. University must pass the Test of English as a Foreign Language (TOEFL) and the GRE;
- provide official transcripts showing completion of a bachelor's degree from an accredited institution and an acceptable undergraduate grade point average. A minimum of 3.0 undergraduate GPA is required. Official transcripts from every institution attended by an applicant, whether or not the applicant completed a degree program at the institution, are required;
- provide three letters of recommendation that address the issues and meet the criteria established by the program being applied to;
- provide a personal statement that addresses the mission and purpose of the program being applied to;
- take part in an admissions interview (required by some programs); and
- exhibit personal and professional experiences and characteristics that are relevant to the profession and/or field and/or degree program for which the application is being submitted.

Doctor of Philosophy (Ph.D.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the Ph.D program will include the following:

- letters of recommendation should address the applicant's *academic* potential;
- available student space in program;
- For TAL: availability of faculty advisor willing to mentor the student.

- For EPS: Counseling: receipt of completed applications by predetermined cut-off date. Please reference the SEHD web site, as doctoral applications are reviewed once each year.

Doctor of Education (Ed.D.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the Ed.D. program will include the following:

- letters of recommendation should address the applicant's academic potential;
- available student space in program; and
- admissions interview.

Specialist in Education (Ed.S.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the Ed.D. program will include the following:

- completion of a master's degree with an outstanding record from an accredited institution;
- adequacy of previous study in the field for which the Ed.S. is being requested;
- an appropriate period of successful teaching experience (TAL only);
- acceptable scores on the Graduate Record Examination (GRE); or in the case of TAL only, approval of a GRE waiver. Applicants who seek a GRE waiver must have taught for a minimum of three years in a full-time capacity, fill out and submit a GRE waiver form, and submit a 3-page essay on an important educational.

Master of Science in Education (M.S.Ed.)

In addition to the factors listed as general requirements for all applications to the SEHD's graduate programs, consideration for admission to the M.S.Ed. program will include the following:

- For some M.S.Ed. programs in TAL: Teachers with **at least** three years full-time teaching experience may apply for a GRE waiver for programs in the Department of Teaching and Learning. An application for waiver of the GRE requirement may be found on the SEHD web site. Teachers who apply for a GRE waiver must submit a 3-page essay on an important topic in education.
- For Community and Social Change (EPS): Professionals who have worked full-time for at least three years in a not-for-profit setting may apply for a waiver of the GRE requirement. Please contact the program directly for conditions governing this waiver.

International Applications

All international applications must provide additional information and meet additional requirements as required by the UM Graduate School and the UM Office of International Admissions. For an appropriate link to these requirements, please visit the Graduate School (p. 360) web site.

Admission Decision

Once an applicant has been admitted to graduate study, that individual should meet with the faculty advisor who was appointed to serve in that capacity and whose name appears in the admissions letter. This advisor will help the student enroll in courses that are appropriate to the program; to develop and to refine a Program of Study or Course Sequence Plan

that must be on file in the Senior Associate Dean's Office by the end of the first semester of study.

Honor Code

The School of Education and Human Development follows the Graduate School's Honor Code. All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

Continuous Enrollment

The School of Education and Human Development adheres to the Graduate School's continuous enrollment requirement.

Financial Assistance

In addition to University-wide fellowships and the availability of student loans, the School of Education and Human Development provides many forms of financial assistance for students enrolled in its graduate programs. These include tuition-based scholarships (including federally funded scholarships), teacher-tuition scholarships, training fellowships, graduate student assistantships, and other forms of help.

Notwithstanding a student's time to completion, the SEHD limits a student's eligibility for scholarships and other financial assistance that is under its control to five years from the time of initial enrollment.

Scholarship-based financial assistance is to be used only for courses that define each student's program of study. Students who enroll in courses outside of their programs of study will be charged full tuition for those courses.

Teacher Tuition Scholarships do not apply to doctoral (Ph.D. and Ed.D.) programs.

Tuition scholarship assistance may not be applied to the retaking of courses for any reason whatsoever.

Financial assistance whose sources of funding are outside of the School of Education and Human Development, for example Federal loans provided by the University of Miami, shall be governed by all applicable rules, regulations and policies. Specifically, many federal loans and grants have conditions limiting the programs and/or courses to which they may be applied. Some federal loans are restricted to graduate courses only; some fellowships, grants or traineeships may entail post-graduation employment commitments. Alternatively, private scholarships or fellowships may have their own conditions. Before accepting any form of financial assistance, please be sure to ask about and to fully understand the conditions that govern whatever type of financial assistance you are offered.

Degree Requirements

In addition to the formal academic requirements (as outlined below), the School of Education and Human Development requires its students to demonstrate personal qualities that, in the judgment of the faculty, would permit them to function effectively in their professional roles. The School of Education and Human Development reserves the right to dismiss any students who are academically or personally unwilling or unable to carry out the professional responsibilities of the respective profession for which they are being trained. Conduct which may be considered unprofessional may include, but is not limited to, research or professional

misconduct; dishonesty, cheating, plagiarism; exercise of professionally poor judgment; sexual harassment, discrimination on the basis of race, ethnicity, religion, or sexual orientation; and inappropriate interpersonal behavior. It is up to all students to fulfill their responsibilities in a timely and professional manner, to represent themselves and the University with honesty, and to treat others with dignity and respect.

Doctor of Philosophy (Ph.D.)

Upon admission to graduate study, a supervisory committee, consisting of at least four members (composed as per UM Graduate School regulations), will be appointed by the School of Education and Human Development.

The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.

The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Senior Associate Dean of Graduate Studies in the School of Education and Human Development.

The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

The residence requirement is two full-time consecutive semesters of course work at the University of Miami.

The minimum total credit hours required beyond the Bachelor's are 60, plus a minimum of 12 dissertation-research credit hours.

15 credit hours of statistics and research methods are required as prescribed by the supervisory committee.

A student must pass a Qualifying exam before being admitted to candidacy for a doctorate. The content and conditions for administering the Qualifying examination are defined by the program area in which a student is enrolled.

A student's score on the Qualifying examination is the professional judgment of the committee that was appointed to score that examination. As such, no academic appeals of scores on qualifying examination are possible.

If a student fails an initial attempt at passing a program's Qualifying examination, the student's advisory committee may allow a student a second opportunity to pass a new qualifying examination that is administered within a year of the original, *at its sole discretion*.

A student who fails a program's qualifying examination may not proceed any farther in the program and is, instead, dismissed at the end of then-current term. Beyond the then-current term in which a student's qualifying examination is scored, no additional financial assistance will be provided to a student who is scheduled to be dismissed from the program for failure in the qualifying examination.

Students are required to complete all Ph.D. requirements within 8 years of initial enrollment.

Doctor of Education (Ed.D.)

Upon admission to graduate study, a supervisory committee, consisting of at least four members (composed as per UM Graduate School regulations), will be appointed by the School of Education and Human Development.

The student will meet with the chairperson of this committee to design a Program of Study/Residency Plan.

The Program of Study/Residency Plan must be approved by the supervisory committee, the department chairperson, and the Senior Associate Dean of Academic Studies in the School of Education and Human Development.

The Program of Study/Residency Plan must be filed with both the Graduate School and the School of Education and Human Development by the end of the second semester of enrollment or future registration will not be permitted.

All students are required to submit a signed Student Responsibility Checklist and the Graduate Student Honor Code by the end of their first semester of enrollment.

The minimum total credit hours required beyond the bachelors are 60, including a minimum of 12 dissertation credit hours.

A supporting area consisting of at least 12 credit hours is required; the student must be qualified for admission to graduate status in this area, and receive approval for enrollment from the appropriate department and from the School of Education and Human Development.

A minimum of 12 credit hours of statistics and research methods are required as prescribed by the supervisory committee.

Students are required to complete all Ed.D. requirements within 8 years of initial enrollment.

Specialist in Education (Ed.S.)

The Specialist in Education is a terminal degree that is independent of both doctoral degrees (Ph.D. and Ed.D.) that are offered by the SEHD. Although there is normally some overlap in coursework, admission to a specialist program does not imply that the student has been or will be admitted to a doctoral program.

A supervisory committee consisting of three faculty members in the student's area of study will be appointed by the School of Education and Human Development.

Upon admission to the specialist program, a formal program of study is approved by the Supervisory Committee.

A minimum of 60 graduate credit hours, (or 30 credit hours after completion of the Master's program) is required. The program must include at least 30 graduate credit hours earned at the University of Miami and at least 18 graduate credit hours earned following admission to the specialist program. The specialist program of study is developed in consultation with the Supervisory Committee that consists of 3 faculty members (a chairperson and 2 other members).

Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen, a maximum of 6 credit hours may be counted toward the total degree requirements, and an oral examination in defense of the thesis will be required. The written comprehensive examination will cover the student's program of study. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the Chairperson of the Specialist Supervisory Committee.

All specialist students must engage in teaching and/or research appropriate to their degree program.

All work for the degree of Specialist in Education must be completed within six years of initial enrollment.

Master of Science in Education (M.S.Ed.)

A minimum of 30 graduate credit hours is required.

TAL: Students enrolled in any certification program that has been approved by Florida Department of Education (e.g., the Professional Training Option) must fulfill any and all additional requirements (e.g., passing state teacher tests) that are specified by the program approval.

EPS: Students enrolled in any counseling program must complete the required "Personal Growth Experience" form.

Students must pass a comprehensive written examination, portfolio (with an oral examination as a possible additional requirement), capstone course, project, thesis, or requirement specified by the program. When a thesis is chosen (in the KIN Dept. or EPS Dept.), a maximum of 6 credit hours may be counted toward the total degree requirements, and an oral examination in defense of the thesis will be required. The written comprehensive examination will cover the student's program of study. The examination must be taken during or after the final semester in which the student is enrolled for coursework in the program. The project will be directed by the student's advisor.

All work towards the Master's degree must be completed within six years of initial enrollment.

Educational and Psychological Studies

Certificate in Latino Mental Health Counseling

This Certificate requires previous graduate training. It can be acquired after graduation from the Masters Program in Counseling or can be integrated into the Doctoral Program in Counseling Psychology. It can be completed in addition to or after completion of a degree program in counseling, psychology or a related field.

Core Courses		
EPS 687	Latino Youth And Families	3
EPS 688	Spanish For Mental Health Professionals	3
EPS 689	Psychological Interventions with Hispanic/Latino Populations	3
Total Credit Hours		9

Ed.D. in Higher Education Leadership

The Higher Education Leadership program, which offers a Doctor of Education degree (Ed.D.), is committed to preparing high-quality graduates for senior leadership positions in colleges and universities, state and federal agencies, and other educational organizations. The Ed.D. program is guided by a practitioner-scholar model that combines theoretical offerings with application to practical higher education problems. Students focus on areas of special interest and choose dissertation projects that address issues confronting the contemporary higher education workplace.

The Executive Track is an innovative option in the Ed.D. program explicitly designed to meet the needs of working professionals. Courses are offered on weekends, and a cohort design allows students to develop meaningful relationships, support one another, and learn from the diverse experiences of fellow educators. Ed.D. students may also choose to take courses in a traditional weekly format.

An emphasis across the traditional and Executive Ed.D. curriculum is on how theory and empirical evidence inform the administrative, organizational, and policy contexts within postsecondary education. Unique to the University of Miami's Higher Education Leadership program curriculum is its component in Enrollment Management, a comprehensive strategy that promotes the seamless integration of administrative responsibilities to efficiently and effectively meet institutional needs and promote student success.

Higher Education Foundations

M.S.Ed. in Community and Social Change

The Community and Social Change Master's program is designed to prepare a new generation of creative leaders for the not-for-profit sector who are knowledgeable in the research, theories, and practice of individual and social well-being. The vision of the program is to be a hub for innovative and applied leadership in community well-being and social change. The mission of the program is to prepare globally aware leaders, researchers, and agents of change who create, inspire, and engage community organizations to foster well-being in diverse community settings. The program is designed to develop community leaders who can help understand and address the real challenges faced by local communities in a multi-cultural and global context. The program is designed to accommodate a variety of students by offering courses in a unique format that incorporates the following domains;

1. Core theory and skill-building coursework,
2. Core research coursework,
3. Experiential field experience (practicum), and
4. Capstone experience (Independent project, portfolio, or masters thesis).

Core Courses		
EPS 622	Community Well-being and Change: Theory and Practice	3
EPS 623	Development & Change in Community Organizations: Theory & Practice	3
EPS 624	Essentials of Research in Social and Behavioral Sciences	3
EPS 625	Program Evaluation	3
EPS 628	Managing Community Organizations	3
EPS 648	Multicultural Communities in a Globalized Society	3
Practicum Field Experience		
EPS 629	Seminar in Community & Social Change	3
Electives/Cognate		
Select 9 credit hours of electives ¹		
Total Credit Hours		30

¹ NOTE: If electives are not specified (to be determined) when form is submitted to the Senior Associate Dean's Office, then you should complete a Course Substitution form when you register for the approved electives.

M.S.Ed. in Counseling - Marriage and Family Therapy Concentration

Programs offered in counseling and counseling psychology are characterized by intensive clinical supervision by faculty members in an on-campus clinic, by strengths in the areas of family systems and health psychology, and by the rich multi-ethnic composition of the community, students and clients.

Marriage and Family Therapy

This variable 60 credit hour program provides the academic and pre-degree supervision requirements for licensing as a Marriage and Family Therapist in the State of Florida.

Core Courses		
EPS 667	Professional, Legal and Ethical Issues in Counseling	3
EPS 668	Psychosocial Bases of Social and Cultural Diversity	3
EPS 669	Psychopathology for Counselors	3
EPS 676	Counseling Process and Practice	3

M.S.Ed. in Higher Education Administration - Enrollment Management Concentration

The Higher Education Administration Program, which offers a Master of Science in Education with concentrations in Enrollment Management, Student Life and Development, or Institutional Research and Policy Analysis, is designed to produce skilled and versatile higher education administrators who understand all aspects of their professional environment.

Our graduates enter a variety of roles in college and university administration with the ability to consider today's challenges from a broad-based, highly informed perspective.

Also offered is a Certificate Program for working professionals who already have Master's degrees and seek career-furthering credentials and skills.

Enrollment Management Concentration

The Enrollment Management concentration (33 credit hours), the product of a unique collaboration between the School of Education and Human Development and the Division of Enrollments, integrates theory, research, teamwork, and effective communication. It is an interdisciplinary program, with courses also required in the School of Business Administration. Opportunities abound for integrating research and theory in daily practice.

Core Courses		
EPS 748	Enrollment Management: Theory and Practice	3
EPS 749	Advanced Seminar in Enrollment Management	3
EPS 751	Seminar in Higher Education Administration: Contemporary Issues	3
Higher Education Foundations		
EPS 737	Organization and Administration of Higher Education I	3
EPS 742	Higher Education in the United States: From Harvard to Present	3

² EPS700 is required.

M.S.Ed. in Higher Education Administration - Institutional Research and Policy Analysis

The Higher Education Administration Program, which offers a Master of Science in Education with concentrations in Enrollment Management, Student Life and Development, or Institutional Research and Policy Analysis, is designed to produce skilled and versatile higher education administrators who understand all aspects of their professional environment.

Our graduates enter a variety of roles in college and university administration with the ability to consider today's challenges from a broad-based, highly informed perspective.

Also offered is a Certificate Program for working professionals who already have Master's degrees and seek career-furthering credentials and skills.

The Institutional Research and Policy Analysis concentration (33 credits) focuses on skills necessary to conduct applied research related to the effective functioning of postsecondary institutions. Areas of study extend beyond integrating research into effective administrative or policy initiatives to include understanding state and federal policies, higher education foundations, statistics, and data analytics.

Core Courses in Higher Education

M.S.Ed. in Research, Measurement and Evaluation

The curriculum of the M.S. Ed. in RME is structured around three components: (A) a core set of 24 credits (8 courses of 3 credits each) of required coursework covering the fundamentals of research design, measurement, and statistical analysis; (B) 6 credits of elective coursework; and (C) a comprehensive exam occurring upon the completion of the 24 credits of required coursework. The specific details of the curriculum are given below.

Core Courses		24
EPS 700	Introductory Statistics	3
EPS 701	Introduction to Research Methods	3
EPS 702	General Linear Models	3
EPS 703	Applied Multivariate Statistics	3
EPS 704	Computer Applications in Educational and Behavioral Science Research	3
EPS 705	Measurement and Psychometric Theory	3
EPS 706	CATEGORICAL DATA ANALYSIS	3
EPS 708	An Introduction to Structural Equation Modeling for Multivariable Data	3
Electives ^{1,2}		6
Select two courses from the following for a total of 6 credit hours:		6
EPS 699	Advanced Individual Study	1-6
EPS 707	Item Response Theory	3
EPS 709	Introduction to Multilevel Modeling	3
EPS 710	Meta-analytic methods for research synthesis.	3
EPS 711	Advanced Topics In Research, Measurement, And Evaluation	3
EPS 712	Field Experience in Educational Research	2-6
EPS 714	Qualitative Methods I	3
EPS 715	Qualitative Methods II: Case Studies and Grounded Theory	3
EPS 716	Qualitative Methods II: Interviews and Content Analysis	3
Comprehensive Exam		

Each student must successfully pass a comprehensive exam that covers the content of the core 24 credits. This exam assesses the student’s competency in these core areas of research methodology and use of statistical software, and is based on content that is aligned with the material covered in the core 24 credits.

- ¹ Students work with faculty member(s) to select from a large number of graduate courses relevant to the students’ interests and professional goals. Appropriate courses may be related to advanced statistical modeling or other content areas.
- ² Upon the approval of your academic advisor, you can take the classes from other departments.

Ph.D. in Community Well-Being

The program in Community Well-Being trains community-engaged action-researchers committed to promoting social justice through rigorous theoretical analysis and community-based research. The program is grounded in the discipline of community psychology, and focuses on community-engaged scholarship that involves the researcher in a mutually beneficial partnership with the community. The program prepares scholars for careers in academia, research, and public policy.

Prerequisite		
EPS 622	Community Well-being and Change: Theory and Practice	3
EPS 623	Development & Change in Community Organizations: Theory & Practice	3
EPS 624	Essentials of Research in Social and Behavioral Sciences	3

Ph.D. in Counseling Psychology

The Counseling Psychology Program has been fully accredited by The American Psychological Association since 1989 and has a proud tradition of preparing students as scholars, clinicians and community leaders. Firmly committed to the foundational values of the discipline of counseling psychology, including its emphasis on prevention, optimal human development and the promotion of individual, family and community well-being, the program strives to prepare students who will make a difference in the world through research, scholarship and reflective practice. The mission of the program is to nurture the development of counseling psychology graduate students and faculty as reflective researchers and scientist-practitioners committed to promoting psychological well-being in a multicultural complex world.

Prerequisite Counseling Courses		
EPS 667	Professional, Legal and Ethical Issues in Counseling	3
EPS 674	Lifestyle and Career Counseling	3
EPS 675	Therapeutic Group Procedures	3

Ph.D. in Research, Measurement, and Evaluation

The curriculum of the Ph.D. in RME is structured around six components: (A) a core set of 36 credits (12 courses of 3 credits each) of required coursework covering the fundamentals of research design, measurement, and statistical analysis; (B) 6 credits of a research apprenticeship, in which students conduct mentored research under the supervision of RME faculty members; (C) 6 credits of field experience in educational research, in which students play active roles in the design and analysis of an applied research or evaluation projects; (D) the doctoral qualifying exam; (E) 12 credits of the doctoral dissertation and (F) 6 credits of electives (12 credits of electives for students who do not hold a master degree);

Specific details of the curriculum are below.

Core Courses		36
EPS 700	Introductory Statistics	3
EPS 701	Introduction to Research Methods	3
EPS 702	General Linear Models	3
EPS 703	Applied Multivariate Statistics	3
EPS 704	Computer Applications in Educational and Behavioral Science Research	3
EPS 705	Measurement and Psychometric Theory	3
EPS 706	CATEGORICAL DATA ANALYSIS	3
EPS 707	Item Response Theory	3
EPS 708	An Introduction to Structural Equation Modeling for Multivariable Data	3
EPS 709	Introduction to Multilevel Modeling	3
EPS 710	Meta-analytic methods for research synthesis.	3
EPS 711	Advanced Topics In Research, Measurement, And Evaluation	3
Research Apprenticeship		6
EPS 799	Advanced Individual Study ²	1-3
For a minimum of 6 research apprenticeship credits, students work under the mentorship of RME faculty members (or approved faculty members outside of RME) on original studies pertinent to research, measurement, and evaluation. It is expected that the work completed during the apprenticeship culminates in a manuscript that is suitable for publication in an academic journal. The 6 credits of apprenticeship are documented as two 3-credit blocks of EPS799 (Advanced Individual Study, Form for registering for EPS799 can be found in http://www.education.miami.edu/studentintranet/pdfs/grad-gen/appis.pdf); and the research apprenticeship must be completed prior to the commencement of dissertation hours (EPS830).		
Field Experience in Educational Research		6
EPS 712	Field Experience in Educational Research ²	2-6

Students must complete a minimum of 6 credits in field experience related to educational research. The field experience involves providing methodological assistance to a research or evaluation project at the University of Miami or other approved organization (e.g., the evaluation division of Miami-Dade County Public Schools). The nature of the field experience must be approved by the student's advisor prior to commencing the credit hours. The field experience credits are currently documented as EPS712.

Doctoral Qualifying Exam

Students must successfully pass the doctoral qualifying exam prior to the commencement of the doctoral dissertation.

Dissertation Hours		12
EPS 830	Pre-Candidacy Dissertation Research	1-12
EPS 840	Post-Candidacy Dissertation Research	1-12
Electives ^{1 2 3 4}		6
Any combination of the courses below* may be taken for a minimum of 6 credit hours.		
EPS 712	Field Experience in Educational Research	2-6
EPS 714	Qualitative Methods I	3
EPS 715	Qualitative Methods II: Case Studies and Grounded Theory	3
EPS 716	Qualitative Methods II: Interviews and Content Analysis	3
EPS 799	Advanced Individual Study	1-3

- ¹ 6 credits for students with a Master degree; 12 credits for students without a Master degree
- ² EPS 799 (Advanced Individual Study) and EPS 712 (Field Experience in Educational Research) can be repeated over and above the credits fulfilling a student's apprenticeship (6 credits) and field experience (6 credits) requirements.
- ³ Upon the approval of your academic advisor, you can take the classes from other departments.
- ⁴ Additional courses may be substituted upon approval from a student's academic advisor. These options include a variety of graduate courses in the fields of computer science, psychology, education, and other areas of interest.

Kinesiology and Sport Sciences

Dept. Code: KIN

Programs

Doctor of Philosophy (Ph.D.)

- Exercise Physiology (p. 494)

Master of Science in Education (M.S.Ed.)

- Exercise Physiology (NOTE: accelerated tracks are offered in each of the following, pursuant to a BS degree in Exercise Physiology or Athletic Training from the University of Miami.)
 - Clinical and Applied Exercise Physiology (p. 491)
 - Nutrition for Health and Human Performance (p. 492)
 - Strength and Conditioning/Fitness Entrepreneurship (p. 492)

- Sport Administration (p. 493)
- Sports Medicine with a Concentration in Athletic Training (Note: an accelerated track is offered pursuant to a BS degree in Athletic Training from the University of Miami) (p. 493)

Certificate in Kinesiology and Sport Sciences (Non-Degree, Graduate Program)

- Women's Health (p. 491)

Masters

Masters Programs in Kinesiology and Sport Sciences

- M.S.Ed. in Exercise Physiology (p. 491)
- M.S.Ed. in Exercise Physiology - Strength and Conditioning/Fitness Entrepreneurship Track (p. 492)
- M.S.Ed. in Nutrition for Health and Human Performance (p. 492)
- M.S.Ed. in Sports Medicine - Athletic Training Concentration (p. 493)
- M.S.Ed. in Sport Administration (p. 493)

Doctoral

Doctoral Programs in Kinesiology and Sport Sciences

- Ph.D. in Exercise Physiology (p. 494)

Certificates

Certificate in Kinesiology and Sport Sciences

- Women's Health (p. 491)

Certificate in Women's Health

A certificate in women's health (12 credit hours) is available for those wishing to specialize in research issues, trends, and physiological concerns of women across the female lifespan. Students must earn a grade of "C" or higher in this specialty. Students will receive a certificate of completion upon completing all coursework in this specialty area. These courses may be considered as part of a student's outside supporting field in the doctoral program.

KIN 781	Issues Specific to Women's Health	3
KIN 782	Psychosocial Issues in Women's Health	3
KIN 783	Sports Medicine for the Female Athlete	3
KIN 784	Advance Neurological Mechanisms of Metabolism and Weight Regulation	3
Total Credit Hours		12

M.S.Ed. in Exercise Physiology

Graduate students in this program receive a sound scientific education with opportunities for applied physiological research and hands-on clinical experiences.

Clinical and Applied Exercise Physiology

36 credit hours are to be taken from among the following courses:

Required Core in the Major		
KIN 621	Advanced Systemic Exercise Physiology	3
KIN 630	Cellular Exercise Physiology	3
KIN 631	Laboratory Techniques in Functional Evaluation of Skeletal Muscle, Laboratory Experiences in Systemic Exercise Physiology	3
KIN 679	Principles of Exercise Assessment: Cardiovascular	3
KIN 686	Exercise Prescription/Assessment Laboratory	3
KIN 735	Methods in Biomechanical Analysis	3
KIN 740	Neurophysiology in Exercise Science	3
Restricted Electives		
Select 6 credit hours of graduate KIN courses. ¹		
6		
Research Competencies		
9 credit hours		
KIN 746	Research Methods in Kinesiology and Sport Sciences	3
EPS 700	Introductory Statistics	3
	or EPS 702 General Linear Modeling	
KIN 799	Special Project	3
	or KINXXX: Graduate Elective and Comprehensive Exam ²	

¹ For further information, please contact the Graduate Program Director.

² **NOTE:** Those students taking the comprehensive exam must enroll in another KIN elective course to complete their master's degree requirements in exercise physiology.

Accelerated Track

30 credit hours are to be taken from among the following courses:

Required Core in the Major		
KIN 621	Advanced Systemic Exercise Physiology	3
KIN 630	Cellular Exercise Physiology	3
KIN 631	Laboratory Techniques in Functional Evaluation of Skeletal Muscle, Laboratory Experiences in Systemic Exercise Physiology	3
KIN 679	Principles of Exercise Assessment: Cardiovascular	3
KIN 686	Exercise Prescription/Assessment Laboratory	3
KIN 740	Neurophysiology in Exercise Science	3
Restricted Electives		
Select 6 credit hours of graduate KIN courses. ¹		
6		
Research Competencies (9 credit hours)		
KIN 746	Research Methods in Kinesiology and Sport Sciences	3
EPS 700	Introductory Statistics	3
	or EPS 702 General Linear Modeling	
EPS 799	Advanced Individual Study	1-3
	or KINXXX: Elective and Comprehensive Exam ²	

¹ For further information, please contact the Graduate Program Director.

² **NOTE:** Those students taking the comprehensive exam must enroll in another KIN elective course to complete their master's degree requirements in exercise physiology.

M.S.Ed. in Exercise Physiology - Strength and Conditioning/Fitness Entrepreneurship Track

This program is for persons interested in advanced skill in exercise programming and instruction, the fitness entrepreneur, and those looking for administrative positions in the fitness industry.

Regular Track

Select 36 credit hours from the following courses:

KIN 621	Advanced Systemic Exercise Physiology	3
KIN 630	Cellular Exercise Physiology	3
KIN 636	Strength and Conditioning I	3
KIN 637	Strength and Conditioning II	3
KIN 645	Special Sport Populations	3
KIN 646	Elite Conditioning I	3
KIN 647	Elite Conditioning II	3
KIN 661	Facility Management	3
KIN 662	Fitness Facility Management II	3
KIN 669	The Foundations of Exercise Prescription	3
KIN 670	Advanced Programming	3
KIN 677	Advanced Nutrition for Health and Fitness	3
KIN 679	Principles of Exercise Assessment: Cardiovascular	3
KIN 680	Principles of exercise Prescription: Neuromuscular	3
KIN 686	Exercise Prescription/Assessment Laboratory	3
KIN 699	Advanced Programming for Endurance Athletes	3
KIN 746	Research Methods in Kinesiology and Sport Sciences	3
KIN 795	Graduate/Clinical Field Experience in Kinesiology and Sport Sciences	3

Accelerated Track

Select 30 credit hours from the following courses:

KIN 621	Advanced Systemic Exercise Physiology	3
KIN 630	Cellular Exercise Physiology	3
KIN 636	Strength and Conditioning I	3
KIN 637	Strength and Conditioning II	3
KIN 645	Special Sport Populations	3
KIN 646	Elite Conditioning I	3
KIN 647	Elite Conditioning II	3
KIN 661	Facility Management	3
KIN 662	Fitness Facility Management II	3
KIN 669	The Foundations of Exercise Prescription	3
KIN 670	Advanced Programming	3

KIN 677	Advanced Nutrition for Health and Fitness	3
KIN 679	Principles of Exercise Assessment: Cardiovascular	3
KIN 680	Principles of exercise Prescription: Neuromuscular	3
KIN 686	Exercise Prescription/Assessment Laboratory	3
KIN 699	Advanced Programming for Endurance Athletes	3
KIN 746	Research Methods in Kinesiology and Sport Sciences	3
KIN 795	Graduate/Clinical Field Experience in Kinesiology and Sport Sciences	3

M.S.Ed. in Nutrition for Health and Human Performance

This program was designed to develop an interface between Exercise Physiology and Nutrition Science.

Regular Track

KIN 638	Nutrition during the Lifecycle	3
KIN 679	Principles of Exercise Assessment: Cardiovascular	3
KIN 677	Advanced Nutrition for Health and Fitness	3
KIN 669	The Foundations of Exercise Prescription	3
KIN 623	Food Science and Management Principles	3
KIN 634	Integrative & Functional Nutrition	3
KIN 639	Dietary Supplements And Human Performance	3
KIN 645	Special Sport Populations	3
KIN 650	Nutrition Biochemistry	3
KIN 655	Medical Nutrition Therapy	3
KIN 698	Professional Training & Counseling For Integrative Health	3
KIN 784	Advance Neurological Mechanisms of Metabolism and Weight Regulation	3
Total Credit Hours		36

To be eligible to sit for the Florida Licensed Dietitian/Nutritionist (LD/N) students must take an additional 900 hours of KIN727 (Practicum in Nutrition) or outside alternative.

Accelerated Track

KIN 638	Nutrition during the Lifecycle	3
KIN 679	Principles of Exercise Assessment: Cardiovascular	3
KIN 623	Food Science and Management Principles	3
KIN 634	Integrative & Functional Nutrition	3
KIN 639	Dietary Supplements And Human Performance	3
KIN 645	Special Sport Populations	3
KIN 650	Nutrition Biochemistry	3
KIN 655	Medical Nutrition Therapy	3
KIN 698	Professional Training & Counseling For Integrative Health	3

KIN 784	Advance Neurological Mechanisms of Metabolism and Weight Regulation	3
Total Credit Hours		30

To be eligible to sit for the Florida Licensed Dietitian/Nutritionist (LD/N) students must take an additional 900 hours of KIN727 (Practicum in Nutrition) or outside alternative.

M.S.Ed. in Sport Administration

A program for persons interested in athletic sport administration or recreation and leisure sports administration.

Students are required to complete a total of 30 credit hours: 24 required & 6 Electives¹.

Courses include:

KIN 601	Orgnaization and Administration of Sports Programs	3
KIN 602	Fiscal Management in Sport Administration FISCAL MGT SPTS AD	3
KIN 603	Principles of Sport Marketing	3
KIN 604	Essential Leadership in Sport and the Professions	3
KIN 605	Sport Sponsorship and Promotion	3
KIN 606	Ethical Decision Making in Sports and the Professions	3
KIN 607	Legal Aspects of Sports and Exercise Science	3
KIN 608	GLOBALIZATION OF SPORT	3
KIN 609	ADVANCED SPORT INFORMATION MANAGEMENT	3
KIN 610	Facilities and Event Management	3
KIN 611	Field Experience in Sport Administration I	1-9
KIN 612	Field Experience In Sport Administration II	1-3
KIN 613	Field Experience in Sport Administration III	1-3
KIN 615	Practical Approach to Motivation and Ethical Decision Making	1-3
KIN 616	Advanced Sport Governance	3
KIN 617	Creative Approaches to Problem Solving and Conflict Management	3
KIN 620	Contemporary Issues in Kinesiology and Sport Sciences	3
KIN 667	Elements of Sports Psychology	3
KIN 690	Strength And Conditioning Independent Study/ Project, Special Topics in Kinesiology and Sport Sciences	1-3
KIN 746	Research Methods in Kinesiology and Sport Sciences	3
KIN 799	Special Project	1
KIN 810	Master's Thesis	1-6
Restricted Electives		
KINXXX - See advisor for a list of restricted electives.		

¹ See Graduate Academic Advisor to determine which courses are considered core and electives.

M.S.Ed. in Sports Medicine - Athletic Training Concentration

A program for persons interested in the medical aspects of sports injuries including prevention, treatment, and rehabilitation.

Regular Track

Select 36 credit hours from the following courses:

KIN 635	Clinical Biomechanics for Sport Medicine Professionals	3
KIN 688	Advanced Gross Anatomy In Kinesiology And Sport Sciences	3
KIN 657	Diagnostic Imaging Techniques In Sports Medicine	3
KIN 715	Evidence-Based Sports Medicine	3
KIN 716	Advanced Rehabilitation Techniques in Sports Medicine	3
KIN 717	Advanced Evaluation Techniques in Sports Medicine	3
KIN 720	Practicum in Athletic Training	3
KIN 721	Independent Study I	1
KIN 722	Practicum in Athletic Training 2	3
KIN 723	Independent Study 2	1
KIN 724	Practicum in Athletic Training III	3
KIN 725	Independent Study III	1
KIN 726	Practicum in Athletic Training IV	3
KIN 7XX	Independent Study 4	3
KIN 746	Research Methods in Kinesiology and Sport Sciences	3
KIN 791	Practicum in Kinesiology and Sport Sciences/ Master's students	1
KIN 799	Special Project	1-3

Accelerated Track

Select 30 credit hours from the following courses:

KIN 635	Clinical Biomechanics for Sport Medicine Professionals	3
KIN 688	Advanced Gross Anatomy In Kinesiology And Sport Sciences	3
KIN 657	Diagnostic Imaging Techniques In Sports Medicine	3
KIN 715	Evidence-Based Sports Medicine	3
KIN 716	Advanced Rehabilitation Techniques in Sports Medicine	3
KIN 717	Advanced Evaluation Techniques in Sports Medicine	3
KIN 720	Practicum in Athletic Training	3
KIN 721	Independent Study I	1
KIN 722	Practicum in Athletic Training 2	3

KIN 723	Independent Study 2	1
KIN 724	Practicum in Athletic Training III	3
KIN 725	Independent Study III	1
KIN 726	Practicum in Athletic Training IV	3
KIN 7XX	Independent Study 4	3
KIN 746	Research Methods in Kinesiology and Sport Sciences	3
KIN 791	Practicum in Kinesiology and Sport Sciences/ Master's students	1
KIN 799	Special Project	1-3

Ph.D. in Exercise Physiology

Coursework specialization is available in this program for persons interested in clinical and research orientation in the area of exercise physiology.

Required Core in the Major		
KIN 621	Advanced Systemic Exercise Physiology	3
KIN 630	Cellular Exercise Physiology	3
KIN 631	Laboratory Techniques in Functional Evaluation of Skeletal Muscle, Laboratory Experiences in Systemic Exercise Physiology	3
KIN 679	Principles of Exercise Assessment: Cardiovascular	3
KIN 686	Exercise Prescription/Assessment Laboratory	3
KIN 735	Methods in Biomechanical Analysis	3
KIN 740	Neurophysiology in Exercise Science	3
Restricted Electives		
Select 9 credit hours of graduate KIN courses. ¹		9
Unrestricted Electives		
Select 3 credit hours of graduate coursework. ¹		3
Outside Supporting Field		
Select 12 credit hours from relevant supportive field. ²		12
Research Competencies (15 credit hours required)		
KIN 746	Research Methods in Kinesiology and Sport Sciences	3
EPS 702	General Linear Models	3
EPS 703	Applied Multivariate Statistics	3
EPS 708	An Introduction to Structural Equation Modeling for Multivariable Data	3
EPS7XX	Graduate Research Competency Elective	3
Dissertation		
Select 12 credit hours of Dissertation		
KIN 830	Pre-Candidacy to Dissertation Research	6
KIN 840	Post-Candidacy Dissertation Research	6
Total Credit Hours		72

¹ For further information, please contact the Graduate Program Director.

² For guidance, please contact the Graduate Program Director.

Note: 2/3 of all coursework must be at or above the 700 level. Students entering with a Master's degree in Exercise Physiology or a related degree

must take a minimum of 30 credit hours of graduate coursework at the University of Miami in addition to 12 credit hours of dissertation.

Teaching and Learning

Dept. Code: TAL

Programs

Doctor of Philosophy (Ph.D.)

Teaching and Learning with specializations in:

- Language and Literacy Learning in Multilingual Settings (LLMS) (p. 496)
- Science, Technology, Engineering and Mathematics (STEM) Education (p. 497)
- Special Education (p. 497)

This individually-tailored program is designed to help students achieve their professional research-based career goals. A central component of the doctoral program in Teaching and Learning includes work on research projects that support collaboration with faculty and the application of course work as students develop their own research ideas. TAL's Ph.D. program emphasizes an understanding of theory in scholarly inquiry; the intellectual framing and conduct of empirical research; the placement of research within cultural contexts and policy settings; designing, implementing and testing of transformative learning-environments that promote deep learning; and critical analysis of policy, research and practice.

Specialist in Education (Ed.S.)

- Advanced Professional Studies (p. 495)
- Early Childhood Special Education (p. 495)
- Reading (p. 495)
- STEM Education (p. 495)

Master of Science in Education (M.S.Ed.)

- Advanced Professional Studies (p. 495)
- Education and Social Change (p. 495)
- Early Childhood Special Education (p. 495)
- Reading (p. 496)
- STEM Education (p. 496)

Masters

Masters Programs in Teaching and Learning

- M.S.Ed. in Advanced Professional Studies (p. 495)
- M.S.Ed. in Education and Social Change (p. 495)
- M.S.Ed. in Early Childhood Special Education (p. 495)
- M.S.Ed. in Reading (p. 496)
- M.S.Ed. in STEM Education (p. 496)

Specialist

Specialist Programs in Teaching and Learning

- Ed.S. Specialist in Education (p. 495)

Doctoral

Doctoral Programs in Teaching and Learning

- Ph.D. in Teaching and Learning - Language and Literacy Learning in Multilingual Settings (LLLMS) (p. 496)
- Ph.D. in Teaching and Learning - Science, Technology, Engineering and Mathematics (STEM) Education (p. 497)
- Ph.D. in Teaching and Learning - Special Education (p. 497)

Ed.S. Specialist in Education

- Advanced Professional Studies
- Early Childhood Special Education
- Reading
- STEM Education

The Ed.S. degree is a terminal degree, for educators who already have a relevant Master's degree and who wish to increase their proficiency in their chosen field.

The program requires 30 additional credit hours beyond the Masters Degree (minimum) and is individually designed after admission. Some programs for cohorts of teachers feature lock-step curricula. These programs typically combine students pursuing M.S.Ed. degrees with those pursuing Ed.S. degrees. While all students in these programs follow the same curriculum, students pursuing Ed.S. degrees receive additional or different assignments.

Please contact the Department of Teaching and Learning for a program sheet and course listings for the above programs.

M.S.Ed. in Advanced Professional Studies

Periodically, the Department of Teaching and Learning offers various Advanced Professional Studies programs to specific groups of teachers (cohorts). The purpose of these programs is to prepare teachers to assume leadership roles in various disciplines and to enhance the teachers' current knowledge of "best practices" in education. Each cohort's curriculum is designed to meet that cohort's primary mission. Successful completion of these programs leads to conferral of the Master's of Education (M.S.Ed.) or Specialist in Education (Ed.S.) degree.

Please contact the Department of Teaching and Learning for a program sheet and course listings for the above program.

M.S.Ed. in Early Childhood Special Education

Core Courses		
TAL 640	Typical and Atypical Child Development	3
TAL 641	Working with Families of Young Children with Disabilities: Strategies and Medical Issues	3
TAL 642	Evaluation and Assessment in Infant and Early Childhood Special	3
TAL 643	Intervention Strategies in Infant and Early Childhood Special Education	3
TAL 644	Early Childhood Curriculum Development	3
TAL 645	Methods for Communications and Language in Young Children with Disabilities	3

TAL 646	Working with Children who Exhibit Challenging Behaviors	3
TAL 647	Language and Early Reading Instruction	3
TAL 648	Practicum/Internship with Infants and Toddlers with Disabilities (0-3 yrs.)	3
TAL 649	Practicum/Internship with Children with Disabilities (3-5 yrs.)	3
Total Credit Hours		30

M.S.Ed. in Education and Social Change

The Education and Social Change program's conceptual framework focuses on the world of education beyond classroom walls, the classroom context of teaching, and the students in classrooms, comprising a holistic, developmental approach across the three areas. Overall, the goals of the program track are to improve instruction for diverse populations, to prepare teachers for leadership roles within their schools, and to develop capacity to lead future change efforts in support of public education.

There are two tracks with three possible program plans: 1) Teaching Track and 2) Social Change Track. The Teaching Track includes a choice of two program plans (Core Classes plus Teaching Track for those with state teaching certification or Professional Teaching Option for those wishing to pursue a Florida Temporary Teaching Certificate), and the Social Change Track is made up of the Core Classes plus Social Change Track course.

Teaching Track or Social Change Track		
30 - 36 credit hours required		
TAL 601	Classroom Based Assessment	3
TAL 627	Understanding Culture in the Classroom	3
TAL 629	Educating Exceptional Students	3
TAL 634	Language and Reading Instruction	3
TAL 666	Introduction To The Politics Of Education, Teaching, And Learning	3
TAL 668	Human Development, Learning and Schooling	3
TAL XXX	Organizational Well-Being in Education	
Social Change Track (3 credit hours)		
TAL 667	Education Reform, Policy And The Social Organization Of Schooling	3
Teaching Track		
Selection 3 credit hours from the following:		
TAL 660	Instruction and Assessment in the Secondary School.	3
TAL 665	Methods Of Teaching In The Elementary School	3
Electives ¹		
Electives (6 credits): With advisor approval, students may select up to 6 credits (2 courses) to be included in their program plans. -or- Professional Teaching Option: Leading to FL DOE Temporary Teaching Certification upon successful completion of the Teaching Track, along with: ¹		6
Professional Teaching Option		
Core Courses: 30 - 36 credit hours required		

A minimum of 18 credit hours (6 courses) to a maximum of 24 credit hours (8 courses) from among the following:		
TAL 601	Classroom Based Assessment	3
TAL 606	Issues and Strategies for ESOL	3
TAL 612	Classroom and Behavior Management	3
TAL 627	Understanding Culture in the Classroom	3
TAL 629	Educating Exceptional Students	3
TAL 666	Introduction To The Politics Of Education, Teaching, And Learning	3
TAL 668	Human Development, Learning and Schooling	3
TAL XXX	Organizational Well-Being in Education	
Select 3 credit hours (1 course) of the following Teaching Track courses:		
TAL 660	Instruction and Assessment in the Secondary School.	3
TAL 665	Methods Of Teaching In The Elementary School	3
Select 3 credit hours (1 course) from the following:		
TAL 610	Literacy and Learning Strategies in the Content Area	3
TAL 634	Language and Reading Instruction	3
TAL 647	Language and Early Reading Instruction	3
Electives		
Select 6 credits (2 courses) from the following:		
TAL 616	Mathematics in the Elementary School	3
TAL 617	Science in the Elementary School	3
TAL 625	Online Teaching and Leadership	3
TAL 650	Literature for Children and Adolescents.	3

¹ See Graduate Program Advisor for guidance.

M.S.Ed. in Reading

TAL XXX	Classroom Based Research	3
TAL 607	Instructional Leadership	3
TAL 608	Language Development for Linguistically and Culturally Diverse Students	3
TAL 609	Practicum in Reading	3
TAL 630	Instructing Students Who Have Literacy Challenges	3
TAL 631	Assessment of Reading and Related Learning Disabilities	3
TAL 632	Intervention for Reading and Related Learning Disabilities	3
TAL 638	Language Arts and Culture in the Classroom	3
TAL 650	Literature for Children and Adolescents.	3
TAL 732	Seminar in Reading	3
Total Credit Hours		30

M.S.Ed. in STEM Education

30 credit hours required.

15 credit hours (minimum) in the core of STEM education to be selected from among the following courses:		
TAL 677	Diversity And Equity In Stem Education	3
TAL 772	Instructional Design and Technology in STEM Education	3
TAL 773	Stem Teaching And Teacher Education	3
TAL 774	Stem Learning	3
TAL 775	Stem Curriculum And Policy	3
TAL 776	Assessment In Stem Education	3
TAL XXX	Interaction analysis in STEM learning settings	3
15 credit hours of coherent course work in content speciality that is related to a STEM field or specialty area in education.		

Ph.D. in Teaching and Learning - Language and Literacy Learning in Multilingual Settings

60 credit hours of graduate course work, plus 12 credit hours of doctoral-thesis research. Course work provides a foundation that supports students' ongoing research.

Core Courses		
TAL 731	Language Policy And Planning (K-12)	3
TAL 733	Applied Linguistics	3
TAL 734	Theory And Research In Reading	3
TAL 735	Theory And Research In Writing	3
Research Competency Requirement		
Select 15 credit hours of research methods including quantitative, qualitative, and mixed methods approaches ¹		15
Student Diversity Requirement		
9 credit hours on student social, cultural, and demographic diversity including:		
TAL 703	Issues and Trends in Multicultural Education	3
TAL XXX	6 credit hours focused on specific dimensions of diversity from an allied field	6
Foundations Requirement		
6 credit hours of foundations:		
TAL 702	The Social and Cultural Foundation of Education	3
TAL XXX	Theories of Learning	3
Pro-Seminar Requirement		
TAL 700	Professional Seminar	3
Electives Requirement		
Select 15 credit hours of electives meant to provide greater focus on area of specialization. ²		15
Dissertation Requirement		
TAL 830	Pre-Candidacy to Dissertation Research.	6
TAL 840	Post-Candidacy Dissertation Research.	6
Total Credit Hours		72

¹ See Graduate Program Director for a list of required research courses.

² See Graduate Program Director for guidance.

Ph.D. in Teaching and Learning - Science, Technology, Engineering and Mathematics (STEM) Education

60 credit hours of graduate course work, plus 12 credit hours of doctoral-thesis research. Course work provides a foundation that supports students' ongoing research.

STEM Education Core Courses		
Select 15 credit hours from the following:		15
TAL 677	Diversity And Equity In Stem Education	3
TAL 772	Instructional Design and Technology in STEM Education	3
TAL 773	Stem Teaching And Teacher Education	3
TAL 774	Stem Learning	3
TAL 775	Stem Curriculum And Policy	3
TAL 776	Assessment In Stem Education	3
TAL 777	Stem-Education Research Practicum	3
TALXXX	Interaction analysis within STEM learning settings	
Research Competency Requirement		
Select 15 credit hours of research methods including quantitative, qualitative and mixed methods approaches. ¹		15
Student Diversity Requirement		
9 credit hours on student social, cultural and demographic diversity including:		
TAL 703	Issues and Trends in Multicultural Education	3
TAL XXX	6 credit hours focused on specific dimensions of diversity from an allied field	6
Foundations Requirement		
9 credit hours in foundations including courses in (a) the social and cultural foundations of education, (b) a content course in student's area of specialization		9
TAL XXX	Theories of Learning	
Pro-Seminar Requirement		
TAL 700	Professional Seminar	3
Electives Requirement		
Select 9 credit hours of electives meant to provide greater focus on area of specialization. ²		9
Dissertation Requirement		
TAL 830	Pre-Candidacy to Dissertation Research.	6
TAL 840	Post-Candidacy Dissertation Research.	6

¹ See Graduate Program Director for a list of required research courses.

² See Graduate Program Director for guidance.

Ph.D. in Teaching and Learning - Special Education

60 credit hours of graduate course work, plus 12 credit hours of doctoral-thesis research. Course work provides a foundation that supports students' ongoing research.

Special Education Core Courses		
TAL 753	Cognitive Psychology In Special Education	3
TAL 754	Disability And Diversity: Critical Views	3
TAL 755	Current Issues In Special Education	3
TAL 756	Research in Special Education	3
Research Competency Requirement		
Select 15 credit hours of research methods including quantitative, qualitative, mixed methods approaches. ¹		15
Student Diversity Requirement		
Select 9 credit hours on student social, cultural and demographic diversity including:		
TAL 703	Issues and Trends in Multicultural Education	3
TALXXX	6 credit hours focused on specific dimensions of diversity from an allied field.	6
Foundations Requirement		
6 credit hours of foundations:		
TAL 702	The Social and Cultural Foundation of Education	3
TALXXX	Theories of Learning	3
Pro-Seminar Requirement		
TAL 700	Professional Seminar	3
Electives Requirement		
Select 15 credit hours of electives meant to provide greater focus on field of specialization ²		15
Dissertation Requirement		
TAL 830	Pre-Candidacy to Dissertation Research.	6
TAL 840	Post-Candidacy Dissertation Research.	6
Total Credit Hours		72

Engineering

<http://www.miami.edu/engineering>

Degree Programs

The College of Engineering offers courses of graduate study leading to the degrees of:

- Master of Science (Environmental Health and Safety),
- Master of Science (Occupational Ergonomics and Safety),
- Master of Science (Management of Technology),
- Master of Science in Architectural Engineering,
- Master of Science in Biomedical Engineering,
- Master of Science in Biomedical Engineering (Medical Physics),
- Master of Science in Civil Engineering,
- Master of Science in Electrical and Computer Engineering,
- Master of Science in Industrial Engineering,
- Master of Science in Industrial Engineering/Master of Business Administration, and
- Master of Science in Mechanical Engineering.

Ph.D. degrees are offered in the areas of:

1. Biomedical Engineering,
2. Biomedical Engineering (Medical Physics),
3. Civil Engineering,
4. Electrical and Computer Engineering,
5. Ergonomics and Human Factors
6. Industrial Engineering, and
7. Mechanical Engineering.

Admission Requirements

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or Ph.D. track. Admission guidelines for the various tracks are as follows. Please refer to program specific sections of the bulletin for more information with respect to admission and degree requirements.

B.S. to M.S.

In engineering, the master's – not the bachelor's – degree is the first professional degree, so all engineers should seek to obtain an M. S. degree. In order to facilitate the obtainment of an M.S. degree, the University of Miami (UM) College of Engineering (CoE) offers the M.S. degree through a number of possible venues or entry points, as summarized below. Every one of our M.S. degree programs requires 10 courses or 30 credit hours to complete; this can be typically undertaken in one, 9-month academic year (i.e., by enrolling in 15 credit hours per semester).

General Admission Requirements

1. A B.S. degree from an accredited program.
2. Typically a cumulative grade point average of 3.0 on a 4.0 scale.
3. Typically a GRE score of 300 or higher (verbal + quantitative).
4. Typically for international students a TOEFL PBT score of 550 or higher, or a TOEFL iBT score of 80 or higher, or an IELTS score of 6.5 or higher.

Some students may be required to take additional pre-requisite coursework, depending on the nature and content of their B.S. degree. A maximum of 6 credit hours above and beyond those required for a B.S. degree can be transferred into our 30 credit hour M.S. program. Additionally, qualified students may apply for a partial tuition scholarship (which at present is averaging about 25% of the cost). More detailed information can be found in the Prospective Graduate Students section of our website at www.miami.edu/coe (<http://www.miami.edu/coe>).

UM Entry Point	Typical Duration	Comments
1. Freshman Year	4 + 1 years	Students enter UM CoE as a freshman and apply by their junior year to obtain a joint B.S./M.S. degree after 5 years.
2. Transfer Year	2 + 2 + 1 years	Students enter UM CoE as a transfer from another accredited program after 2 years and apply by their junior year to obtain a joint B.S./M.S. degree after 3 years.
3. Summer Semester Before M.S.	4 + 1 year	International students complete their B.S. capstone project at UM CoE as exchange students, then receive their B.S. from their home institution and transition – without leaving U.S. – into the M.S. program, beginning in the Fall semester.
4. First M.S. Semester On-Campus	1 year	Students enter M.S. program either after receiving a B.S. or after being in the workforce following their B.S. degree.
5. First M.S. Semester Off-Campus	1.5 to 3 years	Working professionals enter a specially customized M.S. degree program at an off-campus location.

6. First Semester of An Intensive English Program (IEP)	IEP + 1.5 years	International students with a B.S. in engineering who are unable to meet TOEFL/IELTS requirements and have a minimum 146 or higher score on the quantitative section of the GRE may enter into the IEP and, assuming a minimum score of 450 on TOEFL, must take one required M.S. course per IEP semester; if they graduate from IEP and their M.S. course grades average 3.0 or better, they will not be required to retake the GRE before continuing – as a full-time student – in their chosen M.S. program.
---	-----------------	---

- M.S. in Environmental Health and Safety in conjunction with the School of Medicine.

The M.S. and Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

Further details on the various College of Engineering areas of specialization are given under the Departmental and Program headings that follow this section.

Students applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant's abilities and background.

Students who hold a bachelor's degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

A student's overall program is planned by the student and the student's advisory committee. Requirements for the M.S. thesis and non-thesis options (not available in all areas of specialization) are shown below.

Accepted M.S. applicants can apply and be considered on a competitive basis for partial tuition scholarships. Need based aid also can be awarded, as determined through the financial aid process. A minimum graduate GPA of 3.0 must be maintained in order to maintain satisfactory progress.

Accepted Ph.D. applicants financial assistance is available in the form of fellowships, partial tuition scholarships, teaching and research assistantships, and graduate cooperative assistantships combining study and work assignments with private engineering and architectural firms and government agencies. A minimum graduate GPA of 3.3 must be maintained in order to maintain satisfactory progress.

Financial support is provided predominantly to students pursuing Ph.D. degrees.

For further information, contact David T. Poole, Director of Admission, College of Engineering at dtpoole@miami.edu or 305-284-4773.

Degree Requirements

Requirements for the Master of Science Degree (Thesis Option)

- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 6 course credit hours must be at the 700-level.
- 6 credit hours of the required 30 must be earned in thesis work.
- An oral examination in defense of the thesis.

Requirements for the Master of Science Degree (Non-Thesis Option)

- An approved integrated program with a minimum of 30 credit hours with an average grade of B or better and no grade below C.
- At least 12 of the course credit hours must be at the 700 level.
- In most departments a 3 credit hour graduating project is required.

B.S. to Ph.D.

Direct admission to the Ph.D. track by students holding B.S. degrees is limited to students with exceptional credentials. These credentials typically include a minimum GPA of 3.5 on a 4.0 scale and a minimum GRE of 308 (verbal plus quantitative). After completion of the Departmental M.S. requirements, students enrolled in the direct B.S. to Ph.D. track may apply for an M.S. degree.

M.S. to Ph.D.

Criteria for admission into the Ph.D. program for students with an appropriate M.S. degree include a minimum GPA of 3.5 on a 4.0 scale within their M.S. degree program and a minimum GRE of 302 (verbal plus quantitative).

The College offers graduate programs leading to degrees in both traditional and interdisciplinary areas of study. The primary focus of the College lies in those areas and problems that cross traditional lines. Given the interdisciplinary nature of programs, flexibility is provided in course selection which allows each student to pursue a program especially tailored to the goals of the individual. Given the strengths of the University, graduate programs are offered in conjunction with other schools or units. These programs include:

- Biomedical Engineering in conjunction with the School of Medicine
- Engineering Management
Dual M.S. in Industrial Engineering and M.B.A. in conjunction with the School of Business Administration
- M.S. program in Management of Technology in conjunction with the School of Business Administration

Requirements for the Doctor of Philosophy Degree

- The programs leading to the degree of Doctor of Philosophy comply in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and dissertation.
- Applicants for admission to the Ph.D. program will be expected to have superior records in their M.S. and B.S. degree programs, well above average scores on the Graduate Record Examination, and strong letters of recommendation.
- At least 18 credit hours in courses must be taken beyond the requirements for the M.S. degree of which 6 credit hours must be at the 700 level.
- All candidates for the doctorate are expected to complete an appropriate integrated program of studies in preparation for the comprehensive Qualifying Examination.
- Students are expected to take their qualifying exams during the first year of enrollment. Admission to candidacy across College of Engineering Departments includes passing the qualifying exam and successful defense of a proposal for research.
- Minimum of one year beyond admission to candidacy is usually necessary for the completion of an acceptable dissertation (12 credit hours or more), whereupon the student is then expected to defend their Ph.D. thesis during the Final Oral Examination.
- Departments may have requirements in addition to the above general requirements for their own graduate programs.

For further information, contact Office of Admission, College of Engineering (David Poole, dtpoole@miami.edu or 305-284-4773).

Postgraduate Certificate Program

- A Postgraduate Certificate Program is available requiring the completion of a minimum of 15 credit hours of individually planned advanced course work in an area of engineering specialization, or interdisciplinary study.
- Course sequences culminate at an advanced level, but may begin at a basic level if a new area of specialization is to be undertaken.
- The Program must be completed with a grade average of at least C, within a period of five calendar years from the date of enrollment.
- No transfer credit hours will be accepted. International students requiring a student visa must be in a degree program, and cannot obtain a student visa for the Certificate Program; but international students with certain other types of visas may enroll in the Program.
- Basic admission requirement for the Program is a bachelor's degree in a recognized field of engineering or registration as a Professional Engineer by examination.
- Students demonstrating marked ability in the Program may be encouraged to apply for admission to study for the Master's Degree, and may apply up to 6 credit hours toward the M.S. degree.

Customized Engineering Master's Program

The College of Engineering at the University of Miami has a unique graduate admission option for students wishing to be accepted into graduate studies to pursue a Master of Science degree in Engineering, but who are unable to demonstrate acceptable levels of English proficiency at the time of their application for admission. The IEP+ 1.5

Year Program is focused on helping non-native English applicants to obtain a Master of Science degree in Engineering.

Prospective students must complete and submit an application for graduate admission into the College of Engineering, providing all supporting documents as outlined in our graduate admission application and meet the following criteria:

1. Applicants must be academically admissible into graduate studies with appropriate academic credentials. They must have a Bachelor of Science degree in Engineering, or its equivalent, or be a candidate for one at the time of application.
2. Applicants must score a 146 or higher on the quantitative portion of the GRE.
3. Applicants must score a 450 or higher on TOEFL PBT (paper based test), or a 133 on TOEFL CBT (computer based test), or 45 on TOEFL iBT (internet based test) or 4.5 on ILETS (International English Language Testing System).

Students who are accepted under these criteria will enroll in our Intensive English Program (IEP) for a designated time, typically a year. The actual length of time a student will spend in IEP will be determined through a placement exam given once the student has arrived on the University of Miami Coral Gables campus. Students will also be required to enroll in a minimum of one graduate engineering course each semester while enrolled in IEP. Selection of these courses will be done after academic advising has taken place with our Associate Dean for Academics for students in this program.

Full-time enrollment in the M.S. portion of the IEP/M.S. Program will commence when the student has successfully completed Level Five of IEP and has completed two or more approved engineering courses, with a cumulative GPA of 3.0 or higher. Depending on the student's background, the M.S. degree will require the taking of 30 or more credit hours – corresponding to 10 or more 3 credit hour courses – and the achievement of a cumulative GPA of 3.0 or higher in the taken courses. Assuming a 30 credit hour M.S. program, it is anticipated that the IEP and 6 credit hours will be completed in the first year, 18 credit hours the second year (9 credit hours in the Fall and 9 credit hours in the Spring) and a minimum of 6 credit hours in Fall of the third year; thus, the duration is expected to be IEP+1.5 years.

If you have any questions about the CEM Program including cost of the program, please contact David T. Poole, Director of Admission, College of Engineering at dtpoole@miami.edu or 305-284-4773 or Associate Dean for Academics, Dr. Shihab Asfour at sasfour@miami.edu.

Ph.D. Course Exchange with Florida International University

University of Miami Ph.D. students are eligible to enroll in courses at Florida International University for a maximum of 6 credit hours. Enrollment in FIU courses requires approval through the student's program of study committee. See FIU/UM Ph.D. exchange section of the Graduate School section of the bulletin for more details.

Biomedical Engineering

Dept. Code: BME

Degree Programs

The Department of Biomedical Engineering offers graduate programs leading to the degrees of Master of Science (thesis or non-thesis option) and Doctor of Philosophy in Biomedical Engineering. A 5-year BS/MS option is available for qualified undergraduate students enrolled within the Department.

Areas of Research

The areas of research in Biomedical Engineering include:

1. Biomedical instrumentation and devices
2. Medical imaging
3. Diagnostic and therapeutic systems
4. Biomedical signal and image processing
5. Rehabilitation and neural engineering
6. Brain-computer interface
7. Biomedical optics and lasers
8. Medical physics
9. Biomechanics, biofluid dynamics, hemodynamics
10. Biomaterials, tissue and cellular engineering
11. Stem cell research
12. Lab-on-a-chip devices

Admission Requirements

1. The Department of Biomedical Engineering uses the same general graduate admission requirements as the College of Engineering.
2. Students who hold a Bachelor's degree in a field other than engineering may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate courses, in addition to the regular requirements for the graduate degree.

Masters

Masters Programs in Biomedical Engineering

- M.S. in Biomedical Engineering (p. 501)
- B.S./M.S. Five-Year Program in Biomedical Engineering (p. 501)

Doctoral

Doctoral Program in Biomedical Engineering

- Ph.D. in Biomedical Engineering (p. 502)

B.S./M.S. Five-Year Program in Biomedical Engineering

This program is available only to qualified undergraduate students enrolled within the Department as described in the Undergraduate Bulletin (p. 230).

1. This program permits students to receive a baccalaureate degree (BSBE) and a Master of Science (MS) degree in five years.
2. The two degrees are awarded simultaneously when the combined requirements have been met for both degrees.
3. Qualified students who want to be enrolled in this program must apply before the end of their junior year and meet all pertinent graduate school and College of Engineering requirements.

4. In lieu of the senior design requirement, the participants complete one significant BS/MS design project by registering for BME 705 and BME 706.
5. The design project is monitored by at least two mentors, one of the mentors must be a member of the primary faculty in the department.
6. The project is complete upon the mentor's acceptance of a verbal presentation and a written report.

M.S. in Biomedical Engineering

1. The Master of Science degree offers the graduate student an opportunity to obtain advanced training in selected areas of biomedical engineering and to begin independent research.
2. General requirements for the M.S. degree are listed in this Bulletin under Engineering and under Master's Degree-General.
3. Both a 30 credit hour thesis option and a 30 credit hour non-thesis option are available.
4. There is also a 5-year BS/MS option available for qualified undergraduate students enrolled within the Department.
5. The department admits four types of students to its MS program:
 - a. Students with BS degrees in Biomedical Engineering or similar engineering fields
 - b. Students with BS degrees in Electrical, Computer, Mechanical, Chemical, or similar engineering fields
 - c. Students with BS degrees in Physics, Mathematics, Computer Science, Chemistry, Biology or similar fields
 - d. Students with MD or similar degrees
6. Students in the last two groups are generally given conditional admission and required to take additional undergraduate courses in engineering, mathematics and science depending on their previous course work as decided by the graduate program director and the designated advisor.
7. There are three paths to earn a Master of Science degree in Biomedical Engineering:
 - a. The Thesis Option requires a minimum of 30 credit hours beyond the BS degree. These must include a minimum of 6 thesis credit hours (BME 810) and the completion of at least 6 credit hours of appropriate courses at the 700 level.
 - b. The Non-Thesis Option requires a minimum of 30 credit hours beyond the BS degree. These must include at least 3 credit hours for an independent design or research project for which the student enrolls in BME 705. In addition, at least 9 credit hours of appropriate courses at the 700 level must be completed.
 - c. The BS/MS Dual degree Program (see separate section below).
8. The student's overall graduate program is planned by the student, adviser, graduate program director and the thesis committee (for the thesis option).
 - a. The thesis committee consists of a minimum of 3 members.
 - b. Two members, including the chair of the committee, shall be faculty members from the BME Department (primary or secondary), and one member must be from outside the Department.
 - c. Outside members of the thesis committee can include part-time faculty that teach within the Department.
 - d. One of the committee members must be a member of the Graduate Faculty.

9. The three courses of the Unified Medical Sciences sequence (BME 601, BME 602 and BME 603) were designed to apprise the engineer of the basic knowledge in the life sciences necessary to work in the broad field of biomedical engineering.
 - a. MS Students coming from traditional engineering field with no biology/medicine backgrounds are required to complete all of the three Unified Medical Sciences courses.
 - b. Other MS students are required to take at least two of the three courses unless the student holds a degree in medicine (MD, DO or equivalent) or an advanced degree (or its equivalent) in the life sciences.
 - c. Each such exception requires the approval of the department's faculty for the course of concern.

Ph.D. in Biomedical Engineering

1. The goal of the PhD program in Biomedical Engineering at the University of Miami is to prepare graduates for careers in academia, industrial research and development, or government. The program is designed to train students for advanced independent research and technical innovation in biomedical engineering.
2. The general requirements for award of the Doctor of Philosophy degree include:
 - a. Completion of a minimum of 60 credit hours beyond the Bachelor of Science degree.
 - b. Satisfactory completion of a qualifying examination.
 - c. The submission, oral defense, and approval of a dissertation proposal.
 - d. The submission and oral defense and approval of a dissertation. There are no foreign language competency requirements for the PhD in biomedical engineering.
3. The requirements for admission to the PhD program in biomedical engineering usually include:
 - a. In general, the department admits three types of students to its PhD program:
 - i Students with MS degrees in Biomedical Engineering or related science and engineering fields.
 - ii Students with MD degrees with undergraduate degrees in sciences or engineering.
 - iii Highly qualified students with BS degrees in engineering or sciences (direct BS to PhD track).
 - b. The general requirements for admission of BS students to the doctoral degree program are consistent with the admission requirements of the College of Engineering.
 - c. Students in M.S. thesis or non-thesis tracks who wish to pursue a doctoral degree can transfer to the doctoral degree program without completing a thesis or project under the following general requirements:
 - i A letter of support by a faculty member who agrees to serve as the student's Ph.D. dissertation advisor.
 - ii Completion of an application for admission to the PhD program, which will be reviewed by the Department's Graduate Admissions Committee, using the standard admission criteria for the doctoral program.
 - d. Regulations concerning admission, course requirements, residence requirements, qualifying and final examinations, and dissertation are listed in this Bulletin under Engineering and Doctor of Philosophy.
4. The doctoral program in biomedical engineering requires each student to pass a departmental qualifying screening examination.
 - a. The screening examination consists of three written examinations on each of the following broad subjects:
 - i basic engineering;
 - ii applied mathematics and computer science; and
 - iii applied physiology and medical science.
 - b. These examinations are usually offered once or twice each year.
 - c. The examination must be taken the first time it is scheduled after completion of the first two semesters.
 - d. A student may repeat once any or all parts of the examination where the results were found unsatisfactory.
 - e. Students admitted to the doctoral program with a BS degree that do not pass the qualifying examination may complete the MS degree.
5. Following the successful completion of the screening examination, a PhD Supervisory Committee is appointed by the Chairperson of the Department of Biomedical Engineering. The role of the Supervisory Committee is to administer the dissertation proposal, and to make up any additional written or oral examination deemed necessary to complete the qualifying examination.
 - a. The supervisory committee is composed of a minimum of 5 members.
 - b. Three members, including the chair, shall be members of the Graduate Faculty, and one member shall be from outside the Department.
 - c. A minimum of three members, including the chair of the committee, must be primary faculty members from the BME Department.
 - d. A research mentor who is not a Primary Faculty member of the Department of Biomedical Engineering, can serve as Co-Chair of the Supervisory Committee, together with a second Co-Chair who shall be a member of the primary faculty of the Department of Biomedical Engineering.
 - e. A written dissertation proposal is submitted along with an oral presentation to the supervisory committee.
 - f. Acceptance of the dissertation proposal in combination with other examinations as determined by the committee to assure the qualifications of the student for the doctorate leads to candidacy for the Ph.D.
6. When the student is admitted to candidacy, a dissertation committee is formed.
 - a. The Dissertation Committee is nominated by the Department, and is approved and appointed by the Dean of the Graduate School.
 - b. In the Department of Biomedical Engineering, the Dissertation Committee is generally the same as the Supervisory Committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation.
 - c. The composition of the Dissertation Committee is subject to the same rules as for the Supervisory Committee (see above).
 - d. The duties of the Dissertation Committee are:
 - i to consult with and to advise students on their research;
 - ii to meet, at intervals, to review progress and expected results;

- iii to read and comment upon the draft dissertation;
- iv to meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

7. Successful defense of the dissertation leads to the award of the PhD degree.
8. All students in the BME Doctor or Philosophy program are required to complete the following course or credit hour requirements:
 - a. At least two of the following three courses: BME 601, BME 602, BME 603.
 - i Students, who have completed these courses or similar coursework in their previous MS programs, may substitute technical electives for this requirement.
 - ii Students in the direct BS to PhD track and students with no prior exposure to biology/medicine are required to complete all three courses
 - iii This requirement can only be waived for students holding MD degrees.
 - b. A zero-credit hour Biomedical Engineering Seminar course (BME 780). This requirement can not be waived.
 - c. Students admitted with an MS degree must complete at least 18 credit hours of graduate level course work followed by at least 12 credit hours of dissertation work (BME 830 before admission to candidacy or BME 840 after admission to candidacy). A minimum of 6 course credit hours must be at the 700 level.
 - d. Students admitted with a BS degree must complete at least 42 credit hours of graduate level course work followed by at least 18 credit hours of dissertation work (BME 830 before admission to candidacy or BME 840 after admission to candidacy). A minimum of 12 course credit hours must be at the 700 level.

M.S., Ph.D. and Certificate Programs in Medical Physics

Medical Physics Program

The Department of Biomedical Engineering at the University of Miami offers special MS and PhD programs in Medical Physics. The Medical Physics graduate program is accredited by CAMPEP (Commission on Accreditation of Medical Physics Educational Programs). The objective of the Medical Physics program is to provide advanced knowledge in the field of therapeutic medical physics, and to provide the training required for students to become licensed medical physicists. This program is coordinated by the Department of Biomedical Engineering and the Department of Radiation Oncology at the School of Medicine. Students who apply for the Medical Physics program are required to have BS degrees in Engineering, Physics or Science with a Minor in Physics, unless the student is being considered for admission under our BS/MS program.

The program is open to biomedical engineering students enrolled in the PhD program, regular MS program, as well as the dual degree (BS/MS) program. Candidates are required to have completed 9 credits of upper level Physics courses (examples include Electricity and Magnetism, Atomic Physics, Modern Physics, Quantum Mechanics, Optics, Nuclear

Physics, Heat & Thermodynamics, Advanced Mechanics) before they start their course work in the Medical Physics program.

Of the credit hours required for their respective graduate degrees, students enrolled in the Medical Physics Program must complete the following courses:

BME 602	Unified Medical Sciences II	3
BME 620	Medical Imaging System	3
BME 681	Radiation Biology and Physics	3
BME 682	Radiation Therapy Physics	3
BME 683	Radiation Protection	3
BME 729	Advanced Medical Imaging	3
BME 781	Radiation Dosimetry And Physics	3
BME 783	Radiation Therapy Physics Clinical Rotation	3
BME 784	Medical Physics Journal Club	1
Total Credit Hours		25

Any remaining credit hours required to complete the program must satisfy the general requirements of the Biomedical Engineering graduate degrees. In particular, students enrolled in the MS program in Medical Physics need to complete a total of 31 credit hours (non-thesis option) by taking additional 3 credit hours of a Combined Medical Science course and 3 credit hours of a MS project or a total of 34 credit hours (BS/MS and thesis option) by taking additional 3 credit hours of a Combined Medical Science course and 6 credit hours of a MS design project or MS thesis. Students enrolled in the PhD program in Medical Physics need to complete a total of 40 credit hours by taking additional 3 credit hours of a Combined Medical Science course and 12 credit hours in doctoral dissertation.

The topic of the BS/MS project (BME 705/BME 706), MS project (BME 705, non-thesis option), MS thesis or PhD dissertation must be related to medical physics. In general, the project is co-supervised by Faculty from the Department of Biomedical Engineering and the Department of Radiation Oncology.

Certificate Program in Medical Physics

Associated with the Department of Biomedical Engineering's graduate program in Medical Physics, the University of Miami offers a Certificate Program in Medical Physics. The Certificate Program is accredited by CAMPEP (Commission on Accreditation of Medical Physics Educational Programs) and is a non-degree granting program. The objective of this two-semester program is to allow qualified individuals who have obtained PhD degrees in Physics, Engineering or a related field with a physics-minor-equivalent background to transition into a career in medical physics.

Students enrolled in the Certificate Program in Medical Physics must complete at least 18 credit hours from the following courses:

BME 602	Unified Medical Sciences II	3
Select one of the following courses:		3
BME 620	Medical Imaging System	
BME 729	Advanced Medical Imaging	
BME 681	Radiation Biology and Physics	3
BME 682	Radiation Therapy Physics	3

BME 683	Radiation Protection	3
BME 781	Radiation Dosimetry And Physics	3
Optional Course		0-3
BME 783	Radiation Therapy Physics Clinical Rotation	
Total Credit Hours		18-21

Credit hours completed by students enrolled in the certificate program are not eligible for degree application.

Civil, Architectural and Environmental Engineering

<http://cae.miami.edu>

Dept. Code: CAE

Degree Programs

The Department of Civil, Architectural, and Environmental Engineering offers graduate programs leading to the degrees of:

- Master of Science in Architectural Engineering
- Master of Science in Civil Engineering
- Doctor of Philosophy in Civil Engineering

The specialty areas of study in Civil Engineering include:

- structural engineering and structural materials
- environmental engineering
- water-resources engineering
- The specialty areas of study in Architectural Engineering include:
 - integrated building systems
 - MEP systems

In all fields of specialization, up to one-half of the required course work for the selected degree may be taken outside of the Department.

Admission Requirements

All students applying to the graduate program are required to submit GRE scores and three letters of recommendation. Admission criteria are described under Colleges of Engineering – Graduate Admission Requirements.

1. International students should consult the section on admissions.
2. Students who hold a bachelor's degree in a field other than their proposed major may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree.

Research Opportunities - Civil Engineering

- Current research activities in the Department include properties of concrete materials, composite structural systems, fiber-reinforced concrete, modeling and simulation of engineering materials, multi-scale modeling of materials, fracture mechanics, structural steel behavior, structural health monitoring, structural repair and rehabilitation.

Research Opportunities - Architectural Engineering

- Current research activities in the Department include energy, indoor air quality, heating, ventilating and air conditioning (HVAC), environmentally compatible construction materials and systems, life-cycle building systems integration, and sustainable affordable housing.

Research Opportunities - Environmental Engineering

- Current research activities in the Department include development of new physicochemical water and wastewater treatment processes, potable wastewater reuse, solid and hazardous waste management, health and environmental risk analysis, environmental/economic planning for sustainable development, hazardous waste remediation, environmental health studies, water quality studies, ground-water, surface-water, and contaminant-transport processes, hydrologic processes, water resources planning and management, and water policy.

Masters

Masters Programs in Civil, Architectural and Environmental Engineering

- M.S. in Architectural Engineering (p. 504)
- M.S. in Civil Engineering (p. 505)

Doctoral

Doctoral Program in Civil, Architectural and Environmental Engineering

- Ph.D. in Civil Engineering (p. 505)

M.S. in Architectural Engineering

- Requirements for the M.S. degree are listed in this Bulletin under Engineering (p. 498) and under Master's Degree General.
- A total of 6 credit hours of transfer and/or exchange coursework not counted towards the student's bachelor's degree may be taken at another institution and used to satisfy requirements for the M.S. degree.
- Both a thesis option and a non-thesis option are available.
- There is also a 5-year B.S./M.S. option available for qualified undergraduate students enrolled within the Department. For this combined degree program only, students are allowed to transfer up to 9 credit hours of graduate coursework from a semester spent abroad. The coursework resulting in the 9 credit hour transfer is to be approved by the student's M.S. advisor prior to initiating the study abroad program.
- Of 30 required credit hours, up to 6 may be thesis research. At least 12 credit hours must be at the 600 level, of which up to 6 credit hours can be thesis research, independent study, or, for 5-year BS-MS candidates, Capstone Design.
- The student and an advisory committee plan the student's overall program.
 - a. The advisory committee consists of a minimum of 3 members.
 - b. The chair of the committee shall be a full-time faculty member from the CAE Department, one member must be from outside

the Department and hold a Ph.D., and one member other than the chair must be either a full-time or part-time member of the Department.

- c. One of the committee members must be a member of the Graduate Faculty.

M.S. in Civil Engineering

- Requirements for the M.S. degree are listed in this Bulletin under Engineering (p. 498) and under Master's Degree General.
- A total of 6 credit hours of transfer and/or exchange coursework not counted towards the student's bachelor's degree may be taken at another institution and used to satisfy requirements for the M.S. degree.
- Both a thesis option and a non-thesis option are available.
- There is also a 5-year B.S./M.S. option available for qualified undergraduate students enrolled within the Department. For this combined degree program only, students are allowed to transfer up to 9 credit hours of graduate coursework from a semester spent abroad. The coursework resulting in the 9 credit hour transfer is to be approved by the student's M.S. advisor prior to initiating the study abroad program.
- Of 30 required credit hours, up to 6 may be thesis research. At least 12 credit hours must be at the 600 level, of which up to 6 credit hours can be thesis research, independent study, or, for 5-year BS-MS candidates, Capstone Design.
- The student and an advisory committee plan the students overall program.
 - a. The advisory committee consists of a minimum of 3 members.
 - b. The chair of the committee shall be a full-time faculty member from the CAE Department, one member must be from outside the Department and hold a Ph.D., and one member other than the chair must be either a full-time or part-time member of the Department.
 - c. One of the committee members must be a member of the Graduate Faculty.

Ph.D. in Civil Engineering

1. Regulations concerning admission, course requirements, residence requirements, qualifying and final examinations, and dissertation are listed in this Bulletin under Engineering and Doctor of Philosophy.
2. A total of 6 credit hours of transfer and/or exchange coursework beyond those counted towards the student's bachelor's and master's degrees may be taken at another institution and used to satisfy requirements for the Ph.D. degree. Students entering without a previous master's degree may use a total of 12 such credit hours to satisfy requirements for the Ph.D.
3. For students with a previous master's degree, 18 credit hours of coursework are required, six of which must be at the 600 level in courses other than independent study. For students entering without a previous master's degree, 42 credit hours of coursework are required, 12 of which must be at the 600 level in courses other than independent study.
4. The student and a supervisory committee plan the students overall program.

5. A separate dissertation committee may be formed to oversee the progress of the dissertation but, in most instances, the student's supervisory committee also serves as the dissertation committee.
6. The supervisory/dissertation committee shall be composed of a minimum of 4 members.
 - a. Three members, including the chair, shall be members of the Graduate Faculty, and one member shall be from outside the Department and hold a Ph.D.
 - b. A minimum of two members, including the chair of the committee, must be full-time members from the CAE Department.

Electrical and Computer Engineering

Current research interests of the faculty include:

- Machine Learning and Artificial Intelligence
- Biometrics
- Bioinformatics and Computational Biology
- Networks and Information Security
- Network Congestion Control
- Wireless Network
- Network Science
- Databases
- Data Mining
- Evidence and Data Fusion
- Signal Processing and Filtering
- Acoustics, Speech, and Audio Processing
- Big Data Storage Systems
- Learning from Data
- Decision Modeling
- Image Processing and Computer Vision
- Underwater Imaging and Vision
- Grid Computing
- Communications
- Multimedia Systems and Networks
- Systems Engineering
- Photonics and Integrated Optics
- Optoelectronic Devices
- Micro-Electro-Mechanical Systems (MEMS)
- Optical Imaging and Sensing
- Bio-Nanotechnology
- Very Large Scale Integration (VLSI)

The 5-Year B.S.E.E.-M.S.E.C.E Dual Degree Program

This is a structured and integrated program of 152/154 credit hours (depending on the undergraduate option). Students may pursue this program from either of the undergraduate option available for Electrical Engineering Majors. It includes two required courses, ECE 715 and ECE 716, as well as the selection of advanced technical electives.

Note the following:

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be in courses open to graduate students only (700 level).
- Interested ECE Juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.E.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable G.R.E. score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.E.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

The 5-Year B.S.Cp.E. - M.S.E.C.E. Dual Degree Program

This is a structured and integrated program of 154/156 credit hours (depending on the undergraduate option). Students may pursue this program from either of the undergraduate option available for Computer Engineering Majors. It includes two required courses, ECE 715 and ECE 716, as well as the selection of advanced technical electives.

Note the following:

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be in courses open to graduate students only (700 level).
- Interested Computer Engineering juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.Cp.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable G.R.E. score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.Cp.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

Masters

Masters Programs in Electrical and Computer Engineering

- M.S. in Electrical and Computer Engineering (p. 510)
- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Electrical Engineering Option (p. 264)

- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Audio Engineering Option (p. 263)
- Five-Year B.S.C.P.E.-M.S.E.C.E. Dual Degree - Computer Engineering Option (p. 261)
- Five-Year B.S.C.P.E.-M.S.E.C.E. Dual Degree - Software Engineering Option (p. 262)

Doctoral

Doctoral Program in Electrical and Computer Engineering

² Offered only in the Fall semester

³ Should be taken as Graduate (G) courses.

M.S. in Electrical and Computer Engineering

The Electrical and Computer Engineering Department offers the Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.) with a thesis option (24 course credit hours and 6 thesis credit hours) or a non-thesis option (30 course credit hours and no thesis credit hours).

Ph.D. in Electrical and Computer Engineering

1. The program leading to the degree of Doctor of Philosophy (Ph.D.) complies in full with the requirements of the Graduate School concerning admission, residence requirements, qualifying examinations and the dissertation.
2. Course requirements for the Ph.D. are described under the College of Engineering section.
3. There is no foreign language requirement.
4. The Ph.D. program in the Department will concentrate on a variety of emphasis areas for study and research.

700 level courses and above are open only to graduate students.

Industrial Engineering

Department Mission Statement

The Department of Industrial Engineering mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Degree Programs

The Department of Industrial Engineering offers graduate programs leading to the:

- Master of Science in Industrial Engineering
- Master of Science in Environmental Health and Safety
- Master of Science in Occupational Ergonomics and Safety
- MSIE/MBA Weekend Executive Program (in conjunction with the School of Business)
- Master of Science in Management of Technology (in conjunction with the School of Business)

The Department also offers:

- a Ph.D. program in Ergonomics and Human Factors

- a Ph.D. in Industrial Engineering.

Masters

Masters Program in Industrial Engineering

- M.S. in Industrial Engineering (p. 511)
- M.S. in Environmental Health and Safety (p. 511)
- M.S. in Management of Technology (p. 512)
- M.S.I.E./M.B.A. Executive Program (p. 512)

Doctoral

Doctoral Program in Industrial Engineering

- Ph.D. in Industrial Engineering (p. 511)
- Ph.D. in Ergonomics and Human Factors (p. 513)

M.S. in Environmental Health and Safety

Master of Science in Environmental Health and Safety

An interdisciplinary **M.S. degree program in Environmental Health and Safety** are offered through the Department of Industrial Engineering in collaboration with the School of Medicine. These programs of study are individually structured to fit the student's interests and career objectives.

1. The program will consist of a 36 credit hours in the areas of environmental health and safety.

2. Core Courses		
EPH 601	Medical Biostatistics I	3
EPH 602	Biostatistics II	3
EPH 621	Fundamentals of Epidemiology	3
EPH 641	Integrated Aspects of Environmental Health	3
IEN 651	Accident Prevention Systems	3
IEN 657	Ergonomics And Human Factors Engineering	3
IEN 757	Ergonomics and Occupational Biomechanics	3
IEN 794	Master's Project	3
Electives (4 courses)		12
Total Credit Hours		36

- 1.

Master of Science in Occupational Ergonomics and Safety

An interdisciplinary **M.S. degree program in Occupational Ergonomics and Safety** are offered through the Department of Industrial Engineering in collaboration with the School of Medicine. These programs of study are individually structured to fit the student's interests and career objectives.

1. The program will consist of a 36 hour Master's degree program in Occupational Ergonomics and Safety in the Department of Industrial Engineering. The program will include 33 hours of course work in the areas of ergonomics and safety and 3 hours on internship in an

industrial or health care related facility. Research areas will include musculoskeletal injuries, occupational stress, automation and design for older workers and special populations.

2. Common Core Courses		
IEN 651	Accident Prevention Systems	3
IEN 657	Ergonomics And Human Factors Engineering	3
IEN 658	Industrial Hygiene I	3
IEN 712	Design of Experiments	3
IEN 757	Ergonomics and Occupational Biomechanics	3
IEN 758	Ergonomics and Special Populations	3
IEN 794	Master's Project	3
EPH 621	Fundamentals of Epidemiology	3
Electives (9 credits)		9
Internship		3
Total Credit Hours		36

M.S. in Industrial Engineering

1. The Master of Science degree in Industrial Engineering includes the following areas of concentration:
 - a. Engineering Management
 - b. Ergonomics and Human Factors
 - c. Health Care Systems
 - d. Management of Technology
 - e. Manufacturing Engineering
 - f. Occupational Health and Safety
 - g. Operations Research
 - h. Productivity Engineering
 - i. Quality
2. Students (other than University of Miami graduates) applying for graduate admission to the College should submit three letters of recommendation from individuals familiar with the applicant's abilities and background. Students who hold a bachelor's degree in a field other than Industrial Engineering may be admitted to the graduate program and to candidacy upon completion of appropriate undergraduate deficiency courses, in addition to the regular requirements for the graduate degree. A student's overall program is planned by the student and the Graduate Advisor.
3. Requirements for the Master of Science Degree (both thesis and non-thesis option):
 - a. An approved integrated program with a minimum of 30 credit hours with a 3.0 average or better on all credit hours attempted and no single grade below "C" at the University of Miami while a graduate student.
 - b. At least 12 course credit hours must be at the 700 level.

Thesis Option¹		
5 Common Core Courses		
IEN 712	Design of Experiments	3
IEN 742	Linear Programming and Extensions	3
IEN 757	Ergonomics and Occupational Biomechanics	3

IEN 761	Engineering Cost Management	3
or IEN 763	Project Management Techniques	
or IEN 764	Supply Chain Management	
IEN 765	Advanced Production Systems	3
3 Elective Courses		9
IEN 810	Master's Thesis	6
Total Credit Hours		30

Non-Thesis Option ¹		
5 Common Core Courses		
IEN 712	Design of Experiments	3
IEN 742	Linear Programming and Extensions	3
IEN 757	Ergonomics and Occupational Biomechanics	3
IEN 761	Engineering Cost Management	3
or IEN 763	Project Management Techniques	
or IEN 764	Supply Chain Management	
IEN 765	Advanced Production Systems	3
4 Elective Courses		12
IEN 794	Master's Project	3
Total Credit Hours		30

¹ Note: All courses are 3 credit hours unless otherwise indicated

Notes:

- i In addition to the above required courses, the student will have to take other graduate level elective courses to fulfill the degree requirements. A list of approved electives is maintained by the Graduate Advisor in the Department of Industrial Engineering. Substitution of courses is allowed, but must be approved by the Graduate Advisor and the Department Chairman.
 - ii 500-level courses are open to advanced undergraduates and to graduate students; 600-level courses are open only to graduate students.
 - iii 500-level and 600-level courses are also open to qualified graduate students majoring in other disciplines.
4. The Department of Industrial Engineering offers a 5-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering Program (BSIE/MSIE Program).
- a. This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering.
 - b. The special conditions for this 5-Year BSIE/MSIE Program are as follows:
 - i The student must declare his/her intent to participate before the end of their Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
 - ii A student wishing to withdraw from the 5-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 694 in order to get his/her BSIE degree.

iii To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.

iv The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all requirements are satisfied.

c. More details can be found in the Undergraduate bulletin (p. 267).

M.S. in Management of Technology

Master of Science in Management of Technology is an academically challenging program that allows you to gain significant training in both technology and management.

1. It is a 36 credit hour curriculum with 12 credits in Technology oriented courses and 12 credits in Management topics
2. A bachelor's degree from a regionally accredited university with a GRE or GMAT score that is acceptable.

3. Industrial Engineering Core Courses		
IEN 672	Management of Technological Innovation	3
IEN 712	Design of Experiments	3
IEN 761	Engineering Cost Management	3
or IEN 764	Supply Chain Management	
or IEN 772	Strategic Management of Technological Innovation.	
Management Core Courses		
MGT 651	Behavioral and Organizational Systems	3
MGT 658	Strategic Management	3
MGT 660	Leadership and Motivation in Organizations	3
Industrial Engineering Electives (3 courses) - 600 or 700 level		9
Management Electives (3 courses) - 600 or 700 level		9
Total Credit Hours		36

M.S.I.E./M.B.A. Executive Program

Dual **MSIE/MBA** Weekend Executive program makes it possible to earn two separate degrees at the same time, a Master of Business Administration Degree (MBA) and a Master of Science in Industrial Engineering (MSIE).

1. It is a 57 credit hour program that starts every January and is completed in two years and one semester. Classes are held on Saturdays and during intersessions.
2. A bachelor's degree in any engineering discipline, an acceptable GRE score, and at least 3 years of work experience is required.

3. MSIE Courses		
IEN 672	Management of Technological Innovation	3
IEN 712	Design of Experiments	3
IEN 742	Linear Programming and Extensions	3
IEN 757	Ergonomics and Occupational Biomechanics	3
IEN 763	Project Management Techniques	3
IEN 765	Advanced Production Systems	3
IEN 794	Master's Project	3

MBA Courses		
ACC 607	Financial Accounting & Reporting	3
ACC 608	Managerial Accounting	3
BSL 695	Legal Implications in Executive Decision Making	3
BTE 621	Management Information Systems	3
ECO 690	Essentials of Economic Theory	3
FIN 602	Fundamentals of Finance	3
MGT 600	Managing Responsible Behavior in Organizations	3
MGT 653	Operations Management	3
MGT 658	Strategic Management	3
MKT 660	Foundations of Marketing Management	3
Electives (2 courses)		6
Total Credit Hours		57

- Safety Engineering,
- Biomechanics, and
- Statistics & Regression analysis

- Upon completing the course requirements, passing the qualifying exams, and successfully defending the Ph.D. proposal, the student is eligible for admission to the Ph.D. candidacy.
- Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. Dissertation committee chair will decide on the dissertation committee members. The Dissertation committee will consist of not less than four members, three from the Department's graduate faculty, one from outside the Department. The chairman has to be a member of the graduate faculty. The duties of the Dissertation Committee are:
 - To consult with and to advise students on their research.
 - To meet, at intervals, to review progress and expected results.
 - To read and comment upon the draft dissertation.
 - To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.
 - The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.
- There are no foreign language requirements for the Ph.D. degree.

Ph.D. in Ergonomics and Human Factors

- The Department offers a Ph.D. in Ergonomics and Human Factors for students with a background in engineering and/or related sciences.
- General requirements for award of the Doctor of Philosophy degree include:
 - 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D.
 - At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken.
- Course work requirements depend on the student's background, and are established by the Graduate Advisor and the Department Chairman.
- To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.
- Once a student has completed all course and required research credit hours, he or she must enroll in "Research in Residence" status until the degree has been granted. "Research in Residence" status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.
- A written qualifying examination is to be taken by each doctoral degree candidate during the first year of graduate work. The department may specify that the student must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the Graduate Advisor notifies the Department Chairman that the student has passed or failed the examination. A student who fails the examination may be permitted to retake it, with the permission of the Graduate Advisor and the Chairman. Qualifying examinations normally will not be given during the summer months. The applicant must hold a 3.0 average on all credit hours attempted with no single grade below "C" at the University of Miami while a graduate student.
- Each student in Ph.D. program in Ergonomics and Human Factors has to take and pass 5 qualifying exams in the following areas:
 - Ergonomics and Human Factors,
 - Industrial Hygiene,

Ph.D. in Industrial Engineering

- The Department offers a Ph.D. in Industrial Engineering for students with a background in engineering.
- General requirements for award of the Doctor of Philosophy degree include:
 - 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D.
 - At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken.
- Course work requirements depend on the student's background, and are established by the Graduate Advisor and the Department Chairman.
- To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and permission to re-enter must be granted.
- Once a student has completed all course and required research credit hours, he or she must enroll in "Research in Residence" status until the degree has been granted. "Research in Residence" status is considered full time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School.
- A written qualifying examination is to be taken by each doctoral degree candidate during the first year of graduate work. The department may specify that the student must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the Graduate Advisor notifies the Department Chairman that the student has passed or failed the examination. A student who fails the examination may be

permitted to retake it, with the permission of the Graduate Advisor and the Chairman. Qualifying examinations normally will not be given during the summer months. The applicant must hold a 3.0 average on all credit hours attempted with no single grade below "C" at the University of Miami while a graduate student.

7. Each student in the Ph.D. program in Industrial Engineering has to take and pass 5 qualifying exams in the following areas:
 - Management of Technology,
 - Ergonomics & Biomechanics,
 - Operations Research,
 - Manufacturing Engineering, and
 - Statistics & Regression analysis.
8. Upon completing the course requirements, passing the qualifying exams, and successfully defending the Ph.D. proposal, the student is eligible for admission to the Ph.D. candidacy.
9. Upon passing the qualifying exams, the student in consultation with his/her selected Ph.D. Dissertation committee chair will decide on the dissertation committee members. The Dissertation committee will consist of not less than four members, three from the Department's graduate faculty, one from outside the Department. The chairman has to be a member of the graduate faculty. The duties of the Dissertation Committee are:
 - a. To consult with and to advise students on their research.
 - b. To meet, at intervals, to review progress and expected results.
 - c. To read and comment upon the draft dissertation.
 - d. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.
 - e. The candidate is well advised to have a final acceptable typescript of the dissertation in the hands of each member of his/her committee at a time reasonably in advance of the final defense of the work.
10. There are no foreign language requirements for the Ph.D. degree.

- Nano Mechanics
- Heat Transfer
- Hydrogen Energy
- Materials Science,
- Internal Combustion Engines
- Controls and Design
- Aerodynamics and CFD
- Nano-Bio-Systems
- Fuel Cells

3. It is expected that each graduate student will indicate early in his/her graduate work (within the first year), the particular area in which he/she intends to concentrate his/her efforts as well as the faculty advisor for dissertation.

500 level courses are open to advanced undergraduates and to graduate students; 600 level courses are open only to graduate students.

Clean Energy Research Institute

1. The Clean Energy Research Institute in the Department of Mechanical and Aerospace Engineering acts as the focal point of energy and environment related activities in the College of Engineering.
2. Its goals are:
 - to conduct research and to generate research proposals to investigate energy and environmental problems;
 - to organize seminars, workshops and conferences using researchers within and without the University;
 - to assemble, compile, publish and disseminate information on every aspect of energy and environmental problems; and
 - to cooperate with other organs of the University, other academic institutions, government and private organizations in connection with the above listed activities.
3. The current activities of the Institute include research into hydrogen as a clean, inexhaustible synthetic fuel, environmental damage caused by fossil fuels, global warming and its remediation, instabilities in boiling systems, solar cooling and heating, hybrid solar collectors, remote sensing applied to energy related problems and solar energy, system optimization and reliability of solar and wind energy systems, and organization of national and international conferences and symposia on energy and environmental problems.

Mechanical and Aerospace Engineering

Dept. Code: MAE

Degree Programs

The Department of Mechanical and Aerospace Engineering offers courses and provides facilities for two programs of graduate study and research in Mechanical Engineering, leading to the degrees of:

- Master of Science
 - Doctor of Philosophy
1. The program of study must reflect the importance of underlying principles of the physical sciences and mathematical analysis to all phases of modern mechanical engineering.
 2. Within the department, specializations are available in:
 - Fluid Mechanics
 - Biomechanics
 - Solid Mechanics
 - Composite Materials
 - Optimization and Reliability

Research Laboratories

- Advanced Nano Systems Laboratory
- Aerospace Materials Simulation Laboratory
- Center for Advanced Multi-Scale Studies
- Computational Fluid Dynamics Laboratory
- Fuel Cells Laboratory
- Integrated Nano-Bio-Systems Laboratory
- Internal Combustion Laboratory
- Materials Laboratory
- Measurements Laboratory
- Multi-Functional Composite Materials Laboratory
- Optimization and Reliability Laboratory
- Robotics and Intelligent Systems Engineering Laboratory
- Thermo-Fluid Mechanics Laboratory

- Tissue Biomechanics Laboratory
- Wind Tunnel Laboratory

Masters

Masters Programs in Mechanical and Aerospace Engineering

- M.S. in Mechanical Engineering (p. 515)

Doctoral

Doctoral Program in Mechanical and Aerospace Engineering

- Ph.D. in Mechanical Engineering (p. 515)

M.S. in Mechanical Engineering

1. One academic year, or equivalent, spent in full time graduate study will be the minimum time necessary for a student to fulfill the requirements for the degree of Master of Science in Mechanical Engineering.
2. General requirements for the M.S. degree are listed under the Engineering heading of this section and in the general information of this Bulletin.
3. Students applying for acceptance to degree status must comply with the general requirements of the Graduate School.
4. Both a 30 credit hour thesis option and a 30 credit hour non-thesis option are available.
 - a. The student taking the Thesis Option must take an oral examination in defense of the thesis.
 - b. The student taking the Non-Thesis Option must complete a 3 credit hour Graduation Project at the end of the course program.
 - c. The Master of Science Degree in Mechanical Engineering (Management Option) can only be taken under the Non-Thesis Option.
 - i This degree specialization combines 15 credit hours selected from graduate business courses with 15 credit hours in a graduate engineering area of concentration.
 - ii An undergraduate degree in engineering is required.

Ph.D. in Mechanical Engineering

1. The program in the Department of Mechanical and Aerospace Engineering leading to the degree of Doctor of Philosophy complies in full with the regulations of the Graduate School concerning admission, residence requirements, qualifying and final examinations and the dissertation.
2. There is no foreign language requirement.
3. All candidates for the Ph.D. degree are expected to complete an integrated program of studies in mechanical engineering, mathematics, physics and/or chemistry in preparation for the Qualifying Examination.
4. A qualifying examination is to be taken by each doctoral degree student within the first year. In the qualifying examination, the student is expected to demonstrate his/her competence in certain basic courses appropriate to modern mechanical engineering to the satisfaction of the department. A Ph.D. student will be admitted to

candidacy after passing the qualifying examination as well as the defense of dissertation proposal.

5. One or two years beyond admittance to candidacy will usually be found necessary for the completion of an acceptable dissertation, whereupon the student will be required to pass the Final Oral Defense of the Dissertation.
6. The candidate may, if he/she so desires, pursue for his/her dissertation an investigation in connection with any of the research projects in progress in the Mechanical and Aerospace Engineering Department or, in the case of interdisciplinary programs, in other Colleges/Schools such as the School of Marine and Atmospheric Science or the Medical School.

Ocean Engineering

About the Program

The University of Miami has a long history in Ocean Engineering. The University of Miami's College of Engineering together with the Rosenstiel School of Marine and Atmospheric Science offered a Master of Science degree in Ocean Engineering. The program and others of its kind in the nation, were popular in the 1970s and 1980s, but fell into decline during the 1990s as national circumstances and priorities changed. In particular, opportunities in ship building and underwater acoustics, two key sectors in the field, diminished significantly. The activity in the field at UM has been primarily a PhD focused program since the late 1990s.

However, In the past decade, several major incidents – the 2010 Deep Water oil spill in the Gulf of Mexico, a series of devastating hurricanes in 2003-2005 and the Japan Tsunami have turned our collective attention to the vulnerability of the nation's coastal infrastructure. Furthermore there have been significant demands for an increased emphasis on port and harbor security in the post- September 11 era. These events have led to a revival in the field of Ocean Engineering, albeit with a new focus and broader scope. The revival of the MS in Ocean Engineering was approved by the President of the University of Miami was approved for the fall semester of 2014. We are accepting applications for program beginning on November 1, 2013.

OCEAN ENGINEERING

Ocean Engineering concentrates on problems associated with human interaction with the ocean.

1. The ocean engineer combines competence as an engineer with both a practical experience in and theoretical understanding of the ocean.
2. The Ocean Engineering program, offered jointly with the Rosenstiel School of Marine and Atmospheric Science, is intended to lay the foundation of this competence, experience and understanding.
3. The areas of faculty specialization in this program include coastal engineering, off-shore engineering, structures, turbulence, computer modeling of fluids, acoustics, remote sensing and maritime security.

For further information click here. (<http://www.rsmas.miami.edu/academics/graduate-programs/degrees/master-of-science-in-ocean-engineering/about-the-program>)

Marine and Atmospheric Science

<http://www.rsmas.miami.edu/grad-studies>

Introduction

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation's leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School's present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired, and additional buildings were constructed to accommodate new wide-ranging projects. In 1969 the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution made through the Rosenstiel Foundation to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of 70 scientists who conduct sponsored research while offering graduate studies leading to the Master of Professional Science, Master of Science and Doctor of Philosophy degrees. The School offers curricula in applied marine physics, marine and atmospheric chemistry, marine affairs and policy, marine biology and fisheries, marine geology and geophysics, meteorology and physical oceanography, and ocean sciences. The School also offers undergraduate programs leading to the Bachelor of Science in Marine and Atmospheric Science degree.

The Rosenstiel School uses multiple laboratory and high-performance computing facilities and a state-of-the-art catamaran.

The brand new Marine Technology and Life Sciences Seawater Complex (MTLSSC), opened in 2014, houses studies that rely on seawater for observing air-sea interactions in a controlled environment and for holding, spawning and rearing marine organisms. This complex is the centerpiece of an updated Rosenstiel School campus.

The catamaran, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School has been in service since 2000. The 96-foot-long catamaran is able to explore the deep ocean as well as normally inaccessible shallow environments such as reefs, mangroves and grassbeds.

Degree Programs

The Rosenstiel School is made up of seven academic programs. These are:

- Applied Marine Physics
- Marine and Atmospheric Chemistry

- Marine Affairs and Policy
- Marine Biology and Fisheries
- Marine Geology and Geophysics
- Meteorology and Physical Oceanography
- Ocean Sciences

Please note the Rosenstiel School is currently restructuring all graduate programs to provide broader opportunities and greater flexibility to our students. The new and restructured graduate programs will be effective Spring 2016. Please visit www.rsmas.miami.edu for more details.

The Rosenstiel School of Marine and Atmospheric Science offers three graduate degree programs leading to the Master of Professional Science (M.P.S.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.) degrees. M.S./Ph.D. students can pursue degrees in applied marine physics, marine and atmospheric chemistry, marine biology and fisheries, marine geology and geophysics, meteorology and physical oceanography, and ocean sciences. M.P.S. students can enroll in degree tracks in marine affairs and policy, marine biology and fisheries, meteorology and physical oceanography, and ocean sciences. The division of Marine Affairs and Policy offers interdisciplinary Master of Professional Science and Master of Science degrees only.

In conjunction with the University of Miami School of Law, the Division of Marine Affairs and Policy at the Rosenstiel School also offers a joint degree program in Law and Marine Affairs. Upon completion of this program, a student earns a Juris Doctor degree from the School of Law and a Master of Professional Science in Marine Affairs and Policy from Rosenstiel.

Admission requirements and undergraduate preparation recommendations are both available at www.rsmas.miami.edu.

Degree Requirements

The Master of Professional Science (MPS) Program

The Master of Professional Science (M.P.S.) degree is offered in the disciplines of Marine Affairs and Policy (Aquaculture Management, Coastal Zone Management, Coastal Sustainability, Exploration Science, Marine Conservation, and Underwater Archaeology), Marine Biology and Fisheries (Fisheries Management and Conservation, Marine Mammal Science, Tropical Marine Ecosystem Management, and Oceans and Human Health), Meteorology and Physical Oceanography (Broadcast Meteorology, Computational Meteorology and Oceanography, Weather, Climate and Society, and Weather Forecasting), and Ocean Sciences (Applied Remote Sensing and Natural Hazard and Catastrophes). It is expected that the normal time for completion of degree requirements for the Master of Professional Science degree will be ~ 15 months of full-time study.

Credit Hour Requirements

Students in the Master of Professional Science Program are required to complete 24 course credit hours and 6 internship credit hours. Within each track, there are compulsory classes and electives. Coursework is multidisciplinary and thus will be accepted from multiple departments. As the terminal part of the degree, students must complete an internship with an approved agency, institution, or business, culminating in a final report.

Comprehensive Examination

A comprehensive examination is required of all M.P.S. students after completing at least 18 course credit hours and prior to beginning an internship. In most cases, the exam will be written and will be based on M.P.S. coursework or the common body of knowledge relevant to each track. However, each division determines the content and form of the examination and establishes the test date for its students in a given year-class according to general school guidelines. In the event of a failure, a student may be re-examined once, upon the advice of the student's advisor and at the discretion of the faculty of the division. If granted, the re-examination must be given before the end of the following semester. The Graduate Studies Office should receive written notification of the examination results. Students who fail the re-examination are subject to dismissal from the school.

Internship

Each student will be required to complete an internship with an organization engaged in some activity associated with marine and atmospheric science and identify an Internship Supervisor. Internships can be either paid or unpaid by the organization, or students can complete the internship by formal participation in a University sponsored program. An internship proposal, including contact information for the Internship Supervisor, must be submitted to the academic advisor and mentor for approval before the internship can begin.

Internship Report and Oral Presentation

The final grade will be based on a written report and an oral presentation. The internship report is not a summary of involvement but rather a contributory assessment of the experience, including developmental insight and a summary of any research performed. Internship report guidelines will be provided.

Conference Attendance

Though not mandatory, M.P.S. students are strongly encouraged to attend a scientific conference during their academic residency at RSMAS.

The M.S. Program

The Master of Science degree is offered in the disciplines of applied marine physics, marine affairs and policy, marine biology and fisheries, marine and atmospheric chemistry, marine geology and geophysics, or meteorology and physical oceanography. It is expected that the normal time for completion of degree requirements for the Masters of Science degree will be two years of full-time study.

Credit Hour Requirements

24 graduate course credit hours are required for the Master of Science degree. In addition, the student must enroll for a total of 6 credit hours of thesis research (710). All students are required to take at least one course outside the division of residence.

Comprehensive Examination

A comprehensive examination is required of all students. Each division determines the content and form of the examination and establishes a test date for its students according to general School guidelines. In the event of a failure, a student may be reexamined once, upon the advice of the student's committee and at the discretion of the faculty of the Division. If granted, the reexamination must be given before the end of the following semester. Students who fail the re-examination are subject to dismissal from the School.

Thesis

A thesis is normally required for the Master of Science degree in marine and atmospheric science. A public oral defense of the thesis must take place. The thesis committee must consist of at least three members, one of whom is a regular member of the Graduate Faculty of the University; one member must be from outside the division.

The Ph.D. Program

The Doctor of Philosophy degree is offered in applied marine physics, marine biology and fisheries, marine and atmospheric chemistry, marine geology and geophysics, and meteorology and physical oceanography. It is expected that the total time to complete the requirements for the Ph.D. degree will normally be four years of full-time study from the date of receipt of the M.S. degree or, if the M.S. is bypassed, five years of full-time study from the date of admission with a bachelor's degree.

Credit Hour Requirements

A total of 60 credit hours are required for the Ph.D. and not less than half of the total credit hours must be in work open only to graduate students (i.e. 600 level or above). At least 24 of the 60 credit hours must be course credit hours taken in residence at the University of Miami, and may include those course credit hours taken as part of the Master of Science degree. A minimum of 12 dissertation research credit hours must be taken; however, the course credit hour and research credit hour requirements needed are determined by the individual division. Students transferring into the school with a Master's of Science degree are normally given credit hour for 24 course credit hours. However, individual divisions may require additional course credit hours to remove deficiencies. All students entering the Ph.D. program without a master's degree are required to take at least one course outside the division of residence.

Dissertation Committee

The dissertation committee must consist of at least four members; this includes the committee chair, who shall be a member of the division or share the chair duties with a co-chair from the committee and be a regular member of the Graduate Faculty. Of the remaining members, two shall be from the Graduate Faculty, and one member of each Ph.D. committee must have their primary affiliation outside of RSMAS and that member must also have a Ph.D. degree. (Adjunct and secondary appointments are considered outside if their primary affiliation is not RSMAS).

Comprehensive Examination

A comprehensive examination, oral, written or both, is required of all RSMAS students. In the event of a failure, a student may be re-examined once, upon the advice of the student's committee and at the discretion of the faculty of the division. Students who fail the re-examination are subject to dismissal from the School.

Qualifying Examination

A written qualifying examination is required of all students admitted to the doctoral program. The student's committee will normally prepare and administer the examination within the guidelines established by the faculty of the School and of each division. In the event of a failure, a student may be reexamined once, upon the recommendation of the student's committee and at the discretion of the faculty of the division. If granted, the reexamination must be given before the end of the following semester. Language and other research tools requirements, if applicable,

must be completed prior to taking the qualifying examination. Students who fail the re-examination are subject to dismissal from the School.

Dissertation Proposal

An outline of the dissertation containing the following must be approved by the student's committee and submitted to the RSMAS Graduate Studies Office with a copy to the division academic committee:

1. tentative title
2. statement of the problem and objectives
3. methods of attacking the problem, including equipment and facilities required
4. timetable

A "Proposal Approval" form must accompany the proposal and be signed by the members of the student's committee.

Admission to Candidacy

Upon completion of the following requirements, the student is admitted to candidacy:

1. have an approved committee on file in Graduate Studies
2. successfully pass the comprehensive examination
3. successfully pass the qualifying examination
4. complete the language requirement, if any
5. submit the dissertation proposal
6. have a 3.0 average in all credit hours earned (≥ 12 credit hours)
7. remove all "I" or deficiencies

An application for Admission to Candidacy must be completed. All doctoral students must be admitted to candidacy at least one semester prior to the one they intend to graduate.

Dissertation

A dissertation is required of all doctoral students at the Rosenstiel School. A public oral defense of the dissertation is required. A student must be admitted to candidacy prior to the defense and registered in the semester that he/she defends. Each dissertation must be accompanied by three originals of the Certificate of Approval. This form must be signed by all members of the student's committee and the RSMAS Associate Dean of Graduate Studies.

No student gains the right to be recommended for the degree simply by fulfilling requirements. The right to recommend to the degree is reserved for the student's Committee. Any student who fails to meet the cumulative grade point average requirement and other academic progress standards established by the University and the School is subject to dismissal from the graduate program.

Applied Marine Physics

Dept. Code: AMP

Degree Programs

Master of Science and Doctor of Philosophy degrees in applied marine physics are offered by the Applied Marine Physics Division of the Rosenstiel School of Marine and Atmospheric Science. An approved interdisciplinary program is required for the M.S. degree in applied marine physics which consists of a minimum of 30 credit hours at the graduate level with an average grade of "B" or better and no grade below "C." The

30 credit hours are divided among 24 credit hours in courses and 6 credit hours for thesis research. At least 6 of the required course credit hours must be at the 600 level. For the Ph.D. degree, 60 graduate credit hours are required. These are divided among a minimum of 27 credit hours in courses (9 of which must be at the 600 level) and a minimum of 12 credit hours in dissertation research. Students may include up to 24 credit hours for course taken as part of a Master of Science degree (validation of previous credit hour courses is necessary).

Marine Affairs and Policy

- Dept. Code: MAF

Degree Programs

The Division of Marine Affairs and Policy accepts highly qualified students who wish to pursue an academic degree program (M.P.S. or M.S.) that combines a basic curriculum in marine science with a complementary program in a non-marine science discipline. Student programs are individually designed, and the M.S. curriculum requires a thesis. The program is intended to provide the student with a broadened perspective of marine issues and problem-solving abilities. MAF offers specializations in Aquaculture Management, Coastal Zone Management, Coastal Sustainability, Marine Conservation, Exploratory and Citizen Science, and Underwater Archaeology.

Current division research and teaching focus on integrated coastal zone management, marine resource economics, political and environmental ecology, coastal and ocean law and policy, fisheries and aquaculture management, environmental planning and environmental impact assessment, underwater marine cultural resource management and marine geographic information systems.

M.S.

The M.S. in Marine Affairs and Policy program is geared to students who are interested in the application of science and technology in issues of marine resource management and are willing to carry out independent investigation and to present the results in a thesis.

The M.S. has two tracks:

- the Science/Policy track
- the Policy track.

Students who apply to the Science/Policy track are required to have a B.S. degree in one of the pure sciences. The M.S. curriculum will include courses and training, which will address current marine policy issues and policy analysis techniques. The M.P.S. program is geared to students with diverse academic backgrounds who are interested in careers related to marine resource management and policy and who seek advanced training in marine and atmospheric science.

M.P.S.

There are six Marine Affairs and Policy (<http://mps.rsmas.miami.edu/> requirements) (MAF) tracks for the Master of Professional Science (http://mps.rsmas.miami.edu) degree (M.P.S.).

These are:

1. Aquaculture (<http://mps.rsmas.miami.edu/degree-program/aquaculture/>): The Professional Masters Program in Aquaculture

focuses on the environmental, technological, social, economic, legal, and political aspects of sustainable aquaculture.

2. Coastal Sustainability (<http://mps.rsmas.miami.edu/degree-program/coastal-sustainability>): This track provides students with advanced training in the expanding field of sustainability, with a combined focus on the practical aspects of systems management and the theoretical understanding of whole-systems design and coastal resiliency.
3. Coastal Zone Management (<http://mps.rsmas.miami.edu/degree-program/coastal-management>): Students will be introduced to the legal and governance frameworks on topics such as coastal fisheries management, marine protected areas, port management, tourism development, environmental impact assessment, and oil exploration.
4. Exploration Science (<http://mps.rsmas.miami.edu/degree-program/exploration-science>): Exploration Science is the applied practice and study of field research using a variety of methods, technologies, and approaches to drive question-based scientific endeavors.
5. Marine Conservation (<http://mps.rsmas.miami.edu/degree-program/marine-conservation>): The goal of the track is to advance conservation efforts, scientific literacy and communication, public outreach and integration, and education within the marine realm. Practical aspects of the program will vary between individuals but may include exposure to field methods and techniques, GIS and remote sensing of shallow water marine environments, the development of environmental impact statements, coastal law, the development of social media, scientific communication, and statistics for environmental management.
6. Underwater Archaeology (<http://mps.rsmas.miami.edu/degree-program/underwater-archaeology>): This track focuses on the management of underwater cultural heritage (MUCH), and will introduce participants to the legal and governance frameworks.

B.A. / M.P.S.

Marine Affairs and Policy, in cooperation with the Undergraduate Marine and Atmospheric Science Program, also offers a five-year B.A./M.P.S. Program in Marine Affairs. This program enables qualified students to earn a B.A. in Marine Affairs in four years with the opportunity to earn an M.P.S. with only one additional year. Conditional acceptance to the MPS program is based on the student's GPA at the end of their sophomore year. Students must then take GRE exams and apply for acceptance to the graduate program at Rosenstiel during their junior year.

M.P.S. / J.D.

The Division of Marine Affairs and Policy at the Rosenstiel School and the University of Miami School of Law offer a Joint degree program in Law and Marine Affairs. Upon completion of this program, a student earns a Juris Doctor degree from the School of Law and a M.P.S. in Marine Affairs from Rosenstiel. A student may complete requirements for both degrees within three and one-half years in an intensive program of six semesters and two full summers. This program is geared toward students who want a career in the field of law with a specialization in marine and environmental issues.

Marine Biology and Fisheries

- Dept. Code: MBF

Degree Programs

Students admitted to the program in the Division of Marine Biology and Fisheries are required to have a strong undergraduate preparation in the life sciences, with additional coursework in mathematics (calculus), physics, and chemistry (through organic). The program offers a series of study-options leading to the M.P.S., M.S. or Ph.D. degrees. These are intended to guide the student in a comprehensive study of marine organisms and the marine environment, and to develop areas of specialization within the marine biological sciences. Students are strongly encouraged to contact the faculty member whose area of research is of interest to them.

Areas of faculty interest include biological oceanography, biochemistry and molecular biology, ecology, fisheries, microbiology, physiology, toxicology, systematics, behavior and ecosystem and fisheries management. Students are not restricted to studies in any one study-option, and may (in consultation with their faculty advisor and/or committee) tailor their academic programs to suit individual interests in more than one area of faculty expertise.

M.S. / Ph.D.

Within the Division of Marine Biology and Fisheries there are four major academic tracks for the M.S. and Ph.D. degrees, each of which has one or more sub-specializations. These are:

1. Biological Oceanography, which has an emphasis on near shore and pelagic marine life;
2. Fisheries Sciences, which focuses on fisheries stock assessment, population modeling, and fisheries management;
3. Marine Biomedical Sciences, which has subspecialties in Marine Molecular Biology and Genetics, Marine Diseases, and Marine Physiology and Biochemistry/Toxicology; and
4. Ecological Sciences and Coastal Marine Biology.
This latter academic track offers specialization in Marine Biology, Coral Reef and Coastal-Marine Ecology, and Ecological Systems and Environmental Management.

Individual curricula may blend coursework from one or more tracks depending on the specific interests of the student.

M.P.S.

There are four Marine Biology and Fisheries tracks (<http://mps.rsmas.miami.edu/requirements>) for the Master of Professional Science (<http://mps.rsmas.miami.edu>) degree (M.P.S.).

These are:

1. Fisheries Management and Conservation (<http://mps.rsmas.miami.edu/degree-program/fisheries-conservation-management>): this track allows students to develop the professional skills required to be a fisheries scientist with curriculum options in various relevant areas of interest, such as fisheries management, fisheries surveys, and quantitative fisheries.
2. Marine Mammal Science (<http://mps.rsmas.miami.edu/degree-program/marine-mammal-science>): students in this degree track will prepare for employment in marine mammal management (including associated ecosystems), population assessments, acoustics, and care.

- Oceans and Human Health (<http://mps.rsmas.miami.edu/degree-program/oceans-human-health>): With greater use of marine resources, there is a growing concern over the impact of the oceans on human health via water and vector-borne infectious diseases. In this track, students learn to effectively assess these impacts and develop management tactics for future remediation.
- Tropical Marine Ecosystem Science (<http://mps.rsmas.miami.edu/degree-program/tropical-marine-ecosystem>): this track provides students with advanced training in the theoretical aspects of tropical marine ecology, as well as the practical aspects needed to begin a career in this field.

Marine Geology and Geophysics

- Dept. Code: MGG

Degree Programs

The undergraduate student wishing to prepare for graduate work in marine geology and geophysics must be well trained in the basic sciences. According to the special interests of the individual, the undergraduate major and minor should be in geology, physics, chemistry, and/or mathematics.

The Division of Marine Geology and Geophysics offers M.S. and Ph.D. programs in the following broad areas:

- Environmental Geology and Geochemistry
- Sedimentary Systems and Marine Geology
- Paleoclimatology and Global Change
- Igneous Petrology and Geochemistry
- Geophysics
- Geodesy

Within each discipline, students have considerable flexibility in choice of courses, and "cross-track" courses are possible for students with special interests. Interactions with other divisions are particularly encouraged.

Marine and Atmospheric Chemistry

- Dept. Code: MAC

Degree Program

The program covers the chemistry of the atmosphere and oceans, including geochemical, photochemical and biochemical processes. Undergraduate training should be in chemistry, physics, biology and mathematics; also useful may be courses in geology, biochemistry, oceanography and meteorology.

New students are evaluated for their knowledge of chemistry; deficiencies are corrected by directed study and/or course work and must be remedied within one year. New students can be admitted to the M.A. or the M.S. program, or directly into the PhD program, even without a prior M.S. degree.

Students are assigned a faculty advisor when they are accepted into MAC, and before the end of the second year they form a supervisory committee. The advisor and committee discuss with the student a course of study and research for the student. Students without an MS degree take a written comprehensive examination after course work is

complete. The comprehensive exam tests the basic knowledge of marine and atmospheric science, and is based on course material taken by the student. After passing the comprehensive exam, the student prepares a dissertation research proposal which usually includes an abstract, background material, hypothesis and/or list of objectives, methods, preliminary data, and bibliography. The dissertation research proposal needs to be approved by the advisor and supervisory committee. Ph.D. students also take a written qualifying exam. The qualifying examination is set by the advisor and supervisory committee and is taken after their approval of the dissertation proposal. The qualifying exam tests the student's knowledge of the chosen research topic. An oral examination may be required after the written examination. Students who twice fail the qualifying examination will receive an MS if they present and successfully defend a written thesis. For all students, the seminar (MAC 770) is taken twice for credit hour. However, each student must give one seminar per year and they must attend seminars regularly.

Meteorology and Physical Oceanography

- Dept. Code: MPO

Degree Programs

The Division of Meteorology and Physical Oceanography (MPO) of the Rosenstiel School of Marine and Atmospheric Science (RSMAS) is engaged in research and graduate instruction in the physical processes governing the motion and composition of the ocean and atmosphere. The program ranges from direct observation to theoretical and numerical modeling of the earth-atmosphere system.

Three types of degrees are awarded by the Division:

- Master of Science,
 - which requires 30 credit hours, including 24 credit hours in courses and 6 research credit hours;
- Doctor of Philosophy,
 - which requires 60 credit hours, including a minimum of 30 course credit hours and a minimum of 12 research credit hours; and
- the Master of Professional Science (<http://mps.rsmas.miami.edu>),
 - which requires 30 credit hours, including 24 course credit hours and 6 internship credit hours.

Students applying for admission to graduate study in the Division of Meteorology and Physical Oceanography should have a solid background in mathematics and physics or engineering. Once admitted, students in this Division will take courses in both Meteorology and Physical Oceanography in order to develop an understanding of the ocean and the atmosphere as closely related dynamical systems.

M.S. / Ph.D.

In the first year, students will take 5-6 courses, followed by a comprehensive exam at the end of the spring semester. Based on the results of this exam, students may be given the option to enter the Ph.D. program directly, to enter the M.S. program (leading to subsequent entrance into the Ph.D. program), or they may be required to re-take the comprehensive exam. Typical times for completion are 2-3 years for M.S. degrees, and 4-6 years for Ph.D. degrees.

M.P.S.

There are four Meteorology and Physical Oceanography (<http://mps.rsmas.miami.edu/requirements>) (MPO) tracks for the Master of Professional Science (<http://mps.rsmas.miami.edu>) degree (M.P.S.).

These are:

1. Broadcast Meteorology (<http://mps.rsmas.miami.edu/degree-program/broadcast-meteorology>): This track option prepares student for both on-camera and behind-the-scenes careers in broadcast meteorology, as well as the opportunity to develop the knowledge and training necessary to enter the broader field of science journalism.
2. Computational Meteorology and Oceanography (<http://mps.rsmas.miami.edu/degree-program/computational-meteorology-oceanography>): The degree track in Computational Meteorology and Oceanography is designed to assist students in the pursuit of advanced training in the computational science aspects of meteorology and physical oceanography.
3. Weather, Climate and Society (<http://mps.rsmas.miami.edu/degree-program/weather-climate-society>): This degree track emphasizes the relationship between weather, climate and societal impacts.
4. Weather Forecasting (<http://mps.rsmas.miami.edu/degree-program/weather-forecasting>): This track is designed for students who have an undergraduate degree in meteorology and seek graduate level training and experience in applied weather forecasting.

Medicine

Biochemistry and Molecular Biology

<http://biomed.miami.edu>

Overview

Biochemistry and Molecular Biology are sciences at the epicenter of modern biomedical research. Understanding basic biochemical pathways is key to gaining new knowledge for the prevention and combating of disease, allowing for the expansion of current boundaries in medicine and science. In addition to medical applications, molecular biology is indispensable for the development of tools implemented for environmental and bionanotechnology problems. The Department of Biochemistry and Molecular Biology (BMB) at the University of Miami is committed to maintaining our discipline as a central science and strives for excellence by sustaining the current areas of strength, fostering interdisciplinary and clinical translational research, and expanding the research portfolio to evolving areas of inquiry and discovery. Our expertise in RNA biology, understanding DNA stability and repair, studying the biophysical nature of biomolecules, and gaining insight into cellular signaling pathways has been recently expanded by the arrival of researchers specialized in the design of natural and semi-synthetic biomolecules, as well as molecular-based devices that can be employed in translational medicine and other bionanotechnology applications. The commitment of the Miller School to increase growth in the basic sciences will continue to provide our department with new and exciting opportunities to enhance our prominence in biomedical research.

A chief mission of our department is to educate future generations of investigators and medical students to become critical thinkers and the leaders in their fields. The diverse composition of our department in regards to research interests creates a unique and intellectually stimulating learning environment for students at the undergraduate,

graduate, and postgraduate levels. We offer a host of courses to fulfill the curriculum to obtain a BS in Biochemistry, a MS and a PhD in Biochemistry, as well as the basic science requirements for MD and MD / PhD students. Our courses address the basic principles of biochemistry and molecular biology as well as the emerging science and future of the fields.

The department serves the worldwide scientific community through leadership roles and active participation in national and international conferences, serving in study sections and on federal agency panels. Additionally, our department's faculty roster encompasses editors of journals and members of editorial boards, as well as board members of national and international governmental centers and members of advisory boards of companies in the private sector. Moreover, the Department is committed to serve the community by participating in a variety of outreach events to promote awareness of the importance of science and technology in relation to public health and the environment.

Our department is also unique for hosting the internationally recognized annual Miami Winter Symposium, created by Professor William Whelan, the first leader and Chair of the Department. The Miami Winter Symposium is currently managed by Nature Publishing and features world-renowned speakers in emerging areas of science and technology. This event cements our department's goal of furthering education and discovery in biochemistry and molecular biology on an international level.

Admission

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found at: <http://biomed.med.miami.edu/apply>

Program Plan

Program Plan

The BMB graduate program director assists each entering student in tailoring a program to match his or her interests. First year students take courses in a core curriculum taught by the faculties from the basic science departments. Courses are taught not only by formal lectures but also as seminars and informal discussions. The BMB graduate program's curriculum is designed to provide broad knowledge in the various aspects of molecular biology and biochemistry in addition to intensive training in certain specialized areas of research according to the student's interests.

Please note that the following is only a sample curriculum plan. Current students must discuss their plan with their program director to make adjustments as needed. It is the student's responsibility to contact the program to verify the information.

Year One		
Fall		Credit Hours
PIB 701	Introduction to Biomedical Sciences	5
PIB 702	Scientific Reasoning	3
PIB 731	Laboratory Research	1
PIB 700	Journal Club	1
PIB 780	Research Ethics	1

Biomedical Sciences

biomed.med.miami.edu

Overview

Programs in Biomedical Sciences (PIBS) at the University of Miami Miller's School of Medicine (UMMSM) provides students a wide variety of research opportunities in the biological sciences across many disciplines and departments.

First-year students take a core curriculum that builds a solid foundation in the biomedical sciences. The common coursework in the first semester ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. Students have the flexibility to select breakout sessions that match their interests. The core curriculum also offers critical learning opportunities in biostatistics, genomic and analytical tools. In the second semester, students select individual modular courses offered in our eight disciplines. These courses cover topics of specific relevance to graduate programs or research topics. Students also complete a course in Biostatistics and a workshop in Bioinformatics.

PhD Program Selection

Students complete three to four laboratory rotations in various disciplines during their first year. This opportunity allows students to explore their interests before selecting a program and dissertation mentor. Students match with mentors in specific programs and achieve program affiliation at the end of their first year in one of the following programs (for years two through five):

- Biochemistry & Molecular Biology (<http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology>)
- Cancer Biology (<http://biomed.med.miami.edu/graduate-programs/cancer-biology>)
- Human Genetics & Genomics (<http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics>)
- Microbiology & Immunology (<http://biomed.med.miami.edu/graduate-programs/microbiology-and-immunology>)
- Molecular & Cellular Pharmacology (<http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology>)
- Molecular Cell & Developmental Biology (<http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology>)
- Neuroscience (<http://biomed.med.miami.edu/graduate-programs/neuroscience>)
- Physiology & Biophysics (<http://biomed.med.miami.edu/graduate-programs/physiology-and-biophysics>)

PIB 830	Doctoral Dissertation	1
Term Credit Hours:		1
Total Credit Hours:		20-21

Program Elective Courses

The following program courses are available to first year students in their spring semester. It is generally recommended that students only take courses in the program they wish to enter. This will put students on a timely path to graduation. Your options will be discussed in your spring course advising appointment.

BMB 714	Molecular Genetics	2
BMB 715	Structural Biology and Applications to Drug Discovery	2
CAB 710	Cancer Biochemistry & Molecular Biology	3
CAB 720	Dialogues with Cancer Clinicians (PIBS Module)	1
HGG 630	Variation and Disease	2
HGG 640	Family Studies and Genetic Analysis	2
MCP 704	Mechanisms of Drug Action	3
MCP 752	Cell Signaling I: Intracellular Signal Transduction.	3
MCP 753	Cell Signaling 2: Cell-to-Cell Communication and Development.	3
MDB 751	Advanced Cell Biology Approaches to Molecular Medicine	2-3
MDB 752	Current Topics in Mammalian Development	2-3
MDB 753	Histology	1
MIC 625	Mechanisms of Microbial Virulence	2
MIC 728	Principles of Immunology	3
NEU 661	Molecular And Cellular Neuroscience	2
NEU 663	Developmental Neuroscience.	2
PHS 610	Cell Physiology Biophysics	2
PHS 620	Neurophysiology	3
PHS 612	Systemic Physiology	4
PHS 741	Principles of Membrane Physiology and Biophysics I	2
PHS 742	Principles of Membrane Physiology and Biophysics II	2

Biostatistics

<http://www.biostat.med.miami.edu/>

Dept. Code: BST

Degree Programs

- Master of Science in Biostatistics (MS)
- Doctor of Philosophy in Biostatistics (PhD)

Masters

Masters Program in Biostatistics

- M.S. in Biostatistics (p. 524)

Doctoral

Doctoral Program in Biostatistics

- Ph.D. in Biostatistics (p. 524)

M.S. in Biostatistics

The Master of Science (MS) in Biostatistics is structured around four pairs of courses: A regression sequence consisting of linear regression and generalized linear regression, an inference sequence consisting of Probability and Distribution Theory and Statistical Inference, a multivariate sequence consisting of Applied Modern Multivariate Methods and Longitudinal Data, and a clinical trials sequence consisting of Survival Analysis and Clinical Trials. Enrichment is provided by regular topics courses and by a Statistical Practicum. A major paper (capstone project) is required to demonstrate satisfactory facility with the major concepts.

The essential background an ideal entering student would have is

1. a minimum of three semesters of calculus including partial derivatives and techniques for solving multiple integrals,
2. one semester of linear algebra,
3. one semester of probability theory, and
4. four undergraduate courses in statistics or biostatistics.

For more information about the MS in Biostatistics **click here** (<http://www.biostat.med.miami.edu/academics/ms-in-biostatistics>).

Ph.D. in Biostatistics

The Ph.D. in Biostatistics, offered through the Division of Biostatistics in the Department of Public Health Sciences at the Miller School of Medicine, provides a flexible curriculum to cover the basics.

Admitted PhD students are expected to take a full suite of courses including several iterations of the seminar course, a consulting practicum (or advanced computing course), and a series of four to six courses that ensure the candidate has studied a subject matter discipline within biomedical research. PhD students are also expected to take high-level courses in statistical theory, survival analysis, and high-dimensional and complex data not generally taken by MS students. A sample program can be found at <http://www.biostat.med.miami.edu/academics/phd-in-biostatistics>.

PhD students are expected to pass a first-year exam between their first two years of study and to be examined on a thesis proposal normally at the end of their third year of study.

To obtain detailed program curricula on the Master of Science and PhD in Biostatistics, please contact our offices at the address below or visit our website at <http://www.biostat.med.miami.edu/>

Cancer Biology

<http://biomed.med.miami.edu/>

Overview

The Sheila and David Fuente Graduate Program in Cancer Biology is a University-wide interdisciplinary training program that involves faculty from the basic science and clinical departments of the University of Miami. The objective of this program is to provide a unique multidisciplinary training environment for highly qualified individuals that will prepare them for independent research and teaching careers. The overall philosophy of the program is to integrate basic and clinical research. The scientific focus is on the biology of cancer and the development of novel diagnostic and therapeutic approaches.

The program emphasizes a multidisciplinary approach which incorporates concepts and state-of-the-art techniques from molecular biology, biochemistry, cell biology, biostatistics, genetics, genomics, immunology, proteomics, structural biology, clinical oncology, and translational research programs at the Sylvester Comprehensive Cancer Center. An important goal of the program is to provide students with a strong background in basic biomedical research coupled with an understanding of clinical aspects of cancer including diagnostic, prognostic, and therapeutic intervention. To achieve this goal, the program utilizes a unique program of study that includes lectures from both basic and clinical researchers. In addition, the program has a two-tier mentoring system in which students receive guidance from both a research mentor and a physician mentor. The research mentor is the dissertation advisor, while the physician mentor will provide the student with a clinical perspective in oncology. Through this dual mentorship, students conduct their doctoral research and obtain clinical knowledge in their area of study. The program aims to instill in students the ability to design multidisciplinary research programs in which scientific research is driven by unmet clinical challenges.

Courses in Cancer Biochemistry and Molecular Biology are prerequisites for all CAB courses. Required courses are Tumor Biology, Student Seminars, Tumor Boards, Special Topics in Cancer Research, Dialogues with Cancer Clinicians, and Logic and Reasoning in Translational Cancer

Research. (Students can also choose electives in cancer epidemiology, cellular and molecular biology, immunology, pharmacology, and microbiology with permission of the CAB Director. After joining the program and choosing a research mentor, students formulate a proposal and take a qualifying exam. Their subsequent research is guided by an individually tailored dissertation committee, including the research advisor and physician mentor.)

Admission

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found at: <http://biomed.med.miami.edu/apply>

Clinical and Translational Investigation

<http://miamictsi.org/education/masters-program>

Overview

This Master of Science in Clinical and Translational Investigation (MSCTI) at the University of Miami has been established to create a structured educational program that offers trainees of diverse cultural and educational backgrounds formal graduate training (<http://mscti.med.miami.edu>) in the principles and practice of translational science and clinical research. Our highly integrated, cross-disciplinary program has been designed to further the new discipline of translational science by providing a foundation for the development of future practitioners and leaders of translational science who are prepared to deal with the perceived bottlenecks that inhibit translational research: institutional culture and practice, scientific complexity of translational research design and methodology, and regulatory and ethical processes.

The overall goal of this curriculum development award is to engage promising new and Early Stage Investigators in the discipline of translational science so that they make the pursuit of academic translational science their own professional goal.

Carlos Sandoval (c.sandoval1@med.miami.edu), Program Manager
MS Clinical and Translational Investigation
305 243 6398

Admission

Admissions Requirements

All individuals with strong research backgrounds are eligible to submit an application. Applications will be reviewed in batches, and admittance will be based on those most qualified for the program. We strongly encourage the following to apply:

- Individuals who have completed terminal healthcare degrees (e.g., MD, PhD, DO, RN) who are interested in pursuing additional formal didactic training (<http://mscti.med.miami.edu/program/who-is-eligible>) to become independent investigators in clinical and/or translational science;
- Individuals who have completed (<http://mscti.med.miami.edu/program/who-is-eligible>) terminal scientific degrees (e.g., PhD, DSci) who are interested in pursuing additional formal didactic training to improve knowledge and skills related to translation of basic to clinical applications; and
- Individuals who are currently enrolled in a terminal degree program (<http://mscti.med.miami.edu/program/who-is-eligible>) (e.g., MD, PhD) who are interested in adding a year to their program to obtain a MCTSI concurrent with their terminal degree.
- Students who have completed a Bachelor's degree who have outstanding academic credentials and an interest in obtaining a MS prior to a career in clinical translational research or a graduate program will also be eligible.

Completed (<http://mscti.med.miami.edu/admissions/admissions-requirements>) **application package consist of the following:**

- Completed online application form
- Application fee (US dollars, non-refundable)
- Official transcripts from each college or university attended
- Resume (<http://mscti.med.miami.edu/admissions/admissions-requirements>) or Curriculum Vitae
- Three letters of recommendation
- Personal statement of career goals and interest in degree program (<http://mscti.med.miami.edu/admissions/admissions-requirements>).
- Members of the Admissions Committees examine each application for acceptance into the program. Materials submitted in support of an application are confidential and cannot be released for other purposes nor returned to the applicant.

A GRE is not required

Full application instructions can be found at: biomed.med.miami.edu/apply

Program Plan

Course of Study

The Masters in Clinical and Translational Investigation program can be completed in 1-3 years depending on goals and professional responsibilities the student. This thirty credit hour (<http://mscti.med.miami.edu/program/program-basics>) program that includes completion of structured content courses, participation in small group interactive seminars and completion of a K-award, R21, or R01-type interdisciplinary clinical / translational research proposal. The proposal serves as a thesis or a formal master thesis, to be evaluated by a thesis committee consisting of one member of the Steering Committee, two faculty members, each representing one component of the translational focus (T1, T2, T3, T4) of the student, and another investigator not affiliated with the K30 program.

Successful completion of the MSCTI requires students to maintain a GPA of 3.0 or greater with no grade below C in any courses and successful completion of the thesis project.

Current students must discuss their plan with their program manager to make adjustments as needed. Students on a F-1 visa must enroll in a minimum of nine credits per semester.

Program Plan for Part-time Professional Students

Year One		
Fall		Credit Hours
CTI 601	Introduction To Clinical And Translational Research	2
EPH 621	Fundamentals of Epidemiology	3
EPH 601	Medical Biostatistics I	3
Term Credit Hours:		8
Spring		
CTI 602	Writing for Translational and Clinical Science	2
HGG 630	Variation and Disease	2
Term Credit Hours:		4
Summer I		
EPH 604	Clinical Trials	3
Term Credit Hours:		3
Year Two		
Fall		
CTI 810	Master's Thesis	6
EPH 647	Community-based Participatory Research	3
Term Credit Hours:		9
Spring		
CTI 603	Research Ethics	3
EPH 603	Applied Data Management and Analysis	3
Term Credit Hours:		6
Total Credit Hours:		30

Program Plan for Full-time Students

This plan is ideal for students who want to complete the program full-time as well as students on F-1 visas.

Year One		
Fall		Credit Hours
CTI 601	Introduction To Clinical And Translational Research	2
EPH 601	Medical Biostatistics I	3
EPH 621	Fundamentals of Epidemiology	3
EPH 617	Introduction to Disease Prevention and Health Promotion	3

Term Credit Hours:		6
Total Credit Hours:		30

Human Genetics and Genomics

<http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics>

Overview

The Interdepartmental PhD Program in Human Genetics and Genomics is a multi-disciplinary program aimed at training scientists broadly in areas of human genetics and genomics relevant to human health and disease. The emerging practice of "precision medicine," whereby clinical treatment decisions are based in part on an individual's genomic profile, depends on "genomic literacy" among practitioners, researchers and patients. Human Genetics and Genomics is a multidisciplinary field that requires training in three core competencies: clinical, molecular, and statistical genetics. Individuals earning PhDs in Human Genetics and Genomics will have various career options, including clinical laboratory (after fellowship training and board certification), research laboratory or computational research in academia, healthcare, and the biotechnology industry.

During the first year PIBS curriculum, students will have the opportunity to take two introductory short courses: Variation & Disease and Family Studies & Genetic Analysis. Rotations through faculty laboratories provide students with hands-on experience in various research areas. The rotations also provide the student the background necessary to select their dissertation advisor and area of research.

During the second year, the curriculum focuses on core coursework in molecular and computational genetics, biostatistics, and seminars and journal clubs.

Also, during the second year, students choose to pursue one of two tracks within the program: molecular genetics or computational genetics. Course requirements differ slightly between these two paths: students in the molecular genetics track will take Advanced Topics in Molecular Genetics while the Computational Genetics track students take Fundamentals of Genetic Epidemiology and Medical Biostatistics II.

During the second and third years of study, students formulate and defend a dissertation proposal. All students participate in a 1-credit hour clinical rotation and complete a teaching practicum during their fourth or fifth years.

Admission

Applying to the Program

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

Competitive candidates will have the following:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstracts and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

Applicants must submit the following:

- Online Application
- Application Fee

- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found at: biomed.med.miami.edu/apply (<http://biomed.med.miami.edu/apply>)

Program Plan

Program Plan

The PhD in Human Genetics and Genomics (HGG) curriculum allows candidates to pursue a track in *molecular* or *computational* genetics by their second year of training; however, all students complete a core curriculum in the first three years of graduate study. Students will also participate in seminars and journal clubs in the fall and spring semesters, through all years of study.

First-year students interested in Human Genetics and Genomics are strongly encouraged to take two introductory HGG short courses in the spring semester: HGG 630 – Variation and Disease and HGG 640 – Family Studies and Genetic Analysis which are requirements for completing the HGG degree. Courses in computational / quantitative skills, including biostatistics and bioinformatics will also form part of the first year PIBS curriculum. Each PIBS student completes at least three lab rotations of nine weeks each and chooses a dissertation laboratory (and graduate program) during the latter half of the spring semester. If necessary a fourth rotation may be possible, and in this case a laboratory choice may be deferred until June. All first year students will make short presentations to a group of faculty after each lab rotation. For these presentations the students will be divided into four groups with related research interests.

After choosing a mentor and laboratory at the end of the first year, a student becomes a member of the HGG program. Students select and follow a track in *molecular* genetics or *computational* genetics in the first semester of year 2. At this point course requirements differ slightly between these two paths: Students in the *molecular* genetics track take Advanced Topics in Molecular Genetics (HGG 650) in the second semester, while the *computational* genetics track students take a course in epidemiology, (EPH 621) in the fall, and a second course in biostatistics (EPH 602) and a second course in genetic epidemiology (HGG 621) in the spring.

In addition to the required core courses, all students participate in a clinical rotation and serve one semester as a teaching assistant for a core course, in their fourth or fifth year.

It is expected that on average, students will complete the program in five years. Please review the complete course descriptions on the COURSE tab above. The general core curriculum is shown in the Plan of Study below:

Plan of Study - Molecular Track

Year One		
Fall		Credit Hours
PIB 701	Introduction to Biomedical Sciences	5

MD/PHD Program

<http://mdphd.med.miami.edu/>

Overview

The Miller School of Medicine MD / PhD Program provides a unique training environment for exceptionally qualified individuals who want to pursue careers in academic medicine and research. The curriculum comprises the school's outstanding preclinical and clinical training, rigorous PhD graduate training and several elements, including professional development workshops and other activities, specifically designed to enhance the MD / PhD training experience. There has been a long tradition of research excellence and physician scientist training at the Miller School of Medicine. With the opportunities for basic and

clinical research here, Miami's diverse population and access to Latin America and the Caribbean, the backdrop of a vibrant city, make the Miller School a unique place for MD / PhD training.

PhD Programs

The following doctoral programs, described elsewhere in this bulletin, participate in the MD / PhD Program. The MD / PhD Program office can provide you with further information about these programs and the research interests of their faculty.

- Biochemistry & Molecular Biology (<http://biomed.med.miami.edu/graduate-programs/biochemistry-and-molecular-biology>)
- Biostatistics (<http://www.biostat.med.miami.edu/academics/phd-in-biostatistics>)
- Cancer Biology (<http://biomed.med.miami.edu/graduate-programs/cancer-biology>)
- Epidemiology (<http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-epidemiology>)
- Human Genetics & Genomics (<http://biomed.med.miami.edu/graduate-programs/human-genetics-and-genomics>)
- Microbiology and Immunology (<http://biomed.med.miami.edu/graduate-programs/microbiology-and-immunology>)
- Molecular Cell & Developmental Biology (<http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology>)
- Molecular and Cellular Pharmacology (<http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology>)
- Neuroscience (<http://biomed.med.miami.edu/graduate-programs/neuroscience>)
- Physiology and Biophysics (<http://biomed.med.miami.edu/graduate-programs/physiology-and-biophysics>)
- Prevention Science & Community Health (<http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-prevention-science>)

mdphd@miami.edu
www.mdphd.med.miami.edu (<http://www.biomed.miami.edu/mdphd>)

Admission

Admission Requirements

Admission to the MD/PhD Program is highly competitive, and interested applicants are advised to apply early in the fall. AMCAS applications must be received by the Medical Admissions Office no later than December 15. Applicants must complete the minimum course requirements (<http://admissions.med.miami.edu/md-programs/general-md/prerequisites>) of the MD Program to be considered for the MD / PhD Program. The

Graduate Record Examination (GRE) is not required for matriculation into the MD/PhD Program.

Competitive applicants will have the following:

- Completed AMCAS & Secondary Application for MD / PhD
- Excellent academic record
- Strong MCAT scores
- Significant research experience
- Co-authorship on abstracts and / or peer-reviewed papers is desirable
- Strong letters of recommendation from research mentors and other scientists who can specifically address the applicant's potential as a physician scientist
- Motivation to pursue a career as a physician scientist

Applications from under-represented groups, including minorities, individuals with disabilities and women, are encouraged.

All MD / PhD applicants are reviewed by both the MD Program Admissions Committee and the MD / PhD Program Admissions Committee. These evaluations proceed independently, and a student will still be considered for the MD program even after an unfavorable review by the MD / PhD Program. A successful applicant is granted admission to both the MD Program and the MD / PhD Program.

Full application instructions can be found at: mdphd.med.miami.edu/Admissions (<http://mdphd.med.miami.edu/Admissions>)

Program Plan

Program Sequence

The MD / PhD Program provides an integrated experience with exposure to clinical and research training throughout the medical and graduate phases of the program. Students complete the first two years of medical school, which are followed by their PhD training and then the final two years of clinical clerkships. Students are advised to begin the program in June to enable an early start on their research rotations as the MD program courses begin in mid-August. The summers before the second and third year are usually spent in research rotations (3 are required), but some students choose to continue their research rotations during the academic year of the first two years of medical school. It is recommended that students select a graduate program by February of their second year in the program and identify a research mentor no later than the beginning of the third year when they start graduate training. The third year is spent both in class to fulfill the graduate course requirements and in the mentor's research group. Students should plan to take their PhD qualifying exam by the end of the third year. The following two or more years are spent carrying out original research for their dissertation. Students also participate in a clinical skills tutorial during graduate training to expand their exposure to the clinical setting. All PhD requirements must be completed before entry into the third year of medical school but most students continue research upon return to clinical clerkships.

Combined degree programs are long and challenging. To relieve pressure produced by the demands of the medical and graduate curricula, the University of Miami Miller, School of Medicine, MD / PhD Program provides a stimulating and supportive environment in which all combined degree students have frequent opportunities to meet and exchange ideas and for professional development. This includes a first and second year

student journal club, all program clinical case discussions, opportunities to meet other physician scientists, student organized workshops and an annual MD / PhD student research symposium.

Microbiology and Immunology

<http://biomed.med.miami.edu>

Overview

Microbiology and Immunology is a multidisciplinary program encompassing the areas of cellular and molecular immunology, virology, microbial genetics, and pathogenic bacteriology.

The goals of the department's graduate program are to provide each student with the opportunity to acquire the theoretical background and conceptual framework with the technical research skills necessary to attain a PhD. During the first year of study, a broad educational base in all disciplines together with laboratory rotations introduce students to the diverse array of research topics. Students then choose one area of concentration for their research. The varied interests of the faculty provide numerous opportunities for student participation and a broad choice in dissertation research.

Active research in immunology includes the areas of cytotoxicity, programmed cell death, cytokine receptor signaling, clinical and experimental bone marrow transplantation, stem cell biology, gene therapy for cancer treatment, antigen recognition, cell differentiation and communication, aging of the immune system, interleukins, genetic control of immunoglobulin production, gene activation, and evolution of the immune response. Research in other areas includes molecular biology of virus-host interaction in both animal and human systems, control and regulation of bacterial pathogenesis, selective tumor chemotherapy and radiation therapy, and therapy of parasitic infections.

Goals

The goals of the MIC Graduate Program include training and acquisition of:

- A broad scientific reasoning ability and knowledge base in Microbiology and Immunology
- Technical skills required for experiments in the area of specialization
- Presentation skills required for teaching, scientific talks, manuscripts, and grants
- A preparation for a scientific career in academia, industry, or teaching within 5 ½ years

Admission

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores
- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found at: <http://biomed.med.miami.edu/apply>

Molecular Cell and Developmental Biology

<http://biomed.med.miami.edu/graduate-programs/molecular-cell-and-developmental-biology>

Overview

The graduate program in Molecular Cell and Developmental Biology offers graduate training towards the PhD degree in the fields of molecular cell biology, cell biology, developmental biology and cancer biology. In order to provide a wide range of current research opportunities, this program is interdisciplinary, comprised primarily of faculty from the department of Cell Biology and includes additional faculty from several other Departments and Centers at the Miller School of Medicine. These include: the Departments of Microbiology & Immunology, Molecular & Cellular Pharmacology, Medicine, Ophthalmology, Urology, Surgery, Neurosurgery and Neurology, the Sylvester Comprehensive Cancer Center, and the Miami Project to Cure Paralysis.

Students have the opportunity to do research in the many areas of modern cell, molecular and developmental biology. Research topics including the cytoskeleton, cell surface molecular biology, stem cells, lens, corneal and retinal biology, protein processing and sorting, signal transduction, airway biology, regulation of gene expression in development, podocyte biology, cancer biology, neuromuscular development, malignant transformation, growth factors, epithelial cell biology, organogenesis and tissue repair, pattern formation in early development, RNA localization, mitochondrial molecular biology and cancer therapeutics.

The primary objective of this interdisciplinary graduate program is to prepare students for careers as independent, PhD level researchers and educators, in both academic institutions and in the biotechnology industry and other venues.

Program Plan
Plan of Study

The program's Graduate Studies Committee assists each entering student in tailoring a program to match his/her interests. First year students take courses in a core curriculum taught by faculty from the medical basic science departments. Courses are taught not only by formal lectures, but also as seminars and informal discussions. The curriculum is designed to provide broad knowledge in the various aspects of modern cell biology, developmental biology, molecular biology and biochemistry in addition to intensive training in certain specialized areas

of research according to the student's interests. In the remaining years of student, nearly all of the student's time is spent on original laboratory research. Students are usually admitted in the Fall semester.

Minimum credit requirements for the PhD degree are set by the University at 36 course credits (including specific required courses) and 24 credit hours of research (for a total of 60 credits). The course credits must be earned in graduate level (600 and above) courses. Students may elect to take any of the graduate courses offered by the MDB program, in addition to the mandatory courses, or choose from a large variety of advanced courses offered by other basic science programs at the University of Miami Miller School of Medicine.

Mandatory courses for the program include Biostatistics (EPH 601), Advanced Cell Biology: Approaches to Molecular Medicine (MDB 751), Current Topics in Mammalian Development (MDB 752), Histology (MDB 753), and *Tumor Biology (MDB 765). The latter may be replaced by any graduate level course in human disease or neuronal cell biology. **These courses are electives for MD/PhD students.*

Throughout the program the students are expected to attend department seminars (Tuesdays at noon), journal club (once a month, Wednesday at noon), and student presentations (once a month, Wednesday at noon).

The student should be working in the laboratory where he/she intends to do his/her thesis research by the summer, first year. At the end of the Fall semester of the second year, students are required to take the Qualifying Exam (QE). The goals of the QE are (1) to assess the scientific proficiency of the student, especially his/her ability to design experiments and to write a competitive grant application; and (2) to aid the student and mentor in the process of obtaining extramural funds to support the student's stipend.

The thesis proposal is expected to be passed during the second year, Summer semester. It is important to note that in the MDB program this is not the Qualifying Exam. Rather, it is a collegial meeting with the thesis committee where the student discusses his/her preliminary data and plans for the thesis. Students normally meet with the committee for progress meetings every 6-9 months.

The thesis is defended in front of the entire program and also in a meeting with the committee. The average time-to-completion is 5.5 years.

Please note that the following is a sample curriculum plan. Current students must discuss their plan with their program coordinator to make adjustments as needed.

Molecular and Cellular Pharmacology

<http://biomed.med.miami.edu/graduate-programs/molecular-and-cellular-pharmacology>

Overview

Scientists in the Molecular and Cellular Pharmacology Program make use of the knowledge and techniques of biology, chemistry and physics to study the action of drugs, hormones and neurotransmitters on living systems and, more generally, the mechanisms through which signals are recognized and transduced by cells.

The goals of the research in this department are:

- to identify new targets and pathways for development of pharmaceuticals

- to use drugs as tools in the study of basic biological processes
- to develop and study agents that may be beneficial in the treatment of disease

A variety of technical approaches is used, including genetics, molecular biology, protein biochemistry and biophysics, fluorescence microscopy, immunology, computer modeling, cell culture, imaging, gene expression profiling, proteomics and whole animal studies including transgenic and genetically engineered mouse models. The faculty are a mixture of senior scientists who are recognized leaders in their respective fields and more junior faculty with recent training in state-of-the-art approaches to important biomedical problems.

Research interests of the faculty include:

Cardiovascular Pharmacology / Signaling / Muscle Contraction

Investigators in this area study transcriptional regulation of gene expression and intracellular signals associated with the growth and function of the heart. They study ion channels, membrane events, blood vessels, etc. Studies of cardiac muscle contraction and the effect of disease causing mutations in the contractile apparatus of the heart on heart performance and morphology are also being pursued.

Current research areas include structure/function relationships in the proteins of the thin (troponin complex) and thick (myosin) filaments in health and disease, the role of specific ion channels in ventricular hypertrophy and its alleviation, excitation-contraction coupling in skeletal and cardiac muscle, proto-oncogene regulation of cardiac-specific genes, signaling in cardiac myocytes including the characterization of multimolecular enzyme complexes, apoptosis during myocardial ischemia, the role of microRNAs in cholesterol biosynthesis and smooth muscle cell plasticity, and the potential of stem cell based therapy for cardiac disease. A new study has been launched to investigate the effect of bone marrow stem cells in cardiac repair.

Neuropharmacology / Neuroscience

Investigators in this area study the development, function, pharmacology, and diseases of the nervous system.

Current research interests include neuronal signaling through G-proteins, Ca²⁺, and cyclic nucleotides, growth and guidance of axons during development and regeneration after injury, molecular control of dendrite development, control of physiological functions by the nervous system; molecular mechanisms and cell biology of olfaction and phototransduction; the genetic and cellular basis of neural development and degeneration using the fruit fly *Drosophila melanogaster* as a model system.

Cell Biology / Cancer

Investigators in this area study cell cycle control and cancer, gene expression, mechanisms of hormone action, signal transduction, cytoskeleton, membrane transport, stem cells, and novel therapeutics.

Current research interests include steroid hormone regulation of gene expression and cell proliferation; cell cycle checkpoints during DNA replication; protein trafficking including endocytosis and exocytosis; control of cell polarity and morphogenesis; cilia in pulmonary function; molecular basis of human lymphoma; endocrine-related cancers including prostate and breast; stem cell maintenance and therapy; stem

cell differentiation in hematopoiesis and physiochemical and metabolic aspects of drug design.

Model Systems

Many investigators are using model organisms for their studies. These include transgenic and knock-out/knock-in mouse models *Xenopus*, *Drosophila* and yeast models. Yeast and *Drosophila* are important models because of the powerful molecular and genetic approaches and tools available. *Xenopus* provides a unique system for studying development and for protein expression and analysis. These systems are being used to study fundamental processes such as apoptosis, cell cycle, signal transduction, membrane dynamics, cytoskeleton, cell polarity, olfaction, development of the cardiovascular system, neurogenesis and neuronal degeneration. All of these processes are conserved in humans, so these systems serve as important models of human diseases. Investigators are also using these systems to screen for therapeutic agents and to identify targets of toxins and other natural, synthetic or pharmacologically relevant compounds.

Program Plan

Plan of Study

In the first year, students receive a solid foundation in biomedical science. The core coursework ranges from molecules to cells to systems of human physiology. Lectures are balanced by breakout sessions, in which faculty members discuss the primary literature with students in small groups. The core curriculum also offers critical learning opportunities in biostatistics and in using genomic and other databases, as well as education in ethics. Students also meet several times in small groups with experienced faculty mentors to discuss important issues of student development. In subsequent semesters, students take core courses encompassing mechanisms of drug action, neuropharmacology, cardiovascular pharmacology and intracellular signal transduction. A variety of elective courses are offered by this program and other basic science programs at the Miller School of Medicine.

Students begin their dissertation research at the end of the first year and complete their course requirements in the second year. In subsequent years, students devote their efforts to original thesis research.

Please note that the following is a sample curriculum plan. Current students must discuss their plan with their program coordinator to make adjustments as needed.

Neuroscience

<http://biomed.med.miami.edu/graduate-programs/neuroscience>

Overview

The Neuroscience Program, established in 1992, is an interdisciplinary / interdepartmental PhD program designed to guide trainees through the process of acquiring the research skills and the intellectual rigor needed to become independent professional neuroscientists. The program achieves these goals through coursework, seminars and journal clubs, dissertation research committee guidance, and outstanding faculty mentorship. The program also provides two annual forums for students to showcase their research: Neuroscience Research Day to celebrate Neuroscience in South Florida, and a 2-day retreat in Marco Island with students, faculty and other researchers.

More than 80 participating faculty are located in several departments and schools, including Cell Biology and Anatomy, Molecular and Cellular Pharmacology, Physiology and Biophysics, Biology, Bioengineering, Psychology, The John P. Hussman Institute for Human Genomics, and the Rosenstiel School of Marine and Atmospheric Sciences, as well as several clinical departments such as Neurological Surgery, Neurology, Ophthalmology, Pathology, Physical Therapy, and Psychiatry.

Neuroscience faculty pursue a wide variety of research interests, including cellular and molecular mechanisms involved in signal transduction, gene expression in electrically excitable cells, synapse formation, neuronal growth and survival, integrative neuroscience, neuroimmunology, stroke, neuronal regeneration, autonomic control, brain metabolism and cerebral blood flow, degenerative changes within specific neural pathways in Parkinson's and Alzheimer's diseases, and genetic analysis of neurological disorders.

Program Plan

Course of Study

Graduate training is the major goal of the program, with emphasis on cellular, molecular, and genetic approaches to Neuroscience. A single core curriculum provides the didactic scaffold of the program. This curriculum consists of courses in Developmental Neuroscience Membrane Biophysics, Introductory Neuroscience, Neural Systems, and Neuroanatomy. The core courses are supplemented with a variety of Special Topics Short Courses. Students also attend research seminars and a scientific journal club. The Neuroscience Steering Committee guides the students, overseeing their coursework, until they have passed their qualifying exams. From then on, their progress is supervised by individually tailored dissertation committees.

To be eligible to receive the PhD, students are required to complete a minimum of 60 (sixty) credit hours, including at least 36 required graduate course credits and 24 credits of dissertation research.

Typically, at least 18 of the 36 credits for coursework will be in NEU courses.

Required Courses in Neuroscience

NEU 600	Seminar in Neuroscience	1
NEU 631	Special Topics In Neuroscience	1-5
NEU 661	Molecular And Cellular Neuroscience	2
NEU 662	Systems Neuroscience	4
NEU 663	Developmental Neuroscience.	2
NEU 697	Neuroanatomy	3
PHS 741	Principles of Membrane Physiology and Biophysics I	2
PHS 742	Principles of Membrane Physiology and Biophysics II	2

Program Plan

Please note that the following is only a sample curriculum plan. Current students must discuss their plan with their program director to make adjustments as needed. It is the student's responsibility to contact the program to verify the information.

Physical Therapy

<http://www.pt.med.miami.edu>

Dept. Code: PTS

The Department of Physical Therapy is committed to providing quality educational experiences that enable its graduates to effectively carry out the expanding responsibilities of physical therapists as autonomous health care providers practicing in preventive, evaluative, maintenance, acute care, rehabilitation, outpatient settings, and in educational and research environments.

The individual and collective efforts of the members of the Physical Therapy faculty are directed toward attaining specific goals and objectives as expressed in the philosophic statement of the American Physical Therapy Association.

The *Mission of the Department of Physical Therapy* (revised in December, 2000; re-affirmed in 2012) in accordance with the Mission of the Miller School of Medicine is to provide excellence in physical therapist education, to expand evidence-based practice of physical therapy through research, to provide high quality care to all who need it, and to be a community partner.

Admission Requirements

Doctor of Physical Therapy (entry level DPT)

Applicants should have a baccalaureate degree in a related field and 3.0, or "B" average or better in the following courses:

English	(5 quarter hours)	3
Composition/ Writing intensive course		
Introduction to Statistics	(5 quarter hours)	3
Psychology	(5 quarter hours)	3
General Biology	(5 quarter hours)	3
General Chemistry I and II each with Lab	(12 quarter hours)	8
General Physics I and II each with Lab	(12 quarter hours)	8
Human Anatomy	(5 quarter hours)	3
Select one of the following:		3-6
Human Physiology	(5 quarter hours)	

Combined (9 quarter hours) Anatomy and Physiology I & II	
Total Credit Hours	34-37

Application Procedure

We are accepting applications through Physical Therapist Centralized Application Service (PTCAS). Please visit www.ptcas.org (<http://www.ptcas.org>) to apply.

The next application cycle will open on July 1. The application deadline is October 15; we encourage you to apply early. Classes begin in May of each year. Application requirements consist of the following:

- Submission of all application materials to PTCAS. Completion of prerequisites or plan to complete by time of matriculation, with a minimum GPA of 3.0 on a 4.0 scale.
- Demonstration of knowledge concerning the physical therapy profession by submitting:
 - A minimum of 100 hours of first-hand observation and/or work experience related to the practice of physical therapy.
 - This experience must be substantiated in writing by a registered/licensed physical therapist. The name and email of the physical therapist(s) is required for verification.
- Submission of three to four (3-4) letters of recommendation from people who can address both the applicant's moral character and potential as a physical therapist.
 - At least one letter must be written by a registered/licensed physical therapist, and one or more from faculty.
- An on-site interview is required and will be offered to those applicants who have met the admission criteria.
- Graduate Record Exam (GRE). Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website at: www.ets.org/s/gre/pdf/concordance_information.pdf (http://www.ets.org/s/gre/pdf/concordance_information.pdf) for the official ETS Concordance Table. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 3.0 on the analytical section is also required.
- International students are to complete the PTCAS application and submit official transcripts to the DPT program instead of PTCAS. Transcripts that are not in English must include an official translation. International applicants must have all transcripts evaluated by the University of Miami's Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation. International applicants must meet ALL the necessary requirements to qualify for a student visa.

For more information contact:

Admissions Office
Department of Physical Therapy
5915 Ponce de Leon Blvd., 5th Floor
Coral Gables, FL 33146
Phone 305-284-4535

Email: physicaltherapy@miami.edu

Website: www.pt.med.miami.edu (<http://www.pt.med.miami.edu>)

Doctor of Philosophy in Physical Therapy (PhD)

Application Requirements

Applicants to the Physical Therapy PhD Studies Program must have a clinical degree in physical therapy from an accredited physical therapy program and be eligible for licensure to practice physical therapy in the United States. Students enrolled in the PhD in Physical Therapy program at the University of Miami work closely with a faculty mentor from their first days in the program. As a first step in the application process, the applicant must identify an area of interest and contact a faculty mentor involved in that area. Students are admitted to the program upon endorsement of a faculty mentor and completion of all admission requirements, with final selection made by the PhD Studies Committee. Stipend and tuition support is potentially available for qualified applicants.

The applicant must meet all the general admissions requirements of the University of Miami Graduate School. Additionally, stipulations include:

- Direct entry into the PhD program is dependent upon having any of the degrees below:
 - An entry-level Master's Degree in Physical Therapy
 - An advanced Master's Degree with a Bachelor's Degree in Physical Therapy
 - A Bachelor's Degree in Physical Therapy.
- An applicant with a Bachelor's Degree in Physical Therapy, though able to commence course work in the PhD Program, will be required to complete additional credit hours before final admission to the PhD Program.
- Official Transcripts of all college work.
- Three completed recommendation forms with at least one form completed by a physical therapist.
- A letter indicating career goals and objectives.
- Licensure or eligibility for licensure, as a physical therapist in the State of Florida (must be licensed within 1 year of admission).
- GRE scores current within the past 5 years (see minimum requirements below)

Applicants who took the GRE before July 31, 2011 must score a minimum of 1000 on the verbal and quantitative sections combined. As of August 2011 the GRE exam and its scoring scale have changed significantly. Please visit the ETS website at: www.ets.org/s/gre/pdf/concordance_information.pdf (http://www.ets.org/s/gre/pdf/concordance_information.pdf) for the official ETS Concordance Table. Graduate Admissions will be using this concordance table when reviewing exam scores. Applicants must score a minimum of 147 on the quantitative section and 149 on the verbal section. A minimum score of 4.0 on the analytical section is also required. International applicants must submit a complete application and have all transcripts evaluated by the University of Miami's Office of International Admissions before they can be considered for graduate study. Any transcript not in English must be submitted with an official translation.

The research areas of the faculty are diverse, reflecting the clinical and scientific emphasizes areas of the faculty. Please refer to the Faculty Section for specifics.

For more information on the PhD degree contact:

 email: keroach@miami.edu

Degree Programs

Doctor of Physical Therapy (entry level DPT)

The Department offers the clinical Doctor of Physical Therapy (DPT). The DPT program recognizes the importance of in-depth basic and applied science knowledge and the humanities. As such, the curriculum is carefully sequenced to allow students to develop skills in both classroom and clinical settings.

Faculty also understand the importance of presenting problem-solving skills in conjunction with fundamental physical therapy concepts so that students will develop the professional attitudes and insights required for sustained and continued growth throughout their careers.

The entry-level doctoral program (DPT) is offered under the auspices of the Department of Physical Therapy, University of Miami Miller School of Medicine.

Doctor of Philosophy in Physical Therapy (PhD)

The University of Miami Doctor of Philosophy in Physical Therapy program develops physical therapist students for leadership positions in academic and research settings. Along with guiding students in the development of requisite knowledge and skills, the program promotes professional socialization into the role of academic faculty. We believe preparation to teach and undertake research in a physical therapy curriculum at the university level requires excellence in three dimensions:

1. Expertise in a specified content area;
2. Advanced knowledge and skill in research methods, design, and implementation of analysis and communication of results; and
3. Proficiency in instructional design, teaching methods, and evaluation.

The successful integration of these three dimensions, each complex in its own right, provides the means for the student to develop expertise in testing, analyzing, researching, and teaching about disorders that interfere with function. Unifying these three core areas is the process of socialization to the role of a faculty member, including an awareness of academic responsibilities and sensitivity to the needs of the adult learner.

In keeping with this philosophy, students develop breadth of knowledge through completion of coursework from three basic core areas:

- Concentration Core,
- Research Core, and
- Education Core.

They develop depth by completing elective courses with the intent to build expertise in their respective areas of concentration. The successful graduate of this program will have the requisite knowledge and skills to integrate research findings and scientific theory with clinical observations. On this basis, the graduate will be prepared

to perform original research aimed at developing new knowledge to enhance the scientific basis of clinical practice and theoretical principles that will advance the profession of physical therapy. The program offers opportunities for the student to gain skill in communicating theories, concepts and research findings and to experience the roles and responsibilities of an academic faculty member. Students complete a dissertation project in which they develop and conduct a unique and significant research investigation with the guidance of a Physical Therapy faculty member as research advisor.

Doctoral

Doctoral Programs in Physical Therapy

- D.P.T. Doctor of Physical Therapy (Entry Level) (p. 543)
- Ph.D. in Physical Therapy (p. 543)

D.P.T. Doctor of Physical Therapy (Entry Level)

To receive the Doctor of Physical Therapy degree, the candidate must:

1. Complete all coursework (105 credit hours) as required with an overall GPA of 3.0 or better.
2. Complete at least 3 credit hours of Elective coursework, in addition to the 105 credit hours.
3. Successfully complete the clinical internships (I-IV) required.

The University of Miami, Department of Physical Therapy has affiliations with 350 clinical sites locally and throughout the country.

Distant internships may incur additional expenses for the student.

Ph.D. in Physical Therapy

The curriculum for all three core content areas (Musculoskeletal, Motor Control, and Outcomes Research) consist of:

- 19 - 21 credit hours in a core concentration area (i.e., Motor Control, Outcomes Research, or Musculoskeletal Prosthetics and Amputee Rehabilitation)
- 12 credit hours in core education courses,
- 12 credit hours in core research courses,
- 6 - 21 credit hours in electives in area of concentration and
- 12 credit hours of Doctoral dissertation for a total of 60-75 credit hours.
- Credit hours may vary depending on educational background of applicants.

Physiology and Biophysics

biomed.med.miami.edu

Overview

Physiology and Biophysics is focused on how human organism function by applying principles of physics to the underlying molecules and cells. The training and research emphasis in the Graduate Program in Physiology and Biophysics at the University of Miami School of Medicine is directed at determining the molecular mechanisms underlying physiological functions, such as how does the heartbeat, how does the brain work, and how do we see, smell, and taste, using biophysical techniques and analyses. More specifically, research facilities and guidance for graduate work are available in developmental neurobiology, sensory receptor mechanisms, axonal electrophysiology, ionic mechanism of the nerve impulse, electrophysiological and molecular aspects of synaptic and neuromuscular transmission, mechanisms of ion channel gating, selectivity and conductance, metabolic aspects of nervous function, molecular neuroscience, neuroimmunology, protein structure-function studies, molecular recognition, ligand-receptor interactions, axonal growth, neurotrophic factors, cytokines, gene targeting, neuronal apoptosis, nerve regeneration, molecular adhesion, and regulation of muscle contraction.

The Graduate Program in Physiology and Biophysics trains its students to use and develop state-of-the-art biophysical techniques that address fundamental questions related to molecular and cellular physiology and biophysics and developmental and molecular neuroscience. In addition, the students receive training in related biological disciplines and also in systemic physiology in order to obtain a broad viewpoint. This training prepares the students for future careers in research and teaching in academic institutions and also for careers in industry.

Admission

Admission Requirements

Applicants to biomedical programs should have a bachelor degree in a biological or related discipline (e.g., psychology, chemistry, engineering, physics). Although there are no prerequisite requirements, courses in general biology, cell/molecular biology, calculus, general physics, organic chemistry, physical chemistry, and biochemistry are encouraged. Applications are generally accepted from September to December for fall entry only. Select applicants will be offered an interview.

COMPETITIVE CANDIDATES WILL HAVE THE FOLLOWING:

- Excellent academic record
- Competitive GRE exam scores

- Research experience in a laboratory setting
- Publications of abstract and / or papers
- Co-authorship in a peer-reviewed journal is recommended
- Strong letters of recommendation from research scientists who know the candidate well
- Motivation to pursue state-of-the-art biomedical research

APPLICANTS MUST SUBMIT THE FOLLOWING:

- Online Application
- Application Fee
- Official Academic Transcripts
- GRE General Test
- English Proficiency Exam (non-native speakers)
- Statement of Purpose
- Resume / CV

Full application instructions can be found at: <http://biomed.med.miami.edu/apply>

Program Plan

Program Plan

The Department of Physiology and Biophysics' PhD program trains highly qualified students for successful careers in research, teaching and industry. A high faculty to student ratio assures that each student receives individualized help from the faculty together with access to the latest scientific instrumentation.

Student training is enhanced by research seminars and student-oriented discussions presented by world-renowned visiting scientists, as well as by participation in research seminars and research discussion groups. We seek to provide a congenial and supportive environment in which each student develops to the fullest their abilities to reason critically, design and conduct incisive experiments, and communicate research results effectively in both written and oral formats. Our faculty's wide collective experience as successful researchers, teachers, journal editors, and peer reviewers is available to help graduates prepare for and attain research and teaching positions in academia and industry.

Please note that the following is only a sample curriculum plan. Current students must discuss their plan with their program director to make adjustments as needed. It is the student's responsibility to contact the program to verify the information.

Year One		
Fall		Credit Hours
PIB 701	Introduction to Biomedical Sciences	5
PIB 702	Scientific Reasoning	3
PIB 731	Laboratory Research	2
PIB 700	Journal Club	1
PIB 780	Research Ethics	1
PIB 782	Professional Development: Skills for Success I	1
Term Credit Hours:		13
Spring

Admission Requirements

<http://publichealth.med.miami.edu/future-students/admissions>

- **Online Application** applicants must submit their application online through SOPHAS (<http://sophas.org>), the centralized application service of the Association of Schools and Programs of Public Health (ASPPH) (<http://aspph.org>). **All application materials, including transcripts, test scores, personal statement, resume, and letters of recommendation, must be submitted online through SOPHAS** (<http://sophas.org>).
- **Official transcripts** from all previously attended colleges and universities. All foreign transcripts must be official and submitted in the original language. If the original language is not English, an official translation must be submitted along with the transcript. We do not accept evaluations from foreign credentialing service organizations. All non-US transcripts must be evaluated by the World Education Service (WES) using their ICAP Course-by-course evaluation service. For further instructions, visit the WES-SOPHAS website at www.wes.org/sophas/ (<http://www.wes.org/sophas>). Non-US transcripts are evaluated exclusively through WES. For further information visit <http://publichealth.med.miami.edu/graduate/sophas>.
- **Official GRE test scores** Applicants are required to submit GRE general exam (http://www.ets.org/gre/revised_general/about) scores taken within the last five years. Alternatively we accept the MCAT, LSAT, GMAT and DAT for the MPH/MSPH degree programs only. Applicants to the MPH/MSPH program who hold advanced degrees (MD, PhD, JD) are encouraged but not required to submit test scores.
- **TOEFL/IELTS** International students whose native language is not English are required to submit TOEFL (<http://www.ets.org/toefl/ibt/about>) Or IELTS scores. For further information visit <http://publichealth.med.miami.edu/graduate/sophas>.
- **Resume/Curriculum Vitae** including employment, activities, community service, education, academic or professional honors.
- **Statement of purpose** detailing your academic interest in our program as well as your future career goals. This statement should discuss any experience you have in public health including field experience, training, education, or other related qualifications. Discuss how earning this degree will contribute to your future and the future of public health.
- **Three letters of recommendation** from people who are best able to assess your ability to be successful in a public health degree program. Ideally, your recommenders are recent professors, researchers, or employers in a related field. You will be asked for your recommenders' contact information on the online application. They will be sent an online form to complete via email.

To obtain detailed program curricula on the MPH/MSPH, PhD in Epidemiology, and joint degree programs, please contact our offices at the address below or visit our website at <http://publichealth.med.miami.edu/>

For further information, please contact:

David Lee, PhD, Graduate Program Director

Public Health

<http://publichealth.med.miami.edu/>

Dept. Code: EPH

Degree Programs

- Master of Public Health (MPH)
- Master of Science in Public Health (MSPH)
- Doctor of Philosophy in Epidemiology (PhD)

The Graduate Programs in the Department of Public Health at the University of Miami Miller School of Medicine are at the forefront of public health science with emphases on research, education, and evidence-based, public health service. The Graduate Programs promote an environment of learning and inquiry, stressing the scientific method as a way of generating knowledge about common pathways in health and illness. The mission of the Graduate Programs in Public Health is to develop leaders who can expand and translate knowledge into policy and practice to promote health and prevent disease in human populations.

Joint Degree Programs

Joint degree programs are also offered in conjunction with the School of Medicine (MD/MPH, MD/PhD), School of Law (JD/MPH), School of Business (MPA/MPH), and the College of Arts and Sciences (MAIA/MPH) and (MALAS).

Masters

Masters Programs in Public Health

- M.P.H. Master of Public Health (p. 546)
- M.S.P.H. Master of Science in Public Health (p. 546)

Doctoral

Doctoral Program in Epidemiology and Public Health

- Ph.D. in Epidemiology (p. 546)

M.P.H. Master of Public Health

The MPH degree is a professional degree for students who require a broad general academic experience in public health. Students will acquire competency in the fundamental public health disciplines. This includes research design and conduct, data analysis and policy analysis, communications, program planning and administration, public health systems and the organization of health services in the United States and Latin America, recognition and analysis of ethical issues in public health and professional practice, the needs of special populations, and the integration of these core disciplines in public health decision making. The MPH degree is a 45 credit hour program that is accredited by the Council on Education for Public Health.

The 45 credit hour degree program consists of:

- Core Courses (18 credits)
- Area of Focus (21 credits)
- Capstone/culminating experience (6 credits)

The Capstone Field Experience and the Capstone Project are both vital components of the MPH program, and together form the Capstone Experience. The Capstone Field Experience is designed to provide students with real world work experience in the field of public health. This experience places students in health-related settings (local, national, and international) to work on projects of mutual interest to both the field organization and the student. The Capstone Project is intended to build upon this fieldwork and is geared toward providing the student with an opportunity to apply public health academic theory and acquired skills to community health problems. Students are encouraged to build their Capstone Experience in such a way that supports their academic and professional interests as they advance in their careers as public health professionals.

M.S.P.H. Master of Science in Public Health

The MSPH is an academic research degree designed for students who wish to prepare for further study at the doctoral level, or to prepare for

research or technical positions in government, industry, academia, or private institutions. Studies will include many of the core disciplines included in the MPH degree with an additional emphasis on advanced research methods and quantitative analysis skills. The MSPH program is accredited by the Council on Education for Public Health.

The 45 credit hours degree consists of:

- Required Core Courses (21 credits)
- Required Methods Courses (6 credits)
- Elective Courses (12 credits)
- Research Thesis Project (6 credits)

Full-time students can expect to complete the MPH or MSPH degree requirements within 2 years. A 9-credit hour waiver may be available for students who enter the MPH or MSPH degree programs with an earned advanced degree (e.g., MD, DDS, DVM).

Ph.D. in Epidemiology

The Doctor of Philosophy (PhD) in Epidemiology is an intensive research training program for students with prior training in Epidemiology or related disciplines. It provides advanced education and training for students seeking a professional career in medical and health-related research, as well as for physicians and other persons who have attained professional degrees and are seeking to integrate epidemiological research and methods into their ongoing careers. The program is primarily designed for persons who have an MPH degree, as well as for physicians and others who have a master's or doctoral degree in a related discipline.

All PhD students are required to complete 63 credit hours. There are:

- core courses in epidemiology and biostatistics
- courses in electives
- the dissertation

Please visit <http://publichealth.med.miami.edu/graduate/academic-programs/phd-in-epidemiology> for additional information.

 - c. Piano Performance – Conc. Code: MKPF
 - d. Vocal Performance – Conc. Code: MVPF

Entrance Exams

The Frost School of Music requires certain incoming graduate students to take entrance exams in Musicology and Music Theory prior to enrolling in courses. Graduate students are expected to be well-prepared for these exams. Any student who does not achieve the designated 80% pass rate must fulfill a remediation requirement prior to completion of the final project as required for the graduate degree. Please access the following link for more information: http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/musicology_placement_exam/

Degree Requirements: Doctoral Degrees

Doctor of Musical Arts (DMA)

The purpose of the Doctor of Musical Arts is to train the most promising musicians at the highest musical and intellectual level for prominent careers in their field. The degree stresses excellence in performance, composition, scholarship, and teaching. By its nature, the Doctor of Musical Arts provides opportunities for students with proven accomplishment to prepare themselves for the professorship.

For the Doctor of Musical Arts in Performance, Keyboard Performance and Pedagogy, Composition, Jazz Composition, Jazz Performance, Vocal Pedagogy and Performance, and Conducting, the candidate must meet all the general requirements for the PhD degree with respect to residence, total minimum credit hours, and written and oral examinations. The main distinction between the two degrees pertains to the required creative activity. The DMA emphasizes performance ability, as well as performance-related research. These creative efforts replace the dissertation requirements traditionally found in the PhD. In addition to specific courses and credit hours listed in the following pages, students pursuing the DMA must meet the requirements listed below.

Doctoral Committee for the DMA

This committee can be the same or different from the student's recital committee. The committee should consist of four members, including three members from the student's major area (one of whom is the committee chair), and one member from another department of the Frost School. The committee chair will be Regular Faculty and/or hold a doctoral degree (i.e., DMA or PhD) as well as graduate faculty status. Two other committee members will be Regular Faculty or members of the Graduate Faculty. At least one member of the committee must hold a doctoral degree (i.e., DMA or PhD). Committees are first approved by the committee chair and then the Associate Dean of Graduate Studies in the Frost School before students apply for candidacy. Requests for exceptions to these committee requirements can be submitted in writing for consideration by the Associate Dean of Graduate Studies in the Frost School.

Responsibilities of the committee shall include the following:

1. Overseeing all of the students work prior to admission to candidacy, including academic program planning and advising as to recital repertoire.
2. Advising the student regarding relevant research competencies (tools) and ensuring that the student demonstrates these competencies prior to admission to candidacy.
3. Adjudging the quality of the student's recitals, pedagogy presentations, or compositions.
4. Overseeing the doctoral essay or lecture recital, including approval of the topic and proposal, supervision of the writing of the essay or lecture recital, assessment of the quality of the final essay or lecture recital, and the quality of the final essay defense. In cases where special faculty expertise

is needed for a particular essay topic, changes in membership of the doctoral committee may be made. Membership of the essay committee is recommended by the department or program concerned, and approved and appointed by the Dean of the Graduate School.

DMA Cognates

Students pursuing a Doctor of Musical Arts degree may select an additional formal area of study known as a cognate. The 12 credit hours devoted to the cognate apply to the 60 credit hours required for the degree. The Department in which the cognate resides administers the cognate. Students must apply to the cognate Department for admission. The admission process may include an audition, interview, portfolio, or testing as determined by the cognate Department. Students must complete all requirements specified for a cognate to be recognized as having completed the cognate. Otherwise, the credit hours will be considered electives. No credits required in the DMA program can apply to the cognate. Any overlap will require approved course substitutions within either the DMA program or the cognate as determined to be most appropriate by the Associate Dean of Graduate Studies. Completion of the cognate will appear on the student's transcript at time of degree conferral.

Procedures for Entering a Cognate

1. Contact the Department in which the cognate resides and obtain written approval of your entrance. The Department should verify student admission to the cognate by emailing the Graduate Studies Office.
2. Visit the Graduate Studies Office in the Frost School of Music to formally enroll in the cognate and to obtain a copy of the Academic Progress Record (APR) for the cognate.

List of Cognates and Respective Departments:

Doctoral Cognate in Accompanying/Chamber Music, Department of Keyboard Performance

Doctoral Cognate in Conducting: Choral, Department of Vocal Performance

Doctoral Cognate in Conducting: Instrumental, Department of Instrumental Performance

Doctoral Cognate in Higher Education, Department of Music Education and Music Therapy

Doctoral Cognate in Instrumental Performance, Department of Instrumental Performance

Doctoral Cognate in Jazz Performance, Department of Studio Music and Jazz

Doctoral Cognate in Keyboard Pedagogy, Department of Keyboard Performance

Doctoral Cognate in Music Business, Department of Music Media and Industry

Doctoral Cognate in Music Education, Department of Music Education and Music Therapy

Doctoral Cognate in Music Technology, Department of Music Theory and Composition

Doctoral Cognate in Music Theory, Department of Music Theory and Composition

Doctoral Cognate in Musicology, Department of Musicology

Doctoral Cognate in Vocal Pedagogy, Department of Vocal Performance

Doctoral Cognate in Vocal Performance, Department of Vocal Performance

Doctoral Cognate in Vocal Accompanying, Department of Vocal Performance

DMA Qualifying Examinations

Qualifying examinations represent a significant milestone in the doctoral degree. All students pursuing the Doctor of Musical Arts degree must pass Doctoral Qualifying Examinations prior to proposing the DMA Essay, and prior to applying for candidacy. These exams represent a comprehensive and in-depth assessment of graduate student knowledge and skill level in the major discipline as acquired over a lifetime of academic and practical experience. Students who fail a qualifying exam (or a portion of the exam) can re-take the exam in the subsequent semester. A student who fails a qualifying examination (or portion of the exam) for a second time will be dismissed from his/her respective degree program.

Students pursuing the DMA in the following degree programs are required to take qualifying examinations in Musicology and Music Theory:

- Collaborative Piano
- Choral Conducting
- Composition
- Instrumental Conducting
- Instrumental Performance, including Multiple Woodwinds
- Keyboard Performance and Pedagogy
- Piano Performance
- Vocal Pedagogy and Performance
- Vocal Performance

Students pursuing the DMA in Jazz Composition or Jazz Performance (Instrumental or Vocal) are required to take qualifying examinations in Musicology, as well as Jazz Studies (i.e., jazz harmony/theory, aural and rhythm proficiency, keyboard harmony proficiency, and jazz arranging).

Students pursuing the DMA in Composition are required to complete qualifying examinations in Musicology and Composition.

Additional information on Doctoral Qualifying Exams can be found on our Graduate Studies website: http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/doctoral_qualifying_exam/

All DMA students are strongly encouraged to contact their advisors and Department Chairs to obtain more information on exam scheduling, expectations, and preparation.

Performance and jazz performance majors must present a qualifying recital during the first semester in residence.

Admission to Candidacy

Doctoral students may apply for candidacy after successful completion of all qualifying examinations. No student may receive the degree in the

same semester or summer session in which he or she is admitted to candidacy.

Performance and Creative Requirements

DMA students in performance, jazz performance, or keyboard performance and pedagogy may present one recital before the qualifying written examination (provided they have passed their qualifying recital). Before the second or third recital, depending upon program, students must have passed the Qualifying Examinations and removed all reservations for the written examinations in music theory, musicology, and music education, as well as having presented a proposal for the doctoral essay to their committee. Before the final recital, the student must be admitted to candidacy. All recitals are to be presented during either Fall or Spring semesters when classes are in session.

Performance Majors

Students accepted into the program must present three full-length (60 minute) doctoral recitals, and may choose from these options as decided in consultation with their studio teacher:

1. Three solo recitals
2. Two solo recitals and one chamber recital
3. Solo recitals may also include some chamber music which features the student's instrument or voice

Vocalists are expected to execute one or more substantial roles in a large scale work, e.g., opera or oratorio in addition to the solo recitals. Students majoring in accompanying and chamber music will present one solo recital, one chamber music recital, and three accompanying recitals. For Keyboard Performance and Pedagogy, an approved combination of recitals and pedagogy presentations is required.

Jazz Performance Majors

Students must present three full-length recitals.

Conducting Majors: Choral

No less than two approved full recitals shall be presented by each candidate.

Conducting Majors: Instrumental

Three approved public recitals (or the equivalent) with suitable performing groups must be given during the period of residency and prior to the oral examination.

Composition Majors

1. The candidate will be required to compose a piece of substantial proportions.
2. The candidate will be required to write a doctoral essay. The text will either detail the doctoral composition or discuss another topic as approved by the doctoral committee chair.
3. A public presentation of the candidate's compositions will be required. A series of smaller performances presented each semester on- or off-campus, a larger festival performance(s), or a cumulative solo recital at the terminal stages of the degree exemplify how this requirement can be fulfilled. Other options are possible with faculty approval.

DMA Final Project

By means of a written Doctoral Essay or Lecture Recital, all DMA candidates are expected to demonstrate their ability to conduct an original scholarly investigation and present its results in an articulate manner. All DMA students must pass a public oral defense of the Doctoral Essay or Lecture Recital. Detailed information on these projects and defense procedures is provided in the Frost School of Music Graduate Student Handbook, found here: http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks/

Doctor of Philosophy (PhD)

The Doctor of Philosophy degree is offered in Music Education, and Music Education with Music Therapy Emphasis. This rigorous curriculum prepares students to become innovative researchers, scholars, and outstanding leaders in these disciplines. Graduates are uniquely-prepared for careers in higher education, research, and administration.

Candidates must meet all general requirements for the PhD degree as defined by the Graduate School of the University of Miami with respect to residence, total minimum credit hours, and written and oral examinations.

In addition to specific courses and credit hours listed in the following pages, students pursuing the PhD must meet the requirements listed below.

PhD Qualifying Examination

All PhD students must complete a qualifying examination that includes two components. The first component consists of writing three scholarly papers that are independent of or significant extensions of documents written as part of other coursework. The second component consists of a one-hour, oral examination focusing on the written papers. Students in the PhD degree program should contact their graduate advisor to obtain detailed guidelines on the entire qualifying examination process. After successfully completing this exam, students can apply for Doctoral Candidacy and defend the dissertation proposal. Students who fail a qualifying exam (or a portion of the exam) can re-take the exam in the subsequent semester, with committee approval. A student who fails a qualifying examination (or portion of the exam) twice will be dismissed from the degree program.

Doctoral Committee for the PhD

All students pursuing the Doctor of Philosophy degree must establish a Doctoral Committee to oversee the dissertation. The committee should consist of five members, including three members from the student's major area (one of whom is the committee chair), and one other member from another department within the Frost School, and one faculty member from outside the Frost School. The committee chair and two other members must be members of the Graduate Faculty. Requests for exceptions to these committee requirements can be submitted in writing for consideration by the Associate Dean of Graduate Studies in the Frost School.

Admission to Candidacy

Doctoral students may apply for candidacy after successful completion of all qualifying examinations. No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy.

PhD Final Project: the Dissertation

The culminating project for the PhD is the Doctoral Dissertation. A PhD is traditionally considered a research-oriented academic degree, thus the dissertation should consist of independent, original research that demonstrates the candidate's mastery of both subject matter and scholarly method. All PhD students must pass a public oral defense of the Dissertation. Detailed information, including defense procedures, is provided in the Frost School of Music Graduate Student Handbook: http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks/

Degree Requirements: Masters Degrees

Master of Music Degree (MM) in:

- Collaborative Piano
- Conducting, Choral or Instrumental
- Instrumental Performance
- Keyboard Performance
- Jazz Performance
- Vocal Performance

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

Ensemble Requirements

The curricula for Master of Music degrees in performance and conducting include participation in one ensemble during each semester that a student is registered for 7 credit hours or more.

Credit Hours and Grades

A minimum of 30 credit hours of graduate level courses with an average of B and no grade below C. All students must complete the required courses of their major.

Conducting Recital Guidelines

Master's Recital

A compilation on DVD of conducting single or multiple works of live performances of major ensembles spread across the Masters' experience. These performances are arranged in consultation with the major professor who assists in the preparation of the performances.

Master's Advanced Recital

A full-length conducting recital is prepared and presented. The ensemble(s) and repertoire will be selected in close consultation with the major professor who will assist in the preparation process. All aspects of performance preparation including scheduling, venue arrangements, program notes, and the like will be carried out by the student under the guidance of the major professor.

Performance Recital Guidelines

Master's Recital

A full-length recital performed publicly by the student that may include chamber music in which the student's instrument plays a prominent role. Selection of repertoire is determined in consultation with the major professor who assists in the preparation of the performances.

Master's Advanced Recital

A full-length recital in which all music performed features the recitalist as a soloist. The recitalist will prepare extended program notes on the repertoire performed. Portions of the extended program notes are to be included with the recital program distributed to the audience. The performance is to be recorded in both audio and video so that the recitalist presents a DVD as evidence of the recital to the Dean of Graduate Studies prior to the end of the semester in which the recital was given. Repertoire will be selected in consultation with the major professor, who will assist in the preparation process. The student under the guidance of the major professor will carry out all aspects of performance preparation including scheduling, venue arrangements, program notes, and the like.

Recital Papers and Extended Program Notes

Students must complete a scholarly document in the form of either a Recital Paper or Extended Program Notes which must be defended before the masters recital committee. Detailed information on these documents and defense procedures are provided in the Frost School of Music Graduate Student Handbook: http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks/

Master of Music Degree (MM) in:

- **Composition**
- **Digital Arts and Sound Design**
- **Keyboard Performance and Pedagogy**
- **Media Writing and Production**
- **Musicology**
- **Music Education**
- **Music Therapy**
- **Sound Recording Arts**
- **Studio Jazz Writing**

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

Credit Hours and Grades

A minimum of 30 credit hours of graduate level courses with an average of B and no grade below C. All students must complete the required courses of their major.

Masters Thesis or Masters Project

Students in these Master of Music degree programs must complete either a thesis or masters project and must pass a public, oral defense of their work. Detailed information on these documents and defense procedures are provided in the Frost School of Music Graduate Student Handbook: http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks/

Comprehensive Examinations

Certain masters degree programs also require students to take written Comprehensive Examinations. Students should contact their advisors to obtain specific details regarding comprehensive examination requirements. The exam is typically written and evaluated by a

committee of faculty members in the student's department who are familiar with the student's discipline.

Per Graduate School policy, students who fail the comprehensive exam may be given one opportunity to retake the exam, with the committee's approval. The re-take of the comprehensive exam may not be taken during the same semester as the original exam, or during a summer session. Additionally, the re-take must be completed within one calendar year of the original exam.

Master of Music Degree (MM) in:

- **Jazz Pedagogy**
- **Music Business and Entertainment Industries**

In addition to specific courses and credit hours listed in the following pages, students pursuing these Master of Music degrees must meet all requirements listed below.

Credit Hours and Grades

A minimum of 30 credit hours of graduate level courses with an average of B and no grade below C. All students must complete the required courses of their major.

Cumulative Exit Exam

Students must pass a cumulative exit exam as part of the Master of Music degree in Music Business and Entertainment Industries or Jazz Pedagogy.

Master of Arts Degree (MA) in:

- **Arts Presenting and Live Entertainment Management**

In addition to specific courses and credit hours listed in the following pages, students pursuing this Master of Arts degree must meet all requirements listed below.

Cumulative Exit Exam

Students must pass a cumulative exit exam as part of the Master of Arts degree in Arts Presenting and Live Entertainment Management.

Master of Science Degree (MS) in:

- **Music Engineering Technology**

In addition to specific courses and credit hours listed in the following pages, students pursuing this Master of Science degree must meet all requirements listed below.

Masters Research Project

Students pursuing the Master of Science degree in Music Engineering Technology must complete a substantial final project in the form of independent research that is defended before a faculty committee.

Detailed information on this project and defense procedures are provided in the Frost School of Music Graduate Student Handbook: http://www.miami.edu/frost/index.php/graduate_studies/about_us/current_graduate_students/student_handbooks/

Degree Requirements: Artist Diploma

Artist Diploma (AD) in:

- **Instrumental Conducting**
- **Instrumental Performance**

- **Keyboard Performance**
- **Vocal Performance**

The Artist Diploma is an intensive, one-year immersion in performance or conducting study for candidates with highly-developed skills. In addition to specific courses and credit hours listed in the following pages, students pursuing the AD program must also complete two, full-length (60 minute) recitals.

Instrumental Performance

The Frost School of Music's Department of Instrumental Performance has programs tailored to meet the needs and interests of students – like you – who aspire to performance careers. Graduates of these programs often pursue careers as symphony musicians, university professors, concert soloists, or band or orchestra conductors. Many graduates pursue advanced study and graduate degrees for further career preparation.

As an instrumental performance major, you will focus on developing and honing your performance skills on a selected brass, percussion, string, or woodwind instrument with assistance from faculty who have distinguished themselves as outstanding teachers and performing musicians. While the curriculum emphasizes development of tone and musicianship, as well as technical mastery of the instrument, it also includes music theory, music history and literature, orchestral literature and teaching methods. In addition, you will develop expertise in contemporary literature and chamber music performance. For more information, please visit the website for the department of Instrumental Performance at http://www.miami.edu/frost/index.php/instrumental_performance/

Artist Diploma

Artist Diploma in Instrumental Conducting or Performance

The Artist Diploma is a program of advanced study designed for the outstanding career-oriented performer. The curriculum emphasizes preparation for major competitions, auditions, apprenticeships, and the development of a performance career. Entrance to the program is limited to those individuals who have demonstrated exceptional skills in performance or conducting by audition. A fully enrolled student can complete the 18 credit hour program in one year.

M.M. in Instrumental Conducting

Candidates must possess and demonstrate an unquestioned gift of musical leadership based upon broad experience with instrumental ensembles. Advanced orchestration must be included in the program. Admission requirements include a baccalaureate degree in conducting or performance, accumulated practical experience with instrumental ensembles, and experience equivalent to an undergraduate requirement in orchestration. Enrollment in this major is only by special permission.

M.M. in Instrumental Performance

Violin

The candidate must show an adequate technical grounding in scales, arpeggios, bowing and phrasing, demonstrate adequate ability in sight

reading on the instrument, and be able to read at sight simple piano accompaniments.

Harp

The candidate must have a mastery of scales and arpeggios in all octaves in both slow and rapid tempo, and in various rhythms, should have had orchestral and other ensemble experience, should be able to read orchestral parts at sight, and should have developed the ability to transcribe music written for keyboard (or other) instruments for use in orchestra or ensemble or accompanying.

Multiple Woodwinds

The applicant must demonstrate, by audition, proficiency in at least three of the following families of instruments: clarinet, saxophone, flute, and double reed. Applied instruction will include a minimum of 8 credit hours from the above groups as determined by the student's advisor. The recital (the content and evaluation of which are the responsibility of the student's recital committee) will consist of performance on the student's major instrument, and on instruments from at least two other woodwinds. The student is expected to supply his/her own professional quality instruments.

The student must demonstrate a high level of accomplishment on his/her instrument in the areas of tone, technique, and musicality.

Keyboard Performance

The Department of Keyboard Performance at the Frost School of Music is a dynamic center for music scholarship. Regardless if a student is more versed in classical or contemporary repertoire, the performance and academic opportunities are exceptional and for all areas of keyboard study. A degree from the Frost School will ensure broad comprehensive training for a student in a performance-intensive environment. Degree programs incorporate performance, music research, pedagogy, and professional skills to cultivate students for a professional life in music. Graduates may seek careers as concert performers, collaborative pianists/accompanists, and/or as artist teachers. For more information, please visit the website for the department of Keyboard Performance at http://www.miami.edu/frost/index.php/keyboard_performance/

Music Education and Music Therapy

The Department of Music Education and Music Therapy boasts two of the most innovative programs in the country and is committed to the preparation of outstanding music educators, therapists and scholars at all degree levels. The department faculty members are cutting edge scholars and researchers, holding leadership positions in internationally prominent organizations. Their contributions to research, scholarship, and pedagogy consistently inspire their students while informing the profession at large.

The music education program seeks to transcend all areas of music teaching and learning, from birth to older adulthood, and from public schools to community programs, allowing the principles of pedagogy to be applied broadly in a wide variety of contexts.

Music Education

A basic premise of the Music Education program is that music teachers must be both musicians and teachers; thus, competency as a musician is equally as important as having a strong theoretical and practical foundation in music education. Carefully coordinated courses emphasize sequencing of instruction in terms of student's musical development and incorporate ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners. For more information, please visit the website for the department of Music Education at http://www.miami.edu/frost/index.php/department_of_music_education/

Music Therapy

Music therapy involves using music as a tool to help people regain or develop important life skills, such as communication, physical movement, attention and memory, emotional growth or social skills. Therapeutic techniques are based on scientific knowledge regarding how the human brain and body respond to and utilize musical stimuli.

Music therapists work with individuals of all ages who require treatment due to deficits in physical, cognitive or social/emotional functioning.

Potential employment sites include medical or psychiatric hospitals, clinics, nursing homes, rehabilitation centers, special education or early intervention school settings, hospices, or correctional settings. Music therapy can be a rewarding career for the individual who has a strong musical background and who is interested in a health care profession. For more information, please visit the website for the department of Music Therapy at http://www.miami.edu/frost/index.php/music_therapy/

M.M. in Music Education with Teaching Certification

A student holding a B.M. degree in music may work toward certification in Music Education concurrently with the M.M. degree in Music Education. The B.M. degree must have included at least 14 credit hours of music performance, 12 credit hours of music theory, 3 credit hours of conducting, 6 credit hours of music history, and credit hours in performance ensembles. The culminating project for this degree takes place within MED 775. This program is approved by the Florida Department of Education and leads to initial certification as a music teacher for grades K-12.

Ph.D. in Music Education

The Doctor of Philosophy program is offered in Music Education, as well as in Music Education with Music Therapy Emphasis. Requirements for the degree conform to those for the general Doctor of Philosophy degree, listed elsewhere in this Bulletin. The Ph.D. is a research degree requiring 60 credit hours beyond the Master's degree or 90 credit hours beyond a Bachelor's degree. Enrollment for the Ph.D. degree is limited. Acceptance into the program is based on academic credentials, Graduate Record Examination Scores, personal suitability, recommendations, experience, and demonstrated professional competency.

Students are admitted to candidacy after successful completion of at least three semesters of coursework, including MED 795 Doctoral Research Project, as well as the MED Qualifying Examination. Research tools are selected in consultation with the student's advisor, as relevant to the proposed dissertation research.

Music Media and Industry

Music Business and Entertainment Industries

In today's fast changing, multi-billion dollar international music and entertainment industries, there are more record labels, publishers, media companies, distributors, retailers, and product manufacturers actively promoting the sale and use of music than ever before. As the market for music shifts away from physical products and traditional methods to digital online and mobile, a greater number of competent, highly-skilled executives and entrepreneurs will be needed to meet the specialized demands of the new music industry. Since 1964, the Music Business and Entertainment Industries program has been at the forefront of music business education. The MBEI program has been carefully designed to prepare qualified music business students for these emerging opportunities.

Our graduate program, where students earn a Master of Music, focuses primarily on music business courses, with the opportunity to pursue additional coursework in both the School of Business and School of Communications. We also offer the only joint degree Juris Doctor (J.D.) and Master of Music in Music Business and Entertainment Industries (M.M.). For more information, please visit the website for the

department of Music Business at http://www.miami.edu/frost/index.php/music_business/

Music Engineering Technology

Since 1975, the Music Engineering Technology program at the University of Miami Frost School of Music has pioneered education in music and technology, setting the standard by which the National Association of Schools of Music (NASM) accredits other such programs around the United States. Alumni of the program have contributed significantly to the music and audio industries and upon graduation pursue careers ranging from recording engineer to software designer.

The Music Engineering Technology program offers a two-year Master of Science graduate degree for students who have completed an undergraduate degree in electrical engineering or computer science. These students study the software and hardware design of audio systems and perform independent research that culminates in a thesis project. Upon graduation, these students are widely placed in top corporations that span the audio industry. For more information, please visit the website for the department of Music Engineering at http://www.miami.edu/frost/index.php/music_engineering/

Arts Presenting and Live Entertainment Management

Arts Presenting (AP Live) is a Live Entertainment Management Program with an emphasis on the performing arts and commercial music industries. AP Live offers a curriculum that's distinctly tailored to provide a thorough understanding of marketing, promotion, management, legal aspects, risks and finance of a diversity of live entertainment endeavors.

AP Live students gain hands on experience producing events, marketing and promoting concerts and working with venues on all aspects of a live entertainment performance. For more information, please visit the website for the Arts Presenting Program at http://www.miami.edu/frost/index.php/arts_presenting

Joint

J.D./M.M. in Music Business and Entertainment Industries

The University of Miami School of Law and the Frost School of Music offer the first ever joint degree program in law and music business. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Music in Music Business and Entertainment Industries degree from the School of Music.

In this specialization, students not only learn the essentials of law, but also the common practices of the music business – essential skills for becoming a successful attorney in the music industry. Through this joint program, students can complete both degrees in less time (3 to 4 years) while studying at a top law school and one of the best music schools in the country. And, as one of the four major music cities in the U.S. and

as the music center for the Latin American Divisions of all major music companies, Miami offers exceptional internship and work opportunities. For more information, please visit <http://www.law.miami.edu/academics/jd-music.php?op=0>

J.D./M.A. – Master in Arts Presenting & Live Entertainment Management

The University of Miami School of Law in partnership with the University of Miami's esteemed Frost School of Music, Department of Music Business and Entertainment Industries, now offers a joint J.D./M.A. in Law and Arts Presenting & Live Entertainment Management.

This combination of degrees is ideal for Law School students looking to:

- Prepare for a career in entertainment law
- Develop a focus on the presentation of concerts, exhibitions, performances, and events
- Apply legal knowledge in the areas of contracts, risk management, marketing, and finance to the live entertainment/performance fields.

This program is similar to the J.D./M.M. program in Music Business and Entertainment Industries, but has a focus on the concert/performance arena. For more information, please visit <http://www.law.miami.edu/academics/jd-ma-entertainment.php?op=0>

Music Theory - Composition

Degree Programs

Known for its aesthetic diversity and openness to the ever-changing and progressive world of composition, the Frost School of Music's Department of Music Theory and Composition has a long tradition of distinguished faculty and students. When today's post-baccalaureate composers decide to pursue a Master's Degree in Composition, Digital Arts and Sound Design, or Media Writing and Production, they look to Frost faculty composers for inspiration and mentoring. At Frost, graduate students are well coached to take the next steps toward their professional maturation. They work one-on-one with our dedicated faculty to expand their music portfolios, enter competitions, apply for commissions and network in the music profession. Candidates for the Doctor of Musical Arts in Composition (D.M.A.) develop advanced research and teaching skills that are applicable to careers in higher education. For more information on the Music Theory and Composition department, please visit http://www.miami.edu/frost/index.php/department_of_music_theory_and_composition/

Musicology

Degree Programs

Graduate students seeking the M.M. in Musicology at the Frost School of Music enjoy a balanced curriculum of study in music literature, analysis, performance, and research methods.

Our stellar faculty and extensive library resources help students fulfill their musical and academic goals while preparing for advanced study. Musicology majors interact and collaborate with others in a variety of musical disciplines, gaining insight into the role their own specialization plays in a thriving musical environment.

Musicology students are expected to demonstrate proficiency in a language other than English, normally German, French, or Spanish. Proficiency examinations will be administered by the Department of Modern Languages and will consist of 1-2 passages from representative scholarly readings. Alternatively, enrolling in ITA 625, FRE 625, or an equivalent course at the graduate level may fulfill the requirement. This requirement should be completed by the beginning of the second year to facilitate research on the master's thesis.

Studio Music and Jazz

Degree Programs

The mission of the Studio Music and Jazz Instrumental Degree Programs is to: (1) prepare jazz instrumentalists to enter the music profession or further jazz studies; (2) identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career; (3) foster faculty creativity and performance which serves as a role model for students; (4) develop, and revise courses in jazz improvisation, jazz arranging/composition and provide on and off campus performance opportunities; (5) produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact discs, radio and Internet broadcast; and (6) provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production. For more information on the Studio Music and Jazz department, please visit http://www.miami.edu/frost/index.php/studio_music_and_jazz/

Nursing and Health Studies

<http://www.miami.edu/nursing>

DEPARTMENT CODE: NUR

The School of Nursing and Health Studies offers three graduate degrees:

- Master of Science in Nursing (MSN)
- Doctor of Nursing Practice (DNP)
- Doctor of Philosophy (PhD) in Nursing

If admitted to an MSN, DNP or PhD program, all students must successfully pass a background check which includes fingerprinting and drug screening, and must also provide proof of current immunizations. These requirements must be met prior to registering for courses.

Note that courses and policies are subject to change throughout the academic year. Please refer to the 2015-2016 Student Handbook for the applicable curriculum and progression policies.

Master of Science in Nursing

The Master of Science in Nursing (MSN) degree program is designed for professional nurses holding a Bachelor of Science degree with a major in nursing (BSN). Registered nurses with baccalaureate degrees in other fields are also eligible to apply for admission. Specialty tracks focus on selected areas of advanced practice nursing and nursing education. The degree requirements may be completed in three semesters of full-time study. Part-time study is also available (five semesters). Further information about each program may be obtained from:

Office of Student Services
School of Nursing and Health Studies
University of Miami
P.O. Box 248153
Coral Gables, FL 33124-3850

Visit us on-line at: http://www.miami.edu/sonhs/index.php/sonhs/academics/master_programs/
E-mail: Nursinggrad@miami.edu
Call: 305-284-4325

The MSN Program is accredited by:

Commission on Collegiate Nursing Education (CCNE)
One DuPont Circle NW, Suite 530
Washington, DC 20036
202-887-6791

Additional national accreditation is from:

Council on Accreditation of Nurse Anesthesia Education Programs (COA)
222 South Prospect Avenue
Park Ridge, Illinois
60068-4001
847-692-7050 (ext. 1154)

Graduate Student Responsibilities

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. It is the student's responsibility to comply with all the provisions of the *Bulletin* and written changes to the program of study. Students are provided assistance by faculty advisors

and faculty members. Requests for deviation from the program of study or school requirements are granted only by written approval from the Associate Dean or Dean. Students who are in violation of the provisions of this *Bulletin* may be withdrawn unilaterally by appropriate School officials from classes, deleted as Nursing and Health Studies students or have a stop placed upon their future enrollment. The school reserves the right to change academic requirements to include course offerings to ensure that students are receiving the latest knowledge. Classes may be held on weekdays or weekends, and will be listed as such in the course schedule. Changes are transmitted by written notice in the current year of the School of Nursing and Health Studies Master's Handbook located at www.miami.edu/sonhs (<http://www.miami.edu/sonhs>) or by the Dean.

Progression/Dismissal Policy

In order for MSN students to progress through their programs to completion, the academic policy is as follows:

1. Any graduate student who receives a "C" or lower in a nursing course will be dismissed from his or her program.
2. A grade of "B-" or "C+" for a course is below graduate standards, and the student must repeat that course. However, a student may only repeat one course, one time. The student will be dismissed if he/she fails a second course even if he/she retook and passed the previous failed course.
3. A passing grade in all clinical experiences is required to pass a course having a clinical component (generally listed as a "lab section" by UM). Students who are not making satisfactory progress may also receive an academic alert at mid-semester or mid-course.
4. All grades are included in the computation of the UM overall grade point average including those that are failed or repeated.

MSN Admission Requirements (Advance Practice Specialties)

Admission to graduate programs in the School of Nursing and Health Studies is subject to the rules, regulations, and procedures as determined by each graduate nursing program and the Graduate Bulletin of the University of Miami. Admission to the master's program requires:

- Submission of a complete University of Miami Graduate School application for admission
- A Baccalaureate degree (BSN preferred) from a regionally-accredited institution
- Official transcripts from all undergraduate and graduate institutions attended, unless the applicant is a graduate of the University of Miami
- Three letters of reference, at least one of which is from an academic source
- Statement of professional goals for graduate study
- Current resume
- One year of Critical Care Experience is required for the Adult-Gerontology Acute Care Nurse Practitioner program
- Prerequisite: Introductory Statistics Course
- Current (unrestricted) RN license (once admitted to the program, students must provide a Florida RN license)
- Photocopies of the following certifications:

Adult-Gerontology	BLS
Primary Care NP	

Adult-Gerontology Acute Care NP	BLS	ALS
Family NP	BLS	
Nurse Education	BLS	

- Applicants for whom English is not the native language must comply with the Minimum Score Requirement in the University's policy on Examinations for International Students located at: http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements/
- Interviews are part of the admissions process, and candidates selected for interviews will be notified.

Students must submit to drug screening and background checks. See the School of Nursing and Health Studies Student Handbook 2015-16 for further information.

MSN SPECIALTY TRACKS

- Adult-Gerontology ACUTE CARE Nurse Practitioner
- ADULT-Gerontology Primary Care NURSE PRACTITIONER
- FAMILY NURSE PRACTITIONER
- NURSE EDUCATION

Programs leading to the Master of Science in Nursing (MSN) degree prepare students for Advanced Practice Nursing in Adult-Gerontology Acute Care Nurse Practitioner, Adult-Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, and Nurse Education.

Doctor of Nursing Practice

The DNP degree is a practice-focused doctorate designed for nurses seeking a terminal degree in nursing practice. The DNP Program is accredited by:

Commission on Collegiate Nursing Education (CCNE)
One DuPont Circle NW, Suite 530
Washington, DC 20036
202-887-6791

The program is offered in two formats: the MSN-DNP and the BSN-DNP Nurse Anesthesia track. The Nurse Anesthesia track is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs (COA), Park Ridge, Illinois.

The outcome objectives for graduates of the DNP program are to:

- Integrate knowledge, theories, and concepts from the biophysical, psychosocial, analytical, and organization sciences to develop ethical health care systems and new frontiers for nursing practice that address health care disparities.
- Evaluate research methods and findings to create an evidence base for nursing practice and health care delivery systems that reflect best practices and alleviate health care disparities.
- Synthesize knowledge gained from traditional and innovative learning methods to lead quality, cost-effective health care collaborations addressing health care disparities.
- Demonstrate expert clinical judgment and knowledge of health care systems to design, deliver and evaluate evidence-based care interventions to reduce health care disparities.

- Model expert nursing practice and serve as mentors to nursing colleagues in their efforts to improve nursing practice and health care systems.
- Employ knowledge of health care policy and economics to develop and evaluate programs to address health care disparities.

MSN-DNP Admission Requirements

- A baccalaureate degree and a master's degree, preferably in nursing, from an accredited institution. Individuals without an MSN are evaluated on a case-by-case basis for admission.
- Minimum 3.0 GPA from MSN program.
- Official transcripts from all undergraduate and graduate institutions attended, unless the applicant is a graduate of the University of Miami.
- Two (2) letters of recommendation, at least one of which is from an academic source, and preferably from individuals with an earned doctorate in nursing.
- Statement of professional goals for graduate study.
- Current resume.
- National specialty certification in an area of nursing practice.
- Current (unrestricted) RN license¹.
- Current Basic Life Support certification (i.e., CPR or BLS).
- Applicants for whom English is not their native language must comply with the minimum score requirement in the University's policy on Examinations for International Students located at http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements/.
- Interviews will be scheduled as requested by faculty.
- Documentation of completion of a minimum of 440 precepted clinical hours or supervised residency hours in master's level program. An applicant who cannot provide such documentation may submit a portfolio for evaluation of equivalent clinical hours. Contents of the portfolio should include:
 1. Descriptions of any supervised internship or residency experiences in their master's program.
 2. Descriptions of any supervised internship or residency experiences they may have had after their master's programs.
 3. Descriptions of nursing practice-related supervised projects in their master's programs.
 4. Descriptions of nursing practice-related supervised projects they accomplished after their master's programs (community or service sector). Any of the projects must have been accomplished outside of work hours.
 5. Signed statement from supervisor of project with the number of hours in the project.
 6. Names and contact information of the supervisors who can be contacted to describe the experiences listed above.

Final assignment of portfolio clinical hours is non-negotiable and is based on the level and nature of the supervision, the type, and applicant's responsibilities in the project.

Students must submit to drug screening and background checks. See the School of Nursing and Health Studies Student Handbook 2015-16 for further information.

- ¹ International and out-of-state students are welcome in the DNP program. They must have a degree equivalent to a U.S. baccalaureate degree in nursing. However, some assignments are limited to students holding current Florida RN licenses and BLS certification.

Doctor of Nursing Practice - Nurse Anesthesia Track

The BSN-DNP Nurse Anesthesia program is available as an entry into practice degree, meaning it is available to post-baccalaureate nurses, with or without a master's degree in nursing. The DNP anesthesia track degree is a practice-focused doctorate. The program is a lock-step program; students must successfully complete a semester to progress to the next semester.

BSN-DNP Nurse Anesthesia Track Admission Requirements

- Bachelor's degree in nursing from an NLN or CCNE accredited program of nursing is preferred. Registered nurses with a bachelor's degree in other relevant science fields will be considered on an exception basis.
- Official transcripts from undergraduate and graduate institutions, unless the applicant is a graduate of the University of Miami.
- A current, unrestricted license to practice nursing in the state of Florida, or the state or territory of current practice (once admitted to the program, must obtain Florida licensure).
- Nursing GPA 3.0.
- Statistics course within 5 years.
- **Minimum** of 2 years critical care experience within the last five years.
- Current resume/curriculum vitae.
- Written personal goal statement which describes your future role as a DNP within the health care system.
- 3 letters of recommendation: 1 from a current clinical supervisor, 1 from a former/current academic faculty member, 1 from a community leader or professional colleague.
- Current Basic Life Support (BLS), Advanced Cardiac Life Support (ACLS), & Pediatric Advanced Life Support (PALS) certificates.
- Applicants for whom English is not their native language must comply with the minimum score requirement in the University's policy on Examinations for International Students located at http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements/.
- Successful completion of a pre-admission interview (personal interview).
- Interviews will be scheduled as requested by faculty.

Students must submit to drug screening and background checks. See the School of Nursing and Health Studies Student Handbook 2015-16 for further information.

Doctor of Philosophy

The Ph.D. with a major in Nursing Science requires a minimum of 41 credit hours of coursework beyond the master's degree or 62 credit hours of coursework beyond the bachelor's degree. The principal goal of the PhD with a major in Nursing Science is to prepare scholars and researchers who will contribute to the growth of science in nursing through recognized methods of scholarly inquiry. Admission to the doctoral program is competitive.

PhD Admission Requirements

- Baccalaureate or a master's degree in nursing from an accredited college or university (or equivalent for international applicants), with a minimum 3.0 GPA.
- Official transcripts from all undergraduate and graduate institutions attended, unless the applicant is a graduate of the University of Miami.
- Statement of professional goals for graduate study, including research interests and fit with faculty.
- Resume/CV.
- Three (3) letters of recommendation, one of which must be from an academic source.
- Licensed as a professional nurse (not required for international applicants).
- Competitive GRE scores.
- International applicants for whom English is not their native language must comply with the minimum score requirement in the University's policy on Examinations for International Students located at http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements/.
- Interviews will be scheduled as requested by faculty.

Students must submit to drug screening and background checks. See the School of Nursing and Health Studies PhD Student Handbook 2015-16 for further information.

Financial Assistance

Full-time PhD students are considered for support which may include:

1. Tuition Scholarships. These awards vary in amount and are intended to assist the recipient in pursuit of study and research as required by the degree. These scholarships are awarded on a competitive basis.
2. Graduate Stipends. These cash awards, paid monthly, are intended as part of an educational assistance program for PhD degree students. The stipends require service in the form of teaching, research assistance, or other appropriate educational activities that may be designated by the supervisor of the recipient.

For further information, contact:

Office of Student Services
 School of Nursing and Health Studies
 University of Miami
 P.O. Box 248153
 Coral Gables, FL 33124-3850
 Phone: 305-284-4325

Masters

Master of Science in Nursing with Specialty Tracks in:

- Adult-Gerontology Acute Care Nurse Practitioner (p. 573)
- Adult-Gerontology Primary Care Nurse Practitioner (p. 574)
- Family Nurse Practitioner (p. 575)

Doctoral

- Doctor of Nursing Practice MSN-DNP (p. 569)
- Doctor of Nursing Practice - Nurse Anesthesia Track (BSN-DNP) (p. 568)
- Ph.D. in Nursing Science (p. 576)

Doctor of Nursing Practice - Nurse Anesthesia Track (BSN-DNP)

BSN-DNP Completion Requirements

To receive the Doctor of Nursing Practice Degree, the student must:

1. Complete all course work as required with an overall GPA of 3.0 or better.
2. Complete all required clinical and practice immersion hours.
3. Successfully complete the capstone project before graduation.
4. Successfully complete annual benchmark exams, before progressing into next phase of the program.
5. Successfully pass the DNP comprehensive examination. The exam is an integrative experience to demonstrate students' mastery of the outcome objectives of the program.
6. Pass a comprehensive clinical nurse anesthesia oral board examination.

Ph.D. in Nursing Science

Degree Requirements

To receive the Doctor of Philosophy degree, the candidate must meet all the general requirements for the PhD degree with respect to course work, residency, the qualifying examination, 12 credit hours of dissertation, and successful defense of the dissertation.

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. It is the student's responsibility to understand fully and comply with all the provisions of the *Bulletin* and written changes to their program of study. Students are provided assistance by advisors and faculty members. Requests for deviation from the program of study or school requirements are granted only by written approval from the Dean. Students who are in violation of the provisions of this *Bulletin* may be withdrawn unilaterally by appropriate school officials from classes, or have a stop placed upon their future enrollment. The school reserves the right to change academic requirements to ensure that students are receiving the latest knowledge. Changes are transmitted by written notice in the current year of the *School of Nursing and Health Studies PhD Student Handbook* located at www.miami.edu/sonhs (<http://www.miami.edu/sonhs>) or by the Dean.

GRADUATE STUDENT HANDBOOK FOR ONLINE STUDENTS

Message from the Dean

Graduate school at the University of Miami is a place where students gain proficiency in a specialty with the guidance of dedicated faculty in the presence of a community of world-class scholars. UM students are thought leaders and innovators whose accomplishments are showcased on a global stage. Our students represent the best and the brightest and their engagement with our faculty continues to elevate the University.

The Graduate Student Handbook for Online Students

The *Graduate Student Handbook for Online Students* is an excellent resource for graduate online students at the University of Miami. The Handbook contains all applicable policies and valuable information for graduate online students compiled into one comprehensive manual. Online graduate student enrollment is governed by this Handbook. This handbook describes policies and procedures pertaining to the Graduate School and online graduate study at the University of Miami. Policies or procedures for online graduate students may vary from policies or procedures of campus-based graduate students. This Graduate Student Handbook is applicable to Online Students only. In the event of a conflict between this handbook for online graduate students and any other applicable University policies or procedures, the terms of this handbook shall control. It is the student's responsibility to be aware of and comply with all policies, procedures and deadlines. Although the Handbook contains general information, students should be aware of regulations and policies that directly pertain to individual graduate programs, as many programs have additional requirements of their own, as well as a program handbook.

Policies Modification

This is the official University of Miami source for the enrollment, business, and financial policies associated with the University's UOnline programs. The University reserves the right to amend and update these policies at any point in the future. Amendments to these policies will be published on the University Registrar's website.

Please also consult these additional University of Miami policies:

- Our privacy statement (http://www.miami.edu/index.php/privacy_statement) for our privacy and data collection policies.
- Technology policies
 - http://www.miami.edu/it/index.php/a060_acceptable_use_of_info_tech_resources_by_students/

About the Graduate School

About the Graduate School

The Graduate School is the administrative body overseeing all master's and doctoral programs.

Mission and Goal Statement

The mission of the Graduate School is to promote graduate education, scholarship and research; to support individuals, departments and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally, the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility the recommendation for the degree rests with the faculty.

Academic Calendar

Please visit the **Office of the Registrar** website for the most recent academic calendar for online programs.

Definitions

New Student

A new student is a student who has been admitted to a program and paid the enrollment deposit but not yet completed the first 7 days of the first program course.

Continuing Student

A continuing student is a student who has completed **at least** the first 7 days of the first course in their program and not yet graduated from the program.

Course

A course is an educational component made up of academic content, assignments and activities, the successful completion of which earns a student credit hours toward completion of a program. A course is delivered and accessed online via a learning management system (LMS). A course is 7 weeks long.

Academic Plan/Program of Study

A series of courses that make up a full degree or certificate program. All courses in a program must be successfully completed for a student to be considered for graduation.

Academic Year

The academic year is August through July and consists of 3 terms (Fall, Spring, Summer).

Term

A term is the discrete length of time in which courses are offered. A term is 15-weeks long and encompasses two 7-week sessions with a 1-week break in between them.

- Fall Term is August – December
- Spring Term is January – April
- Summer Term is May – July

Session

A session is the discrete length of time during which a single course is completed. A session is 7-weeks long.

General Academic Requirements and Regulations

All graduate work (except for the master's degree in Law, J.D. in Law, and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of their programs in regard to attendance, examinations, payment of fees and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Prospective students should note that "graduate study" means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative and scholarship of the student. The term must be distinguished from "post-graduation study" which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor's degree.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right, to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

Time to Completion

Time to completion starts when a student begins any program in the Graduate School. All work must be completed within three (3) years of the start date to the graduate program, for those studying for the various master's degrees. Individual programs may set a shorter time period. Exceptions may be granted by the Dean of the Graduate School at the request of the Graduate Program Director. Course availability may vary by program and term; therefore students who may need to withdraw or

take a break from their program should work directly with their Academic Advisor to ensure timely completion within the three (3) year window.

A student is ineligible for financial aid when it becomes mathematically impossible for him/her to complete the program within 150% of the length of the program. The length of the program is the amount of time necessary for a student to complete all requirements for a degree or certificate.

Each online degree program has a *minimum* time within which a student may complete the degree if the student takes the courses on a continually enrolled basis. Online degrees are flexible, and the actual time to completion, within the three-year limit, can vary by student. However, if a student is not continuously enrolled for a period greater than one year, he or she must reapply to the program and will lose any tuition discounts previously applied to their account. A student may be eligible for any tuition discounts available to new students at the time of the student's re-admission, and should contact the Online Enrollment Office to see if they qualify.

Graduate Transfer Credits

- Transfer credits from an outside institution may not be applied toward any online degree in the School of Business.
- A maximum of 6 credit hours may, with the permission of Program Director, be applied to the M.S. Ed. in Sport Administration degree online.
- Certain UOnline business courses may be transferable to other UOnline business programs. Students should contact their Academic Advisor at uonlineadvising@miami.edu to see if their courses are eligible to transfer.
- Graduate credit hours transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program exceeds six years. On an individual basis, students may be permitted to validate over-aged credit hours by examination, with program approval.
- Students in the UOnline degree programs may not transfer or transfer credit hours from the online degree version of these programs to the campus based versions of the programs without the permission of the Program Director and the Dean of the school.
- Students may not transfer to transfer any credits from any campus-based program to any of the UOnline programs without the permission of the Program Director and the Dean of the school.
- Students may not take any individual UOnline course and transfer into an existing campus program using the online course as an elective course option.
- Transfer credit hours grades will not be factored into a student's cumulative grade point average at the University. Transfer credit hours only impact the number of credit hours earned.

Registration

Registration and Online Course Access

Registration starts about **2 weeks** before each term. Each term contains two 7-week sessions with about a 1-week break in between each course. Students will have access to their online course approximately four (4) days before the first day of class. New and continuing students will be automatically registered by their advisor, and are only registered for

classes at the beginning of each semester. UOnline programs currently do not allow for students to only enroll for one course per term. Students may take time off from their program, but must do so in term increments at this time. Students who wish to take time off should contact their Academic Advisor prior to their withdrawal to ensure appropriate course availability and to determine their ability to complete their degree program in the required time frame upon the student's return.

New Student Registration

Students will be eligible for registration once the University has received their enrollment deposit, paid in full. Students will be registered into courses for the entire first term, both first and second sessions (2 courses per term), by the Registrar's Office. Students will have access to the online course approximately **4 days before** each session start date.

Continuing Student Registration

Students will be eligible for registration provided they have no financial or other holds on their account or are not withdrawn. If a student has previously withdrawn from their UOnline program, and it has been less than one year since they have been enrolled, the student should contact their Academic Advisor at uonlineadvising@miami.edu to re-enroll for the upcoming term. Please refer to the UOnline Academic Calendar for important deadlines regarding registration for continuing students. Students will be registered into courses for the entire term, both first and second sessions (2 courses per term), by the Registrar's Office. Students will have access to their course approximately **4 days before** each session start date.

Financial, Academic and Other Holds

If students have any financial or other holds, they will not be registered into a course until they have met the requirements to remove the hold. Please refer to the UOnline Academic Calendar for important dates regarding registration for continuing students and readmission.

Full-Time Study

All students are considered full time. At this time, only students who do not require financial aid are eligible for part time status. Students should contact their academic advisor for further information on part time status.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School and the Registrar's Office.

No full-time faculty member may be a full-time online student, whether or not working toward a degree. Nor may a full-time online student be a full-time faculty member.

No full-time online student will be a principal investigator on any grant or contract, whether in name or fact. And no principal investigator will be a full-time online student.

Admissions

Applying to the Online Programs

If students would like to apply to a UOnline program, they will need to create a profile and apply online via our on line application portal found at <https://myonline.miami.edu>. Here students will be assigned a personal Enrollment Advisor who will help guide them as the student submits all

the components and required documents for their application. Students' Enrollment Advisors will also guide them through the onboarding process and be available to answer any questions.

TOEFL (Test of English as a Foreign Language)

If students do not hold a U.S. undergraduate degree, they may be required to take the TOEFL exam. If they are required to submit a TOEFL score, students should visit <http://www.ets.org/toefl> to arrange to take the test. The TOEFL code for the University of Miami is **5815**.

The University will consider candidates with these minimum TOEFL scores; however, TOEFL score requirements may vary by program:

TOEFL Internet Minimum Score	94
TOEFL Computer Minimum Score	240
TOEFL Paper Minimum Score	600

The TOEFL requirement may be waived for non-native English speakers provided they meet one of the following criteria:

- Students earned their undergraduate degree in a country where the official language is English (this does not include degrees from just English-speaking institutions or just a country where English is spoken).
- Students studied in the United States at an undergraduate level for at least one year or the equivalent of 30 consecutive credit hours.
- Students have lived **and** worked in an English-speaking country for the past two or more years.

Letters of Recommendation

Letters of Recommendations must be submitted directly by the student's recommender to the student's Enrollment Advisor and are **not submitted** through the Online Application. Letters of Recommendation submitted by the student through the Online Application will not be accepted. The student's Enrollment Advisor will provide the student with the Letter of Recommendation guidelines and submission criteria that the student can give to their recommenders.

Letters of Recommendation will only be accepted in a **pdf** format sent directly from the recommender to the student's Enrollment Advisor and must have all of the required components as per the submission criteria provided. Letters of Recommendation received in a Word document, body of an email, or any other format will not be accepted.

Admissions & Admissions Decisions

Once the University receives the student's complete application with all required documents, the admissions review process will start.

Regular Admit (with Official Transcripts)

If the application meets the standard admissions requirements and the University has received all official transcripts (please see the Transcripts (p. 25) section), the student will receive an offer of full admission **in approximately 48 business hours** after the University has received the completed application. The student will receive an official email from the Enrollment Advisor and be able to view the admissions decision via their Online Application portal.

Conditional Admit (with Unofficial Transcripts and/or Test Scores)

If the application fully meets the standard admissions requirements, the student may be conditionally admitted if the University has received and accepted the unofficial transcripts for all institutions attended and/or the student's unofficial test scores (if required). Unofficial transcripts may be considered acceptable ONLY IF ALL the following items are legible on the transcript document:

- Name of the institution
- Student name
- Cumulative Grade Point Average (preferred)
- Course numbers
- Course names
- Credit hours earned
- Grades earned
- Degree conferred with date (if applicable)
- No other documents will be accepted

Students receive notification typically **within 48 business hours** after the University has received a complete application (including other required documentation) that the student has been Conditionally Admitted. The notification of Conditional Admission will also address the requirements the student will have to satisfy in order to be officially admitted. The failure to meet any of these conditions will be grounds for the withdrawal of the Conditional Admission and/or the withdrawal from all programs. The student will receive an official email from his/her Enrollment Advisor and be able to view the admissions decision via your Online Application portal.

Students MUST pay their tuition bill or have accepted their Financial Aid Award, no later than by the payment due date. Once students are fully admitted and have paid their non-refundable enrollment deposit, they can receive financial aid within the same term, provided the University has granted the student full admission during the same academic year. Students may start their course and continue through the term as long as they have been awarded Financial Aid, and have accepted their Financial Aid award no later than the first day of class. Student's Financial Aid funds will not be disbursed until all official admissions documents and all required Financial Aid documents have been received.

Students will not be registered for the next term until their current balance is paid in full. In the event the student's financial aid award is delayed, students should work directly with their Enrollment Advisor to determine the appropriate next steps and ensure they meet the appropriate payment deadlines. Students should refer to the Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) for important deadlines regarding Financial Aid Application due dates. Students may submit their FAFSA after the Financial Aid application priority consideration due date, but may have to use an alternative form of payment if their Financial Aid is not processed by the required payment deadlines.

Students should review the Monthly Payment Plan (MPP) section for guidance on setting up a monthly payment plan. Also, the Payment Policies section for payment options and consequences for non-payment. Monthly payment plans are available for students at the beginning of

each term. Fall and Spring MPP consist of four (4) payments; however, Summer MPP consist of three (3) payment options.

Students should review the Transcripts section for official transcripts deadlines and consequences if the University has not received all official transcripts. Students should also review the UOnline Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>) for official transcript deadlines.

Accepting Admission

When a student's admission decision has been made, the student will receive an official Admissions decision email from the Enrollment Advisor. Students can also view the admissions decision and receive next steps via the online application portal found at <https://myonline.miami.edu>.

A student's Enrollment Advisor will guide him/her through the next steps to accept their offer of admission and pay their non-refundable enrollment deposit. A student's offer of admission has not been accepted until their non-refundable enrollment deposit has been paid.

Offer of Admission Expiration

Offers of Admission are **valid 1 calendar year (or 365 days) from the date of the admission offer** as noted on their official admission letter sent via email. To officially accept the offer of admission, a student must log into Canelink and pay their non-refundable enrollment deposit. If a student has not accepted an offer of admission within a year of issuance, he/she must reapply to the University and program. Student should contact the Online Enrollment Office to verify what documents must be submitted for consideration.

Reapplying/Readmission

There are a few situations in which students have to reapply to a program. Students will have to reapply to a program if:

- A student's original Offer of Admission has expired and he/she never started the online program.
- A student requests to change to a different program.
- A student has been withdrawn from his/her program for more than 1 year.
- A student failed to meet the requirements of a Conditional Admission.

To reapply, students can login and start the Online Application (<https://applyonline.miami.edu/SignIn>) using their previous log-in credentials. A student should contact the Online Enrollment Office at 1-800-411-2290 if they have questions regarding the application.

Not Admitted

If a student's application does NOT meet the standard admissions requirements, he/she will receive a notification that he/she has not been admitted into the program typically **within 48 business hours** after the University received the student's completed application. Students will receive an email from their Enrollment Advisor and be able to view their admissions decision via their Online Application portal (<https://applyonline.miami.edu/SignIn>).

If a student is not admitted into a program, he/she will receive an explanatory email from the Enrollment Advisor and will be able to view their admissions decision via their Online Application portal.

Students may be eligible to reapply once they have met the admission requirements or choose to apply to a new program. A student's Enrollment Advisor will contact a student to discuss their options.

Transcripts for Admissions

Official Transcripts

- MUST Arrive in a sealed envelope with the school's stamp/seal across the back or on the institution's official envelope
- Be opened only by a member of the University of Miami admission staff
- Have a Registrar's signature and/or watermark and/or indented seal which appears on the transcript

Mailing Address for submission of transcripts:

University of Miami Online Enrollment Office 1320 South Dixie Highway
Gables One Tower –Suite 902, **Locator Code: 2991**
Miami, FL 33146

Please ensure that the locator code is included in the address.
Transcripts may not be received if address is missing the locator code.

Electronic Transcripts

Electronic transcripts will be considered official if they are sent directly from the accredited institution and received directly by the Online Enrollment Office at etranscripts@miami.edu. A transcript sent directly to the student's Enrollment Advisor will be considered as unofficial and will need to be re-sent to the official etranscripts@miami.edu address.

Official Transcripts, Scores & Conditional Admission

The University must receive official transcripts for all institutions attended before any student can be considered fully admitted into the University.

Official Transcripts Due Date

If a student was Conditionally Admitted into a program with unofficial transcripts, the University **MUST receive the student's official transcripts from all institutions attended by the last day of the 1st session of the first term** as entered on their online application. A student's Admissions letter will provide the exact due date for the official transcript(s) and he/she may check Canelink to verify that the University has received the student's official transcripts. Students should refer to the Academic Calendar for important due dates.

Official Test Scores Due Date

If a student was Conditionally Admitted into a program with unofficial test scores and is required to submit official GRE, GMAT or TOEFL official test scores, the University **MUST receive their official test scores by the last day of the 1st session of their first term**. A student's Admissions letter will provide the exact due date for the student's official test score(s) and he/she may check Canelink to verify that the University has received the student's official test scores. Students should refer to the Academic Calendar for important due dates.

Financial Aid & Tuition Payment

If students apply for Financial Aid, Financial Aid will be NOT be awarded until the University has received the official transcripts from all

institutions attended and/or test scores, if required. Please see the Financial Aid (p. 31) section for more information about Financial Aid eligibility and awarding.

Because Financial Aid will not be awarded until official transcripts from all institutions attended and test scores are received, a student **MUST** pay the tuition bill by the payment due date. Students should review the Payment policies for payment options and consequences for non-payment.

Official Transcripts and Test Scores Not Received

If Official Transcripts and/or Test Scores (if required) are NOT received by the due date:

- A student will be removed from the next course
- A student will be administratively withdrawn and may be reinstated if the University receives the student's official transcripts.

Enrollment Deposit

Once students have received their offer of admission or conditional admission, they will pay a **non-refundable** enrollment deposit in order to accept their offer of admission. Once the deposit in full has been received, students will be registered for their online orientation and first courses by their Enrollment Advisor.

What the Enrollment Deposit Is

The enrollment deposit payment is:

- Paid one time per UOnline program
- **Non-refundable** including if the student's Offer of Admission has expired and he/she never started the program or if they were conditionally admitted and did not meet the conditions for full admission.
- Due no later than **the date listed on the academic calendar**.
- Applied against a student's 1st tuition bill
- Valid for as long as the Offer of Admission is valid:
 - If a student's Offer of Admission for their UOnline program has expired and he/she reappplies to any program (campus-based or online), a student will be required to pay the deposit again and any applicable fees.
- Transferrable to a new UOnline program: if a student applies to a new UOnline program while the existing Offer of Admission is still valid, the student will not have to pay the deposit again.
- Not transferrable to any campus-based program.

Paying the Enrollment Deposit

After a student has received the Offer of Admission, the student will be provided access to Canelink to pay the student's enrollment deposit with the following payment options:

- Online Credit Card payment:
 - MasterCard
 - Visa
 - American Express
 - Discover
- E-check (drawn on a US bank only)
 - Bank-to-Bank, Exchange Bureau or Wire Transfer.

- Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payments.

New Students

Student Readiness Orientation

Once a student has been admitted and paid the non-refundable enrollment deposit, a student will be enrolled into the Student Readiness Orientation. The Student Readiness Orientation (SRO) is an interactive series of required activities in the University's social media environment and will be accessed by students through their UOnline student portal. During the Orientation, students will meet other students, prepare for online learning at the University of Miami and familiarize themselves with their support structures and University academic policies.

A student's Enrollment Advisor will remind students to complete the readiness activities, address any concerns students may have, and ensure students fully understand each of the activities so that students may be prepared to start their first course. For students to be fully prepared for their courses, completion of the SRO is highly recommended. Additional activities may be recommended or required in order for students to be prepared for class. Student should work closely with their Enrollment Advisor to receive guidance on completion of these additional activities.

Successful Completion

Once students have **successfully completed all required activities** in the Student Readiness environment, they will be able to start the 1st course in the program. Students should complete these activities **at least 7 days before** their chosen start date.

Program Change

If a student **changes his/her program**, the student may be required to complete some program-specific portions of the Student Readiness Orientation. If so, the student's Enrollment Advisor will inform the student and provide access to the relevant Student Readiness Orientation activities.

Offer of Admission Expiration

If a student's **Offer of Admission has expired** and he/she has not started a program, the student will be required to retake the Student Readiness Orientation once he/she has been re-admitted into the program.

Technical Requirements

To help ensure success, students should be proficient using e-mail, the Internet, and common desktop productivity software. During the course of the program, requirements (either hardware or software) may change from the original technology recommendation. Students should consult the software/hardware requirements within the program or with the faculty member or Student Support Team for any technology recommendations that may have changed since the original recommendation mentioned below or within the program of study.

Below are some **initial** recommendations. **Please note that these recommendations and requirements may change as technology changes**

and may also vary from course to course. Also please note that specific programs of study may have other specific requirements:

Recommended Setup

- Internet access required; 6-10 Mbps speed or higher recommended; Broadband is recommended as students with dial-up may experience degraded performance
- Windows Vista/7 or Mac OS X with virtualization software (like Parallels with Windows OS)
- 2GB of RAM minimum
- 40GB hard drive
- speakers, and headphone connected to the computer
- Inkjet or laser printer
- Scanner or Scanning Application for mobile devices
- Portable media (thumb drive)

Software Requirements

- Recommended Web browser—current version of Chrome
- Other Web browsers (Internet Explorer ver. 9.0 or higher or Firefox's current and next most recent releases).
- Microsoft Office
- Adobe Reader ver. 10.1 or higher
- Adobe Flash Player ver. 11.7 or higher
- Apple QuickTime ver. 7.7 or higher
- Windows Media Player ver. 11 or higher
- Antivirus software (e.g., McAfee or Norton) installed, running, and kept current by promptly installing the upgrades and patches made available by the software manufacturer

Tablet/Laptop Recommendation

Students enrolled in programs that require participation in academic residencies are encouraged to use a laptop or tablet computer for their work. Some coursework may not be fully compatible with use of a tablet or mobile device; therefore, it is recommended that students have a desktop/laptop available if needed.

Additional Technology Requirements

Some programs may require additional technology requirements that are not mentioned above. Please refer to the program course(s) syllabi or course materials list in the UOnline student portal to review any special technology requirements for the program of study.

Cost, Fees, Billing and Payment

Tuition Includes

- Online learning environment and courses
- Application processing
- **Non-refundable** Enrollment Deposit (paid separately and deducted from 1st tuition bill)
- Technology fee
- Access to the online library, career center, and disability services
- Student and Technical Support

Tuition Does NOT Include

- Course Materials, Books and e-books
- Late Payment Fees, if assessed
- Graduation related fees

Your Tuition Invoice and Payment

Immediately after students have been registered into class, their tuition bill will be available in their student center through Canelink. Payment in full is due or arrangements to pay finalized by the 1st day of the 1st class of each term. If the University does not receive payment in full by this date, students will be removed from the online classes.

Payment Currencies

A student invoice is in **United States Dollars (USD)** and the University accepts payment only in **United States Dollar, USD**.

Payment Methods

The University offers several payment methods, described below. A student’s tuition invoice will contain instructions for using these payment methods.

Credit Card

A student may pay by credit card via the University’s partner, Elavon. A student can pay with:

- MasterCard
- Visa
- American Express
- Discover

Students will be charged a processing fee of 2.5% to pay by credit card.

eCheck (ACH)

Students may pay their tuition by E-check (ACH) online through your Canelink account:

- Click on the “Student Home” tab
- Navigate to Finances section
- Click on “Account Inquiry”
- Click on “Payment” and follow the instructions.

Students will not be charged any additional fee if they pay by e-Check. For additional help, contact the Student Support Team.

Wire Transfer

Students may pay their tuition by wire transfer, using these instructions:

- Bank of America, N.A.
1500 South Dixie Highway
Coral Gables, FL 33146
- ABA # 026009593
- For Credit To: University of Miami Concentration Account # 5508319094
- For Further Credit To: Students Full Name & ID Number
- International Wires SWIFT Code: BOFAUS3N

Students should make sure that their full name and ID number are included with the wire transfer to ensure the funds are applied correctly.

Wire/Bank Transfer Fees

Students are responsible for any fees or currency exchange processing charged by their bank or exchange bureau when transferring funds and should account for this when sending tuition payment. The University is not responsible for any fees students may incur during the transfer process.

Payment by a Third Party

A Third Party Sponsorship allows someone other than the student to pay a student’s tuition (employer, for example). Students with this type of assistance must inform the Financial Aid Office to ensure that financial aid is awarded appropriately and that funds are applied appropriately.

If a student’s tuition is paid via Third Party Sponsorship, the student will still remain subject to all policies, including due dates, late payment fees and financial hold rules and consequences.

Monthly Payment Plan (MPP)

Through the Monthly Payment Plan, term tuition payment is divided into 4 monthly payments, each due on the 1st of the month. The Monthly Payment Plan is only available in the Fall and Spring terms. For the Summer term, a 3-payment Monthly Payment Plan option is only available to UOnline students.

- Students must pay each term in full before they will be registered for the next term (see payment methods section). This chart details the Monthly Payment Plan option available during the Fall and Spring Terms only.

Payment #	Reminder Sent	Payment Due By
1	1 week before	No later than 1st day of class
2	1 week before	1st of the next consecutive month
3	1 week before	1st of the next consecutive month
4	1 week before	1st of the next consecutive month

Late Payment

- If payment is not received by payment due date, a registration hold will be placed on a student’s account the next business day.
- Once payment has been received, the registration hold issued for late payment will be removed.

Tuition Reductions, Scholarships, Special Offers

During the Enrollment and Admissions process and at the University’s discretion, tuition reductions and scholarships may be offered to incoming students. Existing students will not be eligible for any **new** tuition reductions offered to incoming students. A tuition reduction will remain on a student’s account for the duration of the online program for which they received the reduction provided the student remains academically eligible and does not withdraw from the program for longer than one-year. Any student who is not enrolled in their program for greater than one year, will no longer be eligible for their initial tuition reduction and must reapply for admission to a program. A student may

be eligible for any new tuition reductions being offered upon reapplication to a UOnline program. Students should contact an Enrollment Advisor for current offerings and qualifying criteria.

If students qualify for a tuition reduction, their Enrollment Advisor will provide them, in writing, the formal terms and conditions specific to that tuition reduction. The reduction will be included in a student's tuition statement/note in Financial Aid package if applicable and deducted from tuition accordingly. If financial aid is awarded prior to the tuition reduction being applied to a student's bill, the financial aid award will be adjusted accordingly. Student should contact the Financial Aid Office at gradprof.finaid@miami.edu if they have questions regarding this adjustment.

Tuition Increase

The University reviews tuition rates each year and reserves the right to increase tuition for existing students.

If the University does increase tuition:

- The increase will be implemented at the beginning of the Fall term and will apply forward to any future, unbilled tuition.
- The University will notify all students **at least 1 month** before the start of the Fall term.
- Students' tuition invoices moving forward will be adjusted to reflect the increase.

Change Payment Plan

Students may request to change payment plans. Currently the options are:

- Payment in Full to Monthly Payment Plan.
- Monthly Payment Plan to Payment in Full.

Payment Plan changes will be implemented **only at the beginning of the next term**. Students must complete any payments due for the current term as agreed under their current payment plan before they can request a new payment plan.

Students should contact the Student Support Team for more information about changing their payment plan. Formal requests must be in writing/online form

Billing Support

The student's Enrollment Advisor and Student Support Team will be able to answer questions or provide information about a student's invoice.

Graduate Grading

Scale/Quality Points

An average of B (3.0) is required for a graduate degree, and no "D" credit hour may be counted toward the degree. All work leading to the graduate degree and taken as a graduate student will be counted in computing the quality point average, including courses graded "D".

No transferred credit hours are calculated into the University of Miami G.P.A.

Grade Interpretations

A	Excellent accomplishment.
B	Good accomplishment.
C	Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).
S	Symbol used for acceptable (U-unacceptable) thesis, dissertation, practicum and internship credit hour. It may be used for regular courses under special circumstances with the prior approval of the instructor, department chairman, and the Dean of the Graduate School. The Graduate School considers a grade of "S" to indicate a minimum of a 3.0 GPA in a graduate course if a student has taken no prior coursework on the graduate level. A grade of "S" reflects that a student is in good academic standing.
D	Poor (not acceptable for credit hour toward the advanced degree).
F	Failure.
W	Course dropped prior to the last day for withdrawing from classes as published in the official calendar of the University. Courses dropped after last date must have approval of Dean of Graduate School. Credit hour can be earned only by successful repetition of the course.
I	Incomplete work in passing status with the instructor's permission to complete the course. (Not to be used for thesis or dissertation credit hours). Student may request an incomplete from the professor if: • they have completed at least 75% of the course and • have a C or better in the course at the time of the request. The "I" should be changed to a letter grade within one (1) calendar year after it is given, unless the Academic Dean of the student's primary school or college and the Dean of the Graduate School approve the delay. If the "I" is not changed within one year, credit hour can be earned only by successful repetition of the course. (Note: Fellowships and financial aid may be withdrawn if there is an excess accumulation of "I"s on a student's transcript.).
IP	Denotes in progress grade given by instructor for any course (600, 700, or 800 level) in which a student has made expected or clearly satisfactory progress during the term, but has yet fully to complete requirements for the course. "IP" is to be given for 800-level internships, research, thesis and dissertation courses that have not been completed. Upon satisfaction of all Graduate School requirements, the Assistant Director, Programs of the Graduate School will issue final credit hour for all master's thesis and doctoral dissertation courses (e.g., 810, 820, 830, 835, 840 and 850). Zero-credit hour courses (e.g., 820 and 850) will be changed to "S." Please note that all "IP"s must be converted to "S", letter grade, or "I" at graduation. "IP" will also be converted to "I" upon any departure from the University for a period in excess of one year.
NP	Symbol assigned by Enrollment Services indicating that the instructor has not yet reported the student's grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student's graduation. ¹

¹ Faculty Senate Legislation #85005(B)

Quality points are awarded as follows:

A+	4.00
A	4.00
A-	3.70
B+	3.30
B	3.00
B-	2.70
C+	2.30
C	2.00
C-	1.70
D+	0.00
D	0.00
F	0.00

The quality point average is then determined by dividing the total of quality points earned by the total of credit hours attempted. The symbols "S", "W", and "I" are not counted as credit hour attempted.

Repeating Courses

A student may repeat a course in which a failing grade was earned, but the repetition of the course will not eliminate the previous grade from the record and the student is responsible for tuition and other costs related to the repeated course. A course may be repeated only once unless written authorization is provided by the Program Director, Dean of the School and Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a "C-" or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated. If a student attempts to retake a passed course, taking the same course to obtain a better grade, financial aid may be affected.

Registrations which involve repeating a course in which a grade of "A" or "B" has already been earned may not earn quality points or credit hours, nor count as credit hours attempted.

Attendance

Military Withdrawal

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit hour for the course (see below). A student should contact their Academic Advisor if they need to request a military withdrawal.

If a student receives federal financial aid and withdraws before they complete 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University.

1. On recommendation of the Dean of the school, students who withdraw after the 5th week of the session because of official orders to active duty with the Armed Forces of the United States may be awarded credit hour in any course in which they have achieved a C

or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).

2. Credit hour granted for a course under this policy should count toward graduation.
3. There should be no refund of tuition for courses for which credit hour has been granted. Refunds of courses not awarded credit hour should be on the same basis as complete withdrawals for military service.
4. The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Attendance and Participation, 1st Week (new and continuing students)

Online courses are not independent study courses. They involve a mixture of independent work outside the online course environment and presence within the course room. Authentic student engagement includes activities such as doing assigned readings, preparing and presenting quality assignments and participating substantively in online discussion. Logging into the online course alone does not demonstrate adequate engagement or participation.

Attendance during the first week of each course ensures you are on the right path to successfully completing your course and helps ensure that all students are assigned to groups with active participants to support quality group work. Participation in an online course is defined as the submission of a gradable assignment and/or discussion post about academic matters.

Students are required to attend, engage and participate in each of their online course(s) in an active and timely fashion. For each course, a student must participate by submitting their Week 1 assignments/discussion(s) during the first 7 calendar days from the course start date. This policy is the same for both New and Continuing students. If a new or continuing student logs in, but does not participate in any Week 1 activities by the end of day 7 (Eastern Standard Time) of a course, they will be administratively withdrawn from the program and must contact their Enrollment Advisor or Academic Advisor regarding steps for readmission.

Attendance by Day 7

By the **end of the Day 7** (Eastern Standard Time) of each Course, a student must log into the Blackboard classroom to actively indicate his/her intention to participate in and complete that course. If by Day 7 the student has logged in and submitted an assignment and has not formally rescheduled his/her start date or withdrawn from the program the student will:

- Be considered as attending the course.
- Be obligated to pay for the course in full or make all payments in accordance with the monthly payment plan.
- Be responsible for adhering to all University policies and course policies

No Attendance by Day 7

Starting on the first day of each course the Enrollment Advisor or Academic Advisor will contact the student if the student has not yet logged in to the Blackboard classroom, and remind the student to do so. If the student does **not** log into the Blackboard classroom the **end of Day 7** (Eastern Standard Time), the student will be removed from the current course and will no longer be able to attend class. The student will be administratively withdrawn from the term and will need to contact their Enrollment Advisor or Academic Advisor to discuss their options for returning the following term.

If a student is a **new student** and his/her Enrollment Advisor has been able to contact the student, the student will be encouraged to reschedule his/her start date so that the student is able to continue in the program.

A student who chooses to remain in the course will be subject to all applicable deadlines as stated in the course syllabus.

If a student is a **continuing student** and the Academic Advisor has been able to contact the student, the student will be encouraged to submit a withdrawal request with a return date to ensure he/she is not withdrawn from the program. A student who chooses to remain in the program will be subject to all applicable deadlines as stated in the course syllabus.

The Enrollment Deposit will remain on the student's account and remains non-refundable. If the student has a tuition balance, it will be voided and reissued on the 1st day of the next course for which the student is registered should the student choose to change their start date.

Removed from Course Erroneously

If a student believes he/she has been **removed from the course erroneously**, the student should contact his/her Academic Advisor to discuss options.

No Contact or Response by Day 7

A student will be designated as a non-starter, if a student has not logged into the Blackboard classroom by Day 7 and the Enrollment Advisor or Academic Advising Team has not been able to contact the student.

New Students

If an Enrollment Advisor cannot reach the student, or does not receive response from the student by Day 7 of the term, the student will be administratively withdrawn from the term. If the Offer of Admission expires, the student will be required to reapply to the program.

Continuing Students

If the Academic Advising Team cannot reach or does not receive response from the student by Day 7 of the term, the student will be administratively withdrawn from the program. The student should contact the Academic Advising Team if they intend to return in the future and should review the Academic Calendar for all applicable deadlines regarding readmission.

On-going Attendance

Students should continue to login and attend class every week. Students who do not participate in their courses as indicated by course requirements, or fail to notify the University that they are no longer attending will be administratively withdrawn. This may result in the requirement for the return of previously awarded federal financial aid. If

the University is required to return federal student aid funds, the student will be required to pay any outstanding balance owed the University.

If a student receives federal financial aid and withdraws before they complete 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University. This Federal Financial Aid calculation is separate and in addition to the Refund Policy and Schedule. If a student has questions pertaining to either policy, they should contact their Academic Advisor.

Student Change Requests

Reschedule Start Date, Student Initiated

A new student may reschedule his/her start date **before or by the end of Day 7** (Eastern Standard Time) of the 1st Course. The student may reschedule the start date provided the Offer of Admission has not expired.

Students must submit their request in writing to their Enrollment Advisors and discuss the options and any financial and academic consequences no later than the end of Day 7 to ensure they do not incur further costs, because all students are subject at all times to the Refund Policy and Schedule. In extraordinary circumstances, such as a serious illness or accident, students may request to appeal their withdrawal date by contacting their Academic Advisor for more information regarding the UOnline Student Appeal process.

Choosing to Remain in the Course

If after discussing with their Enrollment Advisor students decide to **remain** in the course, students' Enrollment Advisors will confirm this verbal decision with the students formally, in writing via email, reiterating the financial and academic obligations. Students should reply to the email and confirm their wish to remain in the course. Otherwise, the original written request to reschedule will be honored.

Choosing to Reschedule

If after discussing with their Enrollment Advisors students decide to **reschedule** their start date, the Enrollment Advisors will process the formal request and:

- Students will be removed from any courses currently enrolled.
- Students will be enrolled into the courses for the term of the requested start date.
- Students may lose any associated tuition reductions (please see tuition reduction's terms and conditions).

The Enrollment Advisor should confirm formally within 1-2 business days that the start date change has been completed. The student may also view their start date change in Canelink.

The Enrollment Deposit will remain on the student's account. If a student has received the 1st tuition balance, it will be voided and reissued before the 1st day of the new start date.

Financial Obligations After Day 7

If a student does **not** contact his/her Enrollment Advisor and formally submit in writing his/her request to reschedule the start date by the end of Day 7, after Day 7 the student will be obligated to pay for the course in

accordance with the refund policy and schedule and is not eligible for a credit of tuition towards the rescheduled terms.

Offer of Admission Expired

If a student's **Offer of Admissions has expired**, he/she will not be able to reschedule the start date and must reapply to the Program.

Add a Course

Each active student will be registered at least **14 days before each term start** into the appropriate course(s) according to the sequence and rules of the program. Any student requested changes will be implemented by **1 day before the course start** to ensure proper section and group assignments. New students must contact their Enrollment Advisor to discuss any changes or concerns about course registration. Continuing students should contact their Academic Advisor to discuss any changes or concerns about course registration.

Drop a Course

A student may drop a course only **before or by the end of Day 7** (Eastern Standard Time) in order to avoid financial or academic (grading) consequences as per the refund policy and course syllabus.

If a student is a new student, he/she must contact the Enrollment Advisor to discuss the need to drop a course and potentially reschedule the start date. Due to the scheduling and sequence of courses, new students may need to be dropped from all courses in the term and may need to wait to be rescheduled at the beginning of the next available term for their program.

If the student is a continuing student he/she must contact the Academic Advisor to discuss the need to drop a course and withdraw from the program. In some cases, due to course scheduling and sequence, a student may need to drop all courses from the term and wait to enroll in a future term. Continuing students should work closely with their Academic Advisor to discuss all rescheduling options and ensure they are meeting the required times-to-completion for their program.

If a student receives federal financial aid and withdraws before he/she completes 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University. If a student plans to drop a course or to withdraw from their program, they should consult both the Financial Aid withdrawal policy as well as the Refund Policy for UOnline programs to determine their financial responsibilities.

Retaking the Entire Course

If a student is required to retake an entire failed course:

- The student will be re-registered for the failed course the next time it is offered or in the next session
- If the student has already been registered into the next course in the program sequence, the registration will be adjusted.
- The student will be billed the full course tuition.
- The student can receive Financial Aid to pay for the second course retake, but if the student fails and takes the course a THIRD time, Financial Aid will not be available and the student must pay for the

course tuition out-of-pocket. A student may contact their Academic Advisor for more information on payment options.

Change of Program

Students may request to change from their current program to another online program. The student must apply to the new program and provide information necessary for admission into that program. The student's Enrollment Advisor will work with the student and the admissions staff to determine if the student is qualified to apply for a new program. Please note that program changes will be implemented as per the University's Online academic calendar.

If the student is still a new student (has not completed the 1st 7 days from the start date) the student should contact their Enrollment Advisor. If the student is a continuing student he/she should contact the Academic Advisor to discuss all of the options and the new program admissions requirements. Tuition and any applicable tuition discounts that were previously applied to a new or continuing student's balance will be subject to change upon changing the program.

Non-Standard Change of Program

If a student is eligible to change into a new program, he/she will be registered into the appropriate course and start the new program in the next available term. Approved completed courses will be transferred into the new program. Students will not be charged another enrollment deposit.

If a student does not meet the admissions requirements, the student should continue to work with the Enrollment Advisor or Academic Advising on other options available.

Withdraw from Course but Not Program

If a student needs to withdraw from a course but does not wish to withdraw from the program, the student should contact their Academic Advisor to discuss the academic and financial implications. The student should also review the academic calendar for important dates regarding withdrawal from a course and how the withdrawal will be reflected on the transcript. In some cases, due to course scheduling and sequencing, a student may need to drop all courses from the term and may have to wait longer than one term to be rescheduled. Continuing student should work closely with their Academic Advisor to discuss all rescheduling options and ensure they meet time-to-completion requirements for their program.

If after discussions with their Academic Advisor the student decides to withdraw from a course, the deadlines for withdrawal, as they appear on the academic calendar, will apply. Additionally, if students withdraw from the course after the "**last day to drop without a W**" as per the Academic Calendar, they will:

- Be required to pay for the course in accordance with the refund policy and schedule for online programs.
- Receive a Withdrawn (W) grade for that course and, for this reason, will remain registered in that course until the course end date so the final grade can be posted to the student's official record.

Withdraw from Program

If students are withdrawn from the program this means they are permanently suspended from continuing with their studies. Therefore, students will not be registered for future courses or have access to the

online student community, the academic environment or other related program privileges.

If a student is considering withdrawing from the program, he/she should be aware of the financial and academic consequences for doing so. There are different consequences for withdrawing **before and after Day 7**.

If a student receives federal financial aid and withdraws before he/she completes 60% of the term, a pro rated calculation will determine the amount of financial aid the student has earned. It is based on the amount of time the student was enrolled. This calculation is independent of any charges incurred at the University as per the refund policy and schedule. Students should contact their Academic Advisor before withdrawing to fully understand their financial obligations upon withdrawal.

Student-Initiated Withdraw from Program BEFORE Day 7

Should a student wish to withdraw from the program **before, or by the end of Day 7** (Eastern Standard Time) of their first course, new students must contact the Enrollment Advisor in writing (via email) to make the request and discuss alternatives. Continuing students who wish to withdraw from the program before of by the end of Day 7 (Eastern Standard Time) of their current course must contact their Academic Advisor in writing (via email) to make the request and discuss alternatives. If the student decides to withdraw from the program by end of Day 7 of the current course:

- The student will be removed from their course(s).
- The student will be refunded for the course(s) in accordance with the refund policy for online programs (minus the enrollment deposit).
- The course(s) will **not** appear on the student's record.

A student's Enrollment Advisor or Academic Advisor will submit the initial request as the effective program withdrawal date and should confirm formally within 1-2 business days that the student's program withdrawal request has been completed.

The Enrollment Deposit remains non-refundable. If the student received a tuition invoice, it will be recalculated or cancelled in accordance with the refund policy and schedule and effective date of program withdrawal.

Student-Initiated Withdraw from Program AFTER Day 7

If the student would like to withdraw from the program **after Day 7** (Eastern Standard Time) of the course start, he/she must contact the Academic Advisor in writing (via email) to make the request and discuss alternatives. If the student decides to withdraw from the program:

- The student will be removed from any course currently enrolled.
- The student will receive a **Withdrawal (W)** on the student's record for their course.

The student's Academic Advisor will submit the student's initial request as the effective program withdrawal date, and the student should confirm formally within 1-2 business days that the program withdraw request has been completed. The enrollment deposit remains non-refundable.

Any tuition payments made by the student for the course through the time of withdrawal will not be applied or credited towards any future courses the student may enroll into. If a student is using Financial Aid, a recalculation of financial aid may be required to determine if any funds need to be returned to Title IV. In this case, the calculation may take

up to 45 days from the effective date of withdrawal to appear on the student's account. Students may check Canelink to review their account and balance.

Administration-Initiated Withdraw from Program

The student may be withdrawn from the program for academic progress issues, academic integrity, non-payment or other administrative issues. In this event, the student will receive formal notification that he/she will be withdrawn from the program.

The student will still be responsible for completing payment on any previously taken courses and will be subject to all billing, payment and collections policies.

Withdraw from Institution

If the student requested to withdraw from the program, he/she will be formally withdrawn from the Institution within 1-calendar year/365 days of the effective withdrawal date on record. Until this time, the student may still request to be reinstated to the program under certain circumstances. A student should contact Academic Advising for next steps on reinstatement if they choose to return after that time.

If the student is withdrawn from the program he/she will be withdraw from the Institution immediately and may not be reinstated either to the program or Institution.

Withdrawal Appeal Process

In extraordinary circumstances, such as a serious illness or accident, students may request to appeal their withdrawal date by contacting their Academic Advisor for more information on the UOnline Withdrawal Appeal process. The appeal form must be submitted within 30 calendar days from the date of withdrawal from the University or if the appeal is being submitted for a semester that is completed, the form must be submitted within 30 calendar days of the last day of the end of the semester in question. Students must adhere to the specific documentation requirements as stated on the Appeal Form and submit all required documentation, along with the completed form to registrar@miami.edu. A decision will be sent electronically to the email address provided on the Appeal Form within a months time from the date it was received.

Reinstatement to Program

If a student has been withdrawn from the program, he/she may be reinstated to the program if:

- The student was **not** withdrawn from the program for academic progress or misconduct reasons.
- The student was **not** withdrawn from the Institution or is not in the process of being withdrawn from the Institution.
- The student has no unpaid tuition balance.
- The student has been withdrawn from the program for **less than 1 calendar year** (365 calendar days). If the student is withdrawn for **more than 1 calendar year**, he/she must reapply to the program.

Students may not credit any previously paid tuition to courses they register into once reinstated and should contact the Academic Advisor to discuss the reinstatement process and requirements.

Late Payments, Holds, Collections and Refunds

Late Payment Fees

A payment is considered late if it has **not been paid by 1 day after** the payment due date. Late fees may be assessed to the student's account.

Financial Hold

Students are expected to pay tuition on time. Paying on time ensures timely registration into subsequent courses so that a student can continue to advance toward completing the program. Students must pay for each term in full before they can continue on to the next term.

If a student is **15 or more days past due on 1 or more invoices**, he/she will be placed on Student Account/Financial Hold.

If a Student Account/Financial hold is placed, students:

- will be able to complete the current course
- will **not** be registered into future courses until all outstanding invoices have been paid.
- will **not** be able to receive transcripts or a diploma

Placement on Student Account Hold

Students will receive a reminder that payment is due as well as overdue. Students will also be notified once a Student Accounts Hold is placed on their account.

Removal From Student Account Hold

Once students have made their overdue payment, the Student Accounts Hold will be removed within 24 hours and students will be registered into the next course in the next available term.

Third Party Collections

The University utilizes third party collections services to collect on unpaid balances.

Refund Schedule

A student who withdraws or is withdrawn from the program may be entitled to a refund according to the rules outlined below.

By or Before Day 7 (Week 1) of Each Course

If a student withdraws from the program **by, or before Day 7** (Eastern Standard Time) of a course, he/she will be refunded 100% of tuition paid for that course, excluding the enrollment deposit. If the student withdraws during the refund period and has not yet paid any tuition owed for that course, the Student Accounts Office will cancel the balance for that course.

Day 8-14 (Week 2) of Each Course

If a student withdraws from the program **after Day 7, but not later than Day 14**, he/she will receive a **50% refund**.

Day 15-49 (Week 3-Week 7) of Each Course

If a student withdraws from the program on or **after Day 15**, he/she will receive **no refund** and will be obligated to pay for the **entire course they are currently enrolled**.

The effective withdraw date is:

- If initiated by the student, it is the date the student formally requested to be withdrawn in writing via email.
- If initiated by the Administration, it is the date the administration formally entered/processed the withdrawal.

Overpaid Tuition

After students have withdrawn, if they paid more than what they owed on a course, they will be refunded the difference between what they paid and the amount due as determined by the refund schedule and effective withdraw date. Overpayment tuition refunds are typically processed on or about 14 days after the start of each ter; however, in certain circumstances this time frame may be delayed. Students may check their Canelink account to view when refunds have been processed.

Refund Policy and Schedule - Timeline and Methods

All refunds will be paid via the payment method paid and within 30 days of the effective withdrawal date on record.

Day Formally Withdrawn from Program	Day 0-7 (Week 1)	Day 8-14 (Week 2)	Day 15-49 (Week 3-7)
Enrollment Deposit	No refund	No refund	No refund
Tuition Refund (minus the enrollment deposit)	100% refund	50% refund	No refund

Ethics, Student Rights and Responsibilities

Students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics, or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Students found to be in violation of these standards are subject to disciplinary actions by the student's program and/or the Graduate School. All graduate students are bound by the rules and regulations of the University of Miami that apply to them. The **Graduate Honor Code** can be reviewed on the Dean of Students (p. 593) website.

Disciplinary and Grievance Procedures for Graduate Students

Two types of procedures exist:

- Academic and
- Nonacademic.

Procedures for handling disciplinary and grievance matters are handled by the Graduate Student Appeals Committee. Contact the Graduate School for details about the appeals process. The Graduate School expects an appeal to have gone through the program or department and then the School's Academic Dean prior to its being heard by the Graduate School. The University Ombudsperson may also be consulted. For more information, please refer to the Academic Bulletin (p. 360).

Honors and Awards

Award of Academic Merit

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Who's Who Among Students in American Universities and Colleges

The Graduate School solicits nominations for this award annually. Nominations are provided by Graduate Program Directors at the beginning of the spring term.

- Graduate Student Awards
- Graduate Student Organization Award
- GSA Executive Award
- Senate Award
- Academic Award
- Graduate Student Award

Requirements for Commencement

It is the responsibility of the student to apply for graduation through Canelink during the student's final term prior to the deadline for the next commencement ceremony.

Both the dates for commencement and the deadline to apply for graduation are published in the online academic calendar (<http://www.miami.edu/index.php/registrar/calendar>). Students who previously applied for graduation but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students will be degree candidates until they have been cleared by the Graduate School.

Participation in the commencement ceremony or the listing of a student's name in the commencement book in no way implies or ensures graduation. A student's graduation is contingent upon successful completion of the degree requirements and approval by the academic school or college.

Commencement ceremonies are held in May and December only. Those students completing degree requirements during the fall, spring,

or summer sessions may, if they wish, participate in the graduation ceremonies of the previous or following May or December. Students receiving a Ph.D., D.M.A., D.N.P., D.P.T., or Ed.D. degree and plan to participate in the hooding ceremony and all master's students marching in the graduation ceremony must have the approval of the graduate advisor, director, or appropriate person in the department/school to participate in the ceremonies.

Participation in commencement for students in all graduate programs is contingent upon the following:

1. The student must have met the requirements for the program.
2. The student must have a minimum of 3.00 cumulative grade point average;
3. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last term of study must be paid in full by the beginning of the final term.

Clearance for Degree Conferral

For the Graduate School to clear a student for graduation:

1. All original documents (transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).
2. The Admission to Candidacy form must have been completed by the program at least one term before graduation. The Graduate School does not require application to candidacy for master's, D.P.T., nor D.N.P. degrees.
3. The student must defend his/her thesis or dissertation (if applicable) no later than two weeks before the last day of class in the term he/she wishes to graduate.
4. The student must submit his/her final, Dissertation Editor-approved thesis or dissertation with all corrections completed and final paperwork turned in to the Graduate School by the last day of exams in the term he/she wishes to graduate for their clearance to be processed in time.

Graduate Student Association

The primary function of the GSA is to promote effective graduate student participation in University affairs. The GSA serves as a liaison between graduate students, faculty, and the administration. In addition, the GSA exists as a forum to support and improve the quality of the graduate student environment at the University of Miami. The University of Miami Graduate Student Association is an active member of the National Association of Graduate-Professional Students. All graduate students at the University of Miami are members of the GSA. For more information visit the GSA's website at <http://www6.miami.edu/gsa/about.html>.

Graduate Council

The mission of the Graduate Council is to promote graduate education, scholarship, and research; to support individuals, departments and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities and to maintain high ethical and academic standards in graduate studies.

Student Resources

Dean of Students Office

The mission of the Dean of Students Office is to foster the personal development of students by providing a range of programs and services that create an optimal learning and living environment. The Graduate Honor Code (http://www.miami.edu/sa/index.php/policies_and_procedures/honor_code) and the Student Rights and Responsibilities Handbook (<https://umshare.miami.edu/web/wda/deanstudents/pdf/20132014SRR.pdf>) are two methods in which the University encourages ethical behavior in all its students. The Graduate Honor Council is a student organization which investigates violations of the Graduate Honor Code and decides appropriate action. The Dean of Students Office also oversees the University Chaplains Association, which consists of various campus ministries to serve the spiritual needs of students. For more information on these and other services offered by the Dean of Students Office, call 305-284-5353 or visit www.miami.edu/dean-students (<http://www.miami.edu/dean-students>).

Career Development

The Toppel Career Center assists undergraduate students, graduate students, and alumni in formulating their career plans and in pursuing internship opportunities.

It is the intent and desire of the University of Miami and the Toppel Career Center to provide equal employment opportunities for students and graduates regardless of race, color, national origin, religion, gender, sexual orientation, age or disabilities.

HireACane.com is a management system where students can access internships, jobs, on-campus recruiting information, career programs, and companies/organizations attending Careers Expos and Fairs. Students can only access these additional online resources by activating and logging into their HireACane.com account.

Student Disability

The Academic Resource Center (ARC) provides academic resources and support to ensure that students with documented disabilities are able to access and participate in the opportunities available at the University of Miami.

All students seeking accommodations for a disability must register with the Office of Disability Services. Students should register as soon as possible so that the office has sufficient time to receive and review the necessary documentation and coordinate reasonable accommodations. To register, schedule an appointment with the ARC at 305-284-2374 or e-mail disabilityservices@miami.edu.

Before a determination is made regarding a request for accommodations, the student must complete the proper forms and submit current, appropriate, and full documentation of the disability as required by ARC.

SPECIAL PROGRAMS

Miami Semester

<http://www.miami.edu/miamisemester>

The Miami Semester – Visiting Student Program provides the opportunity for degree-seeking students attending other colleges to spend one or two semesters in Miami living, studying and doing research at the University of Miami. Domestic or international students may enroll in this program, taking advantage of our geographical location, renowned faculty, and unique environmental features.

The Miami Semester – Visiting Student Program is limited to degree-seeking undergraduates in good standing attending other universities and colleges. Participating students will be required to take a minimum of twelve credits.

Course offerings are subject to change depending on availability.

American Studies

This program allows students to select one to two courses from among the American Studies (AMS) Program's core courses, and classes from other departments based on availability and interests. It is an interdisciplinary approach for students to reflect on the interrelated nature of subjects like, but not limited to, Sociology, Geography, History, and Anthropology, and topics that are relevant to today's society such as cultural diversity, the global economy, regional and geographical norms, and popular culture. The goal of this program is to assist in students' understanding of the world around them by analyzing events, policies, societal norms and cultures, and historical events. Students may take any combination of courses that equal at least 12 credit hours.

Core Courses	
Select a minimum of one of the following:	3
AMS 101 Introduction to American Studies	3
AMS 310 The United States In The World	3
AMS 350 History And Culture Of South Florida	3
Additional Course	
AMS 401 Seminar in American Studies	3
Total Credit Hours	15

Architecture: New Urbanism

The program allows for students currently majoring in Architecture at other colleges and universities to gain perspective of the field in South Florida. Students enroll in six credits of Architectural Design and six to nine credits of related electives or courses in Urban Studies. Students will also have opportunities to participate in study abroad programs in London, Venice, and/or Spain during intersession and spring breaks as an additional enrollment option (additional tuition and program fees apply). Students are required to maintain a standard full-load of credits for the spring semester of 12-15 UM credits.

Core Courses	
Students must submit a design portfolio prior to enrolling in courses	
Select one of the following:	6

ARC 407	Architecture Design VII	6
ARC 408	Architecture Design VIII	6
ARC 509	Architecture Design IX	6
ARC 510	Architecture Design X	6
Additional Courses		
ARC 323	On Site Study of Selected Architecture and Urbanism	3-6
ARC 452	Management of Professional Practice	3
ARC 512	Advanced Visual Analysis	3
PHY 103	General Physics	3
URB 301	Cities in Time and Space	3
Other Architecture elective course offerings (Interior Design, Landscape, and Historic Preservation)		
Total Credit Hours		45-48

Audio Engineering

Audio Engineering allows for students currently majoring in Electrical Engineering to study areas such as circuit theory, electronics, signal processing and multimedia with audio studies in acoustics, digital audio, recording and postproduction. Students must enroll in a minimum of two Electrical Engineering courses from the core courses. Students may also opt to add courses in other areas based on availability and interests.

Core Courses		
ECE 436	Digital Signal Processing	3
ECE 437	Real-Time Digital Signal Processing Laboratory	1
ECE 502	Engineering Acoustics	3
ECE 540	Digital Speech and Audio Processing	3
Additional Courses		
ECE 595	Special Topics in Computer Engineering	1-3
ECE 596	Special Topics in Computer Engineering	1-3
Courses Available through the Frost School of Music		
MMI 141	Experiential Musicianship II	3
MMI 501	Transducer Theory	3
Total Credit Hours		18-22

Ecosystem Science and Policy

The Certificate in Ecosystem Science and Policy provides an opportunity for students from other universities to explore the South Florida environment, ecology and culture via interdisciplinary courses and experiential learning.

Students must take at least two core courses in Ecosystem Science and Policy. Miami Semester students will complete their schedules with courses chosen from among the interdisciplinary ECS courses and from other departments based on availability and interests.

Core Courses for Sophomores		
ECS 112	Field Problems in Ecosystem Science and Policy	2
ECS 202	Seminar Series in Contemporary Environmental Issues II	1
Total Credit Hours		3

Core Courses for Juniors and Seniors		
ECS 202	Seminar Series in Contemporary Environmental Issues II	1
ECS 302	Perspectives on Environmental Decision Making	3
ECS 403	Interdisciplinary Approaches	3
Total Credit Hours		7

International Finance and Marketing

The Certificate in International Finance and Marketing is designed for business students from other universities who want to add an international dimension to their studies. This program allows students to select from a limited set of courses offered by the School of Business. The program focuses on the international aspects of business. The program is open to students with at least a junior standing who have met the course prerequisites. Students must take at least two courses below, but may take all four.

Core Courses		
FIN 330	International Finance	3
MKT 360	International Marketing	3
ECO 442	International Monetary Economics	3
BSL 412	International Business Law	3
Total Credit Hours		12

Marine Science

The Certificate in Marine Science is a hands-on study opportunity for those interested in marine science, oceanography, geology and marine physics. Students must enroll in a minimum of three Marine Science courses. In addition, highly qualified students may be eligible for an independent study research project. Students may also opt to add courses in other areas based on availability and interests.

Sport Administration

Sport Administration is an opportunity for students who are interested in the ethics, leadership, and business of managing athletic organizations. Students will have the opportunity to participate in an internship that fits their interest area as well taking hands-on courses in the Department of Exercise & Sport Sciences. Internships may take place within the UM Athletic Department or local professional sport franchises. Students make take any combination of courses that equal at least 12 credit hours.

Core Courses		
KIN 206	Sport Facilities and Event Management	3
KIN 302	Sport Marketing	3
KIN 306	Essential Leadership in Sports and the Professions	3
KIN 308	Ethical Decision Making in Sport and the Professions	3
KIN 401	Legal Aspects of Sport	3
KIN 403	Sport Information Management	3
KIN 405	Finance and Budget in Sport Administration	3
KIN 498	Seminar in Sport Administration (internship)	3
Total Credit Hours		24

Study Abroad

www.miami.edu/studyabroad

Dept. Code: SAP

With over 80 unique opportunities overseas, students have many options to study abroad on UM programs that align with their interests. Students can live and learn abroad through short term and long term programs with UM faculty or at UM partner universities overseas. Programs with UM faculty are unique in their emphasis on experiential learning, pre-arranged group housing, excursions, and courses taught by UM professors and overseas academic experts. Examples of these programs include UM semester-on-locations in Prague, Buenos Aires, Cape Town, India, the Galapagos, and Rome, as well as short term faculty-led programs during the summer in Europe, Asia, Africa, and South America.

Students can also receive UM credit hours and grades while studying at any one of UM's exchange partner universities overseas. These programs can be undertaken for a semester, year, and/or during the summer. Among a multitude of other options, students can study marine biology on the edge of Australia's Great Barrier Reef at James Cook University, be at the center of Europe and study business at the Vienna University of Economics and Business Administration, explore Iceland's unspoiled nature while studying earth sciences at the University of Iceland, immerse themselves in Japanese culture and business practices at Sophia University in Tokyo, or become acquainted with the changing panorama of international relations at Uppsala University in Sweden. Many of these programs are delivered in English so foreign language proficiency is not required for most study abroad opportunities.

Students who participate in UM Study Abroad programs will receive UM grades and credits and are able to use their existing financial aid towards semester program costs. With careful planning and academic department approval, students can apply their courses abroad to their majors, minors, cognates, or elective credits. Programs are open to sophomores, juniors, and seniors who meet posted eligibility requirements for admission such as minimum cumulative GPA.

The Schools and Colleges at UM encourage study abroad options for their students. With the assistance of the Study Abroad Office and the guidance of academic advisors, students can select a study abroad program to fit almost any major. Additionally, UM financial aid will apply to the costs of the UM programs. Students are advised to plan as early as their freshman year so studying abroad can be incorporated into their academic plan.

The cost of studying abroad varies depending on the type, length, and location of the program. Students are often surprised at how affordable studying abroad can be. Students participating in a UM study abroad program will be able to use their financial aid abroad. Participants are charged full tuition for the term abroad and the financial aid package will be adjusted based on the estimated expenses of the program. If the estimated expenses of the program are lower than the costs of attending UM, participants may be eligible for less in loans, but scholarships and grants will stay the same.

As studying abroad is seen as such an important aspect of a college career, many national and institutional scholarships are available. Interested students should begin to research scholarship opportunities early. The most prestigious study abroad scholarships, which grant up to

\$10,000 per semester, have applications with deadlines up to 18 months before the study abroad program begins. Several other scholarships, with deadlines similar to program application deadlines, are also available and grant up to \$5,000. Learn more about finances and scholarships by visiting the Study Abroad website, speaking with the advisors in the Study Abroad Office and the Office of Financial Assistance Services.

Students enrolled in any study abroad program at a partner institution may not earn 25 percent or more of their credits toward any UM degree program (credit requirements may vary by major/level), including courses taught by UM faculty. A student who anticipates earning 25 percent or more of his/her degree credits while participating in a study abroad program must immediately inform his/her advisor or program chair, who will be responsible for notifying the appropriate parties so that advance approval can be obtained from the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC).

For additional information, contact:

Office of Study Abroad
PO Box 248263
Coral Gables, FL 33124-5221

Summer Scholars Program

<http://www.miami.edu/ssp>

The Summer Scholars Program (SSP) provides a unique opportunity for high school students to study at the University of Miami for three weeks during the second summer semester and earn 6 credit hours. Students will either live on campus or participate as a commuter. SSP is designed to expose high school students to university academics and campus life before commencing undergraduate studies. Interested high school students should seek further information and application requirements for the program on the website at www.miami.edu/ssp (<http://www.miami.edu/ssp>).

Select one (1) area of specialization: ¹	6

Summer Sessions and InterSessions

<http://www.miami.edu/summersessions>

The Summer Sessions program at the University of Miami is an exceptional opportunity for students to enhance their educational goals in a concentrated time period and for the South Florida community to take part in some of the innovative and unusual courses taught by outstanding faculty and well-known guest lecturers.

Special Academic Programs – InterSessions

- January (First) and Spring Break (Second) InterSessions - www.miami.edu/intersession (<http://www.miami.edu/intersession>)

- Summer A (First) and Summer B (second) InterSessions – www.miami.edu/summersessions (<http://www.miami.edu/summersessions>)

January, Spring Break, May, and June InterSession are short term credit hour courses designed so you can concentrate fully on topics not normally offered during regular semesters; getting individual quality time with distinguished faculty members; and sharing knowledge with other students.

Tuition charges for January and Spring Break InterSession are separate from and in addition to your spring tuition charges (ARE NOT included in the full time 12-20 credit hours "Flat Rate" of Spring Semester).

Due to the intense format of the InterSession courses, there are special drop and refund policies; please refer to the web site for complete details.

COURSE LISTING

Accounting Business Administration (ACC)

ACC 211. Principles of Financial Accounting. 3 Credit Hours.

Course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from a user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 212. Managerial Accounting. 3 Credit Hours.

Introduction to managerial accounting. Topics include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information to solve problems. The course is taught from a managerial perspective.

Prerequisite: ACC 211.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 301. Cost Accounting. 3 Credit Hours.

Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. Course is designed to provide students with the necessary skills to perform basic cost accounting.

Prerequisite: ACC 212.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 311. Intermediate Accounting I. 3 Credit Hours.

The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows.

Prerequisite: ACC 212.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 312. Intermediate Accounting II. 3 Credit Hours.

A continuation of ACC 311. Course focuses on more complex accounting applications such as leases, postretirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.

Requisite: School of Business Administration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 315. Accounting for Health Care Organizations.. 3 Credit Hours.

This course focuses on the financial accounting and reporting processes in health care, service industry, and governmental organizations. Practice problem solving techniques related to health care organizations. This will not count as an accounting course for accounting majors and will not satisfy any accounting requirements needed to sit for the CPA exam in Florida.

Prerequisite: ACC 212.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 402. Auditing. 3 Credit Hours.

Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports.

Requisite: School of Business Administration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 403. Fundamentals of Taxation. 3 Credit Hours.

Basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusions, inclusions, statutory deductions, exemptions, and credits. The fundamentals of tax research are also introduced. For students who need to take ACC 303, this course satisfies that requirement.

Prerequisite: ACC 311

Prerequisite or Corequisite: ACC 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 404. Advanced Taxation. 3 Credit Hours.

Study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, reorganization, distribution, and liquidation of corporations and partnerships. Also includes an introduction to estate and gift taxation.

Prerequisite: ACC 403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 406. Accounting Systems. 3 Credit Hours.

Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool.

Prerequisite: ACC 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 411. Advanced Accounting. 3 Credit Hours.

The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, there is coverage of the accounting principles and practices applied to foreign operations and partnerships. For Accounting majors who need to take a 500-level accounting course, this course satisfies that requirement. Prerequisite: ACC 312.

Prerequisite: ACC 312. Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 506. Internal Auditing. 2 Credit Hours.

Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.

Prerequisite: ACC 402. Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 522. Advanced Issues in Auditing. 3 Credit Hours.

Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 524. Accounting for Governmental and Not-for-Profit Entities. 2 Credit Hours.

The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 530. International Financial Reporting Standards. 1 Credit Hour.

This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 550. Accounting Internship. 3.00 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences are required. Approval of chairman is required at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 555. Accounting Honors Research Project. 3.00 Credit Hours.

Research project to fulfill requirements for Departmental Honors Accounting.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

ACC 572. Advanced Financial Analysis. 2 Credit Hours.

This course builds on the analytical techniques developed in the prerequisite financial accounting courses to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The view point is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.

Prerequisite: ACC 312. Requisite: Accepted into the Accounting Accelerated Program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 599. Directed Readings. 1-3 Credit Hours.

Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project is required at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 600. Accounting for Decision-Making and Control. 3 Credit Hours.

The course focuses on the use and understanding of basic financial and managerial accounting reports. The course is oriented to the user of financial data rather than the preparer of the data. Coverage of basic accounting assumptions and current issues affecting accounting processes and reporting are included, but detailed accounting procedures are not emphasized. Completion of the course should permit students to understand accounting information and to communicate with professional accountants. Does not satisfy any accounting requirements needed to sit for the CPA exam in Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 601. Trends in Present Day Accounting. 2 Credit Hours.

Recent developments in accounting thought and advanced accounting theory. The analysis of trends as disclosed by recent releases of the Securities and Exchange Commission, the American Institute of Certified Public Accountants, and the Financial Accounting Standards Board are discussed. Other topics include terminology, current trends in the measurement, presentation of third financial data to meet the needs of third parties, and surveys accounting literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 602. Analysis of Financial Statements. 1-3 Credit Hours.

Course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis (including ratio analysis) and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 603. Studies in Financial Reporting Issues. 2 Credit Hours.

An exploration of complex financial reporting issues using the case method.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 604. Seminar in Cost Accounting. 2 Credit Hours.

Course covers four major segments. First, it reviews the basic concepts and tools associated with management control systems. Second, it underscores the importance of decentralization and the impact it has on decision making. Third, it examines the strategic place for cost management. Examples include the adoption of the balanced score card, quality control, productivity, and environmental cost management. Fourth, the course brings costing and control tools into the discussion of decision making.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 606. Internal Auditing. 2 Credit Hours.

Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 607. Financial Accounting & Reporting. 3 Credit Hours.

Basic concepts of accounting designed to increase understanding of the function of accounting statements and their limitations. The generally accepted principles governing the preparation of financial reports and the use of accounting information in investment and credit decisions. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ACC 608. Managerial Accounting. 3 Credit Hours.

Current managerial accounting techniques and theories. Topics include the use of accounting data in making decisions and planning and control systems for implementation of decisions. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 610. Financial Reporting Research. 2 Credit Hours.

The objective of the course is to familiarize students with researching financial information of publicly traded companies and to provide an introduction to accounting research related to the content and presentation in SEC filings. The course will emphasize searching and accessing as well as understanding and interpretation of financial information presented in SEC filings (e.g., 10-K, 10-Q, Proxy Statements). Accounting topics covered will include accounting information and the capital markets, earnings management, earnings quality, effect of recognition vs. disclosure in accounting reports and the role of the SEC in regulating financial reporting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 611. Auditing Seminar. 2 Credit Hours.

Practical applications of auditing and research into audit matters. Emphasis of the course is placed on cases involving audit failures, appropriate auditing procedures, reporting, and exercise of audit judgment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 616. CPA Review I. 3 Credit Hours.

The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA exam (Regulation and Financial Accounting and Reporting). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 617. CPA Review II. 3 Credit Hours.

The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA Exam (Business Environment and Concepts, and Auditing and Attestation). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 620. Accounting Controls in Information Technology. 2 Credit Hours.

Course develops students' understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting systems elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 622. Advanced Issues in Auditing. 3 Credit Hours.

Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact in audit practice. Not open to students with credit in ACC 522.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 623. International Accounting and Taxation. 2 Credit Hours.

Course covers tax accounting and business considerations in the global business environment. U.S. tax issues involved in international transactions, working across national borders, the Foreign Corrupt Practices Act, money laundering and uses of accounting information in managing an international business. Not open to students with credit for ACC 523.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

ACC 624. Accounting for Governmental and Not-for-Profit Entities. 3 Credit Hours.

The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities. Not open to students with credit for ACC 524.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ACC 630. International Financial Reporting Standards. 1 Credit Hour.

This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 631. Advanced Financial Accounting Topics. 2 Credit Hours.

Coverage of the Generally Accepted Accounting Principles governing business combinations, the preparation of consolidated financial statement including local and foreign subsidiaries, and other financial reporting topics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 632. Intermediate Accounting I. 2 Credit Hours.

The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 633. Intermediate Accounting II. 2 Credit Hours.

The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 634. Cost Accounting. 2 Credit Hours.

Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. This course does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 635. Auditing. 2 Credit Hours.

Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This course does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 636. Accounting Systems. 2 Credit Hours.

Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool. This course does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 639. Income Taxation and Business Entities. 2 Credit Hours.

This course is designed to be the second tax course students who are interested in the business applications of federal income tax laws, as they affect corporations, partnerships, and their owners. Emphasis is placed on tax planning aspects of formation, operation, liquidation, and distributions of corporations and partnerships. Not open to students with credit in ACC 404 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 640. Corporate Taxation I. 2 Credit Hours.

Course covers treatment of the corporate form of organization, its related opportunities, and problem areas, including formation, tax formula, non-liquidating and liquidating distributions, capital structure, redemptions, alternative minimum tax.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 641. Corporate Taxation II. 2 Credit Hours.

An in-depth study of taxable and nontaxable corporate reorganizations. An introduction to affiliated corporations, requirements for consolidated returns, and their associated problems and opportunities are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 642. Seminar in Taxation. 2 Credit Hours.

Investigation of current topical areas in taxation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 643. Tax Research. 2 Credit Hours.

Study of the tax practice environment including the Treasury Department, the Courts, and the legislative history of the Internal Revenue Code. Ethics in tax practice are also examined. Course includes training in the use of tax services such as RIA Checkpoint and LEXIS, in performing tax research. A research methodology for solving tax problem cases is studied and cases to be researched are assigned.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 645. Partnership Taxation. 2 Credit Hours.

Taxation of partners and other flow-through entities. Partnership formation, termination, distribution, liquidation, and sales of partnership interests are covered. Limited partnerships in conjunction with their use as tax shelters are discussed as well as family partnerships, limited liability companies, and LLPs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 647. Estates and Gift Taxes. 2 Credit Hours.

Estate and gift planning for shifting wealth from one individual to another by death, gift, or by the use of trusts. Property included in the decedent's gross estate valuation methods, gifts in contemplation of death, jointly held property, life insurance, transfers with retained life estates, bequests, revocable transfers, the marital deduction, powers of appointment, gifts of present and future interest, and gifts to minors are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 648. Financial Reporting Implications of Income Taxes.. 2 Credit Hours.

This course is designed to provide the foundation necessary to understand the financial accounting and reporting of book-tax differences. The course will cover the preparation of the income tax provision and related financial statement disclosures in conformity with U.S. GAAP (FASB ASC 740)

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 649. Issues in Tax Policy. 2 Credit Hours.

This course looks at the process through which our tax laws are created and the important policy issues inherent in individual and corporate income taxes, consumption taxes, and wealth transfer taxes. Topics in this course are not limited to U.S. taxation and include an examination of systems used in other countries (such as the VAT) as possible alternatives to our current tax.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 650. Accounting Internship. 1-3 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences required.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 660. Managerial Accounting in Healthcare Organizational. 3 Credit Hours.

This course covers Managerial Accounting concepts applied to healthcare organizations. Topics include cost allocation and management control systems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 662. Taxation of Multinational Corporations. 2 Credit Hours.

This course introduces the fundamental tax concepts underlying U.S. taxation of international transactions. Topics include the taxation of U.S. corporations with income from foreign sources, intercompany pricing, anti-tax avoidance provisions, and tax treaties.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 664. Global Mergers and Acquisitions: Accounting and Related Issues. 2 Credit Hours.

This course focuses on the financial, cultural, and strategic aspects of international mergers and acquisitions (M&A) activity and has a global, cross-cultural perspective. It presents a strategic view of the M&A process, examining managerial decision making in the planning, execution, and post-merger phases.

Prerequisite: ACC 402 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 670. Financial Reporting and Analysis. 2 Credit Hours.

The course focuses on the analysis and use of financial accounting information in the evaluation of corporate performance. The course initially demonstrates the accounting process and resulting generation of financial statements. Building on these core accounting concepts, the course emphasizes the understanding of financial statements prepared under U.S. and International Accounting Standards and the analysis of these financial statements including common size analysis, ratio analysis, the impact of taxes, and credit analysis. Completion of the course enhances the student's ability to read, interpret, and analyze financial statements for making investment, credit, acquisition, and other evaluation decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 671. Accounting for Decision Making. 2 Credit Hours.

The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, break-even analysis and pricing, including the impact of taxes. Completion of the course will enhance the student's ability to understand managerial accounting reports and use this information in making business decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 672. Advanced Financial Analysis. 2 Credit Hours.

Advanced Financial Analysis and Valuation builds on the analytical techniques developed in the basic financial statement analysis course, Accounting 670: Financial Reporting and Analysis, to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 673. Taxation for Business and Investment Decisions. 2 Credit Hours.

This course is designed to be the first tax course for students who are interested in acquiring the basic knowledge that all executives and investors should have about our federal income tax system. It studies basic concepts of federal income taxation applicable to all taxpayers. The basic income tax formula is studied including income exclusions, inclusions, statutory deductions, exemptions, and credits as well as property transactions. Completion of this course will enhance the students' appreciation of the role of taxation in making investment, employment-related, and business decisions. Not open to students with credit in ACC 403 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 675. Compensation, Incentives and Strategic Control. 2 Credit Hours.

Internal control is the process by which owners influence manager's of organization to implement the organization's strategies. They key idea is that different organizations typically have different strategies which in turn require different control systems for effective implementation. Internal control involves both formal systems and informal processes. Accounting 675 will begin by describing the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation. We will then explore the economic and financial reporting consequences (perhaps unintended) of various performance measurement mechanisms. In particular, we will focus on issues of short-termism, earnings, management, and attendant control failures that plague Corporate America today. Finally, we will discuss some of the regulatory changes brought about in recent times (e.g., Sarbanes Oxley) to address the apparent widespread control system failures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 677. Forensic Accounting. 2 Credit Hours.

This course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. You will learn how to investigate and quantify fraud, and how it can be detected and prevented as well as the accountants' role in litigation, such as acting as expert witness.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 681. Introduction to Financial and Managerial Accounting. 4 Credit Hours.

The first half of the course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from both a preparer as well as user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows. Topics covered in the second half include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information in decision making from a managerial perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 682. Intermediate Accounting. 4 Credit Hours.

The accounting principles guiding the financial reporting practices of entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. The course begins with a detailed discussion of the components of the income statement as well as the balance sheet followed by more complex accounting applications such as leases, post retirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.

Prerequisite: ACC 681.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 683. Taxation. 4 Credit Hours.

The course begins with a discussion of basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusions, inclusions, statutory deductions, exemptions, and credits. This is followed by a study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, distribution, and liquidation of corporations and partnerships.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 684. Accounting Information Systems. 4 Credit Hours.

Course covers the nature, design, and implementation of accounting information systems. The objective of the course is to develop students' understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting system elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 685. Financial Statement Analysis and Valuation. 4 Credit Hours.

This course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions including the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 686. Auditing. 4 Credit Hours.

Course focuses on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This is followed by discussion of advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 687. Advanced Cost Accounting. 4 Credit Hours.

The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, pricing, and in making other business decisions. Topics include in-depth studies of techniques and issues surrounding cost allocation methods, approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation will be discussed.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 688. Advance Accounting and Financial Reporting. 4 Credit Hours.

The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, the accounting principles and practices applied to foreign operations and partnerships will be discussed along with foreign currency translation issues. This will be followed by an exploration of complex financial reporting issues of contemporaneous interest.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 698. Selected Topics. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 699. Directed Readings. 1-3 Credit Hours.

Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project required at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 701. Empirical Accounting Research. 3.00 Credit Hours.

This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

ACC 702. Empirical Accounting Research II. 3.00 Credit Hours.

This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, and empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies. PREREQUISITE: ACC 701 TOPICS IN EMPIRICAL ACCOUNTING RESEARCH I, OR PERMISSION FROM THE INSTRUCTOR.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 823. Topics in Empirical Accounting Research I. 3 Credit Hours.

This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ACC 824. Topics in Empirical Accounting Research II. 3 Credit Hours.

This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, an empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

ACC 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credit as determined by their advisor, but not for less than a total of 24. Not more than 12 hours of ACC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed their qualifying examinations they may take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Aerospace Studies (AIS)

AIS 101. The Foundations of the United States Air Force I. 1 Credit Hour.

Survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: Air Force heritage, military customs and courtesies, career opportunities, Air Force Core Values, interpersonal communications, and team building. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AIS 102. The Foundations of the United States Air Force II. 1 Credit Hour.

Survey and follow on course to AIS101, designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: Air Force heritage, military customs and courtesies, career opportunities, Air Force Core Values, interpersonal communications, and team building. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AIS 150. Leadership Laboratory. 0 Credit Hours.

Leadership Laboratory (LLAB) is a dynamic and integrated grouping of leadership developmental activities designed to meet the needs and expectations of prospective Air Force second lieutenants and complement the AFROTC academic program. It is a student planned, organized, and executed practicum conducted under the supervision of the Detachment 155 Commander and Operations Flight Commander.

Components: LAB.

Grading: CNC.

Typically Offered: Fall & Spring.

AIS 201. The Evolution of USAF Air and Space Power I. 1 Credit Hour.

Survey and follow-on course to AIS 101/102 designed to examine general aspects of the employment of air and space power through a historical perspective. Historical examples assist in understanding the development of Air Force distinctive capabilities and missions. In addition, the students continue discussing the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders. Students also continue to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AIS 202. The Evolution of USAF Air and Space Power II. 1 Credit Hour.
Continuation of AIS 201 which provides students with knowledge level understanding for general element and employment of air and space power. Discusses the importance of Air Force Core Values with use of operational examples and historical Air Force leaders. Continues to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AIS 301. Air Force Leadership Studies I. 3 Credit Hours.

Aerospace Studies 301 teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AIS 302. Air Force Leadership Studies II. 3 Credit Hours.

Continuation of AIS 301 and is a study of Air Force personnel and evaluation systems, leadership ethics, and communication skills required of Air Force junior officers. Case studies are used to examine Air Force leadership and management situations. Mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AIS 401. National Security Affairs/Preparation for Active Duty I. 3 Credit Hours.

Aerospace Studies 401 is designed to examine national security process, regional studies, advanced leadership ethics, and Air Force Doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism with a continuing emphasis on the refinement of communication skills. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AIS 402. National Security Affairs/Preparation for Active Duty II. 3 Credit Hours.

Continuation of AIS 401 which examines regional studies and advanced leadership ethics. Special topics of interest focus on the military as a profession, officership, military justice, preparation for active duty, and current issues affecting military professionalism. Continued emphasis is given to refining communication skills. Mandatory Leadership Laboratory complements this course by providing students advanced leadership experiences.

Corequisite: AIS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

Africana Studies (AAS)

AAS 150. Introduction to Africana Studies. 3 Credit Hours.

Experiences of African American and other African-descended peoples with emphases on social, cultural, political, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

AAS 260. History of Slavery in the Atlantic. 3 Credit Hours.

The emergence and eventual abolition of the Trans-Atlantic slave trade and its effects on both old and new world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AAS 290. Special Topics. 3 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AAS 350. Black Leadership in the U.S.. 3 Credit Hours.

Black leaders and leadership organizations. Emphasis on their role in overcoming oppression and barriers to advancement.

Prerequisite: 3 Credits in AAS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

AAS 390. Special Topics. 3 Credit Hours.

Content varies by semester.

Prerequisite: 3 Credits in AAS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

AAS 490. Senior Seminar in Africana Studies. 3 Credit Hours.

Content varies by semester.

Prerequisite: AAS 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

American Studies (AMS)

AMS 101. Introduction to American Studies. 3 Credit Hours.

An interdisciplinary approach to American Studies with attention to a particular theme or period.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

AMS 301. Topics In American Studies. 3.00 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMS 310. The United States In The World. 3 Credit Hours.

The culture and history of the United States in a global framework.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMS 321. Topics in American Studies: History. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMS 339. Topics in American Studies: Urban Studies. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMS 350. History And Culture Of South Florida. 3 Credit Hours.

The history and culture of South Florida from a multidisciplinary perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMS 399. Independent Study. 1-3 Credit Hours.

By arrangement with instructor; content varies.

Components: LEC.

Grading: CNC.

Typically Offered: Offered by Announcement Only.

AMS 401. Seminar in American Studies. 3 Credit Hours.

Content varies by semester.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

AMS 499. Independent Study. 3 Credit Hours.

By arrangement with instructor; content varies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

AMS 501. Senior Project. 3 Credit Hours.

All majors must complete either an individual research project or an internship at a local cultural or civic institution. Either option must be approved by the program director.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

AMS 505. Honors Thesis. 3 Credit Hours.

American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505 : honors thesis. Candidates for departmental honors are responsible for finding a faculty member to serve as the thesis advisor. Students would take AMS 501 in the fall semester or the senior year and AMS 505 in the spring to complete the honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

Anthropology (APY)

APY 100. Introduction to Forensic Investigation. 3 Credit Hours.

Students will go into the field to gain an introductory understanding about skeletal identification and crime lab processes.

Requisite: Plan of Summer Scholar Program.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 101. Introduction to Anthropology. 3 Credit Hours.

A broad overview of archaeology, cultural anthropology, biological anthropology, and linguistics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 105. HIV: Sex, Science, and Society. 3 Credit Hours.

The important role that science plays and has played in ameliorating suffering for mankind. We will include an analysis of the scientific, human, and policy-related issues associated with HIV/AIDS.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 109. Anthropology of Religion. 3 Credit Hours.

Through themes such as myth, word and text, symbol, gender, pilgrimage, embodiment, and ritual, students learn about lived religion through anthropological research and field methods. The course also exposes introductory-level students to diverse world religious traditions: Korean folk religion, Indonesian Islam, Hinduism in diaspora, Judaism across cultures, Japanese temple Shinto traditions, and more.

Components: LEC.

Grading: GRD.

APY 200. Introduction to Forensic Anthropology. 3 Credit Hours.

Students will learn the basics of the human bone structure and how it relates to anthropology and forensic studies.

Requisite: Plan of Summer Scholar Program.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 201. Principles of Archaeology. 3 Credit Hours.

History, methods, and theory of archaeology with an outline of the main characteristics of the prehistoric record throughout the world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 202. Principles of Cultural Anthropology. 3 Credit Hours.

Cultural anthropology, including such topics as economics, politics, kinship and families, health systems, religion, and personality.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 203. Principles of Physical Anthropology. 3 Credit Hours.

The origin and biological development of the human species; human evolution explored by means of the fossil record of prehistoric population; differentiation and adaptation of contemporary populations in various world environments; the comparison of humans and other primates with respect to biological and behavioral variability.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 204. Principles of Linguistic Anthropology. 3 Credit Hours.

Human linguistic principles of phonology, morphology, and grammar to construct a framework for understanding the operation of language in cultural context. The functions of human language in structuring ideological, economic, and political realms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 205. Medicine, Health Care In Society. 3 Credit Hours.

A sociohistorical analysis of the intersection between medicine, health care and society, using examples throughout the world. It will reflect on 'taking-for-granted' concepts such as the 'body, risk, illness and healing' and their relationships to culture, power, and society, as well as the plurality of narratives and discourses on health and healing practices.

Requisite: Anthropology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 208. Short-Changed in the City. 3 Credit Hours.

Marginalization plagues sub-populations in almost every large city. An anthropological view of this problem and its origins, presented through readings, discussions, lectures and field trips.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 230. The Sounds of the World's Languages. 3 Credit Hours.

The range of sounds produced by the speakers of the world's languages. An introduction to phonetics, with a focus on acoustically-oriented methods used in contemporary phonetics.

Prerequisite: APY 204.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 240. World Prehistory: Our first three million years. 3 Credit Hours.

An introduction to the prehistoric record worldwide which examines the evolution of human complexity and culture through non-written form of evidence from the archeological record.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 300. Societies and Cultures in Latin America and the Caribbean. 3 Credit Hours.

This course is designed to give students an understanding of issues related to social and processes in Latin American and Caribbean societies, with emphasis on history, class, gender, ethnicity, religion, politics and power, family and migration processes as well as literary and artistic creations. We will begin our study by analyzing the sociohistorical 'production' of these regions, subject formation and processes of political organizing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 301. World Prehistory. 3 Credit Hours.

The global prehistoric record, with emphasis on the development of social complexity and ancient states.

Prerequisite: APY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 306. Human Evolution. 3 Credit Hours.

The macroevolution of humans using the fossil record of vertebrates, including the development of uniquely human behavioral and anatomical adaptations, and of diversity in living populations.

Prerequisite: APY 201 or APY 203.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 307. Human Adaptation. 3 Credit Hours.

Human biological adaptation to different environments and stress is examined anthropologically within an evolutionary framework. Mechanisms of adaptation to temperature extremes and other climatic variables, high altitude, disease, nutritional stress, urbanization, extraterrestrial conditions, and other environmental challenges are described in relation to biological and behavioral variations among human populations. The limits of human performance and human adaptive potential in the present and future are explored.

Prerequisite: APY 201, APY 202, APY 203, BIL 101, and BIL 109.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 308. Human Variation: Anthropology of Race. 3 Credit Hours.

Human biological diversity is viewed historically within a cross-cultural, evolutionary framework. Patterns of variation in human morphological, anatomical, physiological, biochemical, genetic, and behavioral characteristics are investigated in peoples living in different environments throughout the world. Observed differences among human populations are discussed with reference to traditional theories of racial taxonomy and modern perspectives in human classification.

Prerequisite: APY 201, APY 202, APY 203, BIL 101, and BIL 109.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 309. Evolution of Human Behavior. 3 Credit Hours.

Origins and evolution of human behaviors as determined by fossil and archaeological evidence, primate research, and the cross-cultural analysis of behavioral variations in contemporary societies. The interaction of human biological and behavioral evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 310. Primate Behavior and Adaptation. 3 Credit Hours.

The taxonomy, distribution, anatomy, social behavior and adaptations to habitats of human and non-human primates as seen from an evolutionary perspective.

Prerequisite: APY 203 and BIL 150.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 315. Folk and Alternative Medicine. 3 Credit Hours.

Historical and cultural backgrounds of health therapies, including theoretical bases of traditional ethnomedical, nonwestern, and complementary medical systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 320. The Evolution of Language. 3 Credit Hours.

Popular contemporary hypotheses on the origins and development of language.

Prerequisite: APY 204.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 336. Cultural Dynamics. 3 Credit Hours.**Components:** LEC.**Grading:** GRD.**APY 340. Marine Archaeology. 3 Credit Hours.**

Location, excavation, and study of submerged sites.

Prerequisite: APY 201.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**APY 345. Blood And Chocolate: Ancient Civilizations Of Mesoamerica. 3 Credit Hours.**

An archaeological approach to understanding the major pre-Columbian cultures of Mesoamerica, from Olmec to Aztec periods, with emphasis on the ancient Maya. The particular accomplishments of this area such as the domestication of chocolate and corn, hieroglyphic writing, and elaborate sacrificial rituals will be explored.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**APY 360. Anthropology of Food. 3 Credit Hours.**

Evolution of human diet, basic nutrition, food taboos, effects of domestication, effects of diet on skeletal remains, analysis of your own food habits, and the impact of certain foods on our biocultural evolution of our species.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**APY 361. Gender and Language. 3 Credit Hours.**

The ways in which language is used in the constitution of gender from a cross-cultural perspective. Course is co-listed with WGS 361

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**APY 362. The Languages of the World. 3 Credit Hours.**

The world's languages. The primary focus is on major differences and similarities among the structural properties of languages from diverse regions and linguistic families. In short, an introduction to linguistic typology.

Prerequisite: APY 204.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**APY 376. Economic Anthropology. 3 Credit Hours.**

The structure and operation of the small-scale economy in the social system is examined. The interrelationship between social and economic systems, and the formation of non-market economies.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**APY 377. Anthropology of Political Systems and Discourse. 3 Credit Hours.**

Political systems and processes in tribal societies, with special emphasis on dispute settlement, the organization of political control, and the use of oratory. Case studies from Latin American and African examples.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**APY 384. Caribbean Archaeology. 3 Credit Hours.**

An examination of human lifeways in the Antillean archipelago from first settlement through the development of complex socio-political structures in the Late Ceramic Age and ultimately the arrival of European and African migrants.

Prerequisite: APY 201. Or Requisite: Permission of Instructor.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**APY 385. Caribbean Cultures. 3 Credit Hours.**

Caribbean societies, including ethnic diversity, production and exchange, domestic organization, and belief systems.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**APY 386. Psychological Anthropology. 3 Credit Hours.**

The interaction between personality and cultural settings. Topics include cross-cultural child rearing and enculturation, behavioral development and adjustment, "deviance," and ethnopsychiatry.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**APY 387. Cultural Evolution. 3 Credit Hours.**

Evolution of social systems and technologies, from hunting and gathering bands through industrial states.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**APY 391. Gender in Ancient Cultures. 3 Credit Hours.**

A cross-cultural examination of the role gender played in ancient complex culture areas, such as Mesoamerica, Mesopotamia, and the Mediterranean, with emphasis on using the archaeological record to reconstruct social roles.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**APY 392. Sex and Culture. 3 Credit Hours.**

A cross-cultural examination of sex roles and sexuality; gender identity, division of labor, functions of marriage, sexual practices, reproductive control, and political relationships between the sexes.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.

APY 393. Drugs and Culture. 3 Credit Hours.

Cross cultural review of human drug use with special attention to the use of drugs in cultural context.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 394. Comparative Religion. 3 Credit Hours.

A cross-cultural investigation of differing levels of religious belief systems examined from both etic and emic points of view.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 395. Gender, Race & Class. 3 Credit Hours.

Conceptions and intersections of gender, race, and class in historical and contemporary cultures; the impact of these experiences on individuals and society as a whole.

Prerequisite: APY 202 and WGS 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 396. Youth Culture, Identity and Globalization. 3 Credit Hours.

Youth cultural practices and experiences in various urban contexts in the world. Particular emphasis is placed on marginalization, identity and commodification of violent practices as embedded in the globalization processes.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 397. Violence And Ritual. 3 Credit Hours.

Various theories of ritual and violence with reference to ethnographically-based topics. It will explore the role of symbols, rituals and ideologies in shaping and contesting power within nations and other political communities.

Prerequisites: APY 202 or any Social and Behavioral Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 398. Coastal Cultures. 3 Credit Hours.

Fishermen and their special relations to the environment, from Thailand and Sri Lanka to Alaska and the West Indies. Decision-making processes among fishermen, business concepts, responses to technology and myths of the sea.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 399. The Anthropology of Kinship and Family in America. 3 Credit Hours.

Theories of kinship and the family. It will examine emergence of new patterns of kinship networks and construction of individuals. Ethnographic materials will be drawn from the Americas and the Caribbean, particularly Brazil, Cuba, Haiti, Jamaica and the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 405. Readings in Anthropology. 1-3 Credit Hours.

Supervised readings on special topics in Anthropology.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

APY 406. Readings in Anthropology. 1-3 Credit Hours.

Supervised readings on special topics in Anthropology.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 413. Medical Anthropology. 3 Credit Hours.

Cross-cultural and historical perspectives on health and illness in human evolution. Effects of heredity, environment, and culture upon human disease ecology. Biological and behavioral adaptations to disease.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 414. Forensic Anthropology I: Human Osteology. 3 Credit Hours.

Identification and interpretation of the human skeleton, including age, sex, hard tissue pathology and traumas.

Prerequisite: APY 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

APY 415. Forensic Anthropology II: Fieldwork. 3 Credit Hours.

The investigation, analyses, and legal aspects of human remains recovered from crime scenes and mass disasters.

Prerequisite: APY 203 and APY 414.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 416. Bioarchaeology-Peopling the past. 3 Credit Hours.

Contextualization of bodies in space, cultural milieu and time are the primary focus of this course. Students will explore bioarchaeology's history, development and major topical concerns.

Prerequisite: APY 201 or APY 203.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 417. Archaeometry: The Science Of Material Culture. 3 Credit Hours.

The archaeological application of a physical science (physics, chemistry, geology, etc.) techniques to answer pertinent anthropological questions about past societies.

Prerequisite: APY 201. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 418. Seminar in Anthropology. 3 Credit Hours.

Consideration of special topics in physical anthropology, linguistics, archaeology and ethnology and their interrelationships.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 419. Politics of the Past. 3 Credit Hours.

The intersection of archaeology, politics, capitalism, and discrimination to consider the presentation, misconstrual, revision, and reclamation of the past. Lecturing will be kept to a minimum, as the bulk of the class will be devoted to discussion and debate.

Prerequisite: APY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 420. Archaeology, Architecture, and the City. 3 Credit Hours.

Ancient architectural remains in the global anthropological perspective, emphasizing the role of architecture in shaping the evolution of social and political interactions.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 421. Interpreting Bodies. 3 Credit Hours.

Perceptions, representations, and regulation of the physical body as a gendered and sexual site, as a source of pleasure, as a means of social validation, and as an object of coercion. Writing Credit. Lecturing will be kept to a minimum, as the bulk of the class will be devoted to discussion and debate.

Prerequisite: APY 202 and WGS 201.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 422. Pseudoscience in Archaeology. 3 Credit Hours.

Reconstructions of how people lived in the past that claim scientific validity, use the terminology of science, but are unsupported by evidence, can be called pseudoscientific. This course critically evaluates the field of pseudoscientific archaeology by applying the scientific method, logic, and common sense.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 423. Paleopathology: Health and disease in ancient peoples. 3 Credit Hours.

Paleopathology aims to familiarize students with the range of health conditions that present in preserved human remains and to explain the linkages between disease prevalence and culture, economics, and politics.

Prerequisite: APY 414 and APY 416. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 435. Anthropology of Nature and Environment. 3 Credit Hours.

This course is an introduction to the anthropological investigation of nature, biology, and environment. Taking examples from cultural anthropology and the subfields of environmental anthropology, political ecology, and the anthropology of science, the course builds an understanding of the various ways in which ideas about nature and human nature and nature making practices shape our contemporary world: its places, spaces, life forms, and forms of life.

Prerequisite: APY 202.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 484. Anthropological Theory. 3 Credit Hours.

Theoretical frameworks directing data collection and research methodology in anthropology.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 485. Archeological Theory and Technique. 3 Credit Hours.

Theoretical traditions that shape modern archaeological research design and interpretation.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

APY 501. Methods of Anthropological Research. 3-6 Credit Hours.

Concentration on research methods for Cultural, Archaeological, Linguistic, and/or Biological Anthropology.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 502. Field Studies in Anthropology. 3-6 Credit Hours.

Field research in advanced topics in Cultural, Archaeological, Linguistic and/or Biological Anthropology. Preparation of data for professional presentation and publication is stressed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 505. Museum Internship. 3 Credit Hours.

Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.

Prerequisite: APY 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 506. Workshop in Anthropology. 3-6 Credit Hours.

This course is designed for upper level and graduate students to participate in special topics in Anthropology and related fields.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 511. Artlab At Lowe. 3 Credit Hours.

Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

APY 512. Advanced Medical Anthropology. 3 Credit Hours.

Applications of theories and methods of medical anthropology to problems in human health and disease.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 518. Advanced Seminar in Anthropology. 3 Credit Hours.

Specialized topics in Anthropology to involve students into current research specializations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 601. Advanced Seminar in Archaeology, Theory and Practice. 3 Credit Hours.

History and theoretical foundation of modern archaeology; ethics, professional standards, and best practices in archaeology; cultural heritage management with special emphasis on NAGPRA; compliance with Secretary of the Interior standards, Section 106 regulatory knowledge and skills for compliance with government regulations, and current topical literature on archaeology.

Requisite: Graduate Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

APY 602. Advanced Seminar in Cultural Anthropology. 3 Credit Hours.

The application of the anthropological perspective, data collection and analyses methods, and theoretical foundations of traditional cultural anthropology to understanding and working on solving human problems in the modern world. Topics include the design, conduct, and application of modern ethnological methods to research venues in business, governmental/NGO agencies, conflict studies, natural disasters, medical, globalization and financial organizations.

Requisite: Graduate Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 603. Advanced Seminar in Biological Anthropology. 3 Credit Hours.

The historical and theoretical foundations of modern biological anthropology. Topics include ethics and standards for human subjects; applied bioarchaeology, biological anthropology in medical/legal settings, primatology, Human biology and adaptive diversity, modern perspectives on race, and skeletal biology of modern peoples. The development of professional research and writing skills for the discipline is integral to course goals.

Requisite: Graduate Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 604. Advanced Seminar in Linguistic Anthropology. 3 Credit Hours.

Requisite: Graduate Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 605. Museum Internship. 3 Credit Hours.

Field work and on-site experience in museum studies conducted in conjunction with the major museums in Miami. Training and research in methods and techniques in museology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 612. Advanced Medical Anthropology. 3 Credit Hours.

Applications of theories and methods of medical anthropology to problems in human health and disease.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 690. Teaching Practicum In Anthropology. 3 Credit Hours.

Logistics and pedagogical issues of teaching anthropology, including skill set and materials suitable for employment in settings for which the master's is the required, e.g., two-year schools. The student will evaluate texts, create teaching materials for a given subfield, master commonly-available electronic teaching and learning tools, and teach one class as directed.

Requisite: Graduate Status and Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

APY 805. Graduate Internship: Professional Practice of Anthropology. 1-9 Credit Hours.

An internship designed to provide valuable career-related work experience in a real - world setting, e.g., institutions, organizations and/or businesses. Students will identify an opportunity, supervisor, and write a proposal as to the relevancy to their goals. The Internship may be paid or unpaid. This course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

APY 810. Master's Degree Thesis Preparation and Writing. 1-9 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Applied Marine Physics (AMP)

AMP 509. Coastal Physics and Engineering. 3 Credit Hours.

Course addresses linear wave theory, wave statistics, wave generation, tides, wind-driven currents, nearshore circulation, sediment transport by waves and currents, bedforms, bedload, and suspended load. Other topics include longshore and cross-shore transport, equilibrium beach profiles, coastal processes models, Pelnard-Considere model for shoreline change, and Escoffier model for inlet stability.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 536. Modeling of Physical-Biological Interactions. 3 Credit Hours.

The course is designed to teach students the basic components for building coupled physical biological models. Students will be able to understand the processes affecting from low- to high-trophic level organisms in the planktonic environment. Emphasis will be given on numerical simulations of mechanisms involved in: Plankton distribution and patchiness; Trophic interactions (NPZD); Larval behavior and transport; Marine population connectivity.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 551. Special Topics. 1-3 Credit Hours.

Lectures, research projects or directed readings in special topics related to Applied Marine Physics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMP 554. Special Topics. 1-3 Credit Hours.

Lectures, research projects or directed readings in special topics related to Applied Marine Physics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMP 575. Applied Ocean Hydrodynamics. 3 Credit Hours.

The equations governing the dynamics of homogeneous fluids are derived. The concepts of deformation rates, vorticity, stream function, and ideal fluid flow are introduced and demonstrated in applications describing flows in the marine environment. Semi-empirical methods for analyzing viscous flows, boundary layers, and turbulence are presented. Eddy viscosity and more advanced turbulence closure schemes are discussed in the context of coastal circulation, bottom boundary layers and sediment transport.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AMP 576. Wave Propagation in the Ocean Environment. 3 Credit Hours.

Wave equation models, acoustic and other elastic waves, surface gravity waves, boundary conditions, ray tracing, dispersion, diffraction, reflection attenuation, and radiation transport laws are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AMP 609. Coastal Physics and Engineering. 3 Credit Hours.

Course addresses linear wave theory, wave statistics, wave generation, tides, wind-driven currents, nearshore circulation, sediment transport by waves and currents, bedforms, bedload, and suspended load. Other topics include longshore and cross-shore transport, equilibrium beach profiles, coastal processes models, Pelnard-Consideré model for shoreline change, and Escoffier model for inlet stability.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 631. Air-Sea Interaction. 3 Credit Hours.

Course topics include instrumentation, automatic data acquisition and analysis, time series analysis, signals and noise, filtering, and applied statistics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMP 635. Introduction to Underwater Acoustics. 3 Credit Hours.

Course topics include sound waves and pulses, harmonic analysis, sound propagation in the ocean, sonar systems, scattering and absorption, acoustic measurement of marine life and sea-floor properties, sound transmission in waveguides, ambient noise, transducers, and hydrophones.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 636. Modeling of Physical-Biological Interactions. 3 Credit Hours.

The course is designed to teach students the basic components for building coupled physical biological models. Students will be able to understand the processes affecting from low- to high-trophic level organisms in the planktonic environment. Emphasis will be given on numerical simulations of mechanisms involved in: Plankton distribution and patchiness; Trophic interactions (NPZD); Larval behavior and transport; Marine population connectivity.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 675. Applied Ocean Hydrodynamics. 3 Credit Hours.

The equations governing the dynamics of homogeneous fluids are derived. The concepts of deformation rates, vorticity, stream function, and ideal fluid flow are introduced and demonstrated in applications describing flows in the marine environment. Semi-empirical methods for analyzing viscous flows, boundary layers, and turbulence are presented. Eddy viscosity and more advanced turbulence closure schemes are discussed in the context of coastal circulation, bottom boundary layers and sediment transport.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AMP 676. Wave Propagation in the Ocean Environment. 3 Credit Hours.

Wave equation models, acoustic and other elastic waves, surface gravity waves, boundary conditions, ray tracing, dispersion, diffraction, reflection attenuation, and radiation transport laws are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AMP 701. Analytical Methods in Marine Physics. 3 Credit Hours.

Review of linear algebra with emphasis on real symmetric systems. Least squares, optimal estimation, and the Gauss-Markov theorem. Equilibria in discrete and continuous systems, and the foundations of continuum mechanics. Review of vector and tensor analysis. Calculus of variations and the variational principles of mechanics. Fourier analysis and orthogonal expansions. Integral transforms. The discrete Fourier and z transforms. Functions of a complex variable. Ordinary differential equations. Dynamical systems, the phase plane, stability, and an introduction to chaos. The diffusion equation. Linear and nonlinear wave equations. Applications to marine physics involving wave motion and fluid flow are emphasized throughout the course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

AMP 710. Environmental Optics and Electromagnetic Wave Propagation. 3 Credit Hours.

The course will allow students to understand the physical background of geophysical optical and microwave measurements, to learn how to carry out and interpret optical measurements, and how to work with microwave passive/active remote sensing platforms. The student will leave with a thorough understanding of existing physical background of optical instrumentation for underwater measurements as well as active/passive optical and microwave remote sensing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 740. Numerical Modeling in Applied Marine Physics. 3 Credit Hours.

Techniques and applications of numerical modeling in one of the following topical areas: sound propagation and scattering in the ocean; surface gravity wave propagation and scattering in regions of shallow and intermediate depths; and hydrodynamics in the coastal ocean environment. Emphasis (sound propagation versus gravity wave propagation or hydrodynamics) alternates from one year to the other.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 750. Coastal Ocean Circulation. 3 Credit Hours.

Circulation and stratification in the coastal ocean, including the dynamics of wind-driven, tidally-driven, and buoyancy-driven mean and transient flows over variable topography with density stratification. Design of numerical models and observing systems for coastal ocean circulation is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 751. Special Topics. 1-3 Credit Hours.

Lectures, research projects or directed readings in special topics related to Applied Marine Physics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMP 754. Special Topics. 1-3 Credit Hours.

Lectures, research projects or directed readings in special topics related to Applied Marine Physics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMP 772. Advanced Underwater Acoustics. 3 Credit Hours.

Analysis and numerical modeling of sound propagation in the ocean: geometrical acoustics, normal mode theory, and the parabolic equation method. Recent advances in underwater acoustics: effects of oceanic variability, signal fluctuations, random medium propagation, ocean bottom interactions, and shallow water propagation are also examined.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 790. Mechanics and Thermodynamics of the Air-Sea Interface. 3 Credit Hours.

This course deals with the theory and practice of air-sea interaction.

Two hours of lectures and one hour in the wind-wave laboratory provide an appropriate mix of theory and experiment. The topics covered include: thermodynamics of the interface; conservation equations; wave generation, propagation, and dissipation; boundary layer turbulence; heat, mass, and momentum transfer; energy dissipation, intermittency; turbulence closure; and wave prediction models.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 791. Sustainable Fisheries - Advanced Acoustic Surveying. 3 Credit Hours.

This is the third and final course in the three course series. It addresses graduate students with a strong research interest in measuring fish and their habitat on the stock and population level. This course will focus on advanced stock assessment techniques using acoustics and optics. It will cover, for example: - A critical review of classical and current research papers - Signal processing and laboratory experiments - Field surveys and stock assessment reports.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

AMP 794. Advanced Studies. 1-3 Credit Hours.

Supervised study in areas of special interest to graduate students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMP 798. Advanced Studies. 1-3 Credit Hours.

Supervised study in areas of special interest to graduate students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

AMP 805. Special Project. 1-6 Credit Hours.

Supervised project for students pursuing the Master of Arts degree.

Consists of a paper which is researched and written on a topic approved by the student's advisory committee, and presented as a seminar to the student's division. Six credits are required for graduation.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

AMP 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

AMP 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in AMP 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

AMP 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of AMP 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

AMP 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Applied Music (MAP)

MAP 264. VOCAL TECHNIQUES. 2 Credit Hours.

Components: LEC.

Grading: GRD.

Arabic (ARB)

ARB 101. Elementary Arabic I. 3 Credit Hours.

Fundamental grammatical principles; drill in pronunciation; simple reading and translation. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARB 102. Elementary Arabic II. 3 Credit Hours.

Reading and translation; oral and written exercises. Closed to native speakers.

Prerequisite: ARB 101 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARB 201. Intermediate Arabic. 3 Credit Hours.

Continuation of ARB 102. Reading and translation; oral and written exercises. Closed to native speakers.

Prerequisite: ARB 102 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARB 202. Intermediate Arabic II. 3 Credit Hours.

Continuation of Arabic 201. Readings designed to integrate listening comprehension, speaking, reading, writing skills. Discussion of Arab society, history and culture. Closed to native speakers.

Prerequisite: ARB 201 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARB 203. Advanced Arabic. 3 Credit Hours.

5th semester course in Modern Standard Arabic, the Arabic used in almost all written communication and in formal speech throughout the Arab world. Continued development of all four language skills (listening, speaking, reading, and writing) together with study of cultural aspects of the Arab world. Conducted in Arabic. Closed to students who graduated from a high school in which the primary language of instruction was Arabic.

Prerequisite: ARB 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARB 207. Arabic For Heritage Learners. 3 Credit Hours.

Arabic for Heritage Learners is a 200 level course specifically designed for students of Arab descent who fulfilled the equivalent of ARB 201. The course will hone students' ability in critical reading, writing, debate, and discussion of pertinent topics in Arab culture. The course material will focus on the history of Arab culture, literature, film, and music. By the end of the semester students will develop their ability in critical reading and writing in MSA.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARB 251. Levantine Colloquial Arabic I. 3 Credit Hours.

This course will enable students to converse in the colloquial Arabic dialects of the Levant (Jordan, Lebanon, Palestine, and Syria).

Development of communicative abilities in speaking and comprehension, as well as reading and writing (as used in social media, theater, etc.) of colloquial Levantine Arabic. Closed to native speakers (students educated in schools where Arabic was the language of instruction);

heritage learners at the beginning level may be accommodated. Prerequisite: ARB 201 or equivalent.

Prerequisite: ARB 201 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 310. Topics In Arabic Literature And Culture In Translation. 3 Credit Hours.

Specific topics within the literature and cultures of the Arabic-speaking world, including literary, cinematic, and artistic representations of central themes or issues, and the cultural production of particular historical periods or national or immigrant groups. This course is taught in English and does not fulfill the CAS foreign language requirement. May be repeated for credit if topics vary.

Prerequisite: ENG 106 or equivalent.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 312. Arab Cultures: A Cultural History Of The Arab World. 3 Credit Hours.

Study of the main points of Arab cultural history, from Pre-Islamic times to the period following European colonization with an emphasis on intellectual history and literary and visual arts. This course is taught in English and does not fulfill the CAS foreign language requirement. Writing Credit.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 315. Topics In Gender And Sexuality In Translation. 3 Credit Hours.

Topics in gender and sexuality in the context of the Arab world, through literary and/or cultural studies. This course is taught in English and does not fulfill the CAS foreign language requirement. May be repeated for credit if topics vary. Writing Credit.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 410. Language And Power In The Arab World. 3 Credit Hours.

The multiple languages and linguistic registers present in the Arab world and, through materials from linguistics, anthropology, political science, music, art, and literature, leads them into an exploration of the main socio-linguistic features of Arabic and their broader cultural ramifications. This course is conducted in English. It does not fulfill the College of Arts & Sciences language requirement.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 591. Directed Readings. 1-3 Credit Hours.

Directed readings (Independent study) in Arabic Studies.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARB 625. Arabic for Graduate Students. 0 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARB 691. Directed Readings. 1-3 Credit Hours.

Directed readings (Independent study) in Arabic Studies.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Architecture (ARC)

ARC 101. Architecture Design I. 6 Credit Hours.

The study of architecture as an intellectual and aesthetic discipline.

Topics include concept, site, form and technique. Corequisite: ARC 111, 121.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 102. Architecture Design II. 6 Credit Hours.

Architectural response to shelter, space and setting requirements. Topics include programming, program analysis and design, anthropometrics, and architecture psychology. Corequisite: ARC 112, 122.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 110. Introduction to Architectural Design. 3 Credit Hours.

Introduction to the design process and the role of the architect in society. Building design, landscape architecture, urban planning, historic preservation, architectural theory and graphics are taught through drawing and model making in a studio setting. Open to non-architecture majors in college and high school students entering 10th, 11th and 12th grades interested in exploring the field of architecture.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 111. Drawing I. 3 Credit Hours.

An introduction to graphic representation as exploration, selection, coordination and acquisition of visual knowledge in three methods: freehand, mechanical and digital drawing. This course covers topics of orthographic and oblique projections, geometric constructions, lettering, parti sketches, shade and shadow, portfolio design and basic knowledge of digital programs; Adobe Photoshop, Adobe In-Design, Sketch-up Pro, and Autocad. Prerequisite: Corequisite: ARC 101,121.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 112. Drawing II. 3 Credit Hours.

An intermediate course that continues methods integration introduced in Drawing I focusing on conical projections, color theory, measured drawings, Sketchup-up Pro, Autocad, and Revit. Prerequisite: ARC101, 111, Corequisite ARC 102, 122.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 121. Architecture and Culture. 1 Credit Hour.

Architecture as an intellectual and aesthetic discipline. Focus on design theory, language, typology, image, form, context, and case studies.

Corequisite: ARC 101, 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 122. Architecture and Behavior. 1 Credit Hour.

Those aspects of environmental psychology which affect architectural design. Studies in human behavior and the design process, application of psychological factors to the design of buildings and their environment.

Corequisite: ARC 102, 112.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 141. On-Site Survey of European Architecture and Urbanism. 3-6 Credit Hours.

On site introduction to architecture and the city with a historical review of most European periods from classical to contemporary. Survey of European architectural and urbanistic precedents in important selected locations. Elective course open to all majors; lecture and seminar format.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ARC 203. Architecture Design III. 6 Credit Hours.

Architectural response to natural environment and site requirements.

Focus on site analysis and design, climate, access and circulation, landscape, relation to larger context. Corequisite: ARC 223.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 204. Architecture Design IV. 6 Credit Hours.

Building materials and structure as active constituents of architecture design. Focus on orientation, enclosure, low-energy responses, selection and assembly of construction materials, short and intermediate span structural systems. Corequisite: ARC 231.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 213. Drawing Iii. 3 Credit Hours.

An advanced representation course that builds on the tools and methods of Drawing I & II while introducing students to more advanced techniques of three dimensional modeling that integrates hand drawing and computer drawings. Topics covered include; diagramming, research/analytical drawing, designing in perspective, and integration of the following digital programs, Revit, Rhino, Maya, 3-D Max, and Archicad. Prerequisite: ARC 102, 111, 112 or permission of the instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 223. Architecture and the Environment. 1 Credit Hour.

Architectural response to natural environmental requirements. Focus on climate, control, natural energy use, ecosystems, energy flow, environmental intervention, case studies of indigenous buildings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 230. Building Technology I: Materials & Methods.. 3 Credit Hours.

Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 231. Building Technology: Structural Systems. 3 Credit Hours.

Structural systems: the tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral building envelope and financial considerations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 267. History of Architecture I: Ancient, Medieval and Renaissance. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century. Corequisite: ARC 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 268. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end of the sixteenth century through to the present. Corequisite: ARC 204.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 292. Introduction to Architecture Design I. 3 Credit Hours.

Survey of the architecture profession and introduction to architecture design for non-architecture majors. Role, opportunities, vocabulary, visual awareness, techniques and procedures of design.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 293. Introduction to Architecture Design II. 3 Credit Hours.

Continuation of ARC 292 and an introduction to the interactions between architecture and the engineering disciplines for non-architecture majors. Theories of building and site design, technology as an integral component of design, program, site, climate and methodology.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 294. Introduction to the Development of Architecture. 3 Credit Hours.

Introduction to architecture for non-architecture majors. Vocabulary, themes, principles and processes of design, cultural, social, economic and technological influences demonstrated through historic examples.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 301. Architecture Design. 3 Credit Hours.

Comprehensive building and site design for students transferring into the architecture program at third year level. Topics include human, environmental, cultural and technological factors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 305. Architecture Design V. 6 Credit Hours.

Environmental systems and structure as active constituents of architectural design. Topics include the integration of enclosure, structure, environmental and mechanical systems in intermediate and long span structures. Corequisite: ARC 362, CAE 213.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 306. Architecture Design VI. 6 Credit Hours.

Government and finance as active constituents of architecture design. Topics include zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies. Corequisite: ARC 351, CAE 313.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 323. On Site Study of Selected Architecture and Urbanism. 3-6 Credit Hours.

On site study of specific architectural and/or urbanistic precedents at selected locations. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ARC 324. On Site Graphic Analysis of Selected Architecture and Urbanism. 3 Credit Hours.

On site analysis and illustration of specific architectural and/or urbanistic precedents at selected locations. Diagrams, sketches, and drawings recording, analyzing and evaluating buildings and places. Focus on specific period(s) and/or architect(s). Elective course open to all majors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ARC 362. Environmental Building Systems I. 3 Credit Hours.

Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; safety systems - fire safety and emergency and signal systems. Corequisite: ARC 305.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 363. Environmental Building Systems II. 3 Credit Hours.

Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces. Principles and applications of electrical equipment and wiring design. Corequisite: ARC 306.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 371. Ancient Architecture. 3 Credit Hours.

History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 373. Early Christian, Byzantine, and Medieval Architecture. 3 Credit Hours.

History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 382. Architecture and Culture in Italy. 3 Credit Hours.

A cultural and historical framework in preparation for participation in the Rome program. A range of topics, including architecture, art, history, cinema, literature and politics presented by University faculty from a variety of disciplines. Required for participation in the Rome Program.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 390. History of Cities. 3 Credit Hours.

Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 407. Architecture Design VII. 6 Credit Hours.

Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 408. Architecture Design VIII. 6 Credit Hours.

Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 452. Management of Professional Practice. 3 Credit Hours.

Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 475. Colonial Architecture. 3 Credit Hours.

History of architecture and human settlements. Colonial Architecture from the 16th through the 19th centuries in North and South America, the Caribbean, India and Africa.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 476. 19th and 20th Century Architecture. 3 Credit Hours.

History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 481. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 482. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 483. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 500. Architecture Theory. 3 Credit Hours.

Architecture and Culture/Architecture and the Environment Survey of primary texts in theory of architecture. Part 1: Focus on design theory, language, identity, tectonics and context. Part 2: Focus on environmental theory, sustainability, and ecosystems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 501. Architecture Design and Theory I. 6 Credit Hours.

Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 502. Architecture Design and Theory II. 6 Credit Hours.

Technology component; materials, structure, and environmental control systems as a framework for architectural design. Construction materials and methods, structural systems, mechanical systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 503. Architectural Design and Theory III. 6 Credit Hours.

Legal and economic component; government and finances as active constituents of architecture design. Zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 504. Architecture Design and Theory I. 6 Credit Hours.

Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 507. Architecture Design. 6 Credit Hours.

Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 509. Architecture Design IX. 6 Credit Hours.

Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 510. Architecture Design X. 6 Credit Hours.

Elective component: student and faculty select areas of in-depth study. Topics include building types, environment, energy, community design, etc.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 511. Drawing. 3 Credit Hours.

Graphic representation of visual ideas through increased awareness of visual and graphic vocabulary, stressing projections, light, shade and shadow, perspective and freehand sketching.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 512. Advanced Visual Analysis. 3 Credit Hours.

Drawing as a means of analyzing and recording visual experience. Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 513. Computing. 3 Credit Hours.

An introduction to new electronic design tools and technology available to architects today. Lectures on the history and future of computing in the profession.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 514. Michelangelo. 3 Credit Hours.

Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo's work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 515. Computer Modeling. 3 Credit Hours.

Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 516. Architectural Watercolor Renderings. 3 Credit Hours.

This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 517. Construction Documents. 3 Credit Hours.

Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 518. Documentation of Historic Architecture. 3 Credit Hours.

Principles of preservation and restoration, research methods, measured drawings, surveying methods, case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 519. Architecture and Color. 3 Credit Hours.

This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Albert, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 523. Interior Architecture Design. 3 Credit Hours.

Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 524. Selected Topics in Interior Architecture Design. 3 Credit Hours.

Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 525. Landscape Arch Design I. 3 Credit Hours.

Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares and response to architectural context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 526. Landscape Arch Design II. 3 Credit Hours.

Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 527. Architecture Photography. 3 Credit Hours.

Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 528. Historic Preservation. 3 Credit Hours.

Basic design principles for the rehabilitation of historic buildings. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior's Standards for rehabilitation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 529. Research in Design-Methods and Procedures. 3 Credit Hours.

Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 531. Building Technology II: Structural Systems. 3 Credit Hours.

Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 532. Building Structures I. 3 Credit Hours.

The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 533. Building Structures II. 3 Credit Hours.

The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.

Prerequisite: ARC 532.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

ARC 534. The Palazzo in Italian Architecture. 3 Credit Hours.

Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 535. Historic Italian Urbanism. 3 Credit Hours.

Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 536. Italian Gardens. 3 Credit Hours.

Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 537. Research in Rome. 3 Credit Hours.

An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 541. Seminar on Town Design. 3 Credit Hours.

Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; interdisciplinary presentations, review, and criticism of current town and urban design projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 542. Seminar on Housing. 3 Credit Hours.

Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 543. Seminar on Retrofit of Suburbia. 3 Credit Hours.

Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 545. Urban Composition. 3 Credit Hours.

Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors.

Readings and discussion format.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 546. Studies of Havana. 3 Credit Hours.

Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 547. Architecture and Urban Identity. 3 Credit Hours.

Study of the relationship between architecture and urbanism focusing on the ways by which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 548. Seminar in Community Development. 3 Credit Hours.

Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 550. Professional Lecture Series. 3 Credit Hours.

Exposure to the various professional disciplines in South Florida that make contributions to the design process. Case study analysis and evaluation of current building project, from time of initial formulation through completion, including research, diagrammatic studies, site visits and lectures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 551. Contemporary Theories of Architecture. 3 Credit Hours.

Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 553. Structural Design Theory. 3 Credit Hours.

Relationship of structural systems to architectural design. Case studies in theories of structure, form and construction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 554. Architecture of South Florida. 3 Credit Hours.

History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 557. Design and Fabrication Techniques: Carved Panels. 3 Credit Hours.

Design, construction and detailing of wood as applied to furnishings and interiors. Focus: low and high relief carved wood panels. Workshop based course including research, exercises, measuring, documentation and a final project.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 558. Theories of Landscape Architecture. 3 Credit Hours.

Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 568. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end sixteenth century through to the present. Corequisite: ARC502.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 569. Directed Readings. 3 Credit Hours.

A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 570. Modern Architecture. 3 Credit Hours.

History of architecture, landscape, and city design in the modern era.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 572. Selected Topics in World Architecture. 3 Credit Hours.

History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 574. Renaissance Architecture. 3 Credit Hours.

History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 577. The Architecture of Alvar Aalto. 3 Credit Hours.

An examination of the architecture of Alvar Aalto through the analysis of selected buildings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 578. Italian Rationalist Architecture. 3 Credit Hours.

History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 581. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 582. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 583. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 584. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 585. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 586. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 590. History of Cities. 3 Credit Hours.

Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlements.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 593. Computer Animation. 3 Credit Hours.

Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 594. Geographic Information Systems in Urban Design. 3.00 Credit Hours.

Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 596. Interactive Multimedia in Design. 3 Credit Hours.

Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 601. Urban Design I: Urban Form and Types/Form-Based Codes. 6 Credit Hours.

Introduction to urban principles, documentation, lexicon of urbanism, urban codes, and architectural guidelines (Studio Format - Rome Program).

Components: STU.

Grading: GRD.

Typically Offered: Summer.

ARC 602. Urban Design II: General Urban to Urban Core.. 6 Credit Hours.

Studio projects focusing on urban retrofit and the repair of suburbia.

Design topics may include typo-morphological studies, sustainable development, down- town redevelopment, neighborhood retrofit, urban agriculture, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 603. Urban Design III: Regional/Informal Urbanism.. 6 Credit Hours.

Studio projects focusing on regional design, everyday urbanism, informalities and other urbanisms. Design topics may include open space and rural design, informal communities, affordable and manufactured housing, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 604. Architecture Design and Theory I. 6 Credit Hours.

Cultural, human and environment component and architectural responses to these: Social and aesthetic concepts, architectural psychology, climatic principles, programming analysis and design.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 605. Architecture Design and Theory II. 6 Credit Hours.

Technology component; materials, structure, and environmental control systems as a framework for architectural design. Construction materials and methods, structural systems, mechanical systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 606. Architectural Design and Theory III. 6 Credit Hours.

Legal and economic component; government and finances as active constituents of architecture design. Zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 607. Architecture Design.. 6 Credit Hours.

Architecture Design: Comprehensive Component. Topics include zoning regulations, building codes, principles of public health, safety and welfare, market and feasibility studies.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 608. Architecture Design. 6 Credit Hours.

Specialization component: student and faculty select areas of in-depth study in housing. Low-income housing, elderly housing, suburban housing, housing types, etc.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 609. Architecture Design. 6 Credit Hours.

Comprehensive project. Programming, design development, formulation of alternative solutions, detailing, presentation.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 610. Architecture Design Degree Project. 6 Credit Hours.

Special component: student/faculty selected area of special study.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 611. Drawing. 3 Credit Hours.

Graphic representation and exploration of visual ideas through increased awareness of visual and graphic vocabulary, stressing projections, light, shade and shadow, perspective, and freehand sketching.

Components: STU.

Grading: GRD.

Typically Offered: Fall.

ARC 612. Advanced Visual Analysis. 3 Credit Hours.

Drawing as a means of analyzing and recording visual experience.

Composition, form, light, color and drawing as a primary device in the mental registration of visual experience.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 613. Computing. 3 Credit Hours.

An introduction to new electronic design tools and technology available to architects today. Lectures on the history and future of computing in the profession.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 614. Michelangelo. 3 Credit Hours.

Drawing as a form of research across mediums to understand historical research and interpretation of Michelangelo's work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 615. Visualization Techniques. 1 Credit Hour.

Survey of digital and analogue representation techniques for urban designers.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 616. Architectural Watercolor Renderings. 3 Credit Hours.

This course will use freehand drawing and watercolor painting as a vehicle to study and record the urban and architectural conditions of Coral Gables and other South Florida sites. Particular emphasis will be placed on the analytical potential of sketches (recording space, light, surfaces and color).

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 617. Construction Documents. 3 Credit Hours.

Working drawings and specifications. Form, content and role of constituent parts of working drawings and specifications by using case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 618. Documentation of Historic Architecture. 3 Credit Hours.

Principles of preservation and restoration, research methods, measured drawings, surveying methods, case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 619. Architecture and Color. 3 Credit Hours.

This course focuses on the theory and practice of color and its application to architectural design. Topics include color history from Newton through Albert, the relationship between color practice in science versus art, and the discipline of color in architecture from the Neoclassical movement through the Modern Movement.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 620. Architecture Theory. 3 Credit Hours.

Architecture and Culture/Architecture and the Environment Survey of primary texts in theory of architecture. Part 1: Focus on design theory, language, identity, tectonics and context. Part 2: Focus on environmental theory, sustainability, and ecosystems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 621. History-Theory II: Housing, Transportation and Infrastructure.. 3 Credit Hours.

Part I: Survey of housing theories and projects with emphasis on morphological context, typology and composition - focus on topics of modernity. Part II: Introduction to thoroughfare design and walkability principles; description of urban, suburban, rural and regional infrastructure.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 622. History-Theory III: Urban Design Theory.. 3 Credit Hours.

Advanced survey of urban design theories in print and practice - emphasis on issues of modernity. (Seminar Format)

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 623. Public Participation Methods - Charrette with MRED+U Program.. 3 Credit Hours.

Introduction to planning and public participation methods. Design workshop in collaboration with students in the master in Real Estate and Urbanism program. (Some travel may be required)

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 624. Architecture Theory. 3 Credit Hours.

Review and criticism of current theoretical work in architecture. Design theory, language, typology, image, form, context.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 625. Roman Architecture and Urbanism I. 3 Credit Hours.

Historical overview of architecture and town planning in ancient Rome, from the Etruscan period through the Imperial period.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 626. Landscape Arch Design II. 3 Credit Hours.

Analysis and design of landscape spaces. Topics include ecological principles, landforms and plant materials.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 627. Architecture Photography. 3 Credit Hours.

Photography with emphasis on architectural subjects. Introduction to visual principles, photographic equipment, materials, and techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 628. Historic Preservation. 3 Credit Hours.

Basic design principles for the rehabilitation of historic buildings. Evaluating character-defining details; significance analysis; context of setting issues within historic districts; applying the Secretary of the Interior's Standards for rehabilitation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 629. Research in Design-Methods and Procedures. 3 Credit Hours.

Application of research methods and procedures to design issues. Historical, descriptive, analytic, experimental research methods; tools for data manipulation and communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 630. Building Technology: Materials & Methods. 3 Credit Hours.

Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction; Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes, assemblies, detailing and basic building code concepts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 631. Building Technology II: Structural Systems. 3 Credit Hours.

Structural systems: The tectonics, patterns and behavior of the elements of building structures. Topics: Equilibrium, stability, vertical and lateral loads, building envelope and financial considerations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 632. Building Structures I. 3 Credit Hours.

The structural behavior of simple frame structures. Topics include techniques to determine basic system layout and preliminary dimensioning of key subsystems and members.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 633. Building Structures II. 3 Credit Hours.

The structural behavior of complex structures. Topics include prestressed systems, waffle and space trusses, curved structures and longspan buildings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

ARC 634. The Palazzo in Italian Architecture. 3 Credit Hours.

Study of the development of the Renaissance and Baroque palazzo in Rome and other important centers of art and culture. Emphasis on the socio-political context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 635. Historic Italian Urbanism. 3 Credit Hours.

Study of Italian cities and towns from medieval to contemporary times, including a comparative analysis of history and form.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 636. Italian Gardens. 3 Credit Hours.

Study of Italian garden design during the Renaissance, Baroque and Mannerist periods. Emphasis on historical and political context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 637. Research in Rome. 3 Credit Hours.

An exploration of Roman history, architecture and urban form through lectures, on site study and drawing assignments. Emphasis on chronological and spatial sequence of development.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 638. Interior Architecture Design. 3 Credit Hours.

Principles and technical components of interior design. Topics include activity, analysis, finishes, furniture, fixture, lighting, and acoustics.

Components: LEC.

Grading: GRD.

ARC 639. Selected Topics in Interior Architecture Design. 3 Credit Hours.

Principles and technical components of interior design. Topics include interior volumetrics, finishes, furnishings and lighting.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 641. Seminar on Town Design. 3 Credit Hours.

Introduction to the lexicon of urbanism; analytical presentations of the concepts of: region, town, neighborhood, corridor, district, and building type; inter disciplinary presentations, review, and criticism of current town and urban design projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 642. Seminar on Housing. 3 Credit Hours.

Introduction to domestic building typology; exploration of the concepts of low, medium, and high density housing with attention to social, environmental, and economic issues; presentations of current case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 643. Seminar on Retrofit of Suburbia. 3 Credit Hours.

Introduction to the critical reconstitution of the city; theory and history of the concepts of revitalization and redevelopment; presentations, review, and criticism of current case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 644. The Architecture of Palladio. 3 Credit Hours.

On site study of the architecture and urbanism of Andrea Palladio. Emphasis on the artistic precedents of the Veneto Region.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 645. Urban Composition. 3 Credit Hours.

Survey and analytical review of urban rooms as the vessel of human activity in urban culture. Study of proportional and compositional aspects of urban rooms together with economic, social, and cultural factors. Readings and discussion format.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 646. Studies of Havana. 3 Credit Hours.

Analysis of the physical structure of a major city and its environments including an exploration of its history and iconographic themes, mapping and building studies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 647. Architecture and Urban Identity. 3 Credit Hours.

Study of the relationship between architecture and urbanism focusing on the ways by which architecture provides urban identity and image of place. Case studies relating monuments, fabric and urban plans to their culture, time and place. Lecture and seminar format.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 648. Seminar in Community Development. 3 Credit Hours.

Study of the contemporary context for the development of the physical environment. Examination of public, private and third sector implementation of building and community design. Format: guest speakers, readings, discussions, and seminar.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 650. Professional Lecture Series. 3 Credit Hours.

Real estate transactions and deal structuring from the development perspective. Using the case study method, the course explores the key components and the disciplines needed for successful real estate transactions and projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 651. Contemporary Theories of Architecture. 3 Credit Hours.

Theoretical basis of modern architecture and different present currents and movements. Agrarianism, technism, orthodoxy, brutalism, scientism, revivalism, consumerism, rationalism, classicism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 652. Management of Professional Practice. 3 Credit Hours.

Overview of the practice and the profession, legal and ethical concerns, business types and management practices, traditional and non-traditional practices and services, contracts and contractual relationships, disputes and risk management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 653. Structural Design Theory. 3 Credit Hours.

Relationship of structural systems to architectural design. Case studies in theories of structure, form and construction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 654. Architecture of South Florida. 3 Credit Hours.

History of architecture and human settlements. Studies of significant architectural landmarks and urban design of the South Florida Region, chronological growth of Miami, Miami Beach, Coral Gables, Key West and Palm Beach.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 657. Design and Fabrication Techniques: Carved Panels. 3 Credit Hours.

Design, construction and detailing of wood as applied to furnishings and interiors. Focus: low and high relief carved wood panels. Workshop based course including research, exercises, measuring, documentation and a final project.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 658. Theories of Landscape Architecture. 3 Credit Hours.

Leading theories of landscape architecture which have influenced current considerations of nature, landscape and design

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 661. Building Technology I: Materials and Methods.. 3 Credit Hours.

Material characteristics of enclosure and structural systems, case studies in traditional and modern building construction. Topics include properties of building materials: wood, masonry concrete, steel and glass construction techniques; on-site and off-site processes; exterior finishes; assemblies, detailing and basic building code concepts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 662. Environmental Building Systems I. 3 Credit Hours.

Environmental and Safety Systems. Topics include mechanical - HVAC and conveyors; plumbing - fixtures and pipes; electrical - equipment and wiring design; safety systems - fire safety and emergency and signal systems.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ARC 663. Environmental Building Systems II. 3 Credit Hours.

Principles and applications of light and acoustics. Topics include natural and artificial light - planning for sunlight, problems and solutions for interior and exterior illumination; sound - properties, problems and solutions in new and existing spaces electrical equipment and wiring design.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 664. Landscape Arch Design I. 3 Credit Hours.

Analysis and design of landscape spaces. Studies in historical precedent, gardens, parks, plazas, squares and response to architectural context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 665. Computer Modeling. 3 Credit Hours.

Three-dimensional, computer modeling, and rendering. Lecture, problem solving exercises and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 667. History of Architecture I: Ancient, Medieval and Renaissance. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from prehistory to the end of the sixteenth century. Corequisite: ARC 501.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 668. History of Architecture II: Baroque through Contemporary. 3 Credit Hours.

Studies of the history of architecture and urban design. Focus on religious and secular monuments and their settings, domestic architecture and infrastructure, regional constructional and compositional traditions from the end sixteenth century through to the present. Corequisite: ARC502.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 669. Directed Readings. 3 Credit Hours.

A structured program of readings and essays organized by the student and his/her graduate supervisor constituting a preparation for graduate research in the student's chosen area of interest.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 670. Modern Architecture. 3 Credit Hours.

History of architecture, landscape, and city design in the modern era.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 671. Ancient Architecture. 3 Credit Hours.

History of architecture and human settlements. Western European prehistory, Egypt, Mesopotamia, Persia, Aegean and Mediterranean, Greece, Rome.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 672. Selected Topics in World Architecture. 3 Credit Hours.

History of architecture and human settlements. Islamic Near East, North Africa, Hindu and Buddhist India, Nepal, S. E. Asia, China, Japan, Pre-Columbian America.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 673. Early Christian, Byzantine, and Medieval Architecture. 3 Credit Hours.

History of architecture and human settlements. Early Christian and Byzantine architecture in Italy, the Near East, Greece, North Africa, Eastern Europe, Medieval architecture in Western Europe.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 674. Renaissance Architecture. 3 Credit Hours.

History of architecture and human settlements. Renaissance and Baroque architecture in Italy, France, Spain and Portugal, Great Britain, Austria, Germany, and neighboring countries.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 675. Colonial Architecture. 3 Credit Hours.

History of architecture and human settlements. Iberian and British Colonies from the 16th through the 19th centuries: North and South America, Caribbean, India and Africa.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 676. 19th and 20th Century Architecture. 3 Credit Hours.

History of architecture and human settlements. America and Europe during the 19th and 20th centuries; cultural, technological and theoretical development.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 677. The Architecture of Alvar Aalto. 3 Credit Hours.

An examination of the architecture of Alvar Aalto through the analysis of selected buildings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARC 678. Italian Rationalist Architecture. 3 Credit Hours.

History of Italian architecture and urban design between 1914 and 1950: cultural, technological, and theoretical developments; relationship between architecture, politics and propaganda; related survey of the period in other countries (France, German, Soviet Union).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARC 681. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 682. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 683. Special Problems. 3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 684. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 685. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 686. Special Problems. 1-3 Credit Hours.

Group or individual investigations of significant architectural issues, offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 690. History of Cities. 3 Credit Hours.

Historical overview of the origin of cities and the development of cities in the East, West, and New World. Focus on the nature of the industrial revolution and the development of the industrial city and contemporary urban settlement

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARC 693. Computer Animation. 3 Credit Hours.

Explores the use of computer animation and advanced visualization techniques in architecture with emphasis on texture and lighting, spatial choreography and story-boarding.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 694. Geographic Information Systems in Urban Design. 3.00 Credit Hours.

Exploration of Geographic Information Systems (GIS) in urban design. Principles of GIS and their application to spatial analysis, data management and visualization.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 695. Interactive Multimedia in Design. 3 Credit Hours.

Integration of text, video, sound, and computer graphics to create an interactive electronic information medium.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 696. Advanced Topics. 3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics will be shown in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARC 699. Directed Research. 1-6 Credit Hours.

Individually supervised projects. Required 6 credit course for all Master of Architecture in Computing students who exercise final project rather than thesis option.

Components: STU.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 701. Masters Final Project. 6 Credit Hours.

Individually supervised projects. Required as a 6 credit course for all Master of Architecture in Computing students electing a final project.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 720. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis or final project for the master's degree after the student has enrolled for the permissible cumulative total in ARC 699 or ARC 710 (usually six credits). Credit not granted. May be regarded as full-time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARC 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Art (ART)

ART 101. Introduction to Drawing I. 3 Credit Hours.

Contour, cross-contour, perspective, proportion, chiaroscuro, and gesture in pictorial composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ART 102. Introduction to Drawing II. 3 Credit Hours.

Experimentation, chance, exaggeration, movement, texture, and color in pictorial composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 103. Two-Dimensional Design. 3 Credit Hours.

Line, rhythm, shape, pattern, value and color in pictorial composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ART 104. Introduction To 3D Techniques In Clay, Glass, Metal, Wood. 3 Credit Hours.

Basic 3D design principles and techniques in clay, metal, and wood. Students will rotate into each of the areas and learn to use the equipment in each area and make projects in each of the materials.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 105. Figure Drawing. 3 Credit Hours.

Drawing the human figure: proportion, anatomy, perspective, gesture, and expressive line.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 107. Introduction to Drawing III. 3 Credit Hours.

Continuation of ART 101 with emphasis on Renaissance perspective and alternative systems of spatial representation. Survey of materials and methods. Introduction of color.

Prerequisite: ART 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ART 109. Introduction to Electronic Media. 3 Credit Hours.

Computer skills for desktop publishing and digital imaging.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 180. Studies in Studio Art. 1-3 Credit Hours.

Studio studies taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ART 202. Introduction to Painting. 3 Credit Hours.

Materials and techniques of easel painting.

Prerequisite: ART 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 210. Introduction To Digital Photography. 3 Credit Hours.

DSLR Camera and Lens Techniques and Adobe LightRoom Processing In Digital Photography.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ART 217. Introduction to Sculpture. 3 Credit Hours.

Integrated approach to concept development, craftsmanship and appropriate use of materials.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 251. Intaglio/Relief I. 3 Credit Hours.

Drypoint, engraving, etching, aquatint, and softground; relief and intaglio printed collographs; relief printing from linoleum.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 253. Silkscreen I. 3 Credit Hours.

Beginning silkscreen: monotyping with screens, reduction printing, multiple run silkscreen printing and beginning photo silkscreen.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 254. Computer Applications for Printmaking. 3 Credit Hours.

Software programs used as printmaking manipulation tools to aid in the planning of prints.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 260. Special topics in Ceramics. 3 Credit Hours.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**ART 261. Hand-built Ceramics I. 3 Credit Hours.**

Beginning hand-building techniques: pinching, coiling, slab construction; introduction to glazing and firing.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 262. Wheel Thrown Ceramics I. 3 Credit Hours.**

Introduction to wheel throwing, glazing and firing.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 263. Introduction to Glass Blowing. 3 Credit Hours.**

Forming shapes and vessels from molten glass by the use of a blow pipe and glass tools.

Prerequisite: ART 104.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 268. Figure In Clay I. 3 Credit Hours.**

Introduction to modeling the human figure in clay with emphasis on form, volume, proportion, basic anatomy, and gesture.

Prerequisite: ART 104 or ART 261.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**ART 291. Graphic Design I. 3 Credit Hours.**

A comprehensive approach to understanding design fundamentals and the practice of graphic communications.

Prerequisite: ART 109.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 292. Multimedia I/ Web Design. 3 Credit Hours.**

Introduction to web design using several current time-based media.

Prerequisite: ART 109.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 293. Typography. 3 Credit Hours.**

Type and image compositions, history, arrangement, style, aesthetics of printed communications, type software and calligraphy.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 294. Multimedia II/ Animation. 3 Credit Hours.**

Animation using time-based media.

Prerequisite: ART 109.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 301. Intermediate Painting I. 3 Credit Hours.**

Painting in oil and acrylic. Emphasis on experimentation and creative expression.

Prerequisite: ART 202.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 302. Intermediate Painting II. 3 Credit Hours.**

Continuation of ART 301.

Prerequisite: ART 301.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 305. Intermediate Figure Drawing. 3 Credit Hours.**

Continuation of ART 105.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 310. Intermediate Digital Photography. 3 Credit Hours.**

Fine Art Digital Photography (DSLR). Continuation of ART 210, Emphasis on experimentation and creative expression. Adobe LightRoom.

Prerequisite: ART 210.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 311. Color Digital Photography. 3 Credit Hours.**

Fine Art Digital Photography exploring Advanced Color Theory. Emphasis on craftsmanship and creative expression. Adobe Photoshop and Fine Art Digital Printing.

Prerequisite: ART 310.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**ART 312. Alternative Processes Photography. 3 Credit Hours.**

Nineteenth Century Photographic Processes. From the Cyanotype to the Collodion Print, all in the service of creative expression.

Prerequisite: ART 311.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**ART 315. Socially Engaged Art. 3 Credit Hours.**

Contemporary art practices and the role of visual arts in creating social change, through lectures, group discussions, Individual art projects and a collaborative, hands-on community-based art project. note: this is a new course implemented as part of the Engaged Faculty Fellows program to provide students with the opportunity for civic engagement within the context of artmaking. .

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.

ART 317. Intermediate Sculpture I. 3 Credit Hours.

Incorporation of symbol and metaphor to achieve meaning, use of additional materials and technical processes.

Prerequisite: ART 217.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 318. Intermediate Sculpture II. 3 Credit Hours.

Continuation of ART 317.

Prerequisite: ART 317.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 330. ART OF EGYPT MESOPOT. 3 Credit Hours.

Components: LEC.

Grading: GRD.

ART 339. Archaeology Survey. 6 Credit Hours.

Components: LEC.

Grading: GRD.

ART 351. Intaglio/Relief II. 3 Credit Hours.

Continuation of ART 251. Additional processes such as mezzotint, relief printing from woodblocks, multiple block printing, photographic xerox transfers and photo etching.

Prerequisite: ART 251.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 352. Lithography II. 3 Credit Hours.

Continuation of ART 252. Color printing from stones, aluminum plates and photo litho plates. Combination of lithography with other print media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 353. Silkscreen II. 3 Credit Hours.

Continuation of ART 253, including silkscreening on canvas, larger format work, and advanced photo silkscreen techniques.

Prerequisite: ART 253.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 354. Computer Assisted Printmaking: Lithography and Silkscreen. 3 Credit Hours.

The use of inkjet and laser printers to make positives for black and white and process color work in photo lithography; custom color separations for multiple screen printing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 355. History Of Philosophy Of Art. 3 Credit Hours.

An examination of the history of philosophical work on the arts (including literature, visual art, and music) from ancient times through the mid twentieth century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 361. Hand-Built Ceramics II. 3 Credit Hours.

Continuation of ART 261.

Prerequisite: ART 261.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 362. Wheel Thrown Ceramics II. 3 Credit Hours.

Continuation of ART 262.

Prerequisite: ART 262.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 363. Cast Glass Processes. 3 Credit Hours.

The art of cast glass including sand casting and lost wax techniques.

Prerequisite: ART 263 or ART 104.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 364. Intermediate Glass Blowing. 3 Credit Hours.

Exploration of glass working techniques.

Prerequisite: ART 263.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 368. Figure In Clay Ii. 3 Credit Hours.

As continuation of ART 268, this intermediate course will focus on modeling The human figure in clay with emphasis on form, volume, proportion, anatomy, and gesture.

Prerequisite: ART 268.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 391. Graphic Design II. 3 Credit Hours.

Development of form and conceptual design. Contemporary visual rhetorical strategies such as metaphors, puns, irony and methonymy.

Prerequisite: ART 291.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 392. Multimedia III. 3 Credit Hours.

Video art, multimedia, installation art and interactive animation.

Prerequisite: ART 109.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 401. Advanced Painting I. 3 Credit Hours.

Development of a personal style in painting.

Prerequisite: ART 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 402. Advanced Painting II. 3 Credit Hours.

Continuation of ART 401.

Prerequisite: ART 401.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 405. Advanced Figure Drawing. 3 Credit Hours.

Continuation of ART 305.

Prerequisite: ART 305.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 410. Advanced Digital Photography I. 3 Credit Hours.

Development of a personal style in digital imaging. Course is designed for students to pursue a semester long thematic project.

Prerequisite: ART 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 411. Experimental Photography. 3 Credit Hours.

Course content determined by faculty member teaching it from studio lighting class to the Artist Book Project. May be repeated for credit.

Prerequisite: ART 311.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 417. Advanced Sculpture I. 3 Credit Hours.

Individual and collaborative installation and site-specific art.

Prerequisite: ART 317.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 418. Advanced Sculpture II. 3 Credit Hours.

Development of a personal visual vocabulary.

Prerequisite: ART 417.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 451. Intaglio/Relief III. 3 Credit Hours.

Continuation of ART 351.

Prerequisite: ART 351.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 452. Lithography III. 3 Credit Hours.

Continuation of ART 352.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 453. Silkscreen III. 3 Credit Hours.

Continuation of ART 353.

Prerequisite: ART 353.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 454. Computer Assisted Printmaking: Intaglio and Relief. 3 Credit Hours.

Continuation of ART 354, photo etching and relief processes.

Prerequisite: ART 354.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 462. Advanced Ceramics. 3 Credit Hours.

Development of expressive skills in either handbuilding or wheel throwing techniques.

Prerequisite: ART 361 or ART 362.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 468. Figure In Clay Iii. 3 Credit Hours.

As continuation of ART 368, this advanced course will focus on modeling

The human figure in clay with emphasis on form, volume, proportion, anatomy, gesture and expressive handling of clay.

Prerequisite: ART 368. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 491. Graphic Design III. 3 Credit Hours.

Advanced page layout coupled with extensive use of typography with applications in page design for advertising and collateral projects.

Prerequisite: ART 391.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 493. Illustration. 3 Credit Hours.

Contemporary illustration for print, new media, portfolio and exhibition.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 499. Honors Thesis. 3-6 Credit Hours.

Formal thesis and project including an exhibition supervised by member of the department faculty.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 501. Advanced Painting III. 1-6 Credit Hours.

Course content decided between student and professor.

Prerequisite: ART 401 or ART 402.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 502. Advanced Painting IV. 1-6 Credit Hours.

Continuation of ART 501.

Prerequisite: ART 501.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 503. Advanced Painting V. 1-6 Credit Hours.

Course content decided between student and professor. An independent study course may be repeated.

Prerequisite: ART 502.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 504. Advanced Painting VI. 1-6 Credit Hours.

Course content decided between student and professor. An Independent Study course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 505. Advanced Painting VII. 1-6 Credit Hours.

Current readings and/or technical concerns not covered in the regular curriculum. Course content will vary each semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 509. Independent Study in Other Media. 1-6 Credit Hours.

Course content decided between student and professor. Independent study course may be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 510. Advanced Digital Photography 2. 3 Credit Hours.

Course content decided between student and professor. May NOT be repeated for credit.

Prerequisite: ART 410.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 511. Advanced Digital Photography 3. 3 Credit Hours.

Continuation of ART 510. May NOT be repeated for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 512. Independent Study in Photography. 1-6 Credit Hours.

Course content decided between student and professor. An independent study course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 517. Advanced Sculpture III. 3 Credit Hours.

Examination of ongoing work in relationship to historical and contemporary interpretations issues.

Prerequisite: ART 418.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 518. Advanced Sculpture IV. 3 Credit Hours.

Continuation of ART 517.

Prerequisite: ART 517.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 551. Intaglio/Relief IV. 3 Credit Hours.

Advanced work in intaglio/relief processes: course requirements decided between student and professor.

Prerequisite: ART 451.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 552. Lithography IV. 3 Credit Hours.

Advanced work in lithography: course requirements decided between student and professor.

Prerequisite: ART 452.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 553. Silkscreen IV. 3 Credit Hours.

Advanced work in silkscreen.

Prerequisite: ART 453.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 554. Computer Assisted Printmaking. 3 Credit Hours.

Advanced work in computer assisted printmaking; course requirements decided between student and professor.

Prerequisite: ART 454.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 555. Topics in Printmaking. 1-6 Credit Hours.

Current readings and/or technical concerns not covered in the regular curriculum. Course content will vary each semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 562. Contemporary Ceramic Art. 3 Credit Hours.

Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.

Prerequisite: ART 462.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 563. Independent Study in Ceramics/Glass. 1-6 Credit Hours.

Course content decided between student and professor. An independent study course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 564. Directed Research and Projects in Ceramics/Glass. 3 Credit Hours.

Historical to contemporary approach to ceramics; furthering of the technical ability, and development of artistic style.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 591. Portfolio/Business of Design. 3 Credit Hours.

Individually supervised graphic design portfolio. Professional practices in design.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 592. Special Projects/Multimedia/Portfolio. 3 Credit Hours.

Video Art, print design, illustration or multimedia portfolio preparation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 593. Seminar in Professional Practices. 1-6 Credit Hours.

Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues. Portfolio required.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 599. Exhibition Preparation. 3 Credit Hours.

A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 710 Thesis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 602. Advanced Painting ix. 1-6 Credit Hours.

Continuation of ART 601.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 603. Problems in Studio Art. 1-6 Credit Hours.

Course content will be decided in conference between candidate and instructor. This course may be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 604. Seminar in Studio Art. 3 Credit Hours.

Special topics in selected area of studio art.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ART 609. Independent Study in Other Media. 1-6 Credit Hours.

Course content decided between student and professor. Independent study course may be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 630. Graduate Digital Photography I. 1-6 Credit Hours.

Advance Digital Photography Course: Content decided between student and professor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 631. Graduate Digital Photography II. 1-6 Credit Hours.

Advance Digital Course: Content decided between student and professor-Lecture

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 632. Graduate Independent Study in Photography. 1-6 Credit Hours.

Independent Study in Photography: Content decided between student and professor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 633. Graduate Digital Photography III. 1-6 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 634. Graduate Digital Photography IV. 1-6 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 641. Graduate Painting I. 1-6 Credit Hours.

Self-directed study in consultation with instructor. Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 642. Graduate Painting II. 1-6 Credit Hours.

Self-directed study in consultation with instructor. Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 643. Graduate Painting III. 1-6 Credit Hours.

Self-directed study in consultation with instructor. Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 644. Graduate Painting IV. 1-6 Credit Hours.

Self-directed study in consultation with instructor. Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 645. Graduate Painting V. 1-6 Credit Hours.

Self-directed study in consultation with instructor. Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 646. Advanced Painting VIII. 1-6 Credit Hours.

Professional and concentrated experiences in media and subject matter decided in conference between candidate and instructor.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 651. Intaglio/Relief. 1-6 Credit Hours.

Advanced intaglio/relief processes: course requirements decided between candidate and professor.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 652. Lithography. 1-6 Credit Hours.

Advanced lithography. Course requirements decided between candidate and professor.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 653. Silkscreen. 1-6 Credit Hours.

Advanced work in silkscreen.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 655. Topics in Printmaking. 1-6 Credit Hours.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 663. Portfolio/Business of Design. 3 Credit Hours.

Individually supervised graphic design portfolio. Professional practices in design.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 664. Special Projects/Multimedia/Portfolio. 3 Credit Hours.

Video Art, print design, illustration or multimedia portfolio preparation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ART 665. Graphic Design. 3 Credit Hours.

Advanced graduate projects in graphic design.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 666. Multimedia. 3 Credit Hours.

Advanced graduate projects in multimedia.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 671. Graduate Sculpture I. 1-6 Credit Hours.

Examination of ongoing work in relationship to historical and contemporary interpretations issues.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 672. Graduate Sculpture II. 1-6 Credit Hours.

Continuation of ART 517

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 673. Graduate Sculpture III. 1-6 Credit Hours.

Content decided in conference between candidate and instructor.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 674. Sculpture. 3 Credit Hours.

Continuation of ART 617.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 675. Graduate Sculpture V. 1-6 Credit Hours.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 676. Graduate Sculpture VI. 1-6 Credit Hours.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 681. Writing About Art. 3 Credit Hours.

Writing about art on a professional level.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ART 682. Contemporary Ceramic Art I. 1-6 Credit Hours.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 683. Contemporary Ceramic Art II. 1-6 Credit Hours.

Development of artistic style and technical abilities in relation to contemporary trends in ceramic art.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 684. Contemporary Ceramics Art III. 1-6 Credit Hours.

Content to be decided in conference between candidate and instructor.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 685. Contemporary Ceramics Art IV. 1-6 Credit Hours.

Continuation of ART 661.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 686. Contemporary Ceramic Art V. 1-6 Credit Hours.

Prerequisite: ART 685.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 687. Contemporary Ceramic Art VI. 1-6 Credit Hours.

Prerequisite: ART 686.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 688. Independent Study in Ceramics/Glass. 1-6 Credit Hours.

Course content decided between student and professor. An independent study course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 689. Directed Research and Projects in Ceramics/Glass. 3 Credit Hours.

Historical to contemporary approach to ceramics; furthering of the technical ability, and development of artistic style.

Requisite: Graduate Status and Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 693. Seminar in Professional Practices. 1-6 Credit Hours.

Advanced course with a required placement in a professional design or multimedia setting. Classroom sessions on professional topics and issues. Portfolio required.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 699. Exhibition Preparation. 3 Credit Hours.

A seminar class devoted to the preparatory work needed to plan and promote a solo exhibition, including installation/lighting concerns. Preliminary written assignments will also be given in preparation for ART 710 Thesis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ART 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ART 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ART 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

Art History (ARH)

ARH 107. History of Photography. 3 Credit Hours.

A study of photography as a visual medium of expression and communication: a chronological examination of its origins, styles and uses.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARH 131. Survey of Western Art I. 3 Credit Hours.

The art of western cultures from pre-history through the Middle Ages.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARH 132. Survey of Western Art II. 3 Credit Hours.

The art of western cultures from the Renaissance through the 20th century.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ARH 220. Student Docent Practicum at the Lowe Art Museum. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARH 225. Introduction to Museum Studies. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 250. Special Topics In Non-European Art. 3 Credit Hours.

Special Topics in Non-European Art

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 260. Islamic Art. 3 Credit Hours.

Islamic art from the 7th to the 17th century including architecture, manuscript illumination, textiles, ceramics, and small-scale luxury objects. Study of Islam as a religious and political entity showing how the Islamic world defined itself in cultural creation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARH 270. Spanish Art. 3 Credit Hours.

A chronological study from prehistory to the present, addressing significant periods in Spanish art history, and establishing the unique characteristics of this art. How the effects of historical conditions (Islamic presence on the peninsula, American colonies, Franco) have defined Spain as distinct from its European neighbors.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 321. Andean Art. 3 Credit Hours.

South American art from formative times through the Incan empire and the Spanish conquest (A.D. 1521).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 325. Museum Studies Internship. 3 Credit Hours.

The Museum Studies internship is an independent study course in which the student works on educational projects or programs in a museum.

Prerequisite: ARH 131 or ARH 132. Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 326. The Art of South Asia. 3 Credit Hours.

The Arts of South Asia with selections from India and Thailand.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ARH 327. The Art of East Asia. 3 Credit Hours.

The Art of East Asia with selections from China, Korea, and Japan.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARH 332. Greek Art. 3 Credit Hours.

The art of ancient Greek civilization.

Prerequisite: ARH 131. Requisite: Two additional art history classes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 333. Roman Art. 3 Credit Hours.

Roman art from the 1st century B.C. through the 4th century A.D.

Prerequisite: ARH 131. Requisite: Two additional art history classes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 335. Early Christian and Byzantine Art. 3 Credit Hours.

Christian art from the second through the fifteenth centuries in Rome and the Byzantine Empire.

Prerequisite: ARH 131. Requisite: Two additional art history classes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 336. Medieval Art. 3 Credit Hours.

Western European art from the 4th through the 12th century.

Prerequisite: ARH 131. Requisite: Two additional art history classes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 337. Italian Renaissance Art. 3 Credit Hours.

The painting, sculpture, and architecture of Florence in the 15th century.

Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 338. Sixteenth Century Italian Art. 3 Credit Hours.

The painting, sculpture, and architecture of Italy in the 16th century.

Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 339. Northern Renaissance Art. 3 Credit Hours.

The painting of France and the Netherlands in the 14th and 15th centuries.

Prerequisite: ARH 132 or ARH 131.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 340. Baroque Art. 3 Credit Hours.

Art and architecture of the seventeenth century, focusing on major cultural centers in Europe and the Americas.

Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 341. Eighteenth-Century European Art. 3 Credit Hours.

European art from 1700-1820, including Rococo and Neoclassicism, ending with Goya in Spain.

Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 342. Nineteenth-Century European Art. 3 Credit Hours.

Neo-Classicism, Romanticism, Realism, Impressionism, 1760-1900.

Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 343. Modern Art. 3 Credit Hours.

Cezanne to Surrealism. Primarily European Art c. 1880-1940 in the context of the development of Modernism and its aesthetic theories. Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 344. Contemporary Art. 3 Credit Hours.

American and European Art from the Second World War to the present in its social, political, and theoretical contexts.

Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARH 346. History of Graphic Design. 3 Credit Hours.

Evolution of Graphic Design from the invention of writing through the twentieth century concentrating on contemporary themes and technical innovations.

Prerequisite: ARH 131 or ARH 132.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 347. Special Topics in Art History. 3 Credit Hours.

Prerequisite: ARH 131 or ARH 132.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 349. Special Topics in Art and the Law. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 357. Critical Issues in the History Photography. 3 Credit Hours.

The history and theory of photography in visual culture and an exploration of debates regarding how this medium of mass communication has transformed our perceptions and conceptions of art, society, and culture over the past two centuries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 360. Art and Cinema. 3 Credit Hours.

Exploration of the relationship between art, art history, and cinema.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 365. Latin American Modernism. 3 Credit Hours.

The art and theories of Latin American Modernism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 385. Studies in Art History. 1-3 Credit Hours.

Art History studies taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ARH 405. Special Topics In Medieval Art. 3 Credit Hours.

Changing topics in Medieval Art.

Prerequisite: ARH 131. Requisite: Two additional art history classes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 407. Special Topics: Renaissance and Baroque Art. 3 Credit Hours.

Seminar on changing topics in Renaissance and Baroque Art.

Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 408. Special Topics In Modern Art. 3 Credit Hours.

Seminar on changing topics in Modern Art.

Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 409. Special Topics in Contemporary Art. 3 Credit Hours.

Seminar on changing topics in contemporary art.

Prerequisite: ARH 132. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 411. Special Topics: Museum Studies. 3 Credit Hours.

Seminar on changing topics in Museum studies.

Prerequisite: ARH 225. Requisite: Two additional art history courses.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 505. Problems in Art History. 3 Credit Hours.

A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 506. Problems in Art History. 3 Credit Hours.

A means by which the student of advanced standing may investigate areas of a specialized nature, or those which are not offered as a regular part of the curriculum. Course content will be decided in joint conference between student and instructor.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 507. Museum Studies Seminar. 3 Credit Hours.

The museum as an institution and as a site for the construction of knowledge. Students will also explore the relationship between museums and academia.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 508. Museum Exhibition. 3 Credit Hours.

Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 509. Museum Internship. 1-3 Credit Hours.

UM sponsored internship with Miami-area museum.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 510. Arts Administration Internship. 1-3 Credit Hours.

UM sponsored internship with Miami-area arts institution.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 511. Artlab @ The Lowe. 3 Credit Hours.

Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.

Prerequisites: ARH 131, ARH 132. Requisite: Two additional art courses and Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARH 530. Seminar in Art History. 3 Credit Hours.

Special topics in western and nonwestern art. Semester's topic will be announced.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 540. Seminar in The History of Museums and Collecting. 3 Credit Hours.

History of museums and collecting practices in western Europe and the United States from the sixteenth to the twentieth century.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 550. Seminar in Theory and Methodology in the History of Art. 3 Credit Hours.

Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 560. Seminar in Nineteenth and Twentieth Century Art. 3 Credit Hours.

Special topics including museum practices and theory, women's art and contemporary issues.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 570. Seminar in Non-European Art. 3 Credit Hours.

Special Topics in Non-European Art.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 598. Seminar in Contemporary American Art. 3 Credit Hours.

Issues in Art since 1960: Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ARH 605. Problems in Art History. 3 Credit Hours.

Components: LEC.

Grading: CNC.

Typically Offered: Fall & Spring.

ARH 606. Problems in Art History. 3 Credit Hours.

Components: LEC.

Grading: CNC.

Typically Offered: Fall & Spring.

ARH 607. Museum Studies Seminar. 3 Credit Hours.

The museum as an institution and as a site for the construction of knowledge. Students will also explore the relationship between museums and academia.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 608. Museum Exhibition. 3 Credit Hours.

Organizing an art museum exhibition, and participating in the installation. Writing and composing the catalogue.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 609. Museum Internship. 3 Credit Hours.

UM sponsored internship with Miami-area museum.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 610. Arts Administration Internship. 1-3 Credit Hours.

UM sponsored internship with Miami-area arts institution.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ARH 611. Artlab @ The Lowe. 3 Credit Hours.

Organizing an art exhibition at the Lowe Art Museum. Taught by a different faculty member each year.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ARH 630. Seminar in Art History. 3 Credit Hours.

Special topics in western and nonwestern art. Semester's topic will be announced.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 640. Seminar in The History of Museums and Collecting. 3 Credit Hours.

History of museums and collecting practices in western Europe and the United States from the sixteenth to the twentieth century.

Components: SEM.

Grading: GRD.

ARH 650. Seminar in Theory and Methodology in the History of Art. 3 Credit Hours.

Basic methodologies that inform the discipline of art history and an introduction to the key authors and ideas that have shaped and continue to shape how critics and art historians write about art.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 660. Seminar in Nineteenth and Twentieth Century Art. 3 Credit Hours.

Special topics including museum practices and theory, women's art and contemporary issues.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 670. Seminar in Non-European Art. 3 Credit Hours.

Special Topics in Non-European Art.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ARH 698. Seminar in Contemporary Art. 3 Credit Hours.

Issues in Art since 1960: Aesthetic theories and ideological issues generated in contemporary art as expressed in the writing of artists and art critics.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ARH 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ARH 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ARH 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

Atmospheric Science (ATM)

ATM 102. Introduction To Weather And Climate. 3 Credit Hours.

The structure, physics, dynamics and thermodynamics of the atmosphere. Weather, weather forecasting, climate and climate change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 103. Survey of Modern Meteorology. 3 Credit Hours.

Dynamics and thermodynamics of the atmosphere as they relate to contemporary issues in meteorology. Overview of numerical weather prediction techniques and new technologies for monitoring weather and climate. Open to majors or minors with permission of instructor.

Prerequisite: MTH 108.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 118. Current Weather Topics. 2 Credit Hours.

Weather-and Climate-related phenomena such as hurricanes, severe storms, global warming, and acid rain. (Notes and analysis materials provided)

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 220. Climate And Global Change. 3 Credit Hours.

The Earth's climate system and the role of natural and anthropogenic processes in shaping climate change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ATM 243. Weather Forecasting. 3 Credit Hours.

Application of physical principles to weather forecasting. Use and interpretation of computer-generated forecasting guidance products of the U.S. Weather Service.

Prerequisite: MSC 103, ATM 103, and MTH 108.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 265. Atmospheric Chemistry. 3 Credit Hours.

ATM 265 is focused on those aspects of environmental chemistry of most relevance to meteorology students. The class fulfills the American Meteorological Society (AMS) chemistry expectations for a Bachelor's Degree in Meteorology, and in addition, addresses further recommendations from the AMS. AMS expects knowledge of atomic structure and chemical bonding, and, of the properties of gases. Recommended 'beyond the basics' goals include air quality and environmental science applications. ATM 265 fulfills the chemistry requirement for the undergraduate meteorology program. Students interested in pursuing upper-level chemistry courses, including MSC 215 (Chemical Oceanography), and pre-med majors, are recommended to take CHM 111 to meet requirements for the Meteorology B.S. Degree.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 303. Atmospheric Observation. 3 Credit Hours.

Techniques for measuring meteorological variables at the ground and in the free atmosphere.

Prerequisite: ATM 103, and PHY 101 or PHY 205.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 305. Atmospheric Thermodynamics. 3 Credit Hours.

Equation of state; water vapor and moist air thermodynamics; phase changes and latent heat; buoyancy and atmospheric convection; thermodynamic diagrams. Prerequisites: PHY 205

Prerequisite: PHY 205.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 306. Advanced Principles In Broadcasting Meteorology. 3 Credit Hours.

Broadcast meteorology including the production of professional weather briefings and weather news for on camera delivery. Emphasis on accurately communicating complex meteorological concepts, use of computer graphics, and on-camera delivery.

Prerequisite: ATM 103. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 307. Introduction To The Physics Of Climate. 3 Credit Hours.

The physical mechanisms which govern the earth's climate and climate variability.

Prerequisite: MSC 305 and ATM 305.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 321. Scientific Programming In The Atmospheric Sciences. 3 Credit Hours.

An introduction to scientific programming in a linux environment using the FORTRAN 90/95 language with specific applications to Meteorology.

Prerequisites: CSC 120.

Prerequisite: CSC 120.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 371. Readings In Atmospheric Science. 1-2 Credit Hours.

Library research with faculty supervision. Bibliography to be submitted in preparation for laboratory and/or field research project.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

ATM 405. Atmospheric Dynamics I. 3 Credit Hours.

Derivation and scaling of the equations of atmospheric motion; hydrostatic and geostrophic balance; circulation and vorticity.

Prerequisite: ATM305.

Prerequisite: ATM 305 or MSC 305.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 406. Atmospheric Dynamics II. 3 Credit Hours.

Baroclinic and barotropic instability; boundary layer dynamics; mathematical principles of numerical weather prediction; maintenance of the general circulation.

Prerequisite: MSC 405 or ATM 405.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 407. Weather Analysis. 4 Credit Hours.

Three-dimensional analysis of synoptic-scale weather systems; application of the fundamental laws of atmospheric dynamics to observed weather patterns; practical questions of worldwide data exchange and display.

Prerequisite: ATM 305 or MSC 305.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ATM 409. Cloud Physics And Radiation. 3 Credit Hours.

Atmospheric radiation; absorption and scattering principles of remote sensing of the atmosphere; cloud microphysics; nucleation, coalescence, ice crystal growth, atmospheric electricity and lightning.

Prerequisite: MSC 305 and ATM 305.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ATM 411. Projects In Atmospheric Science. 1-3 Credit Hours.

Individual, independent research projects with faculty supervision. A formal written report is required.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

Biochemistry and Molecular Biology (BMB)

BMB 145. Introduction To Bmb Research. 2 Credit Hours.

Students will collaborate on a research project and learn valuable laboratory skills. The goal for this course is to make students "research-ready" through an active, inquiry-based, platform for developing core competencies in biology, genetics, BMB (biochemistry & molecular biology), bioinformatics, scientific discourse and ethics.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 151. Freshman Seminar. 1 Credit Hour.

Students acquire and discuss basic BMB information in a group project setting. Topics are identified by the instructor but refined in response to student interest and discovery. As students create a scientific review manuscript suitable for publication, they learn about the publication process, research ethics and politics.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 245. Introduction To Bmb Or Nutrition Research. 2 Credit Hours.

Students shadow a research assistant in the lab of a BMB faculty member and learn about the research projects and techniques used by the group. Students will assist in preparing reagents, conducting experiments, analyzing data and generating brief reports. Attendance in lab group meetings is expected. Students maintain a weekly online journal and will write a paper describing the research in the lab and proposing a research problem and approach to solve in BMB545.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 251. Sophomore Seminar. 1 Credit Hour.

Students acquire and discuss basic BMB information in a group project setting. Topics are identified by the instructor but refined in response to student interest and discovery. As students create a scientific review manuscript suitable for publication, they learn about the publication process, research ethics and politics.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 260. Introduction to Biochemistry and Nutrition. 3 Credit Hours.

The composition of food and the composition and functioning of a typical cell are described in chemical terms, leading to an understanding of how life processes such as digestion, and metabolism occur and are regulated at the level of individual molecule and reactions. Applications of biochemistry and nutrition are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 400. Principles Of Experimental Biochemistry And Molecular Biology. 2 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 401. Biochemistry For The Biomedical Sciences. 3 Credit Hours.

The biochemical composition, structure, and cellular metabolism of proteins, carbohydrates, lipids, and nucleic acids are rigorously described, emphasizing problem solving strategies required of biomedical field applications.

Prerequisite: CHM 201 or CHM 222.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 402. Principles Of Experimental Biochemistry & Molecular Biology. 2 Credit Hours.

An active, inquiry-based, platform for developing core competencies in biochemistry & molecular biology, making students "research ready".

Prerequisite: CHM 202 or CHM 221 or BMB 401.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 411. Readings In Bmb. 1 Credit Hour.

Students read and discuss one BMB primary research article each week and answer a set of questions meant to provoke critical evaluation of the work. The course introduces students to critical reading of the primary literature in BMB and is open to students at any level. Peer-mentoring and informal student-led instruction is central to the course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 417. Biochemistry of Food and Nutrition. 3 Credit Hours.

This course will provide thorough understanding of the role of different nutrients, their occurrence in food, uptake in the digestive system, transport in blood or lymph, uptake in cells, storage, function and metabolism and excretion. Biosynthesis of nutrients in plants and microorganisms will also be considered. The students will be taught how to gather information about the course topics.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 501. Senior Seminars. 1 Credit Hour.

Students attend seminars of their own choice, presented by either visiting/residing faculty or graduate/postdoctoral students on recent research topics in BMB or any other discipline in the basic biomedical sciences. Students write short reports on these seminars and critically evaluate the presentations. This course can be taken more than once.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 506. Biomedical Case Studies. 1 Credit Hour.

Students explore topics in BMB in the context of solving problems presented in a clinical/biomedical framework. Students work in small groups and independently to acquire, critically evaluate, synthesize and present information.

Prerequisite: CHM 201 or CHM 222.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 507. Protein Structure, Function, & Biology. 3 Credit Hours.

The physical characteristics and behavior of proteins are described, including structure, folding, dynamics, modifications, and interactions. In addition, experimental approaches to protein structure and function are addressed. Readings include both textbook assignments and current research articles, and a term paper is written and submitted for writing credit.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 509. Molecular Biology Of The Gene. 3 Credit Hours.

Biochemical processes involved in the flow of genetic information in both prokaryotes and eukaryotes are described, including DNA replication, repair, genetic recombination, RNA transcription and processing, protein synthesis, control of gene expression, cell differentiation, and recombinant DNA technology. Extensive classroom discussion is mandatory. Reading includes BMB primary research papers, course notes and a textbook.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 511. Topics In Bmb. 2-3 Credit Hours.

Students independently explore the literature in BMB with guidance by a BMB Faculty mentor. BMB primary research literature in an area of mutual interest to the student and the Faculty mentor (usually a content expert in that area) is discussed. Students prepare a paper or other appropriate product (e.g. computer software, a structural model, a dynamic simulation) for evaluation. Writing credit is available for papers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 519. Nutrition And Genetics. 3 Credit Hours.

The influence of nutrition on gene expression through modification of DNA and proteins in chromatin is described (i.e., epigenetics). Also, genetic variations, as well as the influence of bacterial flora of the digestive tract, are considered with respect to abilities to metabolize various dietary components. Students learn how to gather information about course topics and present their findings.

Components: LEC.

Grading: GRD.

BMB 545. Research Problems In Bmb. 2-3 Credit Hours.

Students actively participate in the research laboratory of a faculty mentor to work on an independent research project. Students develop abilities to formulate good questions and sound hypotheses, design practical experiments, collect and analyze useful data, and make justifiable conclusions. Students maintain a weekly online journal, write a paper, and present their research in the lab. Two semesters of BMB545 is required to write a thesis (pre-requisite for graduating with honors in BMB). Writing credit is available for papers.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 617. Readings in Molecular Biology. 1 Credit Hour.

Discussion of classical papers in molecular biology beginning with the concept of the gene and continuing into modern studies. Format consists of student presentations and group discussions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 645. Research Problems in Biochemistry, Cell and Molecular Biology. 2-3 Credit Hours.

Laboratory research problems in various areas of biochemistry, cell biology, and molecular biology, including literature search, experimental design, data gathering, and evaluation of results. This course is the mechanism by which graduate laboratory rotations are done in preparation for selection of Ph.D. mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 680. Research Ethics. 0 Credit Hours.

The NIH Guide for Grants and Contracts stipulates that Institutions receiving support for National Research Service Award Training Grants are required to develop a program in the principles of Scientific Integrity. This program should be an integral part of the proposed training effort. The University of Miami School of Medicine has chosen to respond to this requirement with this course. This course must be taken during the first semester in the Department or Program. This is a six-hour course and will be given in two sessions of three hours each.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 701. Research Journal Club.. 1 Credit Hour.

All registered BMB students must participate in the Journal Club/Seminar. Students are required to critically review published paper(s) of their choice and describe in detail the findings described therein. Senior students will present their own research.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 702. Biochemical Science Seminar. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BMB 709. Advanced Biochemistry and Molecular Biology. 3 Credit Hours.

This course is a continuation course for BMB 616. It covers essentially the same topics as BMB 616 but at a more advanced level. It brings the student to the forefront of research in Molecular Biology. The course material is discussed exclusively in the form of original research papers. Based on this experience, students are required to propose experimental approaches to biological problems and defend them.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BMB 710. Advanced Topics in Biochemistry. 1-5 Credit Hours.

Senior seminars designed to cover in depth recent developments in the field of biochemistry with the purpose of keeping advanced graduate students abreast with new theoretical and experimental findings. General subjects such as mechanisms of enzyme action, oxidative phosphorylation, active transport, metabolic controls and disorders, steroid biochemistry, and biochemical genetics are discussed. The detailed program is announced annually. Majors in Biochemistry and Molecular Biology are expected to take this course each semester in their second and third years.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BMB 714. Molecular Genetics. 2 Credit Hours.

This course deals with mechanisms and fundamental concepts of genetic inheritance. The first part of the course is devoted to the genetics of bacteria and bacteriophages. Topics include genetic complementation, recombination, suppression, transposition, conjugation, transformation, transduction, and regulation of prokaryotic gene expression. The second part of the course covers selected topics in eukaryotic genetics (including molecular genetics of yeast, mitochondria, Drosophila, mice and humans). Problem solving is emphasized in homework and exams. The objective of the course is to provide students with an appreciation of the value of molecular genetics as a tool they can use to solve a wide variety of problems in biomedical research.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 715. Structural Biology and Applications to Drug Discovery. 2 Credit Hours.

This course focuses on the relationships between structure and function in biological macromolecules, and how this knowledge has led to the discoveries of new drugs.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 716. Analysis And Prediction Of Gene Regulation And Protein Function. 4 Credit Hours.

This course will introduce to a diverse array of biophysical methods employed to study macromolecular interactions at structural, thermodynamic, hydrodynamic and kinetic level.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BMB 720. Research in Residence. 0 Credit Hours.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in BMB 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 731. Special Work. 1-3 Credit Hours.

Special work, lecture, or laboratory or a combination of these, as determined by advisor in accord with student's individual interest.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BMB 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BMB 830 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BMB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.

Components: DIL.

Grading: SUS.

BMB 850. Research In Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Biology (BIL)

BIL 101. Introductory Biological Science. 3 Credit Hours.

An introduction to life sciences for the non-major. Students with credit in BIL 150 may NOT take this course to fulfill the natural science requirement. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 102. Elementary Biotechnology. 3 Credit Hours.

Major aspects of the biotechnology field for the non-science major. Food biotechnology, enzymes, environmental biotechnology, transgenic animals and plants, analytical biotechnology and more. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 103. Introduction to Ecology. 3 Credit Hours.

Overview of ecological and evolutionary principles; Relationships of organisms to living and non-living aspects of their environment; human impact on ecosystems. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 104. Genetics and Society. 3 Credit Hours.

The impact of new knowledge in genetics and heredity on society, including a consideration of questions about the inheritance of I.Q. and behavior, racial differences, genetic screening, control of reproduction, genetic engineering, forensic applications. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 105. Biology of Plants. 3 Credit Hours.

Evolution and diversity of the plant kingdom; economic and cultural importance of plants to humans. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 106. Biology of Animals. 3 Credit Hours.

Evolution and diversity of the animal kingdom and the relationship between humans and other animals. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 107. Introduction to Evolution. 3 Credit Hours.

Processes and mechanisms of evolution. A scientific approach to the study of evolution by natural selection, concepts of fitness and adaptation, genetic and developmental bases of evolutionary change, how new species arise, major trends in evolution, extinction and human evolution. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 108. Molecular Journey To Being Human. 3 Credit Hours.

With a focus on the human species, students will explore the nature of DNA and proteins, the origin of life, RNA World hypothesis, the origins of human ancestors and modern humans, the recently-completed Human Genome Project, the genetic basis human diversity, and the ethics of using genetic knowledge to improve the quality of human life.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 109. Human Biology. 3 Credit Hours.

A survey of human anatomy and physiology and the relationship of our species to its environment and other species. Not for credit in the biology major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 112. Human Hereditary Disease. 3 Credit Hours.

An overview of genetics, emphasizing human traits and disorders and their effects on individuals, families, and society. Discover the beauty of human nature, and our knowledge of it, as you develop an understanding of human genetics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 113. General Biology Honors Seminar. 1 Credit Hour.

Special topics in biology correlated with BIL 150.

Corequisite: BIL 150.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

BIL 114. General Biology Honors Seminar. 1 Credit Hour.

Special topics in biology correlated with BIL 160.

Components: DIS.

Grading: GRD.

Typically Offered: Spring.

BIL 149. First Year Information. 1 Credit Hour.

First year seminar for incoming Biology majors. Facilitation and encouragement of development of critical thinking skills, proficiency in oral and written expression, and an ability to solve problems by integrating knowledge from different disciplines in Biology.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

BIL 150. General Biology. 4 Credit Hours.

Principles of biology at the cellular, genetic, and organismal levels of organization. Cell structure and function, energy transduction, biological information transfer, genetics, physiology.

Prerequisites: ENG 105 or MTH 107 or higher. Or Corequisites: ENG 105 or MTH 107 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

BIL 151. General Biology Laboratory. 1 Credit Hour.

A laboratory approach to applying the scientific method. Experimental design and hypothesis testing at the cellular and molecular level.

Corequisite: BIL 150.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Summer.

BIL 152. HHMI General Biology Laboratory.. 1 Credit Hour.

Laboratory exercises to accompany BIL 150. Students teams engage in two inquiry-based laboratory research projects, each lasting six weeks, per semester.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

BIL 160. Evolution and Biodiversity. 4 Credit Hours.

Mechanisms of evolution from an organismal perspective. Systematics, biodiversity, evolutionary theory and mechanisms with emphasis on the morphological, ecological, and behavioral adaptations of selected representatives of the Domains of living organisms.

Corequisite: BIL 161 or BIL 162.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

BIL 161. Evolution and Biodiversity Laboratory. 1 Credit Hour.

A laboratory approach to applying the scientific method. Experimental design and hypothesis testing at the organismal and ecological level.

Corequisite: BIL 160.

Components: LAB.

Grading: GRD.

Typically Offered: Spring & Summer.

BIL 162. HHMI Evolution And Biodiversity Laboratory.. 1 Credit Hour.

Laboratory exercises to accompany BIL 160. Student teams engage in two inquiry-based laboratory research projects, each lasting six weeks, per semester.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BIL 175. First Year Seminar in Biology. 1 Credit Hour.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**BIL 178. Community Science: Autism. 3 Credit Hours.**

Student citizens in both science and communication will collaborate on content intended to reach audiences on multiple platforms. Students will be exposed to both history and cutting edge research surrounding Autism Spectrum Disorder, as well as the neuroscience and genetic basis of autism spectrum disorders. Students will connect with people in the local community, to lend these issues a face and context. Information from readings, experts at the University of Miami, and the larger South Florida Community. Students will work in teams to share expertise from their fields of study to generate content for community consumption.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**BIL 190. Studies in Biology. 1-5 Credit Hours.**

Special topics taken at other institutions with no direct equivalents.

Components: LEC.**Grading:** GRD.**BIL 194. Studies in Biology. 1-5 Credit Hours.**

Special topics taken at other institutions with no direct equivalents.

Components: LEC.**Grading:** GRD.**BIL 195. Studies in Biology. 1-5 Credit Hours.**

Special topics taken at other institutions with no direct equivalents.

Components: LEC.**Grading:** GRD.**BIL 212. Human Genetics. 3 Credit Hours.**

A review of genetics, emphasizing human traits and disorders and their effects on individuals, families, and society. After briefly reviewing cellular and reproductive biology, we will explore genetics more deeply while examining the implications of genetic processes and heredity patterns for human health. We will then examine the genetic basis of human evolution, finishing the semester with a discussion of genetic technologies and their implications for human welfare.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**BIL 220. Evolution and Disease. 3 Credit Hours.**

Evolutionary insights on the origins and emergence of diseases, drug resistance, and how diseases have shaped human evolution.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**BIL 221. Biology of Birds. 4 Credit Hours.**

General biology of birds, field identification, natural history and migrations of southern Florida species. Lecture, 2 hours; laboratory, 3 hours; 4 field trips, 6 hours each. Binoculars required.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**BIL 226. General Botany. 3 Credit Hours.**

Survey of the plant kingdom, including evolution, plant diversity, reproduction, structure, function and ecology.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**BIL 227. General Botany Laboratory. 1 Credit Hour.**

Laboratory exercises to accompany BIL 226.

Prerequisite: BIL 226. Or Corequisite: BIL 226.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**BIL 228. Medical Botany. 3 Credit Hours.**

History of medical botany, approaches to health by different cultures, separation and identification of secondary compounds and mechanisms of action. Molecular and physiological action of different secondary compounds in the treatment of common western ailments. In vivo identification of local medicinal plants.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**BIL 230. Introduction to Marine Biology. 3 Credit Hours.**

The sea as an environment. Marine life, its special problems and adaptations. Emphasis on Caribbean organisms. Lecture, 3 hours. Identical to Marine Science 230.

Corequisite: BIL 231.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**BIL 231. Introduction to Marine Biology Laboratory. 1 Credit Hour.**

Experimental laboratory exploring ecology, physiology and behavior of marine organisms in southern Florida marine habitats. Exercises cover laboratory techniques in behavior, functional morphology, productivity, fisheries research, osmoregulation and community ecology.

Corequisite: BIL 230.

Components: LAB.**Grading:** GRD.**Typically Offered:** Fall.**BIL 244. Hormones And Behavior. 3 Credit Hours.**

A comparative approach to the relationship between hormonal mechanisms and behavior in both animal model systems and humans. An introduction to the endocrine system, sex differences in behavior, parental behavior, hormones and social behavior, learning and memory, stress and affective disorders, interactions between brain, hormones and behavior from a historical perspective viewing the emergence of key theories.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**BIL 250. Genetics. 3 Credit Hours.**

The nature, organization, replication, expression, and evolution of the genetic materials.

Prerequisites: BIL 150, BIL 151, BIL 160, BIL 161.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.

BIL 251. Principles of Genetics Laboratory. 1 Credit Hour.

Laboratory exercises in genetics.

Prerequisite: BIL 250. Or Corequisite: BIL 250.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 252. HON: Honors Laboratory in Genetics. 2 Credit Hours.

Laboratory exercises in genetics.

Prerequisite: BIL 250. Or Corequisite: BIL 250.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BIL 255. Cellular and Molecular Biology. 3 Credit Hours.

Structure, molecules, and functions of cells.

Prerequisites: BIL 150, BIL 151, BIL 160, BIL 161.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 256. Cellular and Molecular Biology Laboratory. 2 Credit Hours.

Laboratory exercises in cellular and organismal biology involving current research techniques and applications.

Prerequisite: BIL 255. Or Corequisite: BIL 255.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BIL 258. Core Laboratory Techniques. 2 Credit Hours.

Conceptual and applied "methods" course in modern analytical techniques. It will expose students to the Department of Biology's three best-developed core laboratory facilities for imaging, molecular biology, and element analysis.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 259. Life In The Cell. 3 Credit Hours.

A comprehensive overview of the molecular biology of the cell, cells, and genomes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 267. Community Science: Autism. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 268. Neurobiology. 3 Credit Hours.

Neurons, organization of the nervous system, electrical properties of neurons, neurotransmitters, receptors, synaptic transmission, sensory and motor system, and complex brain functions.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 281. Undergraduate Learning Intern in Biology. 1 Credit Hour.

Undergraduate Learning Intern in Biology Students serve as peer mentors in a laboratory setting, assisting a graduate laboratory instructor in teaching basic biological concepts to first year undergraduates in BIL 151 and BIL 161.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 285. Special Topics in Biology. 3 Credit Hours.

Topics relevant to the biological sciences, co-listed with other departments or programs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 299. Seminar in Research Problems. 2 Credit Hours.

Discussion of current research of the Biology Faculty.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 311. Biostatistics. 3 Credit Hours.

Descriptive and inferential univariate and bivariate statistics applied to biological data. Probability, probability distributions, data description and presentation, hypothesis testing, decision making and experimental design. (Not open to students with credit in MTH 224, PSY 204 or equivalent).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 312. Biostatistics Laboratory. 1 Credit Hour.

Computer laboratory exercises to complement BIL 311.

Prerequisite: BIL 311. Or Corequisite: BIL 311.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 315. Marine Biota and Biogeochemical Cycles. 3 Credit Hours.

The diverse sources, transformations, and sinks of chemical constituents in the sea; distribution of dissolved and particulate materials in the sea. Role of marine organisms in marine biogeochemical cycling and the marine carbon cycle and its interaction with the terrestrial biosphere and atmosphere.

Prerequisite: MSC 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 316. Global Primary Production. 3 Credit Hours.

Photosynthesis supports the vast majority of life on planet earth. Although terrestrial and aquatic photoautotrophs share the same basic photosynthetic mechanisms, the physical environment and the fate of primary product on differ on land versus in the sea. This course reviews the magnitude and processes that shape primary production in terrestrial, oceanic, and freshwater habitats. It includes the fate of primary production in the earth's biomes, and the role of terrestrial and aquatic productivity in regulating, and responding to, variable climate.

Prerequisite: BIL 160.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 321. Invertebrate Zoology. 4 Credit Hours.

Biology of invertebrates, with emphasis on tropical and subtropical marine forms. Field work and combined lecture-laboratory sessions. Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 324. The Biology of Fishes. 3 Credit Hours.

Selected topics on the ecology and physiology of fishes. Lectures on reproduction, respiration, osmoregulation, sense systems, hormonal control.

Prerequisite: BIL 255 and BIL 360.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 330. Ecology. 3 Credit Hours.

The interactions of living organisms with each other and with their abiotic environment.

Prerequisite: BIL 250 or BIL 255, Calculus strongly recommended.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 331. Ecology Laboratory. 2 Credit Hours.

Lab and field exercises in ecology. Some Saturday field trips required.

Prerequisite: BIL 330. Or Corequisite: BIL 330.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 332. Tropical Ecology. 3 Credit Hours.

Tropical ecosystem including world distribution of tropical climate biogeographical regions, deserts and environmental factors, grassland and primary production, savannah population dynamics, energy flow, biogeochemical cycling, succession, and biodiversity of tropical ecosystem.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 335. Tropical Field Biology. 3 Credit Hours.

Intensive field study in the Costa Rican rainforest conducted during semester recesses with additional pre-trip lectures. Requires payment of trip costs.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 337. Coastal Ecology. 3 Credit Hours.

Unprecedented pressure from population growth, tourism, and resource exploitation of coastal ecosystems provides a theme for an overview of current coastal ecology, especially within a conservation and management framework. Hands-on learning in ecophysiology, coastal oceanography, integration of biological communities, and coastal wetland classification for tropical Florida and the insular Caribbean. Students will review and actively participate in water quality and environmental monitoring.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 343. Animal Communication. 3 Credit Hours.

Communication evolves and functions across species - from invertebrates to humans-to a vast range of acoustic, visual, and chemical signals. Investigate how physical constraints shape animal signals, how animals convey information through signaling, and how honesty is maintained in communication systems. Learn about signaling in a variety of behavioral contexts, including mate attraction, competition, and predation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 350. Survey of Marine Mammals. 3 Credit Hours.

The evolution and ecology of the cetaceans, pinnipeds, manatees, and allies: Natural history, zoo geography, physiology, husbandry, and biomedical aspects.

Prerequisite: BIL 150 and MSC 230.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 352. Techniques in Scanning Electron Microscopy. 3 Credit Hours.

Tissue preparation, use of the scanning electron microscope, photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BIL 353. Projects in Scanning Electron Microscopy. 2 Credit Hours.

Individual research projects in scanning electron microscopy. Six hours of laboratory.

Prerequisite: BIL 352.

Components: PRA.

Grading: GRD.

Typically Offered: Fall.

BIL 360. Comparative Physiology. 3 Credit Hours.

Animal and plant physiological processes such as homeostasis, energy budget, movement, sensation, and reproduction with emphasis on the organismal level.

Prerequisite: BIL 250 or BIL 255 or BIL 259.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 365. Endocrinology. 3 Credit Hours.

The endocrine glands and the chemistry, mechanisms of action, and physiological effects of hormones. Emphasis on vertebrate hormones, including clinical aspects of human endocrinology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 367. Biology Of Cancer. 3 Credit Hours.

A multifaceted exploration of human cancer biology from molecular, cellular, genetic, and histological perspectives, highlighting cellular homeostasis as a precarious life-and-death balancing act.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 369. Fundamentals of the Biology of Aging. 3 Credit Hours.

How and why we age. The biology of aging at the molecular, cellular, and organismal levels in a comparative and evolutionary context.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 371. Readings in Biology. 1 Credit Hour.

Independent readings on selected topics in biology under the supervision of individual faculty.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

BIL 372. Readings in Biology. 1 Credit Hour.

Independent readings on selected topics in biology under the supervision of individual faculty.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 374. Seminar in Biology. 1 Credit Hour.

Seminar on selected topics in biology.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 375. Seminar in Biology. 1 Credit Hour.

Seminar on selected topics in biology.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 376. Complementary and Alternative Medicine. 2 Credit Hours.

Almost 40% of Americans use health care approaches outside of mainstream Western medicine. These non-traditional approaches include acupuncture, meditation, massage therapy, reiki, yoga, hypnotherapy, chiropractic manipulation, and herbal medicine. Some of these approaches seem to hold promise in the healing process, while others have had little research to date. In this course, we will examine scientific evidence for the efficacy of these different approaches.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 381. Workshop Leaders in Biology I. 1.00 Credit Hour.

Peer-led Team Teaching of workshops for groups of BIL 150 students. May be taken once only for credit in the BIL major, but may be taken additional times for a general education credit. Students may serve as workshop leaders for a second time for a stipend if they (1) have taken the course once before and (2) are graduating seniors.

Components: DIS.

Grading: GRD.

Typically Offered: Fall.

BIL 382. Workshop Leaders in Biology II. 1.00 Credit Hour.

Peer-led Team Teaching of workshops for groups of BIL 150 students. May be taken once only for credit in the BIL major, but may be taken additional times for general education credit. Students may serve as workshop leaders for a second time for a stipend if they (1) have taken the course once before and (2) are graduating seniors.

Components: DIS.

Grading: GRD.

Typically Offered: Spring.

BIL 384. Special Laboratory Topics in Biology. 1-3 Credit Hours.

Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 385. Special Topics in Biology. 2-6 Credit Hours.

Topics relevant to the biological sciences, listed as subtitle. May be co-listed with other departments or programs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 390. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: SEM.

Grading: GRD.

BIL 395. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

BIL 399. "DNA And The Changing World". 1 Credit Hour.

This is an online course, not intended for biology majors. It covers in-depth knowledge of DNA, gene, gene function, genome and inheritance with the focus on applying the knowledge to real-world issues; both personal and societal, from the history of life to challenges and opportunities in the modern times at the molecular level. Does not count towards a Biology major or minor.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 402. Seminar In Biology. 1 Credit Hour.

Components: LEC.

Grading: GRD.

BIL 403. Neuroscience Laboratory. 4 Credit Hours.

Research methods and laboratory experiments in contemporary neuroscience from individual cells to behavior. Scientific writing and computer applications in experimental design and analysis. Combined lecture and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BIL 415. Coral Reef Science and Management. 3 Credit Hours.

Coral reefs as biophysical and socioeconomic systems. Coral reef typology, geomorphology; biotic and abiotic components of coral reef ecosystems.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 426. Native and Introduced Plants of the Galapagos. 3 Credit Hours.

Introduction to the unique vegetation and introduced flora of the Galapagos Islands in Ecuador. Current conservation measures used to control the threats affecting native flora, and future prospects for conserving indigenous plants and for ensuring their rational utilization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 432. Ecology in the Galapagos. 3 Credit Hours.

Organisms in relation to their environment, with focus on interactive, hands-on learning that connects empirical nature with abstract thinking. Lectures, discussion and fieldwork on ecosystem ecology, plant dispersal and colonization; organisms' responses to spatial and temporal variability in their environments, plant/animal interactions. Origins and effects of invasive species and actions of bio-control agents. Taught in the Galapagos as part of the UGalapagos semester.

Prerequisite: BIL 332.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 433. Conservation in Practice. 3 Credit Hours.

Intersection between economic development, science and conservation in one of the world's most pristine and fragile ecosystems, the Galapagos Islands. Exploration of how tourism offers an alternative to unsustainable fisheries that once drove the local economy, yet has created a new set of pressures on the people and the environment. Mitigation efforts, science, and international conservation mesh with an understanding of local politics, customs and cultures. Taught in the Galapagos as part of the UGalapagos semester.

Prerequisite: BIL 432.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 435. Origins, Ecology and Conservation of Insular Diversity. 1-3 Credit Hours.

Three-week field course in the Solomon Islands. Ecological and evolutionary processes that maintain and create biological diversity in tropical islands. Natural selection, island biogeography, phylogenetics, community assembly, predator-prey interactions, sexual reproduction, mating systems, and social behavior. On-site field surveys and experiments. Combined lecture and laboratory/field course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

BIL 441. Animal Behavior. 3 Credit Hours.

Mechanistic and evolutionary aspects of animal behavior. A survey of systems that illustrate the control, development and function of behavior in a variety of animals.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 451. Ethics and Genetics. 3 Credit Hours.

Pressing social, ethical, and legal issues raised by our constantly increasing knowledge of genetics, and the applications of this knowledge already available or being proposed. Access to and use of personal genetic information; race and genetics; the diagnosis and treatment of inherited diseases; new modalities of healthcare delivery through genetics; the current state of stem cell research; genetically modified animals and plants as sources of food, medicines, and fuel; and the use of genomics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 454. Biological Core Concepts Through Medical Case Studies. 2 Credit Hours.

A capstone course in which students will complete a series of medically-oriented case studies. Knowledge of biology, chemistry, math, and physics will be applied to real-world issues. Critical thinking will be used to solve basic medical problems, and facilitate understanding of the interdisciplinary nature of medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 455. Developmental Biology. 3 Credit Hours.

Principles of differentiation, morphogenesis and development. Critical analysis of the methods used to study these problems.

Prerequisite: BIL 250 or BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 456. Developmental Biology Laboratory. 2 Credit Hours.

Exploration of developmental genetics by exposing students to a variety of developmental biology experiments using microscopy, molecular biology, genetics and immunohistochemical techniques in three distinct model animals. Following a short series of introductory labs and lectures, students will develop a research proposal with the instructors and spend the remaining weeks of the semester working to complete their proposal under the guidance of the instructors. This class is restricted to students that have taken cell and molecular biology, developmental biology AND genetics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 468. Developmental Neuroscience. 3 Credit Hours.

Molecular, cellular, and physiological mechanisms controlling the proper development and function of neurons and neural circuits. Signaling mechanisms that regulate cell determination, proliferation, and differentiation. Neural migration and outgrowth, synaptic connectivity and plasticity, and neural basis of animal behavior.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 481. Undergraduate Teaching Assistant Training in Biology. 1-3 Credit Hours.

Training and teaching assistance for undergraduate workshops or laboratories, under the direct supervision of faculty. Specific topic is indicated by course subtitle. This course may be taken no more than twice for credit in the Biology major or minor, and if taken twice, teaching assistance must be for two different BIL courses. May be taken multiple times for general elective credit only.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 482. PRISM Teaching Fellow. 2 Credit Hours.

Undergraduate mentors to PRISM students, and teaching fellows to PRISM course instructors in biology.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 483. Civic Engagement In The Galapagos. 3 Credit Hours.

Biological and/or conservation projects in cooperation with citizens of the Galapagos.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 485. Special Topics in Biology. 2-6 Credit Hours.

Topics relevant to the biological sciences, co-listed with other departments or programs.

Components: DIS.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 491. Departmental Seminar in Biology. 1 Credit Hour.

Research seminars by distinguished biologists.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

BIL 492. Departmental Seminar in Biology. 1 Credit Hour.

Research seminars by distinguished biologists.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BIL 495. Projects in Biology. 2 Credit Hours.

Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 496. Projects in Biology. 2 Credit Hours.

Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 497. Projects in Biology. 2 Credit Hours.

Individual, original laboratory or field research supervised by a member of the department faculty and concluded by a formal written report.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 498. Senior Thesis. 2 Credit Hours.

Formal thesis preparation supervised by a member of the departmental faculty including a public oral defense and submission of the written document to the department.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 499. Research Colloquium. 1 Credit Hour.

Discussion of current research done by undergraduate students.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 511. Biometry. 3 Credit Hours.

Descriptive and analytical statistics as used in biology. Emphasizes sampling, presentation of quantitative data, probability theory applications, distributions, parametric and non-parametric test procedures.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 520. Evolution. 3 Credit Hours.

Evolutionary mechanisms and pathways: sources of hereditary variation, evolutionary forces, origins of adaptations, speciation, macro-evolution, origin of life and humankind.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 521. Systematics. 3 Credit Hours.

Concepts and methods in phylogenetic systematics. Lectures, discussions, and computer labs, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 523. Advanced Biology of Marine Invertebrates. 4 Credit Hours.

Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 525. Advanced Herpetology. 3 Credit Hours.

Systematics, biogeography, and evolutionary biology of amphibians and reptiles, with emphasis on modern families. Combined lecture and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 531. Advanced Field Ecology. 5 Credit Hours.

Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory/field, 10 hours on alternate Saturdays, plus research projects.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 532. Stable Isotope Ecology. 3 Credit Hours.

Stable isotope analysis applied to ecological questions such as nutrient cycling, photosynthesis and trophic level studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 535. Molecular Ecology. 3 Credit Hours.

Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA bar codes, and gene expression from a population biological perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 536. Molecular Ecology Laboratory. 1 Credit Hour.

Laboratory techniques, molecular tools, applications, and analysis methods commonly used by researchers in the areas of molecular ecology and population genetics.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 537. Ecosystem Ecology. 3 Credit Hours.

Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 539. Conservation And Protected Areas. 3 Credit Hours.

The science and policy of park planning and management will be explored through four case studies. The case studies will explore key concepts in ecology and population biology relating to loss of habitat, habitat fragmentation, invasive species, pollution and declines in population size.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 551. Population Genetics and Genomics. 3 Credit Hours.

Introduction to population genetics, which examines the evolutionary processes that affect the genetic composition of natural populations: mutation, genetic drift, natural selection, and gene flow. Theoretical and empirical aspects will be examined via mathematical models, methods of measuring genetic variation, and readings of published case studies. Taxonomic focus will be broad and will include both model organisms (e.g., *Drosophila*), and non-model organisms.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 552. Bioinformatics Tools. 3 Credit Hours.

Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure- function analysis and various applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 553. Biomedical Data Science. 3 Credit Hours.

Computational skills for analysis of genomic data sets. Basics of using a command line interface (text editor, Unix/Linux/iOSX), and logging into and getting started on Pegasus2. Python will be used to write scripts for downloading, manipulating, and analyzing data. File sharing and version control using github will be introduced at this stage, which will include RCR training. Analysis, interpretation, and presentation of Next Generation Sequencing data set (RNAseq, exome, or whole genome; public or their own). Interpreting and presenting results, to enable students to extract information from the data rather than just statistically analyze it.

Prerequisite: BIL 250.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 554. Electron Microscopy. 4 Credit Hours.

Techniques in transmission electron microscopy (TEM) including tissue preparation, use of the electron microscope, photography, and interpretation of micrographs. Lecture, 1 hour; laboratory, 6 hours.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

BIL 555. Projects in Electron Microscopy. 2 Credit Hours.

Individual research projects in transmission electron microscopy, 6 hours.

Components: PRA.

Grading: GRD.

Typically Offered: Spring.

BIL 556. Ecological and Evolutionary Genomics. 3 Credit Hours.

The evolution of genomes, and the ecological interactions that drive their evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 565. Evolution and Development. 3 Credit Hours.

Exploration of the relationship between common descent and biological diversity, principally changes in organismal development through time.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 568. Evolution and development of Nervous Systems. 3 Credit Hours.

Mechanisms/pathways/modules underlying formation of the nervous system during embryo development. How some properties of nervous systems have resisted change while others have diverged dramatically during evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 575. Advanced Special Studies in Biology. 1-6 Credit Hours.

Content of course will vary by semester. Content in any semester will be indicated via subtitle in the class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 591. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

BIL 592. Studies in Biology. 1-5 Credit Hours.

Special topics taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

BIL 610. Lab Group Meeting. 1 Credit Hour.

Weekly seminar meeting for discussion of research projects and other academic issues in graduate faculty research laboratories. (Fall semesters)

Components: DIS.

Grading: GRD.

Typically Offered: Fall.

BIL 611. Lab Group Meeting. 2 Credit Hours.

Weekly seminar meeting for discussion of research projects and other academic issues in graduate faculty research laboratories. (Spring semesters)

Components: DIS.

Grading: GRD.

Typically Offered: Spring.

BIL 612. Graduate Core. 3 Credit Hours.

A two-term sequence of modules addressing core principles across Biology in a format based on and fostering trans-disciplinary thought. Each module is one credit, taught dually by two faculty for 15 hours per module over a period of three weeks, and graded independently of other modules. Five modules are taught sequentially each term, for a total of ten credits for the academic year. Different modules may be offered in different years. (Fall semesters)

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 613. Graduate Core Module. 1 Credit Hour.

A two-term sequence of modules addressing core principles across Biology in a format based on and fostering trans-disciplinary thought. Each module is one credit, taught dually by two faculty for 15 hours per module over a period of three weeks, and graded independently of other modules. Five modules are taught sequentially each term, for a total of ten credits for the academic year. Different modules may be offered in different years. (Spring semesters)

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BIL 614. Professional Writing and Grantsmanship. 3 Credit Hours.

Elements of argumentative writing, reader-oriented writing strategies, fundability of submitted grants, and techniques for mastering presentation venues such as posters and talks.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 621. Systematics. 3 Credit Hours.

Concepts and methods in phylogenetic systematics. Lectures, discussions, and computer labs, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 622. Evolution. 3 Credit Hours.

Evolutionary mechanisms and pathways: sources of hereditary variation, evolutionary forces, origins of adaptations, speciation, macro-evolution, origin of life and humankind.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 623. Advanced Biology of Marine Invertebrates. 4 Credit Hours.

Detailed study of major phyla of marine invertebrates. Special emphasis on taxa found in waters off southern Florida. Field course. Lectures, laboratory, special projects, and seminars.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 625. Advanced Herpetology. 3 Credit Hours.

Systematics, biogeography, and evolutionary biology of amphibians and reptiles, with emphasis on modern families. Combined lecture and laboratory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 630. Population and Community Ecology: Theory. 3 Credit Hours.

Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 631. Advanced Field Ecology. 5 Credit Hours.

Principles of and practical experience in quantitative sampling of community structure, plant and animal populations, and animal activities. Emphasis on individual projects. Lecture, 3 hours; laboratory/field, 10 hours on alternate Saturdays, plus research projects.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 632. Population and Community Ecology: Theory II. 3 Credit Hours.

Classical and contemporary theory in population and community ecology including population dynamics, matrix models, life tables, predator-prey models and food webs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 633. Molecular Ecology Laboratory. 1 Credit Hour.

Laboratory techniques, molecular tools, applications, and analysis methods commonly used by researchers in the areas of molecular ecology and population genetics.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 634. Stable Isotope Ecology. 3 Credit Hours.

Stable isotope analysis applied to ecological questions such as nutrient cycling, photosynthesis and trophic level studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 635. Molecular Ecology. 3 Credit Hours.

Molecular markers and analyses, and their applications to different problems in biology. Appropriate sampling, methods for assessing genetic diversity and differentiation. Approaches to studying gene flow, tools for behavioral ecology, remote sampling, tracking individuals, and paternity analysis, hybridization and speciation, DNA bar codes, and gene expression from a population biological perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 636. Tropical Biology: An Ecological Approach. 8 Credit Hours.

The tropical environment and biota; ecologic relations, communities and evolution in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies. Lecture, laboratory, and fieldwork.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 637. Ecología de Poblaciones. 7 Credit Hours.

Theory and practice in field study of plant and animal populations in tropical ecosystems. Given in Spanish in Costa Rica under the Organization for Tropical Studies.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 638. Tropical Managed Ecosystems. 8 Credit Hours.

Application of ecological principles to problems in agriculture, forestry, conservation and natural resource management in the tropics. Conducted in Costa Rica under the Organization for Tropical Studies.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 639. Ecosystem Ecology. 3 Credit Hours.

Concepts and models of energy and nutrient flow, food webs, successional processes, human influences and effects of spatial heterogeneity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 649. Seminar in Behavior. 1 Credit Hour.

Discussion of current literature in animal behavior. This course may be repeated for credit.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

BIL 651. Population Genetics and Genomics. 3 Credit Hours.

Prerequisite: BIL 250 and BIL 255.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 652. Bioinformatics Tools. 3 Credit Hours.

Databases and tools of bioinformatics as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, protein structure- function analysis and various applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 653. Bioinformatics Algorithms. 3 Credit Hours.

The complexity of bioinformatics computations. Introduction to Perl and Bioperl. Pattern matching and sequence homology. Genome assembly. Transcription factor binding site recognition and motif finding, gene prediction, phylogeny, micro array analysis, RNA folding, gene design and synthesis.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 654. Electron Microscopy. 4 Credit Hours.

Techniques in transmission electron microscopy (TEM) including tissue preparation, use of the electron microscope, photography, and interpretation of micrographs. Lecture, 1 hour; laboratory, 6 hours.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

BIL 655. Techniques in Scanning Electron Microscopy. 3 Credit Hours.

Tissue preparation, use of the scanning electron microscope (SEM), photography, and analysis and manipulation of digital images. Lecture 1 hour; laboratory 5 hours.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 656. Ecological and Evolutionary Genomics. 3 Credit Hours.

The evolution of genomes, and the ecological interactions that drive their evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 665. Evolution and Development. 3 Credit Hours.

Exploration of the relationship between common descent and biological diversity, principally changes in organismal development through time.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 668. Evolution and development of Nervous Systems. 3 Credit Hours.

Mechanisms/pathways/modules underlying formation of the nervous system during embryo development. How some properties of nervous systems have resisted change while others have diverged dramatically during evolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 675. Advanced Study in Plant or Animal Sciences. 1-6 Credit Hours.

Content of course will vary by semester. Content in any semester will be expressed as course subtitle.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 678. Current Topics in Biological Research. 1 Credit Hour.

Content will vary by semester. Readings and discussions with eminent scholars temporarily resident in the department's Distinguished Visiting Professor program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 680. Research Ethics. 0 Credit Hours.

An interdisciplinary graduate course in compliance with The NIH Guide for Grants and Contracts, Vol. 18. No. 45, Dec. 22, 1989. A program in the principles of scientific integrity that forms an integral part of the proposed research training effort.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BIL 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her Master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BIL 820. Research in Residence. 0 Credit Hours.

Used to establish research in residence for the thesis for the Master's degree after the student has enrolled for the permissible cumulative total in BIL 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BIL 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of BIL 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BIL 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of BIL 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BIL 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Biomedical Engineering (BME)

BME 100. Introduction to Biomedical Engineering for Summer Scholars. 3 Credit Hours.

This introductory course is designed to expose high school students to biomedical engineering. The program is designed for the exemplary high school student interested in applied mathematics and science. The students will be provided with an understanding and some hands-on experience on topics relative to the discipline of Biomedical Engineering. The course content changes throughout the 3-week duration and includes topics on lasers, medical imaging, biomaterials, bioelectricity and biomechanics. The students will be able to understand the challenges associated with the design, testing and FDA clearance of biomedical devices and the importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with the design and testing of a bioelectric device. Summer Scholar Students only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

BME 111. Introduction to Engineering I. 3 Credit Hours.

Use of engineering tools for problem solving are discussed. Topics include the use of computer techniques for data acquisition, analysis, presentation, software design, computer aided drafting, and development of design skills through several design and building competitions. Introduction to professional ethics and intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 112. Introduction to Engineering II. 3 Credit Hours.

Introduction to biomedical engineering analysis, design, and manufacturing processes. Ethics, regulatory factors, and biomedical engineering design tools (mechanical, electrical and computer tools) are introduced. Hands on experience is provided through a project in which the students design, assemble, program, and test biomedical devices.

Prerequisite: BME 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 211. Introduction to programming for Biomedical Engineers. 3 Credit Hours.

This course will provide a comprehensive introduction to programming using MATLAB. The students will learn MATLAB functions for importing, analyzing, visualizing and exporting data, numerical computation, modeling and solving biomedical engineering problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 265. Medical Systems Physiology. 3 Credit Hours.

Human physiological processes from a bioengineering and medical point of view. Pertinent aspects of anatomy, biophysics, biochemistry, and disease mechanisms are also included.

Prerequisite: BIL 150, BIL 151, and CHM 112.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 302. Cellular Engineering. 3 Credit Hours.

Cellular engineering addresses issues related to understanding and manipulating cell structure-function relationships. This course is intended to bridge between cell biologists and engineers, to understand quantitatively cell biological aspects. Central to biomaterial and tissue engineering is our use of cells and our understanding of their interactions with their environment. It is important to understand how cells respond to external signals from their substrata or their milieu, how they move, and what they need in order to perform their desired function. Students are provided with an introduction to engineering principles and modeling at the cellular level. Of particular interest are cytomechanics, receptor/ligand binding, genetic engineering, enzyme kinetics, and metabolic pathway engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 305. Biomedical Technology. 3 Credit Hours.

Non-mathematical introduction to technical and clinical aspects of biomedical engineering. Biomedical signals and instrumentation, sensors, transducers, physiological measurements, laboratory instrumentation, implants, cardiac assist devices, radiology, ultrasound, CT, MRI, transmission, and scanning electron microscopy. Field trips to clinical and research laboratories are included. Open only to non-BME students.

Prerequisite: BIL 150 and CHM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 310. Mathematical Analysis in Biomedical Engineering. 3 Credit Hours.

Mathematical modeling of physiological and other biomedical engineering systems and devices. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological regulation and control in biosystems.

Prerequisite: MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 311. MATLAB for Biomedical Engineers. 1 Credit Hour.

Laboratory course for applications of Matlab in biomedical engineering. Upon the completion of this course, students will be able to write Matlab scripts to solve engineering problems and perform basic analysis and processing of biomedical signals. The course includes Matlab programming environment; Matlab variables; FOR, IF and WHILE statements, plotting and advance graphics, user defined functions, symbolic computation, data file management and graphical user interfaces. The course concludes with a final project focused in biomedical applications.

Prerequisites: ECE 118, BME 310. Or Corequisite: BME 310.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 312. Biomedical Statistics and Data Analysis. 3 Credit Hours.

The course will provide a comprehensive introduction to biostatistical models and methods, with applications in clinical trials research, observational studies, physiology, genomics and public health. Various examples will be solved using MATLAB and the results will be compared and discussed. A brief introduction to R will be provided.

Prerequisite: BME 211.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 320. The Evolution of Technology. 3 Credit Hours.

Organized and taught by an interdisciplinary team, this innovative course is designed for juniors and seniors. An experimental elective, the course uses multimedia to explore the ways in which innovation is driven by the needs of society and individuals, and nurtured by improvements in tools and production. Five broad subject areas will receive special attention: survival, communication, transportation, entertainment and medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 330. Foundations of Medical Imaging. 3 Credit Hours.

Physical and biological principles of medical imaging, including ultrasound, X-ray, nuclear, magnetic resonance, electrical impedance and optical imaging. Propagation and interaction of ultrasonic waves, light waves, X-ray photons, and nuclear radiation in hard and soft biological tissue. Corequisite: BME 310.

Prerequisite: BME 310. Or Corequisite: BME 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 335. Biomaterials. 3 Credit Hours.

Introduction to the field of Biomaterials. Review of materials science for four main types of biomaterials: ceramics, metals, polymers, and composites. Lectures on special topics given by guest lecturers who are active in their specific areas, under supervision of the instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 375. Fundamentals of Biomechanics. 3 Credit Hours.

Application of solid and fluid mechanics to describe the mechanical behavior of human motion, mechanical behavior of soft and hard biological tissues, cells and biofluids. Review of fundamental concepts and techniques of mechanics (stress, strain, constitutive relations).

Focus on mechanical properties of specific tissues, including tendon, skin, smooth muscle, heart muscle, cartilage, and bone. Cellular and biofluid mechanics will be presented.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 395. Undergraduate Research in Biomedical Engineering. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 399. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. May be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 401. Biomedical Design. 3 Credit Hours.

Planning Phase of an individual or group project for seniors, to be taken during the penultimate semester to graduation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 402. Senior Design I. 1-2 Credit Hours.

Completion of individual or group project for seniors, to be taken during the final semester before graduation. A total of 3 credits in this 401-402 sequence.

Prerequisite: BME 401.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 403. Senior Design II. 1 Credit Hour.

Completion of individual or group project for seniors, to be taken during the final semester before graduation.

Prerequisite: BME 402.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 440. Biomedical Measurements. 4.00 Credit Hours.

Introduction to the principles of measurements in physiological and biological systems, as well as a discussion of measurable parameters, transducers, sensors, signal conditioning, and processing. Laboratory experiments are conducted in parallel with the course.

Prerequisite: BIL 150 and BIL 151.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 450. Biomedical Transport Phenomena. 3 Credit Hours.

Fundamentals of transport phenomena in biological systems including diffusion, osmosis, convection, electrophoresis, and transport with binding. Applications to cell electrophysiology and drug delivery.

Introduction to physiological fluid flow in tissues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 460. Introduction to Physiological Fluid Mechanics. 3 Credit Hours.

The role of transport processes in biological systems, mathematical modeling of physiological fluid transport, conservation of mass and momentum rheology of blood flow in large and small vessels, approximation methods for the analysis of complex physiological flow, fluid flow in the circulation and tissue. Basic engineering principles and mathematical tools are covered for rigorous understanding of physiological fluid flow.

Prerequisite: BME 310 and PHY 206.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 470. Biomedical Signal Analysis. 3 Credit Hours.

Time and frequency description, analysis and processing of biophysical and physiological signals. This course covers analytical and computational tools for measuring, manipulating and interpreting signals fundamental to biomedical engineering. Fourier analysis, Fourier transform, data acquisition, averaging, digital filter design, discrete Fourier transform, correlation, convolution, coherence are discussed.

Prerequisite: BME 311. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 480. Biomedical Instrumentation. 3 Credit Hours.

Analysis and design of systems and electronic circuits in biomedical instrumentation including modeling and simulation of dynamic measurement systems and implementation of analog signal processing. The functional principles, operation, clinical context and technological trends of medical instrumentation systems used in clinical and research applications will be discussed.

Prerequisite: BME 440.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 501. Unified Medical Sciences I. 3 Credit Hours.

Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry and certain aspects of clinical medicine are unified with an emphasis on cellular and subcellular systems. Not open to BME undergraduates.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 502. Unified Medical Sciences II. 3 Credit Hours.

Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on cardiovascular, renal, digestive, endocrine, and reproductive systems. Not open to BME undergraduates.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 503. Unified Medical Science III. 3 Credit Hours.

Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on neural, sensory, and muscular systems. Not open to BME undergraduates.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 506. Computer Aided Design in Biomedical Engineering. 1 Credit Hour.

Laboratory course for computer based two and three dimensional drawing and design based on ProEngineer. Parametric design, parts, features, assemblies for complex modeling. Applications in biomedical engineering design.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 507. LabView Applications for Biomedical Engineering. 1 Credit Hour.

Laboratory course for computer based instrumentation and design based on Labview. Virtual instrumentation, data acquisition and display, GPIB instrument control, biomedical applications in biosignal recording, and monitoring are discussed.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 510. Introduction to Medical Robotics. 3 Credit Hours.

This course will discuss the basic principles of robotics and focus on its medical applications. The course integrates previously learned math, programming and imaging knowledge into an application platform to enable students to understand fundamentals of robotics methods in biology and medicine and to train students to build a robotics prototype through hands-on projects.

Prerequisite: BME 310, BME 311, and BME 330.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 512. Regulatory Control of Biomedical Devices. 3 Credit Hours.

Regulatory agencies and requirements, Food and Drug Administration, 510(k) and premarket approval (PMA), international regulatory requirements, ISO 9000 series, CE, UL, product and process validation, quality engineering, quality improvement programs, rapid prototyping, packaging and sterilization, and project management are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 520. Medical Imaging System. 3 Credit Hours.

Engineering and scientific principles of medical imaging systems. The concepts of instrumentation and diagnostic applications of different techniques and systems are presented. Demonstrations or exhibitions of medical systems are given in the visits to clinic and research laboratories. Topics include digital image and image processing fundamentals, radiographic (X-ray, CT), magnetic resonance (MRI) and radio-isotopic (PET) systems, and associated image reconstruction techniques. Basic concepts and simulation of imaging systems are emphasized.

Prerequisite: ECE 118 and ECE 201. Corequisite: BME 470 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 521. Medical Imaging Applications. 3 Credit Hours.

Medical applications of imaging systems and image processing techniques. Topics include image fundamentals (resolution, format, and storage), image processing fundamentals (transformation, compression, enhancement, segmentation, registration, and reconstruction), and image analysis fundamentals (calibration, quantification, correlation, linearity and depiction). Course includes dedicated computer laboratory projects and demonstrations given in clinical and research laboratories at the medical campus. Corequisite: BME 570 or equivalent.

Prerequisite: ECE 118 and ECE 201. Corequisite: BME 470 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 522. Scanning Electron Microscopy in Biomedical Devices. 3 Credit Hours.

Physics and operating principles of scanning electron microscope (SEM), transmission electron microscope (TEM), and optical light microscope. Biological tissue preparation, storage, fixation and digital image storage. Each student will learn to use the SEM in the design and/or analysis of a biomedical device.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 525. Special Problems. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 526. Special Problems. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 531. Technical Entrepreneurship I. 1 Credit Hour.

The first half of a two-semester sequence that simulates the work of a product development team to gain experience in technical entrepreneurship. The students propose product ideas, assess those collectively, select a few, form teams, define the product, and perform market analysis. The course is concluded with a business and technical development plan for the team's project. Lectures are presented on a variety of entrepreneurial topics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 532. Technical Entrepreneurship II. 2 Credit Hours.

The second half of a two-semester sequence that simulates the work of a product development team to gain experience in technical entrepreneurship. The students complete the development of a working prototype and refine their marketing and business plan based on experience gained during the development phase. Lectures are presented on relevant entrepreneurial topics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 535. Advanced Biomaterials. 3 Credit Hours.

Applications of biomaterials in different tissue and organ systems. Relationship between physical and chemical structure of materials and biological system response are discussed as well as choosing, fabricating, and modifying materials for specific biomedical applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 540. Microcomputer-Based Medical Instrumentation. 3 Credit Hours.

Principles and design of microcomputer-based biomedical instruments, analog and digital signal conversion, microcomputer hardware and software design, algorithm development for medical applications, medical signal processing with microcomputers, software safety in life support systems, and current applications are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 541. Medical Electronic Systems Laboratory. 2 Credit Hours.

Laboratory course for BME 540. Design of medical instruments integrated with microcomputers and telemetry devices. Corequisite: BME 540.

Prerequisite: BME 540.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 545. Biomedical Optical Instruments. 3 Credit Hours.

Introduction to geometrical optics, light sources, detectors, and fiber optics with an emphasis on engineering aspects and medical applications. Fiber-optic delivery systems for medical applications, optics of the eye and visual instruments, and optical instruments used in medicine (microscopes, endoscopes, ophthalmic instruments) are discussed. Hands-on sessions in the laboratory are included.

Prerequisite: PHY 207 and MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 546. Medical Applications of Lasers. 3 Credit Hours.

Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagation in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.

Prerequisite: PHY 207 and MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 555. Fundamentals of Computational Neuroscience. 3 Credit Hours.

Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.

Prerequisite: BME 265. Corequisite: BME 470.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 560. Biomedical Transport Phenomena. 3 Credit Hours.

Fundamentals of transport phenomena in biological systems including diffusion, osmosis, convection, electrophoresis, and transport with binding. Applications to cell electrophysiology and drug delivery. Introduction to physiological fluid flow in tissues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 565. Principles of Cellular and Tissue Engineering. 3 Credit Hours.

Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.

Prerequisite: BIL 150 and BME 335.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 566. Cell and Tissue Engineering Laboratory. 1 Credit Hour.

The principles of cell and tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques and integration of cells within biomaterials. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment. Tissue engineering topics include fabrication, biomaterials/scaffolds and cell integration, and functional assessment.

Corequisite: BME 565.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 570. Advanced Biomedical Signal Processing. 3 Credit Hours.

This course provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include quantitative description, analysis, on-line and real-time processing of biophysical and physiological signals (cardiovascular, neural, sensory, muscular, respiratory and other) using adaptive, learning, pattern recognition and data dimension reduction methods.

Prerequisite: ECE 118 and BME 470.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 571. Introduction to Biosignal Processing Lab. 1 Credit Hour.

Laboratory course in conjunction with BME 570 course. Corequisite: BME 570.

Prerequisite: BME 570. Or Corequisite: BME 570.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 575. Biomechanics II. 3 Credit Hours.

Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 581. Radiation Biology and Physics. 3 Credit Hours.

The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical models for radiobiological analysis. Corequisite or pererequisite: BME 502 or permission of instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 582. Radiation Therapy Physics. 3 Credit Hours.

The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a categorized dosimetric analysis of radiation therapy to different clinical conditions.

Prerequisite: BME 310 and BME 581.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 583. Radiation Protection. 3 Credit Hours.

This course covers radiation safety principles for all areas of clinical medical physics, including regulatory requirements for personnel, equipment and facilities and detailed structural shielding design requirements for medical facilities. The student will become proficient in practical aspects of radiation safety objectives and regulatory requirements in clinical practice, including those for patients, members of the general public and staff. Students will learn the principles for designing and installing structural shielding in clinical facilities that satisfies both regulatory requirements and clinical needs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 587. Finite Element Analysis for Engineers. 3 Credit Hours.

Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electro-magnetic, optical, and fluid flow problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 599. Cooperative Education.. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 601. Unified Medical Sciences I. 3 Credit Hours.

Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry and certain aspects of clinical medicine are unified with an emphasis on cellular and subcellular systems. Not open to BME undergraduates.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 602. Unified Medical Sciences II. 3 Credit Hours.

Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on cardiovascular, renal, digestive, endocrine, and reproductive systems. Not open to BME undergraduates.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 603. Unified Medical Science III. 3 Credit Hours.

Treatment of the basic biological and medical elements in physiological systems. The anatomy, physiology, biophysics, biochemistry, and certain aspects of clinical medicine are unified with an emphasis on neural, sensory, and muscular systems. Not open to BME undergraduates.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 606. Computer Aided Design in Biomedical Engineering. 1 Credit Hour.

Laboratory course for computer based two and three dimensional drawing and design based on ProEngineer. Parametric design, parts, features, assemblies for complex modeling. Applications in biomedical engineering design.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 607. LabView Applications for Biomedical Engineering. 1 Credit Hour.

Laboratory course for computer based instrumentation and design based on Labview. Virtual instrumentation, data acquisition and display, GPIB instrument control, biomedical applications in biosignal recording, and monitoring are discussed.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 610. Introduction to Medical Robotics. 3 Credit Hours.

This course will discuss the basic principles of robotics and focus on its medical applications. The course integrates previously learned math, programming and imaging knowledge into an application platform to enable students to understand fundamentals of robotics methods in biology and medicine and to train students to build a robotics prototype through hands-on projects.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 612. Regulatory Control of Biomedical Devices. 3 Credit Hours.

Regulatory agencies and requirements, Food and Drug Administration, 510(k) and premarket approval (PMA), international regulatory requirements, ISO 9000 series, CE, UL, product and process validation, quality engineering, quality improvement programs, rapid prototyping, packaging and sterilization, and project management are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 620. Medical Imaging System. 3 Credit Hours.

Engineering and scientific principles of medical imaging systems. The concepts of instrumentation and diagnostic applications of different techniques and systems are presented. Demonstrations or exhibitions of medical systems are given in the visits to clinic and research laboratories. Topics include digital image and image processing fundamentals, radiographic (X-ray, CT), magnetic resonance (MRI) and radio-isotopic (PET) systems, and associated image reconstruction techniques. Basic concepts and simulation of imaging systems are emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 621. Medical Imaging Applications. 3 Credit Hours.

Medical applications of imaging systems and image processing techniques. Topics include image fundamentals (resolution, format, and storage), image processing fundamentals (transformation, compression, enhancement, segmentation, registration, and reconstruction), and image analysis fundamentals (calibration, quantification, correlation, linearity and depiction). Course includes dedicated computer laboratory projects and demonstrations given in clinical and research laboratories at the medical campus. Corequisite: BME 570 or equivalent.

Components: LEC.

Grading: GRD.

BME 622. Scanning Electron Microscopy in Biomedical Devices. 3 Credit Hours.

Physics and operating principles of scanning electron microscope (SEM), transmission electron microscope (TEM), and optical light microscope. Biological tissue preparation, storage, fixation and digital image storage. Each student will learn to use the SEM in the design and/or analysis of a biomedical device.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 625. Special Problems. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 626. Special Problems. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 631. Technical Entrepreneurship I. 1 Credit Hour.

The first half of a two-semester sequence that simulates the work of a product development team to gain experience in technical entrepreneurship. The students propose product ideas, assess those collectively, select a few, form teams, define the product, and perform market analysis. The course is concluded with a business and technical development plan for the team's project. Lectures are presented on a variety of entrepreneurial topics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 632. Technical Entrepreneurship II. 2 Credit Hours.

The second half of a two-semester sequence that simulates the work of a product development team to gain experience in technical entrepreneurship. The students complete the development of a working prototype and refine their marketing and business plan based on experience gained during the development phase. Lectures are presented on relevant entrepreneurial topics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 635. Advanced Biomaterials. 3 Credit Hours.

Applications of biomaterials in different tissue and organ systems. Relationship between physical and chemical structure of materials and biological system response are discussed as well as choosing, fabricating, and modifying materials for specific biomedical applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 640. Microcomputer-Based Medical Instrumentation. 3 Credit Hours.

Principles and design of microcomputer-based biomedical instruments, analog and digital signal conversion, microcomputer hardware and software design, algorithm development for medical applications, medical signal processing with microcomputers, software safety in life support systems, and current applications are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 641. Medical Electronic Systems Laboratory. 2 Credit Hours.

Laboratory course for BME 540. Design of medical instruments integrated with microcomputers and telemetry devices. Corequisite: BME 540.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

BME 645. Biomedical Optical Instruments. 3 Credit Hours.

Introduction to geometrical optics, light sources, detectors, and fiber optics with an emphasis on engineering aspects and medical applications. Fiber-optic delivery systems for medical applications, optics of the eye and visual instruments, and optical instruments used in medicine (microscopes, endoscopes, ophthalmic instruments) are discussed. Hands-on sessions in the laboratory are included.

Components: LEC.

Grading: GRD.

BME 646. Medical Applications of Lasers. 3 Credit Hours.

Review of geometrical optics, fiber optics, wave optics, laser physics, and technology. Medical laser systems, optical properties of tissue, light propagation in tissue, laser-tissue interactions, and surgical applications of lasers are also covered. Hands-on sessions in the laboratory are included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 655. Fundamentals of Computational Neuroscience. 3 Credit Hours.

Major concepts include neural signaling and communication from the single neuron to system of neural ensembles and the role of neural computation in engineering applications. Theory and principles of information processing in the brain are presented. Experimental data and computer simulations are used to provide real examples for students experimentation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 660. Biomedical Transport Phenomena. 3 Credit Hours.

Fundamentals of transport phenomena in biological systems including diffusion, osmosis, convection, electrophoresis, and transport with binding. Applications to cell electrophysiology and drug delivery. Introduction to physiological fluid flow in tissues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 665. Principles of Cellular and Tissue Engineering. 3 Credit Hours.

Introduction to cellular and tissue engineering. Current therapeutic approaches for lost/damaged tissue or organ function, tissue engineering strategies to replace/repair tissue or function: infusion of cells, production and delivery of tissue-inducing substances, cells placed on or within biomaterial scaffolds, examples of tissue engineering applications: skin, heart muscle, blood vessels, and blood.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 666. Cell and Tissue Engineering Laboratory. 1 Credit Hour.

The principles of cell and tissue engineering will be presented in a hands-on laboratory experience. General techniques learned will include sterile methods, cell culture techniques and integration of cells within biomaterials. Cell engineering topics include cell cycle/metabolism, adhesion, signal transduction, and assessment. Tissue engineering topics include fabrication, biomaterials/scaffolds and cell integration, and functional assessment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 670. Advanced Biomedical Signal Processing. 3 Credit Hours.

This course provides an overview of advanced topics in biomedical signal processing with an emphasis on practical applications. Topics include quantitative description, analysis, on-line and real-time processing of biophysical and physiological signals (cardiovascular, neural, sensory, muscular, respiratory and other) using adaptive, learning, pattern recognition and data dimension reduction methods.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 671. Introduction to Biosignal Processing Lab. 1 Credit Hour.

Laboratory course in conjunction with BME 570 course. Corequisite: BME 570.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 675. Biomechanics II. 3 Credit Hours.

Applications of linear and nonlinear viscoelastic concepts to the biomedical characteristics of biological tissues and structures at small and large deformations of blood flow, experimental methods of analysis, artificial organs, and life-support systems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 681. Radiation Biology and Physics. 3 Credit Hours.

The principles, methods, and results of radiation biology with physics applications in radiation therapy will be introduced in the course. The course will focus on mechanisms of radiation and biological system interaction, biological aspects of the foundation of radiation therapy, and mathematical models for radiobiological analysis. Corequisite or prerequisite: BME 502 or permission of instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 682. Radiation Therapy Physics. 3 Credit Hours.

The principles and instrumentation of radiation dosimetry with focus on the applications in radiation therapy will be introduced in this course. The course will emphasize radiation dose computation algorithms and applications in treatment dose planning. The course will also cover a categorized dosimetric analysis of radiation therapy to different clinical conditions.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 683. Radiation Protection. 3 Credit Hours.

This course covers radiation safety principles for all areas of clinical medical physics, including regulatory requirements for personnel, equipment and facilities and detailed structural shielding design requirements for medical facilities. The student will become proficient in practical aspects of radiation safety objectives and regulatory requirements in clinical practice, including those for patients, members of the general public and staff. Students will learn the principles for designing and installing structural shielding in clinical facilities that satisfies both regulatory requirements and clinical needs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 687. Finite Element Analysis for Engineers. 3 Credit Hours.

Introduction to the finite-element method. Hands-on applications of FEMLAB software to the analysis of structural, thermal, chemical, electro-magnetic, optical, and fluid flow problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 699. Cooperative Education.. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 705. Master's Design Project I. 3 Credit Hours.

Comprehensive M.S. design project in biomedical engineering. Open to students in the BS/MS and MS programs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 706. Master's Design Project II. 3 Credit Hours.

Comprehensive M.S. design project in biomedical engineering. Open to students in the BS/MS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 713. Application of Computers in Medicine. 3 Credit Hours.

Applications in the clinical and medical research laboratories for physiological data acquisition, analysis, and management of patient records. Differences among computer systems and languages for clinical and research activities are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 722. Scanning Electron Microscopy Special Projects. 3 Credit Hours.

An advanced course for graduate students with basic skills in SEM. Course is open only to masters or Ph.D. students. Students will have an opportunity to do independent research under supervision of the instructor on special projects of interest that may be related to their field of study as long as it is not part of their thesis or dissertation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 723. Neural Engineering. 3 Credit Hours.

Biophysics of neural communication, quantitative electroencephalography and evoked potentials, sleep, seizure, anesthesia and intraoperative monitoring, neural stimulation, artificial and biological neural networks, cochlear and visual implants, brain and muscle stimulation.

Prerequisite: BME 503 and BME 570.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 724. Neuroengineering and Neurorehabilitation. 3 Credit Hours.

Advances in Neural Engineering have led to improved medical-device designs with novel functions. This course focuses on the engineering approaches, R&D advances, and the technical principles of NeuroMotor medical implants. Neural Engineering theory and applications from the perspectives of electronics design, neural signal analysis, and neurophysiology will be covered.

Prerequisite: BME 603.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BME 725. Special Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 726. Special Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 728. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 729. Advanced Medical Imaging. 3 Credit Hours.

Analysis of contemporary medical imaging systems and the associated technologies. The course focuses on principles of advanced medical imaging systems. Topics include multimodality imaging, three-dimensional image reconstruction and visualization, clinical and research applications, and derivation and comparison of algorithms.

Prerequisite: BME 520. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 731. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 732. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 735. Auditory and Visual Neural Systems. 3 Credit Hours.

Design and application of auditory and visual neural systems and devices for medical purposes. Methodologies and instrumentation using electrophysiological, psychophysical and other measurements are explored focusing on diagnostic and therapeutic applications.

Prerequisite: BME 603.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 740. Implantable Biomedical Devices. 3 Credit Hours.

Development and advances in implantable materials and devices especially those used as electrically driven prostheses. Topics include pacemakers, defibrillators, catheters, neurological stimulators, heart assist, bone repair, and other diagnostic and therapeutic devices. The historical, medical significance, business, economic, and technical aspects of these devices and the associated instruments for monitoring are discussed. Fundamentals of electrochemical corrosion and stimulation as well the technology of implantable power sources are reviewed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 745. Biomedical Optical Imaging and Diagnostics. 3 Credit Hours.

Review of geometrical optics, fiber optics, and tissue optics. Introduction to physical optics: interference, diffraction, and polarization; optical imaging resolution limits, super-resolution imaging, advanced optical microscopy, and optical coherence tomography (OCT). Imaging through scattering tissue, imaging and diagnostics with polarized light, fluorescence, infrared, and Raman spectroscopy and applications are also discussed. Optical diagnostics using scattered light: laser Doppler flowmetry, and dynamic light scattering; and opto-chemical and evanescent wave sensors are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 750. Advanced Biomedical Transport Phenomena. 3 Credit Hours.

Continuum mixture theory and applications to mass transport in biological tissues, hydrogels, and other porous media. Mechano-electrochemical coupling phenomena in biological tissues and cells.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 760. Fundamentals of Cellular and Tissue Engineering. 3 Credit Hours.

Principles and advanced topics on cellular and tissue engineering. Topics include biodegradable and non-biodegradable biomaterials, cytokines, the traditional and stem cell-based tissue engineering approaches, bioreactors and special topics such as bone, cartilage and other tissues.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BME 780. Biomedical Engineering Seminar. 1 Credit Hour.

Presentation of biweekly seminars by selected speakers and graduate students on current topics of interest in biomedical engineering. Attendance is required of all students registered in the PhD program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BME 781. Radiation Dosimetry And Physics. 3 Credit Hours.

Application of radiation physics in the field of radiation therapy. The course will cover the relevant subjects of modern physics, the basic modalities and basic instrumentations of radiation therapy, the principles of particle transport and radiation dose computation and quality assurance of radiation therapy instruments. The subject of radiation protection will also be discussed.

Prerequisite: BME 582. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 783. Radiation Therapy Physics Clinical Rotation. 3 Credit Hours.

Students will observe clinical activities at a designated radiation therapy center for ten hours per week. Rotation includes observation of daily treatment, simulation, dose planning, physics quality assurance and routine physics support activities (special physics consultation, weekly physics chart check, monitoring radiation safety activities, support of brachytherapy procedures). Students will meet with the course instructor one and a half hours/week to discuss the schedule and the progress of the rotation activities. Students need to submit reports on each radiation therapy category.

Prerequisite: BME 582. Or Requisite: Permission of Instructor.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 784. Medical Physics Journal Club. 1 Credit Hour.

The course aims to keep track of recent developments in the field of Medical Physics for therapeutic and diagnostic purposes in oncology through reading, discussion and presentation of identified scientific papers from the major journals of Medical Physics among enrolled students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BME 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BME 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in BME 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BME 830. Pre-candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of BME 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BME 840. Post-Candidacy Doctoral Dissertation. 1-13 Credit Hours.

Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in BME 740 may be taken in a regular semester, nor more than six credits in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BME 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Biostatistics (BST)

BST 610. Introduction to Statistical Collaboration. 4 Credit Hours.

This course will introduce students to the art of statistical collaboration. The class will be highly interactive and will include an orientation to the process of statistical collaboration, individual and group assessment of the same consulting projects, and the completion of an individual "live" statistical collaboration project. For the final, live collaboration project, students will meet with the faculty and/or staff of the University of Miami who contributed their particular assigned consulting project(s). Students will need to research different statistical methods to find the best, feasible approach to address the particular consulting project. Students will present their plans for their own consulting projects in class and also help in the discussion/exploration of approaches for other student's consulting projects during class time. After finalization of the analysis plan the student will complete the statistical analyses described within the plan and create a final report.

Components: LEC.

Grading: SUS.

Typically Offered: Fall & Spring.

BST 625. Survey Of Statistical Computing. 3 Credit Hours.

This three credit course aims to familiarize students with the basic use of SAS and R for routine statistical analysis and prepare them for more advanced courses and/or thesis research. Statistical computation will be illustrated with examples in medical research, biological study and business. The focus of the course is on the computing environment, therefore a thorough discussion of statistical theories will not be provided. It is expected that students will already be prepared statistically.

Components: LEC.

Grading: SUS.

Typically Offered: Spring.

BST 630. Longitudinal and Multilevel Data. 3 Credit Hours.**Components:** LEC.**Grading:** SUS.**Typically Offered:** Fall.**BST 640. Modern Numerical Multivariate Methods. 3 Credit Hours.**

This course covers multivariate topics from both a classical as well as modern perspective. Topics to include: Multivariate Normal Distribution; Spectral Decomposition; Principal Component Analysis; Canonical Correlation Analysis; Newton's Method; Steepest Descent; Gradient Boosting; Coordinate Descent Algorithms; Trees; Forests; Discriminant Analysis. The R programming language (<http://www.r-project.org>) will be used extensively throughout the course for computation and statistical analysis.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**BST 649. Advanced Individual Study. 1-3 Credit Hours.**

Individual work on a special project under faculty guidance.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**BST 650. Topics in Biostatistical Research. 1 Credit Hour.****Components:** LEC.**Grading:** SUS.**Typically Offered:** Fall & Spring.**BST 660. Spatial Statistics. 3 Credit Hours.****Components:** LEC.**Grading:** CNC.**Typically Offered:** Fall.**BST 665. Design And Analysis Of Clinical Trials. 3 Credit Hours.**

This first part of this course is an advanced treatment of the key ideas undergirding the design and analysis of contemporary clinical trials.

By the end of the course, students will have learned the statistical foundations of Phase I, II, and III trials from the standpoint of classical Frequentist, Bayesian, and adaptive designs. In addition, students will learn the usual mechanisms for preparing a clinical trial protocol, data safety and monitoring, interim analysis, and proper close out of a trial.

Components: LEC.**Grading:** CNC.**Typically Offered:** Fall.**BST 670. Bayes Data Analysis: Theory And Computing. 3 Credit Hours.**

This first part of this course is an advanced and comprehensive treatment of the foundations of Bayesian theory. Beginning with the Bayesian alternative to sampling theory, the course covers Savage's axioms, the standard Bayesian inference procedure, subjective Bayes interpretation and prior selection, the minimax and complete class theorems, a variety of Bayesian principles (likelihood, stopping time etc.), and a selection of standard parametric and non-parametric examples.

The second part focuses on the computational implementation of Bayesian inference, namely Gibbs sampling, Metropolis-Hastings, and other Markov-Chain-Monte Carlo techniques for obtaining the posterior and posterior quantities. Computational examples will be illustrated using R and WinBUGS. Special topics will include approximate Bayes computing (ABC) and particle methods.

Components: LEC.**Grading:** CNC.**Typically Offered:** Spring.**BST 675. Introduction To Generalized Linear Models. 3 Credit Hours.**

GLM's are an extension of the standard linear model to permit more general outcomes. In this class, we will study GLM's in detail. By the end of the course, we will examine recent extensions of GLMs. We will provide a unifying framework for formulation, estimation and inference. Throughout the course, real data applications from medicine will be used and extensive use of the R programming language will be made to implement ideas discussed.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**BST 680. Advanced Statistical Theory. 3 Credit Hours.**

The first part of this course is a searching treatment of many of the key ideas undergirding hypothesis testing and estimation. In particular, several of the main theorems in mathematical statistics will be stated and proved in full detail. By the end of the course, students will have acquired enough background material for the treatment of a special topic, through a mix of lectures and assignments. Topics will include asymptotic expansions, information theory and non-parametrics.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**BST 690. Theory Of Survival Analysis. 3 Credit Hours.**

Survival analysis is an important tool of statistic with many applications. In this course, without losing sight of such applications, we will give special emphasis to the probabilistic foundations, in terms of counting processes and martingales. Topics include: Failure time models, inference in parametric models, Cox models, counting processes and martingales, likelihood, competing risks and analysis of recurrent event data. The R programming language will be used.

Prerequisite: MTH 524, MTH 525, and BST 680.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**BST 695. Special Topics. 3 Credit Hours.**

The course is designed to allow the listing of special topics within the Division of Biostatistics degree programs and cross list topics with other department's offerings.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**BST 698. Major Paper. 3 Credit Hours.**

The student is working on their culminating project for the degree. The student is expected to explain a collection of related methods in some branch of statistics, use several of them to solve a motivated problem, explaining and contrasting the results. A faculty advisor and second reader are required.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**BST 699. Thesis Project. 1-6 Credit Hours.****Components:** LEC.**Grading:** CNC.**Typically Offered:** Fall, Spring, & Summer.

BST 830. Doctoral Dissertation (pre-candidacy). 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BST 730 may be taken in regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BST 840. Doctoral Dissertation (Post-Candidacy). 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credits as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of BST 740 may be taken in regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BST 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the PhD. after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Business (BUS)

BUS 100. Fundamentals in Business. 3 Credit Hours.

We will expose students to the fundamental activities of the functional areas of business.

Components: LEC.

Grading: GRD.

BUS 101. First Step (Freshman Integrity, Responsibility, and Success through teamwork). 3 Credit Hours.

This course is designed to provide entering freshman business majors an enriched curriculum that examines key issues in the global business environment and emphasizes the importance of ethical business practices. The course culminates with a team project that encourages students to address real world problems and encourages a lifelong commitment to civic engagement.

Requisite: School of Business Administration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BUS 150. Business Analytics. 3 Credit Hours.

The primary purpose of this course is to build skills in learning and using software technologies to support business-oriented problem solving and decision making. Specifically, you will develop the ability to solve problems, to organize and analyze data using spreadsheet and database software, and to learn to distribute information to others through the effective use of collaborative technologies and the Web. Case problems will cover areas such as accounting, finance, marketing, statistics and operations management. Professors from several business school departments will discuss how their disciplines use spreadsheets to solve problems.

Requisite: School of Business Administration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 155. Exploration of Faculty Research in SBA. 1 Credit Hour.

Students will be exposed to some of the SBA's top faculty researchers to learn more about research opportunities and styles of research methodologies within business.

Components: LEC.

Grading: CNC.

Typically Offered: Offered by Announcement Only.

BUS 200. Introduction To Business. 3 Credit Hours.

Businesses today operate in an exceedingly complex environment. Such factors as commodity prices, labor and capital markets, as well as trends in tastes and preferences are constantly changing. This course will explore many of the key issues facing business decision makers in the contemporary environment, including an introduction to business ethics and corporate social responsibility. The course will take an interdisciplinary perspective, touching on essentially all of the business functions including economics, finance, accounting, marketing, management, and business communications. Using approaches from different business disciplines, students will gain insight into the structures and systems of business, as well as the strategies that firms use to compete effectively in the global business environment. BUS200 serves as the foundational course for the Business Cognate in People & Society, and it is offered for Gen Ed credit only.

Requisite: Non Business Majors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 201. Money. 3 Credit Hours.

Financial decisions are at the heart of success in today's economy. Thus, financial literacy and the ability to manage personal finances is increasingly important. This GENERAL EDUCATION course delivers a comprehensive introduction to savings and borrowing, investments, and insurance, including such topics as budgeting, banking and consumer credit, the purchase of residential real estate, planning for retirement, starting a business, and understanding basic financial statements. Not for credit toward any business major or minor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 202. Introduction To The Legal Environment Of Business. 3 Credit Hours.

Prerequisite: BUS 200.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 203. Managing Effectively: A Skills Development Approach. 3 Credit Hours.

Prerequisite: BUS 200.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 206. PRINCIPLES OF INTERNATIONAL BUSINESS. 3 Credit Hours.

This course is designed to provide nonbusiness students with an understanding of what global business is, in particular how international business is conducted across countries with different sets of formal and informal institutions. It also addresses the issues facing multi-national corporations and the factors influencing their success or failure globally.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 255. Business & Society: Inquiry + Discourse. 2 Credit Hours.

This seminar will explore the relationships between business firms and their regulatory, ethical, political, cultural, and social environments. Students will be exposed to a wide range of source materials and academic activities, with the objective of developing their capacity for principled professionalism.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

BUS 300. Critical Thinking & Persuasion for Business. 3 Credit Hours.

The modern businessperson faces a constantly evolving environment and must be able to confront and respond to an array of business issues. At the heart of an effective response is a critical, comprehensive analysis coupled with the ability to meaningfully and persuasively communicate that assessment and recommendations to a variety of constituencies.

This course prepares business students for this by exposing them to a three-step process of problem solving in which they critically analyze the problem, and then communicate their analysis both in writing and orally.

Prerequisite: ENG 106 with a C or better.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 498. Special Topics In Business. 1-3 Credit Hours.

Topics in selected areas of Business

Components: LEC.

Grading: GRD.

BUS 499. Special Topics. 3 Credit Hours.

Prerequisite: BUS 300.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BUS 600. Fundamentals of Critical Thinking and Effective Writing. 1 Credit Hour.

Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical issues, developing reasoned positions, and making compelling written arguments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BUS 601. Mba Math Module. 3.00 Credit Hours.

This course provides the student with the necessary mathematical skills to progress toward an MBA degree. The course begins with a review of algebra and continues with the fundamentals of differential and integral calculus. The focus is on applying these concepts in solving business problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 602. Critical Thinking and Effective Writing. 1 Credit Hour.

Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical questions, developing reasoned positions, and making compelling written arguments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BUS 603. Critical Thinking and Effective Speaking. 1 Credit Hour.

Builds on critical thinking and writing skills acquired in BUS 602. Topics include oral persuasion, prepared and impromptu speeches and dealing with the media, defending one's view before adversarial audiences, display of data, and effective use of visual aids.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 604. Career Development and Enrichment. 1.00 Credit Hour.

This course will expose students to a variety of academic and industry career lectures, events, and workshops to enhance their MBA experience. The focus is to establish added-value to an MBA student through real world and relevant access to information and resources beyond the traditional curriculum.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

BUS 605. Residential Session Abroad. 1-6 Credit Hours.

One two-week session of the Global Executive MBA program is held abroad. During this corporate and international experience students attend lectures and institutional visits. This experience exposes students to other cultures and different perspectives on business issues, and widens international networking opportunities.

Components: LEC.

Grading: SUS.

BUS 628. Multidisciplinary Action Projects. 2-4 Credit Hours.

The Multidisciplinary Action Projects core course (MAP) places students with organizations throughout the world to address pressing organizational challenges. Students work in teams with guidance from faculty advisors to develop actionable and valuable recommendations for sponsors. For students, MAP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. MAP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges. For sponsoring organizations, MAP offers access to a high-caliber team of 4-6 students, the latest business concepts and tools, an external viewpoint, and rapid turnaround. The ultimate deliverable to the sponsor from a MAP project is a set of actionable, data-driven recommendations. MAP projects are based on sponsor needs and address a wide range of business issues – from identifying new processes and improving existing operations to launching new products and targeting new growth opportunities. Sponsors come from many different industries – from alternative energy to business process outsourcing to consumer products to financial services to healthcare to real estate to telecom. Sponsoring organizations may be large corporations, small entrepreneurial start-ups, or non-profit organizations. While each MAP project is different in context, all have essential features in common. All confront students with a real business challenge of significant importance and no existing solution. All require applying concepts and tools from multiple disciplines to successfully complete. All require dynamic sense-making, fact-based decisions, and high-performance teamwork. All unfold in unpredictable ways. All conclude with teams presenting actionable recommendations to project sponsors and faculty advisors.

Components: EXP.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 630. Fundamentals Of Economics, Accounting And Finance. 4 Credit Hours.

This course provides an overview of business economics, accounting, and finance. Economic themes primarily focus on microeconomic topics such as demand, supply, elasticity, and forms of competition. Accounting concepts include corporate financial statements, cost-volume-profit analysis, and traditional and activity-based cost accounting. Finance topics include time value of money, capital budgeting basics, foreign exchange, risk and return, modern portfolio theory, and financial markets. The course includes an integration of many of these concepts through an exposure to business plan development.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 631. Business Analytics And Operational Excellence. 4 Credit Hours.

This course combines three disciplines that form the basis of a modern analytical approach to business management: statistics, optimization, and operations management. Many of the concepts covered are cross-disciplinary and can be applied to a variety of business functions and situations. Although specific examples will be used during the course to illustrate each concept, instruction will focus on the general applicability of the material. Topics to be covered include: numerical and categorical data, population/sample, parameter/statistic, introduction to excel, frequency distributions, histograms, pie charts, measures of variability, pivot tables, measures of association, random variables and distributions, sampling, types of hypothesis and of statistical errors, linear programming, network models, sensitivity analysis, integer and goal programming, forecasting, inventory management and location analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 632. Introduction To Strategy, Market And Management. 4 Credit Hours.

This integrated course focuses on the external environment in which business firms operate and on the management techniques through which managers organize and motivate human resources to support strategic initiatives. It emphasizes in particular three critical sets of actors: customers, competitors, and employees. The purpose of the course is to introduce the student to basic conceptual frameworks and analytic models that managers use to a) identify and understand the customer segments that make up a marketplace, b) formulate strategies that achieve a competitive advantage within that marketplace, and c) lead and motivate employees in the execution of competitive strategies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 633. Business Plan Fundamentals And Communications. 4 Credit Hours.

This course provides students with the fundamentals in the development and preparation of a business plan, as well as of oral and written business communications. Students, after exploring new venture opportunities, will develop a comprehensive business plan, including its functional components (marketing, finance, operational, human and intellectual capital plans), the support with which to secure the needed financial and human resources, and the organization to manage the new venture. Students will also enhance their communication skills with which to identify critical issues, develop reasoned positions, display data, use visual aids effectively, state persuasive and compelling arguments for written documents as well as prepared and impromptu speeches, and deal with the media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 634. Research Project. 1-6 Credit Hours.

Individually supervised research project in selected field. Scope of work must be approved by supervision instructor prior to registration. Total enrollment may not exceed six credits.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BUS 635. Research Project. 1-6 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 640. Quantitative And Analytical Fundamentals For Finance. 1-4 Credit Hours.

This four-credit course provides graduate students with an intensive review of the fundamentals of financial accounting and finance, and as well as microeconomic concepts and quantitative skills, needed as appropriate foundation to pursue the Master of Science in Finance degree or other master degrees that entail taking an elective course in finance. Topics include: Math concept review (functions, exponents, notation, weighted average, derivatives as applied to maximization/minimization); Measures of central location, variability, and association; Supply and demand curves, elasticity; Profit maximization; Markets: perfect competition, monopoly, oligopoly; Economic role of Government (monetary and fiscal policy, regulation, taxation); Basic financial statements (income statement, balance sheet, statement of cash flow, statement of changes in shareholders' equity); Working capital, noncurrent liabilities and owners' equity, investments and long-lived assets; Common size and ratio analysis; Principles in finance; Time value of money; Valuation (including bonds and stocks); Fixed income securities; Term structure of interest rates; Interest rate risk and duration; Capital markets, how securities trade, intermediaries; Capital market efficiency, arbitrage; Risk and return, portfolio math; Diversifiable vs. non-diversifiable risk; Asset Pricing Models (CAPM, beta, Fama-French); Capital structure; Capital budgeting; Cost of capital; Foreign exchange and global investing; Introduction to derivatives. The course will be taught over a two-week period, primarily in lecture, homework, and test format.

Components: DIL.

Grading: GRD.

Typically Offered: Summer.

BUS 641. Business Analytics Capstone Project. 2 Credit Hours.

including data collection and analysis. The description of the problem in question, the approach used to address it, and the findings obtained by the group are to be described in formal written reports. The reports will be evaluated both on their quantitative value and on the quality of the writing.

Prerequisites: MAS 631, MAS 632, MAS 637, MAS 639 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 650. Introduction To The Miami Emba For The Americas. 1 Credit Hour.

This course provides incoming Executive MBA students an orientation to program tools and resources central to program success. Students will receive training in Blackboard, learn to access e-materials and navigate the business fundamental virtual modules, and increase their knowledge of business networking and influence. Students will also be introduced to business information resources and research strategies that they will use throughout the program. They will partake in Case Study preparation and receive an overview of the Integrated Project from Global Management, Global Enterprise, and Global Strategic Marketing perspectives. Students will also receive guidance on operating in teams both virtually and during the residency components of the program. Students will also participate in a corporate visit. This orientation also helps build a sense of affiliation among students and with the University.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

BUS 651. Global Strategic Marketing. 4 Credit Hours.

The purpose of this course is to acquaint the student with the theories and practice of strategic marketing management in the Americas. This course will enable the student to understand markets, develop strategies to capture value, and develop marketing plans based on the nature of national as well as international markets. Specifically, the issues of strategic marketing in the context of firm level strategy will be addressed, as well as issues of value capture and delivery, customer life-time value, pricing, distribution, branding and communication in markets.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 652. Global Strategy. 2 Credit Hours.

The purpose of this course is to change how the strategic environment is viewed, how students think about their own organizations and other others, and how strategy and its execution is viewed. This course will help the student: understand organizations as complex systems embedded in a set of evolving cooperative and competitive economic relationships; identify the distinct resources and capabilities that form the foundation of an organization's competitive advantage; formulate business strategies that anticipate imitation and competitor response; evaluate the relationship between a firm's competitive advantage and its growth opportunities; understand the role of the corporate center in supporting and enhancing the competitive success of operating divisions; and see the interplay of organizational structures, systems, networks, and influence centers that form the basis of effective strategy implementation.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BUS 653. Global Institutions Infrastructure And Environment. 4 Credit Hours.

This course considers how a country's legal and economic institutional arrangements influence managerial strategy involving goods, services and financial flows across nations. The course addresses how economic problems are dealt with by institutional arrangements in different ways around the world. Discussions will emphasize the influence that these institutional arrangements have on managerial project strategy when firms operate across borders. Specific emphasis will be placed on legal, economic and financial institutions in the Americas.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 654. Corporate Financing And Investing. 4 Credit Hours.

This course considers financing and investing within the corporation. As such, it will consider the theoretical structure of the problem, the boundaries that management faces and how these decisions are made by management. The inter-residency portion will focus on the theoretical development and computational aspects of solving the problems. The residency portion will emphasize case discussion and simulation to demonstrate the practical implementation as well as integrating these concepts into the overall management picture. The objective of the course is to develop your understanding of the principles that define financial decision making in the firm. These topics are an important component of the strategic planning and top-level management of the firm. The course will guide you through the theory and computational aspects applying the theory, then through application to situations that will enhance and cement your understanding. Finance theory is universal and therefore does not apply to any given country or system. All of the applications will be international, multinational, or global in context. A central theme of the course is decision making. Specifically we will focus on the financial aspects of major strategic decisions. We will build on previous courses to understand how institutions, accounting, legal structures and more, affect these decisions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 655. Public Policy and Health. 3 Credit Hours.

Development of public policy at the federal, state and local level. Policy process, models of policy analysis, policy development in several government service areas, and plans for policy change. Special emphasis on health policy formulation, implementation and the use of epidemiological tools in health policy analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

BUS 656. Integrated Business Project. 1-6 Credit Hours.

The Integrated Project course (IP) requires students to formulate, develop and implement three business projects that address pressing organizational challenge, over the 17-month duration of the EMBA for the Americas. Students may work in teams or individually to develop actionable and valuable recommendations for their chosen organization and present project outcomes to faculty advisors during the February, June and October residencies. For students, IP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. IP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 657. Optimizing Human Capital. 4 Credit Hours.

The 21st century workplace has often been characterized as the "Age of Intellectual Capital," a time in which competitive advantage is linked intricately to optimizing human resources in distinctive ways. In this dynamic, global marketplace, Darwin rules. To survive, organizations must provide the best products, the best services with the best labor or risk extinction. Contextual factors including changing demographics; global social, economic, and regulatory issues; and technological innovations have created major challenges for organizational sustainability. In a recent publication based on survey results from 94 countries, talent acquisition, retention, management, and engagement were viewed as "urgent" global trends for the 21st century. Utilizing a variety of pedagogical approaches, this course will focus on the ways in which human capital can be leveraged to create sustainability as well as work environments that engage the minds and hearts of participants to achieve strategic initiatives.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BUS 658. Business Analytics. 4 Credit Hours.

One of the strengths of Business Analytics is its broad applicability. The skills learned in this module can be used in virtually any context of business, including but not limited to: finance, marketing, strategy, operations, logistics, transportation, health care, real estate, sports, manufacturing, etc. For that reason, rather than focusing on a single central theme, as do other modules in the MEMBAA program, the Business Analytics module touches on a variety of themes that illustrate its potential.

Components: LEC.

Grading: SUS.

Typically Offered: Fall & Spring.

BUS 660. High Performance Leadership. 4 Credit Hours.

The High Performance Leadership course was developed to help executives build a high-performance work environment and effectively operate in the multi-cultural environment of the Americas and the World. The course is divided into two parts. The first part, the inter-residency will concentrate on the facets of high-performance leadership. It will explore the fundamentals of leadership; investigate the major leadership theoretical concepts; explore a wide-range of leadership research; convey practical leadership implications; and share lessons in conquering self-leadership. This section will be taught online through readings, discussion boards, and case and leader analyses. The emphasis will be on building a sound grasp of good practice, and on developing the ability to apply such knowledge to actual business problems. The theories will be applied to specific situations. The second part of the course, the residency concentrates on the cross-cultural environment of the Americas (and global markets) and addresses four main topics. The first session focuses on Cross-Cultural Communication in Business and allows executives to understand culturally-specific communication patterns, negotiation styles, expectations, cues, and norms. The second session addresses Leadership Issues in Organizational Control and participants will explore ethical and moral dilemmas, and external communications by senior executives. The third session focusses on Cross Cultural Issues in Leadership and examines effective leadership across cultures. The final session addresses Guanxi and Doing Business in China. China is currently or will soon become the world's largest economy (PPP basis) and is increasingly becoming important to the Americas. This session addresses critical thinking, cultural understanding, solutions to problems, and evaluating different options when doing business with China.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 661. Enhancing Global Operations. 4 Credit Hours.

This course focusses on how to manage more complicated global networks; how to optimize service and quality levels of performance; and, how to minimize risks yet maintain required capacities. Operational transformation requires commitment and expertise in strategy and execution to achieve lasting improvements. This course draws on research and real world issues confronting manufacturing and service companies today, providing strategic frameworks to enable executives to make smart choices so that their firms can deliver the products and services they are committed to providing their customers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 662. Decision Making in Global Environment. 4 Credit Hours.

This course provides students with a systematic way to carefully think about decisions to arrive at more informed choices while doing business globally and specifically in the Americas. The course covers structuring decisions, creating alternatives, making tradeoffs among conflicting objectives, accounting for uncertainties and risk tolerance, and analyzing and evaluating alternatives. The course is intended to make participants aware of decision making issues surrounding global business, the dynamic issues surrounding their context, and how these affect managerial strategy. An objective of the course is to increase participants' competence in managerial decision making related to globalization, institutions, incentives, corporate governance, regulation, business law, international finance and accounting, organizations and management (including culture), and international trade.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 663. Entrepreneurship & Innovation. 4 Credit Hours.

This course considers entrepreneurship and innovation within the Americas, together with a special emphasis on the Latin American context. The course covers the building blocks of the entrepreneurial process and pays special attention to the family business model where ownership is closely held. The objective of the course is to develop an understanding of the venture formulation process within the Americas and the processes that surround this. The topics of innovation; venture capital; venture formulation; human capital; market dynamics; technological readiness; role of government, regulation, and culture will be assessed. An objective of the course is to consider new models for venture design such as the agile model of development and the creation of the business canvases, a lean version of the traditional business plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 698. Selected Topics. 1-6 Credit Hours.

Topics in selected areas of business.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 700. Introduction To Commercial Real Estate: Analysis And Field Experience. 3 Credit Hours.

Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a one-week, four module, on-campus class followed by a full-time internship at a local Commercial Real Estate Institution during the first summer of the program. Module I: Students are introduced to the complexities of commercial construction techniques used in South Florida and the important links between architectural plans and economic value to owners and tenants. Module II: Students are introduced to the terminology and financial analysis of commercial real estate. Module III: Students are introduced to the application of real estate finance and valuation principles using ARGUS Valuation – DCF. Module IV: Students participate in a required internship at a local Commercial Real Estate Institution. Regarded as a full-time student.

Components: EXP.

Grading: SUS.

Typically Offered: Summer.

BUS 701. Commercial Real Estate Field Experience. 3 Credit Hours.

Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a full-time internship at a local Commercial Real Estate Institution during the first fall semester of the program. This internship is subsequent to their previous summer internship (BUS 700). Regarded as a full-time student.

Components: EXP.

Grading: SUS.

Typically Offered: Fall.

Business Law (BSL)

BSL 212. Introduction to Business Law. 3 Credit Hours.

Introduction to business law and ethics for the undergraduate student.

Topics include business ethics, contracts (the nature and requisites, formation, interpretation, performance and breach, and remedies), and sales (Uniform Commercial Code, Convention on the International Sale of Goods, transfer of title, warranties, and rights and remedies of buyers and sellers).

Requisite: School of Business Administration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BSL 304. Corporate Law. 3 Credit Hours.

Introduction to the law and regulation of corporations and other business entities. Topics include: tort and other business liabilities, agency and fiduciary duty, partnerships, limited liability companies, corporations (including the legal relationships underpinning their financial structure, director and officer liability, and laws relative to change of control), securities regulation, and antitrust law.

Prerequisite: BSL 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BSL 305. Legal and Social Aspects of Business Regulation. 3 Credit Hours.

An introduction to the legal and ethical issues arising out of business and the regulatory environment. Topics include business ethics and subjects as environmental law antitrust, securities, administrative process, consumer protection, and employment regulation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 313. Coastal Law. 3 Credit Hours.

Basic doctrines and public policy related to the use and regulation of the United States coast zone and seabed. PREREQUISITE: BSL 212 OR EQUIVALENT. Not available for credit toward either the major in Legal Studies or the minor in Business Law.

Prerequisite: BSL 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 314. Ocean Law. 3 Credit Hours.

The principles of international ocean law regarding ocean management. Topics include ocean delimitation and issues of environmental ocean regulation within international legal framework. PREREQUISITE: BSL 212 OR EQUIVALENT. Not available for credit toward either the major in Legal Studies or the minor in Business Law. Prerequisite: BSL 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 324. Negotiation. 3 Credit Hours.

This experiential course is designed to introduce undergraduate business students to the theory and practice of negotiation. The lectures and readings will discuss negotiation theory, equipping students with the concepts and terminology to prepare and execute value-creating, interest-based negotiations. Negotiation exercises will provide the student with an opportunity to apply the theoretical elements of the course in live, simulated negotiations. Extensive review of these simulated negotiations through classroom discussion and film analysis will assist students in cementing their understanding of the use of negotiation theory in practice. Although negotiation theory is applicable to a wide variety of academic contexts, this course focuses on negotiations in the practice of law and business.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 333. Legal Aspects of Real Estate Transactions. 3 Credit Hours.

Legal principles controlling the acquisition, ownership, financing, and development of real property. Topics include nature and acquisition of rights in real property, theory of estates, co-ownership, fixtures, easements, legal descriptions, evidence of title, title insurance, deeds, mortgages, closing the sales and mortgage transactions, condominiums and cooperatives, brokers, and land use.

Prerequisite: BSL 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BSL 401. The Law of Financial Transactions. 3 Credit Hours.

Overview of the law of commercial finance as it relates to existing and emergent payment systems, secured credit, and bankruptcy. Topics include: negotiable instruments, bank deposits and collections, secured transactions, personal and commercial bankruptcies, and accountant liability.

Prerequisite: BSL 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BSL 412. International Business Law. 3 Credit Hours.

International law and organizations, international sales, credits and commercial transactions, U.S. trade law, and the regulation of the international market place are discussed.

Prerequisite: BSL 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BSL 424. Intellectual Property Law. 3 Credit Hours.

This course is designed to acquaint the business student with the general framework of laws that regulate innovation, marketing, competition, and business development in the U.S. Special emphasis will be placed on discussion of ethical issues in information property, unfair competition, and management of intellectual property across various industries. Prerequisite: BSL 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 435. Law Of Entrepreneurship. 3 Credit Hours.

Overview of the legal aspects of entrepreneurship and business management. Special emphasis on entity formation, intellectual property protection, capital formation, securities, tax planning, and risk management.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 460. Health Care Law and Ethics. 3 Credit Hours.

This course is designed to offer the business student an appreciation of the legal foundations and ethical considerations in health care administration in the United States. Prerequisite: BSL 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 476. The Law Of Risk. 3 Credit Hours.

This course offering will analyze risk in business and examine the tools that the law offers to identify danger and risk in the workplace and shift and minimize potential losses. This highly interactive course will first examine the various sources of legal risk, from criminal liability to employment discrimination to personal injury claims and toxic tort exposures. It will then examine the ways business and law pool, shift, and minimize risk. This seminar-style course will also include a significant experiential, hands-on component. Students will also practice contract construction and interpretation in a workshop environment. Prerequisite: BSL 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 485. Managing the Legal Factor. 3 Credit Hours.

This course offers the business manager a frank and analytical view of law and legal practice as they affect business decision-making. It addresses both the issues of cost containment and relationships between counsel and the company with the objective of achieving a more effective management of the legal function in business. Prerequisite: BSL 212 or equivalent. Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 499. Special Topics. 1-3 Credit Hours.

Independent investigation of special subjects. Approval of supervising professor as to topic and evaluation of project required at time of registration.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 555. Business Law Honors Research Project.. 3.00 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Business Law.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

BSL 575. Advanced Business Law. 3 Credit Hours.

Legal problems encountered by Certified Public Accountants, Finance, Management and Marketing Executives, including agency, commercial paper, bank deposits and collections, secured transactions, suretyship, bankruptcy, partnership, corporations, contracts, anti-trust, insurance, property, wills and estates, SEC law, and accountants' legal responsibility. Special attention is given to the commercial law segment of the Uniform Public Accountant Examination.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 612. Legal Aspects of International Business. 3 Credit Hours.

International legal framework, transactional legal issues in finance, marketing, management, distribution, and a review of theory and practice of negotiations. Case studies on such topics as legal implications of GATT, European Competition, C.I.S.G., and Export Import Rules are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 624. Negotiation: Theory & Practice. 2 Credit Hours.

This experiential course is designed to introduce graduate business students to the theory and practice of negotiation. The lectures and readings will discuss negotiation theory, equipping students with the concepts and terminology to prepare and execute value-creating, interest-based negotiations. Negotiation exercises will provide the student with an opportunity to apply the theoretical elements of the course in live, simulated negotiations. Extensive review of these simulated negotiations through classroom discussion and film analysis will assist students in cementing their understanding of the use of negotiation theory in practice. Although negotiation theory is applicable to a wide variety of academic contexts, this course focuses on negotiations in the practice of law and business.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 675. Advanced Business Law. 2 Credit Hours.

Advanced Business Law focuses on the following substantive subject areas commonly encountered by Certified Public Accountants and tested on the Uniform Certified Public Accountancy Examination: business ethics, contracts (including formation, performance, breach, and remedies), commercial transactions under UCC Article 2, commercial paper, agency principles, and secured transactions. Special attention is given to the areas tested on Regulation section of the Uniform CPA Exam.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 685. Legal Aspects of Health Administration. 3 Credit Hours.

Derivation of rule of law governing health providers, vicarious liability of administrative and medical personnel, informed consent, and other related problems are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 690. Legal and Ethical Implications of Business Decision Making. 2 Credit Hours.

The course provides an introduction to our legal and governmental regulatory system, as well as a review of constitutional considerations for businesses. Morality and ethics are defined and distinguished. Applied philosophy is then introduced, to give the student a foundation upon which to analyze the ethical dimensions of common business questions. The relationship between the letter and the spirit of the law is examined. Specific business topics and their legal and ethical aspects are then addressed. This includes, but is not limited to, discussion of the following areas: consumer relationships; business organizations; the balancing of corporate vs. individual power (employee rights and responsibilities, employment discrimination); and the emerging ethic of a global economy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 691. The Public Corporation: Legal Perspectives. 2 Credit Hours.

The Public Corporation: Legal Perspectives reviews the laws governing the formation, operation, regulation, and governance of the public corporation with the objective of providing the graduate business student a sophisticated examination of the legal and social aspects of managing the money of others. Further, the course examines the rules and regulations governing the raising of capital from the public through the sale of securities for the development of and investment in a private enterprise.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 692. Legal Implications of International Business Transactions. 2 Credit Hours.

International legal framework, transactional legal issues in finance, marketing, management, and distribution. Case studies in substantive international legal topics such as international sales contracts, international documentary sale, international terms of trade, legal implications and substantive rules governing international finance, collections, payments, and letter of credit, the resolution of international disputes with a particular emphasis and examination upon the management of litigation, enforcement of foreign judgments, and alternative dispute resolution are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 694. Real Estate Law. 2 Credit Hours.

Real Estate Law focuses on the U.S. legal system as it relates to the buying, selling, and financing of real property. In addition to traditional text material, the analysis of U.S. court cases is used to detail the legal factors of ownership rights and liabilities, specific interests in real property, contracting issues related to the purchase and sale of real property, as well as financing and closing the real estate transaction. The course provides a problem-solving experience, which is intended to develop graduate students' critical thinking process as well as their skills in oral and written communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 695. Legal Implications in Executive Decision Making. 3 Credit Hours.

Law and legal process are examined as they mix with the politics and ethics of business, including the weight given to legal implications in the executive decision-making process.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 696. Legal and Ethical Implications in Executive Decision Making. 3 Credit Hours.

Business and public administration cases requiring identification of the legal, ethical, and social elements as well as the determination of the weight such elements should have in setting policy are discussed. Integration of law and ethics with public and business administration is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 698. Selected Topics. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Business Technology (BTE)

BTE 120. Introduction to Computer Information Systems. 3 Credit Hours.

An introduction to computers and information processing, with emphasis on application software. The course material includes: spreadsheet design and analysis, as well as the use of spreadsheet tools in facilitating decision making; relational database design and the development of database management tools; basic Internet terminology and Web design; development of team-work, presentation, and communication skills through presentation software; and the use of advanced word processing features to create a more efficient and productive working environment, as well as software application integration.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 210. Fundamentals Of Business Technology & Innovation. 3 Credit Hours.

This course covers the fundamental technologies used in business today. Topics include information technology platforms; enterprise technology concepts; network infrastructure; enterprise resource planning; information security; technology architectures; internet; cloud, mobile, and web platforms; analytical technologies; business intelligence; expert systems, and Big Data. Students work on an innovation project to create a specification/business canvas for a new technology product.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 320. Introduction to Programming. 3 Credit Hours.

This course covers the fundamentals of programming logic and structured programming principles—including problem solving, algorithm design, and program development—using a high level programming language. Topics covered include fundamentals of algorithms, flowcharts, problem solving, programming concepts, classes and methods, control structures, arrays, and strings, pointers, and data structures.

Requisite: Must have a CIS and CSC Major or Minor plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 324. Object-Oriented Programming. 3 Credit Hours.

This course introduces the concepts and fundamental techniques of object-oriented programming. Topics include: data abstraction, encapsulation, inheritance, polymorphism, class library, graphics/GUI, exception handling, multithreading, multimedia, files and streams, Internet applets, application development, integrated development environment, interactive program debugging and the eXtensible Markup Language (XML).

Prerequisite: CIS 320 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 360. Systems Analysis and Design. 3 Credit Hours.

This course introduces the techniques of systems analysis and design. Topics include: the Software Development Life Cycle (SDLC), Agile Programming, Extreme Programming, lean software development, Universal Modeling Language (UML), requirements modeling, data modeling, user interface design, data design, normalization, systems architectures, implementation methods, and testing methodologies.

Prerequisites: CIS 320 or CSC 120 or ECE 118 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 361. Design of Information Systems. 3 Credit Hours.

Continuation of CIS 360. Topics include concepts, tools, and techniques of systems design, prototyping, file/database design, and physical process modeling. Students work in groups to design an application system for a business related problem.

Prerequisite: CIS 360.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 389. Launching High Technology Ventures. 3 Credit Hours.

This course develops an understanding of the entrepreneurial processes as they apply to new technology ventures. Topics include: venture formation, venture and angel investments, innovation and creativity, business plan creation, human capital, ethics, and intellectual property.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 400. Web-Mobile-Cloud. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 401. Computers In An Inter-Networked Society. 3 Credit Hours.

This course provides students with fundamental knowledge of the technology and tools that integrate big data, cloud, and mobile computing within a business and social context. Students will study these technologies and their impact on socioeconomic, political, organizational, and personal environments. The course covers the cultural components of a social media society and examines the systems and processes that need to be developed for effective management of that environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 410. Information Systems and Technology. 3 Credit Hours.

Course develops an understanding of the role of information technology within an organizational perspective. The course focuses upon the basic building blocks of information technology architectures and examines the issues facing a Chief Technology Officer in developing systems solutions. Topics include enterprise systems, database, decision support, intelligent systems, the Internet and e-business, as well as the ethical policy issues that affect systems architectures and their use.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BTE 412. Foundations of Business Enterprise Technologies. 3 Credit Hours.

This course provides an understanding of the foundations of enterprise technologies. Topics include: making the business case for technology, distributed architectures, customer relationship management systems (CRM), enterprise resource planning systems (ERP), requirements modeling and design for enterprise systems, software development and outsourcing for the enterprise, enterprise productivity technologies (RFID, internet of things, machine data), 3D-design technologies, cloud technologies, and technologies for the global enterprise.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 413. Big Data Strategy. 3 Credit Hours.

This course provides an introduction to the area of business intelligence termed Big Data. The concepts of high volume, velocity, and variety data are examined. The course examines how big data can be used to create business intelligence strategies in the areas of marketing, product development, systems deployment, and innovation. The course utilizes business intelligence software and Structured Query Languages (SQL) to analyze data. Other Big Data topics covered include the ethics, security, streaming data, sourcing, emergent technologies, and international data regulations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 417. Fundamentals Of Tech Project Management. 3 Credit Hours.

This course is designed to provide the fundamental project management knowledge necessary for a business manager, consultant, project manager, IT professional, and/or team member to successfully initiate and plan IT and other business projects. It is structured to provide principles, methodology, and practical information through a combination of lectures, group collaboration and hands-on exercises. Emphasis is placed on the importance of standardization and best practices as defined by the PMI's Project Management Body-of-Knowledge (PMBOK®).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 420. Analysis of Information Systems. 3 Credit Hours.

Overview of the systems development life cycle (SDLC). Topics include concepts, tools, and techniques of systems analysis; data modeling; process modeling; CA SE tools; and the role of the systems analyst in the organization. Students will work in groups to analyze an application system for a business related problem. Prerequisite: Knowledge of a high level programming language.

Components: LEC.

Grading: GRD.

BTE 421. Design of Information Systems. 3 Credit Hours.

Continuation of CIS 420. Topics include concepts, tools, and techniques of systems design; prototyping; file/database design; and physical process modeling. Students will work in groups to design an application system for a business related problem. Prerequisite: CIS 420.

Components: LEC.

Grading: GRD.

BTE 423. Database Management Systems. 3 Credit Hours.

This course covers the foundations of database management systems (DBMS). Topics include: database systems design, SQL, the relational model, entity-relationship modeling, distributed DBMS, object DBMS, web technology and DBMS, semi-structured data, XML, business intelligence, data warehousing, data warehousing design, introduction to OLAP, and a brief overview of data mining. Students will engage in hands-on exercises for the design and implementation of database business applications. Prerequisite: CIS 360.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 430. Business Networks. 3 Credit Hours.

In this course, students will learn the underlying concepts and technologies in the field of business networks with specific focus on their applications in businesses. Topics covered include: network types, networking standards, protocols, and architectures; the characteristics of physical and logical networking components and technologies; the security issues that affect network systems and their implications on business applications; the technical and organizational issues concerning wireless networks; emerging networking technologies and software tools for designing and troubleshooting various aspects of networks.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 450. Introduction to Health Informatics. 3 Credit Hours.

The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 465. Web Application Development. 3 Credit Hours.

This course will explore Internet and mobile application development methodologies. Topics include: HTML 5, CSS3, scripting languages (JavaScript); jQuery, AJAX, web services, Web Servers (IIS and Apache) and relational databases (MySQL/Apache Derby/Java DB)—all the skills and tools needed to create dynamic Web-based and mobile applications. The coverage will be both on the client side and the server side of Web-based applications, and the course will provide instruction on building rich Internet applications that enhance the presentation of online content and give web applications the look and feel of desktop applications. Students in the course will build Web-based, client/server, database-intensive, multi-tier, and mobile business applications.

Prerequisites: CIS 324, CIS 361, CIS 423, CIS 430.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 490. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 491. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 493. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 494. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 495. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 496. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 497. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 498. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 499. Directed Study in Computer Information Systems. 1-3 Credit Hours.

Individually supervised investigation or research project in selected topics. Offered by special arrangement only. Approval of supervising professor as to topic and evaluation of project required at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 523. Big Data Development. 3 Credit Hours.

This course covers foundational techniques and tools required for data science and big data analytics. The course delivers a thorough overview of and hands-on experience with Big Data technologies, including: Hadoop, Mapreduce, Association rules, Large scale supervised machine learning, Data streams, Clustering, NoSQL systems (Cassandra, Pig, Hive), and applications, including recommendation systems, Web, and security. Students will also examine current research and publications in Data Science/Big Data Analytics, with emphasis on systems and algorithms for large-scale advanced data analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 524. Mobile Apps Development. 3 Credit Hours.

This course covers the fundamentals of programming logic and structured programming principles—including problem solving, algorithm design, and program development for mobile environments—with a focus the Android Platform. The course introduces the requirements and methodologies for developing dedicated and client-server applications that target smartphones, tablet computers, and other mobile devices. Topics include: memory management, communications, power systems, APIs, and among others. The techniques studied are applicable to and can be transitioned to the iOS or Windows 8 platforms.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 535. Information Security. 3 Credit Hours.

This course introduces the principles of computer security. Information is an important strategic and operational corporate asset that needs to be protected from data breaches. This course investigates some of the security measures that can be employed to safeguard information and explores some of the tools and techniques used in designing these measures. Students will examine how system designs, network protocols, and software engineering practices can result in vulnerabilities. They will also explore how to detect and mitigate vulnerabilities in existing systems and, so, how to design and implement better future systems. Additional topics include ethical hacking, social engineering strategies, and other approaches to managing vulnerabilities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 550. Computer Information Systems Internship. 1-3 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight in information technology practice in the area of career interest. Periodic reports and conferences are required.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BTE 565. Mobile to Cloud: Developing Distributed Applications. 3 Credit Hours.

This course introduces students to the basics of the emerging cloud computing paradigm. It also examines how to implement different algorithms for different applications in the cloud and how to deploy mobile applications in the cloud. The course covers the principles, systems, and applications of mobile cloud computing that integrates smart phones and tablets with virtualized distributed computing infrastructure. Students will learn the fundamentals of a variety of systems such as virtual machines, the principles and practices of client/server architectures, the concepts and practices of Infrastructure, Platform, and Software as a Service (IaaS/PaaS/SaaS), cloud platforms such as Google App Engine, Microsoft Azure, and Amazon Web Services(AWS), as well as security issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 572. Intr Exp Sys For Mgt. 3 Credit Hours.

Components: LEC.

Grading: GRD.

BTE 590. Topics in Computer Information Systems. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 610. Foundations of Management Information Systems. 2 Credit Hours.

Course is designed to provide the foundations in management information systems information systems required to understand and effectively use an enterprise wide information system. Topics include the role of the CIO, managing Information Technology (IT) as a strategic resource, business process reengineering, IT planning, IT governance and communication, the Internet, and eBusiness.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 612. Enterprise Technologies. 2 Credit Hours.

Course addresses the needs of business students who wish to expand their understanding of information technology fundamentals. Focusing upon their use in today's enterprises, the course aims to provide students with knowledge of a variety of technological concepts commonly used in the IT Organization's systems development initiatives and enables students to understand the implications of deploying such technologies within the enterprise.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 613. Business Intelligence Technologies. 2 Credit Hours.

Course facilitates business decision makers in their understanding of data analysis tools that operate over data warehouses and 'data marts' more commonly referred to as Business Intelligence. Course focuses upon using technologies to drive effective data driven decision making through effective mining of corporate data warehouses, thus improving operational efficiency and ultimately increasing profitability. Students are exposed to the concepts, analysis techniques, data cubes, and manipulation of information extracted from a data warehouse that enables the formulation and execution of business strategies. Data analysis case studies are used to reinforce students' understanding and strategic use of results to accomplish business objectives.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 617. Information Technology Project Management. 2 Credit Hours.

Course covers the identification and development of information technology plans for projects supporting the organization's business objectives and all activities required in the initiating, planning, executing, controlling, and closing phases of the project's lifecycle. Course is intended to provide the body of knowledge and best practices necessary for a new Consultant, Business Analyst or Project Manager to successfully perform his/her responsibilities on a wide variety of IT enterprise projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 621. Management Information Systems. 3 Credit Hours.

Course is designed to give prospective managers a foundation in MIS sufficient to understand and effectively use information systems. Topics include types of information systems, role of MIS in organizations, CIO issues, ERP systems, and electronic commerce.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 623. Database Management Systems. 3 Credit Hours.

Course covers the fundamental concepts of database management systems using the Oracle DBMS. Topics include database theory and terminology, logical modeling, normalization, SQL language, database design and implementation, database administration, data security, database transaction/concurrency, and data backup.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 624. Mobile Apps Development. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 630. Fundamentals of Local and Wide Area Networks. 3 Credit Hours.

Course provides the graduate student the necessary knowledge to understand the design, integration, technologies, and services of local and wide area networks (LANs and WANs) in the business environment. Topics include signal transmission and propagation, standards and protocols, data communications media and devices, layered/encapsulated communications based on the hybrid TCP/IP-OSI standards, small and large-site PC LANs, Frame Relay, ATM, Virtual Private Networking (VPN), Telephony, Internet technologies, and network security.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 631. Computer and Network Security. 3 Credit Hours.

Protection of computers and networks against unauthorized access, access control, encryption, firewalls, proxy, digital certificates, and software security are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 635. COMP COMMUN SECURITY. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 640. Data Communications and Networking. 3 Credit Hours.

Course addresses advanced topics in computer networks from the perspective of a business decision-maker. The course begins with a focus on signal propagation, media characteristics, and digital and analog encoding techniques. It continues with a study of datalink, network, and transport layer functions as defined by the OSI and TCP/IP models. The architecture of the Internet is explored and routing algorithms for wired, wireless, and peer-to-peer networks are introduced. Course concludes with a high-level overview of the top OSI layers. After taking the class the students should be able to critically evaluate network solutions based on the capabilities and limitations of the equipment.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 646. IT Planning and Project Management. 3 Credit Hours.

Course covers the development of information technology strategic and tactical plans for projects supporting the organization's business objectives and project management as applied to planning, implementing, controlling networking, information systems and e-commerce projects. Course is intended to provide a body of knowledge necessary for a new Consultant or Project Manager to successfully initiate, plan, manage, control, and report on a variety of project types. People skills required in the areas of team selection, structure, conflict resolution, and leadership is also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 650. Introduction to Health Informatics. 3 Credit Hours.

The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 660. Computer Information Systems Graduate Internship. 1-3 Credit Hours.

Student is individually assigned to an operating business firm or other organization to gain insight and experience in information technology practice in area of career interest. Periodic reports and conferences are required. This course can only be taken as "satisfactory/unsatisfactory."

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

BTE 665. Applied Software Project Development. 3 Credit Hours.

Advanced concepts and techniques in application project development. Topics include project management, program testing, documentation, application installation, and application maintenance. Students will work on a group project to sharpen their implementation skills. Prerequisite: CIS 223 or 226 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 680. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Cancer Biology (CAB)

CAB 701. CAB Student Seminar. 1 Credit Hour.

This course (required of 2nd and 3rd year students) offers instruction on the fundamental elements of scientific speaking. The ability to communicate effectively is essential for scientists. All CAB students are required to present their research each year as a 25 min (2nd year students) or 55 min seminar (3rd year and above). Students who are 4th year+ give seminars but are not enrolled.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAB 705. Tumor Boards. 1 Credit Hour.

In the Fall of their second year, students attend Tumor Boards at the Sylvester Comprehensive Cancer Center. During these meetings, clinicians with expertise in different disciplines, review and discuss the medical conditions and treatment options of patients. These meetings provide an opportunity for students to interact with physicians and learn how pathologists, surgeons, medical oncologists and radiation oncologists review specific cases, create and coordinate customized treatment plans. Examples of cases include patients with solid tumors (i.e., breast, colon, liver, prostate), hematologic tumors (i.e., leukemia, lymphoma), and sarcomas (i.e., osteosarcoma, soft tissue). Students are expected to attend 10 different tumor board or site disease group meetings, a minimum of 5 must be attended during the Fall semester.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAB 710. Cancer Biochemistry & Molecular Biology. 3 Credit Hours.

This is an entry-level lecture course designed to introduce students to the major concepts and principles of cell growth deregulation in cancer with a major emphasis on molecular mechanisms. Topics include: oncogenes, tumor suppressors, mechanisms of uncontrolled cell growth, receptors and intracellular signal transduction pathways.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 712. Special Topics in Cancer Research - Viral Oncology and Tumor Immunology Module. 2 Credit Hours.

This module emphasized state of the art knowledge of each discipline, student participation in a problem based learning context. Topics include viral carcinogenesis and epidemiology, Hepatitis, Herpes, Epstein Barr and Human Papilloma Viruses, Kaposi's Sarcoma, viral induced lymphomas, viral oncolysis, and mechanisms of anti-tumor immunity.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 713. Special Topics in Cancer Research - Molecular Cancer Therapeutics Module. 2 Credit Hours.

This module explores the signal transduction pathways critical for cancer cell proliferation and survival that may provide new therapeutic targets, approaches for identification and validation of molecular targets within these pathways. Students are introduced to the strategies used in the discovery and design of biological and drug based therapies, and the implementation of clinical trials.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 714. Cancer Epidemiology, Prevention and Biobehavioral Oncology. 2 Credit Hours.

The overall philosophy of this module is to introduce students to the basic principles of biobehavioral oncology and cancer epidemiology and cancer prevention and control. The course will explore cancer epidemiology approaches used to identify the molecular and genetic mechanisms of cancer risk and progression and how these are used to develop predictive models in treatment response. Methods for identifying social, environmental, and biological reasons for cancer disparities among different populations will also be covered. Sections on bio-behavioral oncology include: health behavior change processes in persons at risk for and diagnosed with cancer; methods to improve adaptation to cancer diagnosis and treatment, psychosocial intervention research techniques and bio-behavioral processes explaining their effects on health and quality of life (QOL), translation of behavioral and psychosocial intervention to the community, symptom/treatment side effects management approaches, predictors of late effects of cancer treatment and development of preventative interventions.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 715. Special Topics in Cancer Research - Breast and Genitourinary Cancers Module. 2 Credit Hours.

This module highlights key aspects of the cellular and molecular mechanisms of breast, prostate, renal and bladder cancers as well as providing an overview of cancer detection, diagnosis, and therapy. Emerging research opportunities are identified. Topics include estrogen receptor and androgen receptor signaling, cancer progression, endocrine therapies and resistance. Key signaling pathways and the biology of metastasis will be discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 720. Dialogues with Cancer Clinicians (PIBS Module). 1 Credit Hour.

This module features physician mentors of the Cancer Biology Graduate Program who will discuss clinical aspects of cancer treatment with an emphasis on continuity of care of newly diagnosed patients between disciplines and will articulate unmet clinical needs and research. Mentors will provide clinical perspectives on their areas of specialization as it relates to patient care including diagnosis, staging, therapy, and outcomes.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 750. Logic and Reasoning in Translational Cancer Research: Bench to Bedside Part 1. 3 Credit Hours.

An important facet of the Cancer Biology Ph.D. Program is the training of students in the interrelationships between basic research and clinical medicine, i.e., translational research. The goal of this advanced course is to expose students to the scientific reasoning and logic underlying problem solving in clinical cancer research. This course is designed to help students integrate information and develop the thought processes necessary to critically evaluate information in the literature and experimental approaches, conceptualize problems in the field and identify areas for scientific exploration. Students learn how the knowledge obtained from basic research laboratories is applied to clinical problems including prevention, diagnosis, prognosis, and therapeutic treatment of cancer. Specific examples of translational research, i.e., laboratory to clinic are emphasized. Students also learn the key role of clinical observation in identifying basic research problems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAB 830. Dissertation Research - Pre Candidacy. 2 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credits as determined by the Office of Graduate Studies but not less than a total of 24. Not more than six in the summer. If a student has a) passed qualifying exam(s) and (b) is engaged in an assistantship, he/she may still take the maximum allowable credits.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAB 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.

Required for all Ph.D. candidates. Grade will remain IP until student dissertation is accepted by Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAB 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit is not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Chemistry (CHM)

CHM 099. Preparatory Chemistry 1. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 101. Chemistry And Society. 3 Credit Hours.

The basic principles of chemistry for the non-science major with an emphasis on understanding the chemistry of the world around us, especially as it pertains to the choices we make as consumers and as a society. Integrated themes include energy, the environment, food and nutrition, health and personal care, and other contemporary societal issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 102. Fundamentals of Chemistry II. 3 Credit Hours.

A continuation of Chemistry 101.

Prerequisite: CHM 101.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 103. Chemistry for Life Sciences I (Lecture). 3 Credit Hours.

Essentials of inorganic chemistry as it applies to biological systems. Designed for (but not limited to) those planning health-related careers. Lecture, 3 hours.

Corequisite: CHM 105.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 104. Chemistry for Life Sciences II (Lecture). 3 Credit Hours.

A continuation of CHM 103, with emphasis on organic and biological chemistry, including biochemical processes and metabolism. Lecture, 3 hours.

Prerequisite: CHM 103.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 105. Chemistry for Life Sciences I (Laboratory). 1 Credit Hour.

Designed for those students in CHM 103 requiring a laboratory course. Laboratory, 3 hours.

Prerequisite: CHM 103. Or Corequisite: CHM 103.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

CHM 106. Chemistry for Life Sciences II (Laboratory). 1 Credit Hour.

Designed for those students in CHM 104 requiring a laboratory course. Laboratory, 3 hours.

Prerequisite: CHM 104. Or Corequisite: CHM 104.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CHM 110. Chemical Problem Solving. 3 Credit Hours.

Components: LEC.

Grading: GRD.

CHM 111. Principles of Chemistry I. 3 Credit Hours.

Fundamental principles of chemical science. The beginning course for science majors and premedical students. Lecture, 3 hours.

Prerequisites: MTH 107 or Higher. Corequisites: MTH 107 or Higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 112. Principles of Chemistry II. 3 Credit Hours.

Continuation of CHM 111. Lecture, 3 hours.

Prerequisite: CHM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 113. Chemistry Laboratory I. 1 Credit Hour.

Laboratory techniques of chemistry. To accompany CHM 111. Laboratory, 3 hours.

Corequisite: CHM 111.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 114. Chemistry Laboratory II. 1 Credit Hour.

Continuation of CHM 113. Intermediate laboratory techniques and quantitative analysis. To accompany CHM 112. Laboratory, 3 hours.

Corequisite: CHM 112 or CHM 221.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 121. Chemistry For The Biosciences I. 4 Credit Hours.

This is the first course in a three course sequence designed to meet the needs of Life Science students interested in pursuing professional education in the health sciences. Topics to be covered in this course include: basic atomic structure, reaction stoichiometry, gases, chemical equilibrium, acids and bases, thermodynamics, and chemical kinetics. Co-registration with a separate recitation section is required.

Prerequisites: MTH 107 or Higher. Corequisites: MTH 107 or Higher.

Components: LEC.

Grading: GRD.

CHM 151. Chemistry for Engineers. 3 Credit Hours.

Fundamental principles of chemistry for engineering students. Not recommended for students that plan to enter Medical School. Lecture, 3 hours.

Prerequisites: MTH 105 or MTH 107. Or Corequisites: MTH 105 or MTH 107.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 153. Chemistry Laboratory for Engineers. 1 Credit Hour.

An introductory laboratory course to accompany CHM 151. The techniques of chemistry for engineering students.

Prerequisite: CHM 151. Or Corequisite: CHM 151.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 201. Organic Chemistry I (Lecture). 3 Credit Hours.

The chemistry of carbon compounds. Required of chemistry majors, and premedical students; recommended for majors in life sciences. Lecture, 3 hours.

Prerequisite: CHM 112 or CHM 221.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 202. Organic Chemistry II (Lecture). 3 Credit Hours.

Continuation of CHM 201. Lecture, 3 hours.

Prerequisite: CHM 201.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 205. Organic Chemistry Laboratory I. 1 Credit Hour.

Introduction to techniques of organic chemistry. Laboratory, 3 hours.

Prerequisites: CHM 201 or CHM 222. Or Corequisites: CHM 201 or CHM 222.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 206. Organic Chemistry Laboratory II. 1 Credit Hour.

Continuation of CHM 205. Laboratory, 3 hours.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 214. Quantitative Analytical Chemistry. 3 Credit Hours.

Prerequisites: CHM 202, MTH 162 or MTH 172.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 221. CHM211 Chemistry for the Biosciences II. 4 Credit Hours.

This is the second course in a three course sequence designed to meet the needs of Life Science students interested in pursuing professional education in the health sciences. Topics to be covered in this course include: electronic atomic structure, basic quantum mechanics, molecular geometry, identification of organic molecules, and interpretation of chemical structures via spectroscopic methods. Co-registration with a separate recitation section is required.

Prerequisite: CHM 121.

Components: LEC.

Grading: GRD.

CHM 222. CHM212 Chemistry for the Biosciences III. 4 Credit Hours.

This is the third course in a three course sequence designed to meet the needs of Life Science students interested in pursuing professional education in the health sciences. Topics to be covered in this course include: organic chemical reactivity, reaction prediction analysis, organic reaction mechanisms, electronic interactions, energy states, and reactivity of biomolecules. Co-registration with a separate recitation section is required.

Prerequisite: CHM 221.

Components: LEC.

Grading: GRD.

CHM 304. Structural Identification of Organic Compounds. 3 Credit Hours.

The fundamental principles of ultraviolet/visible, infrared, nuclear magnetic resonance and mass spectrometry. How the combination of these sophisticated analytical techniques can be used to elucidate the structures of organic compounds.

Prerequisite: CHM 202 and CHM 206.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 316. Instrumental Analytical Chemistry. 3 Credit Hours.

Modern methods of quantitative analysis. Lecture, 3 hours.

Prerequisite: CHM 304 and CHM 360.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 317. The Chemistry of Food and Taste.. 3 Credit Hours.

The chemical compositions of the raw materials and end products, and a survey of the changes that these undergo when exposed to human manipulations.

Prerequisite: CHM 201 and CHM 202.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 320. Instrumental Methods in Chemistry and Biochemistry. 2 Credit Hours.

Instrumental methods in modern chemistry and biochemistry, including spectrometric, electrochemical, and chromatographic (separation) Laboratory, 8 hours. Satisfies writing requirement.

Prerequisite: CHM 304. Corequisite: CHM 316.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CHM 331. Physical Chemistry for Premedical Students. 3 Credit Hours.

Fundamentals of thermodynamics as applied to gases, liquids and solutions; chemical kinetics and other selected topics. Lecture, 3 hours.

Prerequisite: CHM 112, MTH 161, and PHY 102.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 360. Physical Chemistry I (Lecture). 3 Credit Hours.

Introduction to physical chemistry including thermodynamics, gaseous and liquid states, solutions, homogeneous and heterogeneous equilibrium. Lecture, 3 hours.

Prerequisites: CHM 112, MTH 162 or MTH 172. Requisite: One Semester of Physics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 364. Physical Chemistry (Laboratory I). 1 Credit Hour.

Representative experiments in physical chemistry. Laboratory, 4 hours.

Prerequisite: CHM 360 or CHM 331. Or Corequisite: CHM 360 or CHM 331.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 365. Physical Chemistry II (Lecture). 3 Credit Hours.

Chemical kinetics, introductory quantum chemistry, molecular spectroscopy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 381. Workshop Leaders in Chemistry I. 1 Credit Hour.

Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 382. Workshop Leaders in Chemistry II. 1 Credit Hour.

Students engaged in Peer-Led Team Teaching of workshops for groups of CHM 111 and/or CHM 112 students may enroll for this course. May be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 391. Chemistry Internship For Credit. 1-3 Credit Hours.

Provides chemistry majors with an opportunity to apply skills learned in coursework within settings outside the university. For example students can work in local schools, assisting instructors and mentoring students. They can also work in companies or government agencies for a defined period of time with clearly delineated goals to expand their expertise and practical knowledge of chemistry. Each enrolled student will be closely mentored by a faculty member.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 400. Introduction to Teaching in Chemistry Labs. 1 Credit Hour.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

CHM 401. Environmental Chemistry. 3 Credit Hours.

Major environmental features of the earth; Role of natural and synthetic chemicals in the environment; Atmospheric and aquatic pollution; Application of acid-base theory and oxidation reduction to environmental problems.

Prerequisite: CHM 201 or CHM 222.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 441. Inorganic Chemistry (Lecture). 3 Credit Hours.

The relation of atomic and molecular structure to chemical and physical properties; introduction to nonaqueous solvents, coordination compounds, solid state chemistry and nuclear reactions. Lecture, 3 hours. Prerequisite: CHM 365.

Prerequisite: CHM 365.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 442. Inorganic Chemistry (Laboratory). 1 Credit Hour.

Synthesis of inorganic compounds and determination of their physical and chemical properties. CHM 541 is a co-requisite for ACS chemistry majors. Laboratory, 3 hours.

Prerequisite: CHM 365 and CHM 541.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CHM 464. Physical Chemistry (Laboratory II). 1 Credit Hour.

Continuation of CHM 364. Laboratory, 4 hours.

Prerequisite: CHM 365.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

CHM 488. Undergraduate Research. 1-3 Credit Hours.

Laboratory research under the direction of a member of the chemistry faculty. Thesis optional. Course may be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 490. Honors Research. 1-3 Credit Hours.

Laboratory research under the direction of a member of the Chemistry faculty. Thesis required. Course may be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 520. Physical Organic Chemistry. 3 Credit Hours.

Aspects of chemical bonding, acids and bases, stereochemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bi-molecular reactions.

Prerequisite: CHM 202 and CHM 360.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 522. Synthetic Organic Chemistry. 3 Credit Hours.

Functional group transformations, Synthron approach. Retro-synthetic analyses, multistep syntheses.

Prerequisite: CHM 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 524. Supramolecular Chemistry. 3 Credit Hours.

Complexation, recognition, and catalysis as applied to bio-organic chemistry. Steric, polar, and lipophilic interactions as well as proximity effects in the design of synthetic enzyme mimics, cationic transport species, etc.

Prerequisite: CHM 365 and CHM 520.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 525. Structural Organic Chemistry. 3 Credit Hours.

Use of electronic and vibrational spectroscopy in structure elucidation. Structure elucidation by modern NMR; EI, CI, MALDI and Electrospray mass spectrometry. Assignment of absolute configuration of chiral centers.

Prerequisite: CHM 202.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 526. CHM523 Medicinal Chemistry. 3 Credit Hours.

Medicinal chemistry is primarily concerned with the development of drug molecules, and the interpretation of their mode of action at the molecular level, with an emphasis on chemical synthesis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 530. Fluorescence Spectroscopy and Microscopy. 3 Credit Hours.

The photophysical properties of organic compounds that illustrates the fundamental principles of fluorescence. It also explains how fluorescence spectra and images can be recorded and how these powerful analytical techniques can be used to address significant problems in biology and medicine.

Prerequisite: CHM 304 and CHM 360.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 535. Molecular and Supramolecular Photochemistry. 3 Credit Hours.

Generation of a model that will help rationalize/predict excited state reactions. A brief background on physical aspects of photochemistry will be given. Exploring and understanding of reactions that are triggered by light. Importance of light in life will be highlighted.

Prerequisite: CHM 201 and CHM 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 541. Principles of Bonding and Reactivity in Inorganic Chemistry. 3 Credit Hours.

Bonding principles necessary to understand the structure, stability, and fundamental reactivity of main group and transition metal inorganic compounds.

Prerequisite: CHM 365.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 553. Modern Quantum Chemistry. 3 Credit Hours.

Many-electron wave functions and operators. Hartee-Fock approximation, density functional theory, configuration interaction, and many-body perturbation theory.

Prerequisite: CHM 365.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 565. Principles of Spectroscopic Techniques. 3 Credit Hours.

Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS), ultraviolet (UV), visible infrared (IR), fluorescence, and other specialized spectroscopic techniques.

Prerequisite: CHM 365.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 575. Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy. 3 Credit Hours.

Theory of nuclear magnetic resonance; Bloch equations; relaxation theory; time- domain versus frequency domain spectroscopies, and principles of multidimensional spectroscopy.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 591. Topics in Chemistry. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 592. Topics in Chemistry. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 593. Readings in Chemistry. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 594. Readings in Chemistry. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 620. Physical Organic Chemistry. 3 Credit Hours.

Aspects of chemical bonding, acids and bases, stereochemistry, aromaticity, pericyclic reactions, linear free energy relationships, transition state theory, excited state chemistry, reactive intermediaries, mechanisms of uni- and bi-molecular reactions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 622. Synthetic Organic Chemistry. 3 Credit Hours.

Functional group transformations, Synthron approach. Retro-synthetic analyses, multistep syntheses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 624. Supramolecular Chemistry. 3 Credit Hours.

Complexation, recognition, and catalysis as applied to bio-organic chemistry. Steric, polar, and lipophilic interactions as well as proximity effects in the design of synthetic enzyme mimics, cationic transport species, etc.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 625. Structural Organic Chemistry. 3 Credit Hours.

Use of electronic and vibrational spectroscopy in structure elucidation. Structure elucidation by modern NMR; EI, CI, MALDI and Electrospray mass spectrometry. Assignment of absolute configuration of chiral centers.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 626. Structural Organic Chemistry. 3 Credit Hours.

Use of electronic and vibrational spectroscopy in structure elucidation. Structure elucidation by modern NMR; EI, CI, MALDI and Electrospray mass spectrometry. Assignment of absolute configuration of chiral centers.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHM 630. Fluorescence Spectroscopy and Microscopy. 3 Credit Hours.

The photophysical properties of organic compounds that illustrates the fundamental principles of fluorescence. It also explains how fluorescence spectra and images can be recorded and how these powerful analytical techniques can be used to address significant problems in biology and medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 635. Molecular and Supramolecular Photochemistry. 3 Credit Hours.

Generation of a model that will help rationalize/predict excited state reactions. A brief background on physical aspects of photochemistry will be given. Exploring and understanding of reactions that are triggered by light. Importance of light in life will be highlighted.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 641. Principles of Bonding and Reactivity in Inorganic Chemistry. 3 Credit Hours.

Bonding principles necessary to understand the structure, stability, and fundamental reactivity of main group and transition metal inorganic compounds.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHM 653. Modern Quantum Chemistry. 3 Credit Hours.

Many-electron wave functions and operators. Hartee-Fock approximation, density functional theory, configuration interaction, and many-body perturbation theory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 655. Electrochemistry. 3 Credit Hours.

Modern electrochemical techniques including voltammetry, chronocoulometry, rotating disk electrode, and ultramicroelectrodes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 665. Principles of Spectroscopic Techniques. 3 Credit Hours.

Spectroscopic techniques: nuclear magnetic resonance (NMR), mass spectra (MS), ultraviolet (UV), visible infrared (IR), fluorescence, and other specialized spectroscopic techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 675. Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy. 3 Credit Hours.

Theory of nuclear magnetic resonance; Bloch equations; relaxation theory; time- domain versus frequency domain spectroscopies, and principles of multidimensional spectroscopy.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 691. Topics in Chemistry. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 692. Topics in Chemistry. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule following the title, "Topics in Chemistry."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 693. Readings in Chemistry. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 694. Readings in Chemistry. 1-3 Credit Hours.

Supervised readings on special topics. Offered by special arrangement. May be repeated for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 779. Chemistry Seminar. 1 Credit Hour.

Participation in the departmental seminar program. Required each semester the student is in residence and not enrolled in CHM 680 (excluding summer sessions).

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 780. Chemistry Seminar. 1 Credit Hour.

Participation in the chemistry department seminar program, including an oral presentation of special topics.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 785. Introduction to Research. 2 Credit Hours.

Research principles and practices, independent study in selected subject areas, and/or oral presentation of a proposed research topic. Open only to graduate students working toward the M.S. or Ph.D. in chemistry.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 788. Problems in Research Planning. 2 Credit Hours.

Formulation of a research program for investigating an original problem not related to the candidate's major laboratory research. A brief written summary and an oral defense of the plan will be required.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHM 805. Research Practices. 1-3 Credit Hours.

Research experiences in special techniques. For students electing the non-thesis M.S. option. May be repeated for a total not to exceed six credits.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

CHM 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CHM 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in CHM 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHM 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CHM 840. Post-candidacy Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CHM 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CHM 851. Research in Residence. 0 Credit Hours.

Components: THI.

Grading: GRD.

Chinese (CHI)

CHI 101. Elementary Chinese (Mandarin). 3 Credit Hours.

Conversation, grammar, reading, elementary composition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHI 102. Elementary Chinese (Mandarin). 3 Credit Hours.

Continuation of CHI 101, conversation, grammar, reading, elementary composition.

Prerequisites: CHI 101 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHI 201. Intermediate Chinese I. 3 Credit Hours.

Expanding further on language skills (grammar, composition and reading) while introducing students to aspects of Chinese customs, history and culture. Closed to native speakers.

Prerequisite: CHI 102 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CHI 202. Intermediate Chinese II. 3 Credit Hours.

Continuation of CHI 201. Further development of reading, writing, speaking and listening skills in Mandarin Chinese. CLOSED TO NATIVE SPEAKERS.

Prerequisite: CHI 201 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CHI 203. Advanced Chinese. 3 Credit Hours.

This course is designed to develop students' ability to use Chinese in a more advanced way. The course emphasizes accurate comprehension, expansion of vocabulary, and development of the ability to use increasing complex grammatical and sentence structures. In addition to improving their language abilities, students will also be exposed to different areas of Chinese culture.

Prerequisite: CHI 202.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CHI 204. Advanced Chinese II. 3 Credit Hours.

The course aims to develop students' ability to use Chinese in a more advanced way by continuing Chinese 203's emphasis on accurate comprehension, expansion of vocabulary, and development of the ability to use increasing complex grammatical and sentence structures. In addition to improving their language abilities, students will also be exposed to different areas of Chinese culture.

Prerequisite: CHI 203 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CHI 310. The Esoteric and the Mundane in the Chinese Literary Tradition. 3 Credit Hours.

Introduction to a variety of important genres and themes in the Chinese literary tradition through the close reading of texts spanning three millennia. Particular attention is paid to notions of humanity, divinity, and monstrosity.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CHI 330. The Powerful Women of Medieval China in History, Fiction, and Modern Media. 3 Credit Hours.

An interdisciplinary examination of the portrayals of ruling-class women who lived during the medieval period in China and who have become a part of the Chinese literary-historical tradition. Works to be examined include short stories, novels, plays, films, and television.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

Cinema and Interactive Media (CIM)

CIM 103. Survey of Motion Pictures. 3 Credit Hours.

Examination of the aesthetic, social, and economic aspects of the motion picture industry. Concentration on the present state of the medium with particular emphasis on future trends.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 111. Web Lab. 3 Credit Hours.

This course is a practical introduction to web design and marketing. Students will learn how to produce and market dynamic websites using modern content management systems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 113. Documentary Approaches. 3 Credit Hours.

Students will explore the varied forms and narrative approaches used in contemporary documentary filmmaking to understand the position of the filmmaker as a storyteller.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 126. Introduction to Screenwriting. 3 Credit Hours.

Creation and formatting of narrative material for motion pictures.

Emphasis on writing the short film.

Prerequisites: CIM 103 or JMM 102, ENG 106.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 151. Introduction to Digital Production. 3 Credit Hours.

Lectures and laboratory work to acquaint the student with the basic techniques of motion pictures. Digital equipment is used to develop an understanding of the motion picture as a creative tool of communication and expression.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 204. History of International Cinema I. 3 Credit Hours.

Examination of the origin and history of the motion picture. Narrative and non-fiction genres in the American and world cinemas from their inception through 1940 are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

CIM 205. History of International Cinema II. 3 Credit Hours.

Examination of the history of the motion picture from 1941 to the present. Narrative and non-fiction genres in the American and world cinemas are included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

CIM 211. Interaction Design. 3 Credit Hours.

In this class students will familiarize themselves with the disciplines of user experience (UX) and interaction design (IxD) by understanding and learning how to apply creative and abstract thinking skills to facilitate communication through the design of interfaces that connect information, products, services, and space. Students will be taught to prototype rich interactive experiences and to assess ease of use, utility, perception of the value of the system, and efficiency in performing tasks.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 251. Motion Picture Workshop: Storytelling. 3 Credit Hours.

The practice of the grammar of cinematic language including shot selection, composition, pacing, story clarity, performance, pre-visualization and pre-planning for the creation of short narrative projects. Through critiques, students encounter and interact with an audience of their peers. This course requires students to master contemporary technology in use in the profession.

Prerequisites: CIM 103, CIM 151.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 255. Essentials Of Documentary Film. 3 Credit Hours.

This course is designed to teach students how to tell compelling cinematic documentary stories with a clear and effective point-of-view. We will compare and analyze various styles of documentary storytelling and use these methods in creating effective documentaries films. An emphasis will be put on the various styles of documentary filmmaking.

Prerequisites: CIM 151 or JMM 245 or JMM 209.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 310. Introduction To Game Design. 3 Credit Hours.

This is an introductory course about game design, theory, and development, and how games align themselves as a lens of study for all interactive media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 326. Intermediate Screenwriting. 3 Credit Hours.

Study of, and practice in, writing feature length, narrative motion pictures. Development of story line in treatment form, attention to cinematic structure, the development of character, and its presentation on screen is discussed.

Prerequisite: CIM 126.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 329. Writing for Series Television. 3 Credit Hours.

An introduction to the structures and techniques of writing situation-comedy and dramatic series television.

Prerequisite: CIM 126.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 351. Introduction to Film Production. 3 Credit Hours.

Introduction to key set crew positions through lectures, exercises and the production of a collective narrative assignment. Students are required to master contemporary and traditional technology in use in the profession including 16mm cameras and sync sound recording.

Prerequisites: CIM 204, CIM 205, CIM 251.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 353. Post Production Sound Editing and Design. 3 Credit Hours.

Post production sound editing and design is a seminar/workshop that provides a practical and theoretical introduction to sound and its function in the narrative moving image process. The course explores the process from production recording through the final mix.

Prerequisite: CIM 351.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 356. Cinematography. 3 Credit Hours.

An overview of the cinematographer's process from script to screen. Working with camera, lighting, and grip equipment on exercises and projects is discussed.

Prerequisite: CIM 251.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 357. Editing. 3 Credit Hours.

Introduction to the theory and practice of motion picture editing. Short editing assignments are designed to develop students' understanding of aesthetic, and technical considerations in the art of dramatic editing.

Prerequisite: CIM 251.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 364. Business of Motion Pictures. 3 Credit Hours.

An examination of the industry's three part structure-production, distribution and exhibition. Consideration given to intellectual property, motion picture "creative accounting" and changes affected by new technologies. Surveys both studio films and independents.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 386. Online Screenwriting. 3 Credit Hours.

The student will prepare and complete the first act of a feature-length screenplay or the student will prepare and commence the rewrite of an existing screenplay.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 394. Special Topics in Motion Pictures. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Prerequisites: CIM 204, CIM 205.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 395. Directing Techniques I. 3 Credit Hours.

To teach the craft of directing through exercises, screen work, and readings.

Prerequisite: CIM 251.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 401. Nonfiction Film and Digital Media. 3 Credit Hours.

An examination of American and world nonfiction films and media.

Prerequisites: CIM 204 or CIM 205.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 403. Film Directors. 3 Credit Hours.

The study of the film authorship through a focus on specific directors.

Prerequisites: CIM 204 or CIM 205.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 404. Aspects of Contemporary Cinema. 3 Credit Hours.

Study of contemporary movements in American and world cinemas.

Prerequisites: CIM 204 or CIM 205.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 406. Genres. 3 Credit Hours.

Study of selected genres from a variety of critical perspectives. Issues pertaining to methodologies of defining and categorizing film are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 407. National Cinemas. 3 Credit Hours.

Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social, political and cultural contexts.

Prerequisites: CIM 204 or CIM 205.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 408. Women, Media, and Popular Culture. 3 Credit Hours.

Examination of film, media, and gender representation from the perspective of feminist theory and cultural studies. Students explore the many ways that women have been portrayed, and how they have portrayed themselves, within popular culture.

Prerequisites: CIM 204 or CIM 205.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 409. Legal Aspects of Motion Pictures. 3 Credit Hours.

The law, contracts, and negotiating techniques of the business affairs aspects of the production of motion pictures.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 413. Mobile Application Development. 3 Credit Hours.

This course will provide students the ability to conceptualize, design, and develop a mobile application of their choosing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 426. Advanced Screenwriting. 3 Credit Hours.

A continuation of CIM 326. Study of, and practice in, writing feature length, narrative motion picture scripts. Attention is given to cinematic structure, the development of character, and its presentation on screen. Emphasis is placed on bringing the script to a completed draft.

Prerequisite: CIM 326.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 429. Advanced Television Writing. 3 Credit Hours.

This course explores how to create, format, and write the original Television Pilot and treatment. The class will cover TV pilot format, length, structure as well as techniques in creating TV characters and situations for both comedy and dramatic episodic TV.

Prerequisite: CIM 329.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 451. Motion Picture Practicum. 3 Credit Hours.

The theory and practice of motion pictures production from script to screen. Lecture and laboratory. Students will develop and produce a narrative, a documentary, or an experimental work of their choice.

Prerequisite: CIM 351.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 456. Advanced Cinematography. 3 Credit Hours.

Advanced work with camera, lighting, and grip equipment on exercises and projects.

Prerequisite: CIM 356. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 457. Advanced Editing. 3 Credit Hours.

Advanced concepts in aesthetics and theories of picture and sound editing, mixing, color correction, and finishing techniques.

Prerequisite: CIM 357. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 458. Documentary Production. 3 Credit Hours.

Students produce two short digital documentaries and explore various approaches to the documentary film.

Prerequisite: CIM 151.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 462. Motion Picture Marketing and Distribution. 3 Credit Hours.

Economic and marketing considerations in the production and distribution of motion pictures.

Prerequisite: CIM 364.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 465. Producing the Motion Picture. 3 Credit Hours.

A practical examination of the development, production and marketing responsibilities in producing theatrical feature films. Focus is placed on the processes involved including the ethical considerations that confront the producer.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 471. Social Impact Games. 3 Credit Hours.

Students will explore the use of games as a communication tool for social good and will create their own game-based interventions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 489. Projects in Screenwriting. 3 Credit Hours.

Individual study. This course and CIM 499 cannot count for more than three credits towards a Communication major or minor.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 494. Motion Picture Internship. 1-3 Credit Hours.

Prescribed study and supervised work with practitioners in motion pictures.

Requisite: Sophomore Status, cumulative GPA of 2.5, and Permission of Instructor.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 499. Projects and Directed Research. 1-3 Credit Hours.

Individual study. No more than three credits may be counted toward a Communication major or minor.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 501. Principles of Aesthetics and Analysis. 3 Credit Hours.

Provides graduate students with introductory immersion in aesthetics, analysis, and history of film and media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 510. Foundation of Screenwriting. 3 Credit Hours.

This course explores the fundamental skill set necessary to manipulate the basic elements of cinematic writing. The course will investigate common dramatic elements found in all screenplays as well as teach format principles of feature, TV and emerging media scripts.

Prerequisite: CIM 126.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 511. Writing the Short Film. 3 Credit Hours.

A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film. Study of and practice in writing short narrative motion picture scripts. Focus is placed on concept, content, cinematic story structure and presentation of character.

Prerequisite: CIM 510.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 513. UX Research Methods. 3 Credit Hours.

This course provides a comprehensive overview of User Experience research methods and how they are incorporated into the product development lifecycle. Students will learn about user-centered design and will conduct a wide range of research methods including ethnography, questionnaires, online studies, and usability testing. There will be considerable focus on practicing research skills and reporting findings from these activities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 518. Seminar In Documentary Film History: Cinema-Verite. 3 Credit Hours.

The primary focus of this course will be on the half-century old school or tradition of documentary filmmaking associated with the terms "Cinéma-vérité" and "direct cinema". Through close analysis of selected classic and contemporary documentaries, the class will explore their historical significance, their aspirations and achievements as films, and their ways of addressing the aesthetic, epistemological, political and moral issues that inevitably arise when filmmakers take their sync-sound camera into the world and undertake to film life as it is really lived.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 519. Seminar In Documentary Production. 3 Credit Hours.

The Seminar in Documentary Production is the capstone production class within the documentary track of the Cinema and Interactive Media Department. Students are entered into the course based on a proposal that outlines their documentary project.

Prerequisites: CIM 255, CIM 458 or JMM 541.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 529. Nonfiction Film. 3 Credit Hours.

An examination of American and world nonfiction films.

Prerequisites: CIM 204 or CIM 205.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 540. Intro to Creative Coding. 3 Credit Hours.

This course will introduce students to the building blocks of creative coding within the visual and media environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 541. Technology Trends. 3 Credit Hours.

Trends is a foundation course intended to promote a dialogue about the current state of business, art, health, culture, and innovation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 542. Physical Computing And Prototyping. 3 Credit Hours.

This seminar will examine the differences and opportunities present, between a series of physical computing techniques and rapid prototyping.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 543. Intro To Systems: Designing Interactivity. 3 Credit Hours.

Students will explore the process of creating a dialogue between individuals or groups of people and a product, service, or system.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 544. Media Activism. 3 Credit Hours.

In this course, students will examine the role of media in shaping social reform to document social issues such as poverty, human rights, social inequities, the environment, and powerless groups. We will review the philosophy and history of media as activism ranging from photography, documentary, cinema, the Internet, social media and newer forms of media. Emphasis is placed on developing a critical understanding of current media advocacy practices with a conscious goal; awareness, change minds, to affect policy, and action. At the end of the semester, students will have a fully developed project concept.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 545. Managing Interactive Media Projects. 3 Credit Hours.

This course takes a comprehensive look at managing interactive media projects from inception to implementation and maintenance.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 550. Motion Graphics And Compositing. 3 Credit Hours.

Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design and green screen.

Prerequisites: CIM 204, CIM 205, CIM 251.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 551. Advanced Motion Graphics and Compositing. 3 Credit Hours.

Extend the 2D skills of students who have taken CIM 550 to 3D motion graphics and animation. Emphasis on title design and animation.

Prerequisite: CIM 550. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 552. Motion Picture Marketing and Distribution. 3 Credit Hours.

Economic and marketing considerations in the production and distribution of motion pictures.

Prerequisites: CIM 204 or CIM 205.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 553. Advanced Motion Picture Marketing. 3 Credit Hours.

Advanced marketing considerations in the distribution of motion pictures.

Prerequisite: CIM 552. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 560. Directing the Actor. 3 Credit Hours.

The purpose of this course is to teach and practice the craft of directing, including text analysis, characterization, visualization, design, intention and rehearsal: to train students to articulate their ideas to actors and film crew.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 566. Character and Dialogue. 3 Credit Hours.

An examination of the craft and techniques of creating original characters and dialogue.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 570. Producing the Motion Picture. 3 Credit Hours.

This course examines the creative and financial role performed by the Producer in the production of Hollywood and Independent films. Focus is on the Producer from development through marketing.

Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 590. Building Interfaces. 3 Credit Hours.

This course covers the production concepts and techniques to design and develop dynamic graphical user interfaces (GUIs) for web applications across multiple devices. Students will develop competency with several key technologies used in web development and providing them with the skills and principles needed to make effective use of these technologies.

Prerequisite: CIM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 591. Advanced Systems: Designing Playful Experiences. 3 Credit Hours.

Building on their systems foundation from the Intro to Systems course, students will continue to play and analyze the games along with designing games in order to build a more extensive vocabulary and toolkit to both understand and design interactive systems. Students will be exposed to a range of popular game prototyping technologies (for example: Twine, GameSalad, ARIS) and will create several mini projects as well as one final game project created using the platform of their choice. Students will explore a different core game mechanic with each prototyping tool thus broadening their ability to create targeted meaning within a playful experience.

Prerequisites: CIM 211 or CIM 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 593. Dynamic Data: Building Database Driven Websites. 3 Credit Hours.

This course teaches data analysis through the development of interactive web applications. The course focuses on communicating through computer programming. Students will learn to build and use databases as a primary source and explore data as content. For this course students will be required to build custom software solutions through web programming languages that utilize third party APIs to interpret, analyze and manipulate data.

Prerequisites: JMM 341 or CIM 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 594. Special Topics in Motion Picture. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 595. Directing Techniques. 3 Credit Hours.

To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.

Prerequisite: CIM 251. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 599. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. May be repeated for a maximum of six credits.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 601. Principles of Aesthetics and Analysis. 3 Credit Hours.

Provides graduate students with introductory immersion in aesthetics, analysis, and history of film and media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 603. Film Directors. 3 Credit Hours.

This course will address the conditions of authorship in film through an intensive study of the films of two or more directors, whose careers will serve as case studies. These directors will be historically important and their work will represent significant achievements in the art of film.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 604. Aspects of Contemporary Cinema. 3 Credit Hours.

The study of the ways in which film communicates. Intensive analysis and criticism of cinematic techniques exemplified through particular films.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 606. Genres. 3 Credit Hours.

A study of selected movie genres from a variety of critical perspectives. Issues pertaining to selfhood, sexual difference, and other concerns of present-day film criticism will be examined.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 608. National Cinemas. 3 Credit Hours.

Selected films from Europe, Asia, Africa and Latin America will be studied in relation to their diverse social/political and cultural contexts.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 609. Legal Aspects of Motion Pictures. 3 Credit Hours.

The law, contracts, and negotiating techniques of the business affairs aspects of the production of motion pictures.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 610. Foundation of Screenwriting. 3 Credit Hours.

This course explores the fundamental skill set necessary to manipulate the basic elements of cinematic writing. The course will investigate common dramatic elements found in all screenplays as well as teach format principles of feature, TV and emerging media scripts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 611. Writing the Short Film. 3 Credit Hours.

A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film. Study of and practice in writing short narrative motion picture scripts. Focus is placed on concept, content, cinematic story structure and presentation of character.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 612. Writing for Episodic Television. 3 Credit Hours.

The course will explore the art and craft required to write a "spec" Television episode. The course will explore how TV writing differs from feature writing and how the TV writer/producer business model works. By the end of the course the student will have finished an hour-long "spec" script for an existing TV show or a two-part sitcom teleplay.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 613. Mobile Application Development. 3 Credit Hours.

This course will provide students the ability to conceptualize, design, and develop a mobile application of their choosing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 618. Seminar In Documentary Film History: Cinema-Verite. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 619. Seminar In Documentary Production. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 620. Cinematography. 3 Credit Hours.

This hands-on course provides students with the aesthetic and technical aspects of professional concepts and techniques in film and digital media cinematography.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 621. Narrative Production. 3 Credit Hours.

An introduction to film and digital production techniques on narrative projects. Emphasis on collaboration, group process and social purpose. Students will be expected to produce a short film abroad as part of this course.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 622. Ux Research. 3 Credit Hours.

The course provides a comprehensive overview of User Experience research methods and how they are incorporated into the product development lifecycle. Students will learn about user-centered design and will conduct a wide range of research methods including ethnography, questionnaires, online studies, and usability testing. There will be considerable focus on practicing research skills and reporting findings from these activities.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 629. Nonfiction Film. 3 Credit Hours.

An examination of American and world nonfiction films.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 630. Introduction to Editing. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 635. Introduction to Design. 3 Credit Hours.

This course is an exploration of the fundamental elements of graphic form, movement, and interaction as expressive and meaningful agents in digital media. Students will work through a series of structured studio exercises designed to iteratively move them from simple to complex visual vocabularies, methods of analysis, workflows, and problem solving using mainstream as well as lesser known software tools. No prior design experience is required but assignments are designed to benefit students of all levels; graduate students will have more flexibility for adapting work to their thesis subject.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 636. Collaborative Innovation Laboratory. 3 Credit Hours.

In this collaboration studio course, students will form small teams and undertake real-world projects with a partnering organization. Students will be provided a design brief outlining project objectives identified by the partnering organization. Over the course of the semester, students will research, brainstorm, design, and test innovative interactive solutions for this core objective, including proposing ideas and presenting prototypes to the partnering organization. Projects that satisfy the partner's needs may result in on-going work for full implementation and exposure for students' work.

Components: LEC.

Grading: GRD.

CIM 640. Intro to Creative Coding. 3 Credit Hours.

This course will introduce students to the building blocks of creative coding within the visual and media environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 641. Technology Trends. 3 Credit Hours.

Trends is a foundation course intended to promote a dialogue about the current state of business, art, health, culture, and innovation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 642. Physical Computing And Prototyping. 3 Credit Hours.

This seminar will examine the differences and opportunities present, between a series of physical computing techniques and rapid prototyping.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 643. Intro To Systems: Designing Interactivity. 3 Credit Hours.

Students will explore the process of creating a dialogue between individuals or groups of people and a product, service, or system.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 644. Media Activism. 3 Credit Hours.

In this course, students will examine the role of media in shaping social reform to document social issues such as poverty, human rights, social inequities, the environment, and powerless groups. We will review the philosophy and history of media as activism ranging from photography, documentary, cinema, the Internet, social media and newer forms of media. Emphasis is placed on developing a critical understanding of current media advocacy practices with a conscious goal; awareness, change minds, to affect policy, and action. At the end of the semester, students will have a fully developed project concept.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 645. Managing Interactive Media Projects. 3 Credit Hours.

This course takes a comprehensive look at managing interactive media projects from inception to implementation and maintenance.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 651. Motion Graphics And Compositing. 3 Credit Hours.

Methods, techniques and aesthetics of 2D computer animation and compositing including animated text, title design and green screen.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 654. Advanced Motion Graphics and Compositing. 3 Credit Hours.

Extend the 2D skills of students who have taken CMP 550 to 3D motion graphics and animation. Emphasis on title design and animation.

Prerequisite: CIM 651.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 658. Documentary Production. 3 Credit Hours.

An introduction to the documentary genre including the production of a documentary from start to finish.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 660. Directing the Actor. 3 Credit Hours.

The purpose of this course is to teach and practice the craft of directing, including text analysis, characterization, visualization, design, intention and rehearsal: to train students to articulate their ideas to actors and film crew.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 666. Character and Dialogue. 3 Credit Hours.

An examination of the craft and techniques of creating original characters and dialogue.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 670. Producing the Motion Picture. 3 Credit Hours.

This course examines the creative and financial role performed by the Producer in the production of Hollywood and Independent films. Focus is on the Producer from development through marketing.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 686. Online Screenwriting. 3 Credit Hours.

The student will prepare and complete the first act of a feature-length screenplay or the student will prepare and commence the rewrite of an existing screenplay.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 690. Building Interfaces. 3 Credit Hours.

This course covers the production concepts and techniques to design and develop dynamic graphical user interfaces (GUIs) for web applications across multiple devices. Students will develop competency with several key technologies used in web development and providing them with the skills and principles needed to make effective use of these technologies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 691. Capstone. 3 Credit Hours.

The capstone seminar is designed to demonstrate a student's accumulated training in Interactive Media in a single original project of their choice, subject to the instructor's approval and under the additional supervision of a faculty mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 692. Advanced Systems: Designing Playful Experiences. 3 Credit Hours.

Building on their systems foundation from the Intro to Systems course, students will continue to play and analyze the games along with designing games in order to build a more extensive vocabulary and toolkit to both understand and design interactive systems. Students will be exposed to a range of popular game prototyping technologies (for example: Twine, GameSalad, ARIS) and will create several mini projects as well as one final game project created using the platform of their choice. Students will explore a different core game mechanic with each prototyping tool thus broadening their ability to create targeted meaning within a playful experience.

Prerequisite: CIM 643.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 693. Dynamic Data: Building Database Driven Websites. 3 Credit Hours.

This course teaches data analysis through the development of interactive web applications. The course focuses on communicating through computer programming. Students will learn to build and use databases as a primary source and explore data as content. For this course students will be required to build custom software solutions through web programming languages that utilize third party APIs to interpret, analyze and manipulate data.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 694. Motion Picture Marketing and Distribution. 3 Credit Hours.

Economic and marketing considerations in the production and distribution of motion pictures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 695. Advanced Motion Picture Marketing. 3 Credit Hours.

Advanced marketing considerations in the distribution of motion pictures.

Prerequisite: CIM 694.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 696. Directing Techniques. 3 Credit Hours.

To build a more advanced set of professional skills and practices through scene work, shooting, and collaboration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 697. Topics In Film Analysis. 3 Credit Hours.

Content varies by semester. Topics such as Film Directors, National Cinemas, Silent Film, Contemporary Cinema. Course may be repeated for credit if content varies.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 705. Production Management. 3 Credit Hours.

A comprehensive examination of the skills and techniques employed by line producers and production managers in the preproduction, production, and post-production of motion pictures.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 707. Pedagogy And Film. 3 Credit Hours.

This course covers a range of traditions in pedagogy, including history, theory, and practical applications. Intended for those who are currently teaching—or who intend to teach—at the college level, the course provides grounding in foundational approaches as well as a familiarity with recent research advancements in pedagogy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 710. Writing the Feature-Length Screenplay. 3 Credit Hours.

Study of and practice in writing feature-length, narrative motion picture scripts. Focus is placed on cinematic structure and presentation of character. Classes will generally be conducted as follows: a discussion of screenplay craft, an in-depth analysis of various films from the writer's POV, and a critique of the various stages of your fellow student screenplays as they evolve throughout the semester.

Prerequisite: CIM 510.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 721. Game Development Studio. 3 Credit Hours.

Components: LEC.

Grading: CNC.

Typically Offered: Fall.

CIM 727. Scriptwriting. 3 Credit Hours.

Study of and practice in writing feature-length, narrative motion picture scripts. Focus is placed on cinematic structure and presentation of character.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CIM 730. Advanced Editing. 3 Credit Hours.

An examination of the art and techniques of post-production designed for students completing advanced motion picture projects. Lectures, group discussions and screenings. Emphasis on rhythm, dramatic moments, character arcs, symbolic vs. thematic editing, elements of sound editing, sound design, and professional mastering standards. This class is designed to develop editorial skills that will prepare students for professional careers in editing. In-depth examination of effects and sound palettes of the Avid Media Composer, as well as a discussion of how to integrate visual effects from external applications. Finishing and mastering techniques for a variety of mediums as well as a reel building will be covered.

Prerequisite: CIM 630.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 738. Writing the Short Film. 3 Credit Hours.

A course in the fundamentals of screenwriting focused on the creation of a 15-30 page screenplay suitable for an MFA project film.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 740. Sound Design. 3 Credit Hours.

Sound Design through seminar and workshop provides a practical and theoretical introduction to sound and its function in the narrative moving image process. The course utilizes professional environments to instruct in the basics of sound editing, studio recording and mixing as it is practiced in the film industry. It will also present the aesthetic use of sound and its integral part in the moving image narrative process.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 752. Advanced Cinematography. 3 Credit Hours.

Advanced technical and photographic principles begun in CMP 651.

Preparation for the filming of the MFA project film.

Prerequisite: CIM 620.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 756. Motion Picture Post-Production Procedures. 3 Credit Hours.

An examination of the esthetics of editing, recording, re-recording, and laboratory procedures following completion of principal photography.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CIM 761. Directing The Camera. 3 Credit Hours.

An introduction to directing actors in low budget, independent films utilizing traditional, modern and evolving directorial techniques used by independent and traditional film makers: analyzing and orchestrating scripted material, developing a directorial concept, creating indelible characterizations, building a visual image, auditioning and casting the talent, blocking and directing the untrained amateur or highly skilled professional actor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CIM 794. Motion Picture Internship. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CIM 795. Special Topics in Motion Pictures. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 799. Advanced Projects and Directed Research. 1-6 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CIM 815. MFA Thesis. 1-6 Credit Hours.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CIM 850. Production Workshop II - Individual Projects. 3 Credit Hours.

A concentration on four distinctive film directors and their work.

Utilization of techniques from film theory, film criticism, and film history to arrive at a definition of their unique cinematic styles.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

Civil and Architectural Engineering (CAE)

CAE 100. Introduction to Civil, Architectural, and Environmental Engineering. 3 Credit Hours.

This introductory course is designed to expose high school students to a variety of specific disciplines within the civil engineering arena to assist them in making informed decisions about possible college majors. The program is designed for the exemplary high school student interested in applied mathematics and science. All students enrolled in this course will gain experience in problem solving, engineering mechanics, computer simulation, and laboratory activity. The course content changes throughout the 3-week duration and includes topics on civil engineering, environmental engineering, and architectural engineering. The students will be provided with an understanding and some hands-on experience on topics relative to the disciplines of civil, architectural, and environmental engineering. Via an introduction to several case histories, the students will be able to understand the challenges associated with the design and construction and importance of the scientific methods in engineering. The laboratory and field trip experiences will deal with bridge building, material testing, water purification, and building systems.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

CAE 111. Introduction to Engineering I. 3 Credit Hours.

Use of engineering tools for problem solving. Computer techniques for data acquisition, analysis and presentation, software design, and computer aided drafting are covered. Development of design skills is achieved through several design and building competitions. Introduction to professional ethics and intellectual property rights, MATLAB, AutoCAD, and programming in C++ is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 112. Introduction to Engineering II. 2 Credit Hours.

Hands-on applications of various surveying instruments for leveling, angles and distance measurements, and other engineering applications. Hands on application of Geographic Information Systems, including ArcView and extensions.

Prerequisite: CAE 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 210. Mechanics of Solids I. 3 Credit Hours.

Vectors, force systems, equilibrium, analysis of frames, machines, trusses for internal forces, friction, centroids, moment of inertia, and shear and bending moment diagrams are discussed.

Prerequisites: PHY 205, MTH 151 or MTH 161 or MTH 171, and Non Engineering majors: PHY 101, PHY 103, PHY 160, PHY 201 and MTH 130, MTH 151, MTH 161, MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 211. Mechanics of Solids II. 3 Credit Hours.

Flexural, shear, principal, and torsional stresses are discussed as well as displacements and instability. An introduction to statically indeterminate analysis is also included.

Prerequisite: CAE 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 212. Structural Laboratory. 1 Credit Hour.

Laboratory techniques, tests for tension, compression, shear, bending, and torsion are discussed. Models, similitudes, buckling of columns, and review of current research are also included. Laboratory 3 hours.

Corequisite: CAE 211.

Prerequisite: IEN 311. Or Corequisites: IEN 311 or CAE 211. Or Requisite: Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 213. Behavior of Structural Systems I. 3 Credit Hours.

Design and testing of experimental models of qualitative and quantitative prediction of full scale structural behavior. Investigation of single and multi-story rectangular frames, curved structures and longspan buildings. Application of graphical and analytical techniques to determine basic system layout and preliminary dimensioning of key subsystems and members is also included.

Prerequisite: ARC 231.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 240. Environmental Pollution. 3 Credit Hours.

Exploration of contemporary environmental issues. Introduction to engineering approaches for protecting and cleaning up the environment, techniques for assessing the impact of human activity on the environment, strategies for pollution control and implementation of environmental mitigation measures.

Requisite: Sophomore Status.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 310. Structural Analysis. 3 Credit Hours.

Analysis of statically determinate and indeterminate structures for internal forces, external reactions, displacements, including influence lines.

Prerequisite: CAE 211.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 313. Behavior of Structural Systems II. 3 Credit Hours.

Overall analysis of simple and multi-story frame structures. Consideration of flat plates, prestressed concrete flat slabs, slab and beam, joist and girder, waffle and space truss systems, columns, wall and rigid frame subsystems under vertical and horizontal loads. Application of structural model analysis to supplement or supplement mathematical analysis is included.

Prerequisite: CAE 213.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 320. Concrete Structures. 3 Credit Hours.

Course topics include design of concrete beams, columns, structural systems one-way slabs, and isolated footings by ultimate design methods.

Prerequisite: CAE 310. Or Corequisite: CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 321. Steel Structures. 3 Credit Hours.

Design of tension, compression, flexural members, and beam columns using load and resistance factor design are discussed. Introduction to design and detailing of welded and bolted connections is also included.

Prerequisite: CAE 310. Or Corequisite: CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 330. Fluid Mechanics. 3 Credit Hours.

Properties of fluids, gas systems, pressure distribution in static fluids, and hydrostatic forces on plane and curved surfaces are discussed. Kinematics and dynamics of fluid motion, dimensional analysis and similitude, flow in closed conduits, pumps, design of water distribution systems, and an introduction to flow in open channels is also included.

Prerequisite: CAE 210 and PHY 206.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 340. Introduction to Environmental Engineering. 3 Credit Hours.

Environmental mass and energy balances, introduction to environmental chemistry, air pollution, water pollution, sustainable solid waste management, risk assessment, and global atmospheric change are discussed.

Prerequisite: MTH 162, and CHM 111 or CHM 151.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 345. Environmental Laboratory And Analysis. 3 Credit Hours.

Laboratory-based course focusing on the analysis of environmental samples including water, wastewater, air, and solids. Basic analytical techniques and quality control are also included as well as an introduction to advanced analytical measurements.

Prerequisite: CHM 112 and CAE 340.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 350. Transportation Engineering I. 3 Credit Hours.

Transportation systems and organizations. Characteristics of driver, vehicles and roads. Basic probability and statistics. Traffic studies and data collection. Signal timing design, basic capacity and analysis. Basic geometric design and route surveying. Highway safety. Sustainable transportation systems.

Prerequisite: MTH 211. Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 370. Geotechnical Engineering I. 3 Credit Hours.

Soil composition and classification, excavation, grading, fill compaction, stress distribution in soils, one-dimensional flow of water through soil, laboratory, and field permeability, effective stress concept, calculation of consolidation, field settlement, bearing capacity, and design and analysis of shallow foundations are discussed.

Prerequisite: CAE 211. Corequisite: CAE 371.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 371. Geotechnical Laboratory. 1 Credit Hour.

Evaluation of physical and mechanical properties of soils, and preparation of reports. Three hours.

Prerequisite: ENG 107 and IEN 311. Corequisite: CAE 370.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 380. Electrical and Illumination Systems for Buildings. 3 Credit Hours.

Typical electrical systems for buildings including electrical circuits, protective devices and code requirements. Illumination and lighting design.

Prerequisite: PHY 207.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 381. Building Mechanical Systems I: Hvac Fundamentals. 3 Credit Hours.

Moist air properties and psychrometric chart. Indoor air quality and thermal comfort. Air conditioning systems and processes. Heat transfer in buildings. Solar radiation. Space load analysis and calculation.

Prerequisite: MAE 303 and CAE 330.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 395. Undergraduate Research. 1-3 Credit Hours.

Designed for the undergraduate student who wishes to engage in research. Not for graduate credit or for baccalaureate graduation credit. Subject and credit to be arranged with the instructor.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

CAE 399. Internship. 1 Credit Hour.

Practical application of classroom theory through employment with firms offering positions consistent with the student's field of study. Courses may be repeated.

Components: IND.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 400. Preparation for FE Exam. 1 Credit Hour.

Review of material in preparation for the Fundamentals of Engineering (FE) examination. For credit only.

Requisite: Senior Status.

Components: LEC.

Grading: CNC.

Typically Offered: Offered by Announcement Only.

CAE 402. Professional Engineering Practice. 3 Credit Hours.

Principles of engineering economics and economic evaluation of engineering projects. A discussion of professional practice issues including the philosophy and methodology of engineering, professional licensure and ethics. Discussion of the business aspects of engineering including business organization, management, contracts and legal issues. Engineering leadership in the formulation of public policy.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CAE 403. Senior Design Project I - Civil & Architectural. 1 Credit Hour.

Two-semester comprehensive design project based on the knowledge and skills acquired in earlier coursework and incorporating engineering standards and realistic constraints. The faculty coordinator and several practicing engineers/architects provide consultation, guidance, and recommendations on aspects such as problem definition, evaluation of design approaches, design development, and the preparation of construction documents.

Requisite: Senior Status and Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 404. Senior Design Project II - Civil & Architectural. 2 Credit Hours.

Second semester of a two-semester comprehensive design project based on the knowledge and skills acquired in earlier coursework and incorporating engineering standards and realistic constraints. The faculty coordinator and several practicing engineers/architects provide consultation, guidance and recommendations on aspects such as problem definition, evaluation of design approaches, design development and the preparation of construction documents. Prerequisite: CAE 403.

Prerequisite: CAE 403.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 421. Timber Structural Systems. 3 Credit Hours.

Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included. Prerequisite: CAE 310.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 430. Water-Resources Engineering I. 3 Credit Hours.

Basic principles of open channel flow. Computation of water surface profiles. Design of hydraulic structures, design of lined and unlined open channels, and design of sanitary sewer systems. Introduction to hydrology and analysis of hydrologic data. Rainfall characteristics and peak runoff models.

Prerequisite: CAE 330.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 440. Water Quality Control Systems. 3 Credit Hours.

Principles of domestic wastewater treatment, design of biological and chemical waste treatment processes, design and sizing of small scale treatment units, and design of water treatment processes are discussed. An introduction to industrial waste treatment.

Prerequisite: CAE 330 and CAE 340.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 450. Transportation Engineering II. 3 Credit Hours.

Transportation system planning and design. Advanced geometric design for highway and railway/transit. Human, vehicle, and environmental factors affecting the design, operation, and safety of transportation systems. Planning and design of both landside/airside aspects of airport facilities. Water port and multi-modal facilities design.

Prerequisite: CAE 350.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 460. Construction Management. 3 Credit Hours.

An introduction to the management of construction projects including legal considerations as well as the techniques of management science applied to construction. The course includes engineering methods of cost and time estimating, and exercises in applications of engineering economics, network planning techniques, including CPM and PERT are introduced. The management principles of time and cost control are also explored. Computer application of project management tools are included.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 470. Foundations and Earth Retaining Systems. 3 Credit Hours.

Natural soil deposits and subsoil exploration. Geotechnical analysis and design of shallow and deep foundations. Theories of lateral earth pressure. Design and analysis of earth-filled retaining systems.

Prerequisite: CAE 330, CAE 370, and CAE 371.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 480. Plumbing and Life Safety For Buildings. 3 Credit Hours.

Design of Building environmental systems including domestic cold and hot water systems, sanitary storm and special waste systems, fuel gas systems, building life safety systems and architectural acoustics.

Prerequisite: CAE 330.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 481. Building Mechanical Systems II: HVAC Systems. 3 Credit Hours.

Applies engineering principles to the design of heating, ventilating, and air conditioning (HVAC) systems for buildings. Covers air distribution systems, air handling units, coils and heat exchangers, water distribution systems, and primary systems.

Prerequisite: CAE 381.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 510. Structural Mechanics. 3 Credit Hours.

Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 511. Advanced Structural Analysis. 3 Credit Hours.

General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional, and composite members. Basic flexural and stiffness methods and matrix development are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 520. Advanced Design of Concrete Structures. 3 Credit Hours.

Design of reinforced concrete flat plates, flat slabs, two-way slabs, long columns, and slab-column connections are discussed. Deflections, crack widths, and background of current ACI Building Code are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 521. Advanced Design of Steel Structures. 3 Credit Hours.

Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 522. Design of Prestressed Concrete Structures. 3 Credit Hours.

Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included. Prerequisite: CAE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 523. Design of Masonry Structures. 3 Credit Hours.

Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 525. Timber Structural Systems. 3 Credit Hours.

Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 530. Water Resources Engineering II. 3 Credit Hours.

Runoff models, routing models, water-quality models, and evapotranspiration models. Design of storm water management systems. Principles of groundwater flow. Design of wells and wellfields for public water supply. Legal regulatory, and economic components of water-resources management systems. Comprehensive design project.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 531. Surface-Water Hydrology. 3 Credit Hours.

Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of stormwater-management systems, evapotranspiration, and regional water-management is also included as well as case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 532. Ground-Water Hydrology. 3 Credit Hours.

Governing equations of ground-water flow. Numerical modeling of ground-water flow. Analytic and semi-analytic solutions to the flow equations. Principle of superposition and method of images. Saltwater intrusion. Ground-water flow in the unsaturated zone. Engineered systems. Introduction to contaminant fate and transport in ground water.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 533. Water-Quality Control in Natural Systems. 3 Credit Hours.

Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 540. Environmental Chemistry. 3 Credit Hours.

Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 541. Engineering Systems For Disease Control And Bioremediation. 3 Credit Hours.

Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 542. Solid and Hazardous Waste Engineering. 3 Credit Hours.

Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered. Design projects are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 543. Air Pollution Control Engineering. 3 Credit Hours.

Fundamentals of air pollution and air quality; properties and control of particulates, volatile organic compounds, carbon monoxide, sulfur oxides, and nitrogen oxides; motor vehicle emissions; health and aesthetic effects (acid rain, visibility), laws and regulations, meteorology and pollutant transport in the atmosphere; indoor air pollution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 553. Transportation Systems Planning and Demand Modeling. 3 Credit Hours.

Transportation demand analysis and forecasting. Sampling techniques, collection and analysis of survey data. Disaggregate and aggregate models. Trip generation, distribution, modal split and assignment. Transportation network equilibrium. Transportation system management.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 560. Sustainable Construction. 3 Credit Hours.

Drivers and foundations of sustainable construction. Principles of sustainable construction: integrated planning and design, life-cycle view of projects, resource selection and optimization, protection of the natural environment, toxics and pollutants elimination, durability and quality. Green building assessment initiatives, green building policies, and code impacts. Evaluation of the environmental impacts of construction operations. Innovative design and construction practices. Economic viability. Subtropical and coastal issue and opportunities. Case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 561. Computer Aided Architectural Engineering Design. 3 Credit Hours.

The course prepares students to utilize Building Information Modeling (BIM) and Building Performance Analysis (BPA) in a coordinated, integrated and consistent approach in the Architecture, Engineering and Construction (AEC) Industry. The basics of high-quality 5 dimensional BIM modeling are covering including 3D modeling of buildings and building components, imbedded cost-estimating and the phasing the construction process. Basics of REVIT Structure and MEP are also covered. BPAC components covered include climate analysis, daylighting, wind and airflow analysis, solar radiation analysis and whole building energy analysis. Upon completion student will receive a PBA certification from Autodesk

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 570. Advanced Foundation Engineering. 3 Credit Hours.

Rock and soil formation. Subsurface exploration. Advanced design and analysis of shallow and deep foundations. Design and analysis of cofferdams.

Prerequisite: CAE 470. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 580. Hospital and Health Care Facility Design. 3 Credit Hours.

Planning, design, and construction of modern hospital and health care facilities. Design criteria for functional services, and required structural and patient safety. Design standards. Discussion of construction related topics and problems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 581. Energy-Efficient Building Design. 3 Credit Hours.

Concepts and methods of energy-efficient building design and sustainable performance. Topics cover building envelope, mechanical, power and lighting, and service water heating systems. Computer-based energy simulation methods and building energy standards are emphasized.

Prerequisite: CAE 481.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 582. Energy-Efficient Building Design. 3 Credit Hours.

Course cancelled 3/25/2002. See CAE 581.

Components: LEC.

Grading: GRD.

CAE 590. Special Topics. 1-3 Credit Hours.

Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 591. Special Topics. 1-3 Credit Hours.

Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 594. Special Topics. 1-3 Credit Hours.

Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 595. Special Problems. 1-4 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 599. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: IND.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

CAE 610. Structural Mechanics. 3 Credit Hours.

Analysis of stress and deformation of solids. Application to systems in the elastic and inelastic range. Topics include beams of special geometry and support, stress concentrations, stresses in elastic foundations, torsion, energy methods, failure theories, and brittle fracture.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 611. Advanced Structural Analysis. 3 Credit Hours.

General methods of indeterminate analysis. Elements of energy method in indeterminate analysis of axial, flexural torsional, and composite members. Basic flexural and stiffness methods and matrix development are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 620. Advanced Design of Concrete Structures. 3 Credit Hours.

Design of reinforced concrete flat plates, flat slabs, two-way slabs, long columns, and slab-column connections are discussed. Deflections, crack widths, and background of current ACI Building Code are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 621. Advanced Design of Steel Structures. 3 Credit Hours.

Steel framing systems, design of members and connections of braced and rigid frames, design for torsion, and design of steel-concrete composite members are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 622. Design of Prestressed Concrete Structures. 3 Credit Hours.

Materials and systems for prestressing, design of prestressed concrete members for flexure and shear, camber, deflection, and crack control are discussed. Design of continuous beams, compression members, two-way concrete floor systems, and the loss of prestress are also included.

Prerequisite: CAE 320.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 623. Design of Masonry Structures. 3 Credit Hours.

Masonry construction. Design of flexural and compression members, bearing walls, shear walls, diaphragms, and connections of masonry structures. Arches, vaults, and buttresses are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 625. Timber Structural Systems. 3 Credit Hours.

Engineering properties of timber, design of tension, compression, and flexural members are covered. The design and detail of connections and hardware, and the design of timber systems and heavy timber construction is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 630. Water Resources Engineering II. 3 Credit Hours.

Runoff models, routing models, water-quality models, and evapotranspiration models. Design of storm water management systems. Principles of groundwater flow. Design of wells and wellfields for public water supply. Legal regulatory, and economic components of water-resources management systems. Comprehensive design project.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 631. Surface-Water Hydrology. 3 Credit Hours.

Rainwater characteristics, abstraction processes, surface-runoff, routing, and water-quality models. Design of stormwater-management systems, evapotranspiration, and regional water-management is also included as well as case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 632. Ground-Water Hydrology. 3 Credit Hours.

Governing equations of ground-water flow. Numerical modeling of ground-water flow. Analytic and semi-analytic solutions to the flow equations. Principle of superposition and method of images. Saltwater intrusion. Ground-water flow in the unsaturated zone. Engineered systems. Introduction to contaminant fate and transport in ground water.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 633. Water-Quality Control in Natural Systems. 3 Credit Hours.

Water quality regulations, fate and transport processes, water-quality control in rivers, lakes, wetlands, oceans, and ground water.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 640. Environmental Chemistry. 3 Credit Hours.

Kinetics, equilibrium, acid-base, oxidation-reduction, and reaction chemistry applied to water and wastewater engineering.

Prerequisite: CAE 603.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 641. Engineering Systems For Disease Control And Bioremediation. 3 Credit Hours.

Classification of microorganisms. Microbial agents of infectious diseases and modes of disease transmission. Control of pathogens through water and waste treatment, food protection, and insect control. Microbial ecology and bioremediation systems. Laboratory exercises in microbiology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 642. Solid and Hazardous Waste Engineering. 3 Credit Hours.

Solid-waste characteristics, recycling, incineration, hazardous waste characteristics, prevention, and physical and chemical treatment are covered. Design projects are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 643. Air Pollution Control Engineering. 3 Credit Hours.

Fundamentals of air pollution and air quality; properties and control of particulates, volatile organic compounds, carbon monoxide, sulfur oxides, and nitrogen oxides; motor vehicle emissions; health and aesthetic effects (acid rain, visibility), laws and regulations, meteorology and pollutant transport in the atmosphere; indoor air pollution.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 653. Transportation Systems Planning and Demand Modeling. 3 Credit Hours.

Transportation demand analysis and forecasting. Sampling techniques, collection and analysis of survey data. Disaggregate and aggregate models. Trip generation, distribution, modal split and assignment. Transportation network equilibrium. Transportation system management.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 660. Sustainable Construction. 3 Credit Hours.

Drivers and foundations of sustainable construction. Principles of sustainable construction: integrated planning and design, life-cycle view of projects, resource selection and optimization, protection of the natural environment, toxics and pollutants elimination, durability and quality. Green building assessment initiatives, green building policies, and code impacts. Evaluation of the environmental impacts of construction operations. Innovative design and construction practices. Economic viability. Subtropical and coastal issue and opportunities. Case studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 661. Computer Aided Architectural Engineering Design. 3 Credit Hours.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CAE 670. Advanced Foundation Engineering. 3 Credit Hours.

Rock and soil formation. Subsurface exploration. Advanced design and analysis of shallow and deep foundations. Design and analysis of cofferdams.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 680. Hospital and Health Care Facility Design. 3 Credit Hours.

Planning, design, and construction of modern hospital and health care facilities. Design criteria for functional services, and required structural and patient safety. Design standards. Discussion of construction related topics and problems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 681. Energy-Efficient Building Design. 3 Credit Hours.

Concepts and methods of energy-efficient and environmentally-friendly building design. Topics include energy and sustainable design strategies, climate, passive and active solar design, passive cooling systems, day lighting, and computer simulation of energy flows in buildings. A quantitative understanding of energy fundamentals, examples from practice, and design exercises using computer simulation programs are emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CAE 682. Energy-Efficient Building Design. 3 Credit Hours.

Course cancelled 3/25/2002. See CAE 581.

Components: LEC.

Grading: GRD.

CAE 690. Special Topics. 1-3 Credit Hours.

Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 691. Special Topics. 1-3 Credit Hours.

Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 694. Special Topics. 1-3 Credit Hours.

Sub-titles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Special Topics."

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 695. Special Problems. 1-4 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 699. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 702. Finite Element Methods. 3 Credit Hours.

Variational principles and their application to finite element methods. Applications to: plane stress and plane strain, three-dimensional stress analysis, bending of plates, and axi-symmetric shells. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 703. Master's Design Project I. 3 Credit Hours.

Comprehensive design project in civil, architectural, or environmental engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CAE 704. Master's Design Project II. 3 Credit Hours.

Continuation of CAE 703.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 705. Master's Project. 3 Credit Hours.

Project in civil, architectural, and environmental engineering. Course is required for the non-thesis master's student.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CAE 711. Theory of Elasticity. 3 Credit Hours.

Analysis of stress, strain, and displacement in elastic solids. Basic equations of elasticity. Two-dimensional solutions of beams and other problems in rectangular and polar coordinates. Torsion of bars. Energy methods. Selected topics. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 712. Structural Reliability. 3 Credit Hours.

Development of structural safety concepts, design code applications, load process analysis, and interaction of load and resistance variability. Consideration is given to structural system serviceability and safety.

Prerequisite: IEN 311 or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 714. Structural Dynamics. 3 Credit Hours.

Dynamic responses of structural elements in both the elastic and inelastic ranges. Lagrange's equations, energy models, numerical and analytical methods, vibrations of continuous systems (beams and plates) are discussed. Assigned readings.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 716. Fracture Mechanics. 3 Credit Hours.

Theory of fracture mechanics for linear elastic and nonlinear material behavior, energy release rate, stress intensity factor, and J-integral with practical application to brittle fracture and fatigue. Case studies involving civil infrastructure such as bridges, buildings, pipelines and ships. Metallurgical aspects of fatigue and fracture.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 730. Environmental Hydrology. 3 Credit Hours.

Principles of ecohydrology, agricultural hydrology, impacts of climate change, fundamentals of remote sensing and geographic information systems for hydrologic applications, statistical applications in hydrology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 731. Wastewater Treatment and System Design. 3 Credit Hours.

Characterization of domestic wastewater and flows. Sources of wastewater and health considerations. Unit processes for treatment of wastewater including screening, sedimentation, filtration, flocculation floatation, activated sludge, disinfection, sludge digestion, and sludge disposal.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 732. Water Treatment and System Design. 3 Credit Hours.

Drinking water treatment standards, philosophy of setting standards, public health aspects of organic and inorganic contaminants, basis for design of treatment facilities, design of unit processes for aeration, sedimentation, coagulation, filtration, softening, disinfection, and oxidation are covered. Theory of membrane processes, ion exchange, and water treatment plant residuals are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 735. Water and Wastewater Engineering: Treatment and Reuse. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 743. Risk Analysis. 3 Credit Hours.

Probabilistic risk assessment, Poisson processes, Bayesian methods, fault trees, contaminant transport models, and dose-response relationships for assessment of natural and technological risks.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 780. Indoor Environmental Modeling. 3 Credit Hours.

Prediction of indoor environment using computational fluid dynamics techniques. Advanced topics in thermal comfort and indoor air quality. Basic concepts of turbulence modeling and numerical methods for natural, forced, and mixed convection and jet flows indoors. Simulation of air velocity, temperature, and contaminant concentrations in buildings. Comparison of the simulated results with measured data.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 790. Special Problems. 1-3 Credit Hours.

Research and/or design projects. Individual investigation of current problems. Offered by special arrangement only.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 795. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 796. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 797. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CAE 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her Master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 820. Research in Residence. 1-6 Credit Hours.

Used to establish research in residence for the thesis for the Master's degree after the student has enrolled for the permissible cumulative total in CAE 710 (usually six credits). Credit not granted. May be regarded as full-time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full-time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of CAE 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in CAE 740 may be taken in a regular semester, nor more than six credits in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

CAE 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Classics (CLA)

CLA 220. Greek and Roman Mythology. 3 Credit Hours.

The major political, cultural, and social themes that appear in Greek and Roman mythology, examining literary and material evidence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 221. Sports & Society In The Ancient World. 3 Credit Hours.

The role of sports in ancient Greek and Roman culture. Topics covered include: Mycenaean bull-Jumping; athletic events in Homer; the Olympic games; chariot racing and gladiatorial combat at Rome; and the connection between public athletics and religion. Students learn to interpret literary and iconographic evidence, and study architectural remains such as the stadium at Olympia, the Circus Maximus, and the Colosseum.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 222. Sexuality and Gender in the Ancient World. 3 Credit Hours.

Basic questions of sexuality and gender in ancient Greece and Rome: What does it mean to be male or female? What can we discover about ourselves from the way(s) we have sex? How are all these things related to life, love, power?

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 224. The Heroic Journey. 3 Credit Hours.

The figure of the Hero On a Journey has long captivated the minds of story-tellers and audiences. This motif, known as "The Monomyth," speaks the profoundest hopes and fears of humankind. This course will examine the Monomyth as it occurs particularly in the classical tradition from Gilgamesh to Tolkien.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CLA 225. Magic And The Occult In Antiquity. 3 Credit Hours.

A broad sweep of evidence for magic and the occult in the ancient Mediterranean world. The focus is Graeco-Roman Egypt, renowned in antiquity for occult arts such as divination, daemonology, astrology, and alchemy. The primary sources analyzed are diverse, and include magical formulae, manuals, recipes, curses, philosophical writings, and literary accounts, in particular those by Lucian and Apuleius, purporting to provide true tales of magic.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 231. Sciences in Ancient Greece and Rome. 3 Credit Hours.

The beginnings of scientific investigation in ancient Greece and its development and codification under the Roman Empire.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 232. Topics in Ancient Law, Scandalous Trails from the Ancient Legal World. 3 Credit Hours.

This course examines selected trials from ancient Greece and Rome both as a way to understand these legal systems in themselves and as a way to explore the cultures, values, and biases that shaped them.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 233. Ancient Medicine. 3 Credit Hours.

Provides a historical survey of evidence, practices, and ideas from the world of ancient medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 241. Greek Civilization. 3 Credit Hours.

This course introduces key concepts, events, and personalities of Greek culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 242. Roman Civilization. 3 Credit Hours.

Introduces key concepts, events, and personalities of ancient Roman culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 243. The Art of Government in Greece and Rome. 3 Credit Hours.

Introduces key concepts and models of Greek and Roman Statecraft, including the polis democracy, the Republic and the Empire.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 246. Ancient Rhetorical Theory. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 271. Ancient Philosophy. 3 Credit Hours.

What is knowledge, and how can it be known? Why be moral? What is justice? What is the good life? If we really have free will, can there be such a thing as destiny? In what does friendship consist? What exactly is love? What is the meaning of death? These and other questions were addressed powerfully by the ancient Greeks and Romans. This course will explore such crucial philosophical themes, along with the actual method(s) of inquiry that the ancients devised for examining them. Major figures such as Plato and Aristotle will be featured, along with fragments of the Presocratics and selections from other ancient philosophers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 300. The Good Life. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 301. Ancient Greece. 3 Credit Hours.

Greek civilization from the Late Bronze Age to the end of Greek independence at the battle of Chaeronea in 338 B.C.E.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CLA 302. The Hellenistic Age. 3 Credit Hours.

Conquests of Alexander the Great and the spread of Greek culture in the Near East under Alexander's successors until the death of Cleopatra in 31 B.C.E.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CLA 303. The Roman Republic. 3 Credit Hours.

Roman civilization from the establishment of the Republic until the Battle of Actium in 31 B.C.E.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CLA 304. The Roman Empire. 3 Credit Hours.

Roman civilization from the reign of Augustus in 37 B.C.E. to the Fall of Rome in 476 C.E.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CLA 305. What is a Classic?. 3 Credit Hours.

An explanation of what it means to designate a work of art as 'a classic', in our own culture as well as in other times and places. In order to arrive at a more sophisticated understanding of the category, readings will be chosen from a variety of texts, selected from the world's treasury of acknowledged 'classics,' beginning from the canon of ancient Greek and Roman literature that for many centuries has been the touchstone of Western civilization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 310. Survey of Ancient Greek Literature and Culture. 3 Credit Hours.

Classical Greek culture, paying special attention to Greek literature from Homer to Aristotle. It is intended to lay a foundation for understanding how Hellenic thought and art influenced the development of all subsequent Western culture. All texts will be read in English translation.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 311. Survey of Classical Latin Literature and Culture. 3 Credit Hours.

A broad introduction (in English translation) to the literature of the Roman Republic and Empire. The Greek heritage behind Latin literature will be highlighted. Readings will be chosen from authors such as Catullus, Cicero, Vergil, Horace, Ovid, Petronius, Juvenal, Tacitus, and Suetonius, and from genres such as epic and lyric poetry, oratory, history and satire.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 315. The Classical Epic Tradition. 3 Credit Hours.

The course treats the rise and development of the Western epic tradition from Homer, Lucretius, and Virgil in the classical world, through Dante in the Middle Ages, Milton in the Renaissance, and Wordsworth and Eliot in modernity.

Prerequisite: ENG 106.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 322. Monsters and Fantastical Creatures in Western Antiquity and Other Cultures. 3 Credit Hours.

An explanation of the notion of the "monster" and the "fantastic creature" in a range of literary and visual representations from classical antiquity (the Greek and Roman World) and other cultures from various time periods. Starting with Hesiod's "Catalogue of Monsters" we examine the following questions: Whose mental projection is embodied in a given monster? Are there different categories of monsters? What does the monster represent? What fears does the monster crystallize?

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 323. The Ancient World on Screen. 3 Credit Hours.

How do we represent the ancient Greeks and Romans in modern media? What happens to the books the ancients wrote when these are turned into modern films, TV shows or video games?

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 324. Classical Myth & Contemporary Art.. 3 Credit Hours.

The use, adaptation, transformation, and re-figuring of Classical myth in contemporary art. The artwork will range from photographs to installations and videos. We will use theories drawn from both art criticism and literary criticism. Female artists and post-feminist theory will figure prominently as a way to bring a broader perspective to a scrutiny of the marked gender imbalance in Classical myth.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 325. The Vampire in Folklore, Fiction, and Film. 3 Credit Hours.

By pondering the role of vampires and other such monsters, in folklore, fiction, and film, this course attempts to ponder such fundamental questions as "What does it mean to be human?" and "What are the implications of death?" The tradition will be traced from its earliest antecedents in the ancient world to its latest manifestations in current fiction and screen media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 340. Greek Tragedy. 3 Credit Hours.

Readings in English of the tragedies of Aeschylus, Sophocles, and Euripides.

Prerequisite: ENG 106.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 341. Comedy in Ancient Athens and Rome. 3 Credit Hours.

The comic plays of the ancient Greeks and Romans in English translation. The focus is close reading and analysis of plays by Aristophanes, Menander, Plautus, and Terence, with a view to their socio-political, cultural, and historical milieu. The final weeks are devoted to reception of these works by Shakespeare and Molière.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 360. Women In Greek And Roman Antiquity. 3 Credit Hours.

The lives of women in ancient Greece and Rome. The historical panorama extends from the Mycenaean period ca. 1200 BC to the end of the Roman Empire in the West, 476 AD. The role and influence of Women as mothers and wives in control of the household will be examined In detail. Other themes such as love, death, marriage, divorce, legal and social status, foreign women, spinsters, wise women such as Diotima and Aspasia, Women in the arts and women of power, these will be considered through a close study of historical and literary texts as well as material culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CLA 370. Self and Other in the Ancient World. 3 Credit Hours.

The course examines Greek and Roman depictions of outsiders in a wide range of ancient texts and material sources.

Prerequisite: ENG 105 and ENG 106 or ENG 106.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 372. Greek Religion. 3 Credit Hours.

Examines the religious thought and practice of the ancient Greek-speaking world from the Bronze Age to the first century CE. Major topics include ritual, sacrifice, prayer, chthonic and sky deities, oracles, and mystery-cults. Students will learn to interpret primary source material, such as the epic poems of the archaic period, the so-called Homeric Hymns, and objects of material culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 373. Religions of Rome. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 401. Special Topics in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 402. Special Topics in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 403. Special Topics in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Required readings will be in English. Analogous to REL 404-409 courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 404. Special Projects in Classics. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 405. Special Projects in Classics. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 406. Special Projects in Classics. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 422. Aristophanes. 3 Credit Hours.

Readings from Aristophanes' plays in the original Ancient Greek.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 491. Directed Reading In Classics. 1-3 Credit Hours.

Content to be determined by faculty member and registering student(s).

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 492. Directed Reading in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Analogous to REL 401-403 courses and to (existing)CLA 491.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 493. Directed Reading in Classics. 3 Credit Hours.

This course will address a specific author, topic or text (appearing as a subtitle). Analogous to REL 401-403 courses and to (existing) CLA 491.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 495. Senior Thesis I. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 496. Senior Thesis II. 3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 505. Seminar in Ancient Studies. 3 Credit Hours.

Topics in Greek and Roman studies.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

CLA 605. Graduate Seminar in Ancient Studies. 3 Credit Hours.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CLA 691. Direct Readings in Classical Studies for Graduate Students. 3 Credit Hours.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

Clinical and Translational Investigation (CTI)

CTI 601. Introduction To Clinical And Translational Research. 2 Credit Hours.

This introductory core course will be taught by the PI and Co-PI, as well as various guest lecturers. It will include special topics in translational science including: ethics in translational science, communication of science, introduction to bioinformatics, research with underserved/ under-represented populations, regulatory considerations, grant writing, and other pertinent subjects. Students will be required to attend each weekly seminar and read the corresponding journal excerpts. Students are required to attend the weekly discussion sessions led by the PI and Co-PI in order to solidify concepts and translational themes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CTI 602. Writing for Translational and Clinical Science. 2 Credit Hours.

This introductory core course will be taught by the Masters of Science in Clinical and Translational Investigation (MSCTI) Program Directors, as well as various guest lecturers. The focus of the course will be on developing grant and manuscript writing skills in the area of clinical and translational science across the translational science spectrum.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CTI 603. Research Ethics. 3 Credit Hours.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

CTI 810. Master's Thesis. 1-6 Credit Hours.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

CTI 820. Research in Residence. 1 Credit Hour.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

Communication (COM)

COM 101. Mass Media Communication in Society. 3 Credit Hours.

A survey of the history, development, structure, and effects of mass communication media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 110. Communication Theory. 3 Credit Hours.

Survey of basic communication theories and models. Study of processes, functions, levels, and general principles of human communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 250. Freedom of Expression and Communication Ethics. 3 Credit Hours.

An examination of the concept of freedom of expression, its philosophical roots, its application of contemporary issues in communication, and of the basics of moral philosophy (ethics) and moral reasoning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 395. Honors Seminar in Communication. 3 Credit Hours.

An examination of central issues and topics in the field of Communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

COM 401. Honors Communication Colloquium. 3 Credit Hours.

An examination of central issues and topics in the field of Communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

COM 406. Special Topics In Communication. 3 Credit Hours.

COURSE SUBJECT MATTER VARIES ACCORDING TO ANNOUNCED SPECIAL TOPIC. SEE CLASS SCHEDULE FOR DETAILS.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COM 499. Senior Honors Project/Thesis. 3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 601. Theories of Communication. 3 Credit Hours.

Comparison of theories dealing with the processes and effects of communication is discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COM 602. Methods of Communication Research. 3 Credit Hours.

A comprehensive survey of communication research methods. Qualitative and quantitative approaches will be explained and practiced.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COM 603. Qualitative Research Methodologies. 3 Credit Hours.

Research methods and theories for participant-observation, phenomenology, symbolic interactionism, ethnomethodology, content analysis, and historical-critical interpretation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COM 604. Advanced Communication Research Methods and Statistics. 3 Credit Hours.

Provides an advanced examination of the problems and methods found in quantitative communication research.

Prerequisites: COM 601, COM 602.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COM 605. Theories and Methods for Mass Communication Research. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COM 609. Special Topics in Communication. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COM 610. Doctoral Colloquium. 0 Credit Hours.

This course will introduce students to the nature and scope of doctoral study.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COM 615. Social Effects of Mass Communication. 3 Credit Hours.

Roles, functions, and consequences of mass communication in American society.

Prerequisite: COM 601.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

COM 672. Seminar in Persuasive Communication. 3 Credit Hours.

This course is designed to provide students with a basic understanding of the role of communication in the persuasion process. This will be achieved by exploring historical and contemporary theories of persuasion as well as examining research that has focused on persuasion.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COM 695. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 698. Independent Research. 3 Credit Hours.

An in-depth, hands-on course in which students conduct a research project using the specified research method. May include experimental design, advanced qualitative methods, content analysis, or survey methods. Repeatable up to 6 credits.

Prerequisites: COM 602, COM 603.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

COM 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in COM 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COM 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

COM 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Communication Studies (COS)

COS 112. Interpersonal Communication. 3 Credit Hours.

Overview of current theories of interpersonal communication. Consideration is given to impression formation, relationship between self-concept and others, function of language in social interaction, and development and maintenance of relationships.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 210. Writing for Communication Studies. 3 Credit Hours.

Principles of writing, reviewing literature, and synthesizing research for communication studies and the social sciences.

Prerequisite: COM 110.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 211. Public Speaking. 3 Credit Hours.

Introduction to effective audience communication including theory and extensive practice in oral presentations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 212. Interview Skills. 3 Credit Hours.

Study of interview skills, listening techniques, voice and diction.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 304. Intercollegiate Debate Theory and Practice. 1 Credit Hour.

A course designed to teach students how to compete successfully in intercollegiate debate, and to reinforce training through practice and competition.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

COS 311. Advanced Oral Advocacy. 3 Credit Hours.

Advanced presentational speaking to persuade including theory and extensive practice.

Prerequisite: COS 211. Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 314. The Power of Dialogue. 3 Credit Hours.

Students learn how to engage in and lead constructive dialogue about sensitive, emotional, and controversial issues in the public and private spheres.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 316. Small Group Communication. 3 Credit Hours.

Techniques of discussion applied to goal-oriented, small group situations. Consideration is given to research methods, leadership, and conflict resolution. Theory is applied to active classroom participation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 318. Nonverbal Communication. 3 Credit Hours.

Theory and application of selected areas of research in nonverbal communication is addressed. Discussion of environment, space, body movement, posture, eye contact, facial expression, vocal cues, and physical appearance is included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 324. Health Communication. 3 Credit Hours.

This course is designed to provide a broad introduction to human communication in a health-care context. Emphasis will be on issues of social support, patient-health professional/caregiver interaction, organizational culture, planning health promotion campaigns, and cultural conceptions of health and illness.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

COS 325. Communication In Health Organization. 3 Credit Hours.

This course looks at the dyadic, small group, and institutional communication patterns that can affect health outcomes within and between health organizations including hospitals and other allied health services.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 328. Sports As Communication. 3 Credit Hours.

This is a course which introduces students to the study of spectator and participation sports as communication and to communication within sports.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 330. Conflict Management. 3 Credit Hours.

This course provides an understanding of conflict dynamics and strategies for constructive conflict management.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 333. Business Communication. 3 Credit Hours.

Study and practice in the major forms of spoken and written communication in the context of businesses and other professional organizational settings.

Requisite: Sophomore Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 336. Political Communication. 3 Credit Hours.

A review of the history, strategies, theories and trends in political campaign communication in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 343. Introduction to Intercultural Communication. 3 Credit Hours.

Introduction to communication among people from diverse cultures. Application of communication theory to intercultural sensitivity and cultural diversity is emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 351. Qualitative Research Methods. 3 Credit Hours.

Course is designed to introduce students to a sample of qualitative research methods used in communication.

Prerequisites: COM 110, COS 210.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 352. Critical Research In Communication. 3 Credit Hours.

This is a course in rhetorical criticism. Students will gain an understanding of rhetorical theory as it is applied to the analysis and evaluation of significant public communication events.

Prerequisites: COM 110, COS 210.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 353. Quantitative Communication Research Methods and Analyses. 3 Credit Hours.

Introduction to communication research methods. Application of quantitative measurement techniques and statistical analyses will be discussed as well as the use of microcomputer statistical programs.

Prerequisites: COM 110, COS 210.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

COS 354. Organizing for Action. 3 Credit Hours.

This is a course that will introduce the student to Action Research, with application to communication questions in a variety of settings.

Prerequisites: COM 110, COS 210.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 377. Argumentation And Critical Thinking. 3 Credit Hours.

Argumentation theory and practice are discussed. Rhetorical and philosophical foundations of argumentation and their application in various settings including academic debate are also covered

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 391. Undergraduate Special Topics in Communication Studies. 3 Credit Hours.

Course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 405. Practicum in Communication Studies. 1-3 Credit Hours.

Structured participation in programmatic research and applied practice in the community.

Requisite: Junior Status.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 418. Organizational Communication. 3 Credit Hours.

Introduction to organizational communication theory. Consideration of structure, function, and effects of communication in organizations are analyzed. Emphasis is placed on principles needed for decision making and effective management of organizational communication processes.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 426. Patient-Provider Communication. 3 Credit Hours.

This class focuses on the interpersonal environment of patient-provider interaction. The primary purpose of this course is to describe best practices for coming to shared meaning and decision-making between medical professionals and patients in healthcare settings.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 427. Health Behavior And Risk. 3 Credit Hours.

This course introduces students to different theories and models of health communication that are frequently used to develop persuasive health messages. It draws on health communication messaging theory, as well as literature in public health, psychology, and medicine.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 472. Persuasion. 3 Credit Hours.

A review of theory, research, and practice of the intentional use of symbols to influence attitudes, beliefs, and actions.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 473. Words that Shaped the World. 3 Credit Hours.

A study of great speakers and speeches in important international settings.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 474. Presidential Debates. 3 Credit Hours.

History, impacts, content and strategies of televised presidential campaign debates.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 477. Capstone In Engaged Communication Studies. 3 Credit Hours.

Capstone course designed for communication studies majors. Provides students opportunities to apply knowledge of communication theory and associated research skills through their personal engagement in community or organizational service and action research.

Prerequisites: COM 110, COS 210, COS 352, COS 354. Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 479. Capstone for Communication Studies. 3 Credit Hours.

Capstone course designed for communication studies majors. Provides students with the opportunity to apply knowledge of communication theory and research skills through development of capstone project.

Prerequisites: COM 110, COS 210, COS 351, COS 353. Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

COS 498. Communication Studies Internship. 1-3 Credit Hours.

Prescribed study and supervised work with practitioners in organizations. Requisite: Junior Status.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 499. Projects and Directed Research. 1-3 Credit Hours.

Individual study. No more than three credits may be counted toward a Communication major or minor.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 545. Intercultural Communication: International Perspectives. 3 Credit Hours.

Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 546. Intercultural Communication: Domestic Perspectives. 3 Credit Hours.

Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 560. The Executive Communicator. 3 Credit Hours.

Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student speaking styles and performances are also included.

Prerequisite: COS 211. Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 591. Advanced Special Topics in Communication Studies. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 599. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. Course may be repeated to a maximum of six credits. Permission of Department Chair required.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

COS 616. Small Group Processes. 3 Credit Hours.

Techniques of discussion applied to goal-oriented, small group situations. Consideration is given to research methods, leadership, and conflict resolution. Theory is applied to active classroom participation.

Components: LEC.

Grading: GRD.

COS 620. Gender Issues in Leadership. 3 Credit Hours.

This course utilizes case studies of innovative executives to analyze different leadership and communication styles between men and women.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 630. Conflict Management. 3 Credit Hours.

This course provides an understanding of conflict dynamics and strategies for constructive conflict management.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 645. Intercultural Communication: International Perspectives. 3 Credit Hours.

Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Effects of language on the structure of thought. Ethics and process of the diffusion of cultural innovations are analyzed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 646. Intercultural Communication: Domestic Perspectives. 3 Credit Hours.

Effects of cultural attitudes, beliefs, and attributions on meaning assignment. Diffusion of cultural innovations, prejudice, discrimination, and equality are discussed. Emphasis is placed on intercultural interactions within the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 647. Culture and Organizations. 3 Credit Hours.

This course explores the effects of cultural diversity on communication in organizations. Diffusion of innovations, prejudice, discrimination, and equality are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 651. Survey Of Health Communication. 3 Credit Hours.

This course is intended to provide a graduate-level introduction to the study of health communication. Accordingly, it covers a wide range of topic areas informed by an equally diverse range of theories, research paradigms, and applied foci.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 652. Culture And Health. 3 Credit Hours.

This class is designed to give participants an overview of the problems, issues, and processes involved with communicating with people of different cultural and subcultural backgrounds about issues of health and illness.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 653. Organizations, Communication Health. 3 Credit Hours.

This class focuses on the organizational, interpersonal and intercultural dimensions of communication in health care settings. It draws on material from the communication discipline as well as work from medical sociology, anthropology, medicine, humanities and discourse studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 654. Risk Communication. 3 Credit Hours.

This course will offer a foundational understanding of the psychological and sociological bases of risk perceptions that are necessary for effective risk communication.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 655. Health Communication Interventions. 3 Credit Hours.

This course will focus on the planning, development, and assessment of health communication intervention messages and materials.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 660. The Executive Communicator. 3 Credit Hours.

Audience analysis, speech writing, delivery in professional presentations, theory, and history of great speeches are covered. Detailed critiques of student s peaking styles and performances are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 674. Seminar in Interpersonal Communication. 3 Credit Hours.

This course focuses on theoretical approaches to interpersonal communication. Emphasis is placed on current research including fundamentals of relationships, developmental issues, interaction management, and interpersonal competence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 680. Organizational Training and Development. 3 Credit Hours.

This course is designed to provide an examination of internal organizational communication in order to understand appropriate strategies for training and development of supervisors and employees.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 682. Seminar in Organizational Communication. 3 Credit Hours.

This course explores theoretical perspectives and the impact of communication in organizations. Critical analysis includes management styles, decision-making, group interaction, conflict resolution, and diffusion of innovations.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 690. Communication Studies Practicum. 1-3 Credit Hours.

Prescribed graduate study and supervised work with practitioners in organizations.

Prerequisites: COM 601, COM 602, COM 603.

Components: PRA.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

COS 691. Advanced Special Topics in Communication Studies. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

COS 699. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. Course may be repeated to a maximum of six credits.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Computer Science (CSC)

CSC 115. Social and Ethical Issues in Computing. 3 Credit Hours.

History, social context and methods and tools of analysis. Professional and ethical responsibilities. Intellectual property. Privacy and civil liberties.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 118. Information Technology and Society. 3 Credit Hours.

A variety of topics on information technology and society through various course activities including research papers, experiments, and by reading articles. The topics covered include but are not limited to: history of computing, hardware mechanisms, algorithms design, software development principles, software tools, security, and artificial intelligence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

CSC 119. Computers and Society. 3 Credit Hours.

Basic concepts of computer systems. Installing, configuring, and managing computer software. Internet information retrieval. Application software. HTML, programming for the www in JavaScript. E-commerce, cryptography, computer security. Social, legal, ethical issues and the future.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 120. Computer Programming I. 4 Credit Hours.

History of computing. Fundamental programming constructs. Algorithms and problem solving. Object-oriented programming. Recursion.

Prerequisite: MTH 108. Or Corequisites: MTH 140 or Higher or MAS 110.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CSC 210. Computing for Scientists. 3 Credit Hours.

Computing applications in science. Tools and algorithms for applications. Implementation of algorithms. Storage, retrieval analysis and visualization of data in science.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 220. Computer Programming II. 4 Credit Hours.

Common APIs including list, priority queue, set, and map, and their efficient implementations in an object-oriented language using fundamental data structures. Sorting and other applications of recursion. Combining asymptotic analysis and experiments to extrapolate running times. Using APIs in a software project.

Prerequisites: CSC 120 or CIS 324 or ECE 218, MTH 108 or MTH 140 or MTH 141 or MTH 161 or MTH 162 or MTH 171 or MTH 172 or MAS 110.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 314. Computer Organization and Architecture. 3 Credit Hours.

Digital logic and digital systems. Machine level representation of data. Assembly level machine organization. Memory system organization and architecture. Interfacing and communication. Functional organization. Multiprocessing and alternative architectures.

Prerequisite: CSC 120 or CIS 324 or ECE 218. Corequisite: MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CSC 317. Data Structures And Algorithm Analysis. 3 Credit Hours.

Basic algorithmic analysis. Algorithmic strategies. Fundamental computing algorithms. Distributed algorithms. Cryptographic algorithms. Geometric algorithms.

Prerequisite: CSC 220 or ECE 318, and MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 322. System Programming. 3 Credit Hours.

C programming: Program structure, core language elements, pointers.

System tools for C programming. Programming for UNIX: The system call interface, interfaces to the internet. Scripting.

Prerequisite: CSC 220 or ECE 318.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 329. Introduction to Game Programming. 3 Credit Hours.

Fundamental programming issues in game design: Software design; Version control; Basic graphics; GUI programming. Large-scale game project: Team development of a functional game; Graphics and GUI component; Networking component; Core game engine.

Prerequisite: CSC 220 or ECE 318.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 330. Android Programming. 3 Credit Hours.

The android/Eclipse programming environment. The Android execution model. User interfaces. Media. Data storage areas. Sensors and actuators. The Android market.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 401. Computer Science Practicum I. 1 Credit Hour.

Implementation of techniques, algorithms, and data structures being taught in a co-requisite computer science course.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 402. Computer Science Practicum II. 1 Credit Hour.

Implementation of techniques, algorithms, and data structures being taught in a co-requisite computer science course.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 403. Computer Science Practicum III. 1-3 Credit Hours.

Implementation of techniques, algorithms, and data structures being taught in a co-requisite computer science course.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 405. Computer Science Seminars. 1 Credit Hour.

A range of topics in Computer Science, as embodied in the seminars hosted by the Department.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 410. Computer Science Project Planning. 1-3 Credit Hours.

Planning for the implementation of a Computer Science project, including: Problem analysis, System architecture design, Algorithm and data structure selection, User interface design, Verification and validation plan, and Prototyping.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 411. Computer Science Project Implementation. 1-3 Credit Hours.

Implementation of a Computer Science project, including: Hardware preparation, Component implementation, System integration, Verification and validation, and Documentation.

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 412. Computer Science Internship. 1-3 Credit Hours.

A commercial computing environment. Normally 50 internship hours are required per credit earned (the host company must supply documentary evidence of hours worked).

Components: PRA.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 419. Programming Languages. 3 Credit Hours.

Overview of programming languages. Fundamental issues in language design. Virtual machines. Introduction to language translation. Models of execution control. Declaration, modularity, and storage management. Programming language semantics. Programming paradigms.

Prerequisite: CSC 317 or CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 421. Principles Of Computer Operating Systems. 3 Credit Hours.

Process management. Scheduling and dispatch. Interprocess communication. Memory management. File systems. Device management. Security and protection. System programming for UNIX.

Prerequisite: CSC 314 and CSC 322.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 423. Database Systems. 3 Credit Hours.

Information models and systems. Database systems. Data modeling. Relational databases. Relational database design. Database query languages, Data mining concepts, Web database programming.

Prerequisite: CSC 317 or CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 424. Computer Networks. 3 Credit Hours.

Introduction to computer networks and network applications. The protocol stack. Routing, switching and bridging technologies. Models of network computing. Internet standards and protocols.

Prerequisite: CSC 314 and CSC 322.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 427. Theory Of Computing. 3 Credit Hours.

Sets, relations, and languages. Automata theory. Basic computability theory. Turing machines. The complexity classes P and NP.

Prerequisite: CSC 220 or ECE 318, and MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

CSC 431. Introduction To Software Engineering. 3 Credit Hours.

Software processes, requirements and specifications, design, validation, evolution. Project management, tools and environments. Foundations of human-computer interaction. Risks and liabilities of computer-based systems. Intellectual property.

Prerequisite: CSC 317 or CSC 322 or CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 481. Undergraduate Teaching Assistant Training in Computer Science. 1-3 Credit Hours.

Training and teaching assistant for a specific course, in computer laboratories . May be taken multiple times, assisting maximally twice for a given course.

Components: PRA.

Grading: CNC.

Typically Offered: Fall & Spring.

CSC 498. Senior Topics in Computer Science. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 506. Logic. 3 Credit Hours.

Propositional and first order logic: completeness. Computational logic: Robinson's resolution. Formalized theories: arithmetic, Godel's incompleteness theorem , Tarski's theorem on undefinability of truth. Prerequisite: MTH 230 or PHI 210 or PHI 510.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 507. Data Security and Cryptography. 3 Credit Hours.

Access, information flow, and inference controls. Network security and management. Encryption algorithms. Cryptographic techniques. Prerequisite: CSC 517 or CSC 527.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 518. Interpreters and Compiler Theory. 3 Credit Hours.

Translation of higher-level languages into machine language. Grammars, parsing, scanners, precedence relations. Run-time storage and symbol table organization . Semantic routines. Chaining and hashing. Code generation and optimization. Macro implementation. Prerequisite: CSC 519.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 528. Introduction to Parallel Computing. 3 Credit Hours.

Parallel computing systems shared-memory parallel programming, with open MP, distributed-memory parallel programming, software with open MPI software package. Applications: vector and matrix operations, sorting, image processing. Prerequisite: CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 529. Introduction to Computer Graphics. 3 Credit Hours.

Graphic systems. Graphic communication. Geometric modeling (2D and 3D representations). Rendering. Advanced techniques. Display and input devices. Software packages. Prerequisite: CSC 220 or ECE 318, and MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 540. Algorithm Design and Analysis. 3 Credit Hours.

Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.

Prerequisite: CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 545. Introduction to Artificial Intelligence. 3 Credit Hours.

Search and constraint satisfaction. Knowledge representation and reasoning. Natural language processing. Machine learning and neural networks. Game theory. AI programming.

Prerequisite: CSC 220 and MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 547. Computational Geometry. 3 Credit Hours.

Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.

Prerequisite: CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 548. Bioinformatics Algorithms. 3 Credit Hours.

The complexity of bioinformatics computations. Introduction to perl and bioperl. Pattern matching and sequence homology. Genome assembly. Transcription factor Binding Site recognition and motif finding. Gene prediction. Phylogeny..Micro-array analysis. RNA folding. Gene design and synthesis.

Prerequisites: CSC 120 or CSC 210, BIL 150 or BIL 104 or BIL 352 or BIL 552 or CSC 552.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CSC 552. Bioinformatics Tools. 3 Credit Hours.

Databases and tools of bioinformatics, as relevant to research in genomics and molecular biology. Bioinformatics applications. Information retrieval, analytical tools, BLAST searches, promoter analysis, and protein structure- function analysis, and various applications.

Prerequisite: BIL 250 or BIL 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CSC 555. Multimedia Systems. 3 Credit Hours.

Specification and requirements of a multimedia hardware system. Multimedia data technologies. Graphics file formats. Compression and decompression. Multimedia application development.

Prerequisite: CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 595. Topics in Computer Science. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 596. Topics in Computer Science. 1-3 Credit Hours.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 597. Topics in Computer Science. 1-3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 598. Topics in Computer Science. 1-3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 599. Topics in Computer Science. 1-3 Credit Hours.****Components:** THI.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 607. Logic. 3 Credit Hours.**

Propositional and first order logic: completeness. Computational logic: Robinson's resolution. Formalized theories: arithmetic, Godel's incompleteness theorem, Tarski's theorem on undefinability of truth.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 609. Data Security and Cryptography. 3 Credit Hours.**

Access, information flow, and inference controls. Network security and management. Encryption algorithms. Cryptographic techniques.

Prerequisite: CSC 317 or CSC 427.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 618. Interpreters and Compiler Theory. 3 Credit Hours.**

Translation of higher-level languages into machine language. Grammars, parsing, scanners, precedence relations. Run-time storage and symbol table organization. Semantic routines. Chaining and hashing. Code generation and optimization. Macro implementation.

Prerequisite: CSC419.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 623. Theory of Relational Databases. 3 Credit Hours.**

Relational operators. Functional dependencies. Covers for functional dependencies. Multivalued dependencies. Joint dependencies. Normal Forms, Representation theory. Query systems. Acyclic database schemes.

Prerequisite: CSC 423.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 629. Introduction to Computer Graphics. 3 Credit Hours.**

Graphic systems. Graphic communication. Geometric modeling (2D and 3D representations). Rendering. Advanced techniques. Display and input devices. Software packages.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 632. Introduction to Parallel Computing. 3 Credit Hours.**

Parallel computing systems shared-memory parallel programming, with open MP, distributed-memory parallel programming, software with open MPI software package. Applications: vector and matrix operations, sorting, image processing.

Prerequisite: CSC 317.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 640. Algorithm Design and Analysis. 3 Credit Hours.**

Design techniques include divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting, searching, combinatorial and graph algorithms.

Prerequisite: CSC 317.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 645. Introduction to Artificial Intelligence. 3 Credit Hours.**

Search and constraint satisfaction. Knowledge representation and reasoning. Natural language processing. Machine learning and neural networks. Game theory. AI programming.

Prerequisite: CSC 545.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 647. Computational Geometry. 3 Credit Hours.**

Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS.

Prerequisite: CSC 517.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 649. Bioinformatics Algorithms. 3 Credit Hours.**

The complexity of bioinformatics computations. Introduction to perl and bioperl. Pattern matching and sequence homology. Genome assembly. Transcription factor Binding Site recognition and motif finding. Gene prediction. Phylogeny..Micro-array analysis. RNA folding. Gene design and synthesis.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**CSC 651. Autonomous Robotic Systems. 3 Credit Hours.**

Introduction: autonomous systems, autonomous robots, RoboCup, typical components of an autonomous robot. Modeling: perception, noise, modeling, recursive state estimation, Bayes' filter, particle filter, self-localization. Control and motion: PIO-control, calibration of parameters, controlling a wheeled robot, controlling joints, walking motion. Learning (optional, if time permits): overview, different types of learning, reinforcement learning.

Prerequisite: CSC 317 and MTH 210.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.

CSC 656. Multimedia Systems. 3 Credit Hours.

Specification and requirements of a multimedia hardware system. Multimedia data technologies. Graphics file formats. Compression and decompression. Multimedia application development.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 670. Directed Reading. 2-4 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

CSC 685. Topics in Computer Science. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 686. Topics in Computer Science. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 687. Topics in Computer Science. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 688. Topics in Computer Science. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 689. Topics in Computer Science. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 690. Seminar for Beginning Graduate Students. 1-3 Credit Hours.

Flexible topics of interest to beginning graduate students.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 692. Seminar. 1-2 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 707. Logic Programming. 3 Credit Hours.

Programming in Prolog, Fix-point semantics, Declarative semantics, Completeness of SLD-resolution, Negation, Implementation of logic programming languages. Deductive databases.

Prerequisite: MTH 506 and CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 711. Theory of Computation. 3 Credit Hours.

Recursive functions, Markov algorithms, Turing machines. Unsolvability.

Prerequisite: CSC 317 or CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 712. Complexity Theory. 3 Credit Hours.

Models of computations, Blum's axioms, intractability, NP-completeness.

Prerequisite: CSC 527.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 724. Mobile Wireless Systems. 3 Credit Hours.

Cellular Systems, multiple access techniques, wireless networking, mobile IP, power management, user location information management, TDMA, CDMA, and GSM systems, data broadcasting.

Prerequisite: CSC 524.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 732. Parallel Algorithms. 3 Credit Hours.

Parallel computation models; sorting networks; parallel algorithms for sorting, searching, graph problems, prefix computation, pattern matching, and fast Fourier transforms; theory of P-completeness, the class NC.

Prerequisite: CSC 317.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

CSC 746. Neural Computing. 3 Credit Hours.

Fundamentals of artificial neural networks. Perceptrons. Back propagation, algorithm. Pattern recognition. Counter propagation networks. Data compression. Hopfield networks. Optimization.

Bidirectional associative memories. Adaptive resonance theory.

Prerequisite: CSC 517.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 749. Automated Reasoning. 3 Credit Hours.

Propositional and 1st order logic. Reasoning and resolution. More complex inference rules. Using contemporary ATP systems. Prolog as an ATP system and as a programming language. Applications of ATP in research and industry.

Prerequisite: CSC 317 or CSC 645.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 751. Semantic Web. 3 Credit Hours.

Prerequisite: CSC 317 and MTH 309.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 756. Advanced Multimedia Systems. 3 Credit Hours.

Digital-system fundamentals. Digital audio, analog and digital video.

Graphics. Data compression algorithms. CD-ROM technology.

Implementation of multimedia software development tools.

Architecture and issues for distributed multimedia systems. Multimedia communications systems.

Prerequisite: CSC 656.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

CSC 785. Advanced Topics in Computer Science. 1-3 Credit Hours.

Advanced Topics in Computer Science

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 786. Advanced Topics in Computer Science. 1-3 Credit Hours.**

Advanced Topics in Computer Science

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 787. Advanced Topics in Computer Science. 1-3 Credit Hours.**

Advanced Topics in Computer Science

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 788. Advanced Topics in Computer Science. 1-3 Credit Hours.**

Advanced Topics in Computer Science

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 789. Advanced Topics in Computer Science. 1-3 Credit Hours.**

Advanced Topics in Computer Science

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**CSC 793. RESEARCH PROJECT. 1-6 Credit Hours.**

Supervised research project preceding dissertation research for the Ph.D.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**CSC 794. Research Project. 1-6 Credit Hours.**

Supervised research project preceding dissertation research for the Ph.D.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**CSC 810. Master's Thesis. 1-6 Credit Hours.**

The student working on his/her master's thesis enrolls for the number of credit s as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.**Grading:** SUS.**Typically Offered:** Fall & Spring.**CSC 825. Continuous Registration--Master's Study. 1 Credit Hour.**

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall & Spring.**CSC 830. Pre-Candidacy DOCTORAL DISSERTATION. 1-12 Credit Hours.**

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.**Grading:** SUS.**Typically Offered:** Fall, Spring, & Summer.**CSC 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.**

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of CSC 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.**Grading:** SUS.**Typically Offered:** Spring.**CSC 850. Research In Residence. 1 Credit Hour.**

Used to establish research in residence for Ph.D. students after the student has enrolled for permissible cumulative total in appropriate doctoral research. Regarded as full-time residence.

Components: THI.**Grading:** SUS.**Typically Offered:** Fall, Spring, & Summer.

Dance (DAN)

DAN 102. Stretching and Body Work. 1 Credit Hour.

Stretching techniques and examination of various body therapy concepts.

Components: LAB.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**DAN 111. Modern Dance, Level One. 2 Credit Hours.**

Introduction to the discipline of modern dance designed to develop understanding and skill in the basic vocabulary. Open to all students..

Components: LAB.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**DAN 121. Ballet, Level One. 2 Credit Hours.**

Introduction to the discipline of classical ballet designed to develop understanding and skill in the basic vocabulary. Open to all students.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**DAN 130. Orientation To Dance. 2 Credit Hours.**

Introduction to dance as an art form for those interested in career opportunities in dance education. Required for prospective dance minors. Open to all students.

Components: LAB.**Grading:** GRD.**Typically Offered:** Fall & Spring.**DAN 140. Theatre Dance Forms. 2 Credit Hours.**

Introduction to movement skills and stylistic elements of theatrical forms of dance. Open to all students.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.

DAN 190. Improvisation. 2 Credit Hours.

Experience in selective and basic processes of movement involvement both individual and group. Open to all students.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

DAN 211. Modern Dance, Level Two. 3 Credit Hours.

Continuing exploration of modern dance basic techniques and theoretical concepts. Open to all students.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 221. Ballet, Level Two. 3 Credit Hours.

Study of ballet designed to extend technical skill and prepare student for intermediate level work. Open to students with formal ballet training or permission

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 240. Cultural Dance Forms. 2 Credit Hours.

Introduction to movement skills and stylistic elements of dance forms from various cultures. Open to all students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 250. World History Of The Dance. 3 Credit Hours.

Introductory exploration of dance history in relation to life, thought, and culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 280. Dance Composition Level 2. 3 Credit Hours.

Introduction to choreography through creative problem solving by exploring And experimenting with the basic elements of dance; space, time, energy, And motion. Emphasis is on compositional studies versus the creation of fully Developed dances.

Prerequisite: DAN 211.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

DAN 285. Creative Dance For Children. 2 Credit Hours.

Introduction to theories and methods of teaching dance to children of elementary school age. Open to all students

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

DAN 286. Teaching Dance To Children. 2 Credit Hours.

Theory and practice of teaching dance to preschool and school age children. Open to all students

Prerequisite: DAN 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

DAN 290. Introduction To Dance-Movement Therapy. 2 Credit Hours.

Introduction to dance-movement therapy theory and practice.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

DAN 291. Dance Movement Therapy. 3 Credit Hours.

This course will provide a continued investigation into the theoretical and Experiential techniques and practices of dance therapy as well as career Options for students majoring in education and the healing professions.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

DAN 311. Modern Dance, Level Three. 3 Credit Hours.

Intermediate study of modern dance techniques and theoretical concepts. Open to dance minors and by permission!

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 321. Ballet Level Three. 3 Credit Hours.

Study of classical ballet at intermediate/advanced level. Open to students with formal ballet training!

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 380. Dance Composition Level 3. 3 Credit Hours.

Continuation of creative problem solving by exploring,Experimenting, and combining the basic elements of Dance: space, time, energy and motion. Emphasis is on Expansion of ideas for stage productions depending on The quality of the work.

Prerequisite: DAN 280 or DAN 311.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

DAN 385. Methods Of Teaching Dance (K-12). 3 Credit Hours.

Content for teaching dance in a variety of settings including public school grades K-12. Required for dance minor..

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

DAN 411. Modern Dance; Level Four. 3 Credit Hours.

Advanced study of modern dance technique and theatrical concepts.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 421. Ballet, Level Four. 3 Credit Hours.

Study of Classical ballet at an advanced level. Permission of Instructor

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 450. History Of Modern Dance. 3 Credit Hours.

Study of development, philosophies, and theories of American and European modern dance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

DAN 550. Women In Theatrical Dance. 3 Credit Hours.

Women in Dance; the most prominent dancers and choreographers from the 19th and 20th centuries who helped shape western theatrical dance art.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

DAN 585. Methods of Teaching Dance K-12 (Advanced). 3 Credit Hours.

An advanced study of the Dance curriculum content in a variety of settings including public schools, grades K-12.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 593. Special Projects Dance. 1-3 Credit Hours.

Supervised topics and other activities in specific areas of Dance

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

DAN 650. Women In Theatrical Dance. 3 Credit Hours.

Women in Dance; the most prominent dancers and choreographers from the 19th and 20th centuries who helped shape western theatrical dance art.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

DAN 693. Special Projects Dance. 1-3 Credit Hours.

Supervised topics and other activities in specific areas of Dance

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Economics (ECO)

ECO 211. Economic Principles and Problems. 3 Credit Hours.

Fundamental course devoted to development and application of basic analytical tools and principles required for an understanding of major economic problems and policy alternatives available for their solution. Particular emphasis on microeconomic analysis. Topics include the study of markets under varying conditions of competition, including market deficiencies such as pollution, prices, and resource allocation distribution of income, including poverty problems, the economics of the firm and the government, and international economic relations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 212. Economic Principles and Problems. 3 Credit Hours.

Continuation of ECO 211. Course emphasis is placed on macroeconomic analysis. Areas covered include national income and employment analysis, money and banking, economic growth, and comparison of different economic systems, including the problems of developing the less developed world.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 300. Microeconomic Theory And Applications. 3 Credit Hours.

Prerequisites: ECO 211, ECO 212, MAS 110, or MTH 130 or MTH 141 or higher.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 301. Macro Economic Theory. 3 Credit Hours.

Intermediate level analysis of the measurement, determination, and control of aggregate economic activity.

Prerequisites: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 302. Micro Economic Theory. 3 Credit Hours.

Intermediate level analysis of the role of price in resource allocation in markets of varying degrees of competition, as well as in the determination of wages, rent, interest, profits, and public policy.

Prerequisites: ECO 211, ECO 212, MTH 161 or MTH 171.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 303. Macro Economic Theory. 3 Credit Hours.

Prerequisites: ECO 211, ECO 212, MTH 130 or MAS 110 or MTH 151 or MTH 161 or MTH 171.

Components: LEC.

Grading: GRD.

ECO 307. Public Finance and Fiscal Policy. 3 Credit Hours.

The role of local, state, and federal government in attaining an efficient allocation of resources and an equitable distribution of income. Emphasis on criteria for the selection and evaluation of public expenditure and tax programs including the problems of coordinating federal, state, and local finance. Special attention is given to current policy issues.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 311. Labor Economics (I). 3 Credit Hours.

Course surveys the structure and functioning of labor markets. Topics include determinants of labor supply and labor demand, economics of wage differentials, economic impact of labor unions, discrimination in labor markets, and the labor market effects of various government policies such as payroll and income taxes, educational subsidies, and minimum wage laws. The central goal of the course is to provide the student with a framework for analyzing diverse issues related to the labor sector of the economy.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 345. Environmental Economics. 3 Credit Hours.

This course determines the appropriate way to regulate economic activity so as to achieve an optimal balance between competing environmental and economic goals. Economic reasoning is used to evaluate causes and consequences of environmental problems. The course rigorously evaluates various types of environmental regulation, including "cap-and-trade," command and control mandates, and pollution taxes. Other specific topics include public goods, externalities, cost benefit analysis, non-market valuation, and international trade and development and the environment.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 351. Economics of Developing Countries. 3 Credit Hours.

Factors underlying economic development, measures of and goals for development, principles applicable to problems of development, the role of markets and planning in development, social, cultural, and political factors affecting economic development, and comparative rates of progress in different countries.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 371. Latin America And The Global Economy. 3 Credit Hours.

An analysis of the historical growth of major Latin American countries, with emphasis on the post World War II period. Topics include industrialization, foreign investment, international trade and regional integration, agrarian reform, inflation, and development strategies and planning within the context of Latin America.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 379. ECONOMICS OF POVERTY. 3 Credit Hours.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

ECO 386. Health Economics. 3 Credit Hours.

The course applies the tools of microeconomic analysis to the health care sector. It examines how models of demand and supply apply to the health care sector in general, and in particular to the health insurance, the hospital, the physicians, and the pharmaceutical sectors. By examining the actors and issues in this market, students are able to discuss policy issues from an economic perspective.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 403. Contemporary Issues in Monetary Economics. 3 Credit Hours.

Analysis of the role of money in economic affairs. Topics include the determinants of the money supply and interest rates, money and prices, money and stability, and growth. Emphasis is placed on current problems and policies.

Requisite: Must be in School of Business or Economics major or minor in the School of Arts & Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 420. Economic Growth. 3 Credit Hours.

Course covers selected topics in economic growth. Topics include stylized facts associated with economic growth, the theoretical study of economic growth, and empirical tests of those theories. Course work is supplemented by case studies of individual countries, particularly developing countries.

Requisite: Must be in School of Business or Economics major or minor in the School of Arts & Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 430. Applied Econometrics. 3 Credit Hours.

This course introduces basic econometric techniques for analyzing economic data. The goal is to make students sophisticated consumers and skilled producers of empirical analysis, which will be attained by extensive work on a variety of real-world data like students' test scores, CEO wages, mortgage applications, cigarette demand, stock market capitalization, inflation, GDP and interest rates. Learning how to use econometric analysis software is an integral part of the course.

Prerequisite: ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 441. International Trade Theory. 3 Credit Hours.

Study of the principles of comparative advantage and the gains from international trade. Analysis of tariffs, quotas, and protectionism is included.

Requisite: Must be in School of Business or Economics major or minor in the School of Arts & Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 442. International Monetary Economics. 3 Credit Hours.

Analysis of models of the exchange rate, the balance of payments, and monetary policy in an open economy.

Requisite: Must be in School of Business or Economics major or minor in the School of Arts & Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 444. Game Theory in Economic Applications.. 3 Credit Hours.

This course is an introduction to the techniques and questions of modern microeconomics. The course will expose you to the techniques of game theory, the workhorse of modern microeconomics, and will apply those techniques to the analysis of a variety of economics situations and institutions.

Prerequisite: ECO 302. Or Corequisite: ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECO 460. Industrial Organization. 3 Credit Hours.

This course shows how microeconomic theory can be used to understand the diverse practices encountered in real-world markets between the extreme cases of perfect competition and monopoly. Topics to be covered include strategic pricing behavior, collusion, advertising and information, vertical integration, vertical restraints, regulation and a review of empirical literature.

Requisite: Must be in School of Business or Economics major or minor in the School of Arts & Sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 499. Special Topics. 1-3 Credit Hours.

Topics in area of specialization. Approval of department required at time of registration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 510. Mathematical Economics And Applications. 3 Credit Hours.

The course will focus on specific applications of microeconomic theory, which may vary each semester. Topics may include choice under uncertainty, game-theoretic models of insurance markets, principal-agents problems, and basic auction theory. The discussion of each application will be preceded by a discussion of the mathematical tools required. The mathematics topics covered may include basic theory of sets and functions, concave / convex functions and their role in optimization, expectations, conditional probability, Bayes rule, and order statistics.

Prerequisites: ECO 302, MAS 202 or MTH 224.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 511. Labor Economics (II). 3 Credit Hours.

A theoretical and empirical analysis of how labor markets operate. A survey of the literature, problems, and methodology of modern labor economics. Human capital analysis, the wage structure, job search and job-matching models, time-allocation models, the economic impact of labor unions, labor market discrimination, the determinants of labor demand and supply, and the factors affecting government policy relating to the labor sector is also included.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 512. Mathematical Economics (II). 3 Credit Hours.

Economics 512 will be sequential to the introductory Mathematical Economics I (ECO 510). Topics include integral calculus, differential equations, difference equations, Kuhn-Tucker conditions, solutions to general equilibrium systems, optimization under uncertainty, and an introduction to dynamic optimization. Applications of mathematical techniques to economic analysis will be stressed.

Prerequisite: ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 520. Econometrics. 3 Credit Hours.

Statistical methods of estimating and testing mathematical model of economic relationships.

Prerequisite: ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 521. Graduate Macroeconomic Theory. 3 Credit Hours.

The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 532. History of Economic Thought. 3 Credit Hours.

Historical development of economic doctrines and theory. Topics and individuals discussed include mercantilism, physiocracy, Adam Smith, Thomas Malthus, David Ricardo, J. S. Mill, Karl Marx, marginal analysis, Alfred Marshall, and J. M. Keynes. Special emphasis is placed on the effect of historical insights upon the contemporary core of economic theory.

Prerequisites: ECO 300 or ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 533. Advanced Microeconomic Theory. 3 Credit Hours.

An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.

Prerequisite: ECO 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 555. Economics Honors Research Project. 3.00 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Economics.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

ECO 600. Econometrics. 3 Credit Hours.

Statistical methods for estimating and testing mathematical models of economic relationships.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 601. Graduate Macroeconomic Theory. 3 Credit Hours.

The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 602. Advanced Microeconomic Theory. 3 Credit Hours.

An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 603. Monetary Theory and Policy. 3 Credit Hours.

Current monetary theory and its use and application in fiscal and monetary policymaking. Topics include the rational expectations hypothesis, time inconsistency, and the role of the government budget constraint.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 604. Topics in Applied Macroeconomics. 3 Credit Hours.

Course acquaints students with current substantive issues in macroeconomics. Topics include consumption determination, savings behavior, bequest behavior, fiscal policy effects on interest rates, consumption, real exchange rates, trade balances, and inflation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 610. Mathematical Economics And Applications. 3 Credit Hours.

The course will focus on specific applications of microeconomic theory, which may vary each semester. Topics may include choice under uncertainty, game-theoretic models of insurance markets, principal-agents problems, and basic auction theory. The discussion of each application will be preceded by a discussion of the mathematical tools required. The mathematics topics covered may include basic theory of sets and functions, concave / convex functions and their role in optimization, expectations, conditional probability, Bayes rule, and order statistics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 611. Labor Economics (III). 3 Credit Hours.

The formulation and testing of models of labor markets. The application of the tools of microeconomics and econometrics to the analysis of labor markets. Leading contributions in the areas of dynamic analysis of labor markets, human capital investment, the determinants of the wage structure, time allocation and search models, dual and internal labor market models, and analysis of government policy are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 612. Economic Strategies for Firms and the Industry. 3 Credit Hours.

This course shows how modern economic techniques can be used to identify optimal managerial decisions and industrial developments. Diverse real-world applications are examined.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 620. Advanced Econometrics. 3 Credit Hours.

Advanced econometric methods including advanced techniques in multiple regression, Bayesian methods, maximum likelihood estimators, distributed lag models, spectral analysis, and Monte Carlo studies are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 621. Advanced Macro Analysis. 3 Credit Hours.

Theory of the determination of national income, employment, and price levels. Course emphasizes mathematical solutions of Classical, Keynesian, and other economic models.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 625. Applied Econometrics. 3 Credit Hours.

Practical applications of econometrics are surveyed. Computer packages are used to examine economic data. Topics include the series analysis, limited dependent variable modes, pooling cross section and time series data, model selection, and rational expectations models.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 633. Advanced Micro Analysis. 3 Credit Hours.

Theory of the behavior of firms and households and the determination of prices and resource allocation in a decentralized economy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 634. Advanced Micro Analysis II. 3 Credit Hours.

Continuation of ECO 633. Advanced analysis of theory of the household and firm emphasizing recent approaches. Analysis of decisions over time, duality relationships, advanced demand theory, risk and uncertainty, behavioral theories of the firm, and technological change are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 645. Regulations Economics. 3 Credit Hours.

This course examines public policies for dealing with problems arising in markets in which competitive forces are weak. The focus is on monopolies, oligopolies, cartels, and other environments where market mechanisms are unlikely to produce outcomes that benefit consumers more than the alternatives involving costly government intervention.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 675. Latin America And The Global Economy. 3 Credit Hours.

Analysis of the economic, political, and social forces at work in the changing economies in Latin America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 680. Essentials of Economics. 2 Credit Hours.

This course provides an introduction to the core concepts of economics. Topics include allocation of scarce resources by the laws of supply and demand, use of the market place as the principle organizing and distribution tool of the economy, externalities, and market failure.

Pollution of the environment is treated as a needed correction to be done by public regulation through taxation and legislation. The principal forms of firm organization and dissolution are also discussed. Applications of the laws of supply and demand are made to forecasting demand and analyzing cost structure. The entry and exit of firms and the valuation of the firm is also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 685. Managerial Decisions in a Global Economy. 2 Credit Hours.

Modern techniques of economic analysis and decision science are applied to the management of the firm in a global environment. Business planning and the determinants of supply and demand are an integral part of the course. The principal forms of business organization and dissolution are reviewed. The major issues confronted by the firm: Principal-agent problem (or how to motivate managers to act in the best interest of the owners, the shareholders), moral hazard, discounting of free cash flow and terminal value, economies of scale and scope, and strategic management decision making are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 690. Essentials of Economic Theory. 3 Credit Hours.

An economic study of the environment in which the decision making process takes place in management and the functional areas. Structured especially for students without an undergraduate background in economics. Credit not applicable toward 36-credit professional MBA component.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 691. Managerial Economics. 3 Credit Hours.

Application of economic analysis to the formulation and solving of management problems and the determination of business policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 695. Global Economics. 2 Credit Hours.

This is a course in global economics with focus on economic policies and country risk. We study the aggregate behavior of macroeconomics variables that are relevant for business decisions. We take into account the interaction of the national economy with the rest of the world. In other words, we do global economics and study the roles of monetary and fiscal policies in an open economy, foreign direct investment, and the exchange rate.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ECO 698. Selected Topics. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECO 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 12. Not more than 12 hours of ECO 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Ecosystem Science and Policy (ECS)

ECS 100. Science, Society And Policy. 3 Credit Hours.

A view of science and discovery through a societal lens. Science has been impacting society since Galileo Galilei proposed his theory that the Earth moved around the Sun. Science continues to have a profound effect on our lives and the planet. It is important to understand what science is, how it works and how it informs existing and future public policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 111. Introduction to the Earth's Ecosystem. 3 Credit Hours.

Earth's ecosystems and the interactions of humans with them. Concepts in ecology, environmental science and policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 112. Field Problems in Ecosystem Science and Policy. 2 Credit Hours.

Problem solving in ecology and environmental management. Class projects and case studies providing experience in identifying problems, quantifying scientific issues and considering management options and outcomes. Extensive field experience.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 113. Introduction to Environmental Policy. 3 Credit Hours.

Theories and case studies from various fields, including anthropology, economics, ethics, geography, political science and psychology, will be used to explore the multiple perspectives that influence group and individual perceptions of environmental issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 195. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 196. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 197. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 198. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 199. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 201. Seminar Series in Contemporary Environmental Issues I. 1 Credit Hour.

Current environmental topics involving interaction of science and policy.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 202. Seminar Series in Contemporary Environmental Issues II. 1 Credit Hour.

Current environmental topics involving interaction of science and policy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 204. Environmental Statistics. 3 Credit Hours.

An overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 232. Ecological Principles and Environmental Applications. 3 Credit Hours.

Overview of the science of ecology and its basic principles. Covers aspects of organismal ecology (including population genetics, structure, growth and regulation; adaptations and responses to the physical environment and biological communities); community ecology; and ecosystems (including energy flow, biogeochemical cycles, and biomes). Students will learn to apply ecological principles to understand and solve environmental problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 272. Special Topics in Ecosystem Science and Policy. 1-3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 295. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 296. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 297. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 298. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 299. Studies in Ecosystem Science and Policy. 1-5 Credit Hours.

For courses taken at other institutions that have no equivalents here.

Components: LEC.

Grading: GRD.

ECS 301. Tools for Environmental Decision-Making: The Quantitative Perspective. 3 Credit Hours.

Quantitative decision-making techniques and methodologies.

Prerequisite: ECS 111 and ECS 112. Requisite: Plan of ECS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 302. Perspectives on Environmental Decision Making. 3 Credit Hours.

Techniques for assessing human impacts on the environment. Covers approaches from law, ethics, anthropology and includes cases involving local, regional and global environmental management issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 309. Microbes and the Environment. 3 Credit Hours.

This course is designed to provide students in geology, biology and environmental science a fundamental understanding of the role microbes play in shaping the Earth and its environments as well as the basic principles and approaches to studying these interactions in both modern and ancient settings. The metabolic diversity displayed by microbial communities makes them an integral component of global elemental cycles. In this regard, microorganisms have shaped our planet over the past 4 billion years and continue to do so in a very prominent way. The goal of this course is to learn about microbial diversity and metabolism, and the ability of microbes to shape and influence the environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 310. Sustainable Living. 3 Credit Hours.

Sustainable Living explores ways of living that can be sustained for thousands of years, without further damage to earth, ocean and atmosphere. Topics covered include renewable energy, agricultural practices, water issues, green building, low carbon transportation and healthy living/eating. Students advocate for sustainable practices of their choice in writing and in oral/visual presentations. Frequent field trips.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 332. Ecology and Land Use in the Galapagos. 3 Credit Hours.

Fundamental principles of ecology manifested on Isla Isabela will be employed to evaluate land usages including subsistence and production agriculture, animal husbandry, fuel wood and timber, and conservation with ecotourism. Habitats, flora, and fauna from the vicinity of Puerto Villamil to the rim of Volcán Sierra Negra; analysis of agricultural practices and problems of the mist zone on this volcano's southeastern flank.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 335. Biodiversity in Peru. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECS 337. Latin America And The Environment. 3 Credit Hours.

Theoretical dimensions of current environmental challenges in Latin America and examines their ecological, social, economic, and political dimensions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 371. Readings in Ecosystem Science and Policy. 1-2 Credit Hours.

Supervised readings on special topics. Offered by special arrangement with a faculty member. May be repeated for credit.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 372. Special Topics in Ecosystem Science and Policy. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 373. Topics in Ecosystem Science. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 374. Topics in Environmental Policy. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 375. Topics in Environment and the Humanities. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 376. Topics in Environmental Communication. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 377. Topics in Environmental Economics and Development. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 380. Field Studies in Ecosystem Science and Policy. 1-4 Credit Hours.

Field course to various U.S. and international regions, focusing on current and historic interactions of humans with the local environment. Includes water, land, and mineral resources as well as impacts on local ecosystems. Emphasis on current management efforts and potential impacts of climate change.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 385. Civic Engagement In Galapagos. 3 Credit Hours.

This course is part of the UGalapagos semester held in the Galapagos and is open only to students who have been accepted by the Department of Biology. This field course offers you a rare chance to examine human interactions in a highly politicized landscape of conservation. You will learn historical development and contemporary issues of Latin America from an interdisciplinary perspective, through the cultural, political and social lens of the Galapagos

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 391. STUDIES IN ECOSYSTEM SCIENCE AND POLICY. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 392. STUDIES IN ECOSYSTEM SCIENCE AND POLICY. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 393. STUDIES IN ECOSYSTEM SCIENCE AND POLICY. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 394. STUDIES IN ECOSYSTEM SCIENCE AND POLICY. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 395. STUDIES IN ECOSYSTEM SCIENCE AND POLICY. 1-4 Credit Hours.

(Not offered: transfer credit only) Courses taken at other institutions but having no direct equivalents here.

Components: LEC.

Grading: GRD.

ECS 401. Internship. 3 Credit Hours.

Students selecting the internship will be required to spend a minimum of 120 contact hours working in an outside firm or agency whose mission is to address environmental issues where science and policy intersect.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 402. Thesis. 3 Credit Hours.

Individual, original research of independent study supervised by a UM faculty member and concluded by formal thesis preparation, public oral defense and submission of the thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 403. Interdisciplinary Approaches. 3 Credit Hours.

Students with diverse disciplinary backgrounds will design an interdisciplinary study focused on an environmental problem with a major science component and significant societal implications. Students will apply quantitative methods, formulate usable policy, and communicate their results.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 405. Applied Research In Ecosystem Science And Policy. 1-3 Credit Hours.

Faculty-mentored applied research in environmental topics. Projects in natural ecosystems, sustainable design and business, and communication of environmental issues.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 432. Ecology in the Galapagos. 3 Credit Hours.

Organisms in relation to their environment, with a focus on interactive hands-on learning experiences that connect empirical nature with abstract thinking. Lectures, discussion and field work will help students begin to understand ecosystem ecology, plant dispersal and colonization, organisms' responses to spatial and temporal variability in their environments, plant/animal interactions. Origins and effects of invasive species and actions of bio-control agents.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 433. Conservation in Practice. 3 Credit Hours.

Intersection between economic development, science and conservation in one of the world's most pristine and fragile ecosystems. Exploration of how tourism offers an alternative to unsustainable fisheries that once drove the local economy, yet has created a new set of pressures on the people and the environment. Mitigation efforts, science, and international conservation mesh with an understanding of local politics, customs, and cultures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 485. Political Ecology Of Galapagos. 3 Credit Hours.

This course is part of the UGalapagos semester held in the Galapagos and is open only to students who have been accepted by the Department of Biology. Throughout the term, you will engage in civic activities identified in consultation with the people, government and public health facilities of the small, rural village of Villamil, the sole habitation on Isla Isabella. A major aim is to nurture the mutual respect and understanding across the cultural divide that is necessary to make a difference in the civic life of a community.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 501. Interdisciplinary Environmental Theory. 3 Credit Hours.

Theoretical approaches in environmental and social science fields, including conservation biology, ecology, geography, economics, sociology, anthropology, philosophy, and interdisciplinary approaches. Themes include human ecology, historical ecology, landscape ecology, environmental law and ethics, perception of risk and uncertainty, vulnerability and adaptation, and environmental valuation.

Requisite: Plan of Ecosystem Science and Policy.

Components: DIS.

Grading: GRD.

Typically Offered: Fall.

ECS 503. Interdisciplinary Environmental Methods. 3 Credit Hours.

Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media, Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of Interdisciplinary approaches and methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.

Requisite: Plan of Ecosystem Science and Policy.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 507. Interdisciplinary Environmental Decision Analysis. 3 Credit Hours.

Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm. Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economics, political science, and anthropology.

Requisite: Plan of Ecosystem Science and Policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 572. Special Topics in ECS. 3.00 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 580. Field Studies. 1-4 Credit Hours.

This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of environmental issues and conservation concerns.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECS 601. Interdisciplinary Environmental Theory. 3 Credit Hours.

Theoretical approaches in environmental and social science fields, including conservation biology, ecology, geography, economics, sociology, anthropology, philosophy, and interdisciplinary approaches. Themes include human ecology, historical ecology, landscape ecology, environmental law and ethics, perception of risk and uncertainty, vulnerability and adaptation, and environmental valuation.

Requisite: Plan of Ecosystem Science and Policy.

Components: DIS.

Grading: GRD.

Typically Offered: Fall.

ECS 603. Interdisciplinary Environmental Methods. 3 Credit Hours.

Environmental methods related to core programmatic themes of Urban Ecology, Global Public Health, Climate and Society, Environment and the Media, Integrated Marine and Terrestrial Management, and Regulatory Regimes. The course focuses on the application of Interdisciplinary approaches and methods for addressing complex environmental problems. Students will learn to design and employ interdisciplinary approaches, using qualitative and quantitative methods and analysis, through lectures, reading assignments, discussion sessions, and assignments.

Requisite: Plan of Ecosystem Science and Policy.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 605. Interdisciplinary Environmental Law & Policy. 3 Credit Hours.

Analysis of science-based environmental decision-making and policy implementation at the federal and state levels in the United States, with comparative international perspectives, and an introduction to international institutions that fashion and carry out environmental policy. Case studies will cover authorization, appropriations and oversight functions of Congress and state legislatures; the role of the executive, federal and state, in initiating and implementing statutes by regulation and other means; and the role of negotiation, litigation, mediation and consensus-building in resolving disputes and advancing or thwarting environmental policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 607. Interdisciplinary Environmental Decision Analysis. 3 Credit Hours.

Approaches to studying and interpreting human behavior related to a range of decision making at the level of individual, group, and firm. Multidisciplinary theories and methods informing work in the decision sciences will be covered from fields of psychology, business, economics, political science, and anthropology.

Requisite: Plan of Ecosystem Science and Policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECS 608. Interdisciplinary ECS Seminar.. 2 Credit Hours.

Seminar centering on research and case studies illustrating cutting edge human- environment research, and including both qualitative and quantitative methods. Intensive reading and writing related to relevant topics in the field.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ECS 672. Special Topics in ECS. 3.00 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 680. Field Studies. 1-4 Credit Hours.

This course will provide participants with the opportunity for intensive field research geared toward an interdisciplinary understanding of environmental issues and conservation concerns.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ECS 725. Problems in Environmental Science and Policy. 1-6 Credit Hours.

Content and prerequisites announced when offered. Course may be repeated for credit if content varies.

Requisite: Plan of Ecosystem Science and Policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 790. Directed Readings. 1-3 Credit Hours.

Individually supervised readings on special topics. Offered by arrangement with the instructor. May be retaken for credit.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECS 820. Master's Research. 9.00 Credit Hours.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ECS 830. Pre-Candidacy Research. 1-9 Credit Hours.

Research for ECS Ph.D. students who have not attained candidacy.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECS 840. Doctoral Dissertation. 1-6 Credit Hours.

Required for all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 13 credits total. No more than 12 hours of ECS 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECS 850. Research In Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Education and Psychology Study (EPS)

EPS 201. Psychosocial Change and Well-being. 3 Credit Hours.

Introduction to personal and interpersonal approaches to well-being.

Includes theoretical, historical, philosophical, and psychological bases of well-being. Emphasis will be placed on real-life applications of theory and practice to the promotion of psychosocial change and well-being.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 270. Lifespan Human Development. 3 Credit Hours.

Processes and theories of human development from birth to old age are explored. Areas to be covered include: physical development, cognitive development, social and personality development, moral development, and language development. Emphasis is placed on development as a life-long process and its importance in understanding human behavior.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 280. Introduction to Family Studies: Dating, Coupling, Parenting. 3 Credit Hours.

Theory and practice of romantic relationships and parent-child relationships, including discussion and skills building. Research based information on how to maximize the quality of these interpersonal relationships will be examined.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 291. Community and Character Development. 3 Credit Hours.

The course covers moral and psychological dimensions pertaining to character development as it occurs in communities. Topics include contemporary theory and research regarding perspectives on virtue and morality, states of character, ethical decision making, and character development. The reciprocal relationships between character and community will be a central theme in exploring ethical issues that arise in working with individuals, institutions, and communities. Theory and research will be linked to relevant applications.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 306. Insanity and Humanity: Mental Illness, Society, Stigma and Services. 3 Credit Hours.

The genesis for this course was the generally poor, inaccurate and stigmatized understanding of mental illness in society based on portrayals in popular media including Hollywood produced films. However, over the past several years the depth and accuracy of awareness and knowledge has changed, as the depiction of mental illness and treatment services in films has improved and the availability of narrative accounts has increased. This course is designed to allow Human and Social Development majors, with a particular interest in wellness and human services, to explore varying portrayals of mental illnesses in popular media. The course will foster critical analysis of narrative and film depictions of illness, as well as connect these depictions to a broader narrative on stigma, social determinants of illness and wellness, prevention and intervention.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 311. Group Processes and Development. 3 Credit Hours.

Research findings concerning the nature of small groups and patterns of behavior associated with them are explored. Students experience an ongoing group process to which theories and concepts can be applied. Emphasis is placed on learning to be a participant observer of group behavior and processes, learning about one's own behavior in groups, and developing skills to be a more effective member and leader in task groups.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 321. Understanding Human Service Organizations. 3 Credit Hours.

Prerequisite: EPS 201. Or Corequisite: EPS 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 340. Psychology and Sociology of Sexual Identity. 3 Credit Hours.

History, psychology, and sociology of gay, lesbian, and transgendered populations.

Prerequisite: PSY 110 or SOC 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 351. Introduction to Statistics and Research Design. 3 Credit Hours.

The course will cover basic statistics relevant to the social sciences (e.g., central tendency, variation, t-tests, correlations), with emphasis on real world applications employing commonly used research designs. Students will acquire the tools necessary to interpret elementary statistical analyses and a foundation in the basic analytic methods used in conducting quantitative research in the behavioral sciences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 360. Educational Psychology. 3 Credit Hours.

A review of basic educational psychology principles including cognitive and language development, personal, social and moral development, learning theories, and motivation. A review of basic concepts that contribute to effective learning and other aspects of education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 361. Community Psychology & Development. 3 Credit Hours.

Community psychology is about the prevention of psychosocial problems and the promotion of mental health and well being through the creation of equitable and just social settings, neighborhoods, communities, and societies. Course topics include: stress & social support; oppression and human diversity; primary prevention, social intervention and health promotion; self-help; mediating structures; community mental health; alternative settings; community development and social change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 371. Applied Social Research Methods. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 420. Introduction to Counseling and Psychotherapy. 3 Credit Hours.

This course is a survey of the theories and practical applications of counseling and psychotherapy. Students will acquire an understanding of a variety of theories of psychotherapy, the basic requirements and skills for effective, ethical counseling, and an appreciation for the role of values and human differences in counseling and psychotherapy. This course does not prepare students for practice in mental health professions.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 440. Listening and Helping Skills.. 3 Credit Hours.

Listening and Helping Skills is an introductory course to the foundational skills used in helping relationships. Through lectures, discussions and role- plays, students will learn the rationale behind basic helping skills and their application to diverse settings and contexts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 452. Community Program Development And Evaluation. 3 Credit Hours.

This course addresses the theoretical and practical principles of designing, planning, implementing, and evaluating programs in community-bases settings. The students will learn about prevention, effective program development, program approaches, program components, program evaluation, and cultural proficiency in program development and evaluation. Students will acquire and practice skills for becoming effective workers and leaders in community-based agencies. The course will consist of readings, presentations, and applied knowledge.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 462. Community Consultation and Leadership. 3 Credit Hours.

This course will cover strength based, preventive, empowering approaches to institutional and community change, and will address related skills, stages, processes and outcomes; Conflict resolution, facilitation, strategic planning, visioning, advocacy, change management, and community mobilization will be studied and practiced in class.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 504. Mentored Research Studies. 1-3 Credit Hours.

Under the guidance of EPS faculty and graduate students, undergraduate students, will have an opportunity to get involved in various components of research study; gain valuable knowledge and research experience; and expand their undergraduate academic experience.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 505. Lifespan Human Development. 3 Credit Hours.

Theories and research relating to the biophysical, cognitive, and psychosocial domains of human lifespan development.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 510. Professional, Legal and Ethical Issues in Counseling. 3 Credit Hours.

Professional, legal, ethical, and licensing issues in the counseling profession .

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 511. Lifestyle and Career Counseling. 3 Credit Hours.

An introductory course in career development and career counseling, focusing on theories of career development, counseling tools, strategies, and sociological, economic, and psychological influences on the American worker.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 512. Assessment Strategies for Counselors I. 3 Credit Hours.

This course places emphasis on diagnosis, appraisal, assessment, and testing for individual and interpersonal disorders. It addresses statistical procedures and psychometric principles necessary for responsible test use and exposes the student to a variety of test and non-test assessment techniques in marriage and family, and mental health counseling.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 513. Counseling Process and Practice. 3 Credit Hours.

The development of basic communication and clinical skills necessary for establishing the counseling relationship and conducting therapy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 514. Psychosocial Bases of Social and Cultural Diversity. 3 Credit Hours.

Interrelationship between psychology and sociology in understanding development of diversity in human social systems. Implications for counseling and therapy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 517. Working With Black Clients:Treatment And Assessment Considerations. 3 Credit Hours.

This course presents three core content areas with respect to the treatment and assessment of Black populations. The first content area addresses historical aspects of the development of Black psychology. Additionally, it will review ethnocentrism, the misuse of Western psychology to marginalize African Americans and reasons for scientific abuses against people of color, such as the Tuskegee Syphilis Study. Lastly the first content area will focus on topics such as the Black family, racism, cultural mistrust, stereotype threat, Black/White relations, and Black mental health. Concomitant aspects of Black culture including; racial identity development, spirituality, sexuality, common misconceptions about Black populations, and within group differences related to gender, class, age, and sexual orientation will be peripherally addressed. The second content area presents a culturally-informed perspective on the psychological assessment and treatment of African Americans. It will focus on topics such as ethnic/racial identity models, cultural variables that may affect DSM 5 diagnoses, epidemiological mental health data across ethno-racial groups, biased measures, culturally specific interventions, and important factors to consider during the delivery of treatment. The third module will focus largely on the infusion and integration of the first two modules in therapeutic practice with Black populations. Students will become familiar with the most updated standards of multicultural competencies published by the following associations; •

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 526. Counseling in Community Settings. 3 Credit Hours.

Exploration of a variety of perspectives on community services relevant to mental health counselors. Topics include: the variety of community settings; community, national, and international diversity in mental health services; diversity of clients (e.g., cultures, religions, GLBT, elderly, social classes, disabilities); mental health funding; the role of politics, policy, advocacy, and research; interviewing across cultures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 527. Community Youth Development. 3 Credit Hours.

This course in community youth development (CYD) will focus on the philosophical, sociological, and educational foundations of a youth development perspective that highlights youth as powerful catalysts for change and positive forces in shaping communities. We reflect on how youth development is inextricably linked with family and community development. After reviewing and critiquing traditional adolescent development theories, students will engage with theories and practices of CYD, youth empowerment, youth civic engagement, youth organizing, social justice youth development, youth activism, and critical youth engagement.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 533. Organization and Administration of Higher Education I. 3 Credit Hours.

Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions. Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 539. Effective Teaching, Learning, Assessment & Curriculum in Higher Education. 3 Credit Hours.

Provides an overview of current theories, research, and best practices in effective teaching, learning, assessment, and curricular design.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

EPS 543. The Community College. 3 Credit Hours.

An overview of American community colleges including historical evolution, purposes and functions, characteristics of students and faculty, organization and administration, curricula, current issues, and trends.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 545. Administration of Student Affairs. 3 Credit Hours.

History and philosophy of student affairs will be addressed as well as principles and organization of student affairs administration, current problems, procedures, and recent developments.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 553. Introductory Statistics. 3 Credit Hours.

Basic Statistical procedures will be discussed including measures of central tendency, variability and relationship, sampling, and basic tests of statistical significance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

EPS 554. Essentials of Research in Social and Behavioral Sciences. 3 Credit Hours.

Study of the standards methods and techniques of research in the behavioral and social sciences. Brief orientation to quantitative and qualitative procedures used in the analysis and interpretation of research data are emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 568. Computer Applications in Educational and Behavioral Science Research. 3 Credit Hours.

An introduction to the use of microcomputer statistical packages in social science research, with emphasis given to SPSS for Windows. Course content will cover a broad range of activities encountered in the data analytic process including planning and creating a database, data coding, file manipulation tasks, data screening, and statistical analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 570. Basic skills in Counseling and Interviewing. 3 Credit Hours.

Introductory course on essential skills used in counseling and interviewing. Through lectures, discussions, and small group exercises, students will explore their natural style of helping and learn effective listening and communication skills. This course is not intended to train students to become a professional counselor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 578. Human and Social Development Practicum. 3-6 Credit Hours.

The practicum serves an integrative function: it allows students to apply their academic training, to further develop their career goals, and to hone their skills while gaining experience in real-world settings. Practica are unpaid, supervised experiences. Students choose from a menu of settings that have been approved as HSD practicum sites and spend a minimum of 120 hours (3 credits) or 250 hours (6 credits) at their chosen setting over the course of the semester. Must be taken concurrently with EPS 481.

Components: PRA.

Grading: GRD.

Typically Offered: Spring.

EPS 579. Human and Social Development Practicum Seminar. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 587. Special Topics In Human And Social Development. 1-3 Credit Hours.

This course is designed for students wishing to focus on a specific area of study within the umbrella of Human and Social Development. Topics will be offered based on current trends in the field as well as student and faculty interest. Students will be given supervision and support in a structured seminar setting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 589. Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 591. Workshop in Education. 1-3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 592. Workshop in Education. 1-3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 593. Workshop in Education. 3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 595. Research Honors Project I. 2 Credit Hours.

This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 596. Research Honors Project II. 2 Credit Hours.

This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 598. Research Honors Project - Seminar. 1 Credit Hour.

This course is restricted to students in the SEHD who have been accepted into the Research Honors Program and are working with a Faculty mentor. Students are required to present at the undergraduate Research, Creativity, and Innovation Forum.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 599. Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 600. Field Exper Edu Res. 2-6 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 601. Field Studies in Education. 1-6 Credit Hours.

Individual study of a school or school system, identifying its strengths and weaknesses, and making positive recommendations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 605. Regression Methods. 3 Credit Hours.

The aim of this course is to provide a solid foundation in the basic concepts of multivariate statistics, and its application to practical research questions. This course extends the content of EPS 671 (ANOVA methods) and EPS 672 (regression methods) to cover methods used when there are multiple dependent variables to be modeled simultaneously. This course focuses on the traditional multivariate methods (as opposed to the contemporary models of structure equation modeling) that see wide use in the behavioral sciences. The general topics covered in the course include, but are not limited to: introductory matrix algebra, multivariate analysis of variance (MANOVA), factorial MANOVA, discriminant function analysis, and exploratory factor analysis. In all cases, this course is intended to provide a solid conceptual background of these topics, as well as a thorough description/practice of the application of these topics to real data scenarios.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 620. Workshop in Education. 3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 622. Community Well-being and Change: Theory and Practice. 3 Credit Hours.

This course is designed to promote an understanding of the factors associated with healthy communities. It provides a comprehensive overview of the relevant skills and theories including: ecological/systems theory/models; community theories (sense of community, social capital, environmental psychology); and critical social theory, social justice, and social determinants of well-being.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 623. Development & Change in Community Organizations: Theory & Practice. 3 Credit Hours.

This course focuses on the unique role of non-profit, community-based organizations in promoting human and community development. Students will engage in an analysis of the range of functions that organizations serve and the various organizational strategies used in community settings.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 624. Essentials of Research in Social and Behavioral Sciences. 3 Credit Hours.

Study of the standards methods and techniques of research in the behavioral and social sciences. Brief orientation to quantitative and qualitative procedures used in the analysis and interpretation of research data are emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 625. Program Evaluation. 3 Credit Hours.

Terminology, models, standards, practices, and common problems associated with program evaluation in Educational and Social Service settings. Prerequisite: EPS 670 and 553 or equivalents.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 627. Community Youth Development. 3 Credit Hours.

This course in community youth development (CYD) will focus on the philosophical, sociological, and educational foundations of a youth development perspective that highlights youth as powerful catalysts for change and positive forces in shaping communities. We reflect on how youth development is inextricably linked with family and community development. After reviewing and critiquing traditional adolescent development theories, students will engage with theories and practices of CYD, youth empowerment, youth civic engagement, youth organizing, social justice youth development, youth activism, and critical youth engagement.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 628. Managing Community Organizations. 3 Credit Hours.

This course is designed to develop leadership skills for individuals engaged with community based organizations. Topics will include administrative, management, and fiscal issues. Grant writing, fund-raising, organizational communication, program planning, marketing, innovation, strategic planning, and accountability issues will be examined from a nonprofit organizational perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 629. Seminar in Community & Social Change. 3 Credit Hours.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 648. Multicultural Communities in a Globalized Society. 3 Credit Hours.

This course examines the relationship between multiculturalism and globalization and how these concepts impact education and the world at large. Topics include dimensions of human diversity, identities and acculturation; race and class; gender and power; children and youth; social inclusion and social justice; health disparities; poverty and work; racism and inequality.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 667. Professional, Legal and Ethical Issues in Counseling. 3 Credit Hours.

Professional, legal, ethical, and licensing issues in the counseling profession .

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 668. Psychosocial Bases of Social and Cultural Diversity. 3 Credit Hours.

Interrelationship between psychology and sociology in understanding development of diversity in human social systems. Implications for counseling and therapy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 669. Psychopathology for Counselors. 3 Credit Hours.

In depth introduction to abnormal human behavior patterns of concern to mental health professionals. Clinical conditions will be examined within the context of currently most viable theory and research relating to etiology, assessment, diagnosis and treatment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 670. Dynamics of Marriage and Family Systems. 3 Credit Hours.

Introduction to the history and development of marriage and family systems theory as a method for understanding individuals' behavior and functioning. Introduction to several modes of family therapy. Throughout the course, lectures will also be integrated with other topics including race, culture, gender, sexual orientation, ability.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 671. Family Therapy. 3 Credit Hours.

Concentrated study of several approaches to family therapy including systemic and psychosocial perspectives. Theory and techniques of family therapy are taught in lecture, videotape, and simulation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 672. Therapy for Couples. 3 Credit Hours.

Theory and technique linked to working with couples, in marriage and in other relationships.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 673. Counseling in Community Settings. 3 Credit Hours.

Exploration of a variety of perspectives on community services relevant to mental health counselors. Topics include: the variety of community settings; community, national, and international diversity in mental health services; diversity of clients (e.g., cultures, religions, GLBT, elderly, social classes, disabilities); mental health funding; the role of politics, policy, advocacy, and research; interviewing across cultures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 674. Lifestyle and Career Counseling. 3 Credit Hours.

An introductory course in career development and career counseling, focusing on theories of career development, counseling tools, strategies, and sociological, economic, and psychological influences on the American worker.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 675. Therapeutic Group Procedures. 3 Credit Hours.

This course examines both the theory and practice of group counseling. The course covers therapist issues, patient selection criteria, group structuring as well as basic therapeutic techniques. The course prepares students to design structured counseling groups, to prepare group counseling materials, and to lead counseling groups of various types.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 676. Counseling Process and Practice. 3 Credit Hours.

The development of basic communication and clinical skills necessary for establishing the counseling relationship and conducting therapy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 677. Assessment Strategies for Counselors I. 3 Credit Hours.

This course places emphasis on diagnosis, appraisal, assessment, and testing for individual and interpersonal disorders. It addresses statistical procedures and psychometric principles necessary for responsible test use and exposes the student to a variety of test and non-test assessment techniques in marriage and family, and mental health counseling.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 679. Lifespan Human Development. 3 Credit Hours.

Theories and research relating to the biophysical, cognitive, and psychosocial domains of human lifespan development.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 680. Theory and Practice with Children and Adolescents. 3 Credit Hours.

Course prepares students to provide preventive and therapeutic interventions with children and adolescents including theory, research, and practice.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 681. Counseling and Sexuality. 3 Credit Hours.

Emphasis is placed on self-awareness and acceptance of all dimensions of human sexuality. Readings and classroom activities focus on biological aspects of sexuality, an understanding of sexual dysfunctions, and their treatment.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 682. Practicum in Counseling I. 1-4 Credit Hours.

Supervised Practicum at the Institute for Individual and Family counseling and other appropriated clinical settings relating theoretical formulations to intervention strategies appropriate to specialization.

Corequisite: EPS 619.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 683. Practicum Laboratory I. 1-4 Credit Hours.

Individual, dyad, and small group supervision at approved Practicum sites.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 684. Research and Program Evaluation in Counseling. 3 Credit Hours.

Course focuses on the interpretation and application of research data as applied to clinical practice. Skills in using behavioral research-based literature to identify, evaluate and interpret appropriate interventions are also emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 685. Substance Abuse and Addictions: Theories and Counseling. 3 Credit Hours.

Theories and research on individual, systemic causes, and outcomes of substance abuse, and concomitant practices in counseling and therapy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 686. Working With Black Clients: Treatment And Assessment Considerations. 3 Credit Hours.

This course presents three core content areas with respect to the treatment and assessment of Black populations. The first content area addresses historical aspects of the development of Black psychology. Additionally, it will review ethnocentrism, the misuse of Western psychology to marginalize African Americans and reasons for scientific abuses against people of color, such as the Tuskegee Syphilis Study. Lastly the first content area will focus on topics such as the Black family, racism, cultural mistrust, stereotype threat, Black/White relations, and Black mental health. Concomitant aspects of Black culture including; racial identity development, spirituality, sexuality, common misconceptions about Black populations, and within group differences related to gender, class, age, and sexual orientation will be peripherally addressed. The second content area presents a culturally-informed perspective on the psychological assessment and treatment of African Americans. It will focus on topics such as ethnic/racial identity models, cultural variables that may affect DSM 5 diagnoses, epidemiological mental health data across ethno-racial groups, biased measures, culturally specific interventions, and important factors to consider during the delivery of treatment. The third module will focus largely on the infusion and integration of the first two modules in therapeutic practice with Black populations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 687. Latino Youth And Families. 3 Credit Hours.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Summer.**EPS 688. Spanish For Mental Health Professionals. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Summer.**EPS 689. Psychological Interventions with Hispanic/Latino Populations. 3 Credit Hours.**

Explores the diversity of experiences among Hispanics and their implications for therapy. Topics include: racial diversity among Hispanics, sociopolitical factors in mental health, the impact of immigration on mental health, special psychological treatments: trauma treatment, family interventions and bilingual counseling.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**EPS 698. Continuous Registration--Master's Study. 1 Credit Hour.**

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**EPS 699. Advanced Individual Study. 1-6 Credit Hours.**

Individual work on a special project under faculty guidance.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall & Spring.**EPS 700. Introductory Statistics. 3 Credit Hours.**

Basic Statistical procedures will be discussed including measures of central tendency, variability and relationship, sampling, and basic tests of statistical significance.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Summer.**EPS 701. Introduction to Research Methods. 3 Credit Hours.**

The nature of disciplined inquiry in behavioral and social sciences. Includes philosophy of science, quantitative and qualitative research, basic concepts in sampling and measurement, and systematic searches of the research literature. Students required to complete literature search on a topic of their interest and submit a report of their findings.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**EPS 702. General Linear Models. 3 Credit Hours.**

Group comparative designs, univariate parametric and nonparametric methods and statistical inference will be discussed. Topics include probability, sampling, estimation, ANOVA, ANCOVA. Students will be required to use computer packages (SAS/SPSS).

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**EPS 703. Applied Multivariate Statistics. 3 Credit Hours.**

This course will provide: (1) a conceptually-oriented introduction to regression methods and (2) opportunities to learn related data-analytic techniques.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**EPS 704. Computer Applications in Educational and Behavioral Science Research. 3 Credit Hours.**

An introduction to the use of microcomputer statistical packages in social science research, with emphasis given to SPSS for Windows. Course content will cover a broad range of activities encountered in the data analytic process including planning and creating a database, data coding, file manipulation tasks, data screening, and statistical analysis.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**EPS 705. Measurement and Psychometric Theory. 3 Credit Hours.**

This course provides an introduction to the theory and application of measurement and psychometric models used in the behavioral sciences.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**EPS 706. CATEGORICAL DATA ANALYSIS. 3 Credit Hours.**

Categorical data is abundant in many different fields such as education, psychology, and marketing. The use of statistical methods for categorical data has increased dramatically in recent years. Categorical data can be numeric or character, but it is always a discrete number of levels. Virtually every research project categorizes some of its observations: male or female, marital status, political or religious affiliation, race of patient, and so on.

Prerequisite: EPS 553 and EPS 671.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**EPS 707. Item Response Theory. 3 Credit Hours.**

The purpose of the course is to provide training in the theory and application of item response theory (IRT) as it pertains to educational and psychological measurements. Focus will be given to discussing IRT as a measurement model used to measure the properties of items and individuals. Particular attention will be given to contrasting the properties of the IRT model to the classical test theory, and the application of IRT to actual data sets.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**EPS 708. An Introduction to Structural Equation Modeling for Multivariable Data. 3 Credit Hours.**

This course will provide (1) a conceptually-oriented introduction to Structural Equation Modeling for multivariate data and (2) opportunities to learn related data-analytic techniques.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.

EPS 709. Introduction to Multilevel Modeling. 3 Credit Hours.

This course will provide: (1) a conceptually-oriented introduction to multilevel modeling and (2) opportunities to learn related data-analytic techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 710. Meta-analytic methods for research synthesis.. 3 Credit Hours.

Meta-analysis is the general practice of combining, comparing, and interpreting statistics across a set of studies that investigate the same (or similar) phenomena using a properly motivated theoretical framework. Meta-analysis has become a popular tool in a variety of research disciplines, including the social sciences, education, medicine, and business. This course provides a thorough introduction to the theoretical foundations of meta-analysis, discusses commonly used statistical techniques, and analyzes several examples of the existing meta-analysis. Emphasis is placed on application, so that students are trained to independently perform a meta-analysis, from start to finish, in whatever substantive area interests students the most.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 711. Advanced Topics In Research, Measurement, And Evaluation. 3 Credit Hours.

Review of emerging quantitative methodological advances relevant to educational research for which formal course title and syllabus have not been developed and formalized in the UM Bulletin. Allow for experimental instructional formats. See Course Notes for specific topic.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 712. Field Experience in Educational Research. 2-6 Credit Hours.

A total of 125 hours of supervised practical experiences in educational research. Emphasis is placed on actual participation in a wide variety of on-going research projects through associations with an approved educational R & D center. Normally taken in two or three credit blocks.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 714. Qualitative Methods I. 3 Credit Hours.

An overview of the history, nature, characteristics, strategies, and ethics of qualitative research methods. Critical analysis and evaluation of various types of qualitative studies, including design, sampling, processes of data collection and analysis, and reporting results.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 715. Qualitative Methods II: Case Studies and Grounded Theory. 3 Credit Hours.

Types and designs of case studies, development of protocol, field work, data analysis, and report writing. Practical procedures and techniques for conducting grounded theory studies, including data coding and analysis, and reporting of results.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 716. Qualitative Methods II: Interviews and Content Analysis. 3 Credit Hours.

Sociological and oral history interview methods, including methodological issues, computer-based coding, decoding, and interpreting data. Visual and text based content analysis, scoring schemas, and inter-rated reliability are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 725. Seminar In Community Well-Being. 1-3 Credit Hours.

This course provides an overview of the field of community psychology. We will examine the conceptual and theoretical developments in community psychology since the 1965 Swampscott Conference (the 'birthplace' of community psychology) through reading primary sources – articles, monographs and book chapters – by those who have shaped the field. The readings will include some empirical research studies, but our key focus is the conceptual writings. The goal of this course is to understand and critique different theoretical perspectives in the field of community psychology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 731. FOUNDATIONS OF COMMUNITY PSYCHOLOGY. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 732. Community Based Participatory Action Research. 3 Credit Hours.

Prerequisite: EPS 670.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 737. Organization and Administration of Higher Education I. 3 Credit Hours.

Theoretical approaches from organizational analysis. Applications to problems, processes, and patterns of higher education institutions. Consideration given to legal status, governance patterns, and external relations. Administrator, faculty, trustee, and student roles are also explored.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 738. Effective Teaching, Learning, Assessment & Curriculum in Higher Education. 3 Credit Hours.

Provides an overview of current theories, research, and best practices in effective teaching, learning, assessment, and curricular design.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

EPS 739. The Community College. 3 Credit Hours.

An overview of American community colleges including historical evolution, purposes and functions, characteristics of students and faculty, organization and administration, curricula, current issues, and trends.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 740. Administration of Student Affairs. 3 Credit Hours.

History and philosophy of student affairs will be addressed as well as principles and organization of student affairs administration, current problems, procedures, and recent developments.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPS 741. Basic skills in Counseling and Interviewing. 3 Credit Hours.

Introductory course on essential skills used in counseling and interviewing. Through lectures, discussions, and small group exercises, students will explore their natural style of helping and learn effective listening and communication skills. This course is not intended to train students to become a professional counselor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 742. Higher Education in the United States: From Harvard to Present. 3 Credit Hours.

Broad view of issues and problems in higher education. Fundamental ideas and significant literature are analyzed from historical, philosophical, and societal perspectives.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 743. Psychological Bases of Education. 3 Credit Hours.

Review and extension of basic principles of psychology underlying educational practice. Basic concepts of educational psychology which contribute to effective education will be discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 744. Student Diversity in American Higher Education. 3 Credit Hours.

Emphasis on the diversity of today's undergraduate students. An examination of the sociological context and philosophical orientation of contemporary college students is included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 745. Organization of Higher Education II: Governance, Leadership and Finance. 3 Credit Hours.

Provides an overview of selected topics in governance, administrative leadership and finance in higher education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 746. College Student Development: Theory, Research and Practice. 3 Credit Hours.

Emphasis on student growth and development during college and an analysis of the factors which affect development along cognitive and affective dimensions. An in-depth examination of college student development theories is included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 747. Critical Issues in Student Affairs. 3 Credit Hours.

Emphasis on the most pressing issues facing the profession of student affairs today including diversity, funding, staff retention and the law and student affairs.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 748. Enrollment Management: Theory and Practice. 3 Credit Hours.

Comprehensive overview of principles and practices of a strategic process that begins with recruitment and continues through graduation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 749. Advanced Seminar in Enrollment Management. 3 Credit Hours.

In-depth exploration of topics in enrollment management, including market research, market testing, pricing strategies, strategic planning, and development of a future vision.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 750. Seminar in Higher Education/Enrollment Management: Contemporary Issues. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 751. Seminar in Higher Education Administration: Contemporary Issues. 3 Credit Hours.

A review of recent developments, research findings, changing issues, and problems in contemporary American higher education.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 752. Dissertation Seminar. 3 Credit Hours.

The development and analysis of dissertation proposals will be required. Detailed coverage of the research process, proposal elements, dissertation writing and all aspects of doctoral research will be emphasized. Extensive feedback on research ideas and writing is involved.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 753. Internship in College Teaching. 3 Credit Hours.

A program in observation and supervised teaching in the community junior or liberal arts college. The student spends 15-20 hours per week. Included is a seminar held with the college supervisor which meets several times during the semester.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 754. Practicum: Administration of Higher Education. 1-6 Credit Hours.

This course is designed to provide students with an opportunity to develop professional competencies while they apply theory to practice. Opportunities can be pursued in enrollment management or student affairs related offices either on campus or at other higher education institutions. Students will contract for the type of experience desired and a formal research paper and presentation will culminate this activity.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 764. Workshop in Education. 1-3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 765. Workshop in Education. 1-3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

EPS 766. Workshop in Education. 3 Credit Hours.

Study in special interest areas in education.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 767. Counseling Psychology: Theory, Research and Practice I. 3 Credit Hours.

Orientation to counseling psychology as a discipline including theories, research methodology, contemporary research, lifestyle and career development theory, and professional issues. Required of all first year counseling psychology students. May be taken for 3 or 6 credits to a maximum of 12 credits.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 768. Counseling Psychology: Theory, Research and Practice II. 3 Credit Hours.

Orientation to counseling psychology as a discipline including theories, research methodology, contemporary research, lifestyle and career development theory, and professional issues. Required of all first year counseling psychology students. May be taken for 3 or 6 credits to a maximum of 12 credits.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 770. Psychological Appraisal I. 3 Credit Hours.

Orientation to psychological appraisal with emphasis on development of skill in assessment of intellectual functioning.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

EPS 771. Psychological Appraisal II. 3 Credit Hours.

Orientation to psychological appraisal with emphasis on use of procedures which facilitate preparation for, and evaluation of, intervention efforts in the personality and social-behavioral areas.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 775. Doctoral Practicum I. 1-9 Credit Hours.

Supervised counseling experiences with clients at the Institute for Individual and Family Counseling. Individual and small group supervision by program faculty.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 776. Doctoral Practicum II. 1-9 Credit Hours.

Supervised counseling and assessment experience in outside agencies, hospitals and community settings. Small group case conference conducted by program faculty.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 777. Advanced Practicum in Counseling Psychology. 1-9 Credit Hours.

Supervised experience appropriate to the work of the counseling psychologist.

Components: PRA.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 779. Internship in Counseling Psychology. 1-6 Credit Hours.

Supervised internship in Counseling Psychology in an approved facility.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 780. Cultural Diversity and Mental Health. 3 Credit Hours.

Advanced training in conceptualizing the individual within cultural and sociopolitical contexts with purpose of creating more reflective and intentional clinicians. Includes learning skills for improving the lives of clients in these areas.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPS 781. The Social Bases Of Human Activity And Flourishing. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPS 782. Supervision in Counseling Psychology. 3 Credit Hours.

The course includes a didactic presentation of theories of supervision and consultation. Application of supervision theories with opportunities to practice beginning supervisor skills.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 785. Preparing Future Faculty Seminar. 1-3 Credit Hours.

The goal of this course is to introduce you to the larger role of university professor. The class is designed to give you some general sense of university structure and of the breadth of opportunities in higher education, to think through your own vision of "being a professor" particularly the part of that role that focuses on teaching, and to help you on the job search by preparing a professional portfolio that will help you get that first job and, hopefully, set you on a smooth career path. The PFF seminar will provide you with contextual and interdisciplinary knowledge of professoriate. Each seminar will be designed to aid you in your goal to become an outstanding faculty member. PFF will give you an overview of life on the academic job market and the pre-tenure years. It is your responsibility to tailor that information to fit your needs. It is expected that you take the information you learn in PFF and speak with mentors in your discipline to glean further insights into faculty life.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 789. Research Practicum. 1-6 Credit Hours.

Hands on experience in various aspects and processes in research.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

EPS 798. Advanced Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 799. Advanced Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her adviser. Credit is not awarded until the thesis has been accepted.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPS 820. Research in Residence. 0 Credit Hours.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in EPS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 825. Continuous Registration Master's Study. 1 Credit Hour.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPS 830. Pre-Candidacy Dissertation Research. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of EPS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPS 835. Doctor of Education Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ed.D. The student enrolls for credit as determined by his/her advisor. Credit is not awarded until the doctoral project has been accepted. Total enrollment may not exceed 12 credits.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPS 840. Post-Candidacy Dissertation Research. 1-12 Credit Hours.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPS 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and Ed.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate school.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Electrical & Computer Engineering (ECE)

ECE 100. Introduction to Electrical and Computer Engineering. 3 Credit Hours.

Introduction to Electrical and Computer Engineering (ECE) for high school students interested in science and technology. The course covers important thematic units of the discipline: electronics, digital design, computer programming and signal processing. Emphasis on hands-on experience in the use of laboratory instrumentation, circuit construction and computer simulation.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 111. Introduction to Engineering I. 3 Credit Hours.

Use of engineering tools and computer techniques for problem solving, data acquisition, analysis, presentation, software design, and computer aided drafting. Development of design skills through several design and building competitions is included as well as an introduction to professional ethics, intellectual property rights, the use of MATLAB, AutoCAD, and programming in C++.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 112. Introduction to Engineering II. 2.00 Credit Hours.

Course is designed to provide first-year undergraduate students with an introduction to some key electrical and computer engineering concepts and topics by discussing their roles in some of the commonly used electrical and computer engineering systems. Numerical examples, circuit simulations, and computer programming are introduced through the use of MATLAB, microcontroller programming languages, and PSpice. Hands-on experience are provided through a project where the students design, assemble, program, and test a microcontroller-based mobile robot with a variety of sensing devices. Should be taken as a freshman only; otherwise to be replaced by a technical elective.

Prerequisite: ECE 111. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 118. Introduction to Programming. 3 Credit Hours.

Introduction to computing, problem solving, program design, C++ language fundamentals, and software engineering principles. Software design projects are included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 201. Electrical Circuit Theory. 3 Credit Hours.

Fundamentals of DC-AC circuit laws, including steady state and transient analysis. Lecture, 3 hours.

Prerequisite: PHY 205.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 204. Electrical Circuits Laboratory. 1 Credit Hour.

Laboratory work employing the techniques of circuit theory to physical components, devices, and circuits. Use of electronic computing techniques to relate analytical and empirical investigations. Laboratory, 3 hours.

Prerequisite: ECE 201.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 205. Principles of Electrical Engineering--I. 3 Credit Hours.

Fundamentals of DC and AC Circuits and a survey of Electrical Machinery and Electronics. Not open to students with credits in ECE 201. Lecture, 3 hours.

Prerequisite: MTH 162 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 218. Data Structures. 3 Credit Hours.

Continuation of Programming with emphasis on C++ and the skills required of a capable programmer. Essential data structures and algorithms, and introducing algorithm analysis. Basic sorting, searching, and data management. Dynamic and static memory management. Object oriented programming.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 301. Electromagnetic Field Theory. 3 Credit Hours.

Vector analysis, static and time-varying fields, Maxwell's equations, propagation of electromagnetic waves, and transmission line theory and applications are discussed.

Prerequisite: PHY 207 and MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 304. Logic Design. 3.00 Credit Hours.

Boolean algebra and its applications in analysis and design of logic circuits. Introduction to SSI and MSI circuits as building blocks, memory elements, and analysis and synthesis of synchronous and asynchronous sequential systems are discussed.

Prerequisite: ECE 118 or CSC 120.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 305. Electronics I. 3 Credit Hours.

Semiconductor physics and devices. Diodes, bipolar-junction transistors (BJT). Introduction to field-effect transistors (FETs) and Operational Amplifiers. Emphasis on dc and ac analysis of electronic circuits. Use of CAD tools such as PSpice.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 306. Electronics II. 3 Credit Hours.

Continuation of ECE 305. Emphasis on integrated circuits. Field-effect transistors (FETs). Application of operational amplifiers and other integrated circuits. Frequency response of amplifiers. Use of CAD tools as PSpice.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 307. Circuits, Signals And Systems. 3.00 Credit Hours.

This course teaches the basics of continuous-time signals and systems with an emphasis on circuits as motivating examples. Topics include signals and linear time-invariant systems, convolution, stability, Laplace Transform, transfer function, poles and zeros, s-domain circuit analysis, feedback control, Fourier Series and Transform, Bode plots, analog filters.

Prerequisite: ECE 201, MTH 311.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 308. Linear Control Systems. 3 Credit Hours.

Introduction to system theory, transfer function and state variable modeling of linear continuous time systems, root locus, Bode plot, Nyquist criterion, analysis and controller design using root locus and frequency domain techniques, proportional-integral-derivative controllers.

Prerequisite: ECE 307, ECE 311, MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 310. Introduction to Engineering Probability. 3 Credit Hours.

Axioms of probability, discrete and continuous random variables, probability density functions. Expectation, conditioning, independence, functions of random variables, characteristic functions, multiple random variables. Sums of random variables, limit theorems, probability bounds, convergence concepts. Introduction to statistical analysis, estimation, and hypothesis testing. Cross-listed with IEN 310.

Prerequisite: MTH 162 or equivalent. Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 311. Electronics Laboratory. 1 Credit Hour.

Laboratory course in conjunction with courses ECE 305 and 306.

Prerequisites: ECE 204, ECE 306. Or Corequisite: ECE 306.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 312. Processors: Hardware, Software, And Interfacing. 4 Credit Hours.

Architecture and operation of modern microprocessor based computer systems and microcontrollers. Assembly language and applications with hands on experience. Lecture, 3 hours; laboratory, 3 hours.

Prerequisite: ECE 304.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 315. Digital Design Laboratory. 1 Credit Hour.

Familiarization with properties and use of logic gates, flip-flops, digital standard components, and programmable logic devices. Design and implementation of combinational and synchronous digital systems and Computer Aided Engineering (CAE) tools for design and simulation of digital systems are also included.

Prerequisite: ECE 304.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 316. Structured Digital Design. 1 Credit Hour.

VHDL ((VHSIC (very high speed integrated circuits) hardware description language)) introduction and syntax. Functional and behavioral models of VHDL for design, testing, and simulation of digital circuits and programmable logic devices. Design and implementation of combinational and sequential digital systems using VHDL is also included.

Prerequisite: ECE 315. Or Corequisite: ECE 315.

Components: LAB.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 318. Algorithms. 3 Credit Hours.

Continuation of the programming sequence. Object oriented programming with C++, emphasizing the skills required of a professional programmer. Essential data structures and algorithms: trees, graphs, hash tables, parsing and text processing. Advanced sorting and data management algorithms. Advanced features of C++; effective programming with C.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 322. Systems Programming. 3 Credit Hours.

Practical hands-on experience with UNIX systems programming and administration. Programming using C and shell scripting languages. File systems features, multiprocessing, inter-process communication, and systems programming fundamentals are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 336. Discrete-Time Signals And Systems. 3 Credit Hours.

This course provides the basics connecting continuous-time (CT) and discrete-time (DT) signal processing, and an introduction to discrete-time signals and systems and applications. Topics include communication, sampling, discrete-time linear time-invariant (LTI) signals and systems, difference equations, z Transform, transform domain analysis of DT systems, DT Fourier transform (DTFT), digital filters, applications to audio, and image processing.

Prerequisite: ECE 307.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 368. Internet Computing I. 3 Credit Hours.

Principles and practices used in creating interactive Internet sites. Extensive object oriented programming in Java is taught. Use of eXtensible Markup Language (XML) to provide content description. Use of GUI components and graphics to create web based applications.

Prerequisite: ECE 218.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 395. Undergraduate Research in Electrical and Computer Engineering. 1-3 Credit Hours.

Research and/or design projects consisting of an individual investigation of real-world contemporary problems. Offered by special arrangement and under the supervision of a faculty member.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 399. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with firms offering positions consistent with the student's field of study. Course may be repeated.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 404. Communication Systems. 3 Credit Hours.

Introduction to digital communication, including binary and M-ary baseband and bandpass modulation over additive white Gaussian noise channels. Optimal receivers, pulse shaping for bandlimited channels, synchronization, multiple access.

Prerequisite: ECE 336, ECE 310 or IEN 310.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 405. Solid-State Electronics. 3 Credit Hours.

Principles of semiconductor electronics, energy bands of semiconductors, Fermi level, carrier distribution, and transport mechanisms are discussed. Application of semiconductor theory to various junction and field effect devices are included.

Prerequisite: ECE 301, PHY 207.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 414. Computer Organization and Design. 3 Credit Hours.

Hardware structure, organization and design of computers. Design of computer arithmetic and control units, data, and instruction paths. Modern hardware description language (HDL) based design methodology. Register transfer level design of computers and digital systems. Algorithmic state machine (ASM) charts, instruction set architecture, control unit implementation, microprogramming, memory organization, pipelining, I/O system organization and high speed arithmetic units are discussed.

Prerequisite: ECE 312.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 415. Senior Project I. 1 Credit Hour.

Topics cover tasks in project planning including scheduling, documentation, communication (written and oral), financial constraints, and ethics. Students are required to present project proposals to serve as the basis for the follow-up course, ECE 416.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 416. Senior Project II. 2 Credit Hours.

The capstone design course for Electrical Engineering majors. An electrical system is designed, implemented, and documented.

Prerequisite: ECE 415.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 417. Embedded Microprocessor System Design. 3 Credit Hours.

Study of microcomputer system design, scientific methods for quantifying system performance, embedded controller applications using high level languages, and debugging strategies. Lecture, 1 hour; laboratory, 3 hours.

Prerequisite: ECE 218, ECE 315, ECE 414.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 418. Senior Project Planning. 1 Credit Hour.

The creative process of devising a product to meet customers needs including an overview of the design process, analysis of requirements, project planning, scheduling, evaluation, and documentation. Students are required to present project proposals to serve as the basis for the follow-up senior design project.

Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 419. Senior Project. 2 Credit Hours.

The purpose of this course is to integrate the student's knowledge in hardware, software, and project management. A major digital system is designed, implemented, debugged, and documented.

Prerequisite: ECE 418, ECE 417, ECE 454.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 436. Digital Signal Processing. 3 Credit Hours.

Topics include finite length transforms (e.g., discrete Fourier transform, discrete sine and cosine transforms) and their fast computation, finite impulse response (FIR) and infinite impulse response (IIR) digital filter design, digital filter structures, finite wordlength effects on filter performance, and multirate signal processing fundamentals.

Prerequisite: ECE 336.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 437. Real-Time Digital Signal Processing Laboratory. 1 Credit Hour.

Digital signal processing hardware for real-time operation, software development tools, instruction set, and DSP experiments with audio and speech application are discussed.

Prerequisite: ECE 436. Or Corequisite: ECE 436.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

ECE 454. Digital System Design and Testing. 2 Credit Hours.

Functional building blocks and concepts of control and timing in digital design. Descriptive techniques for digital systems and design for testability.

Prerequisite: ECE 316.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 455. Design-for-Testability Laboratory. 1 Credit Hour.

Project laboratory demonstrating the techniques necessary to design, implement, and debug and test a large system. The process is carried through from conceptual design, implementation, integration, simulation, and synthesis on a FPGA chip.

Prerequisite: ECE 454. Or Corequisite: ECE 454.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 499. Senior-Junior Cooperative Education. 1-3 Credit Hours.

Analysis and design experience obtained in industry or government. Approved project jointly supervised and assessed by department faculty and external partner. Note: A maximum of three credits could be used to satisfy degree requirement as Technical Elective. See Bulletin for more information.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ECE 500. Engineering Analytical Techniques. 3 Credit Hours.

Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials. singular value decomposition, vector, and matrix norms are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 502. Engineering Acoustics. 3 Credit Hours.

Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 503. Laser Communications. 3 Credit Hours.

Prerequisites: PHY 206, PHY 207, ECE 301, or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 504. Fundamentals of Optical. 3 Credit Hours.

Prerequisites: ECE 301 or BME 545.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 505. Semiconductor Photonic Devices. 3 Credit Hours.

Principles of semiconductor electronics: energy bands of semiconductors; Fermi level; carrier distribution and transport mechanisms. Application of semiconductor theory to various junction and field effect devices. Prerequisite : ECE 305.

Prerequisite: ECE 305.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 506. Microfabrication. 3 Credit Hours.

Principles of operation, properties and applications of semiconductor devices, junction, metal-semiconductor, metal-oxide-semiconductor, optoelectronic, bulk-effect, and charge-coupled are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 511. Computability, Complexity, And Algorithms. 3 Credit Hours.

Advanced programming techniques: dynamic programming, fast data retrieval and sorting, enumerators, data structures, and data management. The limits of software engineering, computability and models of computation, complexity analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 512. Software Engineering and Architecture. 3 Credit Hours.

Examination of the building blocks of software systems. Requirements and specifications. Model driven Architecture. Architectural and Design Patterns. Design and analysis for functionality and quality. Computer Aided Software Engineering tools.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 513. Software Design and Verification. 3 Credit Hours.

Design for testability. Software testing methods and tools. Formal review techniques. Functional and structured testing methods and test generation. Unit-level testing. Integration, acceptance, regression, performance and stress testing. Verification methods.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 514. Computer Architecture. 3 Credit Hours.

Computer data and instruction types, survey of existing architectures, and the interaction between hardware and software sub-systems are discussed. Advanced topics in computer architecture.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ECE 519. Design of Computing Languages. 3 Credit Hours.

Major features of modern programming languages with emphasis on design and software efficiency. Interaction between language design and the design of its compiler are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 521. Computer Operating Systems. 3 Credit Hours.

The design and implementation of operating systems. Virtual memory and memory management, resource allocation, device drivers, process creation, control, communications and scheduling, file systems, data protection, security, parallel processing and time-sharing. The class includes a significant operating system implementation project.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 532. VLSI Systems. 3 Credit Hours.

Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, maskmaking, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 533. Random Signals and Noise. 3 Credit Hours.

Probability models, Bayes' theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationarity and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 534. Communication Networks. 3 Credit Hours.

Principles of digital communications, Local Area Networks (LANs), Wide Area Networks(WANs), Open systems Intercommunication (OSI), Internet reference models, internet architecture and protocols, packet switching and routing, and network performance are discussed. PREREQUISITE:

ECE 310 OR IEN 310.

Prerequisites: ECE 310. or IEN 310.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 536. Adaptive Filters And Signal Processing. 3 Credit Hours.

Topics include linear models and estimation, orthogonality principle, Wiener filters, stochastic gradient methods, LMS and RLS algorithms, mean square error and tracking performance and applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 537. Principles of Artificial Intelligence. 3 Credit Hours.

Search techniques, game trees, exhaustive vs. cutoff search, natural language processing, augmented transition networks, knowledge representation, cognitive aspects, semantic networks, problem-solving, expert systems, and AI machines are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 538. Introduction to Digital Image Processing. 3 Credit Hours.

Digital image representation. Image smoothing, sharpening, and transformations. Color image processing. Encoding of digital images. High level image segmentation and description techniques. Processing of image sequences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 539. Digital Communications. 3 Credit Hours.

Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 540. Digital Speech and Audio Processing. 3 Credit Hours.

Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 543. BioNanotechnology. 3 Credit Hours.

Introduction on the fundamentals of nanotechnology with a focus on Biomedical Applications. A foundation of nanotechnology concepts will be established through lectures on nanometrology with quantum physics basics, nano manufacturing tools, physical, chemical properties of nanomaterials. Application of these principles in electronics, magnetics, mechanics and optics will be discussed. Use of these nanoengineering principles and concepts to focus on biomedical technology applications such as biosensors, biomaterials, biomimetics and therapeutics

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 546. Reliable Digital System Design. 3 Credit Hours.

Topics include descriptive technique for digital systems, synchronizer failure and metastability estimation, design for testability, and estimating digital system reliability. Computer-Aided Engineering (CAE) tools are also covered. Not open to students with credit in ECE 454. Offered only for Graduate students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 548. Machine Learning. 3 Credit Hours.

Fundamentals of intelligent system design and strategies of learning capability simulation. Selected case studies of learning systems for engineering applications are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 553. Neural Networks. 3 Credit Hours.

Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error back-propagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 562. Wireless and Cellular Communication. 3 Credit Hours.

Wireless Channel Characterization: path loss, shadowing, fading, frequency-selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beamforming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 563. Wireless Communication Lab. 1 Credit Hour.

Computer simulation of path loss, shadowing and fading in wireless channels, performance of various digital modulation methods in both Gaussian and wireless channels, diversity methods, equalization methods including zero-forcing, minimum mean-square error (MMSE) and decision-feedback equalization (DFE), co-channel interfacing in cellular systems, space-time coding. Orthogonal Frequency Division Multiplexing (OFDM) systems, spreading codes for Code Division Multiple Access (CDMA) systems, and matched-filter receiver and multiuser detector for CDMA systems. Measurement of wireless signals in various environments.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 564. Wireless Networks. 3 Credit Hours.

Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks: IEEE 802.11 (WiFi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 567. Database Design and Management. 3 Credit Hours.

Database systems design, modeling, implementation, management methodologies, and techniques. Different database systems are addressed including relational, object-oriented, object-relational, and distributed database systems. Internet (WWW) technology, data warehousing, and online analytical processing applications of database management systems and hands-on experience with commercial database systems is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 570. Network Client-Server Programming. 3 Credit Hours.

Introduction to server-client systems and programming. Advanced server-client design and implementation based on distributed component object model in Windows and UNIX.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 572. Object-Oriented and Distributed Database Management Systems. 3 Credit Hours.

Object-Oriented modeling concepts in languages and database systems. Object-Oriented database systems. Semantic data models, nested-relational, object-relational databases. Distributed database system. Federated Databases. Application to engineering design problems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 574. Agent Technology. 3 Credit Hours.

Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information agents, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 576. Internet and Intranet Security. 3 Credit Hours.

Security issues and applications for securing internet and intranet-based information exchange. Secure information models, security tools, security services, security protocols, electronic commerce, virtual private networks, firewalls, and security versus cost tradeoffs are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 577. Data Mining. 3 Credit Hours.

Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 579. Mobile Computing. 3 Credit Hours.

Mobile computing and proxy architectures, mobile web protocols, mobile user interfaces, applications, systems-ware adaptations, mobile databases, transactions, data synchronization, privacy, authentication, and security are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 580. Electrical and Computer Engineering Internship. 1-3 Credit Hours.

Analysis, design, and research experience obtained at an operating and recognized industry. Approved project jointly supervised and assessed by departmental faculty and industrial partner.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 581. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

ECE 582. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

ECE 583. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 584. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 590. Special Topics in Information Technology. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Information Technology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 591. Special Topics in Information Technology. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Information Technology.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 594. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 595. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 596. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 597. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 598. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 599. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 600. Engineering Analytical Techniques. 3 Credit Hours.

Complex variables, analytic functions, power series, residue theorem, conformal mappings, series solution, Bessel functions, Legendre polynomials. singular value decomposition, vector, and matrix norms are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 602. Engineering Acoustics. 3 Credit Hours.

Introduction to basic principles of acoustics, methods of sound measurement, physiological, psychological acoustics, the acoustics of the major classes of musical instruments and speech, fundamentals of transducers, architectural acoustics, and the effects and control of noise are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 603. Laser Communications. 3 Credit Hours.

Prerequisites: PHY 206, PHY 207, ECE 301, or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 604. Fundamentals of Optical. 3 Credit Hours.

Prerequisites: ECE 301 or BME 545.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 605. Semiconductor Photonic Devices. 3 Credit Hours.

Principles of semiconductor electronics: energy bands of semiconductors; Fermi level; carrier distribution and transport mechanisms. Application of semiconductor theory to various junction and field effect devices. Prerequisite : ECE 305.

Prerequisite: ECE 305.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 606. Microfabrication. 3 Credit Hours.

Principles of operation, properties and applications of semiconductor devices, junction, metal-semiconductor, metal-oxide-semiconductor, optoelectronic, bulk-effect, and charge-coupled are covered

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 632. VLSI Systems. 3 Credit Hours.

Fundamentals of MOS Technology in VLSI. System data, control flow, structures, design, layout, maskmaking, fabrication, packaging, and testing of VLSI chips are discussed. Highly concurrent Very Large Scale Integration computational systems are also covered.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

ECE 633. Random Signals and Noise. 3 Credit Hours.

Probability models, Bayes' theorem, Limit theorems of Laplace and Poisson, functions of random variables, Central limit theorem, conditional expectation and estimation, Stochastic processes, stationarity and ergodicity, cross-spectral analysis, filtering, and prediction are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 636. Adaptive Filters And Signal Processing. 3 Credit Hours.

Topics include linear models and estimation, orthogonality principle, Wiener filters, stochastic gradient methods, LMS and RLS algorithms, mean square error and tracking performance and applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 637. Principles of Artificial Intelligence. 3 Credit Hours.

Search techniques, game trees, exhaustive vs. cutoff search, natural language processing, augmented transition networks, knowledge representation, cognitive aspects, semantic networks, problem-solving, expert systems, and AI machines are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 638. Introduction to Digital Image Processing. 3 Credit Hours.

Digital image representation. Image smoothing, sharpening, and transformations. Color image processing. Encoding of digital images. High level image segmentation and description techniques. Processing of image sequences.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 639. Digital Communications. 3 Credit Hours.

Principles for the analysis and design of digital communications systems. Nyquist sampling, signal space representation, digital modulation techniques and optimal receiver design, ISI channels, error control coding, convolutional codes, Viterbi decoder, and wireless applications.

Components: LEC.

Grading: GRD.

ECE 640. Digital Speech and Audio Processing. 3 Credit Hours.

Introduction to human speech production, hearing, and perception. Digital speech and audio signal analysis in time and frequency, speech and audio coding, speech synthesis and recognition, language modeling, design of systems for human-machine interaction are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 643. BioNanotechnology. 3 Credit Hours.

Introduction on the fundamentals of nanotechnology with a focus on Biomedical Applications. A foundation of nanotechnology concepts will be established through lectures on nanometrology with quantum physics basics, nano manufacturing tools, physical, chemical properties of nanomaterials. Application of these principles in electronics, magnetics, mechanics and optics will be discussed. Use of these nanoengineering principles and concepts to focus on biomedical technology applications such as biosensors, biomaterials, biomimetics and therapeutics

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 646. Reliable Digital System Design. 3 Credit Hours.

Topics include descriptive technique for digital systems, synchronizer failure and metastability estimation, design for testability, and estimating digital system reliability. Computer-Aided Engineering (CAE) tools are also covered. Not open to students with credit in ECE 454. Offered only for Graduate students.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 648. Machine Learning. 3 Credit Hours.

Fundamentals of intelligent system design and strategies of learning capability simulation. Selected case studies of learning systems for engineering applications are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 653. Neural Networks. 3 Credit Hours.

Artificial neural network algorithms and structures, learning process, perceptron, least-mean-square algorithms, multilayer perceptron, error back-propagation, radial-basis function networks, the Hopfield network, and self-organizing systems are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 662. Wireless and Cellular Communication. 3 Credit Hours.

Wireless Channel Characterization: path loss, shadowing, fading, frequency-selective channels, Doppler spread, and delay spread. Diversity techniques: frequency, time and space diversity. Multiple Antenna Systems: space-time coding, beamforming and layered space-time system. Digital Modulation: adaptive modulations and Orthogonal Frequency Division Multiplexing (OFDM). Cellular Concept: frequency reuse, co-channel interference and handoff. Multiple Access Methods: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and random access. CDMA: spreading codes, RAKE receiver, multiuser detection and power control.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECE 664. Wireless Networks. 3 Credit Hours.

Introduction of wireless channels and network. Introduction of medium access control: Frequency Division Multiple Access (FDMA), Time Division Multiple Access (TDMA), Code Division Multiple Access (CDMA) and Carrier Sense Multiple Access. Wireless data networks IEEE 802.11 (WiFi), IEEE 802.16 (WiMax) and Bluetooth. Wireless network layer: mobile IP and mobile ad-hoc networks. Wireless transport layer: mobile TCP. Wireless Cellular systems: network structure and call processing of GSM and CDMA systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 672. Object-Oriented and Distributed Database Management Systems. 3 Credit Hours.

Object-Oriented modeling concepts in languages and database systems. Object-Oriented database systems. Semantic data models, nested-relational, object-relational databases. Distributed database system. Federated Databases. Application to engineering design problems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 674. Agent Technology. 3 Credit Hours.

Agent definition and applications, agent modeling, theories, agent representation using KIF (Knowledge Interchange Format), agent behavior, ethical and emotional agents, agent communication languages (KQML (Knowledge Query and Manipulation Language)), agent development environments and tools, agent systems (cooperative agents, interface agents, information agents, learning agents, believable agents, agents for workgroups, mobile agents), and agent case studies are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 677. Data Mining. 3 Credit Hours.

Introduction to the general principles of inferring useful knowledge from large data sets. Data mining algorithms, including inferring rules, linear regression, decision trees, association rules, and predictive models. Evaluation of data mining algorithms, including training, testing, prediction, comparison, cost, and cross-validation. Data mining applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 680. Electrical and Computer Engineering Internship. 1-3 Credit Hours.

Analysis, design, and research experience obtained at an operating and recognized industry. Approved project jointly supervised and assessed by departmental faculty and industrial partner.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 681. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

ECE 682. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

ECE 683. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 684. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 694. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 695. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 696. Special Topics in Computer Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Computer Engineering .

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 697. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering .

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 698. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering .

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 699. Special Topics in Electrical Engineering. 1-3 Credit Hours.

Lecture courses in selected areas of specialization within Electrical Engineering .

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 715. M. S. Design Project I. 3 Credit Hours.

Comprehensive M.S. design project in electrical or computer engineering. Open only to students in the BS/MS dual-degree program.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 716. M.S. Design Project II. 3 Credit Hours.

Continuation of ECE 715. Open only to students in the BS/MS dual-degree program .

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 738. Computer Vision. 3 Credit Hours.

Principles of computer vision. Segmentation, shape and texture analysis, 3D scene analysis, polyhedral scenes, time-varying image analysis, parallel processing algorithms, matching, and recognition are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 753. Pattern Recognition and Neural Networks. 3 Credit Hours.

Statistical pattern classification, feature extraction, cluster analysis, neural net models, Hopfield net, competitive learning, multi-layer perceptron, and the Boltzmann machine are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 756. Information Theory. 3 Credit Hours.

Measure of uncertainty and entropy, two dimensional sources, noisy channels, mutual and transinformation, equivocation, efficiency and channel capacity, minimum redundancy coding, error-detecting, error-correcting codes, continuous channel without memory. Gaussian additive noise, sampling theorem, and vector space are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 781. Advanced Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

ECE 782. Advanced Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECE 783. Advanced Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 784. Advanced Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ECE 795. Advanced Topics in Computer Engineering. 1-3 Credit Hours.

Subject matter offerings in computer engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 796. Advanced Topics in Computer Engineering. 1-3 Credit Hours.

Subject matter offerings in computer engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 797. Advanced Topics in Electrical Engineering. 1-3 Credit Hours.

Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 798. Advanced Topics in Electrical Engineering. 1-3 Credit Hours.

Subject matter offerings in electrical engineering based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 799. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECE 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ECE 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ECE 810 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ECE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. No more than 12 hours of ECE 830 may be taken in a regular semester; no more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. No more than 12 credits in ECE 840 may be taken in a regular semester; no more than six credits in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

ECE 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

English (ENG)

ENG 100. Writer's Symposium. 3 Credit Hours.

Writer's Symposium is designed to give students exposure and practice in the crafts of poetry and fiction. Students will develop skills appropriate to each genre. The course will explore the rhythm, line, image, and metaphor of poetry as well as fiction-related issues such as narration, dialogue, setting and point of view.

Requisite: Plan of Summer Scholar Program.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 103. Basic Academic Writing. 3 Credit Hours.

Intensive approach to the basics of academic writing with emphasis on building written fluency, using conventions of standard written English, and editing for precision and correctness. Intended for students who need extra preparation before entering ENG 105. Not for credit toward graduation.

Components: LEC.

Grading: CNC.

Typically Offered: Fall & Spring.

ENG 105. English Composition I. 3 Credit Hours.

Introduction to written academic argument and inquiry. Not for major or minor. Cannot be taken on credit-only option.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 106. English Composition II. 3 Credit Hours.

Advanced approaches to written academic argument, with emphasis on textual analysis and incorporation of secondary sources. Not for major or minor. Cannot be taken on credit-only option.

Prerequisite: ENG 105. Or Requisite: SAT score \geq 700 or ACT score \geq 32.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 107. English Composition II: Science and Technology. 3 Credit Hours.

Advanced approaches to written academic argument, with emphasis on textual analysis and incorporating source material using readings and approaches connected to science and technology. Alternative to ENG 106. Not for major or minor. Cannot be taken on credit-only option.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 201. World Literary Masterpieces I. 3 Credit Hours.

Comparative study of literary masterpieces from ancient times through the Renaissance. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 202. World Literary Masterpieces II. 3 Credit Hours.

Comparative study of literary masterpieces from the Renaissance to the present. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 205. Jewish Literature. 3 Credit Hours.

Selections from the Bible, the Talmud, the Kabbalah, medieval poetry and prose, Yiddish and Sephardic literature, and contemporary American and Israeli writers.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 208. Advanced Academic Writing for Transfer Students. 3 Credit Hours.

Review of research techniques and revision strategies. Completes the university composition requirement for those students who transfer into UM with credit for one composition course from another institution. Open only to transfer students who have received transfer credit for either English 105 or English 106. Not open to students who have taken either English 105 and/or 106 at UM.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 209. Creative Writing. 3 Credit Hours.

Analysis and writing of Short stories and poems. Cannot be taken for credit only.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 210. Literary Themes and Topics. 3 Credit Hours.

Literary analysis and practice in critical writing through the study of selected works; themes and topics vary by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 211. English Literature I. 3 Credit Hours.

Selected readings from the middle ages to the late 18th century. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 212. English Literature II. 3 Credit Hours.

Selected readings from the late 18th century to the present. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 213. American Literature I. 3 Credit Hours.

Selected American authors prior to the Civil War. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 214. American Literature II. 3 Credit Hours.

Selected American authors from the Civil War to the present. Satisfies writing requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 215. English and American Literature by Women. 3 Credit Hours.

A survey of women writers from the Middle Ages to the present; explores the female literary tradition and women's relationship to culture and society.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 219. Cw Beginning Mixed Genre Workshop. 3 Credit Hours.

Prerequisite: ENG 106 or equivalent, and ENG 209.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 220. Introduction to Poetry. 3 Credit Hours.

Introduction to the forms of poetry through the analysis of representative poems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 221. Introduction to Fiction. 3 Credit Hours.

Forms of prose fiction and the analysis of representative short stories and novels.

Prerequisite: ENG 106. Or Corequisite: ENG 106.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 230. Advanced Business Communication. 3 Credit Hours.

Professional writing with critical attention to complex rhetorical situations. Practice in formal and informal written communication styles.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ENG 231. Advanced Writing for Arts and Humanities. 3 Credit Hours.

Advance instruction in writing for specialist and non-specialist audiences on topics in the Arts and Humanities disciplines, with an emphasis on essay and multimodal forms of communication.

Prerequisite: ENG 106 or ENG 107 or ENG 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 232. Advance Writing for People and Society. 3 Credit Hours.

Advance instruction in writing for specialist and non-specialist audiences on topics in the People and Society disciplines, with an emphasis on essay and multimodal forms of communication.

Prerequisite: ENG 106 or ENG 107 or ENG 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 233. Advanced Writing for STEM. 3 Credit Hours.

Advance instruction in writing for specialist and non-specialist audiences on topics in the STEM disciplines, with an emphasis on essay and multimodal forms of communication.

Prerequisite: ENG 106 or ENG 107 or ENG 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 245. The Circle of Knowledge: Science and the Humanities. 3 Credit Hours.

Major works in the debate over the arts and sciences from the classical Greeks and the humanistic Renaissance to the Scientific Revolution, the impact of Darwin, the cognitive revolution in science, and postmodern interdisciplinarity.

Components: LEC.

Grading: CNC.

Typically Offered: Fall.

ENG 250. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 251. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 252. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 253. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 254. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 255. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 257. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 258. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 259. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 260. African-American Literature. 3 Credit Hours.

Selected readings of the eighteenth century to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 261. Literature of the Americas. 3 Credit Hours.

Selected readings from North, Central, and South American, and Caribbean literature from their origins to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 290. Beginning Fiction Workshop. 3 Credit Hours.

Frequent exercises in workshop environment, with readings in contemporary fiction. Attention to tense and points of view; reviews of grammar and punctuation. 30-40 pages of creative writing, including development and revision of one full-length short story (12-20 pages).

Requisite: Plan of Creative Writing.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 292. Beginning Poetry Workshop. 3 Credit Hours.

Emphasis of creation and critique of new student poetry in workshop setting; continued reading in genre. Variety of styles and techniques presented, including line, image and metaphor. 12-15 new poems, plus revisions, required.

Requisite: Plan of Creative Writing.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 301. The Study of Language. 3 Credit Hours.

Language itself as an object of study; broad linguistic issues of language types, processes of language change, and language variation. Emphasis on language in "real world" applications such as law, folk culture, poetry, education, and computers.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 306. Advanced Composition. 3 Credit Hours.

Composition and analysis of English prose. Topics vary. May be repeated if topics are different.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 310. Literature and Culture in Classical Greece and Rome, I. 3 Credit Hours.

Major pre-classical and classical Greek writers, including Homer, Sappho, Pindar, Aeschylus, Herodotus, and Sophocles, treated by close analysis, and attention to connecting themes; Greek art and archeology in reference to specific texts.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 311. Literature and Culture in Classical Greece and Rome, II. 3 Credit Hours.

Thucydides on the Peloponnesian War; the drama of Euripides and Aristophanes; the dialogues of Plato on Socrates' trial and death; Aristotle's Poetics. Early Roman tradition; Rome and its relation to Greek culture; Livy on Roman history; Cicero, Virgil's Aeneid, Marcus Aurelius.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 312. The European Middle Ages. 3 Credit Hours.

British and continental literature and thought from the 5th through the 15th centuries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 313. The European Renaissance. 3 Credit Hours.

Major writers of the European Renaissance, such as Petrarch, Machiavelli, Castiglione, Erasmus, More, Rabelais, Montaigne, Marguerite de Navarre.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 314. The European Enlightenment. 3 Credit Hours.

Major writers of the European Enlightenment, such as Locke, Montesquieu, Vico, Hume, Voltaire, Rousseau, Diderot, Lessing, Smith, and Kant.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 315. The Classical Epic Tradition. 3 Credit Hours.

The rise and development of the Western epic tradition from Homer, Lucretius, and Virgil in the classical world, through Dante in the Middle Ages, Milton in the Renaissance, and Wordsworth and Eliot in modernity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 316. Early Celtic Literature. 3 Credit Hours.

Study in translation of literary, hagiographic, and historiographic sources, principally from Irish, Welsh, and Latin, dating from 800 to 1800, with an introduction to source languages and to Celtic cultures beginning in the prehistoric era.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 319. Shakespeare. 3 Credit Hours.

Representative comedies, histories, tragedies and romances. Not for students who have taken ENG 430 or 431; may not be taken concurrently with ENG 430 or 431.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 321. Major American Novelists. 3 Credit Hours.

Works by selected American novelists.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 323. Major British Novelists. 3 Credit Hours.

Works by selected British novelists.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 325. Major European Novelists. 3 Credit Hours.

Works by selected European novelists.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 331. Legal Writing. 3 Credit Hours.

A study of the composition of legal arguments in court opinions, legal briefs, oral arguments before the Supreme Court, and social-legal documents. Emphasis on analysis of issues, structure and style of legal writing, and the function of logic in persuasion.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 332. Writing For and About Community Service. 3 Credit Hours.

Writing on social issues from sociological and literary sources, supplemented with community service activities (minimum 12 hours per semester).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 333. Writing the Research Paper. 3 Credit Hours.

Advanced techniques in conducting research and writing the research paper. Use of traditional library resources, on-line searches, the Internet, and other research methods. Strategies for effective presentation of research findings. Students not in the Bachelor of General Studies program need permission of instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 334. Legal Rhetoric. 3 Credit Hours.

Legal texts and the rhetoric of legal discourse.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 340. Forms of the Novel. 3 Credit Hours.

Techniques and esthetics of the novel form; emphasis on major tendencies in the evolution of long prose fiction rather than on chronological development.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 341. Modern British and American Poetry. 3 Credit Hours.

Representative poets and critics of poetry since 1900; attention to the basic principles of poetics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 342. Lyric Voices and Traditions. 3 Credit Hours.

Major figures and trends in the history of lyric poetry.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 350. Studies in English. 3 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 351. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 352. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 353. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 354. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 355. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 356. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 357. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 358. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 359. Studies in English. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

ENG 360. Comparative Literature of the Black World. 3 Credit Hours.

Oral and written Black literature in Africa, the United States, the Caribbean, and South America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 361. Caribbean Literature. 3 Credit Hours.

Introduction to twentieth-century literature with special emphasis on the regional preoccupation with a distinctly Caribbean aesthetic.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 363. Jewish American Literature. 3 Credit Hours.

Twentieth-century Jewish writers in the United States such as Singer, Bellow, Roth, Ozick, and Malamud.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 364. Sephardic Literature. 3 Credit Hours.

Judeo-Spanish culture and literature from medieval times to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 365. Literature of the Holocaust. 3 Credit Hours.

Literature relating to the Nazi genocide and its aftermath.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 366. Asian American Literature. 3 Credit Hours.

Literature by Asian immigrants and exiles in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 368. Representations Of Arabs And Jews In Israeli And Palestinian Literature And Film. 3 Credit Hours.

Literary narratives and films, by both Arabs and Jews, discussing the relationship between the portrayal of Arabs and Jews within Israeli and Palestinian society. The core question we will address concerns the writer's emphatic response to the identity and history of the other. Other issues to be examined include the influence of the literary imagination on empathy and the role of dissent and protest in society.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 372. Women Writing: Theory and Practice. 3 Credit Hours.

Women writers, emphasizing the role of gender in literary creation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 373. Literary Representations of Women. 3 Credit Hours.

The portrayal of women in literature from ancient times to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 374. Women Writers. 3 Credit Hours.

A study of women's writings and feminist criticism from 1930 to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 375. Modern Drama. 3 Credit Hours.

The major dramatists of the modern world: Ibsen, Chekhov, Strindberg, Shaw, Pirandello, and O'Neill.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 376. Contemporary Drama. 3 Credit Hours.

The dramatists of our time: Albee, Miller, Williams, Becket, Sartre, Genet, Pinter, Osborne, Stoppard, Durenmatt, and others.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 379. Modern Literature. 3 Credit Hours.

Western literature of the modern era. emphasizing roots, traditions, practices.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 380. Contemporary Literature. 3 Credit Hours.

Fiction, drama, and poetry from World War II to the present.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 383. The Literature of Science Fiction. 3 Credit Hours.

A general survey of the literature of science fiction, with emphasis on writings of the twentieth century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 384. The Bible as Literature. 3 Credit Hours.

Selected readings from the Bible.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 385. Myth and Literature. 3 Credit Hours.

A study of myth and ritual and their relation to literary works, from the early epic to contemporary literature.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 386. King Arthur in Literature. 3 Credit Hours.

King Arthur in literature from the fifteenth to the twentieth century in England and America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 387. Literature and Imperialism. 3 Credit Hours.

Relationships between empire and literary expression. Works by authors such as Shakespeare, Behn, Defoe, Bronte, Conrad, Kipling, Melville, Yeats, Twain, and Forster.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 388. Literature and Popular Culture. 3 Credit Hours.

Literary forms of popular expression, considered in relation to politics, ideology, gender, or race; comparison to other forms of popular culture in print, music, or the visual media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 389. The Sixties: Literature, History, And Culture Of The 1960S. 3 Credit Hours.

"1960s culture in the United States through literature, film, and oral accounts of experience of the period."

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 390. Intermediate Fiction Workshop. 3 Credit Hours.

Review of craft issues presented in 290, with emphasis on development of structure and contemporary use of point of view.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 391. Cw Intermediate Mixed-Genre Workshop. 3 Credit Hours.

Prerequisite: ENG 219.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 392. Intermediate Poetry Workshop. 3 Credit Hours.

Review of craft issues presented in 292, integrating formal strategies with research topics.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 395. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 396. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 397. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated in parentheses following course number and title in Class Schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 398. Directed Readings/Directed Research. 3 Credit Hours.

By arrangement with instructor. Content varies.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 401. Senior Seminar in Literature. 3 Credit Hours.

An intensive study of a literary topic or figure.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

ENG 402. Independent Study. 1 Credit Hour.

An intensive study of a literary topic or figure.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 404. Creative Writing (Prose Fiction). 3 Credit Hours.

Work toward professional standards primarily in prose fiction. Student fiction is considered in workshop sessions with comment by members of the class and instructors.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 406. Creative Writing (Poetry). 3 Credit Hours.

Work toward professional standards in poetry. Student poetry is considered in workshop sessions with comment by members of the class and by instructor.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 408. Writing Autobiography. 3 Credit Hours.

Literary style and method using student autobiography as a resource.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 410. Old English Language and Literature. 3 Credit Hours.

The grammar, syntax, and phonology of Old English language; readings in Old English poetry and prose.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 411. Old English Literature. 3 Credit Hours.

Translation and Close analysis of Beowulf or other major poetic texts of Old English literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 420. Chaucer. 3 Credit Hours.

Chaucer's major works.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 430. Shakespeare: The Early Plays. 3 Credit Hours.

Shakespeare's plays from the period 1583-1600. May not be taken concurrently with ENG 319.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 431. Shakespeare: The Later Plays. 3 Credit Hours.

A study of the second half of Shakespeare's canon, read in chronological sequence. The plays will be selected from those composed in the period 1600-1611. May not be taken concurrently with ENG 319.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 432. English Renaissance Poetry and Prose. 3 Credit Hours.

A study of such figures as Wyatt, Sidney, Spenser, Nashe, Marlowe, Shakespeare, Jonson, Donne, Bacon, Milton.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 433. English Renaissance Drama. 3 Credit Hours.

English drama during the sixteenth and seventeenth centuries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 434. Seventeenth-Century Poetry and Prose. 3 Credit Hours.

Seventeenth-century writers and forms, including work by major and minor writers such as James I, Jonson, Donne, Bacon, Lovelace, Carew, Herrick, Andrewes, Herbert, Milton, Marvell, Clarendon, Dryden, Rochester, Behn, and Bunyan.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 435. Milton. 3 Credit Hours.

Selected readings in the poetry and prose of John Milton.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 440. Restoration and Eighteenth-Century Literature. 3 Credit Hours.

English poetry and prose, exclusive of the novel, from Dryden to Burns.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 441. 18th-Century British Novel. 3 Credit Hours.

The British novel through the late eighteenth century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 442. Politics and Literature. 3 Credit Hours.

Relations between political theories and forms of literary expression.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 450. The Early Romantic Period. 3 Credit Hours.

The rise of Romanticism in England and the first generation of writers, Blake, Wordsworth, Coleridge, and their contemporaries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 451. The Late Romantic Period. 3 Credit Hours.

The second generation of English Romantic writers: Byron, Shelley, Keats, and their contemporaries.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 455. Victorian Poetry and Prose. 3 Credit Hours.

Selected English poetry and prose of the period, exclusive of the novel.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 456. Nineteenth-Century English Novel. 3 Credit Hours.

Studies in the development of the English novel from Scott to Conrad.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 460. Modern British Literature. 3 Credit Hours.

Studies in Edwardian and Modern literature. Modernist theory and techniques will be illustrated by reference to the work of selected major figures since 1900.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 461. Contemporary British Literature. 3 Credit Hours.

British literature from World War II to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 465. Irish Literature. 3 Credit Hours.

Twentieth-century Irish writers such as Yeats, Synge, Joyce, Stephens, O'Casey, Beckett, and Lavin. Consideration of Irish history, mythology, politics, and culture.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 466. Joyce. 3 Credit Hours.

The major works of James Joyce.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 470. Contemporary British and American Poetry. 3 Credit Hours.

The poetry of the contemporary period, 1945 to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 472. Literature and Psychoanalytic Theory. 3 Credit Hours.

A study of the ways in which Literature, Literary Criticism, and Psychoanalytic Theory interact.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 473. Twentieth-Century Literary Theory. 3 Credit Hours.

An introduction to the major theories of the past century (e.g., psychoanalytic, formalist, materialist, feminist, new historicist).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 480. Early American Literature. 3 Credit Hours.

American writing before 1800. Topics such as colonialism, ethnicity, nationalism, and the ideology of individualism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 482. American Literature: 1800-1865. 3 Credit Hours.

Topics such as individualism, slavery, class and gender relations. Works by Emerson, Poe, Hawthorne, Melville, Douglass, Stowe, and others.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 483. American Literature: 1865-1915. 3 Credit Hours.

The works of such writers as Twain, Howells, James, Dickinson, Robinson, Crane, Norris, London, and Dreiser.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 484. American Literature: 1915 to 1945. 3 Credit Hours.

The works of such writers as Pound, Eliot, H.D., Stein, Frost, Stevens, e.e. cummings, Ransom, Tate, Fitzgerald, Hemingway, Djuna Barnes, Faulkner, O'Neill.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 485. American Literature: 1945 to the Present. 3 Credit Hours.

An intensive inquiry into the works of such writers as Albee, Bellow, Ferlinghetti, Ginsberg, Kerouac, Mailer, Miller, O'Connor, Plath, Welty.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 486. Early African-American Literature. 3 Credit Hours.

African-American literature from the beginnings to the Harlem Renaissance of the nineteen twenties.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 487. Modern African-American Literature. 3 Credit Hours.

African-American literature from the Harlem Renaissance to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 488. Race, Ethnicity, and Literature. 3 Credit Hours.

Topic varies by semester. The Construction of racial and ethnic difference in literature, focusing on the politics of group affiliation and identity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 490. Studies in Women and Literature. 3 Credit Hours.

Content varies by semester. Topics such as women in classical antiquity, women in the middle ages, women in the Renaissance, women in the Restoration and eighteenth century, women in the Romantic and Victorian period.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 491. Russian and Soviet Classics in English. 3 Credit Hours.

Survey of Russian literature in translation from the late 19th century to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 492. Postcolonial Literature and Theory. 3 Credit Hours.

The legacy of colonialism as expressed in the works of Gordimer, Rushdie, Achebe, Walcott, Césaire, Naipaul, Mukherjee, Crow Dog, Menchu, and others. Readings will address theoretical issues such as national formation, cultural hybridity, globalization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 493. History of Literary Criticism. 3 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 494. Feminist Literary Theory. 3 Credit Hours.

Examination of women's contributions to literary theory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 495. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated parenthetically following the title in the class schedule.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 496. Independent Study. 1-3 Credit Hours.

By arrangement with instructor. Content varies by semester. May be used for single semester thesis.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 497. Senior Thesis I. 3 Credit Hours.

Partial requirement for Departmental Honors in English Literature or Creative Writing. Research and preparation for writing senior thesis or creative project. To complete thesis, student must register for ENG 498 in following semester. Student will participate in a series of 3-4 pre-arranged workshops over the course of the two semesters.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 498. Senior Thesis II. 3 Credit Hours.

Partial requirement for Departmental Honors in English Literature or Creative Writing. Writing of either a documented essay on a literary subject or project in prose fiction or poetry, to be written under the direction of a member of the faculty. Student will participate in a series of 3-4 pre-arranged workshops over the course of the two semesters.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 499. Senior Creative Writing Project. 3 Credit Hours.

Partial requirement for Departmental Honors in Creative Writing. Project, in prose fiction or poetry, to be written under the direction of a member of the creative writing faculty.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 504. Form in Poetry. 3 Credit Hours.

Poetic works as literary objects, with attention to poetic trends and the creative process.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 505. Form in Fiction. 3 Credit Hours.

Fictional works as literary objects with attention to individual styles, Fictional Trends and the creative process.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 595. Special Topics. 3 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 601. Creative Writing: Fiction III. 3-6 Credit Hours.

Advanced M.F.A. workshop in the techniques of writing fiction.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 602. Creative Writing: Poetry II. 3-6 Credit Hours.

Advanced M.F.A. workshop in the techniques of writing poetry.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 604. Form in Poetry. 3 Credit Hours.

Poetic works as literary objects, with attention to poetic trends and the creative process.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 605. Form in Fiction. 3 Credit Hours.

Fictional works as literary objects with attention to individual styles, Fictional Trends and the creative process.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 607. Stu In Renaiss Drama. 3 Credit Hours.

Components: LEC.

Grading: GRD.

ENG 610. Studies in Old English Language and Literature. 3 Credit Hours.

Content varies by semester.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 614. Stu Neocl Poet Prose. 3 Credit Hours.

Components: LEC.

Grading: GRD.

ENG 615. Studies in Chaucer. 3 Credit Hours.

Studies in Chaucer.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 616. Studies in Middle English Language and Literature. 3 Credit Hours.

Studies in Middle English Language & Literature.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 620. Studies in Shakespeare. 3 Credit Hours.

Studies in Shakespeare.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 621. Studies in Elizabethan and Jacobean Drama. 3 Credit Hours.

Studies in Elizabethan and Jacobean Drama.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 622. Studies in 16th Century Literature. 3 Credit Hours.

A survey of predominantly non-dramatic Renaissance literature, with an emphasis on the Sixteenth Century.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 623. Studies in Spenser. 3 Credit Hours.

Studies in Spenser.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 624. Studies in 17th Century Literature. 3 Credit Hours.

Studies in 17th Century Literature.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 625. Studies in Milton. 3 Credit Hours.

Studies in Milton.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 630. Restoration and 18th-Century Drama. 3 Credit Hours.

Studies in Restoration and 18th Century Drama.

Components: DIS.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 631. Studies in Restoration and 18th Century Literature. 3 Credit Hours.

Special topics in British Literature from 1660-1800.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 633. The Eighteenth-Century British Novel. 3 Credit Hours.

Survey of the British novel from Defoe to Austen.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 640. Studies in Romanticism. 3 Credit Hours.

A study of writers and genres between the late eighteenth and the mid-nineteenth century, through an investigation of questions of canonicity, epistemological orientation, colonialism, and the revolutionary context.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 645. Studies in Victorian Poetry and Prose. 3 Credit Hours.

Victorian poetry and prose exclusive of the novel. Poems by Tennyson, Browning, Arnold, Rossetti, and others. Prose works by writers such as Carlyle, Newman, Mill, Ruskin, and Pater.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 646. Nineteenth-Century British Novel. 3 Credit Hours.

Survey of the British novel from Austen to Conrad.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 648. Studies in the Novel. 3 Credit Hours.

Topics in eighteenth-, nineteenth-, and twentieth-century fiction.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 650. Studies in Modern British Literature. 3 Credit Hours.

Intensive coverage of a limited topic in twentieth-century British or Irish literature.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 651. Studies in Joyce. 3 Credit Hours.

Close readings of *Dubliners*, *A Portrait of the Artist as a Young Man*, *Ulysses*, and *Finnegans Wake*; extensive review of Joyce criticism.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 652. Studies in Irish Literature. 3 Credit Hours.

Intensive coverage of a selected topic in Irish Literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 654. Contemporary British Literature. 3 Credit Hours.

Studies in British prose, poetry, and drama since 1939.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 655. Contemporary American Poetry and Poetics. 3 Credit Hours.

Poetry and poetics from 1945 to present, focusing on Black Mountain Poetics, the New York School, the Black Arts Movement, Language Poetry and more recent writers and movements.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 658. Studies in Transatlantic Literature. 3 Credit Hours.

Literature on transatlantic themes and/or by transatlantic writers. Border crossing; ships; sailors; and other travelers; movement of people, things, and ideas in the Atlantic world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 660. Studies in American Literature: Beginnings to 1800. 3 Credit Hours.

Studies in American Literature: Beginnings to 1800.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 661. Studies in American Literature: 1800-1865. 3 Credit Hours.

Studies in American Literature: 1800-1865.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 662. Studies in American Literature: 1865-1914. 3 Credit Hours.

Studies in American Literature: 1865-1914.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 663. Studies in American Literature: 1914 to 1950. 3 Credit Hours.

Studies in American Literature: 1914-1950.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 664. Studies in American Literature: 1950 to the present. 3 Credit Hours.

Studies in American Literature: 1950 to the present.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 665. Studies in African-American Literature. 3 Credit Hours.

Studies in African-American Literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 666. Caribbean Literature. 3 Credit Hours.

Caribbean literature and cultural theory; Caribbean aesthetic.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 667. Caribbean Popular Culture. 3 Credit Hours.

Special topics on the relations among politics, popular culture, and literature in the Caribbean region.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 668. Studies in Race and Diasporic Literatures. 3 Credit Hours.

Analysis of race, ethnicity, immigration, and transnationalism in literature and cultural theory.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 669. Studies in Women's Literature. 3 Credit Hours.

Topic varies by semester. Analysis of gender issues and literary production by women.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 670. The Classical Tradition and English Literature. 3 Credit Hours.

A study of classical authors such as Homer, Aeschylus, Sophocles, Euripides, Virgil, Ovid, Horace, and Catullus, who have been seminal for English writers from the Middle Ages to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 672. Comparative Studies in Renaissance and Baroque Literature. 3 Credit Hours.

Topic varies by semester: e.g., The Renaissance Lyric, The Renaissance Epic, The Rise of Humanism, Baroque Drama.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 673. Eighteenth-Century European Literature. 3 Credit Hours.

Major literary and aesthetic works of the European Enlightenment.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 674. The Romantic Movement in Europe. 3 Credit Hours.

A study of the forces and influences of the Romantic Movement in Europe as these intersect English Romanticism.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 675. European Novel. 3 Credit Hours.

Major authors and trends in the development of the European novel as a unified literary tradition.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 677. Studies in Modern Literature. 3 Credit Hours.

Studies in Modern Literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 678. Studies in Contemporary Literature. 3 Credit Hours.

Studies in Contemporary Literature.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 680. History of Literary Criticism. 3 Credit Hours.

A survey of literary criticism and theory from the ancient Greeks to the early twentieth century.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 681. Introduction to Literary Theory. 3 Credit Hours.

Twentieth-century literary theory beginning with the New Criticism and including topics such as semiotics, hermeneutics, deconstruction, feminism, and neopragmatism.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 682. Contemporary Criticism and Theory. 3 Credit Hours.

Topics in recent criticism and theory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 683. Literature and Psychoanalysis. 3 Credit Hours.

The interrelations between literary theory, textual analysis, and psychoanalytic theory.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 684. Theory of Narrative. 3 Credit Hours.

Analysis of narrative theories, ancient to contemporary.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 685. Feminist Theory. 3 Credit Hours.

Feminist writing and criticism from the nineteenth century to the present. Supplementary readings in anthropological, psychoanalytic, and socio-political criticism, as well as in theories of poetic tradition and the poetic process.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 686. Theories of Gender and Sexuality. 3 Credit Hours.

Queer theory and its relationship with gender studies, critical race studies, and emerging directions in the field.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 687. Studies in Literature and Culture since 1950. 3 Credit Hours.

Studies in Literature and Culture since 1950.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 688. Studies in Latino/a Literatures and Cultures. 3 Credit Hours.

Comparative and interdisciplinary approaches to art, film, music and literature. Topics may include: borderlands, postcolonial and "Americas" methodologies; ethnicity, race and mestizaje; immigration and the "Latinization" of the U.S.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 689. Comparative Americas Studies. 3 Credit Hours.

Comparative, interdisciplinary and transnational approaches to literature and cultures of the Americas.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 691. Graduate Practicum I: Teaching College Writing. 0 Credit Hours.

Methods and problems in teaching English composition and college writing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ENG 692. Graduate Practicum II: Teaching College Literature. 0 Credit Hours.

Methods and problems in teaching introductory literature courses.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ENG 693. Teaching College Composition. 3 Credit Hours.

Rhetorical and literary theory related to composition instruction. Designed primarily for Teaching Assistants in the English Department, but open to all students planning to teach writing.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ENG 695. Special Topics. 3 Credit Hours.

Varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ENG 696. Directed Readings. 1-3 Credit Hours.

Varies by semester.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 697. Readings for the Qualifying Examination. 1-3 Credit Hours.

Varies by semester.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ENG 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in ENG 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

ENG 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ENG 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of ENG 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

ENG 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

Epidemiology and Public Health (EPH)

EPH 513. International Health Systems. 3 Credit Hours.

Students will study international health from a broad prospective of global health issues and international health systems. This course will include a critical analysis of health systems in both developing and developed countries through comparison with the World Health Organization's model and the health system in the United States. A variety of health factors will be examined including the role of public health and public health funding.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 572. Public Health Law. 3 Credit Hours.

This course is designed for non-law students studying in epidemiology and public health. The course will begin with a general overview of the fundamental principles and processes of the US legal system, focusing on public health law and ethics. Topics will include privacy, communications, screening and vaccinations, economic regulations and public health reform.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 600. Introduction to Public Health. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 601. Medical Biostatistics I. 3 Credit Hours.

Introduction to probability and statistics including descriptive statistics, tests of hypothesis, regression analysis, contingency tables, nonparametric tests, and life tables. Students gain hands-on experience in the analysis of medical data using several computer systems and at least one of the different statistical packages such as: BMDP, SAS, PSTAT, SYSTAT, and Minitab.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 602. Biostatistics II. 3 Credit Hours.

Continuation and elaboration of EPH 501. Topics include design of factorial experiments, analysis of variance and variance components, multiple linear regression, and life tables.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 603. Applied Data Management and Analysis. 3 Credit Hours.

The course is designed to introduce students to applied quantitative methods through both lecture-based and experimental strategies. Emphasis will be placed on data collection, data management, and conceptual use of various analytic techniques.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPH 604. Clinical Trials. 3 Credit Hours.

Planning, design, analysis, and data management for clinical therapeutic and prophylactic trials. Illustrations are provided through case examples.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPH 609. Tobacco Control and Health: Consumption, Health Effects and Policy. 3 Credit Hours.

This course will provide students with an overview of the research in the field of tobacco control, enable students to have an understanding of the patterns, determinants, and consequences of tobacco use, as well as understand how public health policies have worked to reduce tobacco related morbidity and mortality.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 610. Public Health Surveillance Systems. 3 Credit Hours.

The goal of this course is to make students aware of all aspects that must be considered when designing or working with a Public Health Surveillance System (PHSS). The lectures will concentrate on the different types of PHSS, data base structures, practical design elements, data gathering strategies, quality control and evaluation considerations and the role of PHSS within the public health community. Additionally, students will be given the opportunity to utilize their analytical skills and demonstrate their mastery of statistical software packages by performing three preliminary analysis of a real PHSS data set.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 612. Global Health. 3 Credit Hours.

This seminar examines current global public health issues, governance and decision-making challenges for the 21st Century across developing, transitioning, and developed countries. Topics of discussion include new actors for world health in the era of globalization; linking human development, poverty and health inequities; social, cultural and ethical considerations for health planning; role of industry, trade and public health; evidence based research for improved global health initiatives; foreign policy and health security challenges associated with emergence and re-emergence of infectious diseases and public and private partnerships in global health. Open only to EPH majors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 614. Global Outbreak. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 615. Energy Balance I: Foundations of Nutrition and Physical Activity. 3 Credit Hours.

This course will examine the foundations of Nutrition and Physical Activity Epidemiology, including; population patterns and trends, epidemiological theories, assessment and research methods, biopsychosocial and ecological determinants, major epidemiological studies, and interventions to promote healthy eating and physical activity. The course pre-requisite is successful completion of EPH 521 Fundamentals of Epidemiology or an equivalent course determined by the instructor.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

EPH 616. Energy Balance II: Energy Balance and Health. 3 Credit Hours.

This course will build upon the Energy Balance I course content (EPH 612), focusing on health outcomes associated with positive and negative energy balance, including obesity, chronic diseases, and other related topics, such as energy balance across the lifespan (children, younger adults, and older adults). As in Energy Balance I, major epidemiological studies and theories will be examined throughout the course. The course pre-requisites include successful completion of EPH 521 Fundamentals of Epidemiology (or an equivalent course) and successful completion of EPH 612 Energy Balance I.

Components: LEC.

Grading: SUS.

Typically Offered: Spring.

EPH 617. Introduction to Disease Prevention and Health Promotion. 3 Credit Hours.

This course will introduce students to the science of prevention and health promotion. More specifically, through didactic presentations, group discussions, article readings and critiques, and a term project, this course will focus on providing students with an overview of: the top preventable causes of disease in the U.S., the etiology of disease (with a focus on the top preventable causes of disease in the U.S.) across the lifespan, the role of prevention theories in the development of preventive interventions, and the role of methodology in prevention science. The course will also provide an overview of efficacious/effective preventive interventions, including (but not limited to): family community, and school level interventions. Examples from the fields of obesity, drug use, smoking, and HIV will be used to illustrate the course learning objectives detailed below.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 620. Health Education and Behavior. 3 Credit Hours.

Educational processes with special emphasis on the social and cultural determinants of health behavior, health education as a process of social change, and community based health education organizations. Open only to EPH majors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 621. Fundamentals of Epidemiology. 3 Credit Hours.

Principles and methods of epidemiology. Descriptive epidemiology, environmental and other risk factors, detection of outbreaks, basic demography, and etiologic studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 622. Obesity And Public Health. 3 Credit Hours.

Nearly two thirds of the United States is now considered overweight or obese and the associated medical costs are placing an unsustainable burden on our health care system. However, the issue of overweight/obesity extends beyond behavioral choices and medical costs. This course will take a deeper look at the complex interactions between our environment, behaviors, and policies, and how they jointly contribute to the obesity epidemic. This course will provide an interdisciplinary perspective of the biological, psychosocial, ecological, and economic determinants that contribute to obesity and the resulting pathways to chronic disease and disability. Finally, current evidence-based public health programs currently will be discussed to stimulate critical thinking necessary to implement effective obesity prevention and control programs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 623. Determinants of Health and Health Disparities Across the Life Course. 3 Credit Hours.

This course builds on the concepts and methods examined in EPH 614, delving further into risk and protective processes related to health outcomes across the life course, from the prenatal period to older adulthood. Class readings and discussions will examine examples of common risk pathways contributing to various diseases, including pathways hypothesized to be related to health inequities and disparities, such as: economic and educational disadvantage, stress, sedentary behavior and poor behavioral regulation, social isolation. Common protective pathways that promote health are also reviewed, such as: positive parenting and family relations, and social support.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 624. Advanced Applied Epidemiology. 3 Credit Hours.

Principles and methods of analytical studies including case-control, cohort, and clinical trials. Emphasis is placed on quantitation of influences of change, bias, and confounding in design, conduct, analyses, and interpretation of epidemiologic studies. Evaluation of cause-effect relationships is included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 625. Ethical Issues in Epidemiology. 3 Credit Hours.

The course identifies and analyzes ethical issues in epidemiologic practice and research. Issues include data acquisition and management, confidentiality, valid consent, advocacy, public policy, subgroup stigma, research sponsorship, conflicts of interest, communication of risk, and international and intercultural difference.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 631. Public Health Administration. 3 Credit Hours.

An overview of the historical background, philosophy, and purpose of public health. Relationship between government, law, and public health. Organization, management, and intergovernmental relationships of public health agencies in the United States at the federal, state, and local level. Basic principles of management, decision making, and prioritizing in public health are discussed. Overview of programs and services provided by public health organizations with emphasis on current public health issues and problems are also included. Open only to EPH majors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 632. Us Health Systems. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 639. Ecology and Control of Vector-Borne Diseases. 3 Credit Hours.

The course will provide students with an overview of the epidemiology of major vector-borne diseases in the U.S. (e.g., Lyme Disease, West Nile Virus) and globally (e.g., malaria, dengue, filariasis, leishmaniasis, and other arboviruses), field and lab-based methodologies for vector studies to incriminate vector species and assess transmission dynamics, vector and disease surveillance, and "cutting-edge" vector control technology. A major focus will be on the ecology of vectors in their local environments and how transmission dynamics are affected by changes in land use, urbanization, and climate. Students will learn about new WHO-approved strategies for integrated Vector Management (IVM) and how they are applicable for the prevention and control of all vector-borne diseases.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 640. Urban Environment and Public Health. 3 Credit Hours.

Where we live, where we work, where we go, and how we get there may all impact our behaviors and ultimately our health and well-being. This course examines the urban environment - in particular, those aspects of urban/suburban/semi-rural environments created by humans. This includes how homes, neighborhoods, cities and regions impact public health challenges such as obesity, chronic disease, mental health, infectious disease, and injuries. This course will teach students to translate scientific findings to design healthy communities, and develop interventions to promote urban health. Students will learn how to map neighborhood characteristics such as food outlets, parks and walkability, and to develop recommendations for policymakers.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 641. Integrated Aspects of Environmental Health. 3 Credit Hours.

Interdisciplinary scope of environmental health problems. Development of a practical, dynamic model for integrating fundamental concepts from a variety of environmental disciplines. Open only to EPH majors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 642. Oceans and Human Health. 3 Credit Hours.

This course provides students with introductory knowledge of the broad and relatively young field of Oceans and Human Health. The focus is the present, future, and potential effects of oceanic processes and marine organisms on human health and wellbeing. These diverse factors reflect the physical, chemical, biotic and social processes which require an integration of information and knowledge from the medical, marine, and social sciences. Of growing concern in this rapidly-developing area of study is the human health effects from exposure to substances that occur widely in marine ecosystems including synthetic organic chemicals, polycyclic aromatic hydrocarbons (PHAs), metals (both introduced and anthropogenic), marine toxins, and pathogens.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 644. Fundamentals of Program Evaluation. 3 Credit Hours.

Fundamentals of Program Evaluation was developed as a survey course directed specifically at providing an overview of the broad area of program evaluation. At its base, program evaluation is the investigator of a program's characteristics and merits. In context of health care, the purpose of program evaluation is to provide information in the effectiveness of programs or interventions so as to optimize the outcomes, efficiency and quality of health care. Evaluation of a program is an essential part of the successful implementation and conduct of any health care project or intervention, and should ideally be designed along with the project itself. Program evaluation activities can use a wide range of methodologies (e.g., qualitative, quantitative), analyze different aspects of a program (e.g., structure, activities, organization), and have a large number of intended outcomes (e.g. achievement or program's goals objectives, extent of program impact, program cost).

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 645. Behavioral Epidemiology. 3 Credit Hours.

A sub-discipline of epidemiology with a principal focus on lifestyle behaviors that are health-enhancing or health-compromising. With a focus on health behavior rather than disease endpoints, behavioral epidemiology has a primary prevention orientation. This course explores epidemiologic approaches to description/intervention upon dietary behaviors, exercise, substance use behaviors (cigarettes, alcohol, illicit drugs), and sexual behaviors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 646. Health Services Research Methods. 3 Credit Hours.

Health services research examines how people get access to health care, how much care costs, and what happens to patients as a result of care. It produces knowledge about the resources, organization, financing, provisions, and policies of health services; and is an applied multidisciplinary field. This course will be a survey course of methods in health services research studies.

Components: LEC.

Grading: CNC.

Typically Offered: Fall.

EPH 647. Community-based Participatory Research. 3 Credit Hours.

Community-based participatory research (CBPR) is methodology, increasingly popular in public health and other disciplines, which invites community collaboration throughout the research process from conceptualization of study focus to dissemination of findings. This course will provide an opportunity for medical and graduate students to better understand the process by which community members and academic researchers work collectively to address health disparities and influence social change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 649. Survey Methods: Planning and Conducting Health Surveys. 3 Credit Hours.

The purpose of this class is to introduce students to theories, principles, methods, and best practices of survey design, measurement, and sampling as applied to health surveys. Students develop an understanding of the survey research process including problem definition, strengths and limitations of survey research, survey design, survey sampling techniques, data entry and management, data analysis, and proper reporting of results.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 650. Health Economics for Evaluation and Policy. 3 Credit Hours.

This course centers on a discussion of the criteria used to evaluate the allocation of resources and analyze the behavior of two of the principal actors-consumers and firms. The principles of microeconomics are presented in the context of health care systems and markets. Numerous real-world issues and case studies are used to demonstrate economic decision-making techniques, especially for health care organizations and consumers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 651. Research Methods. 3 Credit Hours.

Purpose of the course is to provide students with a sound understanding of the fundamental concepts and methods for conducting public health research. After a brief introduction to the philosophy of science, the major emphasis in the early portion of the course is on research conceptualization, design and measurement, with a particular focus on the logic of minimizing rival alternative explanations of finding for experimental and quasi-experimental studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

EPH 652. Health Policy. 3 Credit Hours.

Part I will examine seven models encompassing different perspectives on public health: philosophy, political theory and politics, law, economic, science and information culture and religion, and organization and management, including how they relate and their relevance in formulating, implementing, and evaluating public policy. Part II will examine the policy making process including how issues reach the government agenda, how laws are formulated, and how the process affects substance. Part III describes the core elements of policy analysis including: problem definition; background; political, economic, and social landscape; development of policy options; and recommendation. It will also include discussions of how to find and analyze documents and data as well as discuss the financing of health care.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 653. Leading Change In Public Health. 3 Credit Hours.

This new "transition" course at the end of the second year will prepare students for their more advanced experiences in community and public health in the third and fourth years. The objective of this course is to provide students with an opportunity develop essential skills in leading change in public health while linking their academic work in epidemiology and public health for real world application in public health practice. Students will receive didactic presentations on topics such as leading change, interest based negotiation, and leading from the middle as well as lectures on the health disparities and the social determinants of health. These lectures will be integrated with interactive discussions and hands-on small group exercises to explore how practitioners can translate public health and community knowledge into sustainable solutions. "Leading Change in Public Health— Moving From Talk to Action" will provide students with 21st century leadership skills that prepare them to tackle public health issues in our society from the most simple to very complex. Participants will be challenged to think differently on many levels and prepare them to be agents of change for future generations.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

EPH 654. Ethics And Law In Public Health. 3 Credit Hours.

This course focuses on key concepts of law and ethics, economics and epidemiology, and policy analysis, as applied to public health; and it seeks to demonstrate with both current and historical examples how these perspectives empower and constrain public health decision-making and actions. The organizing framework is legal structure, but approached from the perspective that a society's established laws are the clearest exemplars of societal notions of ethics.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 656. Leading Change In Public Health. 3 Credit Hours.

Components: LEC.

Grading: CNC.

Typically Offered: Summer.

EPH 660. Public Health Seminar. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 661. Public Health Nutrition. 3 Credit Hours.

This course provides a dynamic, interactive approach to public health designed to prepare students in basic policy, epidemiology, and health education related to nutrition. Recognizing the multiple social, cultural, environmental, and physiological factors leading to nutritional disease. The course includes experts from a variety of disciplines. Public health nutrition addresses issues germane to the public's health by elucidating their extent, determinants and consequences, and the policies and programs to address them. Open only to EPH majors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 662. Child Policy. 3 Credit Hours.

This course will focus on U.S. federal child policy. This course has been designed to provide a comprehensive, multi-disciplinary (e.g., public health, public policy and social work), and cross-sector perspective (e.g., government, private and philanthropic sectors) on child and family policies. Sessions will cover varying approaches and include presentations from a wide range of experts.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 671. Maternal and Child Health. 3 Credit Hours.

Preventative and therapeutic concepts pertinent to the reduction of morbidity and mortality among mothers and their children.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 680. Practical Field Experience. 3 Credit Hours.

Practical field experience requirement for MPH students. Students are placed in health-related settings (local, national, and international) to work on projects of mutual interest to both the field organization and the student.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 681. Capstone Experience Project. 3 Credit Hours.

The capstone project is intended to build upon EPH 680 field work and will provide students with an opportunity to apply public health academic theory and acquired skills to community health problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPH 684. Special Topics. 3.00 Credit Hours.

This course is designed to allow the listing of special topics within the Department of Epidemiology and Public Health and cross-list topics with other departments' offerings.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPH 699. Public Health Projects. 1-6 Credit Hours.

Research and/or design projects. Individual investigation of current public health problems. Required of all MPH students.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPH 700. Research Seminar. 1-3 Credit Hours.

Course consists of bi-weekly research seminars. Seminar format is individual student-led presentations and discussions with faculty supervision. Topics may include epidemiologic methods, analytic strategies, study design, conduct of human subjects research, bio-ethics, and other pertinent topics. Ph.D. students are required to complete 3 credit hours of EPH 600 prior to graduation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPH 703. Statistical Methods in Epidemiology. 4 Credit Hours.

Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Mantel-Haenszel chi-square, interaction, standardization of rates, incidence density, logistics regression, and other special topics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 705. Statistical Methods in Epidemiology II. 3 Credit Hours.

Continuation and elaboration of EPH 603. Advanced statistical methods used in analyzing data from epidemiologic investigations. Topics include Kappa statistics, life tables, survival analyses, logistic regression, Poisson regression, log linear models, clusters, meta-analysis, and other special topics.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 711. Cancer Epidemiology. 3 Credit Hours.

This course covers the basic epidemiology of cancer. Major sites and exposures are stressed, highlighting descriptive, etiologic and preventive aspects. A major course project and one final exam are included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 717. Integrating Behavior Health Theories and Models. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 720. Cardiovascular Disease Epidemiology and Prevention. 3 Credit Hours.

Course aims to teach and train MPH students in the epidemiology and prevention of cardiovascular and cerebrovascular diseases which are the leading causes of morbidity and mortality among the adult U.S. population. Essential knowledge for those working in the area of public health is emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 721. Chronic Disease Epidemiology. 3 Credit Hours.

The major chronic diseases (e.g. Heart Disease, Cancer, diabetes) their population impact and methods of prevention. Specialized problems associated with chronic disease studies are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 722. Common Pathways: Infectious Diseases. 3 Credit Hours.

This course emphasizes surveillance, investigation, control and global health problems related to infectious diseases. Emphasis will be on the biology of infectious disease systems, development of study designs, epidemiological and biostatistical methods, and the employment of epidemiological methods for addressing major public health issues in international research.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 723. Epidemiology and Public Health Aspects of Diabetes Mellitus. 3 Credit Hours.

This course presents an overview of the epidemiology and public health impact of an important chronic disease, diabetes mellitus (DM). Topics include the classification and descriptive epidemiology of DM and associated health complications, disease screening, evaluation of risk factors, methodological issues associated with DM research, DM among special populations, and the public health impact of DM in the U.S.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

EPH 728. Social Epidemiology of Drug Abuse. 3 Credit Hours.

This intersession course will provide students with a systematic and selective overview of conceptual approaches and research findings related to the impact of social context on substance use behavior. We will consider the social factors that shape the population distribution of drug use, abuse, and addiction and the related consequences. Each session will highlight a different area of research on the frontier of this nascent field. Through a combination of lectures and discussions, the course will focus on describing and understanding the association between social class, race and ethnicity, psychosocial factors, neighborhood and community characteristics, place, and life-course processes to the incidence and progression of drug use, abuse, and addiction and related health consequences.

Components: LEC.

Grading: SUS.

Typically Offered: Spring.

EPH 730. Drug Abuse Epidemiology. 3 Credit Hours.

The purpose of this course is to educate students how to design, implement, and conduct studies of drug abuse epidemiology and its related scientific disciplines.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 740. Basic Pathology and Patho-physiology. 3 Credit Hours.

The course emphasizes basic patho-physiological mechanisms and diseases of particular interest to students of public health. Students obtain an understanding of basic pathological processes, nomenclature of pathological findings, and common natural and unnatural diseases affecting various body systems. Observations of autopsies and the gross pathology of selected organs are also incorporated in the course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 751. Survival Analysis in Clinical Trials. 3 Credit Hours.

Statistical methods for analysis and interpretation of survival data arising from clinical trials. Topics include survival curves, estimation of sample size, survival curves, proportional-hazard models, time dependent variables, and prognostic indices.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 752. Advanced Research Methods. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

EPH 774. Advanced Epidemiologic Methods I. 3 Credit Hours.

The fundamental concepts, principles, and methods of epidemiologic study designs will be presented at an advanced level. In addition, the practical issues in the design, conduct and analysis of epidemiologic studies and interpretation of research findings will be discussed.

The emphasis will also include on application of the epidemiologic methods in the forms of journal article critique and research proposal development. The goal of this course is to present the advanced epidemiologic methods and their theoretical backgrounds to PhD students in fulfilling part of the PhD in Epidemiology degree.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

EPH 776. Advanced Epidemiological Methods II. 3 Credit Hours.

This is the second course of a 2-part course in advance epidemiologic methods. The fundamental concepts, principles, and methods of epidemiologic study designs will be presented at an advanced level. In addition, the practical issues in the design, conduct and analysis of epidemiologic studies and interpretation of research findings will be discussed. The emphasis will also include on application of the epidemiologic methods in the forms of journal article critique and research proposal development. The goal of this course is to present the advanced epidemiologic methods and their theoretical backgrounds to PhD students in fulfilling part of the PhD in Epidemiology degree.

Components: LEC.

Grading: SUS.

Typically Offered: Spring.

EPH 782. Advanced Individual Study. 1-3 Credit Hours.

Individual work on a special project under faculty guidance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPH 825. Continuous Registration--Master's Study. 0 Credit Hours.

To establish residence for MPH students who are preparing for project presentation. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

EPH 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of EPH 730 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 840. Doctoral Dissertation- Post Candidacy. 1-12 Credit Hours.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

EPH 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Executive and Special Programs (ESP)

ESP 500. Review Module. 0 Credit Hours.

A non-credit review session to provide students with the skills necessary to prepare for the successful completion of the common body of knowledge courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ESP 560. Fundamentals of Marketing. 3 Credit Hours.

Marketing problems experienced by top executives are examined. Fundamental problem-solving concepts are developed. Students consider problems of consumer needs, product planning, promotion, distribution, and pricing. The discovery and application of marketing management skills are developed through the use of cases and a major planning project.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

Finance Business Administration (FIN)

FIN 300. Fundamentals of Finance for Non-Finance Majors. 3 Credit Hours.

This course provides an overview of modern finance for non-business majors. Topics include: how financial markets work, understanding financial pages in newspapers and the Internet, how stock and bond prices are determined, how investment portfolios are structured, concepts of risk and return, how companies manage their cash and investments and international finance. Not for credit for business students.

Requisite: Non Business Majors.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 302. Fundamentals of Finance. 3 Credit Hours.

Introduction to the basic tools and concepts in finance. This is the core class in finance for our undergraduate program. Topics include the financial framework of a business entity, taxes, the time value of money, capital market theory, financial risk measures, and capital budgeting.

Note: to be eligible to major in finance, a student must earn a grade of B or higher in this class (a grade of B- does not qualify).

Prerequisites: ECO 211, ACC 211, MAS 201 or MAS 311 or MTH 224 or IEN 311 or IEN 310 or PSY 204 or PSY 290 or PSY 292.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 303. Intermediate Financial Management. 3 Credit Hours.

This course provides an overview of financial decision-making by corporations. Building on topics covered in the introductory finance classes, this course develops the foundations of optimal financial policy and applies these principles to corporate financial decision-making including capital structure, capital budgeting, dividend policy, leasing, securities issuance and the role of investment banks, and mergers and acquisitions. Note: a student must have obtained a B or higher grade in FIN302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate that requirement.

Prerequisites: FIN 302, MAS 202 or MAS 312 or IEN 312.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 308. Intermediate Financial Management for Entrepreneurs. 3 Credit Hours.

This course is primarily for students majoring in entrepreneurship. It provides an overview of financial decision-making by entrepreneurs. Building on topics covered in the introductory finance classes, this course develops the foundations of optimal financial policy and applies these principles to entrepreneurial financial decision-making involved with such things as capital structure, working capital budgeting, leasing, hedging and risk management, securities issuance and the role of investment banks, and mergers and acquisitions. Note: Students cannot take both FIN 308 and FIN 303, so this class is not open to students who have taken FIN 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 315. Trading & Markets. 3 Credit Hours.

This course provides an introduction to the functioning of financial markets and the fast changing field of market microstructure. On the equity trading side, the course covers major exchanges such as NYSE Euronext and Nasdaq OMX, and new players such as BATS and Direct Edge/ISE. Students also learn about dark pools, options and futures exchanges, electronic bond trading platforms, and currency trading systems. In addition, the course provides a summary of different market structures, the role of market participants, different order types, trading strategies, and trading externalities. The course draws on theories and tools from economics and behavioral finance, current institutional practices and market regulation.

Prerequisite: FIN 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 320. Investment and Security Markets. 3 Credit Hours.

This course introduces students to both practical and theoretical aspects of investment with an emphasis on financial markets. Topics include valuation of financial securities such as stocks, bonds and options; modern portfolio theory; the process and institutional characteristics of investing. Note that this course does not address the details of individual security valuation and selection, i.e., this course is not about stock picking or about how to get rich by investing in the markets. Instead, this course attempts to help you develop a lasting conceptual framework in which to view the investment process and to analyze future ideas and changes in investment environment. This class is essential to any student considering a finance concentration. Note: A student must have obtained a B or higher in FIN302 to major in Finance. Earning an A in this class or any other class or classes does not eliminate this requirement.

Prerequisites: FIN 302, MAS 202 or MAS 312 or IEN 312.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 330. International Finance. 3 Credit Hours.

This course applies the principles of finance to international business decisions. Topics include the analysis of foreign exchange rates, balance of payments, characteristics and use of international financial institutions and instruments, the analysis and management of financial risk in the international environment, and financing multinational corporations. Note: a student must have a B or higher in FIN 302 to major in International Finance and Marketing (or Finance). Earning an A in this class or any other class or classes does not eliminate this requirement.

Prerequisite: FIN 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 340. Real Estate Principles. 3 Credit Hours.

This course provides an introduction to basic principles and fundamental practices in the real estate industry. Students learn how to apply the principles of finance to the real estate industry. Topics include common institutional aspects, brokerage, contracting, financing, ownership, management, valuation, appraisal, and investment analysis.

Prerequisites: FIN 302 or FIN 300.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 344. Real Estate Investment Analysis. 3 Credit Hours.

This course introduces the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications. Each student will complete a written evaluation and investment analysis of an existing or proposed commercial real estate project in Miami-Dade, Broward or Monroe County.

Prerequisite: FIN 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 347. Introduction to ARGUS. 1 Credit Hour.

ARGUS software is used extensively in the development, financing and management of commercial real estate, especially in the office, industrial and retail sectors. The introduction to ARGUS class exposes the student to the basic concepts and terminology in the commercial real estate market and to the typical inflows and outflows an owner who invests in real estate faces over the life of the investment.

Prerequisite: FIN 302.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 348. Advance ARGUS. 1 Credit Hour.

At the end of the Advanced ARGUS class the student will be able to assess the viability of detailed rent and operating expense assumptions, make decisions about the impact of financing on investor returns and critically evaluate the investment potential of leveraged office and retail property.

Prerequisites: FIN 302, FIN 347.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 355. Smif Fund Analyst I. 1 Credit Hour.

The course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester; students must commit to and enroll in the follow-up class. Admission to the course is through a competitive application process.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 356. Smif Fund Analyst II. 1 Credit Hour.

This course is designed to introduce the student to the investment management process, including valuation of publicly traded equities. The course is one credit and meets once a week each semester. Enrollment in the course is limited.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 404. Applications in Corporate Finance. 3 Credit Hours.

An application of the concepts and tools of corporate finance. Primary emphasis on analyzing real-world cases dealing with liquidity issues, capital budgeting, firm valuation, advanced corporate financing, hedging with options and futures, corporate financial strategy, and other current issues in corporate finance.

Prerequisites: FIN 302, FIN 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 405. Financial Modeling. 3 Credit Hours.

This course takes a variety of finance topics, which have been covered in the prerequisite courses, and implements them using practical spreadsheet models. Students will use the internet and financial databases to obtain input data for their models. Students will use Visual Basic for Applications (VBA) and design functions and macros to enhance their models. Students must have a solid working knowledge of Windows and Excel, as well as a good understanding of the material taught in the prerequisite finance classes. Students are required to also take FIN406, a co-requisite (zero credit) laboratory class, which provides hands-on instruction. Students must have a mobile (?lap-top?) computer with the capability to run Windows-based software.

Prerequisites: FIN 302, FIN 303, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 408. Introduction to Mergers & Acquisitions. 3 Credit Hours.

This course introduces students to the world of mergers & acquisitions (M&A). More specifically, the course is designed to develop an understanding of (i) the economic, financial, and strategic issues involved in the acquisition of a (public or private) company; (ii) the analytical tools used to value an acquisition target; and (iii) academic research that reports results from large samples of M&A deals. Students will apply their understanding of these issues by analyzing various actual and potential acquisitions.

Prerequisites: FIN 302, FIN 303.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 409. Introduction to Private Equity & Venture Capital. 3 Credit Hours.

In this course, you will learn about the private equity (PE) industry, composed of both venture capital (VC) and buyouts (BO). The focus is on how PE investors evaluate, select, value, and structure deals. This course has several goals. First, the course will deepen your current understanding of corporate finance by applying key concepts and tools to a new and increasingly important industry. Second, the course seeks to introduce you to the institutions of the PE industry. This involves examining, for example, how funds are raised and how term sheets are structured. Finally, a goal is to understand the valuation process used by PE investors.

Prerequisites: FIN 302, FIN 303 or FIN 308.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 410. Financial Institutions and Markets. 3 Credit Hours.

This course examines financial institutions, such as banks (commercial, investment, mortgage, savings), credit unions, insurance companies, pension funds, and mutual funds and the money markets in which they operate, and focuses on why they exist and how to manage them. Topics include financial intermediation and transmutation, monetary theory and policy, Federal Reserve management of the money supply, velocity of money, fiscal theory and policy, interest rates, and immunization.

Prerequisites: FIN 302, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 411. Commercial Bank Management. 3 Credit Hours.

This course introduces the theory and practice of asset-liability management by large publicly traded commercial banks, including the fundamental principles of structuring loans into balance sheets. A major objective of this class is to provide students sufficient background to enter the credit department in the executive development program of major money center bank.

Prerequisites: FIN 302, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 421. Investment Portfolio Management. 3 Credit Hours.

This course covers the techniques of institutional and individual portfolio management. Topics include: Portfolio theory, diversification, asset allocation strategies, equity indexing, equity style management: value versus growth, mutual funds, basics of hedge funds and fund of funds, ETF basics, introduction to private equity, equity and bond portfolio management strategies.

Prerequisites: FIN 302, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 422. Speculative Markets and Derivatives. 3 Credit Hours.

This course is an introduction to derivative securities, and examines the nature of derivatives and applications of such instruments in investment and corporate settings. The emphasis is on derivatives of equity-based securities (such as stocks and stock indices), but coverage includes derivatives of debt-based securities (such as Treasury and Eurodollar securities). Topics include options, futures, forwards, and other derivatives, such as options on futures, foreign currency derivatives, swaps, exotic options, real options, as well as financial engineering using derivatives.

Prerequisites: FIN 302, FIN 303, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 423. Introduction to Alternative Investment. 3 Credit Hours.

The objective of this course is to provide an introduction to alternative financial instruments and how capital market participants utilize them. The course covers a large set of investment choices, with a specific focus on fixed income and alternative instruments, such as commodities, interest rates and currency. While covering each instrument, the course also examines with how macro-economic, technological, labor market, taxes and regulatory issues affect specific investment decisions.

Prerequisites: FIN 302, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 425. Business and Security Valuation. 3 Credit Hours.

Applications of finance theory to the problem of valuing public and non-public companies. Multiplier models, discounted cash flow analysis, and the strengths and weaknesses of traditional security valuation methods are addressed in detail. Financial spreadsheet programs and data sources are an integral part of the course.

Prerequisites: FIN 302, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 427. Fixed Income Markets and Analysis. 3 Credit Hours.

This course examines financial markets that trade fixed income securities. A fixed income security is based primarily on a debt contract, such as a bond, debenture, note or Treasury bill. Topics include the valuation, computation of return, and computation of various measures of risk for fixed income securities, as well as the analysis of the term structure of interest rates and various option features commonly included in debt contracts and fixed income securities. Students must have a solid working knowledge of Excel to take this class.

Prerequisite: FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 431. International Financial Management. 3 Credit Hours.

This is an advanced class in international finance from the viewpoint of multi-national organizations, including corporations, investment banks, and commercial banks. Topics include managing the various sources of risk, such as economic, political, and currency; cash receivables, inventory, and payables management; financing; transfer pricing; taxation; currency netting; capital budgeting; and hedging.

Prerequisites: FIN 302, FIN 320, FIN 330.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 444. Real Estate Investment Analysis. 3 Credit Hours.

This course introduces the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market. Each student will complete a written evaluation and investment analysis of an existing or proposed commercial real estate project in Miami-Dade, Broward or Monroe County.

Prerequisites: FIN 302, FIN 303 or FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 445. Real Estate Finance. 3 Credit Hours.

This course introduces the theoretical concepts and analytical techniques used to make a decision to finance the purchase or development of a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market. Students are also encouraged to use their semester projects to apply for one of the numerous case competitions.

Prerequisites: FIN 302, FIN 303 or FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 456. Behavior Finance. 3 Credit Hours.

The goal of this course is to expose you to selected topics from the upcoming field of behavioral finance. This will include a discussion of prospect theory and different types of behavioral biases such as representativeness, disposition effect, overconfidence, narrow framing, familiarity bias, and the house-money effect. In addition, the course will cover the implications of behavioral biases for asset pricing, corporate finance, and the overall macro-economy. Simple experiments will be conducted in class to illustrate some key behavioral concepts.

Prerequisites: FIN 302, FIN 303, FIN 320.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 457. Smif Fund Portfolio Of Instructor. 1 Credit Hour.

The course is designed to introduce the student to the investment management process, including the tools used to compose a diversified portfolio that covers each of the major industrial sectors. The course is one credit and meets once a week each semester. Enrollment in the course is limited.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 458. Smif Fund Portfolio Manager li. 1 Credit Hour.

The course is designed to introduce the student to the investment management process, including the management of an investment organization and the evaluation of portfolio performance. The course is one credit and meets once a week. Enrollment in the course is limited.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 499. Special Topics in Finance. 3.00 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 555. Finance Honors Research Project. 3.00 Credit Hours.

Research project to fulfill requirements for Departmental Honors in Finance.

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

FIN 599. Directed Study. 3 Credit Hours.

Individually supervised research projects in selected finance topics. Approval of the Chairperson and advisor is required prior to registration.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 602. Fundamentals of Finance. 3 Credit Hours.

This is a core MBA course in our executive MBA program, devoted primarily to the area of finance. No prior background in finances is assumed. The course objective is to provide students with a conceptual framework for appreciating and understanding the problems facing the financial manager.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 603. Advanced Corporate Finance. 3 Credit Hours.

Applications in corporate finance. This class builds on the core MBA courses in our executive MBA program, especially Fundamentals of Finance (Finance 602). Topics include working capital management, financial planning, basic option valuation, agency theory, capital structure management, mergers and acquisitions, liabilities management and leasing. Note: required for Finance concentration.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 613. Intermediate Corporate Finance and Investments. 4 Credit Hours.

Prerequisite: BUS 640.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 614. International Finance, Valuation, & Financial Statement Analysis. 4 Credit Hours.

Prerequisites: BUS 640, FIN 613.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 615. Financial Decision Making. 4 Credit Hours.

Prerequisites: BUS 640, BUS 613, FIN 614.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 616. Advanced Corporate Finance. 4 Credit Hours.

Prerequisites: BUS 640, BUS 613, FIN 614.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 617. Derivatives and Financial Modeling. 4 Credit Hours.

Prerequisites: BUS 640, BUS 613, FIN 614.

Components: DIL.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FIN 620. Investment Analysis. 3 Credit Hours.

This course deals with theory and application of investment analysis. Topics include general stock trading, portfolio and risk-return theory, models of stock valuation, portfolio diversification, market efficiency, options and futures, bond valuation and bond portfolio strategy, general commodity investing, and personal financial planning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 621. Portfolio Construction and Management. 3 Credit Hours.

The evolution of portfolio theory and practice and its role in modern investment management. Individual constraint models within the general capital market theory are included as well as empirical evidence, theoretical discussion, and practical exercises.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 622. Financial Options and Futures. 3 Credit Hours.

Study of the theoretical development of models for pricing contingent claims in the field of finance. Application of theoretical results to the hedging of current and future assets and liabilities and to speculative strategies for the risk-averse, profit-maximizing entity are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 630. International Finance. 3 Credit Hours.

The financing of international trade and capital placements. Restrictions on capital retrieval and problems of international liquidity related to the U.S. and non-U.S. firms is discussed as well as current developments in international banking, theory, and policy. Cases involving foreign capital commitments and transactions, especially Latin America are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 631. International Financial Management. 3 Credit Hours.

Sources and uses of long and short term capital for international business applications and foreign currency markets. Financial decisions associated with international cash and capital budgeting, capital repatriation and taxation strategies, capital exposure and coverage, and multinational firm financial strategies are discussed. Lectures and cases are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 641. Valuation and Financial Decision Making. 2 Credit Hours.

Basic financial valuation. This is one of the core classes in finance for our regular MBA program. Topics include the financial environment; the time value of money; capital market efficiency; basic security valuation; risk, return and asset pricing; cost of capital; and an introduction to capital budgeting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 642. The Financial Environment. 2 Credit Hours.

A continuation of FIN 641. Topics include an introduction to the global securities markets and foreign exchange, basic derivatives, real options, the securities trading process, fixed income securities markets, the term structure, investment banking, and short-term financial management and planning.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 643. Quantitative Finance & Market Microstructure. 2 Credit Hours.

This course exposes students to the fast growing field of market microstructure. Students will learn about different trading mechanisms encountered in financial markets today, how information affects prices and liquidity, what algorithms practitioners use to implement their trading strategies, and some basic models of market microstructure. The course ends with a brief description of several common quantitative trading strategies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 644. Real Estate Investment and Appraisal. 2 Credit Hours.

This course will introduce students to the theoretical concepts and analytical techniques used to make a decision to purchase an ownership interest in a commercial real estate project. There is heavy reliance on Excel applications and the use of the Argus database that is a standard resource in the commercial real estate market.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 645. Real Estate Finance. 2 Credit Hours.

This course will introduce you to the theoretical concepts and analytical techniques used to make a decision to loan money for the purchase or development of a commercial real estate project.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 647. Introduction to ARGUS. 1 Credit Hour.

ARGUS software is used extensively in the development, financing and management of commercial real estate, especially in the office, industrial and retail sectors. The introduction to ARGUS class exposes the student to the basic concepts and terminology in the commercial real estate market and to the typical inflows and outflows an owner who invests in real estate faces over the life of the investment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 648. Advanced ARGUS. 1 Credit Hour.

At the end of the Advanced ARGUS class the student will be able to assess the viability of detailed rent and operating expense assumptions, make decisions about the impact of financing on investor returns and critically evaluate the investment potential of leveraged office and retail property.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 650. Financial Investment. 2 Credit Hours.

This course builds on FIN 641 and FIN 642 to provide a more advanced knowledge of the field of investments, particularly the fixed income markets, portfolio construction, asset pricing, and behavioral biases affecting financial decisions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 651. Advanced Topics in Investments. 2 Credit Hours.

This course is about applying finance theory to the practice of investments. Topics include building a term structure model, building a fixed income portfolio, performance standards and measurement, and the role of futures and options in portfolios.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 653. Alternative Investments. 2 Credit Hours.

The course provides an advanced theoretical and practical understanding of various alternative investment strategies, with a specific focus on derivatives (e.g., interest rate and credit derivatives), venture capital and private equity investments, and real estate investments. The course also examines how macro-economic, technological, labor market, taxes and regulatory issues affect specific investment decisions. In addition, the students learn about valuation, investment and risk management strategies of sophisticated investors and recent chronology of events that affect market participants.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 655. Smif Fund Analyst I. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 656. Smif Fund Analyst II. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 657. Smif Fund Portfolio Manager I. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 658. Smif Fund Manager II. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 660. International Finance. 2 Credit Hours.

Finance 660 builds on Finance 641 and 642, and introduces students to the concepts that are important in today's dramatically changing global economy. The course covers the international monetary system; the interrelationship between national economies through the balance of payments; the economic relationships that determine a currency's value relative to other currencies and real goods; the markets and instruments of international finance; currency crises and contagion; the hedging of international risk exposure; and international portfolio investment. Requisite: Master in International Business Studies Students Only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 661. Advanced Topics in International Finance. 2 Credit Hours.

This course builds directly on Finance 660 and on the MBA core classes, Finance 641 and 642, using a variety of techniques, including group projects and class discussion. A number of special topics are covered including measuring and managing the many additional risk exposures faced by a multi-national enterprise, investment decisions in a global framework, and financing the multi-national firm.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 663. Ad Corporation Fin. 3 Credit Hours.

Components: LEC.

Grading: GRD.

FIN 670. Corporate Finance. 2 Credit Hours.

This course builds on Finance 641 and 642 and focuses on financial decision making from a corporation's perspective. Issues addressed include capital structure, management of corporate liabilities, leasing and other asset-based financing techniques, advanced treatment of capital budgeting and some of the complex issues involved, and corporate mergers and acquisitions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 671. Advanced Topics in Corporate Finance. 2 Credit Hours.

This course builds directly on Finance 670 and on the MBA core classes, Finance 641 and Finance 642, and relies mainly on the analysis and vigorous class discussion of a variety of real-world cases. The cases cover a broad range of topics, including short- and long-term financing, capital budgeting decisions, corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, and other current issues in corporate finance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 674. Financial Analysis of Mergers and Acquisitions. 2 Credit Hours.

This course is designed to develop an understanding of (1) the economic and financial issues involved in the acquisition of a company; (2) the analytical valuation tools used to evaluate an acquisition; and (3) potential and empirical stock market reaction to an acquisition. Students are then asked to apply their understanding of the issues to analyze cases involving various aspects of acquisition.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 679. Private Equity and Venture Capital. 2 Credit Hours.

In this course, you will learn about the private equity (PE) industry, composed of both venture capital (VC) and buyouts (BO). The focus is on how PE investors evaluate, select, value, and structure deals. The course will improve your understanding of corporate finance by applying central concepts and tools to a new and increasingly important industry. The course will also introduce you to the institutions of the PE industry. This involves examining, for example, how contracts are structured to reduce asymmetric information problems and agency costs that are endemic to any PE investment. In addition, the students will learn about the valuation process used by PE investors.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FIN 681. Financial Institutions. 2 Credit Hours.

Finance 681 builds on Finance 641 and 642 and focuses on the management of financial institutions, such as banks. Topics include risk management, deposits and deposit insurance, liquidity, reserve requirements, capital adequacy, liability management, investment interest rate risk, and current issues connected with financial institutions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 683. Financial Modeling. 2 Credit Hours.

This course takes a variety of finance topics and implements them using practical spreadsheet models. Students will use the intent and financial databases to obtain input data for their models. Students will learn Visual Basic for Applications (VBA) to design functions and macros that will enhance their models. In addition to class time, this course will meet in a "computer lab" (a classroom) for hands-on instruction. Students are presumed to have a working knowledge of Windows and Excel.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 685. Mathematics of Financial Derivatives. 2 Credit Hours.

This course builds on Finance 650 and 670. This course provides an in-depth mathematical treatment of derivatives and is divided into three parts: (1) options; (2) futures and forwards; and (3) other derivative instruments, which include options on futures, foreign currency derivatives, swaps, exotic options, and financial engineering. The emphasis is placed on equity instruments, although there is also some coverage of short- and long-term interest bearing instruments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FIN 686. Financial Decision Making. 2 Credit Hours.

The goal of this course is to use decision-making theory to better understand why investors, money managers, and corporate managers often make suboptimal economic and financial decisions. The first part of the course focuses on the basic techniques and models that a manager or an investor can use to make effective financial decisions. The second part of the course focuses on the psychological, social, and cultural determinants of suboptimal investor and managerial behavior. In addition, the course examines the impact of those mistakes for financial markets (e.g., price bubbles) and the overall economy. The course should be useful to individuals who work in a corporate setting or at a money management firm (mutual funds, hedge funds, pension funds, etc.).

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FIN 698. Selected Topics in Finance. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 699. Directed Readings and Study. 1-3 Credit Hours.

Individually supervised research or reading projects in selected fields. Evaluation of project and subject by the supervising professor is required at the time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 705. Theory of Corporate Finance. 3 Credit Hours.

The aim of this course is to expose students to some of the important papers that constitute the theoretical foundations of corporate finance. The course will try to give you a working understanding of the key papers and give you a flavor of the techniques for setting up and solving models, which you could possibly apply in your own research. The later part of the course leans more towards empirical work and discusses the connections and gaps between theoretical and empirical corporate literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 706. Empirical Methods in Finance. 3 Credit Hours.

The objective of this course is to give you an introduction to empirical research in finance. This class is not designed like an econometrics class where the emphasis is the statistical specification of tests and the derivation of underlying asymptotics. The focus in this class is the understanding of the technique and the actual implementation in finance. The goal is to provide you with a toolbox of techniques that you can use to answer empirical questions in corporate finance and asset pricing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 707. Financial Economics I. 3 Credit Hours.

This course is an introductory Ph.D. level course on the fundamental theories of asset pricing. Specifically, it consists of three parts. The first part focuses on individual choice under uncertainty. The second part develops equilibrium asset pricing theories, which include mean-variance efficiency and the Capital Asset Pricing Model (CAPM), as well as the Arbitrage Pricing Theory (APT). The third part reviews recent development in asset pricing by introducing some stylized facts and new theories.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 708. Financial Economics II. 3 Credit Hours.

This is a second course on asset pricing. The class is divided in two independent modules. The first module covers discrete time asset pricing models with frictions. These frictions include, among others, asymmetric information, slow-moving capital, delegated portfolio management, and short-sale constraints. The second module is an introduction to continuous time finance. Topics include introduction to stochastic calculus, derivative pricing and hedging, optimal portfolio choice, and equilibrium asset pricing.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 709. Behavioral Finance. 3 Credit Hours.

This course will cover selected topics from the field of behavioral finance. Issues related to both asset pricing and corporate finance will be discussed. The main objective of the course is to help you identify a few interesting research ideas and execute one of these ideas into a completed paper, which could be part of your dissertation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FIN 830. Pre-Dissertation Research. 1-6 Credit Hours.

Components: LEC.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

First-Year Seminar Fine Arts (FFA)

FFA 190. First-Year Seminars in Arts. 3 Credit Hours.

Seminars designed to introduce up to 25 freshmen to the Fine Arts. Topics will vary from year to year, as will faculty teaching the seminars.

Components: LEC.

French (FRE)

FRE 101. Elementary French I. 3 Credit Hours.

For students with no background or previous study of French. The focus of FRE 101 is the development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: university life, family, leisure activities, home and community. Includes both oral and written assessment of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French. Not open to students who have completed 2 or more years of high school French. Closed to heritage or native speakers of French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 102. Elementary French II. 3 Credit Hours.

Continuation of FRE 101. The development of communicative abilities in speaking, reading, writing and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 105. Accelerated Elementary French. 3 Credit Hours.

For students with previous study of French desiring to review material covered in FRE 101 and 102 in preparation for continued study of French at the intermediate level. The focus of FRE 105 is the continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: family, leisure activities, home, and community, childhood and adolescence, food and lifestyle, university life and professions. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 201. Intermediate French I. 3 Credit Hours.

For students with previous study of elementary-level French. The continued development of communicative abilities in speaking, reading, writing, and comprehension of French and an introduction to the cultural practices of the Francophone world. Themes on: travel, technological innovations, the evolution of family values, and social and environmental issues. Includes both oral and written assessments of grammatical structures and vocabulary introduced, informal and formal writing. Conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 202. Intermediate French II. 3 Credit Hours.

For students with some previous study of French at the intermediate level, who are familiar with all the tenses and with vocabulary related to the topics covered in FRE 101-201. FRE 202 is the first semester of a two-semester sequence ending with FRE 203. The continued development of skills in reading, writing, speaking, and listening in French, with an additional emphasis on cultural competence in the French-speaking world. Themes on: relationships, cultural values, different historical perspectives, and current politics. These themes will be explored through articles, films and literary texts. The course will develop writing and reading strategies, providing them with the tools to think, read, and write critically and analytically in papers of 1-3 pages. Progress will also be assessed through quizzes and exams. Course conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 203. Advanced French. 3 Credit Hours.

Continuation of FRE 202. This course will prepare students for advanced literature, linguistic, and culture courses. The class will use films, literary works, and other cultural texts. Students will write analytic essays of 3-5 pages to develop style, vocabulary, and syntax. Course conducted entirely in French.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

FRE 280. French Culture And Conservation. 3 Credit Hours.

The major social, historical and political factors that have shaped contemporary and traditional French culture and society. This cultural approach to language-learning is set in the small towns and villages of the Sete region, rich and vibrant with a centuries-old history of intellectual advances and social tolerance. The historical and social evolution of French culture will be studied through film, literature and art with visits to relevant historical sites and museums.

Prerequisite: FRE 102 or FRE 105.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 301. Interpreting Literary And Cultural Texts In French. 3 Credit Hours.

Tools for the interpretation and analysis of literary and cultural materials from the French-speaking world. Acquisition of terminology and theories through the study of the main literary genres (prose, poetry, and drama) and a complementary genre of cultural analysis (e.g., film studies, cultural studies, etc.). Emphasis on critical writing skills. Closed to native speakers formally educated in French.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 302. The Cultures of France. 3 Credit Hours.

Historical survey of French intellectual, artistic, and popular culture. Writing credit.

Prerequisite: FRE 214 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 303. The Cultures Of Francophone Africa, Canada, And/Or The Caribbean. 3 Credit Hours.

Historical survey of the intellectual, artistic, and popular culture of the French-speaking communities in Africa, Canada and the Caribbean.

Prerequisite: FRE 214 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 310. Topics in French and Francophone Studies in Translation. 3 Credit Hours.

Topics in the literature and/or cultures of the French-speaking world. Readings and discussion in English. Development of critical reading and writing skills. Fulfills humanities literature requirement. Writing Credit. Does not fulfill foreign language requirement. May be repeated when the topic varies. May be used toward the French major in accordance with Department of Modern Languages and Literature stipulations.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 321. Literary Topics. 3 Credit Hours.

The study of literature, film and/or the arts through a specific topic. Maybe repeated for credit if topic is different.

Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 322. Topics in Global French Culture. 3 Credit Hours.

Issues centered on the culture of France and/or regions where French is spoken. Topics such as film, Caribbean history, journalism, translations, migration. May be repeated for credit if topic is different.

Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 325. Topics In French-Language Cinema. 3 Credit Hours.

Topics in the cinema of the French-speaking world. Analysis of films in their cultural context. May be repeated for credit if topics vary.

Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

FRE 330. Topics In Gender And Sexuality. 3 Credit Hours.

Topics in gender and sexuality in the context of the French-speaking world, through literary and/or cultural studies. Writing Credit. May be repeated if topics vary. Prerequisite: FRE 301 or the Equivalent.

Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 340. Migration In Literary And Cultural Studies. 3 Credit Hours.

Study of migration to or from France, French-speaking Canada and America, Africa and/or the Caribbean. Writing Credit. May be repeated for credit if topics vary. PREREQUISITE: FRE 301, OR EQUIVALENT.

Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 345. Franco-Maghrebian Studies. 3 Credit Hours.

The study of major historical, social, cultural and literary issues related to the Franco-Maghrebian interface. Writing Credit. May be repeated for credit if topics vary. PREREQUISITE: FRE 301, OR EQUIVALENT
Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 346. African Studies. 3 Credit Hours.

Topics in the literary and/or cultural study of French-speaking Africa. May be repeated for credit if topics vary. Writing Credit.
Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 360. The Caribbean Through Literary And Cultural Studies. 3 Credit Hours.

Literary and cultural readings on the Caribbean. Writing Credit. May be repeated for credit if topics vary.
Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 363. Medieval And Renaissance Topics In French. 3 Credit Hours.

Topics within French literature from the 12th century to the end of the 16th century.

Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 364. Early Modern Topics In French. 3 Credit Hours.

Topics within French literature from the 17th and 18th centuries.
Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 365. 19Th Century Topics In French. 3 Credit Hours.

Topics within French literature from the 19th and 20th centuries.
Prerequisite: FRE 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

FRE 366. 20th and 21st Century Tpoics in French. 3 Credit Hours.

Study of currents, themes, and movements that define and run the course of 20th and 21st century French literature and culture. Course materials may encompass a diverse array of sources, including art, film, literature, theatre, aesthetics, political cultures and theoretical debates. May be repeated if the topic changes substantially.

Prerequisite: FRE 301.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FRE 395. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 396. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 397. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 398. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 399. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 432. French For Global Business. 3 Credit Hours.

The language and culture tools needed to work and conduct business in French anywhere it is spoken around the world.

Prerequisite: FRE 301. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

FRE 442. Advanced writing workshop in French. 3 Credit Hours.

Intensive writing of various genres based on the discussion of readings.

Prerequisite: FRE 301. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 495. Transfer Credits. 1-3 Credit Hours.

Awarded for 400-level course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

FRE 501. Capstone. 3 Credit Hours.

Course with a broad-based topic designed to integrate high-level linguistic, critical and analytical skills with the body of knowledge acquired during the course of study toward the major. Topics vary. Open only to undergraduates in the last semester of their French major. Course is writing intensive; fulfills writing credit requirement.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 591. Directed Readings. 1-3 Credit Hours.

May be repeated for credit if topic is different.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 592. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 593. Directed Readings. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 594. Senior honors Thesis I. 3 Credit Hours.

Directed research for honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 595. Senior Honors Thesis II. 3 Credit Hours.

Directed writing of honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

FRE 611. Topics in French Medieval Literature. 3 Credit Hours.

Recent topics: exile, the epic, orientalism, imperialism, monsters.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 612. Topics in French Renaissance Literature. 3 Credit Hours.

Specific genres, works, authors, and movements. Possible topics: Melancholy and Madness; Montaigne; Rabelais; Marguerite de Navarre; lyric poetry.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 613. Topics in 17th Century French Literature. 3 Credit Hours.

Recent topics: Racine, Moliere, Corneille: Pascal and the Moralists tradition, the birth of the psychological novel, love and war.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 614. Topics in 18th Century French Literature. 3 Credit Hours.

Recent topics: Diderot, Rousseau, Sade; exoticism as related to political theory; the epistolary novel; the Enlightenment and post-colonial theory.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 615. Topics in 19th Century French Literature. 3 Credit Hours.

Recent topics: Balzac, Stendhal, Flaubert; Dandysm and Decadence; the Symbolist movement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 616. Topics in 20th-21st Century French Literature. 3 Credit Hours.

Recent topics: Paris 1913; Surrealism; Artaud, Beckett, Ionesco, Genet; the Nouveau Roman.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 621. Special Topics in French Studies. 3 Credit Hours.

Special Topics in French Studies.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 625. Elementary French for Graduate Research. 0 Credit Hours.

Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 675. Topics in Francophone Studies. 3 Credit Hours.

Recent topics: travel narratives, literary historiography, discourses of race, colonialism, multilingualism and literacy, nationalism and culture.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 691. Writing Practicum. 1 Credit Hour.

The writing of a publishable research paper under faculty guidance.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 692. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

FRE 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. Prior to admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of FRE 730 may be taken in a regular semester, nor more than six in a summer session. Students who have not passed their qualifying examinations yet, but are not taking any courses, may enroll in FRE 730.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

FRE 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. After admission to candidacy, the student will enroll for credit as determined by his/her advisor. Not more than 12 hours of FRE 740 may be taken in a regular semester, nor more than six in a summer session. Students who have passed their qualifying examinations, but are not taking courses any more, may enroll in FRE 740. Where a student has passed his /her(a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

FRE 850. Research in Residence. 1 Credit Hour.

Used to establish residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

General Business Management and Organization (GBM)

GBM 100. Fundamentals Of Ethics And Leadership. 3 Credit Hours.

This is a comprehensive course specifically designed to assist students focus on building a proper foundation to prepare for college and then law school or graduate school in the future. The course creates opportunities for students to hone their ethical, business and legal skills. Students will be exposed to the functional areas of business: management, legal studies, and marketing. GBM 100 is a blend of academics, leadership, networking and teamwork that are at the core of a successful transition from high school to college to graduate school.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

GBM 101. Fundamentals Of Business. 3 Credit Hours.

This course is designed to provide a broad introduction to the various fields of business knowledge that are essential for successful decision making in the global marketplace. Students will be exposed to the functional areas of business: economics, accounting, finance, and management. The curriculum will require students to engage in hands-on activities that will help to familiarize them with the different business fields and decide if a career in business is right for them.

Components: LEC.

Grading: GRD.

GBM 580. Law & Econ In Soc. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Genomic Medicine (GNM)

GNM 601. Fundamentals Of Genomic Medicine. 2 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GNM 602. Clinical Applications Of Genomic Medicine Ii. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GNM 605. Research Ethics. 1 Credit Hour.

This course introduces foundational concepts in research ethics in preparation for conducting the genomic medicine practicum. Online Human Subjects Research and Responsible Conduct of Research training through the CITI program website will be supplemented with 6 one-hour in-person discussion sessions.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GNM 610. Clinical Application Of Genomic Medicine 1. 2 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GNM 630. Clinical Applications Of Genomic Medicine Iii. 4 Credit Hours.

This course continues the systems-based learning in GNM610 and GNM602, covering topics in rheumatology, autoimmunity, infectious disease, hematology, oncology, endocrinology, diabetes and metabolism, ophthalmology, and dermatology. The class will meet 2 hours each week for literature-based discussion sessions, and self-directed learning (online lectures and text-based learning modules) will take approximately 2 hours per week.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GNM 631. Genomic Medicine Laboratory. 3 Credit Hours.

Components: LAB.

Grading: CNC.

Typically Offered: Fall & Summer.

GNM 640. Pharmacogenomics. 1 Credit Hour.

This course covers pharmacogenomics as a special case of genomic medicine that will be practiced in every setting. The course provides an overview of known drug/gene interactions, interpreting test results, and integrating these results into clinical practice.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GNM 660. Computational Methods For Genomic Medicine. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GNM 680. Genomic Ethics And Public Policy. 2 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

Geography (GEG)

GEG 101. Digital Earth. 3 Credit Hours.

Explores various geospatial technologies and the societal implications of our digital world with particular emphasis locational services, mapping, imagery, and other capabilities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 105. World Regional Geography. 3 Credit Hours.

An introduction to geography's basic concepts within the framework of a comprehensive survey of the world's major regions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 110. Introduction to Human Geography. 3 Credit Hours.

An introduction to the sub-fields of human geography by an examination of patterns and process in the international system.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 120. Physical Geography. 3 Credit Hours.

The Earth system (atmosphere; hydrosphere; biosphere; lithosphere) emphasizing the interrelationships among its constituent subsystems; human-environmental interactions and geographic dimensions of these four subsystems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 199. Introduction to GIS (Geographic Information Systems). 3 Credit Hours.

This course uses lecture and lab sessions to teach fundamental concepts in Geographic Information Systems (GIS) and introduce related geographic technologies (Global Positioning Systems, Remote Sensing, etc.). Topics include the nature and sources of digital and spatial data, map projections and datums, raster and vector data structures, raster and vector spatial analysis, and GIS project design. Students will learn to use ArcView and Idrisi, two leading GIS software programs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 201. Topics in Geography. 3 Credit Hours.

Content and prerequisites vary.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 210. Introduction To Geographic Research Methods. 3 Credit Hours.

Explores the fundamentals of conducting social science research, such as research design, hypothesis formulation, and field data collection, with particular emphasis on quantitative and qualitative geographic analytical methods.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 212. Geography of Middle America and the Caribbean. 3 Credit Hours.

Human and physical geography of Middle America and the Caribbean.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 221. Introduction To Health And Medical Geography. 3 Credit Hours.

An introduction to health and medical geography which has recently emerged as a significant subfield integrating public health and medicine with human and physical geography and climatology. Medical geography is explored across three major themes: disease ecology (relationship between disease and the natural/human environments), social approaches (including political economy and socio-behavioral approaches), and the spatial approach (using maps and spatial statistics to identify patterns in health outcomes and health services).

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 222. Geography of South America. 3 Credit Hours.

This course is an introduction to the geography of South America. It explores the physical, political, economic, social and cultural geographies of this diverse and complex world region. The course covers agrarian and urban land-use patterns, migration and territorial development and includes urban and regional planning, health, education and social services, with particular attention given to how these interventions address problems of uneven territorial development and social inequality.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 232. Geography and Development in Africa. 3 Credit Hours.

A survey of the geography of Africa south of the Sahara, with particular emphasis on development and the role of African states in the international system.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 242. Economic and Political Geography of the Middle East. 3 Credit Hours.

Human and physical geography of the Middle East with emphasis on current topics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 252. United States and Canada. 3 Credit Hours.

Human and physical geography of North America.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 272. Jewish Geography. 3 Credit Hours.

Facts of Jewish history, geography, and demography both in the world and the United States. Basic geographic concepts that help us to understand the Jewish world and provide a basis for understanding the various ways that Jewish communities have adapted to different geographic circumstances.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 280. Introduction to Cartography and Computer Mapping. 3 Credit Hours.

Methods and techniques of cartography. Cartographic representation of spatial data.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 300. Human Geography. 3 Credit Hours.

The focus is on human geography by exploring pressing global issues including population growth, migration, economic crises, environmental decline, food security, identity politics, war and urbanization. These topics will be explored through the lens of cultural geography, uncovering, how spatial interconnections and geographical interdependence shape the world as we know it. FOR BGS STUDENTS ONLY

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 301. Topics in Geography. 3 Credit Hours.

Content and prerequisites announced when offered. Course may be repeated for credit if content varies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 304. World Economic Geography. 3 Credit Hours.

Geographic analysis of the distribution of economic activities with emphasis on present-day patterns and trends of production, distribution, and consumption of the world's major commodities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 311. Drinking Water: Past, Present, And Future. 3 Credit Hours.

Traces the past, present, and future of human drinking water supplies through a social science lens. Examines drinking water as a physical, social, economic, and political resource, and how the integration of these views affects the management of global drinking water supplies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 341. Geography of Population and Development. 3 Credit Hours.

Major world population issues are discussed, including population growth, fertility patterns, mortality change, migration, ethnicity, and population structure changes.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 343. Doomsters & Boomsters: Perspective on Population Growth & Sustainability. 3 Credit Hours.

A critical look at two general views of global population growth and humankind's future prospects for sustainable well-being: so-called Doomsters, who believe that growing global human populations and resource-consuming lifestyles threaten our environment and the welfare of most human beings, and so-called Boomsters, who do not believe that population growth and consumption are a threat, but rather that the environment and lifestyles are generally improving, and that human ingenuity and technology will continue to make the world a better place.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 362. World Urban Geography. 3 Credit Hours.

An introduction to the principles and methods that apply to the geographic study of cities and urbanization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 370. Conservation of Resources. 3 Credit Hours.

Problems of resource availability in an urban-industrial society.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 371. Environmental Geography: Current Issues. 3 Credit Hours.

Topics selected from a wide range of current environmental problems from a geographical perspective. Students will become familiar with a wide range of ecological processes as well as the human forces that currently modify them.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 391. Intermediate GIS (Geographic Information Systems). 3.00 Credit Hours.

This course deals with fundamental concepts of raster and vector data manipulation and analysis through lectures and laboratory exercises.

Topics covered include vector polygon editing and topology, data quality assessment, integration of raster and vector data, basic concepts of remote sensing, cartographic modeling, suitability mapping, and multi-criteria evaluations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 392. Remote Sensing of the Environment. 3 Credit Hours.

Theory and techniques of environmental remote sensing and imagery interpretation for earth resources monitoring and management.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 420. Geopolitics. 3 Credit Hours.

Analysis of contemporary global geopolitical issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 481. Introduction to Quantitative Methods. 3 Credit Hours.

The use of basic methods or quantitative analysis in geographic research.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 491. GIS and Environmental Modeling. 3 Credit Hours.

Creation, editing, management and display of spatial databases in ARC/INFO, a vector-based GIS (Geographic Information System).

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 501. Place, Region, Nature. 3 Credit Hours.

Seminar for Graduate and senior undergraduate students about geographic thought and geographical traditions.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 510. Survey Research in Geography. 3 Credit Hours.

The use of survey research including the choice of a survey mechanism, sampling, questionnaire design, survey logistics, survey analysis, and reporting of results.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 511. Field Studies in Geography. 1-6 Credit Hours.

One to six weeks of intensive geographic field studies outside the Miami area. Lectures will be given prior to departure. The locations and topics of study will vary.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 513. Advanced Cartography. 3 Credit Hours.

Cartographic research techniques, cognitive mapping, distortion, transformations and cartograms. Prerequisite: GEG 280 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 515. Human Dimensions of Global Environmental Change. 3 Credit Hours.

Explores the human dimensions of global environmental change using an interdisciplinary approach. The course is reading and writing intensive. Special attention is given to the central role that land-use/cover change plays in the larger realm of global environmental change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 519. Immigration to the United States. 3 Credit Hours.

A description and analysis of current immigration patterns in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 522. Urbanization in the Developing World. 3 Credit Hours.

Patterns and processes in large cities in the developing world are examined.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 523. Seminar in Urban Management. 3 Credit Hours.

Identification of and responses to urban problems in large cities in European and Latin American metropolitan areas. Emphasis is on demographic, cultural/ethnic, service-provision, environmental, transportation, and land-use problems. Approach is via case studies, theory applications, and planning practicalities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 525. Topics in Geography. 3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 530. Resources and Society. 3 Credit Hours.

This course examines the relations between human society and material nature from within a broad theoretical perspective, relating questions of science, culture, and technology to the politics and economics of natural resources, focusing particularly on water, food, and petroleum.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 535. Internship in Geography. 1-4 Credit Hours.

Students are assigned to work for a local public or private agency.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 543. Doomsters & Boomsters: Perspective on Population Growth & Sustainability. 3 Credit Hours.

A critical look at two general views of global population growth and humankind's future prospects for sustainable well-being: so-called Doomsters, who believe that growing global human populations and resource-consuming lifestyles threaten our environment and the welfare of most human beings, and so-called Boomsters, who do not believe that population growth and consumption are a threat, but rather that the environment and lifestyles are generally improving, and that human ingenuity and technology will continue to make the world a better place.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 545. Special Topics. 3 Credit Hours.

Content varies by semester.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 552. Seminar on the Geography of South Florida. 3 Credit Hours.

Human and physical geography of South Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 555. Field Methods and Geospatial Analysis. 3 Credit Hours.

With a focus on geo-spatial applications, this methods course introduces students to field research addressing complex socio-environmental issues. The course includes exercises with GPS data collection; geo-tagged photography; ground truthing; spatial survey design; and distributed GIS. Various research areas and cognate field methods including environmental demography, community surveying, cultural mapping, and multi-sited ethnography.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 563. URBAN GEOGRAPHY. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 580. Introductory Quantitative Methods for Geographical Analysis.. 3 Credit Hours.

Basic quantitative methods for geographic analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 582. Advanced Quantitative Methods. 3 Credit Hours.

Continuation of GEG 481. The use of statistical methods and techniques in the solution of geographic research problems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 585. Advanced Cartography. 3 Credit Hours.

An understanding of cartography; a high degree of fluency in the art and science of map-making. The theory, principles, concepts and techniques required to present geographically-referenced data in order to effectively communicate spatial relationships, patterns, and the results of spatial analyses. Extensive experience in creating a wide variety of aesthetically-pleasing, professional-looking maps using ArcGIS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 591. Introduction to GIS (Geographic Information Systems) for graduate students. 3.00 Credit Hours.

Overview of basic concepts in GIS (Geographic Information Systems) for students wishing to get graduate credit. This class involves a student project using GIS.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 592. Advanced Environmental Remote Sensing. 3 Credit Hours.

A foundation in remote sensing and digital image processing. Special emphasis will be paid to land applications, use of satellite imagery, and the use of optical imagery in land-cover mapping. Introductory concepts of electromagnetic energy and radiative transfer; a basis for understanding remote sensing applications typically found in geography including multispectral image processing and classification.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 593. Intermediate GIS. 3.00 Credit Hours.

The objective of this course is to provide an introduction to analysis of spatial data in geographic information systems (GIS). The course will provide students with instruction on manipulation of raster and vector data as well as cartographic modeling using raster-based GIS software. Students also will receive exposure to introductory concepts of remote sensing and visualization, which are rapidly growing sub-fields of GIS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 595. Web Gis. 3 Credit Hours.

Map serving technologies and internet map design, focusing on the programming concepts needed to construct and implement high-quality web mapping applications. Lab exercises will make use of both the commonly used open source GIS and related programming tools for customizing web-based mapping applications, as well as the leading proprietary web mapping capabilities provided in ESRI's ArcGIS Server. Students build their own on-line interactive, customizable maps and will learn the basics of client/server architecture and processing, JavaScript programming, and XML/HTML basics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 602. Place, Region, Nature. 3 Credit Hours.

Seminar for Graduate and senior undergraduate students about geographic thought and geographical traditions.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 603. Advanced Research Design in Geography. 3 Credit Hours.

Designing and proposing geographic research projects based upon a critical reading of the geographical literature. Students will prepare a master's thesis (master's students) or dissertation (doctoral students) project proposal.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 610. Survey Research in Geography. 3 Credit Hours.

The use of survey research including the choice of a survey mechanism, sampling, questionnaire design, survey logistics, survey analysis, and reporting of results.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 613. Advanced Cartography. 3 Credit Hours.

Cartographic research techniques, cognitive mapping, distortion, transformations and cartograms. Prerequisite: GEG 280 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 615. Human Dimensions of Global Environmental Change. 3 Credit Hours.

Explores the human dimensions of global environmental change using an interdisciplinary approach. The course is reading and writing intensive. Special attention is given to the central role that land-use/cover change plays in the larger realm of global environmental change.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 619. Immigration to the United States. 3 Credit Hours.

A description and analysis of current immigration patterns in the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 622. Urbanization in the Developing World. 3 Credit Hours.

Patterns and processes in large cities in the developing world are examined.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 623. Seminar in Urban Management. 3 Credit Hours.

Identification of and responses to urban problems in large cities in European and Latin American metropolitan areas. Emphasis is on demographic, cultural/ethnic, service-provision, environmental, transportation, and land-use problems. Approach is via case studies, theory applications, and planning practicalities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GEG 625. Advance independent study in geography I. 1-6 Credit Hours.

Advanced independent study for Two-Paper Option for first paper.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 635. Internship in Geography. 1-4 Credit Hours.

Students are assigned to work for a local public or private agency.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 637. Development Studies. 3 Credit Hours.

Advanced seminar on issues in contemporary development studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 645. Advanced Independent Study in Geography II. 1-6 Credit Hours.

Advanced independent study for Two-Paper Option for second paper.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 652. Seminar on the Geography of South Florida. 3 Credit Hours.

Human and physical geography of South Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 655. Field Methods and Geospatial Analysis. 3 Credit Hours.

With a focus on geo-spatial applications, this methods course introduces students to field research addressing complex socio-environmental issues. The course includes exercises with GPS data collection; geo-tagged photography; ground truthing; spatial survey design; and distributed GIS. Various research areas and cognate field methods including environmental demography, community surveying, cultural mapping, and multi-sited ethnography.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 661. Advanced Urban Geography. 3 Credit Hours.

Analysis of the spatial structure of urban centers, the development of and interaction between functional zones, and the movement of goods and people in urban areas.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 663. URBAN GEOGRAPHY. 3 Credit Hours.

Components: LSN.

Grading: GRD.

Typically Offered: Fall.

GEG 680. Introductory Quantitative Methods for Geographical Analysis.. 3 Credit Hours.

Basic quantitative methods for geographic analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GEG 681. Advanced Spatial Statistics. 3 Credit Hours.

Social and environmental science applications of spatial statistical analysis illustrated with data and numerical (simulation experiments) examples employing interactive software. This course's focus is on spatial auto correlation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 685. Advanced Cartography. 3 Credit Hours.

An understanding of cartography; a high degree of fluency in the art and science of map-making. The theory, principles, concepts and techniques required to present geographically-referenced data in order to effectively communicate spatial relationships, patterns, and the results of spatial analyses. Extensive experience in creating a wide variety of aesthetically-pleasing, professional-looking maps using ArcGIS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 691. Introduction to GIS (Geographic Information Systems) for graduate students. 3.00 Credit Hours.

Overview of basic concepts in GIS (Geographic Information Systems) for students wishing to get graduate credit. This class involves a student project using GIS.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GEG 692. Advanced Environmental Remote Sensing. 3 Credit Hours.

A foundation in remote sensing and digital image processing. Special emphasis will be paid to land applications, use of satellite imagery, and the use of optical imagery in land-cover mapping. Introductory concepts of electromagnetic energy and radiative transfer; a basis for understanding remote sensing applications typically found in geography including multispectral image processing and classification.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 693. Intermediate GIS. 3.00 Credit Hours.

The objective of this course is to provide an introduction to analysis of spatial data in geographic information systems (GIS). The course will provide students with instruction on manipulation of raster and vector data as well as cartographic modeling using raster-based GIS software. Students also will receive exposure to introductory concepts of remote sensing and visualization, which are rapidly growing sub-fields of GIS.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GEG 695. Web Gis. 3 Credit Hours.

Map serving technologies and internet map design, focusing on the programming concepts needed to construct and implement high-quality web mapping applications. Lab exercises will make use of both the commonly used open source GIS and related programming tools for customizing web-based mapping applications, as well as the leading proprietary web mapping capabilities provided in ESRI's ArcGIS Server. Students build their own on-line interactive, customizable maps and will learn the basics of client/server architecture and processing, JavaScript programming, and XML/HTML basics.

Components: LEC.

Grading: GRD.

GEG 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

GEG 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in GEG 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GEG 825. Continuous Registration--Master's Study. 0 Credit Hours.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Geological Sciences (GSC)

GSC 101. Origin and Evolution of Planet Earth. 3 Credit Hours.

The origin of the elements and the evolution of the universe. The formation and early evolution of the solar system. The differentiation of the earth into core, mantle, and crust. Origin of the oceans and atmosphere.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 102. Evolution of the Biosphere. 3 Credit Hours.

The physical basis of life. The origin, early evolution, history of life on Earth. Emphasis on major crises and innovations, including the evolution of modern man.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 103. Evolution of the Modern Earth's Environment. 3 Credit Hours.

The earth's crust: composition and morphology. Ocean and atmosphere: radiation balance and dynamics. Climatology and paleoclimatology. The ice ages and the evolution of the modern environment. The relationships between the geological environment and human activities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 105. THE GLOBAL ENVIRONMENT. 3 Credit Hours.

Anthropogenic effects on the Earth's environment compared to analogous natural events.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 106. Geological Influences on Society. 3 Credit Hours.

Impact of geological processes on daily human activities and decision-making. Geological hazards and human habitation. Economic geology and exploration of natural resources. Influences of geology on other disciplines.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 107. Natural Disasters - Hollywood Vs. Reality. 3 Credit Hours.

This course will explore the causes, effects and societal responses to disasters. We will look at a variety of natural hazards and related disasters including flooding, volcanoes, landslides, earthquakes, hurricanes, tsunami and drought. Using excerpted segments of "disaster films" in conjunction with scientific treatments, we can identify the causes, frequency, consequences, risks, and public perceptions of natural hazards.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 110. The Earth System. 3 Credit Hours.

Interactions among the major components of the Earth System - the geosphere, the hydrosphere, the atmosphere, and the biosphere. To be taken concurrently with GSC 114 lab section.

Corequisite: GSC 114.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 111. Earth System History. 4 Credit Hours.

Earth History, beginning with earliest origins and surveying major steps in the evolution of the geosphere, atmosphere, hydrosphere, and biosphere.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 114. Earth Processes Lab. 2 Credit Hours.

Minerals, rocks, sediments, maps, imagery, fossils and paleoenvironmental reconstruction methods. Current frontiers of knowledge and field introduction to marine geology. Co-requisite: GSC 110.

Corequisite: GSC 110.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 204. Environmental Statistics. 3 Credit Hours.

This introductory course provides an overview of parametric and nonparametric statistics with an emphasis on applications in the analysis of environmental data.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 230. Reef Systems Through Time. 3 Credit Hours.

Interacting geological, physical, chemical, biological, and climatic processes that define a reefal setting and system. Field trips included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 231. Field Study of Reef Systems Through Time. 2 Credit Hours.

Fossil reef systems of the Paleozoic age in west Texas and New Mexico. Components, fabrics, and facies relationships. Field Methods. Visit to the Permian reef complex at Alamogordo. Carlsbad and Mississippian, Pennsylvanian and Permian reef mounds near Alamogordo. Fee required.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 240. Introduction to Marine Geology. 3 Credit Hours.

Learn about the origin, structure and evolution of the ocean basins and their margins, including interpretation of the paleo-archives hidden on the seafloor. The course material is necessarily broad, covering marine geography, plate tectonics, active and passive margins, coastal and ocean processes, sediment processes, continental margin and seafloor resources, and climate and ocean history and interactions. Our approach will be interdisciplinary, requiring integration of chemical, physical and biological systems, as well as geologic processes. A special emphasis will be placed on learning to read the sediment record as an archive of information on biologic and climate evolution.

Prerequisite: GSC 110, and GSC 114 or GSC 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 260. Earth Materials. 4 Credit Hours.

Physical and optical properties of common rock-forming minerals and their occurrence in igneous, metamorphic, sedimentary rocks, and ore deposits. Lecture, 3 hours; laboratory, 4 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 300. Trout and Calderas.. 3 Credit Hours.

A study of Earth processes necessary for environment which support and sustain wild trout. Instruction in fly fishing techniques based on an understanding of these processes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 310. Microbes and the Environment. 3 Credit Hours.

This course is designed to provide students in geology, biology and environmental science a fundamental understanding of the role microbes play in shaping the Earth and its environments as well as the basic principles and approaches to studying these interactions in both modern and ancient settings. The metabolic diversity displayed by microbial communities makes them an integral component of global elemental cycles. In this regard, microorganisms have shaped our planet over the past 4 billion years and continue to do so in a very prominent way. The goal of this course is to learn about microbial diversity and metabolism, and the ability of microbes to shape and influence the environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 311. Field Study of Volcanoes and Society. 2 Credit Hours.

Field trip to Popocatepetl and surrounding sites near Mexico City. Nature and impact of explosive volcanic eruptions on prehistoric civilizations. Fee required.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 360. Depositional and Diagenetic Systems. 4 Credit Hours.

Sedimentary processes, sedimentology, and sedimentary diagenesis. Physical, biological and chemical sedimentation in Earth's surficial environments. Paleoenvironmental and diagenetic history reconstruction using petrologic, hand specimen, and field methods. Cyclicity in sedimentary systems. Lecture, 3 hours; field/ laboratory, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 380. Paleontology and Stratigraphy. 4 Credit Hours.

Biostratigraphy, paleoecology, taphonomy, micro- and macro-evolutionary processes, and physical and chemical methods used for stratigraphic correlation. Major groups of invertebrate phyla comprising the bulk of the fossil record. Lecture, 3 hours; laboratory, 2 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 401. Senior Internship. 3 Credit Hours.

Field and laboratory studies conducted in conjunction with an approved academic environmental or industrial research laboratory or agency.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GSC 410. Environmental Geochemistry. 3 Credit Hours.

Natural distribution of the elements on earth, and how this is being changed. Radioactivity and energy, greenhouse warming and ozone depletion, water and waste and other environmental problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GSC 420. Geophysics. 3 Credit Hours.

The earth's gravitational field. Geomagnetism and paleomagnetism. Seismology. Heat flow. Plate tectonics. Lecture, 3 hours; laboratory, 2 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 440. Igneous and Metamorphic Petrology. 4 Credit Hours.

Genesis and classification of igneous and metamorphic rocks, field relationships of rock assemblages, and results of recent laboratory investigations. Identification of common rock types in hand specimens and by thin-section and X-ray diffraction techniques. Lecture, 3 hours; laboratory, 3 hours.

Prerequisite: GSC 260.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 462. Earth's Ancient Atmospheres, Climates, And Sea Levels. 3 Credit Hours.

The Earth's atmospheres, climates, and sea level from the early Pre-Cambrian to present. Focus is placed on how the study of Earth's past is relevant to both modern and future climate change.

Prerequisite: GSC 110 and GSC 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 480. Structural Geology. 4 Credit Hours.

Behavior of rock materials; analysis, description and classification of geologic folds, faults, joints; analysis of rock fabrics; tectonic and geologic history of continents and continental margins. Lecture, 2 hours; laboratory, 2 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GSC 482. Field Methods. 2 Credit Hours.

Field and laboratory exercises in mapping. Interpretation of aerial and satellite photographs; coring and laboratory meets two hours/week. Field portion is on alternate Saturdays plus four day trip to Appalachians or Caribbean.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

GSC 490. Senior Thesis. 3 Credit Hours.

Individual, original research of independent study supervised by a member of the Departmental faculty and concluded by formal thesis preparation, public oral defense and submission of the thesis to the Department.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 491. Senior Thesis. 3 Credit Hours.

Individual, original research of independent study supervised by a member of the Departmental faculty and concluded by formal thesis preparation, public oral defense and submission of the thesis to the Department.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 550. Hydrogeology. 3 Credit Hours.

Movement of subterranean water. The mechanical, chemical and thermal interaction of water with porous solids, and the transport of energy and chemical constituents. The origin of porosity and permeability. The controls exerted on aquifers by the lithology, stratigraphy and structure of geologic deposits and formations.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 560. Colloquium - Current Topics in the Geosciences. 1 Credit Hour.

Weekly presentations and discussions. Written and oral presentations required.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GSC 561. Colloquium - Current Topics in the Geosciences. 1 Credit Hour.

Weekly presentations and discussions. Written and oral presentations required.

Components: DIS.

Grading: GRD.

Typically Offered: Spring.

GSC 574. Special Studies. 1-4 Credit Hours.

Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 575. Special Studies. 1-4 Credit Hours.

Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 576. Special Studies. 1-4 Credit Hours.

Students engaged in approved field and/or laboratory activities, such as work at sea or in the laboratory under supervision, may register for credit.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GSC 580. Summer Field Geology. 4 Credit Hours.

An intensive four-week summer field laboratory study of modern geological processes and ancient rock sequences. Mapping, description and interpretation of rock and structural sequences, paleoenvironmental reconstruction, interpretation of tectonic history. Reports required.

Touring course. Travel fee required.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

GSC 581. Summer Field Environmental Geology. 2 Credit Hours.

Field evaluation of environmental geology problems in marine, coastal, wetland and terrestrial environments. Effects of human alteration of landscape, natural hazards, pollution of ground water, surface water and soils. Role of climate change on surficial environments. Reports required.

Touring course. Travel fee required. Co-requisite: GSC 580.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

GSC 582. Field Studies. 1-4 Credit Hours.

Conducted field trips to selected geological sites in the United States and abroad. Report required.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GSC 596. Research in Geology. 1-4 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

German (GER)

GER 101. Elementary German I. 3 Credit Hours.

Fundamental grammatical principles; exercises to develop a foundation for skills of listening, speaking, reading, and writing; introduction to German culture. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GER 102. Elementary German II. 3 Credit Hours.

Continuation of GER 101. Building upon fundamental grammatical principles; exercises to develop a foundation for skills of listening, speaking, reading, and writing; introduction to German culture. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GER 201. Intermediate German I. 3 Credit Hours.

Continuation of GER 102, with special emphasis on essay writing.

Components: LEC.

Grading: GRD.

GER 202. Intermediate German II. 3 Credit Hours.

Integrated grammar, writing, and conversation via content-based instruction. Diverse selection of readings: stories, plays, essays, interviews, other materials. Development of skills in a workshop format.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GER 301. Interpreting Literary And Cultural Texts In German. 3 Credit Hours.

Tools for the interpretation and analysis of literary and cultural materials from the German-speaking world. Acquisition of terminology and theories through the study of the main literary genres (prose, poetry, and drama) and a complementary genre of cultural analysis (e.g., film studies, cultural studies, etc.). Emphasis on critical writing skills.

Prerequisite: GER 212 or equivalent.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

GER 302. The Cultures of the German-Speaking World. 3 Credit Hours.

Historical survey of cultures in areas of the world where German is spoken: arts, letters, science, political and social institutions. Conducted in German. Collateral readings and reports.

Prerequisite: GER 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 310. Ger 310: German Studies in Translation. 3 Credit Hours.

Topics in German literature, philosophy, history, etc. Readings and discussion in English. Development of critical reading and writing skills. Fulfills humanities literature requirement. Writing credit. Does not fulfill foreign language requirement. May not be used for German minor credit. Prerequisite: ENG 106 or equivalent.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

GER 321. Special Topics in German Studies. 3 Credit Hours.

Intensive study of a special topic. May be repeated for credit when topic varies. May be used to fulfill the humanities literature requirement. Writing credit.

Prerequisite: GER 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 365. Twentieth-Century German Studies. 3 Credit Hours.

The second empire and the third Reich, the Weimar Republic, and the two Germanies. Examination of the arts, sciences, letters, and political and social institutions of twentieth-century Germanophone areas. May be used to fulfill the humanities literature requirement. Writing credit.

Prerequisite: GER 301 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 370. The Holocaust in History, Film, and Memorial Culture. 3 Credit Hours.

The course examines the representation of the Holocaust in historiography, film, and memorial culture. Readings will include texts by historians and writers such as Primo Levi, Raul Hilberg, Daniel Goldhagen, James Young and others; films will include, among others, Alain Resnais's NIGHT AND FOG, Claude Lanzmann's SHOAH, and Steven Spielberg's SCHINDLER'S LIST. Reading-and writing-intensive course with reading and discussions in English. In addition to daily/weekly homework assignments, an in-class midterm exam and a final, cumulative take-home exam, students will also complete an extended analytical term paper. Students will also be required to watch films outside of regularly scheduled class hours.

Requisite: Sophomore Status.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 395. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

GER 396. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

GER 397. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

GER 398. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

GER 399. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

GER 400. Advanced German Conversation: Contemporary German Politics & Society. 3 Credit Hours.

This advanced German conversation course provides students with the opportunity to expand and strengthen their oral proficiency and listening comprehension in German through a systematic exploration and guided discussions of current issues in contemporary German politics and society.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

GER 442. Advanced Stylistics and Composition. 3 Credit Hours.

Analysis of grammar and style. Discussion of readings. Intensive writing. Writing credit.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GER 592. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 594. Senior Honors Thesis I. 3 Credit Hours.

Directed research for honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

GER 595. Senior Honors Thesis II. 3 Credit Hours.

Directed writing of honors thesis.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

GER 625. German for Graduate Research. 0 Credit Hours.

Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor.)

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

GER 691. Directed Readings. 1-3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Graduate School (GRD)

GRD 600. Graduate Student Training: Preventing Sexual Harassment and Sexual Violence. 0 Credit Hours.

Components: DIL.

Grading: NON.

Typically Offered: Fall & Spring.

GRD 601. Graduate Student Training: Graduate Teaching Assistant Orientation. 0 Credit Hours.

Components: DIL.

Grading: NOG.

Typically Offered: Fall & Spring.

Greek (GRE)

GRE 101. Elementary Ancient Greek I. 3 Credit Hours.

Alphabet, pronunciation, accentuation, vocabulary, grammar, reading exercises, and written exercises.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GRE 102. Elementary Ancient Greek II. 3 Credit Hours.

Continuation of GRE 101.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GRE 103. Intensive Greek for the New Testament. 3 Credit Hours.

An intensive introduction to the Koine dialect of the New Testament and Septuagint. The course is intended for students with little to no background in Ancient Greek, and covers material similar to that found in the GRE 101 and GRE 102 sequence for Attic Greek. Students leave GRE 103 prepared for GRE 201 and capable of reading extended passages from the New Testament.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 201. Intermediate Ancient Greek I. 3 Credit Hours.

Reading from classical and Hellenistic authors. Building on their knowledge of elementary Greek grammar, students move toward real fluency in reading ancient Greek, and the pleasure of encountering these great authors in their original language.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GRE 202. Intermediate Ancient Greek II. 3 Credit Hours.

Reading Ancient Greek poetry. Students will read selections from Homer's *Odyssey* and *Iliad*, with emphasis on the Homeric dialect, meter, and the oral tradition of these epics. Greek 202 prepares students for 300- and 400-level Ancient Greek poetry courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GRE 300. Sophocles. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GRE 311. Plato. 3 Credit Hours.

Reading of Plato's dialogues and letters with a view to syntax, the acquisition of vocabulary, and Plato's prose style and philosophical thought.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GRE 321. Euripides. 3 Credit Hours.

Readings in the plays of Euripides, with an emphasis on syntax, vocabulary, dramaturgy, and the social role of tragedy in ancient Athenian culture.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GRE 400. Sophocles Antigone. 3 Credit Hours.

This course reads Sophocles' *Antigone* in its entirety in the original Greek. We discuss historical, cultural, and linguistic problems while familiarizing ourselves with some of the main features of the critical reception of this central Greek tragic drama.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GRE 401. Special Topics in Greek Literature. 3 Credit Hours.

This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [This will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 402. Special Topics in Greek Literature. 3 Credit Hours.

This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [this will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 403. Special Topics in Greek Literature. 3 Credit Hours.

This course will address a specific author, topic, or text (appearing as a subtitle) Analogous to REL 404-409 courses. [this will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 404. Special Projects in Ancient Greek Literature & Culture. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle) Analogous to REL 407-409 [this will vary each time the course is offered]

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 405. Special Projects in Ancient Greek Literature and Culture. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 406. Special Projects in Ancient Greek Literature and Culture. 3 Credit Hours.

This course will address a specific project in Classics (appearing as a subtitle). Analogous to REL 407-409.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 408. Supervised Reading in Classical Greek. 3 Credit Hours.

Variable subject matter determined by instructor and student. Analogous to REL 401-403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 409. Supervised Reading in Classical Greek. 3 Credit Hours.

Variable subject matter determined by instructor and student. Analogous to REL 401-403.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 411. Homer. 3 Credit Hours.

Readings from the *Iliad* and/or *Odyssey*.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

GRE 421. Greek Orators. 3 Credit Hours.

Readings from Lysias and Demosthenes.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GRE 422. Aristophanes. 3 Credit Hours.

Readings from Aristophanes' plays in the original Ancient Greek.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

GRE 431. Herodotus. 3 Credit Hours.

Readings in ancient Greek from Herodotus, the "father of history."

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

GRE 491. Directed Readings. 1-3 Credit Hours.

Content to be determined by faculty member and registering student(s).

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

GRE 691. Directed Readings in Latin for Graduate Students. 3 Credit Hours.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

Haitian Creole (HAI)

HAI 101. Elementary Haitian Creole I. 3 Credit Hours.

Development of basic listening, speaking, reading and writing skills; focus on conversation and the grammatical fundamentals of Haitian Creole.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HAI 102. Elementary Haitian Creole II. 3 Credit Hours.

Basic listening, speaking, reading and writing skills developed in Elementary Haitian Creole 101. Students will produce more complex grammatical structures in oral and written presentations, and focus on improvement of pronunciation.

Prerequisite: HAI 101 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HAI 201. Intermediate Haitian Creole I. 3 Credit Hours.

Basic listening, speaking, reading and writing skills developed in Elementary Haitian Creole 102. Continued development of communicative abilities and introduction to the cultural practices, family values, and social and environmental issues of Haiti. Include both oral and written components.

Prerequisite: HAI 102 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HAI 625. Haitian Creole for Graduate Research I. 0 Credit Hours.

Basic listening, speaking, reading, and writing skills; focus on conversation and the grammatical fundamentals of Haitian Creole.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

HAI 626. Haitian Creole for Graduate Research II. 0 Credit Hours.

Continuation of 625 listening, speaking, reading, and writing skills; focus on conversation and the grammatical fundamentals of Haitian Creole.

Prerequisite: HAI 625 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

Healthcare Sciences (HCS)

HCS 202. Introductory Statistics in Health Care. 3 Credit Hours.

Application of descriptive and inferential statistics. Principles and methods of summarizing data including tables, graphs, percentile ranks, central tendency, variability, normal distribution. Basic concepts of probability, hypothesis testing, and analysis of variance. Examples and problems from nursing, health sciences and public health.

Corequisite: MTH 101. Or Requisite: ALEKS > or = 55 or SAT Score > or = 630 or ACT > or = 28.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 207. Introduction to Pharmacology. 3 Credit Hours.

Introduction to the basic principles of therapeutic pharmacology. Special consideration of cultural beliefs and folk medicine included. Emphasis is on the understanding of the different classes of drugs and their application in various health care settings.

Prerequisites: BIL 150, CHM 103 or CHM 111, HCS 212, and HCS 215.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 212. Human Anatomy. 3 Credit Hours.

Emphasis is on the understanding of the anatomical compartments of the human body and the ability to identify the bony skeleton, musculatures, blood vessels and internal organs of each compartment.

Prerequisite: BIL 150.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 213. Human Anatomy Laboratory. 1 Credit Hour.

Laboratory to accompany HCS 212.

Prerequisite: HCS 212. Or Corequisite: HCS 212.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 215. Principles of Systemic Physiology. 3 Credit Hours.

Emphasis is on the understanding of the Physiology and selected Pathophysiology of various organs and systems.

Prerequisites: HCS 212, CHM 111, CHM 113 or CHM 103, CHM 105. Or Corequisites: CHM 111, CHM 113 or CHM 103, CHM 105.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 216. Principles of Systemic Physiology Laboratory. 1 Credit Hour.

Laboratory to accompany HCS 215

Prerequisite: HCS 215. Or Corequisite: HCS 215.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

HCS 352. Biological Principles Of Public Health. 3 Credit Hours.

This course examines the biological basis and pathogenesis of diseases from a public health perspective and describes the impact on populations. This course also presents the basic scientific and biomedical concepts of modern public health problems and explores in depth mechanisms and models of the major categories of disease. The biologic principles presented in this course are foundations to developing and implementing public health disease prevention, control, or management programs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 355. Global Nutrition. 3 Credit Hours.

This course examines nutrition related public health issues in the global setting. Nutrition related morbidity and mortality, etiologic factors, and population-focused strategies to address these issues are covered. Food relief and nutrition policies and programs at the local, national and international levels are examined. Current scientific research in international nutrition is reviewed from an epidemiological perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HCS 402. Global Health Disparities Research. 3 Credit Hours.

This is a 4 week intensive educational experience that prepares students to be successful conducting supervised health disparities research as part of the MHIRT program at a foreign institution, disseminating findings, and applying to graduate school. The training program is broken into a preparation phase (3 weeks prior to leaving to their host country), and a dissemination phase (1 week after they return). Students will be working as a research assistant at a foreign site for eight weeks in between the preparation and dissemination phases of this training program. Students will learn about the influence of culture and healthcare policy on health and health disparities, research design, statistics, communicating research findings and careers in health disparities research.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

HCS 461. Health Disparities Research Practicum. 1-4 Credit Hours.

This course is designed to provide opportunities for students across all levels of higher education to participate in health disparities research. Students will be mentored by a health disparities researcher with an active research project. Objectives will be established by the research mentor and the student according to educational level, interests and opportunities. Students will be incorporated into the research team and expected to attend project meetings. They will also be expected to participate in scholarly work that could contribute to the success of the project. Examples of scholarly work include co-authoring research papers and presentations, developing recruitment materials, assisting in compiling/developing data collection measures, or any other product deemed appropriate by the mentor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HCS 465. Public Health Statistics And Data Management. 3 Credit Hours.

This course is designed to give students an opportunity to apply basic principles of statistics and data management in public health. Students will learn to use statistical techniques to answer questions relating to the morbidity and mortality of health conditions and the efficacy and effectiveness of public health interventions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 487. Global Health Practicum. 3 Credit Hours.

Collaborative clinical venture between UM/SON and an International School of Nursing. Students will exchange supervised western clinical experiences, knowledge and skills for the care of clients and families in specialty areas, including MedSurg, Surgery, ICU and/or Emergency nursing units. Students will apply and synthesize basic science knowledge and skills that foster ethical, legal and culturally specific health care.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HCS 499. Selected Topics. 6.00 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HCS 600. Public Health Information. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

HCS 601. Legal, Ethical And Regulatory Issues In Health Informatics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HCS 603. Healthcare Databases: Design, Development And Clinical Application. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 604. System Life Cycle/Project Management. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 605. Health Information Exchange. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 608. Information Security. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HCS 609. Research Methods And Applications For Health Informatics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

HCS 611. Capstone In Health Informatics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HCS 658. Structure And Processes In Health Care Organization And Health Care Policy. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

Hebrew (HEB)

HEB 101. Elementary Hebrew I. 3 Credit Hours.

Grammatical principles: reading for comprehension and conversation; oral and written exercises. Normally, closed to students who have completed two years of high school Hebrew. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HEB 102. Elementary Hebrew II. 3 Credit Hours.

Continuation of HEB 101. Closed to native speakers.

Prerequisite: HEB 101 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HEB 201. Intermediate Hebrew I. 3 Credit Hours.

Integrated grammar review. Diverse selection of readings: stories, plays, essays, interviews. Practice in speaking and in writing. Class conducted in Hebrew. Closed to native speakers.

Prerequisite: HEB 102 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HEB 202. Intermediate Hebrew II. 3 Credit Hours.

Continuation of 201 with oral presentations, compositions, and grammar review. Class conducted in Hebrew. Closed to native speakers.

Prerequisite: HEB 201 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

History (HIS)

HIS 101. History of the United States, I (to 1877). 3 Credit Hours.

Political, social, and economic development of the United States through Reconstruction.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 102. History of the United States, II (since 1877). 3 Credit Hours.

Political, social, and economic development of the United States since Reconstruction.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 121. Emperors, Shoguns, And Concubines: East Asia, Origins-1800. 3 Credit Hours.

Examines the history of East Asia to 1800.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 122. The Dragon And The Rising Sun: East Asia, 1800-Present. 3 Credit Hours.

Examines the history of East Asia since 1800.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 131. Development of Western Civilization, I. 3 Credit Hours.

A survey of the development of the West from the emergence of the earliest civilizations in Mesopotamia and Egypt to the formation of modern European nation states in the sixteenth and seventeenth centuries, emphasizing the ideas, values, events, and institutions that have influenced the present.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 132. Development of Western Civilization, II. 3 Credit Hours.

A survey of the development of the West from the formation of modern European nation states in the sixteenth and seventeenth centuries to the present, emphasizing the rivalry of European powers, the impact of European expansion, the effect of industrialism and revolution upon Western society, and the role of the New World.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 161. History of Latin America, I (to 1824). 3 Credit Hours.

A survey of Spanish and Portuguese America from the pre-Columbian era through the end of the colonial period.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 162. History of Latin America, II (since 1824). 3 Credit Hours.

A survey of the national period in Latin American history, emphasizing the political and social issues in the transition from colonialism to nationhood.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 192. Studies in History. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 193. Studies in History. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 194. Studies in History. 1-5 Credit Hours.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 200. The Early Modern Mediterranean. 3 Credit Hours.

A thematic overview of the early modern Mediterranean, approximately 1450 -1750. It will consider the characteristics that make each of the civilizations in this region unique while also examining networks of religious, economic, cultural, political, and intellectual exchange.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 201. History of Africa, I (to 1800). 3 Credit Hours.

History of Africa before the Colonial period, emphasizing sources for the study of African history, African political and social institutions, the slave trade, and "legitimate" trade and markets.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 202. History of Africa, II (since 1800). 3 Credit Hours.

The emergence of modern Africa from about 1800 to the present, emphasizing the European conquest of Africa, African responses to colonialism, independence and the post-independence period.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 209. African-American History to 1877. 3 Credit Hours.

History of people of African descent in the United States from African roots to 1877.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 210. African-American History, 1877-PRESENT. 3 Credit Hours.

History of people of African descent in the United States from 1877 to present.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 211. Epics, Gods, Kings: Pre-Mofern India 2500 B.C.E. to 1600 A.D.. 3 Credit Hours.

This course will explore the history, culture and political economy of India tracing it thematically from 2500 B.C.E. to 1600 A.D.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 212. The Mughals And The British (1526-1947). 3 Credit Hours.

A survey of historical India, covering the modern states of India, Pakistan, and Bangladesh, that highlights social and religious identities, modernization, nationalism, the "women question," partition, and independence.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 220. History of European Sexuality. 3 Credit Hours.

The history of European sexuality from the Greeks to the present day.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 223. Medicine And Society: From The Ancient World To The 21St Century. 3 Credit Hours.

Medicine and society presents a historical survey of the development of western medicine and public health from the earliest times to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 225. History of the Modern Business Enterprise. 3 Credit Hours.

This course examines the history of big business in the nineteenth and twentieth centuries. Drawing often on individual firm histories, its focus will be a comparative study of the big business experience in America, Europe, Asia, and the imperial world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 226. The World in the Twentieth Century. 3 Credit Hours.

Survey of twentieth century international history with a focus on the main political, social, and economic trends.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 227. Nationalism: Love Thy Brother, Hate Thy Neighbor?. 3 Credit Hours.

This lower-division lecture course will offer an introductory thematic overview to the ideas and politics of nationalism throughout the globe.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 228. Holy War and Toleration in Western Religious Traditions. 3 Credit Hours.

An exploration of concepts of Holy War and Just War and of traditions of tolerance and intolerance in Judaism, Christianity, and Islam, from ancient times to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 229. Consumer Society: A Global History. 3 Credit Hours.

In the United States we are surrounded today with a seemingly limitless variety of consumer goods, and we are offered constant reminders of the increasingly globalized nature of modern life. Too often, however, such commentary reflects a shocking lack of perspective about the origins and evolution of these trends. This course encourages a deeper understanding by exploring the history of how consumer societies emerged across the world. Spanning an arc from the eighteenth century to the present, the course looks at the social and cultural impact of global consumables (ranging from food to automobiles) in the Americas, Europe, Asia, and other regions. The readings and lectures consider the social, ethical, and environmental problems associated with the rise of global consumption.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 240. Europe's Great Revolutions: A Comparative Study of the Eng French Russian Revolutions. 3 Credit Hours.

This course examines and compares the three revolutions that have shaped the modern Western world: The Puritan Revolt in 17th-century England, the French Revolution of 1789, and the Russian (Communist) Revolution of 1917. Each of these events was of course historically distinct, but there are discernible parallels as well. This course explores their intellectual, social, economic, and political causes and consequence in a comparative context.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HIS 246. Origins and History of the Russian Revolution. 3 Credit Hours.

The background and events of the Russian Revolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 253. History of Mexico: Guns and Tortillas, or, How Mexico Became Mexican. 3 Credit Hours.

Culture and ideology of the Mexican Revolution.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 254. History of the Cold War in the Americas.. 3 Credit Hours.

Focusing on the late 1940s to late 1980s, this course examines the origins, evolution, and enduring consequences of the Cold War in the Americas. It explores key issues such as the emergence of new nationalist currents, the impact of U.S. intervention, competing visions of revolution and counter-revolution, and shifting definitions of democracy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 261. Women's America I (Nineteenth Century). 3 Credit Hours.

An introduction to the major currents in American women's history during the Nineteenth Century.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 262. Women's America II (Twentieth Century). 3 Credit Hours.

An introduction to the major currents in American women's history during the Twentieth Century.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 265. Witchcraft in Colonial America. 3 Credit Hours.

Exploration of witch beliefs and witch-hunting in colonial America, incorporating religious, cultural, gendered, psychological, political, legal, social, and economic perspectives.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 266. The Founders: Fact And Fiction. 3 Credit Hours.

Explores the history of the American founders.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 267. Objects in History: The Material Culture of Early America. 3 Credit Hours.

What material culture objects, architecture, and landscape can tell us about the lives of people in the past. Our focus is on the early period of American history, and we will work with objects in Richter Library's Special Collections and the Lowe Art Museum, as well as visit museums in greater Miami, to enrich our studies.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 271. American Political History Since 1960: Policy , Public History, and Modern Media. 3 Credit Hours.

Explores selective elements of modern American politics, policy studies, media, and public history, predominantly since 1960.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 282. The History of Zionism. 3 Credit Hours.

The religious, cultural, historical, political and social underpinnings of the development of Zionism that led to the creation of the State of Israel.

Through readings, analysis of speeches and essays, exploration of films and the internet, the class will move through time from the origins of the Zionist idea to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 284. The Second World War.. 3 Credit Hours.

The Second World War: Analysis of its origins, the military and political course of events, and its consequences, such as the cold war.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 285. The origins and history of the Third Reich.. 3 Credit Hours.

This lecture course offers a comprehensive survey of the history of Nazi Germany from early pre-fascist movements before World War I to the final ignominious collapse of the Nazi regime in 1945.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 290. The Beach: The Beach as Place, Space and Event in World Historical Context. 3 Credit Hours.

History of the beach as a particular geographic place and space in human history in comparative world context. Themes and issues include tourism, socio-economic factors in beach access, beach-related industries, immigration, cultural contact, exploration, "beach life," surfing, ethnicity, segregation, and politics of real estate.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 291. The Sea In History. 3 Credit Hours.

Human relations with the sea from prehistoric times to the present and across the globe. It will look at the spread of peoples, ideas, religions, and goods across the seas, and the role of networks, empires and navies in this history.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 292. Transfer Credits. 1-5 Credit Hours.

Courses for which there is no direct equivalent.

Components: LEC.

Grading: GRD.

HIS 293. Transfer Credits. 1-5 Credit Hours.

Courses for which there is no direct equivalent.

Components: LEC.

Grading: GRD.

HIS 294. Transfer Credits. 1-5 Credit Hours.

Courses for which there is no direct equivalent.

Components: LEC.

Grading: GRD.

HIS 296. Special Topics. 3 Credit Hours.

Content varies by semester and is indicated parenthetically following course title in class schedules.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

HIS 297. History Internship. 3 Credit Hours.

Provides history students with the opportunity to obtain credit for an internship with the approval and under the close supervision of a faculty member.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 300. World War I in the Middle East, 1911-1923. 3 Credit Hours.

This class will cover the period between the Young Turk Revolution in 1908 and the demise of the Ottoman Empire in the early 1920s. The course will analyze the violence associated with the breakdown of imperial rule during World War I and will conclude with a discussion of the legacies of Ottoman rule in Anatolia, the Balkans, and the Arab provinces.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 303. Ancient Egypt. 3 Credit Hours.

History of Egypt from unification (ca. 3100 B.C.) until the conquest by Alexander the Great (323 B.C.). Prerequisite: Three credits in history.

Components: LEC.

Grading: GRD.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HIS 355. Modern Brazil. 3 Credit Hours.

The history and culture of modern Brazil.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 356. History of Argentina's Civilization, Barbarism, and Power.. 3 Credit Hours.

How did a country that was supposedly so prosperous and advanced become a land of perennial crisis? Countless observers have posed variations on this question in seeking to make sense of the "Argentine riddle." This class will provide students with an introduction to the fascinating history of Argentina. We will reject pat explanations of the "riddle" to examine instead the array of cultural, political, and economic forces that have shaped Argentine society.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 357. Social History of Latin America. 3 Credit Hours.

Demographic changes, race and ethnic relations, immigration, and urbanization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 358. Gender and Sexuality in Latin America. 3 Credit Hours.

Latin American History from colonial times to the present day using gender as a central category of historical analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 359. Caribbean Intellectual History. 3 Credit Hours.

Nineteenth and twentieth-century Caribbean political and social thought. Connects the history of ideas to the history of social movements in the region. Links international, intellectual, political and artistic currents.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

HIS 360. Modern Latin America Through Film. 3 Credit Hours.

Analysis of films with regard to their historical value and their impact on forming historical perceptions about modern Latin America.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 361. American Colonial History (1607-1763). 3 Credit Hours.

History of the British mainland colonies from the establishment of Jamestown to the end of the French and Indian War.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 362. The American Revolution (1763-1783). 3 Credit Hours.

The political, social, and constitutional issues that culminated in the Declaration of Independence, and the achievement of American nationhood.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Courses taken at other institutions with no direct equivalents.

Components: LEC.

Grading: GRD.

HIS 595. Studies in Visual History. 3 Credit Hours.

Selected topics in the use of photographs and other visual evidence for historical purposes. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 599. Independent Research. 3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 602. Studies in African History. 3 Credit Hours.

Selected topics in African history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 611. Studies in Asian History. 3 Credit Hours.

Selected topics in Asian history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 632. Studies in European History. 3 Credit Hours.

Selected topics in European history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 633. Seminar in European History. 3 Credit Hours.

Selected topics in European History.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 634. Seminar in Ancient History. 3 Credit Hours.

Selected topics in Ancient History.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 636. Studies in Medieval History. 3 Credit Hours.

Selected topics in Medieval history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 638. Studies in Early Modern European History. 3 Credit Hours.

Selected topics in European history before the French Revolution. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 641. Field Preparation: Colonial Latin America. 3 Credit Hours.

An introduction to central historical issues and historiographical debates in the field of Colonial Latin America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 646. Studies In Modern European History. 3 Credit Hours.

Selected topics in European history after the French Revolution. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 652. Studies in Latin American History. 3 Credit Hours.

Selected topics in Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 654. Studies in Modern Latin American History. 3 Credit Hours.

Selected topics in Latin-American history before and after Independence. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 655. Studies in Colonial Latin American History. 3 Credit Hours.

Selected topics in the colonial period of Latin-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 662. Studies in United States History. 3 Credit Hours.

Selected topics in United States history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 664. Studies in American Intellectual and Cultural History. 3 Credit Hours.

Selected topics in American intellectual and cultural history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 665. Studies in American Political and Diplomatic History. 3 Credit Hours.

Selected topics in American political and diplomatic history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 669. Studies In African-American History. 3 Credit Hours.

Selected topics in African-American history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 670. Studies in Public History. 3 Credit Hours.

Selected topics in public history. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 697. Studies in Visual History. 3 Credit Hours.

Selected topics in the use of photographs and other visual evidence for historical purposes. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 701. Seminar in Comparative History. 3 Credit Hours.

Selected topics in Comparative History.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 702. Seminar in Comparative History. 3 Credit Hours.

Selected topics in Comparative History.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 703. Directed Readings in African History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 704. Directed Readings in Asian History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 705. Directed Readings in European History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 706. Directed Readings In Latin-American History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 707. Directed Readings in American History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 708. Directed Readings in Comparative History. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 709. Field Preparation: Colonial and Revolutionary America. 3 Credit Hours.

An introduction to central historical issues and historiographical debates in the field of Colonial and Revolutionary America.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 712. Field Preparation: Modern America. 3 Credit Hours.

An introduction to central historical issues and historiographical debates in the field of Modern America.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 713. Field Preparation: Medieval Europe. 3 Credit Hours.

The central historical issues and historiographical debates in the field of Medieval European History.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

HIS 714. Field Preparation: Early Modern Europe. 3 Credit Hours.

An introduction to central historical issues and historiographical debates in the field of Early Modern Europe.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 718. Field Preparation: Modern Latin America. 3 Credit Hours.

An introduction to central historical issues and historiographical debates in the field of Modern Latin America.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 721. Historiography. 3 Credit Hours.

The philosophy, theory, and practice of history.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 760. Seminar in Latin-American History. 3 Credit Hours.

Selected topics in Latin-American History.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 761. Seminar in United States History. 3 Credit Hours.

Selected topics in United States History.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

HIS 762. History as a Profession. 3 Credit Hours.

Practical experience for graduate students in designing courses; preparing lectures, conference papers and scholarly publications; and in applying for jobs and research grants

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

HIS 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in HIS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

HIS 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor, but for not less than a total of 12 hours. Up to 12 hours may be taken in a regular semester, but not more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

HIS 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of HIS 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

HIS 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

Honors and Academic Enhancement (HON)

HON 323. Topics in Humanities. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

HON 330. Books That Matter. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HON 333. Topics in Social Science. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

HON 351. Topics In The Natural Sciences. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

Human Genetics and Genomics (HGG)

HGG 601. Seminar/Journal Club. 1 Credit Hour.

All registered students must participate in the Seminar/Journal Club. Students are required to review published papers and discuss in detail the findings described therein.

Components: SEM.

Grading: SUS.

Typically Offered: Fall & Spring.

HGG 621. Fundamentals Of Genetic Epidemiology. 3 Credit Hours.

This class is a survey of introductory topics in genetic epidemiology and statistical genetics. Basic concepts and methods will be covered including introduction to genetic linkage and genetic association including candidate gene analysis and genome-wide studies, gene-environment interactions, quantitative trait analysis, and rare variant analysis. The course will consist of a combination of lectures and computational laboratory assignments, with some discussion from the primary scientific literature. There will be several lab assignments (requiring use of laptops), one exam, and two in-class paper discussions. Details on the assignments will be posted to BlackBoard.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HGG 630. Variation and Disease. 2 Credit Hours.

This course provides an overview of the science of genetics, including historical and modern approaches, with emphasis on the underlying mechanisms of human genomic variation and their relation to human disease. After taking this course the student will be able to list the different types of human genomic variation, explain the mechanism by which each occurs, and discuss the consequences of the variation. Where appropriate, specific examples of human disorders will be related to the variation. Topics include: chromosomal, biochemical, and DNA sequence variation, mitochondrial genome variation and epigenetic effects. The course structure consists of a combination of lectures and discussion of primary literature.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HGG 631. Genes in Populations. 3 Credit Hours.

The course explores the relevant history and principals governing the behavior of genes in human populations. Topics include Hardy-Weinberg equilibrium; Mendelian, complex and quantitative traits; principals of selection and change in populations, neutral theory; and molecular evolution of gene families. The course is lecture based with supplemental readings.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

HGG 640. Family Studies and Genetic Analysis. 2 Credit Hours.

This course will cover the analysis of genetic data in family based data sets. Topics include: heritability, segregation analysis and linkage analysis. This course includes a computer lab component in which students will learn to use the relevant analytic programs.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HGG 650. Advanced Topics in Molecular Genetics. 3 Credit Hours.

Topics include human microRNAs, the neurobiology of aging, structural variation, modern genome technology, among others. The course structure consists of discussions and analysis of primary literature.

Components: LEC.

Grading: SUS.

Typically Offered: Spring.

HGG 660. Bioinformatics Theory and Practice. 3 Credit Hours.

This course covers a gradient of basic to advanced bioinformatics theory, data mining, and analysis. Each class will include a lecture to explain the concepts, followed by a hands-on lab session with worksheets and exercises. Early lectures will cover in-depth searching of the major databases, alignments, and motif discovery. These themes will recur with the applications of these and other algorithms to gene expression analysis, next generation sequencing data and its analysis, and analysis of variation. Freely available web resources will be used wherever possible, and the students will learn how to use perl for some bioinformatics applications.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

HGG 680. Genome Ethics and Public Policy. 3 Credit Hours.

This course explores current and future applications of human genetics as they pertain to the health and identity of individuals and society. Topics to be covered will include the science of genetic testing, the ethical, legal and social issues related to such testing, living with a genetic diagnosis, the factors influencing the use of human genetic information, and evolving direct-to-consumer genetic testing services. The emphasis will be on real life examples and experiences, with a primary goal of helping students explore how their life, and the society in which we live, will be affected by genetic information. Policy themes include: the role of society in regulating the use of genetic testing and genetic information, implications of genetic testing for people with disabilities, role of the media in public genetic education, legal issues associated with the use of genetic information (e.g. discrimination, duty to warn, wrongful birth), and the role of eugenics in today's society.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

HGG 681. Human Genetics Clinical Rotation. 1 Credit Hour.

The HGG graduate students participate in medical genetics clinic post clinical rounds, metabolic-sign out and journal clubs. During clinic students observe clinical evaluations and counseling, and participate in weekly didactic sessions with faculty and residents.

Components: CLN.

Grading: SUS.

Typically Offered: Fall & Spring.

HGG 689. Human Genetics and Genomics Teaching Practicum. 1 Credit Hour.

HGG students serve one semester as a teaching assistant for a core course. This experience will include giving at least one lecture, leading small group discussions, and holding regular office hours to discuss student questions. This will generally take place in the student's third or fourth year, and will be graded as a one-credit pass-fail course.

Components: PRA.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

HGG 830. Doctoral Dissertation- Pre Candidacy.. 1-12 Credit Hours.

1 - 12 credit course for Doctoral candidates working on pre-candidacy dissertation.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

HGG 840. Doctoral Dissertation - Post Candidacy. 1-12 Credit Hours.

1-12 credit course for Doctoral Candidates working on dissertation post candidacy.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

HGG 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for Ph.D, after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Industrial Engineering (IEN)

IEN 111. Introduction to Engineering I. 3 Credit Hours.

Use of engineering tools and computer techniques for problem solving, data acquisition, analysis, presentation, software design, and computer aided drafting. Development of design skills through several design and building competitions. Introduction to professional ethics, intellectual property, ethics, intellectual property rights, and an introduction to use of MATLAB, AutoCAD, and programming in C++.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 112. Introduction to Engineering II. 2 Credit Hours.

Continuation of IEN 111. An overview of Industrial Engineering concepts and issues important to the design and operation of industrial and service systems. Students will learn the use of software tools developed to enhance the Industrial Engineer's ability such as database management, high level programming languages, electronic spreadsheets, and computer graphics.

Prerequisite: IEN 111.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 201. Methods Analysis and Work Measurement. 3 Credit Hours.

Design of improved methods for doing work based on effective human effort. Time standardization of productive operations by work measurement, predetermined time systems, and activity sampling are discussed. Tools and charts for methods analysis are discussed and use of Microsoft Vision is emphasized and reviewed.

Prerequisite: IEN 111.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 306. Manufacturing Processes. 3 Credit Hours.

Basic and applied sciences in processing of materials. Effects of processing on the manufactured parts, selection of processing methods, and their relation with material properties. Contemporary and non-traditional processes used in manufacturing are also covered.

Prerequisite: CHM 111 or CHM 151, PHY 205.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 310. Introduction to Engineering Probability. 3 Credit Hours.

Axioms of probability, discrete and continuous random variables, probability density functions, cumulative distribution function, expectation, conditioning, independence, functions of random variables, multiple random variables, sums of random variables, introduction to statistical analysis, estimation, and hypothesis testing. Cross-listed with EEN 310.

Prerequisite: MTH 162 or equivalent. Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 311. Applied Probability And Statistics. 3 Credit Hours.

This course covers fundamental probability concepts, random variables, mathematical expectation, discrete and continuous probability distributions, sampling distributions, point and interval estimation, hypothesis testing, and simple linear regression and correlation. The use of Minitab, a statistical software application, is emphasized. Examples are drawn from various disciplines.

Prerequisite: MTH 162 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 312. Applied Statistical Methods. 3 Credit Hours.

Linear regression, multiple regression, analysis of variance, and design of experiments are discussed. Cross-listed with MAS 312.

Prerequisite: IEN 310 or ECE 310 or IEN 311 or MAS 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 351. Industrial Safety Engineering. 3 Credit Hours.

Basic principles of accident prevention and safety engineering approach to the design of mechanical equipment, facilities, and manufacturing processes. Analysis and design of fire prevention procedures and accident control procedures in industry are included.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 360. Productivity Engineering. 3 Credit Hours.

Definitions and scope of productivity engineering and management. The productivity cycle. Productivity measurement, evaluation, improvement-discussion and examples. Productivity planning and improvement through the application of industrial and systems engineering techniques. Discussion of individual techniques with examples.

Application potential of the course in real life situations.

Prerequisite: MTH 162 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 361. Industrial Cost Analysis. 3 Credit Hours.

Analysis of financial statements and cost factors in manufacturing and service systems. Cost accounting methods, job order costing and process costing approaches. Deterministic and probabilistic estimates of cost.

Prerequisite: MTH 162 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 363. Project Management for Engineers. 3 Credit Hours.

This course will help students develop a basic understanding of the key concepts, theories, tools, and methodologies of project management. Students will be introduced to the different phases of managing projects from conception to termination with particular emphasis on planning, scheduling, resource allocation, monitoring and control. The course will utilize a case-study-based approach in analyzing the techniques and methods of project management.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 372. Emerging Technologies And The Creation Of Technological Innovations. 3 Credit Hours.

A variety of emerging technologies will be discussed (nanotechnology, energy technologies, information technologies, biotechnologies, etc). The process of utilization in innovations will be covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

 IEN 380. Engineering Economy. 3 Credit Hours.

Engineering Economy Fundamentals. Interest and money-time relationship, methods of making economic decisions, risk and uncertainty, sensitivity analysis, selections among multiple alternatives, depreciation, benefit-cost analysis, replacement studies, minimum cost analysis, and related topics.

Prerequisite: MTH 162 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

 IEN 399. Internship. 1 Credit Hour.

Practical application of classroom theory through employment with firms offering positions consistent with the student's field of study. Course may be repeated.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

 IEN 406. Computer-Aided Manufacturing. 3 Credit Hours.

A comprehensive view of manufacturing with a focus on design, automation, and the use of computers in manufacturing. The topics include computer-aided design, communications, programmable logic controllers, CNC machining, industrial robots, process planning, and computer-integrated manufacturing. Laboratory projects are an integral part of the course.

Prerequisite: CHM 111 or CHM 151, PHY 205.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 407. Product Design for Manufacturing. 3 Credit Hours.

The different phases of engineering design process. Guided Iteration Methodology for product design. Topics include design for manufacturing (DFM), best practices of product realization, solid modeling using SolidWorks, quality in design, issues in patents, liability and ethics. Engineering design specifications, evaluation methods for design alternatives.

Prerequisite: IEN 406.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 441. Deterministic Models in Operations Research. 3 Credit Hours.

Introduction to deterministic mathematical models with applications to operational problems. Topics include the methodology of operations research, mathematical programming, game theory, network flow-theory, and dynamic programming. Cross-listed with MAS 441.

Prerequisite: MTH 210.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

 IEN 442. Stochastic Models in Operations Research. 3 Credit Hours.

Probabilistic models in operations research. Topics include probabilistic inventory models, queuing theory, Markov chains, and probabilistic dynamic programming. Cross-listed with MAS 442.

Prerequisites: IEN 310 or ECE 310 or IEN 311 or MAS 311, IEN 441 or MAS 441.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

 IEN 465. Production and Inventory Control. 3 Credit Hours.

Production and inventory management techniques such as forecasting methods, inventory control subject to both known and uncertain demand, aggregate planning, introduction to scheduling, materials requirement planning (MRP), just-in-time (JIT) manufacturing, and introduction to scheduling are covered.

Prerequisite: IEN 310 or ECE 310 or IEN 311 or MAS 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

 IEN 494. Senior Project. 3.00 Credit Hours.

Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems. Course includes preparation of project proposal, data collection, analysis, reporting, and formal presentations.

Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

 IEN 501. Manufacturing Analysis and Design I. 3 Credit Hours.

Analysis of Production Systems stressing diagnosis of problems associated with work measurement, manufacturing methodologies, and their interaction with cost factors.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 502. Manufacturing Analysis and Design II. 3 Credit Hours.

Analysis of production systems stressing diagnosis of problems of quality and production control, utilizing quantitative techniques and analytical methods.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 505. Robotics. 3 Credit Hours.

Fundamentals of robotics including kinematics and dynamics, trajectory planning, sensors and actuators, robotic vision, and case studies.

Building your own robot is an integral part of hands-on laboratory exercises. Matlab control toolbox and image analysis toolbox will be extensively used for design and analysis.

Prerequisite: IEN 406.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 507. Design of Manufacturing Systems. 3 Credit Hours.

State-of-the-art techniques and tools relevant to the design, analysis, and control of modern manufacturing systems. Topics include modeling of manufacturing systems, tools for manufacturing system analysis, manufacturing system planning and scheduling, and lean manufacturing systems.

Prerequisite: IEN 465 or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 509. Automated Assembly. 3 Credit Hours.

Fundamentals of automated assembly including parts transfer systems and feeders, parts orientation and grasping techniques, product design for automated assembly (DFA), assembly robots, and performance and economics of assembly systems.

Prerequisite: IEN 406.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 512. Statistical Quality Control and Quality Management. 3 Credit Hours.

This course addresses the concepts, theories, tools and methodologies employed in the management and improvement of quality. The course examines many of the advance topics in statistical quality control including control charts and process capability studies, acceptance sampling, as well as Quality Function Deployment (QFD) and introduction to reliability. Also covered in the course are Lean Six Sigma methodology, tools and concepts.

Prerequisite: IEN 311 or MAS 311 or IEN 312 or MAS 312.

Components: THI.

Grading: GRD.

Typically Offered: Spring.

IEN 513. Quality Management in Service Organizations. 3 Credit Hours.

Course examines the issues of quality and productivity management in the service sector. Topics covered include the development and use of questionnaires, service industry applications of quality such as in banking, insurance, healthcare, transportation, government, public utilities, and retail trade.

Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 524. Decision Support Systems in Industrial Engineering. 3 Credit Hours.

Theory and application of decision support systems in industrial engineering. Topics include the study of model-based, data-based, knowledge-based, and communication-based decision support systems. Emphasis is placed on the selection process of the appropriate systems for various decision problems in industrial environments.

Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 547. Computer Simulation Systems. 3 Credit Hours.

Computer simulation and the development of simulation models. Application of discrete and continuous system simulation languages to systems studies is also included.

Prerequisites: IEN 442, MAS 442 or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 551. Accident Prevention Systems. 3 Credit Hours.

Introduction to the basic principles of accident prevention and how to apply the safety engineering approach to the design of industrial accident prevention systems.

Prerequisite: IEN 351 or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 557. Ergonomics And Human Factors Engineering. 3 Credit Hours.

The study of human capacities and limitations with emphasis on human performance in system design. Topics include design of displays and controls, workload, job design, human information processing, anthropometry, workplace design, biomechanics, task analysis, and research techniques in human factors engineering. Lecture, 3 hours.

Prerequisite: IEN 312 or MAS 312 or Permission of Instructor.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Summer.

IEN 558. Industrial Hygiene I. 3 Credit Hours.

Recognition of occupational chemical health hazards. Evaluation methods and analytical procedures used to determine level of exposure to chemical and toxic hazards. Control measures and compliance with OSHA requirements with special emphasis on industrial ventilation, and other methods of control are included.

Prerequisites: CHM 111 or CHM 151. Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 559. Industrial Hygiene II. 3 Credit Hours.

Recognition of physical occupational health hazards and evaluation methods and instruments used in measuring exposure levels with special emphasis on physical hazards. Protective measures and compliance with OSHA requirements is also included. Lecture, 3 hours.

Prerequisites: CHM 111 or CHM 151. Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 568. Materials Handling and Facilities Planning. 3 Credit Hours.

Analysis and design of production and service facilities, emphasis on material handling requirements. Capacity requirements, facility location, layout, storage systems and warehousing are discussed.

Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 570. Engineering Management. 3 Credit Hours.

Integrating engineering discipline into the social and economic considerations of managing systems. Tools and techniques used by engineering managers including engineering project life cycle, role playing, communication, decision-making in engineering management, and managing change in engineering organizations are discussed.

Prerequisite: IEN 311 or MAS 311 or IEN 312 or MAS 312 or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 571. Engineering Entrepreneurship. 3 Credit Hours.

The conversion of technological know-how and engineering theories into business enterprises. The role of technology in creating wealth, connecting technology with market, the role and characteristics of entrepreneurs, starting a business and the business plan, innovation, industrial and service organizations, and the new business environment.

Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 572. Management of Technological Innovation. 3 Credit Hours.

Engineering, Science and Management Principles contributing to the development of a successful framework for Managing technology with an organization, nationally or internationally. The process of technological innovations, technological planning and forecasting, and socio-economic changes. Prerequisite: Senior or graduate standing.

Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

IEN 590. Special Topics in Industrial Engineering. 1-3 Credit Hours.

Sub-titles describing the topics are shown in parentheses in the class schedule, following the title "Special Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 594. Master's Capstone Design Project. 3.00 Credit Hours.

A capstone design project for students in the five-year BSIE/MSIE program. Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems is emphasized. Offered for students in this program only.

Prerequisite: IEN 547. Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 595. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 596. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 599. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 601. Manufacturing Analysis and Design I. 3 Credit Hours.

Analysis of Production Systems stressing diagnosis of problems associated with work measurement, manufacturing methodologies, and their interaction with cost factors.

Prerequisite: IEN 301 or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 602. Manufacturing Analysis and Design II. 3 Credit Hours.

Analysis of production systems stressing diagnosis of problems of quality and production control, utilizing quantitative techniques and analytical methods.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 605. Robotics. 3 Credit Hours.

Fundamentals of robotics including kinematics and dynamics, trajectory planning, sensors and actuators, robotic vision, and case studies.

Building your own robot is an integral part of hands-on laboratory exercises. Matlab control toolbox and image analysis toolbox will be extensively used for design and analysis.

Components: LEC.

Grading: GRD.

IEN 607. Design of Manufacturing Systems. 3 Credit Hours.

State-of-the-art techniques and tools relevant to the design, analysis, and control of modern manufacturing systems. Topics include modeling of manufacturing systems, tools for manufacturing system analysis, manufacturing system planning and scheduling, and lean manufacturing systems.

Requisite: Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 612. Statistical Quality Control and Quality Management. 3 Credit Hours.

This course addresses the concepts, theories, tools and methodologies employed in the management and improvement of quality. The course examines many of the advance topics in statistical quality control including control charts and process capability studies, acceptance sampling, as well as Quality Function Deployment (QFD) and introduction to reliability. Also covered in the course are Lean Six Sigma methodology, tools and concepts.

Prerequisite: IEN 311 or MAS 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 613. Quality Management in Service Organizations. 3 Credit Hours.

Course examines the issues of quality and productivity management in the service sector. Topics covered include the development and use of questionnaires, service industry applications of quality such as in banking, insurance, healthcare, transportation, government, public utilities, and retail trade.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 624. Decision Support Systems in Industrial Engineering. 3 Credit Hours.

Theory and application of decision support systems in industrial engineering. Topics include the study of model-based, data-based, knowledge-based, and communication-based decision support systems. Emphasis is placed on the selection process of the appropriate systems for various decision problems in industrial environments.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 647. Computer Simulation Systems. 3 Credit Hours.

Computer simulation and the development of simulation models.

Application of discrete and continuous system simulation languages to systems studies is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 651. Accident Prevention Systems. 3 Credit Hours.

Introduction to the basic principles of accident prevention and how to apply the safety engineering approach to the design of industrial accident prevention systems

Prerequisites: IEN 311, IEN 351.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 657. Ergonomics And Human Factors Engineering. 3 Credit Hours.

The study of human capacities and limitations with emphasis on human performance in system design. Topics include design of displays and controls, workload, job design, human information processing, anthropometry, workplace design, biomechanics, task analysis, and research techniques in human factors engineering. Lecture, 3 hours.

Requisite: Graduate Status.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Summer.

IEN 658. Industrial Hygiene I. 3 Credit Hours.

Recognition of occupational chemical health hazards. Evaluation methods and analytical procedures used to determine level of exposure to chemical and toxic hazards. Control measures and compliance with OSHA requirements with special emphasis on industrial ventilation, and other methods of control are included.

Prerequisite: IEN 557.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 670. Engineering Management. 3 Credit Hours.

Integrating engineering discipline into the social and economic considerations of managing systems. Tools and techniques used by engineering managers including engineering project life cycle, role playing, communication, decision-making in engineering management, and managing change in engineering organizations are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 671. Engineering Entrepreneurship. 3 Credit Hours.

The conversion of technological know-how and engineering theories into business enterprises. The role of technology in creating wealth, connecting technology with market, the role and characteristics of entrepreneurs, starting a business and the business plan, innovation, industrial and service organizations, and the new business environment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEEN 672. Management of Technological Innovation. 3 Credit Hours.

Engineering, Science and Management Principles contributing to the development of a successful framework for Managing technology with an organization, nationally or internationally. The process of technological innovations, technological planning and forecasting, and socio-economic changes. Prerequisite: Senior or graduate standing. Prerequisite: IEN 572 or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

IEEN 690. Special Topics in Industrial Engineering. 3 Credit Hours.

Sub-titles describing the topics are shown in parentheses in the class schedule, following the title "Special Topics".

Components: LEC.

Grading: GRD.

IEEN 694. Master's Capstone Design Project. 3.00 Credit Hours.

A capstone design project for students in the five-year BSIE/MSIE program. Integration of Industrial Engineering principles and techniques in the design and improvement of production and service systems is emphasized. Offered for students in this program only.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEEN 695. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEEN 696. Special Problems. 1-3 Credit Hours.

Project course introducing methods of research through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEEN 699. Cooperative Education. 1 Credit Hour.

Practical application of classroom theory through alternating semester or summer employment with industries offering positions consistent with the student's field of study. Course may be repeated. Periodic reports and conferences are required.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEEN 712. Design of Experiments. 3 Credit Hours.

Design and analysis of experiments, randomized blocks, Latin Squares, factorials, multiple correlation and regression, and application to response surfaces are discussed. 3 hours.

Prerequisite: IEN 311 or MAS 311 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEEN 713. Applied Regression Analysis. 3 Credit Hours.

Theory and applications of regression based models. Focus will be on empirical model building, estimation, inference and prediction with emphasis on interpretation of results and understanding model assumptions. Key Topics will be linear regression, panel data and time series analysis.

Prerequisite: IEN 311 or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEEN 715. Quality Through Planned Experimentation. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEEN 716. Advanced Quality Control. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEEN 742. Linear Programming and Extensions. 3 Credit Hours.

Formulation, solution, postoptimality analysis of linear programming problems; revised simplex, parametric programming, decomposition of large-scale systems. Use of computer packages. Introduction to integer programming, network flows, and nonlinear programming applications.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEEN 757. Ergonomics and Occupational Biomechanics. 3 Credit Hours.

Effects of human factors in the improvement of performance of systems. Human capacities, capabilities, and limitations as derived from anatomical, physiological, and psychological principles are applied to the design of tools and equipment. Incorporation of all factors into systems design to achieve better system performance is emphasized.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEEN 758. Ergonomics and Special Populations. 3 Credit Hours.

Ergonomic issues relevant to design for older adults and special populations such as the handicapped. Primary emphasis is placed on work environments, transportation and communication systems, and home environments. Topics include cognitive and physiological characteristics of special populations, workplace design, job and equipment design, rehabilitation engineering, clinical ergonomics, and legislation such as the ADA. Lecture, 3 hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEEN 760. Productivity Measurement and Evaluation. 3 Credit Hours.

Basic concepts. Productivity measurement approaches at international, national, industry, and company levels. Latest measurement models for manufacturing companies. Relationships between total and partial productivities, profit and total productivity. Productivity evaluation: theory and methodology.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 761. Engineering Cost Management. 3 Credit Hours.

Issues of cost management, including activity based costing of engineering projects. A detailed study of how to separate, identify, understand and manage the major activities performed, and how these activities relate to customer needs. Overall view of costs associated with products, processes, and customers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 763. Project Management Techniques. 3 Credit Hours.

Techniques and Tools in Project Management. Use of network flow techniques including PERT/CPM, planning, systems concepts, time management, conflicts, cost and resource control, tradeoff analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

IEN 764. Supply Chain Management. 3 Credit Hours.

Supply Chain Management focuses on the flow of products, information, and money throughout the supply chain. An overview of issues, opportunities, tools, and approaches is provided. Emphasis is placed on business processes, system dynamics, control, design and re-engineering, and on the relationship between the supply chain and the company's strategic position relative to its clients and its competition. The dimensions of inter-corporate relationships with partners, including decision-making, incentives, and risk are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 765. Advanced Production Systems. 3 Credit Hours.

Quantitative, heuristic and computer methods applied to problems of production planning, work force balancing and capacity expansion. Sequencing and scheduling models. Advanced Material Requirements Planning (MRP II). Just In Time production systems (JIT). Master Production Scheduling (MPS). Optimize Production Technology (OPT). KANBAN production planning system. Learning curve theory. Advanced forecasting and time-series analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 772. Strategic Management of Technological Innovation.. 3 Credit Hours.

Advanced topics in the management of technology emphasizing the relationship between technology and competitiveness in the global marketplace. Technology development in the U.S., Japan, and Europe, industrial R & D, strategic technological planning, and conditions for successful implementations. Case studies are used with individual and group assignments. Prerequisite: IEN 572 - Management of Technology or permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 791. Industrial Engineering Seminar. 0 Credit Hours.

Oral presentation and discussion of current topics in Industrial Engineering.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

IEN 794. Master's Project. 3 Credit Hours.

A capstone project for M.S. students in the non-thesis option.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

IEN 795. Special Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation of current problems. Offered by special arrangement only.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 796. Special Problems. 1-3 Credit Hours.

Research and/or design projects through an individual investigation. of current problems. Offered by special arrangement only.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 799. Advanced Topics. 1-3 Credit Hours.

Subject matter offerings based upon student demand and availability of faculty. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title "Advanced Topics".

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

IEN 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

IEN 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in IEN 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEN 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEN 830. Pre-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken prior to Ph.D. student's candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 hours of IEN 730 may be taken in a regular semester, nor more than six in a summer session. n six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

IEN 840. Post-Candidacy Doctoral Dissertation. 1-12 Credit Hours.

Doctoral dissertation credits taken after Ph.D. student has been admitted to candidacy. The student will enroll for credit as determined by his/her advisor. Not more than 12 credits in IEN 740 may be taken in a regular semester, nor more than six credits in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

IEN 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Instrumental Performance (MIP)

MIP 0B1. Oboe. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Barret (Brod, Luft, Sellner, Ferling). Repertoire: Albinoni, Bach, Hayde, Schumann, Britten. Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 0B3. Oboe. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Bozza (Gillet, Prestini). Repertoire: Mozart, Telemann, Bach, Poulenc, Vaughan Williams. Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 0B5. Oboe. 1-4 Credit Hours.

Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum. Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 0B6. Oboe. 1-2 Credit Hours.

Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum. Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 0B7. Oboe. 1-2 Credit Hours.

Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 1. Brass Forum. 0 Credit Hours.

An informal recital setting and performance class for brass principals and majors with guest and faculty presentations.

Components: FOR.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 120. Class Guitar I for Non-Music Majors. 1 Credit Hour.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 121. Class Guitar I for Jazz Majors. 1 Credit Hour.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 130. Afro-Caribbean Hand Drumming, Level I. 1 Credit Hour.

The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. This class is taught in a workshop format.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 131. Afro-Caribbean Hand Drumming, Level II. 1 Credit Hour.

The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Level II is a performance ensemble.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 135. Percussion Contemporary Chamber Music. 1 Credit Hour.

Mandatory for all classical percussionists, this course focuses on the contemporary uncondacted chamber music repertoire. The goal is for students to develop and use an advanced listening/communicating skill set, while playing music with others. This course also targets to improve students' capabilities in contemporary music interpretation and performance.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 138. Trombone Choir. 1 Credit Hour.

The study and performance of literature for small and large trombone ensembles.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 139. Brass Chamber Music. 1 Credit Hour.

The study and performance of literature for small ensembles of similar or mixed brass instruments.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 140. Flute Choir. 1 Credit Hour.

Reading, rehearsing, and performing the flute choir repertoire (duets, trios, quartets, quintets).

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 141. Saxophone Ensemble. 1 Credit Hour.

The study and performance of classical and jazz literature for small saxophone ensembles.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 143. Woodwind Chamber Music. 1 Credit Hour.

Exploring the woodwind chamber music repertoire as represented by various combinations of instruments.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 144. Woodwind Chamber Ensemble. 1 Credit Hour.

Woodwind chamber ensemble is designed to give students knowledge of the most important literature for woodwinds through practice, rehearsal, and performance of major works for woodwind chamber ensemble.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 145. String-Keyboard Chamber Music. 1 Credit Hour.

The study and performance of literature from the Baroque Period through the 20th Century for two or more players for string instrumentalists and strings with keyboard.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 169. Band of the Hour Pep Band. 1 Credit Hour.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 170. Marching Band. 1 Credit Hour.

The "Band of the Hour" Marching Band is open to all qualified undergraduate and graduate students, regardless of major. The band performs at all home Miami Hurricane football games and selected away games.

Components: ENS.

Grading: GRD.

Typically Offered: Fall.

MIP 171. Symphonic Winds. 1 Credit Hour.

Symphonic Band is a large wind band that performs significant repertoire for wind and percussion instruments. It is open to all qualified undergraduate and graduate students, regardless of major.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 172. University Band. 1 Credit Hour.

University Band is a large ensemble offering students the opportunity to play standard repertoire of the wind band. This group is open to all wind and percussion players throughout the university, regardless of major.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

MIP 174. Brass Choir. 1 Credit Hour.

Major works for Brass Choir are studied. Special emphasis is given to orchestral repertoire.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 176. Wind Ensemble. 1 Credit Hour.

This course offers performance opportunities for qualified wind and percussion players. Repertoire includes significant literature written for the small and large wind band.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 180. Symphony Orchestra. 1 Credit Hour.

The Symphony Orchestra performs significant repertoire for large orchestra. It is open to all qualified undergraduate students by audition.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 181. Instrumental Conducting I. 2 Credit Hours.

This course provides practical procedures and materials for beginning instrumental conducting students. Students demonstrate basic conducting patterns, preparations, and releases in all meters.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 182. Instrumental Conducting II. 2 Credit Hours.

This course provides practical procedures and materials for advancing instrumental conducting students. Students demonstrate refined skill in conducting musical styles and independence of gestures.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 191. Tuba Ensemble. 1 Credit Hour.

The study and performance of compositions and/or transcriptions written for an ensemble of tubas and/or euphoniums.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 192. Classical Guitar Ensemble. 1 Credit Hour.

This course focuses on sightreading, rhythm recognition, and ensemble performance through the study of exercises, scales, and diverse repertoire.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 2. Guitar Forum. 0 Credit Hours.

An informal recital setting and performance class for guitar principals and majors with guest and faculty presentations.

Components: FOR.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 220. Class Guitar II for Non-music Majors. 1 Credit Hour.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 270. Leadership and Instructional Strategies for Marching Band. 1 Credit Hour.

Prerequisite: MIP 170. Or Requisite: Approval of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 281. Instrumental Conducting III. 1 Credit Hour.

This course provides a synthesis of the skills demonstrated in Instrumental Conducting I and II while developing error detection skills in common performance errors.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 282. Instrumental Conducting IV. 1 Credit Hour.

Students demonstrate knowledge of instruments, instrumentation of the wind band and orchestra, and analyze scores for conception, interpretation, rehearsal, and performance.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 307. Skills Lab V: Classical Improvisation. 2 Credit Hours.

Introduce students to the process of improvisation in all styles of classical music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 308. Skills Lab VI: Composition as Applied Improvisation. 2 Credit Hours.

Moving from the world of improvisation to composition, this course re-focuses musical expression into written form encompassing pre-tonal, tonal and post-tonal techniques through analysis, written improvisation, and model-composition.

Prerequisites: MTC 211 or MTC 240.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MIP 317. Basic Conducting. 2 Credit Hours.

A study of the basic techniques of all rhythms, patterns, subdivisions of beats, dynamics, starting, stopping, and giving cues. Course provides an elementary study of scores as to form and harmonic intent.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 399. Junior Recital. 1 Credit Hour.

A public recital of one half-hour or more. Course is required of all instrumental performance majors.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 407. Skills Lab VII: Basic Conducting/Arranging. 2 Credit Hours.

This course in basic conducting and arranging is designed to acquaint the student by application, with the basic beat, patterns (symmetrical and asymmetrical), preparatory beats, releases, dynamics, fermati, tempo changes, elementary score study and rehearsal techniques. Elements of practical arranging will be explored as students arrange excerpts for their specific skills ensemble that address areas of conducting technique.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 408. Skills Lab VIII: Culminating Project. 2 Credit Hours.

In this class students will create, perform, and produce a culminating concert event that will incorporate all the various skills they have acquired over the course of the Experiential Music Curriculum. The music for this performance will be written (or arranged), played, and conducted by the students in the skills ensemble, and it will require skills in improvisation, technology, and promotion that have been learned in the previous Skills Ensemble classes. The instructor will work in a consultative and guidance role to help the students develop and produce this performance.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MIP 418. Instrumental Conducting. 2 Credit Hours.

Course covers Baton technique, score reading, and interpretation. Actual experience in rehearsing instrumental ensembles is included.

Prerequisite: MIP 317.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 493. Special Projects In Instrumental Performance. 1-3 Credit Hours.

Supervised readings and other activities in specific areas of Instrumental Performance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 494. Special Topics In Instrumental Performance. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 499. Senior Recital. 1 Credit Hour.

A public recital of one hour or more. Required of all performance majors.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 5. Percussion Forum. 0 Credit Hours.

An informal recital setting and performance class for Percussion principals and majors with guest and faculty presentations.

Components: FOR.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 541. Bassoon Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the bassoon since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 542. Clarinet Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the clarinet since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 543. Flute Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the flute since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 544. Oboe Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the oboe since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 545. Brass Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of brass instruments since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 546. Percussion Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of percussion instruments since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 547. Saxophone Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the saxophone since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 548. Guitar Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the guitar since 1600.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 549. String Repertoire and Pedagogy. 1-2 Credit Hours.

An exploration of teaching string playing. Areas covered include problem-solving and communication techniques, and practical considerations in establishing a teaching studio. Students participate in hands-on teaching opportunities. Prerequisite: Advanced standing in Music and permission of instructor.

Requisite: Music Majors, Upperclass Status or Permission of Instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 550. Bach Cello Suites. 1 Credit Hour.

The study and performance of the six suites for unaccompanied cello of Johann Sebastian Bach.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 580. Orchestral Audition Preparation. 1 Credit Hour.

The study of the more difficult excerpts from the orchestral literature for violin, viola, violoncello, or double bass. Course may be repeated for credit.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 593. Special Projects In Instrumental Performance Or Conducting. 1-3 Credit Hours.

Supervised topics and other activities in specific areas of Instrumental Performance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 594. Special Topics In Instrumental Performance And Conducting. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 641. Bassoon Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the bassoon since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 642. Clarinet Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the clarinet since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 643. Flute Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the flute since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 644. Oboe Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the oboe since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 645. Brass Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of brass instruments since 1600.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 646. Percussion Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of percussion instruments since 1600.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 647. Saxophone Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the saxophone since 1600.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 648. Guitar Repertoire and Pedagogy. 1-2 Credit Hours.

Solo and small ensemble literature of the guitar since 1600.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 649. String Repertoire and Pedagogy. 1-2 Credit Hours.

An exploration of teaching string playing. Areas covered include problem-solving and communication techniques, and practical considerations in establishing a teaching studio. Students participate in hands-on teaching opportunities. Prerequisite: Advanced standing in Music and permission of instructor.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 650. Bach Cello Suites. 1 Credit Hour.

The study and performance of the six suites for unaccompanied cello of Johann Sebastian Bach.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 655. Seminar in Baroque Performance. 1 Credit Hour.

Students will present research on compositions representative of the Baroque period. Presentations will include interpretation, style, and historical context of both the composer and the work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 680. Orchestral Audition Preparation. 1 Credit Hour.

The study of the more difficult excerpts from the orchestral literature for violin, viola, violoncello, or double bass. Course may be repeated for cr

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 693. Special Projects In Instrumental Performance Or Conducting. 1-3 Credit Hours.

Supervised topics and other activities in specific areas of Instrumental Performance.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 694. Special Topics In Instrumental Performance And Conducting. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 7. String Forum. 0 Credit Hours.

An informal recital setting and performance class for string principals and majors with guest and faculty presentations.

Components: FOR.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 701. MM Recital Program Notes Preparation. 1 Credit Hour.

Students prepare extensive, original program notes, with bibliography. These notes will be made available to the audience of the second Masters recital. The notes may focus on the historical, analytical and performance aspects of the repertoire for this recital. Required in MM two-recital degree programs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 710. Graduate Conducting Seminar. 1-2 Credit Hours.

The graduate conducting seminar is an advanced study of conducting and rehearsal techniques combined with score and ensemble topics. Specific topics vary each semester. May be repeated for credit.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 720. Concepts and Processes of Classical Improvisation. 1 Credit Hour.

Concepts and Processes of Improvisation in classical music

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 730. Afro-Caribbean Hand Drumming, Level I. 1 Credit Hour.

The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Class is taught as a workshop.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 731. Afro-Caribbean Hand Drumming, Level II. 1 Credit Hour.

The study of hand drumming techniques used to perform the music of Africa and the new world African music that originated in the islands of the Caribbean and the countries of Central and Latin America. Level II is a performance ensemble.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 735. Percussion Contemporary Chamber Music. 1 Credit Hour.

Mandatory for all classical percussionists, this course focuses on the contemporary uncondacted chamber music repertoire. The goal is for students to develop and use an advanced listening/communicating skill set, while playing music with others. This course also targets to improve students' capabilities in contemporary music interpretation and performance.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 738. Trombone Choir. 1 Credit Hour.

The study and performance of literature for small and large trombone ensembles.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 739. Brass Chamber Music. 1 Credit Hour.

The study and performance of literature for small ensembles of similar or mixed brass instruments.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 740. Flute Choir. 1 Credit Hour.

Reading, rehearsing, and performing the flute choir repertoire (duets, trios, quartets, quintets).

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 741. Saxophone Ensemble. 1 Credit Hour.

The study and performance of classical and jazz literature for small saxophone ensembles.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 743. Woodwind Chamber Music. 1 Credit Hour.

Exploring the woodwind chamber music repertoire as represented by various combinations of instruments.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 744. Woodwind Chamber Ensemble. 1 Credit Hour.

Woodwind chamber ensemble is designed to give students knowledge of the most important literature for woodwinds through practice, rehearsal, and performance of major works for woodwind chamber ensemble.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 745. String-Keyboard Chamber Music. 1 Credit Hour.

The study and performance of literature from the Baroque Period through the 20th Century for two or more players for string instrumentalists and strings with keyboard.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 756. Seminar in Classical Performance. 1 Credit Hour.

Students will present research on compositions representative of the classical period. Presentations will include interpretation, style, and historical context of both the composer and the work.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 757. Seminar in Romantic Performance. 1 Credit Hour.

Students will present research on compositions representative of the Romantic period. Presentations will include interpretation, style, and historical context of both the composer and the work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MIP 758. Seminar in Contemporary Performance. 1 Credit Hour.

Students will present research on compositions representative of the Contemporary music. Presentations will include interpretation, style, and historical context of both the composer and the work.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MIP 769. Jazz Guitar Ensemble. 1 Credit Hour.

Components: SEM.

Grading: GRD.

MIP 770. Marching Band. 1 Credit Hour.

The "Band of the Hour" Marching Band is open to all qualified undergraduate and graduate students, regardless of major. The band performs at all home Miami Hurricane football games and selected away games.

Components: ENS.

Grading: GRD.

Typically Offered: Fall.

MIP 771. Symphonic Winds. 1 Credit Hour.

Symphonic Band is a large wind band that performs significant repertoire for wind and percussion instruments. It is open to all qualified undergraduate and graduate students, regardless of major.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 774. Brass Choir. 1 Credit Hour.

Major works for Brass Choir are studied. Special emphasis is given to orchestral repertoire.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 776. Wind Ensemble. 1 Credit Hour.

This course offers performance opportunities for qualified wind and percussion players. Repertoire includes significant literature written for the small and large wind band.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 780. Symphony Orchestra. 1 Credit Hour.

The Symphony Orchestra performs significant repertoire for large orchestra. It is open to all qualified graduate students by audition.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 781. Instrumental Conducting Workshop. 2 Credit Hours.

This course provides practical procedures and materials for beginning and advancing conducting students. Students enrolled in the four-semester sequence demonstrate basic conducting techniques, demonstration of instruments and instrumentation of the wind band and orchestra, and analyze scores for conception, interpretations, rehearsal, and performance.

Prerequisites: MTC 112, MTC 122.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MIP 782. Instrumental Conducting II. 2 Credit Hours.

This course provides practical procedures and materials for advancing instrumental conducting students. Students demonstrate refined skill in conducting musical styles and independence of gestures.

Prerequisites: MIP 781 or MIP 317.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MIP 791. Tuba Ensemble. 1 Credit Hour.

The study and performance of compositions and/or transcriptions written for an ensemble of tubas and/or euphoniums.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 792. Classical Guitar Ensemble. 1 Credit Hour.

This course focuses on sightreading, rhythm recognition, and ensemble performance through the study of exercise, scales, and diverse repertoire.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP 793. Special Projects In Instrumental Performance Or Conducting. 1-3 Credit Hours.

Projects in any phase of instrumental performance in which the student is interested and qualified to work.

Components: ENS.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 794. Special Projects In Instrumental Performance Or Conducting. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP 811. Master's Recital Paper. 1-3 Credit Hours.

The student working on his/her master's recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIP 812. Master's Recital. 1 Credit Hour.

The student enrolls for recital credit during the semester in which he/she presents the master's recital.

Components: PRA.

Grading: SUS.

Typically Offered: Fall & Spring.

MIP 813. Master's Advanced Recital. 2 Credit Hours.

The second recital for those taking the two-recital option in the Master of Music in Instrumental Performance degree.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

MIP 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MIP 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIP 831. Doctoral Essay. 1-12 Credit Hours.

Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MIP 731 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIP 832. Doctoral Recital. 1-2 Credit Hours.

Required of all candidates for the D.M.A.

Components: PRA.

Grading: SUS.

Typically Offered: Fall & Spring.

MIP 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.M.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MIP 9. Woodwind Forum. 0 Credit Hours.

An informal recital setting and performance class for woodwind principals and majors with guest and faculty presentations.

Components: FOR.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BA1. Bassoon. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Vivaldi Concerto, Bourdeau - Premier solo, Galliard, Handel, Marcello, Nino Rota Procaccini.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BA3. Bassoon. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Milde (Vol. 2). Gambaro. Repertoire: Bach, Bozza, Eigar, Jean Jean, Hindemith, Mozart, Flament.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAB. Bassoon. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Vivaldi Concerto, Bourdeau - Premier solo, Galliard, Handel, Marcello, Nino Rota Procaccini.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAC. Bassoon. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Bourdeau - Second Solo, David, Domenico, Dubois, Fasch, Kozeluh, Pierre, Telemann, Vivaldi.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAD. Bassoon. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Jancourt, Milde (Vol. 1). Repertoire: Bourdeau - Second Solo, David, Domenico, Dubois, Fasch, Kozeluh, Pierre, Telemann, Vivaldi.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAF. Bassoon. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Milde (Vol. 2). Gambaro. Repertoire: Bach, Bozza, Eigar, Jean Jean, Hindemith, Mozart, Flament.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAG. Bassoon. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Milde (Vol. 1). Bianchi. Repertoire: Bruns, Dutilleux, Francaix, Hummel, Saint-Saens, Tansman, Villa-Lobos, Weber (both).

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAH. Bassoon. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Method Books by Giampieri, Milde (Vol. 1). Bianchi. Repertoire: Bruns, Dutilleux, Francaix, Hummel, Saint-Saens, Tansman, Villa-Lobos, Weber (both).

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAI. Bassoon. 1-4 Credit Hours.

Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAJ. Bassoon. 1-4 Credit Hours.

Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAK. Bassoon. 1-4 Credit Hours.

Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP BAL. Bassoon. 1-4 Credit Hours.

Mastery of technical aspects of bassoon performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as reed making, specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAM. Bassoon. 1-4 Credit Hours.

Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAN. Bassoon. 1-4 Credit Hours.

Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAO. Bassoon. 1-4 Credit Hours.

Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAP. Bassoon. 1-4 Credit Hours.

Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAQ. Bassoon. 1-4 Credit Hours.

Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BAR. Bassoon. 1-4 Credit Hours.

Continued mastery of technical aspects of bassoon performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BH5. Baritone Horn. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BH6. Baritone Horn. 1-2 Credit Hours.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BH7. Baritone Horn. 1-2 Credit Hours.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BHK. Baritone Horn. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP BHL. Baritone Horn. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BHN. Baritone Horn. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BHO. Baritone Horn. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BHP. Baritone Horn. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BHQ. Baritone Horn. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP BHR. Baritone Horn. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD1. Conducting. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD3. Conducting. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD5. Conducting. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD6. Conducting. 1-2 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CD7. Conducting. 1-2 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDB. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDC. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDD. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDF. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDG. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDH. Conducting. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDK. Conducting. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP CDL. Conducting. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDN. Conducting. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDO. Conducting. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDP. Conducting. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDQ. Conducting. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CDR. Conducting. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CL1. Clarinet. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Scale study. Etude books: Rose 32 Etudes, Baermann Method Book 3. Repertoire: Schumann, Saint-Saens, Gade, Arnold. Orchestral excerpts.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CL3. Clarinet. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Jean Jean 16 or 18 Etudes, and Opperman Advanced Velocity Studies. Repertoire: Poulenc, Stravinsky, Bernstein, Brahms.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CL5. Clarinet. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLB. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Scale study. Etude books: Rose 32 Etudes, Baermann Method Book 3. Repertoire: Schumann, Saint-Saens, Gade, Arnold. Orchestral excerpts.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLC. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Cavillini Caprices, and Opperman Intermediate Velocity Studies. Repertoire: Weber, Hindemith, Burgmuller.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLD. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Cavillini Caprices, and Opperman Intermediate Velocity Studies. Repertoire: Weber, Hindemith, Burgmuller.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLF. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Jean Jean 16 or 18 Etudes, and Opperman Advanced Velocity Studies. Repertoire: Poulenc, Stravinsky, Bernstein, Brahms.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLG. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Opperman Virtuoso Velocity Studies. Repertoire: Debussy, Rozsa, Muczynski, Berg.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLH. Clarinet. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Same as previous semesters as well as Opperman Virtuoso Velocity Studies. Repertoire: Debussy, Rozsa, Muczynski, Berg.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLK. Clarinet. 1-4 Credit Hours.

Prerequisite: Master's level.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP CLL. Clarinet. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLN. Clarinet. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLO. Clarinet. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLP. Clarinet. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLQ. Clarinet. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP CLR. Clarinet. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB1. Double Bass. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB3. Double Bass. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB5. Double Bass. 1-4 Credit Hours.

Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB6. Double Bass. 1-2 Credit Hours.

Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DB7. Double Bass. 1-2 Credit Hours.

Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBB. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBC. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBD. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBF. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBG. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBH. Double Bass. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBJ. Double Bass. 1-4 Credit Hours.

Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBK. Double Bass. 1-4 Credit Hours.

Advanced study of the double bass. Preparation for Master's recitals, and oral defense, orchestral repertoire, planning auditions, and insights on teaching.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP DBN. Double Bass. 1-4 Credit Hours.

Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBO. Double Bass. 1-4 Credit Hours.

Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBP. Double Bass. 1-4 Credit Hours.

Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBQ. Double Bass. 1-4 Credit Hours.

Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP DBR. Double Bass. 1-4 Credit Hours.

Preparation of qualifying and DMA recitals and oral defense. Continuation of advanced orchestral repertoire and methods and audition preparation. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EU1. Euphonium. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Arban, Concone, Schlossberg, Barat, Presser.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EU3. Euphonium. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Fink Stevens, Maxime-Alphones, Jacob, Hartley.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUB. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Arban, Concone, Schlossberg, Barat, Presser.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUC. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Bordogni-Rochut, Peters, Jones, Vivaldi.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUD. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Bordogni-Rochut, Peters, Jones, Vivaldi.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUF. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Fink Stevens, Maxime-Alphones, Jacob, Hartley.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUG. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Charlier, Bozza, Uber, Horovitz Bellstedt; band and orchestral excerpts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP EUH. Euphonium. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. ½-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Repertoire: Charlier, Bozza, Uber, Horovitz Bellstedt; band and orchestral excerpts.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FH1. French Horn. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Beginning transposition study. Studies by Shoemaker, Kopprasch, Maxime-Alphonse, Kling; appropriate passages from orchestral works. Repertoire: Mozart, Saint-Saens, F. Strauss, R. Strauss.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FH3. French Horn. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continued transposition study, further skills development, scales and arpeggios. Studies by Bach, Maxime-Alphonse, Gallay; Belloli; orchestral repertoire. Repertoire: Mozart, Strauss, Hindemith, Dukas, Chabier.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FH5. French Horn. 1-4 Credit Hours.

Emphasis will continue to be the advancement of repertoire experience and skill assessment. Preparation and presentation of a solo recital will be the main focus of repertoire study. In-depth study of Orchestral Literature will also begin this semester.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHB. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, and articulation. Appropriate major and minor scales. Beginning transposition study. Studies by Shoemaker, Kopprasch, Maxime-Alphonse, Kling; appropriate passages from orchestral works. Repertoire: Mozart, Saint-Saens, F. Strauss, R. Strauss.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHC. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continue transposition study. Continue development of embouchure, breathing, and articulation. Appropriate major and minor scales. Studies by Kopprasch, Maxime-Alphonse, Kling; Gallay; orchestral repertoire. Repertoire: Mozart, Strauss, Rachmaninoff, Glazounov.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHD. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continue transposition study. Continue development of embouchure, breathing, and articulation. Appropriate major and minor scales. Studies by Kopprasch, Maxime-Alphonse, Kling; Gallay; orchestral repertoire. Repertoire: Mozart, Strauss, Rachmaninoff, Glazounov.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHF. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continued transposition study, further skills development, scales and arpeggios. Studies by Bach, Maxime-Alphonse, Gallay; Belloli; orchestral repertoire. Repertoire: Mozart, Strauss, Hindemith, Dukas, Chabier.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHG. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further skills development to the highest attainable level. Studies by Reynolds, Hackelman, Neuling, Barboteo, Bach. Orchestral repertoire. Repertoire: Bozza, Gliere, Strauss, Haydn.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHH. French Horn. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Further skills development to the highest attainable level. Studies by Reynolds, Hackelman, Neuling, Barboteo, Bach. Orchestral repertoire. Repertoire: Bozza, Gliere, Strauss, Haydn.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHI. French Horn. 1-2 Credit Hours.

Emphasis will be on an assessment of students' skills, needs and repertoire experience. Materials will be explored from the standard etude and solo literature that is relevant to the students' level and skill needs. Exploration will begin to choose material for a solo recital in the Spring semester.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHK. French Horn. 1-4 Credit Hours.

Further exploration of solo and chamber music repertoire. Orchestral literature will take a larger role in preparation for auditions. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP FHL. French Horn. 1-4 Credit Hours.

Focus on audition preparation and repertoire for the final Master's recital.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHM. French Horn. 1-4 Credit Hours.

Students' skills needs will be assessed and a course of study developed for any remedial needs. An in-depth study of appropriate literature for both solo and chamber recitals will be undertaken in preparation for a long-term degree plan. Advanced study of Orchestral Literature will begin, including listening and score study. Repertoire for an initial recital and the Qualifying Recital will be chosen and prepared.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHN. French Horn. 1-4 Credit Hours.

The initial Doctoral Recital and the Qualifying Recital will be presented.

Repertoire for these recitals will be the main focus but the Study of Orchestral Literature will remain a constant.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHO. French Horn. 1-4 Credit Hours.

Repertoire exploration for either the Solo recital or the Chamber Music recital along with continuing Orchestral Literature study.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHP. French Horn. 1-4 Credit Hours.

Final preparation and presentation for either the Solo recital or Chamber Music recital. Preparation for Orchestral auditions will also continue.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHQ. French Horn. 1-4 Credit Hours.

Repertoire exploration for the final recital along with Orchestral audition preparation. An overview of pedagogical materials will be explored and prepared as possible teaching tools.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FHR. French Horn. 1-4 Credit Hours.

Final preparation and presentation of remaining recital. Preparation for auditions should be advanced enough that the student can begin to take auditions. This will provide the opportunity for follow up work on audition skills and techniques.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FL1. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Taffanel - Gaubert 17 Daily Exercises, Berbiguer - 18 Etudes, Andersen Little Caprices. All major and minor scales, two octaves; Moyses - De la Sonorite, 24 Petite Melodies Vol. I. Repertoire: Handel Sonatas, Godard Allegretto.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FL3. Flute. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Moyses Daily Exercises, Andersen Op. 15, Op. 63; Moyses De la Sonorite, Tone Development Through Interpretation. Repertoire: Mozart G Major Concerto, Hindemith Sonata, Debussy Syrinx.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FL5. Flute. 1-4 Credit Hours.

Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FL7. Flute. 1-2 Credit Hours.

Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLB. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Taffanel - Gaubert 17 Daily Exercises, Berbiguer - 18 Etudes, Andersen Little Caprices. All major and minor scales, two octaves; Moyse - De la Sonorite, 24 Petite Melodies Vol. I. Repertoire: Handel Sonatas, Godard Allegretto.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLC. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Taffanel - Gaubert 17 Daily Exercises, Andersen, Op. 41; Moyse - De la Sonorite, 25 Petite Melodies Vol. II, Moyse Daily Exercises - major and minor scales, thirds.

Repertoire: Telemann Fantasies, CPE Bach Sonata, Faure Fantasia Chaminade Concertino.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLD. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Taffanel - Gaubert 17 Daily Exercises, Andersen, Op. 41; Moyse - De la Sonorite, 25 Petite Melodies Vol. II, Moyse Daily Exercises - major and minor scales, thirds.

Repertoire: Telemann Fantasies, CPE Bach Sonata, Faure Fantasia Chaminade Concertino.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLF. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Moyse Daily Exercises, Andersen Op. 15, Op. 63; Moyse De la Sonorite, Tone Development Through Interpretation. Repertoire: Mozart G Major Concerto, Hindemith Sonata, Dubussy Syrinx.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLG. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Moyse Daily Exercises, Andersen Op. 15, Soussmann Etudes; Moyse De la Sonorite, Tone Development Through Interpretation. Repertoire: Poulenc Sonata, Bach Sonatas, Martinu Sonata.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLH. Flute. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Moyse Daily Exercises, Andersen Op. 15, Soussmann Etudes; Moyse De la Sonorite, Tone Development Through Interpretation. Repertoire: Poulenc Sonata, Bach Sonatas, Martinu Sonata.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLI. Flute. 1-4 Credit Hours.

Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLK. Flute. 1-4 Credit Hours.

Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP FLL. Flute. 1-4 Credit Hours.

Mastery of technical aspects of flute performance. Preparation of Masters recital(s) and oral defense. Preparation of repertoire for audition for further study or professional placement. Related areas such as specific individualized studies, instrumental maintenance, and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLN. Flute. 1-4 Credit Hours.

Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLO. Flute. 1-4 Credit Hours.

Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLP. Flute. 1-4 Credit Hours.

Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLQ. Flute. 1-4 Credit Hours.

Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP FLR. Flute. 1-4 Credit Hours.

Continue mastery of technical aspects of flute performance. Preparation of DMA recitals and oral defense. Preparation of repertoire for audition for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GU1. Guitar. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GU3. Guitar. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GU5. Guitar. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GU6. Guitar. 1-2 Credit Hours.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GUP. Guitar. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GUQ. Guitar. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP GUR. Guitar. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA1. Harp. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA3. Harp. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA5. Harp. 1-4 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA6. Harp. 1-2 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HA7. Harp. 1-2 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAB. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAC. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAD. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAF. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAG. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAH. Harp. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAK. Harp. 1-4 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP HAL. Harp. 1-4 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAN. Harp. 1-4 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAO. Harp. 1-4 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAP. Harp. 1-4 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAQ. Harp. 1-4 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP HAR. Harp. 1-4 Credit Hours.

Advanced study of solo harp literature.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBB. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Barret (Brod, Luft, Sellner, Ferling). Repertoire: Albinoni, Bach, Hayde, Schumann, Britten.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBC. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Ferling (Bleuzet, Sellner).

Repertoire: Saint-Saens, Hindemith, Vivaldi, Goossens, Francaix.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBD. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Ferling (Bleuzet, Sellner).

Repertoire: Saint-Saens, Hindemith, Vivaldi, Goossens, Francaix.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBF. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Bozza (Gillet, Prestini).

Repertoire: Mozart, Telemann, Bach, Poulenc, Vaughan Williams.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBG. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Loyon (Gillet).

Repertoire: Mozart, Strauss, Martinu, Dutilleux.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBH. Oboe. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Scales, arpeggios, trills. Appropriate technical exercises. Etudes by Loyon (Gillet).

Repertoire: Mozart, Strauss, Martinu, Dutilleux.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBK. Oboe. 1-4 Credit Hours.

Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP OBL. Oboe. 1-4 Credit Hours.

Mastery of technical aspects of oboe performance. Preparation of Masters recital(s) and Oral Defense. Preparation of audition repertoire for further study or professional placement. Related areas such as reed making, specific individualized studies, instrument maintenance, chamber music and orchestral excerpts are also part of the curriculum. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBN. Oboe. 1-4 Credit Hours.

Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBO. Oboe. 1-4 Credit Hours.

Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBP. Oboe. 1-4 Credit Hours.

Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBQ. Oboe. 1-4 Credit Hours.

Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP OBR. Oboe. 1-4 Credit Hours.

Continue mastery of technical aspects of oboe performance. Preparation of DMA recitals and Oral Defense. Preparation of audition repertoire for professional placement. An overview of pedagogy materials for performance and teaching use will also be explored.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE1. Percussion. 2 Credit Hours.

1-hour lesson for students enrolled for 2-4 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of two mallets technique. Review of basic technique and repertoire on snare drum and timpani. Basic multi-percussion etudes. Repertoire: Mallet: G. H. Green, Musser, Creston, Rosauo. Snare Drum: Cirone, Delecluse, Rosauo. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE3. Percussion. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced four mallets technique on marimba and vibraphone. Advanced technique and repertoire on snare drum and timpani. Advanced multi-percussion etudes. Orchestral excerpts. Repertoire: Mallet: Abe, Ford, Friedman, Rosauo. Snare Drum: Cirone, Delecluse, Fink, Gautrieux. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE5. Percussion. 1-4 Credit Hours.

Second semester of the Masters Degree in percussion performance. The main area of focus is first recital; to be performed this semester. Exploration into solo and ensemble performance needs will continue through this semester.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE6. Percussion. 1-2 Credit Hours.

First semester of the Master's Degree in percussion performance. Emphasis on assessment of students' skills needs and repertoire experience. Materials covered to include standard solo and ensemble repertoire and technical work. First recital repertoire chosen from works supplementing students' needs.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PE7. Percussion. 1-2 Credit Hours.

First of six semesters of study for a DMA in percussion performance. Students' needs assessed, and a course of study devised. Solo and ensemble works studied in-depth accordingly. Works for an initial and qualifying recital chosen.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEB. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of two mallets technique. Review of basic technique and repertory on snare drum and timpani. Basic multi-percussion etudes. Repertoire: Mallet: G. H. Green, Musser, Creston, Rosauero. Snare Drum: Cirone, Delecluse, Rosauero. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEC. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of four mallets technique. Intermediate technique etudes and repertory on snare drum and timpani. Intermediate multi-percussion etudes. Repertoire: Mallet: Gomez, Musser, Peters, Rosauero. Snare Drum: Cirone, Delecluse, Fink, Rosauero. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PED. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of four mallets technique. Intermediate technique etudes and repertory on snare drum and timpani. Intermediate multi-percussion etudes. Repertoire: Mallet: Gomez, Musser, Peters, Rosauero. Snare Drum: Cirone, Delecluse, Fink, Rosauero. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEF. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Advanced four mallets technique on marimba and vibraphone. Advanced technique and repertory on snare drum and timpani. Advanced multi-percussion etudes. Orchestral excerpts. Repertoire: Mallet: Abe, Ford, Friedman, Rosauero. Snare Drum: Cirone, Delecluse, Fink, Gautrieux. Timpani: Hochrainer, Writh, Goodman.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEG. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of advanced repertory and preparation for the final recital. Etudes and works on marimba, vibraphone, snare drum, timpani, multi-percussion, and orchestral excerpts. At least one piece at the final concert has to be a concerto-like composition performed with piano or percussion ensemble.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEH. Percussion. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of advanced repertory and preparation for the final recital. Etudes and works on marimba, vibraphone, snare drum, timpani, multi-percussion, and orchestral excerpts. At least one piece at the final concert has to be a concerto-like composition performed with piano or percussion ensemble.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEK. Percussion. 1-4 Credit Hours.

Third semester of the Master's Degree in percussion performance. Further exploration of solo and chamber music in preparation for final recital. An overview of pedagogy materials for performance and teaching introduced.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP PEL. Percussion. 1-4 Credit Hours.

Final semester of the Master's Degree in percussion performance. Main focus to be placed upon preparations for the final recital, which will be performed this semester.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEN. Percussion. 1-4 Credit Hours.

Second semester DMA. Main focus on initial and qualifying recitals, which are to be performed this semester. Ensemble and technical needs to be addressed.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEO. Percussion. 1-4 Credit Hours.

Third semester DMA. Repertoire for either solo or Chamber recital to be chosen.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEP. Percussion. 1-4 Credit Hours.

Fourth semester DMA. Either solo or chamber recital to be presented, as well as continuing ensemble studies.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PEQ. Percussion. 1-4 Credit Hours.

Fifth semester DMA. Repertoire for final recital will be the focus of the semester. Ensemble work to continue, as well as pedagogical studies.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP PER. Percussion. 1-4 Credit Hours.

Final semester DMA. Final preparation and presentation of the final recital to be the main focus of the semester. Any remaining pedagogical and ensemble concerns are addressed.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SA1. Saxophone. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SA3. Saxophone. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SA5. Saxophone. 1-4 Credit Hours.

Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Study of advanced scales is required along with some jazz studies and advanced literature will be addressed in the private lesson format.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SA6. Saxophone. 1-2 Credit Hours.

Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAB. Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAC. Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAD. Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAF. Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAG. Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAH. Saxophone. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP SAK. Saxophone. 1-4 Credit Hours.

Graduate level private study in classical saxophone is geared toward the individual's needs depending on the ability and skills mastered during the undergraduate level. The student will be required to seek refinement in all areas, including tone, intonation, technique, stylistic interpretation, and advanced forms of saxophone techniques. The student must be thoroughly versed in the pedagogy of the instrument. Requisite: Frost School of Music.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TB1. Trombone. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Development of embouchure, breathing, articulation, sound, and slide technique. Appropriate major and minor scales. Works by Arban, Blazhevich, Pares, Rochut, Tyrell, and others. Solo literature as appropriate for the student's abilities.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TB3. Trombone. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Continuation of technical development including upper register, advanced slide technique, and refined articulation. Works as previously listed, followed by Masson and Bitsch. Solo literature as appropriate for the student's abilities, and continuation of selected orchestral excerpts.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TB5. Trombone. 1-4 Credit Hours.

Advanced progressive study is chosen from the following etude books, Gabriel Masson 12 Various Etudes, Marcel Bitsch 15 Rhythmical Studies, Roger Bountry 12 Etudes for High Perfection, and Brade Edwards Lip-slurs-Exercises for Tone and Technique. Additionally, solo concerto literature and contemporary works are studied and prepared to advance the student's technical and musical mastery of the trombone. Orchestral excerpts are studied to further develop and refine an appropriate sense of orchestral style.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP TB6. Trombone. 1-2 Credit Hours.

Typically Offered: Fall & Spring.

MIP VNF. Violin. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Dont 42 Caprices, Gavinies 24 Matinees, Vieuxtemps 12 Studies. Repertoire: J. S. Bach, Beethoven, Brahms, Vaughan Williams, Ravel, Sarasate, Sibelius, Vieuxtemps, Shostakovich.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNG. Violin. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Galamian Contemporary Violin Technique. Paganini 24 Caprices, Wieniawski Ecole Moderne. Repertoire: J. S. Bach, Beethoven, Ysaye, Franck, Faure, Paganini, Brahms, Bartok.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNH. Violin. 1-2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Flesch Scale System, Galamian Contemporary Violin Technique. Paganini 24 Caprices, Wieniawski Ecole Moderne. Repertoire: J. S. Bach, Beethoven, Ysaye, Franck, Faure, Paganini, Brahms, Bartok.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNK. Violin. 1-4 Credit Hours.

Components: LSN.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MIP VNL. Violin. 1-4 Credit Hours.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNN. Violin. 1-4 Credit Hours.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNO. Violin. 1-4 Credit Hours.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNP. Violin. 1-4 Credit Hours.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNQ. Violin. 1-4 Credit Hours.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

MIP VNR. Violin. 1-4 Credit Hours.

Components: LSN.

Grading: GRD.

Typically Offered: Fall & Spring.

Intensive English Program (IEP)

IEP 1. Level Undetermined. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 11. RW Level Undetermined. 0 Credit Hours.

Reading and Writing class for students whose English level has not been determined.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEP 111. Level I - Written Communication. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 112. Level I - Oral Communication. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 113. Level I Workshop. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 114. Level I - Reading. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 12. OC Level Undetermined. 0 Credit Hours.

Oral Communication class for students whose English level has not been determined.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEP 121. Level II - Written Communication. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 122. Level II - Oral Communications. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 123. Level I & II Workshop. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 124. Level II Reading. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 131. Level III Written Communication. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 132. Level III - Oral Communication. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 133. Level III Workshop. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 134. Level III Reading. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 141. Level IV - Reading / Writing. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 142. Level IV - Oral Communication. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 151. Level V - Reading / Writing. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 152. Level V - Oral Communication. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 153. Level IV/V - Selected Topics. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 154. LEVEL IV/V Selected Topics. 0 Credit Hours.

Components: LEC.

Grading: GRD.

IEP 155. ST-UM Transition. 0 Credit Hours.

This course will provide orientation, skills, assistance and support for IEP/UM students as they transition to a full load of credit courses.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEP 161. Core I. 0 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IEP 162. Core II. 0 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Interdisciplinary Studies (IDS)

IDS 699. Directed Study. 1-6 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

IDS 825. Master Study. 1-6 Credit Hours.**Components:** THI.**Grading:** GRD.**Typically Offered:** Spring & Summer.**IDS 830. Pre-Candidacy Dissertation Research. 1-12 Credit Hours.**

Required of all candidates for the Ph.D. The student will enroll for credit as determined by his/her advisor but not for less than a total of 24. Not more than 12 hours of IDS 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed his/her (a) qualifying examinations, and (b) is engaged in an assistantship, he/she may still take the maximum allowable credit stated above.

Components: THI.**Grading:** SUS.**Typically Offered:** Fall & Spring.**IDS 840. Post-Candidacy Dissertation. 1-6 Credit Hours.****Components:** THI.**Grading:** SUS.**Typically Offered:** Fall, Spring, & Summer.**IDS 850. Research and Residence. 1-6 Credit Hours.**

Used to establish research in residence for the Ph.D., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.**Grading:** SUS.**Typically Offered:** Fall.

International Studies (INS)

INS 101. Global Perspectives. 3 Credit Hours.

Introduces students to the study of international relations focusing on the continuing threat of national and ethnic conflict; terrorism; environmental and health concerns; globalization; economic interdependence, and poverty. Students are provided an overview of the evolution of international affairs in the modern era and are introduced to the various scholarly approaches for an understanding of international affairs.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 102. Global Economics. 3 Credit Hours.**

The international economy. This course develops the analytical tools underlying "the economic way of thinking" and applies them to two main topics: the environment and international trade.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 104. Global Perspectives Discussion Section. 0 Credit Hours.****Components:** DIS.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 105. Global Perspectives Discussion Section 2. 0 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 201. Globalization and Change in World Politics. 3 Credit Hours.**

The academic and public policy debates regarding the multiple impacts of the globalization of the world economy on the politics of nation-states and on the dynamics of the international system itself.

Prerequisite: INS 101.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 202. INS Methodology. 3 Credit Hours.**

The approaches, methods and techniques used for designing and conducting international studies research.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**INS 210. INS Topics. 3 Credit Hours.**

Special topics taken at other institutions with no direct equivalents.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 310. Advanced Topics in INS. 3 Credit Hours.**

Prerequisite: POL 202 or POL 203.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 311. Advanced Topics in INS II. 3 Credit Hours.**

Prerequisite: POL 202 or POL 203.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 319. Empire: Global Legacies. 3 Credit Hours.**

A review of the key features of the Roman, Chinese, Russian, Ottoman, Spanish, and British empires and their global legacies. Different perspectives and conceptualizations on empires. Major characteristics of the empires studied and their enduring resonances in specific regions and globally.

Prerequisite: INS 101.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 320. Global Economics II. 3 Credit Hours.**

Macroeconomics and its application to the study of the international economy. Measurement of income and level of development; determinants of economic growth; inflation and unemployment; open economy macroeconomics.

Prerequisite: INS 102 or ECO 211 or ECO 212.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 321. Global Political Economy. 3 Credit Hours.**

The implications of the globalization of trade, production, finance, and culture on equity, social welfare and the quality of democratic institutions and practices in both the Global North and the Global South.

Prerequisite: INS 102 or ECO 211 or ECO 212.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.

INS 322. Economics of Development and the Environment. 3 Credit Hours.

Structural changes that accompany economic growth that impact the environment and sustainable development.

Prerequisite: INS 102 or ECO 211 or ECO 212.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 324. The History of Zionism. 3 Credit Hours.

The religious, cultural, historical, political and social underpinnings of the development of Zionism that led to the creation of the State of Israel.

Through readings, analysis of speeches and essays, exploration of films and the internet, the class will move through time from the origins of the Zionist idea to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 325. Israel: The Making of a State. 3 Credit Hours.

An introduction to the creation of the State of Israel in its historical context, emphasizing the period of 1935-55: the struggle for Israel's establishment, the making of the state and the early challenges Israel faced. The class will use documents, texts, testimony, poetry, music and film.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 330. Introduction of Comparative Studies. 3 Credit Hours.

Introduces students to the comparative method and to the theories and concepts required to analyze political transformation of states, societies, economies and culture in a globalization world.

Prerequisite: POL 202 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 335. Democratization. 3 Credit Hours.

A comparative overview of the problems of introducing democratic and market economic institutions into areas where they have not flourished and how to maintain them in established democracies.

Prerequisite: POL 202 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 341. Nationalism, Ethnicity and Conflict. 3 Credit Hours.

Examines theories of ethnic and national conflict focusing on contemporary issues throughout the world.

Prerequisite: POL 202 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 344. Gender and Politics. 3 Credit Hours.

Compares the roles played by men and women in political systems worldwide; examines public policy outcomes with significant gender-based effects, including policies on sexuality & reproductive health, gender-based violence, work & the family, and access to education.

Prerequisite: POL 202.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 352. Panoramic View of the Middle East. 3 Credit Hours.

The Middle East and a basic understanding of the factors, forces and processes shaping developments in the modern and contemporary history of this important world region.

Prerequisite: POL 202 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 367. Foreign Policy Topics. 3 Credit Hours.

Prerequisite: POL 202 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 380. Democracy and Globalization in Latin America. 3 Credit Hours.

The global dimensions of Latin American politics, emphasizing democratization and its discontents; human rights; the emergence of transnational civil society; and the impacts of market reforms on development, equity and social inclusion.

Prerequisite: POL 202 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 385. Latin American Topics. 3 Credit Hours.

Prerequisite: POL 202 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 391. The European Union. 3 Credit Hours.

The course will combine 6 objectives: 1)to investigate the historical development of Europe as a civilization and as an idea through review of some main historical and political factors and ideologies from 1815-present; 2)to survey the main organizations and experiments in European integration before/after World War II; 3)to analyze the historical development of the European communities; 4)to examine major institutions of the European Union; 5)to analyze the main European Union policies and current issues; 6)to reflect upon the future of the nation-state and the idea of a united Europe, the role of transformed ideologies, and the rebirth of nationalism while pondering about future scenarios for European integration.

Prerequisite: INS 101.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 394. European Topics. 3 Credit Hours.

Prerequisite: POL 202 or POL 203.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 410. INS Advanced Seminar. 3 Credit Hours.

Prerequisite: POL 202 or POL 203.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 411. IR Advanced Seminar. 3 Credit Hours.**

Prerequisite: POL 202 or POL 203.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 415. Independent Study. 1-6 Credit Hours.**

Individualized research done under the guidance of selected faculty member. Depending upon the requirements established by the instructor, the student will be responsible for a research paper corresponding to the number of credits taken.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**INS 418. Honors Thesis. 3 Credit Hours.**

Honors thesis research. This course is required for students seeking magna or summa cum laude and those seeking departmental honors. A thesis committee comprised of three members, two from International Studies and one from the university faculty must be established. The thesis advisor must also be from International Studies.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 419. Honors Thesis II. 3 Credit Hours.**

Honors thesis writing.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 420. Global Trade. 3 Credit Hours.**

Economic principles in global issues such as comparative advantage; specialization and trade; macroeconomics in the open economy; commercial policy; globalization; inequalities, within and among nations; and governance.

Prerequisite: INS 102.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**INS 421. Poverty and the Environment. 3 Credit Hours.**

The processes by which a growing economy creates wealth in the form of goods and services while simultaneously increasing poverty and pollution.

Prerequisite: INS 102.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**INS 430. Comparative Studies Seminar. 3 Credit Hours.**

Prerequisite: POL 202 or POL 203.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 450. History of Economic Thought. 3 Credit Hours.**

A review of the contributions made by some of the most influential authors and schools of thought to the fields of political economy and economics. Examination of the links of ideas, theories, and policy approaches on economic phenomena with moral philosophy and other realms of knowledge. Emphasis is placed on the contributions made by the classics of political economy and their continuities and discontinuities with respect to pre-classical and post-classical ones.

Prerequisite: INS 201 or POL 201.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 460. United Nations Seminar. 3 Credit Hours.**

The organization and functions of the UN, including its structure, network of agencies, and issues in which it is involved. Emphasis is given to reforms, the Millennium Development Goals, and problematic relationships among the UN member states.

Prerequisite: POL 202 or POL 203.

Components: SEM.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 503. Int Relations Topics. 3 Credit Hours.**

Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 504. Int Rel Topics II. 3 Credit Hours.**

Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 509. International Migration and the Health Care System. 3 Credit Hours.**

An exposure to one of the most critical aspects of development globally: the migration-development nexus. The centrality of this issue has in current debates on development. Research and policy-making approaches to different aspects of this nexus. Several countries and regions are covered throughout the semester. Development of research skills through systematic participation in specific projects.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 510. Issues In Ins. 3 Credit Hours.**

Analysis of current issues of international importance.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.

INS 515. Independent Study. 1-6 Credit Hours.

Advanced level research done under the guidance of a selected faculty member. This course can be used as one of the two 500-level requirements for International Studies majors.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 518. Global Migration and Development. 3 Credit Hours.

An examination of the nexus between migration and the health care system. Immigrants as professionals in the medical field; immigrants as people in need to health care services. Many countries have relied on immigration to cover critical shortages of professionals while others suffer from the exodus of professionals. The impact of immigration on these systems through an increase in the demand for medical services and other mechanisms. An examination of research and policy approaches to these issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 519. Internship. 1-3 Credit Hours.

A research paper is required for this course. The student works with a selected faculty member who determines the length and scope of the project. The Student is responsible for finding the internship position.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 520. Microeconomics for INS. 3 Credit Hours.

Microeconomics for students of international studies. Topics will include rationality, market failure and comparative advantage.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 521. INT'L ECON TOPICS II (International Economic System Topics). 3 Credit Hours.

Selected topics in International Economics. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 522. Latin American Political Economy. 3 Credit Hours.

Latin American political economy including analysis of market reform and integration of the region into the world economy.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 524. Intl Econ Topics. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 530. Comparative Analysis. 3 Credit Hours.

Advanced overview of the comparative method. Required for students specializing in Comparative Studies at the graduate level.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 532. Globalization and Human Rights. 3 Credit Hours.

The integration of markets has many concerned for the political and economic rights of the common citizen. This course examines The effect of globalization on the human rights standards throughout the world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 533. Transnational Social Movements. 3 Credit Hours.

Focuses on global civic activism and contentious politics, with particular attention to transnational non-state actors - NGOs, social movements, environmental protection, and the emergence of a global civil society.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 534. Military, State and Society. 3 Credit Hours.

The role of the military in state formation; questions of military rule, civilian control, and social structures in contemporary world politics.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 536. Comparative Political Regimes. 3 Credit Hours.

Literature concerned with the transition from authoritarianism to democracy in various parts of the world.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 537. Comparative Political Economy. 3 Credit Hours.

Compares how domestic politics and macroeconomic policies interact with globalization. Case studies include welfare states in the U.S. and Europe, East Asian development, post communist transitions and market restructuring in Latin America and Africa.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 540. National Security. 3 Credit Hours.

The central issues concerning European security since World War II, with emphasis on the period since the end of the cold war.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 542. Drug-Trafficking in the Americas. 3 Credit Hours.

The political economy of the U.S.-Latin American drug trade in the 20th Century along with the dynamics of the U.S.-led war on drugs through the first years of the Twenty First Century.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 543. National Security and Foreign Policy. 3 Credit Hours.

Explores alternative conceptualizations of "security" and the new challenges to U.S. national security that have emerged in the Post-Cold War era.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

INS 551. Regional Topics II. 3 Credit Hours.

Selected topics in International Business. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 560. US Foreign Policy. 3 Credit Hours.

The leading approaches to the analysis of American foreign policy. Particular emphasis will be placed on the post-Cold War period and the new challenges to U.S. foreign policy of the 21st century.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 561. Negotiation and Bargaining. 3 Credit Hours.

Examines the nature of diplomatic negotiation through readings and discussion of international negotiation and through the case method, selecting several cases of high-level policy issues in which the United States has been a principal actor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 562. International Peace and Conflict Resolution. 3 Credit Hours.

The major sources of conflict, and what resources are available for making and keeping the peace? This class introduces students to the most fundamental concerns of the field of International Relations (IR), and especially of its sub-field IPCR.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 563. International Organizations. 3 Credit Hours.

The role, function, and impact on states of international governmental and non-governmental organizations in critical areas like peace and security, human rights, economic development, and environmental degradation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 564. International Law. 3 Credit Hours.

How international law affects the conduct of states. Issues include jurisdiction, diplomatic immunity, the use of armed force, peaceful dispute settlement among states, human rights, and the International Criminal Court.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 565. The World Before European Domination. 3 Credit Hours.

The historical roots of the contemporary international system. Its objective is to question the standard Eurocentric perspective on the rise of the West to a dominant position in the global system.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

INS 566. US-Latin American Relations. 3 Credit Hours.

Political, economic and strategic aspects of U.S.-Latin American relations; the historical experience and contemporary issues, including the influence of extra-regional parties such as Europe and China.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 570. Globalization and Health. 3 Credit Hours.

Globalization and its benefits and threats to public health; the relationship between global economic, political, social, cultural, environmental and technological changes and their impact on human health.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 571. International Development and Human Welfare. 3 Credit Hours.

Health and development links; macroeconomic policies and their impact on social equity; poverty and structural inequities; and other key issues that influence human development.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 572. Global Health Policy and Ethics. 3 Credit Hours.

National, regional and global health policies with special consideration to ethical and human rights issues; policies and the moral considerations that shape public health policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 573. Disasters, Terrorism and Global Public Health. 3 Credit Hours.

The historical processes and present trends of disasters, terrorism, humanitarian emergencies and their impact on human health, safety and security.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 580. Latin American Comparative Politics. 3 Credit Hours.

The major intellectual debates shaping the field of comparative politics including: (1) development, (2) military politics, (3) democratization and (4) the emergence of new social movements.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 581. Politics and Ideology in Latin America. 3 Credit Hours.

The roles played by both "class" and the "new social movements" in the emergence of new modes of political representation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 584. Latin American Thought. 3 Credit Hours.

The evolution of Latin American thought through political and intellectual history; the classical writings of the main "pensadores", and a comparative analysis of contemporary ideological trends.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 586. Brazil in Transition. 3 Credit Hours.

The social, economic, cultural transformations shaping Brazilian politics. In addition to visiting Rio de Janeiro and Salvador, there will be seminars with Brazilian academics and social and political activists.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 590. EURO-LATIN AMER REL (European-Latin American Relations). 3 Credit Hours.

This course deals primarily with five main themes: shared history between Europe and Latin America; mutual transfer of ideas (ideologies and political thought), perceptions (images and stereotypes), people (voluntary and slavery), and goods (trade and investment); foreign policies of main European states and the European Community toward Latin America; an analysis of some specific country cases (Spain, especially) and issues (regional integration, among them); and how the above have affected inter-American relations and the hegemonic role of the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 591. The European Union. 3 Credit Hours.

The European Union's history, institutions, policies and contemporary issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 592. European Union and the World. 3 Credit Hours.

The European Union's development, its main institutions and policies followed by an analysis of the main features of the European Union's external relations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 593. European Security. 3 Credit Hours.

Regional security in Europe, focusing on NATO expansion, EU expansion, Russian foreign policy, and related issues.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 594. European Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 595. European Social Movements. 3 Credit Hours.

The major social movements active today throughout Europe including those concerned with the environment, agriculture, poverty, racism, defending social democracy, the rights of workers, minorities, and women.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 596. POST-SOVIET TOPICS (Post-Soviet Topics). 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 599. Special Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 601. IR Theory. 3 Credit Hours.

Introduces students to key historic events, themes, concepts, and theories that have animated the practice and scholarship of international relations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 603. Dissertation Proposal. 3 Credit Hours.

A workshop designed to assist doctoral students in the preparation of a proposal for their dissertation research projects.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

INS 604. Int Rel Topics II. 3 Credit Hours.

Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 605. Int Relations Topics. 3 Credit Hours.

Selected topics in International Relations Theory. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 606. Issues In Ins. 3 Credit Hours.

Analysis of current issues of international importance.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 607. INT'L ECON TOPICS II (International Economic System Topics). 3 Credit Hours.

Selected topics in International Economics. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 608. Intl Econ Topics. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 609. Globalization and Human Rights. 3 Credit Hours.

The integration of markets has many concerned for the political and economic rights of the common citizen. This course examines The effect of globalization on the human rights standards throughout the world.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 610. Graduate Seminar in INS. 3 Credit Hours.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 611. Int Relatns Meth Ii (International Relations Methodology Ii). 3 Credit Hours.**

Introduces graduate students to issues of research design and research methods in International Relations. The course will focus on three main methodological approaches in political science: qualitative case study, quantitative research and formal modeling. Apart from examining the principles guiding the choice of methods (and the trade offs involved in that choice), the course will examine how these methods have been applied to the study of three major sub-fields of international relations: international political economy, security studies, and international environmental regimes. It also aims to provide the students with basic knowledge on how to apply these methods to their own research.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**INS 612. Graduate Seminar In Qualitative Research Methods. 3 Credit Hours.**

The main goal of this seminar is to enable students to become proficient in qualitative research methods. The seminar covers specific research methods and techniques, their relevance and limitations, their relationships with philosophical perspectives, epistemological and methodological debates, and ethical and practical considerations involved in qualitative research. Ethnographic methods, the use of social network analysis in qualitative research, the logics of inquiry in case study methods, grounded theory, and types of discourse and contents analysis, are amongst the topics covered. This is a hands-on graduate seminar in which the students are encouraged to think creatively on which method(s) could make their research of complex political, social, and cultural phenomena more rigorous and sophisticated by applying methods and techniques learned in class.

Components: SEM.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 613. Transnational Social Movemen. 3 Credit Hours.**

Focuses on global civic activism and contentious politics, with particular attention to transnational non-state actors - NGOs, social movements, environmental protection, and the emergence of a global civil society.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 614. Comparative Political Regimes. 3 Credit Hours.**

Literature concerned with the transition from authoritarianism to democracy in various parts of the world.

Components: SEM.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 616. National Security. 3 Credit Hours.**

The central issues concerning European security since World War II, with emphasis on the period since the end of the cold war.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 617. National Security and Foreign Policy. 3 Credit Hours.**

Explores alternative conceptualizations of "security" and the new challenges to U.S. national security that have emerged in the Post-Cold War era.

Components: LEC.**Grading:** GRD.**Typically Offered:** Summer.**INS 618. Regional Topics II. 3 Credit Hours.**

Selected topics in International Business. Subtitles describing the topics to be offered will be shown in parentheses in the printed class schedule, following the title.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 619. Internship. 1-3 Credit Hours.**

A research paper is required for this course. The student works with a selected faculty member who determines the length and scope of the project. The Student is responsible for finding the internship position.

Components: THI.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**INS 620. International Migration and the Health Care System. 3 Credit Hours.****Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**INS 622. Advanced Seminar in International Economics. 3 Credit Hours.**

This is a seminar in International Economics at the graduate level. The first part consists of a rigorous but nontechnical presentation of international trade theory, followed by a discussion of the main arguments for protection and their validity. The third part of the course analyzes the process of globalization; its meaning, measurement and effects. A final brief section is devoted to the determination of exchange rates and the international monetary system.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**INS 627. Negotiation and Bargaining. 3 Credit Hours.**

Examines the nature of diplomatic negotiation through readings and discussion of international negotiation and through the case method, selecting several cases of high-level policy issues in which the United States has been a principal actor.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**INS 628. International Peace and Conflict Resolution. 3 Credit Hours.**

The major sources of conflict, and what resources are available for making and keeping the peace? This class introduces students to the most fundamental concerns of the field of International Relations (IR), and especially of its sub-field IPCR.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.

INS 629. International Organizations. 3 Credit Hours.

The role, function, and impact on states of international governmental and non-governmental organizations in critical areas like peace and security, human rights, economic development, and environmental degradation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 630. Advanced Seminar in Comparative Studies. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 637. Comparative Political Economy. 3 Credit Hours.

Compares how domestic politics and macroeconomic policies interact with globalization. Case studies include welfare states in the U.S. and Europe, East Asian development, post communist transitions and market restructuring in Latin America and Africa.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 638. US-Latin American Relations. 3 Credit Hours.

Political, economic and strategic aspects of U.S.-Latin American relations; the historical experience and contemporary issues, including the influence of extra-regional parties such as Europe and China.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 639. Globalization and Health. 3 Credit Hours.

Globalization and its benefits and threats to public health; the relationship between global economic, political, social, cultural, environmental and technological changes and their impact on human health.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 641. Advanced ISC Seminar. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 642. Drug-Trafficking in the Americas. 3 Credit Hours.

The political economy of the U.S.-Latin American drug trade in the 20th Century along with the dynamics of the U.S.-led war on drugs through the first years of the Twenty First Century.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

INS 644. International Development and Human Welfare. 3 Credit Hours.

Health and development links; macroeconomic policies and their impact on social equity; poverty and structural inequities; and other key issues that influence human development.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 645. Disasters, Terrorism and Global Public Health. 3 Credit Hours.

The historical processes and present trends of disasters, terrorism, humanitarian emergencies and their impact on human health, safety and security.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 646. Politics and Ideology in Latin America. 3 Credit Hours.

The roles played by both "class" and the "new social movements" in the emergence of new modes of political representation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 647. Latin American Thought. 3 Credit Hours.

The evolution of Latin American thought through political and intellectual history; the classical writings of the main "pensadores", and a comparative analysis of contemporary ideological trends.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 648. Brazil in Transition. 3 Credit Hours.

The social, economic, cultural transformations shaping Brazilian politics. In addition to visiting Rio de Janeiro and Salvador, there will be seminars with Brazilian academics and social and political activists.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 649. EURO-LATIN AMER REL (European-Latin American Relations). 3 Credit Hours.

This course deals primarily with five main themes: shared history between Europe and Latin America; mutual transfer of ideas (ideologies and political thought), perceptions (images and stereotypes), people (voluntary and slavery), and goods (trade and investment); foreign policies of main European states and the European Community toward Latin America; an analysis of some specific country cases (Spain, especially) and issues (regional integration, among them); and how the above have affected inter-American relations and the hegemonic role of the United States.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 650. Advanced Regional Seminar. 3 Credit Hours.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 653. The European Union. 3 Credit Hours.

The European Union's history, institutions, policies and contemporary issues.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 654. European Union and the World. 3 Credit Hours.

The European Union's development, its main institutions and policies followed by an analysis of the main features of the European Union's external relations.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 655. POST-SOVIET TOPICS (Post-Soviet Topics). 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 656. Special Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 657. US Foreign Policy. 3 Credit Hours.

The leading approaches to the analysis of American foreign policy. Particular emphasis will be placed on the post-Cold War period and the new challenges to U.S. foreign policy of the 21st century.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 664. International Law. 3 Credit Hours.

How international law affects the conduct of states. Issues include jurisdiction, diplomatic immunity, the use of armed force, peaceful dispute settlement among states, human rights, and the International Criminal Court.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

INS 665. The World Before European Domination. 3 Credit Hours.

The historical roots of the contemporary international system. Its objective is to question the standard Eurocentric perspective on the rise of the West to a dominant position in the global system.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

INS 672. Global Health Policy and Ethics. 3 Credit Hours.

National, regional and global health policies with special consideration to ethical and human rights issues; policies and the moral considerations that shape public health policy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

INS 693. European Security. 3 Credit Hours.

Regional security in Europe, focusing on NATO expansion, EU expansion, Russian foreign policy, and related issues.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

INS 694. European Topics. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

INS 699. Readings in International Studies. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 810. Master's Thesis. 1-6 Credit Hours.

The student working on his/her master's thesis enrolls for credit, in most departments not to exceed six, as determined by his/her advisor. Credit is not awarded until the thesis has been accepted.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

INS 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in INS 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 825. Continuous Registration--Master's Study. 1 Credit Hour.

To establish residence for non-thesis master's students who are preparing for major examinations. Credit not granted. Regarded as full time residence.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

INS 830. Doctoral Dissertation. 1-12 Credit Hours.

A total of 12 hours of INS 730 is required of all candidates for the Ph.D. Not more than 12 dissertation credits may be taken during the Fall or Spring semesters, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

INS 840. Post-candidacy Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the Ph.D. who have advanced to candidacy. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of INS 740 may be taken in a regular semester, nor more than six in a summer session.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

INS 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Italian (ITA)

ITA 101. Elementary Italian I. 3 Credit Hours.

Drill in pronunciation, grammatical principles, reading and translation, oral and written exercises. Normally closed to students who have completed two years of high school Italian. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ITA 102. Elementary Italian II. 3 Credit Hours.

Continuation of ITA 101. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ITA 200. Discussion and Debates about Contemporary Italian Society. 3 Credit Hours.

Through recent movies, discussions, and formal debates, students will improve their spoken Italian while gaining understanding of contemporary society in Italy.

Prerequisite: ITA 211.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ITA 201. Intermediate Italian I. 3 Credit Hours.

Integrated grammar review. Diverse selection of readings: stories, plays, essays, interviews. Practice in speaking and in writing. Class conducted in Italian.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ITA 202. Intermediate Italian II. 3 Credit Hours.

This course uses different genres of texts (portraits, descriptions, short stories, film reviews, magazines) to explore different ways of writing and to prepare students for 300-level work. Structured in a workshop format, the course also develops conversational skills. Class conducted in Italian. Closed to native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ITA 301. Interpreting Literary And Cultural Texts In Italian. 3 Credit Hours.

Tools for the interpretation and analysis of Italian literary and cultural materials. Acquisition of terminology and theories through the study of the main literary genres (prose, poetry, and drama) and a complementary genre of cultural analysis (e.g., film studies, cultural studies, etc.). Emphasis on critical writing skills. Closed to native speakers formally educated in Italian.

Prerequisite: ITA 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 310. Topics in Italian Studies in Translation. 3 Credit Hours.

Intensive study, in English translation, of a topic, theme, author, period, or literary movement. May be repeated when the topic varies. Writing Credit. Prerequisite: ENG 106 or equivalent.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 312. Italian Civilization. 3 Credit Hours.

The intellectual life of Italy, political and social institution arts, letters, and sciences. Collateral readings and reports.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 314. Topics In Early Modern Italian Literature In Translation. 3 Credit Hours.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 315. Topics In Gender And Sexuality In Translation. 3 Credit Hours.

This course presents issues dealing with gender and sexuality in Italy in a variety of chronological settings, using the appropriate sources for the topic (e.g., films, newsprint and TV ads, novels). This course does not fulfill the foreign language requirement.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 316. Topics In 18Th-And 19Th Century Italian Literature In Translation. 3 Credit Hours.

An introduction to one or more aspects of Italian literature of the 18th and 19th centuries in translation: e.g., the role of opera in Italian culture; the literature of the Italian Risorgimento; the historical novel. This course does not fulfill the foreign language requirement.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 317. Topics In 20Th Century Italian Literature In Translation. 3 Credit Hours.

An introduction to one or more aspects of Italian literature of the 20th century in translation: e.g., the experience of war, the child narrator in Calvino and Ammaniti, the experimental novels of the 1960s and '70s. This course does not fulfill the foreign language requirement.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 319. Travels Italy. 3 Credit Hours.

Develops an understanding of Italy's contemporary image in the world by, first, presenting some of the earlier representations of Italy and Italians from Dante, through the Renaissance and Baroque periods, to the present; and second, by looking at the various cultures coming into contact with the Italian one. It attempts to come to grips with notions of representation, ethnicity, ethnocentrism, and stereotypes. Taught in English and does not fulfill CAS language requirement.

Prerequisite: ENG 106 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 321. Special Topics in Italian Literature. 3 Credit Hours.

Introduction to one or more aspects of Italian literature of the Middle Ages in translation: e.g., Dante, the *Stil novo*, the literature of the Black Plague.

Prerequisite: ITA 212 or equivalent.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 330. Topics In Gender And Sexuality In Italian Culture. 3 Credit Hours.

Issues dealing with gender and sexuality in Italy in a variety of chronological settings, using the appropriate sources for the topic (e.g., films, newsprint and TV ads, novels). Taught in Italian.

Prerequisite: ITA 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 363. Introduction to Medieval and Renaissance Italian Literature. 3 Credit Hours.

Culture and literature in Italian vernacular from its earliest document through the Renaissance. May be used to fulfill humanities literature requirement. Writing credit.

Prerequisite: ITA 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 364. Introduction to 17th-19th Century Italian Literature. 3 Credit Hours.

Italian culture and literature from the Baroque to the nineteenth century. May be used to fulfill humanities literature requirement. Writing credit.

Prerequisite: ITA 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 365. Introduction to 20th Century Italian Literature. 3 Credit Hours.

Italian culture and literature of the twentieth century. May be used to fulfill humanities literature requirement. Writing credit.

Prerequisite: ITA 212 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 394. Internship. 1-3 Credit Hours.

On-site experience in an Italian-speaking cultural, business, or not-for-profit organization. Normally 50 internship hours are required per credit earned (the host will supply documentary evidence of hours worked).

Permission of a faculty member in ITA required.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ITA 395. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

ITA 396. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

ITA 397. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

ITA 398. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

ITA 399. Transfer Credits. 1-3 Credit Hours.

Awarded for course work at another institution for which UM has no direct equivalent.

Components: LEC.

Grading: GRD.

ITA 400. Creative Writing in Italian. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 432. Italian for Business and for Business Travelers. 3 Credit Hours.

This course will allow non-native speakers of Italian communicate with native Italian speakers in a business environment by providing students with the basic vocabulary and professional expressions that are most often used in the business arena. Target business areas will be addressed through specific exercises, individual presentations, pair and group work, class discussion, preparing a Portfolio and a Final written Project, while working with authentic materials.

Prerequisite: ITA 212. Requisite: Course is closed to Native speakers.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 592. Directed Readings. 1-3 Credit Hours.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ITA 593. Directed Readings. 1-3 Credit Hours.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**ITA 625. Italian for Graduate Research. 0 Credit Hours.**

Grammatical structuring, verb tenses, and word families necessary for reading text with minimal use of a dictionary. May fulfill the Foreign Language Reading Competency Requirement (consult your graduate advisor).

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.**ITA 691. Directed Readings. 1-3 Credit Hours.****Components:** THI.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.

Japanese (JPN)

JPN 101. Elementary Japanese I. 3 Credit Hours.

Introduction to modern Japanese: pronunciation, grammar, conversation, and the elements of the writing system. Closed to native speakers.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**JPN 102. Elementary Japanese II. 3 Credit Hours.**

Continuation of JPN 101. Introduction to modern Japanese: pronunciation, grammar, conversation, and the elements of the writing system. Closed to native speakers.

Prerequisite: JPN 101 or equivalent.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**JPN 201. Intermediate Japanese I. 3 Credit Hours.**

Continuation of JPN 102. Grammar, composition and readings in modern Japanese, which will introduce students to aspects of Japanese customs, history and culture. Closed to native speakers.

Prerequisite: JPN 102 or equivalent.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall.**JPN 202. Intermediate Japanese II. 3 Credit Hours.**

Continuation of JPN 201. Grammar, dialogues, and readings, designed to integrate listening, comprehension, speaking, reading and writing skills. Discussion of the Japanese culture, history, and customs. Closed to native speakers.

Prerequisite: JPN 201 or equivalent.

Components: LEC.**Grading:** GRD.**Typically Offered:** Spring.**JPN 203. Advanced Japanese I. 3 Credit Hours.**

JPN 203 (Advanced Japanese I) is a continuation of JPN 202. This course will solidify and advance students' grammatical knowledge and will improve their application skills in all four areas: speaking, listening, reading, and writing, dealing with various topics in Japanese at an advanced level. In addition to improving their language abilities, students will also be exposed to different areas of Japanese culture.

Prerequisite: JPN 202.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**JPN 210. Introduction to Japanese Culture. 3 Credit Hours.**

Prerequisite: JPN 102.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.

Journalism and Media Management (JMM)

JMM 102. Understanding Media And Content In The Digital Age. 3 Credit Hours.

This course examines how traditional and new media industries are economically structured and how various media content influences audiences and culture. Historical, technological, and regulatory issues related to the different media platforms will also be discussed from a comparative perspective.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**JMM 106. Visual Design. 3 Credit Hours.**

This course is an introduction to the principles of design, typography, color theory, usability and interactivity as they apply to the layout and design of content for print and digital media.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**JMM 108. Writing For The Digital Age. 3 Credit Hours.**

This course provides students with an understanding of writing styles appropriate for communicating in the digital age, with particular emphasis on grammar, spelling, syntax and clarity. It provides a solid foundation for further practice and specialization in various types of multimedia communication.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**JMM 206. Special Topics In Journalism And Media Management I. 3 Credit Hours.**

This course subject matter varies according to announced special topics. See class schedule for details.

Components: LEC.**Grading:** GRD.**Typically Offered:** Offered by Announcement Only.

JMM 208. Fundamentals Of Newsgathering. 3 Credit Hours.

Skill development in gathering facts and other material for, and in preparation of, news stories in a variety of genres across platforms. Focus on gathering information from multiple sources, analyzing and organizing information for dissemination, and presenting the most pertinent facts clearly and cohesively to multiple media outlets. Prerequisites: JMM 111 or JMM 108.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 210. Writing About the Arts. 3 Credit Hours.

The aim of JMM 210 is to help you develop skills in writing and reporting about entertainment and the arts.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 221. Introduction to Documentary Photography. 3 Credit Hours.

Course is designed to develop skills in visual storytelling. Students will learn to produce images and recognize what makes good photographs in terms of content, composition, and technical quality.

Prerequisite: JMM 106.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 233. Television Performance. 3 Credit Hours.

Introduction to communication concepts and skills involved in on-camera duties such as anchoring, interviewing and live reporting.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 235. Radio Production and Performance. 3 Credit Hours.

Introduction to equipment and procedures of radio. Production of radio programs and formats, editing, announcing, sequencing program elements, and designing program formulas are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 245. Introduction to Electronic Media Production. 3 Credit Hours.

Introduction to the theory, process, and procedure of electronic media production. Lecture and laboratory are included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 285. Applied Statistics for Journalism and Media Management. 3 Credit Hours.

This course provides students an introduction to descriptive and bivariate inferential statistics to better understand and use media research and analysis. Computer applications are included.

Prerequisite: MTH 101. or Requisite: Qualified AP or AB Score or Placement Exam Administered by the Math Department.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 300. Journalism Practicum. 1-3 Credit Hours.

Prescribed study and supervised work with faculty and staff of the student news paper or related news media. Students receive first-hand knowledge and experience in a working news environment.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 301. Media Research And Analysis. 3 Credit Hours.

Survey of qualitative and quantitative research methods used to collect and analyze data on media audiences. Course also covers metrics used by media industries. Practice in conducting small-scale audience measurement is included.

Prerequisite: JMM 102. Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 302. Electronic Media Law. 3 Credit Hours.

Course provides analysis of laws and other forces that influence broadcasting, cable, and online media operations. Examines the application of the First Amendment to media operations with a focus on press law.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 303. Communication Law And Policy. 3 Credit Hours.

A study of First Amendment law and theories concerning libel, privacy, copyright, advertising, corporate communications, reporter privilege, free-press/fair trial, pornography, access to government information, broadcasting and new communication technologies. Discussion of international perspectives on media regulation

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 305. Legal Issues In Media Management. 3 Credit Hours.

Examination of the legal environment affecting contemporary media businesses including broadcasting, advertising, public relations, web-based media, and print publications. Focus on U.S. law, with introduction of international and comparative perspectives.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 306. Special Topics In Journalism And Media Management II. 3 Credit Hours.

This course subject matter varies according to announced special topics. See class schedule for details.

Requisite: Sophomore Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 307. Mobile Journalism. 3 Credit Hours.

This course provides an introduction to the fundamental procedures in the production and development of mobile storytelling.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 309. Data Journalism. 3 Credit Hours.

This course teaches data analysis and interactive deployment of the World Wide Web and other digital platforms. Students will learn to analyze data for journalistic work and will be expected to create and deploy database-driven applications.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 313. Media Sales. 3 Credit Hours.

Operation of sales departments within media outlets. Course includes the preparation and delivery of sales presentations as well as the use of audience reports.

Prerequisite: JMM 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 314. Media Programming. 3 Credit Hours.

Course covers categories and sources for selecting program materials used in radio, television, cable television, and other program services. Strategies employed in devising program schedules and understanding audience behaviors are also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 317. Broadcast Journalism. 3 Credit Hours.

Preparation of materials for presentation through the broadcast/cable media with emphasis on news writing for oral presentation by studio anchors and field reporters. Course examines issues facing the profession of broadcast journalism, radio, and TV reporting techniques and news program formats.

Prerequisite: JMM 245.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 319. History of Journalism. 3 Credit Hours.

The development and impact of American journalism.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 331. Information Graphics and Visualization. 3 Credit Hours.

Introduction to informal graphic procedures and practices as they pertain to print and online media. Layout and design typography, mechanical production techniques, and production vocabulary will be an integral part of this course.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 333. Social Media. 3 Credit Hours.

Examination of best practices for use of social media for gathering, disseminating, and promoting information.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 341. Web Design. 3 Credit Hours.

This course covers the basic aspects of interaction design and web development, focusing on production processes. It provides an overview of web design concepts including usability, accessibility, information architecture, basic animation, and graphic design; all discussed in the context of the web environment. This course further offers an introduction to fundamental and emerging web trends.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 345. Intermediate Electronic Media Production. 3 Credit Hours.

Planning and execution of complex field, studio, and multimedia production in a variety of lengths and formats. High level skills in television control room situations and non-linear editing will be used to produce audio, video, and online content.

Prerequisite: JMM 245.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 361. Advanced Documentary Photography. 3 Credit Hours.

Advanced Documentary Photography is a class designed to improve the visual storytelling news gathering, and photographic technical skills introduced in the introductory course.

Prerequisite: JMM 221.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 381. Newspaper Editing and Layout. 3 Credit Hours.

Introduction to electronic editing and development of skills in copy editing, headline writing, picture editing, and newspaper layout.

Prerequisite: JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 382. Publication Planning and Editing. 3 Credit Hours.

Introduction to editing and design, with emphasis on the development of skills in editing copy and photos, writing headlines, news judgment and designing print publications and websites.

Prerequisites: JMM 216 or JMM 208, JMM 106.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 401. Editorial Interpretation of Contemporary Events. 3 Credit Hours.

Critical examination of fundamental issues in public life. Preparation of editorials and interpretive articles for mass media are included.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 402. Strategic Media Management. 3 Credit Hours.

This course focuses on strategy analysis, formulation, implementation, and evaluation in managing media enterprises. Media cases are used to apply and discuss strategies.

Prerequisites: JMM 403 or JMM 435. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 403. Media Economics. 3 Credit Hours.

Economic concepts, practices, and issues as they relate to the mass media industry.

Requisite: Junior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 406. Special Topics In Journalism And Media Management III. 3 Credit Hours.

This course subject matter varies according to announced special topics. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 407. Media Entrepreneurship. 3 Credit Hours.

Students generate comprehensive business plans for a proposed media enterprise. Organizational, financial, and marketing aspects of starting a media business are discussed.

Requisite: Senior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 408. International Electronic Media Systems. 3 Credit Hours.

Seminar on world broadcasting systems and trans-national communication services. Discussion of contemporary issues involving electronic media systems worldwide.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 409. Advanced Feature Design. 3 Credit Hours.

Advanced newspaper, magazine, and electronic design. Students will develop the skills necessary to produce strong visual packages combining type, photography, artwork, and white space. The course will cover advanced design and traditional reproduction techniques for art and copywriting as well as on-line presentations.

Prerequisites: JMM 106 or STC 202, STC 203.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 414. Evolution and Impact of Television Content: The American Sitcom. 3 Credit Hours.

The seminar will examine how social, economic and political factors impacted the development and evolution of the content of sitcoms, as well as the impact such content had on American society.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 417. Advanced Broadcast Journalism. 3 Credit Hours.

This capstone course concentrates on gathering and preparing news stories for presentation in news programs. Includes field reporting, editing, preparation of visual and aural TV elements, writing, producing and performing for on-air presentation. Lecture and laboratory are included.

Prerequisites: JMM 245, JMM 317.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 419. Interactive Storytelling. 3 Credit Hours.

This course explores how storytelling is reinventing itself utilizing the new digital communication tools available. It will cover linear and non-linear storytelling techniques and production processes.

Prerequisites: JMM 106, JMM 245, JMM 341. Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 422. Programming For Interactivity. 3 Credit Hours.

This course is a multimedia class that will teach the fundamental programming skills required to create compelling online multimedia stories. Programming taught in this class caters specifically for non-programmers who want to learn how to present their work online in an interactive manner.

Prerequisite: JMM 341.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 427. Television Newscast. 3 Credit Hours.

Studio anchoring, newscast producing, and field reporting for news and public affairs programming.

Prerequisite: JMM 417.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 434. Media Distribution for Film and Television. 3 Credit Hours.

This course covers the various aspects of the distribution process for films and television programs through conventional and emerging channels.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 435. Media Technology. 3 Credit Hours.

This course examines the deployment, use, and impact of communication technologies in various media contexts from an economic, regulatory, and social perspective.

Prerequisite: JMM 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 442. Online Journalism. 3 Credit Hours.

A study of the issues, skills and practices related to the online presentation of news and information in a convergent media environment.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 444. Public Affairs Reporting. 3 Credit Hours.

Emphasis on reporting, writing and analysis about institutions, issues and actions of local government, and their effects on society.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 445. Advanced Electronic Media Production. 3 Credit Hours.

The integration of the producer's role and the structure of program design as they relate to day-to-day production operations. Lecture and laboratory are included.

Prerequisite: JMM 345.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 446. Travel Writing. 3 Credit Hours.

A study of the major types and styles of travel news and features stories for newspapers, magazines, newsletters, and websites.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 447. In-depth Journalism and Media Convergence. 3 Credit Hours.

A capstone experience that requires students to use effectively their full range of journalistic knowledge, newsgathering, and writing skills to prepare news and information for different media platforms.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 461. Seminar in News Ethics and Problems. 3 Credit Hours.

Ethical, practical, and professional problems of news communicators in society.

Requisite: Junior Status or Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 495. Internship In Journalism And Media Management. 1-3 Credit Hours.

Prescribed study and supervised work with professionals in Journalism and Media Management.

Requisite: Sophomore Status, cumulative GPA of 2.5, and Permission of Instructor.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 499. Projects and Directed Research. 1-3 Credit Hours.

Individual study. No more than three credits may be counted toward a Communication major or minor.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 510. Comparative Media Systems. 3 Credit Hours.

This course deals with issues in international news gathering and distribution, giving special attention to Latin America and the Caribbean. The class takes a comparative approach, looking at media systems in the United States and other nations.

Requisite: Sophomore Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 511. Global Media. 3 Credit Hours.

An analysis of issues and practices surrounding globalization, regionalization, and global/local as they relate to media industries, journalism, and communication.

Requisite: Sophomore Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 513. Computer-Assisted Reporting. 3 Credit Hours.

Use of computer applications for newsgathering with emphasis on the World Wide Web, commercial online services, and database tools.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 515. Reporting and the Internet. 3 Credit Hours.

Overview of uses of online computer services for newsgathering and distribution with emphasis on the Internet.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 517. Television News Reporting. 3 Credit Hours.

Gathering and preparation of news stories for presentation in news programs. Includes field reporting, editing, preparation of visual and aural elements, writing, producing and performing for on-air presentation.

Prerequisites: JMM 245, JMM 317.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 521. Seminar in Visual Storytelling. 3 Credit Hours.

An advanced seminar class designed to enhance the knowledge and practice of the visual storytelling narrative. This seminar stresses the importance of converging media, still images, video, and sound. Particular emphasis will be placed upon the creation of a multimedia portfolio.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 522. Advance Infographics And Data Visualization. 3 Credit Hours.

This course is an introduction to the visual display of information in digital and interactive media, with a special focus on the encoding of data by means of statistical charts, maps, and diagrams.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 523. Sports Reporting. 3 Credit Hours.

An analysis of sports journalism that will develop students' skills in sports reporting and sports writing. Discussions range across the entire field of sports reporting, including broadcasting, but the greatest emphasis is concentrated on sports reporting and writing for newspapers and magazines.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 527. Television News Producing. 3 Credit Hours.

Studio anchoring, newscast producing and field reporting for news and public affairs programming. Live field reporting and field and studio interviewing techniques are covered.

Prerequisites: JMM 417 or JMM 517.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 531. Database Journalism. 3 Credit Hours.

This course teaches data analysis and interactive deployment of data of the World Wide Web and other digital platforms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 533. Social Media For Journalists. 3 Credit Hours.

Examination of best practices for use of social media for gathering, disseminating, and promoting information.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 537. The Business Of Modern Journalism. 3 Credit Hours.

Provides an examination of the evolving business models for legacy news organizations as well as discussion of entrepreneurial opportunities for news content in new media and digital platforms.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 541. Advanced Audio Video Narratives. 3 Credit Hours.

This course examines uses of audio and video to communicate journalism. Students learn to investigate, gather content, and produce documentary stories primarily for online distribution.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 544. Feature Writing. 3 Credit Hours.

Analyzing and writing feature articles for magazines, newspapers, and other news media.

Prerequisites: JMM 216 or JMM 208.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 547. Magazine Planning. 3 Credit Hours.

This course is a magazine planning class where students will create a 32-page print/digital cross-platform niche publication from scratch. It will be based on a business model creating a design and content for a specific audience.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 550. 3D Design and Graphics. 3 Credit Hours.

This course focuses on the use of 3D Design software for communication and how to integrate with other print and digital technologies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 551. Advanced Programming. 3 Credit Hours.

This course explores the role of the programmer as journalist. Students will perform the basic tasks of journalism from a programmatic perspective including: gathering, distilling and presenting information. Students will learn how to gather information from public databases and government websites. They will learn how to automate processes for filtering information and learn how to present this information in a visual and interactive news report. Students will also learn how to combine multiple sources of information, to personalize information for the end reader, and account for the relevant permutations of the data. Students will learn to build and query databases as well as mine and visually present the information using programming languages such as PHP and Python. Rapid development frameworks such as Django, Zendand, Symfony will also be covered in the class.

Components: LEC.

Grading: SUS.

Typically Offered: Summer.

JMM 560. Team Multimedia Project. 1-3 Credit Hours.

Students will work in a team to produce a documentary multimedia project in conjunction with one or more partner universities. Students will study the genre of documentary multimedia storytelling, research their assigned topic(s), content-gather, edit, wireframe, design and program the project and produce it on multiple platforms depending on the topic and intended audience. Students will use audio, photographic, video, infographic and text reporting tools in producing the project. They will also study methodologies for evaluating multimedia and beta test the site using established research methodologies.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

JMM 592. Special Topics In Journalism And Media Management. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Requisite: Junior, Senior, and Graduate Status.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 599. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. Course may be repeated to a maximum of six credits.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 601. Editorial Interpretation of Contemporary Events. 3 Credit Hours.

Critical examination of fundamental issues in public life. Preparation of editorials and interpretive articles for mass media are included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 605. News Technologies.. 3 Credit Hours.

This course emphasizes how television, digital, and multimedia technologies contribute to the storytelling process. Understanding of production theories and news processes will be gained through hands on work with television and multimedia projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 606. Multimedia Design. 3 Credit Hours.

This is a project-based course in multimedia design, with emphasis on visual concepts and graphics development. Students will be learning about the various software packages to design and integrate interaction into their projects. Topics covered include preparing existing content for multimedia journalism, animation, layout for interactive media, typography, photography and usability.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 607. Broadcast Journalism. 3 Credit Hours.

Advanced instruction in techniques of news writing and field reporting, including conducting research for stories, preparing complete field packages for newscasts, filing live remotes, and conducting interviews.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 608. Long-Form Public Affairs Programming. 3 Credit Hours.

Development and production of longer form news, information magazine, and documentary style programming.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

JMM 609. Internship In Journalism And Media Management. 1-3 Credit Hours.

Prescribed study and supervised work with professionals in newspapers, magazines, web sites or related news media.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 610. Comparative Media Systems. 3 Credit Hours.

This course deals with issues in international news gathering and distribution, giving special attention to Latin America and the Caribbean. The class takes a comparative approach, looking at media systems in the United States and other nations.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 611. Newswriting and Reporting Seminar. 3 Credit Hours.

Development of newswriting and reporting skills for news media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 612. History of Journalism Seminar. 3 Credit Hours.

The development and impact of journalism in America traced through industry leaders and events.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 613. Computer-Assisted Reporting. 3 Credit Hours.

Use of computer applications for newsgathering with emphasis on the World Wide Web, commercial online services, and database tools.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 614. Media Law and Ethics Seminar. 3 Credit Hours.

A survey of legal and ethical issues concerning First Amendment theories and practices regarding defamation, privacy, freedom of information, free press vs. fair trial, reporter privilege, access to media, intellectual property, obscenity, broadcasting, and new media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 615. Writing and Reporting Across Platforms. 3 Credit Hours.

An introduction to professional operating practices in multimedia journalism with emphasis on news writing and news production skills.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 617. Television News Reporting. 3 Credit Hours.

Gathering and preparation of news stories for presentation in news programs. Includes field reporting, editing, preparation of visual and aural elements, writing, producing and performing for on-air presentation.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 618. International Journalism. 3 Credit Hours.

News gathering, transmission, and distribution outside the United States, with emphasis on Latin America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 619. Interactive Storytelling. 3 Credit Hours.

Digitization allows us to merge several forms of media that were not connected in the past. This course is intended as an exploration of how storytelling is re-inventing itself utilizing the new digital communication tools available to us today. This course will cover linear and non-linear storytelling techniques and production processes.

Prerequisites: JMM 628, JMM 622, JMM 630, CIM 690. Or Requisite:

Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 620. Reporting and the Internet. 3 Credit Hours.

Overview of uses of online computer services for newsgathering and distribution with emphasis on the Internet.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 621. Global Media. 3 Credit Hours.

An analysis of issues and practices surrounding globalization, regionalization, and global/local as they relate to media industries, journalism, and communication.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 622. Infographics And Data Visualization. 3 Credit Hours.

This course is an introduction to the visual display of information in digital and interactive media, with a special focus on the encoding of data by means of statistical charts, maps, and diagrams.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

JMM 623. Sports Reporting. 3 Credit Hours.

An analysis of sports journalism that will develop students' skills in sports reporting and sports writing. Discussions range across the entire field of sports reporting, including broadcasting, but the greatest emphasis is concentrated on sports reporting and writing for newspapers and magazines.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 624. Seminar in Editing and Design for Print and Websites. 3 Credit Hours.

Theory and practice in news media copy editing, layout, and design.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 625. Advanced Newsgathering and Writing Seminar. 3 Credit Hours.

Refining news writing and reporting skills for the media.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 626. Specialized Writing and Reporting Seminar. 3 Credit Hours.

Techniques in writing and reporting about specialized and complex subjects for news media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 627. Television News Producing. 3 Credit Hours.

Studio anchoring, newscast producing and field reporting for news and public affairs programming. Live field reporting and field and studio interviewing techniques are covered.

Components: LAB.

Grading: GRD.

JMM 628. Seminar in Visual Storytelling. 3 Credit Hours.

An advanced seminar class designed to enhance the knowledge and practice of the visual storytelling narrative. This seminar stresses the importance of converging media, still images, video, and sound. Particular emphasis will be placed upon the creation of a multimedia portfolio.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

JMM 630. Programming for Interactivity. 3 Credit Hours.

This course is a multimedia class that will teach the fundamental programming skills required to create compelling online multimedia stories.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 631. Database Journalism. 3 Credit Hours.

This course teaches data analysis and interactive deployment of data of the World Wide Web and other digital platforms.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 633. Social Media. 3 Credit Hours.

Examination of best practices for use of social media for gathering, disseminating and promoting news.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 634. Media Distribution. 3 Credit Hours.

This course covers the various aspects of the distribution process for films and television programs through conventional and emerging channels.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 635. The Broadcasting, Cable, and Electronic Media Industry. 3 Credit Hours.

Examination of broadcasting, cable, and related electronic media from a business perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 637. The Business Of Modern Journalism. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JMM 641. Advanced Audio Video Narratives. 3 Credit Hours.

This course examines uses of audio and video to communicate journalism. Students learn to investigate, gather content, and produce documentary stories primarily for online distribution.

Prerequisite: JMM 628. Or Requisite: Permission of Instructor.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 644. Feature Writing. 3 Credit Hours.

Analyzing and writing feature articles for magazines, newspapers, and other news media.

Components: LAB.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 646. Travel Writing. 3 Credit Hours.

A study of the major types and styles of travel news and features stories for newspapers, magazines, newsletters, and websites.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 647. Magazine Planning. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 649. Team Multimedia Project. 1-3 Credit Hours.

Students will work in a team to produce a documentary multimedia project in conjunction with one or more partner universities. Students will study the genre of documentary multimedia storytelling, research their assigned topic(s), content-gather, edit, wireframe, design and program the project and produce it on multiple platforms depending on the topic and intended audience. Students will use audio, photographic, video, infographic and text reporting tools in producing the project. They will also study methodologies for evaluating multimedia and beta test the site using established research methodologies.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

JMM 650. 3D Design and Graphics. 3 Credit Hours.

This course focuses on the use of 3D Design software for communication and how to integrate with other print and digital technologies.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JMM 651. Advanced Programming. 3 Credit Hours.

This course explores the role of the programmer as journalist. Students will perform the basic tasks of journalism from a programmatic perspective including: gathering, distilling and presenting information. Students will learn how to gather information from public databases and government websites. They will learn how to automate processes for filtering information and learn how to present this information in a visual and interactive news report. Students will also learn how to combine multiple sources of information, to personalize information for the end reader, and account for the relevant permutations of the data. Students will learn to build and query databases as well as mine and visually present the information using programming languages such as PHP and Python. Rapid development frameworks such as Django, Zend and Symfony will also be covered in the class.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

JMM 653. Practicum In Producing News. 1-3 Credit Hours.

The mechanics of planning and executing professional style newscasts and/or long-form television news program.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 654. Writing for Publication. 1-3 Credit Hours.

This course focuses on writing principles and practices of the news media. It is designed to give the student exposure and practical experience in writing for the print media.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 655. Media Technology. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 692. Special Topics In Journalism And Media Management. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 695. Special Topics in Journalism. 3 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: IND.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JMM 696. Special Topics in Visual Journalism. 1-6 Credit Hours.

This course subject matter varies according to announced special topic. See class schedule for details.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JMM 699. Advanced Projects and Directed Research. 1-6 Credit Hours.

Individual study. Course may be repeated to a maximum of six credits.

Components: IND.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 715. Multimedia Project. 1-6 Credit Hours.

Students, in consultation with program faculty, will complete a final project that reflects in-depth knowledge and analysis of a subject and professional competence in multimedia storytelling. Course may be repeated to a maximum of six credits.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

JMM 725. Journalism Internship. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

Judaic Studies (JUS)

JUS 200. Isreal Origins Culture and Society. 3 Credit Hours.

This course will review the emergence of modern Israel from the inception of Zionism to the present. It will include the structure of the old and new Yishuv, immigrations to Eretz Yisrael, British rule in Palestine, relationships with the great powers, sociological associations and cleavages, Israel-Diaspora relations, American Jewry and Israel, and religion and state.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

JUS 205. Icheic Service Corps Internship. 3 Credit Hours.

Interns will gain meaningful experiences that will offer them an opportunity to become involved in service-oriented activities that give them a deep insight and unique understanding of the historical significance of the Holocaust while providing valuable services to the survivors of Nazi atrocities.

Components: DIS.

Grading: CNC.

Typically Offered: Fall.

JUS 206. ICHEIC Service Corps Internship. 3 Credit Hours.

Interns will gain meaningful experiences that will offer them an opportunity to become involved in service-oriented activities that give them a deep insight and unique understanding of the historical significance of the Holocaust while providing valuable services to the survivors of Nazi atrocities.

Components: SEM.

Grading: CNC.

Typically Offered: Spring.

JUS 231. Jewish Civilization: Society, Culture, and Religion. 3 Credit Hours.

Introduction to Jewish civilization from Abraham to present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 250. The Holocaust Through Film, Memoir and Testimony. 3 Credit Hours.

The purpose of the course is to introduce students to the history of the Holocaust through classroom dialogue, film, and literature analysis. Involving students in major ethical and moral issues raised in the study of the Holocaust by encouraging students to think critically, explore choices, and make decisions based on a code of conduct that reflects a commitment to humanity.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 301. Studies In Judaica. 3 Credit Hours.

Special topics offering at the 300-level for students pursuing a major/minor in Judaic Studies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 314. The Rise of Judaism. 3 Credit Hours.

The history and literature of early Judaism, covering the period from the fall of Jerusalem in 587/586 BCE to the beginnings of rabbinic Judaism and the formation of the Mishnah (ca.200 CE).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JUS 324. The History of Zionism. 3 Credit Hours.

The religious, cultural, historical, political and social underpinnings of the development of Zionism that fed to the creation of the State of Israel. Through readings, analysis of speeches and essays, exploration of films and the internet, the class will move through time from the origins of the Zionist idea to the present.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 325. Israel: The Making of a State. 3 Credit Hours.

An introduction to the creation of the State of Israel in its historical context, emphasizing the period of 1935-55: the struggle for Israel's establishment, the making of the state and the early challenges Israel faced. The class will use documents, texts, testimony, poetry, music and film.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 338. History of the Holocaust. 3 Credit Hours.

Focus on the roots, events and results of the Nazis nearly successful annihilation of Jewish men, women, and children living under the Swastika. We will study Hitler's political aims, his Aryan superiority mythology, his domestic and foreign policies, and his conquests. We will also investigate how Germans, admired for their culture, became instruments of mass murder. Also included in this survey are the heroism of Jewish resisters and gentile rescuers who stood in direct opposition to the silence of the Christian churches and inactivity of the nearly all nations in the face of the Jewish disaster.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

JUS 352. Panoramic View of the Middle East. 3 Credit Hours.

The course is designed to provide a comprehensive introduction to the Middle East and a basic understanding of factors, forces, and processes shaping developments in the modern and contemporary history of this important world region.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JUS 360. Hollywood and Popular Culture: The American Jewish Experience. 3 Credit Hours.

The image of the Jew and the Jewish experience in American Cinema. Prerequisite: JUS 231 or HIS 102.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 375. Religion and Democracy in Israel. 3 Credit Hours.

Israel's evolution as a nation and a society by focusing on how religion impacts ethnicity, culture, and democracy.

Components: SEM.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 380. Archeology of Palestine. 3 Credit Hours.

Survey of the major archaeological excavations and surveys of Palestine, how this is used to interpret biblical narrative and give context to the emergence of Judaism and Christianity.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

JUS 401. Studies in Judaica. 1-3 Credit Hours.

Designed to enable students interested in some phase of Judaic Studies to study extensively in that field of interest.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 410. Special Topics. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 411. Special Topics. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

JUS 421. Internship in Judaic Studies. 1-3 Credit Hours.

Prescribed study and supervised work with practitioners in Judaic services.

Components: DIS.

Grading: CNC.

Typically Offered: Fall & Spring.

JUS 498. Senior Thesis. 3 Credit Hours.

Partial requirement for Departmental Honors in Judaic Studies. Thesis to be a documented essay in any area of Judaic Studies written under the direction of a member of the faculty.

Components: THI.

Grading: GRD.

Typically Offered: Fall & Spring.

JUS 499. Senior Thesis. 3 Credit Hours.

Partial requirement for Departmental Honors in Judaic Studies. Thesis to be a documented essay in any area of Judaic Studies written under the direction of a member of the faculty.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

Keyboard Performance (MKP)

MKP 0R1. Organ. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Manual Technique and Pedal Technique. Repertoire: Gleason, Method of Organ Playing: Compositions for Manuals, Studies and Compositions for Manuals and Pedal; selected chorale preludes and smaller-scale preludes and fugues by Bach, Buxtehude, Brahms, and others; basics of hymn playing.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 0R3. Organ. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit. Technical Requirements: Gleason, Method of Organ Playing: selected exercises from Pedal Scales, Broken Chords, Advanced Exercises. Repertoire: Selected compositions by Bach and representative Baroque, Classical, Romantic, and Modern composers. Hymn playing and organ accompanying techniques.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 0R5. Organ. 1-4 Credit Hours.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 0R6. Organ. 1-2 Credit Hours.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 0R7. Organ. 1-2 Credit Hours.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 111. Non-Major Class Piano I. 1 Credit Hour.

This course is designed for the adult beginner who has an interest in playing keyboard instruments for pleasure. Students with no previous musical or keyboard experience learn the fundamentals of music theory and apply them to playing the keyboard at the beginning level.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 112. Non-Major Class Piano II. 1 Credit Hour.

Designed for the adult beginner who has an interest in playing keyboard instruments for pleasure, this course builds on the concepts introduced in MKP 111. Students continue to learn the fundamentals of music theory and apply them to playing the keyboard.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 140. Keyboard Studies I. 1 Credit Hour.

Major and minor five finger patterns, beginning repertoire, major scales and arpeggios, basic chord progressions, for types of triads, dominant seventh chords, beginning sight reading, harmonization, transposition, and improvisation skills.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MKP 141. Keyboard Studies II. 1 Credit Hour.

Minor scales and arpeggios, modal scales, five types of seventh chords and inversions, and more extensive chord progressions. Study of repertoire and the development of sight-reading, harmonization, transposition, and improvisation skills are continued.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MKP 185. Musical Theatre Accompanying. 1 Credit Hour.

A class designed to improve the skills of pianists with a particular interest in musical theatre piano accompaniment. Students will study in a classroom setting.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 186. Vocal Accompanying I. 1 Credit Hour.

Pianists will attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 187. Vocal Accompanying II. 1 Credit Hour.

Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 189. Accompanying, Level I. 1 Credit Hour.

Development of sightreading skills and score preparation.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 190. Accompanying, Level II. 1 Credit Hour.

Progressive development of individual vocal/instrumental and ensemble accompanying, sightreading, score reading, and improvising from a lead sheet.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 191. Accompanying, Level III. 1 Credit Hour.

Progressive development of all types of accompaniment skills including; clef and score reading, transposition; possible recital, opera theater, choral ensemble, and/or orchestral accompanying.

Prerequisite: MKP 190.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 220. Computers, Keyboards, And Music. 2 Credit Hours.

An introduction to basic computing skills for the musician that explores computers, keyboards, and other MIDI- (Musical Instrument Digital Interface) related instruments as tools for the musician. Topics include electronic keyboards, computer hardware and software, MIDI sequencing, computer-assisted musical notation, and teaching strategies using new technologies. Students gain hands-on experience while completing projects in each of the above areas.

Prerequisite: MKP 102.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 240. Keyboard Studies III. 2 Credit Hours.

Dominant seventh arpeggios, secondary dominants, and work more extensively with chord progressions. Students also learn Theme and Variation form, Sonata form, and characteristics of the musical style periods. Study of repertoire and the development of sight-reading, harmonization, and the improvisation skills are continued. Transposition of instrumental music to concert pitch, and beginning choral and instrumental score reading are introduced. Students will continue playing major and minor scales at an increased level of difficulty.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall.

MKP 241. Keyboard Studies IV. 2 Credit Hours.

Diminished seventh arpeggios, augmented, and Neapolitan sixth chords, Three-Part Rondo forms, extended chord structures, and a variety of chord Progressions that modulate. Study of repertoire and the development of sight-reading, harmonization, transposition, and improvisation skills are continued. Choral and instrumental score reading, modal scales, and major and minor scales are performed at an increased level of difficulty.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Spring.

MKP 399. Junior Recital. 1 Credit Hour.

A public recital of one half-hour or more. Course is required of all performance majors.

Requisite: Frost School of Music.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 493. Special Projects In Keyboard Performance. 1-3 Credit Hours.

Supervised readings and other activities in specific areas of Keyboard Performance.

Requisite: Frost School of Music.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 494. Special Topics In Keyboard Performance. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

MKP 499. Senior Recital. 1 Credit Hour.

A public recital of one hour or more. Course is required of all performance majors.

Requisite: Frost School of Music.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 547. Keyboard Pedagogy. 3 Credit Hours.

Methods and materials for teaching keyboard instruments with a focus on private lesson instruction. Topics include teacher profile, general teaching considerations, the business of teaching, the beginning student, second- and third-year students, teaching materials, and an introduction to new technology in piano teaching.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 548. Intermediate to Advanced Repertoire. 3 Credit Hours.

A class dedicated to a survey and discussion of a wide range of teaching materials including teaching exercises, etudes, and performance literature?both well known and under appreciated. Topics include reference literature and web resources, piece assigning considerations and leveling, and detailed discussion of selected materials with specific teaching and remedial strategies. Annotated bibliography with MIDI-file attachments of incipits to be submitted at the end of the semester for a grade.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKP 549. Keyboard Pedagogy II:Keyboard Pedagogy Diagnostics. 3 Credit Hours.

1st class of each week: round-table discussion of private teaching strategies using video taped performance excerpts of students at various levels. 2nd class of each week: a focus on a wide range of teaching repertoire covering intermediate to advanced levels with an emphasis on problem prevention and solving.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 550. Keyboard Pedagogy III: Pracice Strategies. 3 Credit Hours.

Focus on practice strategy at the keyboard using Philip Johnston's Practice Revolution as a springboard for discussion. Topics also include recent findings and leading researchers in cognitive neuroscience and "brain-based learning," as well as resources available for musician wellness and injury prevention.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 589. Keyboard Accompanying Program in Salzburg, Austria. 0 Credit Hours.

Course is conducted at Salzburg College, Austria. Students receive comprehensive and intensive coaching in piano and accompanying from Dr. Posnak and other internationally acclaimed guest artists. Piano students study piano (2 cr.) and accompanying (1 cr.).

Requisite: Frost School of Music.

Components: LEC.

Grading: AUD.

Typically Offered: Spring.

MKP 593. Special Projects In Keyboard Performance. 1-3 Credit Hours.

Supervised topics and other activities in specific areas of Keyboard Performance.

Requisite: Frost School of Music.

Components: SEM.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 594. Special Topics In Music Theory Or Composition. 1-3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 6. Piano Forum. 0 Credit Hours.

A non-credit performance class for all piano majors and principals.

Majors are required to perform once each semester with the approval of the applied teacher .

Requisite: Frost School of Music.

Components: FOR.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 612. Seminar in Romantic Performance. 1 Credit Hour.

This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work. Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 647. Keyboard Pedagogy. 3 Credit Hours.

Methods and materials for teaching keyboard instruments with a focus on private lesson instruction. Topics include teacher profile, general teaching considerations, the business of teaching, the beginning student, second- and third-year students, teaching materials, and an introduction to new technology in piano teaching.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 648. Intermediate to Advanced Repertoire. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 710. Seminar in Baroque Performance. 1 Credit Hour.

This course is designed as a performance class for graduate DMA piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work. Requisite: Frost School of Music.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

MKP 711. Seminar in Classical Performance. 1 Credit Hour.

This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work. Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

MKP 712. Seminar in Romantic Performance. 1 Credit Hour.

This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 713. Seminar in Contemporary Music. 1 Credit Hour.

This course is designed as a performance class for graduate piano majors. Class members will be responsible for presentation of major compositions representative of the period. Research will be required for each presentation concentrating on interpretation, stylistic requirements of the period and the historical context of the composers and work. Requisite: Frost School of Music.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

MKP 747. Seminar in Keyboard Pedagogy. 3 Credit Hours.

Focus on college-level teaching and professional development for a pianist. Topics include group piano teaching materials and strategies, syllabi and exam-objective rubric creation, pedagogy curriculum building, pedagogy text survey, administrative duties overview, preparation for the job market including job search and interview process, and C. V. building avenues such as publication, workshop/lecture presentation, editing teaching repertoire, and training in music technology. Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

MKP 750. Keyboard Pedagogy Research Seminar. 1 Credit Hour.

Research, reading and writing in keyboard pedagogy on topics either historical or current. An in-depth research or project on a topic as approved by KPED faculty culminates in a written paper with annotated bibliography. Course may be repeated for credit.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 780. Keyboard Pedagogy Internship. 1 Credit Hour.

The student team-teaches a piano class or a private student with an instructor. The Program Director observes and critiques the student, and the student videotapes lessons and offers critiques of their own teaching following a guideline.

Requisite: Frost School of Music.

Components: PRA.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 785. Musical Theatre Accompanying. 1 Credit Hour.

A class designed to improve the skills of pianists with a particular interest in musical theatre piano accompaniment. Students will study in a classroom setting.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 786. Vocal Accompanying I. 1 Credit Hour.

Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

MKP 787. Vocal Accompanying II. 1 Credit Hour.

Pianists attend seminars where the principles of accompanying classical and musical theatre singers are addressed. Students are assigned to accompany applied voice lessons and ensembles.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 788. Graduate Seminar in Accompanying. 1 Credit Hour.

Study and performance of major vocal and chamber music literature as related to the accompanist and chamber musician. Course may be repeated for credit.

Requisite: Frost School of Music.

Components: SEM.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 789. Accompanying, Level I. 1 Credit Hour.

Development of sightreading skills and score preparation.

Requisite: Frost School of Music.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 790. Accompanying, Level II. 1 Credit Hour.

Progressive development of individual vocal/instrumental and ensemble accompanying, sightreading, score reading, and improvising from a lead sheet.

Requisite: Frost School of Music.

Components: LAB.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 791. Accompanying, Level III. 1 Credit Hour.

Progressive development of all types of accompaniment skills including clef and score reading, transposition, possible recital, opera theater, choral ensemble, and/or orchestral accompanying.

Requisite: Frost School of Music.

Components: ENS.

Grading: GRD.

Typically Offered: Fall & Spring.

MKP 793. Special Projects In Keyboard Performance. 1-3 Credit Hours.

Projects in any phase of keyboard performance in which the student is interested and qualified to work.

Requisite: Frost School of Music.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 794. Special Topics In Keyboard Performance. 1-3 Credit Hours.

Projects in any phase of keyboard performance in which the student is interested and qualified to work.

Requisite: Frost School of Music.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

MKP 811. Master's Recital Paper. 1-3 Credit Hours.

The student working on his/her master's recital paper enrolls for credit as determined by his/her advisor. Credit is not awarded until the paper has been accepted.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MKP 812. Master's Recital. 1 Credit Hour.

The student enrolls for recital credit during the semester in which he/she presents the master's recital.

Requisite: Frost School of Music.

Components: PRA.

Grading: SUS.

Typically Offered: Fall & Spring.

MKP 813. Master's Pedagogy Project. 1-3 Credit Hours.

The student working on his/her master's pedagogy project enrolls for credit as determined by his/her advisor. Credit is not awarded until the project paper is accepted.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

MKP 820. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the thesis for the master's degree after the student has enrolled for the permissible cumulative total in MKP 710 (usually six credits). Credit not granted. May be regarded as full time residence.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MKP 831. Doctoral Essay. 1-12 Credit Hours.

Required of all candidates for the D.M.A. The student will enroll for credit as determined by his/her advisor, but not for less than a total of 12. Not more than 12 hours of MKP 731 may be taken in a regular semester, nor more than six in a summer session.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MKP 832. Doctoral Recital. 1-2 Credit Hours.

Required of all candidates for the D.M.A.

Requisite: Frost School of Music.

Components: PRA.

Grading: SUS.

Typically Offered: Fall & Spring.

MKP 850. Research in Residence. 1 Credit Hour.

Used to establish research in residence for the Ph.D. and D.M.A., after the student has been enrolled for the permissible cumulative total in appropriate doctoral research. Credit not granted. May be regarded as full-time residence as determined by the Dean of the Graduate School.

Requisite: Frost School of Music.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

MKP HC1. Harpsichord. 2 Credit Hours.

1-hour lesson for students enrolled for 2 credits. 1/2-hour lesson for students enrolled for 1 credit.

Requisite: Frost School of Music.

Components: STU.

Grading: GRD.

Typically Offered: Fall & Spring.
