

TABLE OF CONTENTS

General University Information	13	Student Identification Numbers	28
Mission Statement	13	Transfers Between Schools and Colleges	28
Undergraduate Academic Procedures and Information	13	Admission	28
Student-Right-To-Know and Campus Security Act	14	Freshman Admission	28
Course Information	14	Transfer Admission	29
Academic Credit	14	Undergraduate International Admission	29
Academic Calendar	15	Early Admission	30
Change or Drop of Course	15	Advanced Placement/Credit	30
Class Attendance and Absences	16	GED Scores	30
Course-Numbering System	16	Non-Degree Enrollment	31
Credit for Service Experience	17	Financial Assistance	31
Credit Only Option	17	Federal and Institutional Need Based Aid SAP Policy	33
Final Examination Policy	17	Scholarship SAP Policy	34
Registration	17	State of Florida SAP Policy	35
Cancellation of Courses	17	SAP Appeals Process	36
Repeat Rules	17	Student Employment	36
Schedules	18	Financial Payment Policies	37
Temporary/Permanent Withdrawal from the University	18	Payment Options	38
Military Withdrawal	19	Tuition and Fees	39
General Education Requirements	19	Alumni Rate and Policy	42
Grades	21	Room Rates	42
Academic Standing, Probation, and Dismissal	21	Meal Plans	43
Appeals and Readmission	22	Parking and Transportation	43
The Grading System	23	Student Services	43
Honor Code	24	Academic Resource Center	44
Graduation	24	Disability Services	44
Graduation and Degrees	24	Cane Cards	44
Graduation Honors	25	Commuter Student Involvement	45
Diplomas and Transcripts	25	Off-Campus Housing Assistance	45
Student Status	25	Counseling Center	45
Academic Bankruptcy	25	Dean of Students	46
Certification of Enrollment	26	Career Services	46
Classification of Students	26	Honor Council	47
Undergraduates Taking Graduate Coursework	27	International Student and Scholar Services	48
Eligibility for University Extracurricular Activities	27	Libraries	48
Readmission	27	Ombudsperson and University Troubleshooters	48
Inactive Status	28	Residence Life	49
Non-UM Programs	28	Student Health Services	50
		University Dining Services	51
		Honors	52

Foote Fellow Honors Program	52	B.A. in Chemistry	78
Departmental Honors Programs	53	B.S. in Chemistry	79
Honor Societies	54	Certified B.S. in Chemistry	79
First-Year Seminars	55	Minor in Chemistry	80
Veterans	55	Classics	80
Undergraduate Academic Programs	57	B.A. in Classics - Classical Civilization Track	81
Architecture	57	B.A. in Classics - Greek Track	81
Academic Policies	57	B.A. in Classics - Latin Track	81
Bachelor of Architecture	58	B.A. in Classics - Latin and Greek Track	81
Bachelor of Science in Architectural Engineering and Master of Architecture	60	Minor in Classics	81
Honors	61	Computer Science	81
Minor in Architecture	61	Bachelor of Science in Computer Science	82
Arts and Sciences	62	Bachelor of Arts in Computer Science	83
Aerospace Studies	65	Computer Science as a Second Major	84
Minor in Aerospace Studies	66	Five-Year B.S. + M.S. in Computer Science	84
Africana Studies	66	Minor in Computer Science	84
B.A. in Africana Studies	67	Criminology	84
Minor in Africana Studies	67	B.A. in Criminology	85
American Studies	67	Minor in Criminology	85
B.A. in American Studies	68	Economics	86
Minor in American Studies	68	Major in Economics	86
Anthropology	68	Minor in Economics	87
B.A. in Anthropology	69	Ecosystem Science and Policy	87
Minor in Anthropology	69	B.A. in Ecosystem Science and Policy	87
Art and Art History	69	B.S. in Ecosystem Science and Policy	89
B.A. in Art History	70	Certificate in Sustainability	90
B.A. in General Study	70	Minor in Ecosystem Science and Policy	92
B.A. in Studio Art	71	Education	92
B.F.A. in Art	71	Minor in Traditional Education	92
Minor in Art and Art History	71	Professional Training Option Certificate	92
Astronomy	72	Engineering	93
Biochemistry and Molecular Biology	72	English	93
B.S. in Biochemistry and Molecular Biology or Nutrition	73	B.A. in English	94
Minor in Biochemistry and Molecular Biology	75	B.A. in English - Concentration in British Literary History	95
Biology	75	B.A. in English - Concentration in Creative Writing	95
B.A. in Biology	76	B.A. in English - Concentration in Women's Literature	95
B.S. in Biology	77	Minor in Creative Writing	96
Minor in Biology	78	Minor in English	96
Chemistry	78	Geography and Regional Studies	96
		B.A. in Geography as a First Major	97

B.A. in Geography as a Second Major	97	B.A. in Philosophy - Pre-Law Track	121
Geospatial Technology Certificate	97	B.A. in Philosophy - Pre-Med Track	121
Minor in Geography	98	Minor in Philosophy	122
Geological Sciences	98	Minor in Philosophy - Pre-Law Track	122
B.A. in Geological Sciences	99	Minor in Philosophy - Pre-Med Track	122
B.S. in Geological Sciences	99	Physical Sciences	122
Five Year B.S./M.S. in Geological Sciences and Marine Geology	100	Physics	122
Minor in Geological Sciences	100	B.S. in Physics - Applied Physics	122
History	100	B.S. in Physics - Chemistry/Physics	123
B.A. in History	101	B.S. in Physics - Engineering/Physics	124
Minor in History	101	B.S. in Physics - Marine Science/Physics	124
International Studies	101	B.S. in Physics - Pure Physics	124
B.A. in International Studies	102	Minor in Physics	125
Minor in International Studies	103	Political Science	125
Judaic Studies	103	B.A. in Political Science	125
B.A. in the George Feldenkreis Program in Judaic Studies	103	Minor in Political Science	127
Minor in the George Feldenkreis Program in Judaic Studies	104	Psychology	127
Latin American Studies	104	B.A. or B.S. in Psychology	128
B.A. in Latin American Studies	105	Minor in Psychology	129
B.A./M.A in Latin American Studies (Fellows in Latin American Studies)	106	Religious Studies	129
Minor in Latin American Studies	107	B.A. in Religion and Health Care	130
Mathematics	107	B.A. in Religious Studies	131
B.A. or B.S. in Mathematics	107	Minor in Religion and Health Care	131
Minor in Mathematics	108	Minor in Religious Studies	131
Microbiology and Immunology	109	Sociology	131
B.S. in Microbiology and Immunology	109	B.A. in Sociology	132
Minor in Microbiology and Immunology	111	Sociology & Criminology Double Major; Combined Minor	132
Military Science	112	Minor in Sociology	133
Modern Languages and Literatures	113	Theatre Arts	133
B.A. in French, German, or Spanish	116	B.A. in Theatre Arts	134
Minor in Arabic Studies	117	B.F.A. in Theatre Arts - Acting	134
Minor in French, German, Italian, Portuguese, or Spanish	117	B.F.A. in Theatre Arts - Design/Technical Production	135
Minor in Modern Languages	117	B.F.A. in Theatre Arts - Musical Theatre	136
Neuroscience	117	B.F.A. in Theatre Arts - Stage Management	137
B.S. in Neuroscience	119	B.F.A. in Theatre Arts - Theatre Management	138
Philosophy	120	Minor in Theatre Arts	139
B.A. in Philosophy	121	Urban Studies	139
		Minor in Urban Studies	139
		Women's and Gender Studies	140
		B.A. in Women's and Gender Studies	141

Minor in LGBTQ Studies	141	B.S.B.A. in Management	179
Minor in Women's and Gender Studies	141	Minor in Entrepreneurship for Business Students - Health Care Ventures Track	180
Business	142	Minor in Entrepreneurship for Business Students - High Growth/Technology Ventures Track	180
Accounting	150	Minor in Entrepreneurship for Non-Business Students	180
Accelerated Accounting Programs	151	Minor in Management for Business Students	181
B.B.A. in Accounting	152	Minor in Management for Non-Business Students	181
B.S.B.A. in Accounting	153	Management Science	181
Five-Year Accounting Program with Senior-Year Internship	154	B.S.B.A. in Business Analytics	182
Minor in Accounting	155	Minor in Business Analytics	183
Business Law	155	Marketing	183
B.B.A. in Legal Studies	155	B.B.A. in Marketing	184
B.S.B.A. in Legal Studies	156	B.S.B.A. in Marketing	185
Minor in Business Law	157	Minor in Marketing for Business Students	187
Business Technology	157	Minor in Marketing for Non-Business Students	187
B.B.A. in Business Technology	158	Communication	188
B.S.B.A. in Business Technology	159	Cinema and Interactive Media	191
Minor in Business Technology	160	B.S.C. in Motion Pictures - Business Concentration	192
Economics	160	B.S.C. in Motion Pictures - Critical Studies Concentration	192
B.B.A. in Economics	161	B.S.C. in Motion Pictures - General Concentration	193
B.S.B.A. in Economics	162	B.S.C. in Motion Pictures - Production Concentration	193
Minor in Economics for Business Students	164	B.S.C. in Motion Pictures - Screenwriting Concentration	194
Minor in Economics for Non-Business Students	164	Minor in Interactive Media	194
Finance	165	Minor in Motion Pictures	194
B.B.A. in Finance	165	Communication Minor	194
B.B.A. in International Finance and Marketing	166	Communication Studies	194
B.B.A. in Real Estate	167	B.S.C. in Communication Studies - General Concentration	195
B.S.B.A. in Finance	168	B.S.C. in Communication Studies - Intercultural Concentration	196
B.S.B.A. in International Finance and Marketing	169	B.S.C. in Communication Studies - Organizational Concentration	196
B.S.B.A. in Real Estate	170	B.S.C. in Communication Studies - Public Advocacy Concentration	196
Minor in Finance	171	Minor in Communication Studies	197
Health Sector Management and Policy	171	Minor in Health Communication	197
B.B.A. in Health Sector Management and Policy	172	Journalism and Media Management	197
B.S.B.A. in Health Sector Management and Policy	173	B.S.C. in Broadcast Journalism	199
Minor in Health Sector Management and Policy	174	B.S.C. in Electronic Media	199
Management	174	B.S.C. in Journalism	199
B.B.A. in Entrepreneurship	175		
B.B.A. in Human Resource Management	176		
B.B.A. in Management	176		
B.S.B.A. in Entrepreneurship	177		
B.S.B.A. in Human Resource Management	178		

B.S.C. in Media Management	200	Engineering	225
Minor in Broadcast Journalism	200	Biomedical Engineering	230
Minor in Electronic Media	200	B.S. in Biomedical Engineering - Biomaterials and Tissue Concentration	232
Minor in Journalism	201	B.S. in Biomedical Engineering - Electrical Concentration	233
Minor in Media Management	201	B.S. in Biomedical Engineering - Mechanical Concentration	234
Strategic Communication	201	B.S. in Biomedical Engineering - Premed Concentration	236
B.S.C. in Advertising - Advertising Creative Track	202	B.S./M.S. in Biomedical Engineering - Biomaterials and Tissue Concentration	237
B.S.C. in Advertising - Advertising Management Track	203	B.S./M.S. in Biomedical Engineering - Electrical Concentration	239
B.S.C. in Advertising - General Advertising Track	203	B.S./M.S. in Biomedical Engineering - Mechanical Concentration	240
B.S.C. in Public Relations	204	B.S./M.S. in Biomedical Engineering - Premed Concentration	241
Minor in Advertising	204	Civil, Architectural and Environmental Engineering	243
Minor in Public Relations	205	B.S. in Civil Engineering	244
Minor in Strategic Communication	205	B.S. in Architectural Engineering	245
Continuing and International Education	206	B.S. in Environmental Engineering	246
Adult Student Access Program	206	B.S./M.S. in Civil Engineering	247
Bachelor of General Studies	206	B.S./M.S. in Architectural Engineering	247
Credit Certificate Programs	207	B.S. in Environmental Engineering/M.S. in Civil Engineering	248
Global Academy	208	B.S. in Architectural Engineering and Master of Architecture Dual Degree	248
Intensive Language Institute	208	Minor in Architectural Engineering	249
Office of Professional Advancement	208	Minor in Civil Engineering	250
Education and Human Development	211	Minor in Environmental Engineering	250
Educational and Psychological Studies	212	Electrical and Computer Engineering	250
B.S.E.D. in Human and Social Development - Community and Program Development (HSDC)	214	B.S.C.p.E. in Computer Engineering - Computer Engineering Option	255
B.S.E.D. in Human and Social Development - Human and Social Development Studies (HSDS)	214	B.S.C.p.E. in Computer Engineering - Software Engineering Option	256
B.S.E.D. in Human and Social Development - Individual and Relational Development Track (HSDI)	214	B.S.E.E. in Electrical Engineering - Audio Engineering Option	257
Minor in Human and Social Development	214	B.S.E.E. in Electrical Engineering - Electrical Engineering Option	258
Kinesiology and Sport Sciences	214	B.S.E.E. in Electrical Engineering - Electrical Engineering Pre- Med Option	259
B.S. in Exercise Physiology	216	Five-Year B.S.C.p.E.-M.S.E.C.E. Dual Degree Program - Computer Engineering Option	261
B.S. in Athletic Training	217	Five-Year B.S.C.p.E.-M.S.E.C.E. Dual Degree Program - Software Engineering Option	262
B.S. in Education, Sport Administration	218		
Minor in Exercise Physiology	218		
Minor in Sport Administration	218		
Minor in Sports Medicine	219		
Teaching and Learning	219		
B.S.E.D. in Elementary/Exceptional Student Education (ESE) with ESOL and Reading Endorsements	221		
B.S.E.D. in Secondary Education	223		
Minor in Education	223		
Professional Training Option Certificate	224		

Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree Program - Audio Engineering Option	263	B.A. in Marine Affairs	288
Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree Program - Electrical Engineering Option	264	Minor in Climate Science and Policy	289
Minor in Computer Engineering	265	Minor in Marine Policy	289
Minor in Electrical Engineering	265	Marine Science	289
Engineering Science	265	B.S. in Marine Science with a Second Major in One of: Applied Physics, Biochemistry, Engineering (All Disciplines), and Mathematics	289
Engineering Science Curriculum - General Concentration	266	B.S. in Marine Science/Biology	290
Engineering Science Curriculum - Premed Concentration	267	B.S. in Marine Science/Chemistry	291
Industrial Engineering	267	B.S. in Marine Science/Computer Science	292
B.S.I.E. in Industrial Engineering	269	B.S. in Marine Science/Geological Sciences	292
B.S.I.E. in Industrial Engineering - Engineering Management Concentration	270	B.S. in Marine Science/Meteorology	293
B.S.I.E. in Industrial Engineering - Manufacturing Concentration	272	B.S. in Marine Science/Microbiology and Immunology	293
B.S.I.E. in Industrial Engineering - Pre-Med Concentration	273	B.S. in Marine Science/Physics	294
Five-Year Bachelor of Science in Industrial Engineering (Engineering Management Concentration) and Master of Science in Industrial Engineering B.S.I.E./M.S.I.E.	274	Minor in Marine Science	294
Five-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering B.S.I.E./M.S.I.E.	275	Music	296
Minor in Industrial Engineering	276	Academic Policies	297
Mechanical and Aerospace Engineering	276	Degree Programs	298
B.S. and M.S. in Mechanical Engineering	278	Bachelor of Arts in Music (MUS)	298
B.S. in Aerospace Engineering	279	B.A.M. Bachelor of Arts in Music	300
B.S. in Aerospace Engineering and B.S. in Mechanical Engineering Dual Degree	279	Instrumental Performance (MIP)	301
B.S. in Mechanical Engineering	280	B.M. in Instrumental Performance	303
B.S. in Mechanical Engineering - Aerospace Engineering Concentration	281	Keyboard Performance (MKP)	304
B.S. in Mechanical Engineering - Internal Combustion Engines Concentration	282	B.M. in Keyboard Performance	306
Minor in Mechanical Engineering	282	Music Business Entertainment Industries (MBEI)	306
Marine and Atmospheric Science	284	B.M. in Music Business Entertainment Industries with a Required Minor in Business, Communications, or Entertainment	309
Atmospheric Science - Meteorology	285	Music Education and Music Therapy (MED) & (MTY)	310
B.S. Double Major in Meteorology and Marine Science	286	B.M. in Music Education with Minor in Education	313
B.S. Double Major in Meteorology and Mathematics	286	B.M. in Music Therapy with Minor in Psychology	315
B.S. in Meteorology	287	Music Engineering Technology (MUE)	317
Minor in Climate Science and Policy	287	B.S. in Music Engineering with Required Minor in Electrical Engineering or Computer Engineering	319
Minor in Meteorology	288	Music Theory Comp. (MTC) & Media Writing & Prod. (MWP)	320
Marine Affairs	288	B.M. in Media Writing and Production	323
		B.M. in Music Theory and Composition	324
		Minor in Music Composition	325
		Studio Music and Jazz (MSJI) & (MSJV)	325
		B.M. in Studio Music and Jazz Instrumental	329
		B.M. in Studio Music and Jazz Voice	330

Minor in Studio Music and Jazz Instrumental (Music Majors Only)	331	Arts and Sciences	385
The Bruce Hornsby Creative American Music Program	331	Anthropology	385
B.M. in Music Business Entertainment Industries with Minor in Creative American Music & Business, Communications, or Entertainment	335	M.A. in Anthropology	385
Minor in Creative American Music	336	Art and Art History	387
Vocal Performance (MVP)	336	M.F.A. in Studio Art	388
B.M. in Vocal Performance	338	Biology	388
Experiential Music Curriculum Core Courses	338	M.S. in Biology with Thesis (Three Year Program)	389
General Education	339	M.S. in Biology without Thesis (Two Year Program)	390
Minors	340	Ph.D. in Biology	391
Nursing and Health Studies	342	Chemistry	393
Health Science	342	M.S. in Chemistry	393
B.S. in Health Science - General Track	345	Ph.D. in Chemistry	393
B.S. in Health Science - Health Science/Health Management and Policy Track	346	Computer Science	394
B.S. in Health Science - Pre-Pharmacy Track	347	Five-Year B.S. and M.S. in Computer Science	394
B.S. in Health Science - Pre-Physical Therapy Track	347	M.S. in Computer Science	395
Nursing	348	Ph.D. in Computer Science	395
Accelerated BSN	353	Creative Writing	397
RN-BSN	354	English	397
Traditional BSN	354	Ph.D. in English	397
Public Health	355	Geography and Regional Studies	397
B.S. in Public Health	358	Graduate Certificate in Geospatial Technology	398
Minor in Health Communication	359	Geological Sciences	398
Minor in Public Health	359	History	399
Graduate Academic Programs	360	Ph.D. in History	399
Graduate School	360	International Administration	402
Academic Policies	360	M.A. in International Administration	402
Admission	366	International Studies	403
Degree Programs	369	M.A. in International Studies	403
Interdisciplinary Graduate Studies	372	Ph.D. in International Studies	403
Environmental Science and Policy	372	Latin American Studies	404
Office of Study Abroad	372	B.A./ M.A. in Latin American Studies	404
Master's Degree	372	M.A. Dual Degree in Latin American Studies and Journalism	405
Doctoral Degree	374	M.A. Dual Degree in Latin American Studies and Public Health	406
Architecture	377	M.A. in Latin American Studies with GIS Certificate	407
M.Arch Professional Degree	378	Liberal Studies	407
M.S. Architecture Post Professional Degree	379	M.A. in Liberal Studies	407
M.U.D. Master of Urban Design Post-Professional Degree	383	Mathematics	408
Master in Real Estate Development and Urbanism	383	M.A. in Mathematics	408
		M.S. in Mathematics	408

Ph.D. in Mathematics	408	Master of Accounting	424
Modern Languages and Literatures	409	Master of Arts in Economics	429
Ph.D. in Romance Studies	410	Master of Professional Accounting (online)	429
Philosophy	410	Master of Science in Business Analytics	429
M.A. in Philosophy	411	Master of Science in Finance	429
Ph.D. in Philosophy	411	Master of Science in Finance (online)	430
Physics	412	Master of Science in Management Studies	430
Ph.D. in Physics	412	Master of Science in Taxation	430
Political Science	412	Non-Degree	434
J.D./M.P.A. Joint Degree Program	412	Certificate in Accounting Practice (online)	434
M.P.A. Masters in Public Administration	413	Certificate in Business Administration	434
M.P.A./M.P.H. Second Master's Degree in Public Health	413	Certificate in Corporate Finance (online)	434
Online M.P.A.	413	Certificate in Financial Decision Making (online)	435
Psychology	413	Certificate in Leadership	435
Ph.D. in Psychology	413	Executive Education Programs	435
Sociology	414	Courses	435
M.A. in Sociology	414	Accounting Courses	435
Ph.D. in Sociology	414	Business Courses	441
Business	416	Business Law Courses	447
Doctoral	419	Business Technology Courses	448
Doctorate of Philosophy in Business	419	Economics Courses	450
Doctorate of Philosophy in Economics	420	Finance Courses	452
Master of Business Administration (MBA)	421	Management Courses	455
Accelerated MBA in Real Estate	421	Management Science Courses	460
BArch/MBA	421	Marketing Courses	463
Full Time MBA	421	Communication	467
JD/LLM/MBA	422	Cinema and Interactive Media	469
JD/MBA	422	M.F.A. in Interactive Media	469
MD/MBA	422	M.F.A. in Motion Pictures	470
One Year MBA	422	Communication Studies	471
Executive and Professional MBA	422	M.A. in Communication Studies - Communication Studies Track	471
Executive MBA in Health Sector Management and Policy	423	M.A. in Communication Studies - Health Communication Track	472
Global Executive MBA (in Spanish)	423	M.A. in Communication Studies - Intercultural Communication Track	472
Professional MBA	423	M.A. in Communication Studies - Organizational Communication Track	473
The Miami Executive MBA for Artists and Athletes (hybrid)	423	Doctor of Philosophy in Communication	474
The Miami Executive MBA for the Americas (hybrid)	424	J.D./M.A. in School of Communication	475
Specialized Master Degrees	424	J.D./M.A. in Communication Studies	475
Master in International Business	424	J.D./M.A. in Journalism	477

J.D./M.A. in Public Relations	477	M.S.Ed. in Education and Social Change	495
Journalism and Media Management	477	M.S.Ed. in Reading	496
M.A. in Journalism	478	M.S.Ed. in STEM Education	496
Strategic Communication	478	Ph.D. in Teaching and Learning - Language and Literacy Learning in Multilingual Settings	496
M.A. in Public Relations	478	Ph.D. in Teaching and Learning - Science, Technology, Engineering and Mathematics (STEM) Education	497
Education and Human Development	480	Ph.D. in Teaching and Learning - Special Education	497
Educational and Psychological Studies	483	Engineering	498
Certificate in Higher Education Administration/Enrollment Management	483	Biomedical Engineering	500
Certificate in Higher Education Administration/Student Life and Development	484	B.S./M.S. Five-Year Program in Biomedical Engineering	501
Certificate in Latino Mental Health Counseling	484	M.S. in Biomedical Engineering	501
Ed.D. in Higher Education Leadership	485	Ph.D. in Biomedical Engineering	502
M.S.Ed. in Community and Social Change	485	M.S., Ph.D. and Certificate Programs in Medical Physics	503
M.S.Ed. in Counseling - Marriage and Family Therapy Concentration	486	Civil, Architectural and Environmental Engineering	504
M.S.Ed. in Counseling - Mental Health Counseling Concentration	486	M.S. in Architectural Engineering	504
M.S.Ed. in Higher Education Administration - Enrollment Management Concentration	486	M.S. in Civil Engineering	505
M.S.Ed. in Higher Education Administration - Institutional Research and Policy Analysis	487	Ph.D. in Civil Engineering	505
M.S.Ed. in Higher Education Administration - Student Life and Development Concentration	488	Electrical and Computer Engineering	505
M.S.Ed. in Research, Measurement and Evaluation	488	Five-Year B.S.C.P.E.-M.S.E.C.E. Dual Degree - Computer Engineering Option	506
Ph.D. in Community Well-Being	489	Five-Year B.S.C.P.E.-M.S.E.C.E. Dual Degree - Software Engineering Option	507
Ph.D. in Counseling Psychology	489	Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Audio Engineering Option	508
Ph.D. in Research, Measurement, and Evaluation	490	Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree - Electrical Engineering Option	509
Kinesiology and Sport Sciences	490	M.S. in Electrical and Computer Engineering	510
Certificate in Women's Health	491	Ph.D. in Electrical and Computer Engineering	510
M.S.Ed. in Exercise Physiology	491	Industrial Engineering	510
M.S.Ed. in Exercise Physiology - Strength and Conditioning/Fitness Entrepreneurship Track	492	M.S. in Environmental Health and Safety	511
M.S.Ed. in Nutrition for Health and Human Performance	492	M.S. in Industrial Engineering	511
M.S.Ed. in Sport Administration	493	M.S. in Management of Technology	512
M.S.Ed. in Sports Medicine - Athletic Training Concentration	493	M.S.I.E./M.B.A. Executive Program	512
Ph.D. in Exercise Physiology	494	Ph.D. in Ergonomics and Human Factors	513
Teaching and Learning	494	Ph.D. in Industrial Engineering	513
Ed.S. Specialist in Education	495	Mechanical and Aerospace Engineering	514
M.S.Ed. in Advanced Professional Studies	495	M.S. in Mechanical Engineering	515
M.S.Ed. in Early Childhood Special Education	495	Ph.D. in Mechanical Engineering	515
		Ocean Engineering	515
		Marine and Atmospheric Science	516

Applied Marine Physics	518	M.M. in Collaborative Piano	555
Marine Affairs and Policy	518	M.M. in Keyboard Performance and Pedagogy	555
Marine Biology and Fisheries	519	M.M. in Piano Performance	555
Marine Geology and Geophysics	520	Music Education and Music Therapy	556
Marine and Atmospheric Chemistry	520	M.M. in Music Education	556
Meteorology and Physical Oceanography	520	M.M. in Music Education with Teaching Certification	556

GENERAL UNIVERSITY INFORMATION

A private, independent, international university

An equal opportunity/affirmative action employer

An announcement with information on administration, organization, admission and graduation requirements, and the courses of instruction in:

Undergraduate and Graduate Studies, 2015-2016

It is the policy of the University of Miami that no person within the jurisdiction thereof shall, on the basis of race, religion, color, sex, age, disability, sexual orientation, gender identity or expression, veterans status, or national origin, be excluded from, participation in, be denied the benefits of, or be subjected to discrimination or harassment (including all forms of sexual harassment and sexual violence) under any program or activity of the University, regardless of whether such program or activity occurs on-campus or off-campus. The University does not intend by this commitment to require compliance with this policy by governmental or external organizations that associate with but are not controlled by the University, except as required by law. The Executive Director of Workplace Equity and Performance is responsible for coordinating the University's effort to implement the nondiscrimination policy and Affirmative Action Programs for employees and students. The Executive Director may be contacted at the following address or telephone number:

Workplace Equity and Performance Office

Gables One Tower, Suite 100R

1320 S. Dixie Highway

Coral Gables, FL 33146

305-284-3064

More information regarding the student sexual harassment/violence policy may be found online in the Student Rights and Responsibilities Handbook (<https://umshare.miami.edu/web/wda/deanstudents/pdf/20132014SRR.pdf>). For available resources and services contact the Dean of Students Office (http://www.miami.edu/sa/index.php/dean_of_students), Phone: 305-284-5353; the Counseling Center (http://www.miami.edu/sa/index.php/counseling_center), Phone: 305-284-5511; and/or the Sexual Assault Response Team (http://www.miami.edu/sa/index.php/counseling_center/current_students/special_programs/sexual_assault_response_team_sart) (S.A.R.T).

The University of Miami is authorized under Federal law to enroll non-immigrant alien students.

The University reserves the right to change any provision or requirement, including, but not limited to fees and tuition, at any time without notice. Degrees, courses, programs, activities, and like academic or non-academic offerings of the University may also be changed from time to time without notice. The University further reserves the right to require a student to withdraw at any time under University policies, as may be promulgated from time to time. Further, admission of a student to the University of Miami for any semester does not imply that such student will be enrolled in any succeeding academic semesters. It also reserves the right to impose sanctions on any student whose conduct

is unsatisfactory. Any admission on the basis of false statements or documents is void when the misconduct is discovered, and the student is not entitled to any credit hour for work which the student may have done at the University prior to any discipline that may be taken as a result of such misconduct. When a student is dismissed or suspended from the University for cause, there will be no refund of tuition or fees paid. If a dismissed student has paid only a part of his tuition and fees, the balance due the University will be considered a receivable and will be collected.

There will be no refund of tuition, fees, charges or any other payments made to the University in the event the operation of the University is suspended at any time as a result of any act of God, strike, riot, disruption, or for any other reason beyond the control of the University.

The University of Miami is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award bachelor's, master's, specialist, and doctoral degrees. Contact the Commission on Colleges at:

1866 Southern Lane
Decatur, Georgia 30033-4097

or call 404-679-4500 for questions about the accreditation of the University of Miami.

Mission Statement

The University of Miami's mission is to educate and nurture students, to create knowledge, and to provide service to our community and beyond. Committed to excellence and proud of the diversity of our University family, we strive to develop future leaders of our nation and the world.

Core Values

We are absolutely committed to freedom of inquiry—the freedom to think, to question, to criticize, and to dissent. We will pursue the value of excellence in our research and educational missions with the single-mindedness that only great commitments deserve. We will provide our students with the foundations for ethical citizenship and service to others, a respect for differences among people, and a commitment to high standards of thought and communication. We also will prepare them for rewarding lifelong careers and will imbue in them a continued and permanent desire for the study of knowledge and the search for truth.

Undergraduate Academic Procedures and Information

While the University makes every effort to provide academic counseling to its students, its basic policy places the responsibility for planning an academic program upon the student.

The University of Miami relies on electronic means (email and CaneLink accounts) for correspondence with students. Students are required to maintain a working email address and are expected to update their personal biographical information annually via their CaneLink account. Students who fail to maintain a working email account may not receive critical university information.

Students are expected to familiarize themselves with the requirements of:

- the University,
- the schools in which they are enrolled, and
- their major department.

Requirements refer to those stated in the Bulletin at the time of admission to degree status, unless a student has not been continuously enrolled. In such cases, the Bulletin in effect at the time of re-admission is the one to be used. Under special circumstances, a student may appeal the bulletin decision. In such cases, the determination of the Bulletin in effect is made by the readmitting School or College.

Academic core requirements will not be waived for students under any circumstances.

The work of each student is under the supervision of an academic Dean and of the appropriate Scholarship Committee. A student who fails to maintain an adequate academic record may be dismissed from the University.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters. If a student whose record is unsatisfactory is for some reason permitted to continue in attendance, the appropriate scholarship committee or Dean may specify the standard that must be attained, and any other conditions to be met.

A student who graduates and plans to enter a graduate school or professional school at the University of Miami must apply for admission to the appropriate school of the University in accordance with application deadlines of respective schools.

Not all the regulations and procedures described below pertain to the Graduate School, the Law School, and the School of Medicine. The specific regulations of these schools are stated in their respective Bulletins.

Student-Right-To-Know and Campus Security Act

The Student-Right-to-Know and Campus Security Act requires institutions to disclose information about graduation rates and crime statistics to current and prospective students. Students interested in obtaining this type of information should contact the Office of Admission, 305-284-4323 or go to www.miami.edu/hea (<http://www.miami.edu/hea>).

Family Educational Rights and Privacy Act (FERPA) Buckley Amendment

The purpose of this policy is to assure that students have access to their educational records and to assure the privacy of students by restricting the disclosure of information from education records to those persons authorized under the Act.

The policy is provided to all students in the Student Life Handbook. Copies can also be printed from the website www.miami.edu/hea (<http://www.miami.edu/hea>).

Security of Student Records

The Office of the Registrar is charged with the responsibility of maintaining the security and integrity of student records. Student records

created before 1985 have been electronically scanned. Student records created after 1985 are housed on an electronic database.

In order to maintain confidentiality, access to the student record system is limited to university personnel who have a legitimate need for this information. Each user is required to fill out an access form. A user name is created, and each user must also create a password that must be changed every 180 days. Periodic audits of records as well as reviews of who has access to the system are regularly scheduled to ensure a secure environment.

Students are assigned a UM ID number that is unique to them and they are encouraged to use it instead of their social security number. Students are required to provide their student ID or a photo ID when requesting academic record information from this office.

FERPA Training

FERPA, the Family Educational Rights and Privacy Act, provides established guidelines for universities to ensure that students have access to their educational records as well as to ensure the privacy of said records by restricting the disclosure of information from educational records to those persons authorized under the Act. FERPA guidelines must be followed when dealing with the disclosure of student information.

All staff who use the student records system are required to complete a FERPA tutorial. Periodic reviews are required.

Service Indicator (Hold) on Student Records

Schools and colleges, university administrative departments and other student related offices have the ability to put service indicators, also known as holds, on student records. These holds can be financial, academic or disciplinary in nature and may delay a student's ability to register, to receive an official transcript or to receive a diploma. Holds on a student's record normally require action on the part of the student, i.e., a payment, completion of paperwork, etc. Specific information on a hold and what is required to remove it can be found in the Student Services Center in CaneLink or can be obtained from the office/department that initiated the hold.

Course Information

Academic Credit

The University of Miami adopted the following Federal Definition of the Credit Hour at the Faculty Senate meeting on April 17, 2013 that appears in the Credit Hours policy statement of the Southern Association of Colleges and Schools Commission on Colleges (SACS), Federal Requirement 4.9:

Federal Definition of the Credit Hour

For purposes of the application of this policy and in accord with federal regulations, a credit hour is an amount of work represented in intended learning outcomes and verified by evidence of student achievement that is an institutionally established equivalency that reasonably approximates:

1. Not less than one hour of classroom or direct faculty instruction and a minimum of two hours out of class student work each week for approximately fifteen weeks for one semester or trimester credit hour,

or ten to twelve weeks for one quarter credit hour, or the equivalent amount of work over a different amount of time, or

- At least an equivalent amount of work as outlined in item 1 above for other academic activities as established by the institution including laboratory work, internships, practica, studio work, and other academic work leading to the award of credit hours.

Application of Credit Hour Policy

This credit hour policy applies to all undergraduate and graduate programs that award academic credit (i.e., any course that appears on an official transcript issued by the University) regardless of the delivery method including, but not limited to, self-paced, online, hybrid, lecture, seminar, and laboratory. Academic units are responsible for ensuring that credit hours are awarded only for work that meets the requirements outlined in this policy.

The expectation of contact time inside the classroom and student effort outside the classroom is the same in all formats of a course whether it be online, a hybrid of face-to-face contact with some content delivered electronically, or one delivered in lecture or seminar format. The University operates on the semester system and, for its measure of academic course work, uses academic credits (referred to as semester credits, semester hours, credit hours, hours, or credits).

Courses that have less structured classroom schedules, such as research seminars, independent studies, internships, practica, studio work, or any other academic work leading to the award of credit hours, at a minimum, should state clearly learning objectives and expected outcomes and workload expectations that meet the standards set forth above.

Two or three laboratory hours each week throughout a semester are considered the equivalent of one lecture hour in counting credit hours earned in an undergraduate laboratory or studio course.

No grades or credit hours are given for audited courses.

Campus Processes - Curriculum Review

Each College or School within the University of Miami is charged with following the policy on credit hours in its review and approval of all undergraduate and graduate courses and for certifying that the expected student learning for the course meets the credit hour standard. The determination of credit hours is made when a new course or a revision to an existing course is proposed. The submitted syllabus is examined for contact time as well as for assignments and evaluation mechanisms.

The Office of the University Registrar requires training for class scheduling before granting access to any departmental staff approved by a department for scheduling classes.

Academic Calendar

The University of Miami adheres to a reasonable approximation of the Carnegie unit for contact time. In addition, students are expected to spend two hours outside of class in preparation for every classroom hour. The Academic Calendar is the official record of academic instruction.

The standard meeting times for three-credit hour courses are as follows:

- 50-minute, Monday-Wednesday-Friday schedule;
- 75-minute, Tuesday-Thursday schedule.

The calendar is planned to ensure 69 class days (41 Monday-Wednesday-Friday meeting days and 28 Tuesday-Thursday meeting days) and at least five days for final examinations. The policy allows a mandatory examination period to be counted in the minutes of instruction, but does not count reading days. The University has a required two-and-a-half-hour final examination policy that adds 150 minutes of instruction, resulting in a minimum of 2,200 minutes of classroom instruction in a three-credit hour course for all undergraduate and graduate terms in the Academic Calendar.

The calculation for summer sessions and other abbreviated terms follows this same standard which means longer class meeting times over the duration of the shortened term.

The University Registrar maintains the official Academic Calendar on its website: <http://www.miami.edu/index.php/registrar/calendar/>.

School of Business Administration

In the School of Business Administration, graduate programs include terms of varying length. The School follows federal and SACS guidelines for the credit hour. All graduate business programs have a minimum of 750 minutes of instructional contact time per credit hour, including the final examination. Students are expected to dedicate at least two hours of course-related work for each hour of instruction.

School of Law

The School of Law is accredited by the American Bar Association and follows federal and SACS guidelines for the credit hour. Ordinarily, full-time students must enroll for a minimum of 11 credit hours and a maximum of 16 credit hours (please consult the Student Handbook and Honor Code). For one credit hour, a student receives 700 minutes of instruction, exclusive of examination time. For a three-credit hour course, this equates to 2,100 minutes of classroom instruction. An additional 180 minutes of instruction is allotted for the final exam session in a three-credit hour course. The faculty expects students to spend at least two hours outside the classroom in preparation for each hour of instruction.

Miller School of Medicine

The Miller School of Medicine is accredited by the Liaison Committee on Medical Education (LCME). The School's Department of Physical Therapy is accredited by the Commission on Accreditation in Physical Therapy Education (CAPTE). The length of all educational programs is appropriate for each degree, based on national standards and accreditation criteria. The School follows federal and SACS guidelines for the credit hour. Completion of the M.D. program ordinarily takes four years. Although credit hours are not specified by the LCME, the medical education program leading to the M.D. must include at least 130 weeks of instruction. The University of Miami's curriculum consists of 161 weeks and may be referenced here: <http://admissions.med.miami.edu/md-programs/general-md/curriculum>.

Change or Drop of Course

Course changes after the completion of registration must be approved by the student's academic dean.

Dropping of any course for which the student has registered is official only when the drop has been fully processed by the student successfully dropping the course via CaneLink or by the Office of the Registrar.

Please note: Failure to attend classes or merely giving notice to instructors of one's absence will not be considered as an official withdrawal and may result in failure in the course.

The last day to drop a course or make a change in credit-only option is noted on the Academic Calendar located on the Office of the Registrar's website at www.miami.edu/registrar (<http://www.miami.edu/registrar>).

Students enrolled in a course after the withdrawal date must receive a final grade in the course.

Class Attendance and Absences

Regular and punctual class attendance is vital for all students.

Instructors will distribute course syllabi which include policies regarding class attendance and missed or late work. Any student may be dropped from a course or receive a lowered grade for unauthorized absences in excess of those permitted by the instructor. It is each student's responsibility to know and understand the instructor's policies. It is also the student's responsibility to give the instructor notice one week prior to any anticipated absence and to contact the instructor within one week after any unanticipated absence.

All students are responsible for material covered during their absence. However, the instructor must allow each student who is absent for a University-approved reason either the opportunity to make up, or to be excused from, work missed, without any reduction in the student's final course grade as a direct result of such absence.

Other than absences for a University-approved reason, the instructor determines whether or not an absence is for an acceptable reason and whether or not students shall have the opportunity to make up missed work. If the instructor does not recognize the reason as acceptable, the student may appeal to the chair of the department in which the course is offered.

The following constitute University-approved reasons for absences:

1. Participation in an activity approved by the Academic Deans Policy Council, such as musical and debate activity, R.O.T.C. function, or varsity athletic trip; participation in a special academic activity such as a field trip or other special event connected with academic coursework. Verification of a student's participation shall be issued by the sponsor when authorized by the Office of the Executive Vice President and Provost.
2. Observance of a religious holy day as described in the Religious Holy Day Policy, below:

Religious Holy Day Policy

The University of Miami, although a secular institution, is determined to accommodate those students who wish to observe religious holy days. It seeks to reflect its awareness of and sensitivity to religious holy days whenever possible when scheduling University activities. The following provisions are meant to apply equitably to all religious groups and to provide opportunities to all to meet their religious obligations.

1. Except as specifically provided to the contrary, this policy is binding on all students in undergraduate programs. Schools offering graduate or professional programs, including undergraduate professional programs, are strongly encouraged to adhere to these policies to the maximum extent practicable.

2. Any student absent from class in observance of a religious holy day shall not be penalized in any way for an examination or assignment missed during the period of absence. Absence in observance of a religious holy day does not relieve students from responsibility for any part of the course work required during the period of absence.

Students who are absent on days of examinations or class assignments shall be offered a reasonable opportunity to make up the work without penalty, if the student previously arranged to be absent. Nothing in this policy shall preclude faculty members from limiting the number of student absences to a reasonable number of absences for any reason. The faculty member has discretion to determine how the make-up obligation will be fulfilled. A faculty member who penalizes a student contrary to these provisions may have committed unprofessional conduct, and thus may be subject to a complaint to the Committee on Professional Conduct under the provisions of Section B4.9 of the Faculty Manual.

3. It is the student's obligation to provide faculty members with notice of the dates they will be absent due to observance of religious holy days, preferably before the beginning of classes but no later than the end of the first three class days. For religious holy days that fall within the first three class days, students must provide faculty members with notice no later than two class days before the absence. Missing a class due to travel plans associated with a particular religious holy day does not constitute an excused absence. Absences due to observance of religious holy days that are not pre-arranged with the relevant faculty member within the first three class days may be considered unexcused, and the faculty member may therefore prevent the student from making up examinations or assignments missed during the period of absence.
4. Faculty members are encouraged to anticipate days when a substantial number of students will be absent for observance of religious holy days and should avoid scheduling examinations and assignment deadlines on those days. Faculty members are expected to reasonably assist students in obtaining class information the student missed during the period of absence in observance of a religious holy day. In that regard, faculty members are urged to allow taping or recording of the class session, with the reproduction limited to the student's personal use, when a student misses a class due to observance of a religious holy day. To assist in identifying religious observance days, faculty members are encouraged to consult the illustrative list provided in the Interfaith Calendar (<http://www.interfaithcalendar.org>). Faculty members are urged to remind students of their obligation to inform faculty members within the first three class days of any anticipated absences due to observance of religious holy days and should include that information in the syllabus or course requirements document for that course.

Course-Numbering System

The following course-numbering system is used:

- Courses in the 100 series are primarily for freshmen.
- Courses in the 200 series are primarily for sophomores.
- Courses in the 300 series are primarily for juniors.
- Courses in the 400 series are primarily for seniors.
- Courses in the 500 series are open only to seniors or other qualified undergraduates.
- Courses in the 600 through 800 are open only to graduate students.

Courses in some departments, with the specific numbers 100, 200, 300, 400 are offered, in most instances, on an experimental or trial basis. When listed in CaneLink's Course Offerings, a more descriptive title will normally be attached.

Credit for Service Experience

Veterans of the military services may make application for academic credit for schooling received while in the armed forces. Credit hour may be awarded for work that the American Council on Education Guide regards as college level. Students must have credit hours approved by their departmental chairperson.

Credit hour for military service and experience is usually in the elective area and may not take the place of subjects required for graduation. Such work is not assigned quality points and is not included in quality point computations.

Credit Only Option

The credit only option has been established to encourage students to explore academic areas outside their major and minor fields of concentration. Students may use this option with free electives and receive a CR (Credit Received) or NC (No Credit). These courses become part of a student's record, but they do not count in the grade point average as computed by the University of Miami.

Eligibility

To be eligible to enroll for courses under the CR/NC option, a student must:

1. Hold the standing of Sophomore or above, and, if a transfer, must have completed one semester of residency at the University of Miami;
2. At the time of registration have a minimum cumulative grade point average of at least 3.00;
3. Elect the CR/NC option within two weeks following the last day of registration for Fall and Spring semesters. Election of CR/NC options for Summer Sessions must occur no later than the fifth class day following the last day of registration. No changes except withdrawals from the course are permitted after this time.

Regulations and Restrictions

1. Eligible students may take one course per semester for credit only, to a maximum of 9 credit hours.
2. Only free electives may be taken under this option. Free electives are defined as courses not taken to fulfill the requirements for the major, minor, or general education requirements (including prerequisite course work) of the University and the individual schools.
3. ENG 105 and ENG 106 cannot be taken for credit only.
4. Grading standards for the credit only option are the same as for students who register for the course under the regular grading system. Letter grades will be submitted by instructors to the Office of the Registrar. The Office of the Registrar will change all grades A through C (including "C-") to CR (Credit Received) for those enrolled under the CR/NC option.
5. A grade of NC (No Credit) will be recorded by the Office of the Registrar for all grades of D and F. The student will not receive credit hours or quality points for the grade of NC.

6. Should a student subsequently change his/her major, free electives taken for credit only prior to the declaration of this major may be counted toward fulfilling major, minor, or general education requirements at the discretion of the department chairman and the academic dean.

Final Examination Policy

- Final Examinations may not be given during a regularly-scheduled class period.
- No examination shall be permitted during the reading period.
- Final Examinations may be rescheduled only with the permission of the school/college dean.
- No student shall be required to take more than two final examinations in a twenty-four hour period. A student having three or more final examinations scheduled during a twenty-four hour period may request the instructor of the course most easily rescheduled (normally the course with the smallest enrollment) to reschedule the examination for that individual. The request shall be made no later than two weeks before the last class day.
- A student who has a conflict between a final examination and a religious observation may request that the instructor reschedule that student's examination. The request shall be made no later than two weeks before the last class day. For the resolution of any problem pertaining to the scheduling of final examinations, a student should consult with the following entities or persons in this order: the relevant instructor, the department chair, the Dean or designee. If the matter cannot be resolved at the school or college, the student should contact the Office of the Provost.

Registration

Registration dates are shown on the University Academic Calendar (<http://www.miami.edu/index.php/registrar/calendar>), and all students are expected to register on these days. If a student is permitted to register late, a fee may be charged.

Cancellation of Courses

Students who select courses and fail to make payment and/or financial arrangements with the Office of Student Account Services (OSAS) prior to the payment deadline will have their course schedules canceled. Reinstatement of classes can only occur after payment arrangements have been made with the OSAS to cover all financial obligations including any reinstatement fees. Reinstatement to cancelled classes will be on an "as available" basis after financial arrangements have been completed.

Repeat Rules

A student may repeat a course, but the repetition will not eliminate the previous grade from the record. A course may be repeated only once¹ unless written authorization is provided by the chair of the department in which the course is offered or, in the case of an un-departmentalized school, by the dean.

Illegal Repeat

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

General Repeat Rule

- If the initial grade is D+ or lower (or a C- in cases where an academic unit requires a C or higher), both the initial grade and the repeat grade are included in the computation of the student's cumulative grade-point average (CGPA).
- If the initial grade is a D or D+ (or a C- in cases where an academic unit requires a C or higher) and the repeat grade is passing, the number of credit hours required for graduation will be increased by the number of credit hours repeated.
- Registrations that involve repeating a course in which a grade of C or higher (or C- in cases where an academic unit does not require a C or higher) has already been earned do not earn quality points or credit hours, nor count as credit hours attempted.
- Courses repeated after graduation² will be posted to the transcript showing the grade received; however, the CGPA and credits earned will not be modified based on the grade received for the repeated course.

Freshman Repeat Rule

- A student may elect to repeat up to two courses that were taken at the University of Miami within that student's first two semesters of college work³ and in which the student earned a grade of D (including D+) or F. Each repeated course must be taken at the University of Miami, must be the same course as the course initially taken, and must be completed within 12 months after the end of the semester (or summer session) in which the initial course was first taken.
- No course may be repeated more than once under this rule. A course repeated more than once under the University's General Repeat Rule will not qualify under the Freshman Repeat Rule.
- Enrollment for a second time in a course constitutes a repeat of that course for the purposes of this rule, unless the student withdraws from the course on or before the University's published Last Day to Drop a Course date.
- For each repeated course, only the second grade (whether higher, or lower, or the same as the first grade) will be used in the computation of the student's CGPA. The initial course will not count as credit hours attempted or earned, although the initial course grade will remain on the student's permanent record.
- Students who plan to apply to graduate and/or professional school should be aware that such institutions may recalculate the CGPA to include the initial grade earned before the repeat.

¹ This does not include courses that are eligible to be repeated for credit (e.g. Special Topic courses, Music lessons, etc.). Courses that are eligible to be repeated are designated in the student information system, CaneLink. Courses may have limits on the number of times they may be repeated.

² This refers to courses or a course with a particular grade required for entry into a different degree program.

³ First two semesters includes work at all schools attended, not just the University of Miami.

Schedules

Fifteen or sixteen credit hours constitutes a normal schedule at the University. Academic deans and advisors will determine the appropriate credit hour load for their students. (A schedule of charges for credit hours

is found in the Financial Payment Policies section of this Bulletin.) The schedule of any student whose outside interests cause unsatisfactory scholastic attainment may be reduced by the dean.

Temporary/Permanent Withdrawal from the University

If a student decides to withdraw from the University of Miami, there are procedures in place to facilitate this process. In order to withdraw officially from the University, a student must follow the procedures outlined in this bulletin and on the Office of the Registrar website (<http://www.miami.edu/registrar>).

Failure to follow the outlined withdrawal process may result in monies owed to the university (e.g. tuition, fees, etc.), failing grades on a student's academic record and/or other negative consequences.

Please note that dropping courses in a summer session, thereby reducing a student credit-hour load to zero is not construed as a formal withdrawal from the University.

Undergraduate Students

Undergraduate students are required to meet with an Advisor in the 'Cane Success Center. The 'Cane Success Center is located on the 2nd Floor of the University Center, Suite 2275 (also known as "The Nest"). They can also be reached at (305) 284-1807 or success@miami.edu.

For more details about the withdrawal process and for helpful hints on making a smooth transition out of the University, visit the **Undergraduate Withdrawing Student Checklist** (http://www.miami.edu/index.php/cane_success_center/withdrawal/WithdrawingStudentChecklist) or view the PDF (<https://umshare.miami.edu/web/wda/admission/Website/PDFs/Withdrawal/Withdrawal%20Checklist.pdf>).

For students who are no longer on campus – If you have already left the University but did not complete the withdrawal process before your departure, please call or email the 'Cane Success Center at (305) 284-1807 or success@miami.edu to begin the withdrawal process. Your withdrawal will not be finalized until an Exit Interview is completed.

Undergraduate Appeal Process

Withdrawal Date Appeal Form – If you were unable to attend classes due to a serious accident or illness, and this prevented you from notifying the University of your withdrawal in a timely manner, a Withdrawal Date Appeal Form (http://www.miami.edu/index.php/cane_success_center/withdrawal/withdrawal_date_appeal_form) can be submitted for consideration by an Appeals Committee. Appeals are submitted **AFTER** completing the official withdrawal process above and must include supporting documentation as to what prevented a timely notification. All appeals must be submitted within 30 calendar days of the official withdrawal date established with the 'Cane Success Center or if the appeal is being submitted for a semester that has already completed, it must be submitted within 30 calendar days of the last day of the end of the semester in question. Appeals should be submitted via email to registrar@miami.edu or by mail to:

University of Miami
Office of the Registrar - Withdrawal Date Appeal
P.O. Box 248026

Coral Gables, FL 33124-6914

The Withdrawal Appeal Form can be found at: <https://umshare.miami.edu/web/wda/admission/Website/PDFs/Withdrawal/Withdrawal%20Date%20Appeal%20Form.pdf>

If you have a Merit-based Scholarship and want to return to UM –

If you withdraw from the University but choose to return within one calendar year, and you have continued to meet the requirements of your scholarship, then your merit scholarship will be waiting for you here. Contact the 'Cane Success Center to begin the process of readmission. *Frost School of Music students will need to re-audition after one semester away from the University.

Student Groups with Special Concerns Regarding Withdrawing from the University

- **Veterans** and children of deceased or totally disabled veterans attending the University as students under the government's educational benefit bills must also be cleared by the Veterans Affairs Certifying Official.
- **Varsity athletes or any athlete** registered with the department of Athletics must obtain approval and be cleared by the Athletic department prior to any change in their registration status, including withdrawal from the university.
- Per U.S. Department of Homeland Security (DHS) regulations, **international students in F-1 or J-1 visa status** must notify their ISSS advisor prior to temporarily or permanently withdrawing from the University and must leave the U.S. within 15 days of withdrawing. Failure to comply with DHS regulations may result in the loss of your future eligibility to enter the U.S.

Refunds

During the academic year, tuition will be refunded on a prorated basis depending on the date that is noted as the 'Total Withdrawal Date'. Tuition will be refunded on a prorated basis through 60 percent of the semester.

Title IV financial aid and tuition will be refunded on a pro rata daily basis through 60 percent of the semester. This date is determined based on the student notifying the Canes Success Center (Undergraduate)/ Office of the Registrar (Graduate) of his/her intent to withdraw. If the student fails to notify the appropriate office, federal guidelines for determining refunds will be followed. Please see the Refund Policy (p. 37) under the Financial Payment Policies section.

Military Withdrawal

- Students who need to withdraw from a semester due to official orders to active duty with the Armed Forces of the United State must provide a copy of their official written orders when submitting the request to withdraw.
- Students who withdraw **after the 12th week of the semester** because of these official orders may either be awarded credit hour (CR) or an academic grade for any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).

- Credit hour granted for courses under this policy should count toward graduation.
- There should be no refund of tuition for courses for which credit hour has been awarded. Refunds for courses not awarded credit hour should be on the same basis as complete withdrawals for military service.
- The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

General Education Requirements

Philosophy

The University of Miami's General Education Requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. The General Education Requirements provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The General Education Requirements allow students to create an integrative map for their academic careers, providing a context for more focused studies.

As an institution of higher learning in an increasingly diverse and global community our goals are to produce graduates who have been exposed to a broad spectrum of educational opportunities and to prepare them for successful participation in the world. The University's General Education Requirements consist of coursework taken before, within, and in addition to students' specialized study within their areas of concentration. The aims of the General Education Requirements are designed to ensure that graduates of the University will have acquired essential intellectual skills and exposure to a range of intellectual perspectives and academic disciplines. Whereas the requirements of majors specified by schools and colleges within the University emphasize depth of learning, the General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge.

Areas of Proficiency

The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use quantitative skills with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively. Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT examination may earn a student exemption from, but not credit for, ENG 105.

Students will be able to:

- Gather information, synthesize data, compare various points of view, and present results in writing.

- Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
- Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks.

Effective Fall 2016¹, new students without prior college credit in English Composition will be placed as follows:

- ENG 103: ACT English score below 18, SAT Writing score below 430, and (if relevant) TOEFL iBT Writing score below 18.
- ENG 105: ACT English score 18-31, SAT Writing score 430-680, or TOEFL iBT Writing score 18 or above.
- ENG 106 or ENG 107: ACT English score 32 or above or SAT Writing score 690 or above

¹ Beginning Fall 2017, the ACT Plus Writing or the Redesigned SAT with optional Essay will be required for new undergraduate applicants with fewer than thirty transfer credits. Placement cutoffs for the ACT Plus Writing and the Redesigned SAT with optional Essay are to be comparable to the fall 2016 score levels above, using concordance tables for the ACT Plus Writing and the Redesigned SAT with optional Essay.

All requirements for the English Composition General Education Requirements must be completed prior to attaining junior year classification.

Quantitative Skills

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to understand and use essential quantitative skills. The Quantitative Skills requirement helps students learn to use quantitative skills and tools to solve problems, including the interpretation, manipulation and application of quantitative data. Students fulfill this requirement by completing either a Department of Mathematics course numbered MTH 108 or higher or a quantitative skills course approved by the student's college/school and the University Curriculum Committee in consultation with appropriate academic units. Exemption from the requirement can be achieved through the following tests: AP, IB, SAT, SAT subject test in mathematics level 2, or a test administered by the Department of Mathematics.

Students will be able to:

- Select and use appropriate quantitative methods and tools to solve problems.
- Interpret, manipulate, and apply quantitative data to solve problems.

Areas of Knowledge

In April 2012, the University of Miami Faculty Senate adopted a new set of General Education Requirements for Areas of Knowledge. The new "Cognate Program" was implemented during the 2013-2014 academic year.¹

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural exploration.

In satisfying the Cognate Program for the Areas of Knowledge requirement, students examine creative expression in the arts, literature,

and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world. Students fulfill the requirement by completing three cognates, one from each of the three areas of the university curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics (STEM). A cognate is a group of at least three courses for at least nine credit hours, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate.

While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students' transcripts.

The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. (Some majors and minors, depending on the courses selected, can fulfill alternative Areas of Knowledge.) All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the "Responsible Academic Unit" (RAU) for the cognate. Inquiries about a cognate should be directed to the cognate's RAU.

¹ The Faculty Senate University Curriculum Committee submitted this clarifying language to Legislation #2012-19(B) The following rule applies to all cognates: A course may not be used to satisfy the requirements of more than one cognate. This rule applies whether the cognate requirement is being met by a major, a minor, or a designated cognate. The fact that a school requires students to take courses which the school construes as outside the major or minor, but must be taken to fulfill the requirements for that major or minor, does not allow the course to be counted for both purposes. On the other hand, the fact that a course is listed as one which must be taken to meet the requirements for a major or minor does not necessarily preclude a student from participating in a cognate which has that course as one of its options. In many cases, the student could take one of the other courses, which make up the cognate.

Arts & Humanities

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

- Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.
- Understand the creation and performance of art.

The following departments and programs offer courses that are used in Arts & Humanities cognates: Africana Studies; American Studies; Architecture; Art & Art History; Cinema & Interactive Media; Classics; English; History; Judaic Studies; Latin American Studies; Modern Languages & Literatures; Music Theory – Composition; Musicology; Philosophy; Religious Studies; Strategic Communication; and Theatre Arts. Others will be added as cognates are approved.

People & Society

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Students will be able to:

- Analyze the organization of society.
- Analyze patterns of social change.

The following departments and programs offer courses that are used in People & Society cognates: Accounting; Aerospace Studies; Africana Studies; American Studies; Anthropology; Business Law; Classics; Communication Studies; Criminology; Economics; Ecosystem Science & Policy; Educational & Psychological Studies; Geography; History; International Studies; Journalism & Media Management; Judaic Studies; Kinesiology & Sport Sciences; Latin American Studies; Management; Marine Affairs; Marketing; Military Science; Modern Languages & Literatures; Music Media & Industry; Nursing; Philosophy; Political Science; Psychology; Religious Studies; Sociology; Strategic Communication; Teaching & Learning; Urban Studies; and Women's & Gender Studies. Others will be added as cognates are approved.

Science, Technology, Engineering & Mathematics (STEM)

Science, Technology, Engineering & Mathematics (STEM) cognates develop students' abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Students will be able to:

- Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
- Interpret quantitative data and draw useful conclusions.

The following departments and programs offer courses that are used in Science, Technology, Engineering & Mathematics cognates: Anthropology; Architecture; Atmospheric Science; Biochemistry; Biology; Biomedical Engineering; Chemistry; Civil, Architectural & Environmental Engineering; Computer Information Systems; Computer Science; Economics; Ecosystem Science & Policy; Electrical & Computer Engineering; Engineering Science; Finance; Geography; Geological Sciences; Health Science; Industrial Engineering; Kinesiology & Sport Sciences; Management Science; Marine Science; Marketing; Mathematics; Mechanical & Aerospace Engineering; Microbiology &

Immunology; Neuroscience; Nursing; Physics; and Psychology. Others will be added as cognates are approved.

NOTES

For the current listing of cognates, visit <http://www.miami.edu/cognates>.

The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge, but may be used to fulfill the cognate requirement in only one of those areas. A course may be used in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates by application to the cognate's RAU. Transfer courses, Advanced Placement, International Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course credit hour, can be used in cognates. Courses that transfer in with non-specific UM course credit hour can be used in cognates only by application to the cognate's Responsible Academic Unit (RAU).

Transfer students entering the university with 30 or more credits may take an individualized cognate as one of the three required cognates. Individualized cognates allow for flexible use of transfer credits to fulfill a cognate requirement, as approved by the dean/advising office in the student's school/college.

Grades

Academic Standing, Probation, and Dismissal

At the end of each semester the University shall determine whether a student is in Good Academic Standing, on Academic Probation, or subject to Academic Dismissal. Some schools and colleges may have exceptions to the Good Academic Standing, Academic Warning, Academic Probation and Academic Dismissal policies listed below.

Good Academic Standing

To be in Good Academic Standing a student must not be on Academic Probation or subject to Academic Dismissal.

Academic Probation

Students other than first-semester freshmen (non-transfer student) whose UM cumulative grade-point average (CGPA) in University of Miami courses is below the following levels shall be placed on Academic Probation.

Credit Hours Earned	CGPA
Fewer than 33	1.7
33-64	1.8
65-96	1.9
More than 96	2.0

First-semester freshmen who have a semester grade-point average below 1.3 shall be placed on Academic Probation. In addition, students who fail to make satisfactory progress toward meeting the degree requirements

specified by their School or College may be put on Probation by the Academic Standards Committee of the School/College. Students on Academic Probation must meet with their academic advisor prior to the following semester and shall be restricted to a 13-credit hour load.

Academic Dismissal

A student who remains on probationary status after two consecutive semesters on Academic Probation shall be subject to Academic Dismissal. A student who has been on Academic Probation for one semester and has a CGPA below 1.0 shall also be subject to Academic Dismissal. The decision to dismiss shall be made by the Academic Standards Committee of the School or College in which the student is enrolled. If a decision is made not to dismiss, the student shall remain on Academic Probation.

Appeals and Readmission

Students who wish to appeal their Academic probation or dismissal for academic reasons, must do so in writing to the School or College Academic Standards Committee within thirty days of the notice of dismissal. Those who have been dismissed for academic reasons shall not be considered for readmission to any school or college at the University until at least two regular semesters have elapsed since their dismissal.

Faculty Senate Student Affairs Committee Standard Academic Appeals Process

The Faculty Senate Student Affairs Committee (FSSAC) has responsibility for undergraduate student academic appeals. The FSSAC includes faculty representatives from all undergraduate schools as well as three non-voting ex officio representatives: a graduate and undergraduate student representative and the University ombudsperson. The FSSAC reviews undergraduate student academic appeals that have not been resolved at the department, school, or college levels. As noted in section II below, the FSSAC hears cases only after they have gone through the departmental and college process. The processes are the same for grade and non-grade appeals except as noted below.

I. Time Constraints

Appeals must be filed within a year of the occurrence of the academic action resulting in the appeal and prior to the completion of all degree requirements or withdrawal from the University. Exceptions to this deadline may be permitted by the FSSAC for good cause.

Each level of appeal should aim to review the appeal and arrive at judgment within a two month period from the date the appeal reaches them. The entire process should be completed within one year.

II. Order of Appeal

A student appeal regarding a faculty or administrative academic action must be addressed to the following entities or persons in this order:

1. The faculty member or administrator responsible for the course, program, or activity.
2. The department/program chair/director or administrative superior of the faculty member or administrator.
3. The Dean or designee of the school or college offering the course, program or activity.

4. If the school, college or administrative unit has a committee constituted to hear student appeals, that committee must be consulted before proceeding to the next level.
5. The ombudsperson. The student is to provide the materials listed in Section III below to the ombudsperson who will review the merits of the appeal, and attempt to resolve the matter. The ombudsperson, as part of his/her review should give the student a preliminary assessment as to whether the matter, as presented by the student at that time, is reviewable by the FSSAC.
If the matter is the appeal of a final grade, and only after all the other steps are taken, the ombudsperson may refer the matter to the Provost who will decide whether or not to refer the appeal to the FSSAC.
For a non-grade-appeal, the student has the final authority to decide whether to take the appeal to FSSAC. If s/he chooses to do so, the ombudsperson shall forward the appeal and the accompanying documentation to the FSSAC via the Faculty Senate Office.
6. The Provost may request that the FSSAC review an appeal. If, but only if, s/he does so, the FSSAC shall have jurisdiction to review a grade-related appeal.
 - a. As part of the request, the Provost shall forward to the FSSAC, via the Faculty Senate office, the materials submitted by the student as indicated in Section III, below.
 - b. The FSSAC will review the student's written appeal (see section III below), confer with the appropriate faculty, administrators, and others as it deems necessary in making its recommendation to the Provost. The FSSAC may request an interview with the student, additional information or access to records, interviews with relevant faculty or administrators, or additional information or access to records kept by faculty or administrators.
 - c. The FSSAC will communicate its findings and recommendations to the Provost. Copies shall be provided to the Faculty Senate.
7. The final decision with respect to the grade-related appeal will be made by the Provost and communicated to the student in writing. Copies shall be provided to the Faculty Senate Office and to the Chair of the FSSAC.
8. For non-grade-related academic appeals:
 - a. The FSSAC shall act upon those appeals and report its findings and recommendation to the Provost. The Committee shall forward to the Chair of the Faculty Senate a copy of its recommendation to the Provost.
 - b. The Provost shall communicate his/her decision on each recommendation to the student concerned, to the Chair of the Committee, and the Chair of the Faculty Senate.

III. Materials for an Appeal

When bringing an appeal, the student must state in writing issues s/he wishes to have considered. The appeal must include:

1. An appeal letter clearly stating the conditions as seen by the student, and offering reasons for granting the appeal.
2. The appeal letter must indicate if the student wishes to make a personal appearance and, if so, the reasons why the appearance is necessary.
3. Documents of support (e.g., examinations, term papers, syllabi, or medical documentation of illness) that the student wishes to have examined.

4. All written decisions made at earlier levels of the appeal by individual faculty/administrators, departments/programs/administrative units, college or school committees, and deans which are available to the student or in the student's possession.

IV. Other Notes and Special Conditions

1. If the appeal is based on or related to a charge made by the student of discrimination on the basis of race, color, national origin, religion, sex, sexual orientation, age, or handicap, a representative of the appropriate University office will be contacted and, as appropriate, consulted in the appeal process.
2. If the appeal is based on or related to a disability:
 - a. The ADA Coordinating Committee shall serve in an advisory capacity.
 - b. The student is to include in the materials provided, the appropriate forms from the Office of Disability Services documenting:
 - i. An evaluation of the disability
 - ii. Recommendations related to the disability
 - c. The FSSAC does not consider appeals based upon the grant, denial or modification of an accommodation by the Office of Disability Services. Instead, any such appeal is as prescribed by the Office of Disability Services Grievance Procedure only.

The Grading System

A	Excellent attainment
B	Good attainment
C	Fair attainment
D	Poor attainment (earns credit hour but may not fulfill requirement for a major)
F	Failure (effective Fall 1995)
W	Course dropped on or before the last day for withdrawing from classes as published in the official calendar of the University. Credit hour can be earned only by successful repetition of the course.
I	Incomplete work in passing status with the instructor's permission to complete the course. An "I" will be assigned only if the instructor is satisfied that there are reasonable non-academic grounds for the student's incomplete work. ¹ An "I" is not intended to be assigned in order to permit a student to repeat a course without registration or to permit a student to do additional work in order to improve upon grades earned during the semester. The student who receives an "I" must complete the course with a passing grade within the time frame specified by the professor of the course but not longer than the end of one calendar year, or prior to graduation, whichever occurs first. An Academic Dean may approve an extension initiated by the course instructor. An "I" not completed prior to the student's graduation shall be changed to an "IE" or "IF" by action of the student's Academic Dean. ²

IP	Denotes in progress grade assigned upon satisfactory completion of the first semester of a two-semester sequence, with the final grade for both courses to be submitted at the end of the second semester of the sequence. Please note that all "IP"s must be converted to a letter grade or "IF" at graduation. "IP" will also be converted to "IF" upon any departure from the University for a period in excess of one year. ³
IF	Symbol indicating that an "I" grade was not appropriately completed. ⁴ The symbol "IF" is equivalent to an "F" when computing a student's average.
CR	Grade signifying that credit only is awarded based on a "C" average or better.
NC	Grade signifying that no credit hour is awarded based on a course average below a grade of "C".
NG	Symbol assigned by the Office of the Registrar indicating that the instructor has not reported the student's grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student's graduation, or by the end of one regular academic semester, whichever comes first. An Academic Dean may approve an extension initiated by the course instructor. An "NG" not replaced by a passing grade, or by a "W", prior to the student's graduation shall be changed to an "F" by action of the student's Academic Dean. ⁵

Grade Point Average

The grade point average is used to determine:

- class rank
- graduation and university honor eligibility
- good standing, probation, and dismissal status
- scholarship eligibility

Your official grade point average is based only on the work you have completed at the University of Miami. The only exception to this policy is for determining whether a student qualifies for university honors established by the minimum grade point requirement at the time of graduation. For graduation purposes, cumulative grade point average is defined as either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere whether or not the transfer work is accepted toward a degree at the University of Miami, whichever is lower.

Quality points per credit hour are awarded as follows:

A+	4.00
A	4.00
A-	3.70
B+	3.30
B	3.00
B-	2.70
C+	2.30
C	2.00
C-	1.70
D+	1.30
D	1.00

E (Prior to Fall 1995)	0.00
IE ¹	0.00
F (Effective Fall 1995)	0.00
IF	0.00

Courses marked with an "IE" or "IF" count as credit hour attempted but are not counted in credit hours earned and do not carry quality points.⁵

Credit hours marked CR are counted as credit hours earned but are not counted in credit hours attempted and do not carry quality points. Courses marked with the symbols I, IP, W, NC, and NG do not carry credit hours attempted, credit hours earned, or quality points.

The grade point average is determined by dividing the total quality points earned by the total credit hours attempted.

Military service credit hour, some foreign university credit hour, correspondence course credit hour, credit by examination, etc., are not awarded quality points and do not enter the computation of the grade point average.

Honor Code

The Honor Code, initiated at the request of the Undergraduate Student Body Government, ratified by student referendum, approved by the Faculty Senate, by the President of the University, and administered by students, protects the academic integrity of the University of Miami by encouraging consistent ethical behavior among its undergraduate students. The Code provides standards that prohibit all forms of scholastic dishonesty, including cheating, plagiarism, collusion, and falsification or misrepresentation of experimental data. The Code covers all written and oral examinations, term papers, creative works, assigned computer related work, and any other academic work done at the University by an undergraduate student.

All undergraduate students are responsible for reading, understanding, and upholding the Honor Code. Signed pledges are required for written work submitted for evaluation, but the absence of a signed pledge does not free a student from the ethical standards required by the Code. Procedures for dealing with infractions of the Code, including provisions for appeals, are printed in the text of the Honor Code. Copies may be obtained from the Office of the Dean of Students or from the office of the Undergraduate Student Body Government, or on-line at www.miami.edu/honor-council (<http://www.miami.edu/honor-council>).

In keeping with the traditional prerogatives of university faculties, nothing in the Code infringes on the faculty's assignment of grades undertaken in a class. Instructors are informed when students have been found guilty of infractions involving their classes. Courses in which students have been failed for academic dishonesty may neither be dropped nor repeated under the terms of the freshman repeat rule.

The Dean's List

The Dean's List is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained high scholastic achievement for the semester. To attain the Dean's List, a student must, for the semester:

1. have registered for and have completed 12 or more graded credit hours (excluding the credit hours earned in courses taken for credit only);
2. have attained a quality point average of 3.50 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Dean's List will be announced by each college and school at the end of the semester. The Office of the Registrar will post this achievement to the student's permanent record.

The Provost's Honor Roll

The Provost's Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained a high scholastic achievement for the semester. To attain the Provost's Honor Roll, a student must, for the semester:

1. have registered for and have completed 12 or more graded credit hours (excluding the credit hours earned in courses taken for credit hour only);
2. have attained a quality point average of 3.75 or higher for the semester;
3. have no courses with pending grades (I or NG).

The Provost's Honor Roll will be announced by the Provost's Office. The Office of the Registrar will post the achievement to the student's permanent record, and distribute the Provost's Honor Roll Certificate.

The President's Honor Roll

The President's Honor Roll is composed of those undergraduate students who are enrolled in a degree-seeking program and have attained the highest possible scholastic achievement for the semester. To attain the President's Honor Roll a student must, for the semester:

1. have registered for and completed 12 or more graded credit hours (excluding credit hours earned in courses taken for credit only);
2. have attained a quality point average of 4.0 for the semester;
3. have no courses with pending grades (I or NG).

The President's Honor Roll will be announced by the Office of the Registrar who will post the achievement to the student's permanent record, and distribute the President's Honor Roll Certificate.

Graduation

Graduation and Degrees

It is the responsibility of the student to be sure he/she makes satisfactory progress toward, and fulfills requirements for, the degree he/she seeks. He/she may obtain help in the office of his/her Academic Dean.

To receive a Bachelor's degree from the University, the student must earn at least 120 credit hours (more in some schools), with a C average (2.0) or better as well as a C average for all work done at the University of Miami.

Students must also meet all of the degree requirements of their respective schools and should not expect requirements in composition, mathematics, foreign languages, or other subject areas to be waived for any reason.

- A student transferring credit hours from a 2-year community or junior college (this being the last school attended) must complete a minimum of **56 credit hours in residence** at the University of Miami to earn an undergraduate degree.
- A student transferring credit hours from a 4-year college or university (this being the last school attended) must complete a minimum of **45 credit hours in residence** at the University of Miami to earn an undergraduate degree.
- In addition, each student must complete at least half of the credit hours specified for his or her major in residence at the University of Miami.
- Not more than 30 credit hours of correspondence work and extension work combined will be accepted toward a degree, and neither correspondence nor extension work may be credited as a part of the last 45/56 credit hours of the student's program.
- Not more than 30 credit hours based on military experience will be awarded toward the degree.
- Credit hours earned in a manner other than by course registration, i.e. proficiency examination, CLEP, placement tests, etc., may not be used to meet the final 45/56 credit hour residency requirement, however such credit by examination may be earned while the student is enrolled in the courses needed to meet the final 45/56 credit-hour residency requirement.
- Once a degree has been awarded, no changes will be made to the academic record.

Dual Degree

- To obtain two different undergraduate degrees, a student must complete all the requirements for each degree.
- A second undergraduate degree on the same level requires a different major and a different minor.
- If the degrees are in two different schools, a student must meet the requirements with distinctly different majors and minors, wherever applicable, in each school.
- Students must obtain approval from the Office of the Senior Vice Provost and Dean of Undergraduate Education to pursue dual degrees in different schools.

As a general rule, college credit hours more than 12 years old are not recognized for degree purposes. Students in this category should consult their academic deans.

A student must apply for graduation on CaneLink during the semester in which they expect to graduate.

Graduation Honors

University Honors (summa cum laude, magna cum laude and cum laude) will be determined by a minimum GPA unique to the school or college from which the student is graduating. The GPA required will change each

academic year and will be based on the cumulative GPA of the previous year's graduating class.

Visit the Honors Program and Office of Academic Enhancement website at www.miami.edu/honorsprogram (<http://www.miami.edu/honorsprogram>) for specific GPA requirements each academic year to determine eligibility for graduation with University Honors.

The top 5% of the graduating class will receive summa cum laude within each individual school or college; the next 10% will receive magna cum laude, and the next 10% cum laude.

Eligibility for University Honors for each student is determined by the lower of two GPAs:

1. UM cumulative graduation GPA
2. Combination GPA (UM cumulative graduation GPA + Transfer GPA)

A student must meet the required GPA by the completion of the final semester within his/her school or college to be eligible to graduate with the honor.

Diplomas and Transcripts

No diplomas or official transcripts are released from the Office of the Registrar without the approval of the Office of Student Account Services.

The last date on which application may be made for each graduation period is published in the Academic Calendar. The academic deans are the only officers authorized to approve placing the student's name on the candidate degree list.

Diplomas are issued after the student's graduation has been awarded by the school/college and noted on the student's official transcript. The diploma must be issued in the name on the student's academic record. Addition or omission of a middle name is acceptable. The addition of a middle name will be acceptable only as it appears on the student's application for admission. If the middle name is not on the application or if the student wants another version, documented proof of a legal name change must be presented to the Office of the Registrar.

Official transcripts are issued only upon receipt of a secure electronic request through the university's online transcript system or a written and signed request from the student is received in the office. Payment for the transcripts is required before they will be sent.

Unofficial transcripts are available free of charge to students through CaneLink.

Student Status

Academic Bankruptcy

Students entering college sometimes perform at an unacceptable academic level. They either drop out or are dismissed. Some individuals with this experience re-evaluate their educational goals and desire to return to college. Their academic record, however, may present an insurmountable obstacle. Undergraduate students in this category who want the opportunity for a fresh start at the University without this handicap may apply for admission or readmission with the request that their prior academic record be disregarded.

In order to be considered for academic bankruptcy, a student's combined college grade point average must be below 2.00 as calculated by the Office of Admission.

Application for Initial Admission to the University with Academic Bankruptcy

The applicant must apply to the Office of Admission and:

1. Must have been admissible to the University as a senior in high school,
2. Must have attended an accredited institution for at least one year and must not have attended any college or university for the preceding six months, and,
3. Must not be admissible to the University based on his or her college-level work.

Application for Readmission to the University with Academic Bankruptcy

A University of Miami student who has dropped out or who has been dismissed may request Academic Bankruptcy on meeting these conditions:

1. The student must apply to the Office of the Registrar.
2. At least six months must have elapsed since the end of the semester in which the student was last in attendance at the University of Miami.
3. Detailed written evidence must be provided with the readmission application, showing that the conditions or factors that caused the poor performance have changed sufficiently, so that there is a reasonable expectation of future satisfactory performance.

Conditions of Approval

1. If Academic Bankruptcy is approved, no course credit hours earned previously will be displayed on the transcript for credit hours attempted, credit hours earned, or quality points earned; however, all grades¹ earned previously will remain on the transcript.
2. Readmission applicants with approval from the dean of the accepting school, may have Academic Bankruptcy apply only to those credit hours taken by the student when last in attendance at the University of Miami, so that credit hours earned at another institution subsequent to the date the student last attended the University are not affected.

¹ All grades, good or bad, are invalidated during this process and will not be reinstated at any future time.

Academic Bankruptcy will be granted only once for any student.

Certification of Enrollment

Students who require certification of enrollment for insurance or education loan purposes may obtain an enrollment letter via their CaneLink¹ account (<https://canelink.miami.edu>) or by submitting a request in writing to the Office of the Registrar. Enrollment verification via CaneLink is available after the last day to drop without a "W". Please refer to the University's academic calendar for specific dates.

Enrollment Verification letters will include only information maintained in the university's official academic record system. The Office of the Registrar will not alter, amend or add anything to the standard letter. Notarization is available upon request.

Students will be certified as currently enrolled once they have met their financial obligations. If a student is delinquent in paying his/her tuition and fees statement balance and/or Monthly Payment Plan, the University will not process transcript and/or diploma requests. Course selection/modification will not be permitted for any previous, current or future semesters. The student is not considered enrolled during the term in question, which means that certification of enrollment cannot be provided for insurance, student loan deferment or repayment purposes. Non-payment also means the student is ineligible for financial assistance awarded for the term in question. A late payment fee may be assessed on delinquent accounts.

Students who require enrollment certification for scholarship purposes only, will be conditionally certified until financial obligations are met.

¹ For students who do not have a Social Security number, verification letters are generated by the Office of the Registrar. Letters are typically generated in seven (7) business days but may take longer during our registration period and the first two weeks of classes.

Classification of Students

Students are classified in three ways:

1. by course load (full- or part-time);
2. by objective (degree sought, non-degree, transient, audit, etc.);
3. by year.

By Course Load

A student is a full-time student if he/she carries not less than the minimum normal load, 12 credit hours per semester in most schools, nine credit hours in the Graduate School (please refer to the Graduate section for exceptions). The minimum credit hour loads in a summer session will vary for each category, according to the length of the sessions. (A typical full-time class schedule for fall and spring semesters not requiring override approval from an advisor consists of 15 credit hours. In some cases, students are recommended to enroll in fewer than 15 credit hours.) Please refer to the university's full-time/half-time policy located at www.miami.edu/registrar (<http://www.miami.edu/registrar>). For spring semester, Intersession courses can be included when evaluating full-time status. It is important to note that tuition charges for Intersession courses typically are separate from and in addition to charges for the spring semester. Full-time status may vary from one college or school to another. Students should consult with the dean of his/her college or school for details.

By Objective

A degree student is one whose immediate educational objective consists wholly or principally of work normally credited to a University of Miami bachelor's or higher degree. To qualify for this status, a student must meet the standards for admission.

A non-degree student is one who is not pursuing a degree program. Such students are those who, although eligible for degree candidacy, have requested permission to take a limited or special selection of credit hour

courses without regard to requirements for a degree. This classification includes high school graduates and students with previous college credit hour

1. who do not want degree status;
2. whose applications for degree status are incomplete;
3. who are taking work toward teacher certification;
4. who are workshop applicants;
5. who are visiting summer school students. (Students under 21 years of age who have not completed high school will not be admitted to this status.) Non-degree students are sub-classified as transient, special, etc.

An undergraduate non-degree student may petition the Director of Admissions to have his/her status changed to that of degree student. Up to 30 credit hours earned in non-degree status may be applied towards a degree, but only to the extent approved by the appropriate academic dean. It is therefore important that the degree student identify himself/herself as such, early in his/her program.

By Year

- A freshman is a degree student who has earned 0 to 29 credit hours.
- A sophomore is a degree student who has earned 30 to 59 credit hours.
- A junior is a degree student who has earned 60 to 89 credit hours.
- A senior is a degree student who has earned 90 credit hours or more.

Transient Student

A transient student is one who is enrolled at the University of Miami with the sole intention of using credit hours earned toward graduation elsewhere.

Audit Student

An audit student is one who enrolls as an observer or listener only. Auditing is allowed only when there is space available in the class. Audit status may be restricted by the Dean in the case of laboratory, studio or performance courses where audit status is not appropriate. Audit students receive no credit hour, do not prepare written assignments or take examinations, are not eligible for residence in campus residence halls, and do not receive student privileges except for the use of the library. No entries are made on the permanent academic record for audited courses.

Students wishing to change from audit status to credit hour status must obtain all necessary approvals within two weeks following the last day of registration for Fall and Spring semesters and no later than the fifth class day following the last day of registration for Summer Sessions. No changes except withdrawals from the course are permitted after this time.

Note: Fee for auditing a course is non-refundable. Please refer to financial information section of the bulletin.

Undergraduates Taking Graduate Coursework

University of Miami undergraduates within 30 credit hours of meeting the requirements for the Baccalaureate Degree may be considered for

concurrent admission to graduate study in non-degree graduate status, and in this status may take and receive credit hour for graduate courses, while completing the requirement for the baccalaureate. The application may be found at: https://umshare.miami.edu/web/wda/grad/forms_/web/undergrad_take_grad_course.pdf.

Admission to Graduate Status requires:

1. Must have a minimum of 3.000 G.P.A.
2. The submission of an Undergraduates to Take a Graduate Course form (which can be obtained at the Graduate School) which will not require the application fee;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and of the Graduate Dean prior to registration on the form.

Admission to Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credit hours earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than six (6) credit hours may be taken in one semester, and no more than a total of twelve (12) credit hours may be taken while in Graduate Status. Students may take no more than 13 credit hours of combined undergraduate and graduate courses per semester.

Students electing Graduate status must register and be processed centrally at the Office of the Registrar.

Eligibility for University Extracurricular Activities

Full participation in University-sanctioned extracurricular activities and organizations is open to all full-time students who are not on academic probation and who have been assessed the Student Activity Fee. Extracurricular activities include, but are not limited to the following: academic, athletic, dramatic, or musical organizations or teams; student organizations registered with the Committee on Student Organizations (COSO); fraternities and sororities; student publications; program boards; and University committees.

Students on probation may participate in any activity required as partial fulfillment of their degree program; may attend meetings of organizations; and may play intramural sports. They may not otherwise compete, perform, or hold a leadership position. At the beginning of each fall semester, the activity's faculty or staff advisor or appropriate committee chairperson shall determine with the Office of the Provost the eligibility of each participating student. Some activities apply stricter standards, and may monitor academic progress and review eligibility during the academic year. Students should consult with the individual activity for specific requirements.

Readmission

Undergraduate students who have not attended the University for at least one semester should request readmission through the Office of the Registrar no later than two weeks before the beginning of classes, in the semester they wish to re-enroll. Readmission to the University is

contingent upon approval of the Dean of the school/college the student is applying to and clearance from the Office of Student Account Services.

International students who seek readmission must receive clearance from International Admission and submit a bank letter to receive an I-20 from International Student and Scholar Services.

Specific details on the readmission process can be found at: http://www.miami.edu/index.php/registrar/inactive_status_readmission_withdrawal/readmission_information/

Students who have attended another college or university since they were last enrolled at the University of Miami, will be required to provide a transcript of their work. Failure to disclose all prior institutions attended may result in disciplinary action.

An undergraduate student who has applied to graduate for a given semester will not be eligible to register for any subsequent semester until the student applies for readmission or admission to a new program. A candidate for graduation may wish to continue his/her studies in one of the following situations:

1. If the student fails to graduate and further registration is needed, they must delete their application for graduation in CaneLink and within twenty-four hours, registration for subsequent semesters or sessions should be available. Students should contact the Office of the Registrar for assistance.
2. If the student graduates and wishes to pursue a second bachelor's degree, the student must apply for readmission, stating his/her new degree objective.
3. If the student graduates and wishes to take additional course work without a degree objective, the student must apply for unclassified status.

Proof of immunization must be provided to the Student Health Service before readmission to the University of Miami. Failure to do so may prevent you from registering for classes.

Inactive Status

Inactive status is available to continuing, undergraduate, degree-seeking students who intend, and qualify, to re-enroll at the University of Miami after leaving the university for a designated period of time. This status is used when students will not be taking classes at another institution. Students interested in this option may obtain further information at <https://umshare.miami.edu/web/wda/registrar/Forms-1/InactiveStatusNotificationForm.pdf> or by visiting the Office of the Registrar.

Non-UM Programs

Students who study through a non-UM program, domestic or study abroad, and would like to have those credit hours applied toward their UM degree, should apply for Non-UM Program status. For more specific information on the Non-UM program please see the application:

<https://umshare.miami.edu/web/wda/registrar/Forms-1/Non-UM%20ProgramApplication.pdf>.

Non-UM is only available in the Fall and Spring semesters.

Student Identification Numbers

All students at the University of Miami will receive an identification number that is unique to them. This number supplements the social security number, which is also required by the university in order to provide information to the federal government and approved agencies. Access to social security numbers is limited to staff who have a legitimate need for that information.

Transfers Between Schools and Colleges

Undergraduate students who have compiled fewer than sixty (60) credit hours may transfer between schools and colleges provided that such students:

1. Demonstrate their academic admissibility to the new program (as defined by class rank and SAT scores) at the time of their original matriculation at the University;
2. Satisfy any special criteria required for admission by a particular program (e.g., auditions in the arts, portfolios in architecture, etc.); and
3. Obtain the approval of the Dean of the receiving school or college.

It is a general policy of the University that students admitted to degree seeking status may not transfer to an unclassified status.

Students who have compiled 60 or more credit hours with an average of 2.0 or higher and who have satisfied all of the above three conditions may be eligible to transfer between schools and colleges pending space availability and additional program requirements.

Admission

The University of Miami is a member of the National Association for College Admission Counseling and subscribes to its Statement of Principles of Good Practice.

Freshman Admission

The Admission Committee reviews applications and bases admission decisions on the following factors:

- **The Secondary School Record.** The applicant must be in the process of completing graduation requirements at a regionally accredited secondary school or must be a graduate of an accredited secondary school. The applicant must have successfully completed a solid college preparatory program including English, Mathematics, natural sciences, social sciences and foreign language.
- **Standardized Tests.** *Applicants attending schools in the United States must submit official SAT or ACT results. The results of these tests, together with the secondary school record, provide a better measure of the ability of a candidate to perform college level work successfully than can be obtained by either measure alone. Applicants graduating from a secondary school outside of the United States **should not** submit SAT or ACT results.*
- **The Counselor's Evaluation Form.** This form is to be completed by the applicant's secondary school counselor and includes rank in class, test score information, and an evaluation of potential for academic success in the student's area of interest.

- **The Essay.** Since each applicant is considered individually, the Essay provides the opportunity to present information that may assist the Admission Committee as it evaluates the application for admission.

See admission procedures for freshmen (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/freshman/freshman_application_instructions).

Transfer Admission

Transfer admission may be granted in most fields of study to students who have earned credit hours from other regionally accredited colleges or universities. Courses completed with **passing grades of C or higher** at other colleges and universities and acceptable for academic credit hours by the University of Miami, will be verified, and where appropriate, will be translated into University of Miami equivalents by the Office of Undergraduate Admission. However, the Dean of the College or School within the University from which the student plans to graduate determines which transferred courses may be counted toward meeting graduation requirements of that College or School.

Transfer of Credit Hours to UM

Work taken at other institutions will appear on the University of Miami transcript in separate entries as:

1. The total number of transferable credit hours attempted and quality points earned, regardless of grades, and
2. The total credit hours transferred, which shall be the total credit hours for which a grade of C or higher was earned.

*Note: Only the transfer totals earned are added to the University of Miami totals. Total credit hours attempted and quality points earned elsewhere are **not included** in the University of Miami totals.*

The University does not accept transfer credit hours for courses in which a grade of C- and below (or the equivalent grade) was earned. However, grades of C-, D, and F are used to calculate the transfer admission grade point average.

Credit hours are not transferred from institutions not accredited by the appropriate regional accrediting association. Limited exceptions may be made with the approval of the Dean in the College or School of the student's major. Credit hours transferred from institutions not in existence long enough to attain regional accreditation must be validated by the attainment of a C average or better in the first 12 credit hours of course work taken at the University of Miami.

The University does not have a coursework forgiveness policy. The grades of any repeated courses will be averaged.

A student may not repeat a course in which a grade of C or higher has been earned. This is considered an illegal repeat.

Upper division course requirements (300 level or above) at the University may not be satisfied with community college courses.

After being offered admission and enrolling, a student must submit any final college transcripts with grades, AP, IB, AICE or CLEP examination scores for review by the end of the first semester of enrollment. Any documents listed above which are submitted after this time period will not be reviewed and credit hours will not be awarded.

Required Credit Hours in Residence at the University of Miami

A student transferring credit hours from a 2-year community or junior college (this being the last school attended) must complete a minimum of **56 credit hours in residence** at the University of Miami to earn an undergraduate degree.

A student transferring credit hours from a 4-year college or university (this being the last school attended) must complete a minimum of **45 credit hours in residence** at the University of Miami to earn an undergraduate degree.

At least **half of the credit hours** required for the chosen Major or Minor must be completed at the University of Miami.

See Admission procedures for transfer students (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/transfer_applicants/transfer_application_instructions).

Undergraduate International Admission

ELIGIBILITY FOR ADMISSION (http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/eligibility_requirements_by_country)

Admission Procedures for International Students

Educational Documents

Diplomas, Certificates

Copies should be enclosed with the application. Students from countries following the British educational system must submit certified photocopies, or ask the examinations council to mail confidential results to the University of Miami. Reports of scores in school-leaving examinations (e.g., Baccalaureate) must also be submitted.

Transcripts, Statements of Marks

A transcript must contain the following information: subjects studied; marks (grades) awarded; length of class periods; number of periods per week for each subject; and grading scale with minimum passing mark. Year-by-year records of marks should be sent to the University of Miami directly from U.S. institutions. Certified records from foreign institutions may be submitted by applicants, but the University may sometimes insist that such transcripts be sent directly to the University of Miami from the issuing institutions. All secondary and tertiary transcripts must be submitted.

English Translations

Documents in a language other than English must be accompanied by certified English translations. Notarized translations will not be accepted. Translations supplement but do not replace original documents. Please remember to send both.

Syllabus of university study (description of each course or subject studied accompanied by certified English translations. Notarized translations will not be accepted).

A current (within the past six months) bank or government sponsorship letter guaranteeing payment for tuition and fees, books, room and board,

medical insurance and personal expenses for one calendar year (two semesters and two summer sessions) is required.

Examinations for International Students

All international students whose native language is not English, including those applying for transfer from U.S. institutions, are required to submit the results of the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS). The TOEFL code for the University of Miami is 5815.

The SAT score report is **not required and should not be submitted for admission consideration** from applicants who are attending schools outside the United States. Applicants should only submit an SAT score report if they qualify for merit scholarship consideration.

Please see the TOEFL Score Requirements

(http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements).

Conditional admission: Academically qualified applicants who are unable to take the TOEFL, or who have scored less than the required minimum, may be offered admission to undergraduate programs with the condition that they successfully complete level five of the University of Miami Intensive English Program or obtain a 550 TOEFL and higher. University of Miami TOEFL code number is 5815, and the IELTS code number is 4861.

Institutional TOEFL scores are designed for academic placement use at the University of Miami. Those needing TOEFL for admission to the University of Miami or for use elsewhere should take the TOEFL iBT instead. Visit www.ets.org/toefl/ (<http://www.ets.org/toefl/>) for more information about the TOEFL iBT.

Please see the IELTS Score Requirements

(http://www.miami.edu/admission/index.php/undergraduate_admission/apply/international_applicants/toefl_or_other_english_proficiency_requirements).

IELTS is the International English Language Testing System. It measures ability to communicate in English across all four language skills – listening, reading, writing and speaking – for people who intend to study or work where English is the language of communication.

IELTS Course ID (codes): Undergraduate Admission – 4861; Graduate Admission – 4862. For more information, visit http://bandscore.ielts.org/course_info.aspx?OrgId=3187.

Programs of Study

International students are eligible to apply for all programs offered at the University of Miami. It should be noted that medicine and law are studied at the graduate level in the United States, and it is therefore inappropriate for undergraduate international applicants to request these programs.

Financial Information

The University of Miami has no financial assistance for international students other than academic scholarships. International students must provide funds for all of their expenses during the entire period of study, including travel and vacations. Students who would not be able to cover their expenses are best advised not to apply for admission.

Early Admission

A limited number of carefully selected students who are currently enrolled in high school and who have completed three years of study may be admitted to the University as freshmen. Early admission applicants typically have a very strong academic background and demonstrate a mature character.

Students who wish to apply under Early Admission must have the support of his/her parents, guidance counselor, and high school. Early applicants must also schedule an interview with the Office of Undergraduate Admission.

Early Admission applicants must submit official high school transcripts, SAT or ACT examination results, and all other supporting documents required to complete the application as part of the admission process.

Early Admission applicants will be notified of an admission decision by June 1 or after receipt of grades from the final high school year completed.

Since every applicant must be appraised individually, no general qualifications can be listed. Students interested in early admission may send inquiries and requests for applications to the Office of Undergraduate Admission.

Advanced Placement/Credit

The University allows students to receive college credit hour toward graduation from the following programs: Advanced Placement, International Baccalaureate, Dual Enrollment, and College Level Examination Program. To have Advanced Placement, International Baccalaureate, or College Level Examination Program credit hours evaluated, the student must submit an official test result report to the Office of Undergraduate Admission. The University of Miami does not give credit hour for CLEP Foreign Language and General Examinations. Students taking Dual Enrollment courses (college courses taken while still in high school) must submit an official college transcript for review of potential transfer credit hour. Please refer to the transfer student section for requirements to transfer college coursework.

A student must submit official AP, IB, Dual Enrollment transcripts or CLEP results no later than the end of the first semester of enrollment for review. Documents submitted after this time period will not be reviewed and credit hour will not be awarded.

The University will accept no more than 60 credit hours from these programs to count toward the 120 credit hours required for graduation.

GED Scores

Submitting GED Scores

An applicant may apply to the University upon completion of the GED in lieu of completing high school. When applying with the GED, the applicant must submit official high school transcripts up to the time of withdrawal, as well as the official GED score report and diploma.

Applicants submitting the GED must achieve the following scores to be considered for admission. These scores should be considered a guideline and do not guarantee admission to the applicant.

For exams taken in English:

Overall score of 2800
No subscore below 500

For exams taken in any language other than English:

Overall score of 3000
No subscore below 600

It is strongly suggested that applicants submitting the GED in any language other than English also submit a TOEFL score.

Non-Degree Enrollment

Adult Student Access Program (A.S.A.P.)

For information and policies regarding enrollment for classes in a Non-Degree seeking status, please visit:

<https://next-bulletin.miami.edu/undergraduate-academic-programs/continuing-international-education/adult-student-access/>

For more information, please contact:

The Adult Student Access Program

Financial Assistance

<http://www.miami.edu/admission/index.php/ofas/>

The Office of Student Financial Assistance (<http://www6.miami.edu/ofas/>) and Employment (<https://www.miami.edu/ofas/>) administers federal, state, private and University financial assistance programs. Our office awards financial assistance for Undergraduate and Graduate/Professional students. We communicate with our students mainly through the **CaneLink** (<https://canelink.miami.edu>) system regarding any information we might need in order to complete the financial aid process. Medical students should contact their respective financial aid office.

Office of Student Financial Assistance and Employment

P.O. Box 248187
Coral Gables, FL 33124-5240
Telephone: 305-284-6000
Fax: 305-284-4082
Hours of Operation:
Monday-Friday (8:30 am - 5:00 pm EST)

Undergraduate Undergraduate Financial Assistance

It is the purpose of the Office of Student Financial Assistance and Employment to provide need base assistance and/or academic achievement awards to qualified students in the form of scholarships, grants, loans and work programs (http://www.miami.edu/index.php/office_of_financial_assistance/ug/ug_aid) to the extent that resources are available. Professional financial aid and student employment

advisors are ready to assist all students plan for the most efficient use of their financial resources for education.

Underlying the awarding of need-based financial assistance is the philosophy that the student and family have the primary responsibility for educational costs. Need-based financial assistance serves to supplement these primary resources.

- Students who require financial assistance in order to attend the University should apply for assistance each academic year.
- Candidates for admission should indicate their interest in financial assistance by checking the box provided for that purpose in the application for admission.
- The U.S. Department of Education's Free Application for Federal Student Aid (FAFSA) (<http://www.fafsa.ed.gov>) is used to determine eligibility for federal need based assistance. The FAFSA must be completed for each academic year.
- Beginning with students who entered during the 2014-2015 academic year (including readmitted students) the College Board's CSS Financial Aid PROFILE Application is required to determine institutional need based financial aid awards. The PROFILE application must be completed each academic year to determine renewal eligibility.

Admission Application Option (App Deadline)	PROFILE, Prior Year Tax Transcripts and W-2's Deadline	FAFSA Deadline	Current Year Tax Transcripts and W-2's Deadline
Early Decision I & Early Action (November 1)	November 1	February 1	April 15
Early Decision II (January 1)	January 1	February 1	April 15
Regular Decision (January 1)	February 1	February 1	April 15
Transfer (Fall-March 1)	March 1	March 1	April 15
Continuing Student	N/A	April 15	April 15

Important Financial Aid Tips

- Financial aid applications are accepted throughout the year but it is important to note that the appropriate preference date for receipt of aid applications must be met as aid is awarded on a funds available basis.
- **DO NOT WAIT FOR YOUR ADMISSION DECISION TO APPLY FOR FINANCIAL AID.** Financial aid resources are limited and there is no guarantee of assistance for students who do not submit appropriate documentation by the deadline posted above. **Your financial aid application will not be considered complete until all documents are received.**
- Apply for an FSA ID from the Department of Education early: <https://fsaid.ed.gov/npas/index.htm>.
- Keep a checklist and copies of all forms submitted. Put the applicant's name and UM ID# on all forms submitted.
- Use your best estimate of current income information when completing the FAFSA and PROFILE if your federal tax returns

have not been completed by the application deadline. Submit your complete current year federal tax transcripts to our office by April 15.

- If you are not required to file a federal tax return and will not be filing, please notify us in writing

Financial Aid Census Date

Effective Fall 2014, financial aid awards will be set according to a census date or date of fixed enrollment. All financial aid awards will be set according to the enrollment in effect at the close of business on the last day of the drop/add period each regular term semester. No adjustments will be made to the financial aid awards for any enrollment changes (increases or decreases) made after this date with two exceptions:

1. Bright Futures awards will continue to be adjusted (increased or decreased) according to any change in the enrolled credit hours.
2. The aid award package for students with federal financial aid and who completely withdraw (drop to 0 credit hours enrolled) will be adjusted according to the regulatory required Return To Title IV Calculation.

Graduate/Professional Graduate and Doctoral Students

It is the purpose of the Office of Student Financial Assistance and Employment to provide federal financial aid assistance to qualified students in the form of loans and work programs (http://www.miami.edu/index.php/office_of_financial_assistance/ug/ug_aid) to the extent that resources are available. Professional financial aid and student employment advisors are ready to assist all students plan for the most efficient use of their financial resources for education. Law, Graduate and Doctoral students need only complete a few steps in order to receive notification and disbursement of federal awards.

1. Apply for Admission to a Graduate Program or the Law Program at the University of Miami.
2. Complete the Free Application for Federal Student Aid (FAFSA).
3. Accept, reduce or decline your awarded aid via CaneLink.
 - a. First-time loan borrowers must complete Entrance Counseling at the Department of Education website (<http://www.studentloans.gov>).
 - b. A signed Promissory Note for both the Unsubsidized and the Graduate PLUS Loan are required if either loan is utilized. Each should be completed at the Department of Education website (<http://www.studentloans.gov>).
 - c. Students receiving the Graduate PLUS Loan must have an approved credit check conducted by the Department of Education in order for the loan to be disbursed.

Your financial aid award may consist of loans, scholarships, tuition waivers or a combination. Aid is offered to a student's maximum eligibility as determined by enrollment and the Cost of Attendance (COA).

Some of the aid programs which may be offered to a Law, Graduate or Doctoral student:

Federal Direct Unsubsidized Stafford Loan: the interest becomes due to the student upon the disbursement of the funds. However, a student may choose to capitalize the interest which will accrue and result in additional

indebtedness when repayment begins. Eligibility is not based on need and is up to \$20,500 for an academic year.

Federal Direct Graduate PLUS Loan: Borrowers may be eligible to request up to the cost of attendance minus other financial aid. Your award letter includes your maximum loan eligibility for the Federal Graduate PLUS Loan. This loan is based on the borrower not having an adverse credit history. Once you have accepted the offered loan amount on CaneLink, a credit check will be conducted by the US Department of Education. You will be required to have completed a Master Promissory Notice as well as Entrance Counseling (first time borrowers only). In the event your loan is declined, you have the option of appealing that decision or reapplying with an endorser; however, the Department of Education will then require you complete Credit Counseling in order to approve the disbursement of your loan.

First-time borrowers will need to complete the online Federal Direct Stafford Loan Master Promissory Note (MPN) and Loan Entrance Counseling with the Department of Education. Students may complete all federal student loan applications and entrance counseling at the Department of Education website (<http://www.studentloans.gov>).

Scholarships and Tuition Waivers are exclusively handled by the respective department. Our office is notified of scholarships/waivers by the department and it is then added to your award package. Adjustments to your Graduate PLUS Loan and/or other aid may take place upon notification to prevent an over award of aid.

In order to receive a graduate assistantship or fellowship, a graduate student must:

- Be admitted unconditionally to a post-baccalaureate degree program;
- Be enrolled for full-time study; and
- Maintain a cumulative graduate grade point average of 3.0 or above.

For additional information, please visit the Law School Website at www.law.miami.edu (<http://www.law.miami.edu>) or the Graduate School Website at www.miami.edu/grad (<http://www.miami.edu/grad>). For specific information regarding graduate programs, contact the Graduate Advisor of the respective program. For information regarding loan and work-study opportunities, visit the Office Student Financial Assistance and Employment website at www.miami.edu/ofas (<http://www.miami.edu/ofas>).

Graduate Online

For United States citizens and eligible non-citizens, federal financial aid is available for online programs.

- Applying for Financial Aid (http://www.miami.edu/index.php/office_of_financial_assistance/g/g_applying), UM
- Costs and Financial Aid (http://www.miami.edu/gs/index.php/graduate_school/costs_and_financial_aid), UM

Eligibility

Please see the University's Financial Aid (p. 31) website for eligibility criteria.

- http://www.miami.edu/index.php/office_of_financial_assistance/g/g_applying/eligibility/

Applying for Financial Aid

To apply for financial aid, submit the Free Application for Federal Student Aid (FAFSA) at <https://fafsa.ed.gov/>. Be sure to include the University of Miami school code **001536**.

http://www.miami.edu/index.php/office_of_financial_assistance/g/g_applying/g_apply/

Awarding and Disbursing Financial Aid

Key Points and associated deadlines:

- Awards are processed on a rolling basis and are done annually, one academic year at a time (3 terms per academic year: Fall, Spring and Summer).
- Students are strongly encouraged to begin the application process at least **four weeks** prior to the start date of their program or renewal date of their existing loan.
- Applications will be accepted in the **last 30 days of the term**, but the Office of Student Financial Assistance and Employment cannot be held responsible if funds are not available for disbursement for the term. Delays can occur that are outside of the control of the Office of Student Financial Assistance and Employment.

New Students

The Office of Student Financial Assistance and Employment will award Financial Aid for new students when

- FAFSA has been received
- A student has been fully admitted
- Student has enrolled in classes

Financial Aid will be disbursed only when:

- All Official transcripts have been received by the University
- After the last day to add/drop and when attendance has been confirmed

Continuing Students

The Office of Student Financial Assistance and Employment will award Financial Aid for continuing students only when

- FAFSA has been received
- The student has enrolled in classes

Financial Aid will be disbursed only when:

- After the last day to add/drop and when attendance has been confirmed.

Maintaining Eligibility, including Satisfactory Academic Progress

Students must maintain all federal aid eligibility requirements for the entire term. Please see the eligibility (p. 33) page for specific criteria for maintaining eligibility.

http://www.miami.edu/index.php/office_of_financial_assistance/g/g_standards/

Federal and Institutional Need Based Aid SAP Policy

Federal and Institutional Need-based Satisfactory Academic Progress Policy

- In compliance with federal financial aid regulations, the University of Miami requires satisfactory academic progress (SAP) towards a degree as an eligibility requirement for federal and university need-based financial assistance. The SAP policy requires both a quantitative and a qualitative measure of a student's progress.
- This policy is applicable to all undergraduate, law, graduate and doctoral students receiving financial aid through federal aid sources, including the Federal Parent Loan for Undergraduate Students (PLUS).
- At the end of each semester, the Office of Student Financial Assistance and Employment Services reviews the academic progress of all University of Miami financial aid recipients.
- If it is determined that a student is not making satisfactory academic progress at the end of the semester, a notification is sent to the student. The student will be placed on financial aid warning for one semester. Aid will not be withdrawn for the subsequent (warning) term, but at the end of that term, the student's academic record will be reviewed by Office of Student Financial Assistance and Employment and appropriate renewal or termination actions will be taken. Notification will be sent to the student detailing information on the appeal process.
- Federal academic progress policy is subject to change based on guidelines and changes made by the U.S. Department of Education.

Undergraduate

Credit Completion and Cumulative Grade Point Average Requirement for all Federal Aid and UM Need-based Assistance

Undergraduate Students

A student must have earned at least 67% of the total credit hours attempted during his/her overall academic career. Graduate level credit hours cannot be combined to meet the 67% requirement; however, credit hours transferred into the University of Miami are used in the calculation.

The percentage of earned credit hours is calculated by dividing earned credit hours by all attempted credit hours. Rounding does not apply (e.g.: student completes 21 of 31 attempted credit hours therefore percentage complete is $21 / 31 = 67\%$).

- Withdrawals, Incomplete, Audits, and Fs are attempted but not considered earned hours.
- Reinstatement of aid eligibility can be obtained by earning additional University-approved credit hours, achieving the 67% completion requirement, or having an appeal approved by a committee as outlined later in this section.
- The University reviews progress at the end of each semester. Aid eligibility will be restored upon determination that the progress requirements have been met.

All undergraduate students must meet and maintain the University of Miami credit hour and cumulative grade point average (CGPA)

requirements to maintain satisfactory academic progress. The criteria listed below must be met to receive federal and institutional financial assistance administered by the Office of Student Financial Assistance and Employment.

Credit Hours Earned	Minimum Cumulative G.P.A.
0 to 32	1.7
33 to 64	1.8
65 to 96	1.9
97 +	2.0

This criteria does not apply for meeting requirements for University of Miami scholarships and State of Florida financial aid. State of Florida financial aid and University of Miami academic scholarships have their own CGPA requirements.

Maximum Period of Eligibility for All Financial Assistance Awards

- Degree-seeking undergraduate students receiving federal aid must complete their degrees within 150% of the normal time for completion as determined by the school or college catalog under which the student was admitted. For example, if an academic program requires 120 credit hours, the student must complete the program within 180 total credit hours. Credit hours used in this calculation include those accepted for transfer and those attempted at the University of Miami.
- Pell Grant eligibility is limited to 12 full time semesters or the equivalent (e.g.; two half-time semesters equal one full time semester) www.studentaid.ed.gov/pell-limit (<http://studentaid.ed.gov/PORTALSWebApp/students/english/PellLimit.jsp>).
- Students receiving university need-based grants are limited to four years of eligibility (five years of eligibility for the five-year undergraduate degree programs).

Graduate/Professional Federal Financial Aid Semester Review - Graduate and Doctoral

- A student must have earned at least 67% of the total credit hours attempted during his/her overall academic career. Undergraduate and graduate level credit hours cannot be combined to meet the 67% requirement; however, credit hours transferred into the University of Miami are used in the calculation. The percentage of earned credit hours is calculated by dividing earned credit hours by all attempted credit hours. Rounding does not apply. (e.g.: Student completes 21 of 31 attempted credit hours, percentage complete is $21 / 31 = 67\%$).
- Withdrawals, Incompletes, Audits, and F's are attempted but not considered earned hours.
- Credit hours transferred into the University of Miami will be counted as credit hours attempted and credit hours earned.
- Reinstatement of aid eligibility can be obtained by earning additional University approved credit hours, achieving the 67% completion requirement, or having an appeal approved by a committee as outlined later in this section.
- The University reviews progress at the end of each semester. Aid eligibility will be restored upon determination that the progress requirements have been met.

Graduate students must be enrolled at least half-time in order to receive federal financial assistance. A minimum of 5 graduate credit hours constitutes at least half-time enrollment at the graduate level. The only exception to this credit hour requirement is enrollment in any of the 800-level research courses. Students enrolled in any of these courses are considered full-time and are eligible for federal loans.

Graduate and Doctoral Students

All University of Miami graduate and doctoral students must maintain a minimum 3.0 cumulative grade point average (CGPA). Graduate students who fail to meet the minimum credit hour or cumulative grade point average requirements have failed to meet the satisfactory academic progress standards established by the University. Those in violation of the satisfactory academic progress eligibility requirements will be notified in writing of their eligibility status and right to appeal.

Maximum Period of Eligibility for All Financial Assistance Awards

- Graduate students may receive federally-funded assistance for the time to complete their degree requirements in accordance with limits set by the Graduate School. The limits are: six (6) years for those studying for the various masters degrees and 8 years for those studying for doctoral degrees. Students pursuing dual masters degrees will receive aid for a maximum of six (6) years. Students in a combined masters degree/doctoral degree program are eligible for assistance for a maximum of eight (8) years.
- Time to completion starts when a student begins any program in the Graduate School, whether it is a masters or doctoral program. All work must be completed within six years of the time of admission to graduate work, for those studying for the various masters degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a masters degree in field, work must be completed within eight years. Individual programs may be set to a shorter time period.
- Graduate students who plan to enroll in a graduate degree program should keep in mind their aggregate loan limits. For more information, go to the National Student Loan Data System (NSLDS) at <http://www.nsls.ed.gov>. This site displays information on loan amounts, outstanding balances, loan statuses and disbursements.

Law School Students

Please visit the Law School Website for the Satisfactory Academic Progress Policy for Law Students: <http://www.law.miami.edu/financial-aid/standards-of-academic-progress.php?op=3>

Scholarship SAP Policy

Undergraduate only

- The academic scholarship is available to undergraduate students enrolled full time in a course of undergraduate study leading to the first bachelor's degree.
- First-time freshmen are eligible for University of Miami academic scholarships for four years (eight consecutive semesters), or such shorter time required to complete the baccalaureate degree.
- Transfer students are eligible for University of Miami academic scholarships for two years (four consecutive semesters), or such shorter time required to complete the baccalaureate degree.

- Academic scholarships may be applied only to fall and spring semester coursework of undergraduate study only. They are not available during a summer term.
- Bachelor of Architecture students may receive the scholarship for five academic years (ten consecutive semesters), or such shorter time required to complete the degree. Bachelor of Architecture students admitted as a transfer student from another university may receive the scholarship for up to three academic years (six consecutive semesters), or such shorter time required to complete the degree.

Credit Hour and GPA Requirements for UM Scholarships

- Scholarship recipients must maintain a minimum 3.0 cumulative grade point average (on a 4.0 scale) for all credit hours earned at the University of Miami to retain their scholarship.
- All full-time undergraduate students are required to register for and complete at least 24 (a minimum of 12 each semester) new credit hours at the University of Miami each academic year, defined as the fall and spring semesters.
- Reinstatement of academic scholarship eligibility can be obtained by earning additional University-approved credit hours. The University reviews progress once a year at the end of the spring semester.
- Withdrawals, Incomplete, Audits, and F's are attempted but not considered earned credit hours
- Ronald Hammond scholarship recipients should refer to their contract for renewal criteria provided by the Office of Academic Enhancement (<http://www6.miami.edu/provost/oae>).

All 2014-2015 and prior academic scholarship recipients please refer to the Bulletin at the time when you were admitted into the university for scholarship renewal requirements.

Graduate/Professional Graduate/ Professional Only

Graduates scholarships awards are determined by the departments. A student's academic progress and eligibility for an award is monitored and evaluated by the departments.

State of Florida SAP Policy

The Florida Department of Education (<http://www.fldoe.org/students/financialaid.asp>) Office of Student Financial Assistance (<http://www.floridastudentfinancialaid.org>) has its own standards of progress for state financial assistance.

- All Bright Futures Scholarship recipients (includes Florida Academic and Florida Medallion scholarships) are eligible for up to 132 credit hours; however, eligible students may only receive up to 45 credit hours per academic year.
- 2009-2010 high school graduates and thereafter may receive up to 100% of his/her program of study or 120 credit hours (or the equivalent in quarter or clock hours) toward completion of his/her first baccalaureate degree, or for up to five years from high school graduation (if the student was initially funded within three years after high school graduation), whichever comes first.
- Florida Gold Seal Vocational Scholar recipients who graduate from high school in the 2009-2010 academic year and thereafter are

eligible to receive funding for up to 100% of their program of study, up to 90 credit hours.

- State of Florida Aid academic progress policy is subject to change based on changes made by the Florida Department of Education.

A student must earn at least 24 credit hours (or the equivalent) if enrolled full time for the entire academic year. A student enrolled full time (12 or more credit hours or the equivalent) for only one term must earn at least 12 credit hours for that term. If a student is enrolled part time for any part of the academic year, the student must earn a prorated number of credit hours. (See below). Initial eligibility must be at least 6 credit hours.

Student Funded (per term)	Required Earned Hours (per term)
12+ credit hours (Full Time)	12
9-11 credit hours (Three-Quarter Time)	9
6-8 credit hours (Half Time)	6

A student that fails to meet the minimum institutional grade point average (3.0 for Florida Academic, 2.75 for Florida Medallion and Gold Seal) will no longer be eligible for his/her Bright Futures award. Florida Academic recipients that fail to achieve a 3.0 institutional average, but achieve at least a 2.75 institutional average, will renew at the lower Florida Medallion amount. Recipients that fail to meet the progress requirements receive notice including information on the appeal process.

- Award Reinstatement: an eligible student that did not receive scholarship funds for the last academic year (fall through spring), may request reinstatement of the award. The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA) website at <http://www.FloridaStudentFinancialAid.org> (<http://www.FloridaStudentFinancialAid.org>)
- Award Restoration: a student that failed to achieve a minimum 2.75 institutional GPA and became ineligible for funding may apply for restoration in an academic year **after** which the 2.75 institutional GPA requirement was met. (The 2.75 institutional GPA must be met before the fall term for which the student is applying.) The student must complete a Reinstatement/Restoration application available on the Florida Department of Education Office of Student Financial Assistance (OSFA) website at <http://www.FloridaStudentFinancialAid.org> (<http://www.FloridaStudentFinancialAid.org>)
- For 2009-10 and later high school graduates, if a scholarship is not renewed because of an insufficient GPA **during their first year of funding**, the scholarship may be restored in an academic year after the minimum institutional GPA requirement is met. Students who do not meet the **minimum earned credit hours** requirement or who fail to meet the minimum institutional GPA requirement **after** their first year of funding will **NOT** be permitted a restoration opportunity. ***State of Florida Aid academic progress policy is subject to change based on changes made by the Florida Department of Education.**
- Recipients of the William L. Boyd, IV, Florida Resident Access Grant (BFRAG) and Florida Student Assistance Grant (FSAG) must complete at least 24 credit hours each academic year with an institutional grade point average of at least 2.0. Classes taken in the previous summer may be included in calculating the completed credit hours (credit hours earned during summer of **2014** may be combined with the credit hours earned during the 2014-2015 academic year to

meet the 24 credit hour requirement). Please note that credits earned the previous summer at another institution may be counted if they are accepted as transfer credits to the University of Miami; however, this will have no impact on the CGPA calculation at UM.

- William L. Boyd, IV, Florida Resident Access Grant (BFRAG) and Florida Student Access Grant (FSAG) recipients are limited to nine semesters of eligibility.

Students that do not meet the annual minimum 24 credit hours requirement for renewal, may not receive funding the following academic year. To be eligible for renewal in a subsequent year, the student must meet the general eligibility requirements for renewal and have maintained/earned an institutional GPA of 2.0.

Students enrolling for only one semester must complete at least 12 new credit hours while maintaining the required institutional GPA.

SAP Appeals Process

Students that do not meet the academic progress requirements may submit a written appeal to request reinstatement of eligibility to receive aid. The student must complete the University of Miami's Academic Progress Appeal Form. This petition requires the student to:

1. Submit a written explanation as to why he/she was unable to meet or maintain the academic progress requirements; and
2. Submit documentation that substantiates the student's circumstances, such as a letter from a doctor or copies of medical bills if a student cites medical reasons for not meeting the requirements.

The appeal form (<https://umshare.miami.edu/web/wda/financialassistance/SAP15-16.pdf>) may be downloaded from the financial assistance website. Submit the Appeal Form and all documentation to the Satisfactory Academic Progress (SAP) Appeal Committee, c/o the Office of Student Financial Assistance and Employment. All appeals must be submitted no later than 30 days from notice of ineligibility. All appeals submitted completely and on time will be reviewed by the committee prior to the beginning of each semester. Decisions are made using the appeal documentation provided by the student in conjunction with the student's academic record. All decisions by the committee are final.

A general description of the major financial assistance programs available through various departments as well as the Office of Student Financial Assistance and Employment can be found at <http://www.miami.edu/ofas>.

Student Employment

Student Employment (<http://www.miami.edu/ose>)

Student Employment is responsible for assisting and guiding students (admitted and enrolled in a degree program at the University of Miami) through the job search and placement process while attending the University.

Student Employment provides job opportunities to all students regardless of sex, age, disability, sexual orientation, ethnicity, nationality, race or creed. University of Miami student employees are required to

adhere to established federal, state and local employment regulation practices.

Employment programs for undergraduate students include the Federal Work Study, Student Assistant program, and Miami Commitment program, all of which offer opportunities on campus and in the surrounding community. Employment programs for graduate students include: Federal Work Study, Student Assistant Program and Graduate Assistantships.

Eligibility for an employment program does not provide the funds up-front for tuition expenses.

Federal Work Study

Federal Work Study is a need-based program that provides part-time job opportunities based on your financial aid eligibility. To apply for Federal Work Study, you must complete the Free Application for Federal Student Aid (FAFSA) and check yes to "Are you interested in being considered for work study?"

Students who are awarded Federal Work Study obtain jobs available at the University of Miami campuses or at off-campus community service agencies that have been approved to participate in the program.

Student Assistant Program

The Student Assistant program is for those students who do not apply or qualify for financial aid. Student assistant positions are similar to Federal Work Study in terms of job responsibilities and rates of pay; however, they are not supported by federal funds.

Miami Commitment Program (http://www.miami.edu/index.php/miamicommitment/miami_commitment_forms/endofyear_evaluation)

The Miami Commitment program is available by invitation to a limited number of students based on Office Admission recruitment strategies. To be considered, invited students must apply to the program by the published deadline.

Graduate Assistantship Program

Graduate Assistantships are mostly offered directly to selected students by their academic departments. Graduate Assistantships may include a tuition scholarship of varying amounts, in addition to work payment. Students must be admitted to a Graduate or Professional Degree Program at the University of Miami in order to be hired as a Graduate Assistant.

Off-Campus Employment

Students seeking career-related experiences and who have reliable transportation can work off-campus. Student Financial Assistance and Employment acts only as a referral service and makes no particular recommendations regarding off-campus employers. Off-Campus employers hire students directly and Student Financial Assistance and Employment is not responsible for safety, wages, working conditions, or other aspects of off-campus employment.

The University of Miami participates in E-verify (http://www.miami.edu/index.php/ose/student_information/after_being_hired/e-verify_ose). E-Verify is an Internet-based system that allows an employer, using information reported on an employee's Form I-9, to determine the eligibility of that employee to work in the United States. The E-Verify system is operated by the U.S. Department of Homeland Security (DHS)

in partnership with the Social Security Administration (SSA). Student employees need to present original documents to complete the Form I-9 and E-verify. A list of other acceptable documents can be found online at [miami.edu/ose \(https://umshare.miami.edu/web/wda/benefits/FormI9Documents.pdf\)](https://umshare.miami.edu/web/wda/benefits/FormI9Documents.pdf).

Financial Payment Policies

Policy

All semester charges (tuition, room, board and fees) are due by the date on the billing notification e-mail, unless an established Monthly Payment Plan contract has been finalized with the Office of Student Account Services. Previously unbilled and new charges are due and payable when incurred. Payment is considered complete only when all charges are paid or when satisfactory arrangements to pay have been finalized with the Office of Student Account Services.

Consequences of Non-Payment

There are consequences to non-payment. Students that are delinquent in paying their tuition and fees statement balance and/or Monthly Payment Plan may be subject to having their class schedule cancelled. Also, there will be a hold on transcripts and course registration for the current and subsequent semester. Cancellation may also lead to the forfeiture of any financial aid the student may have been awarded.

Course selection will not be permitted for any past due accounts including Monthly Payment Plans. A late payment fee will be assessed on all delinquent accounts.

Finance Charges

No additional charges are imposed on an account once full payments are received by the payment due date. If, however, payment is received after the payment due date, a Finance Charge is assessed. Finance charges are assessed at an Annual Percentage Rate of 16%.

Anticipated Payments

If financial aid funds are not available at the time of registration, the student would normally be expected to cover these payments. However, financial aid awards will be considered "anticipated" under the following conditions:

- The Office of Student Financial Assistance and Employment (OSFAE) is provided with a source of aid (other than College Work Study or Miami Commitment) on the student's award package.
- OSFAE awards the corresponding amount on the student's award package. i.e., outside scholarship information must be provided to both the Offices of Financial Assistance and Student Account Services in order to consider the aid as "anticipated."
- OSFAE allocates the **guaranteed** award during the semester that the disbursement should be expected.
- Final guarantees have been processed by the appropriate alternative loan lender – preliminary approvals will not result in automatic disbursements of alternative loan funds.

Examples

Veterans Monthly Educational Benefit Checks: An amount not to exceed the total of the checks expected to be received during the semester (for fall and spring, this is typically three checks) may

be credited. Arrangements for this type of tuition credit must be initiated with a representative of Veterans Affairs through the Office of the Registrar and the Office of Student Account Services.

Students with VA benefits are required to sign a promissory note with the Office of Student Accounts in order to have their anticipated awards credited to their account.

International Students with Government Sponsorships: Payment of all or a portion of charges that can be billed directly to corresponding government agencies may be credited upon presentation of appropriate documentation from their government or embassy.

Florida Prepaid Program

The University of Miami will assist with a student's education expenses by billing for any available Florida Prepaid College Program funding directly to the Florida Prepaid College Board. Florida Prepaid participants may authorize the University of Miami to request a payment disbursement option that best matches your needs and current savings in the plan. We encourage participants to authorize a payment that will facilitate your financial planning objectives for your student's enrollment at the University of Miami.

The University of Miami requires new students to complete the "Florida Prepaid College Program Authorization Form." In addition to this form, all students who plan to use their prepaid funds must contact Florida Prepaid at 1-800-552-4723 option 2, and request a separate Florida Prepaid "Transfer Form." Upon your request, Florida Prepaid will mail the Transfer Form to you. The purchaser of the plan must complete this form and return it directly to Florida Prepaid. It is necessary that Florida Prepaid have this Transfer Form on file in order for students to use Florida Prepaid funds at the University of Miami.

Questions in reference to Florida Prepaid should be sent to saccounts@miami.edu with "Florida Prepaid" in the subject line. The required authorization form for the University of Miami and an example can be downloaded from the following web site: www.miami.edu/osas (<http://www.miami.edu/osas>)

Policy on Previous and Unpaid Balances Non-Payment

The University of Miami may declare due and payable at once the sum of all past due balances. In addition, the student will be responsible for interest accrued on all past due and unpaid amounts at the maximum rate permitted by law and any and all costs incurred by the University of Miami in enforcing its rights. The University reserves the right to withhold transcripts, diplomas, readmission, and future registration for non-payment of outstanding balances. The University's Collection Department may also disclose the student's outstanding indebtedness, along with other relevant information, to credit information bureaus. A non-refundable \$100 reinstatement fee will be charged to reinstate each unpaid and cancelled semester.

Refund Policy

Definitions

Title IV Financial Aid or Title IV Programs refers to the following awards:

- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loan, DL PLUS (Graduate Student), DL PLUS (Parent)

- Federal PELL Grant
- Federal Supplemental Educational Opportunity Grant (SEOG)
- Federal College Work Study

Refund Policy

Students who have advised the appropriate University department of their withdrawal, through 60 percent of the semester, will receive credit for eligible financial aid refunds using a pro-rated calculation based on the percentage of the semester attended by the student. Unearned Title IV funds will be returned in accordance with the refund policy established in Section 484B of the Higher Education Act of 1965, as amended (HEA) and provided for through the Student Assistance General Provisions regulations enacted on October 7, 1998. Please review UM's current policy on tuition refunds (https://umshare.miami.edu/web/wda/accountservices/Refund_Calendar/Refunds20148.pdf). Fees are not refundable and will not be pro-rated.

The University refund schedule does not apply to students in the following on-campus and off-campus programs: The Executive MBA, the MBA Program for Working Professionals, and the Master of Science in Professional Management. Unless the student has completed official withdrawal procedures in writing with the Graduate Business Program office prior to the beginning of a course/term, tuition will be refunded on a prorated basis based on the number of class meetings attended through the effective date of withdrawal. No tuition refund will be granted when class attendance has exceeded 50% of class meetings. This policy supersedes any information stated in the Graduate Bulletin and other university publications.

Procedure

The amount of earned tuition and financial aid will be calculated on a daily pro-rated basis. Unearned tuition will be credited to the students account. Unearned, disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid programs. Students who have not completed the verification process are ineligible to receive any financial aid and therefore no financial aid will have been earned. All disbursed financial aid will be charged to the students account and refunded to the appropriate financial aid program.

The return of financial aid will be refunded to the following sources used in the specific order as noted below until the total amount of the school's responsibility has been satisfied:

- Unsubsidized Federal Stafford Loans
- Subsidized Federal Stafford Loans
- Federal Perkins Loans
- Federal PLUS Loans (Graduate Student)
- Federal PLUS Loans (Parent)
- Federal Pell Grant
- Federal Supplemental Opportunity Grant (SEOG - Federal Portion Only)
- Any other Title IV Assistance
- State financial aid

In the event of an overpayment of unearned Title IV grants, the University will send the student a notification letter requesting payment in full or the establishment of a satisfactory payment arrangement with the University's Department of Collection or the Debt Collection Services

of the U.S. Department of Education. This notification letter will be processed within 30 days of the date of the University's determination that the student withdrew.

If the student does not respond to the request for repayment within 15 days, the University will notify the Department of Education of any Title IV grant overpayment. If the student does not make satisfactory repayment arrangements for the repayment of Title IV grant aid, the student will then become ineligible for federal assistance on the 46th day from the date of the University's repayment letter.

Withdrawal Example

A student notifies the Registrar of withdrawal on the 50th day of the semester. If the total number of calendar days in a semester were 108, the earned financial aid ratio would be 50 divided by 108 or 46.3 percent. The student would have earned 46.3 percent of the approved federal aid that the student was originally scheduled to receive for the term. The 53.7 percent of the student's scheduled or disbursed aid remains unearned and must be returned to the Federal Program. If a student remains in school until the percentage of earned financial aid is 60% or more, then federal regulations consider the student to have earned 100% of their federal aid. For further information please refer to the 'Cane Success Center withdrawal information page (http://www.miami.edu/index.php/cane_success_center/withdrawal).

Post Withdrawal Disbursements

If the University determines that a student is eligible for Title IV funds that have not been disbursed, grant funds that the student is eligible for will be disbursed first. Federal aid that the student is eligible for will be credited to the students account and applied against any outstanding charges.

Reinstatement of Cancelled Classes (Continuing Students)

Classes are subject to cancellation if the student fails to complete payment by the due date for each semester. Reinstatement of a cancelled semester is at the sole discretion of the Office of Student Account Services. A non-refundable \$100.00 Reinstatement Fee will be assessed on the student's account if a reinstatement of cancelled classes is granted.

The student will be allowed to register for a subsequent semester only if all outstanding balances have been paid in full, with certified funds.

Important Note: Students who are receiving financial assistance and have had their classes canceled for the semester run the risk of forfeiting their awarded financial aid for the term and/or academic year.

Payment Options

The University Cashier accepts cash, personal checks, traveler's checks, cashier's checks, certified checks, money orders, and checks drawn against lines of credit. Personal check and credit card payments are accepted on line via CaneLink. Bank wire transfers are also accepted.

Checks and Money Orders

Payments must be in U.S. Dollars and drawn on a U.S. bank. Payments must be made payable to the University of Miami and include the

student's identification number to ensure credit to the student's account.
Post-dated checks are not accepted.

Returned Checks Policy

All returned checks are deposited twice, automatically, and without notice. A Returned Check Fine will be assessed to the student's account, as listed below, after the second attempt. Check cashing privileges will be canceled for those students who have three (3) or more returned checks.

A notification letter will be mailed to the maker of the check by the University's Collection Department detailing the amount and fine for the returned check. Check cashing privileges will be restricted until cash or certified funds (money order or cashier's check) are presented for payment. A personal check will not be accepted to replace a dishonored check.

Returned check fines processed through CaneLink will incur a \$20 fee. Checks not processed through CaneLink will incur the following charges:

Check < or = \$800.00	\$20.00 fee
Checks over \$800.00	2.5% of the check amount
Checks for Monthly Payment Plan	\$25.00 Fee

Wire Transfer of Funds

Wire transfer of funds for payment on an account at the University of Miami may be processed through any full service bank. Please direct the transfer to:

Bank of America, N.A.
 1500 South Dixie Highway
 Coral Gables, Florida 33146

ABA Routing Number: 026009593
 For Credit to: University of Miami Account 5508319094
 For Further Credit to: **Student Name and I.D. Number**

The student's name and the student's identification number (C#) are required in order to properly credit funds to the student's account.

Tuition Payment Plans

The Office of Student Account Services offers several tuition payment options to assist students and parents. The University's payment options are designed to provide convenient alternative plans of budgeting and paying educational costs whether or not a financial assistance award is granted.

Monthly Payment Plan (MPP)

Purpose: This plan allows you to divide all or part of your semester educational expenses (tuition, fees, on-campus housing, and meal plan less financial assistance) into four convenient monthly payments for the fall. A four month payment plan is also available for the spring term as well. The University of Miami does not offer a monthly payment plan option for the summer term.

Contract length: This plan is offered on a semester-by-semester basis for the fall and spring semesters. The minimum contract for either plan is \$1,000.

Fee: A 3% non-refundable administration fee of the amount financed is charged and included in the established monthly payments.

Conditions: Payments are due on the 1st of each month with the first payment due on August 1st. The first payment for spring MPPs will be due on the first business day in January.

Students may apply for the Monthly Payment Plan on CaneLink. For more information regarding this option please follow this link to the Monthly Payment Plan FAQ page (<https://umshare.miami.edu/web/wda/accountservices/MPP%20FAQs%20website%20changes%207%2022%2013.pdf>).

Tuition and Fees

Tuition

The basic undergraduate tuition rate covers the normal student load and is increased if the student carries an overload. Private instruction, e.g., music lessons, carries extra charges. Students who opt to participate in any of the University's intercession courses will be billed for the intercession course separately from the flat rate cost of full-time tuition and fees.

For tuition charges in special programs and sessions, see announcements that are published concerning these components of the University's academic program.

The following list of charges is effective for the academic year 2015-2016.

Undergraduates (All Colleges and Schools)

Number of Credit Hours	Tuition (per semester)
One	\$ 1,850.00
Two	\$ 3,700.00
Three	\$ 5,550.00
Four	\$ 7,400.00
Five	\$ 9,250.00
Six	\$ 11,100.00
Seven	\$ 12,950.00
Eight	\$ 14,800.00
Nine	\$ 16,650.00
Ten	\$ 18,500.00
Eleven	\$ 20,350.00
Twelve to twenty (Includes Course Fees)	\$ 22,200.00
In excess of 20, per credit hour	\$ 1,850.00
No credit hour towards degree (audit), per course, nonrefundable	\$ 1,850.00

Undergraduate students carrying both undergraduate and graduate courses will be charged tuition at the rate in effect for undergraduate credit hours taken and appropriate fees. For example, tuition for a student carrying a total of 15 credit hours, of which 3 are graduate and 12 are undergraduate, would be charged at the \$22,200.00 rate.

Undergraduate students taking graduate level coursework that is priced at a special level will be billed separately for these courses. Students

should check with their advisors and/or the appropriate school's department for more details on their course pricing requirements.

Full-time fees will be assessed according to student classification as an undergraduate or graduate.

The University reserves the right to change without notice tuition, fees, room and all other charges at the beginning of any academic year, and the right to change activities and board fees at the beginning of any semester.

Graduate Students

(Pre-Master', Post-Master's, and Doctoral Students per credit hour	\$1,850.00
Research in Residence (720 or 750) or Continuous Registration-Master's Study (725), per fall/spring semester	\$1,850.00
Research in Residence (720 or 750) or Continuous Registration-Master's Study (725), per summer session (0 Research Credit Courses)	\$1,850.00
Audit Work (No degree credit) Tuition, per course, non-refundable.	\$1,850.00

Certain programs are conducted by the University under contract with the State of Florida. Florida residents who have been accepted as students in those contract programs are required to pay current state tuition for each credit hour taken and the state provides the University with additional funds in accordance with the terms of the contracts. Students involved in state contract programs should contact the appropriate school/college to ascertain the state tuition charge per credit hour that they are expected to pay.

Fees

Some fees depend upon full-time status. This is usually determined by the sum total of semester credit hours carried by the student in all divisions or enrollment in certain special programs that are classified as full-time regardless of credit hour load. Intersession classes are included with regular fall and spring semester classes in determining the student's full- or part-time status. This determination will also result in the billing of required fees. Fees are subject to change.

Undergraduate students are classified full-time if they enroll in 12 or more credit hours in a regular semester or 12 or more credit hours in a summer session or if they are enrolled in a special program which is classified full-time regardless of credit hour load.

Graduate students are classified full-time if they enroll in nine (9) or more credit hours in a regular semester or six (6) or more credit hours in a summer session, or if they are enrolled in dissertation credit hours that are classified as full-time.

Mandatory Fees

FALL OR SPRING SEMESTER	Student Activity Fee	Athletic Fee	Wellness Center	Student Health and Counseling Centers Fee	Student Center Fee	Total
Undergraduate – full-time (12 or more credit hours) ¹	\$59.00	\$75.00	\$152.00	\$120.00	\$156.00	662.00
Graduate, fulltime (9 or more credit hours) ¹	\$46.00	N/A	\$152.00 ²	\$120.00	\$156.00	474.00
Rosenstiel Graduate (9 or more credit hours) ¹	\$15.00	N/A	\$152.00 ²	\$120.00	N/A	287.00
Medical Science Graduate (0 or more credit hours) ¹	\$15.00	N/A	\$161.00 ²	\$25.00- Med Gables \$92.00-	N/A	293.00
Law Students (12 or more credit hours) ¹	\$59.00	N/A	\$152.00	\$120.00	\$156.00	487.00

¹ Student Health & Counseling Centers Fee is mandatory for all full time students regardless of credit hour load. Also mandatory for part-time students.

² Wellness Center Fee is automatically charged to all full-time Graduate, Rosenstiel Graduate, and Medical Graduate students. It is mandatory unless declined with a waiver form submitted to and approved by the Office of Student Account Services by the last date to add classes for the semester as defined in the university's academic calendar.

SUMMER SESSION FEES (per session)	
Undergraduate (Full Time 5+ Credit Hours)	
Student Activity Fee	\$11.00
Student Health and Counseling Centers Fee	\$60.00
Student Center Fee	\$78.00

Total:	149.00
Graduate (Full Time 5+ Credit Hours)	
Student Health and Counseling Centers Fee	\$60.00
Student Center Fee	\$78.00
Rosenstiel Graduate	
Student Health and Counseling Centers Fee	\$60.00
Medical Graduate	
Student Health and Counseling Centers Fee	\$46.00
Law	
Student Health and Counseling Centers Fee	\$60.00
Student Center Fee	\$78.00

Health Insurance Fee (August 15, 2015 to August 14, 2016)	\$2,466.00
--	-------------------

Please note you are not required to have the University sponsored health insurance plan in order to utilize the services of the Student Health Center.

Students who are not enrolled for the current semester but intend to enroll for the next semester and graduating seniors (who wish access for one additional week after graduation), may gain access to the services of the Student Health Service after paying the Health and Counseling Centers Fee.

Optional Fees

FALL OR SPRING SEMESTER FEES (per semester)	Student Activity Fee	Student health and Counseling Centers Fee	Athletic Fee	Wellness Center
Undergraduate Students (1 to 11 credit hours)	\$159.00	Not Optional	\$75.00	\$152.00
Graduate Students (0-8 credit hours)	\$46.00	Not Optional	\$75.00	\$152.00 ¹
Graduate Students (9 or more credit hours)	Not Optional	Not Optional	\$75.00	\$152.00 ¹
Rosenstiel Graduate Students (0 to 8 credit hours)	\$15.00	Not Optional	\$75.00	\$152.00 ¹
Rosenstiel Graduate Students (9 or more credit hours)	Not Optional	Not Optional	\$75.00	\$152.00 ¹

Medical Science Graduate Students (0 or more credit hours)	Not Optional	Not Optional	\$75.00	\$161.00 ¹
--	--------------	--------------	---------	-----------------------

¹ Wellness Center Fee is automatically charged to all full-time Graduate, Rosenstiel Graduate, and Medical Graduate students. It is mandatory unless declined with a waiver form submitted to and approved by the Office of Student Account Services by the last date to add classes for the semester as defined in the university's academic calendar.

Optional SUMMER SESSION FEES (per entire summer term)	Activity Fee ¹	Wellness Center Fee
Undergraduates	Not Optional	\$130.00
Graduate	\$20.00	\$130.00

¹ Optional only for students taking less than 5 credit hours per session.

Other Fees

Diploma Fee	
Original Diploma	no charge
Replacement Covers	\$5.00
Replacement – Bachelors, Masters, Ph.D	\$10.00
Replacement – Law, Medicine	\$15.00

Transcript Fee	
Mailed/Paper Transcripts	\$10.00
Electronic/PDF Transcripts	\$7.00

Note: Unofficial transcripts are available in CaneLink (<https://caneid.miami.edu/cas/login?service=https%3A%2F%2Fcanid.miami.edu%2Fidp%2FAuthn%2FRemoteUser>). (<https://caneid.miami.edu/cas/login?service=https%3A%2F%2Fcanid.miami.edu%2Fidp%2FAuthn%2FRemoteUser>)

Fees Charged by Sonhs to Students Registered for Clinical Courses (Annual, non-refundable, due at registration, estimated at time of publication)¹	
Academic Year 2015-2016	
Nursing Fees	\$770.00
Total	Between \$347.00 - \$520.00

Professional Liability Insurance (annual, non-refundable, due at registration, estimated at time of publication)¹

Clinical athletic training students	\$75.00/semester
-------------------------------------	------------------

Music Charges for Non-Music Majors or Minors (Lessons in Applied Music)

Fees, in addition to regular tuition, per credit hour per semester	\$300.00
Readmission Fee	\$100.00
Inactive Status Fee	\$50.00/semester
Non-UM Program Status Fee	\$50.00/semester
Graduate Application Fee	\$65.00

Graduate Business Program Mandatory Fees

For all Graduate Business Programs, there is a one-time non-refundable \$2,000.00 mandatory Enrollment Fee for Applicants with intent to enroll in all Masters of Business Administration (MBA) and Specialized Master Degree Programs.

In addition to tuition, all Executive and Professional MBA programs have a mandatory Program Administration Fee charged each semester. The tuition typically increases each academic year. Any increase in the University of Miami per credit tuition rate will be compensated by a corresponding reduction in the program administration fee. The total cost of the program (Tuition and Program Administration Fee) therefore will not vary.

Program Administration Fee

Professional MBA beginning in Fall 2015	\$3,200.00
Professional MBA beginning in Spring 2015	\$3,200.00
The Miami Executive MBA for the Americas	\$7,916.00
Global Executive MBA (in Spanish)	\$2,312.00
Executive Health Sector Management and Management	\$1,050.00
Executive MBA for Artists and Athletes	\$9,600.00

Late Registration Fee (Permission to register required) Reinstatement Fee

Reinstatement Fee charged if classes are canceled AFTER Semester begins	\$100.00
---	----------

Proficiency or Competency Examination Fee

College of Engineering, Division of Continuing and International Education:

Examination Fee, per examination	\$25.00
Recording Fee for Competency Examinations, per examination	\$25.00
English Language Proficiency Test	\$50.00

Alumni Rate and Policy

Special Opportunity for UM Graduates

UM graduates may take undergraduate credit hour courses in the College of Arts and Sciences on a space available basis, at a special alumni rate. All University of Miami graduates are eligible for this special program.

Students may take whatever courses are of interest. From Anthropology to Theatre Arts and all the disciplines in between, participants may choose a course or collection of courses (maximum two courses per discipline) to meet professional or personal goals.

Interested students may call the Division of Continuing and International Education at 305-284-4000 to inquire about the benefit and/or the current tuition rate, request an application, or enroll in the courses. They will submit a simple, no-fee, one-page application, simply select an undergraduate course (open on a space available basis) and be on their way to continued learning at UM.

Policies Governing Enrollment in University of Miami Alumni Status

The University of Miami Alumni Status includes students who are not seeking a degree and meet the following requirements. Enrollment in a non-degree program and/or satisfactory completion of courses does not imply admission to a degree program.

1. University of Miami graduates (completed degree);
2. U.S. citizens or permanent U.S. residents.

Conditions applying to University of Miami Alumni enrollment

1. Students may enroll in a maximum of 12 undergraduate credit hours per semester.
2. Students are limited to two courses per academic department.¹
3. Courses may be selected from the College of Arts and Sciences only.
4. International students will not be issued I-20 forms.
5. International students in B-1 (business) or B-2 (pleasure) visa status may engage in study as long as the educational activity is secondary to the principal activity for which the visa was sought.
6. Enrollment may be completed on a space-available basis only. (Course availability determined two days prior to semester start.)
7. Courses taken for undergraduate credit hour (including 500 level courses) will not be considered for graduate credit hour at a later date.

¹ Note: Not all courses and/or departments may be available.

Room Rates

Room Rates - Undergraduates

Residential Colleges ¹	Semester	Annual
Double	\$3,778.00	\$7,556.00
Small Single ²	\$5,009.00	\$10,018.00
Standard Single ³	\$5,758.00	\$11,516.00

University Village ⁴	Fall Semester 2012 (Aug-Dec)	Spring Semester 2013 (Jan-May)	Summer Term 2013 (June-July)	Annual Rate (12-mos. agreement) in Total
Ibis Model (1:1)	\$8,810.00	\$8,810.00	\$3,480.00	\$21,100.00
Palm Model (2:2)	\$6,180.00	\$6,180.00	\$2,430.00	\$14,790.00
Cane Model (4:2)	\$5,300.00	\$5,300.00	\$2,080.00	\$12,680.00
Villager Model (4:4)	\$5,720.00	\$5,720.00	\$2,250.00	\$13,690.00
Lake Model (4:4)	\$5,840.00	\$5,840.00	\$2,300.00	\$13,980.00

- ¹ Freshmen are typically assigned to Hecht and Stanford Residential Colleges but may be assigned to another residential college based on availability.
- ² Small Singles are only available in Hecht and Stanford Residential Colleges and only to new freshmen.
- ³ Standard single rooms are available in Eaton, Mahoney, and Pearson Colleges and only to returning upper-class students.
- ⁴ For upper-class students only (60+ academic credit hours completed)—no freshmen or sophomores; annual (12-month) agreement for all Village residents—billed by semester/term through the Office of Student Account Services.

SUMMER SESSION (all air-conditioned)	Rates are per person
Double Room	\$ 950.00 per session
Small Single Room (when available)	\$1,250.00 per session
Standard Single Room	N/A

Graduate Housing

Housing in on-campus housing is not available for GRADUATE students in addition to married students, single parents with children, law students, and medical students. The Department of Housing and Residential Life does assist GRADUATE students with off-campus housing information and resources at <http://www.miami.edu/housing>.

Law Housing

Housing in on-campus housing is not available for LAW students in addition to married students, single parents with children, graduate students, and medical students. The Department of Housing and Residential Life does assist LAW students with off-campus housing information and resources at <http://www.miami.edu/housing>.

Meal Plans

The following are the Meal Plan rates for the 2015 - 2016 academic year. Meal Plan enrollment is for the full academic year but charged on a semester basis.

Plan	Dining Dollars Per Semester	Semester Cost	Annual Cost
Unlimited Meal Plan	\$100	\$3,091	\$6,182

19 Meal Plan	\$50	\$2,676	\$5,352
14 Meal Plan	\$150	\$2,559	\$5,118
8 Meal Plan	\$200	\$1,853	\$3,706

University Village and Commuter students are eligible to participate in the Block Meal Plans. These plans offer greater flexibility, a better value and may be purchased at any time during the academic year. For more information, visit http://www.miami.edu/finance/index.php/auxiliary_services/dining_services.

Plan	Semester Cost
100 Block Meal Plan	\$ 1,194
75 Block Meal Plan	\$ 916
50 Block Meal Plan	\$ 622
10 Block Refresh	\$ 119

Parking and Transportation

Description	Price (Tax Included)
Commuter Student	\$ 496.00
Fall Only - Commuter	\$ 248.00
Resident Student	\$ 534.00
Fall Only - Resident	\$ 268.00
Discount	\$ 254.00
Visitor	\$ 559.00
Motorcycle	\$ 100.00

*Parking subject to change

Parking on the University of Miami's Coral Gables campus is a privilege extended to those using the facilities of the University consistent with the terms of the University's Motor Vehicle Parking Code and other policies of the University as they are set or amended by the Provost. Parking privileges are extended only to those eligible members of the university community including trustees, faculty, administrators, staff, students, vendors and visitors who have paid for, received and properly displayed a current and valid UM parking permit. In consideration of being allowed to use the University's facilities for parking, the purchaser of a parking permit agrees to be bound by the rules set forth in the Motor Vehicle Parking Code, and agrees to pay to the University any fine or administrative charge assessed for non-compliance with this code.

Students, faculty, employees, and staff may not park in visitor parking spaces, and UM parking permits are not valid at parking meters.

First year resident students (students residing on the Coral Gables campus who are attending college on a full time basis for the first time) are restricted from purchasing a parking permit to park on the University of Miami's Coral Gables campus. This policy applies to first year students living in University of Miami student housing on the Coral Gables campus.

For more information on Parking, please visit our Website, www.miami.edu/parking (<http://www.miami.edu/parking>). Annual permits are valid August 16, 2015 through August 15, 2016.

Student Services

Academic Resource Center

Located on the second floor of the University Center, the Camner Academic Resource Center (ARC) offers free academic assistance to all UM students. The ARC offers individual peer tutoring by appointment in most subjects, study skills instruction with a Learning Specialist, free academic workshops, and many other valuable services. Please visit www.umarc.miami.edu (<http://www.umarc.miami.edu>) or call 305-284-2800 to learn more and/or schedule an appointment.

Peer Tutoring

At the ARC, all UM students can take advantage of free individual peer tutoring to develop a deeper understanding of course work through additional, special, or corrective content instruction. All tutoring is course specific and taught by nationally certified peer tutors. All UM students are eligible for two hours of tutoring per week for each course. Please email tutoring.arc@miami.edu for more information or to ask any questions.

Supplemental Instruction

Small group sessions are available to help students succeed in the University's toughest courses. Group Peer Tutoring is done on a weekly basis where students sit down to discuss course content in a small group setting with the peer tutor serving as a facilitator.

Academic Workshops

This free workshop series instructs students on specific academic skills and strategies to enhance academic performance. Workshop topics include effective test-taking strategies, improving study strategies, utilizing technology, and organization and time management skills. Topics are updated every semester, and students may attend unlimited sessions. Please visit our website www.umarc.miami.edu (<http://www.umarc.miami.edu>) for the current workshop schedule.

Learning Specialists

The Camner Academic Resource Center provides the support of trained Learning Specialists to students experiencing difficulty with academic issues. Students may request a one-on-one meeting with a Learning Specialist to help develop the skills needed to achieve success in their academic careers. Skills covered during these appointments include time management, effective note-taking, college textbook reading, educational technologies, test taking, and other learning strategies. Students can request an appointment with a Learning Specialist through our website or by filling out a request form at the Camner Academic Resource Center. Visit the website at www.umarc.miami.edu (<http://www.umarc.miami.edu>) for more information about the support services available to students.

Independent Learning Initiative

The Independent Learning Initiative is a fee-based academic support program that provides structure, support, instruction, and monitoring for students needing additional guidance during the college experience. During the semester, students will identify and understand their academic strengths and areas for growth, as well as learn strategies, skills, and technologies to enhance their academic and personal success in college. Participants learn to monitor their academic progress and critically evaluate their current skills and strategies to work towards becoming a successful independent student. For more information about the program

or to apply, please visit our website at www.umarc.miami.edu (<http://www.umarc.miami.edu>).

UMX 100: The University of Miami Experience

The University of Miami Experience (UMX 100) is a graded, comprehensive virtual self-paced course specifically designed to assist first year students in making a successful transition to the University of Miami. Freshman and transfer students are automatically enrolled. UMX 100 provides an opportunity for students to utilize UM resources necessary for success in college and beyond. Specifically, students will be exposed to campus leadership opportunities, academic and career planning, university traditions, study abroad opportunities, personal wellness programs, as well as advising and registration through videos, power points, blogs, and more. These resources and opportunities are only a click away. Questions about UMX 100 can be directed to umx@miami.edu.

The course will open on the following dates each semester:

Fall Semester	August 1st
Spring Semester	January 1st

Disability Services

Office of Disability Services (ODS)

The Office of Disability Services (ODS) is the primary university office responsible for the coordination of auxiliary aids and services for students with disabilities. Please visit our website www.umarc.miami.edu (<http://www.umarc.miami.edu>) for more information.

The Office of Disability Services (ODS) provides academic accommodations and support to ensure that students with disabilities are able to access and participate in the opportunities available at the University of Miami. Individuals with disabilities must request academic accommodations through the Office of Disabilities Services. Accommodations are determined on a collaborative and case-by-case basis and are based on the documentation provided by the individual. ODS staff will work collaboratively with students to determine what academic adjustments and educational auxiliary aids are reasonable to ensure that students with disabilities are not subject to discrimination.

Information is available to prospective and enrolled students, their parents and/or sponsors. The Office of Disability Services (ODS) is located in the Camner Academic Resource Center in Whitten University Center N2400. ODS staff can be reached at 305-284-2374 (Voice) or 305-284-1999 (Fax). Office hours are 8:30 am to 5:00 pm, Monday through Friday. Individuals may email the office staff at disabilityservices@miami.edu for quick responses to questions.

The following deadline dates apply for all requests for academic accommodations through the Office of Disabilities Services:

Fall Semester	June 1st
Spring Semester	December 1st
Summer Semester	6 weeks prior to first day of class

Cane Cards

The Cane Card is an on-campus student identification card. Students, faculty, and staff must present a government issued photo ID such

as a driver's license or passport when acquiring their card. The Cane Card provides access to on-campus student residences, the Otto G. Richter Library, computer laboratories, the swimming pool, the Patti and Allan Herbert Wellness Center (for those who purchase a membership), and other facilities where access has been granted. The Cane Card is also used to control lending privileges at the library, access to athletic and other events (fee required), the purchase of discounted Metrorail tickets, U-Print services, and meal plan privileges. All University of Miami students, faculty and staff are required to carry their Cane Cards for identification purposes while on campus.

- Lost or stolen Cane Cards should be reported to the Cane Card office at 305-284-3096 during the week or anytime by accessing your MyUM account, under the financial tab.
- Lost or stolen cards may also be reported to security 24 hours per day at 305-284-6666.
- After being reported stolen or lost, a card will be deactivated to prevent unauthorized use.
- Lost or stolen cards will be replaced for a \$25 fee (Fee waived in certain circumstances. Please contact the Cane Card office for additional details).
- Damaged cards will be replaced for free upon exchange of the original damaged card.
- For all issues with Cane Express accounts, call Student Account Services at 305-284-6430.

Commuter Student Involvement

The Department of Orientation and Commuter Student Involvement is located on the second floor of the Shalala Student Center, suite 203. This department offers a variety of services and programs for students from Miami-Dade and Broward Counties who live at home and commute to the University of Miami. For more information, please visit our website at [miami.edu/csi](http://www.miami.edu/csi) (<http://www.miami.edu/csi>).

Great Start Pre-Orientation Program for First-Year Commuter Students

Great Start is an overnight, pre-orientation program designed to promote and emphasize college adjustment and campus involvement opportunities. The program's goal is to help students feel like a part of the University and give them a chance to meet other commuter students. Students who participated in Great Start have said the program greatly contributed to a positive transition from high school to college.

Commuter student leaders serve as Program Coordinators, Steering Committee members, and Counselors. Applications are available in the fall on the Great Start website, [miami.edu/greatstart](http://www.miami.edu/greatstart) (<http://www.miami.edu/greatstart>).

Commuter Assistant/Transfer Assistant Program

The Commuter Assistant (CA)/Transfer Assistant (TA) Program provides first-year commuter and incoming transfer students with an experience that mirrors the programs and services offered by Resident Assistants and Academic Fellows to first-year students living on-campus in a Residential College. All first-year commuter students and interested new transfer students will be assigned to a CA or TA group and will begin meeting with this group during New Student Orientation. The CA/TA

serves as a mentor, plans programs that will aid commuter or transfer students in their transition to college, and works with the Department of Orientation and Commuter Student Involvement to plan, promote, and implement initiatives specifically focused on first-year commuter or incoming transfer students. CAs and TAs release informative newsletters to their student groups and also host a monthly breakfast called "Good Morning, Commuters!" for off-campus students. CAs and TAs are hired during the spring semester. Applications are available on the departmental website, [miami.edu/csi](http://www.miami.edu/csi) (<http://www.miami.edu/csi>).

Association of Commuter Students

The Association of Commuter Students (ACS) is a second home for its members. ACS, a student organization, provides social support, service opportunities, school spirit involvement, and a physical space through which commuters bond with fellow students and to participate in all that the University has to offer. ACS provides its members with a working knowledge of UM that gives them the opportunity to become fully involved in campus life. Brought together by a simple fact of life, commuting to campus, ACS members have forged bonds that extend beyond this commonality. For more information on ACS, visit their website at [miami.edu/studorgs/acs](http://www.miami.edu/studorgs/acs) (<http://www.miami.edu/studorgs/acs>) or www.miami.edu/sa/index.php/commuter_student_involvement/association_of_commuter_students.

Off-Campus Housing Assistance

The Department of Housing and Residential Life provides assistance to students, staff, and faculty with identifying off-campus housing options. A web-based search engine of community listings and information about off-campus apartment complex listings is available along with other resources such as:

- Individual consultations & appointments
- Over-the-phone guidance
- Knowledge of the greater Miami area & specific neighborhoods where students typically reside
- Roommate search assistance

For more information about assistance with off-campus housing, visit [miami.edu/off-campus-services](http://www.miami.edu/off-campus-services) (<http://www.miami.edu/off-campus-services>), or contact the office at 305-284-4505 or email housing@miami.edu.

Counseling Center

<https://miami.edu/counseling-center>

The Counseling Center is the primary provider of mental health services for UM students. The Counseling Center provides short-term individual, couples, and group therapy as well as psycho-educational outreach programming and consultation. Urgent care and limited career and psychological assessment are also available. Psychiatric services are available to those under the care of a Counseling Center therapist.

The Counseling Center staff consists of experienced professionals from the fields of mental health counseling, psychology, social work and psychiatry.

During the fall and spring semesters, the Counseling Center is open Monday, Wednesday and Friday from 8:30 a.m. to 5 p.m. and Tuesdays and Thursdays from 8:30 a.m. to 7 p.m. During the Spring, Summer and

Winter breaks the Counseling Center is open Monday through Friday from 8:30 a.m. to 5 p.m.

Students can call the Counseling Center directly at 305-284-5511 or request an appointment in person. The Counseling Center offers walk-in triage service for students in crisis. The University Counseling Center is located at 1204 Dickinson Drive, Suites N & S.

For more information, visit <https://miami.edu/counseling-center>.

Sexual Assault Response Team (S.A.R.T.)

The Counseling Center also coordinates the **Sexual Assault Response Team (S.A.R.T.)**. S.A.R.T. is a 24/7 telephone response line to assist University of Miami students victims of sexual assault. This service is available during the academic year and is for both men and women. The S.A.R.T. hotline number is 305-798-6666.

For more information, visit <https://miami.edu/SART>.

Graduate Student Training

The Counseling Center participates in the graduate training programs in the Department of Psychology and the programs of the Department of Educational and Psychological Studies. Doctoral students in psychology take part in the Center's professional activities and have first-hand contact with clinical problems. In addition, pre-doctoral interns obtain professional training at the Counseling Center through the Dr. Jess Spire Pre-doctoral Internship in Professional Psychology. The pre-doctoral internship at the Counseling Center is accredited by the American Psychological Association.

Dean of Students

www.doso.miami.edu (<http://www.doso.miami.edu>)

The Dean of Students Office provides leadership that is consistent with the University's mission and works closely with students and student organizations, contributing to their co-curricular education and serving as an advocate for their varied interests. The Office works directly with academic, athletic, student affairs, and other administrators in the coordination of institutional efforts to address specific concerns, as well as to enhance the overall quality of the student experience.

Each area within the Dean of Students Office provides students with opportunities for student support, involvement, and leadership. For more information about each of these areas, click on the links below.

- Alcohol and Other Drug Education (<http://www.miami.edu/sa/index.php/pier21>)
- Greek Life (http://www.miami.edu/sa/index.php/dean_of_students/FraternitiesAndSororities-1-1)
- Judicial Affairs (http://www.miami.edu/sa/index.php/dean_of_students/judicial)
 - Student Rights and Responsibilities Handbook (<https://umshare.miami.edu/web/wda/deanstudents/pdf/20132014SRR.pdf>)
- Sexual Assault Resources - It's On Us (http://www.miami.edu/sa/index.php/its_on_us)
- Undergraduate Honor Council (http://www.miami.edu/sa/index.php/dean_of_students/undergraduate_honor_council)

- University Chaplains' Association (http://www.miami.edu/sa/index.php/spiritual_life)
- Veteran Student Services (http://www.miami.edu/sa/index.php/dean_of_students/veteran_student_services)

The Dean of Students Office coordinates efforts in response to various student crises and employs an Assistant Dean who is a Licensed Clinical Social Worker. The entire staff is knowledgeable and prepared to assist all students in their adjustments to campus life. The administration and record keeping of all undergraduate student disciplinary infractions are also the responsibility of the Dean of Students Office.

To contact the Dean of Students Office visit Whitten University Center, Suite 2250 or call 305-284-5353.

Career Services

<http://www.HireACane.com>

Patricia and Harold Toppel Career Center

(305) 284-5451 | toppel@miami.edu

The Toppel Career Center provides innovative and dynamic career services to students and alumni of the University of Miami. Furnished with the latest technology, including videoconferencing, 360-degree video recording, and lecture capture, the Center's six interview suites, a technology lab, a conference room, and a multipurpose Loft offer a variety of spaces (<http://www.HireACane.com/Students/ToppelReservations.aspx>) for students to meet their career-related needs. The Center is often described as "like no other" by visitors and is a model for career services throughout the country. Over six times larger than the average career center, the 12,000 square-foot building on Ponce De Leon Boulevard houses career programs and workshops, networkers, professional individualized advising, practice interviews, industry panels, walk-in peer advising, company presentations, on-campus interviews, and more.

Career Education

Regardless of the path you take, an effective career planning process begins *as soon as you step on campus*. Professional staff at the Center assist students with their career development utilizing a three-part model (<http://www.HireACane.com/Students/GettingStarted/Explore,Prepare,ConnectCareerEducationPlan.aspx>) that provides the tools necessary to Explore (strengths, interests, values, skills, and abilities), Prepare (career and industry research, practice interviews, and internships), and Connect (building meaningful relationships and growing a professional network).

Advising Services

Toppel offers a variety of options for career advising. You can set up an individual advising appointment with highly trained and motivated career advisors who have industry-specific knowledge and can provide you guidance on potential career paths (schedule online at [HireACane.com](http://www.HireACane.com) (<http://www.HireACane.com>)). For resume (<http://www.HireACane.com/Students/ResumesandLetters/ResumeAssistance.aspx>) and cover letter (<http://www.HireACane.com/Students/ResumesandLetters/CoverLettersandNetworkingLetters.aspx>) reviews and practice interviews (<http://www.HireACane.com/Students/InterviewPreparation.aspx>), you can drop by any time from Monday through Friday, 9am - 4:30pm, to meet with a peer advisor (no appointment necessary). The Center even

offers online career assessments (<http://www.HireACane.com/Students/GettingStarted/CareerAssessments.aspx>) that can help you narrow down career options by building self-awareness.

Programs and Workshops

A series of programs and workshops (<http://www.HireACane.com/Students/Programs.aspx>) is offered throughout the academic year both in person and virtually. Each session provides information and skill-building activities in the areas of resume development, interviewing skills, social media for the job search, securing internships, and much more. In addition, programs designed to increase awareness of specific career paths and professional opportunities are offered. These are often conducted by outside speakers and panelists who are UM alumni and/or recognized specialists in their field.

Career Preparation & Networking

Through the Center's vision, *Empowering and Connecting a World of 'Canes*, the staff encourages students to develop meaningful relationships with professionals in their area(s) of interest. The Toppel Career Center provides many opportunities for you to network with employers and alumni, including panel programs, employer meet-ups, job shadowing (USshadow (<http://www.HireACane.com/Students/USshadow.aspx>)), on-campus recruiting, and career fairs.

Career Fairs and On-Campus Recruiting

Career Expo (<http://www.HireACane.com/Students/CareerFairsandEvents/CareerExpo.aspx>) is the largest career fair, typically bringing in over 100 employers and 1,000 students and alumni biannually in September and February. Toppel also organizes smaller industry-specific career fairs that focus on more specialized areas. Representatives from a variety of industries from around the world visit campus to meet, interview and discuss career opportunities with students. In addition, the On-Campus Recruiting (<http://www.HireACane.com/Students/JobSearching/OnCampusRecruiting.aspx>) program brings employers to campus for company information sessions and to interview students for jobs and internships in the interview suites. Last year, over 1,000 interviews were conducted in the Center's interview suites. You can apply for these positions through Toppel's free online career management system at HireACane.com (<http://www.HireACane.com>).

Toppel Internship Program

The Toppel Internship Program (TIP) (<http://www.sa.miami.edu/toppel/mainsite/Students/Internships/ToppelInternshipProgram.aspx>) is designed to provide valuable career-related work experience through internships with participating employers. TIP allows students to earn a one-credit transcript notation from the Toppel Career Center for internships they have already secured. Students can also search HireACane (<http://www.HireACane.com>) for hundreds of opportunities available to them. Part-time internships require at least 160 working hours while full-time internships require at least 320 working hours.

UCAN

If you are interested in jobs and internships outside of South Florida, the Center is a member of the University Career Action Network (UCAN) (<http://ucan-csm.symplicity.com/students>), a highly selective consortium of private institutions across the country. Participating schools, including Brown, Duke, Emory, Princeton, Harvard, and others, share internship opportunities across the network. You will be strongly encouraged to

complete at least one internship while here, and these partnerships will help you meet this goal.

The Launch Pad at Toppel

The Launch Pad at Toppel (<http://www.thelaunchpad.org>) provides support to all entrepreneurs and inventors at the University of Miami. The Launch Pad's programs are co-curricular and voluntary by design. Pragmatic, concrete, and experiential, they provide the just-in-time knowledge entrepreneurs need to assess and develop their ideas and plans for a new enterprise. The Launch Pad offers guidance, encouragement, and immediate access to a dedicated local commercial network. It brings entrepreneurs into the local business community as early as possible. The Launch Pad's programs are exercises in experiential capitalism that fulfill a key educational obligation: to teach learners not just how to find a job, but also how to make a job.

Connecting with the Toppel Career Center

The Toppel Career Center's mission is to help all students achieve a lifetime of career success. Currently, over 2/3 of all undergraduate students utilize the Center's services each year, including over 1,500 unique visits to career fairs and nearly 4,000 unique visits to career education opportunities. Evidence shows that students who visit the Career Center are more likely to earn internships and ultimately have better career outcomes at the time of graduation. Visit us at 5225 Ponce De Leon Blvd. or by logging into HireACane.com (<http://www.HireACane.com>) and activating your account as soon as you arrive on campus! You can also keep up with what we're doing by following any one of our social media platforms: LinkedIn (http://www.linkedin.com/groups?gid=1295647&trk=hb_side_g), Facebook (<http://www.facebook.com/pages/Toppel-Career-Center-at-the-University-of-Miami/70221785028?ref=ts>), Twitter (<http://www.twitter.com/toppel>), Instagram (<http://instagram.com/hireacane>), YouTube (<http://www.youtube.com/toppelcareercenter>), Flickr (<http://www.flickr.com/photos/hireacane>), Blogger (<http://toppelpeers.blogspot.com>), Pinterest (<http://pinterest.com/umtoppel>), and Snapchat (username: HireACane).

Honor Council

The Honor Council - Undergraduate

www.miami.edu/honor-council (<http://www.miami.edu/honor-council>)

The purpose of the Honor Council is to protect the academic integrity of the University by encouraging consistent ethical behavior by students in their academic work. The Honor Council investigates and adjudicates alleged violations of the Undergraduate Student Honor Code (https://umshare.miami.edu/web/wda/deanstudents/pdf/undergrad_honorcode.pdf). The Council is also responsible for educating the University community on Honor Code related issues and promoting academic integrity through a variety of educational programs. The Council consists of representatives from the undergraduate schools and colleges.

Members of the University community who would like to request Honor Council programming or an investigation of alleged academic dishonesty are encouraged to call the Honor Council at 305-284-5354 or email honorcouncil@miami.edu.

International Student and Scholar Services

www.miami.edu/iss

International Student and Scholar Services (ISSS)

1306 Stanford Drive
Whitten University Center, Suite 2275
Coral Gables, FL 33146-6929
Telephone: 305-284-2928
Fax: 305-284-3409
Email: iss@miami.edu
Website: www.miami.edu/iss (<http://www.miami.edu/iss>)

ISSS represents the needs and interests of the University of Miami international community and provides support services and programs for international students, scholars, and academic departments at UM. Every year, approximately 3,748 international students (undergraduate and graduate) and scholars (professors and researchers) from 120 countries representing every region of the world study, teach, and conduct research at the University of Miami.

International students and scholars face some unique challenges as well as opportunities while pursuing their academic goals at UM. The professional and dedicated ISSS staff provides expert advice, services, programs, and information aimed at supporting their educational endeavors and enriching their U.S. experience over the entire course of their stay. ISSS support services and programs encompass:

- **Pre-Arrival Information**
- **Immigration Advising for Students and Scholars in F-1 and J-1 Status**
- **Employment Information and Authorization**
- **Online Tax Return Preparation System**
- **Liaison with Sponsoring Embassies, Government and Agencies**
- **Short-Term, Small Emergency Loans**
- **Assistance with Personal and Adjustment Problems**
- **Assistance in Coping with Crises**
- **Advocacy**
- **International Student Orientation**
- **International Scholar Orientation**
- **Advise the Council of International Students and Organizations (COISO)**

On the ISSS website you will find detailed information regarding each of these services and programs. Please do not hesitate to contact us should you have any questions or require additional information. We look forward to assisting you.

Libraries

The libraries of the University of Miami (<http://welcome.miami.edu/academics/libraries>) rank among the top research libraries in North America with a combined collection of over 3.6 million volumes, with 95,600 current electronic and print serials. The libraries are located on the Coral Gables, Rosenstiel, and Medical campuses.

Individual and Collaborative Study Space

Learn about the hours (<http://library.miami.edu/hours>) we're open for you.

Access to Millions of Resources

Consult the library website (<http://library.miami.edu>) to get access to millions of resources, experts, and learn more about all the spaces and services available to you.

Expert Assistance for Every Subject

Librarians (<http://sp.library.miami.edu/subjects/staff.php?letter=Librarians%20by%20Subject%20Specialty>) are available to support students in all courses and majors. Consider us part of your network.

Online Research Guides for Courses and Majors

Online research guides (<http://libguides.miami.edu/content.php?pid=384666>) can help you find the resources you need for course assignments, research projects and more.

Jobs

We offer a variety of opportunities for student employment. Check out our openings today (<http://library.miami.edu/student-jobs>).

Ombudsperson and University Troubleshooters

www.miami.edu/ombudsperson (<http://www.miami.edu/ombudsperson>)

The Ombudsperson and University Troubleshooters provide open channels of communication between students and the university by listening to student concerns, investigating the facts and attempting to resolve situations in the best possible way. Ultimately, the goal is to resolve matters and assist students in their success at the University. The Ombudsperson and University Troubleshooters do not bypass or circumvent those individuals who have responsibility for departments or classroom instruction. Nor will they eliminate certain structured grievance and appellate mechanisms already established by the University.

Ombudsperson

The Ombudsperson is in a position to interpret University policy to students and make recommendations to the central administration when policy changes are needed as they have extensive knowledge of the University. The Ombudsperson assists in the decision-making process within the University and ensures that the University follows its own published policies and procedures. The Ombudsperson will connect students to faculty and administrators who will listen, answer questions, interpret policies/procedures and provide guidance on the appropriate steps to consider for a resolution. The Ombudsperson seeks to resolve matters informally before they become matters in a formal grievance-appeal proceeding and works with students in establishing next steps to assist in their success at the University.

University Troubleshooters

University Troubleshooters are faculty members and administrators who serve as a resource for students seeking assistance. They represent in a wide range of campus departments, who assist students with academic and administrative related matters. If a student has spoken to the appropriate University Troubleshooter and have not brought resolution to a student's concern, students should contact the

Ombudsperson. For a listing of University Troubleshooters, click on the following links: Academic Troubleshooters (http://www.miami.edu/sa/index.php/ombudsperson/academic_troubleshooters) or Administrative Troubleshooters (http://www.miami.edu/sa/index.php/ombudsperson/administrative_troubleshooters).

For more information on the Ombudsperson or University Troubleshooters, visit [miami.edu/ombudsperson](http://www.miami.edu/ombudsperson) (<http://www.miami.edu/ombudsperson>), call 305-284-4922, email ombudsperson@miami.edu or visit the office in Ashe Building 244.

Residence Life

Housing and Residential Life

www.miami.edu/housing (<http://www.miami.edu/housing>)

The University of Miami offers undergraduate on-campus housing in five residential colleges and University Village.

Each residential college has resident faculty members (Masters and Associate Masters), an Area Director/Assistant Area Director, and student staff who all live in the residential college with the resident students to support and promote student well-being, safety, academic achievement, student learning, and development. Numerous social, educational, cultural, and recreational programs are offered throughout the academic year.

Special Interest Housing (<http://www6.miami.edu/provost/oe/sih.html>) (SIH) is also available within the residential college system—these resident communities are facilitated through the Office of Academic Enhancement. Themes center around literature, community service, ethnic cuisine, healthier lifestyles, and diverse educational experiences as well as academic and career interests.

General Highlights

- The University has both single and double rooms. Singles are limited and assigned based on seniority living on campus and, thus, entering students are typically assigned to double occupancy rooms.
- All non-local freshmen students are required to live in University housing for two academic semesters, as long as space is available. This policy does not apply to freshmen students living with parents or legal guardians in Miami-Dade or Broward Counties.
- University Village (http://www.miami.edu/sa/index.php/residential_life/on_campus/university_village), an apartment-style residential community, is an available option to juniors and seniors. The apartments are fully furnished and include in-apartment washers and dryers, full-size kitchen appliances (stove, refrigerator, microwave, & dishwasher), and reserved parking.
- All housing facilities are co-educational with men and women living on alternate floors or alternating separate suites or apartments.

Applying for On-Campus Housing

- Admitted undergraduate students, following verification of acceptance to the University and payment of the enrollment deposit, can apply for housing via CaneLink (<http://www.canelink.miami.edu>).
- Students are encouraged to apply for housing as soon as possible after paying the enrollment deposit. New freshmen housing applications should be submitted by May 1, 2015; applications

received from new freshmen after May 1, 2015 will be accommodated on a space available basis.

- The \$250 non-refundable pre-payment can be paid by credit card or electronic debit from a checking account at the time of application.
- Assignments to buildings, rooms, and specific roommates are made according to the date of application and receipt of the housing deposit.
- Whenever possible, requests for roommates are honored. However, if specific preferences are not available, the University reserves the right to assign students to other roommates.

The 2015-2016 housing agreement is for both fall and spring semesters, unless the applicant is:

1. applying only for spring semester housing (not available in University Village)
2. applying only for summer session housing
3. graduating in December
4. participating in a University of Miami study abroad experience spring semester
5. not enrolling in the University spring semester

Housing cancellations received through May 31, 2015 will result in a \$500 cancellation penalty. Cancellations received after May 31, 2015 will result in:

- the canceling student being responsible for the fall semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing
- if filled, the canceling student will only be assessed the \$500 cancellation penalty

Housing cancellations for the spring semester received through December 1, 2015 will result in a \$500 cancellation penalty.

Cancellations for the spring semester received after December 1, 2015 will result in:

- the canceling student being responsible for the spring semester housing charges, unless or until the vacancy created by the cancellation can be filled by another qualifying University student applying for housing
- if filled, the canceling student will only be assessed the \$500 cancellation penalty

Note: Written notice of cancellations must be made to the Department of Housing and Residential Life office directly.

Dates of Housing Availability

Fall Semester	August 20, 2015 - December 18, 2015
Spring Semester	January 7, 2015 - May 8, 2015

Off-Campus Housing Resources

The Department of Housing and Residential Life also provides assistance to students, staff, and faculty with identifying off-campus housing options. A web-based search engine of community listings and information about off-campus apartment complex listings is available along with other resources such as:

- Individual consultations and appointments

- Over-the-phone guidance
- Knowledge of the greater Miami area & specific neighborhoods where students typically reside
- Roommate search assistance

For more information about housing on-campus or assistance with off-campus housing, please visit [miami.edu/housing](http://www.miami.edu/housing) (<http://www.miami.edu/housing>), call 305-284-4505, or email housing@miami.edu.

Student Health Services

[miami.edu/student-health](http://www.miami.edu/student-health) (http://www.miami.edu/sa/index.php/student_health_center)

The Student Health Service provides primary care, specialty care and pharmacy services to eligible (http://www.miami.edu/sa/index.php/student_health_center/general_information/#Eligibility) University of Miami students. You are not required to have the Health Center sponsored insurance plan to utilize our services. Appointments can be scheduled at mystudenthealth.miami.edu (<https://caneid.miami.edu/cas/login?service=https://mystudenthealth.miami.edu>), services are also available on a “drop in” basis.

The Student Health Service is located at:

5513 Merrick Drive
Coral Gables, Florida 33146
(across from the Pavia Garage)

Contact Information

Telephone: 305-284-9100

Fax: 305-284-4098

Hours of Operation

Fall and Spring semesters: 8:30 a.m. to 5:00 p.m., Mondays, Tuesdays, Wednesdays and Fridays. On Thursdays: 9:00 a.m. to 5:00 p.m. Sundays: 11:00 a.m. until 4:00 p.m.

Winter break, Spring break, and Summer sessions: Monday through Friday from 9:00 a.m. to 5:00 p.m.

The Health Service is closed on Saturdays and University holidays. After hours assistance is available by calling 305-284-9100.

For sudden, severe illness or serious accident dial 911. For illnesses or injuries requiring immediate attention, students are urged to go to an Emergency Room. After hours assistance for urgent situations can be obtained by dialing 305-284-9100. Students with United Healthcare insurance may also contact the United Healthcare Nurseline by calling 800-436-7709 and selecting the Health Resources option. For less urgent conditions, you may visit one of the local Urgent Care Centers (<https://umshare.miami.edu/web/wda/studenthealth/pdf/UrgentCareCenters.pdf>).

Eligibility/Access

The Health & Counseling Centers Fee, is mandatory for (undergraduate (p. 39), graduate (p. 39), and law (p. 39)) students regardless of credit hour load and all students registered in an off-campus program

who are enrolled in the University sponsored student insurance plan (http://www.miami.edu/sa/index.php/student_health_center/insurance_information).

Employees may be charged the Health and Counseling Centers fee on their initial bill, however the charge will be removed from their bill soon after the last day to drop or add a class, if they remain eligible for tuition remission benefits. Dependent of UM employees are treated the same as all other students..

Health Insurance

Domestic students enrolled in six or more credit hours per semester (or considered full time) are required to obtain adequate health insurance (see exceptions (<https://umshare.miami.edu/web/wda/studenthealth/pdf/ProgramsNotCharged.pdf>)). The annual premium for the health insurance plan offered through the University is added to each student’s fees. Domestic students with adequate alternative coverage may request cancellation of the insurance fee via CaneLink. Insurance cancellation must be renewed each year via CaneLink.

Deadlines to waive the insurance are:

- July 25 for the Fall semester
- January 25 for the Spring semester
- April 25 for Summer I
- June 25 for Summer II

Domestic students can check the status of their insurance waiver/cancellation request via CaneLink. The insurance premium will be prorated for those students entering for the first time in the Spring or Summer semesters. No waiver and/or refund will be granted after the above dates.

Students who have previously waived the insurance charge can reinstate the insurance prior to the Spring semester or first Summer session by completing the reinstatement request form and checklist. Coverage can also be reinitiated at the start of the Fall semester by choosing **not** to re-waive the charge, or at other times during the academic year, if within 30 days of termination of other similar coverage, by completing the reinstatement request form and checklist (<https://umshare.miami.edu/web/wda/studenthealth/Forms-1/studentreinstatement.pdf>). Documentation of termination may be requested.

Deadline for reinstatement of insurance is January 25th for the Spring. Please do not consider your reinstatement complete until reinstatement has been verified via CaneLink, the charge has been posted to your student account and all charges on your account have been paid.

All international students are required to enroll in the University sponsored health insurance program. The annual premium for this coverage is added to each student’s fees.

Any additional questions regarding the health insurance requirement should be directed to the Student Health Service at 305-284-9100 or studenthealth@miami.edu.

Immunization

All students are required to provide proof of immunization against measles, mumps and rubella; and tetanus, diphtheria and pertussis.

All new students must also provide proof of immunization against hepatitis B (http://www.miami.edu/sa/index.php/student_health_center/immunization_information/#Hepatitis) and meningococcal meningitis (http://www.miami.edu/sa/index.php/student_health_center/immunization_information/#Hepatitis) **or** sign a waiver declining these immunizations. An immunization (https://umshare.miami.edu/web/wda/studenthealth/pdf/immunization_form_07new.pdf) form must be completed and returned to the Student Health Service prior to arrival on campus. For students less than 18 years old, the meningitis/hepatitis vaccine waivers must be signed by a parent or legal guardian.

All international students must also be screened for tuberculosis by completing page two of the immunization form (https://umshare.miami.edu/web/wda/studenthealth/pdf/immunization_form_07new.pdf).

Deadlines for submission of immunization records are Fall - August 22nd, Spring - January 15th, Summer - April 15th. Failure to comply with this requirement will interfere with registration. A \$50.00 processing fee will be charged for any form received after the start of the semester. Immunization information must be entered at mystudenthealth.miami.edu (<https://mystudenthealth.miami.edu>) prior to faxing or mailing the form to the Student Health Service for verification. Immunization compliance can also be verified at mystudenthealth.miami.edu (<https://mystudenthealth.miami.edu>). Instructions on the use of mystudenthealth.miami.edu (<https://mystudenthealth.miami.edu>) is available at [miami.edu/student-health](http://www.miami.edu/student-health) (<http://www.miami.edu/student-health>).

Most students will be able to obtain the required immunization information from their prior medical providers or from their prior high school, college or university. Students who believe that they were previously immunized but are unable to provide proof of immunization may either obtain blood tests confirming immunity or obtain the necessary immunizations. Immunizations and blood tests documenting immunity are available at the Student Health Service. All charges are in addition to processing fees for late forms.

Immunization against varicella (chicken pox) is suggested and is available at the Student Health Service for a reasonable charge.

Pharmacy

The pharmacy (http://www.miami.edu/sa/index.php/student_health_center/pharmacy) is located on the second floor of the Student Health Service, and can fill prescriptions from most local and out of town medical providers.

Prescription prices are often lower than at local drug stores, and most insurance plans are accepted. Non-prescription medications, vitamins, nutritional supplements, personal care products, over-the-counter medications, and condoms are also available. New prescriptions can be dropped off, called or faxed by the ordering provider. Refill requests will be handled most promptly by having your prescription number available and calling the automated refill line at 305-284-5922. Refills can also be requested by calling 305-284-5922 option 2.

- Students with the Health Service sponsored insurance plan receive enhanced benefits if prescriptions are filled at the Health Service pharmacy.

Contact information for Pharmacy

Telephone: 305-284-5922

Fax: 305-284-4883

Hours of Operation for Pharmacy

Fall and Spring semesters are from 9:00 a.m. to 5:30 p.m., Monday through Friday. Winter break, Spring break, and Summer sessions, 9:00 a.m. to 5:00 p.m. Monday through Friday.

The pharmacy is closed on Saturdays, Sundays, and on University holidays.

University Dining Services

The University of Miami Dining Services program offers students a variety of food options conveniently located throughout the campus. Among these are the:

- Hurricane Food Court - featuring varied concepts including several well-known national brands
- Courtside Eatery at the Wellness Center - featuring a variety of healthy food options
- Jenkins Snack Bar – the perfect spot to grab a quick bite at the School of Business
- The Corner Deli at Outtakes – specializing in sandwiches, salads, & soups made with kosher ingredients
- Outtakes – a full service convenience store
- Starbucks at Richter Library & Student Center – your favorite specialty coffee
- Carts – for your convenience around campus [Communication, Memorial, and Merrick]
- Village Marketplace – providing UV residents your convenience store needs
- Einstein Bros. Bagels – enjoy a delicious bagel at the Law School
- Sebastian's Café – offers specialty sandwiches and salads at UM's Newman Alumni Center
- GOT Spot featuring Rose's Café – our newest addition located at the University's Gables One Tower
- Lime Fresh Mexican Grill – Mexican fare at the University Center
- M20 – made to order deli sandwiches, Panini's, salads, and soups at the Student Center
- Jamba Juice – smoothies at the Student Center

The University of Miami Dining Services program offers a variety of services that meet the individual student's schedule of classes and extracurricular activities. Four different meal plan options are offered at the Hecht/Stanford and Mahoney/Pearson Dining locations for students residing in the residential dorms on campus:

- Unlimited meal plan provides unlimited access into the dining hall
- 19 meal plan provides 19 meals per week
- 14 meal plan provides 14 meals per week
- 8 meal plan provides 8 meals per week
- 100 Block meal plan provides 100 meals to be consumed throughout the fall and spring semesters
- 75 Block meal plan provides 75 meals to be consumed throughout the fall and spring semesters

- 50 Block meal plan provides 50 meals to be consumed throughout the fall and spring semesters
- Enrollment in any of the residential colleges (excluding University Village) requires participation in the 8, 14, 19, or the Unlimited meal plan
- Freshmen must choose from the Unlimited, 19, or 14 Meal Plans only
- Block meal plans are open to Commuter and University Village students only
- Graduate and undergraduate students who are 25 or older as of September 1 of the meal plan contract year are excluded from this requirement
- Commuter and other students not enrolled in the residential colleges may participate in any meal plan
- All meal plans are available seven days a week. Students have the opportunity to eat meals five times a day up to their weekly meal total. Unless they are on the Unlimited meal plan
- Take out is limited to once per meal period
- Releases will be subject to a \$300 cancellation fee plus full charges through the week of cancellation, and may also result in a Dining Dollars surcharge fee
- Approval is obtained solely through the Department of Dining Services
- The University reserves the right to terminate the contract by written notice if a student fails to comply with any of the terms and conditions of the contract and all other University and Dining Services rules and regulations.

For more information on Dining Services write to:

University of Miami, Dining Services
P.O. Box 248106
Coral Gables, FL 33124-6909

call Dining Services at 305-284-3584, email diningservices@miami.edu or visit http://www.miami.edu/finance/index.php/auxiliary_services/dining_services/.

Dining Dollars

- Dining Dollars provided with the meal plan may be used in approved food service locations for food purchases only. Usage is limited to \$20 per day
- Dining Dollars may not be used in vending machines
- Unused Dining Dollars at the end of the Fall Semester will carry into the Spring Semester
- Unused Dining Dollars at the end of the Spring Semester are forfeited
- Dining Dollars may be used at the Hurricane Food Court, Carts, The Corner Deli, Outtakes Convenience Store, Village Marketplace, Rathskeller, Subway, Jenkins Snack Bar, Starbucks, BankUnited Center, Sebastian's Café, Courtside Eatery at the Wellness Center, Lime Fresh Mexican Grill, Jamba Juice, and M20

Dining Services Contract

- The Dining Services contract begins with the first meal of Fall Semester and extends through the last meal of Spring Semester
- The student indicates choice of meal program on the Dining Contract or via CaneLink
- The student's signature on the Dining Contract or election via CaneLink signifies acceptance of that board plan for the period indicated
- Students who do not enroll in any of the meal plans will be force enrolled onto the 14 meal plan. All terms and conditions will be binding upon the student
- Meals are not served when the University is not in session, during official University vacation periods, or between semesters
- The entire semester amount must be paid in full at the same time students pay other registration costs (tuition and fees) during or before the first week of classes
- All students may make changes to their meal plan within the first week of the semester by notifying the Department of Dining Services or via CaneLink
- Changes made to lower meal plans for the Spring Semester will be assessed a \$40 processing fee
- Charges will be prorated up to the end of the week
- Meal plan weeks run Monday through Sunday

Honors

Foote Fellows Honors Program

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years. The Foote Fellows Honors Program offers unique academic freedom to the most educationally accomplished incoming students at the University of Miami.

Additionally, outstanding students may pursue departmental honors. Students who satisfactorily complete the requirements for departmental honors are graduated with Departmental Honors; the award is noted on the graduates diploma and official transcript.

Foote Fellow Honors Program

http://www.miami.edu/admission/index.php/undergraduate_admission/academics/foote_fellows_honors_program/

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the

University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Departmental Honors Programs

Among the departments offering approved programs for honors study at the junior-senior level for both majors and elective students are American studies, art and art history, biochemistry and molecular biology, biology, business administration, chemistry, computer science, engineering, English, finance, French, German, history, international finance and marketing, international studies, Judaic Studies, marine science, mathematics, meteorology, microbiology and immunology, philosophy, political science, psychology, religious studies, sociology, Spanish, and women's and gender studies. Admission into the program is by invitation, but any student who believes himself or herself qualified may apply to the Chairman or the Departmental Honors Advisor of the major department, preferably during the sophomore or early junior year. Upon successful completion of the required program and with approval by the faculty of the department, the notation Departmental Honors in ... is included in the candidate's diploma and transcript.

Departmental Honors are designed primarily to provide an opportunity for the student to intensify and deepen his or her knowledge of the major, to permit closer associations with professors in the student's area of concentration, and to prepare the student for research, thesis preparation, and other work at the graduate level in the major areas.

Departmental Honors requirements vary by departments; the prospective Departmental Honors student should confer with the Honors Advisor within the department about specific requirements for graduation with Departmental Honors.

Fellows in Latin American Studies (FILAS)

This innovative, dual B.A./M.A. honors degree in Latin American Studies allows outstanding incoming freshmen the opportunity to complete a master's degree in five years, following a rigorous, efficient, accelerated curriculum of 150 credits. This highly selective group of students will enjoy close faculty mentoring and the opportunity to engage in specialized research projects with faculty. Students will gain advanced competence in at least one major language of Latin America, intern for one semester in public or private organizations dealing with Latin America and/or the Caribbean, and take advanced seminars with UM's major Latin American scholars and visiting scholars. In addition, students will receive first-hand experience in their regions of focus by studying abroad. Most study abroad opportunities are for one semester (six months). FILAS students may arrange their own study abroad in consultation with the academic director or they may participate in the university's study abroad options. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Fellows in Latin American Studies (FILAS). The FILAS application form and supporting materials must be submitted

no later than November 1st of the applicant's senior year. A review of completed applications will begin by the end of November. Admitted first-semester freshmen interested in admittance to the FILAS program should contact the Academic Director of the Latin American Studies Programs for application information before October 1st.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree (http://www.miami.edu/admission/index.php/undergraduate_admission/academics/dual_degree_honors).

Honors Program in Biochemistry and Molecular Biology (HPBMB)

The Honors Program in Biochemistry & Molecular Biology (HPBMB) is offered to mature high school seniors with strong academic ability and achievement who seek careers in biological or biomedical science. Students can earn both a Bachelor of Science (BS) and a Doctor of Philosophy Degree (PhD) in approximately six years.

To begin, students are admitted simultaneously into (i) the Honors Program and (ii) a special Privileged Studies Program in the College of Arts and Sciences. Privileged Studies provides flexibility in designing a course of study without the limitations of the conventional course distribution requirements. Furthermore, students are assured of a place in the graduate program of the Biochemistry & Molecular Biology Department after 2.5 or 3 calendar years of undergraduate work, provided that (i) a 3.5 GPA both overall and in the sciences is maintained and (ii) at least 1200 is scored on the graduate records examination (GRE). Undergraduates will conduct intensive laboratory work in the areas of biochemistry, molecular biology, and/or nutritional biochemistry starting in their very first year of the program. By spring of their junior year, students will prepare an undergraduate thesis as preparation for their entry into graduate school. At that time they will start taking graduate courses and continue to do research with a graduate faculty member.

Applicants must have a combined SAT1 score of 1400 (combined Math and Critical Reading scores) or an ACT score of 32 and an unweighted GPA of 3.75. An SAT2 score of at least 600 in Math, and one science (Biology, Chemistry or Physics) is required. Eight semesters of English and mathematics and two semesters each of biology and chemistry must be completed by the time they graduate from high school. All components of the Common Application for undergraduate admission must be completed by November 1 of the senior year. In addition, a supplemental application form for the Honors Program in Biochemistry & Molecular Biology (HPBMB) must be completed at this time, including the personal statement. Finally, letters of recommendation in support of the application must be received from (i) three teachers and (ii) a counselor.

For further information and application forms, please go to the following web address: www.miami.edu/dualdegree (http://www.miami.edu/admission/index.php/undergraduate_admission/academics/dual_degree_honors).

Honors Program in Exercise Physiology (HPEP)

The Kinesiology and Sport Sciences Department offers an accelerated Master degree program for students who have completed their 4-year undergraduate program in Exercise Physiology or Athletic Training. It allows students to complete their Master degree in any of the Exercise Physiology tracks (Clinical and Applied Exercise Physiology, Strength and

Conditioning, and Nutrition for Health and Human Performance) within one year of their BS degree obtained in that major.

The additional year of study will enable students to complete all requirements leading to a Master of Science degree in Exercise Physiology in the School of Education and Human Development, (M.S. Ed.), in 5 years. To be considered, applicants must be in the top 10% of their high school graduating class. Students must have an SAT score of 1000 or an ACT score of 30 and an unweighted minimum GPA of 3.0 or above. The Exercise Physiology and HPEP application forms and supporting materials must be submitted no later than August 1st of the applicant's senior year. A review of completed applications will begin by the end of September.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree (<http://www.miami.edu/dualdegree>).

Honors Program in Law (HPLW)

The University of Miami offers the Honors Program in Law (HPLW) which allows excellent students with high academic ability to gain admission to both undergraduate study and to graduate study in the law school. Such an achievement guarantees admission to the School of Law, pending students meet all program requirements - and gives qualified students the chance to complete both bachelors and Juris Doctor degrees in just six years. Applicants who wish to be considered for admission must be high school seniors in the top 5% of their class, have a minimum SAT I score of 1400 or (ACT 32) and an unweighted GPA of 3.750. In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Law. The HPLW application form and supporting materials must be submitted no later than November 1st of the applicant's senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree (<http://www.miami.edu/dualdegree>).

Honors Program in Marine Geology (HPMG)

The Honors Program in Marine Geology (HPMG) allows exceptional students to pursue an accelerated program in the undergraduate Geological Sciences and graduate Marine Geology and Geophysics programs. The degree consists of an undergraduate Bachelor of Sciences degree in Geological Sciences from the College of Arts and Sciences, combined with a graduate Master of Science degree from the Division of Marine Geology and Geophysics at the University of Miami Rosenstiel School of Marine and Atmospheric Science. Applicants must be high school seniors in the top 10% of their class and must have a minimum SAT I score of 1360 or (ACT 31). In addition to the regular Application for Admission to the University, the applicant must complete a separate application form for the Honors Program in Marine Geology. The HPMG application form and supporting materials must be submitted no later than November 1st of the applicant's senior year. A review of completed applications will begin by the end of November.

For further information and application forms please go to the following web address: www.miami.edu/dualdegree (<http://www.miami.edu/dualdegree>).

Honors Program in Medicine (HPME)

The Honors Program in Medicine (HPME) is offered to mature high school seniors with strong academic ability and achievement who seek careers in medicine or medical science. Students can earn both a Bachelor of Science (BS) and a Doctor of Medicine Degree (MD) in 7 or 8 years.

Students undergo a highly selective screening process and are admitted simultaneously to the University of Miami and the Miller School of Medicine. Accepted students are assured of a place in medical school after 3 or 4 calendar years of undergraduate work assuming they maintain the required grade point average and receive the required MCAT score.

Applicants to the Honors Program in Medicine must be US citizens or permanent residents of the United States with an alien registration receipt card in their possession at the time of application. Residents of any state may apply. Only students who are in their last year of high school are eligible to apply.

To be considered students must:

- have a combined SAT1 score of 1400 (combined Math and Critical Reading scores) or an ACT score of 32 and an unweighted GPA of 3.75
- meet the SAT II score requirement of at least 600 in Math (Level I or II) and one science (Biology, Chemistry or Physics)
- have completed eight semesters of English and mathematics and two semesters each of biology and chemistry by the time they graduate from high school complete all components of your Common Application for undergraduate admission and all standardized testing by November 1
- complete a Dual Degree Honors Program Supplemental Application for Medicine by November 1

For further information and application forms please go to the following web address: www.miami.edu/dualdegree (<http://www.miami.edu/dualdegree>).

Honor Societies

The following honor societies have chapters at the University of Miami:

- Alpha Epsilon Delta (Pre-Med)
- Alpha Epsilon Rho (Electronic Media)
- Alpha Eta Mu Beta (Biomedical Engineering)
- Alpha Kappa Delta (Sociology)
- Alpha Lambda Delta (Freshmen General Scholarship)
- Alpha Phi Sigma (Criminology)
- Alpha Rho Chi (Architecture)
- Beta Alpha Psi (Accounting)
- Beta Beta Beta (Biology)
- Beta Gamma Sigma (Business)
- Chi Epsilon (Civil, Architectural and Environmental Engineering)
- Chi Epsilon Pi (Meteorology)
- Eta Kappa Nu (Electrical and Computer Engineering)
- Eta Sigma Phi (Classics)
- Golden Key (General Scholarship)

- Honors Students' Association (General Scholarship)
- Mortar Board (General Scholarship)
- Omicron Delta Kappa (General Scholarship)
- Phi Beta Kappa (General Scholarship)
- Phi Lambda Pi (General Scholarship)
- Pi Kappa Lambda (Music and Music Education)
- Pi Lambda Theta (Education)
- Pi Sigma Alpha (Political Science)
- Pi Tau Sigma (Mechanical and Aerospace Engineering)
- Psi Chi (Psychology)
- Rho Rho Rho (Marine Science)
- Sigma Delta Pi (Spanish)
- Sigma Gamma Epsilon (Geological Sciences)
- Sigma Pi Sigma (Physics)
- Sigma Tau Delta (International English)
- Sigma Theta Tau (Nursing)
- Tau Beta Pi (Engineering)
- Theta Alpha Kappa (Religious Studies)

First-Year Seminars

First-Year Seminars

- FFA 190-199. First-Year Seminars in Arts
- FLT 190-199. First-Year Seminars in Literature
- FNS 190-199. First-Year Seminars in Natural Science
- FPR 190-199. First-Year Seminars in Philosophy/Religion
- FSS 190-199. First-Year Seminars in the Social Sciences

Conceived as alternatives to the typical survey courses that incoming students take, First-Year Seminars offer a limited number of students a small class focused on a specific topic. The seminars are interdisciplinary in nature and/or experimental in subject and design. Seminars are taught by distinguished faculty from a wide variety of academic disciplines and offer students the opportunity to engage in research from their first semester on campus. No student may take more than one. First-Year Seminars are 3 credit hour courses that may be used to fulfill general education requirements in STEM, People & Society, or Arts & Humanities, as they can be a part of cognates.

Veterans

Veterans' Benefits

The University of Miami maintains a Veterans' Affairs (V.A.) Office in the:

Office of the Registrar
P.O. Box 248026
Coral Gables, Florida 33124-6914

This office assists veterans and dependents of veterans who are entitled to V.A. educational benefits under Chapter 30, 31, 32, 33, or Chapter 35 of Title 38, U.S. Code, and Chapter 1606 or Chapter 1607, Title 10, USC. The University of Miami participates in the Yellow Ribbon Program for qualified Chapter 33 recipients.¹ Anyone needing information on Veterans' Benefits is advised to contact the Office of the Registrar

or visit the Registrar's website at www.miami.edu/registrar (<http://www.miami.edu/registrar>) and select "Veteran Information".

V.A. students with previous post-secondary educational training/experience must request an official transcript(s) be sent to the School. If the transcript has not been received prior to the end of the student's initial semester, or as specified in the guidelines under the program he/she is enrolled in, the Veterans' Affairs Office will not re-certify the student for V.A. educational benefits. The Veterans' Affairs Office may re-certify the student after the transcript has been received.

The V.A. student's previous training and/or experience will be evaluated by the School. Should credit(s) be accepted and/or awarded, the V.A. student's tuition and training time may be reduced proportionally. The V.A. and the student will receive a written notice of the credit(s) allowed.

¹ The University of Miami's Yellow Ribbon Program is available to students in the Fall and Spring semesters only.

Standards of Progress Policy for Veterans

Satisfactory progress is indicated by a Satisfactory Progress Average (SPA), which is a variation of the Quality Point Average (QPA). The SPA is computed by the following formula:

A	4
B	3
C	2
D	1
E	0
IE	0
F	0
IF	0
NG	0

- Note that "E's", "F's", "IE's" and "IF's" are included in the SPA.
- A grade of CR will be counted as CR=2.
- The SPA is determined by dividing the total quality points earned by the credits attempted.

When a course is dropped with a grade of "W", the V.A. requires a student to repay any benefits received for that course unless the V.A. determines there are mitigating circumstances involved.

Benefits will not be paid for courses in which a student receives an NG or NC.

- An SPA of 2.0 or greater for undergraduate students, or 3.0 or greater for graduate students, is satisfactory progress.
- Less than 2.0 for undergraduate, and less than 3.0 for graduate students, is not satisfactory.
- Law and M.D. students will be considered to be making satisfactory progress as long as they meet the academic standards set by their schools for retention in their degree programs.
- The SPA is non-cumulative. It is computed each term on a one-term basis.
- Any term a student's SPA is less than 2.0 for undergraduate or 3.0 for graduate, he/she will be notified that he/she is not making

satisfactory progress. He/she will be certified, in a probationary status, for only one additional semester.

- If, at the end of this additional semester, his/her SPA for that semester is still below the satisfactory level, the V.A. will be notified of the unsatisfactory progress and his/her educational benefits will be terminated.
- A student whose V.A. educational benefits have been terminated for unsatisfactory progress may petition the Veterans' Affairs Office to be re-certified after one semester has elapsed. Please address your request to:

VA Certifying Official
c/o Office of the Registrar
University of Miami
P.O. Box 248026
Coral Gables Florida 33124-6914

- The Veterans' Affairs Office may re-certify the student for V.A. educational benefits only if there is a reasonable likelihood that the student will be able to attain and maintain satisfactory progress for the remainder of the program.

For V.A. Payment of Benefits Purposes

All V.A. Students are required to notify the V.A. Certifying Official, every semester, in writing, their intent to use their benefits, and therefore to be certified for that semester.

- An "I" (incomplete) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of **one calendar year** unless permission for a delay is granted by the Academic Dean.
- An "NG" (no grade) designation for a course must be converted to a credit grade counting toward graduation, or a failing grade, by the end of **one regular semester** unless permission for a delay is granted by the Academic Dean.
- If permission is obtained, a memo signed by the Academic Dean must be given to the Veterans' Affairs Office during the semester in which the "I" or "NG" was to be removed. This memo should also state the period of time for which the delay is approved.
- If a memo giving permission for a delay in the "I" or "NG" removal is not received by the end of the semester in which the "I" or "NG" was to be removed, the V.A. will be notified of the incomplete grade resulting in a loss of educational benefits for that course.

Please consult with our office regarding regulations for "IP's" received in Thesis, Research, or Dissertation.

There is an official period after each registration in which a student may drop a course without a "W" appearing on his/her grade report. This period is not to be confused with the last date to drop a course with a "W" grade. Please check the academic calendar on the Registrar's website for dates: www.miami.edu/registrar (<http://www.miami.edu/registrar>).

Class Attendance and Absences

- Regular and punctual class attendance is vital for all students.
- It is the student's responsibility to know the instructor's policies regarding examinations, penalties for absences, and late or missed work.

- A copy of the student's transcript will be placed in the student's permanent file maintained by the Veterans' Affairs Office.

Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses. V.A. educational benefits will only pay for courses that are toward the program in which you are enrolled.

Veterans and children of deceased or totally disabled veterans receive training allowance in proportion to the schedule carried. The full load required to receive full training allowance is 12 credits in undergraduate school (9 credits in Graduate School).

UNDERGRADUATE ACADEMIC PROGRAMS

Architecture

<http://www.arc.miami.edu>

Introduction

The School of Architecture offers a five-year, accredited professional program leading to the Bachelor of Architecture degree. The Bachelor of Architecture fulfills the educational requirements for professional registration. It offers specialized architectural study through upper-level studios and architecture electives, as well as opportunities for the study of liberal arts through the elective sequence.

The School of Architecture's location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation's fastest growing urban areas. These challenges result in an increasing demand for skilled professionals. Students have the opportunity to work with the faculty in the exploration of theoretical issues and in the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

Mission

- Prepare students for professional leadership and lifelong learning in architecture, urbanism and related fields.
- Preserve and develop knowledge for the profession through research and practice.
- Share knowledge locally and internationally through community service.
- Promote building and community design goals of environmental responsibility, social equity and economic sustainability.

Accreditation

The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accreditation Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional

graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Resources

The school's resources, including state-of-the-art computer and digital fabrication laboratories, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for undergraduate architecture students include:

- the **Historic Preservation Certificate**
- the **Classical Architecture Certificate**
- the **Master of Urban Design**
- the **Master of Real Estate Development and Urbanism**
- the **M.S. Architecture**
- the **BSAE/MARCH**
- the **BARCH/MBA**

Dual Degree Programs

A six year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Architecture is also available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion of this program, graduates are eligible for professional registration as both an engineer and an architect. The course requirements for the BSAE/MARCH program are as follows:

Majors

Major in Architecture

- Bachelor of Architecture (p. 58)

Minors

Minor in Architecture

- Architecture (p. 61)

Joint

Joint Degrees in Architecture

- Bachelor of Science in Architectural Engineering and Master of Architecture (p. 60)

Academic Policies

Admission

Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the School of Architecture is selective and highly competitive. Application to the Bachelor of Architecture program is requested by January 1st. Early application is encouraged.

Freshman

Admission decisions are based on the following factors: portfolio, secondary school record, SAT/ACT score, counselor's evaluation and the student essay.

Transfer Students

The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 G.P.A. is required for transfer admission. A portfolio is required for advanced placement in the design sequence of the Bachelor of Architecture Program. Application deadline for the School of Architecture program is March 1st.

All transfer students requesting advanced placement in design must provide a portfolio of previous academic design and graphic work and three academic recommendations. Students accepted into third year design will be required to complete a transitional design course (ARC 301) during the summer prior to enrollment. The courses MTH 130 and PHY 103, or their equivalent are to be completed before admission into ARC 305.

Student Responsibilities

Students in the School of Architecture are responsible for planning their own programs and for meeting degree requirements. It is the student's responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study. Students are provided assistance by advisors and faculty members. Written requests for variation from program or school requirements are reviewed by a faculty committee.

Academic Progress and Probation

The School of Architecture will review each student's record at the end of each semester. When a student's semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with School of Architecture policies and procedures. Students on probation are not permitted to enroll in more than 13 credit hours, shall meet on a monthly basis with their academic advisor, and may have a STOP placed upon their future enrollment until grades for work-in-progress are reviewed. First semester freshmen who have a semester grade-point average below 2.0 shall be placed on probation.

Credit Hours Earned	CGPA
Fewer than 33 credit hours	2.0
33-64 credit hours	2.1
65-96 credit hours	2.2
More than 96 credit hours	2.3

Students must complete all Architecture Design studios with a grade of C- or higher. Students receiving two consecutive C- grades in architecture design studios will have to repeat the later course. Students receiving a grade of D+ or lower in an architecture design studio must repeat the studio and will be restricted to a 15 credit hour semester load. The student will meet with an academic advisor on a monthly basis and will be reviewed prior to continuation.

Academic Dismissal

A student in the School of Architecture whose CGPA or progress toward degree completion falls below the level of the minimum standards of the University of Miami may be dismissed. In the School of Architecture this includes a student who receives three grades of D+ or lower in design courses.

Class Attendance and Absences

Class attendance is mandatory for all architecture courses; three unexcused absences constitutes grounds for dismissal from the course and/or a failing grade. Students are required to be present for an entire design review, therefore, students arriving late or departing early from class will be considered absent. Excused absences require written notification and are granted by the instructor.

Failing Grades or Incompletes

A required architecture course in which a student receives a failing grade must be repeated during the first subsequent semester in which the course is offered. Incompletes can be given only for reasons of serious illness or exceptional hardship.

Student Work

The University may retain selected student work and may place it in the architecture archives for exhibition, publication, or other use as the University deems appropriate. Each student in architecture is encouraged to maintain a design portfolio of every project undertaken throughout the five-year program.

Permission to Take Courses at Another University

A form is available from the Office of Academic Services and should be completed and approved PRIOR to off-campus enrollment. Students are encouraged to provide complete documentation for each course request form. Each student requesting transfer credit hour must supply the University of Miami registrar with certified transcripts. Additionally, each student should review transfer evaluations to be certain that all courses are correctly evaluated for credit hour. The proper transmission and transfer of credit hours is the responsibility of the individual student. The last 45 credit hours towards the degree must be completed at the University of Miami.

Changes to Academic Requirements

The School reserves the right to change academic requirements.

Computer Requirement

Undergraduate and graduate students entering the program are required to purchase their own computers for use in the design studio. The School of Architecture computing resources are accessible via a wireless network with an approved device and subject to School and University policy. System requirements are published on the School of Architecture web site.

Requirements for Graduation

Architecture students must complete a cognate in People and Society and a cognate in either Arts & Humanities or STEM.

Bachelor of Architecture

Specific procedures and policies are detailed in the student handbook available from the Office of Academic Services.

First Year		Credit Hours
First Semester		
ARC 101	Architecture Design I	6
ARC 111	Drawing I	3
ARC 121	Architecture and Culture	1
MTH 130	Introductory Calculus	3
ENG 105	English Composition I	3
Term Credit Hours:		16

ARC 371	Ancient Architecture	
ARC 373	Early Christian, Byzantine, and Medieval Architecture	
ARC 475	Colonial Architecture	
ARC 476	19th and 20th Century Architecture	
ARC 554	Architecture of South Florida	
ARC 570	Modern Architecture	
ARC 572	Selected Topics in World Architecture	
ARC 574	Renaissance Architecture	
ARC 590	History of Cities	
Term Credit Hours:		69
Total Credit Hours:		171

Curriculum Notes

The School reserves the right to retain all student projects done in for academic credit hour. MTH 130 AND ENG 105 are entry-level courses. Courses taken to achieve entry-level status cannot be considered towards the total credit hours required for the B.Arch. Degree.

Electives

The program requires four types of electives:

- Architecture electives (7 courses)
- Investigations in areas of architectural interest beyond the core requirements
- Professional practice elective (1 course)
- Focused examination of a topic related to practice
- Non-Architecture electives (5 courses)
- Explorations of general University offerings
- Minor (4-5 courses) or 2 cognates (6 courses)
- Concentrated study in an area outside of architecture

A minor or its equivalent is required for all students who began the program prior to the Fall of 2013. All others shall complete the cognate requirements. Areas are selected in consultation with faculty advisors.

Bachelor of Science in Architectural Engineering and Master of Architecture

Year One		
First Semester		Credit Hours
CAE 111	Introduction to Engineering I	3
ENG 105	English Composition I	3
MTH 151	Calculus I for Engineers	5
PHY 205	University Physics I	3
ARC 121	Architecture and Culture	1

Term Credit Hours:		12
Total Credit Hours:		203

¹ To be selected from approved lists of People and Society (PS)/Arts and Humanities (HA). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours). Students are advised to select the HA Cognate that includes the following courses: ARC 230 or ARC 630, ARC 268 or ARC 476 and ARC 594.

² To be selected from approved list of Technical Electives

Honors

Henry Adams Medal

Awarded in conjunction with the American Institute of Architects to the highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Henry Adams Certificate

Awarded in conjunction with the American Institute of Architects to the second highest-ranking graduating student for scholarship and excellence in a professional architecture program.

Other honors, distinctions, and awards are presented annually for excellent student performance.

Minor in Architecture

A minor in architecture is available to non-architecture majors as an option in the undergraduate architecture program. The purpose of the minor is to provide a general understanding and appreciation of the discipline of architecture. The minor does not satisfy professional requirements in architecture but does offer an introductory basis for further study at the undergraduate or graduate level. The program requires 12 credit hours in architecture courses.

Four architecture electives from the following list of courses may be taken to complete the requirements for the minor.

ARC 121	Architecture and Culture	1
ARC 122	Architecture and Behavior	1
ARC 141	On-Site Survey of European Architecture and Urbanism	3-6

ARC 223	Architecture and the Environment	1
ARC 267	History of Architecture I: Ancient, Medieval and Renaissance	3
ARC 268	History of Architecture II: Baroque through Contemporary	3
ARC 292	Introduction to Architecture Design I	3
ARC 293	Introduction to Architecture Design II	3
ARC 294	Introduction to the Development of Architecture	3
ARC 323	On Site Study of Selected Architecture and Urbanism	3-6
ARC 324	On Site Graphic Analysis of Selected Architecture and Urbanism	3
ARC 371	Ancient Architecture	3
ARC 373	Early Christian, Byzantine, and Medieval Architecture	3
ARC 475	Colonial Architecture	3
ARC 476	19th and 20th Century Architecture	3
ARC 481	Special Problems	1-3
ARC 551	Contemporary Theories of Architecture	3
ARC 554	Architecture of South Florida	3
ARC 572	Selected Topics in World Architecture	3
ARC 574	Renaissance Architecture	3
ARC 581	Special Problems	3
ARC 582	Special Problems	3
ARC 583	Special Problems	3
ARC 584	Special Problems	1-3
ARC 585	Special Problems	1-3
ARC 586	Special Problems	1-3
ARC 590	History of Cities	3

Arts and Sciences

<http://www.as.miami.edu>

Introduction

The College of Arts and Sciences at the University of Miami is a community of scholars and students that encourages the quest for a deeper understanding of the human experience and fosters a personal commitment to lifelong learning, intellectual growth, and the enduring values of the liberal arts.

The College is dedicated to helping students develop analytical and communication skills, creative abilities, and a sense of civic responsibility needed in an increasingly complex society. It strives to provide them with a rigorous grounding in their chosen field, an awareness of the interconnectedness of disciplines, and an exposure to the discovery of new knowledge.

The College seeks to create an intellectual environment that enhances individual growth and supports scholarly activities and creative endeavors that augment human knowledge and understanding.

Degree Programs

The College of Arts and Sciences offers courses leading to the degrees of:

- Bachelor of Arts
- Bachelor of Science
- Bachelor of Fine Arts
- Bachelor of Liberal Arts

Graduates with one of these degrees will have had a sound liberal arts introduction to the major fields of human knowledge. In addition to this background, each bachelor's candidate has the opportunity to select an area of academic or of occupational interest. Professional or pre-professional curricula leading to certification in teaching, or to dentistry, medicine, law, etc., can be built into the degree program.

Academic Policies

The College of Arts and Sciences follows the general university academic policies outlined in the General Academic Information section of this Bulletin.

Academic Appeal Policy and Procedures

The College's Faculty Committee on Academic Appeals (FCAA) is responsible for reviewing and conducting hearings on appeals related to exceptions to academic policy under the authority of the College of Arts and Sciences. Appeals **must** be submitted directly by the student from their student UM email account. Appeals will not be accepted from parents/guardians, doctors, attorneys, or anyone else other than the student. Please read below for a list of acceptable and unacceptable appeal requests. **All appeals related to course drops/enrollment adjustments MUST be submitted within 30 calendar days from the semester end date noted on the academic calendar for the semester in question.** Transcripts will not be altered once a student has graduated and has a conferred degree. Appeal decisions will be delivered to students' UM email account within 2 to 3 business weeks upon receipt of the appeal. All appeal decisions are final and non-negotiable.

The student maintains full responsibility for the impact of an appeal decision, especially as it relates to their account, financial aid, visa status, academic progress, and graduation timeline.

Steps to Submit an Acceptable Appeal:

1. Draft an email to the Assistant Dean of Academic Services – see website for contact information. as.miami.edu/advising.
2. The appeal email must briefly describe the situation, the reason/justification for the request, the specific request/action, the specific year/term/course ID as applicable to the type of appeal, and the student's name/ID.
3. Appeals must be accompanied by supporting documentation, if applicable to the type of appeal. Documentation must be submitted as an attachment to the appeal email. It is the responsibility of the student to determine what documentation best supports their appeal case. We will not pre-approve documentation before submission of the appeal. We will only accept documentation from the student submitting the appeal.

Appealable Actions for Committee Review:

1. Request for retroactive drop of one, or more, courses after the last date to drop without a W, and/or after the last day to drop a class for the semester in question. **This type of appeal is only considered for cases of extreme, unforeseen circumstances or medical emergencies that can be documented.** Retroactive drop action can **NOT result in a complete withdrawal (all enrolled classes dropped)**.
2. Request for waiver of the 45 credit hour residency requirement
 - a. Appeal must include the institution where credits will be/were taken, the year/term to be/were taken, and the exact number of credits to be considered for waiver.
 - b. This process **does not** preapprove transfer equivalencies or guarantee transferability of courses. Students are responsible for adhering to all necessary policies and procedures related to transferring courses to UM.
3. Substitution for, or waiver from College of Arts and Sciences' General Education Requirements (not University general education requirements – see below).

The following requested actions are not appealable through the College of Arts and Sciences FCAA:

1. Adjustment of academic record/transcript after graduation and a conferral of the degree: See University Bulletin
2. Retroactive withdrawals for Fall/Spring semesters
 - a. The University has a formal withdrawal policy found here: http://www.miami.edu/index.php/cane_success_center/withdrawal/
3. Retroactive withdrawals for summer sessions that alters the effective date of the withdrawal
 - a. See withdrawal policy linked above
4. Grade Appeals, including incomplete grades that are now IF grades
 - a. See Faculty Senate Appeals process in Bulletin here: <http://www.miami.edu/index.php/academicbulletin/>
5. Waiver of University General Education Requirements as defined by the Bulletin: No appeals process available
6. Substitution for/waiver from any requirements related to a major or minor: Under respective department authority

7. Excused absences from a course(s): Absences are under the authority of individual instructors
8. Credit Only Option after deadline: No appeals process available

Requirements for Graduation

Bachelor of Arts and Bachelor of Science Degrees

Candidates for degrees in the College of Arts and Sciences must complete the credit hours of work and achieve the quality point average specified for students in the University at large. These requirements are indicated in the *Academic Procedures and Information* section of this Bulletin. Candidates must also complete the General Education requirements of the University, i.e., the *Proficiencies*: English Composition, Advanced Writing and Communication, and Quantitative Skills; completion of a cognate in each of the three areas: Arts & Humanities, People & Society, and Science, Technology, Engineering & Mathematics. The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge.

I. Additional Proficiencies and Areas of Knowledge Requirements

In addition to the university's general education requirements, the college has the following requirements and provisos:

Bachelor of Science

- Second Language Proficiency: Degree candidates must earn at least 3 credit hours of a language other than English at the 200 level or higher.
- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- Mathematics Proficiency: Degree candidates must complete a calculus sequence: MTH 161-MTH 162, MTH 140-MTH 141-MTH 162, or MTH 171-MTH 172.
- Computing or Statistics Proficiency: Degree candidates must earn at least 3 credit hours in either
 1. a computing course approved by the major department; or
 2. a statistics course approved by the major department.
- Natural Science Area of Knowledge: Degree candidates must earn at least 3 credit hours in Natural Science, in one of the following departments: Biology, Chemistry, Geological Sciences or Physics. These credit hours must be earned in courses that count toward a major in that department. These credit hours may double count with any other requirement.

Bachelor of Arts

- Second Language Proficiency: Degree candidates must earn at least 3 credit hours of a language other than English at the 200 level or higher.
- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- Mathematics Proficiency: Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 or higher.

- Natural Science Area of Knowledge: Degree candidates must earn at least 3 credit hours in Natural Science: Anthropology (only APY 203), Biology, Chemistry, Ecosystem Science and Policy (only ECS 111, ECS 112, ECS 202), Geography (only GEG 120), Geological Sciences, Marine Sciences (except MSC 313, MSC 314), Physical Sciences, and Physics. These credit hours may double count with any other requirement.

Bachelor of Fine Arts

- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- Mathematics Proficiency: Degree candidates must earn at least 3 credit hours in a Mathematics course numbered MTH 108 or higher.

Bachelor of Liberal Arts

- Advanced Writing and Communication Proficiency: Degree candidates must complete at least four writing courses, and at least one writing course must be in the student's major discipline.
- None

Details of the Second Language Proficiency

Second language requirements can be fulfilled through courses offered in the departments of Modern Languages and Literatures (Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Portuguese, and Spanish, except for courses numbered 310-319), Classics (Latin and Greek), and Teaching and Learning in the School of Education (American Sign Language). Special 100- and 200-level Spanish courses are required of heritage Spanish speakers who choose to fulfill the language requirement by taking Spanish. Courses taken in order to meet second language requirements, including necessary prerequisite courses, cannot be used in cognates taken to fulfill the Areas of Knowledge requirement.

Students who graduated high school at an institution in which the primary language of instruction and the primary language of school administration was not English, are eligible for exemption from the CAS second language requirement. Exemption will be granted by CAS Office of Student Advising. To be granted the exemption, the student must have on file the equivalent of a high school diploma from such an institution.

Details of the Advanced Writing and Communication Proficiency

Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student's major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline.

Individual writing course offerings may make the writing component independent of the rest of the course. As such the the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two transfer courses towards the writing requirement.

Separation of Proficiencies and Areas of Knowledge

Courses taken to fulfill the proficiency requirements cannot be used in cognates taken to fulfill the Areas of Knowledge requirement.

II. Major and Minor Fields (B.A. and B.S degrees)

B.A. and B.S. degree candidates must choose a major offered in the college by one of the disciplines with an undergraduate academic program in the college, and at least one other minor or major from any of the disciplines in the university. B.S. degree candidates must choose a major from one the STEM fields: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Ecosystem Science and Policy, Geological Sciences, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Psychology. B.A. degree candidates must choose at least one major or minor from a field other than the STEM fields: Biochemistry and Molecular Biology, Biology, Chemistry, Computer Science, Geological Sciences, Mathematics, Microbiology and Immunology, Neuroscience, Physics, Computer Information Systems, and Engineering. The majors and minors taken by a student must come from different fields of study. Multiple majors and minors may be taken from departments and programs that offer multiple fields of study. To find the requirements for majors and minors, consult this bulletin under the discipline concerned, and confer with the designated departmental representatives. Any student who does not make satisfactory progress towards a major may be required to change or relinquish candidacy for the degree.

Individual courses may be used to satisfy the requirements of multiple majors and minors. However, a minimum combined total number of credit hours must be completed in courses required for the majors and minors. The minimum number of credit hours is 24 times the number of majors, plus 9 times the number of minors.

III. Additional Bachelor of Fine Arts Requirements

B.F.A. degree candidates must satisfy the requirements of a major as determined by the Department of Art and Art History or the Department of Theatre Arts. B.F.A. studio majors must minor in Art History. Students must maintain at least a GPA of 3.0 in their major, and an overall GPA of 2.0 or above as specified in departmental and program sections of this bulletin.

IV. Additional Bachelor of Liberal Arts Requirements

B.L.A. degree candidates must complete 120 credit hours with an overall GPA of 2.0 or above. At least 60 of the 120 credit hours must be in 300, 400, or 500-level courses. Of these 60 credit hours, 30 credit hours must be completed in the College of Arts and Sciences. No more than 40 credit hours in 300-level or higher courses may be earned in any one department, and no more than 52 total credit hours may be earned in any one department. Up to 30 of the 120 credit hours may be courses from other schools and colleges of the university except for those courses expressly excluded from recognition by the college. Students may, but are not required to, elect a major in a department. If a student fulfills the departmental requirements for the major, it will be recorded on the official transcript. No minor may be elected.

V. Other Requirements

General Electives

Beyond the general education and major/minor courses, all students must complete sufficient general electives to reach a total of 120 credit hours. General electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses.

Credit Only

Only general electives may be taken under this option. Courses that are used to satisfy the major, the minor, the distribution requirements of the College and the general education requirements of the University may not be taken for credit only.

Exemption

Exemption from a course or courses refers specifically to the following:

1. credit by examination through the Advanced Placement (AP) or International Baccalaureate (IB) programs;
2. advanced placement by proficiency examinations or test scores, with no credit earned;
3. advanced standing and/or placement, with credit earned.

Transfer Credit Hours

Credit hours transferred from other institutions may not count towards the completion of a major or minor without the written approval of the department or program.

Independent Major

The Independent Major allows students to pursue a BA or a BS degree in the College of Arts and Sciences, depending on the field of study and in consultation with the Guidance Committee. Students will fulfill all requirements for such degrees.

Students may begin to develop a proposal for the IM when they have reached sophomore standing. The proposal should explain why existing majors are inappropriate or inadequate to satisfy the student's interests. Students will be ineligible for declaring the IM upon reaching senior standing, that is, they must declare as a junior and spend at least two (2) full semesters in residence at UM in the IM. Students will require a cumulative UM GPA of 3.5 or higher to be eligible for the IM.

A student's Guidance Committee typically will comprise two tenured or tenure-track faculty, typically from different departments, who represent the disciplinary breadth of the courses selected for the IM. A third Guidance Committee member might be appropriate when the proposed course of study encompasses expertise from three Departments or disciplines. The Guidance Committee Chair, who has primary oversight responsibility regarding satisfactory completion of the major, will serve as the primary advisor for the student's senior research/creative project under most circumstances, and must be a tenure-track faculty. Exceptions to the Chair serving as the primary advisor might include situations where there are co-advisors.

The IM proposal must include at least thirty (30) credit hours of coursework beyond those needed to fulfill General Education requirements. Of those thirty (30), at least six (6) must be at the 300 level; additionally, six (6) credit hours will be satisfied by a Capstone project/thesis in the last two (2) semesters of the Bachelor's degree. Because many courses have variable availability and conflicts are inevitable, strong proposals will identify more than 30 credit hours of coursework before being submitted to the Advisory Committee for approval. If a student wishes to pursue the IM as a double-major, the Advisory Committee should give particular attention to the appropriateness of the student's plan of study; no double-counting of credit hours will be allowed between the two majors.

PreLaw Preparation

Although no specific curriculum is required in preparation for Law School, the Pre-Law Committee of the American Bar Association strongly recommends that students considering a career in Law should have a well-balanced education. This education should include courses requiring intensive writing, logical reasoning and critical thinking and reading skills.

Prelaw Advising provides a variety of services to all students interested in attending Law School. For more information, please contact the Office of Student Academic Services in Ashe 200. These services include:

1. Pre-Law Advising: confidential advising in preparation for law school (i.e. application process, general information, discussion of your concerns).
2. The Pre-Law Manual: information about requirements, preparation etc., for law school.
3. Pre-Law Newsletter: information about programs and events.
4. LSAT and LSDAS registration booklets (for juniors and seniors).
5. Campus-wide programs for pre-law students such as Law Day.
6. Programs and seminars in coordination with other University of Miami departments such as: School of Law Career Planning Center, School of Law Center for Ethics and Public Service, Toppel Career Planning and Placement, the Counseling Center, and the Reading and Study Skills Center.

In order to take advantage of the services listed above a student should complete a Pre-Law registration card at the beginning of the academic year.

Other

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available at the following link; <http://www.as.miami.edu/academics/undergraduate-studies/scholarships/> and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services in the College of Arts and Sciences.

Foote Fellows

Foote Fellows pursuing degrees in the College of Arts and Sciences are exempt from all University-wide and College-specific general education requirements. They are eligible for priority admission into the daVinci program, first-year seminars, and internships in the Dean's office. Opportunities to learn by doing, through research or tutorials, as well as seed money for students interested in developing a business plan or a prototype are also available to A&S Foote Fellows. Questions? Go to Ashe 200 for answers!

DaVinci Program

The da Vinci Program encourages high-achieving, intellectually curious students to rethink the map of human knowledge. It emphasizes connections between humanistic and scientific inquiry and their modes of understanding: objectivity, critical analysis, self-reflexivity, the nature of proof, authority, and the logic and rhetoric of written expression. It also helps define the distinctive elements that humanities classes can offer to STEM-minded students: a chance to reflect on questions of human

values, ethics, and aesthetics. At the same time, it introduces humanities students to conceptually new means of investigating the traditional fields.

Students are invited in the program before their first year and they take a seminar per semester in each of the first four semesters of study. A capstone experience marks the conclusion of their undergraduate career.

PRISM Program

The Advanced Program in Integrated Science and Math (PRISM) brings together top first-year students interested in the natural sciences. The program is designed for those who plan on pursuing postgraduate education and a career in science or medicine (Ph.D./M.D. track). Our outstanding faculty, lab directors, graduate assistants, and caring advisors are here to encourage integrated learning in STEM disciplines. PRISM students are exposed to new developments in science and are encouraged to become actively engaged in research during their undergraduate experience. PRISM classes are advanced versions of the typical track done by a first-year natural science student, so there are no additional classes to complete.

Aerospace Studies

<http://www.miami.edu/aerospace-studies>

Dept. Code: AIS

Introduction

Air Force Reserve Officer Training Corps (AFROTC)

AFROTC is a nationwide program that allows students to pursue commissions (become officers) in the United States Air Force (USAF) while simultaneously attending college. AFROTC classes are held on college campuses throughout the United States and Puerto Rico; students can register through normal course registration processes.

AFROTC consists of four years of Aerospace Studies classes (Foundations of the USAF, Evolution of USAF and Space Power, Air Force Leadership Studies, and National Security Affairs/Preparation for Active Duty), and a corresponding Leadership Laboratory for each year (where students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies). College students enrolled in the AFROTC program (known as "cadets") who successfully complete both AFROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

For more information on AFROTC course descriptions, please review <http://miami.edu/>. For more information on the AFROTC program, please review <http://www.as.miami.edu/afrotc/>.

Enrollment

There is no military obligation to enroll in AFROTC. To enroll students must meet the following criteria:

- Be a U.S. citizens or resident alien, or be able to become a U.S. citizen prior to attending Field Training the summer following sophomore year
- Be full-time college students, enrolled in 12 credit hours per semester
- Be able to participate in a demanding physical fitness program

- Be able to pass a Department of Defense Medical Examination
- Have solid moral character
- Maintain AFROTC minimum required grade point average

Scholarships

More than 60% of Air Force ROTC scholarships are awarded to undergraduate students in engineering or other scientific and technical disciplines. However, students in every degree program enjoy scholarship opportunities, as the Air Force seeks to engage students who excel both academically and militarily. Scholarships are awarded in increments of two, three, and four years. Air Force ROTC offers several types of scholarships. Type 1 covers full tuition and most required fees. Type 2 covers tuition and fees, but is capped at \$18,000 annually. Type 7 scholarships are designated for in-state tuition-level institutions. All types of awards provide an allowance for books and a monthly non-taxable stipend. All scholarship cadets are required to meet academic, military, and physical fitness standards to earn and maintain scholarship benefits.

Additionally, University of Miami undergraduates enrolled in the Air Force ROTC program are assured a combined University grant and/or scholarship award during the fall and spring semesters equal to 25% of the University's tuition charge for a maximum of four years. The subsidy is not available during the summer term. Students must maintain continuous enrollment in the AFROTC program, must maintain satisfactory academic progress to continue receiving the subsidy, and full time enrollment in one of the University's undergraduate degree programs is required. No application is required. Awards are made automatically based on information provided by the University's AFROTC detachment.

Benefits

All AFROTC cadets receive uniforms, books and equipment for ROTC classes at no cost. Upon being commissioned a Second Lieutenant in the Air Force, you will receive a starting salary and allowances worth more than \$58,000 annually¹. Free medical and dental care, 30 days paid annual vacation and educational benefits are also part of the compensation package.

¹ Based on 2013 Pay Chart and Miami FL Housing Allowance for an O-1

Educational Objectives

AIS 101/AIS 102 Foundations of the United States Air Force (Lecture 1, Leadership Lab* 0)

Aerospace Studies AIS 101/AIS 102 is a survey course designed to introduce students to the United States Air Force and Air Force Reserve Officer Training Corps. Featured topics include: Air Force heritage, military customs and courtesies, career opportunities, Air Force Core Values, interpersonal communications, and team building. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS 201/AIS 202 The Evolution of USAF Air and Space Power (Lecture 1, Leadership Lab* 0)

Aerospace Studies AIS 201/AIS 202 is a survey course designed to examine general aspects of the employment of air and space power through a historical perspective. Historical examples assist in

understanding the development of Air Force distinctive capabilities and missions. In addition, the students continue discussing the importance of the Air Force Core Values with the use of operational examples and historical Air Force leaders. Students also continue to develop communication skills. Leadership Laboratory is mandatory for AFROTC cadets and complements this course by providing cadets with followership experiences.

AIS 301/AIS 302 Air Force Leadership Studies (Lecture 3, Leadership Lab* 0)

Aerospace Studies AIS 301/AIS 302 teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills. Case studies are used to examine Air Force leadership and management situations as a means of demonstrating and exercising practical application of the concepts being studied. A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

AIS 401/AIS 402 National Security Affairs and Preparation for Active Duty (Lecture 3, Leadership Lab* 0)

Aerospace Studies AIS 401/AIS 402 is a course designed to examine national security process, regional studies, advanced leadership ethics, and Air Force Doctrine. Special topics of interest focus on the military as a profession, officership, military justice, civilian control of the military, preparation for active duty, and current issues affecting military professionalism with a continuing emphasis on the refinement of communication skills.

A mandatory Leadership Laboratory complements this course by providing advanced leadership experiences in officer-type activities, giving students the opportunity to apply leadership and management principles.

Minors

Minor in Aerospace Studies

- Aerospace Studies (p. 66)

Minor in Aerospace Studies

- A minor in Aerospace Studies consists of 16 credit hours.
- You must take all AIS courses listed under the Aerospace Course Listing.
- A grade of C- or higher, with an overall GPA of 2.0, is required in each course taken for the minor.

Africana Studies

<http://www.as.miami.edu/africanastudies>

Dept. Code: AAS

Introduction

The Program in Africana Studies (AAS) provides opportunities for students to learn about the experiences of people of African descent in North and South America, the Caribbean and continental Africa. Courses

are presently offered leading to a major or minor in Africana Studies. Students are encouraged to pursue these courses, even if they are not majors or minors, in order to achieve a balanced education in keeping with the stated goals of the University of Miami.

Educational Objectives

1. To help students research, acquire, and disseminate information about the historical and social experiences of Africans and people of African descent on all sides of the Atlantic basin, but with special emphasis on the United States.
2. To facilitate students' understanding of the multi-cultural, multi-ethnic, globalized society of our time.
3. To help students think critically about the global black experience.
4. To prepare students for graduate work and professional careers.

Departmental Honors

Carter G. Woodson Award - Best all-round student who combines intellectual excellence and community service.

Writing Requirement

To satisfy the College of Arts & Sciences writing requirement in the discipline, students majoring in Africana Studies should take at least one English course or one History course related to Africana Studies and is listed as an advanced writing course.

Majors

Major in Africana Studies

- B.A. in Africana Studies (p. 67)

Minors

Minor in Africana Studies

- Africana Studies (p. 67)

B.A. in Africana Studies

- A major in Africana Studies consists of 30 credit hours.
- Twelve of the 30 credit hours must be completed at the 300 level or above.
- A grade of C- or better with an overall GPA of 2.0 is required in each course taken for the major.

Africana majors must complete the following core courses:		
AAS 150	Introduction to Africana Studies	3
AAS 490	Senior Seminar in Africana Studies	3
HIS 201	History of Africa, I (to 1800)	3
HIS 209	African-American History to 1877	3
or HIS 210	African-American History, 1877-PRESENT	3
Select one Caribbean Studies course from the following:		3
ENG 361	Caribbean Literature	
APY 385	Caribbean Cultures	
GEG 212	Geography of Middle America and the Caribbean	
HIS 318	Modern Caribbean History	

The remaining courses must be selected from the list of acceptable courses approved by the program, in any school or college within the university.	15
Total Credit Hours	30

Minor in Africana Studies

- A minor in Africana Studies consists of 15 credit hours.
- A grade of C- or higher with an overall GPA of 2.0, is required in each course taken for the minor.
- A minimum of six credit hours must be numbered 300 or higher.

Africana minors must complete the following courses:		
AAS 150	Introduction to Africana Studies	3
HIS 201	History of Africa, I (to 1800)	3
or HIS 209	African-American History to 1877	3
The remaining courses must be selected from the list of acceptable courses approved by the program, in any school or college within the university.		9
Total Credit Hours		15

American Studies

<http://www.as.miami.edu/americanstudies/>

Dept. Codes: AMS

Introduction

The **Program in American Studies at the University of Miami** fosters the interdisciplinary study of American culture and society, and explores the place of the United States in an increasingly interconnected world. Our faculty come from a wide range of fields, including history, literature, political science, religion, art, philosophy, law, music, ethnic studies, anthropology, architecture, sociology, communications, and education. What unites them is the commitment to examining the U.S. from multiple perspectives, highlighting the diversity of people, cultures, and experiences that have shaped the past and present United States. The Program places analysis of globalization at its center, and encourages a hemispheric perspective that allows students and faculty to explore interests in the United States, the Caribbean, Latin America, the Pacific Rim, and other border crossings.

Educational Objectives

The undergraduate curriculum in American Studies encourages students to bridge the divide between disciplines by examining specific themes and topics in an engaging, dynamic, interdisciplinary manner. By exposing students to courses that place questions of cultural diversity, regional difference, ethnic and racial identity, gender and sexuality, class dynamics, and popular culture at the forefront of intellectual investigation, the Program in American Studies enables them to situate their own experiences in a wider context. It also exposes them to a multiplicity of perspectives that inform our understanding of the United States and its place in a global society. The Program encourages its majors to study abroad, and faculty members help students plan their curriculum to make that option feasible.

Departmental Honors

American Studies majors with a cumulative GPA of at least 3.5 in AMS courses and an overall GPA of at least 3.0 may earn departmental honors by completing AMS 505. Candidates for departmental honors are responsible for finding a faculty member to serve as thesis advisor. Students then must complete a thesis proposal of approximately 500 words that must be approved by the thesis advisor and the program director. The format and length of the thesis will vary according to the nature of the project. Students would take AMS 501 in the fall semester of the senior year and AMS 505 in the spring to complete the honors thesis.

Advance Writing and Communication Requirement

To satisfy the College of Arts & Sciences writing requirement in the discipline, students majoring in American Studies should take at least one English course or one History course related to the American Studies discipline listed as an advanced writing course.

Majors

Major in American Studies

- B.A. in American Studies (p. 68)

Minors

Minor in American Studies

- American Studies (p. 68)

B.A. in American Studies

A major in American Studies consists of at least 30 credit hours in American Studies courses (core, co-listed, or cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in AMS courses. These credit hours must include at least 18 at the 300 level or above. All majors must complete AMS 101; AMS 310; at least two other AMS core courses; at least one course in American history, and at least one course in American literature.

Students must take three courses, chosen in consultation with an American Studies advisor, in a specialized area of American Studies (200 level or higher). Students may work in areas including, but not limited to, Ethnic Studies, Caribbean Studies, Latino/a Studies, Environmental Studies, Communication Studies, Women's Literature, Urban Studies, Africana Studies, Religious Studies, or Material Culture Studies. At least one of these courses must be either comparative or non-U.S.-based.

Students must take courses from at least three different departments in order to fulfill the requirements for the major.

In addition, all majors must complete AMS 501. This capstone course can take the form of an individual research project or an internship at a local cultural or civic institution. For the research option, students will identify an appropriate faculty member to supervise and grade the project, and then obtain approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will be determined by the faculty member and student in consultation with the program director. For the internship option, students will partner with any number of local institutions and produce a creative and/or scholarly project for

evaluation. The internship will be arranged through the program director, in consultation with the Butler Center and/or the Office of Civic and Community Engagement. The final product will be evaluated by the program director.

Minor in American Studies

A minor in American Studies consists of at least 15 credit hours in American Studies courses (core, co-listed, or cross-listed) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in AMS courses.

Select 9 credit hours at the 300 level or above	9
AMS 101 Introduction to American Studies	3
AMS 310 The United States In The World	3
Select at least one additional AMS core course	3
Select at least one course in American history or American literature	3
Total Credit Hours	21

Anthropology

<http://www.as.miami.edu/anthropology>

Dept. Code: APY

Introduction

Anthropology is the scientific study of humankind, from its beginnings to the present. Of the many sciences that study aspects of humans and their behavior, only anthropology attempts to understand and integrate the entire panorama of human biology and culture in all times and places.

The **Anthropology Department** offers a wide range of courses for students in pursuit of the Bachelor of Arts degree, from the basic four fields of cultural anthropology, linguistics, physical anthropology, and archaeology, to advanced study of topics such as Maya archaeology, medical anthropology, Caribbean cultures, primatology, and the evolution of language.

Anthropological training concentrates on broadly transferable skill areas such as understanding human diversity, building research skills for collecting and making sense of information, and communicating effectively. The skills developed through completing a degree in anthropology are useful for living and working in today's world, which increasingly means interacting with people from many different cultural backgrounds and nations.

The field is especially suited to a multi-ethnic, multi-lingual, and multi-cultural urban center such as Miami, and the research programs of the department faculty reflect the compositions and concerns of the larger community.

Anthropological knowledge has taken an increasing role in the solution of practical problems in public health, cultural resource management, economic development in the Third World, business relations with immigrant and overseas populations, State and Federal programs, and many other areas.

Educational Objectives

Students who graduate from our program in anthropology will have achieved:

1. Basic familiarity with each of the four subfields of our discipline: archaeology, cultural anthropology, linguistic anthropology, and physical or biological anthropology.
2. Extended familiarity with one or more of these subfields in terms of knowledge of content, e.g. area ethnology in Latin America and/or the Caribbean; topical knowledge such as substance use and abuse, gender, food, primate behavior, art, ritual, museums and collections, material culture, and/or world languages; and methodological skills involving field research in one or more of the subfields.
3. The ability to articulate the anthropological view of the human condition in terms of an operational definition of culture and a holistic perspective on how humans behave.
4. Sufficient skill in research to be able to produce a research paper based on original anthropological investigation.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in anthropology should take at least two courses designated as W (writing intensive) offered in the department.

Degree Programs

The Department of Anthropology offers a **major** and a **minor** in the University's array of Bachelor of Arts Degrees.

Departmental Honors

A student with junior or senior standing and a cumulative grade point average of 3.5 or higher may earn honors in anthropology by completion of a qualifying thesis paper encompassing an original research agenda under the direction of a member of the faculty in the Department of Anthropology. The scope of work will be set in a thesis proposal submitted to the adviser and approved in writing. The student will submit a copy of the completed thesis to the Department upon final approval by the Thesis Adviser.

Medical Anthropology Track

The courses listed below constitute a medical anthropology track that may be pursued by anthropology majors. In addition to the required four subfield courses (APY 201-APY 202-APY 203-APY 204), the medical anthropology track may consist of any six of the following list of courses.

APY 205	Medicine, Health Care In Society,Medicine, Health Care in Society	3
APY 391	Gender in Ancient Cultures	3
APY 315	Folk and Alternative Medicine	3
APY 416	Bioarchaeology-Peopling the past	3
APY 392	Sex and Culture	3
APY 421	Interpreting Bodies	3
APY 393	Drugs and Culture	3
APY 397	Violence And Ritual	3
CLA 233	Ancient Medicine	3
APY 413	Medical Anthropology	3
APY 501	Methods of Anthropological Research	3-6
APY 502	Field Studies in Anthropology	3-6

APY 512	Advanced Medical Anthropology	3
PSY 292	Introduction To Biobehavioral Statistics For Non-Majors	3
SOC 211	Quantitative Methods for Sociologists (incl. lab)	3
APY 307	Human Adaptation	3
APY 310	Primate Behavior and Adaptation	3
APY 360	Anthropology of Food	3
APY 414	Forensic Anthropology I: Human Osteology	3
APY 415	Forensic Anthropology II: Fieldwork	3

Majors

Major in Anthropology

- B.A. in Anthropology (p. 69)

Minors

Minor in Anthropology

- Anthropology (p. 69)

B.A. in Anthropology

A major in Anthropology consists of 30 credit hours in Anthropology, passed with a grade of C- or higher with an overall GPA of 2.0.

APY 201	Principles of Archaeology (or approved alternatives)	3
APY 202	Principles of Cultural Anthropology (or approved alternatives)	3
APY 203	Principles of Physical Anthropology (or approved alternatives)	3
APY 204	Principles of Linguistic Anthropology (or approved alternatives)	3
APY 484	Anthropological Theory	3
A minimum of five additional anthropology courses at the 300 level or higher		15
Total Credit Hours		30

Majors are strongly encouraged to enroll in one of our many fieldwork opportunities or to obtain training in field methods specific to their interests. The remainder of the program will be developed with the student's departmental adviser. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in anthropology should take at least two courses designated as W (writing intensive) offered by the department.

Minor in Anthropology

A minor in Anthropology consists of 15 or more credit hours, passed with a grade of C- or higher with an overall GPA of 2.0 including any two 200-level anthropology courses. Appropriate courses offered in other departments may also be counted toward the minor with approval of the Director of Undergraduate Studies.

Art and Art History

<http://www.as.miami.edu/art>

Dept. Codes: ART, ARH

Educational Objectives

The Department of Art and Art History provides facilities and instruction to serve equally the needs of the general student for participation in and appreciation of the visual arts and those of students with specialized interests and abilities preparing for careers in the production, teaching, utilization, and interpretation of Art and Art History.

Degree Programs

The Department of Art and Art History offers two degrees:

- the Bachelor of Arts, with tracks in:
 - Art History
 - General Study
 - Studio Art
- the Bachelor of Fine Arts in Studio Art, which allows for primary and secondary concentrations in:
 - Painting
 - Sculpture
 - Printmaking
 - Photography/Digital Imaging
 - Graphic Design/Multimedia
 - Ceramics

The B.A. requires a minimum of 36 credit hours in the department with a grade of C or higher. The B. A. major is also required to have a minor outside the department. Minor requirements are specified by each department and are listed in the Bulletin. The B.F.A. requires a minimum of 72 credit hours in the department, a grade of C or higher in each course, a successful portfolio review, and at least a 3.0 average in departmental courses. The B.F.A. major is not required to have a minor outside the department. To satisfy the College of Arts and Sciences writing requirement, students majoring in Art or Art History, for all degree programs, must complete at least one course in Art History designated as a writing course.

Departmental Honors

In order to be eligible for Departmental Honors, candidates must have completed at least nine credit hours at the 300 level or above, and must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for Honors must request admission to Departmental Honors from the Department Chair, and identify an exhibition/thesis faculty supervisor.

In addition to fulfilling the regular major requirements, students must register in their senior for six credits of Independent Study at the 500 level. Art majors will be expected to work on an exhibition project. Art history majors will be expected to research and write an Honors thesis.

The Department Chair and the faculty supervisor will determine whether the completed exhibition project or thesis merits Departmental Honors.

Audit

Due to the nature of studio courses, it is not possible for a student to audit courses offered in the studio areas.

Majors

Majors in Art and Art History

- B.A. in Art History (p. 70)
- B.A. in General Study (p. 70)

B.F.A. in Art

Portfolio Review

All students who anticipate graduating with a Bachelor of Fine Arts (BFA) degree must submit a portfolio consisting of 15-20 images of their work. Instructions for submitting this folio can be found on the department website. Students can apply as incoming freshmen or anytime within their first years. NO STUDENT IS OFFICIALLY CONSIDERED A BFA CANDIDATE UNTIL THE PORTFOLIO IS APPROVED BY THE FACULTY. If the BFA portfolio is not submitted at the proper time or fails to be passed by the faculty, the student will be advised and registered as a Bachelor of Arts (BA) candidate.

BFA Exhibition

Unless otherwise instructed, each BFA candidate will take part in an exhibition of work screened and approved by a faculty member from their area of specialization, accomplished as an art major at the University of Miami, in the Fall or Spring semester of the senior year. The BFA exhibitions are held in the College Gallery.

At the time the candidates BFA exhibition is hung, a formal critique will be arranged between the student and the art faculty.

BFA Course Requirements

General Foundation Courses		
ART 101	Introduction to Drawing I	3
ART 104	Introduction To 3D Techniques In Clay, Glass, Metal, Wood	3
ART 109	Introduction to Electronic Media	3

ART 107	Introduction to Drawing III	
ART 305	Intermediate Figure Drawing	
Total Credit Hours		72

BFA Minor in Art History

All BFA studio majors automatically minor in art history. A minor outside the department is not required.

A BFA student is limited to a maximum of 21 credit hours in any one studio area – Painting, Printmaking, Graphic Design/Multimedia, Photo/Digital, Ceramics, and Sculpture.

Students must maintain at least a 3.0 average in their major.

Minor in Art and Art History

BFA Minor in Art History

All BFA studio majors automatically minor in Art History. A minor outside the department is not required.

A BFA student is limited to a maximum of 21 credits in any one studio area - Painting, Printmaking, Graphic Design, Multimedia, Photography/ Digital Imaging, Ceramics, or Sculpture.

Students must maintain at least a 3.0 average in their major.

Minor

A minor in Art and Art History consists of 15 credit hours (9 of which must be from the University of Miami) in any departmental courses. All courses must be passed with a C or higher.

Astronomy

Astronomy

For courses in Astronomy see PHYSICS (p. 122), in particular PHY 110 and PHY 545.

Biochemistry and Molecular Biology

<http://biomed.miami.edu/>

Dept. Code: BMB

(Code for the major is either Track 1: BCHM or Track 2: BCHN)

Introduction

Biochemistry is the chemistry of life. It includes or has large areas of overlap with molecular biology, biophysics, structural biology, cell biology, metabolism, neuroscience, nutrition, genetics, etc. It tries to explain what happens in living organisms and how biological processes are regulated. It is a relatively young science. Our understanding is still developing and students can learn something new every day. An Undergraduate Major in one of our two tracks, Track 1: Biochemistry and Molecular Biology (BCHM) or Track 2: Biochemistry and Nutrition (BCHN), provides an excellent preparation for:

1. Medical School
2. Graduate Studies in all basic medical sciences: Biochemistry, Molecular Biology, Cell Biology, Genetics, Neurobiology, Microbiology, Immunology, Pharmacology, Biophysics, Physiology, Bio-informatics, Biology, Nutrition, Environmental Science, and others.
3. Industry: Biotechnology, Pharmaceutical, Food Production, Food processing, and others.
4. Allied Health Professions: Nutrition, Dentistry, Forensics, Veterinary Medicine, Toxicology, Clinical Chemistry, Environmental Science, and others.
5. Non-Health Professions: Chemistry, Physics, Scientific Publishing, Patent Law, and others.

Kornberg A, "How I became a biochemist." *IUBMB Life*. 2002; 53: 3: 185-6. 12102176

Kornberg A, "Biochemistry matters." *Nat Struct Mol Biol*. 2004; 11: 6: 493. 15164002

Educational Objectives

The undergraduate program in Biochemistry & Molecular Biology strives to provide

1. superior training in nutrition, biochemistry and molecular biology and
2. encouragement for self-study and research to students seeking a B.S. degree.

As part of a research-oriented university, the department, through its students, creates new knowledge. As a result of our teaching efforts, the new B.S.'s created will be able to matriculate into professional and graduate schools or to find positions in teaching professions and/or industry. In addition, the department serves the community by providing expertise in matters related to nutritional and medical biochemistry. For example, it teaches biochemistry to pre-medical and other pre-health students across a wide variety of life science related majors including biology, microbiology, neuroscience, and biomedical engineering.

Degree Programs

As a member of the College of Arts & Sciences, the Department of Biochemistry and Molecular Biology offers an undergraduate B.S. degree. As a member of the Miller School of Medicine, it offers the following graduate degrees: Ph.D., Executive Ph.D., dual B.S.-Ph.D., and dual M.D.-Ph.D. Also, it offers a Molecular Medicine Pathway for M.D. students.

Departmental Honors

Departmental honors can be earned by biochemistry majors who have:

1. Successfully completed two semesters of research (5 or 6 credit hours of BMB 545). This research must be described in a brief thesis that needs to be approved by three BMB faculty members.
2. A 3.5 or higher grade point average in all BMB courses.
3. A 3.3 or higher grade point average in all courses taken at the University of Miami.

Dual Degree Honors Program

The Honors Program in Biochemistry & Molecular Biology (HPBMB) is offered to mature high school seniors with strong academic ability and achievement who seek careers in biological or biomedical science. Students can earn both a Bachelor of Science (BS) and a Doctor of Philosophy Degree (PhD) in approximately 6 years. For information see http://www.miami.edu/admission/index.php/undergraduate_admission/academics/dual_degree_honors/.

Majors

Major in Biochemistry and Molecular Biology

- B.S. in Biochemistry and Molecular Biology or Nutrition (p. 73)

Minors

Minor in Biochemistry and Molecular Biology

- Biochemistry and Molecular Biology (p. 75)

B.S. in Biochemistry and Molecular Biology or Nutrition

Major

The Bachelor of Science (B.S.) degree in either BCHM or BCHN requires 16 total credits of BMB courses: 10 credits of required BMB courses plus six credits of elective BMB courses. At least two elective BMB credits must come from a BMB lab course, either BMB 145, BMB 245, BMB 402, or BMB 545. To satisfy the College of Arts and Sciences writing requirement in the discipline, BMB majors must complete for writing credit (W) either BMB 507, BMB 511, or BMB 545. For all students, a grade of C or better must be earned in each BMB course. For current UM students to declare either major or minor in BMB, a UM cumulative grade point average of 2.9 is required. For transfer students to declare either major or minor in BMB, a grade point average of 3.5 is required. The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities. The two possible academic tracks, BCHM and BCHN, differ by two required upper level BMB lecture courses.

Required BMB Courses	
Students must complete all four BMB lecture courses listed in either Track 1 or Track 2:	10
Track 1 (BCHM)	
BMB 401 Biochemistry For The Biomedical Sciences	
BMB 506 Biomedical Case Studies	
BMB 507 Protein Structure, Function, & Biology ¹	
BMB 509 Molecular Biology Of The Gene	
Track 2 (BCHN)	
BMB 401 Biochemistry For The Biomedical Sciences	
BMB 506 Biomedical Case Studies	
BMB 417 Biochemistry of Food and Nutrition	
BMB 519 Nutrition And Genetics	
Elective BMB Courses	
Students in either Track 1 or 2 must complete at least six credits of elective BMB courses. At least two elective BMB credits must come from a BMB lab course, either BMB 145, BMB 245, BMB 402, or BMB 545.	6
BMB 145 Introduction To Bmb Research	
BMB 151 Freshman Seminar	
BMB 245 Introduction To Bmb Or Nutrition Research	
BMB 251 Sophomore Seminar	
BMB 402 Principles Of Experimental Biochemistry & Molecular Biology	
BMB 411 Readings In Bmb	
BMB 501 Senior Seminars	
BMB 511 Topics In Bmb ¹	
BMB 545 Research Problems In Bmb ¹	
Biology ²	
BIL 150 General Biology	5
& BIL 151 and General Biology Laboratory	
BIL 160 Evolution and Biodiversity	5
& BIL 161 and Evolution and Biodiversity Laboratory	

BIL 255 Cellular and Molecular Biology	3
BIL 250 Genetics	3
Chemistry ³	
CHM 121 Chemistry For The Biosciences I	5
& CHM 113 and Chemistry Laboratory I	
CHM 221 CHM211 Chemistry for the Biosciences II	5
& CHM 114 and Chemistry Laboratory II	
CHM 222 CHM212 Chemistry for the Biosciences III	5
& CHM 205 and Organic Chemistry Laboratory I	
CHM 206 Organic Chemistry Laboratory II	1
Physics ⁴	
PHY 101 College Physics I	5
& PHY 106 and College Physics Laboratory I	
PHY 102 College Physics II	5
& PHY 108 and College Physics Laboratory II	
Mathematics ⁵	
MTH 161 Calculus I	4
MTH 162 Calculus II	4
Statistics or Computer ⁶	
PSY 292 Introduction To Biobehavioral Statistics For Non-Majors	3
or CSC 120 Computer Programming I	
Total Credit Hours	69

¹ Writing credit (W) may be obtained in this course.

² These courses may be taken more than once for additional credits.

³ PRISM students take designated sections of the traditional chemistry series: CHM 111/CHM 113, CHM 112/CHM 114, CHM 201/CHM 205, and CHM 202/CHM 206, which satisfy the requirement for obtaining the Minor in Chemistry. The indicated three semester "Chemistry for the Biosciences" series is preferred, since students will be prepared for independent BMB research at a more early stage.

⁴ PRISM students take PHY 201/PHY 106 and PHY 202/PHY 108. A more advanced physics course series can be substituted (e.g., PHY 205, PHY 206/PHY 208, PHY 207/PHY 209).

⁵ PRISM students take MTH 171 and MTH 172.

⁶ PRISM students take CSC 210.

B.S. in Biochemistry and Nutrition (BCHN)

Sample Curriculum with Traditional CHM 111/CHM 112/CHM 201/CHM 202

The curriculum is essentially the same as BCHM, except BMB 417 is substituted for BMB 507 and BMB 519 is substituted for BMB 509.

Minor in Biochemistry and Molecular Biology

10 credit hours in either Track 1: BCHM or Track 2: BCHN.

BMB 401	Biochemistry For The Biomedical Sciences ¹	3
BMB 506	Biomedical Case Studies ¹	1
Select 6 credit hours from remaining BMB courses		6
Total Credit Hours		10

¹ Students must have all the courses that are a prerequisite for BMB 401 and BMB 506.

Students should become familiar with the credit hour sharing rules. Credit hours for a minor cannot be used for a major. Credit hours can be shared between two majors.

The Department will make its own independent determination on a case-by-case basis concerning the equivalency of courses taken at other universities.

A grade of C or better must be earned in each Biochemistry and Molecular Biology course.

Biology

<http://www.bio.miami.edu>

Dept. Code: BIL

Introduction

The Department of Biology offers undergraduate programs for students interested in a natural science education that will prepare them for careers in biological research, medicine and other health-related fields,

teaching, environmental management and other fields that require a broad base of biological knowledge.

Educational Objectives

The Department of Biology trains students to understand and use the scientific method, and to engage in critical thinking and experimental design. We strongly encourage original laboratory and/or field research under the mentorship of biology faculty. The Bachelor of Science in Biology prepares the student for further training in natural science, such as biology graduate school, as well as medical, veterinary, dental or other health-care professions. The Bachelor of Arts degree prepares the student for a career in more humanities-related fields such as teaching or environmental law.

Degree Programs

Two undergraduate degrees are available in Biology: the B.S. and A.B.

Both require a **major** in Biology of 34 credit hours with a minimum grade of C- in each course and an overall GPA of 2.0.

Departmental Honors

Honors Program

See HONORS PROGRAMS (p. 52) elsewhere in this Bulletin for minimal requirements. In addition to the grade point averages specified in the minimal requirements, the following program constitutes the Biology Departmental Honors Program:

Select a minimum of two of the following: ¹	4
BIL 495 Projects in Biology	
BIL 496 Projects in Biology	
BIL 497 Projects in Biology	
Complete a senior thesis, of superior quality, on the results of the research.	
BIL 498 Senior Thesis	
Select research colloquium:	
BIL 499 Research Colloquium	
Select a minimum of two BIL credit hours from the following:	2
BIL 299 Seminar in Research Problems	
BIL 374 Seminar in Biology	
BIL 375 Seminar in Biology	
BIL 402 Seminar In Biology	
Select a minimum of one course in the Department of Biology at the 500 level	3
An overall GPA of 3.3 and a biology GPA of 3.5.	

¹ Projects in Biology involve a research project carried out under the supervision of a member of the Department of Biology faculty or alternative faculty approved by the Office of Undergraduate Research.

Advanced placement, and in certain situations, course credit hour can be earned through the College Entrance Examination Board program, placement examinations, and departmental proficiency examinations.

For Graduate programs, consult the Graduate School section of this Bulletin.

Variations within the above program may be permitted by the Department Chair in special cases.

Majors

Majors in Biology

- B.S. in Biology (p. 77)
- B.A. in Biology (p. 76)

Minors

Minor in Biology

- Biology (p. 78)

B.A. in Biology

The B.A. degree is recommended for students involved in interdisciplinary programs and for entrance to those professional schools and specific biological careers not requiring a B.S. degree with a major in Biology. In addition to the College of Arts and Sciences degree requirements, the B.A. requirements are as follows:

Biology		
BIL 150	General Biology	4
BIL 151	General Biology Laboratory	1
BIL 160	Evolution and Biodiversity	4
BIL 161	Evolution and Biodiversity Laboratory	1
BIL Electives		24
At least three of which must be at the 400-level or higher		
Up to eight credit hours toward the major, but not the minor, may be selected from the following:		8
Courses numbered 300 or higher in BMB, MBF or MIC		
BME 305	Biomedical Technology	
CSC 548	Bioinformatics Algorithms	
MSC courses numbered 300 or higher with a biological topic		
Chemistry		
Select one of the following options:		4
Option 1: Choose CHM 103, CHM 105 *OR* CHM 111, CHM 113		
CHM 103	Chemistry for Life Sciences I (Lecture) & CHM 105 and Chemistry for Life Sciences I (Laboratory)	
CHM 111	Principles of Chemistry I & CHM 113 and Chemistry Laboratory I	
PLUS choose CHM 104, CHM 106 *OR* CHM 201, CHM 206		
CHM 104	Chemistry for Life Sciences II (Lecture) & CHM 106 and Chemistry for Life Sciences II (Laboratory)	
CHM 201	Organic Chemistry I (Lecture) & CHM 205 and Organic Chemistry Laboratory I	
Option 2: Choose Chemistry for the BioSciences Three-semester Sequence.		
CHM 121	Chemistry For The Biosciences I & CHM 113 and Chemistry Laboratory I	
CHM 221	CHM211 Chemistry for the Biosciences II & CHM 114 and Chemistry Laboratory II	
CHM 222	CHM212 Chemistry for the Biosciences III & CHM 205 and Organic Chemistry Laboratory I	

Minor		
A minor in a department other than natural science.		
B.S. in Biology		
The B.S. degree is recommended in preparation for graduate schools, professional schools, marine biology, and high school or college teaching. In addition to the College of Arts and Sciences general degree requirements, the B.S. requirements are as follows:		
BIL 150	General Biology	4
BIL 151	General Biology Laboratory	1
BIL 160	Evolution and Biodiversity	4
BIL 161	Evolution and Biodiversity Laboratory	1
BIL 250	Genetics	3
BIL 255	Cellular and Molecular Biology	3
BIL 330	Ecology	3
or BIL 432	Ecology in the Galapagos	
BIL 360	Comparative Physiology	3
Additional BIL electives		12
At least three credit hours of which must be at the 400-level or higher		
Two biology laboratory or field courses beyond BIL 151, BIL 161 are required as part of the additional BIL electives. Lab/field courses in approved departments other than Biology (e.g., MIC, MSC, NEU) may be counted towards this lab requirement.		
Up to eight credit hours toward the major, but not the minor, may be selected from the following:		8
Courses numbered 300 or higher in BMB, MBF or MIC		
BME 305	Biomedical Technology	
CSC 548	Bioinformatics Algorithms	
RSM 521	Object-Oriented Programming And Agent-Based Modelling	
MSC courses numbered 300 or higher with a biological topic		
A maximum of two credit hours of the following may be applied towards the major		2
BIL 371	Readings in Biology	
BIL 372	Readings in Biology	
A maximum of six credit hours of the following may be applied towards the major ¹		6
BIL 495	Projects in Biology	
BIL 496	Projects in Biology	
BIL 497	Projects in Biology	
A maximum of two credit hours of the following (no more than one of each option) may be applied towards the major.		2
BIL 281	Undergraduate Learning Intern in Biology	
BIL 381	Workshop Leaders in Biology I ²	
BIL 382	Workshop Leaders in Biology II	
BIL 481	Undergraduate Teaching Assistant Training in Biology	
Statistics or Computer Language/Programming		
Select one statistics or one computer language/programming course from the following: ³		3
BIL 311	Biostatistics	
BIL 511	Biometry	
ECS 204	Environmental Statistics	
IEN 311	Applied Probability And Statistics	
MSC 204	Environmental Statistics	
MTH 224	Introduction to Probability and Statistics	
PSY 292	Introduction To Biobehavioral Statistics For Non-Majors	
CSC 120	Computer Programming I	
Chemistry		
Select one of the following Options:		
Option 1: Standard Chemistry Sequence (addition of CHM 202, CHM 206 will fulfill the minor in Chemistry)		12
CHM 111	Principles of Chemistry I	4
& CHM 113	and Chemistry Laboratory I (recommended to be taken in the first year)	
CHM 112	Principles of Chemistry II	4
& CHM 114	and Chemistry Laboratory II (recommended to be taken in the first year)	
CHM 201	Organic Chemistry I (Lecture)	
& CHM 205	and Organic Chemistry Laboratory I (recommended to be taken in the second year)	
Option 2: Three-semester Chemistry Sequence (recommended for life sciences major; includes the minor in Chemistry)		15
CHM 121	Chemistry For The Biosciences I	
CHM 221	CHM211 Chemistry for the Biosciences II	
CHM 222	CHM212 Chemistry for the Biosciences III	
CHM 113	Chemistry Laboratory I	
CHM 114	Chemistry Laboratory II	
CHM 205	Organic Chemistry Laboratory I	
Physics		
Two semesters of college physics with laboratory or three semesters of university physics with laboratory		
Minor		
A minor in chemistry, ecosystem science and policy, physics, geological sciences, marine sciences, biochemistry and molecular biology, computer science, mathematics, or microbiology and immunology		
Total Credit Hours		90

¹ Only one course may be counted towards the laboratory course requirement for the B.S. degree

² A maximum of one credit hour may be applied towards the major or minor. These courses may be taken more than once each for *general elective credit only*, but only two credits from these options may count towards the major or minor.

³ This will fulfill the mathematics/statistics/computer programming requirement under the College of Arts and Sciences General degree requirements for the Bachelor of Science.

Minor in Biology

A biology minor consists of nine credit hours of BIL at the 200-level or higher *taken in residence at the University of Miami*. (Note: All courses in the minor must be in BIL. Courses from BMB, MBF, MIC, or BME, or other natural sciences approved as electives in the BIL *major* may not be counted towards the *minor*.)

Overall GPA in the BIL minor courses must be a minimum of 2.0.

All credit hours required for a Biology minor must be earned in residence at the University of Miami.

Chemistry

<http://www.as.miami.edu/chemistry>

Dept. Code: CHM

Introduction

Each undergraduate chemistry degree program requires:

Core Courses		
CHM 111	Principles of Chemistry I	3
CHM 112	Principles of Chemistry II	3
CHM 113	Chemistry Laboratory I	1
CHM 114	Chemistry Laboratory II	1
CHM 202	Organic Chemistry II (Lecture)	3
CHM 205	Organic Chemistry Laboratory I	1
CHM 206	Organic Chemistry Laboratory II	1
CHM 214	Quantitative Analytical Chemistry	3
One year of Calculus		
At least two semesters of Physics Plus Lab		
Total Credit Hours		16

The requirements for a major are flexible and should conform to the objectives of the student. A grade of C- or higher must be earned in all courses taken for major or minor credit hour, and the Chemistry GPA must be 2.00 or higher. Credit hours earned in CHM 381 and CHM 382 **do not count** toward the major or minor.

Educational Objectives

The mission of the Bachelor's degree program in the Chemistry Department is to promote an understanding and appreciation of the role of chemistry in modern society, especially as it relates to and integrates with other biological and physical sciences and societal issues facing humanity today such as the environment, health issues and technological advances.

Degree Programs

Three programs lead to degrees with a chemistry major:

1. The B.A. degree
2. The B.S. degree
3. The B.S. degree with certification by the American Chemical Society Committee for Professional Training of Chemists.

Departmental Honors

Honors in Chemistry may be earned by students who complete the B.S. degree in chemistry, plus at least five credit hours of CHM 488 and one credit hour of CHM 490, all with an average grade of at least 3.30. A written Honors Thesis and oral defense on the subject of the Honors Research must be presented by the student and approved by a Department Honors Committee.

Writing Requirement

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Chemistry should take CHM 320 or ENG 233.

Credit for Courses at the 100- and 200-Level

Credit hour may be earned in only one of the courses CHM 103, CHM 111 or CHM 151. Credit hour may not be earned in both CHM 104 and CHM 201.

Majors

Majors in Chemistry

- B.A. in Chemistry (p. 78)
- B.S. in Chemistry (p. 79)
- Certified B.S. in Chemistry (p. 79)

Minors

Minor in Chemistry

- Chemistry (p. 80)

B.A. in Chemistry

<http://www.as.miami.edu/chemistry/>

The **B.A.** degree requires 27 credit hours of chemistry. This major is designed for premedical students, high school science teachers, and others who choose a non-science minor. It may be combined with business courses in an interdisciplinary program. Variations within the program below may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner.

Core Courses		
CHM 111	Principles of Chemistry I	3
CHM 112	Principles of Chemistry II	3
CHM 113	Chemistry Laboratory I	1
CHM 114	Chemistry Laboratory II	1
CHM 201	Organic Chemistry I (Lecture)	3
CHM 202	Organic Chemistry II (Lecture)	3
CHM 205	Organic Chemistry Laboratory I	1
CHM 206	Organic Chemistry Laboratory II	1
CHM 214	Quantitative Analytical Chemistry	3
One year of Calculus		
At least two semesters of Physics Plus Lab		
CHM 331 or CHM 360	Physical Chemistry for Premedical Students Physical Chemistry I (Lecture)	3

Electives	
Select sufficient credit hours of the following:	5
CHM 316 Instrumental Analytical Chemistry	
CHM 320 Instrumental Methods in Chemistry and Biochemistry	
CHM 365 Physical Chemistry II (Lecture)	
CHM 401 Environmental Chemistry	
CHM 441 Inorganic Chemistry (Lecture)	
CHM 520 Physical Organic Chemistry	
BMB 401 Biochemistry For The Biomedical Sciences	
Total Credit Hours	27

B.S. in Chemistry

<http://www.as.miami.edu/chemistry/>

Core Courses	
CHM 111 Principles of Chemistry I	3
CHM 112 Principles of Chemistry II	3
CHM 113 Chemistry Laboratory I	1
CHM 114 Chemistry Laboratory II	1
CHM 201 Organic Chemistry I (Lecture)	3
CHM 202 Organic Chemistry II (Lecture)	3
CHM 205 Organic Chemistry Laboratory I	1
CHM 206 Organic Chemistry Laboratory II	1
CHM 214 Quantitative Analytical Chemistry	3
Choose One of the Following:	8
MTH 161 Calculus I & MTH 162 and Calculus II	
MTH 171 Calculus I & MTH 172 and Calculus II	
Choose One of the Following:	10-11
PHY 101 College Physics I & PHY 102 and College Physics II & PHY 106 and College Physics Laboratory I & PHY 108 and College Physics Laboratory II	
PHY 205 University Physics I & PHY 210 and Honors University Physics II-III & PHY 208 and University Physics II Lab & PHY 209 and University Physics Iii Lab	
PHY 205 University Physics I & PHY 206 and University Physics II & PHY 207 and University Physics III & PHY 208 and University Physics II Lab & PHY 209 and University Physics Iii Lab	
Advanced Courses	
CHM 316 Instrumental Analytical Chemistry	3
CHM 320 Instrumental Methods in Chemistry and Biochemistry	2
CHM 360 Physical Chemistry I (Lecture)	3
CHM 364 Physical Chemistry (Laboratory I)	1
CHM 365 Physical Chemistry II (Lecture)	3
CHM 441 Inorganic Chemistry (Lecture)	3

BMB 401 Biochemistry For The Biomedical Sciences	3
Electives	
CHM 317 The Chemistry of Food and Taste.	3
CHM 401 Environmental Chemistry	
Any 500-level CHM course	
Total Credit Hours	58-59

The **B.S.** degree requires 40 credit hours of chemistry. This major meets the minimum entrance requirements of many graduate programs in chemistry. Variations within the above program may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner. For students who plan to do graduate work in physical chemistry, a double minor is recommended: Mathematics and Computer Science through 310 and 311, Physics through 350 and 360.

Certified B.S. in Chemistry

<http://www.as.miami.edu/chemistry/>

The American Chemical Society **certified B.S.** degree consists of:

Core Courses	
CHM 111 Principles of Chemistry I	3
CHM 112 Principles of Chemistry II	3
CHM 113 Chemistry Laboratory I	1
CHM 114 Chemistry Laboratory II	1
CHM 201 Organic Chemistry I (Lecture)	3
CHM 202 Organic Chemistry II (Lecture)	3
CHM 205 Organic Chemistry Laboratory I	1
CHM 206 Organic Chemistry Laboratory II	1
CHM 214 Quantitative Analytical Chemistry	3
Choose One of the Following:	8
MTH 161 Calculus I & MTH 162 and Calculus II	
MTH 171 Calculus I & MTH 172 and Calculus II	
Choose One of the Following:	10-11
PHY 205 University Physics I & PHY 210 and Honors University Physics II-III & PHY 208 and University Physics II Lab & PHY 209 and University Physics Iii Lab	
PHY 205 University Physics I & PHY 206 and University Physics II & PHY 207 and University Physics III & PHY 208 and University Physics II Lab & PHY 209 and University Physics Iii Lab	
Advanced Courses	
CHM 316 Instrumental Analytical Chemistry	3
CHM 320 Instrumental Methods in Chemistry and Biochemistry	2
CHM 360 Physical Chemistry I (Lecture)	3
CHM 364 Physical Chemistry (Laboratory I)	1
CHM 365 Physical Chemistry II (Lecture)	3

CHM 464	Physical Chemistry (Laboratory II)	1
CHM 441	Inorganic Chemistry (Lecture)	3
CHM 442	Inorganic Chemistry (Laboratory)	1
BMB 401	Biochemistry For The Biomedical Sciences	3
CHM 488	Undergraduate Research	2
CHM 490	Honors Research	1
Electives		3
CHM 317	The Chemistry of Food and Taste.	
CHM 401	Environmental Chemistry	
Any 500-level CHM course		
Total Credit Hours		63-64

Variations within the above programs may be recommended by the Department. Transfer students must complete a minimum of half of the required major credit hours in residence in the Department. Students should make certain that math and physics prerequisites are fulfilled in a timely manner. For students who plan to do graduate work in physical chemistry, a double minor is recommended: Mathematics and Computer Science through 310 and 311, Physics through 350 and 360.

Minor in Chemistry

<http://www.as.miami.edu/chemistry/>

A minor in chemistry consists of 16 credits in chemistry courses, 8 of which must be at the 200 level or above taken at the University of Miami, exclusive of CHM 381, CHM 382, CHM 488 and CHM 490.

Classics

<http://www.as.miami.edu/classics>

Introduction

All culture and civilizations have their classics: those works of art that are seen as the best of their kind, have withstood the test of time, and embody the symbolic values of their society. In the Western tradition, the study of 'Classics' has focused upon the languages, thoughts, literatures, and cultures of ancient Greece and Rome, and their impact on the whole subsequent history of the Western world.

The study of Classics has been conceived in unusually broad terms; it is intended to encompass everything that can be known about the ancient Mediterranean world. There is room in Classics for the study of fields as disparate as literature, science, sculpture, history, architecture, religion, philosophy, theater, economics, music -- in short, the entire panorama of human endeavor. It is no wonder that the study of Classics has always tended to attract some of the liveliest and most brilliant intellects; and it is equally unsurprising that students majoring in Classics find themselves extremely well-prepared for undertaking practically any type of career, whether that be in politics, law, medicine, teaching, publishing, research of all kinds, journalism, banking, or the corporate world. A degree in Classics marks the UM graduate as a person of superior analytical and critical skills, one who has proved able to cope with a rigorous academic curriculum, and who is exceptionally educated in the most fundamental aspects of what it means to be human. Thus, Classics is at the core of the humanities.

Educational Objectives

The educational objectives of the Department of Classics may be stated in a variety of ways, and on a number of levels. In terms of linguistic competency, students majoring (or minoring) in Classics are required to reach an appropriate level of fluency in reading ancient Greek or Latin, or both. In terms of cultural literacy, students of the Classics are educated within a rigorous curriculum exposing them to the great literary works and material cultures of ancient Greece and Rome. In terms of critical thinking, students of the Classics are trained to hone the skills of memory, analysis, and synthesis, skills that they will be able to apply for the rest of their lives in any realm of thought or action whatsoever.

The goal of an education in Classics is to foster and inculcate an ever-burgeoning awareness of what Cicero referred to as *humanitas* -- in short, everything it is to be human. It is the mission of Classics to expose its students to the greatest thoughts and endeavors of the human race, and to encourage them to think about what that greatness consists in, and how to enlarge upon it. The profoundest educational objective of the Department of Classics is to preserve and study all that is important about the past, in order best to prepare for the future.

Degree Programs

The Department of Classics offers the Major and the Minor in Classics.

Major in Classics

The undergraduate Major in Classics at UM has four possible tracks. Greek, Latin, Greek and Latin, and Classical Civilization. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Classics should take three courses marked W from the list of GRE, LAT, and CLA courses offered in the catalogue.

General Education Rubrics

Courses in Classics labeled 'LAT' or 'GRE' and above the 201 level -- that is, LAT 202, GRE 202, and higher -- satisfy General Education requirements under the 'Literature' requirement of the 'Humanities' rubric.

Some courses in Classics labeled CLA satisfy General Education requirements under the 'Literature' requirement, while others do so under the 'People and Society' requirement. These are as follows:

Literature		
CLA 224	The Heroic Journey	3
CLA 246	Ancient Rhetorical Theory	3
CLA 310	Survey of Ancient Greek Literature and Culture	3
CLA 311	Survey of Classical Latin Literature and Culture	3
CLA 315	The Classical Epic Tradition	3
CLA 322	Monsters and Fantastical Creatures in Western Antiquity and Other Cultures	3
CLA 340	Greek Tragedy	3
CLA 360	Women In Greek And Roman Antiquity	3
People & Society		
CLA 221	Sports & Society In The Ancient World	3
CLA 222	Sexuality and Gender in the Ancient World	3
CLA 232	Topics in Ancient Law, Scandalous Trails from the Ancient Legal World	3
CLA 233	Ancient Medicine	3

CLA 241	Greek Civilization	3
CLA 242	Roman Civilization	3
CLA 301	Ancient Greece	3
CLA 302	The Hellenistic Age	3
CLA 303	The Roman Republic	3
CLA 304	The Roman Empire	3
CLA 323	The Ancient World on Screen	3
CLA 325	The Vampire in Folklore, Fiction, and Film	3
CLA 370	Self and Other in the Ancient World	3

Departmental Honors

A student may earn Honors in Classics by completing a 'capstone' project with a grade of B or higher. This project can be the senior thesis (CLA 495 and 496; 6 credits) or an Independent Study course (LAT 491, GRE 491, or CLA 491; 3 credits) that includes a substantial research paper.

Either project must be supervised by a faculty member in the Classics Department. In order to qualify for a 'capstone' project, the student must have by the end of the junior year a minimum GPA of 3.5 in the Classics major and 3.3 overall.

In addition, Classics Majors, Classics Minors, and other students who meet certain academic criteria are eligible for membership in Eta Sigma Phi, the National Honors Society for Classics.

Majors

Majors in Classics

B.A. in Classics with Tracks in:

- Greek (p. 81)
- Latin (p. 81)
- Latin and Greek (p. 81)
- Classical Civilization (p. 81)

Minors

Minor in Classics

- Classics (p. 81)

B.A. in Classics - Classical Civilization Track

Select one of the following Options:	9
Option 1:	
LAT 101 Elementary Latin I	
LAT 102 Elementary Latin II	
LAT 201 Intermediate Latin I	
Option 2:	
GRE 101 Elementary Ancient Greek I	
GRE 102 Elementary Ancient Greek II	
GRE 201 Intermediate Ancient Greek I	
Select one additional course (202 and above) in either Latin (LAT) or Greek (GRE)	3
Select six Classics-in-translation (CLA) courses	18
Total Credit Hours	30

B.A. in Classics - Greek Track

GRE 101 Elementary Ancient Greek I	3
GRE 102 Elementary Ancient Greek II	3
GRE 201 Intermediate Ancient Greek I	3
Select five additional courses in Greek (GRE 202 and above)	15
Select two Classics-in-translation (CLA) courses	6
Total Credit Hours	30

B.A. in Classics - Latin Track

LAT 101 Elementary Latin I	3
LAT 102 Elementary Latin II	3
LAT 201 Intermediate Latin I	3
Select five additional courses in Latin (LAT 202 and above)	15
Select two Classics-in-translation (CLA) courses	6
Total Credit Hours	30

B.A. in Classics - Latin and Greek Track

LAT 101 Elementary Latin I	3
LAT 102 Elementary Latin II	3
LAT 201 Intermediate Latin I	3
GRE 101 Elementary Ancient Greek I	3
GRE 102 Elementary Ancient Greek II	3
GRE 201 Intermediate Ancient Greek I	3
Select two additional courses in Latin (LAT 202 and above)	6
Select two additional courses in Greek (GRE 202 and above)	6
Select two Classics-in-translation (CLA) courses	6
Total Credit Hours	36

Minor in Classics

Courses that qualify for the minor in Classics are taught each semester. A grade of C-minus or better is required in each course taken for the minor, as well as an overall GPA of 2.0 or higher.

Select one of the following:	3
3 credit hours in a Greek (GRE) course	
3 credit hours in a Latin (LAT) course	
Select 12 credit hours in Greek (GRE), Latin (LAT), or Classics-in-translation (CLA) courses in any combination desired	12
Total Credit Hours	15

Computer Science

<http://www.cs.miami.edu>

Dep't Code: CSC

Introduction

The Department of Computer Science offers undergraduate and graduate education in Computer Science, and performs research in various areas of Computer Science. The Department has faculty with strong accomplishments in the fields of algorithm engineering, automated

reasoning, bioinformatics, computational complexity, computational geometry & computer graphics, cryptography & network security, data mining, molecular computation, multimedia systems, music information retrieval, robotics, scientific computing, semantic web, and wireless & mobile computing.

Educational Objectives

The Department of Computer Science educates students in the science of software development: the analysis of domain problems, the development of algorithms and programs, the use of specialist computing techniques, the system-software and hardware platforms, and the production and deployment of efficient and robust computer software. Instruction ranges from introductory programming classes and laboratories, through to research in various areas of computer science.

Degree Programs

The Department of Computer Science offers

- a Bachelor of Science (BS) major
- a Bachelor of Arts (BA) major
- a 5-year Bachelor of Science + Master of Science (BS+MS)
- a minor

Computer Science as a Second Major

A second major in Computer Science is available to all students. A second major in Computer Science requires completion of the requirements of either the Bachelor of Science version or the Bachelor of Arts version.

Writing within the Discipline

To satisfy the College of Arts and Sciences writing requirement in the discipline, students whose first major is Computer Science must take at least one of the following courses for a writing credit: CSC 431, CSC 405, ENG 233.

Departmental Honors

In addition to the University's requirements for Departmental Honors, Departmental Honors in Computer Science requires completing a major and 6 additional approved credit hours (all CSC 4XX and CSC 5XX courses are approved). The major or additional credit hours must include at least 3 credit hours from CSC 410 and CSC 411.

Notes

- A grade of C- or better in all CSC courses is required in a major or minor.
- An overall GPA of 2.5 or better in all CSC courses is required in a major or minor. This GPA is computed using only courses from this department. If a course is repeated only the highest grade for the course is used.
- For a Computer Science major, at least 15 credit hours of CSC courses must be completed at the University of Miami.
- For a Computer Science minor, at least 9 credit hours of CSC courses must be completed at the University of Miami.

Majors

Majors in Computer Science

- B.S. in Computer Science (p. 82)
- B.A. in Computer Science (p. 83)
- Second Major in Computer Science (p. 84)

Minors

Minor in Computer Science

- Computer Science (p. 84)

Joint

Joint Degrees in Computer Science

- Five-Year B.S. + M.S. in Computer Science (p. 84)

Bachelor of Science in Computer Science

Students must complete the *Core*, a *Track*, and the *Science & Ethics* requirements.

Core Computer Science Courses		
CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures And Algorithm Analysis	3
CSC 322	System Programming	3
CSC 427	Theory Of Computing	3
CSC 431	Introduction To Software Engineering	3
Core Mathematics Courses		
MTH 161	Calculus I (or equivalent - MTH 140 and MTH 141, MTH 151, or MTH 171)	4
MTH 162	Calculus II (or equivalent - MTH 172)	4
MTH 210	Introduction to Linear Algebra	3
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3
Tracks		
Select one of the following Tracks:		17
Comprehensive Track: ^{1,2}		
CSC 419	Programming Languages	
CSC 421	Principles Of Computer Operating Systems	
CSC 423	Database Systems	
CSC 424	Computer Networks	
Select a minimum of 5 credit hours of approved electives		
Flexible Track: ¹		
Select a minimum of 17 credit hours of approved electives		
Computational Science Track: ³		
CSC 210	Computing for Scientists	
CSC 528	Introduction to Parallel Computing	
CSC 547	Computational Geometry	
CSC 548	Bioinformatics Algorithms	
CSC 410	Computer Science Project Planning	
or CSC 411	Computer Science Project Implementation	
MTH 320	Introduction to Numerical Analysis	
or MTH 520	Numerical Linear Algebra	

BIL 150	General Biology ⁴
or BIL 151	General Biology Laboratory
Cryptography and Security Track: ³	
CSC 421	Principles Of Computer Operating Systems
CSC 424	Computer Networks
CSC 507	Data Security and Cryptography
CSC 410	Computer Science Project Planning
or CSC 411	Computer Science Project Implementation
Select one of the following:	
MTH 461	Survey Of Modern Algebra
MTH 505	Theory of Numbers
MTH 561	Abstract Algebra I
Select a minimum of 2 credit hours of approved electives	
Graphics and Games Track: ³	
CSC 329	Introduction to Game Programming
CSC 529	Introduction to Computer Graphics
CSC 545	Introduction to Artificial Intelligence
CSC 410	Computer Science Project Planning
or CSC 411	Computer Science Project Implementation
Select a minimum of 5 credit hours of approved electives ⁵	
PHY 101	College Physics I ⁶
or PHY 205	University Physics I
Science & Ethics Requirement	
An approved two semester sequence of courses with laboratory ⁷	
PHI 115	Social and Ethical Issues in Computing
Approved Electives	
Any CSC 2XX, CSC 3XX, CSC 4XX, CSC 5XX ⁸	
BTE 360	Systems Analysis and Design
BTE 465	Web Application Development
ECE 414	Computer Organization and Design
ECE 514	Computer Architecture
ECE 537	Principles of Artificial Intelligence
ECE 548	Machine Learning
ECE 553	Neural Networks
ECE 572	Object-Oriented and Distributed Database Management Systems
ECE 574	Agent Technology
ECE 577	Data Mining
MTH 320	Introduction to Numerical Analysis
MTH 505	Theory of Numbers
MTH 520	Numerical Linear Algebra
MTH 521	Numerical Methods In Differential Equations
MTH 524	Introduction to Probability Theory
MTH 525	Introduction to Mathematical Statistics
Total Credit Hours	57

¹ Available to all students.

² The Comprehensive Track provides coverage of the topics in Computer Science prescribed by the Association of Computing Machinery curriculum and the ABET Computing Accreditation Commission.

³ Requires permission of the Director of Undergraduate Studies.

⁴ The courses used to meet the Science requirement must include BIL 150 and BIL 151.

⁵ In addition to the generally approved electives, MMI 504 and MMI 505 are approved for the Graphics and Games track.

⁶ The courses used to meet the Science requirement must include either PHY 101 or PHY 205.

⁷ Courses may be taken in Biology, Chemistry, or Physics..

⁸ Maximally 6 credit hours from CSC 40X Computer Science Practicum, and maximally 6 credit hours from CSC 481.

Bachelor of Arts in Computer Science

Students must complete the *Core* and *Electives*.

Core Computer Science Courses		
CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 322	System Programming	3
CSC 431	Introduction To Software Engineering	3
Core Mathematics Courses		
MTH 161	Calculus I (or equivalent - MTH 140 and MTH 141, MTH 151, or MTH 171)	4
MTH 309	Discrete Mathematics I	3
Electives		
Select 9 approved credit hours of the following:		9
Any CSC 2XX, CSC 3XX, CSC 4XX, CSC 5XX		
CSC 119	Computers and Society	
or BTE 320	Introduction to Programming	
or BTE 410	Information Systems and Technology	
or JMM 341	Web Design	
or GEG 199	Introduction to GIS (Geographic Information Systems)	
or MSC 321	Scientific Programming in the Atmospheric Sciences	
BIL 552	Bioinformatics Tools	
BTE 360	Systems Analysis and Design	
BTE 423	Database Management Systems	
BTE 430	Business Networks	
BTE 465	Web Application Development	
ECE 368	Internet Computing I	
ECE 414	Computer Organization and Design	
ECE 514	Computer Architecture	
ECE 537	Principles of Artificial Intelligence	
ECE 548	Machine Learning	
ECE 553	Neural Networks	
ECE 570	Network Client-Server Programming	
ECE 572	Object-Oriented and Distributed Database Management Systems	
ECE 574	Agent Technology	

ECE 576	Internet and Intranet Security	
ECE 577	Data Mining	
ECE 579	Mobile Computing	
MTH 320	Introduction to Numerical Analysis	
MTH 505	Theory of Numbers	
MTH 520	Numerical Linear Algebra	
MTH 521	Numerical Methods In Differential Equations	
MTH 524	Introduction to Probability Theory	
MTH 525	Introduction to Mathematical Statistics	
MMI 505	Current Trends In Music Engineering I (for Music Engineering students only)	
Total Credit Hours		33

Computer Science as a Second Major

A second major in Computer Science is available to all students. A second major in Computer Science requires completion of the requirements of a Computer Science major, either the Second Major in Computer Science, Fundamentals (p. 83) or the Second Major in Computer Science, with Tracks (p. 82).

Five-Year B.S. + M.S. in Computer Science

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students must complete the requirements for a Bachelor of Science in Computer Science, and the requirements for a 30 credit hour Master of Science in Computer Science (p. 395) with thesis. No credit hours may be counted towards both requirements.

Students enter the "MS-phase" of the program when they have met the following requirements:

- They have achieved senior status, i.e., earned 89 credit hours towards their Bachelor of Science in Computer Science.
- Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e.:

CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures And Algorithm Analysis	3
CSC 427	Theory Of Computing	3
MTH 161	Calculus I	4
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3

- They have completed 3 credit hours of CSC 410/CSC 411 in a research-oriented project.
- They have a GPA of at least 3.0 in the CSC courses taken towards their BS in Computer Science.

- They have advised the Director of Graduate Studies of their eligibility for the MS-phase.

Students in the MS-phase must complete 3 further credit hours of CSC 410/CSC 411 in a research-oriented project, as part of their Bachelor of Science in Computer Science (this project will normally be the starting point for the Master of Science research). Students in the MS-phase may take 600 level courses that count towards completing the requirements for the Master of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree. Students in the MS-phase must submit their GRE scores before they are admitted to graduate student status.

Incoming students can be admitted to the program if their mathematics placement is MTH 108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time they have achieved senior status. If a student is removed or decides to withdraw from the program, any 600 level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

Minor in Computer Science

A minor in Computer Science requires completion of the following:

Core Courses		
CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
Electives		
CSC 3XX	Any 300-level Computer Science course	3
Select 6 approved credit hours of the following:		6
Any CSC 2XX, CSC 3XX, CSC 4XX, CSC 5XX		
CSC 119	Computers and Society	
or BTE 320 Introduction to Programming		
or BTE 410 Information Systems and Technology		
or JMM 341Web Design		
or GEG 199 Introduction to GIS (Geographic Information Systems)		
or MSC 321 Scientific Programming in the Atmospheric Sciences		
BIL 552	Bioinformatics Tools	
BTE 360	Systems Analysis and Design	
BTE 423	Database Management Systems	
BTE 430	Business Networks	
BTE 465	Web Application Development	
Total Credit Hours		17

Criminology

<http://www.as.miami.edu/sociology>

Introduction

The major in Criminology provides a comprehensive understanding of crime and the criminal justice system. The major prepares students to assume roles of leadership in this critical area of modern society.

Courses are designed to review theory, research, and applications of knowledge regarding delinquency and crime, as well as to understand the manner in which offenders are processed. Students learn about the nature and extent of crime, different types of crime, and theories to explain crime. In addition, detailed analyses are made of the functions of the law, police, courts, and correctional systems and the ways in which these are linked to broader aspects of society. Students may also minor in Criminology. The Criminology major and minor are administered through the Department of Sociology.

Educational Objectives

CRIMINOLOGY courses have several broad objectives, including:

1. General education and development of critical thinking skills.
2. Undergraduate preparation for pursuing careers in such fields as law and society, in the local and state criminal justice systems (e.g., juvenile probation officer, pretrial services officer, crime analyst for criminal justice agencies), or in federal agencies (e.g., DEA).
3. Preparation for graduate study in criminology, criminal justice, sociology, or other social and behavioral sciences.
4. Preparation for law school.

Degree Programs

Students may earn a Bachelor of Arts degree in Criminology. The Department of Sociology also offers graduate degrees in Sociology (M.A., Ph.D.) with emphases in criminology and in other areas (race/ethnic relations and medical sociology).

Departmental Honors

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Criminology. They must also achieve a minimum of B in all Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.
2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee in the Department of Sociology. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499. The student should have the same professor for all six credit hours.
3. Recruitment of eligible students is by departmental invitation during a student's junior year.

Advanced Writing and Communication Requirements

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, all Criminology majors must take 4 writing-designated courses, including 1 writing-designated course in the SOC area. Writing courses are regularly offered within the department; however, it is the student's responsibility to plan accordingly

to incorporate a designated SOC writing-designated course into their graduation plans.

Alpha Phi Sigma

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Alpha Phi Sigma, the National Criminal Justice Honor Society. Alpha Phi Sigma sponsors events that enhance the academic and social life of the department.

Majors

Major in Criminology

- B.A. in Criminology (p. 85)
- Criminology & Sociology Double Major; Combined Minor (p. 132)

Minors

Minor in Criminology

- Criminology (p. 85)
- Criminology & Sociology Double Major; Combined Minor (p. 132)

B.A. in Criminology

The major in Criminology consists of 31 credit hours, including:

Required Courses		
SOC 101	Introduction to Sociology	3
SOC 210	Introduction to Social Research ¹	3
SOC 211	Quantitative Methods for Sociologists ²	3
SOC 212	Quantitative Methods Lab	1
SOC 371	Criminology	3
SOC 470	Theories of Deviant Behavior	3
SOC 271	Criminal Justice	3
or SOC 370	Juvenile Delinquency	
Elective Courses		
Select four other courses offered by the Department		12
Total Credit Hours		31

¹ EPS 452 can be substituted for SOC 210 only by students who are also enrolled in the School of Education.

² PSY 291 can be substituted for SOC 211 only by students who are also majoring or minoring in Psychology. SOC 212 remains a requirement.

Other Requirements

- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of **16 credit hours must be earned in residency** in the Department; thus, only a maximum of **15 credit hours** can be transferred from other institutions as eligible for the CRIMINOLOGY major.

Minor in Criminology

A minor in Criminology requires a minimum of 15 credit hours, including:

Required Courses		
SOC 101	Introduction to Sociology	3
SOC 371	Criminology	3
Elective Courses		
Select three other courses offered by the Department, of which one must be 300-level or higher		9
Total Credit Hours		15

Other Requirements

- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of 9 credit hours must be earned in residency in the Department; thus, only a maximum of 6 credit hours may be transferred from other institutions as eligible credit hours for the Criminology major.

Economics

Introduction and Educational Objectives

Economics uses the idea of optimizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies. It is particularly recommended for students planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

Degree Programs

A student pursuing the Economics major through the College of Arts and Sciences must meet the degree requirements set forth in this Academic Bulletin (p. 62). Additionally, a student pursuing the Economics major will select one of two possible tracks: Political Economy (the People and Society track) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering track).

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Economics may be the major area of specialization of a candidate for the Master of Arts (p. 429) and Doctor of Philosophy (p. 420) degrees. Consult the Graduate Academic Programs section of the Bulletin for the general requirements of these programs.

Majors

Major in Economics

- Economics (p. 86)

Minors

Minor in Economics

- Economics (p. 87)

Major in Economics

A student pursuing the major in Economics through the College of Arts and Sciences will select one of two possible tracks: Political Economy

(the People and Society track) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering track).

Economics Major, Political Economy Track (P&S)

The **Political Economy** track consists of a minimum of 24 credit hours of Economics courses according to the following:

Core Courses		
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
Required Courses		
ECO 300	Microeconomic Theory And Applications ^{1,2}	3
or ECO 302	Micro Economic Theory	
ECO 303	Macro Economic Theory ³	3
Elective Courses		
Select two, three, or four courses (6-12 credit hours) from the following:		6-12
ECO 307	Public Finance and Fiscal Policy	
ECO 311	Labor Economics (I)	
ECO 345	Environmental Economics	
ECO 351	Economics of Developing Countries	
ECO 371	Latin America And The Global Economy	
ECO 379	ECONOMICS OF POVERTY	
ECO 386	Health Economics	
ECO 403	Contemporary Issues in Monetary Economics	
ECO 420	Economic Growth	
ECO 441	International Trade Theory	
ECO 442	International Monetary Economics	
ECO 460	Industrial Organization	
ECO 499	Special Topics (Energy Economics; Global Economics:Trade and Financial Flows; Global Economics, Energy, and Commodity Markets; Managerial Economics; The Economics of China)	
ECO 521	Graduate Macroeconomic Theory	
ECO 532	History of Economic Thought	
Students who have completed ECO 302 may select a maximum of two electives (0-6 credit hours) from the following:		0-6
ECO 430	Applied Econometrics	
ECO 444	Game Theory in Economic Applications.	
ECO 510	Mathematical Economics And Applications ⁴	
ECO 512	Mathematical Economics (II)	
ECO 520	Econometrics	
ECO 533	Advanced Microeconomic Theory	
Additional options in this category include ECO 499 (Special topics: Forecasting or Special Topics: Information Economics)		
Total Credit Hours		24

¹ All advanced courses in Economics (300-500 levels) require ECO 300 or the more technical version, ECO 302, as a pre-requisite.

² Additional pre-requisite for ECO 300: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher

Additional pre-requisite for ECO 302: MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher

³ Additional pre-requisite for ECO 303: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher

⁴ Additional pre-requisite for ECO 510: MAS 202 or MAS 311 or IEN 311 or MTH 224

Note: All specific coursework for the major in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

Economics Major, Quantitative Economics Track (STEM)

The **Quantitative Economics** track consists of a minimum of 24 credit hours of Economics courses according to the following:

Core Courses		
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
Required Courses		
ECO 302	Micro Economic Theory ^{1, 2}	3
ECO 303	Macro Economic Theory ²	3
Elective Courses		
Select four courses (12 credit hours) from the following:		12
ECO 430	Applied Econometrics	
ECO 444	Game Theory in Economic Applications.	
ECO 499	Special Topics (Information Economics or Forecasting only)	
ECO 510	Mathematical Economics And Applications ³	
ECO 512	Mathematical Economics (II)	
ECO 520	Econometrics	
ECO 533	Advanced Microeconomic Theory	
Total Credit Hours		24

¹ All advanced courses in Economics (300-500 levels) require ECO 302 as a pre-requisite.

² Additional pre-requisite for ECO 302 and for ECO 303: MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher

³ Additional pre-requisite for ECO 510: MAS 202 or MAS 311 or IEN 311 or MTH 224

Note: All specific coursework for the major in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

Minor in Economics

Arts and Sciences students may minor in economics. (p. 164)

Ecosystem Science and Policy

<http://www.cesp.miami.edu>

Dept. Code: ECS

Introduction

The undergraduate program in Ecosystem Science and Policy (ECS) is offered by the Leonard and Jayne Abess Center for Ecosystem Science and Policy. The goal of the program is to educate the next generation of environmental leaders. The ECS program provides students with a broad background in environmental issues from a variety of perspectives, along with in-depth education in an area of specialization.

Educational Objectives

The ECS major offers a series of problem-based learning courses, culminating in a capstone course in the senior year. Courses emphasize integration of science and policy approaches to real-world environmental issues. This preparation gives students both the theoretical background and technical skills to pursue environmental careers in, teaching and research, as well as for careers in government and private industries concerned with the environment.

Degree Programs

The Ecosystem Science and Policy program offers two undergraduate degree major programs: a Bachelor of Science (B.S.) and a Bachelor of Arts (B.A.). The minor consists of 15 credit hours. Majors are required to complete either an environmentally related internship or a research project with the Center for Ecosystem Science and Policy or with other UM faculty.

Only those courses passed with a grade of "C-" or better in the ECS core may be applied to the major or minor. All ECS majors are required to maintain an overall cumulative grade point average of 2.5 or better.

Majors

Majors in Ecosystem Science and Policy

- B.S. in Ecosystem Science and Policy (p. 89)
- B.A. in Ecosystem Science and Policy (p. 87)

Minors

Minor in Ecosystem Science and Policy

- Ecosystem Science and Policy (p. 92)

Certificates

Certificate in Ecosystem Science and Policy

- Sustainability (p. 90)

B.A. in Ecosystem Science and Policy

The B.A. degree in Ecosystem Science and Policy is recommended in preparation for careers in law, government and business, including professional schools and careers in government and private industries concerned with the environment. Students pursuing the B.A. may choose to have the major fulfill either the STEM or People & Society cognate; they will need to complete the other cognate plus the Arts & Humanities cognate. Students with a second major in another school or college

should consult their advisors regarding requirements for that major. Any course used to fulfill one ECS requirement cannot be used to fulfill another; however, courses other than the ECS core can be used to fulfill requirements for a cognate, minor, or second major. Students whose primary college is Arts & Sciences are required to complete four courses designated as "Writing Intensive" (also known as "W") courses. Those seeking a B.A. degree in ECS must complete at least two, but as many as four, ECS courses designated as "W". These include ECS 113, ECS 301, ECS 302, ECS 402, and ECS 403. Up to two "W" courses may be selected from other departments. Students whose primary degree is in another school or college should follow its writing requirements.

ECS Core Courses		
ECS 111	Introduction to the Earth's Ecosystem	3
ECS 112	Field Problems in Ecosystem Science and Policy	2
ECS 113	Introduction to Environmental Policy	3
ECS 201	Seminar Series in Contemporary Environmental Issues I	1
or ECS 202	Seminar Series in Contemporary Environmental Issues II	1
ECS 232	Ecological Principles and Environmental Applications	3
ECS 301	Tools for Environmental Decision-Making: The Quantitative Perspective	3
ECS 302	Perspectives on Environmental Decision Making	3
ECS 401	Internship	3

MAF 502	Economics of Natural Resources	
MAF 510	Environmental Planning and the Environmental Impact Statement	
MAF 518	Coastal Zone Management	
POL 314	Legislative Processes	
SOC 210	Introduction to Social Research	
Total Credit Hours		54-57

¹ Additional courses may be approved by the ECS program.

² APY, ARC, ECO, ECS, GEG, HIS, INS, LAS, MAF, POL, SOC

B.S. in Ecosystem Science and Policy

The B.S. degree in Ecosystem Science and Policy is recommended for students intending to attend graduate or professional schools in pursuit of research or academic careers (including secondary or higher education). It is also suitable for those preparing for technical careers in government and private industries concerned with the environment. Students pursuing the B.S. may choose to have the major fulfill either the STEM or People & Society cognate; they will need to complete the other cognate plus the Arts & Humanities cognate. Students with a second major in another school or college should consult their advisors regarding requirements for that major and school or college. Any course used to fulfill one ECS requirement cannot be used to fulfill another; however, courses other than the ECS core can be used to fulfill requirements for a cognate, minor, or second major. Students whose primary college is Arts & Sciences are required to complete four courses designated as "Writing Intensive" (also known as "W") courses. Those seeking a B.S. degree in ECS must complete at least two, but as many as four, ECS courses designated as "W". These include ECS 113, 301, 302, 402, and 403. Up to two "W" courses may be selected from other departments. Students whose primary degree is in another school or college should follow its writing requirements.

ECS Core Courses		
ECS 111	Introduction to the Earth's Ecosystem	3
ECS 112	Field Problems in Ecosystem Science and Policy	2
ECS 113	Introduction to Environmental Policy	3
ECS 201	Seminar Series in Contemporary Environmental Issues I	1
or ECS 202	Seminar Series in Contemporary Environmental Issues II	
ECS 232	Ecological Principles and Environmental Applications	3
or BIL 330	Ecology	
ECS 301	Tools for Environmental Decision-Making: The Quantitative Perspective	3
ECS 302	Perspectives on Environmental Decision Making	3
ECS 401	Internship	3
or ECS 402	Thesis	
ECS 403	Interdisciplinary Approaches	3
ECS electives at the 300 level or higher		6
In addition, students must take the following courses, which may fulfill cognate or second major requirements:		
Science Core Courses		
A science course at the 110 level or above with lab (BIL, GSC, MSC, PHY)		4
CHM 111 & CHM 113	Principles of Chemistry I and Chemistry Laboratory I	4
CHM 112 & CHM 114	Principles of Chemistry II and Chemistry Laboratory II	4
CAE 240	Environmental Pollution	3
or CAE 340	Introduction to Environmental Engineering	
Complete one of the following ECS science tracks:		9-15
Environmental Chemistry Track: ¹		

Select three of the following (must include 2 labs):		
CHM 201	Organic Chemistry I (Lecture) & CHM 205 and Organic Chemistry Laboratory I	
CHM 202	Organic Chemistry II (Lecture) & CHM 206 and Organic Chemistry Laboratory II	
CHM 360	Physical Chemistry I (Lecture) & CHM 364 and Physical Chemistry (Laboratory I)	
CHM 365	Physical Chemistry II (Lecture) & CHM 464 and Physical Chemistry (Laboratory II)	
CHM 401	Environmental Chemistry	
Environmental Health Track: ²		
Select three of the following:		
CHM 201	Organic Chemistry I (Lecture) & CHM 205 and Organic Chemistry Laboratory I	
MIC 301	Introduction to Microbiology and Immunology	
MIC 322	Medical Parasitology	
Geology Track: ³		
GSC 260	Earth Materials	
Select two of the following:		
GSC 360	Depositional and Diagenetic Systems	
GSC 380	Paleontology and Stratigraphy	
GSC 410	Environmental Geochemistry	
GSC 420	Geophysics	
GSC 480	Structural Geology	
GSC 550	Hydrogeology	
Geospatial Certificate Track: ⁴		
GEG 199	Introduction to GIS (Geographic Information Systems)	
GEG 391	Intermediate GIS (Geographic Information Systems)	
GEG 392	Remote Sensing of the Environment	
Select two of the following:		
GEG 491	GIS and Environmental Modeling	
GEG 545	Special Topics (Web-GIS)	
GEG 545	Special Topics (Advanced SAR Techniques and Applications)	
GEG 545	Special Topics (GIS in Public Health)	
Mathematics Track: ⁵		
MTH 359	Mathematical Models in Biology and Medicine	
Select two of the following:		
MTH 210	Introduction to Linear Algebra	
MTH 310	Multivariable Calculus	
MTH 311	Introduction to Ordinary Differential Equations	
Mathematics Courses		
Select one of the following:		5-8
MTH 151	Calculus I for Engineers & MTH 162 and Calculus II	
MTH 161	Calculus I & MTH 162 and Calculus II	
MTH 171	Calculus I & MTH 172 and Calculus II	
Select one of the following Statistics courses:		3

ECS 204	Environmental Statistics	
MSC 204	Environmental Statistics	
BIL 311	Biostatistics	
MTH 224	Introduction to Probability and Statistics	
PSY 292	Introduction To Biobehavioral Statistics For Non-Majors	
Social Science Core Courses		
Select one of the following Economics/Political Science courses for BS:		3
ECS 377	Topics in Environmental Economics and Development	
ECO 211	Economic Principles and Problems	
ECO 212	Economic Principles and Problems	
INS 102	Global Economics	
INS 421	Poverty and the Environment	
MSC 345	Economics of Natural Resources and the Environment	
POL 201	Introduction to American National Government	
POL 202	Introduction To Comparative Politics	
POL 203	Introduction to International Relations	
Select one of the following ECS social science skills courses for BS: ⁶		3
BSL 212	Introduction to Business Law	
BSL/MSC 314	Ocean Law	
STC 114	Principles of Advertising	
JMM 106	Visual Design	
JMM 341	Web Design	
ECS 376	Topics in Environmental Communication	
ECS 377	Topics in Environmental Economics and Development	
EPS 321	Understanding Human Service Organizations	
FIN 300	Fundamentals of Finance for Non-Finance Majors	
FIN 302	Fundamentals of Finance	
GEG 120	Physical Geography	
GEG 199	Introduction to GIS (Geographic Information Systems)	
INS 503	Int Relations Topics (e.g., Role of Foreign Aid in International Development)	
LAS 502	Research Design in Latin American Studies	
MGT 303	Operations Management	
MGT 353	Introduction to Entrepreneurship	
MKT 201	Foundations of Marketing	
PHI 110	Critical Thinking	
PHI 215	Logic and Law	
POL 314	Legislative Processes	
POL 342	State and Local Government and Politics	
POL 353	Interest Groups and Lobbying	
POL 524	Non-Profit Organizations: Law, Policy, and Management	

SOC 210	Introduction to Social Research	
Total Credit Hours		68-77

- ¹ Note: CHM 111/CHM 113, CHM 112/CHM 114 must be taken before the Chemistry concentration. Fulfillment of the Chemistry concentration earns a Chemistry minor.
- ² Note: BIL 150/BIL 151, BIL 160/BIL 161 and CHM 121, CHM 221, CHM 222 should be taken before the Environmental Health concentration.
- ³ Note: GSC 110/GSC 114 and GSC 111 should be taken before the Geology concentration. This plus the Geology concentration earns a minor in Geological Sciences.
- ⁴ Note: Fulfillment of the Geospatial Certificate PLUS GEG 110 earns a geography minor. This minor does NOT qualify for an Arts and Sciences B.S.; students completing the geospatial certificate concentration must complete an additional minor in one of the following for an Arts and Sciences B.S.: Biology, Chemistry, Computer Science, Geology, Marine Science, Mathematics, Physics.
- ⁵ Note: Calculus II must be taken before the Mathematics concentration. Fulfillment of the Mathematics concentration earns Mathematics minor.
- ⁶ Note: ECS B.S. majors without a second major must take a GIS course, e.g., GEG 199.

Certificate in Sustainability

The certificate program is intended to equip students with knowledge and skills for implementing positive change through environmentally responsible practices in various fields; to serve as a curricular adjunct to sustainable initiatives at UM; to foster a culture of conservation at the University; to enhance students' preparation for a variety of careers, including engineering, architecture, business, marketing, government, and more; and to affirm UM's commitment to sustainability and complement its efforts to enhance environmental education.

To obtain the sustainability certificate, students will complete the People & Society cognate "Global Sustainability: Living on a Finite Planet." (For details on the cognate, see below or use the cognate search engine at: https://canelink.miami.edu/psc/PUMIAJ/EMPLOYEE/HRMS/c/UMSR266_MENU.UMSR266_COGNSRCH.GBL)

The Global Sustainability cognate will earn students 9 of the 18 credit hours needed for the Sustainability Certificate.

In addition, students will take 9 more credit hours from courses included in the cognate or from a list of approved courses (see below). Students may take the additional 9 credit hours to align with their major or minor, or individual interests (e.g., energy, green buildings, natural resource management). Note that some courses on the list may require one or more prerequisites. It is the responsibility of students to obtain any permissions for waivers of prerequisites from the appropriate parties in a given School or College. Courses not on the list below may be substituted; students should obtain permission for substitutions in advance from the director or assistant director of ECS.

Students must be enrolled full time and all courses for the Certificate must be passed with no lower than a "C" grade. Students who successfully complete the program will receive a notation on their transcripts that they have received the Sustainability Certificate.

Cognate: Global Sustainability: Living on a Finite Planet

Area of Knowledge: People and Society

Responsible Academic Unit: MSC Marine & Atmospheric Science

This cluster consists of three linked groups. Group one introduces human impacts on the natural world. Group two discusses environmental politics and policies. Group three considers societal implications of living on a finite planet.

Select exactly three of the following option groups:	
Option Group: Human Impacts on Natural World	
Select exactly one course from the following:	
ECS 111	Introduction to the Earth's Ecosystem 3
GSC 103	Evolution of the Modern Earth's Environment
MSC 220	Climate and Global Change
Option Group: Environmental Politics & Policy	
Select exactly one course from the following:	
ECS 113	Introduction to Environmental Policy 3
ECS 372	Special Topics in Ecosystem Science and Policy
GEG 371	Environmental Geography: Current Issues
POL 322	Environmental Politics and Policy
MSC 340	Ocean Policy
MSC 313	Coastal Law
MSC 346	Climate Science and Policy
Option Group: Social Implications	
Select exactly one course from the following:	
ARC 223	Architecture and the Environment 3
INS 322	Economics of Development and the Environment
INS 421	Poverty and the Environment
ECO 345	Environmental Economics
MSC 345	Economics of Natural Resources and the Environment
ECS 310	Sustainable Living
GEG 311	Drinking Water: Past, Present, And Future
GEG 341	Geography of Population and Development
Total Credit Hours	9

Prerequisite Courses

- GEG 371 has a prerequisite of 1 course in physical geography or ecology, or permission of instructor; the ecology requirement should be filled by most of the courses in option group 1
- POL 322 has a prerequisite of POL 201 or POL 202; it is only offered in Summer
- MSC 340 has a prerequisite of MSC 111
- ARC 223 has a prerequisite of ARC 102 and ARC 122
- INS 322 has a prerequisite of INS 102 or ECO 211 and ECO 212, or permission of instructor
- INS 421 has a prerequisite of INS 102 or permission of instructor
- ECO 345 has a prerequisite of ECO 211 and ECO 302
- MSC 345 has a prerequisite of ECO 211

- GEG 341 has a prerequisite of any 100 level GEG course.

Additional Courses

In addition to completing the "Global Sustainability" cognate, students must take at least 9 more credit hours to earn the sustainability certificate. Any courses within the "Global Sustainability" cognate not being used to satisfy the cognate may count for the certificate. Students may also choose courses from the list below. The list includes courses specific to various areas of study (e.g., engineering) that may require one or more prerequisites. Please see the relevant School/Department descriptions in this Bulletin for further details.

Education

Degree in Teacher Education for Elementary and Secondary Schools

The School of Education in conjunction with the College of Arts and Sciences and the School of Music offers a degree program in teacher education. Students majoring in Elementary may choose to earn their degree through the School of Education or the College of Arts and Sciences.

The program in Secondary Education enables a student to teach in a secondary school in the areas of English, Mathematics, Biology, Economics, Geography, History, International Studies or Political Science. Students wishing to earn certification in Secondary Education must complete a Bachelor of Arts or a Bachelor of Science degree in the College of Arts and Sciences with a major in Secondary Education.¹

¹ For specific information regarding required coursework, field experiences, and State requirements, please see an academic advisor in the School of Education.

Other

All education programs are approved by the State of Florida Department of Education. For specific information regarding required coursework, please see an education advisor.

Minors

Minor in Education

- Traditional Education (p. 92)

Certificates

Certificate in Education

- Professional Training Option (p. 92)

Minor in Traditional Education

The requirements for a minor in education consist of 15 credit hours passed with a C or higher, with an overall GPA of 2.5 in courses selected from the list of acceptable TAL departmental courses. A minimum of six credit hours must be numbered 300 or higher. This minor does not lead to teaching credentials.

Professional Training Option Certificate

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional component, one of the requirements to become a certified teacher in the State of Florida.

The PTO minor ranges from 17-18 credit hours. Upon completion of the program participants will receive a Certificate of Completion. UM transcripts will indicate that the student has completed a Florida State approved PTO program. Program completers will be eligible to apply for a Temporary Teaching Certificate in the State of Florida.

PTO Minor Courses

TAL 101	Social and Technological Foundations of Education.	3
---------	--	---

TAL 103	Psychological Foundations of Education	3
TAL 404	Content Area Literacy in the Secondary Classroom	3
TAL 305	Classroom and Behavior Management	3

Select one of the following (appropriate for the subject area):		1-3
TAL 506	Issues and Strategies for ESOL	
TAL 524	Education and the Arts	
TAL 541	Instruction in Secondary English.	
TAL 542	Instruction In Secondary Mathematics	
TAL 543	Instruction In Secondary Science	
TAL 544	Instruction In Secondary Social Studies	
Total Credit Hours		16-18

affords them a knowledge of our literary heritage in all of its historical and cultural dimensions.

Degree Programs

The major in English leads to the degree of Bachelor of Arts.

Major in English

Students majoring in English must earn 30 credit hours in English courses (36 credit hours for Departmental Honors) and must meet the requirements for one of the tracks described below:

- The English Literature Major (p. 94),
- The Creative Writing Concentration (p. 95),
- The Concentration in British Literary History (p. 95), or
- The Women's Literature Concentration (p. 95).

Credit hours earned for courses in freshman composition (ENG 105, ENG 106, ENG 107, and ENG 208) may not be applied toward the total number of credit hours required for the major. In each English course, the English major must earn a grade of C- or better, with an overall GPA in the major of 2.0 or better.

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

All students majoring in English must take at least one Writing (W) course offered by the Department of English.

Minor

The Department of English offers two minors:

- The Minor in English (p. 96) and
- The English Minor in Creative Writing (p. 96).

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Departmental Honors in Literature

Students interested in seeking Departmental Honors in English should consult the Director of Undergraduate Studies in English, normally before the end of the junior year.

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the English Literature Major, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirement #2 of the English Literature Major.
2. Complete a six-credit-hour Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester.

Engineering

<http://www.miami.edu/engineering>

Minor in Engineering

The College of Engineering offers the student in the College of Arts and Sciences a variety of 15 credit hour minors designed to give the student a basic understanding of the technologies that support and shape our civilization. Minors may be elected in Architectural, Civil, Computer, Electrical, Environmental, Industrial, or Mechanical Engineering. The student is given considerable freedom in choosing courses in accordance with the student's interests.

Faculty in the College is prepared to assist students seeking Engineering minors in the preparation of programs of study.

More detailed descriptions of these minors will be found in the COLLEGE OF ENGINEERING (p. 225) section of this Bulletin.

English

<http://www.as.miami.edu/english>

Dept. Code: ENG

Introduction

The English Department offers programs for students interested in a liberal arts education. While many English majors direct their studies toward careers in law, creative writing, secondary education, or university teaching and scholarship, an English major is just as valuable to students considering careers in business, journalism, or any of the health professions. Students who would like to learn more about any of these programs are encouraged to consult the Director of Undergraduate Studies in the Department of English, Ashe Bldg. 321.

Educational Objectives

English as a discipline offers an opportunity for a general humanistic education, and it develops skills in communication and analysis essential in most careers. An education in English teaches students to write, to think critically, to weigh values, and to communicate ideas. At the same time, it develops their creativity and aesthetic understanding, and

The student must receive a grade of B or higher in both courses in order to qualify for honors. **(6 credit hours)**

3. While taking ENG 497 and ENG 498, participate in any workshops offered by the English Department for students engaged in independent research projects.
4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.
5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credit hours

Departmental Honors in Creative Writing

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses (including courses in creative writing) and a 3.3 average overall. In addition to meeting the requirements for the Creative Writing Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirement #3 of the Creative Writing Concentration.
2. Complete a six-credit-hour Senior Creative Writing Project. The student undertaking this project normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. **(6 credit hours)**
3. Receive for the project a recommendation for honors by the director of the Senior Creative Writing Project and by one other faculty reader designated by the Director of Creative Writing.
4. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credit hours

Departmental Honors in Women's Literature

To enter the program a student must have achieved by the end of the junior year at least a 3.5 average in English courses and a 3.3 average overall. In addition to fulfilling the requirements for the Women's Literature Concentration, the candidate for Departmental Honors must:

1. Take at least three literature courses numbered 400 or above in fulfilling requirements #2 and #3 of the Women's Literature Concentration.
2. Complete a six-credit-hour Senior Thesis. This thesis is a documented essay of about 10,000 words on a literary subject. The student undertaking a Senior Thesis normally registers in ENG 497 for the first semester of the project, and in ENG 498 for the second semester. The student must receive a grade of B or higher in both courses in order to qualify for honors. **(6 credit hours)**
3. While taking ENG 497 and ENG 498, participate in any workshops offered by the English Department for students engaged in independent research projects.
4. Receive for the thesis a recommendation for honors by the director of the Senior Thesis and by one other faculty reader from the Department of English.

5. Achieve an average in the major of at least 3.5, and an overall average of at least 3.3.

Total: 36 credit hours

Majors

Majors in English

- B.A. in English (p. 94)
- B.A. in English with Concentrations in:
 - Creative Writing (p. 95)
 - British Literary History (p. 95)
 - Women's Literature (p. 95)

Minors

Minors in English

- English (p. 96)
- Creative Writing (p. 96)

B.A. in English

Requirements for the English Literature Major are as follows:

1. Select ONE of the following (N.B., ENG 210 may NOT be used to fulfill this requirement):	3
ENG 201 World Literary Masterpieces I	
ENG 202 World Literary Masterpieces II	
ENG 205 Jewish Literature	
ENG 211 English Literature I	
ENG 212 English Literature II	
ENG 213 American Literature I	
ENG 214 American Literature II	
ENG 215 English and American Literature by Women	
ENG 260 African-American Literature	
ENG 261 Literature of the Americas	
2. Select FIVE LITERATURE courses numbered 300 or above. At least TWO must be numbered 400 or above. The courses must be distributed as follows:	15
Select two courses numbered 300 or above in literature before 1700	
Select two courses numbered 300 or above in literature between 1700 and 1900	
Select one course numbered 300 or above in literature since 1900	
3. Select FOUR additional English courses other than freshman composition ¹	12
Total Credit Hours	30

¹ i.e., any four courses designated ENG and numbered 200 or above, excluding ENG 208.

All students majoring in English must take at least one Writing (W) course offered by the Department of English.

B.A. in English - Concentration in British Literary History

Requirements for the Concentration in British Literary History are as follows:

ENG 211	English Literature I	3
ENG 212	English Literature II	3
Select EIGHT courses numbered 300 or above, at least FOUR of which must be numbered 400 or above. These courses must be distributed as follows:		24
Select one course numbered 300 or above on Shakespeare		
Select one course numbered 300 or above on literary theory or the history of criticism		
Select two additional courses numbered 300 or above in British literature (or a combination of British and other literatures) before 1800		
Select two additional courses numbered 300 or above in British literature (or a combination of British and other literatures) after 1800		
Select two electives numbered 300 or above		
Recommended Courses		
Select ancillary courses in Art History, Music, History, and Philosophy, in consultation with a departmental advisor		
Total Credit Hours		30

All students majoring in English must take at least one Writing (W) course offered by the Department of English.

B.A. in English - Concentration in Creative Writing

Students who declare a major in English with a Creative Writing Concentration should meet with the Director of Creative Writing.

Requirements for the Creative Writing Concentration are as follows:

1. Select one of the following workshop tracks:		12
Fiction Track		
ENG 290	Beginning Fiction Workshop	
ENG 390	Intermediate Fiction Workshop	
Select one of the following options:		
ENG 404	Creative Writing (Prose Fiction) (TO BE TAKEN TWICE)	
OR		
ENG 404	Creative Writing (Prose Fiction) & ENG 408 and Writing Autobiography ¹	
Poetry Track		
ENG 292	Beginning Poetry Workshop	
ENG 392	Intermediate Poetry Workshop	
Select one of the following options:		
ENG 406	Creative Writing (Poetry) (TO BE TAKEN TWICE)	
OR		

ENG 406	Creative Writing (Poetry) & ENG 408 and Writing Autobiography ²	
2. Select one of the following (N. B., ENG 210 may NOT be used toward the fulfillment of this requirement):		3
ENG 201	World Literary Masterpieces I	
ENG 202	World Literary Masterpieces II	
ENG 205	Jewish Literature	
ENG 211	English Literature I	
ENG 212	English Literature II	
ENG 213	American Literature I	
ENG 214	American Literature II	
ENG 215	English and American Literature by Women	
ENG 260	African-American Literature	
ENG 261	Literature of the Americas	
3. Select FOUR LITERATURE courses numbered 300 or above, at least TWO of which must cover literature earlier than 1900. TWO of the four courses must be numbered 400 or above.		12
4. Select one additional LITERATURE course numbered 200 or higher		3
Total Credit Hours		30

¹ In this option, ENG 404 is to be taken once.

² In this option, ENG 406 is to be taken once.

All students majoring in English must take at least one Writing (W) course offered by the Department of English.

B.A. in English - Concentration in Women's Literature

Students considering this concentration may want to take a special Women's Studies section of ENG 106 in the freshman year.

Requirements for the Women's Literature Concentration are as follows:

1. ENG 215	3
2. Select FOUR literature courses numbered 300 or above, at least TWO of which must be numbered 400 or above. These courses must be distributed as follows:	12
Select two courses in literature before 1700	
Select two courses in literature between 1700 and 1900	
3. Select FIVE additional English courses other than freshman composition¹	15
4. Select THREE of the courses in 2 and 3, above, from the following list: ENG 372, ENG 373, ENG 374, ENG 490, ENG 494, or any English course numbered 200 or above (other than ENG 215) that is combined with a course in Women's and Gender Studies	
5. Recommended Courses	
Select ancillary courses in Women's and Gender Studies, in consultation with a departmental advisor	
Total Credit Hours	30

¹ i.e., any five courses designated ENG and numbered 200 or above, excluding ENG 208.

All students majoring in English must take at least one Writing (W) course offered by the Department of English.

Minor in Creative Writing

Students may declare an English Minor in Creative Writing through their school or college. Submitting materials to the Creative Writing Program is not required for the minor. The student completes, with a grade of C- or better in each course and with an overall GPA in the minor of 2.0 or better, at least 15 credit hours at the 200-level or above beyond the credits earned for freshman composition. The 15 credit hours must be distributed as follows:

ENG 209	Creative Writing	3
Select one LITERATURE course at the 200-level, excluding ENG 210		3
ENG 219	Cw Beginning Mixed Genre Workshop	3
ENG 391	Cw Intermediate Mixed-Genre Workshop	3
Select one LITERATURE course at the 300-level or above		3
Total Credit Hours		15

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Minor in English

The student minoring in English completes, with a grade of C- or better in each course and with an overall GPA in the minor of 2.0 or better, at least 15 credit hours at the 200-level or above beyond the credits earned for freshman composition. The 15 credit hours must be distributed as follows:

Select one LITERATURE course at the 200-level	3
Select one LITERATURE course at the 200-level or the 300-level	3
Select one LITERATURE course at the 400-level	3
Select TWO additional English courses other than freshman composition ¹	6
Total Credit Hours	15

¹ i.e., any two courses designated ENG and numbered 200 or above, excluding ENG 208.

Students pursuing both a major and a minor (or two majors) offered by the Department of English may double-count a maximum of two English courses toward the fulfillment of their degree requirements. They must also have an additional major or minor in a department other than English.

Geography and Regional Studies

<http://www.as.miami.edu/geography>

Dept. Code: GEG

Introduction

Geography is the science of place and space. Geographers ask where things are located on the surface of the earth, why they are located where they are, how places differ from one another, and how people interact with the environment. There are two main branches of geography: human geography and physical geography. Human geography is concerned with the spatial aspects of human existence. Physical geographers study patterns of climates, land forms, vegetation, soils, and water. Thus, Geography links the social sciences and natural sciences.

Geographers use many tools and techniques in their work, and geographic technologies are increasingly among the most important emerging fields for understanding our complex world. They include Geographic Information Systems (GIS), Remote Sensing, Global Positioning Systems (GPS), online mapping such as Google Earth, statistics, and others.

Geographers work in many different areas, such as environmental management, education, disaster response, city and county planning, community development, and more. Geography is an interdisciplinary field that offers diverse career opportunities.

The relevance and prestige of Geography as a discipline was helped enormously during the past 20 years by four key developments:

1. the emergence of "globalization" as a phenomenon requiring analysis and explanation;
2. the increasing recognition of space and place in cognate social and physical sciences;
3. deepening concern for nature-society interactions and issues of environmental sustainability and development; and,
4. the development of geographic information systems (GIS and GIScience) and remote sensing technologies and their widespread adoption by organizations in both the public and private sectors.

Educational Objectives

Geography offers specializations in areas such as

- Geographic Information Systems and Remote Sensing
 - Medical Geography and Global Health
 - Urban Geography and International urbanization
- Environmental Studies
- International and Regional Development

Geography offers courses on the Middle East, Africa, South America, and other regions.

Geography offers courses that provide training in indispensable skills for everyone entering the present-day labor market:

- Research Methodology
- Statistics
- Computer Cartography
- Geographic Information Systems (GIS)
- Remote Sensing of the Environment

Study Abroad

Majors are strongly encouraged to study abroad. Study abroad at carefully selected institutions will complement the student's curriculum and area of specialization, will enhance fluency in a foreign language, and will result in heightened affinity for a foreign culture. The study abroad experience need not result in credit overloads or extended time spent in the program.

Degree Programs

The major in Geography leads to Bachelor of Arts degree.

Departmental Honors in Geography

The Department of Geography encourages its majors and minors to intensify and deepen their knowledge of Geography through its Departmental Honors Program. The program is designed to give our students the opportunity to explore various topics and problems in Geography that are of particular interest to them, to work more closely with faculty in the department, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in Geography or other disciplines.

Minimum requirements for the program are as follows:

1. a cumulative grade point average of at least 3.30;
2. a cumulative grade point average in Geography of at least 3.50; and
3. a thesis that is approved by departmental faculty.

Students have 3 options for writing the thesis.

1. Students may take 6 credit hours of independent study (GEG 525) with one or more departmental faculty.
2. Students may take a 3 credit hour course offered at the 300-level or above and 3 credit hours of independent study (GEG 525).
3. In exceptional circumstances, a student's thesis may be written as part of the requirements for earning 6 credit hours in Geography at the 300-level or above.

In all three cases, the thesis must be a single, coherent work of scholarship through which the student earns 6 credit hours in Geography over the course of two semesters.

A Geography faculty member must serve as the Honors thesis advisor, and a second reader, who may be from another department, must be selected in consultation with the thesis advisor. The thesis must be at least 30 pages in length (double spaced, 12 point font), not including tables and figures. Once the topic and committee are secured, students should turn in their signed Departmental Honors Thesis Form to the main office of the Geography Department. This form must be signed by the Director of Undergraduate Studies and submitted by October 15 for fall graduation and February 15 for Spring graduation.

In addition to completing the written thesis, students must orally present the results of their work to faculty and students at a special honors colloquium to be held at the end of the semester.

Majors

Majors in Geography and Regional Studies

- B.A. in Geography as a First Major (p. 97)

- B.A. in Geography as a Second Major (p. 97)

Minors

Minor in Geography and Regional Studies

- Geography (p. 98)

Certificates

Certificate in Geography and Regional Studies

- Geospatial Technology (p. 97)

B.A. in Geography as a First Major

1. Students must complete at least 30 credit hours in Geography with a grade of C- or higher.
2. The overall GPA in courses counted toward the major must be 2.00 or higher.

Select three of the following:		9
GEG 105	World Regional Geography	
GEG 110	Introduction to Human Geography	
GEG 120	Physical Geography	
GEG 199	Introduction to GIS (Geographic Information Systems)	
GEG 501	Place, Region, Nature	3
Total Credit Hours		12

3. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Geography must take GEG 501.

B.A. in Geography as a Second Major

1. Students must take at least 24 credit hours in geography courses with a grade of C- or higher.
2. The overall GPA in courses counting toward the major must be 2.00 or higher.
3. Of the coursework at the 200-level or higher in Geography, no more than 6 credit hours may count double towards the other major.

Select two of the following:		6
GEG 105	World Regional Geography	
GEG 110	Introduction to Human Geography	
GEG 120	Physical Geography	
GEG 199	Introduction to GIS (Geographic Information Systems)	
GEG 501	Place, Region, Nature	3
Total Credit Hours		9

Geospatial Technology Certificate

This Certificate Program is designed to benefit students who seek to enhance their skills in geospatial technologies, especially Geographic Information Systems (GIS) and satellite remote sensing. Students will be exposed to standard software tools used in the industry (ArcGIS), as well as satellite image data. Students who earn the Certificate will enhance their employment prospects and/or advance their careers in geospatial

technology, particularly in job settings that stress the use of satellite remote sensing and vector-based GIS.

The Certificate requires a minimum of 15 credit hours, including 3 core courses and 2 or more electives completed with at least a C- grade in each course. Students may also receive up to 6 credit hours toward the certificate for past course work completed at UM or other accredited colleges and universities within the past 3 years. At most one course may be taken for credit only.

GIS Certificate Program Core Courses		
GEG 199	Introduction to GIS (Geographic Information Systems)	3
or GEG 591	Introduction to GIS (Geographic Information Systems) for graduate students	
GEG 391	Intermediate GIS (Geographic Information Systems)	3
or GEG 592	Advanced Environmental Remote Sensing	
GEG 392	Remote Sensing of the Environment	3
or GEG 592	Advanced Environmental Remote Sensing	
GIS Certificate Program Electives		
Select a minimum two of the following:		6
GEG 280	Introduction to Cartography and Computer Mapping	
GEG 301	Topics in Geography (when offered as a GIS topic)	
GEG 481	Introduction to Quantitative Methods	
or GEG 580	Introductory Quantitative Methods for Geographical Analysis.	
GEG 491	GIS and Environmental Modeling	
GEG 525	Topics in Geography	
GEG 535	Internship in Geography	
GEG 545	Special Topics (when offered as a GIS topic)	
GEG 582	Advanced Quantitative Methods	
GEG 585	Advanced Cartography	
GEG 595	Web Gis	
GEG 681	Advanced Spatial Statistics	
Total Credit Hours		15

Note that all courses from the Certificate Program can be double counted toward the major.

Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center or with the GIS Program Director. Upon approval by the GIS Program Director, 3 to 4 credit hours may be earned with an internship (GEG 535).

For more information e-mail terghazar@miami.edu to make an appointment.

Minor in Geography

1. Students must complete at least 15 credit hours in Geography with a grade of C- or higher.
2. At least 6 credit hours must be at the 300-level or higher.

Geological Sciences

<http://www.as.miami.edu/geology>

Dept. Code: GSC

Introduction

Geological Sciences is concerned with Planet Earth, its origin, evolution, structure, internal and surface processes, mineral resources, environmental preservation, global dynamics, paleoclimate reconstruction, and life history. Geologists use their knowledge of chemistry, biology, physics and mathematics to solve Earth problems.

Educational Objectives

Geological Sciences undergraduates are prepared for careers in industry as well as graduate study in geosciences, the environmental sciences, and marine sciences. Career paths include research and teaching, as well as employment in the petroleum and mineral industries and in industries and government organizations concerned with energy resources, geodynamics, the marine environment, conservation, and climate change.

Degree Programs

The Department of Geological Sciences offers three undergraduate degree major programs and two double major programs:

- Bachelor of Science (B.S.)
- Bachelor of Arts (B.A.) in Geological Sciences
- Five-year Master of Science Program (M.S.)
- Geological Sciences/Marine Science (Double Major)
- Geological Science/Ecosystem Science and Policy (Double Major)

For the Geoscience Graduate Program please see the Department of Marine Geosciences (p. 520) at the RSMAS campus.

Double Major

Double majors are offered in cooperation with the Marine and Atmospheric Science Program and the Ecosystem Science and Policy Program.

Marine Science (MSC)

This program consists of a major in the Geological Sciences and a major in Marine Science. Interested students should read the information under Marine and Atmospheric Science in this Bulletin and contact the Marine Science office (184 Cox Science or 305-284-2180) for details.

Ecosystem Science and Policy (ECS)

This program consists of a major in Geological Sciences and a major in Ecosystem Science and Policy (ECS). Interested students should read the information under ECS in this bulletin and contact the ECS office (058 Cox).

Departmental Honors

Honors in Geological Sciences may be earned by students in good standing within the University Honors program. In addition to their general requirements, a student must have an overall GPA of 3.0 or better, and also perform research beginning prior to their senior year, resulting

in a written Honor's Thesis and oral defense approved by the student's thesis advisor.

Writing and Communications Requirement

To satisfy the College of Arts and Sciences writing and communications requirement in the discipline, students majoring in Geological Sciences should take at least two of the following courses (GSC 114, GSC 310, GSC 462, GSC 560).

Majors

Majors in Geological Sciences

- B.S. in Geological Sciences (p. 99)
- B.A. in Geological Sciences (p. 99)

Minors

Minor in Geological Sciences

- Geological Sciences (p. 100)

Joint

Joint Degrees in Geological Sciences

- Five Year B.S./M.S. in Geological Sciences and Marine Geology (p. 100)

B.A. in Geological Sciences

The B.A. in Geological Sciences is recommended for science oriented students who plan to use an understanding of Earth systems in their professional careers but desire a broader liberal arts education or are pursuing a dual major outside the sciences. B.A. students must complete a core curriculum of 24-27 credit hours including:

Select two of the following:	6-7
GSC 101 Origin and Evolution of Planet Earth	
GSC 102 Evolution of the Biosphere or GSC 111 Earth System History	
GSC 103 Evolution of the Modern Earth's Environment (or GSC 120 series) or GSC 110 The Earth System	
GSC 114 Earth Processes Lab	2
GSC 260 Earth Materials	4
GSC 360 Depositional and Diagenetic Systems	4
GSC 482 Field Methods	2
Select eight additional credit hours at the 300 – 500 level with a grade of C- or better and with an overall GPA of 2.0	8
Students are strongly encouraged to take:	
GSC 580 Summer Field Geology	
GSC 231 Field Study of Reef Systems Through Time (offered during spring break) or GSC 311 Field Study of Volcanoes and Society	
Total Credit Hours	26-27

B.S. in Geological Sciences

The B.S. in Geological Sciences is recommended as preparation for graduate school and careers in professional research and science

teaching. As described in sections 3 and 4 below, a B.S. in Geological Science requires a strong foundation in mathematics and several applied sciences.

Core Curriculum ¹		
GSC 110	The Earth System	3
GSC 114	Earth Processes Lab	2
GSC 111	Earth System History	4
GSC 260	Earth Materials	4
GSC 360	Depositional and Diagenetic Systems	4
GSC 380	Paleontology and Stratigraphy	4
GSC 410	Environmental Geochemistry	3
or GSC 420	Geophysics	
GSC 440	Igneous and Metamorphic Petrology	4
GSC 480	Structural Geology	4
GSC 482	Field Methods	2
GSC 561	Colloquium - Current Topics in the Geosciences	1
Summer Field Course for B.S. Candidates		
GSC 580	Summer Field Geology (or an approved field course through another university) ²	4
Calculus		
Select one of the following:		8
MTH 161	Calculus I & MTH 162 and Calculus II	
MTH 171	Calculus I & MTH 172 and Calculus II	
Select either one semester of a computer course or a statistics course		3
Chemistry		
CHM 111	Principles of Chemistry I	3
Recommended Courses:		
CHM 112	Principles of Chemistry II	
CHM 113	Chemistry Laboratory I	
CHM 114	Chemistry Laboratory II	
College Physics		
PHY 101	College Physics I	8
& PHY 102	and College Physics II	
Recommended Courses in lieu of College Physics:		
PHY 205	University Physics I & PHY 206 and University Physics II	
Complete the "Required Areas of Study" of the College (see under COLLEGE OF ARTS AND SCIENCES in this Bulletin)		
Minor		
Select a Minor from the following:		
Biology		
Chemistry		
Computer Science		
Ecosystem Science and Policy		
Marine and Atmospheric Science		
Mathematics		

Physics	
Total Credit Hours	61

- ¹ Must complete with a grade of C- or better and with an overall GPA of 2.0.
- ² The field course (GSC 580 or an approved equivalent at another University) is required for B.S. students and encouraged for others in order to gain practical experience in the skills of observation, interpretation, measuring, sampling, mapping and report writing. This requirement, when completed, has proven to be a strong asset when applying for graduate work or employment.

Geological Sciences B.S. students desiring a minor in Ecosystem Science and Policy must take:

ECS 111	Introduction to the Earth's Ecosystem	3
ECS 112	Field Problems in Ecosystem Science and Policy	2
ECS 113	Introduction to Environmental Policy	3
ECS 201	Seminar Series in Contemporary Environmental Issues I	1
or ECS 202	Seminar Series in Contemporary Environmental Issues II	1
Select six other science focused credit hours in ECS courses at the 300-level or above ¹		6
Total Credit Hours		15

- ¹ ECS 301, ECS 380 series, and ECS 580 series; and ECS 372 series with approval of Departmental Chair.

Five Year B.S./M.S. in Geological Sciences and Marine Geology

A 5-year B.S. /M.S. in Geological Sciences and Marine Geology allows qualified students to complete a master's degree in one year of study beyond the B.S.

The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences. The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).

Undergraduate requirements are listed under the B.S. degree above with the Honors option. By the beginning of their junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor. Contact the Geological Sciences chair at the departmental office (305-284-4253) for more information.

Minor in Geological Sciences

The minor in Geological Sciences consists of 16 credit hours in courses numbered 110 or higher. A minimum grade of "C-" must be earned in each course with an overall GPA of 2.0.

History

<http://www.as.miami.edu/history>

Dept. Code: HIS

Introduction

History is the systematic study of the past. The study of history includes training in how to gather information, how to research issues and problems, how to analyze data and construct arguments, and how to communicate ideas in writing. These are essential skills, tools that are prized in the world beyond the university. A major in history is an excellent beginning and solid stepping stone to professional school and the business world. For goals ranging from law to journalism, and from medicine to the MBA, history serves as a versatile undergraduate major. Multinational businesses demand that their executives understand the peoples and cultures around them, and be able to communicate that understanding effectively. If an occupation demands critical thinking and analysis, a background in history is invaluable.

Educational Objectives

All history courses expose students to historical interpretation and critical analysis.

- Courses at the 100 and 200 levels are intended as introductions to broad fields of history and are open to students with no previous college-level history experience.
- All 300 level history courses are writing intensive, are graded principally through essay examinations and short papers, and count toward the fulfillment of the University of Miami writing across the curriculum requirement.
- Courses at the 400 level are programs of individual directed study. Permission of the instructor is required in each case, and such permission is normally given only to students who have completed a lower-level course with the faculty member in question.
- Courses at the 500 level require a 300 level history course as prerequisite. All 500 level courses deal extensively with the historiography of their particular subjects, and all require a written research project as a major component of the work of the course.
- To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in History will take two 500-level History seminars."

Degree Programs

The major in History leads to the degree of Bachelor of Arts.

Departmental Honors

History majors with a cumulative GPA of at least 3.6 in history courses may earn departmental honors by completing a research project of 6 credit hours judged worthy of honors by a departmental committee, provided that at least 6 courses worth 18 credit hours have been completed at the University of Miami.

Other

For the requirements of the M.A. and Ph.D. degrees in history see the Bulletin of the Graduate School.

Majors

Major in History

- B.A. in History (p. 101)

Minors

Minor in History

- History (p. 101)

B.A. in History

A major in history consists of at least 30 credit hours in history with a grade of C- or better in each course, and with a cumulative GPA of at least 2.0 in history courses. These credit hours may include history courses taken for general distribution requirements, and must include at least 18 credit hours at the 300 level or above, of which at least 6 credit hours must be taken in the form of 500-level seminars. (HIS 599 does not count). All courses for majors will be selected by students in consultation with advisors designated by the department.

Credit hours from other institutions may be counted toward the major or minor, and to general distribution requirements as appropriate, but departmental approval is required in each case. Students who complete the Advanced Placement course in either United States or European history and pass the examination with a grade of 4 or 5 may receive credit hour in the appropriate history courses. Students who complete the International Baccalaureate program and pass the higher level history examination with a grade of 6 or higher will receive 3 credit hours in the appropriate entry-level history course. (However, in some cases students will only receive elective credit hour). At least 18 credit hours of the major and at least 9 credit hours of the minor must be completed at the University of Miami.

The department offers a variety of study abroad options with credit hour toward the major or minor.

Minor in History

A minor in history consists of at least 15 credit hours in history with a grade of C- or better in each course, and with a cumulative GPA of at least 2.0 in history courses. These credit hours may include history courses taken for general distribution requirements, and must include at least 9 credit hours at the 300 level or above. Courses for minors should be selected in consultation with a departmental advisor.

International Studies

<http://www.as.miami.edu/international-studies>

Dept. Code: INS

Introduction

The International Studies major provides a focused educational experience aimed at familiarizing students with the key structural features and dynamics of the international system and preparing them to enter the growing international job market. Processes of globalization, in part driven by global capital flows, expanding trade and the unrelenting development of communication and information technologies, have affected virtually everyone in every country, often in ways we are just beginning to understand. These developments often pose serious

problems for government and other societal institutions, while also creating a demand for individuals who understand international processes. Jobs in virtually all sectors have acquired a decidedly international dimension, whether in trade, tourism, finance, public policy, government, or education. INS Graduates have moved on to the corporate world, the public sector, started their own businesses, or have continued their studies at the graduate level (i.e. Law, Business, and International Studies).

Educational Objectives

International Studies seeks to provide students with the ability to understand:

- International politics within the context of interstate relations and foreign policy.
- International economics and its sub-discipline international political economy, including such issues as trade and production, money and finance, and development.
- Social science research methods including qualitative, quantitative, comparative case study and formal modeling.

Students are encouraged to explore interdisciplinary options that further their understanding of international studies. This type of coursework can be taken in other disciplines offered at the university or taken outside the institution, either through exchange programs or other inter-institutional options provided by UM. Students will demonstrate the ability to synthesize the various thematic areas of the discipline through required participation in advanced seminars. Seminars will stress analytical participation, oral presentations and the ability to interpret and critique core theoretical readings.

Degree Programs

International Studies provides both a major and minor option for students. The flexibility of the program often allows students to double major without the need to extend their university studies. Students are encouraged to speak with the International Studies advisor to explore such possibilities. The major in International Studies leads to the degree of Bachelor of Arts.

Advanced Writing & Communication Requirements

Details of the Advanced Writing and Communication Proficiency:

Degree candidates must complete at least four writing courses, and at least one writing course must be in one of the student's major disciplines (not applicable to BLA students who do not select a major). Students should consult the bulletin section of their major to find out which writing-intensive courses are acceptable to the discipline

Individual writing course offerings may make the writing component independent of the rest of the course. As such the writing component might be optional, the writing component might not contribute to the overall grade, and writing credit might be awarded even if the overall grade is a fail.

Transfer students may use a maximum of two courses towards the writing requirement.

Departmental Honors

The Department of International Studies encourages its majors to intensify and deepen their knowledge of the field through its departmental honors program. The program is designed to give students the opportunity to explore various topics and problems in international studies that are of particular interest to them, to work more closely with departmental faculty, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in international studies and related fields.

Minimal requirements for the program are as follows:

1. a cumulative grade point average of at least 3.30;
2. a cumulative grade point average in international studies of at least 3.50; and
3. a thesis that is approved, with a grade of at least B+, by a member of the departmental faculty.

After reaching agreement with a member of the faculty who will serve as the honors thesis advisor, students writing a senior honors thesis will enroll in INS 418 and INS 419, Honors Thesis, for a total of six credit hours [the credit hours may be spread over two semesters or taken in a single semester]. The thesis itself is expected to be an extended, coherent work of scholarship on an issue of relevance in the field of international studies.

- B.A. in International Studies (p. 102)

Minors

Minor in International Studies

- International Studies (p. 103)

B.A. in International Studies

Requirements for the Major in International Studies (30 credit hours)

The International Studies major consists of three components:

1. *Core Requirements*
2. *Thematic Core*
3. *INS Electives*

Core Requirements		
INS 101	Global Perspectives ¹	3
INS 102	Global Economics	3
INS 201	Globalization and Change in World Politics ¹	3
INS 202	INS Methodology	3
Thematic Core		
Select a minimum of one course from each of the following four fields: ²		12
International Politics, Foreign Policy and Peace Studies:		
INS 341	Nationalism, Ethnicity and Conflict	
INS 540	National Security	
INS 542	Drug-Trafficking in the Americas	

INS 560	US Foreign Policy	
INS 561	Negotiation and Bargaining	
INS 566	US-Latin American Relations	
Comparative Studies of Politics and Societies in a Globalizing World:		
INS 330	Introduction of Comparative Studies	
INS 335	Democratization	
INS 533	Transnational Social Movements	
INS 534	Military, State and Society	
INS 565	The World Before European Domination	
INS 584	Latin American Thought	
International Economics, Political Economy and Development:		
INS 320	Global Economics II	
INS 321	Global Political Economy	
INS 322	Economics of Development and the Environment	
INS 420	Global Trade	
INS 520	Microeconomics for INS	
INS 571	International Development and Human Welfare	
International Law, Organizations, and Global Governance:		
INS 460	United Nations Seminar	
INS 570	Globalization and Health	
INS 573	Disasters, Terrorism and Global Public Health	
INS 591	The European Union	
INS 595	European Social Movements	
INS Electives and Interdisciplinary Options		
Select six credit hours of electives at the 300 level or above. ³		6
Total Credit Hours		30

¹ These courses must be completed before taking the Thematic Core courses.

² Additional classes will be counted toward the elective portion of the INS major, if taken. Other courses, including classes in other disciplines, may be taken with the approval of the INS Advisor.

³ With the approval of the INS Advisor, students may take courses from other departments outside of INS such as Geography and Regional Studies, History, Anthropology, Sociology, Political Science, Economics, Religion, Art History, Foreign Languages, Environmental Science, et cetera. Appropriate study abroad courses, an approved internship (INS 519), or an honors thesis (INS 418 & INS 419) may also be used to fulfill elective credit hour requirements.

Important Advising Notes for all International Studies Majors

1. **Double Counting:** Of the combined courses in the Thematic Core and the INS Electives, no more than 6 credit hours may count double towards a second major. A student may not count any course used to fulfill the requirements of the INS major toward a minor requirement.
2. **Study Abroad:** Students are strongly encouraged to study abroad for a summer, a semester, or an entire year, depending on the program. Study abroad at carefully selected institutions will complement the student's curriculum and area of specialization, will enhance fluency in the foreign language, and will result in heightened affinity for a

foreign culture. The study abroad experience need not result in credit hour overloads or extended time spent in the program.

- 3. Internship Credit Hour:** Students are encouraged to find a suitable internship during their undergraduate career. Upon approval by an advisor in the International Studies Undergraduate Program Office, 3 credit hours may be earned with an internship (INS 519), either toward the major or as elective credit hours (depending on the relevance of the particular internship to the INS major). The University's Toppel Career Planning and Placement Center regularly advertises internships.
- 4. Academic Standing:** Only courses in which a grade of C- or better is attained, may be counted towards the International Studies major and students must maintain a GPA of 2.75 or better in all major requirements (30 credit hours).

Minor in International Studies

Requirements for the Minor in International Studies (15 credit hours)

The International Studies Minor consists of two parts:

1. 6 credit hour set of introductory courses;
2. 9 credit hours in advanced courses.

Base Courses	
Select two of the following core requirements:	
INS 101	Global Perspectives
INS 102	Global Economics
INS 201	Globalization and Change in World Politics
INS 202	INS Methodology
Advanced Courses	
Select three INS courses at the 300-level or above in order to graduate with a minor in International Studies ¹	9
Total Credit Hours	9

¹ Advanced level courses from other departments may be taken if approved by the INS advisor. Only courses in which a grade of C- or better is attained may be counted towards the minor in International Studies, and students must maintain a GPA of 2.75 or better in all minor requirements (15 credit hours).

Judaic Studies

<http://www.as.miami.edu/judaic>

Dept. Code: JUS

Introduction

The George Feldenkreis Program in Judaic Studies is a broad, flexible, interdisciplinary program designed for undergraduates to gain an understanding of Jewish civilization and its diverse cultural experiences. The program, which is non-theological in orientation, is an academic exploration of the multi-faceted, socio-historical, 4,000-year record of the Jewish people. Courses taught by and combined with the program, highlight the variety of cultural, political, social, and religious experiences of Jews in different times and places.

Educational Objectives

The program is structured to provide an in-depth liberal arts education that will constitute a foundation for advanced academic study, professional careers in a variety of fields, and a more complex and rich understanding of the Jewish world. Judaic Studies courses meet distribution requirements for the Humanities and Social Sciences in the College of Arts and Sciences, the College of Engineering, the School of Communication, the School of Business, and the Frost School of Music.

Advanced Writing and Communication Requirement

Students majoring in Judaic Studies satisfy the college of Arts and Sciences "Writing requirement in the discipline" when they take any course in Jewish or Israeli literature offered by the Department of English.

Holocaust Survivors Service Internship (JUS 205/JUS 206)

Interns meet on a 1 to 1 basis with Holocaust survivor, who currently reside in South Florida, and gain experiences that will offer them valuable, once-in-a-lifetime opportunity to meet with survivors of the Holocaust. Students are expected to commit to two semesters of service for 3 credit hours each semester (A total of 6). Credit hours may be earned for JUS, REL, or Social Science requirements.

Students who participate in the program will assist Holocaust survivors as "friendly visitors." Student volunteers are scheduled to meet regularly each semester with a UM faculty member to share their experiences and to participate in enrichment activities.

Interns will also earn a stipend of up to \$250 per semester to cover any out of pocket expenses that may incur. This will be based on the number of visits to survivors.

The program is open to students of all denominations and backgrounds.

* Finger Printing and Background checks will need to be completed once registered for the program.

Majors

Major in Judaic Studies

- B.A. in the George Feldenkreis Program in Judaic Studies (p. 103)

Minors

Minor in Judaic Studies

- The George Feldenkreis Program in Judaic Studies (p. 104)

B.A. in the George Feldenkreis Program in Judaic Studies

JUS 231	Jewish Civilization: Society, Culture, and Religion	3
Any course in Jewish or Israeli Literature offered by the English Department.		
A course in Hebrew at the 200-level or higher (which can be used simultaneously to fulfill the College of Arts and Sciences Language requirement). ¹		

One course in Ancient Jewish History and Society and one course in Modern Jewish History and Society. Courses will be designated appropriately by the Program Director each semester.²

15 more credits (5 courses) in classes listed in the Judaic Studies Degree Audit or combined sections approved for JUS credit, 9 credits of which must be completed at the 300-level or higher. Students who complete HEB 201 need only complete 6 credits at the 300-level or higher.³

¹ Can be used simultaneously to fulfill the College of Arts and Sciences Language requirement.

² Courses will be designated appropriately by the Program Director each semester.

³ 12 credit hours of which must be completed at the 300-level or higher. Students who complete HEB 202 need only complete 9 credit hours at the 300-level or higher.

Honors in Judaic Studies consist of the above plus an Honors Thesis and one additional elective at the 300 level or higher.

A grade of "C-" or better must be attained in each course taken for the major with an overall GPA of 2.0.

Minor in the George Feldenkreis Program in Judaic Studies

One of the following 3 courses:

JUS 231	Jewish Civilization: Society, Culture, and Religion	3
---------	---	---

Any course in Jewish or Israeli Literature offered by the English Department.

GEG 272	Jewish Geography	3
---------	------------------	---

Four courses in Ancient/Modern Jewish History and Society (to be designated as such and published by the JUS Program Director each semester). Students are strongly encouraged to take at least one course in Ancient Jewish History and Society and at least one course in Modern Jewish History and Society.

Students are strongly encouraged to take HEB 101 as one of the above four courses.

A grade of "C-" or better must be attained in each course with an overall GPA of 2.0.

Latin American Studies

<http://www.as.miami.edu/las>

Dept. Code: LAS

Introduction

Latin American Studies offers an interdisciplinary approach to learning about the politics, economics, cultures, and societies of Latin America and the Caribbean. Undergraduate courses are offered in Africana Studies, American Studies, Anthropology, Architecture, Art and Art History, Biology, Communication, Economics, Geography, History, Journalism, International Studies, Marketing, English, Modern Languages

and Literatures, Music, Musicology, Political Science, Religious Studies, Sociology, and Women's and Gender Studies. The major in Latin American Studies is designed for the student who wants to acquire background knowledge about the area or who is interested in some aspect of Latin American and Caribbean affairs, such as government, law, business, research, journalism, education or public health. Students are strongly encouraged to spend at least one semester abroad on a program with a Latin American and/or Caribbean Studies component (see Office of International Education and Exchange Programs (p. 372))

Educational Objectives

The goal of the BA in Latin American Studies is to acquire, advance and disseminate knowledge of the history, literature, culture, politics, economics, and natural and social sciences of the regions within an interdisciplinary framework. This program also places special emphasis on the languages and cultures of Hispanophone, Francophone and Lusophone Americas, including the transnational study of Latin Americans, Caribbeans and their descendants in the United States. Students should leave the program with the following:

- the analytical and methodological tools needed to conduct interdisciplinary research;
- the ability to read, write and think critically about primary and secondary sources;
- a general knowledge of the different regions that comprise Latin America, the Caribbean and their Diaspora as well as a critical understanding that the geographic, political, and cultural boundaries that have traditionally defined the "area" as an object of study are not isomorphic and are connected to the interests of European and North American powers;
- a critical understanding of the competing ways in which Latin American and Caribbean peoples have represented themselves paying particular attention to race/ethnicity, class, gender and sexuality, language, religion, migration, transculturation, and other historical, social, economic, and political factors;
- a language competency in either French, Spanish, Portuguese, or Haitian Creole at an intermediate level and a beginning competency in a second language spoken in the region (either French, Spanish, Portuguese, Haitian Creole indigenous language of Latin America and the Caribbean);
- a "Beyond the Books" experience that will bridge the gap between the university and the surrounding communities, and will help solidify a long-term interest in and commitment to the regions.

Degree Programs

- Bachelor of Arts

Departmental Honors

The Latin American Studies Program invites its undergraduate majors and minors to apply for departmental honors and expand their knowledge of Latin America and the Caribbean. Admission into the departmental honors program is by invitation, but any student who believes her or himself qualified may apply to the academic director of Latin American Studies, preferably during the sophomore or early junior year. Candidates for departmental honors work closely with one faculty member for two semesters to engage in original research in an area of her/his choice. LAS majors and minors with a cumulative G.P.A. of at least 3.0 and an overall G.P.A. of at least 3.5 in the LAS major or minor may earn

departmental honors by completing two honors thesis courses, LAS 495 and LAS 496 (Honors I & II). Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as honors thesis advisor and obtain written approval of the Academic Director. The faculty member with whom the student works will help determine the nature of the independent research project. Candidates must complete a thesis (with a grade of at least a B+, which must be approved by the thesis advisor) and present the work at the LAS Annual Student Symposium or another similar event showcasing undergraduate research at the university.

Advanced Writing and Communication Requirement

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Latin American Studies should take at least one course with a "W" designation. These courses include (please refer to CaneLink or the LAS Course Booklet for details on courses that fulfill the writing requirement, as offerings change every semester):

LAS 101	Introduction to Latin American and Caribbean Studies	3
LAS 200	Introduction To Latina/O Studies	3
LAS 301	Interdisciplinary Topics in Latin American and Caribbean Studies	3
LAS 320	Special Topics in Latin American and Caribbean Environment	3
LAS 330	Special Topics in Latin American and Caribbean Religions	3
LAS 340	Special Topics in Latin American and Caribbean Economics	3
LAS 350	Special Topics in Latin American and Caribbean Art and Culture	3
LAS 360	Special Topics in Latin American and Caribbean Politics	3
LAS 370	Special Topics in Latin American and Caribbean Media and Communications	3
LAS 494	Independent Study in Latin American and Caribbean Studies	1-3
LAS 495	SENIOR HONORS THESIS I	3
LAS 496	SENIOR HONORS THESIS II	3

Select six courses in classes listed in LAS or combined with LAS ¹		18
Select one of the following:		3
LAS 494	Independent Study in Latin American and Caribbean Studies	
LAS 501	Interdisciplinary In Latin American And Caribbean	
LAS 505	Internship in Latin American and Caribbean Studies	
LAS 506	Civic Engagement In Latin America	
Total Credit Hours		36

¹ 12 credit hours of which must be completed at the 300-level or higher. Courses that are not combined with LAS but do have a significant focus on Latin America may be taken with the approval of the academic director. A freshman seminar with a significant focus (25% or more) on Latin America or the Caribbean may be counted towards this requirement. SPA 203 and FRE 203 may be counted towards this requirement if not used to satisfy the aforementioned language requirements.

A C- or better for all major courses, with a GPA of 2.0 are required for successful completion of the LAS Major.

B.A./M.A in Latin American Studies (Fellows in Latin American Studies)

FILAS (Fellows in Latin American Studies)

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM's world-class faculty in various academic disciplines, *FILAS* participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, *FILAS* students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication, Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean from the following categories (at least ten of these courses must be taken at the Master's level):

CAS GENERAL EDUCATION REQUIREMENTS	
English Composition ¹	6
ENG 105 English Composition I	
ENG 106 English Composition II	
Mathematics, Computing & Statistics ²	3
Second Language ³	
Writing Across the Curriculum ⁴	
Cognates ⁵	9
Advanced Language Proficiency in Spanish, French, Portuguese, or Haitian Creole	3
Select one of the following:	
FRE 203 Advanced French	
HAI 201 Intermediate Haitian Creole I	
POR 202 Intermediate Portuguese II	
SPA 203 Advanced Spanish	
Secondary Language Competence in another Latin American or Caribbean Language	3
Select one of the following:	
FRE 105 Accelerated Elementary French	
HAI 102 Elementary Haitian Creole II ((or equivalent))	
POR 105 Beginning Portuguese for Spanish Speakers	
SPA 105 Accelerated Elementary Spanish	
FILAS Specific Requirements	
Select one gateway seminar in Latin American Studies	3
Select two History courses	6
Select two International Studies courses	6
Select two Economics courses	6
Select two advanced Languages and Literatures courses (SPA, POR, FRE, or HAI)	6
Select seven courses in Study Abroad	21
Select one course as Internship in Latin America	3
Select five courses above the 300-level (third-year) in a range of disciplines	15
Select ten courses in one focus track	30

MA Phase Requirements		
GRE Exam in Semester 7 or 8		
LAS 601	Interdisciplinary In Latin American And Caribbean	3
LAS 602	Research Design in Latin American Studies	3
Select two Regional Fundamentals courses		6
Select four electives from approved LAS or combined courses		12
LAS 810	Pre-candidacy thesis credits (students must enroll in two semesters of this 3-credit course to fulfill this requirement.)	6
Total Credit Hours		150

- Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the two above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).
- MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.
- Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. **FILAS students already fulfill this requirement when completing the language requirements cited below.**
- Degree candidates must complete at least four writing courses, and at least one such course must be in the student's major discipline.
- Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. **However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement. According to the Collage of Arts & Sciences, "three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, 112, or 202), Geological Sciences, Marine Science (except MSC 313 and 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate."**

FILAS students also write a Master's Thesis based on an original research project. In addition, they must defend the thesis and present their findings at the LAS Annual Student Symposium.

FILAS Admission Requirements

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.

- Statement of interest in *FILAS*, emphasizing prior language or area study
- To continue through the graduate level (MA Phase), students must maintain at least a 3.4 GPA and take the GRE Exam.

Minor in Latin American Studies

The minor in Latin American Studies may be obtained by completing LAS 101 or LAS 290 and 12 more credit hours in approved LAS courses. At least three of these courses should be taken at the 300 level or above.

UBuenos Aires

Students enrolled in the UBuenos Aires study abroad program who are interested in completing an LAS minor must enroll in the following courses at Universidad de Belgrano:

- History of Latin America or Estudios Culturales Latinoamericanos (either one must fulfill the UM equivalency for LAS101)
- One Spanish language course or, for students at the advanced level in Spanish, one course taught in Spanish not to include PEAL262 or PEAL302
- Three additional courses from those listed in the "Available Courses List": https://goabroad.miami.edu/index.cfm?FuseAction=Programs.ViewProgram&Program_ID=10256

Students wanting to apply these classes towards an LAS major should consult with the academic director of Latin American Studies for further guidance.

Mathematics

<http://www.math.miami.edu>

Dept. Code: MTH

Educational Objectives

The aim of our mathematics degree programs is to provide students with a core knowledge of mathematics essential to the understanding of science and other disciplines. Students should gain substantial problem solving and critical reasoning skills and should develop an understanding of the conceptual underpinnings of mathematics. The knowledge gained through these programs should provide the necessary background in mathematics for those students planning to go on to graduate study in mathematics and related fields. This knowledge should also prepare those students who will be immediately entering careers in science, business, education or other fields which are increasingly making use of mathematics.

Degree Programs

- Bachelor of Arts and Bachelor of Science

Major

The requirements for a major in mathematics (p. 107) vary according to the objectives of the student. There are **seven courses** required of all mathematics majors.

An **additional four courses** are required, selected from one of the following track options:

- Core Mathematics
- Applied Analysis
- Computational Mathematics
- Probability and Statistics
- Secondary School Teaching
- Mathematical Economics

Minor

A student seeking a minor in mathematics (p. 108) must have credit for a **calculus sequence**: MTH 161-MTH 162 or MTH 171-MTH 172.

In addition, a minor in mathematics requires **three courses** from a list of approved courses for the minor. (p. 108) All three courses must be taken in the Department of Mathematics, University of Miami. A grade of C- or better is required for each of the three courses applied toward the minor and the quality point average for the three courses must be 2.5 or above.

Departmental Honors

Requirements for Departmental Honors in Mathematics (p. 107):

The student must complete **three sequences** from a list of approved two-course sequences. The student must attain at least a B in each course used to fulfill this requirement. In addition, the student must attain at least a 3.5 average over all courses counted toward the mathematics major and an overall (university-wide) average of at least 3.3.

For requirements leading to the Master of Arts, Master of Science, or Doctor of Philosophy degrees, with a major in mathematics, see the Bulletin of the Graduate School (p. 408).

Majors

B.A. or B.S. in Mathematics (p. 107)

Minors

Minor in Mathematics (p. 108)

B.A. or B.S. in Mathematics

The requirements of a major in mathematics vary according to the objectives of the student. There are seven courses required of all mathematics majors. An additional four courses are required selected from one of six track options: (p. 108)

(Requirements for Departmental Honors in Mathematics (p. 108) are given at the end of this section.)

Courses Required of All Mathematics Majors:

MTH 161 or MTH 171	Calculus I	4
MTH 162 or MTH 172	Calculus II	4
MTH 210	Introduction to Linear Algebra	3
MTH 230	Introduction to Abstract Mathematics	3
MTH 310	Multivariable Calculus	3
MTH 461	Survey Of Modern Algebra	3

or MTH 561	Abstract Algebra I	3
MTH 433	Advanced Calculus	
or MTH 533	Introduction to Real Analysis I	

Track Options:

Select four courses from one of the following Tracks:	12
Core Mathematics Track:	
Select four of the following:	
MTH 510	Linear Algebra
MTH 512	Elementary Complex Analysis
MTH 531	Topology I
MTH 532	Topology II
MTH 534	Introduction to Real Analysis II
MTH 551	Introduction to Differential Geometry
MTH 562	Abstract Algebra II
Applied Analysis Track: ¹	
MTH 311	Introduction to Ordinary Differential Equations
MTH 512	Elementary Complex Analysis
Select one of the following:	
MTH 513	Partial Differential Equations I
& MTH 514	and Partial Differential Equations II
MTH 515	Ordinary Differential Equations
& MTH 516	and Dynamics and Bifurcations
Computational Mathematics Track:	
MTH 320	Introduction to Numerical Analysis
CSC 317	Data Structures And Algorithm Analysis
MTH 520	Numerical Linear Algebra
& MTH 521	and Numerical Methods In Differential Equations
Probability and Statistics Track:	
MTH 224	Introduction to Probability and Statistics
MTH 524	Introduction to Probability Theory
& MTH 525	and Introduction to Mathematical Statistics
MTH 542	Statistical Analysis
Secondary School Teaching Track: ²	
MTH 224	Introduction to Probability and Statistics
MTH 309	Discrete Mathematics I
Select two of the following:	
MTH 502	History of Mathematics
MTH 504	Foundations of Geometry
MTH 505	Theory of Numbers
Mathematical Economics Track:	
MTH 524	Introduction to Probability Theory
& MTH 525	and Introduction to Mathematical Statistics
ECO 512	Mathematical Economics (II)
Select one of the following:	
ECO 520	Econometrics
ECO 521	Graduate Macroeconomic Theory
ECO 533	Advanced Microeconomic Theory

¹ Course work in physics is desirable.

² This option is only for those obtaining a teaching credential.

Notes

- It would be useful for students planning to do graduate study in mathematics to complete the following courses: MTH 531, MTH 532, MTH 533, MTH 534, MTH 561, MTH 562.
- Students interested in **actuarial science** should choose the Probability and Statistics option; for these students a finance minor is recommended.
- Transfer students will be permitted to apply up to 14 transfer credit hours towards the major; however, the courses MTH 461 (or MTH 561) and MTH 433 (or MTH 533) must be completed at the University of Miami.
- A grade of C- or better is required for each course applied toward the major; the overall quality point average for University of Miami courses applied toward the major must be 2.5 or above.

Requirements for Departmental Honors in Mathematics:

Select three of the following sequences	18	
MTH 513	Partial Differential Equations I	6
& MTH 514	and Partial Differential Equations II	
MTH 515	Ordinary Differential Equations	6
& MTH 516	and Dynamics and Bifurcations	
MTH 520	Numerical Linear Algebra	6
& MTH 521	and Numerical Methods In Differential Equations	
MTH 524	Introduction to Probability Theory	6
& MTH 525	and Introduction to Mathematical Statistics	
MTH 531	Topology I	6
& MTH 532	and Topology II	
MTH 533	Introduction to Real Analysis I	6
& MTH 534	and Introduction to Real Analysis II	
MTH 561	Abstract Algebra I	6
& MTH 562	and Abstract Algebra II	

The student must attain at least a B in each course used to fulfill this requirement. In addition, the student must attain at least a 3.5 average over all courses counted toward the mathematics major and an overall (university-wide) average of at least 3.3.

A combined major in meteorology and mathematics (p. 286) is available. For specific information please see the Meteorology section of the bulletin.

Minor in Mathematics

www.math.miami.edu

A student seeking a minor in mathematics must have credit in a **calculus sequence**: MTH 161-MTH 162 or MTH 171-MTH 172.

In addition, a minor in mathematics requires **three of the following courses**.

Select three of the following:	9
MTH 210	Introduction to Linear Algebra
MTH 211	Calculus III

or MTH 310	Multivariable Calculus	
MTH 224	Introduction to Probability and Statistics	
MTH 230	Introduction to Abstract Mathematics	
MTH 309	Discrete Mathematics I	
MTH 311	Introduction to Ordinary Differential Equations	
MTH 320	Introduction to Numerical Analysis	
MTH 359	Mathematical Models in Biology and Medicine	
MTH 433	Advanced Calculus	
MTH 461	Survey Of Modern Algebra	
Total Credit Hours		9

Notes

- All three courses must be taken in the Department of Mathematics, University of Miami.
- It is possible to select certain 500 level mathematics courses among the three, with prior approval of the Mathematics Department.
- A grade of C- or better is required for each of these three courses and the quality point average for the three courses must be 2.5 or above.

Microbiology and Immunology

<http://www.as.miami.edu/microbiology-immunology>

Dept. Code: MIC

Introduction

Microbiology and Immunology is an ancillary department in the College of Arts and Sciences. Our primary goal is to educate students in their chosen field and instill into them a desire for lifelong learning. Research opportunities and laboratory engagement help create knowledge in our students while preparing them to become active members of the scientific and public communities. A major in Microbiology and Immunology requires thorough preparation in chemistry, biology, biochemistry, physics, and mathematics.

Educational Objectives

1. To expose students to the various disciplines within the field of Microbiology and Immunology, including virology, parasitology, microbial genetics, immunology and medical bacteriology.
2. To introduce students to special projects and/or research opportunities in laboratories at the School of Medicine.
3. To provide laboratory experience for the development of skills required for the conduct of research.
4. To make students aware of current cutting edge research in the field of Microbiology and Immunology by attending seminars of speakers from within and outside the University.

Degree Programs

- A Bachelor's of Science degree is awarded to all microbiology and immunology majors upon completion of the requirements. A chemistry minor is automatically received however, a student's choice of minor may be science or non-science.

Advanced Writing and Communication

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Microbiology and Immunology

should take at least one course from the following MIC 201, MIC 301, MIC 302, MIC 304 or MIC 323.

Departmental Honors

Students that wish to gain a deeper understanding of Microbiology and Immunology can choose to write a thesis. The following program constitutes receiving Departmental Honors in Microbiology and Immunology.

1. Overall GPA 3.3 or higher
2. Six credit hours of Special Projects (MIC 451, MIC 452, MIC 453, MIC 454, MIC 455 or MIC 456) carried out under supervision of a member of the Microbiology and Immunology faculty, culminating in a senior thesis that includes 15 references. Once the mentor and student have revised and finalized the document a hard copy must be turned in to the Program Director.

Majors

Major in Microbiology and Immunology

- B.S. in Microbiology and Immunology (p. 109)

Minors

Minor in Microbiology and Immunology

- Microbiology and Immunology (p. 111)

B.S. in Microbiology and Immunology

Minimum requirements are:

Required MIC Courses		
Select one of the following:		5
MIC 301	Introduction to Microbiology and Immunology ^{1,2,4}	
MIC 303 & MIC 304	Part 1 of 2: Introductory Microbiology and Immunology (Lecture) and Part 2 of 2: Introductory Microbiology and Immunology (Lab) ^{1,2,4}	
Other Required Courses		
MIC 319	Innate Immunity ^{2,3}	3
MIC 321	Immunobiology ^{2,4}	3
11 credit hours of MIC Courses Required		11
Elective MIC Courses		
Select 13 credit hours of the following:		13
MIC 201	Modern Plagues and Society	
MIC 322	Medical Parasitology ⁴	
MIC 323	Principles of Microbial Pathogenesis ³	
MIC 436	Fundamental and Medical Virology ⁴	
MIC 441	Microbiology and Immunology Colloquium ^{3,4}	
Research in MIC for Credit		
(only 6 credit hours may be applied to count toward the 13 MIC Elective hours, any credits over 6 count as elective credits toward the 120 credits required for graduation)		
MIC 451	Special Projects in Immunobiology ^{5,6}	
MIC 452	Special Projects in Parasitology ^{5,6}	
MIC 453	Special Projects in Pathogenic Bacteriology ^{5,6}	

MIC 454	Special Projects in Microbial Genetics ^{5,6}	
MIC 455	Special Projects in Immunogenetics ^{5,6}	
MIC 456	Special Projects in Virology ^{5,6}	
Outside Electives that be taken to count toward the 13 credit hours above (3 courses maximum)		
BIL 352	Techniques in Scanning Electron Microscopy ⁴	
	or BIL 554 Electron Microscopy	
BIL 255	Cellular and Molecular Biology	
GSC 310	Microbes and the Environment	
	or MSC 465 Marine Comparative Immunology	
Required Natural Science Courses		
CHM 111 & CHM 113	Principles of Chemistry I and Chemistry Laboratory I	4
CHM 112 & CHM 114	Principles of Chemistry II and Chemistry Laboratory II	4
CHM 201 & CHM 205	Organic Chemistry I (Lecture) and Organic Chemistry Laboratory I	4
CHM 202 & CHM 206	Organic Chemistry II (Lecture) and Organic Chemistry Laboratory II	4
BIL 150 & BIL 151	General Biology and General Biology Laboratory	5
BIL 160 & BIL 161	Evolution and Biodiversity and Evolution and Biodiversity Laboratory	5
BMB 401	Biochemistry For The Biomedical Sciences	3
Select one of the following Physics Options:		10-11
Option 1:		
PHY 101 & PHY 106	College Physics I and College Physics Laboratory I	
PHY 102 & PHY 108	College Physics II and College Physics Laboratory II	
Option 2:		
PHY 205	University Physics I	
PHY 206	University Physics II	
PHY 207	University Physics III	
PHY 208	University Physics II Lab	
PHY 209	University Physics Iii Lab	
Select two semesters of Calculus including:		8
MTH 162	Calculus II	
Select one of the following Computer Science or Statistics courses:		3-4
CSC 120	Computer Programming I	
CSC 210	Computing for Scientists	
MTH 224	Introduction to Probability and Statistics	
PSY 292	Introduction To Biobehavioral Statistics For Non-Majors	
SOC 211	Quantitative Methods for Sociologists	
EPS 553	Introductory Statistics	
Total Credit Hours		85-87

¹ Honors students must take both the MIC 301 or MIC 303/MIC 304 and MIC 302.

² Required of all Microbiology and Immunology majors.

³ MIC 201, MIC 304, MIC 319, MIC 323, GSC 310, BIL 554 Fall Semester only

⁴ MIC 301, MIC 302, MIC 303, MIC 321, MIC 322, MIC 436 Spring Semester only

⁵ MIC 441 Fall and Spring Semesters

⁶ MIC 451, MIC 452, MIC 453, MIC 454, MIC 455, MIC 456 all require that you have already completed 17 credit hours in MIC/MIC electives and a 3.0 cumm GPA with permission of Program Director or Roger Fall and Spring Semester

All MIC majors are required to have a minor (science or non-science). Students automatically get a CHM minor provided that they take one year of organic chemistry while in residence at UM.

Transfer students seeking a Microbiology and Immunology major must earn at least 10 credit hours taken in residence at UM beyond MIC 301 in the courses listed above for majors.

**4-year Sample Curriculum
(Assuming courses are taken during the fall/spring)**
This is a guide and is not meant to take the place of the advice of your major advisor, you should consult with them before making any changes.

Freshman Year		
Fall		Credit Hours
MIC 201	Modern Plagues and Society (Optional course)	3
CHM 111	Principles of Chemistry I	3
CHM 113	Chemistry Laboratory I	1
BIL 150	General Biology	4
BIL 151	General Biology Laboratory	1
Select one of the following:		3
PSY 110	Introduction to Psychology	
People and Society Cognate Course		
ENG 105	English Composition I	3
Term Credit Hours:		18
Spring		
MIC 301 or 303	Introduction to Microbiology and Immunology or Part 1 of 2: Introductory Microbiology and Immunology (Lecture)	5
BIL 160	Evolution and Biodiversity	4
BIL 161	Evolution and Biodiversity Laboratory	1
CHM 112	Principles of Chemistry II	3
CHM 114	Chemistry Laboratory II	1

ENG 106 or 107	English Composition II or English Composition II: Science and Technology	3
Term Credit Hours:		17
Sophomore Year		
Fall		
MIC 304	Part 2 of 2: Introductory Microbiology and Immunology (Lab) (If 303 was taken semester prior)	2
MIC 319	Innate Immunity	3
Arts and Humanities Cognate Course		3
CHM 201	Organic Chemistry I (Lecture)	3
CHM 205	Organic Chemistry Laboratory I	1
MTH 161	Calculus I	4
Foreign Language		3
Term Credit Hours:		19
Spring		
MIC 321	Immunobiology	3
CHM 202	Organic Chemistry II (Lecture)	3
CHM 206	Organic Chemistry Laboratory II	1
MTH 162	Calculus II	4
BIL 255	Cellular and Molecular Biology	3
Foreign Language or SOC		3
Term Credit Hours:		17
Junior Year		
Fall		
MIC 323	Principles of Microbial Pathogenesis	3
GSC 310 or MSC 465	Microbes and the Environment or Marine Comparative Immunology	3
PHY 101	College Physics I	4
PHY 106	College Physics Laboratory I	1
BMB 401	Biochemistry For The Biomedical Sciences	3
Foreign Language		3
Term Credit Hours:		17
Spring		
MIC 436	Fundamental and Medical Virology	3
People and Society Cognate		3
PHY 102	College Physics II	4
PHY 108	College Physics Laboratory II	1
Statistics or Computer Science		3-4
Arts and Humanities Cognate Course		3
Term Credit Hours:		17-18
Senior Year		
Fall		
MIC 441	Microbiology and Immunology Colloquium	1

MIC 451, 452, 453, 454, 455, or 456	Special Projects in Immunobiology or Special Projects in Parasitology or Special Projects in Pathogenic Bacteriology or Special Projects in Microbial Genetics or Special Projects in Immunogenetics or Special Projects in Virology	2-6
BIL 554	Electron Microscopy	4
Elective		3
People and Society Cognate Course		3
Term Credit Hours:		13-17
Spring		
MIC 322	Medical Parasitology	3
MIC 452, 451, 453, 454, 455, or 456	Special Projects in Parasitology or Special Projects in Immunobiology or Special Projects in Pathogenic Bacteriology or Special Projects in Microbial Genetics or Special Projects in Immunogenetics or Special Projects in Virology	2-6
BIL 352	Techniques in Scanning Electron Microscopy (Cannot be taken to count toward MIC if BIL 554 has been taken)	3
Elective		3
Arts and Humanities Cognate Course		3
Term Credit Hours:		14-18
Total Credit Hours:		132-141

Minor in Microbiology and Immunology

Take three of the following:		11
MIC 301	Introduction to Microbiology and Immunology	
.....Or		
MIC 303 & MIC 304	Part 1 of 2: Introductory Microbiology and Immunology (Lecture) and Part 2 of 2: Introductory Microbiology and Immunology (Lab) (Cannot be used if MIC 301 is taken)	
.....And these two		
MIC 319	Innate Immunity	
MIC 321	Immunobiology	
Select a minimum of one credit hour from the following:		1
MIC 201	Modern Plagues and Society	
MIC 322	Medical Parasitology	
MIC 323	Principles of Microbial Pathogenesis	
MIC 436	Fundamental and Medical Virology	

MIC 441 Microbiology and Immunology Colloquium	
Total Credit Hours	12

Variations in the above programs may, in special cases, be approved by the Microbiology and Immunology undergraduate advisor and Director. All courses in Microbiology and Immunology to be credited toward a Microbiology and Immunology major or minor must be completed with a grade of C- or better with an overall GPA of 2.0.

Military Science

<http://www.as.miami.edu/armyrotc>

<http://armyrotc.fiu.edu/>

Dept. Code: MSL

Introduction

The Army Reserve Officer Training Corps is a college elective that will help students succeed in their desired career, whether civilian or military. Students who complete all ROTC requirements may be commissioned second lieutenants and serve in the Army, Army National Guard or Army Reserve.

The military science department's Reserve Officers Training Corps (ROTC) program of instruction qualifies the student for a commission in the United States Army, Army National Guard, or United States Army Reserve. The curriculum does not provide technical training in a job specialty nor does it emphasize vocational training; rather, it complements and provides a base for normal progression in the commissioned officers' educational program.

Leadership and management objectives are included in academic periods of instruction. Practical leadership experience is gained in a field training environment by attendance at a 31-day summer camp, normally between the junior and senior years. Nursing students may attend a nursing internship at Army hospitals following the normal summer camp. A leadership laboratory also provides experience in a range of leadership positions during the school year. The department offers both a four-year and a two-year program, each with its own special advantages. Students are invited to visit or write the Department of Military Science to obtain additional information.

Core Program

The program requires four years of military science courses which consist of a two-year basic course and a two-year advanced course. Students can begin the four-year program as freshmen or as sophomores.

There is also a two-year ROTC program for those students with only two years of college remaining. The two-year course is designed for junior college and other non-ROTC college transfer students, but may be utilized by students who did not enroll in the basic course outlined below.

Graduate students may also qualify for enrollment in the two-year course. Additional information regarding eligibility requirements for the two-year program may be obtained by contacting the Department of Military Science.

Women are encouraged to enroll and will be commissioned as officers in the United States Army upon completion of the ROTC curriculum. Job

opportunities for women officers in the Army are the same as those for men, excluding a few combat arms fields.

Basic Course

The basic course is normally taken as an elective subject by students in their freshman and sophomore years. The purpose of this instruction is to qualify students for entry into the advanced course by familiarizing them with the organization of the Army, military skills, and military tradition. Students do not incur any military obligation as a result of enrolling in the basic course. Enrollment in ROTC requires proof of a doctor's physical screening. Participation in regularly scheduled physical training is required. In addition to classroom instruction, a one and a half hour leadership laboratory period is required every other week.

Advanced Course

Instruction in the advanced course includes leadership and management, the exercise of command, military teaching methods, tactics, logistics, administration, history, and military justice. Leadership experience and command experience are provided by assigning advanced course students as cadet officers and noncommissioned officers. Participation in regularly scheduled physical training is a required part of the leadership training. Classroom instruction consists of two one and a quarter hour (75 minutes) periods each week and a two hour (120 minutes) leadership laboratory period every week. Only students who have demonstrated a definite potential for becoming competent officers will be selected for the advanced course.

Army Nurse Corps Option

Students enrolled in the School of Nursing curriculum leading to the degree of Bachelor of Science in Nursing may simultaneously qualify for commissions as Second Lieutenants in the Army Nurse Corps. Nursing students qualify for entry into the Officer Development Course through satisfactory completion of the General Military Course, the Basic Camp option or equivalent training. Nursing students participate in a summer Advanced Camp training program and an Army nurse training program. They provide practical and leadership experience in the clinical setting. The focus is to provide nursing cadets an experience which integrates clinical, interpersonal and leadership knowledge and skills. Emphasis is placed on practical experience under the direct supervision of an Army Nurse Corps Officer who acts as the cadet's preceptor throughout the camp period.

Professional Military Education

In addition to basic and advanced ROTC courses, cadets must complete professional military education requirements consisting of one course in each of the following areas: written and oral communication skills, U.S. military history, and computer literacy. Students should consult with the professor of military science to determine those University courses suitable for fulfilling these requirements.

Monetary Allowances

Cadets selected for admission into the advanced course qualify for a nontaxable monetary allowance of \$450–\$500 per month for up to 20 months. Cadets may also qualify for the simultaneous membership program with the United States Army Reserve or National Guard, which can provide approximately \$4,800 per semester during the last two years of school. Both the United States Army Reserve and the National

Guard offer additional monetary incentives for cadets who join their organizations (drill pay).

Army ROTC College Scholarship Program

Financial assistance is available in the form of two- or three-year ROTC academic scholarships for selected students. Under the Army ROTC Scholarship Program, the students/cadets receive FULL Tuition and Fees. Additionally, Army scholarship recipients receive a flat-rate allowance of \$1200 per year for textbooks and other expenses and \$350–\$500 per month stipend for up to 10 months per year. During the 32-day advanced course summer training between the junior and senior years, Army ROTC also pays attending cadets \$27 per day plus room and board. There are also numerous national and organizational scholarships that students may compete for as a member of Army ROTC.

Additionally, University of Miami undergraduates enrolled in the Army ROTC program are assured a combined University grant and/or scholarship award during the fall and spring semesters equal to 25% of the University's tuition charge for a maximum of four years. The subsidy is not available during the summer term. Students must maintain continuous enrollment in the Army ROTC program, must maintain satisfactory academic progress to continue receiving the subsidy, and full time enrollment in one of the University's undergraduate degree programs is required. No application is required. Awards are made automatically based on information provided by the University's Army ROTC detachment.

Uniforms and Textbooks

All uniforms and items of insignia incident to membership in the Army ROTC Program are furnished by the Department of Military Science. Textbooks are provided at no cost to students/cadets enrolled in the basic course.

Special Activities

Cadets have the opportunity to join and participate in a number of military affiliated organizations and activities, both on a voluntary and a selective basis. The Color Guard is a voluntary organization that functions as a military unit participating in military ceremonies and presenting the national colors at civic events. Cadets have the opportunity to qualify for and compete with cadets from other universities and colleges in a series of military events termed Ranger Challenge.

Awards and Decorations

Awards and decorations made available by national organizations, the University of Miami Army ROTC Alumni Association, and local and national military organizations, are presented to both basic and advanced officer course cadets each year. These plaques, trophies, medals, and ribbons symbolize superior achievement in Army ROTC and other University academic courses, and in outstanding campus and cadet corps leadership.

Prerequisite for Admission to the Professional Officer Course

1. Be at least 17 years of age at time of acceptance.
2. Be able to complete the professional officer course and graduate from the University of Miami prior to reaching the age of thirty (30) at the time of commissioning.

3. Selection by the professor of military science and acceptance by the University of Miami.
4. Execute a written agreement with the government to complete the professional officer course and accept an Army ROTC commission.
5. Enlist in the Army Reserve Component-ROTC (terminated upon receiving an Army officer commission).

Those students enrolled in the four-year Army ROTC program must complete the basic course or its equivalent, or have acceptable prior military service. Veterans and students with previous ROTC training are invited to write, visit, or call the Department of Military Science 305-284-3329 or 305-348-1619 to discuss their eligibility status.

Students desiring entry into the two-year Army ROTC program should contact the Department of Military Science one semester prior to the semester in which they wish to enroll in the professional officer course. This lead time is required to complete the application and a physical examination prior to enrollment in the professional officer course.

Leadership Laboratory

Leadership laboratory is open to students who are members of the Reserve Officer Training Corps or who are eligible to pursue a commission as determined by the professor of military science. Leadership laboratory is the formalized phase of leadership training conducted by the cadets. It is scheduled for two (120 minutes) hours every week for both the basic and advanced officer courses (non-contracted and contracted). All uniforms and equipment required for cadet activities are furnished.

Educational Objectives

To provide a base of knowledge in the areas of ethics, leadership, Communication skills, Military Leadership, U.S Military History, Tactics and Team building to include future Officer development.

Degree Programs

Students can receive degrees from the university in addition to being in the Army ROTC program, as well as being eligible (once requirements are met) to receive a minor in Military Science.

Modern Languages and Literatures

<http://www.as.miami.edu/ml>

Dept. Codes: ARB, CHI, FRE, GER, HAI, HEB, ITA, JPN, MLL, POR, SPA

Introduction

The study of languages and cultures is an integral part of a modern, global university education. At the University of Miami, students can choose courses in Arabic, Chinese, French, German, Haitian Creole, Hebrew, Italian, Japanese, Portuguese, and Spanish. All majors (French, German, Spanish), minors (Arabic Studies, Italian, Portuguese), and language programs (Chinese, Hebrew, Japanese) in the department are articulated through the notion of Global Literacy. Global literacy is the **ability to participate in sociocultural practices** by both interacting with others in different languages and by creating, presenting, and interpreting ideas through oral and written texts **in more than one language**. Consequently, global literacy involves awareness about oral and written texts, their conventions and genres, and their social, historical, political, and artistic uses. It entails linguistic proficiency in

more than one language. You cannot be global if you only live in one language. Global Literacy includes written and oral communication, critical thinking and social responsibility, and appreciation of cultural artifacts, artistic products, and new technologies in more than one language.

Global Literacy and multilingualism foster success in business, economics, education, law, medicine, natural sciences, politics, social sciences, arts, and humanities. Language study most effectively enriches academic as well as personal experiences when students choose a language based on its relevance to possible careers, to research in particular fields, to personal heritage, or to the understanding of unfamiliar cultures. Students combine advanced modern language study with majors in other fields, such as International Studies, Communications, History, Political Science (and other pre-law fields), Biology (and other pre-med fields), Nursing, English, Finance, Latin American Studies, Anthropology, Psychology, Computer Science, Sociology, and Philosophy.

The Department has Undergraduate Advisors for each language (<http://www.as.miami.edu/ml/undergraduate/advising>). You are encouraged to consult with them for placement, and must consult with them if you plan to major, minor, or study abroad (contact the Department office for names and office hours). If you plan to double major, you must have an advisor from each of your fields.

Students may qualify for a wide range of departmental awards (<http://www.as.miami.edu/ml/undergraduate/student-awards>) for excellence in linguistic and literary achievement. The Modern Languages and Literatures Awards Reception takes place annually during graduation week. Some awards are conferred through nomination by professors; others require an application. Students may obtain information on specific awards in the Department office. The annual deadline for applications is usually in early March.

Placement Guideline for MLL Courses

Most students studying a second language can determine their appropriate level by adhering to the following guidelines. However, various factors (i.e., the strength of the program in which the student previously studied the language, how long it has been since the student has used the language, the extent of the student's exposure to the language at home/in social settings; the student's knowledge of other languages, etc.) make it such that these are only guidelines and individual cases may differ. For this reason, on the first day of class of each course section, the instructor conducts a diagnostic evaluation of students' abilities. The instructor will then inform students whether that course is indeed the level or track that will benefit him/her the most or, if not, which course he/she must take. For this reason, it is extremely important that students attend their language class on the first day of class for the semester.

Students who wish to study Spanish (as a second language, native language, or heritage language) can get more tailored placement advice through our on-line placement advisor: <http://www.as.miami.edu/labs/resources/placement/index.html>.

The following are MLL's general placement guidelines (<http://www.as.miami.edu/ml/undergraduate/placement-guidelines>):

- If you have not studied Arabic, Chinese, French, German, Hebrew, Italian, Japanese, or Spanish in high school, or have completed one

to two years of high school instruction, take 101; for Portuguese, take 105.

- If you have taken 101 or its equivalent at another institution, take 102.
- If you have completed three years of high school instruction in French or Spanish, or scored a 3 on the AP language exam take 105. If you have had three years of high school Arabic, Chinese, German, Hebrew, Italian, or Japanese, take 102.
- If you have taken four years of high school French or Spanish, scored a 4 on the AP exam or a 4 on the IB exam in French or Spanish, or took the equivalent of 102 or 105 at another university, take 201. If you have taken four years of high school German, Italian or Portuguese, take 201. If you have taken four years of Arabic, Chinese, Hebrew, or Japanese, take 201.
- If you had five to six years of high school French, German, Italian, or Spanish, take 202.
- If you have taken the equivalent of 201 at another university, or scored a 5 on the AP exam, you have completed your language requirement. If you wish to continue your studies, take 202.
- If you took the equivalent of 202 in French or Spanish at another university or scored a 4 on the AP literature exam, you have completed your language requirement. If you wish to continue your studies, take 203. If you took the equivalent of 202 in German, Italian or Portuguese at another university, you have completed your language requirement. If you wish to continue your studies, take 301.
- If you scored a 5 on the AP literature exam in French, Italian or Spanish, you have completed your language requirement. If you wish to continue your studies, take 301.

The Department offers courses open to native speakers of French, German, Italian, Portuguese, and Spanish. Native speakers may *not* enroll in 101, 102, 105, 201, 202, 203, or 301 in their language. If you are a native speaker of French, German, Italian, or Portuguese, and graduated from a high school where that was the official language of instruction, you may take any course above 301 (consult with the respective Undergraduate Advisor). If you are a native speaker of Spanish and graduated from a high school where that was the official language of instruction, your first SPA course at UM must be either SPA 302 or SPA 303 or SPA 307 (which is a prerequisite for most other SPA courses).

The Department of Modern Languages & Literatures identifies as *heritage learners* of Spanish those students who begin their university studies of the language with little or no prior instruction in Spanish but who, because of family background or social experience, can already understand much casual spoken Spanish and have a passive knowledge of the language (though they may not usually speak the language themselves). In the great majority of cases, they have been born and fully educated in the United States, and may have grown up speaking principally English (or a 'mix' of Spanish and English, i.e. 'Spanglish') in the home with their grandparents, parents and siblings. Heritage learners may or may not consider themselves as "bilinguals" or "native speakers", since both of these terms carry very different connotations—linguistic, social, and psychological—for different individuals. Some state that they "do not really speak Spanish" even though they are able to comprehend much spoken language (i.e., they are "passive bilinguals"). In the great majority of cases, they self-identify as "Hispanic" or "Latino/a".

HERITAGE LEARNERS OF SPANISH MUST BE PLACED IN ONE OF THE FOLLOWING FOUR COURSES:

1. **SPA 107 Basic Spanish for Heritage Learners** is for those students with little or no prior instruction in Spanish who, because of family background or social experience, can understand casual spoken Spanish and have a passive knowledge of the language although they do not usually speak the language themselves. Generally, their abilities to read and write Spanish are very weak. **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**
2. **SPA 207 Intermediate Spanish for Heritage Learners** is for those students **WHO HAVE ALREADY TAKEN AND PASSED SPA 107** or who have studied Spanish for **AT LEAST TWO YEARS IN HIGH SCHOOL.** They can understand casual spoken Spanish and have some functional ability in speaking, reading and writing the language. **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**
3. **SPA 208 Advanced Spanish for Heritage Learners** is for those students who have studied Spanish for four years in high school and who have developed functional abilities in speaking, reading and writing the language. Students who earned a score of 5 on the AP Spanish Language Exam should register for this course. **CLOSED TO STUDENTS WHO GRADUATED HIGH SCHOOL IN A SPANISH-SPEAKING COUNTRY.**
4. **SPA 307 Introduction to Literary Studies for Native/ Heritage Speakers** is intended for those students who have completed **secondary and/or university studies in a Spanish-speaking country** and for those heritage learners who demonstrate an advanced level of productive competence (in the written and spoken modes) in Spanish because of prior formal study of the language. Many heritage learners who place directly into 343 have taken AP Spanish literature in high school and earned a score of 4 or 5.

SPA 101, SPA 102, SPA 105, SPA 201, SPA 202 AND SPA 203 ARE NOT FOR HERITAGE LEARNERS. ANY HERITAGE LEARNER WHO ENROLLS IN ONE OF THESE COURSES WILL BE OBLIGATED TO SWITCH TO A HERITAGE LANGUAGE COURSE (SPA 107, SPA 207, SPA 208 OR SPA 307) DURING THE FIRST WEEK OF CLASS.

Arts and Sciences Language Requirement

The College of Arts and Sciences requires all B.A. and B.S. degree students to show competency in a language other than English by successfully completing an approved college language course at the 200-level or higher. Students wishing to fulfill the language requirement in a language not taught at UM, may request an equivalency evaluation for a course at the appropriate level offered at an accredited institution, complete the approved equivalent course, and transfer the credits. Students requesting such an equivalency evaluation must submit appropriate documentation to the MLL department for approval. For a native speaker of the language in question, a course that transfers at UM's 300-level will fulfill the language requirement. For a second language learner of the language in question, a course that transfers at UM's 200-level will fulfill the language requirement.

Writing Credits: Writing Across the Curriculum

All of the Department's 300- and 500-level courses and some 400-level courses offer writing credit. NOTE: Courses may simultaneously fulfill General Education requirements and Writing Credit, or the Foreign Language Requirement and Writing Credit.

Cognates

Most of the Department's courses are part of cognates in one of two Areas of Knowledge: Arts & Humanities, and People & Society. A course cannot simultaneously complete a cognate in an Area of Knowledge and the College of Arts & Sciences' Foreign Language Requirement.

Degree Programs

Students pursuing a single major in Arts and Sciences earn a BA.

Major

Goals of the Major

The major is designed to allow students to gain advanced linguistic, cultural and literary competence in the given language. With each course students grow in the capacity to communicate, to critically see and understand the world not only in more sophisticated perspectives but also from other geopolitical positions, and in understanding and appreciating media, new technologies, film, literary and cultural products which also foster the appreciation of learners' own language, culture, and society. Students will develop analytical and critical skills. They will learn to build coherent arguments orally and in writing; to develop tools for the interpretation of various texts; to perform research and write critical papers; to find and evaluate sources of information; to heighten their sensitivity to contexts of language, and to appreciate language as art. Students will also acquire a broad, structured knowledge of the history, literature and culture in the target language. Finally, they will learn to carry out cultural comparisons and to view their own culture with new eyes.

You do not have to be a student of the College of Arts and Sciences to major in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a major in a modern language are encouraged to study abroad. The International Education and Exchange Program (IEEP in Rhodes House, room 37F) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order to take full advantage of study abroad, students should visit IEEP early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

Minor

You do not have to be a student of the College of Arts and Sciences to minor in a modern language; you need only the approval of your college or school advisor and to complete the departmental requirements. If you wish to complete a double degree, consult with an Arts and Sciences Advisor.

Students completing a minor in a modern language are encouraged to study abroad. The International Education and Exchange Program (IEEP in Rhodes House, room 37F) sponsors programs for Chinese, French, German, Italian, Japanese, Portuguese, and Spanish. It is also possible to fulfill some Arts and Sciences distribution requirements abroad. In order

to take full advantage of study abroad, students should visit IEEP early in their university careers, discuss course equivalencies with the Study Abroad Advisor for their chosen languages (contact the Department office for names and office hours), and consult with their major advisors. Credit hour toward the major for courses taken abroad will be determined on an individual basis.

Departmental Honors

Departmental Honors in Modern Languages are possible in the three languages for which the major is offered: French, German and Spanish. In order to request admission to Departmental Honors, candidates must have completed at least twelve credit hours at the 300 level or above. They must have a GPA of 3.5 in all their major courses and a 3.5 overall average GPA. Both GPAs must be maintained in order to graduate with Departmental Honors.

During their junior year, candidates for honors will identify an honors thesis supervisor and a second reader and request admission to Departmental Honors. Admission to candidacy must also be approved by the Director of Undergraduate Studies for the appropriate language.

In addition to fulfilling the regular major requirements, students must register in their Senior year for FRE or GER or SPA 594-595, Senior Honors Thesis. This is a two-semester, six credit hour sequence: 594 for research and 595 for the actual writing of the honors thesis.

The honors thesis advisor and the second reader will determine whether the finished thesis merits Departmental Honors.

Majors

Major in Modern Languages and Literatures

- B.A. in French, German, or Spanish (p. 116)

Minors

Minors in Modern Languages and Literatures

- Arabic Studies (p. 117)
- French, German, Italian, Portuguese, or Spanish (p. 117)
- Modern Languages (p. 117)

B.A. in French, German, or Spanish

A major consists of at least 24 credit hours beyond 202/207, which must include the following distribution:

- at least 9 credit hours must be at the 300 level;
- at least 3 credit hours must be at the 400 level;
- at least 3 credit hours must be at the 500 level (capstone course);
- Spanish and French majors must take at least one course that focuses on a period prior to the 20th century.

Spanish majors must take one of the following:	3
SPA 353 Colonial Spanish American Topics	
SPA 363 Medieval And Early Modern Peninsular Topics	
SPA 354 19Th-Century Spanish American Topics	
SPA 364 18th and 19th CENTURY PENINSULAR TOPICS	
French majors must take one of the following:	3

FRE 363	Medieval And Renaissance Topics In French
FRE 364	Early Modern Topics In French
FRE 365	19Th Century Topics In French

- For German majors with GER 202 and Spanish and French majors with SPA 203/FRE 203, the remaining 6 credit hours can be taken in any of the 300 or 400-level courses of the respective programs.
- Five writing intensive classes (W) in the department are required of all majors. Thus, students completing a major in FRE, GER, and SPA satisfy the College of Arts and Sciences writing requirement in the discipline.

In consultation with their MLL advisor, students can have up to 1 course (3 credit hours) from among the MLL courses or the FRE, GER, and SPA courses taught in English (numbered 310-319) count toward their French, German, or Spanish major.

Only one professional Spanish course (SPA 432 or SPA 433) will count towards the Spanish major, although students are free to take both.

Students with transfer credit hours at the 300-level must take at least 21 graded credit hours at or above the 300-level at the University of Miami; i.e., up to 9 credit hours at the 300- and 400-level may be transferred from another institution or a study abroad program not administered by UM. Up to 12 credit hours taken abroad in a UM-administered program may count towards any of the majors in the Department. Students must earn a grade of C- or higher in every course counting toward the major, and maintain a minimum overall average of 2.5 in the major.

Capstone Courses

The final course in the major is the capstone course (501) which must be taken in residence. This course will:

- Integrate the various skills acquired during the course of study (linguistic, analytical, knowledge-based);
- Incorporate interpretive as well as presentational modes of communication;
- Contain an over-arching and cohesive theme;
- Include an element of collaboration among students.

It will constitute a moment of recapitulation of, synthesis, and reflection on a student's experience in the major as well as a bridge towards graduate-level studies, should s/he decide to pursue them.

Of the 24 credit hours required for the major, a minimum of 12 credit hours must be earned in courses taught by MLL faculty (whether on campus or in faculty-led study-abroad programs). Since we encourage students to study abroad in UM-sponsored programs, up to 12 credit hours from these programs may be applied toward the major. Up to 6 transfer credit hours from other institutions may count toward the major; whether these are credit hours transferred from another U.S. institution or from non-UM study abroad programs, transferred credit hours must be granted UM equivalency in order to be eligible to count toward the major. Please note, however, that the total number of combined UM study-abroad (exclusive of MLL faculty-led programs) and transfer credit hours shall not exceed 12 credit hours.

For example:

- A student may use 3 transfer credit hours with UM equivalency and 9 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 6 transfer credit hours with UM equivalency and 6 credit hours from a UM-sponsored study abroad program toward fulfillment of the major; the remaining 12 credit hours must be earned in courses taught by MLL faculty.
- A student may use 12 credit hours from a UM-administered study-abroad program not led by MLL faculty and 12 credit hours in courses taught by MLL faculty to fulfill the major.

Exceptions to this 12 credit hours rule may be made in cases where a student will participate in a UM-administered study-abroad program for a full academic year.

Minor in Arabic Studies

A minor in Arabic Studies consists of a minimum of 15 credit hours, passed with a "C" or higher.

Select a minimum of three credit hours in a 200-level Arabic language course:	3
ARB 201 Intermediate Arabic	
ARB 202 Intermediate Arabic II	
ARB 207 Arabic For Heritage Learners	
or the equivalent	
Select a minimum of three credit hours in one of the following: ¹	3
ARB 310 Topics In Arabic Literature And Culture In Translation	
ARB 410 Language And Power In The Arab World	
ARB 312 Arab Cultures: A Cultural History Of The Arab World	
ARB 315 Topics In Gender And Sexuality In Translation	
Select a minimum of three additional credit hours in any ARB course beyond ARB 101	3
Select a minimum of three credit hours, outside of ARB courses, in humanities or social science courses focused on the Middle East, North Africa, Islam, or the Arab world.	3
REL 171 Introduction to Islam	
ARH 260 Islamic Art	
INS 352 Panoramic View of the Middle East	
GEG 242 Economic and Political Geography of the Middle East	
POL 387 Politics of the Middle East	
or another relevant course as approved by the program director	
Select a minimum of three additional credit hours from either an ARB course beyond ARB 101 or any approved course focused on the Middle East, North Africa, Islam, or the Arab world	3
Total Credit Hours	15

¹ Arabic Studies courses are taught in English.

Up to 9 credit hours taken abroad in an Arabic-speaking country are eligible to fulfill the requirements for the minor. Up to 6 transfer credit hours from an accredited university or 4-year college in another region of the world are eligible to fulfill the requirements for the minor. In all cases, whether the credit hours are from a UM-affiliated study abroad program or transfer credit hours from any institution, the credit hours' UM equivalency, if any, will be determined by the UM Arabic Studies Program Director; ARB 310 must be taken within the Department of Modern Languages and Literatures at UM; and the student must fulfill the distribution of requirements and other criteria stipulated above.

If a student has studied Modern Standard Arabic (fusha) in another setting (e.g., a high school foreign language program or schooling in an Arab country), she/he may request a proficiency evaluation from the Program Director. If the student's Modern Standard Arabic is equivalent to, or beyond, the Intermediate level, the student may be exempted from the requirement to earn 3 credit hours in a 200-level Arabic language course; however, the student will still be required to take at least 9 credit hours of ARB courses and a total of 15 credit hours, as stipulated above, to complete the minor.

Minor in French, German, Italian, Portuguese, or Spanish

A minor in one modern language consists of a minimum of 12 credit hours in that language, earned according to the following guidelines: a minimum of 9 credit hours must be at the 300 and/or 400 level, a minimum of 6 credit hours must be graded credit hours taught by UM faculty, a maximum of 3 credit hours may be transferred from another institution or from a study-abroad program not administered by UM.

Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.

Minor in Modern Languages

The minor in two foreign languages consists of at least 24 graded credit hours with 12 credit hours in one language on any level and 12 credit hours in any other language, 6 of which must be on the 300-level or above. For example: ARB 101, ARB 102, ARB 201 and ARB 202 along with SPA 202, SPA 203, SPA 301 and SPA 322 would constitute a Minor in Modern Languages; so would FRE 201, FRE 203, FRE 301 and FRE 330 along with ITA 101, ITA 102, ITA 201 and ITA 202. Many other combinations are possible. This minor must include 6 graded credit hours per language from the University of Miami. Students must earn a grade of C- or higher in every course counting toward the minor, and maintain a minimum overall average of 2.5 in the minor.

Neuroscience

<https://www.as.miami.edu/neuroscience/>; <http://www.psy.miami.edu/>; <http://neuroscience.med.miami.edu/undergraduate-program>

Dept. Code (NEUR)

Introduction

Neuroscience is the study of the nervous system (i.e., the brain, spinal cord, and peripheral nerves), the mechanisms of behavior, and the nature of mind and consciousness. The Neuroscience Program is a rigorous, interdisciplinary program between the Department of Psychology,

the Department of Biology, and the Miller School of Medicine. The neuroscience major provides a broad-based liberal arts background that can be applied to a variety of career fields. It is also excellent preparation for medical school or graduate study in neuroscience, psychology, biology or behavioral medicine.

Educational Objectives

The neuroscience major seeks to provide students with exposure to and a fundamental understanding of the neural and bio behavioral sciences by delivering an integrative educational experience and promoting interactions among faculty, graduate students, and undergraduate students in basic scientific inquiry, advising, and mentoring.

Degree Programs

All neuroscience majors are required to pursue a Bachelor of Science (B.S.) degree.

Departmental Honors

Students can earn Departmental Honors in Neuroscience by demonstrating excellence in their coursework and completing a Senior Honors Thesis in Neuroscience.

1. **Excellence in Coursework** – A minimum 3.3 combined GPA and a minimum 3.5 neuroscience GPA is required.
2. **Senior Honors Thesis in Neuroscience** – This is an independent empirical research project that is completed across two semesters (i.e., NEU 580 and NEU 581) under the supervision of a faculty mentor in the Neuroscience Program. At least one year of prior research experience with the faculty mentor is highly recommended. Written approval from the faculty mentor and the Director of Undergraduate Academic Services in the Department of Psychology is also required.

Other

The neuroscience major is administered by the Department of Psychology's Undergraduate Academic Services for Psychology (UASP) office. UASP provides comprehensive advising services to all students on a walk-in basis from 9:00 a.m. to 4:30 p.m., Monday through Friday, in Flipse 508. Appointments are only necessary during the official advising period for registration.

Freshmen and Transfer Students

All freshmen neuroscience majors in the College of Arts and Sciences are required to participate in the Department of Psychology's year-long orientation, advising, and mentoring program, FACT FORUM (Freshmen Advising Contact Term and Faculty Overview of Research and Undergraduate Mentoring). These courses are one credit hour general electives designed to enable students to take ownership of their education by familiarizing them with the academic rules and regulations of the University of Miami, helping them think critically about their curriculum, providing them with in-depth exposure to research, and preparing them to enter the professional world.

New transfer students are highly encouraged to participate in a similar one semester program called TUMS (Transfer to the University of Miami). This course is specifically designed to ease the transition for new transfer students to the University of Miami.

Students who declare a neuroscience major after matriculation may be required to take part in an advising seminar prior to declaring the neuroscience major.

Prerequisites

Students must adhere to all prerequisites. They are also required to earn a minimum grade of C- in any course that is to serve as a prerequisite for another course in the neuroscience major. Students who enroll in NEU or PSY courses without the specified prerequisites may be dropped.

Advanced Writing and Communication Requirement

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, neuroscience majors must take 4 writing-designated courses, including 1 writing-designated course in the PSY or NEU area. Two such writing courses, PSY 390 and NEU 403, are already built into the neuroscience major.

Research Experience for Course Credit

Research experience is considered an integral part of the neuroscience major. Students may earn course credit (i.e., NEU 280, NEU 380, and/or NEU 480) by working in the laboratory of a Neuroscience Program faculty mentor. Students can repeat NEU 280, NEU 380, and NEU 480 without penalty. A minimum 2.8 combined and neuroscience GPA is required to earn research credit. Written permission from a faculty mentor and UASP is also required. Note: Students may volunteer in a research laboratory by completing the appropriate volunteer paperwork with UASP if they are unable to register for research credit.

Research Participation in PSY 110

As an introduction to behavioral science, all students enrolled in PSY 110 may be required to participate as subjects in research studies conducted by faculty and/or graduate students, or by reading selected research reports and writing article critiques. Refer to the course syllabus for more details. Note: This introductory research participation requirement is not sufficient for students interested in attending graduate school in neuroscience or psychology.

Senior Assessment

As part of the Department of Psychology's accreditation plan, all senior neuroscience majors will be required to take part in a senior assessment that may last up to four hours. Assessment scores will not affect the students' graduation status; however, failure to complete the assessment may delay or prevent graduation.

Transfer Courses

Courses from other colleges or universities may be assigned NEU or PSY credit at UM with written approval by UASP.

Majors

Major in Neuroscience

- B.S. in Neuroscience (p. 119)

Minors

Minor in Neuroscience

There is no minor available in neuroscience.

B.S. in Neuroscience

The major in neuroscience requires roughly 50 credit hours in core BIL, NEU, and PSY courses, and roughly 26 credit hours in auxiliary CHM and PHY courses.

Core Courses		
BIL 150	General Biology	4
Select one of the following:		1
BIL 151	General Biology Laboratory	
BIL 152	HHMI General Biology Laboratory.	
BIL 160	Evolution and Biodiversity	4
Select one of the following:		1
BIL 161	Evolution and Biodiversity Laboratory	
BIL 162	HHMI Evolution And Biodiversity Laboratory.	
BIL 250	Genetics	3
BIL 255	Cellular and Molecular Biology	3
or BIL 259	Life In The Cell	
BIL 268	Neurobiology	3
NEU 342	Neural Mechanisms of Disease	3
NEU 403	Neuroscience laboratory	4
Select one of the following:		3
NEU 400	Neurogenetics	
NEU 440	Neural Mechanisms Of Psychiatric Disorders	
NEU 465	Cellular and Molecular Neuroscience	
NEU 468	Developmental Neuroscience.	
PSY 110	Introduction to Psychology	3
PSY 290	Introduction To Research Methods	3
PSY 291	Introduction To Biobehavioral Statistics	3
PSY 390	Intermediate Research Methods And Biobehavioral Statistics	3
PSY 425	Psychobiology	3
Select one additional BIL elective of the following: ¹		3
BIL 330	Ecology	
BIL 360	Comparative Physiology	
BIL 365	Endocrinology	
BIL 441	Animal Behavior	
BIL 455	Developmental Biology	
BIL 511	Biometry	
BIL 520	Evolution	
BIL 568	Evolution and development of Nervous Systems	
BMB 401	Biochemistry For The Biomedical Sciences	
MIC 301	Introduction to Microbiology and Immunology	
or MIC 303	Part 1 of 2: Introductory Microbiology and Immunology & MIC 304 (Lecture)	
	and Part 2 of 2: Introductory Microbiology and Immunology (Lab)	
NEU 342	Neural Mechanisms of Disease	
NEU 400	Neurogenetics	
NEU 440	Neural Mechanisms Of Psychiatric Disorders	
NEU 465	Cellular and Molecular Neuroscience	

NEU 468	Developmental Neuroscience.	
Select one additional BIL elective or PSY elective of the following: ¹		3
BIL 330	Ecology	
BIL 360	Comparative Physiology	
BIL 365	Endocrinology	
BIL 441	Animal Behavior	
BIL 455	Developmental Biology	
BIL 511	Biometry	
BIL 520	Evolution	
BIL 568	Evolution and development of Nervous Systems	
BMB 401	Biochemistry For The Biomedical Sciences	
MIC 301	Introduction to Microbiology and Immunology	
or MIC 303	Part 1 of 2: Introductory Microbiology and Immunology & MIC 304 (Lecture)	
	and Part 2 of 2: Introductory Microbiology and Immunology (Lab)	
NEU 342	Neural Mechanisms of Disease	
NEU 400	Neurogenetics	
NEU 440	Neural Mechanisms Of Psychiatric Disorders	
NEU 465	Cellular and Molecular Neuroscience	
NEU 468	Developmental Neuroscience.	
PSY 240	Abnormal Psychology	
PSY 320	Psychology Of Drugs And Behavior	
PSY 345	Abnormal Child Psychology	
PSY 391	Tests And Measurements	
PSY 426	Health Psychology	
PSY 491	Advanced Biobehavioral Statistics	
Auxiliary Courses		
Select one of the following CHM sequences:		16
Traditional Chemistry:		
CHM 111	Principles of Chemistry I & CHM 113 and Chemistry Laboratory I	
CHM 112	Principles of Chemistry II & CHM 114 and Chemistry Laboratory II	
CHM 201	Organic Chemistry I (Lecture) & CHM 205 and Organic Chemistry Laboratory I	
CHM 202	Organic Chemistry II (Lecture) & CHM 206 and Organic Chemistry Laboratory II	
Chemistry for the Biosciences:		
CHM 121	Chemistry For The Biosciences I & CHM 113 and Chemistry Laboratory I	
CHM 221	CHM211 Chemistry for the Biosciences II & CHM 114 and Chemistry Laboratory II	
CHM 222	CHM212 Chemistry for the Biosciences III & CHM 205 and Organic Chemistry Laboratory I	
CHM 206	Organic Chemistry Laboratory II	
Select one of the following PHY sequences:		10-11
College Physics:		
PHY 101	College Physics I & PHY 106 and College Physics Laboratory I	

PHY 102 College Physics II & PHY 108 and College Physics Laboratory II	
University Physics:	
PHY 205 University Physics I	
PHY 206 University Physics II & PHY 208 and University Physics II Lab	
PHY 207 University Physics III & PHY 209 and University Physics Iii Lab	
PRISM Physics:	
PHY 201 University Physics I. Life Sciences & PHY 106 and College Physics Laboratory I	
PHY 202 University Physics II - Life Sciences. & PHY 108 and College Physics Laboratory II	
Total Credit Hours	76-77

¹ Note: NEU courses cannot double count for a BIL elective and another required course within the neuroscience major.

Other Requirements

- Students must earn a minimum grade of C- in any course that is to count toward the neuroscience major.
- Students may repeat no more than two courses for the neuroscience major in which they received a D or an F.
- New freshmen and current students must have a minimum 1300 SAT, 30 ACT, or 3.5 combined, UM, and neuroscience GPA after 24 completed credit hours at UM to declare the neuroscience major. Note: At least 7 of these 24 credit hours must be in the BIL, CHM, or MTH courses required of the major and/or the degree.
- New transfer students must have a minimum 3.8 combined GPA to declare the neuroscience major, and at least 7 completed credit hours in the required BIL or CHM courses.
- Students are strongly advised not to continue with the neuroscience major if they have less than a 2.8 neuroscience GPA after 15 completed credit hours in the neuroscience major.
- Students must earn a minimum 2.6 neuroscience GPA to graduate with the neuroscience major.

Notes

- There are limited seats in the neuroscience major so students may be required to join a waitlist before they are able to declare.
- Neuroscience majors are required to complete 130 total credit hours to complete their B.S. degree.
- The neuroscience major can only be declared as a first major for students who are enrolled in the College of Arts and Sciences.
- AP Credit for Statistics (i.e., PSY 292) cannot count toward the neuroscience major.
- Students who declare the neuroscience major after they transfer credit for PSY 292 or complete PSY 292 at UM can use PSY 292 as a substitute for PSY 291.
- The following courses do not count toward the neuroscience major:

NEU 190 Faculty Overview Of Research And Undergraduate Mentoring(Forum)	1
NEU 280 Introduction To Research Projects I	1-3
NEU 380 Introduction To Research Projects Ii	1-3
NEU 480 Research With Writing Credit	1-3

NEU 580 Senior Honors In Neuroscience I	3
NEU 581 Senior Honors In Neuroscience Ii	3
PSY 106 Freshman Advising Contact Term (Fact)	1
PSY 190 Faculty Overview Of Research And Undergraduate Mentoring(Forum)	1
PSY 206 Transfer To The University Of Miami(Tums)	1
PSY 280 Introduction To Research Projects I	1-3
PSY 305 Introduction To Research And Graduate School	1
PSY 380 Introduction To Research Projects II	1-3
PSY 480 Research With Writing Credit	1-3
PSY 580 Senior Honors In Psychology I	3
PSY 581 Senior Honors In Psychology II	3

- All neuroscience majors must complete a minor in Biochemistry, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Science, Mathematics, Microbiology and Immunology, or Physics.
- Neuroscience majors may not earn majors or minors in Biology or Psychology.

Philosophy

<http://www.as.miami.edu/phi>

Dept. Code: PHI

Introduction

The Philosophy Department offers a wide range of courses at the undergraduate level which cover every major area of philosophy as well as its history. Students can major or minor in the subject. In addition, the department sponsors two undergraduate philosophy organizations:

- the Philosophy Club, which is open to all UM undergraduates, and
- Phi Sigma Tau, a chapter of the National Honor Society in Philosophy.

Both groups afford students regular opportunities to meet, eat, and talk philosophy with each other and with graduate students and faculty in the department. All undergraduates who are interested in philosophy are welcome to participate in these philosophical events.

Educational Objectives

Philosophy is the study of the most basic moral, scientific, legal, aesthetic, religious, and metaphysical concepts and theories by which we understand ourselves and our universe. It is a reasoned pursuit of fundamental truths, a quest for understanding, a study of principles of conduct. It analyzes the basic assumptions and concepts of other disciplines and the norms that govern interpersonal relations and the acquisition of knowledge. It seeks to establish standards of evidence, to provide rational methods of resolving conflicts, and to create techniques for evaluating ideas and arguments. Philosophers are dedicated to developing the following abilities: reasoning clearly, distinguishing between good and bad arguments, thinking through complicated questions, and using reason in situations that are often governed by emotions. Studies have shown that philosophy majors do extremely well on standardized tests, and in careers that require analytical abilities such as the practice of law and software development. But irrespective of career choice, philosophy deepens one's sense of the meaning and

varieties of human experience, and enhances self-knowledge, foresight, and sense of direction in life.

Degree Programs

The major in Philosophy leads to the degree of Bachelor of Arts. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in philosophy should take at least two (2) (properly approved writing and communication) philosophy courses.

Pre-Law Major and Minor Tracks

The Department offers major and minor tracks for students wishing to enhance their Pre-Law studies with relevant Philosophy coursework.

Pre-Med Major and Minor Tracks

The Department also offers major and minor tracks for students wishing to supplement their Pre-Med work with relevant Philosophy coursework.

Departmental Honors

A program of work toward graduation with Honors in Philosophy is available for qualified students. Interested students should consult the Departmental Director of Undergraduate Studies during their sophomore or junior years. Further information may be found under the section entitled HONORS PROGRAM.

For requirements leading to the Master of Arts and Ph.D. degree (p. 410), see the Bulletin of the Graduate School.

Majors

Majors in Philosophy

- B.A. in Philosophy (p. 121)
- B.A. in Philosophy - Pre-Law Track (p. 121)
- B.A. in Philosophy - Pre-Med Track (p. 121)

Minors

Minors in Philosophy

- Philosophy (p. 122)
- Philosophy - Pre-Law Track (p. 122)
- Philosophy - Pre-Med Track (p. 122)

B.A. in Philosophy

A major in philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0. Elective courses may be chosen to fit individual needs.

Required Courses		
PHI 210	Symbolic Logic	3
or PHI 215	Logic and Law	
PHI 271	Ancient Philosophy	3
or PHI 272	Modern Philosophy	
Select three courses at the 300 level		9
Select one of the following:		3
PHI 330	Ethics	
PHI 331	Social and Political Philosophy	
PHI 332	Philosophy of Law	

Select two of the following:		6
PHI 340	Theory of Knowledge	
PHI 341	Philosophy of Language	
PHI 343	Philosophy of Science	
PHI 344	Philosophy of Mind	
PHI 345	Metaphysics	
Select six credit hours at the 500 level		6
Total Credit Hours		30

B.A. in Philosophy - Pre-Law Track

A Pre-Law Major Track in Philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0.

Required Courses		
PHI 210	Symbolic Logic	3
or PHI 215	Logic and Law	
PHI 271	Ancient Philosophy	3
or PHI 272	Modern Philosophy	
PHI 330	Ethics	3
or PHI 331	Social and Political Philosophy	
PHI 332	Philosophy of Law	3
or PHI 333	Philosophical foundations of criminal law	
Select two of the following:		6
PHI 340	Theory of Knowledge	
PHI 341	Philosophy of Language	
PHI 343	Philosophy of Science	
Select two 500-level courses		6
Select two additional PHI courses		6
Total Credit Hours		30

B.A. in Philosophy - Pre-Med Track

A Pre-Med Major Track in Philosophy consists of a minimum of ten courses, each passed with a grade of C- or higher, with an overall GPA of 2.0.

Required Courses		
PHI 210	Symbolic Logic	3
PHI 271	Ancient Philosophy	3
or PHI 272	Modern Philosophy	
PHI 330	Ethics	3
PHI 334	Biomedical Ethics	3
PHI 343	Philosophy of Science	3
PHI 340	Theory of Knowledge	3
or PHI 344	Philosophy of Mind	
PHI 546	Evidence and Knowledge in Medicine	3
Select one 500-level courses		3
Select two additional PHI courses		6
Total Credit Hours		30

Minor in Philosophy

A minor in philosophy consists of a minimum of five courses, each passed with a grade of C- or higher with an overall GPA of 2.0. At least three of the courses must be at the 200 level or above, and at least one of these three courses must be at the 300 level or above.

The major and the minor should be planned with the advice of the department.

Minor in Philosophy - Pre-Law Track

A Pre-Law Minor Track in Philosophy consists of a minimum of five courses, each passed with a grade of C- or higher, with an overall GPA of 2.0.

Required Courses		
PHI 210	Symbolic Logic	3
or PHI 215	Logic and Law	
PHI 330	Ethics	3
or PHI 331	Social and Political Philosophy	
PHI 332	Philosophy of Law	3
or PHI 333	Philosophical foundations of criminal law	
Select one of the following:		3
PHI 340	Theory of Knowledge	
PHI 341	Philosophy of Language	
PHI 343	Philosophy of Science	
Select one other PHI course		3
Total Credit Hours		15

Minor in Philosophy - Pre-Med Track

A Pre-Med Minor Track in Philosophy consists of a minimum of five courses, each passed with a grade of C- or higher, with an overall GPA of 2.0.

Required Courses		
PHI 210	Symbolic Logic	3
PHI 334	Biomedical Ethics	3
PHI 343	Philosophy of Science	3
PHI 340	Theory of Knowledge	3
or PHI 344	Philosophy of Mind	
PHI 546	Evidence and Knowledge in Medicine	3
Total Credit Hours		15

Physical Sciences

Dept. Code: PSC

Introduction

PSC 101 is an interdisciplinary physical science course designed primarily for the non-science major. It may be used to satisfy a physical science requirement in some degree programs. Students should consult the degree requirements listed elsewhere in the Bulletin as well as their advisors for the appropriateness of this course for their programs. See also under PHY 110.

Physics

<http://www.physics.miami.edu>

Dept. Code: PHY

Introduction

The requirements for a major or minor in the Department of Physics are flexible and may be adapted to the needs of the individual student.

A grade of C- or better is required in all courses counted toward the major or minor with an overall GPA of 2.0. Any lecture course in the Physics department may be passed by means of a proficiency examination.

Note that more mathematics beyond two semesters of calculus is required for most of the physics courses at the 300 level or higher. In order to complete any Physics major sequence in four years, the student should begin elementary calculus as soon as possible. Students are encouraged to discuss an appropriate math sequence with the physics advisor. The minimum math requirement for physics major typically is as follows:

MTH 151	Calculus I for Engineers	4-5
or MTH 161	Calculus I	
or MTH 171	Calculus I	
MTH 162	Calculus II	4
or MTH 172	Calculus II	
MTH 210	Introduction to Linear Algebra	3
MTH 211	Calculus III	3
or MTH 310	Multivariable Calculus	
MTH 311	Introduction to Ordinary Differential Equations	3
Total Credit Hours		17-18

Requirements for the Master of Science and Doctor of Philosophy (p. 412) degrees will be found in the Bulletin of the Graduate School.

Majors

Majors in Physics

- B.S. in Physics - Pure Physics (p. 124)
- B.S. in Physics - Chemistry/Physics (p. 123)
- B.S. in Physics - Engineering/Physics (p. 124)
- B.S. in Physics - Marine Science/Physics (p. 124)
- B.S. in Physics - Applied Physics (p. 122)

Minors

Minor in Physics

- Physics (p. 125)

B.S. in Physics - Applied Physics

<http://www.physics.miami.edu>

This sequence is available for those intending careers in applied physics. The major is divided into tracks, depending on the student's field of interest. The Physics for the Life Sciences track is designed for premedical students.

Students must complete the core set of courses AND one track in their field of interest. Multiple tracks are allowed with prior authorization from the Department of Physics.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Applied Physics should pass at least one writing intensive course within the Physics Department. These are PHY 306, PHY 362, and PHY 506. The requirement can also be fulfilled by passing ENG 233 with a grade of C- or higher.

Core Courses

The core set of courses is required for all tracks and it includes one of the University Physics sequences with two labs (see table below), plus PHY 350, and PHY 360.

Engineering Physics Track

Additional 5 credits in physics at the 300 level or higher, including PHY 340 and one lab, plus 9 credits in Engineering with prior authorization from the Department of Physics.

Computational Physics Track

Additional 5 credits in physics at the 300 level or higher, including PHY 340 and one lab, plus 2 courses from the Computer Science BS core (p. 82) and a third course in Computer Science with prior authorization from the Department of Physics.

Medical Physics Track

Additional 5 credits in physics at the 300 level or higher, including PHY 351 and one lab, plus BME 265, BME 330, and one among BME 470, BME 520, or BME 521.

Physics for the Life Sciences Track

Additional 6 credits in physics at the 300 level or higher, including PHY 321, plus required biology and chemistry courses. In biology, the required courses are BIL 150, BIL 151, BIL 160, BIL 161, BIL 255, and either BIL 360 or BME 265. In chemistry, the students are required to take one year of inorganic chemistry (CHM 111-CHM 112) with laboratory (CHM 113-CHM 114) and one semester of organic chemistry with laboratory (CHM 201/CHM 205) OR the three-semester sequence of Chemistry for the Life Sciences (CHM 121, CHM 221, CHM 222) with laboratory (CHM 113, CHM 114, CHM 205, CHM 206).

Chemical Physics Track

Additional 6 credits in physics at the 300 level or higher, including PHY 321, plus CHM 360, CHM 364, CHM 365, CHM 464, and one among CHM 530, CHM 553, or CHM 575.

University Physics Sequences

Option 1	11
PHY 205	University Physics I
PHY 206	University Physics II
PHY 207	University Physics III
PHY 208	University Physics II Lab
PHY 209	University Physics Iii Lab
Option 2	11
PHY 205	University Physics I
PHY 210	Honors University Physics II-III

PHY 208	University Physics II Lab
PHY 209	University Physics Iii Lab
Option 3	10
PHY 201	University Physics I. Life Sciences
PHY 202	University Physics II - Life Sciences.
PHY 106	College Physics Laboratory I or PHY 208 University Physics II Lab
PHY 108	College Physics Laboratory II or PHY 209 University Physics Iii Lab

B.S. in Physics - Chemistry/Physics

The dual major in Chemistry and Physics is designed for students who are pursuing a regular B.S. degree in Chemistry (p.) and want to pursue a second major in Physics.

In addition to the major in Chemistry (p. 79), the dual major requires 22 credit hours in physics and specific courses in Chemistry.

Students pursuing this dual major will have to satisfy the College of Arts and Sciences writing requirement for the Chemistry major.

Physics Requirements		
University Physics Sequence	10-11	
Option 1:		
PHY 205	University Physics I	
PHY 206	University Physics II	
PHY 207	University Physics III	
PHY 208	University Physics II Lab	
PHY 209	University Physics Iii Lab	
Option 2:		
PHY 205	University Physics I	
PHY 210	Honors University Physics II-III	
PHY 208	University Physics II Lab	
PHY 209	University Physics Iii Lab	
Option 3:		
PHY 201	University Physics I. Life Sciences	
PHY 202	University Physics II - Life Sciences.	
PHY 106	College Physics Laboratory I or PHY 208 University Physics II Lab	
PHY 108	College Physics Laboratory II or PHY 209 University Physics Iii Lab	
PHY 350	Intermediate Electricity and Magnetism	3
PHY 360	Introduction to Modern Physics	3
Two 300 level (or higher) physics courses, excluding PHY 315		5-6
Chemistry Requirements for the Dual Major		
CHM 360	Physical Chemistry I (Lecture)	3
CHM 364	Physical Chemistry (Laboratory I)	1
CHM 365	Physical Chemistry II (Lecture)	3
CHM 464	Physical Chemistry (Laboratory II)	1
CHM 530	Fluorescence Spectroscopy and Microscopy	3
or CHM 553	Modern Quantum Chemistry	

or CHM 575 Principles of Nuclear Magnetic Resonance and Multidimensional Spectroscopy	
Total Credit Hours	32-34

Other courses may be approved after consultation with a physics faculty advisor.

B.S. in Physics - Engineering/Physics

Students in the College of Engineering who want a dual major in physics should consult the Physics Department Chairman or Associate Chair. A major tailored to the student's needs will be arranged. The minimum number of physics credits is the same as for the Engineering Track of the Applied Physics major.

Students pursuing this dual major will take courses designed to provide them with the skills required for effective communication, both written and oral, within their discipline in the College of Engineering.

A typical sequence for the dual major is as follow:

Physics Requirements		
University Physics Sequence		10-11
Option 1:		
PHY 205	University Physics I	
PHY 206	University Physics II	
PHY 207	University Physics III	
PHY 208	University Physics II Lab	
PHY 209	University Physics Iii Lab	
Option 2:		
PHY 205	University Physics I	
PHY 210	Honors University Physics II-III	
PHY 208	University Physics II Lab	
PHY 209	University Physics Iii Lab	
Option 3:		
PHY 201	University Physics I. Life Sciences	
PHY 202	University Physics II - Life Sciences.	
PHY 106	College Physics Laboratory I	
or PHY 208 University Physics II Lab		
PHY 108	College Physics Laboratory II	
or PHY 209 University Physics Iii Lab		
PHY 350	Intermediate Electricity and Magnetism	3
PHY 360	Introduction to Modern Physics	3
Two 300 level (or higher) physics courses, excluding PHY 315		5-6
Total Credit Hours		21-23

B.S. in Physics - Marine Science/Physics

This is an interdisciplinary major offered in conjunction with RSMAS. It includes all the courses from the pure physics major (p. 124), excluding PHY 306 and PHY 506, together with a group of marine science and other courses detailed in the section of this Bulletin on MARINE SCIENCE (p. 294).

Students pursuing this dual major will take courses designed to provide them with the skills required for effective communication, both written

and oral, within their discipline in the Rosenstiel School of Marine and Atmospheric Science.

B.S. in Physics - Pure Physics

The pure physics major is recommended for students intending to enter graduate school in Physics, or that want a deeper understanding of fundamental physics.

It consists of one of the University Physics sequences with two labs, plus PHY 306 (lab), PHY 321, PHY 340, PHY 350, PHY 351, PHY 360, PHY 362, PHY 506 (lab), PHY 540, and PHY 560.

Students interested in a Ph.D. program in physics are strongly encouraged to also take PHY 561.

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Pure Physics are required to pass at least one writing intensive course within the Physics Department. These are PHY 306, PHY 362, and PHY 506. The requirement can also be fulfilled by passing ENG 233 with a grade of C- or higher.

University Physics Sequence		10-11
Option 1:		
PHY 205	University Physics I	
PHY 206	University Physics II	
PHY 207	University Physics III	
PHY 208	University Physics II Lab	
PHY 209	University Physics Iii Lab	
Option 2:		
PHY 205	University Physics I	
PHY 210	Honors University Physics II-III	
PHY 208	University Physics II Lab	
PHY 209	University Physics Iii Lab	
Option 3:		
PHY 201	University Physics I. Life Sciences	
PHY 202	University Physics II - Life Sciences.	
PHY 106	College Physics Laboratory I	
or PHY 208 University Physics II Lab		
PHY 108	College Physics Laboratory II	
or PHY 209 University Physics Iii Lab		
Upper Level Courses		
PHY 306	Intermediate Laboratory	1
PHY 321	Thermodynamics and Kinetic Theory	3
PHY 340	Classical Mechanics I	3
PHY 350	Intermediate Electricity and Magnetism	3
PHY 351	Intermediate Electricity and Magnetism II	3
PHY 360	Introduction to Modern Physics	3
PHY 362	Modern Physics Honors Seminar	1
PHY 506	Advanced Laboratory	1-2
PHY 540	Classical Mechanics II	3
PHY 560	Quantum Mechanics and Modern Physics I	3
Total Credit Hours		34-36

Minor in Physics

The physics minor consists of:

University Physics Sequence (see Pure Physics Major)	10-11
PHY 360 Introduction to Modern Physics	3
Physics lecture course (other than PHY 315) at the 300-level or above	3
Total Credit Hours	16-17

Political Science

<http://www.as.miami.edu/politicalscience>

Dept. Code: POL

Introduction

A political science major prepares students for work in a number of fields including law, politics, public policy, public administration, and international affairs, as well as employment in business and the non-profit sector.

Educational Objectives

Political science majors gain an understanding of American political and legal life, the workings of other countries' political and economic systems, the relations among countries in the international arena, and key concepts in both political philosophy and social science methodology.

Degree Programs

- Bachelor of Arts in Political Science
- Five year program: Bachelor of Arts in Political Science and Masters of Public Administration (A special curriculum for students specializing in public administration enables them to complete the requirements for both a Bachelor's and Master's degree in five years.)

Departmental Honors

To earn Departmental Honors a political science major must:

1. Graduate with an overall GPA of 3.500.
2. Graduate with a political science GPA of at least 3.700. All political science course grades on a student's transcript are counted in the calculation of the major GPA. This includes all grades from courses that were completed more than once (e.g. to obtain a high enough grade to count towards the major).

Majors

Major in Political Science

- B.A. in Political Science (p. 125)

Minors

Minor in Political Science

- Political Science (p. 127)

B.A. in Political Science

The political science major consists of at least 30 credit hours. At least 21 credit hours of these must be earned at the University of Miami.

To count toward the major, each course must be completed with a grade of C- or above, with an overall GPA of 2.0 or above.

Departmental Core Courses ¹		
POL 201	Introduction to American National Government	3
or POL 199	UMinDC Introduction to American National Government	
POL 202	Introduction To Comparative Politics	3
POL 203	Introduction to International Relations	3
Select a minimum of six credit hours of 500-level seminar courses offered by the University of Miami ²		6
Select a minimum of one course above the 200-level in three of the following five principal sub-fields of political science ³		9
American Politics:		
POL 309	American Political Thought	
POL 311	Conspiracy Theories And The Public	
POL 313	The Constitution	
POL 314	Legislative Processes	
POL 315	American Presidency	
POL 332	Mass Media and Politics	
POL 334	Campaigns	
POL 335	Local Government	
POL 342	State and Local Government and Politics	
POL 343	Government In Metropolitan Areas	
POL 349	U. S. Defense Policy	
POL 351	Public Opinion	
POL 352	Political Parties	
POL 353	Interest Groups and Lobbying	
POL 354	The CIA and the World of Intelligence	
POL 360	Congressional Representation	
POL 390	Special Topics in American Politics	
POL 399	Transfer Credit In American Politics	
POL 400	The 2012 Election	
POL 401	The Election	
POL 491	Immigration Reform And The 2014 Election	
POL 515	Media Content Analysis	
POL 528	Advanced Seminar on Electoral Behavior	
POL 529	Conducting U.S. Elections	
POL 530	Intelligence and National Security Decision Making	
POL 536	U.S. Health Care Crisis: Politics and Policies	
POL 543	Urban Politics	
POL 547	Congressional Representation	
POL 548	Civic Participation and Democracy	
POL 550	Advanced Seminar on American Politics	
POL 553	The Environmental Movement: Groups, Beliefs and Values	
POL 569	Lgbt Politics	

POL 599	Special Topics in American Politics (American Politics)	POL 391	Special Topics in International Relations
Comparative Politics		POL 392	International Terrorism
POL 308	Security, Globalization, and Human Rights.	POL 397	Transfer Credits In International Relations
POL 323	Global Warming, Politics and the European Union	POL 491	Immigration Reform And The 2014 Election
POL 344	Gender and Politics	POL 530	Intelligence and National Security Decision Making
POL 370	Global Energy Politics	POL 531	Global Environmental Politics
POL 380	Comparative Political Analysis	POL 544	Chinese Foreign Policy
POL 381	West European Politics (Previous Title: European Politics and Government)	POL 570	Uniting States in International Perspective
POL 382	Government and Politics of the Federal Republic of Germany	POL 575	The Politics of Civil- Military Relations
POL 384	Postcommunist Russian Politics	POL 576	On Violence: The Politics of Extremes
POL 385	Politics and Society in Latin America	POL 577	Security in South Asia: The Conflicts of Afghanistan, Pakistan and India
POL 386	Democratic Consolidation	POL 578	ENERGY & SECURITY IN EURASIA
POL 387	Politics of the Middle East	POL 579	The politics of post-communist transactions
POL 388	Politics Of Israel	POL 585	Post-Communist Russian Foreign Policy
POL 389	Special Topics in Comparative Politics	POL 586	Conflict in the Middle East and Africa
POL 398	Transfer Credit In Comparative Politics	POL 591	International Security
POL 525	Comparative Public Policy and Administration	POL 592	International Political Economy
POL 507	Politics, Sociology, & Economy in Contemporary Brazil	POL 593	International Relations of the Middle East
POL 527	Comparative Political Institutions	POL 594	European Security
POL 531	Global Environmental Politics	POL 597	Special Topics In International Relations
POL 535	Comparative Legal Systems	Public Administration, Policy, and Law	
POL 569	Lgbt Politics	POL 300	The Politics of Growth Management
POL 571	Sex, Babies, and the State	POL 320	Politics Of Growth Management
POL 579	The politics of post-communist transactions	POL 321	Public Policy And Administration
POL 580	Ethnicity, Nationalism and Secession	POL 322	Environmental Politics and Policy
POL 581	Comparative Political Economy of Post-Industrial Democracies	POL 337	International Law and Organizations
POL 582	Political Economy of Development	POL 372	Introduction to Criminal Justice
POL 584	Contemporary Latin American Politics	POL 373	Constitutional Law I
POL 588	Politics in China	POL 374	Constitutional Law II
POL 598	Special Topics In Comparative Politics (Comparative Politics)	POL 393	Special Topics in Public Administration, Policy, and Law
International Relations		POL 396	TRANSFER CREDIT IN PUBLIC ADMINISTRATION, POLICY, AND LAW
POL 308	Security, Globalization, and Human Rights.	POL 491	Immigration Reform And The 2014 Election
POL 323	Global Warming, Politics and the European Union	POL 501	Budget and Financial Management and Administration
POL 337	International Law and Organizations	POL 522	Introduction to Graduate Public Administration
POL 341	Nationalism, Ethnicity, and Political Conflict	POL 523	Problems in Public and Non-Profit Management
POL 345	The United States and Asia	POL 524	Non-Profit Organizations: Law, Policy, and Management
POL 346	U.S.-Latin American Relations	POL 525	Comparative Public Policy and Administration
POL 347	American Foreign Policy	POL 526	Administrative Law
POL 348	United States Relations with the Middle East	POL 533	Courts and Controversy
POL 349	U. S. Defense Policy	POL 535	Comparative Legal Systems
POL 354	The CIA and the World of Intelligence	POL 536	U.S. Health Care Crisis: Politics and Policies
POL 367	The Historical Roots of American Imperialism	POL 541	Philosophy of Law
POL 370	Global Energy Politics	POL 545	Environmental Policy Making

POL 551	Productivity in the Public and Non-Profit Sectors
POL 555	Total Quality Public Service Management: Achieving High Performance Government
POL 556	Politics and Ethics
POL 557	Ethical and Managerial Issues in Government, Business and Non-Profit Organization.
POL 558	From Electronic Government To Digital Governance
POL 596	Special Topics In Public Administration, Policy And Law
Political Theory and Methods	
POL 250	Scope and Methods of Political Science
POL 301	The Science And Practice Of Political Research
POL 302	Political Fiction and Film
POL 305	Introduction To Political Theory
POL 306	Positive Political Theory
POL 307	Political Ideologies
POL 309	American Political Thought
POL 310	God, Science, and Politics
POL 311	Conspiracy Theories And The Public
POL 380	Comparative Political Analysis
POL 394	Special Topics in Political Theory and Methods
POL 395	Transfer Credit In Political Theory And Methods
POL 506	From Plato Through Rawls
POL 510	Political Analysis
POL 512	Advanced Political Analysis
POL 513	Models of Politics
POL 514	Art and Politics
POL 515	Media Content Analysis
POL 516	Experiments in Political Science
POL 517	Introductory Statistical Methods In Political Science
POL 518	Advanced Statistical Methods In Political Science
POL 519	Introduction To Game Theory For Political Science
POL 541	Philosophy of Law
POL 595	Special Topics In Political Theory And Methods
Total Credit Hours	24

All majors must complete a quiz for graduating seniors (to be used for assessment purposes) during their last semester of coursework.

To satisfy the Advanced Writing & Communication proficiency requirement, students majoring in political science must complete at least one of the four required writing-intensive courses in the Department of Political Science.

Minor in Political Science

A minor requires 15 credit hours of political science, three of which must be from either POL 201, POL 202, or POL 203. To qualify for the minor at least 9 credit hours must be earned in residence.

To count toward a minor, each course must be completed with a grade of C- or higher, with an overall GPA of 2.0 or higher. **POL 213 does not count toward the minor.**

Psychology

<http://www.psy.miami.edu>

Dept. Code: PSY

Introduction

Psychology is the study of how individuals think, behave, feel, and relate to others. Because of its broad and fundamental nature, the psychology major prepares students for graduate study and/or careers in a wide range of people-oriented professions (e.g., psychology, medicine, law, business, communication, etc.). Psychology majors learn about human behavior and gain the analytical and critical thinking skills that are highly-valued in the workforce.

Educational Objectives

The Department of Psychology seeks to provide students with exposure to and a fundamental understanding of psychological science by delivering an integrative educational experience and promoting interactions among faculty, graduate students, and undergraduate students in basic and applied psychological inquiry, advising, mentoring, and community outreach.

Degree Programs

The Department of Psychology offers a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) degree.

Departmental Honors

Students can earn Departmental Honors in Psychology by demonstrating excellence in their course work and completing a Senior Honors Thesis in Psychology.

- Excellence in Coursework** – A minimum 3.3 combined GPA and a minimum 3.5 psychology GPA is required.
- Senior Honors Thesis in Psychology** – This is an independent empirical research project that is completed across two semesters (i.e., PSY 580 and PSY 581) under the supervision of a faculty mentor in the Department of Psychology. At least one year of prior research experience with the faculty mentor is highly recommended. Written approval from the faculty mentor and the Director of Undergraduate Academic Services is also required.

¹ **POL 213 does not count toward the major.**

² This includes any 500-level seminar offered by the Department of Political Science or cross-listed with Political Science. The following 500 level courses are **not** seminars and do **not** fulfill this requirement: POL 520, POL 521, POL 563, POL 564, POL 590.

³ These can include courses used to fulfill departmental core courses requirement. Please note that some courses cover more than one sub-field. Students may not, however, use a single class to fill two sub-field requirements.

Other

The office of Undergraduate Academic Services for Psychology (UASP) provides comprehensive advising services to all students on a walk-in basis from 9:00 a.m. to 4:30 p.m., Monday through Friday, in Flipse 508.

Appointments are only necessary during the official advising period for registration.

Freshmen and Transfer Students

All freshmen psychology majors in the College of Arts and Sciences are required to participate in the Department of Psychology's year-long orientation, advising, and mentoring program, FACT FORUM (Freshmen Advising Contact Term and Faculty Overview of Research and Undergraduate Mentoring). These courses are one credit hour general electives designed to enable students to take ownership of their education by familiarizing them with the academic rules and regulations of the University of Miami, helping them think critically about their curriculum, providing them with in-depth exposure to research, and preparing them to enter the professional world.

New transfer students are highly encouraged to participate in a similar one semester program called TUMS (Transfer to the University of Miami).

This course is specifically designed to ease the transition for new transfer students to the University of Miami.

Students who declare a psychology major after matriculation may be required to take part in an advising seminar prior to declaring the psychology major.

Prerequisites

Students must adhere to all prerequisites. They are also required to earn a minimum grade of C- in any PSY course that is to serve as a prerequisite for another course in the psychology major. Students who enroll in PSY courses without the specified prerequisites may be dropped.

Advanced Writing and Communication Requirement

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, psychology majors must take 4 writing-designated courses, including 1 writing-designated course in the PSY area. Writing courses are already built into the required courses of the B.S. track of the psychology major; however, students who follow the B.A. track of the psychology major will need to plan accordingly to incorporate a writing-designated PSY course into their graduation plans.

Research Experience for Course Credit

Research experience is considered an integral part of the psychology major. Students may earn course credit (i.e., PSY 280, PSY 380, and/or PSY 480) by working in the laboratory of a Department of Psychology faculty mentor. Students can repeat PSY 280, PSY 380, and PSY 480 without penalty. A minimum 2.8 combined and psychology GPA is required to earn research credit. Written permission from a faculty mentor and UASP is also required. Note: Students may volunteer in a research laboratory by completing the appropriate volunteer paperwork with UASP if they are unable to register for research credit.

Research Participation in PSY 110

As an introduction to behavioral science, all students enrolled in PSY 110 may be required to participate as subjects in research studies conducted by faculty and/or graduate students, or by reading selected research reports and writing article critiques. Refer to the course syllabus for more

details. Note: This introductory research participation requirement is not sufficient for students interested in attending graduate school in psychology.

Senior Assessment

As part of the Department of Psychology's accreditation plan, all senior psychology majors will be required to take part in a senior assessment that may last up to four hours. Assessment scores will not affect the students' graduation status; however, failure to complete the assessment may delay or prevent graduation.

Transfer Courses

Courses from other colleges or universities may be assigned PSY credit at UM with written approval by UASP.

Majors

Major in Psychology

- B.A. or B.S. in Psychology (p. 128)

Minors

Minor in Psychology

- Psychology (p. 129)

B.A. or B.S. in Psychology

The major in psychology requires 33 credit hours in PSY courses.

B.A. Departmental Requirements

PSY 110	Introduction to Psychology	3
PSY 290	Introduction To Research Methods	3
PSY 291	Introduction To Biobehavioral Statistics	3
Select nine additional credit hours in 200 level PSY courses		9
Select nine credit hours in 300 level PSY courses		9
Select six credit hours in 400 or 500 level PSY courses		6
Total Credit Hours		33

B.S. Departmental Requirements

PSY 110	Introduction to Psychology	3
PSY 290	Introduction To Research Methods	3
PSY 291	Introduction To Biobehavioral Statistics	3
PSY 390	Intermediate Research Methods And Biobehavioral Statistics	3
PSY 490	Advanced Research Methods	3
Select nine additional credit hours in 200 level PSY courses		9
Select three additional credit hours in 300 level PSY courses		3
Select six additional credit hours in 400 or 500 level PSY courses ¹		6
Total Credit Hours		33

¹ Note: At least 3 of these credit hours must be in a 400 level PSY writing course.

Second Majors in Psychology

- Students enrolled in the **College of Arts and Sciences who pursue a B.A. degree** must follow the “B.A. Departmental Requirements” outlined above.
- Students enrolled in the **College of Arts and Sciences who pursue a B.S. degree** must follow the “B.S. Departmental Requirements” outlined above.
- Students enrolled in the **School of Architecture, School of Business Administration, School of Communication, School of Education and Human Development, and Frost School of Music** must follow the “B.A. Departmental Requirements” outlined above.
- Students enrolled in the **College of Engineering, Rosenstiel School of Marine and Atmospheric Science, and School of Nursing and Health Studies** must follow the “B.S. Departmental Requirements” outlined above.

Other Requirements

- Students must earn a minimum grade of C- in a PSY course to count it toward the psychology major.
- Students must have a minimum 2.8 combined, UM, and psychology GPA to declare the psychology major.
- Students are strongly advised not to continue with the psychology major if they have less than a 2.5 psychology GPA after 15 completed credit hours in psychology.
- Students must earn a minimum 2.3 psychology GPA to graduate with the psychology major.
- Students must complete at least half of their psychology major in residence, including all 300, 400, and 500 level PSY courses.
- Only 6 PSY credit hours at the 300, 400, and 500 level may be taken through a UM Study Abroad Program with prior written approval.

Notes

- AP Credit for Statistics (i.e., PSY 292) cannot count toward the psychology major.
- Students who declare the psychology major after they transfer credit for PSY 292 or complete PSY 292 can use PSY 292 as a substitute for PSY 291.
- Only 6 credit hours of the following may count toward the psychology major:

PSY 280	Introduction To Research Projects I	1-3
PSY 380	Introduction To Research Projects II	1-3
PSY 480	Research With Writing Credit	1-3
PSY 581	Senior Honors In Psychology II	3

- The following courses do not count toward the psychology major:

PSY 106	Freshman Advising Contact Term (Fact)	1
PSY 190	Faculty Overview Of Research And Undergraduate Mentoring(Forum)	1
PSY 206	Transfer To The University Of Miami(Tums)	1
PSY 305	Introduction To Research And Graduate School	1
PSY 580	Senior Honors In Psychology I	3

- All psychology majors who pursue a B.A. degree in the College of Arts and Sciences must complete a minor from the list of acceptable minors published by the College.
- All psychology majors who pursue a B.S. degree in the College of Arts and Sciences must complete a minor in Biochemistry, Biology, Chemistry, Computer Science, Engineering, Geological Sciences, Marine Science, Mathematics, Microbiology and Immunology, or Physics.

Minor in Psychology

The minor in psychology requires 15 credit hours in PSY courses.

Departmental Requirements		
PSY 110	Introduction to Psychology	3
PSY 291	Introduction To Biobehavioral Statistics	3
or PSY 292	Introduction To Biobehavioral Statistics For Non-Majors	
Select nine credit hours in PSY courses		9
Total Credit Hours		15

Other Requirements

- Students must earn a minimum grade of C- in a PSY course to count it toward the minor.
- Students must earn a minimum 2.0 psychology GPA to graduate with the minor.
- Students must complete at least 9 of the 15 minor credit hours in residence, and only 3 of these credit hours may be taken through a UM Study Abroad Program with prior written approval.

Notes

- Only 3 credit hours of PSY 280, PSY 380, and/or PSY 480 may count toward the minor.
- The following courses do not count toward the minor:

PSY 106	Freshman Advising Contact Term (Fact)	1
PSY 190	Faculty Overview Of Research And Undergraduate Mentoring(Forum)	1
PSY 206	Transfer To The University Of Miami(Tums)	1
PSY 305	Introduction To Research And Graduate School	1

Religious Studies

<http://www.as.miami.edu/religion>

Dept. Code: REL

Introduction

Religion is one fundamental way humans order and discern meaning and frame identity, both collective and individual. In the study of religion, students learn what religion is; how religion both shapes and reflects culture, society, politics, and individual experience; and the multiple ways religion matters and has mattered locally and globally, from antiquity to the present. Through the examination of varied disciplinary approaches and exposure to concrete diverse cultural expressions of religion, the department fosters students' broad and deep apprehension of religion's place(s) in human experience. The department's educational work aims

to strengthen students' capacities to read carefully, question critically, communicate knowledge effectively, and apply their learning in civic engagement.

The University regards the academic study of religion as an integral part of liberal, humane learning and seeks to assist students in understanding the role religion plays in human existence and culture. Instruction in the Department of Religious Studies is non-sectarian and seeks an open analysis of all points of view. Courses are designed to provide a general orientation to the academic study of religion for the undergraduate student, as well as more advanced exposure for those who wish to pursue professional careers where a study of religious ideas and institutions would be helpful, such as in psychology, sociology, history, journalism, teaching, law, medicine, the fine arts, religious education, the ministry, and the rabbinate.

The Department sponsors a wide variety of speakers and events each year, including a Religious Studies Colloquium series and a Forum on Religion and Public Life. It has enriched the existing curriculum by bringing to the campus such outstanding scholars as Elizabeth Kuebler-Ross, Joachim Jeremias, Alvin Plantinga, Harry M. Orlinsky, Anson Rainey, Abraham J. Malherbe, Alan Segal, William May, Robert Segal, Douglas Allen, Marvin Sweeney, Martin Hengel, Martin E. Marty, and Juergen Moltmann.

Educational Objectives

The general educational objectives of the Department are

1. to explore texts, histories, and ways in which humans from various cultures have understood their world including the beliefs, ethics, rituals, artifacts, and organizations of religions;
2. to understand the changing relationship between religion and elements of the wider culture including the dynamics of politics, art, economics, literature, and society and their relationship to religions;
3. to become familiar with the theories and methods used in the study of religion.

Degree Programs

The Department offers two tracks by which students may earn a major or a minor. The first track is Religious Studies, which is designed for students who are seeking a broad and comprehensive understanding of the world's major religions and the cultures in which they are practiced. The second track is Religion and Health Care, which is designed for students who are interested in any aspect of health care or who wish to supplement their pre-med concentration with coursework in the field of Religious Studies.

Departmental Honors

The Department of Religious Studies encourages its majors and minors to intensify and deepen their knowledge of religious texts, traditions, and issues through its Departmental Honors Program. The program is designed to give our students the opportunity to explore various topics and problems in religion that are of particular interest to them, to work more closely with faculty in the department, to develop skills in research and thesis preparation, and in some cases to prepare for graduate work in religious studies or other disciplines.

Minimum requirements for the program are as follows:

1. A cumulative grade point average of at least 3.30;
2. A cumulative grade point average in religious studies of at least 3.50; and
3. A thesis that is approved by departmental faculty.

For the determination of honors, cumulative grade point average means either the average of all grades earned at the University of Miami or the combined average of all graded work taken at the University of Miami and elsewhere (whether or not the transfer work is accepted toward a degree at the University of Miami), whichever is lower.

Theta Alpha Kappa

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Theta Alpha Kappa, the National Honor Society for Religious Studies and Theology. Theta Alpha Kappa sponsors events that enhance the academic and social life of the department.

URome

In keeping with its emphasis on a global approach to the study of religion and society, the Department sponsors a study abroad program known as URome. This semester-on-location program, which is open to all qualified University of Miami undergraduate students, is offered each spring semester in collaboration with the American University of Rome. A limited amount of scholarship support for the URome program is available for qualified Religious Studies majors and minors.

Majors

Majors in Religious Studies

- B.A. in Religious Studies (p. 131)
- B.A. in Religion and Health Care (p. 130)

Minors

Minors in Religious Studies

- Religious Studies (p. 131)
- Religion and Health Care (p. 131)

B.A. in Religion and Health Care

FOR STUDENTS FIRST ENROLLED IN OR AFTER FALL SEMESTER 2015

A major in Religion and Health Care leading toward the B.A. degree requires 24 credit hours in Religious Studies, passed with a grade of C- or higher, and a GPA in the major of 2.0.

Select one of the following:	3
REL 101 Introduction to Religion	
REL 102 Problem of God	
REL 103 One God: Judaism, Christianity, Islam	
REL 105 One Goal: Transforming the Self in Asian Religions	
Select four Religion and Health Care courses	12
Select 6 elective credits	6
Select a minimum of 12 credit hours in courses numbered 300 or above	
Writing credit (W) in at least one course in the department	

REL 499	Method and Theory in the Study of Religion	3
Total Credit Hours		24

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Religion and Health Care should take one W class in REL.

To ensure that majors devise a coherent plan of study, the department requires consultation with the department undergraduate advisor.

Transfer students who major in Religion and Health Care must complete at least 12 credit hours in department offered courses numbered 300 or above in residence at the Coral Gables campus.

B.A. in Religious Studies

FOR STUDENTS FIRST ENROLLED IN OR AFTER THE FALL SEMESTER 2015

A major in Religious Studies leading toward the B.A. degree requires 24 credit hours in Religious Studies, passed with a grade of C- or higher, and a GPA in the major of 2.0.

Select one of the following:	3	
REL 101	Introduction to Religion	
REL 102	Problem of God	
REL 103	One God: Judaism, Christianity, Islam	
REL 105	One Goal: Transforming the Self in Asian Religions	
Select a minimum of 18 elective credit hours in REL courses	18	
REL 499	Method and Theory in the Study of Religion	3
Select a minimum of 12 credit hours in courses numbered 300 or above		
Writing credit (W) in at least one course in the department		
Total Credit Hours	24	

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Religious Studies should take one W class in REL.

To ensure that majors devise a coherent plan of study, the department requires consultation with the department undergraduate advisor.

Transfer students who major in Religious Studies must complete at least 12 credits in department offered courses numbered 300 or above in residence at the Coral Gables Campus.

Minor in Religion and Health Care

FOR STUDENTS FIRST ENROLLED IN OR AFTER FALL SEMESTER 2015

An undergraduate minor in Religion and Health Care requires 12 credit hours, passed with a grade of C- or higher, and a GPA in the minor of 2.0.

Select one of the following:	3
REL 101	Introduction to Religion
REL 102	Problem of God
REL 103	One God: Judaism, Christianity, Islam

REL 105	One Goal: Transforming the Self in Asian Religions	
Select two Religion and Health Care courses		6
Select one elective course		3
Select a minimum of 6 credit hours in courses numbered 300 or above		
Total Credit Hours		12

To ensure that minors devise a coherent plan of study, the department requires consultation with the department undergraduate advisor.

Transfer students who minor in Religion and Health Care must complete at least 6 credits in department offered courses numbered 300 or above in residence at the Coral Gables campus.

Minor in Religious Studies

FOR STUDENTS FIRST ENROLLED IN OR AFTER FALL SEMESTER 2015

An undergraduate minor requires 12 credit hours, passed with a grade of C- or higher, and a GPA in the minor of 2.0.

Select one of the following:	3	
REL 101	Introduction to Religion	
REL 102	Problem of God	
REL 103	One God: Judaism, Christianity, Islam	
REL 105	One Goal: Transforming the Self in Asian Religions	
Select 9 elective credits		9
Select a minimum of 6 credit hours in courses numbered 300 or above		
Total Credit Hours		12

To ensure that minors devise a coherent plan of study, the department requires consultation with the department undergraduate advisor.

Transfer students who minor in Religious Studies must complete at least 6 credits in department offered courses numbered 300 or above in residence at the Coral Gables campus.

Sociology

<http://www.as.miami.edu/sociology>

Dept. Code: SOC

Overview

The Major in Sociology provides scientific training for understanding the organization and fluid nature of contemporary society, patterns of social change, and the mutual influence between macro structures and processes (society and culture) on one hand, and the micro level (individuals and groups) on the other. Increasingly, sociologists are also focused on understanding the processes of globalization that are currently transforming contemporary societies.

Courses for both majors are designated SOC; see course list below. For information on Criminology please see the CRIMINOLOGY (p. 84) section of the Bulletin.

Educational Objectives

The undergraduate program in Sociology has as its main objective to provide students with:

1. A strong component of a liberal arts education, training in analytical and statistical skills that are highly valued by potential employers;
2. A valuable undergraduate preparation for pursuing careers in such fields as journalism, politics, public relations, business or public administration and in other—fields that involve investigative or analytical skills or working with diverse groups;
3. An excellent and comprehensive training program for students wishing to pursue graduate work in programs leading to academic positions, research expertise, or work in the field of applied sociology.

Degree Programs

Students may earn a Bachelor of Arts degree in Sociology. The Department of Sociology also offers graduate programs leading to M.A. and Ph.D. degrees in the areas of:

- **Medical sociology**
- **Race and ethnic relations**
- **Criminology**

Departmental Honors

Graduation with Departmental Honors is available to eligible students who fulfill the following:

1. Students desiring Departmental Honors in Sociology or Criminology must maintain an overall GPA of 3.3 and a GPA of 3.5 in Sociology or Criminology. They must also achieve a minimum of B in all Sociology/Criminology courses. For transfer students, the Department uses the cumulative, combined GPA calculated by the Office of the Registrar.
2. A student seeking Departmental Honors is required to write an independent research paper which is submitted to the Undergraduate Committee. The nature of the independent research project is determined by the faculty member(s) with whom the student works. This project is done in SOC 498 & SOC 499. The student should have the same professor(s) for all six credit hours.
3. Recruitment of eligible students is by department invitation during a student's junior year.

Advanced Writing and Communication Requirements

To satisfy the College of Arts and Sciences Advanced Writing and Communication requirement, all Sociology majors must take 4 writing-designated courses, including 1 writing-designated course in the SOC area. Writing courses are regularly offered within the department; however, it is the student's responsibility to plan accordingly to incorporate a designated SOC writing-designated course into their graduation plans.

Alpha Kappa Delta

Majors, minors, and other students who meet certain academic criteria are eligible for membership in Alpha Kappa Delta, the International Sociology Honor Society. Alpha Kappa Delta sponsors events that enhance the academic and social life of the department.

Majors

Major in Sociology

- B.A. in Sociology (p. 132)
- Sociology & Criminology Double Major; Combined Minor (p. 132)

Minors

Minor in Sociology

- Sociology (p. 133)
- Sociology & Criminology Double Major; Combined Minor (p. 132)

B.A. in Sociology

A major in **SOCIOLOGY** requires: a minimum of 31 credit hours, including:

Required Courses		
SOC 101	Introduction to Sociology	3
SOC 210	Introduction to Social Research ¹	3
SOC 211	Quantitative Methods for Sociologists ²	3
SOC 212	Quantitative Methods Lab ²	1
SOC 401	Sociological Theory	3
Select two of the following:		6
SOC 301	Social Organization	
SOC 302	Social Psychology: Sociological Perspective	
SOC 303	Social Inequalities	
Elective Courses		
Four additional courses offered by the Department of Sociology		12
Total Credit Hours		31

¹ EPS 452 can be substituted for SOC 210 only by students who are also enrolled in the School of Education.

² PSY 291 can be substituted for SOC 211 only by students who are also majoring or minoring in Psychology. SOC 212 remains a requirement.

Other Requirements

- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of **16 credit hours must be earned in residency** in the Department; thus, only a maximum of 15 credit hours can be transferred from other institutions as eligible credit hours for the SOCIOLOGY major

Sociology & Criminology Double Major; Combined Minor

Students may choose to double major in both Sociology and Criminology, or major in either Sociology or Criminology while minoring in the other.

Sociology and Criminology Double Major:

Students wishing to complete a double major must complete the Declaration of Major form for the College of Arts and Sciences and fill

in *both* majors. Students completing a double major are not required to complete a minor as well.

A double major in Sociology and Criminology requires a minimum of **58** credit hours, including:

Required Core Courses – 10 Credits

SOC 101 Introduction to Sociology (3 Credits)
 SOC 210 Introduction to Research Methods (3 Credits)
 SOC 211 Quantitative Methods for Sociologists (3 Credits)
 SOC 212 Quantitative Methods Lab (1 Credit)

Sociology Required Courses – 9 Credits

SOC 401 Sociological Theory (3 Credits)

TWO of the following three courses:

SOC 301 Social Organization (3 Credits)
 SOC 302 Social Psychology (3 Credits)
 SOC 303 Social Inequalities (3 Credits)

Criminology Required Courses – 9 Credits

SOC 371 Criminology (3 Credits)
 SOC 470 Theories of Deviant Behavior (3 Credits)

ONE of the following two courses:

SOC 271 Criminal Justice (3 Credits)
 SOC 370 Juvenile Delinquency (3 Credits)

Elective Courses

Ten other courses offered by the Department for a total of 30 credits

Other Requirements:

A minimum final grade of C- in all courses offered by the Department.

A minimum cumulative GPA of 2.00 in all courses offered by the Department.

A minimum of **31 credits must be earned in residency** in the Department; thus, only a maximum of 27 credits can be transferred from other institutions as eligible credits for the SOCIOLOGY/CRIMINOLOGY DOUBLE major

Sociology and Criminology Major-Minor Program

A minor in either **Sociology** or **Criminology** while majoring in the other program requires 12 additional credits offered by the Department to the major program requirements.

6 of these credits must be 300-level or higher, totaling 43 credit hours.

Sociology majors must take SOC 371 Criminology.

Minor in Sociology

A minor in **SOCIOLOGY** requires a minimum of 15 credit hours, including:

Required Courses	
SOC 101	Introduction to Sociology
	3
Elective Courses	

Four additional courses offered by the Department of Sociology,	12
Two of which must be 300 level or higher	
Total Credit Hours	15

Other Requirements

- A minimum final grade of C- in all courses offered by the Department
- A minimum cumulative GPA of 2.0 in all courses offered by the Department
- A minimum of 9 credit hours must be earned in residency in the Department; thus, only a maximum of 6 credit hours can be transferred from other institutions as eligible credit hours for the SOCIOLOGY minor.

Theatre Arts

<http://www.as.miami.edu/theatrearts>

Dept. Code: THA

Introduction

The University of Miami Department of Theatre Arts offers two distinct undergraduate degrees:

- a liberal arts program leading to a Bachelor of Arts degree in theatre and
- a pre-professional conservatory-based theatre training program leading to a Bachelor of Fine Arts degree in either
 - Acting,
 - Musical Theatre,
 - Stage Management,
 - Theatre Management, or
 - Design/Production.

The Department also produces a season of plays and musicals at the Jerry Herman Ring Theatre as well as workshops and student projects in the Studio Theatre.

Educational Objectives

The Department of Theater Arts immerses students in the practices and the study of theatre enabling them to nurture and promote within their communities an engagement with the arts.

Degree Programs

- THE BACHELOR OF ARTS DEGREE
- THE BACHELOR OF FINE ARTS DEGREE

The Bachelor of Fine Arts Degree in Theatre Arts

In addition to the general requirements for admission to the University, the student seeking admission to the BFA program must meet the following requirements of the Department of Theatre Arts:

1. Submission of the Supplemental Application to the Department of Theatre Arts. (This form is located on the Department of Theatre Arts website under "Prospective Students and on the Undergraduate Admissions website page.)

- An audition or interview/portfolio review to determine acceptance into the BFA programs. These audition/reviews will be held on the University of Miami campus as well as in major cities throughout the United States as scheduled on our website.
- BFA transfer students must follow the same Admission procedures as freshmen and should realize that placement into the program will be determined by the Theatre Arts faculty. All BFA transfers must be approved by the Director of the Conservatory.

The candidates for the degree of Bachelor of Fine Arts must satisfy the College of Arts and Sciences academic requirements.

All BFA students are evaluated by the faculty at the end of each semester.

BFA students in Theatre Arts Department courses must earn a cumulative 2.7 grade point average to remain in the BFA program. A Theatre Arts major must maintain a minimum grade of C- or higher in each required course outside the theatre. Failure to maintain satisfactory academic standing may result in the student being placed on academic probation by the Department and eventually to dismissal from the program.

BFA Theatre Arts courses are progressive in nature and students must successfully complete each course in sequence. Failure to pass the requirements of any particular class in the conservatory may result in the student's dismissal from the program. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Theatre Arts should take at least THA 481 and THA 482 offered by the department.

Production activities and discipline within the Department will be governed by the student handbook, available on the Department website (www.miami.edu/tha (<http://www.miami.edu/tha>)).

Musical Theatre and Acting Majors will be admitted to the Bachelor of Fine Arts degree program only in the fall of each academic year.

Majors

Majors in Theatre Arts

- B.A. in Theatre Arts (p. 134)
- B.F.A. in Theatre Arts - Design/Technical Production (p. 135)
- B.F.A. in Theatre Arts - Musical Theatre (p. 136)
- B.F.A. in Theatre Arts - Acting (p. 134)
- B.F.A. in Theatre Arts - Stage Management (p. 137)
- B.F.A. in Theatre Arts - Theatre Management (p. 138)

Minors

Minor in Theatre Arts

- Theatre Arts (p. 139)

B.A. in Theatre Arts

<http://www.as.miami.edu/theatrearts>

All students seeking a Bachelor of Arts degree in Theatre Arts must take the following courses and receive a grade of C- or higher in all Theatre Arts classes and an overall GPA of 2.0 or above. All classes listed as THA are eligible to be counted towards the BA Theatre Arts

degree. The student needs a minimum of 36 credit hours drawn from the requirements listed below. To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in Theatre Arts should take at least THA 481 and THA 482 offered by the department.

Core Classes		
THA 105	Introduction to Acting	3
or THA 106	Introduction To Acting For The Musical Theatre Stage	
THA 141 & THA 143	Introduction to Scene Design/Stagecraft I (Lecture) and Introduction to Theatre Crafts I (Lab)	3
THA 142 & THA 144	Introduction to Costume Design/Stagecraft II (Lecture) and Introduction to Theatre Crafts II (Lab)	3
THA 381	Play Analysis I	3
THA 481	Theatre History I	3
THA 482	Theatre History II	3
Elective Classes		
Select 9 credit hours at the 200 level or higher level		9
Select 6 credit hours at the 300 level or higher level		6
Select 3 credit hours at the 400 level		3
Total Credit Hours		36

Transfer students have a residency requirement of 18 Theatre Arts credit hours on campus.

The State of Florida recognizes the Bachelor of Arts and Bachelor of Fine Arts Degrees as meeting the Theatre Arts subject area requirements for teaching at the secondary level. In addition to earning the BA or BFA degree in Theatre, students desiring to teach in the field of Theatre Arts should complete the required education credit hours in order to be certified by the state.

Minor in Theatre Arts

<http://www.as.miami.edu/theatrearts/>

A minor in Theatre Arts consists of 15 credit hours of Theatre Arts classes with a minimum grade of C- in each course and an overall GPA of 2.0 or above.

Urban Studies

<http://www.as.miami.edu/urb>

Introduction

The minor in Urban Studies provides undergraduate students with a flexible concentration in interdisciplinary studies of cities, urbanism, and urbanity. Urban Studies is a long established academic field, especially prominent in major cities in the United States. Course work combines a practical focus on Metropolitan Miami with more general attention to urban theory and globalization from a global perspective.

The minor has a liberal arts orientation and includes perspectives from the social sciences, architecture, and history. It is a useful complement to majors such as Geography, History, Sociology, Anthropology, Literature, International Studies, Economics, Political Science, and others. The minor is also of particular interest to students in Architecture Communication and Business. Courses in the Minor are taught in the College of Arts & Sciences and the School of Architecture. Note that there are slightly different requirements for ARC students.

Minors

Minor in Urban Studies

- Urban Studies (p. 139)

Minor in Urban Studies

- Students must complete **15 credit hours** (five courses);

- In all five courses, students must achieve a **minimum grade of C- with a 2.0 overall GPA**;

Required Courses		
URB 201	Metropolitan Miami	3
URB 301	Cities in Time and Space	3
Optional Courses		
Select three of the following: ¹		9
AMS 350	History And Culture Of South Florida	
ARC 390/590	History of Cities	
ARC 541	Seminar on Town Design	
ARC 546	Studies of Havana	
ARC 554	Architecture of South Florida	
ARC 584	Special Problems	
APY 420	Archaeology, Architecture, and the City	
ENG 395	Special Topics	
FIN 340	Real Estate Principles	
GEG 511	Field Studies in Geography	
GEG 522	Urbanization in the Developing World	
GEG 523	Seminar in Urban Management

HIS 369	Introduction to Urban America	
HIS 371	Immigration, Race and Ethnicity in American History	
POL 343	Government In Metropolitan Areas	
Total Credit Hours		15

¹ ARC students may select no more than one ARC course while NonARC students must select at least one ARC course. Note that URB 201 or URB 301 will suffice as prerequisites for any of these courses.

Other courses may be approved upon request; please consult the program Director, Dr. Richard Grant: rgrant@miami.edu

Women's and Gender Studies

<http://www.as.miami.edu/wgs>

Dept. code: WGS

Introduction

The Program in Women's and Gender Studies at the University of Miami seeks to encourage the rigorous investigation of gender as a significant issue in all areas of human experience. It reaches across disciplines to draw on a range of methods, theories, and perspectives that help us to understand how ideas and structures based on gender shape our lives. The program's core objective is to foster the examination, open discussion, and lively debate of gender issues among faculty and students from all fields of study, enriching the undergraduate curriculum and the university's academic mission through greater communication

across disciplines and colleges. Its aim is to broaden, deepen, and transform the learning community at UM and beyond.

Educational Objectives

The undergraduate curriculum in Women's and Gender Studies explores the ways in which ideas about gender and sexuality shape social roles and identities, as well as the ways in which race, ethnicity, class, and nationhood influence the perception and experience of gender and sexuality within particular cultures. The curriculum is informed by recent scholarship that recognizes gender and sexuality as crucial components of human experience in social, cultural, economic, political, religious, and legal contexts. It includes courses that introduce students to feminist theory and scholarship, engaging ethical and political issues of equality and justice. The program encourages students to question their assumptions about the possible meanings of female and male through the comparative study of how different societies and historical periods have viewed manhood, womanhood, and relations between women and men. Courses in Women's and Gender Studies enable students to acquire critical and analytical skills that they can then apply in other aspects of their educational experience at UM and beyond the university in their careers and personal development.

The LGBTQ Studies minor is designed to allow students to explore sexuality and sexual minorities from a variety of perspectives. The course will provide students with an introduction to a broad array of LGBTQ issues including visual and performing arts, literature, languages, history, social science, various theories, public policy and the law, families and other types of intimate relationships, crime, popular culture, and LGBTQ identities and communities. This widely interdisciplinary field addresses work in a broad range of scholarly disciplines including biological and cultural studies, in literature and anthropology, in the health sciences, history, and the visual arts. It ranges from archival research to the elaboration of queer theory, from the analysis of constitutional law to questions of public health, from the study of popular culture to investigations into the development and social construction of sexual identity.

Advance Writing and Communication Credit

To satisfy the College of Arts and Sciences writing requirement in the discipline, students majoring in WGS should take at least one WGS core course that is writing intensive (i.e., WGS301).

Departmental Honors

Women's and Gender Studies majors with a cumulative GPA of at least 3.5 in WGS courses and an overall GPA of at least 3.0 may earn departmental honors by completing WGS 505 instead of the senior research project. Candidates for departmental honors are responsible for finding a faculty member who is willing to serve as thesis adviser and then must complete a thesis proposal of approximately 400 words which must be approved by the thesis adviser and then the program director. The format and length of the thesis will vary according to the nature of the project. Most students writing an honors thesis as part of their WGS major will take WGS 505 twice (for a total of 6 credit hours).

Majors

Major in Women's and Gender Studies

- B.A. in Women's and Gender Studies (p. 141)

Minors

Minors in Women's and Gender Studies

- Women's and Gender Studies (p. 141)
- LGBTQ Studies (p. 141)

B.A. in Women's and Gender Studies

A major in Women's and Gender Studies consists of at least 30 credit hours in Women's and Gender Studies courses (core or combined) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in WGS courses. These credits must include at least 18 at the 300 level or above.

Select six courses at the 300 level or above	18
WGS 201 Introduction to Women's and Gender Studies	3
WGS 301 Feminist Inquiries	3
Select a minimum of two other WGS core courses	6
Total Credit Hours	30

All majors must complete WGS 501 (or WGS 505), which will take the form of an individual research project with a faculty member of the student's choice; the student is responsible for finding an appropriate faculty member who is available to supervise the project and then must seek formal approval from the program director before proceeding with the project. The student must produce a substantial written report or research paper, the format of which will vary according to the nature of the project.

Minor in LGBTQ Studies

Minor

A minor in LGBTQ (Lesbian/Gay/Bisexual/Transgender/Queer) Studies consists of at least 15 credits in LGBTQ Studies courses (core or combined sections) with a grade of C- or better in each course, and a cumulative GPA of at least 2.0 in LGBTQ courses. All minors must complete WGS 202 and WGS 201. The remaining course work must include at least 9 credit hours at the 300 level or above and no more than 6 credit hours in any one department or program or more than 3 credit hours of individual studies without the approval of the program director.

Minor in Women's and Gender Studies

A minor in Women's and Gender Studies consists of at least 15 credit hours in Women's and Gender Studies courses (core or combined sections) with a grade of C- or better in each course, with a cumulative GPA of at least 2.0 in WGS courses.

WGS 201 Introduction to Women's and Gender Studies	3
Select three courses at the 300 level or above, including:	9
WGS 301 Feminist Inquiries	
Select a minimum of one other WGS core course	3
Total Credit Hours	15

Business

<http://www.bus.miami.edu>

Introduction

The School of Business Administration offers courses leading to the degrees of

- Bachelor of Business Administration (BBA), and
- Bachelor of Science in Business Administration (BSBA).

Undergraduate degrees in business are administered by the Vice Dean, Undergraduate Business Education.

Mission

The mission of the University of Miami School of Business Administration is to develop innovative ideas and principled leaders that transform global business and society.

Accreditation

The Bachelor of Science in Business Administration and the Bachelor and Master of Business Administration as well as the undergraduate and graduate Accounting programs are fully accredited by AACSB International – The Association to Advance Collegiate Schools of Business.

Academic Policies

Student Responsibilities

- Students in the School of Business Administration are responsible for planning their own programs and for meeting degree requirements.
- It is the student's responsibility to understand fully, and to comply with, all the provisions of this Bulletin and any written changes to their program of study.
- Students are provided assistance by academic advisors and faculty members.
- Requests for deviation from department, program, or school requirements are granted only by written approval from the Vice Dean or respective department chairperson.
- A student who is in violation of the provisions of this Bulletin may be administratively withdrawn from a class or classes, dismissed as a business student, and/or have an electronic hold placed upon future enrollment.
- A student who is disruptive in class as determined by assigned faculty and the Vice Dean will be administratively dropped from the class.
- Information regarding appeal procedures and special requests relative to academic matters is available in Merrick 104, School of Business Administration, Office of Undergraduate Business Education.

Admission to the School of Business Administration

Admission to the University for undergraduate study as a freshman is sufficient for admission to the School of Business Administration prior to matriculation. However, strong quantitative skills are typically needed for success. Students who do not matriculate in the School of Business Administration in their first semester of study at the University may

request a transfer to the School of Business Administration thereafter only according to the policies and procedures set out below.

Transferring to the School of Business Administration

Transfer applicants from outside the University of Miami must submit a satisfactory academic record in compliance with the standards of the University of Miami Office of Admission. All previous transfer courses must be from an accredited institution. Admitted applicants will be in good academic standing at all institutions previously attended and have a minimum cumulative grade point average (GPA) of 3.0. A minimum grade of "C" (2.0) must be earned in all transfer courses for credit to be awarded. This includes repeated courses under a forgiveness policy at any previous institution.

All transfer students to the School of Business Administration, including those from other Schools and Colleges within the University of Miami, must have completed and received college credit for a calculus course equivalent to either MTH 161 (4 credit hours) or MTH 140/MTH 141 (8 credit hours), and earned a grade of "B" or better in the course(s). The transfer calculus course must be approved by submitting the syllabus and textbook title to the University of Miami Department of Mathematics for evaluation.

All transfer coursework taken outside the University of Miami will be reviewed on a course-by-course basis for equivalency to School of Business Administration course requirements. Any business course that is from a non-AACSB accredited institution will be accepted only as elective credit toward the overall degree requirements. Transfer applicants may appeal to have transfer courses from non-AACSB accredited institutions apply toward completion of business course requirements by submitting the course syllabus and textbook title to the appropriate School of Business Administration department for evaluation.

A transfer student's overall coursework must also meet specific curricular and residency requirements. Pursuant to School of Business Administration policy, transfer students must complete 50 percent of the Business Core at the University of Miami. Note that the University of Miami also requires that 50 percent of all major and 50 percent of all minor courses be completed at the University of Miami. Residency and other requirements are set out below in the section headed Requirements for Graduation.

Academic Progress, Probation, and Dismissal

The School of Business Administration reviews each student's academic record at the end of each semester. When a student's semester or cumulative GPA is less than 2.0, or progress toward degree completion is unsatisfactory, the student will be warned, placed on academic probation, or dismissed in accordance with the University's or School of Business Administration's policies and procedures:

- Warning: semester GPA lower than 2.0 but cumulative GPA above 2.0
- Probation: cumulative GPA lower than 2.0
- Probation with Dismissal: two consecutive semesters with cumulative GPA lower than 2.0, or failure to make progress toward degree completion
- Failure to make progress toward degree completion includes, but is not be limited to:

- failure to complete enough credit hours in the business degree program to graduate after ten regular semesters of enrollment
- failure in any business course the student repeats pursuant to the University's General Repeat Rule.
- failure to pass the required calculus course (MAS 110 for BBA degree, MTH 161 for BSBA degree) by the fourth semester.
- A student on probation is not permitted to enroll in more than four courses (no more than 13 credit hours) and may have an electronic hold placed upon future enrollment until grades for work-in-progress are reviewed.
- A student who is dismissed for failure to satisfactorily complete required business core courses, or for failure to make progress toward the degree, may not automatically be dismissed from the University. Accordingly, such a student may apply to another School or College within the University, and if accepted, may continue as an undergraduate student at the University of Miami. For such a student who is **not** accepted by another School or College, dismissal from the School of Business Administration may have the incidental effect of dismissal from the University of Miami as well.

Freshman Repeat Rule (FRR) in the School of Business Administration

The University's Freshman Repeat Rule (FRR) allows a student who receives a "D" or an "F" in a course taken at the University of Miami within the student's first 30 credit hours or first two regular semesters of college work, to repeat up to two such courses within the following two semesters. After the course has been repeated, only the second grade earned will be used in the computation of the student's cumulative GPA. However, the initial grade remains on the record, although the initial grade does not count as "credit hours attempted" or "credit hours earned" at the University of Miami.

The following policy is applied specifically to business students using the University's Freshman Repeat Rule (FRR):

- The summer sessions are not counted as semesters, either individually or together, in computing the two semesters in which a student may elect to repeat a course in which a "D" or "F" grade is earned. Additionally, a student who initially enters the University in the spring semester may repeat courses in which a "D" or "F" grade is earned and which were taken in the summer sessions following initial enrollment, without having either of the summer sessions count as one of the "two semesters" to which the policy refers.
- Students desiring to take advantage of the FRR policy must complete a FRR Request Form, which is available in the School of Business Administration, Office of Undergraduate Business Education. For additional information about the application of the FRR in the School of Business Administration, consult an academic advisor in the Office of Undergraduate Business Education.

Readmission

The requirements for readmission may be viewed in the General Information (p. 22) section of this Bulletin. The following special

conditions related to readmission are also in effect for the School of Business Administration:

- A student requesting readmission, who was previously dismissed for academic reasons or who had below a 2.0 cumulative GPA, must present adequate evidence that the conditions and/or factors that caused the prior poor academic performance have changed sufficiently and that there is a reasonable expectation of satisfactory performance if the student is permitted to resume study in the School of Business Administration.
- A student dismissed for nonacademic reasons must provide written authorization from the Dean of Students' Office before re-enrollment will be permitted.
- A student who did not earn at least a C grade in MAS 110 or MTH 161 will not be readmitted to the School of Business Administration.
- A student seeking readmission may have conditions placed upon any such readmission. Failure to satisfactorily accomplish the stated conditions may result in dismissal or the student otherwise not being permitted to register for future semesters.

Changes to Academic Requirements

The School of Business Administration reserves the right to change academic requirements including course offerings, grades, and required grade point averages, to ensure that students are receiving the latest knowledge and are maintaining the standards necessary to be professionally competitive. Changes are communicated to students either by written or electronic notice, or personally by their academic advisors.

Requirements for Graduation

Residency and Other Graduation Requirements

In addition to meeting the graduation requirements as set out in Degree Programs, below, a candidate for either the BBA or BSBA degree must complete the last 45 credit hours consecutively and exclusively in degree-seeking status in residence at the School of Business Administration, University of Miami. Credit by examination may not be used to meet the residency requirement. In addition, a minimum of 120 credit hours is required for graduation, not including ENG 103, TAL 191, MTH 099, or any UMI Internship course. The student's last 56 credit hours must be completed at a four-year institution.

Age of Credit Hours

Credit hours more than 12 years old are not recognized for degree purposes.

Grade Point Average (GPA)

Students must earn a cumulative grade point average (GPA) of at least 2.0 in all undergraduate courses *and* a GPA of at least 2.0 in all undergraduate courses taken at the University of Miami in order to meet minimum graduation requirements. Each major and/or minor area of specialization within the School of Business Administration has its own set of requirements regarding minimum GPA, both for individual coursework and for cumulative GPA in major coursework. In some cases, this GPA requirement is higher than 2.0. It is the student's responsibility to be familiar with the grade point requirement for his/her proposed major(s) and any minor(s).

Percentage of Credit Hours at UM Required

At least fifty percent of the total credit hours required in the Business Core and the major and minor areas of specialization must be completed at the University of Miami. Considered separately, at least fifty percent of the credit hours required in the major only and/or minor only must be completed at the University of Miami.

Degree Programs

Bachelor of Business Administration (BBA)

All BBA students must complete areas A, B, C, D, and E as listed below. All courses except area D must be taken for graded credit.

A. University of Miami's General Education Requirements

The School of Business Administration participates in the University's General Education requirements (p. 19). See descriptions in the General University Information section of this Academic Bulletin.

All students must satisfy the University's general education Areas of Proficiency: English composition (ENG 105 and ENG 106), Advanced Writing and Communication Skills (School-based program described below), and Quantitative Skills (MAS 110 or any Department of Mathematics course numbered MTH 108 or higher). In addition, all undergraduate students must satisfy the University's general education distribution requirements in three Areas of Knowledge. Every BBA student must complete a cognate designated Arts & Humanities (A&H) outside the School of Business Administration. As each business major and minor fulfills a cognate requirement in one Area of Knowledge, depending on the Area of Knowledge of the student's major(s) and any minor(s), an additional cognate in either People & Society (P&S), or Science, Technology, Engineering, and Mathematics (STEM) may also be required of the BBA student. Students are required to declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

The School of Business Administration's program establishing Advanced Writing and Communication Skills proficiency for business requires students to successfully complete the following courses beyond the basic English composition courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required to complete ENG 230, Advanced Business Communication, with at least a C- before enrolling in BUS 300.

The University Quantitative Skills proficiency requirement is satisfied within the BBA degree requirements upon successful completion of MAS 110.

B. BBA Business Core

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3

BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100- and 200-level Business Core courses must be completed before taking 300- and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but they should be completed before taking MGT 401 or any upper-level courses in the major area of specialization.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better.

Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

C. Major and Minor Areas of Specialization - Requirements

All students must complete the requirements for at least one major in one of the School of Business Administration areas of specialization. Additionally, students may elect to complete a minor in an area of specialization distinct from the major. The minor may be in an area of specialization offered by the School of Business Administration or by another School or College within the University. Major and minor area of specialization requirements are specified by each academic department. Every specialization (major and minor) requirement must be taken for a grade and completed with a grade of "C-" or higher, and students must earn a minimum cumulative GPA of 2.0 in all major and minor specialization courses attempted, unless a higher grade or GPA is prescribed by the relevant department for a specific major or minor area of specialization. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a

second major or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major or a co-major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional/co-major may be used to satisfy a business major or minor area of specialization.

Major areas of specialization in the School of Business Administration are available only with completion of the required Business Core. Therefore, students in other Schools and Colleges of the University of Miami seeking to pursue a major area of specialization in the School of Business Administration must successfully transfer to the School of Business Administration and complete all Business Core requirements for either the BBA or BSBA degree, in addition to completing the specific coursework required for the business major area of specialization. A student in another School or College at the University of Miami pursuing a business degree as a "second degree" or "dual degree student" must meet the minimum requirements for transfer to the School of Business Administration, whether or not the student formally transfers to the School of Business Administration.

Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

Majors and Minors for the BBA Degree

Major Areas of Specialization	Responsible Department
Accounting (P&S)	Accounting
Business Technology (STEM)	Business Technology
Economics (P&S or STEM)	Economics
Entrepreneurship (P&S)	Management
Finance (STEM)	Finance
Health Sector Management and Policy (P&S)	Health Sector Management and Policy
Human Resource Management (P&S)	Management
International Finance and Marketing (STEM)	Finance
Legal Studies (P&S)	Business Law
Management (P&S)	Management
Marketing (P&S)	Marketing
Real Estate (STEM)	Finance

Minor Areas of Specialization	Responsible Department
Accounting (P&S)	Accounting
Business Law (P&S)	Business Law
Business Technology (STEM)	Business Technology
Economics (P&S)	Economics
Entrepreneurship (P&S)	Management
Finance (STEM)	Finance
Health Sector Management and Policy (P&S)	Health Sector Management and Policy

International Business (P&S)	Undergraduate Business Education
Management (P&S)	Management
Marketing (P&S)	Marketing

D. Electives (as needed to meet the minimum 120 credit hours)

All undergraduate courses offered by the University may be used as free electives with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student's cumulative GPA, and credit for the course is included in the student's overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used as preparation for entrance to medical school must be taken for a grade.

E. International Focus Within the Curriculum

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Bachelor of Science in Business Administration (BSBA)

The BSBA degree in the School of Business Administration emphasizes quantitative foundation courses. All BSBA majors in the School of Business Administration must complete areas A, B, C, D, and E as listed below. All courses except area D must be taken for graded credit.

A. University of Miami's General Education Requirements

The School of Business Administration participates in the University's General Education requirements (p. 19). See descriptions in the General University Information section of this Academic Bulletin.

All students must satisfy the University's general education Areas of Proficiency: English composition (ENG 105 and ENG 106), Advanced Writing and Communication Skills (School-based program described below), and Quantitative Skills (any Department of Mathematics course numbered MTH 108 or higher). In addition, all undergraduate students must satisfy the University's general education distribution requirements in three Areas of Knowledge. Every BSBA student must complete a cognate designated Arts & Humanities (A&H) outside the School of Business Administration. As each business major and minor fulfills a cognate requirement in one Area of Knowledge, depending on the Area of Knowledge of the student's major(s) and any minor(s), an additional cognate in either People & Society (P&S), or Science, Technology, Engineering, and Mathematics (STEM) may also be required of the BSBA student. Students are required to declare their cognates with the Office of Undergraduate Business Education prior to the start of the junior year.

The School of Business Administration's program establishing Advanced Writing and Communication Skills proficiency for business requires each student to complete the following courses beyond the basic English

composition courses, ENG 105 and ENG 106: BSL 212 and BUS 300. Any student who does not complete ENG 106 with at least a C- is required to complete ENG 230, Advanced Business Communication, with at least a C- before enrolling in BUS 300.

The University Quantitative Skills proficiency requirement is satisfied within the BSBA degree requirements upon successful completion of MTH 161.

B. BSBA Business Core

MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	
MGT 445	Supply Chain Modeling and Analysis	
MGT 446	Supply Chain Strategy	
Total Credit Hours		62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be

completed before taking MGT 401 or any upper-level courses in the major area of specialization.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

C. Major and Minor Areas of Specialization - Requirements

All students must complete the requirements for at least one major in one of the School of Business Administration areas of specialization. Additionally, students may elect to complete a minor in an area of specialization distinct from the major. The minor may be in an area of specialization offered by the School of Business Administration or by another School or College within the University. The major and minor area of specialization requirements are specified by each academic department. Every specialization (major/minor) requirement must be taken for a grade and completed with a grade of "C-" or higher, and students must earn a minimum cumulative GPA of 2.0 in all major and minor specialization courses attempted, unless a higher grade or GPA is prescribed by the relevant department for a specific major or minor. For specific information on minors offered by other Schools and Colleges of the University of Miami, please refer to the applicable College, School, or Department section within this Academic Bulletin.

Business students are permitted to pursue more than one (business or other) major in distinct areas of specialization; however, completion of all required coursework is dependent upon careful sequencing. No course may be counted toward more than one major area of specialization or toward a major and a minor area of specialization, except a course that is specifically listed by number as required for both major areas of specialization and/or a major and a minor area of specialization. The courses of choice required for one major or minor area of specialization may not be utilized to satisfy courses of choice requirements for a second major or minor area of specialization. Consequently, students should understand that completion of more than one major and/or minor area of specialization may necessitate more than 120 credit hours or more than eight semesters of study for graduation.

Business students may choose to pursue a second major (also referred to as an additional major or a co-major) from the College of Arts and Sciences, the School of Communication, or the School of Education (certain majors only). No courses used to satisfy an additional/co-major may be used to satisfy a business major or minor.

Major areas of specialization in the School of Business Administration are available only with completion of the required Business Core.

Therefore, students in other Schools and Colleges of the University of Miami seeking to pursue a major area of specialization in the School of Business Administration must successfully transfer to the School of Business Administration and complete all Business Core requirements for either the BBA or BSBA degree, in addition to completing the specific coursework required for the business major area of specialization. A student in another School or College at the University of Miami pursuing a business degree as a "second degree" or "dual degree student" must meet the minimum requirements for transfer to the School of Business Administration, whether or not the student formally transfers to the School of Business Administration.

Students are required to declare their major area of specialization and minor area of specialization with the Office of Undergraduate Business Education prior to the start of their junior year.

Majors and Minors for the BSBA Degree

Major Areas of Specialization	Responsible Department
Accounting (P&S)	Accounting
Business Analytics (STEM)	Management Science
Business Technology (STEM)	Business Technology
Economics (P&S or STEM)	Economics
Entrepreneurship (P&S)	Management
Finance (STEM)	Finance

Human Resource Management (P&S)	Management
International Finance and Marketing (STEM)	Finance
Legal Studies (P&S)	Business Law
Management (P&S)	Management
Marketing (P&S)	Marketing
Real Estate (STEM)	Finance

Minor Areas of Specialization	Responsible Department
Accounting (P&S)	Accounting
Business Analytics (STEM)	Management Science
Business Law (P&S)	Business Law
Business Technology (STEM)	Business Technology
Economics (P&S)	Economics
Entrepreneurship (P&S)	Management
Finance (STEM)	Finance
Health Sector Management and Policy (P&S)	Health Sector Management and Policy
International Business (P&S)	Undergraduate Business Education
Management (P&S)	Management
Marketing (P&S)	Marketing

D. Electives (as needed to meet the minimum 120 credit hours)

All undergraduate courses offered by the University may be used as free electives with the following exceptions:

- ENG 103, TAL 191, MTH 099, and UMI 105-UMI 410, are offered for credit but do not count toward degree requirements. Nonetheless, the grade, if any, earned in any of these courses is included in the student's cumulative GPA, and credit for the course is included in the student's overall credit hours earned. Accordingly, these courses will serve to increase the total number of credit hours required to graduate.
- No more than 8 credit hours in applied music, including band, may be used.
- Any science course taken as an elective and used in preparation for entrance to medical school must be taken for a grade.

E. International Focus Within the Curriculum

At least one course with an international focus must be completed within the degree requirements. The appropriateness of the course is determined by the academic advisor.

Honors

General Honors Program, University of Miami

Beginning Academic Year 2015-2016: The Foote Fellows Program (p. 52) serves as the University's General Honors Program.

Prior to Academic Year 2015-2016: Eligible students were invited to join the University's General Honors Program. A total of 24 credit hours of designated (H) honors courses is required to graduate with General University Honors. A minimum 3.5 cumulative GPA must also be maintained in all honors courses. For details, consult the University Honors Program Office (http://www.miami.edu/index.php/honors_program_home) or an academic advisor in the Office of Undergraduate Business Education.

Graduation (Latin) Honors

- Students who qualify based on their cumulative GPA and class rank will graduate with University Honors (p. 25): *cum laude*, *magna cum laude*, or *summa cum laude*.
- For details consult an academic advisor in the Office of Undergraduate Business Education and the University Honors Program Office (http://www.miami.edu/index.php/honors_program_home).

General Business Honors, School of Business Administration

Graduation with General Business Honors requires:

- Completion of all of the requirements of the BSBA degree program; and
- A minimum 3.75 cumulative GPA at graduation.

For details, consult an academic advisor in the Office of Undergraduate Business Education.

Departmental Honors in Business

Graduation with Departmental Business Honors requires:

- A minimum 3.9 GPA in School of Business Administration courses at the end of the junior year; and
- Completion of a 3-credit hour research project during the entire senior year on a topic that is of interest to both the faculty member supervising the research and the student responsible for completing it. The depth of the project must be consistent with the time requirements of a 3-credit hour upper-level class in the supervising department; and
- A minimum 3.9 GPA in all School of Business Administration courses at graduation; and
- Any other requirements, if any, established by the Department granting honors, as set forth in this Academic Bulletin.

Students who major in two distinct areas of specialization may complete their research project in the department of either business major

specialization. Students in interdisciplinary majors (Entrepreneurship, Health Sector Management and Policy, International Finance and Marketing, Real Estate) may complete their research project in any department within the major. Students pursuing a minor may complete their research project in the department of either their major or minor area of specialization.

The 3-credit hour research project class is taken for "credit only" and does not count toward the 120-credit hours required for graduation. Students who begin a research project but do not complete it will be retroactively withdrawn from the research course. Students receive credit for the project only if the work is deemed to be of exceptional quality, consistent with the workload of a 3-credit hour upper-level independent study course, and worthy of a designation that is only open to the top 1% of School of Business Administration undergraduates.

Deadlines and procedures for the projects are available in the Office of Undergraduate Business Education and in department offices.

Business Honor Societies

Students may be nominated for or elected into an honor society based on specific criteria. Contact the listed department for additional information.

- Beta Gamma Sigma (Highest Honors in Business) (Undergraduate Business Education (<http://bus.miami.edu/undergraduate-programs>))
- Beta Alpha Psi (Department of Accounting (<http://bus.miami.edu/faculty-and-research/academic-departments/accounting/contact-us>))

Other Honors

- Omicron Delta Epsilon (Department of Economics (<http://bus.miami.edu/faculty-and-research/academic-departments/economics/contact-us>))

Special Programs for Business Students

The Global Business Studies Program: Latin America

The Global Business Studies Program (<https://www.bus.miami.edu/undergraduate-programs/curriculum/majors/global-business>) is a co-major option for incoming freshman who apply and are selected. The co-major is not available to continuing or transfer students. Students in the program simultaneously pursue a major in a functional area of business and, in the co-major, region-specific global studies coursework.

Curriculum for Co-major in Global Business Studies (21-27 credit hours)

1. Introduction to the region (3 credit hours)
2. Demonstrated proficiency in the language of the region, or where this is not feasible, at least one language course at the 200 level or above (min. 3 credit hours) Students may demonstrate language proficiency by enrolling in business coursework delivered in the language of the region selected.
3. Economics of the region (3 credit hours)
4. Political and/or Regulatory Environment of the region (3 credit hours)
5. History of the region (3 credit hours)
6. Introduction to International Business (Standard course is MGT 349. Recommended alternatives: MGT "Doing Business in [the Region]"

where available, or other approved business course in-country) (total of 3 credit hours)

7. Seminar & Senior Thesis (6 credit hours)

- Culminates in a written research paper examining a significant problem or proposal for a particular country, approached from an interdisciplinary stand point
- Carried out under the supervision of one or more faculty members
- Oral presentation of the student's findings and recommendations also required
- Internship or directed study in-country may allow for field research

8. Minimum of one semester "study abroad" in the studied region is required.

- Students may choose to satisfy the co-major's economics and/or history and/or politics/regulation course requirement in-country.

Minor Area of Specialization in International Business (P&S)

The International Business minor provides business students an interdisciplinary perspective of international business to augment their studies in other areas of business specialization. The International Business minor may not be taken by students pursuing the International Finance and Marketing major or by non-business students. Students must complete all pre-requisite courses before enrolling in required International Business minor courses.

The International Business minor consists of 12 credit hours as follows:

Core Courses		
Select two or three courses (6-9 credit hours) from the following:		6-9
FIN 330	International Finance	
MGT 349	International Business	
MGT 459	International and Multinational Management	
MKT 360	International Marketing	
Breadth Elective Courses		
Select one or two courses (3-6 credit hours) to equal 12 total credit hours for the minor from the following:		3-6
BSL 412	International Business Law	
ECO 351	Economics of Developing Countries	
ECO 371	Latin America And The Global Economy	
ECO 441	International Trade Theory	
ECO 442	International Monetary Economics	
FIN 431	International Financial Management	
MGT 359	Comparative Management	
MKT 469	International Marketing Management	
POL 346	U.S.-Latin American Relations	
POL 347	American Foreign Policy	
POL 348	United States Relations with the Middle East	
POL 380	Comparative Political Analysis	

POL 381	West European Politics (Previous Title: European Politics and Government)
POL 384	Postcommunist Russian Politics
POL 385	Politics and Society in Latin America
POL 387	Politics of the Middle East
POL 392	International Terrorism
POL 544	Chinese Foreign Policy
POL 582	Political Economy of Development
POL 588	Politics in China
POL 591	International Security
POL 593	International Relations of the Middle East
Total Credit Hours	
	12

Options for Non-Business Students

Cognate for Non-Business Students (P&S)

The School of Business Administration offers a general business cognate to non-business students: *Understanding Business*. Completion of the business cognate fulfills the University's General Education requirement of a cognate in the Area of Knowledge labeled People & Society (P&S).

This cognate offers students an overview of the business environment with the goal of promoting awareness and understanding of the real-world issues that affect the global economy in the 21st century. Courses in the cognate deliver the essential business concepts that enable critical consideration of the questions that confront decision makers in the various functional areas of business. Students need to declare the cognate at their home school or college.

The business cognate consists of the following courses:

Required Course ¹		
BUS 200	Introduction To Business	3
Options ²		
Select two courses (6 credit hours) from the following:		6
BUS 201	Money	
BUS 202	Introduction To The Legal Environment Of Business	
BUS 203	Managing Effectively: A Skills Development Approach	
BUS 206	PRINCIPLES OF INTERNATIONAL BUSINESS	
FIN 300	Fundamentals of Finance for Non-Finance Majors	
HIS 225	History of the Modern Business Enterprise	
MGT 251	Nature and Foundations of Entrepreneurship	
MKT 301	Marketing Foundations	
Total Credit Hours		9

¹ Course must be taken by all students pursuing the business cognate before taking any other courses in the cognate.

² To be taken after completing BUS 200. All courses must be taken within the current pre-requisite structure.

Minors for Non-Business Students

Students in other schools and colleges of the University may choose to pursue any of the following minor areas of specialization in the School of Business Administration by officially declaring the minor at their home school or college:

Minor Areas of Specialization

- Business Law (P&S) (p. 157)
- Business Technology (STEM) (p. 160)
- Economics (P&S) (p. 164)
- Entrepreneurship (P&S) (p. 180)
- Finance (STEM) (p. 171)
- Health Sector Management and Policy (P&S) (p. 174)
- Management (P&S) (p. 181)
- Marketing (P&S) (p. 187)

Students interested in completing a minor offered by the School of Business Administration should consult with an academic advisor *in the School or College of their degree/major* to determine if a minor in business is acceptable. Neither advice nor consent from either the Office of Undergraduate Business Education or the relevant School of Business Administration department is necessary for a student to choose or complete a minor offered in the School of Business Administration. Instead the non-business student should simply declare the minor and complete the necessary coursework, according to the details listed in the appropriate department's section of this Academic Bulletin and the following supplemental guidelines, which are applicable to all minors unless otherwise provided by the department offering the minor:

All courses within the minor must be taken for a grade and completed with a grade of "C-" or higher. To be awarded the minor, the student must also achieve a minimum cumulative GPA of 2.0 in all minor courses, unless a higher grade or GPA is prescribed by the department offering the minor, as set out in that department's section of this Academic Bulletin. All courses taken by the student in the department offering the minor will count toward the GPA in the minor.

Foote Fellows

General Overview

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such

as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Foote Fellows in Business

As the best and brightest of each incoming class, School of Business Administration Foote Fellows are afforded the most stimulating academic and co-curricular experiences the School has to offer. They are invited to take part in Foote-only seminars, exclusive workshops on a variety of academic and career-oriented themes, and networking events with some of the School's most honored speakers and guests.

Many of the School's Foote Fellows also engage, one-on-one, with business faculty in cutting-edge research projects that culminate in a series of collaborative workshops as well as potential publications. Unsurprisingly, then, Foote Fellows frequently represent the School as ambassadors to elite conferences and as members of competitive teams vying for regional, national, and international recognition.

Business Foote Fellows also enjoy dedicated academic and co-curricular/career advisors, as well as opportunities for unique mentorship by prominent alumni.

Accounting

Department Code: ACC

Introduction and Educational Objectives

The objective of the program of studies in accounting is to prepare business students to make a smooth transition from college into a successful and meaningful career in the professional practice of accounting, whether it be in public, private, or governmental accounting. Because of the professional aspects of accounting, equal emphasis is placed upon general education in the arts and humanities and the functioning of business enterprises, as well as the basic underlying concepts of accounting.

Degree Programs

A student pursuing the Accounting major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin.

Educational Requirements to Sit for the CPA Exam

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution

and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. **Note:** Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed at: <http://www.myfloridalicense.com/dbpr/cpa/licensure.html>

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida website noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts:

1. the requirements to be eligible to take the CPA exam and
2. the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam

To be eligible to take the CPA exam, you must have completed at least 120 credit hours including 24 credit hours of accounting (auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation) at the upper division (300-level or above) and 24 credit hours in upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division. As part of the general business credit hours, applicants are required to have a total of 6 credit hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable toward the required credit hours nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting. The exam is offered in the following time periods; January – February, April – May, July – August and October – November.

Note: you do not have to have a bachelor's degree in order to sit for the CPA exam.

Requirements for Licensure

In addition to passing all four parts of the CPA exam with at least a 75% within an 18 month rolling period, the BOA requires that you have completed a bachelor's degree plus an additional 30 credit hours for a total of 150 credit hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. (This experience may be obtained before or after sitting for the exam; however, all requirements to sit for the exam must be met before the work experience commences.) If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 credit hours must include a minimum of 36 credit hours of accounting courses at the 300-level or above and at least 39 credit hours of general business courses at the 300-level or above (with some exceptions). Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting

majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State

If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition, if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

Accreditation

The Board accepts degrees from schools accredited by the following associations: Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above-mentioned means, then you must use the provisions of F.A.C. 61H1-27.001(5).

Duplicate Courses

- No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.
- For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

The Fifth Year Option

Many of our graduates satisfy the 30 credit hour requirement for the CPA by continuing on for a fifth year during which time they also can complete the requirements for either the Master of Accounting (MAcc) or Master of Science in Taxation (MST) degree. While the programs are similar in that they offer an opportunity to concentrate in accounting, they differ in degree of specialization and career path orientation. The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers/CFOs or financial analysts. The MST is designed for students interested in careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. Students interested in these programs should consult with the Program Director in the Department of Accounting.

Majors

Major in Accounting

- B.B.A. in Accounting (p. 152)
- B.S.B.A. in Accounting (p. 153)

Minors

Minor in Accounting

- Accounting (p. 155)

Special Programs

Special Programs

- Accelerated Accounting Programs (p. 151)
- Five-Year Accounting Program with Senior-Year Internship (p. 154)

Accelerated Accounting Programs

Accelerated Master's Programs

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) in the usual time frame involving one year of full-time study beyond the Bachelor's level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while in the senior year.

The accelerated programs are available only to students who are undergraduate students at the University of Miami School of Business Administration. The programs are designed in such a way that students can expect to complete both their Bachelor's and Master's degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

Accelerated Program Timeline

1. Internship in summer after junior year
2. Twelve credit hours of work in senior year will count towards the MAcc or MST degree (only students in the accelerated programs are eligible to take these classes during their senior year).
3. In summer after senior year take one graduate course, CPA review course, and the CPA exam.
4. Complete remaining credit hours of graduate work in fall semester after senior year.

Pre-requisites

The following must be completed before students begin their senior year:

- A minimum of 102 credit hours
- All undergraduate degree requirements except for those that can be completed in the senior year
- FIN 303 before or during senior year (for those students who intend to select the MAcc-Corporate track)
- Note: MGT 401 must be completed in the final semester of the undergraduate program.
- The following Accounting major requirements must be taken prior to senior year:

ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II	3
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404	Advanced Taxation	3
or ACC 301	Cost Accounting	
BSL 401	The Law of Financial Transactions	3
Total Credit Hours		18

Senior Year Curriculum (Senior-Graduate Status)

The program-specific curriculum¹ for the senior year is the same for all tracks (except that students selecting the MAcc-Corporate track must complete FIN 303 in order to take the graduate finance courses required for the track) and consists of the following courses:

ACC 301	Cost Accounting ²	3
or ACC 404	Advanced Taxation	
ACC 406	Accounting Systems	3
ACC 411	Advanced Accounting	3
ACC 506	Internal Auditing	2
or ACC 572	Advanced Financial Analysis	
ACC 522	Advanced Issues in Auditing	3
ACC 530	International Financial Reporting Standards	1
ACC 648	Financial Reporting Implications of Income Taxes.	2
BSL 691	The Public Corporation: Legal Perspectives	2
BUS 602	Critical Thinking and Effective Writing	1
BUS 603	Critical Thinking and Effective Speaking	1
FIN 303	Intermediate Financial Management (or other non-accounting undergraduate course approved by Program Director)	3
MGT 401	Strategic Management (taken in final undergraduate semester)	3
Select one additional non-accounting undergraduate course approved by Program Director		3
Total Credit Hours		30

¹ Program requirements are subject to change. Not all courses are offered every semester or term. Consult the Program Director for the recommended sequence.

² Both ACC 301 and ACC 404 are required courses. One of these two courses is completed in the junior year. The remaining course needs to be completed in the senior year.

Students must select their track (MAcc-Assurance, MAcc-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

Summer after Senior Year

Students must take one graduate accounting course in the summer following their senior year. Accounting courses are offered based on demand and could include ACC 620 (offered every summer) or ACC 649.

Students are also **REQUIRED** to take an approved CPA review course during the summer following their senior year after graduation. Students who do not take a CPA review course must complete an additional six graduate credit hours which will likely delay graduation from December to the following May. Students are expected to pass part, if not all, of the CPA exam during this summer.

Final Fall Semester

In the final fall semester students will complete the remaining 15 or 16 graduate credit hours including the requirements for their track

and electives selected in consultation with the Program Director in the Department of Accounting.

Admission to the Accelerated Master's Programs

Incoming Freshmen

- Prospective students may apply to the accelerated program when they apply for admission to the University of Miami.
- SAT Reading and Math combined scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have a cumulative and an accounting major GPA of 3.3 or higher by their junior at the University of Miami. Students must then maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed a minimum of 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 30 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain a cumulative GPA of 3.3 or higher and an accounting major GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed a minimum of 102 credit hours by the start of their senior year including the following:

ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II	3
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404	Advanced Taxation	3
or ACC 301	Cost Accounting	
BSL 401	The Law of Financial Transactions	3
Total Credit Hours		18

B.B.A. in Accounting

Major Area of Specialization in Accounting (P&S)

Students pursuing the BBA in Accounting must complete the BBA Business Core and the specific coursework for the Accounting major area of specialization as follows:

BBA Business Core Requirements for the Accounting Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Area Specific Coursework for the Accounting Major Area of Specialization (P&S)

The undergraduate curriculum consists of 24 credit hours of Accounting and 3 credit hours of Business Law beyond the Business Core requirements. All courses must be taken within the current pre-requisite structure.

Required Courses		
ACC 301	Cost Accounting	3
ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II **	3
ACC 406	Accounting Systems	3
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404	Advanced Taxation	3
ACC 411	Advanced Accounting	3

BSL 401	The Law of Financial Transactions	3
Total Credit Hours		27

** To continue as an accounting major, a student must have a minimum cumulative GPA of 3.0 in accounting courses before enrolling in ACC 312. All subsequent coursework specific to the accounting major area of specialization, including ACC 312, must be completed with a grade of "C-" or better.

B.S.B.A. in Accounting**Major Area of Specialization in Accounting (P&S)**

Students pursuing the BSBA in Accounting must complete the BSBA Business Core and the specific coursework for the Accounting major area of specialization as follows:

BSBA Business Core Requirements for the Accounting Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3

Quantitative Elective

Select one of the suggested courses approved by the academic advisor:

BTE 324	Object-Oriented Programming	3
BTE 423	Database Management Systems	3
ECO 430	Applied Econometrics	3
ECO 510	Mathematical Economics And Applications	3
MAS 342	Introduction to Optimization and Decision Making	3
MAS 442	Stochastic Models in Operations Research	3
MAS 547	Computer Simulation Systems	3
MGT 445	Supply Chain Modeling and Analysis	3

MGT 446 Supply Chain Strategy	
Total Credit Hours	62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Accounting Major Area of Specialization (P&S)

The undergraduate curriculum consists of 24 credit hours of Accounting and 3 credit hours of Business Law beyond the Business Core requirements. All courses must be taken within the current pre-requisite structure.

Required Courses		
ACC 301	Cost Accounting	3
ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II ¹	3
ACC 406	Accounting Systems	3
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404	Advanced Taxation	3
ACC 411	Advanced Accounting	3
BSL 401	The Law of Financial Transactions	3
Total Credit Hours		27

¹ To continue as an accounting major, a student must have a minimum cumulative GPA of 3.0 in accounting courses before enrolling in ACC 312. All subsequent coursework specific to the accounting major area of specialization, including ACC 312, must be completed with a grade of "C-" or better.

Five-Year Accounting Program with Senior-Year Internship

Five-Year Accounting Program with Senior-Year Internship

The Five-Year Accounting Program with Senior-Year Internship is intended to allow exceptional students to acquire both undergraduate and graduate accounting degrees in five years while gaining valuable experience working at a full-time internship in the spring semester of their senior year. Students will also take a CPA review course and sit for the CPA exam so they can pass some (if not all) parts of the exam before they graduate with their Master of Accounting or Master of Science in Taxation degree.

Program Timeline

1. Junior Year: Complete an application to the program and apply for an internship position to take place in the spring of senior year.

2. Fall semester of Senior Year: Submit the internship agreement and apply to graduate school.
3. Spring semester of Senior Year: Complete Internship followed by 9 credit hours of coursework to complete the undergraduate degree and Accounting major.
4. Summer following Senior Year: Take CPA review and exam.
5. Fall semester following Senior Year: Begin the Master of Accounting (MAcc) or Master of Science in Taxation (MST) Program.

Pre-requisites

The program is designed for University of Miami School of Business Administration undergraduate students who are pursuing the accounting major and who have a cumulative GPA of at least 3.2 at the time of application. Admission to the program is based on several criteria, so a 3.2 GPA does not guarantee admission. Students should discuss the program and their academic plan for entering the program with an academic advisor in the Office of Undergraduate Business Education or with the Program Director in the Department of Accounting. Prior to the spring semester of their senior year, students will need to have completed all undergraduate degree requirements, except for two accounting major courses and MGT 401.

Senior Year Spring Semester Curriculum

In the first half of the spring semester of the senior year, students will work full-time in an accounting internship for which they can receive 3 credit hours toward their undergraduate degree (ACC 550). Additionally, in the spring semester of their senior year, students will take 9 credit hours in three specially-designed short-duration courses that include two accounting major courses and MGT 401.

Summer, Fall, and Spring after Senior Year

In the summer after their senior year, students will have the opportunity to take a CPA review course and sit for the CPA exam. Students will complete their Master of Accounting or Master of Science in Taxation in the fall and spring semesters after senior year and begin working that following summer or fall.

Admission to the Five-Year Accounting Program with Senior-Year Internship

- Students must apply to the program in their junior year and obtain an "approved" internship through the Toppel Career Center.
- The internship must be scheduled to take place during the spring semester of their senior year.
- In the fall semester of their senior year, before registering for their senior-year spring classes, students must submit a copy of their internship agreement to the Program Director or Program Manager in the Department of Accounting.
- By the fall semester of their senior year, students must have applied for admission to the graduate program and submitted their verification deposit to pursue a Master of Accounting or Master of Science in Taxation degree in the fall semester immediately following their senior year.
- The GMAT will be waived for students admitted into the program.

Minor in Accounting

Minor Area of Specialization in Accounting (P&S)

The Department of Accounting allows business students to earn a minor in Accounting. The Accounting minor is not available to non-business students.

In addition to the general requirements for all business minors, business students wishing to minor in Accounting must complete the following 9 credit hours of coursework in accordance with the current pre-requisite structure, which includes completion of ACC 211 and ACC 212:

Required Courses ¹		
ACC 301	Cost Accounting	3
ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II ²	3
Total Credit Hours		9

¹ ACC 211 and ACC 212 are pre-requisites for all other Accounting courses.

² To obtain a minor in Accounting a student must have a minimum cumulative GPA of 3.0 in Accounting courses before enrolling in ACC 312. This course has the additional pre-requisite of ACC 311

Business Law

Department Code: BSL

Introduction

The modern manager faces increasing legal implications in daily operations and in formulating business policy. Consequently, effective decision-making requires an appreciation of the social, ethical, economic, and political bases of law as it relates to business. Business law courses provide the student with fundamental insight into legal institutions, the regulatory environment, and the nature of legal discourse, as well as an array of substantive principles of law, including such areas as contracts, sales, business organizations, and domestic and international commercial relationships.

Educational Objectives

The primary goals of the Department of Business Law are to contribute to legal knowledge through conducting scholarly research, to disseminate it by publication in leading journals and law reviews, and to transmit that knowledge to students and the larger UM-wide, business, and professional communities.

These goals both inform and drive the Department's educational objectives, which focus on:

- instilling in students a strong sense of the legal and ethical issues permeating business;
- aiding students' comprehension of the legal and regulatory environment as well as the ethical considerations and substantive laws that shape business practices and policies; and
- developing students' analytical and problem solving ability, as well as their oral and written presentation skills.

Degree Programs

A student pursuing the Legal Studies major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin.

Majors

Major in Legal Studies

- B.B.A. in Legal Studies (p. 155)
- B.S.B.A. in Legal Studies (p. 156)

Minors

Minor in Business Law

- Business Law (p. 157)

B.B.A. in Legal Studies

Major Area of Specialization in Legal Studies (P&S)

A student may pursue the Bachelor of Business Administration (BBA) with a major area of specialization in Legal Studies. This course of study facilitates the interaction between legal counsel and the business manager, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human resources, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.

Students pursuing the BBA in Legal Studies must complete the BBA Business Core and the specific coursework for the Legal Studies major area of specialization as follows:

BBA Business Core Requirements for the Legal Studies Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3

MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Legal Studies Major Area of Specialization (P&S)

Students must complete a minimum of 15 credit hours of Business Law courses beyond the core course, BSL 212 (total of 18 credit hours), as follows:

Core Course		
BSL 212	Introduction to Business Law (Taken as part of the Business Core, it is a pre-requisite for all other BSL courses.)	
Required Course		
BSL 485	Managing the Legal Factor (required in the student's final semester)	3
Elective Courses ¹		
Select four courses (12 credit hours) from the following:		12
BSL 304	Corporate Law	
BSL 305	Legal and Social Aspects of Business Regulation	
BSL 324	Negotiation	
BSL 333	Legal Aspects of Real Estate Transactions	
BSL 401	The Law of Financial Transactions	
BSL 412	International Business Law	
BSL 424	Intellectual Property Law	
BSL 435	Law Of Entrepreneurship	
BSL 460	Health Care Law and Ethics	
BSL 476	The Law Of Risk	
BSL 499	Special Topics (as appropriate)	
Total Credit Hours		15

¹ All courses must be completed within the current pre-requisite structure.

NOTE: All specific coursework for the major in Legal Studies must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

B.S.B.A. in Legal Studies

Major Area of Specialization in Legal Studies (P&S)

A student may pursue the Bachelor of Science in Business Administration (BSBA) with a major area of specialization in Legal Studies. This course of study facilitates the interaction between legal counsel and the business manager, preparing graduates to excel in a wide variety of business pursuits. A flexible, inherently cross-disciplinary course of study, the Legal Studies major can facilitate careers in such fields as risk management, compliance, human resources, marketing, finance and accounting, general business or non-profit management, health care, government, and small business ownership/entrepreneurship. For some, it may also provide an appropriate foundation for the professional study of law.

Students pursuing the BSBA in Legal Studies must complete the BSBA Business Core and the specific coursework for the Legal Studies major area of specialization as follows:

BSBA Business Core Requirements for the Legal Studies Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Quantitative Elective		
Select one of the suggested courses approved by the academic advisor:		3
BTE 324	Object-Oriented Programming	
BTE 423	Database Management Systems	
ECO 430	Applied Econometrics	
ECO 510	Mathematical Economics And Applications	
MAS 342	Introduction to Optimization and Decision Making	
MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	

MGT 445	Supply Chain Modeling and Analysis	
MGT 446	Supply Chain Strategy	
Total Credit Hours		62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Legal Studies Major Area of Specialization (P&S)

Students must complete a minimum of 15 credit hours of Business Law courses beyond the core course, BSL 212 (total of 18 credit hours), as follows:

Core Course		
BSL 212	Introduction to Business Law (Taken as part of the Business Core, it is a pre-requisite for all other BSL courses.)	
Required Course		
BSL 485	Managing the Legal Factor (required in the student's final semester)	3
Elective Courses ¹		
Select four courses (12 credit hours) from the following:		12
BSL 304	Corporate Law	
BSL 305	Legal and Social Aspects of Business Regulation	
BSL 324	Negotiation	
BSL 333	Legal Aspects of Real Estate Transactions	
BSL 401	The Law of Financial Transactions	
BSL 412	International Business Law	
BSL 424	Intellectual Property Law	
BSL 435	Law Of Entrepreneurship	
BSL 460	Health Care Law and Ethics	
BSL 476	The Law Of Risk	
BSL 499	Special Topics (as appropriate)	
Total Credit Hours		15

¹ All courses must be completed within the current pre-requisite structure.

NOTE: All specific coursework for the major in Legal Studies must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

Minor in Business Law

Minor Area of Specialization in Business Law (P&S)

The Business Law minor is flexible, permitting business and non-business students alike to augment their studies with an appreciation of the

role of law and ethics in global citizenship as well as in the student's chosen corporate, creative, scientific, academic, professional, or personal endeavors. Students in the School of Business Administration, as well as students in the other schools and colleges of the University of Miami, pursue the minor in Business Law by officially declaring the minor at their home school or college and completing the coursework identified below. Interested *non-business* students, before declaring the minor, should consult with an academic advisor *in the School or College of their degree/major* to determine if the minor in Business Law is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Business Law Department is necessary.

The 12 credit hour minor in Business Law consists of the following (all courses must be completed within the current pre-requisite structure):

Required Courses		
BSL 212	Introduction to Business Law (part of the Business Core for Business students)	3
BSL 485	Managing the Legal Factor (required in the student's final semester)	3
Elective Courses		
Select two courses (6 credit hours) from the following:		6
BSL 304	Corporate Law	
BSL 305	Legal and Social Aspects of Business Regulation	
BSL 324	Negotiation	
BSL 333	Legal Aspects of Real Estate Transactions	
BSL 401	The Law of Financial Transactions	
BSL 412	International Business Law	
BSL 424	Intellectual Property Law	
BSL 435	Law Of Entrepreneurship	
BSL 460	Health Care Law and Ethics	
BSL 476	The Law Of Risk	
BSL 499	Special Topics (as appropriate)	
Total Credit Hours		12

NOTE: All specific coursework for the minor in Legal Studies must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the minor area of specialization.

Business Technology

Department Code: BTE

Introduction

The Department of Business Technology serves the University as the focus for employing business technology and information management in the efficient solution of the entire range of business problems.

Today's business and government organizations rely heavily upon information management for efficient administration and management. Collection, storage, and retrieval of data by computers are involved in the wide range of business activities including daily operations, management decision-making, and long-range planning. As the dependence of management on business technology grows, so does the need for

business technology specialists. The courses and degree programs are described below.

Educational Objectives

The Business Technology major is designed to provide the student with the key information technology and management skills needed in today's business environment, plus a firm grounding in the primary business areas in which these skills will be applied. Graduates of the program may qualify for entry-level positions as systems and/or information analysts, information security specialists, consultants, user support analysts, programmers, or other information management positions.

Degree Programs

A student pursuing the Business Technology major can earn either a Bachelor in Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin.

Majors

Major in Business Technology

- B.B.A. in Business Technology (p. 158)
- B.S.B.A. in Business Technology (p. 159)

Minors

Minor in Business Technology

- Business Technology (p. 160)

B.B.A. in Business Technology

Major Area of Specialization in Business Technology (STEM)

Students pursuing the BBA in Business Technology must complete the BBA Business Core and the specific coursework for the Business Technology major area of specialization as follows:

BBA Business Core Requirements for the Business Technology Major Area of Specialization (STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3

MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Business Technology Major Area of Specialization (STEM)

Students must complete a minimum of 18 credit hours of Business Technology courses beyond the Business Core courses.

Required Courses ¹		
BTE 320	Introduction to Programming	3
BTE 400	Web-Mobile-Cloud (pre-requisite BTE 320)	3
BTE 417	Fundamentals Of Tech Project Management, Fundamentals of Tech Project Management	3
BTE 423	Database Management Systems (pre-requisite BTE 320 or BTE 324)	3
Elective Courses ¹		
Select two courses (6 credit hours) from the following:		6
BTE 324	Object-Oriented Programming	
BTE 360	Systems Analysis and Design	
BTE 389	Launching High Technology Ventures	
BTE 401	Computers In An Inter-Networked Society	
BTE 413	Big Data Strategy	
BTE 430	Business Networks (pre-requisite BTE 320)	
BTE 450	Introduction to Health Informatics	
BTE 465	Web Application Development (pre-requisite BTE 320)	
BTE 497	Topics in Computer Information Systems (Legal Informatics)	
BTE 523	Big Data Development (pre-requisite BTE 320 & BTE 423)	
BTE 524	Mobile Apps Development (pre-requisite BTE 324)	
BTE 535	Information Security (pre-requisite BTE 320 & BTE 430)	
BTE 565	Mobile to Cloud: Developing Distributed Applications (pre-requisite BTE 320 or BTE 324)	
BTE 490	Topics in Computer Information Systems	

BTE 491	Topics in Computer Information Systems	
BTE 493	Topics in Computer Information Systems	
BTE 494	Topics in Computer Information Systems	
BTE 495	Topics in Computer Information Systems	
BTE 496	Topics in Computer Information Systems	
BTE 498	Topics in Computer Information Systems	
BTE 499	Directed Study in Computer Information Systems	
BTE 550	Computer Information Systems Internship	
Total Credit Hours		18

¹ All courses must be completed within the current pre-requisite structure.

Note: All specific coursework for the major in Business Technology must be completed with a grade of "C-" or higher. In addition, a minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

B.S.B.A. in Business Technology

Major Area of Specialization in Business Technology (STEM)

Students pursuing the BSBA in Business Technology must complete the BSBA Business Core and the specific coursework for the Business Technology major area of specialization as follows:

BSBA Business Core Requirements for the Business Technology Major Area of Specialization (STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Quantitative Elective		
Select one of the suggested courses approved by the academic advisor:		3

BTE 324	Object-Oriented Programming (may only be used if Business Technology is an additional major area of specialization)	
BTE 423	Database Management Systems (may only be used if Business Technology is an additional major area of specialization)	
ECO 430	Applied Econometrics	
ECO 510	Mathematical Economics And Applications	
MAS 342	Introduction to Optimization and Decision Making	
MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	
MGT 445	Supply Chain Modeling and Analysis	
MGT 446	Supply Chain Strategy	
Total Credit Hours		62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Business Technology Major Area of Specialization (STEM)

Students must complete a minimum of 18 credit hours of courses in Business Technology beyond the core course, BTE 320 (total of 21 credit hours), as follows:

Core Course		
BTE 320	Introduction to Programming (taken as part of the BSBA Business Core)	
Required Courses ¹		
BTE 324	Object-Oriented Programming	3
BTE 400	Web-Mobile-Cloud (pre-requisite BTE 320)	3
BTE 417	Fundamentals Of Tech Project Management, Fundamentals of Tech Project Management	3
BTE 423	Database Management Systems (pre-requisite BTE 320 or BTE 324)	3
Elective Courses ¹		
Select two courses (6 credit hours) from the following:		
BTE 360	Systems Analysis and Design	
BTE 389	Launching High Technology Ventures	
BTE 401	Computers In An Inter-Networked Society	
BTE 413	Big Data Strategy	
BTE 430	Business Networks (pre-requisite BTE 320)	
BTE 450	Introduction to Health Informatics	
BTE 465	Web Application Development (pre-requisite BTE 320)	

BTE 497	Topics in Computer Information Systems (Legal Informatics)	
BTE 523	Big Data Development (pre-requisite BTE 320 & BTE 423)	
BTE 524	Mobile Apps Development (pre-requisite BTE 324)	
BTE 535	Information Security (pre-requisite BTE 320 & BTE 430)	
BTE 565	Mobile to Cloud: Developing Distributed Applications (pre-requisite BTE 320 or BTE 324)	
BTE 490	Topics in Computer Information Systems	
BTE 491	Topics in Computer Information Systems	
BTE 493	Topics in Computer Information Systems	
BTE 494	Topics in Computer Information Systems	
BTE 495	Topics in Computer Information Systems	
BTE 496	Topics in Computer Information Systems	
BTE 498	Topics in Computer Information Systems	
BTE 499	Directed Study in Computer Information Systems	
BTE 550	Computer Information Systems Internship	
Total Credit Hours		18

¹ All courses must be completed within the current pre-requisite structure.

Note: All specific coursework for the major in Business Technology must be completed with a grade of "C-" or better. In addition, a minimum cumulative GPA of 2.5 is required for all courses taken toward the major area of specialization.

Minor in Business Technology

Minor Area of Specialization in Business Technology (STEM)

Students in the School of Business Administration, as well as students in the other schools and colleges of the University of Miami, may pursue the minor in Business Technology by officially declaring the minor at their home school or college and completing the coursework specified below. Interested *non-business* students, before declaring the minor, should consult with an academic advisor *in the School or College of their degree/major* to determine if the minor in Business Technology is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Business Technology Department is necessary.

The 12 credit hour minor in Business Technology consists of the following:

Required Courses		
BTE 320	Introduction to Programming	3
BTE 412	Foundations of Business Enterprise Technologies, Foundations Of Business Enterprise Technologies	3
Elective Courses ¹		
Select two courses (6 credit hours) from the following:		6
BTE 324	Object-Oriented Programming	

BTE 360	Systems Analysis and Design	
BTE 389	Launching High Technology Ventures	
BTE 400	Web-Mobile-Cloud (pre-requisite BTE 320)	
BTE 401	Computers In An Inter-Networked Society	
BTE 413	Big Data Strategy	
BTE 417	Fundamentals Of Tech Project Management, Fundamentals of Tech Project Management	
BTE 423	Database Management Systems (pre-requisite BTE 320 or BTE 324)	
BTE 430	Business Networks (pre-requisite BTE 320)	
BTE 450	Introduction to Health Informatics	
BTE 465	Web Application Development (pre-requisite BTE 320)	
BTE 497	Topics in Computer Information Systems (Legal Informatics)	
BTE 523	Big Data Development (pre-requisite BTE 320 & BTE 423)	
BTE 524	Mobile Apps Development (pre-requisite BTE 324)	
BTE 535	Information Security (pre-requisite BTE 320 & BTE 430)	
BTE 565	Mobile to Cloud: Developing Distributed Applications (pre-requisite BTE 320 or BTE 324)	
BTE 490	Topics in Computer Information Systems	
BTE 491	Topics in Computer Information Systems	
BTE 493	Topics in Computer Information Systems	
BTE 494	Topics in Computer Information Systems	
BTE 495	Topics in Computer Information Systems	
BTE 496	Topics in Computer Information Systems	
BTE 498	Topics in Computer Information Systems	
BTE 499	Directed Study in Computer Information Systems	
BTE 550	Computer Information Systems Internship	
Total Credit Hours		12

¹ All courses must be completed within the current pre-requisite structure.

Note: All specific coursework for the minor in Business Technology must be completed with a grade of "C-" or better. In addition, a minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Economics

Department Code: ECO

Introduction and Educational Objectives

Economics uses the idea of optimizing behavior to provide a unified framework for studying human action. The economics curriculum is designed to give business students an understanding of economic theory and its application to a wide range of problems. The program provides excellent preparation for careers in business, government, and international agencies. It is particularly recommended for students

planning graduate study or professional training in fields such as law, business, international studies, public administration, and economics.

Degree Programs

A student pursuing the Economics major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin. Additionally, a student pursuing the Economics major will select one of two possible tracks: Political Economy (the People and Society track) or Quantitative Economics (the Science, Technology, Mathematics, and Engineering track).

Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers. Economics may also be the major area of specialization of a candidate for the Master of Arts (p. 429) and Doctor of Philosophy (p. 420) degrees. Consult the Graduate Academic Programs section of the Bulletin for general requirements of these programs of study.

Majors

Major in Economics

- B.B.A. in Economics (p. 161)
- B.S.B.A. in Economics (p. 162)

Minors

Minors in Economics

- Minor in Economics for Business Students (p. 164)
- Minor in Economics for Non-Business Students (p. 164)

B.B.A. in Economics

Major Area of Specialization in Economics (P&S or STEM)

Students who wish to pursue the Economics major area of specialization will choose between two tracks: Political Economy (P&S) or Quantitative Economics (STEM).

In the Political Economy track, People and Society courses are predominant. In the Quantitative Economics track, Science, Technology, Engineering, and Mathematics courses are predominant.

Students pursuing the BBA in Economics must complete the BBA Business Core and the specific coursework for one of the Economics major tracks as follows:

BBA Business Core Requirements for the Economics Major Area of Specialization (P&S or STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3

ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Choose one of the two tracks listed below: Political Economy (P&S) or Quantitative Economics (STEM).

Specific Coursework for the Economics Major Area of Specialization, Political Economy Track (P&S)

The **Political Economy** track consists of a minimum of 18 credit hours of Economics courses in addition to ECO 211 and ECO 212 (total of 24 credit hours), according to the following:

Core Courses		
ECO 211	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
ECO 212	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
Required Courses		
ECO 300	Microeconomic Theory And Applications ^{1,2}	3
or ECO 302	Micro Economic Theory	
ECO 303	Macro Economic Theory ³	3
Elective Courses		
Select two, three, or four courses (6-12 credit hours) from the following:		6-12
ECO 307	Public Finance and Fiscal Policy	
ECO 311	Labor Economics (I)	
ECO 345	Environmental Economics	

ECO 351	Economics of Developing Countries	
ECO 371	Latin America And The Global Economy	
ECO 379	ECONOMICS OF POVERTY	
ECO 386	Health Economics	
ECO 403	Contemporary Issues in Monetary Economics	
ECO 420	Economic Growth	
ECO 441	International Trade Theory	
ECO 442	International Monetary Economics	
ECO 460	Industrial Organization	
ECO 499	Special Topics (Energy Economics; Global Economics:Trade and Financial Flows; Global Economics, Energy, and Commodity Markets; Managerial Economics; The Economics of China)	
ECO 521	Graduate Macroeconomic Theory	
ECO 532	History of Economic Thought	
Students who have completed ECO 302 may select a maximum of two electives (0-6 credit hours) from the following:		0-6
ECO 430	Applied Econometrics	
ECO 444	Game Theory in Economic Applications.	
ECO 510	Mathematical Economics And Applications ⁴	
ECO 512	Mathematical Economics (II)	
ECO 520	Econometrics	
ECO 533	Advanced Microeconomic Theory	
Additional two options in this category include ECO 499 (Special topics: Forecasting or Special Topics: Information Economics)		
Total Credit Hours		18

¹ All advanced courses in Economics (300-500 levels) require ECO 300 or the more technical version, ECO 302, as a pre-requisite.

² Additional pre-requisite for ECO 300: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher

Additional pre-requisite for ECO 302: MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher

³ Additional pre-requisite for ECO 303: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher

⁴ Additional pre-requisite for ECO 510: MAS 202 or MAS 311 or IEN 311 or MTH 224

Note: All specific coursework for the major in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

Area Specific Coursework for the Economics Major Area of Specialization, Quantitative Economics Track (STEM)

The **Quantitative Economics** track consists of a minimum of 18 credit hours of Economics courses in addition to ECO 211 and ECO 212 (total of 24 credit hours) according to the following:

Core Courses

ECO 211	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
ECO 212	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
Required Courses		
ECO 302	Micro Economic Theory ^{1,2}	3
ECO 303	Macro Economic Theory ²	3
Elective Courses		
Select four courses (12 credit hours) from the following:		12
ECO 430	Applied Econometrics	
ECO 444	Game Theory in Economic Applications.	
ECO 499	Special Topics (Information Economics or Forecasting only)	
ECO 510	Mathematical Economics And Applications ³	
ECO 512	Mathematical Economics (II)	
ECO 520	Econometrics	
ECO 533	Advanced Microeconomic Theory	
Total Credit Hours		18

¹ All advanced courses in Economics (300-500 levels) require ECO 302 as a pre-requisite.

² Additional pre-requisite for ECO 302 and for ECO 303: MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher

³ Additional pre-requisite for ECO 510: MAS 202 or MAS 311 or IEN 311 or MTH 224

Note: All specific coursework for the major in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

B.S.B.A. in Economics

Major Area of Specialization in Economics (P&S or STEM)

Students who wish to pursue the Economics major area of specialization will choose between two tracks: Political Economy (P&S) or Quantitative Economics (STEM).

In the Political Economy track, People and Society courses are predominant. In the Quantitative Economics track, Science, Technology, Engineering, and Mathematics courses are predominant.

Students pursuing the BSBA in Economics must complete the BSBA Business Core and the specific coursework for one of the Economics major tracks as follows:

BSBA Business Core Requirements for the Economics Major Area of Specialization (P&S or STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3

BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Quantitative Elective		
Select one of the suggested courses approved by the academic advisor:		3
BTE 324	Object-Oriented Programming	
BTE 423	Database Management Systems	
ECO 430	Applied Econometrics (may only be used if Economics is an additional major area of specialization)	
ECO 510	Mathematical Economics And Applications (may only be used if Economics is an additional major area of specialization)	
MAS 342	Introduction to Optimization and Decision Making	
MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	
MGT 445	Supply Chain Modeling and Analysis	
MGT 446	Supply Chain Strategy	
Total Credit Hours		62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Choose one of the two tracks listed below: Political Economy (P&S) or Quantitative Economics (STEM).

Specific Coursework for the Economics Major Area of Specialization, Political Economy Track (P&S)

The **Political Economy** track consists of a minimum of 18 credit hours of Economics courses in addition to ECO 211 and ECO 212 (total of 24 credit hours), according to the following:

Core Courses		
ECO 211	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
ECO 212	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
Required Courses		
ECO 302	Micro Economic Theory (required of BSBA students regardless of track) ^{1,2}	3
ECO 303	Macro Economic Theory ²	3
Elective Courses		
Select two, three, or four courses (6-12 credit hours) from the following:		6-12
ECO 307	Public Finance and Fiscal Policy	
ECO 311	Labor Economics (I)	
ECO 345	Environmental Economics	
ECO 351	Economics of Developing Countries	
ECO 371	Latin America And The Global Economy	
ECO 379	ECONOMICS OF POVERTY	
ECO 386	Health Economics	
ECO 403	Contemporary Issues in Monetary Economics	
ECO 420	Economic Growth	
ECO 441	International Trade Theory	
ECO 442	International Monetary Economics	
ECO 460	Industrial Organization	
ECO 499	Special Topics (Energy Economics; Global Economics:Trade and Financial Flows; Global Economics, Energy, and Commodity Markets; Managerial Economics; The Economics of China)	
ECO 521	Graduate Macroeconomic Theory	
ECO 532	History of Economic Thought	
Only one or two of the elective courses (0-6 credit hours) may be selected from the following:		0-6
ECO 430	Applied Econometrics	
ECO 444	Game Theory in Economic Applications.	
ECO 510	Mathematical Economics And Applications ³	
ECO 512	Mathematical Economics (II)	
ECO 520	Econometrics	
ECO 533	Advanced Microeconomic Theory	
Additional two options in this category include ECO 499 (Special topics: Forecasting or Special Topics: Information Economics)		
Total Credit Hours		18

- ¹ All advanced courses in Economics (300-500 levels) require ECO 302 as a pre-requisite.
- ² Additional pre-requisite for ECO 302 and for ECO 303 : MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher
- ³ Additional pre-requisite for ECO 510 : MAS 311 or IEN 311 or MTH 224

Note: All specific coursework for the major in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

Specific Coursework for the Economics Major Area of Specialization, Quantitative Economics Track (STEM)

The **Quantitative Economics** track consists of a minimum of 18 credit hours of Economics courses in addition to ECO 211 and ECO 212 (total of 24 credit hours) according to the following:

Core Courses		
ECO 211	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
ECO 212	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
Required Courses		
ECO 302	Micro Economic Theory ^{1, 2}	3
ECO 303	Macro Economic Theory ²	3
Elective Courses		
Select four courses (12 credits) from the following:		12
ECO 430	Applied Econometrics	
ECO 444	Game Theory in Economic Applications.	
ECO 499	Special Topics (Information Economics or Forecasting only)	
ECO 510	Mathematical Economics And Applications ³	
ECO 512	Mathematical Economics (II)	
ECO 520	Econometrics	
ECO 533	Advanced Microeconomic Theory	
Total Credit Hours		18

- ¹ All advanced courses in Economics (300-500 levels) require ECO 302 as a pre-requisite.
- ² Additional pre-requisite for ECO 302 and for ECO 303 : MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher
- ³ Additional pre-requisite for ECO 510 : MAS 311 or IEN 311 or MTH 224

Note: All specific coursework for the major in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization. All courses must be taken within the current pre-requisite structure.

Minor in Economics for Business Students

Minor Area of Specialization in Economics for Business Students (P&S)

Business students may pursue a minor in Economics by taking 12 credit hours of Economics courses in addition to the Business Core courses ECO 211 and ECO 212 (total of 18 credits). All courses must be taken within the current pre-requisite structure.

Core Courses		
ECO 211	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
ECO 212	Economic Principles and Problems (Taken as part of the Business Core, ECO 211 & ECO 212 are pre-requisites for all other Economics courses)	
Required Course - Select one of the following:		3
ECO 300	Microeconomic Theory And Applications ^{1, 2} or ECO 302 Micro Economic Theory	
Elective Courses ³		
Select three courses (9 credit hours) from the Economics departmental offerings - check all pre-requisites		9
Total Credit Hours		12

- ¹ Additional pre-requisite for ECO 300: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher
- ² Additional pre-requisite for ECO 302 : MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher
- ³ All advanced courses in Economics (300 - 500 levels) require ECO 300 or the more technical version, ECO 302.

NOTE: All specific coursework for the minor in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the minor area of specialization.

Minor in Economics for Non-Business Students

Minor Area of Specialization in Economics for Non-Business Students (P&S)

Non-Business students in any school or college may pursue a minor in Economics in the School of Business Administration. Interested students should consult with an academic advisor *in the School or College of their degree/major* to determine if the minor in Economics is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Economics department is necessary for a student to choose or complete a minor in Economics. Instead the non-business student should simply declare the Economics minor and complete the required 15 credit hours of Economics courses, according to the following:

Required Courses		
------------------	--	--

ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
ECO 300 or ECO 302	Microeconomic Theory And Applications ^{1, 2} Micro Economic Theory	3
Elective Courses ³		
Select two courses (6 credit hours) from the Economics departmental offerings - check all pre-requisites		6
Total Credit Hours		15

¹ Additional pre-requisite for ECO 300: MAS 110 or MTH 130 or MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent calculus course or higher

² Additional pre-requisite for ECO 302: MTH 141 or MTH 151 or MTH 161 or MTH 171 or an equivalent Calculus 1 course or higher

³ All advanced courses in Economics (300 - 500 levels) require ECO 300 or the more technical version, ECO 302.

NOTE: All specific coursework for the minor in Economics must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the minor area of specialization.

Finance

Department Code: FIN

Introduction

The finance major is designed to prepare business students for a wide variety of careers. Because finance is focused on valuation and decision making, it is applicable to virtually every possible type of organization.

Educational Objectives

The finance discipline is focused on two primary issues. The first is determining value. The second is making the best decisions with respect to value. We study these issues in a variety of contexts and industries.

The three primary areas of finance are financial management, investments, and financial markets and intermediaries. Financial management focuses on how an organization can accomplish its mission. For example, a corporation seeks to create and maintain wealth, and a non-profit organization seeks to improve the world in some way. All organizations want to achieve their mission to the greatest extent possible, and that requires making the best decisions with respect to value. The area of investments studies the purchase and sale of financial securities, such as stocks, bonds, options, and futures from the point of view of an investor. Financial markets are created to facilitate the trading (buying/selling) of financial securities. Financial intermediaries sell claims on themselves to investors, such as stock, life insurance, or a bank deposit. Financial intermediaries then invest the money from such sales in other assets such as loans, real estate, or other financial securities.

Degree Programs

A student pursuing a major in the Finance Department can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in

Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin.

Majors

- Finance
- International Finance and Marketing
- Real Estate

Important Note: To be eligible for any of the three majors offered by the Finance Department, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a cumulative University of Miami GPA of 2.5 or higher after having completed FIN 302.

B.B.A. in Finance

Major Area of Specialization in Finance (STEM)

Students pursuing the BBA in Finance must complete the BBA Business Core and the specific coursework for the Finance major area of specialization as follows:

BBA Business Core Requirements for the Finance Major Area of Specialization (STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3

MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Finance Major Area of Specialization (STEM)

Students must complete a minimum of 18 credit hours of Finance courses beyond the core course, FIN 302 (total of 21 credit hours). All courses must be taken within the current pre-requisite structure.

Core Course		
FIN 302	Fundamentals of Finance (taken as part of the Business Core) ¹	
Required Courses		
FIN 303	Intermediate Financial Management (pre-requisite FIN 302) ²	3
FIN 320	Investment and Security Markets (pre-requisite FIN 302) ²	3
Elective Courses		
	Select two courses (6 credit hours) at the 300 - 500 level from the Finance departmental offerings. ³	6
	Select two courses (6 credit hours) at the 400 or 500 level from the Finance departmental offerings.	6
Total Credit Hours		18

¹ **Important Note:** In order to pursue a major in Finance, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 after having completed FIN 302.

² Students are strongly encouraged to take FIN 303 and FIN 320 during the same semester.

³ Excluding FIN 300 and FIN 308.

Note: All specific coursework for the major in Finance must be completed with a grade of "C-" or higher (except for the minimum "B"

grade required for FIN 302, as noted). A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

B.B.A. in International Finance and Marketing

Major Area of Specialization in International Finance and Marketing (STEM)

Introduction

The International Finance and Marketing major area of specialization is aimed at meeting the needs of business students seeking to pursue a career in international business, finance, and/or marketing.

Educational Objectives

The International Finance and Marketing major area of specialization is designed to prepare students for the most critical areas of decision making in international business. The objective is to provide business students with a comprehensive curriculum based on a strong program of international courses, and to create opportunities for access to multinational companies and the international business community.

Curriculum

Students pursuing the BBA in International Finance and Marketing must complete the BBA Business Core and the specific coursework for the International Finance and Marketing major area of specialization as follows:

BBA Business Core Requirements for the International Finance and Marketing Major Area of Specialization (STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the International Finance and Marketing Major Area of Specialization (STEM)

Students must complete a minimum of 21 credit hours of Finance and Marketing courses beyond the core courses FIN 302 and MKT 201/MKT 301 (total of 27 credit hours) as follows:

Core Courses		
FIN 302	Fundamentals of Finance (taken as part of the Business Core) ¹	
MKT 201/301	Foundations of Marketing (taken as part of the Business Core) ¹	
Required Courses ²		
FIN 320	Investment and Security Markets (pre-requisite FIN 302)	3
FIN 330	International Finance (pre-requisite FIN 302)	3
FIN 431	International Financial Management (pre-requisites FIN 302, FIN 330)	3
MKT 302	Marketing Research and Market Analysis (pre-requisites MKT 201/MKT 301, MAS 202)	3
MKT 360	International Marketing (pre-requisite MKT 201/MKT 301)	3
MKT 469	International Marketing Management (pre-requisites MKT 302 (Pre or co-requisite) & MKT 360)	3
Elective Course ²		
	Select one course (3 credit hours) at the 400 level from Finance departmental offerings. ³	3
Total Credit Hours		21

¹ **Important Note:** In order to pursue a major in International Finance and Marketing, a student must earn a grade of "B" (grade point of 3.0) or higher in both FIN 302 and MKT 201/MKT 301 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 after having completed FIN 302.

² All courses must be taken within the current pre-requisite structure.

³ No 300-level Finance course may be used to satisfy this requirement. Additionally, some 400-level Finance courses require FIN 303 as a pre-requisite.

Note: All specific coursework for the major in International Finance and Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302 and MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

B.B.A. in Real Estate

Major Area of Specialization in Real Estate (STEM)

Introduction

The Real Estate major in the School of Business Administration is created for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

Educational Objectives

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major strengthens ties with important segments of the business community and builds on the University's strategic strengths in architecture (New Urbanism) and urban planning.

Students pursuing the major in Real Estate should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (p. 139) (For more information, contact the Director of the Urban Studies Program. (<http://www.as.miami.edu/urbanstudies/contact>))

Curriculum

Students pursuing the BBA in Real Estate must complete the BBA Business Core and the specific coursework for the Real Estate major area of specialization as follows:

BBA Business Core Requirements for the Real Estate Major Area of Specialization (STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a “C-” or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Real Estate Major Area of Specialization (STEM)

Students must complete a minimum of 18 credit hours of Real Estate coursework beyond the core course FIN 302 (total of 21 credit hours). All courses must be taken within the current pre-requisite structure.

Core Course		
FIN 302	Fundamentals of Finance (taken as part of the Business Core) ¹	
Required Courses		
FIN 303	Intermediate Financial Management (pre-requisite FIN 302) ²	3
or FIN 320	Investment and Security Markets	
FIN 344	Real Estate Investment Analysis (pre-requisites FIN 302 & FIN 303 or FIN 320)	3
BSL 333	Legal Aspects of Real Estate Transactions (pre-requisite BSL 212)	3
ARC 584	Special Problems (Introduction to Real Estate and Urbanism)	3
Elective Courses		
Select two courses (6 credit hours) from the following:		6
FIN 427	Fixed Income Markets and Analysis (Pre-requisites FIN 302, FIN 320)	
FIN 445	Real Estate Finance (Pre-requisites FIN 302 & FIN 303 or FIN 320)	
FIN 499	Special Topics in Finance (Real Estate Market Analysis) ³	
Optional Courses (Strongly Recommended)		
Introductory ARGUS and Advanced ARGUS, offered as one-credit enhancements in the spring semester		
Total Credit Hours		18

¹ **Important Note:** In order to major in Real Estate, a student must earn a grade of “B” (grade point of 3.0) or higher in FIN 302 (note that a grade of “B-” does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 after having completed FIN 302.

² In choosing to take FIN 303 or FIN 320, students are strongly advised to consider the prerequisites of the 400 level classes they might want to take later.

³ FIN 344 is the pre-requisite or co-requisite for FIN 499: Real Estate Market Analysis.

Note: All specific coursework for the major in Real Estate must be completed with a grade of “C-” or higher (except for the minimum “B”

grade required for FIN 302, as noted). A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

B.S.B.A. in Finance

Major Area of Specialization in Finance (STEM)

Students pursuing the BSBA in Finance must complete the BSBA Business Core and the specific coursework for the Finance major area of specialization as follows:

BSBA Business Core Requirements for the Finance Major Area of Specialization (STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3

ECO 510	Mathematical Economics And Applications	
MAS 342	Introduction to Optimization and Decision Making	
MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	
MGT 445	Supply Chain Modeling and Analysis	
MGT 446	Supply Chain Strategy	
Total Credit Hours		62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should

be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Finance Major Area of Specialization (STEM)

Students must complete a minimum of 18 credit hours of Finance courses beyond the core course, FIN 302 (total of 21 credit hours). All courses must be taken within the current pre-requisite structure.

Core Course		
FIN 302	Fundamentals of Finance (taken as part of the Business Core) ¹	
Required Courses		
FIN 303	Intermediate Financial Management (pre-requisite FIN 302) ²	3
FIN 320	Investment and Security Markets (pre-requisite FIN 302) ²	3
Elective Courses		
Select two courses (6 credit hours) at the 300 - 500 level from the Finance departmental offerings. ³		6
Select two courses (6 credit hours) at the 400 or 500 level from the Finance departmental offerings.		6
Total Credit Hours		18

¹ **Important Note:** In order to pursue a major in Finance, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 after having completed FIN 302.

² Students are strongly encouraged to take FIN 303 and FIN 320 during the same semester.

³ excluding FIN 300 and FIN 308.

Note: All specific coursework for the major in Finance must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

B.S.B.A. in International Finance and Marketing

Major Area of Specialization in International Finance and Marketing (STEM)

Introduction

The International Finance and Marketing major area of specialization is aimed at meeting the needs of business students seeking to pursue careers in international business, finance, and/or marketing.

Educational Objectives

The International Finance and Marketing major area of specialization is designed to prepare students for the most critical areas of decision making in international business. The objective is to provide business students with a comprehensive curriculum based on a strong program

of international courses, and create opportunities for access to multinational companies and the international business community.

Curriculum

Students pursuing the BSBA in International Finance and Marketing must complete the BSBA Business Core and the specific coursework for the International Finance and Marketing major area of specialization as follows:

BSBA Business Core Requirements for the International Finance and Marketing Major Area of Specialization (STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3

MKT 302	Marketing Research and Market Analysis (pre-requisites MKT 201/MKT 301, MAS 202)	3
MKT 360	International Marketing (pre-requisite MKT 201/MKT 301)	3
MKT 469	International Marketing Management (pre-requisites MKT 302 (Pre or co-requisite) & MKT 360)	3
Elective Course ²		
Select one course (3 credit hours) at the 400 level from Finance departmental offerings. ³		3
Total Credit Hours		21

¹ **Important Note:** In order to pursue a major in International Finance and Marketing, a student must earn a grade of "B" (grade point of 3.0) or higher in both FIN 302 **and** MKT 201/MKT 301 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 after having completed FIN 302.

² All courses must be taken within the current pre-requisite structure.

³ No 300-level Finance course may be used to satisfy this requirement. Additionally, some 400-level Finance courses require FIN 303 as a pre-requisite.

Note: All specific coursework for the major in International Finance and Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302 and MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

B.S.B.A. in Real Estate

Major Area of Specialization in Real Estate (STEM)

Introduction

The Real Estate major in the School of Business Administration is created for business students seeking to apply the theoretical and analytical concepts of finance to real estate lending, investment, and development.

Educational Objectives

The importance of understanding developments in real estate and mortgage markets and the integration of real estate investments into the national and international economy have led to increased interest in this important field. The real estate major strengthens ties with important segments of the business community and builds on the University's strategic strengths in architecture (New Urbanism) and urban planning.

Business students pursuing the major in Real Estate should consider taking the courses necessary to meet the requirements of the Urban Studies Minor (p. 139) (For more information, contact the Director of the Urban Studies Program. (<http://www.as.miami.edu/urbanstudies/contact>))

Curriculum

Students pursuing the BSBA in Real Estate must complete the BSBA Business Core and the specific coursework for the Real Estate major area of specialization as follows:

BSBA Business Core Requirements for the Real Estate Major Area of Specialization (STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Quantitative Elective		

Select one of the suggested courses approved by the academic advisor:	3
BTE 324 Object-Oriented Programming	
BTE 423 Database Management Systems	
ECO 430 Applied Econometrics	
ECO 510 Mathematical Economics And Applications	
MAS 342 Introduction to Optimization and Decision Making	
MAS 442 Stochastic Models in Operations Research	
MAS 547 Computer Simulation Systems	
MGT 445 Supply Chain Modeling and Analysis	
MGT 446 Supply Chain Strategy	
Total Credit Hours	62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Real Estate Major Area of Specialization (STEM)

Students must complete a minimum of 18 credit hours of Real Estate coursework beyond the core course FIN 302 (total of 21 credit hours). All courses must be taken within the current pre-requisite structure.

Core Course	
FIN 302	Fundamentals of Finance (taken as part of the Business Core) ¹
Required Courses	
FIN 303	Intermediate Financial Management (pre-requisite FIN 302) ²
or FIN 320	Investment and Security Markets
FIN 344	Real Estate Investment Analysis (pre-requisites FIN 302 & FIN 303 or FIN 320)
BSL 333	Legal Aspects of Real Estate Transactions (pre-requisite BSL 212)
ARC 584	Special Problems (Introduction to Real Estate and Urbanism)
Elective Courses	
Select two courses (6 credit hours) from the following:	
FIN 427	Fixed Income Markets and Analysis (Pre-requisites FIN 302, FIN 320)
FIN 445	Real Estate Finance (Pre-requisites FIN 302 & FIN 303 or FIN 320)
FIN 499	Special Topics in Finance (Real Estate Market Analysis) ³
Optional Courses (Strongly Recommended)	

Introductory ARGUS and Advanced ARGUS, offered as one-credit enhancements in the spring semester	
Total Credit Hours	18

- Important Note:** In order to major in Real Estate, a student must earn a grade of "B" (grade point of 3.0) or higher in FIN 302 (note that a grade of "B-" does not qualify), and must have a minimum cumulative University of Miami GPA of 2.5 after having completed FIN 302.
- In choosing to take FIN 303 or FIN 320, students are strongly advised to consider the prerequisites of the 400 level classes they might want to take later.
- FIN 344 is the pre-requisite or co-requisite for FIN 499: Real Estate Market Analysis.

Note: All specific coursework for the major in Real Estate must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for FIN 302, as noted). A minimum cumulative GPA of 2.0 is required for all courses taken in the major area of specialization.

Minor in Finance

Minor Area of Specialization in Finance (STEM)

Students in the School of Business Administration, as well as students in the other schools and colleges of the University of Miami, may pursue a minor in Finance by officially declaring the minor at their home school or college. Interested *non-business* students, before declaring the minor, should consult with an academic advisor in the School or College of their degree/major to determine if the minor in Finance is acceptable. If so, neither the advice nor the consent of either the Office of Undergraduate Business Education or the Finance Department is necessary.

The 12 credit hour minor in Finance consists of the following (all courses must be taken within the current pre-requisite structure):

Required Courses		
FIN 302	Fundamentals of Finance (part of Business Core for Business students)	3
FIN 303	Intermediate Financial Management ¹	3
FIN 320	Investment and Security Markets ¹	3
Elective Course		
Select one course (3 credit hours) at the 300 or 400 level from Finance departmental offerings. ²		3
Total Credit Hours		12

¹ Pre-requisite is FIN 302

² excluding FIN 300 and FIN 308.

NOTE: All specific coursework for the minor in Finance must be completed with a grade of "C-" or higher. A minimum cumulative GPA of 2.0 is required for all courses taken in the minor area of specialization.

Health Sector Management and Policy

Department Code: HSM

Introduction

The Health Sector Management and Policy major area of specialization is designed for students seeking to pursue careers in health management

and policy in any of a variety of health care organizations and public settings. The curriculum enables students to gain skills and understanding in the specialized language of health care and to comprehend concepts of management, financing, politics, law, and ethics as applied to the health care sector. The major area of specialization is also ideal for students aspiring to earn advanced degrees in health administration, health economics, medical sociology, public health, or law.

Educational Objectives

The purpose of the major area of specialization in Health Sector Management and Policy is to provide the business student with a basic understanding of the management, economic and financial structure, as well as the legal, ethical, and governmental policy aspects of the health care industry. Appropriate candidates for the major area of specialization in Health Sector Management and Policy include School of Business Administration students interested in exploring the health care sector, working in the legal, management, or policy-making aspects of the health care sector or those wanting to have an augmentation to their pre-med, pre-law or pre-MBA, MPA or MPH studies, as well as those who expect to pursue a Ph.D. The minor area of specialization in Health Sector Management and Policy is available to students from all UM schools and colleges. Members of the Department are prepared to counsel students in the selection of courses and in other matters relating to the preparation for careers.

Degree Programs

The major area of specialization in Health Sector Management and Policy is available to students seeking a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA), by declaring it and meeting the degree requirements set forth in this Academic Bulletin.

Majors

Major in Health Sector Management and Policy

- B.B.A. in Health Sector Management and Policy (p. 172)
- B.S.B.A. in Health Sector Management and Policy (p. 173)

INS 572	Global Health Policy and Ethics	
INS 573	Disasters, Terrorism and Global Public Health	
POL 536	U.S. Health Care Crisis: Politics and Policies	
SOC 321	Applied Health Policy	
Total Credit Hours		21

¹ MGT 270 is foundational to all other major coursework.

² Pre-requisites: ECO 211, ECO 212, ECO 300 or ECO 302, and a calculus course

Note: All specific coursework for the major in Health Sector Management and Policy must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

Minor in Health Sector Management and Policy

Minor Area of Specialization in Health Sector Management and Policy (P&S)

The purpose of the minor in Health Sector Management and Policy is to provide the student with a basic understanding of the organizational, management, economic, and financial structure, as well as the legal, ethical, and governmental policy of the health care industry. Appropriate candidates for this minor will include students interested in: exploring the health care sector; working in the legal, management, or policy making aspects of the health care sector; or those wanting to have an augmentation to their health sciences, nursing, pre-med, pre-law or pre-MBA/MPA studies.

Students in the School of Business Administration, as well as students in the other schools and colleges of the University of Miami, may pursue the minor in Health Sector Management and Policy by officially declaring the minor at their home school or college and completing the coursework specified below. Interested *non-business* students, before declaring the minor, should consult with an academic advisor *in the School or College of their degree/major* to determine if the minor in Health Sector Management and Policy is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Department of Health Sector Management and Policy is necessary.

The 12 credit hour minor in Health Sector Management and Policy consists of four courses— three required and one elective as indicated below (all courses must be taken within the current pre-requisite structure):

Foundational Course		
MGT 270	Introduction To Health Sector Organization And Management ¹	3
Required Courses		
BSL 460	Health Care Law and Ethics (pre-requisite BSL 212)	3
ECO 386	Health Economics ²	3
Elective Course		

Select one course (3 credit hours) from the following:		3
INS 570	Globalization and Health	
INS 571	International Development and Human Welfare	
INS 572	Global Health Policy and Ethics	
INS 573	Disasters, Terrorism and Global Public Health	
SOC 321	Applied Health Policy	
Total Credit Hours		12

¹ MGT 270 is foundational to all other minor coursework.

² Pre-requisites: ECO 211, ECO 212, ECO 300 or ECO 302, and a calculus course

Note: All specific coursework for the minor in Health Sector Management and Policy must be completed with a grade of “C” or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Management

Department Code: MGT

Introduction

The Department of Management in the School of Business Administration is heterogeneous with respect to both research and teaching areas. Faculty are specialized in and teach courses that span a number of fields including entrepreneurship, human resources, international management, leadership, operations management, organizational behavior, strategic management, supply chain management, and teams. Given both the multinational context and diversity present in twenty first century organizations, coursework in the Department of Management is focused on preparing business students to be productive and effective contributors to the various communities they are embedded within or impact. Students who select any of the Management major areas of specialization pursue a variety of careers after graduation including starting businesses, running family businesses, accepting management positions in domestic or international organizations, attending law school, or pursuing other advanced graduate degrees.

Educational Objectives

- The development of critical thinking skills to evaluate decision choices, challenges, and issues confronting managers today;
- The improvement of interpersonal skills and learning to work effectively in teams;
- An understanding of the tools, methods, and procedures used to successfully lead people and organizations; and
- An awareness of the ethical issues and responsibilities inherent in being a member of the global business community.

Degree Programs

A student pursuing any major from the Department of Management may earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the degree requirements set forth in this Academic Bulletin.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All

area specific coursework for any major and/or minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major and/or minor area of specialization.

Majors

Majors in Management, Entrepreneurship, and Human Resource Management

- B.B.A. in Management (p. 176)
- B.S.B.A. in Management (p. 179)
- B.B.A. in Entrepreneurship (p. 175)
- B.S.B.A. in Entrepreneurship (p. 177)

Minors

Minors in Management and Entrepreneurship

- Management for Business Students (p. 181)
- Management for Non-Business Students (p. 181)
- Entrepreneurship for Business Students - High Growth/Technology Ventures (p. 180)
- Entrepreneurship for Business Students - Health Care Ventures (p. 180)
- Entrepreneurship for Non-Business Students (p. 180)

B.B.A. in Entrepreneurship

Major Area of Specialization in Entrepreneurship (P&S)

The Entrepreneurship major prepares business students to engage in the process of value creation, regardless of organizational context. Students will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit), or working effectively within an existing organization.

Students pursuing the BBA in Entrepreneurship must complete the BBA Business Core and the specific coursework for the Entrepreneurship major area of specialization as follows:

BBA Business Core Requirements for the Entrepreneurship Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3

MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Entrepreneurship Major Area of Specialization (P&S)

The 18 credit hour major area of specialization in Entrepreneurship consists of the following:

Required Courses ¹		
MGT 353	Introduction to Entrepreneurship	3
MGT 454	Business Planning for Entrepreneurs (pre-requisite MGT 353)	3
MGT 455	Entrepreneurial Consulting (pre-requisites MGT 353, MGT 454)	3
FIN 308	Intermediate Financial Management for Entrepreneurs (pre-requisite FIN 302)	3
Elective Courses ¹		
Select two courses (6 credit hours) from the following:		6
BSL 324	Negotiation	
BSL 424	Intellectual Property Law (recommended)

MGT 360	Effective Leadership (pre-requisite MGT 304)	
MKT 302	Marketing Research and Market Analysis	
MKT 310	Consumer Behavior and Marketing Strategy	
MKT 320	Retailing	
MKT 340	Professional Selling	
MKT 380	New Product Development	

MKT 385	Marketing for Entrepreneurs	
MKT 387	Digital Marketing	
MKT 388	Health Care Marketing	
MKT 389	Understanding Media Metrics In The Digital World	
Total Credit Hours		18

¹ All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework for the major in Entrepreneurship must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

B.B.A. in Human Resource Management

Major Area of Specialization in Human Resource Management (P&S)

The Human Resource Management major area of specialization is designed for business students who intend to pursue a career in human resources or personnel.

Students pursuing the BBA in Human Resource Management must complete the BBA Business Core and the specific coursework for the Human Resource Management major area of specialization as follows:

BBA Business Core Requirements for the Human Resource Management Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and

400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Human Resource Management Major Area of Specialization (P&S)

The 15 credit hour major area of specialization in Human Resource Management consists of the following:

Required Courses ¹		
MGT 302	Human Resource Management	3
MGT 307	Advanced Organizational Behavior (pre-requisite MGT 304)	3
Elective Courses ¹		
Select three courses (9 credit hours) from the following:		9
MGT 308	Training and Development	
MGT 360	Effective Leadership (pre-requisite MGT 304)	
MGT 422	Leading Teams	
MGT 428	Compensation and Benefits Design	
MGT 480	Organizational Development and Change	
Total Credit Hours		15

¹ All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework for the major in Human Resource Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

B.B.A. in Management

Major Area of Specialization in Management (P&S)

Business students who pursue the Management major will be prepared for future careers in all areas of management, including small business and corporate levels. The Management major also provides a solid preparation for the pursuit of other graduate degree programs, particularly in law and business.

Students pursuing the BBA in Management must complete the BBA Business Core and the specific coursework for the Management major area of specialization as follows:

BBA Business Core Requirements for the Management Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3

BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Management Major Area of Specialization (P&S)

Students must complete a minimum of 15 credit hours in Management departmental courses beyond the core courses MGT 303 and MGT 304 (total of 21 credit hours). All courses must be taken within the current pre-requisite structure.

Core Courses		
MGT 303	Operations Management (taken as part of the Business Core)	
MGT 304	Organizational Behavior (taken as part of the Business Core)	
Required Courses		
MGT 302	Human Resource Management	3
MGT 307	Advanced Organizational Behavior (pre-requisite MGT 304)	3
Elective Courses		
Select 3 courses (9 credit hours) from the Department of Management ¹		9
Total Credit Hours		15

¹ Excluding any 100-level Management courses and MGT 401.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework for the major in Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

B.S.B.A. in Entrepreneurship

Major Area of Specialization in Entrepreneurship (P&S)

The Entrepreneurship major prepares business students to engage in the process of value creation, regardless of organizational context. Students pursuing this major will develop a holistic view of organizational creation and change that is applicable to either starting a new venture (for profit or nonprofit) or working effectively within an existing organization.

Students pursuing the BSBA in Entrepreneurship must complete the BSBA Business Core and the specific coursework for the Entrepreneurship major area of specialization as follows:

BSBA Business Core Requirements for the Entrepreneurship Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Quantitative Elective		
Select one of the suggested courses approved by the academic advisor:		3
BTE 324	Object-Oriented Programming	
BTE 423	Database Management Systems	
ECO 430	Applied Econometrics	
ECO 510	Mathematical Economics And Applications	
MAS 342	Introduction to Optimization and Decision Making	
MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	
MGT 445	Supply Chain Modeling and Analysis	

MGT 446 Supply Chain Strategy	
Total Credit Hours	62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Entrepreneurship Major Area of Specialization (P&S)

The 18 credit hour major area of specialization in Entrepreneurship consists of the following:

Required Courses ¹		
MGT 353	Introduction to Entrepreneurship	3
MGT 454	Business Planning for Entrepreneurs (pre-requisite MGT 353)	3
MGT 455	Entrepreneurial Consulting (pre-requisites MGT 353, MGT 454)	3
FIN 308	Intermediate Financial Management for Entrepreneurs (pre-requisite FIN 302)	3
Elective Courses ¹		
Select two courses (6 credit hours) from the following:		6
BSL 324	Negotiation	
BSL 424	Intellectual Property Law (recommended)	
BSL 435	Law Of Entrepreneurship	
FIN 320	Investment and Security Markets	
FIN 410	Financial Institutions and Markets	
FIN 425	Business and Security Valuation	
MGT 251	Nature and Foundations of Entrepreneurship	
MGT 349	International Business	
MGT 357	Entrepreneurship Simulation Experience: Inside the Mind of the Entrepreneurial CEO	
MGT 360	Effective Leadership (pre-requisite MGT 304)	
MKT 302	Marketing Research and Market Analysis	
MKT 310	Consumer Behavior and Marketing Strategy	
MKT 320	Retailing	
MKT 340	Professional Selling	
MKT 380	New Product Development	
MKT 385	Marketing for Entrepreneurs	
MKT 387	Digital Marketing	
MKT 388	Health Care Marketing	
MKT 389	Understanding Media Metrics In The Digital World	
Total Credit Hours		18

¹ All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework for the major in Entrepreneurship must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

B.S.B.A. in Human Resource Management

Major Area of Specialization in Human Resource Management (P&S)

The Human Resource Management major area of specialization is designed for business students intending to pursue careers in human resources or personnel management.

Students pursuing the BSBA in Human Resource Management must complete the BSBA Business Core and the specific coursework for the Human Resource Management major area of specialization as follows:

BSBA Business Core Requirements for the Human Resource Management Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Quantitative Elective		
Select one of the suggested courses approved by the academic advisor:		3
BTE 324	Object-Oriented Programming	
BTE 423	Database Management Systems	
ECO 430	Applied Econometrics	
ECO 510	Mathematical Economics And Applications	
MAS 342	Introduction to Optimization and Decision Making	
MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	
MGT 445	Supply Chain Modeling and Analysis	

MGT 446	Supply Chain Strategy	
Total Credit Hours		62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Human Resource Management Major Area of Specialization (P&S)

The 15 credit hour major area of specialization in Human Resource Management consists of the following:

Required Courses ¹		
MGT 302	Human Resource Management	3
MGT 307	Advanced Organizational Behavior (pre-requisite MGT 304)	3
Elective Courses ¹		
Select three courses (9 credit hours) from the following:		9
MGT 308	Training and Development	
MGT 360	Effective Leadership (pre-requisite MGT 304)	
MGT 422	Leading Teams	
MGT 428	Compensation and Benefits Design	
MGT 480	Organizational Development and Change	
Total Credit Hours		15

¹ All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework for the major in Human Resource Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

B.S.B.A. in Management

Major Area of Specialization in Management (P&S)

Business students who pursue the Management major will be prepared for future careers in all areas of management, including small business and corporate levels. The Management major also provides solid preparation for pursuit of graduate degree programs, particularly in law and business.

Students pursuing the BSBA in Management must complete the BSBA Business Core and the specific coursework for the Management major area of specialization as follows:

BSBA Business Core Requirements for the Management Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3

BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Quantitative Elective		
Select one of the suggested courses approved by the academic advisor:		3
BTE 324	Object-Oriented Programming	
BTE 423	Database Management Systems	
ECO 430	Applied Econometrics	
ECO 510	Mathematical Economics And Applications	
MAS 342	Introduction to Optimization and Decision Making	
MAS 442	Stochastic Models in Operations Research	
MAS 547	Computer Simulation Systems	
MGT 445	Supply Chain Modeling and Analysis (may not double count as major elective in Management unless additional major)	
MGT 446	Supply Chain Strategy (may not double count as major elective in Management unless additional major)	
Total Credit Hours		62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Management Major Area of Specialization (P&S)

Students must complete a minimum of 15 credit hours in Management departmental courses beyond the core courses MGT 303 and MGT 304

(total of 21 credit hours). All courses must be taken within the current pre-requisite structure.

Core Courses		
MGT 303	Operations Management (taken as part of the Business Core)	
MGT 304	Organizational Behavior (taken as part of the Business Core)	
Required Courses		
MGT 302	Human Resource Management	3
MGT 307	Advanced Organizational Behavior (pre-requisite MGT 304)	3
Elective Courses		
Select 3 courses (9 credit hours) from the Department of Management ¹		9
Total Credit Hours		15

¹ excluding any 100-level Management courses and MGT 401.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework for the major in Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

Minor in Entrepreneurship for Business Students - Health Care Ventures Track

Minor Area of Specialization in Entrepreneurship - Health Care Ventures Track (P&S)

This minor is one of two specialized tracks offered to business students seeking to pursue a minor in Entrepreneurship. Eligible business students must have a declared business major other than Entrepreneurship.

The 12 credit hour minor in Entrepreneurship - Health Care Ventures Track consists of the following:

Required Courses ¹		
MGT 353	Introduction to Entrepreneurship	3
MGT 454	Business Planning for Entrepreneurs (pre-requisite MGT 353)	3
MGT 270	Introduction To Health Sector Organization And Management	3
BSL 460	Health Care Law and Ethics (pre-requisite BSL 212)	3
Total Credit Hours		12

¹ All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

All specific coursework taken for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Minor in Entrepreneurship for Business Students - High Growth/Technology Ventures Track

Minor Area of Specialization in Entrepreneurship - High Growth/Technology Ventures Track (P&S)

This minor is one of two specialized tracks offered to business students who wish to pursue a minor in Entrepreneurship. Eligible business students must have a declared business major other than Entrepreneurship.

The 12 credit hour minor in Entrepreneurship - High Growth/Technology Ventures Track consists of the following:

Required Courses ¹		
MGT 353	Introduction to Entrepreneurship	3
MGT 454	Business Planning for Entrepreneurs (pre-requisite MGT 353)	3
FIN 320	Investment and Security Markets (check all pre-requisites)	3
or FIN 425	Business and Security Valuation	
Elective Course ¹		
Select one course (3 credit hours) from the following:		3
BTE 389	Launching High Technology Ventures	
MGT 357	Entrepreneurship Simulation Experience: Inside the Mind of the Entrepreneurial CEO	
Total Credit Hours		12

¹ All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management.

All specific coursework taken for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Minor in Entrepreneurship for Non-Business Students

Minor Area of Specialization in Entrepreneurship for Non-Business Students (P&S)

This minor is for non-business students who seek to learn about developing business plans or how to initiate and manage small business enterprises. Interested students should consult with an academic advisor *in the School or College of their degree/major* to determine if a minor in Entrepreneurship is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Department of Management is necessary. Instead the non-business student should simply declare the minor and complete the required six courses, or 18 credit hours, as follows:

Required Courses ¹		
ACC 211	Principles of Financial Accounting	3
ECO 211	Economic Principles and Problems	3

FIN 300	Fundamentals of Finance for Non-Finance Majors	3
MGT 353	Introduction to Entrepreneurship	3
MKT 301	Marketing Foundations	3
Elective Course ¹		
Select one course (3 credit hours) from the following:		3
BSL 435	Law Of Entrepreneurship (pre-requisite BSL 212)	
MGT 251	Nature and Foundations of Entrepreneurship	
MGT 357	Entrepreneurship Simulation Experience: Inside the Mind of the Entrepreneurial CEO	
MGT 454	Business Planning for Entrepreneurs (pre-requisite MGT 353)	
MGT 498	Selected Topics (related to entrepreneurship)	
MKT 385	Marketing for Entrepreneurs (pre-requisite MKT 301)	
Total Credit Hours		18

¹ All courses must be taken within the current pre-requisite structure.

Note: No one course may be applied toward more than one minor area of specialization in the Department of Management. All coursework taken for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Minor in Management for Business Students

Minor Area of Specialization in Management for Business Students (P&S)

A minor in Management for business students consists of 12 credit hours in Management courses beyond the required courses in the BBA or BSBA Business Core. All courses must be taken within the current pre-requisite structure.

Core Courses		
MGT 303	Operations Management (taken as part of the Business Core)	
MGT 304	Organizational Behavior (taken as part of the Business Core)	
Elective Courses		
Select four courses (12 credit hours) from the Department of Management ¹		12
Total Credit Hours		12

¹ excluding any 100-level Management courses and MGT 401.

Note: No one course may be applied toward more than one major and/or minor area of specialization in the Department of Management. All specific coursework for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Minor in Management for Non-Business Students

Minor Area of Specialization in Management for Non-Business Students (P&S)

Non-Business students in any school or college may pursue a minor in Management in the School of Business Administration. Interested students should consult with an academic advisor *in the School or College of their degree/major* to determine if a minor in Management is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Management Department is necessary for a student to choose or complete a minor in Management. Instead the non-business student should simply declare the Management minor and complete the required 12 credit hours of Management courses, as follows:

Required Courses ¹		
MGT 302	Human Resource Management	3
MGT 303	Operations Management ²	3
MGT 304	Organizational Behavior	3
Elective Course ¹		
Select one course (3 credit hours) at the 300 - 400 level from the Department of Management. ³		3
Total Credit Hours		12

¹ All courses must be taken within the current pre-requisite structure.

² pre-requisite of a Statistics 1 course, such as MAS 201, MAS 311, IEN 311, MTH 224, or the equivalent.

³ excluding MGT 401

Note: No one course may be applied toward more than one minor area of specialization in the Department of Management. All specific coursework for any minor in the Department of Management must be completed with a grade of "C" or higher. A minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Management Science

Department Code: MAS

Introduction

Management Science uses the ideas and methods of science, mathematics, statistics, and computing, which collectively are often referred to as Business Analytics, to help managers make better business decisions. Management Science techniques have been applied in a wide variety of areas including financial modeling, marketing research, organizational theory, transportation and logistics, health care, environmental protection, and manufacturing. Almost any decision can benefit from the methods of Management Science/Analytics.

Educational Objectives

The Department of Management Science offers a major area of specialization in Business Analytics as well as a minor in Business Analytics. The Business Analytics curriculum is designed to give business students the necessary educational background and experience to allow them to work as successful business analytics professionals.

In addition to the general education, business, and economics courses of the Bachelor of Science in Business Administration degree program, the major in Business Analytics requires a solid background in the natural sciences and mathematics. Additionally, students are required to take sequences of courses in optimization, decision science, and data analytics. A number of the courses in the Business Analytics curriculum require projects, in which the student evaluates a real-world system or process. As the system is studied and modeled, the student applies management science methods to find ways to improve the process. In such a course, written and oral presentation of findings is part of the learning and evaluation process. A major or minor area of specialization in Business Analytics is recommended to qualified students as preparation for direct entry into the field of Analytics or as preparation for future graduate studies.

Degree Programs

The Bachelor of Science in Business Administration (BSBA) is awarded with the major in Business Analytics by meeting the appropriate School of Business Administration requirements.

Majors

Major in Business Analytics

- B.S.B.A. in Business Analytics (p. 182)

Minors

Minor in Business Analytics

- Business Analytics (p. 183)

B.S.B.A. in Business Analytics

Major Area of Specialization in Business Analytics (STEM)

The Department of Management Science offers a major area of specialization in Business Analytics for students pursuing the Bachelor of Science in Business Administration degree. Students who choose the major area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

Students pursuing the BSBA in Business Analytics must complete the BSBA Business Core and the specific coursework for the Business Analytics major area of specialization as follows:

BSBA Business Core Requirements for the Business Analytics Major Area of Specialization (STEM)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3

ECO 211	Economic Principles and Problems	3
ECO 212	Economic Principles and Problems	3
FIN 302	Fundamentals of Finance	3
MAS 311	Applied Probability and Statistics	3
MAS 312	Statistical Methods and Quality Control	3
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Quantitative Elective		
Select one of the suggested courses approved by the academic advisor:		3
BTE 324	Object-Oriented Programming (may not double count for the major elective in Business Analytics)	
BTE 423	Database Management Systems (may not double count for the major elective in Business Analytics)	
ECO 430	Applied Econometrics	
ECO 510	Mathematical Economics And Applications	
MAS 342	Introduction to Optimization and Decision Making (may only be used if Business Analytics is an additional major area of specialization)	
MAS 442	Stochastic Models in Operations Research (may only be used if Business Analytics is an additional major area of specialization)	
MAS 547	Computer Simulation Systems (may not double count for the major elective in Business Analytics)	
MGT 445	Supply Chain Modeling and Analysis	
MGT 446	Supply Chain Strategy	
Total Credit Hours		62

NOTE: ENG 105 and ENG 106, or their equivalents, all 100 and 200-level Business Core courses, and MAS 311 must be completed before taking other upper level Business Core courses and coursework in the major, with the exception of ACC 212 and ECO 212. These two courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Business Analytics Major Area of Specialization (STEM)

In order to complete the specific requirements for the major in Business Analytics, students must take a minimum of 18 credit hours of coursework. All courses must be taken within the current pre-requisite structure.

Required Courses		
MAS 332	Data Acquisition, Preparation and Visualization (pre-requisite MAS 202 or MAS 312) ¹	3
MAS 342	Introduction to Optimization and Decision Making (pre-requisites MTH 162 or MTH 172 & MAS 201 or MAS 311) ¹	3
MAS 432	Data Analysis (Pre-requisite MAS 312) ²	3
MAS 442	Stochastic Models in Operations Research (pre-requisite MAS 311) ²	3
Elective Courses - Select two courses (6 credit hours) from the following:		
At least one course must be selected from MAS 547 or MAS 548.		
BTE 324	Object-Oriented Programming (pre-requisite BTE 320)	
BTE 423	Database Management Systems (pre-requisite BTE 320 or BTE 324)	
MAS 547	Computer Simulation Systems (pre-requisite MAS 311) ¹	
MAS 548	Data Mining and Knowledge Acquisition (pre-requisite MAS 312) ²	
Total Credit Hours		18

¹ offered in fall semester

² offered in spring semester

Note: All specific coursework for the major in Business Analytics must be completed with a grade of "C-" or better. In addition, a minimum cumulative GPA of 2.5 is required for all courses taken in the major area of specialization.

Minor in Business Analytics

Minor Area of Specialization in Business Analytics (STEM)

Business students who choose the minor area of specialization in Business Analytics are trained to combine quantitative, statistical, and computational tools and techniques to help companies understand, predict, and act on large amounts of data, improving decision-making in increasingly complex and interconnected business environments.

The 12 credit hour minor in Business Analytics consists of the following:

Required Courses ¹		
MAS 332	Data Acquisition, Preparation and Visualization (pre-requisite MAS 202 or MAS 312 or equivalent) ²	3
MAS 342	Introduction to Optimization and Decision Making (pre-requisites MTH 162 or equivalent & MAS 201 or MAS 311 or equivalent) ²	3
MAS 432	Data Analysis (pre-requisite MAS 312 or equivalent) ³	3
MAS 442	Stochastic Models in Operations Research (pre-requisite MAS 311 or equivalent) ³	3
Total Credit Hours		12

¹ All courses must be taken within the current pre-requisite structure. In order to complete this minor, students will need pre-requisite courses of MTH 162, MAS 311, and MAS 312 or their equivalents.

² offered in fall semester

³ offered in spring semester

Note: All specific coursework for the minor in Business Analytics must be completed with a grade of "C-" or better. In addition, a minimum cumulative GPA of 2.5 is required for all courses taken in the minor area of specialization.

Marketing

Department Code: MKT

Introduction

Rapidly increasing global competition, emergence of new markets, and technological advancements make today's marketplace a highly dynamic and challenging environment for companies. Effective marketing is therefore crucial for organizations to survive and prosper in such an environment. Marketing is the process through which organizations develop and distribute products and services that satisfy the needs of customers. Customer satisfaction is critical to the profitable operations

and growth of organizations and, as such, an integral component of modern-day marketing.

Educational Objectives

The primary goals of the Department of Marketing are:

1. to contribute to marketing knowledge through conducting scholarly research and disseminating the research findings through leading journals;
2. to excel in imparting marketing knowledge to students and honing their critical-thinking skills so as to prepare them for potentially successful careers in an increasingly competitive, dynamic, global, and service-and technology-oriented environment; and
3. to be of service to the business and professional communities at large.

The marketing curriculum offers courses and programs to undergraduate and graduate students for their professional development in domestic and world business.

A program of study in marketing offers students better understanding of and insights into:

- Marketing's role within the organization and society;
- The various 'markets' for goods and services through better identification and analysis of consumer needs, wants, and interests;
- Marketing's responsibility to society in legal, ethical, and moral matters;
- Methods, procedures, and techniques used in planning and managing marketing decisions.

Degree Programs

A student pursuing the Marketing major can earn either a Bachelor of Business Administration (BBA) or a Bachelor of Science in Business Administration (BSBA) by meeting the appropriate School of Business Administration requirements.

Majors

B.B.A. in Marketing

Major Area of Specialization in Marketing (P&S)

The Marketing major area of specialization provides business students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major area of specialization prepares students to practice marketing in a changing competitive environment. Specifically, it covers the 4 Ps of marketing (i.e., product/service, price, promotion and place/distribution) from a managerial perspective. Additionally, the marketing program of

study is flexible, allowing students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research.

A program of study in marketing offers business students a comprehensive understanding of such topics as:

- The critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers' wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies;
- The legal and ethical responsibilities of marketers.

Students pursuing the BBA in Marketing must complete the BBA Business Core and the specific coursework for the Marketing major area of specialization as follows:

BBA Business Core Requirements for the Marketing Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3
ECO 211	Economic Principles and Problems (Microeconomics)	3
ECO 212	Economic Principles and Problems (Macroeconomics)	3
FIN 302	Fundamentals of Finance	3
MAS 110	Quantitative Applications in Business (Calculus)	3
MAS 201	Introduction to Business Statistics	3
MAS 202	Intermediate Business Statistics	3
MGT 303	Operations Management	3
MGT 304	Organizational Behavior	3
MGT 401	Strategic Management (must be taken in final semester)	3
MKT 201	Foundations of Marketing	3
Total Credit Hours		51

NOTE: ENG 105 and ENG 106, or their equivalents, and all 100 and 200-level Business Core courses must be completed before taking 300 and 400-level Business Core courses and coursework in the major, with the exception of ACC 212, ECO 212, and MAS 202. These three courses may be taken concurrently with 300-level Business Core courses, but should be completed before taking MGT 401 or any upper level courses in the major.

NOTE: MAS 110 and MAS 201 must be completed with a "C-" or better. Students who do not earn at least a C- in ENG 106 must complete ENG 230 with at least a C- before enrolling in BUS 300.

Specific Coursework for the Marketing Area of Specialization (P&S)

Students must complete a minimum of 15 credit hours of Marketing courses beyond the core course of MKT 201/MKT 301 (total of 18 credit hours). All courses must be taken within the current pre-requisite structure.

Core Course		
MKT 201	Foundations of Marketing (taken as part of the Business Core; pre-requisite for all other MKT courses.) ^{1,2}	
	or MKT 301 Marketing Foundations	
Required Courses		
MKT 302	Marketing Research and Market Analysis (pre-requisites MKT 201/MKT 301 & MAS 202 or MAS 312)	3
MKT 403	Marketing Management (pre-requisites MKT 302 (pre or co-requisite) & FIN 302)	3
Elective Courses		
Select three courses (9 credit hours) from the following:		9
MKT 310	Consumer Behavior and Marketing Strategy	
MKT 320	Retailing	
MKT 340	Professional Selling	
MKT 360	International Marketing	
MKT 380	New Product Development	
MKT 385	Marketing for Entrepreneurs	
MKT 386	Advertising Management	
MKT 387	Digital Marketing	
MKT 388	Health Care Marketing	

MKT 389	Understanding Media Metrics In The Digital World	
MKT 469	International Marketing Management (pre-requisites MKT 302 (pre or co-requisite) & MKT 360)	
Total Credit Hours		15

¹ **Important Note:** In order to pursue a major in Marketing, a student must earn a grade of "B" (grade point of 3.0) or higher in MKT 201/MKT 301 (note that a grade of "B-" does not qualify).

² MKT 201 *is intended for freshman business students only.* MKT 301 *is an equivalent course, but is intended for students at the sophomore level or higher.*

Note: All specific coursework for the major in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all courses taken in this major area of specialization. All graded departmental courses in Marketing will be calculated into the major GPA.

B.S.B.A. in Marketing

Major Area of Specialization in Marketing (P&S)

The Marketing major area of specialization provides business students with an understanding of the basic concepts of marketing with an emphasis on emerging techniques and technologies. This major area of specialization prepares students to practice marketing in a changing competitive environment. Specifically, it covers the 4 Ps of marketing (i.e., product/service, price, promotion and place/distribution) from a managerial perspective. Additionally, the marketing program of study is flexible, allowing business students to concentrate on specific areas of professional pursuit such as sales management, advertising, retailing, or marketing research.

A program of study in marketing offers students a comprehensive understanding of such topics as:

- The critical role within organizations;
- Identification of markets for products and services through better understanding and analysis of consumers' wants and needs;
- The nature of global competition and identification of viable competitive strategies;
- Methods used in planning and implementing marketing strategies;
- The legal and ethical responsibilities of marketers.

Students pursuing the BSBA in Marketing must complete the BSBA Business Core and the specific coursework for the Marketing major area of specialization as follows:

BSBA Business Core Requirements for the Marketing Major Area of Specialization (P&S)

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
BSL 212	Introduction to Business Law	3
BTE 210	Fundamentals Of Business Technology & Innovation	3
BTE 320	Introduction to Programming	3

BUS 101	First Step (Freshman Integrity, Responsibility, and Success through teamwork)	3
BUS 150	Business Analytics	3
BUS 300	Critical Thinking & Persuasion for Business	3

MKT 360	International Marketing	
MKT 380	New Product Development	
MKT 385	Marketing for Entrepreneurs	
MKT 386	Advertising Management	
MKT 387	Digital Marketing	
MKT 388	Health Care Marketing	

MKT 389	Understanding Media Metrics In The Digital World	
MKT 469	International Marketing Management (pre-requisites MKT 302 (pre or co-requisite) & MKT 360)	
Total Credit Hours		15

¹ **Important Note:** In order to pursue a major in Marketing, a student must earn a grade of "B" (grade point of 3.0) or higher in MKT 201/MKT 301 (note that a grade of "B-" does not qualify).

² MKT 201 is intended for freshman business students only. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher.

Note: All specific coursework for the major in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all courses taken in this major area of specialization. All graded departmental courses in Marketing will be calculated into the major GPA.

Minor in Marketing for Business Students

Minor Area of Specialization in Marketing for Business Students (P&S)

The 12 credit hour minor in Marketing for business students consists of 9 credit hours of Marketing courses beyond the core course MKT 201/MKT 301, as follows:

Core Course		
MKT 201/301	Foundations of Marketing (taken as part of the Business Core; pre-requisite for all other MKT courses) ^{1,2}	
Elective Courses		
Select three courses (9 credit hours) from the Department of Marketing ³		9
Total Credit Hours		9

¹ **Important Note:** In order to pursue the minor in Marketing, a student must earn a grade of "B" (grade point average of 3.0) or higher in MKT 201/MKT 301 (note that a grade of "B-" does not qualify).

² MKT 201 is intended for freshman business students only. MKT 301 is an equivalent course, but is intended for students at the sophomore level or higher.

³ All courses must be taken within the current pre-requisite structure.

Note: All specific coursework for the minor in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 201/MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all courses taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.

Minor in Marketing for Non-Business Students

Minor Area of Specialization in Marketing for Non-Business Students (P&S)

Non-Business students in any school or college may pursue a minor in Marketing in the School of Business Administration. Interested students should consult with an academic advisor in the School or College of their degree/major to determine if a minor in Marketing is acceptable. If so, neither advice nor consent from either the Office of Undergraduate Business Education or the Marketing Department is necessary for a student to choose or complete a Marketing minor. Instead the non-business student should simply declare the minor and complete the required 12 credit hours of Marketing courses, as follows:

Required Course		
MKT 301	Marketing Foundations (pre-requisite for all other MKT courses) ¹	3
Elective Courses		
Select three courses (9 credit hours) from the Department of Marketing. ²		9
Total Credit Hours		12

¹ **Important Note:** In order to pursue the minor in Marketing, a student must earn a grade of "B" (grade point average of 3.0) or higher in MKT 301 (note that a grade of "B-" does not qualify).

² All courses must be taken within the current pre-requisite structure.

Note: All specific coursework for the minor in Marketing must be completed with a grade of "C-" or higher (except for the minimum "B" grade required for MKT 301, as noted). A minimum cumulative GPA of 2.5 is required for all courses taken in this minor area of specialization. All graded departmental courses in Marketing will be calculated into the minor GPA.

Communication

<http://www.miami.edu/com>

Introduction

The School of Communication houses four departments that offer courses in eight majors leading to the Bachelor of Science in Communication degree. The departments are: Cinema and Interactive Media (Motion Pictures), Communication Studies (Communication Studies), Journalism and Media Management (Broadcast Journalism, Electronic Media, Journalism, Media Management), and Strategic Communication (Advertising, Public Relations). In addition, the Master of Arts, Master of Fine Arts, and Doctor of Philosophy degrees are offered in the School.

Students engage with a diverse faculty of communication scholars, artists and professionals in a variety of hands-on learning experiences embracing research, writing, production, creative problem-solving and multimedia storytelling. On-campus television and radio facilities, soundstages and multimedia labs are available for academic and extra curricular student projects. Students utilize contemporary digital imaging technology and learn skills that cut across a variety of media platforms. Digital editing, recording and mixing facilities are available. New media technology is incorporated throughout the curriculum and the School has numerous computer labs and digitally "smart" classrooms.

Two video-conference centers with broadcast-quality interactive capability for remote interviews and programming support the School's mission. The School also houses a film soundstage and two fully digital, high-definition television studios and control rooms. In addition, a fiber-optic linked studio allows for real-time, broadcast-quality transmissions to sites around the world. Under Communication faculty supervision, student-produced programming is distributed through the University's cable facility and carried throughout the community by the local cable operator and is available through online streaming. The School operates several online sites that afford students outlets for multimedia, interactive and cross-platform writing, research, reporting and creative work.

The University's FM radio station, and student online and print newspapers and magazines, offer additional opportunities for career development. The Bill Cosford Cinema, a 240-seat movie theatre, supports the Motion Picture Program and offers film programming for the Miami community. The School's Norton Herrick Center for Motion Picture Studies is dedicated to research into the history and aesthetics of motion pictures and their social and cultural impact.

The School's Center for Communication, Culture, and Change focuses on promoting positive social and behavioral change through communication research. The Center seeks to address urgent social issues, and make a positive difference in people's lives.

The School supports student chapters of the American Advertising Association, the Public Relations Society of America, the Society of Professional Journalists, the National Broadcasting Society, the University Film and Video Association and other professional organizations. In addition, the School sponsors a nationally competitive intercollegiate debate team, which annually produces several members of the All American Debate Team.

Internships in professional settings are available to Communication students at the sophomore, junior and senior levels. Professionals at daily and weekly newspapers, magazines, news bureaus, cable systems, radio and television stations and networks, production houses and motion picture studios cooperate in faculty-supervised internships. Executives of city and county governments, advertising agencies, public relations firms and other business and nonprofit organizations join in providing internship opportunities. The Stein Family Office of Career Services and Internships assists students seeking internships and offers career planning services. Summer and semester-length study abroad opportunities are also available.

Mission

The School of Communication is dedicated to a global educational perspective and is committed to providing a socially responsible and ethically grounded learning environment guided by a diverse faculty of scholars, artists and professionals. The School is committed to quality undergraduate and graduate programs in communication that emphasize the relationship between theory and practice. We believe in freedom of expression and creativity, and encourage both collaboration and independent thinking as we prepare future scholars, professionals and leaders for a lifetime of service and learning.

Accreditation

The University of Miami is accredited by:

The Southern Association of Colleges and Schools
1866 Southern Lane
Decatur, GA 30033-4097

Academic Policies

Internal Transfer into the School of Communication

A student enrolled at the University of Miami in a School or College other than the School of Communication may apply for admission into the School. Applications are accepted throughout the year. A minimum overall grade point average of 2.5 is necessary for consideration. Applications are available in the Admissions, Academic & Alumni Services Office of the School of Communication (2037 Wolfson Building) and must be submitted prior to the end of each semester. Admission decisions will be made promptly after semester grades are final. Students will be notified in writing of the School's decision.

Transfer Students

A transfer student must complete in residence a minimum of 18 credit hours toward a Communication major or a minimum of 9 credit hours toward a Communication minor. Courses taken elsewhere in Communication or related disciplines are not automatically accepted toward a major or minor at the University of Miami. Students who have obtained the written approval of the Chair of a Communication major to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major. Students should consult a School of Communication advisor to determine whether the transfer of Communication courses will increase beyond 120 the total number of credit hours required for a degree. In general, transfer credit hours will not be accepted to satisfy requirements for any course in any major or minor

at the 300-level or above. Student petitions to transfer credit hours will be considered on an individual basis.

Transfer credit hours may not be used to satisfy requirements for any major or minor in Communication without the written approval of the Chair of the program concerned.

Academic Progress & Probation/Dismissal

Students must maintain a grade point average (GPA) of 2.5 or higher in courses taken in residence and submitted for their School of Communication major. Following the first semester in which any student's GPA in the major falls below a 2.5, the School may issue a warning to that student that his or her work does not meet School expectations. Should that student's GPA in the major be below a 2.5 in any subsequent semester, he or she may be placed on Academic Probation. The School may dismiss from the University any student who is on probation a total of two semesters (not necessarily consecutive). A student who has been dismissed from the School may apply for admission to one of the other Schools or Colleges within the University, but will not be readmitted to the School of Communication.

Those who wish to appeal their probation or dismissal must do so in writing to the Dean within 30 days of the notice of probation or dismissal. See also GOOD ACADEMIC STANDING, WARNING, PROBATION, AND DISMISSAL (p. 21).

Internship Credit Hours

All programs allow students to complete multiple internships for academic credit. Students should consult with their faculty advisor or the School's academic advising office for their department's specific internship credit hour policies.

Credit Hours and Advanced Placement Credit

Credit hours may be earned through Advanced Placement, IB, CLEP Examinations and Advanced Placement by Proficiency Examinations. These credit hours may be applied to the appropriate General Education Required Areas of Study or as electives except:

1. where prohibited by the University or a specific program area; or
2. if the course is remedial (e.g., ENG 103, MTH 099).

To earn credit hours, each student must pay a recording fee and have exempted course credit hours entered on his or her University transcript. An exemption may be granted for ENG 105 by the Department of English, but this exemption will not earn credit hours toward the 120 University credit hours required for graduation.

Grade Point Average

A candidate for the Bachelor of Science in Communication (B.S.C.) must complete the credit hours and achieve the grade point average specified for students in the University at large as stated in the section titled ACADEMIC PROCEDURES AND INFORMATION (p. 13), subject to additional requirements specified in School and Program sections.

General Education Requirements

In April 2012, the University of Miami Faculty Senate adopted a new set of General Education Requirements (GERs). The new Cognate Program of General Education was implemented in the 2013-2014 academic year (AY 2014).

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

See GENERAL EDUCATIONAL REQUIREMENTS (p. 19).

Degree Programs

The School of Communication offers courses in eight programs of study leading to the degree Bachelor of Science in Communication. The programs are Advertising, Public Relations, Communication Studies, Electronic Media, Broadcast Journalism, Journalism, Media Management, and Motion Pictures.

Minors

The School of Communication offers minors in its eight programs of study and a general minor in Communication (COM). School of Communication students may complete a minor in a specific program of study, but are not eligible for the general minor in Communication.

Concentrations

Most degree programs offer concentrations or tracks of study in specialty areas. See the individual program sections for details on these concentrations.

Requirements for Graduation

Bachelor of Science Degree in Communication

Required University General Education Requirements

The General Education Requirements provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently. The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor.

All School of Communication students must complete the University's General Education Requirements. These requirements can be found in the General Education Requirements (p. 19) section. Note that the General Education Requirements differ for incoming freshmen and transfer students.

Completion of each School of Communication major or minor fulfills one of the three cognate areas required by the University: People & Society, Arts & Humanities and STEM. (See individual program descriptions below identifying the specific cognate area covered.)

Students completing a second major or minor in the School which fulfills a cognate area different from their first major, and offered in a different department, may apply the second major or minor toward a second cognate area. No course submitted toward a School of Communication major or minor used to fulfill a University cognate may be applied toward any other cognate area. No more than two cognate areas may be completed in the School of Communication.

Students should meet with their advisors for assistance in completing all University and School requirements.

Developing Proficiency in Advanced Writing and Communication Skills

By their nature, Schools of Communication aspire to help students understand communication processes and develop high-level skills in writing, oral presentation and the use of digital communication technologies for crafting meaningful and effective messages. To fulfill the University's Advanced Writing and Communication Skills requirement, all students enrolled in one of the eight undergraduate majors offered by the School will be required to complete their program's core writing course, at least one public speaking/presentational skills course, and one digital skills course.

Major/Minor Requirements

In addition to completing a major in the School of Communication, students must also complete a minor (or a second major) in either a second Program of Study within the School or in an academic program outside of the School. Students completing majors and/or minors in the School must complete all School of Communication courses with grades of C or higher (a grade of C- or lower is not acceptable.) Students may not enroll in a School of Communication course without grades of C or higher in prerequisite courses. Students completing a minor or second major outside the School of Communication should consult this Bulletin for minimum grade requirements.

The Major in the School of Communication

Majors in the School of Communication leading to a Bachelor of Science in Communication require between 39 and 48 credit hours in School of Communication courses specified in Program Statements (below). Courses within each major must be completed with a grade of C or higher (a grade of C- or lower is not acceptable.) In addition, students must maintain a grade point average of 2.5 or higher in courses taken in residence and submitted for their School of Communication majors.

The Minor

Each Communication student, in addition to completing requirements for a Communication major (below), must complete a minor field in either a second Program of Study within the School or in an academic program outside the School. Each course submitted for a minor offered in the School of Communication must be completed with a grade of C or higher (a grade of C- or lower is not acceptable). To find the requirements for a given minor, students should consult this Bulletin and confer with the appropriate department representative.

School of Communication advisors will aid students in identifying appropriate minors. The candidate for a Communication degree may choose from among any of the disciplines offering minors at the University for which they may qualify. The choice of a minor should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

The Second Major Option

Students may choose to complete a second major, either within the School or in an academic program outside the School, in place of the minor requirement. Some second majors are impractical within the minimum 120 credit hours degree program. Students should consult with a Communication advisor before selecting a second major. The choice of a second major should be made no later than the beginning of the junior year and must be approved by the discipline concerned.

Double Counting

Students completing a major and a minor in the School of Communication, or two majors within the School of Communication, may count only COM 250 toward both Programs of Study. No other course duplication is allowed. Students should consult with the Department Chair of the minor or second major for acceptable course substitutions where appropriate.

Upper Division Credit Hours

In earning a Bachelor of Science in Communication, each School of Communication student must complete a minimum of 36 credit hours of course work at the 300-level or above. Upper division transfer credit hours also apply if completed at a four-year institution and if approved by the Department Chair.

Electives

Only Free Elective courses may be taken under the University's Credit Only option (see CREDIT ONLY OPTION (p. 17)). Free Electives are defined as courses not taken to fulfill the requirements of the major within the School of Communication, of the second major or minor, or of the School's General Education Requirements. Free Electives are courses that are not taken to meet any of the above requirements or their prerequisites, but taken solely to meet the requirement of a minimum total of 120 credit hours for the degree.

General Electives

A sufficient number of University electives must be completed to fulfill a minimum total of 120 credit hours. Electives may be chosen from any course offered by the University except certain unapproved courses such as:

DAN 102	Stretching and Body Work	1
ENG 103	Basic Academic Writing	3
MTH 099	Intermediate Algebra	3

Students should consult a School of Communication advisor before selecting elective courses. Because specific courses are required in some School of Communication majors, students are advised to read Program Statements carefully and seek the advice of a School of Communication advisor prior to taking general University electives.

Schedules

Fifteen to sixteen credit hours constitute a normal semester schedule in the School of Communication. Students who wish to register for more than 18 credit hours must obtain prior approval from the Office of Admissions, Academic & Alumni Services (2037 Wolfson Building). Students who are on academic probation will be limited to a maximum of thirteen credit hours.

Honors

School of Communication students may graduate with School Honors in Communication noted upon their diplomas and transcripts. Students must contact the School's Office of Admissions, Academic & Alumni Services (2037 Wolfson Building) for details about the School of Communication Honors Program.

Students may receive recognition as graduates cum laude, magna cum laude, or summa cum laude if they meet the requirements set forth under GRADUATION HONORS (p. 25).

Foote Fellows

General Information

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Foote Fellows in the School of Communication

The School of Communication hosts several activities geared for our Foote Fellows throughout the academic year. School of Communication Foote Fellows will be receiving information from Assistant Dean Luis Herrera regarding our specific programs. For further inquiries, please contact him at lherrera@miami.edu.

Cinema and Interactive Media

<http://com.miami.edu/programs>

The Department of Cinema and Interactive Media offers a major in Motion Pictures and minors in Motion Pictures (CMP) and Interactive Media (CIMI).

Introduction

The Motion Picture Program offers a complete curriculum for a new generation of media specialists, providing historical context and embracing the moving image creative process from writing and development, through production and post-production, to all forms of exhibition.

Visual storytelling requires technical skill, historical perspective and the ability to think critically in cinematic terms. The undergraduate Motion Pictures major provides the practical, collaborative and analytical skills required in today's global and complex media environments.

The accomplished faculty is dedicated to engaging students in the discovery and development of their talents. Students are trained in innovation, creativity, critical thinking, adaptability, and the capacity to integrate theory and practice, technology and art. They are also well-equipped to understand the business and legal environments in which media industries operate.

Facilities in the Motion Picture Program include digital cameras; grip and electrical equipment; a soundstage; digital post-production image and sound facilities; and a digital animation lab. The School also operates the Bill Cosford Cinema, a state-of-the-art theater that exhibits first-run alternative, foreign and classic films. The Cosford Cinema provides an on-campus venue for various film festivals, including the annual Canes Film Festival featuring UM undergraduate and graduate work. A professional showcase screening of the best student work is held annually in Los Angeles.

The Motion Picture Program offers special summer programs in Prague (FAMU), Greece, and Los Angeles (LA Experience).

Major Cognate Area

- Arts and Humanities

Minor Cognate Areas

- Motion Pictures- Arts and Humanities
- Interactive Media- STEM

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

Dept. Code: CIM

Degree Programs

The Bachelor of Science in Communication is offered in the Motion Picture Program.

Major in Motion Pictures

A major is offered in Motion Pictures.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study. Motion Pictures majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Motion Pictures Major

Before admission as a Motion Pictures (CMP) major, a student must:

- Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Cinema and Interactive Media to use transfer credit hours to satisfy one or more requirements of that major may be required to complete

additional courses in residence at the University before being admitted to that major.

- Upon completion of a student's first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student's major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School. See PROBATION AND DISMISSAL (p. 21).

The Motion Pictures Major

Students majoring in Motion Pictures are required to choose one of the following five areas of concentration: General, Production, Screenwriting, Business or Critical Studies.

Minor in Motion Pictures and Interactive Media

Minors are offered in:

- Motion Pictures and
- Interactive Media.

Both minors require a grade of C or higher in all courses (a C- is not acceptable).

Majors

Majors in Cinema and Interactive Media

- B.S.C. in Motion Pictures - General Concentration (p. 193)
- B.S.C. in Motion Pictures - Production Concentration (p. 193)
- B.S.C. in Motion Pictures - Screenwriting Concentration (p. 194)
- B.S.C. in Motion Pictures - Business Concentration (p. 192)
- B.S.C. in Motion Pictures - Critical Studies Concentration (p. 192)

Minors

CIM 413	Mobile Application Development	
CIM 544	Media Activism	
CIM 550	Motion Graphics And Compositing	
CIM 593	Dynamic Data: Building Database Driven Websites	
Total Credit Hours		15-16

A grade of C or higher is required in all courses (a C- is not acceptable).

Minor in Motion Pictures

The minor in Motion Pictures requires:

CIM 103	Survey of Motion Pictures ¹	3
Select 6 credit hours in CIM at the 300 level or above ¹		6
Select 6 additional credit hours in CIM ¹		6
Total Credit Hours		15

¹ A grade of C or higher is required in all courses (a C- is not acceptable).

Communication Minor

Minor in Communication

A student seeking a minor in the general area of Communication must complete 15 credit hours, at least six of which must be at the 300-level or above. At least 9 credit hours towards the minor must be taken at UM.

- Students in the School of Communication cannot minor in Communication.
- Courses taken for this minor must be taken from the departments of Cinema Interactive Media, Communication Studies, Journalism and Media Management and Strategic Communication. Course prefixes include: CIM, COM, COS, JMM and STC.
- Each course submitted for a Communication minor must be completed with a grade of C or higher (a grade of C- or lower is not acceptable).
- Please see an advisor in the School of Communication, Undergraduate Academic Services Office for further assistance.

Communication Studies

<http://com.miami.edu/programs>

The Department of Communication Studies offers a major in Communication Studies and minors in Communication Studies (COS) and Health Communication (CHCO).

Introduction

The major in Communication Studies empowers students to acquire advanced skills in many areas involving human interaction, cross-cultural and international communication, advocacy, argumentation, relationship building, leadership, presentation (oral and written), critical thinking, research and writing. Students become familiar with the rich tradition of communication theory and research, investigate emerging knowledge about communication, and contribute to the growth of new understanding by developing and applying their research capabilities. Students also are challenged to employ their communication understanding and skills in meaningful ways through experiential learning, and professional and community involvement. Communication Studies blends a broad-based theoretical understanding of communication principles with specific and concrete applications to particular contexts.

Students are prepared for a variety of career options in health communication, business and the professions, politics and public advocacy, education, training and media, as well as further graduate and professional study in

communication, law and other areas.

Degree Programs

The Bachelor of Science in Communication is offered in Communication Studies.

Major in Communication Studies

A major is offered in Communication Studies.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study (p. 19). Communication Studies majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Communication Studies major

Before admission as a Communication Studies (COS) major, a student must:

- Complete the four Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Communication Studies to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student's first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student's major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to the major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School. See PROBATION AND DISMISSAL (p. 21).

Minor in Communication Studies

Communication Studies Minor

The minor in Communication Studies requires 15 credit hours, at least six of which must be at the 300-level or above. The additional credit hours must be chosen with prior approval of a Communication Studies advisor. A grade of C or higher is required in all courses (a C- is not acceptable).

Students, in conjunction with an advisor, can construct a Communication Studies minor focusing on areas of specific interest. These sample areas of concentration listed below are notated on the transcript as a Communication Studies Minor. Possible areas of concentration include the following:

Sample Concentration in General Communication Studies

Offers a rich background in the field of human communication in a variety of contexts applicable to all personal, social and professional endeavors. Complements any major or academic/career objective.

COM 110 Communication Theory	3
Select four of the following:	12
COS 112 Interpersonal Communication	
COS 211 Public Speaking	
COS 316 Small Group Communication	
COS 318 Nonverbal Communication	
COS 333 Business Communication	
COS 336 Political Communication	
COS 343 Introduction to Intercultural Communication	
COS 418 Organizational Communication	
Total Credit Hours	15

Sample Concentration in Public Advocacy

Offers theory and application of oral communication and argumentation as it is used to influence others to promote social change and accomplish persuasive advocacy. Appropriate for students interested in a wide range of objectives, including legal studies and pre-law, sales, advertising, marketing, entrepreneurship, and civic and political engagement.

COS 211 Public Speaking	3
Select one of the following:	3

COS 304 Intercollegiate Debate Theory and Practice (complete three credits)	
COS 377 Argumentation And Critical Thinking	
Select three of the following:	9
COS 311 Advanced Oral Advocacy	
COS 314 The Power of Dialogue	
COS 318 Nonverbal Communication	
COS 336 Political Communication	
COS 352 Critical Research In Communication	
COS 472 Persuasion	
COS 473 Words that Shaped the World	
COS 474 Presidential Debates	
Total Credit Hours	15

Minor in Health Communication

Health Communication Minor

The minor in Health Communication requires COS 324 (Health Communication) and BPH 206 (Introduction to Public Health), plus six additional credits in Communication Studies and three additional credits in Public Health from the list below.

The 15 credit hour minor in Health Communication requires:

COS 324 Health Communication	3
BPH 206 Introduction To Public Health	3
Select two Communication Studies Electives	6
COS 325 Communication In Health Organization	
COS 426 Patient-Provider Communication	
COS 427 Health Behavior And Risk	
COS 472 Persuasion	
Select one Public Health elective	3
BPH 305 Issues In Health Disparities	
BPH 310 Global Health	
BPH 321 Health Promotion And Disease Prevention	
BPH 322 Introduction To Health Policy	
Total Credit Hours	15

A grade of C or higher is required in all courses (a grade of C- or lower is not acceptable).

Journalism and Media Management

<http://com.miami.edu/programs>

The Department of Journalism and Media Management offers majors and minors in Journalism, Broadcast Journalism, Electronic Media, and Media Management.

Introduction

The Department of Journalism and Media Management emphasizes hands-on learning and critical thinking within a multicultural, international context. Our students consistently win regional and national awards and obtain prestigious internships, long-term positions and admission

to excellent graduate programs and professional schools in a variety of fields.

Four majors and four minors are offered in the Department of Journalism and Media Management. The department's programs attract students interested in working in these specific fields, but also provide strong writing, creative, and analytical skills to students who pursue careers in other fields, such as law and business.

The School of Communication's Electronic Media and Broadcast Journalism majors are designed for students who intend to pursue professional work in the arts, crafts and businesses of electronic mass communication and allied fields.

Students majoring or minoring in these subjects study all aspects of television, radio, cable, broadband, digital and mobile operations. All Broadcast Journalism and Electronic Media students are encouraged to become involved in UMTV (the campus cable television channel available to the community, the UM campus and over the web) and the student-run radio station, WVUM-FM, serving South Florida.

The School's Media Management major is designed for students interested in the business and management aspects of contemporary media. Students may pursue interests in entrepreneurship, sales, management, technology and research, among other topics. Students are encouraged to network with industry professionals at Media Management Association meetings and expand their knowledge of media business operations on various platforms through local and national internships.

The School's major in Journalism prepares students to be writers, editors and designers for a variety of media from mainstream and alternative newspapers and magazines to online media and entrepreneurial ventures. We emphasize effective storytelling through writing, audio and video recording, photography, graphics and data visualization. Reporting skills, analytical thinking and journalistic ethics are stressed throughout the program. Students are encouraged to work for *The Miami Hurricane*, UM's award-winning online and print student-run newspaper, *Distraction* magazine, the *Ibis* yearbook, and various professional publications and websites.

The School's facilities include a state-of-the-art radio studio, two high-definition television studios, digital post-production suites and related capabilities.

Major Cognate Area

- People and Society (all department majors)

Minor Cognate Area

- People and Society (all department minors)

Dept. Code: JMM

Degree Programs

The Bachelor of Science in Communication is offered in Journalism, Electronic Media, Broadcast Journalism, and Media Management.

Major

Majors are offered in:

- Electronic Media

- Broadcast Journalism
- Media Management
- Journalism

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study. All majors must also complete a separate minor or second major within the School or in an academic program outside the School. Major/Minor pairing among Journalism, Broadcast Journalism, and Electronic Media is not permitted.

NOTE: Departmental Majors, if you wish to both major and minor in the Department of Journalism and Media Management, you must first obtain the written approval of the Chair of the department.

Admission to the Electronic Media, Broadcast Journalism, Media Management and Journalism Majors

Before admission as an Electronic Media, Broadcast Journalism, Media Management or Journalism major, a student must:

- Complete the Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Journalism and Media Management to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student's first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student's major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School. See PROBATION AND DISMISSAL (p. 21).

The minor in Media Management requires:

JMM 102	Understanding Media And Content In The Digital Age	3
JMM 301	Media Research And Analysis	3
JMM 314	Media Programming	3
Select a minimum of 3 credit hours at the 300-level or above ¹		3
Select 3 additional credit hours ¹		3
Total Credit Hours		15

¹ with the prior approval of a Media Management faculty advisor.

A grade of C or higher is required in all courses (a C- is not acceptable).

Strategic Communication

<http://com.miami.edu/programs>

The Department of Strategic Communication offers majors and minors in Advertising and Public Relations and a minor in Strategic Communication.

Dept. Code: STC

Introduction

The Department of Strategic Communication offers majors and minors in Advertising and Public Relations.

Students majoring in Advertising learn the art, craft and business of promoting brands from an integrated marketing perspective. The program gives students a well-rounded education in advertising that emphasizes strategy building, data gathering and analysis, creative development and media planning skills. The program includes practical and theoretical approaches to the world of professional advertising, both domestically and internationally. The curriculum is hands-on and students learn how to create an advertising campaign that meets their client's goals. Qualified students may elect to participate in the internship program, which provides an opportunity to work in the professional community of the Greater Miami area or other regions. The School's Advertising Program also has an active alliance with the American Advertising Federation.

Students majoring in Public Relations learn how to promote a client's business, image, product or service. Public relations is a strategic communication process that builds mutually beneficial relationships between organizations (business, government, nonprofit, individual) and their public's. PR practitioners develop and deliver key messages through traditional and social media channels. The program provides a well-rounded education in public relations that emphasizes research and analysis, creative development and the relationship of all media to PR in both public and private sectors.

The hands-on curriculum reflects the importance of strategic critical thinking, research for understanding target audiences, writing, design expertise and creativity. Students create and execute a PR campaign in a senior-level capstone course that serves a client organization in the community. Demand for PR interns is high, and qualified students may elect to participate in the internship program to acquire professional experience in South Florida and other regions. The program has ties to the Public Relations Society of America and maintains a Public Relations Student Society of America chapter.

Major Cognate Area

- Advertising General Track:
 - People and Society
- Advertising Management Track:
 - People and Society
- Advertising Creative Track:
 - People and Society or
 - Arts and Humanities
- Public Relations:
 - People and Society

Minor Cognate Area

- Advertising Minor:
 - People and Society
- Public Relations Minor:
 - People and Society
- Strategic Communication Minor:
 - People and Society

Please note, students completing majors and minors within the same department may only satisfy one required cognate area of study.

Degree Programs

The Bachelor of Science in Communication is offered in Advertising and Public Relations

Majors are offered in:

- Advertising General Track
- Advertising Creative Track
- Advertising Management Track
- Public Relations

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's General Education Required Areas of Study (p. 19). Advertising majors must also complete a separate minor or a second

major in either a second Program of Study within the School or in an academic program outside the School.

Admission to the Advertising and Public Relations Majors

Before admission as an Advertising or Public Relations major, a student must:

- Complete the five Core courses listed below, in residence at the University, all with grades of C or higher (C- is not acceptable).
- Students who have obtained the written approval of the Chair of Strategic Communication to use transfer credit hours to satisfy one or more requirements of that major may be required to complete additional courses in residence at the University before being admitted to that major.
- Upon completion of a student's first 45 University credit hours while enrolled in the School of Communication, all University credit hours earned toward the major will be used in computing a student's major cumulative grade point average; only those students with a cumulative average of 2.5 or higher will be admitted to a major.
- A student who has completed 45 credit hours while enrolled in the School of Communication, but who has not been admitted to one of the Communication majors, may be dismissed from the School. A student who has completed 60 University credit hours while enrolled in the School, but who has not been admitted to one of the Communication majors, will be dismissed from the School. See PROBATION AND DISMISSAL (p. 21).

Major in Advertising

Students majoring in advertising will choose one of the following three tracks:

- Advertising General Track
- Advertising Management Track
- Advertising Creative Track

Major in Public Relations

A major is offered in Public Relations.

Each candidate for the degree of Bachelor of Science in Communication will complete School of Communication requirements including courses in the School's [General Education Required Areas of Study](#). Public Relations majors must also complete a separate minor or a second major in either a second Program of Study within the School or in an academic program outside the School.

Minors in Strategic Communication Department

The Department of Strategic Communication offers minors in:

- Advertising
- Public Relations
- Strategic Communication

The minors in Advertising, Public Relations and Strategic Communication require a grade of C or higher in all courses (a C- is not acceptable).

Majors

Majors in Strategic Communication

- B.S.C. in Advertising - General Advertising Track (p. 203)

Total Credit Hours		15

NOTE: Students majoring in Advertising (all tracks) and Public Relations may not minor in Strategic Communication.

Continuing and International Education

<http://www.continue.miami.edu>

The University of Miami's Division of Continuing & International Education (DCIE) is dedicated to providing the highest quality education and training – both on campus and online – to people of all ages, throughout every stage of life.

DCIE offers a wide range of undergraduate, graduate and noncredit courses (including fully online and hybrid options) that span a wide array of industry- and academic-related disciplines. Our programs help advance and enrich students who are either beginning their academic journey to those seasoned professionals pursuing career opportunities in South Florida or within the global community.

DCIE manages the following programs:

- Non degree credit courses in undergraduate and graduate studies
- Noncredit professional certificate programs
- Bachelor of General Studies degree program for adults 22+
- Online middle school and high school
- Summer college credit programs for high school students
- Intensive English-language programs for international students
- Intensive language programs
- Osher lifelong learning community for adults aged 50+
- Corporate/custom training and workforce development programs

Adult Student Access Program

www.miami.edu/asap

Students that meet the minimum requirements may take up to 30 credit hours in an undergraduate, non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. In order to be enrolled in this category, students submit an online application with any required documents. A minimum 2.5 G.P.A. is required to continue in the program beyond 12 attempted credit hours. The application for enrollment may be found on the Web at www.miami.edu/asap (<http://www.miami.edu/asap>).

Students may take up to 6 credit hours, lifetime maximum, in a graduate, non-degree seeking category which may be applied to certain degree programs, after all application and degree seeking requirements are met. Not all graduate departments participate in this program. In order to enroll in this category, students submit an online application, after securing the written permission of the participating graduate department. The application for enrollment may be found on the Web at www.miami.edu/asap (<http://www.miami.edu/asap>).

For more information, contact: The Adult Student Access Program, DCIE, University of Miami, umnondegree@miami.edu, 305-284-4000.

Bachelor of General Studies

www.miami.edu/bgs

Introduction

Under the leadership of Collegiate Studies, the DCIE offers the Bachelor of General Studies (BGS) degree program, which provides a solid and

rigorous, interdisciplinary academic experience for adult, part-time students. It is designed specifically for adults who have previously attended college but have not yet completed their undergraduate degrees, as well as for those who have never had the opportunity to pursue post-secondary studies. You are eligible for admission if you graduated from high school at least four years ago, have not attended the University of Miami during the past calendar year, have a minimum of 2.2 grade-point average on previous college work, and are a U.S. citizen or permanent resident.

The BGS curriculum allows an individual the flexibility to design an area of concentration to enhance professional or personal goals. Designed to strengthen critical thinking and writing skills of the students, each course is taught by exceptional University of Miami faculty who are committed to the adult student.

Advisors offer personalized attention in career exploration and academic advising and discuss educational alternatives with potential students. Every effort is made to ensure that the process - from admission to registration - is efficient and convenient. Students may attend day, evening, or weekend classes to complete their educational goals.

To underscore its commitment to the adults in our community, the University offers a special tuition to students in the Bachelor of General Studies program which enables the adult, part-time student to pursue this degree at an affordable tuition rate. What's more, many courses are available online allowing for greater scheduling flexibility.

The admission process takes into consideration that one's grade-point average, while significant, is only one factor in determining an applicant's qualification for acceptance. Therefore, an admissions interview with an advisor from the DCIE will be scheduled to supplement the information you provide on the BGS application form, which may be obtained by calling Collegiate Studies at 305-284-2727 or at www.miami.edu/bgsdegree (<http://www.miami.edu/bgsdegree>).

Requirements for Graduation

I. Candidates for the Bachelor of General Studies (BGS) degree must complete the required credit hours and achieve the quality point average specified for students in the University at large as stated in the section Academic Regulations and Procedures. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

1. Advanced Standing and Placement (Credit Hour Granted);
2. Credit by Examination;
3. Advanced Placement (by proficiency examination);

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours for that subject as a general requirement for graduation, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied towards the 120 required for graduation.

III. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, the distributions of the School, the General Education

Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Required Areas of Study

English Composition ¹		
ENG 105	English Composition I (or their equivalent)	3
ENG 106	English Composition II (or their equivalent)	3
Foreign Languages		
Select a minimum of 3 credit hours of foreign language at the 200 course level or higher.		3
People and Society (History/Social Sciences)		
Select 6 credit hours in a single two-semester History survey sequence		6
Select 9 credit hours in courses taught by at least two of the following disciplines:		9
African American Studies		
American Studies in Social Science		
Anthropology		
Communication		
Economics		
Education and Psychological Studies		
Geography		
Judaic Studies		
Political Science		
Psychology and Sociology		
Arts and Humanities		
Select a total of 12 credit hours in each of the following disciplines:		12
Art History		
Literature		
Philosophy and Religious Studies		
Select a total of 9 credit hours in each of the following disciplines:		9
American Studies in Humanities		
Art		
Art History		
Communications (Motion Pictures)		
Dance		
Theatre Arts		
Musicology

MTH 101	Algebra for College Students (or an acceptable score on the math placement test is required)	3
MTH 113	Finite Mathematics	3

Select one 3 credit hour course in computer information systems	3
Natural World (Natural Sciences)	
Select 6 credit hours in one or more of the following disciplines:	6
Biology	
Chemistry	
Geological Sciences	
Environmental Science	
Marine Sciences	
Physics and Physical Sciences	
Area of Concentration	
Every candidate for a degree must select an area of concentration. ²	30
Interdisciplinary Courses ³	
ENG 333 Writing the Research Paper	3
Select four more interdisciplinary courses to meet requirements for graduation	12
Electives	
Select elective courses in consultation with their advisor to meet the 120 credit hour graduation requirement	15
Total Credit Hours	120

- ¹ during the first year of enrollment in the School.
- ² The candidate designs an area of concentration that meets his/her professional and personal goals. The course of study is reviewed and approved by the Dean and/or Director of the program.
- ³ BGS Interdisciplinary courses are especially designed to foster critical thinking and taught by faculty from all departments.

Credit Certificate Programs

miami.edu/ccp

Not everyone needs or wants a complete degree program. Recognizing this, the DCIE - in cooperation with several other colleges and schools of the University - offers special Credit Certificate Programs.

Focusing on a single subject, these certificate programs allow students to concentrate on courses that offer the specific knowledge and skills needed for career advancement. All courses are taught by University of Miami faculty at the undergraduate level and are taken for academic credit hour.

Each certificate program varies in the number of required credit hours. While required courses are noted, students may work with an advisor in developing an individually-designed program.

Credit certificate programs are currently available in the following subject areas:

Certificate in Accounting

The Undergraduate Certificate in Accounting is awarded by the Division of Continuing and International Education and the Department of Accounting. It is designed for those who hold at least an undergraduate degree (preferably in business) from an accredited college or university, and whose present interest or occupation is accounting. The program

requires students to take the same 24 credit hours of accounting courses required for the undergraduate major in Accounting. To sit for the Certified Public Accountant (CPA) examination in Florida, students must have completed 120 credit hours, including 24 credit hours of accounting (above the elementary level) and 24 credit hours of business courses, including a minimum of six credit hours of business law. There are additional educational requirements to become licensed as a Certified Public Accountant in Florida. Students may wish to consider either the Graduate Certificate in Accounting or the Graduate Certificate in Taxation (offered by the School of Business) to meet those additional education requirements.

Certificate in Computer Information Systems

The Certificate in Computer Information Systems program is designed to provide a broad background in business computer information systems and to develop the technical skills one needs to stay competitive in this challenging field. The program will be of particular benefit to programmers and to management information systems analysts. The certificate is awarded by the DCIE and the Department of Computer Information Systems upon the successful completion of 18 credit hours.

Global Academy

<http://www.umga.miami.edu>

University of Miami Global Academy (UMGA) offers an online middle and high school college preparatory program for both full-time and part-time students. Students have the option of either taking courses and transferring them back to their local school or completing all of their courses at UMGA and graduating from the University of Miami Global Academy. In addition, UMGA offers courses on an accelerated schedule for credit advancement or credit recovery. Whether students are at the middle or high school level, all are provided with the following:

- Instruction from certified, highly qualified teachers
- Academic coaching to assist with schedules and college acceptance
- Small class size
- A highly interactive learning environment that promotes engagement
- Comprehensive curriculum offering regular, honors, Advanced Placement (AP) and world language courses including French, Latin, and Mandarin Chinese
- iESOL Program to increase English language proficiency

Additional information regarding middle school, high school, and summer school can be found at www.umga.miami.edu (<http://www.umga.miami.edu>).

Intensive Language Institute

The Intensive Language Institute offers comprehensive language instruction for academic, professional, and personal purposes. The Intensive English Program, a full-time course of study for international students who wish to pursue university studies in the United States, provides instruction in English language and academic study skills. The

ILI also offers certificate programs, part-time language courses and customized language programs.

Intensive English Program

The Intensive English Program is designed to prepare students to participate successfully in the academic environment. Students are given a placement test upon arrival to determine the most appropriate level of study. Courses are offered at five levels of instruction. The skills-based curriculum integrates reading and writing, listening and speaking into one complete program of study. The focus is on English language acquisition and application in an academic setting. Specialized classes vary by level; focusing on the needs of the language learners. Satisfactory completion of the highest level meets the English language requirement for acceptance to undergraduate programs at the University.

For more information contact:

Intensive English Program
PO Box 248005
Coral Gables, FL 33124-1610
305-284-2752
E-mail: iep@miami.edu
Visit our website at www.miami.edu/iep (<http://www.miami.edu/iep>)

Intensive Language Programs

Communicative language classes are offered in the evenings and on weekends in Spanish, Portuguese, Italian, French, Mandarin Chinese and ESL throughout the year. These courses focus on meaningful communication in the chosen language. Specialized classes focus on Accent Reduction, Medical Spanish or Medical Haitian Creole, and/or Business Writing. A 7-day immersion-style program in Spanish is also offered. Several non-credit certificates are available: the English for Law School Studies Certificate is a 6-week summer program for international students, the Business Communication Certificate focuses on oral and written skills necessary for the workplace, and the Teaching English as a Foreign Language Certificate teaches skills needed to teach ESL or EFL abroad. The Intensive Language Institute also develops and conducts customized language courses on or off campus tailored for individuals, groups, and organizations with specialized language training needs. For further information, or to register for classes, please call us at 305-284-4000 or visit us on the web at: www.continue.miami.edu (<http://www.continue.miami.edu>). Email: alc.cstudies@miami.edu.

Office of Professional Advancement

Dedicated to providing the highest quality, competency-based, continuing professional education, the Office of Professional Advancement offers seminars, courses and certificate programs to meet the training and professional development needs of both corporations and individuals.

For more information, specific curriculum descriptions and a listing of current seminars, courses and workshops, contact the:

Office of Professional Advancement, DCIE
University of Miami
111 Allen Hall
Coral Gables, Florida 33124-1610

Alfus Healthcare Advocacy

This program offers a comprehensive curriculum geared to educate students in the complex field of the US healthcare system. Healthcare advocates strive to maintain high individual services for clients in a system that is frequently impersonal and intimidating. Classes are taught by industry leaders. The program is offered online in cohorts of 8 modules for a period of approximately 9 months. Upon completion, students are prepared to successfully enter this promising new field.

For detailed course descriptions, calendar and tuition cost, please visit our website at: <http://www.continue.miami.edu/pac>.

Electronic Medical Records Specialist Certificate

Manage electronic medical records and gain the professional knowledge to become an essential member of the healthcare team. Learn through hands-on practice sessions using PrimeSUITE®, electronic medical records software. The Program prepares students to sit for the Certified Electronic Health Records Specialist (CEHRS) examination through the National Health Career Association.

For detailed course description, calendar and tuition cost, please visit our website at www.continue.miami.edu.

Business and Leadership Certificate Programs

The Office of Professional Advancement offers certificate programs in the areas of business, Leadership and Nonprofit areas. These non-credit certificate programs are tailored for individuals who want to improve their business and leadership skills.

For a full list of business certificate programs offered, please visit our website: <http://www.continue.miami.edu>.

Certified Professional Coach Program

This Coach Certificate Training Program is designed to support you in becoming a professional coach or in using coaching skills to enhance your leadership, management, and/or communication skills. This program has been written by master coaches and aligns with the International Coach Federation (ICF) Core Coaching Competencies. The University of Miami has designed a thorough program that will allow you to make a powerful leap into using coaching skills and becoming a professional coach. The Certified Professional Coach Program is a 140 hour, eleven month program designed for those interested in a career in coaching, who also want outstanding training in order to serve clients at the highest level. Additionally, it is designed for leaders, managers, human resource professionals, teachers, or service professionals (doctors, lawyers, counselors, consultants, etc.) who want to dramatically improve their ability to communicate, motivate, inspire, and empower others.

For more detailed course descriptions, current schedule, and prices please visit our website at <http://www.continue.miami.edu/coach>.

Human Resources Management Certificate Program

This certificate provides the latest in proven techniques and strategies to effectively manage organizational challenges. The curriculum covers the following topics: Strategic Management, Legal and Regulatory Issues; Employment, Planning, and Placement; Benefits and Compensations; Development and Administration; Training and Development and Employee and Labor Relations. The HR Program is recognized by the Greater Miami Society for Human Resource Management. The comprehensive curriculum works for the newcomer as well as the seasoned professional and is especially useful to small and medium-size business owners. (6 months)

For more detailed course descriptions, current schedule, and prices please visit our website at <http://www.continue.miami.edu/hrm>.

SHRM® Certification Course (SHRM-CP™ / SHRM-SCP™)

Establish yourself as a globally-recognized human resource expert by earning the new standard in HR Certification: SHRM Certified Professional (SHRM-CPT®) and SHRM Senior Certified Professional (SHRM-SCP®). Designed for SHRM credential candidates, this course will expand and test your knowledge of practical, real-life competencies in areas critical for HR career success. Combining expert instruction with the SHRM Learning System® for SHRM - CP™/SHRM-SCP™, you will learn faster, retain more knowledge, and stay on track for success on the exam.

For more detailed course descriptions, current schedule, and prices please visit our website at <http://www.continue.miami.edu>

Interior Design Certificate Program

If you have always had an eye for design, and have a knack for taking an ordinary space and making it feel extraordinary, then the University of Miami Certificate in Interior Design is for you. The Certificate in Interior Design Program offers non-credit courses to those who want to enrich their cultural experiences or who are interested in improving their professional or occupational skills. Taught by industry professionals, our Certificate in Interior Design program focuses on the important fundamentals to enter the design field. A hands-on program, students will learn history of interiors, principles and elements of design, freehand and computer drafting, specification and materials, professional practice, photography and building a portfolio.

For more detailed course descriptions, current schedule, and prices please visit our website at <http://www.continue.miami.edu>

Paralegal Studies Certificate Program

The UM Paralegal Studies program is an intense four-month course of study which certifies the successful student as a qualified professional ready to start an exciting new career as a paralegal. Classes are taught by prominent local attorneys, Judges and Magistrates. The Paralegal Program classes are offered on the weekends, weekdays or weekday evenings at the Coral Gables campus and on weekday evenings in

Broward. This program is also available online in both English and Spanish. (4 months)

For more detailed course descriptions, current schedule, and prices please visit our website at <http://www.continue.miami.edu/paralegal>.

Paralegal Specialist Certificate

The Paralegal Specialist Certificates provide both beginning and experienced paralegals with expansive educational and professional opportunities. The certificate programs allow paralegals to augment current skills and focus on virtually any area of the law. Choose from over 20 Paralegal Specialist Certificates and give yourself an edge in today's competitive job market. All specialist courses are available online so students are able to enroll at any time. (6 months)

For more detailed course descriptions, current schedule, and prices please visit our website at <http://www.continue.miami.edu/paralegal>.

Personal Financial Planning Certificate Program

Designed for students preparing for professional examinations and professional practice in personal financial planning.

Our program consists of providing the highest quality CFP education through Dalton Education, a leading provider of innovative education solutions in financial planning. The founders of Dalton Education have helped thousands of financial professionals earn the CFP® certification marks with their leading CFP review course, THE DALTON REVIEW®. Students can choose from an independent, self-paced, online education program or a live, instructor – led, internet delivered program.

For more detailed course descriptions, current schedule, and prices please visit our website at <http://www.continue.miami.edu/pfp>.

Social Media Management Education Program

University of Miami is proud to offer a Social Media Professional Certificate and Social Media Strategist Certificate. This is a cutting edge program, designed to teach the business applications of social media communications. This self-paced online program is convenient, practical, and affordable with the flexibility to begin at a time that works best for you.

For more detailed course descriptions, current schedule, and prices please visit our website at <http://www.continue.miami.edu>.

Project Management Professional Certificate (PMP®)

This program satisfies the educational requirement needed to qualify to take the Project Management Professional (PMP®) exam.

Learn the core competencies of project management, following the Project Management institute's A Guide to the Project Management Body of Knowledge, (PMBOK®- Guide). Become proficient in the knowledge areas, process groups, skills and techniques delineated in the PMBOK Guide to execute projects effectively and efficiently through all stages.

For more detailed course descriptions, current schedule, and prices please visit our website at <http://www.continue.miami.edu> .

Education and Human Development

<http://www.education.miami.edu>

Introduction

The School of Education and Human Development offers undergraduate majors in:

- Human and Social Development
 - Track I: Individual and Relational Development
 - Track II: Community and Program Development
 - Track III: Human and Social Development Studies
- Athletic Training
- Exercise Physiology
- Sport Administration
- Elementary (K-6)/Exceptional Student Education (K-12) with ESOL and Reading Endorsements (K-12)
- Secondary English with ESOL Endorsement (K-12)
- Secondary Science, Mathematics and Social Science (6-12).

The degrees of Master of Science in Education, Specialist in Education, Doctor of Education, and Doctor of Philosophy are available in various departments within the School. These programs are under the supervision of the Dean of the Graduate School and the School of Education and Human Development Sr. Associate Dean for Graduate Studies.

Vision/Mission

Our vision is to be a center of excellence in the study, promotion and integration of educational, psychological, and physical well-being in multicultural communities.

Our mission is to produce knowledge and prepare the next generation of leaders, researchers, and agents of change and well-being in education and the community.

Academic Policies

Admission

Applications for incoming freshman are processed and reviewed by the Office of Admission.

Application to the Bachelor of Science in Education program is requested by February 1st.

Early application is encouraged.

Transfer students: The academic accomplishments of each transfer student will be evaluated on an individual basis. A 3.0 GPA is recommended for transfer admission.

Application deadline for transfer students is March 1st.

Students admitted into the SEHD programs are held to the program requirements stated in the Bulletin for that term.

Student Responsibilities

Students are responsible for planning their own programs and for meeting degree requirements. It is the student's responsibility to understand and fully comply with the provisions set forth in this Bulletin

and written changes to their program of study. Written requests for variation from program or school requirements are reviewed by an administrative committee.

Matriculated students who elect to transfer courses from another institution over a summer or intersession term, must receive departmental or program approval prior to enrolling in the course. Students are responsible for adhering to the residency rule which states that the last 45 consecutive credits must be earned at UM.

A student advising compact specifies the dual responsibilities between students and advisors in each program.

Academic Progress and Probation

The School will review each student's record at the end of each semester.

When a student's semester or cumulative average is less than stated below, or progress toward degree completion is unsatisfactory, the student will be placed on academic probation or warning in accordance with the School of Education and Human Development policies and procedures.

Students on probation are not permitted to enroll in more than 12 credit hours, shall make arrangements to meet on a monthly basis with their academic advisor, and may have a STOP placed on their future enrollment until grades are further reviewed. The following criteria will determine probationary status.

Credit Hours Earned	CGPA	CGPA (Exercise Physiology Majors Only)
Fewer than 30 credit hours	1.7	2.0
30-59 credit hours	2.0	2.5
60+ credit hours	2.3	2.5

Note: There are different retention and probation policies for Athletic Training majors. Please see the Athletic Training (p. 214) website or the Athletic Training Guidelines Manual for this and other important information regarding the requirements for completion of the Athletic Training major.

Note: The minimum GPA required for graduation from a Teacher Education Program is 2.5.

Subject to Dismissal

A student who remains on academic probation twice during their undergraduate studies can be designated as "Subject to Dismissal" and will be dismissed the following semester if not removed from probationary status. It is not required to be on this status to be dismissed from the School of Education and Human Development or from the University of Miami.

Academic Dismissal

A student in the School of Education and Human Development whose CGPA or progress toward degree completion, falls below the level of the minimum standards of the University of Miami and/or the School of Education and Human Development, may be dismissed.

Accreditation

Kinesiology and Sport Sciences offers the Athletic Training Program that is accredited by the Commission on Accreditation of Athletic Training Education (CAATE); the Sport Administration Program is approved by the North American Society of Sport Management. Teacher Education Programs offered by the School of Education and Human Development are approved by the Florida Department of Education. In conjunction with the Phillip and Patricia Frost School of Music, the School of Education and Human Development offers Teacher Education Programs in Music Education at the undergraduate and graduate levels. Students who successfully complete their program of studies and submit an application to the Florida Department of Education - Bureau of Educator Certification are eligible to receive a Professional Teaching Certificate.

Educational and Psychological Studies

Dept. Code: EPS

Bachelor of Science in Education: Human and Social Development

The major in **Human and Social Development (HSD)** focuses on the promotion of healthy development and well-being. It prepares students to work with people in multiple contexts and settings:

- health and human services
- schools, universities, and community programs
- government and non-government agencies
- grass-roots movements

By exploring the scholarly and practical interconnections among **individual, interpersonal, social, and community approaches to change**, students learn to identify barriers to well-being and to implement effective change-oriented strategies and policies. HSD coursework emphasizes **theory, research, and skills**. It culminates in a **practicum** in a setting related to students' area of interest and prepares them for both graduate studies and careers.

Students choose between three areas of concentration (tracks).

- **Track I: Individual and Relational Development (Track Code: HSDI)**
This track emphasizes individual, relational, and family well-being. Focusing on context and diversity in mental health and on strength-based, preventive, and empowering approaches, courses cover family studies, counseling theories and techniques, interviewing skills, and the basics of human service work. Students are well-prepared for graduate study in the helping professions and careers in health and human services.
- **Track II: Community and Program Development (Track Code: HSDC)**
This track promotes healthy individual and community development by emphasizing how social, institutional, and community dynamics affect personal well-being. Stressing the role of non-government agencies in fostering well-being for people with diverse backgrounds, HSDC prepares students to diagnose institutional and community challenges and offer strategies for positive change. Courses include community-focused planning, needs assessment, and change strategies and nonprofit program development, implementation, and evaluation. Students are well prepared for graduate study in

community psychology and public policy and careers in community organizations.

- **Track III: Human and Social Development Studies (Track Code: HSDS)**

This is a general track which offers a menu of courses relating to individual and community development. HSDS students are free to combine classes from the Individual (HSDI) and Community (HSDC) tracks. This track meets the needs of students who seek greater flexibility in course work and are less concerned with specializing in the individual or community tracks.

HSD students must declare an approved second major or a minor either in the School of Education or through any other school or college.

Requirements for Graduation Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES (p. 13), subject to regulations concerning the major specified in departmental and program sections of this Bulletin.

Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

- Advanced Standing and Placement (Credit Hour Granted);
- Credit by Examination;
- Advanced Placement (by proficiency examination);
- Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

III. Credit Only. Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit hour may not count toward the completion of a major without the written approval of the Assistant Dean of the School of Education and Human Development.

V. Required Areas of Study

1. English Composition 3 – 6 credit hours

Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the ENG 105/ENG 106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour in, ENG 105. Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit hour in, ENG 105.

Courses satisfying the English Composition requirement may not be used to fulfill the Advanced Writing and Communication Requirement.

2. Mathematics

B.S.Ed. degree candidates in the Department of Educational and Psychological Studies are required to take EPS 351. This course fulfills a Math requirement for the HSD major. Prior to taking EPS 351, students must complete MTH 101 or be exempt from MTH 101 based on any of the following tests: AP, IB, or an examination administered by the Department of Mathematics.

3. Foreign Languages (not applicable)

Areas of Knowledge and Cognate Requirements

The University of Miami's General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a **Cognate**, which is a cluster of courses arranged by their content, field and interest.

- A cognate is a group of at least three related courses for at least 9 credit hours.
- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Students must take three cognates to fulfill the Areas of Knowledge requirement,
 - one in the **Arts & Humanities (A&H)**,
 - one in **People & Society (P&S)**, and
 - one in **Science, Technology, Engineering & Mathematics (STEM)**.
- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in that one area.
 - Exercise Physiology and Athletic Training majors will fulfill the **STEM** cognate.
 - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the **P&S** cognate.
- An approved list of cognates can be found on the University of Miami website.

VI. Advanced Writing and Communication Skills Requirement

Every student majoring in Human and Social Development, will meet the Advanced Writing and Communication Requirement upon fulfillment of their major courses. These courses have a prerequisite requirement of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral competencies will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. Courses in the HSD major which meet the Advanced Writing and Communication Skills Requirement are EPS 321, EPS 371 and EPS 579.

VII. Major in Human and Social Development

- Every candidate for the B.S.Ed. degree in the Department of Educational and Psychological Studies must choose a major in Human and Social Development.
- Students choose among three areas of concentration:
 - Track I – Individual and Relational Development (HSDI);
 - Track II – Community and Program Development (HSDC);
 - Track III – Human and Social Development Studies (HSDS).
 To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.
- HSD majors must maintain a minimum overall grade point average of 2.0 with a grade of "C" or better in all courses in the major.
- HSD students must declare an approved second major or a minor in the School of Education and Human Development or through any other UM school or college.

VIII. Minor

B.S.Ed. majors in Human and Social Development are required to declare a minor.

IX. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above.

X. Senior Assessment

Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS review process.

For further information, address all inquiries to:

Minor in Human and Social Development

- The requirements of the minor are 15 credit hours with a grade of C or better.
- Nine of these 15 credit hours must be earned at the University of Miami; with prior approval, three of these nine may be taken through the UM Study Abroad Program.
- All transfer course equivalencies, (up to 6 credits), must be approved by the EPS department.
- EPS 201 is required
- Two courses must be upper division courses (at or above the 300 level)
- The undergraduate coursework in Human and Social Development is open to all qualified University of Miami students.
- Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student's degree granting college or school.

Kinesiology and Sport Sciences

Dept. Code:KIN

The School of Education and Human Development offers undergraduate studies in the Kinesiology and Sport Sciences Department. The Department provides some of the strongest programs in the field, providing a structured classroom setting immersed in theory and knowledge with clinical and practical experiences. The department is committed to fostering unique and collaborative efforts within our diverse University community. Students are encouraged to engage in various work and clinical experiences including opportunities at the Medical School, the Miami Project to cure paralysis, UM Varsity Athletics Department, South Florida sports industry, Sports Medicine Clinics, Veterans Administration Hospital, and local high schools. Students can choose to major in one of the following areas:

- Athletic Training
- Exercise Physiology (with a pre-medical or pre-physical therapy track)
- Sport Administration

Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the

quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES (p. 13), subject to regulations concerning the major specified in departmental and program sections of this Bulletin. Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

- Advanced Standing and Placement (Credit Hour Granted);
- Credit by Examination;
- Advanced Placement (by proficiency examination);
- Statement of Foreign Language Requirements;

II. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

III. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

IV. Transferred credit hour may not count toward the completion of a major without the written approval of the Assistant Dean of the School of Education and Human Development.

V. Required Areas of Study.

1. English Composition

Students must take ENG 105 and ENG 106 (or their equivalent) during the first year of enrollment in the School. Admission to ENG 105 requires a placement score acceptable to the Department of English. Students whose placement scores are deemed unacceptably low will be required to take the non-credit course, ENG 103, before taking ENG 105 and ENG 106. Students whose placement scores are high may be exempt from ENG 105 but not from ENG 106 or its equivalent.

2. Mathematics

B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests. Statistics does not satisfy the Math requirement.

3. Foreign Languages (applicable to Sport Administration majors only)

Students must earn at least 3 credit hours of a foreign language at the 200 course level or higher. Special 200-level courses are required of native speakers who choose to fulfill the language requirement. Two semesters of American Sign Language constitutes an acceptable alternative for the Foreign Language Requirement.

Areas of Knowledge and Cognate Requirements

The University of Miami's General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General

Education requirements by selecting a **Cognate**, which is a cluster of courses arranged by their content, field and interest.

- A cognate is a group of at least three related courses for at least 9 credit hours.
- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Students must take three cognates to fulfill the Areas of Knowledge requirement,
 - one in the **Arts & Humanities (A&H)**,
 - one in **People & Society (P&S)**, and
 - one in **Science, Technology, Engineering & Mathematics (STEM)**.
- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in one area.
 - Exercise Physiology and Athletic Training majors will fulfill the **STEM** cognate.
 - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the **P&S** cognate.
- An approved list of cognates can be found on the University of Miami website.

VI. Advanced Writing and Communication Requirement

Every student majoring in a program from the Kinesiology and Sport Sciences Department will meet the Advanced Writing and Communication Requirement upon fulfillment of the courses for that major. These courses have a prerequisite of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral components will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. The following courses meet the Advanced Writing and Communication Skills Requirement for the major:

Athletic Training: KIN 250 and KIN 260

Exercise Physiology: KIN 365 and KIN 457

Sport Administration: KIN 306 and KIN 498

VII. Majors

Every candidate for the B.S.AT. degree must choose Athletic Training as a major. Every candidate for the B.S.EXPH degree must choose Exercise Physiology as a major. Every candidate for the B.S.Ed. degree must choose a major in Sport Administration. To find the requirements for the major, consult this Bulletin under the discipline concerned, and confer with the designated departmental representative.

The choice of majors should be made no later than the beginning of the junior year and must be approved by the major department. Any student

making unsatisfactory progress in a major may be required to change his/her major or to relinquish candidacy for the degree.

VIII. Minors

B.S.Ed. majors in Sport Administration and Exercise Physiology and B.S. EXPH majors are required to declare a minor. Sport Administration students require department approval before declaring a minor. Exercise Physiology students may choose not to declare a minor if following the pre-med track. Students must complete all of the pre-med courses in order to be waived from the minor requirement. Please consult an advisor for clarification of this requirement.

IX. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above.

X. Senior Assessment

Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS review process.

Minors

A minor in any of the three areas below consists of 14-15 credit hours:

Exercise Physiology

Sport Administration

Sports Medicine

- A grade of C or better is required for each course applied toward the minor; the overall grade point average for the minor must be 2.5 or above.
- The undergraduate coursework in Exercise Physiology, Sports Medicine, and Sport Administration are open to all qualified University of Miami students. A student can minor in *either* Exercise Physiology or Sports Medicine but not both.
- Athletic Training majors are not allowed to minor in Sports Medicine.
- Determination for using these courses as a minor, as a specialization, and/or as electives in any program, is made by the individual student's degree granting college or school.
- Seniors are required to participate in the General Education Assessment as part of the SACS review process.

For further information, address all inquiries to:

Assistant Dean
School of Education and Human Development
P. O. Box 248065
University of Miami
Coral Gables, Florida 33124
Telephone: (305) 284-3711

Majors

- B.S. in Education, Exercise Physiology (p. 216)

- B.S. in Education, Sport Administration (p. 218)

Minors

Minors in Kinesiology and Sport Sciences

- Exercise Physiology (p. 218)
- Sports Medicine (p. 219)
- Sport Administration (p. 218)

B.S. in Exercise Physiology

The Undergraduate program in Exercise Physiology at the University of Miami, is designed for students to acquire a sound knowledge base in the sciences followed by the application of that knowledge base to human movement, exercise and sports performance. Clinical laboratory experiences supplement applied scientific theory in a rigorous academic setting.

- Students may pursue a pre-med track concurrent with the Exercise Physiology major and should inform their advisor if selecting this track.
- Exercise Physiology requires that students maintain a major GPA of 2.75. Students with a major GPA below 2.75 will have one semester to raise their GPA to meet the requirement. Failure to do so may lead to dismissal from the major.
- Students transferring from another college or university must have a cumulative GPA of 3.0 or above in order to be considered for admission to the major.
- A grade of "C" or better is required for each course applied toward the major. Students are allowed to retake a course one time.
- All 100 level courses and KIN 202, KIN 212, and KIN 232 are open to non-majors. All other courses are open to majors and minors only. KIN 202 is only open to science majors.
- All 300- and 400-level courses are restricted to declared Exercise Physiology majors only.
- KIN 466 has been changed to KIN 399, and should be taken in the Spring semester of the junior year. Students unable to take or retake this class prior to graduation are permitted to take KIN 545 as a substitution.
- Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS accreditation review process.
- The BSEXP degree requires:

Calculus		
MTH 161	Calculus I (or equivalent)	4
Statistics and Research Methods		
EPS 351	Introduction to Statistics and Research Design	3
KIN 415	Evidence Based Sports Medicine	3
Total Credit Hours		10

Courses for Exercise Physiology Major

KIN 202	Applied Nutrition for Health and Performance	3
KIN 212	Elements of Sports Psychology	3.00
KIN 221	Biochemistry And Skeletal Muscle	3

KIN 222	Exercise Physiology Laboratory: Neuromuscular	2
KIN 232	Basic Human Physiology	3
KIN 233	Basic Anatomy Lab	2
KIN 321	Introduction to Systemic Exercise Physiology	3
KIN 322	Exercise Physiology Laboratory: Cardiorespiratory	2
KIN 344	Gross Anatomy For Kinesiology And Sport Sciences	3
KIN 345	Kinesiology	3
KIN 365	Principles of Exercise Prescription: Cardiovascular	3
KIN 366	Exercise Physiology Laboratory: Assessment	3
KIN 399	Neuromuscular Basis For Training	3
KIN 421	Advanced Systemic Exercise Physiology	3
KIN 435	Clinical Biomechanics for Sport Medicine Professionals.	3
KIN 457	Practicum in Kinesiology and Sport Sciences	1-3
KIN 477	Advanced Nutrition for Health and Fitness	3

All students who are majoring in Exercise Physiology must earn 8 credit hours TOTAL in chemistry. The chemistry requirement may be fulfilled by any 8 credit hours in chemistry, provided that the courses are not repeated or considered an equivalent of one another.

Therefore, the chemistry requirement may be fulfilled by one of the following combinations:

Combination 1		
CHM 111	Principles of Chemistry I	4
& CHM 113	and Chemistry Laboratory I	
CHM 112	Principles of Chemistry II	4
& CHM 114	and Chemistry Laboratory II	
Combination 2		
CHM 103	Chemistry for Life Sciences I (Lecture)	4
& CHM 105	and Chemistry for Life Sciences I (Laboratory)	
CHM 104	Chemistry for Life Sciences II (Lecture)	4
& CHM 106	and Chemistry for Life Sciences II (Laboratory)	
Combination 3		
CHM 111	Principles of Chemistry I	4
& CHM 113	and Chemistry Laboratory I	
CHM 104	Chemistry for Life Sciences II (Lecture)	4
& CHM 106	and Chemistry for Life Sciences II (Laboratory)	

Please see an advisor for proper chemistry course placement.

University of Miami Honors Program – Exercise Physiology

The courses below will be available for honors credit hour for Exercise Physiology students provided the following stipulations are met:

1. The course is under the direction of a full-time faculty member in Exercise Physiology.
2. The student completes an honors project permission form and submits this form to the instructor within the first three weeks of the semester.

3. The student completes assigned writing credit work by the end of the semester.
4. Assignments completed for honors credit hour are in addition to the University of Miami Writing Center for review.

The University of Miami currently offers an accelerated programs for undergraduate Exercise Physiology majors who want to obtain a Master's Degree in Exercise Physiology, Strength & Conditioning/Fitness Entrepreneurship, or Nutrition for Health & Human Performance. This can be done by taking one additional year of graduate courses. These students must take two graduate courses in Exercise Physiology in their senior undergraduate year in order to earn an M.S.Ed. degree in one additional year. Please visit our website www.education.miami.edu (<http://www.education.miami.edu>) for additional information on the accelerated master's programs. To be eligible students must apply for admission to the accelerated master's program no later than the end of the Fall semester of their senior year.

B.S. in Athletic Training

The Athletic Training program at the University of Miami is an undergraduate education program that has been accredited by CAATE. The program is designed to provide a structured classroom and clinical experience to prepare students to become eligible to sit for the Board of Certification exam; Didactic courses are sequenced to maximize student learning. Please see the Athletic Training website or the Athletic Training Guidelines Manual for the course sequence form and other important information regarding the requirements for completion of the Athletic Training major.

- A degree in Athletic Training requires a major GPA of 3.0 or higher and an overall GPA of 2.5 or higher.
- Seniors are required to participate in the General Education Assessment prior to graduation as part of the SACS accreditation review process.
- Students must successfully meet all of the retention requirements outlined in the Athletic Training Education Program (ATEP) handbook in order to continue in the major.
- The BSAT degree requires:

Calculus		
MTH 161	Calculus I (or equivalent)	4
Statistics and Research Methods		
EPS 351	Introduction to Statistics and Research Design	3
KIN 415	Evidence Based Sports Medicine	3
Total Credit Hours		10

Courses for the Athletic Training Major

KIN 140	Introduction to Athletic Training	2
KIN 141	Introduction to Athletic Training Lab	1
KIN 145	Responding to Emergencies	2
KIN 184	Athletic and Sport Injuries	3
KIN 202	Applied Nutrition for Health and Performance	3

KIN 234	Functional Human Anatomy	3
KIN 235	Personal and Community Health	3
KIN 250	Orthopedic Assessment: Lower Extremity	3
KIN 251	Orthopedic Assessment: Lower Extremity Lab	1
KIN 260	Orthopedic Assessment: Upper Extremity	3
KIN 261	Orthopedic Assessment: Upper Extremity Lab	1
KIN 264	General Medical Conditions Evaluation	1
KIN 345	Kinesiology	3
KIN 365	Principles of Exercise Prescription: Cardiovascular	3
KIN 443	Clinical Athletic Training Lab I	2
KIN 444	Clinical Athletic Training Lab II	2
KIN 455	Clinical Athletic Training Lab III	2
KIN 456	Clinical Athletic Training Lab IV	2
KIN 461	Therapeutic Modalities	2
KIN 462	Therapeutic Modalities Laboratory	1
KIN 463	Therapeutic Rehabilitation	2
KIN 464	Therapeutic Rehabilitation Laboratory	1
KIN 465	Pharmacology	2
KIN 470	Administrative Aspects of Athletic Training	2
KIN 476	Seminar in Athletic training	2
KIN 488	Gross Anatomy	3

Students in the Athletic Training major are not required to declare a minor.

B.S. in Education, Sport Administration

The Sport Administration major at the University of Miami is an undergraduate education program designed to prepare students for careers in the sport industry. The program is committed to the professional development of students so that competencies and skills relevant to the Sport Industry can be acquired over time. Specific competencies in organization, ethics, marketing, leadership and legal issues are emphasized.

- Field experience and internships are an essential component of the major. The KIN department is actively engaged in placing students in visible sports settings and appropriate sport environments so that students acquire relevant competencies and gain pragmatic hands-on experiences that are necessary for success in today's sport industry.
- The Sport Administration major is a 39 credit hour major leading to a Bachelor of Science in Education.
- Students are required to meet a foreign language component. This may be satisfied with two semesters of American Sign Language (TAL 107 and TAL 207), or any intermediate course (200+), in a foreign language that is offered at UM.
- Students transferring from another college or university must have a cumulative GPA of 2.75 or above in order to be considered for admission to the major.
- Students are required to complete a 9-credit internship upon successful completion of **ALL** coursework for the Sport

Administration Major. Exceptions to this policy must be approved by the Undergraduate Program Director and the Assistant Dean.

- A Business minor is suggested to complement the Sport Administration major and provide a well-rounded comprehensive background to the Sport Administration field. A minor in any field is required.
- Students pursuing a degree in Sport Administration must receive a grade of B- or higher in KIN 201 in order to continue with the major.
- **Students will be allowed to retake a course once.**
- All 400-level courses are restricted to declared Sport Administration majors only.
- A degree in Sport Administration requires a major GPA of 2.5 or higher and an overall GPA of 2.3 or higher.
- KIN 306 and KIN 308 may not be taken in the same semester and must be taken during junior year.
- A grade of C or better is required for each course applied toward the major with the exception of KIN 201 which requires a grade of B- or higher in the course, as previously specified.

Courses for the Sport Administration Major

COS 211	Public Speaking	3
KIN 201	Introduction to Sport Administration	3
KIN 206	Sport Facilities and Event Management	3
KIN 212	Elements of Sports Psychology	3
KIN 302	Sport Marketing	3
KIN 306	Essential Leadership in Sports and the Professions	3
KIN 308	Ethical Decision Making in Sport and the Professions	3
KIN 401	Legal Aspects of Sport	3
KIN 403	Sport Information Management	3
KIN 405	Finance and Budget in Sport Administration	3
KIN 410	Problems and Issues in Sport Administration	3
KIN 497	Internship in Sport Administration	1-9
KIN 498	Seminar in Sport Administration	3

Minor in Exercise Physiology

KIN 155	Biological Bases for Physical Activity and Health	3
KIN 202	Applied Nutrition for Health and Performance	3
KIN 232	Basic Human Physiology	3
KIN 233	Basic Anatomy Lab	2
KIN 365	Principles of Exercise Prescription: Cardiovascular	3
Total Credit Hours		14

Minor in Sport Administration

KIN 201	Introduction to Sport Administration	3
Select four of the following:		12
KIN 206	Sport Facilities and Event Management	
KIN 212	Elements of Sports Psychology	
KIN 302	Sport Marketing	

KIN 306	Essential Leadership in Sports and the Professions	
or KIN 308	Ethical Decision Making in Sport and the Professions	
KIN 401	Legal Aspects of Sport	
KIN 403	Sport Information Management	
KIN 405	Finance and Budget in Sport Administration	
KIN 473	Sports Governance	
or KIN 490	Special Topics In Kinesiology And Sports Sciences	
Total Credit Hours		15

Minor in Sports Medicine

KIN 155	Biological Bases for Physical Activity and Health	3
KIN 184	Athletic and Sport Injuries	3
KIN 234	Functional Human Anatomy	3
KIN 235	Personal and Community Health	3
KIN 301	Athletic Injuries & Sport First Aid	3
Total Credit Hours		15

Please note that students majoring in Athletic Training are ineligible for the Sports Medicine minor.

Teaching and Learning

Dept. Code: TAL

The Department of Teaching and Learning offers a Bachelor of Science in Education Degree in **Elementary Education (K-6)/Exceptional Student Education (K-12)** with ESOL (English for Speakers of Other Languages, K-12) and Reading (K-12) endorsements.

In conjunction with the College of Arts and Sciences, the Department also offers majors in **Secondary Education** in English with ESOL endorsement, in Chemistry, in Biology, in Mathematics, and in Social Science (6-12). Students in Secondary Education programs are required to fulfill the general education requirements for the College of Arts and Sciences.

The Department offers two minors:

1. A traditional Education Minor consisting of 15 credit hours and
2. A Professional Training Option minor of 18 credit hours that fulfills the State of Florida "Professional Training Option" (PTO) for teaching in secondary-schools. Candidates must select a minor area of study in English, math, Secondary Science or Secondary Social studies or other areas of recognized certification. In order to obtain teaching credentials from the State of Florida, a PTO completer must successfully teach in an accredited school in Florida for one academic year.

Teacher Preparation Programs

One of the roles of the School of Education and Human Development is to serve as the professional school to conduct and coordinate programs for the preparation of teachers and other educational personnel at the University of Miami. Membership is held in the American Association of Colleges for Teacher Education, the National Association of State Directors of Teacher Education & Certification and in the Florida Association of Colleges for Teacher Educators. Teacher Preparation

Programs (TPP) are accredited by the Florida Department of Education for the preparation of elementary/exceptional student education teachers, secondary teachers, music teachers and other school service personnel.

Professional Development Schools

Bel-Aire Elementary, Henry S. West Laboratory Elementary, Sunset Elementary, Ponce de Leon Middle School and Booker T. Washington Senior High School are operated by Miami-Dade County Public Schools. These schools provide the most up-to-date teaching environments, both in terms of design and curriculum, in partnership with the University of Miami. Students are welcomed at these facilities for field experiences and student teaching, and both students and faculty have the opportunity to contribute to the high quality functioning of these professional development schools.

Teacher Preparation Programs

Teacher Preparation Programs/majors in Elementary/Exceptional Student Education and Secondary Education that lead to professional certification and applicable endorsements are approved by the Florida Department of Education (FLDOE). Please be advised that the State may implement new requirements for certification. **These requirements will be mandatory with or without notice in this bulletin.** The student is responsible for securing the application for certification and submitting the necessary documents and fees to the Florida Department of Education to obtain certification and endorsement. The DOE Certification Ombudsman in the School of Education and Human Development is available to assist with certification and re-certification matters.

Academic Policies

Admission

Selection for the Teaching Profession

The faculty of the School of Education and Human Development conceives its ultimate obligation to be to the children, adolescents, and adults who will be taught by teachers who have completed teacher preparation programs at the University. The quality of students admitted into the teacher education curriculum is as important as the skills, content, and concepts to be learned.

Most courses in the teacher education program require school site-based field experiences, culminating in a full-time 15-week internship. School districts require a criminal background check for field placement students and interns. Fingerprinting and FBI background check procedures are at the applicant's expense. Students with felony arrests may wish to consider these requirements carefully and, if necessary, seek advice from an advisor in the School before applying for admission to the program. Students without a valid social security number will not be eligible for placement in the school district.

The Office of Teacher Preparation and Accreditation will assist students through these requirements.

All students who wish to be considered for admission and/or retention in curricula leading to Florida Teacher Certification will be formally screened at certain points in their program of study with respect to the following criteria:

1. Admission to Teacher Candidacy (see requirements below).

2. Acceptable grade point averages (C or better for courses in the major).
3. Acceptable evaluations by University of Miami faculty.
4. Evaluations by clinical faculty at various field experience sites.
5. Satisfactory progress toward the completion of the Florida Educators Accomplished Practices requirement.

Students who receive a grade below C in their Student Teaching semester will not be recommended for teacher certification.

Note: The Assistant Dean of the School of Education & Human Development and the Director of Teacher Preparation & Accreditation jointly approve appeals to the above policies.

Requirements for Admission to Teacher Candidacy

1. Satisfactory performance on the **General Knowledge Test**.
2. Completion of 45 credit hours. In addition, transfer students must have a minimum of 9 credit hours of acceptable credit earned at the University of Miami.
3. A **2.5 GPA in education core** courses. No education classes lower than C.
4. A **2.5 GPA in the content area** teaching major (for secondary education majors).
5. Completion of the Course Advisement Plan (CAP).
6. Completion of at least one Field Experience requirement.
7. Further enrollment in teacher education course work offered by the School of Education and Human Development is contingent upon the student meeting requirements 1-6 above.
8. All students must successfully complete M-DCPS fingerprinting process. Forms are available in the Office of Undergraduate Academic Services.

NOTE: Appeals to the policies stated 1-6 above must be directed to the Assistant Dean of the School of Education and Human Development.

Please note: **Students may not register for any class above TAL 332 without admission to Teacher Candidacy.**

Requirements for Admission to Student Teaching

Students submit a formal application to the Office of Teacher Preparation and Accreditation for admission to Student Teaching. Application materials are available and are to be completed by students no later than October 15 (Fall semester) or March 15 (Spring semester).

The following requirements must be met:

1. Admission to a Teacher Preparation Program (Teacher Candidacy).
2. Completion of application for admission to Student Teaching, which includes an electronic submission to the Office of Teacher Preparation and Accreditation.
3. Approval of the Assistant Dean for Undergraduate Studies, the TAL Department Chair, and the Director of Teacher Preparation & Accreditation.
4. Recommendations from two members of the faculty familiar with the student's academic proficiency. One of these must be from a faculty member in the School of Education and Human Development.
5. Earned a minimum of 90 credit hours.

6. **Submission of FEAPs Portfolio via Live Text to the Director of Teacher Preparation & Accreditation. The FEAP Portfolio must include evidence at the indicator level in the first five FEAPs.**
7. All secondary majors must have completed approximately two-thirds of the courses in the teaching major and received departmental approval. Elementary/ESE majors must have completed **ALL** of the courses for the Elementary/ESE major.
8. Earned a minimum of 2.5 grade point average in core courses offered by the School of Education and Human Development.
9. A grade of C or better is required of each course applied to the major.
10. Earned a minimum of a 2.5 grade point average overall.
11. Successfully completed pre-internship field experiences.
12. Demonstrate satisfactory progress towards the completion of the Florida Educators Accomplished Practices requirement, as indicated in #6 above.
13. Passed the Florida General Knowledge Test.
14. Taken the Professional Education Test and the Subject Area Exam.

NOTE: A MAXIMUM OF 12 CREDIT HOURS MAY BE TAKEN DURING THE STUDENT TEACHING SEMESTER. No outside job may be held or additional classes taken during the Student Teaching semester.

NOTE: The Assistant Dean and the Director of Teacher Preparation & Accreditation, School of Education and Human Development must approve appeals to the above policies.

Students must complete the Florida Educator Accomplished Practices (FEAPs) and the P- 12 Student Impact Project requirements. Monitoring of FEAPs and progress made toward program completion in the Teacher Education program will occur at the following checkpoints:

1. TAL 306, and TAL 429 ; and application to student teaching
2. Students enrolled in all teacher-education programs will submit complete portfolios at the end of TAL 480/TAL 580.

In addition, students enrolled in all teacher-education programs will submit e-portfolios via Live Text as follows

- TAL 306 Field Experience Seminar I (Must submit an artifact in order to receive a passing grade).
- TAL 429 Field Experience Seminar II (Must submit an artifact in order to receive a passing grade).
- Elementary/ESE major will submit a portfolio artifact through LiveText during (or at the latest) upon completion of TAL 420 and TAL 426;
- Secondary Education major will submit a portfolio artifact through LiveText during or (at the latest) upon completion of TAL 540.
- Music Education major will submit a portfolio artifact through LiveText during or (at the latest) upon completion of TAL 506.

Seniors are required to participate in the General Education Assessment prior to graduation as a part of the SACS review process.

Licensure/Certification Information

Only students who have completed all requirements for any State approved degree or certificate program will have their transcripts stamped as meeting State approved requirements for certification as well as appropriate endorsements. Students must meet requirements of the School of Education and Human Development as well as the college or

school issuing the second major. Evidence of successful completion of all twelve Florida Educator Accomplished Practices is required to receive the FLDOE stamp on the graduate’s final transcript.

Transcript stamp is contingent upon the student taking at least half of the coursework in teacher education at the University of Miami, including the Student Teaching component. At least half of the coursework in the students teaching content area(s) must be taken at the University of Miami in the School of Education and Human Development, Frost School of Music, or other UM schools or colleges as determined by the program in which the student is enrolled.

Department's Honor Code, Ethics FEAP and Plagiarism Policy

At a minimum, students will receive an automatic FAIL for any assignment that shows even minimal evidence of any of the violations listed in the Student Handbook such as cheating, plagiarism, misrepresentation, collusion, falsification of data and documents, or fabrication of findings. The student will not be allowed to improve that grade and the Ethics FEAP will be marked as permanently failed in the student’s portfolio record.

The professor of record will have absolute discretion to judge the severity of an offense involving plagiarism and/pr The Honor Code, including extending the penalty to an F in the course.

Students will receive an automatic FAIL on any **assignment** or **action** which shows a violation to the **Ethics FEAP**. Either the Chair, Director of Accreditation or the Dean’s office may refer a student to the University Honors Council. Consequence for violating the Honor Code include disciplinary warning, disciplinary probation, suspension or expulsion from the university.

For further information, address all inquiries to:

Requirements for Graduation

Bachelor of Science in Education

I. Candidates for B.S.Ed. in the School of Education and Human Development must complete the credit hours of work and achieve the quality point average specified for students in the University at large as stated in the section ACADEMIC REGULATIONS AND PROCEDURES (p. 13), subject to regulations concerning the major specified in departmental and program sections of this Bulletin.

Exempted is interpreted to refer exclusively to those exemptions provided under the following headings:

1. Advanced Standing and Placement (Credit Hour Granted);
2. Credit by Examination;
3. Advanced Placement (by proficiency examination);
4. Statement of Foreign Language Requirements;

II. Students must pass the Professional Education, General Knowledge and Subject Area tests of the Florida Teacher Certification Examination (FTCE).

III. Students must complete the Florida Educator Accomplished Practices (FEAPs) and the P- 12 Student Impact Project requirements. Monitoring of FEAPs and progress made toward program completion in the Teacher Education program will occur at the following checkpoints: Students enrolled in all teacher-education programs will submit complete portfolios at

1. application to student teaching and
2. at the end of TAL 480/TAL 580.

In addition, students enrolled in all teacher-education programs will submit e-portfolios via Live Text as follows

- TAL 306 Field Experience Seminar I (Must submit an artifact in order to receive a passing grade).
- TAL 429 Field Experience Seminar II (Must submit an artifact in order to receive a passing grade).
- Elementary/ESE major will submit a portfolio artifact through LiveText during (or at the latest) upon completion of TAL 420 and TAL 426;
- Secondary Education major will submit a portfolio artifact through LiveText during or (at the latest) upon completion of TAL 540.
- Music Education major will submit a portfolio artifact through LiveText during or (at the latest) upon completion of TAL 506.

IV. Except where a required course is one designated to correct a deficiency in his/her college preparation, the student may apply the credit hours of any required course from which he is exempted toward the credit hours specified for that subject as a general requirement for graduation and, upon payment of a recording fee, toward the 120 credit hours required for graduation. (See Departmental Proficiency Examinations.) An exemption may be granted for ENG 105, but these credit hours may not be applied toward the 120 credit hours required for graduation.

V. Credit Only

Only free electives may be taken under this option. Courses which satisfy the major, minor, the distributions of the School, the General Education Requirements of the University or any course for which a C or better is required may not be taken for credit only.

VI. Transferred credit hour may not count toward the completion of a major without the written approval of the Assistant Dean of the School of Education and Human Development.

VII. Required Areas of Study

1. **English Composition 3 – 6 credit hours**

Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106 or its equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy the ENG 105/ENG 106 requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour in, ENG 105. Appropriate scores on other tests determined by the Department of English may earn a student exemption from, but not credit hour in, ENG 105. Courses satisfying the English Composition requirement

may not be used to fulfill the Writing Across the Curriculum Required Area of Study.

2. **Mathematics**

B.S.Ed. degree candidates must complete MTH 113 or higher. Students who do not place directly into MTH 113 must enroll in either MTH 099 or MTH 101 based on results of placement tests.

3. **Foreign Languages (not applicable)**

Areas of Knowledge and Cognate Requirements

The University of Miami's General Education requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. All new students will fulfill the General Education requirements by selecting a **Cognate**, which is a cluster of courses arranged by their content, field and interest.

- A cognate is a group of at least three related courses for at least 9 credit hours.
- The courses in a cognate are related in a topical, thematic, interdisciplinary, sequential, or other such fashion, so that completion of a cognate provides coherent depth of knowledge in the area.
- Student must take three cognates to fulfill the Areas of Knowledge requirement,
 - one in the **Arts & Humanities (A&H)**,
 - one in **People & Society (P&S)**, and
 - one in **Science, Technology, Engineering & Mathematics (STEM)**.
- Each cognate has course options that allow students to complete the cognate in ways that meet their individual interests, while staying within the coherent focus of the cognate.
- In addition to the cognates that have been designed by faculty, each major and minor fulfills the cognate requirement in one area.
 - Exercise Physiology and Athletic Training majors will fulfill the **STEM** cognate.
 - Sport Administration, Human and Social Development, and Elementary/ESE majors will fulfill the **P&S** cognate.
- An approved list of cognates can be found on the University of Miami website.

VIII. Writing

Every student majoring in Teaching and Learning, will meet the Advanced Writing and Communication Requirement upon fulfillment of their major courses. These courses have a prerequisite requirement of ENG 105 and ENG 106 and will be identified as either writing intensive or as an oral/verbal communication proficiency course or both. Digital competency for both written and oral competencies will be assessed. Writing intensive courses require a minimum of 2500 written words; assignments will be assessed for analytical ability, synthesis of information, grammar, content and style. Courses designated as an oral/verbal proficiency class will provide students an opportunity to demonstrate their presentation skills using accurate standard English structure and syntax, non-verbal cues and gestures, as well as audience appropriate language. Courses for the TAL Major which meet the Advanced Writing and Communication Skills Requirement are **TAL 332** and **TAL 426**.

IX. Majors

Every candidate for the B.S.Ed. degree in the Department of Teaching and Learning must choose a major in Elementary/Exceptional Student Education (ESE) with ESOL and Reading endorsements.

X. Minors

Every candidate for a B.S. Ed. in Elementary Education/ESE must select a minor outside of the department of TAL.

XI. Electives

Electives may be chosen from any courses offered by the University. The student should consult an advisor before selecting elective courses. At least 6 credit hours must be at the 300 level or above. Students may select elective course credits beyond the major, minor and general education requirements to complete a total of 120 credits required for the degree.

Note: Common prerequisites and total length for state-approved teacher education programs are subject to revision based on legislative and State of Florida Department of Education rule changes.

XII. Seniors are required to participate in the General Education Assessment prior to graduation as a part of the SACS review process.

Please note: Students may not register for any class above TAL 332 without admission to Teacher Candidacy. Please see the requirements for Teacher Candidacy on the TAL Department page in the University Bulletin.

Please note: Students are strongly encouraged to register for TAL 203 and TAL 324.

B.S.E.D. in Secondary Education

The Department of Teaching and Learning offers a major in Secondary Education (6-12). Certification is offered in the general areas of:

- English/ESOL Endorsement; (Major code- **SECE**)
- Mathematics (Major code- **SECM**)
- Sciences (Biology, Chemistry) (Major code **SECS**)
- Social Science (Economics, Geography, History, International Studies, or Political Science) (Major code **SECH**)

Each student should complete a major from the appropriate department in the College of Arts and Sciences and a second major in the Department of Teaching and Learning.

The requirements for a major leading to secondary certification include:

- A grade of C or higher in all Education courses and a minimum of 2.5 GPA in both the Secondary Education major and the subject area of discipline. An overall 2.5 GPA is required.
- MDC-PS fingerprinting and FBI background check
- Admission to Teacher Candidacy
- Successful completion of the Florida Teacher Certification Exams including
 - The General Knowledge Exam (all 4 sections)- Required for Teacher Candidacy
 - The Professional Education Exam
 - The Subject Area Exam

- Successful submission of the FEAP e-portfolio submission through Live Text
- Successful completion of the following SEC courses:

1. TAL 101	Social and Technological Foundations of Education.	3
TAL 103	Psychological Foundations of Education (for Secondary English majors only)	3
TAL 305	Classroom and Behavior Management	3
TAL 306	Field Experience Seminar I	0
TAL 330	Introduction to the Education of Exceptional Individuals	3
TAL 404	Content Area Literacy in the Secondary Classroom	3
TAL 429	Field Experience Seminar li	0
TAL 434	Specialized Instructional Strategies/ Transition	3
TAL 506	Issues and Strategies for ESOL ^{for all majors} except Secondary English	3
TAL 540	Instruction and Assessment in the Secondary Shcool.	3
TAL 572	Student Teaching in the Secondary School.	6-9
TAL 580	Seminar on Teaching	1-3
	Select one of the following as appropriate for the subject area:	3
TAL 541	Instruction in Secondary English.	
TAL 542	Instruction In Secondary Mathematics	
TAL 543	Instruction In Secondary Science	
TAL 544	Instruction In Secondary Social Studies	
	English majors take the following courses in lieu of TAL 506	
TAL 308	Language Development for Linguistically and Culturally Diverse Children	3
TAL 428	ESOL Curriculum and Methods and Assessments (for Secondary English majors only)	3
Total Credit Hours		40-45

Please note: Students may not register for classes above TAL 404 without admission to Teacher Candidacy.

Minor in Education

The Department of Teaching and Learning offers two minors.

Education Minor (not for certification)

- 15 credit hours in TAL course work.
- TAL 101 and TAL 103 are required.
- Two courses must be taken at the 300 level or higher.
- All courses must be passed with a C or high with a minimum of 2.5 GPA for the minor.
- It is strongly recommended that students enroll in courses for this minor which do not include Field Experience. Please see an advisor for a list of those courses.

- This minor does not lead to teaching credentials.

Professional Training Option Minor

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. Please be advised that students seeking the PTO must be majoring or minoring in a teachable subject.

- Fingerprinting and Background check completed with the MDC-PS Office
- 18 credit hours.
- All courses must be passed with a C or high with a minimum of 2.5 GPA for the minor.
- Students must pass the Florida Teacher Certification Exams, (FTCE), prior to graduation in order to be eligible for the State of Florida Stamp applied to transcripts.
- Students must pass all 4 sections of the General Knowledge Exam (GKT), part of the FTCE, in order to be eligible for 400 level courses or higher.

COURSES FOR THE PTO MINOR

TAL 101	Social and Technological Foundations of Education.	3
TAL 103	Psychological Foundations of Education	3
TAL 305	Classroom and Behavior Management	3
TAL 404	Content Area Literacy in the Secondary Classroom	3
TAL 540	Instruction and Assessment in the Secondary Shcool. (Select one course from the following list as appropriate for the subject area)	3
Select one course from the following list as appropriate for the subject area		
TAL 506	Issues and Strategies for ESOL	3
TAL 524	Education and the Arts	3
TAL 541	Instruction in Secondary English.	2-3
TAL 542	Instruction In Secondary Mathematics	1-3
TAL 543	Instruction In Secondary Science	1-3
TAL 544	Instruction In Secondary Social Studies	1-3

Professional Training Option Certificate

The Professional Training Option (PTO) is a Florida Department of Education approved pathway for non-education majors to complete the Professional Education component, one of the requirements to become a certified teacher in the State of Florida. Please be advised that students seeking the PTO must be majoring in a teachable area in order to participate in the program.

The PTO minor consists of 17-18 credit hours passed with a C or higher with an overall GPA of 2.5 or higher. Upon completion of the program courses, participants will receive a Certificate of Completion. UM transcripts will indicate that the student has completed a Florida State-approved PTO program. Program completers will be eligible to apply for a 3-year Temporary Teaching Certificate in the State of Florida. There is

a one-year of successful teaching requirement in an accredited school in Florida in order to apply for a Professional Teaching Certificate.

The required courses for the PTO minor are:

TAL 101	Social and Technological Foundations of Education.	3
TAL 103	Psychological Foundations of Education	3
TAL 305	Classroom and Behavior Management	3
TAL 404	Content Area Literacy in the Secondary Classroom	3
TAL 540	Instruction and Assessment in the Secondary Shcool.	3
Select one of the following as appropriate for the subject area and approved by the advisor:		3
TAL 506	Issues and Strategies for ESOL	
TAL 524	Education and the Arts	
TAL 541	Instruction in Secondary English.	
TAL 542	Instruction In Secondary Mathematics	
TAL 543	Instruction In Secondary Science	
TAL 544	Instruction In Secondary Social Studies	
Total Credit Hours		18

Engineering

<http://www.miami.edu/engineering>

Mission

The College of Engineering is committed to educating tomorrow's technology leaders for career success.

The objective of the College of Engineering is to serve society by offering high quality educational programs in the professional areas that it covers, and by performing research and community service, with high professional standards. The College is dedicated to educating engineers to deal with the major issues of society over the next generation - enhancing competitiveness, advancing health care, coming into harmony with the environment, utilizing technology for humankind's benefit, and supporting a sophisticated infrastructure. The goal of the faculty is to prepare students to be employed effectively in manufacturing, consulting, construction, information technology, service industries, and those related to the medical industry and health care, in roles involving planning, design and implementation at all levels of decision making. Students are broadly prepared in technical, leadership, and management skills. Student development accrues both inside and outside the classroom, with input from faculty, employers, alumni, and other students. They are made acutely aware of environmental and international perspectives. Professional competence in the traditional sense is complemented by a broad capability to function in society. The College places great emphasis on providing students with a learning experience which will enable them to develop productive careers while creating engineering solutions to problems of our society. Learning is centered around real life experiences, which involve an understanding of science, mathematics, social values, and aesthetics, to produce economical solutions to physical problems which society encounters. Protection and enhancement of the environment is stressed at all levels, and emphasis is placed on the creative application of knowledge which will improve the quality of life.

Department and Programs

The College of Engineering has five departments -

- Biomedical Engineering,
- Civil, Architectural, and Environmental Engineering,
- Electrical and Computer Engineering,
- Industrial Engineering, and
- Mechanical and Aerospace Engineering

offering curricula leading to Bachelor of Science degrees in the following fields:

- Aerospace Engineering,
- Architectural Engineering,
- Biomedical Engineering,
- Civil Engineering,
- Computer Engineering,
- Electrical Engineering,
- Engineering Science,
- Environmental Engineering,
- Industrial Engineering, and

- Mechanical Engineering.

Interdisciplinary areas of study, areas of specialization within departments, and study in two entirely different areas are available through options, concentrations and dual degree programs.

Accreditation

The programs in Aerospace Engineering, Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering are accredited by the

Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (<http://www.abet.org>) (ABET)
415 North Charles Street
Baltimore, MD 21201
telephone: 410-347-7700

The program in Engineering Science is not accredited.

The College offers graduate programs leading to degrees both in the traditional and interdisciplinary areas of study. Programs leading to the M.S. degree may include specialization in the following areas of study: Architectural Engineering, Biomedical Engineering, Civil Engineering, Electrical and Computer Engineering, Engineering Management, Environmental Engineering, Industrial Engineering, Mechanical Engineering, Medical Informatics, Structural Engineering, and Thermal and Fluid Sciences. A joint M.S.I.E./M.B.A. program and a M.S. program in Management of Technology are offered in conjunction with the School of Business Administration, a M.S. in Environmental Health and Safety in conjunction with the School of Medicine and a M.S. in Occupational Health and Safety in conjunction with the School of Medicine.

Combined BS/MS Program

The College offers a five-year Bachelor of Science and Master of Science BS/MS degree program in Architectural Engineering, Biomedical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Industrial Engineering, and Mechanical Engineering. This program is specifically designed for those students who want to pursue their graduate study as they are completing their undergraduate study. The special conditions and processes for the five-year BS/MS Program are as follows:

Requirements

You must be an undergraduate student in the College of Engineering (CoE). A master's degree is considered the first professional degree in engineering. The Admission Committee will carefully review academic credentials for admission into our M.S. program. Students should discuss the program and possibility of entering with an academic adviser. Completed applications are due prior to the beginning of the final exams in your junior year.

Application Process

Get the application form (It is different for US students and International students) from the CoE Office of Admission, fill it out and then return it to the same office. The application fee is waived for currently enrolled students in the CoE.

Take the GRE Examination before the end of your senior year and attain a combined score of more than 1000 on the Verbal and Quantitative portions.

Financial Implications

Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree. For further information contact the University of Miami Financial Aid Office.

Once admitted into BS-MS program

In your senior year when you have a full time undergraduate status, you may take a maximum of twelve (12) graduate credit hours (a maximum of six (6) credit hours per semester). In order to register for these classes, you must complete and submit the UM Graduate School "Application for Undergraduate to Take Graduate Course" special form.

During your last one or two semesters, when you are taking graduate course work only, register as a graduate student.

A student wishing to withdraw from the BS/MS Program without the MS degree must complete all the requirements for the BS degree.

To qualify for the MS degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA in the credit hours applied toward the MS degree.

The student is awarded both the BS and MS degrees at the end of the fifth year when all degree requirements are satisfied.

The Doctor of Philosophy Degree is currently offered in the area of:

- Biomedical Engineering,
- Civil Engineering,
- Electrical and Computer Engineering,
- Ergonomics and Human Factors,
- Industrial Engineering, and
- Mechanical Engineering.

The Ph.D. programs in Interdepartmental Graduate Studies permit, with approval of the Graduate Council, highly qualified students to pursue a privileged individualized program which cuts across disciplinary lines.

The Bulletin of the Graduate School (p. 498) presents more detailed information on these graduate programs.

The College is primarily housed in the J. Neville McArthur Building. Completed in 1959 and renovated in 1984, this attractive building is the gift of the late J. Neville McArthur, who was a member of the Board of Trustees and a prominent citizen and dairyman. The Engineering Annex is also a gift of the McArthur family. Students in the College of Engineering come from all parts of the United States and from many nations throughout the world, comprising one of the most diverse and cosmopolitan engineering student bodies in the country.

Engineering Laboratories

The College of Engineering maintains a variety of well-equipped laboratories adequate for undergraduate instruction and providing for graduate and sponsored research.

Computer Laboratory

- Clarke Computational Laboratory
- Computer Graphics Laboratory

Biomedical Engineering Laboratories

- Biomedical Design and Instrumentation Laboratory
- Biomaterials/Circulatory Assist Device Laboratory
- Biomedical Atomic Force Microscopy Laboratory
- Biomedical Optics Laboratory
- Diabetes Tissue Engineering Laboratory
- Joint Bioengineering and Endourology Laboratory
- Measurements Laboratory
- Medical Imaging Laboratory
- Neuroprosthetics Research Group
- Neurosensory Engineering Laboratory
- Stem Cell and Mechanobiology Laboratory
- Tissue Biomechanics Laboratory
- Tissue Engineering Laboratory

Civil, Architectural and Environmental Engineering Laboratories

- Environmental Engineering Laboratory
- Geotechnical Engineering Laboratory
- Mechanics of Solids and Materials Laboratory
- Structures and Materials Laboratory
- Sustainable Building Systems Laboratory

Electrical and Computer Engineering Laboratories

- Electronics Laboratory
- Wireless Communications Laboratory
- Digital Signal Processing Laboratory
- Electrical Machinery Laboratory
- Digital Design Laboratory
- Microprocessor Laboratory
- Photonics and Micro-Devices Laboratory
- Distributed Decision Environments Laboratory
- Underwater Imaging Laboratory
- Networks Laboratory
- Embedded Systems Laboratory
- Computer Vision and Image Processing Laboratory
- Information Technology Laboratory
- Multimedia Laboratory
- Digital Audio and Speech Processing Laboratory
- Optics and Fiber Communications Laboratory
- ECE Computer Laboratory
- Nanophotonics and Devices Laboratory
- MEMS and VLSI Laboratory

Industrial Engineering Laboratories

- Computer Integrated Manufacturing Laboratory
- Industrial Hygiene Laboratory

- Biomechanics and Gait Laboratory
- Human Factors and Aging Research Laboratory
- Productivity Research Laboratory
- Work Design Laboratory
- Work Physiology Laboratory
- Systems and Operations Research Laboratory
- Industrial Ventilation Laboratory
- Robotics Laboratory

Mechanical and Aerospace Engineering Laboratories

- Aerospace Materials Simulation Laboratory
- Aerodynamics and Computational Fluid Dynamics Laboratory
- Design and Manufacturing Laboratory
- Fuel Cells Laboratory
- Thermo-Fluid Mechanics Laboratory
- Integrated Nano-Bio-Systems Laboratory
- Internal Combustion Laboratory
- Materials Laboratory
- Materials Modeling Laboratory
- Measurements Laboratory
- Multifunctional Composite Materials Laboratory
- Optimization and Reliability Laboratory
- Robotics and Intelligent Systems Engineering Laboratory
- Stress Analysis Laboratory
- Tissue Biomechanics Laboratory
- Wind Tunnel Laboratory

Academic Policies

Admission

Admission to the College of Engineering is covered under the section on Admission (p. 28) to the University in the General Information section of this Bulletin. Algebra, trigonometry, analytic geometry, chemistry, computer literacy, and physics are high school subjects that are appropriate for students planning on entering the College.

The academic work of each transfer student will be evaluated on an individual basis, and the student will be enrolled in the College at an appropriate level.

Requirements for Graduation

The College believes that emphasis should be placed on the student's ultimate level of attainment in selected subject areas. For those students whose preparation is advanced beyond that of the average secondary school graduate, the University provides proficiency examinations and schedules the students for more advanced work. Graduation for these students may be accelerated. For those students whose secondary school preparation has not provided an adequate background, the University offers preparatory courses. Graduation for these students may be delayed accordingly.

The student's program of study is selected jointly with an adviser, with special attention to the individual student's needs. Flexibility is ordinarily possible within the framework of sound education in the essential fundamentals and within the development of depth in selected fields of design and analysis. An examination of a typical curriculum given under

the various department sections of this Bulletin shows that there is a strong common core of studies. Therefore, students uncertain of their ultimate field of specialization retain a high degree of mobility to enable them to transfer from one curriculum to another.

Each student must demonstrate upon admission an adequate preparation in the necessary skills of reading, writing, and mathematics. Placement test scores will indicate which, if any, supplementary courses must be taken the first semester. Although these courses are recorded for University credit hour, the student must take the full curriculum, as listed, in addition to these courses. Students not prepared in these areas are advised to make every effort to correct deficiencies before the first semester.

Completion of any of the prescribed curricula, except Engineering Science, with an overall grade point average of at least 2.0 (C) in all course work, to include all accepted work from other institution(s), is the basic requirement for graduation in the College. An average of C also must be attained in all work attempted at the University of Miami and the professional studies. The Engineering Science curriculum, because of its special purpose, has a higher requirement, i.e., a grade point average of 3.0 (B).

The requirements for graduation as specified by each Department and Program reflect the general education requirements of the University of Miami and the requirements of the appropriate accrediting agencies. The curricula contain required courses and elective courses. No course required for graduation may be taken under the credit-no credit (Credit-Only) option.

Students are expected to make satisfactory progress toward graduation by meeting the criteria established above. Whenever a student fails to demonstrate positive academic progress, he/she may be placed on academic probation or dismissed by the College of Engineering Scholastic Standards and Advising (SSA) Committee.

General Educational Requirements

Areas of Knowledge

Students at the College of Engineering fulfill the Areas of Knowledge requirement by completing three *cognates*, one from each of the three areas of the university curriculum:

- Arts & Humanities;
- People & Society; and
- Science, Technology, Engineering & Mathematics.

For students in the College of Engineering, their engineering major will count as a cognate in Science, Technology, Engineering & Mathematics. These students have to complete a cognate in People & Society and Arts & Humanities.

A cognate is a group of at least three courses for at least nine credit hours, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate. While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed

on the students' transcripts, thus certifying their depth of knowledge in those areas.

The university offers a large number and range of cognates. All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate's RAU.

Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. These requirements are specified under each department.

The student's official records are maintained by the Office of Enrollment Services. It is the student's obligation to take the initiative to assure that all requirements are being met in conformity with his/her own graduation plans.

Degree Programs

Dual Majors

Dual majors are offered for engineering students with strong interest in related fields of study such as Physics or Mathematics. In order to obtain a dual major in one of these areas, the student will have to obtain, in parallel, a degree in one of the engineering programs, plus additional course work approved by the dual majors department. Further information on this dual major program may be obtained from the Dean's Office of the College.

Minors

Minors are offered by the College of Engineering. The departments of:

- Civil, Architectural, and Environmental Engineering,
- Electrical and Computer Engineering,
- Industrial Engineering, and
- Mechanical Engineering

offer minors with various areas of specialization. Details of each area of concentration and its requirements may be found under each departmental listing.

Engineering students can earn a minor offered by any other College/School within the University of Miami, including the College of Engineering. In cases where the major degree requirements satisfy some of the requirements for the minor, at least six credit hours beyond the major degree requirements must be taken in the minor subject area to earn a minor. Minors in Engineering require a minimum GPA of 2.0 in the courses required for the minor.

Departmental Honors Program

A student in the College of Engineering may graduate with Departmental Honors noted upon his/her diploma and transcript upon fulfillment of the following requirements:

1. Completion of at least 18 credit hours of course work in honors courses and/or in courses at the 500 level, including 6 credit hours in independent study, senior thesis, or designated advanced or special

honors courses specified by the department, with grades of at least B in these 6 credit hours.

2. Attainment of at least a 3.4 overall grade point average. Transfer students must also attain at least a 3.4 grade point average in all work taken at the University of Miami.
3. Attainment of at least a 3.5 average in the departmental major courses.
4. A written request from the student to the departmental faculty during his/her semester of expected graduation stating the desire to graduate with Departmental Honors, and specifying those courses taken in compliance with section (A) above.

Certificate Programs in Engineering

In cooperation with the University's School of Continuing Studies, the College of Engineering offers practicing engineers advanced or specialized training without having to meet the stringent entrance requirements of the Graduate School. Persons holding Bachelor's degrees, registered as Professional Engineers, or possessing equivalent qualifications can be granted Certificates of Proficiency by the University after completing fifteen credit hours of course work in a specified field of engineering. Study programs are arranged on an individual basis by each student and his/her advisor. Detailed information on Certificate Programs can be requested from the Office of the Dean of Engineering.

The Internship Cooperative Program

The Cooperative Program takes its name from the close cooperation that exists between the College and participating employers. This arrangement attempts to insure that each student's academic and work experience will integrate and contribute significantly to his/her overall growth and professional development. Interviews and screening by both the employer and Cooperative Program personnel attempt to match the needs of the employer carefully with the interests and capability of the student.

Advantages to the Student

1. Offers on-the-job experience to supplement the academic degree program.
2. Offers potential long term career employment with the Cooperative Program employer.
3. The experience obtained makes the student, upon graduation, potentially much more valuable to any future employer. Upon completion of an appropriate amount and level of experience, graduation in the Cooperative Program may be recognized by a special seal on the student's diploma.
4. Helps the student to verify whether or not his/her career or specialty choice is correct.
5. Tends to increase motivation and to make academic studies more meaningful.
6. Earnings from Cooperative Program employment can cover a significant portion of the student's college expenses.
7. Certain work experience may shorten the experience requirements, after graduation, for eligibility for professional registration.
8. Helps to develop the students understanding of human relations and the lifelong need of learning to balance appropriately the demands on ones time of multiple duties such as studying, employment, daily necessities, family obligations, etc.

Advantages to the Employer

1. Offers an opportunity to recruit and screen potential employees in the fields of engineering.
2. The Cooperative Program maintains an up-to-date roster of available undergraduate and graduate students, many with previous experience. This roster offers employers means of obtaining employees to meet fluctuating work loads, on relatively short notice.
3. Students in the Cooperative Program can provide good company public relations with their classmates.
4. Participation in a Cooperative Program serves the profession by providing opportunities for many capable and well deserving young persons to attend a University, who otherwise might lack the financial ability or motivation to attend.

Types of Cooperative Program Arrangements

Continuous Work-Study

An arrangement involving a combination of part-time employment (15 or more hours per week) and a credit hour academic load which is appropriately reduced from the normal full-time load to balance the employment duties. Full-time employment may be undertaken during the summer period. Two students may be used during the year to share the hours of a full-time position (20 hours each student). In some instances, an individual student will hold a full-time position and carry a light academic load in evening and/or early morning classes.

Alternating Work-Study

An arrangement involving two students alternating full-time employment and full-time study. Students alternate positions of work and study at the end of each semester (including the summer), and thereby provide the equivalent employee time of a full-time position year-round.

Student Eligibility for the Program

University of Miami students enrolled in the College of Engineering are eligible to enter the Cooperative Program. Initial entry into the Program is limited to superior students. Normally, work assignments are not given until the equivalent of one or two semesters of full-time academic work is completed. Currently, most students in the Program are under continuous work-study arrangements.

Study Abroad Programs

The College of Engineering encourages its students to take advantage of one of the University of Miami's numerous study abroad options in Latin America, Europe, Asia, Australia and the Middle East. Of particular interest to Engineering students are the following: internships (unpaid and paid) in Spain, England, France, Argentina, Colombia, Chile, and Australia in which professional work experience is carried out abroad; course work at Engineering schools abroad for a semester or an academic year; summer programs in intensive Language instruction, Humanities and Social Sciences abroad. The cost of attending these programs is equivalent to University of Miami tuition and fees. Almost all University of Miami financial aid is granted. With prior approval and detailed curriculum advice, courses taken abroad will apply towards graduation.

The Management of Technology Supplemental Program

The objective of this program is to educate engineers in how to exploit their technological knowledge. This is a vital, but often neglected, link in achieving competitiveness in the global marketplace. The basic premise motivating this approach is the recognition that in today's world, technology is the backbone of the business enterprise system and that wealth can only be created through production of goods and services. This program will educate engineers in a multitude of subjects bridging the gap between product technology, production technology and the marketplace, which is the ultimate customer of engineering contributions.

The program consists of four courses:

1. Quality in Design of Products and Production Systems
2. Entrepreneurship for Engineers
3. Production Systems Design
4. Management of Technology.

A project is required at the end of the program, but is threaded throughout the program starting with the first course. Upon completion of the program, the student will receive a special certificate of completion. This program is available to all qualified students in all departments of the College of Engineering.

Admission to the Program

Admission to this supplemental program will be by application submitted by the candidate or by nomination by an advisor or department chair. All applications will be reviewed by a standing committee. Students must meet the prerequisite of each course before enrolling in it.

Requirements for the Certificate

The program is an add-on to existing curriculum. Students must complete all courses designated in order to qualify for the certificate. A notation will be made on the student's transcript recognizing their completion of the special program. No designation will be made on the diploma.

Course Sequence

Courses are recommended to be taken in the sequence indicated above.

Team Work

Students will be encouraged to work on projects in teams. Multidisciplinary teams will also be encouraged.

Foote Fellows

Foote Fellows in CoE

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows in the College of Engineering are exempt from the Cognates Program of General Education requirements within the curricular framework of their major. Within the curricular framework of their majors, Foote Fellows enjoy unmatched freedom and flexibility

to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated adviser helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Biomedical Engineering

<http://www.miami.edu/bme>

Dept. Code: BME

Introduction

Biomedical engineering is a multidisciplinary field at the interface of traditional engineering disciplines and biological sciences. Biomedical engineers apply engineering principles and techniques to solve problems in medicine and biology. Applications include the design of medical devices, implants and prostheses, the development of new biomaterials or drug delivery systems, cellular or tissue engineering, medical applications of optics and lasers, or the acquisition and interpretation of physiological signals and medical images for diagnostic and monitoring purposes. Biomedical engineering has an impact on virtually all fields of medicine.

The Department of Biomedical Engineering at the University of Miami was formally established in 1979 as a graduate program. The four-year undergraduate program leading to the B.S degree in BME was created approximately ten years later to address the growing importance of the field and the need for professional biomedical engineers. The undergraduate BME program at the University of Miami was the first of its kind in Florida, with the first class of B.S.B.E. students graduating in 1993. It has been Accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board of Engineering and Technology (ABET) since 1997. The Department of Biomedical Engineering also offers graduate courses leading to the Master of Science and Doctor of Philosophy degrees. In addition, qualified undergraduate students may apply for the combined BS/MS program (details are provided following the curricula for the BS degrees).

Graduates of the biomedical engineering undergraduate program find employment in industry or continue their studies either in graduate school or in a professional school in medicine and other health-related disciplines (such as dentistry, optometry, orthotics), law or business.

Some special features of the program include the small class size and open-door policy of the faculty, which facilitates student-faculty interaction. The Department has very strong ties with the University of Miami Miller School of Medicine. Undergraduate students have a wide range of research and internship opportunities in some of the leading research laboratories in their respective field. The Department strongly encourages undergraduate student participation in research and professional activities.

Mission Statement

The mission of the biomedical engineering program is to prepare students to become knowledgeable and skilled engineers with an understanding of the ethical and other professional aspects of biomedical engineering. Design skills and an ability to work both independently and as part of a team are emphasized.

Educational Objectives

The educational objectives of the program are to graduate engineers who will apply their knowledge, technical skills, and ability to solve problems at the interface of engineering and life sciences. Within a few years after graduation they will be:

1. Working as professionals in biomedical engineering or related fields.
2. Continuing their education to advance their careers through professional development activities or through the pursuit of advanced degrees.

Program Description

Curriculum

The two educational objectives of the Biomedical Engineering program are achieved via the implementation of a curriculum with four parallel concentrations which include a common core and concentration-specific courses. The core curriculum is designed to provide a broad foundation in the basic sciences and in engineering. Concentration-specific courses provide the depth required to be proficient engineers.

The four concentrations are:

- Electrical (E),
- Mechanical (M),
- Biomaterials and Tissue (B) and
- Premedical (P).

The Premed concentration provides training in biomedical engineering and allows for students to take courses that are commonly required for admission to medical school. The Biomaterials and Tissue concentration provides training in the fundamental aspects of cell and tissue biology, design of biomaterial scaffolds and implants, and the application of tissue engineered constructs toward repair, restoration, and regeneration of damaged cells, tissues and organs. The Electrical concentration provides training in the fundamental aspects of electronics and signal processing, design of instrumentation, sensors, imaging systems and neural interfaces, and the application of biomedical technology toward measurement, control and rehabilitation of tissue and organ function. The Mechanical concentration provides training in the fundamental aspects of solid, fluid, and computational mechanics, design and modeling of biomedical devices such as artificial implants, and prostheses and the application of biomechanical principles toward assessment and

restoration of tissue and organ function. The curriculum is designed to provide all graduates with the analytical and design skills required to formulate and solve problems at the interface of engineering and life sciences. Outstanding students are prepared for graduate studies or medical school.

Required courses in the humanities and social sciences provide students with an awareness of social, ethical and environmental issues related to their profession. The curriculum has been carefully designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to complete the upper level course requirements successfully. The curriculum includes two or three technical electives selected by the student based on their individual professional interests.

The curriculum places a special emphasis on written and oral communication skills. Many of the Biomedical Engineering courses, as well as the capstone design project, include a requirement for a written term paper and oral presentation on a course-related topic related to the class.

Advanced Writing and Communication Skills

Biomedical Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Biomedical Engineering students acquire Advanced Writing and Communication skills in the following core courses:

BME 111	Introduction to Engineering I	3
BME 112	Introduction to Engineering II	3
BME 330	Foundations of Medical Imaging	3
BME 335	Biomaterials	3
BME 402	Senior Design I	2
BME 403	Senior Design II	1
BME 440	Biomedical Measurements	4
BME 450	Biomedical Transport Phenomena	3
BME 480	Biomedical Instrumentation	3

Design Experience

The biomedical engineering design experience is integrated in the curriculum throughout the four years of study, starting in the freshman year with the Introduction to Biomedical Engineering course. Each semester includes classroom or laboratory courses which place a heavy emphasis on theoretical and practical biomedical engineering design concepts. In the second semester of the junior year, students complete a 3 credit-hour course which covers the principles of biomedical engineering design, from problem identification and design conception to implementation and testing, including regulatory aspects. The design experience culminates in the senior year with a yearlong capstone Senior Design Project. The Senior Design Project is typically completed by teams of two to four students who build on their knowledge and previous design experience to solve one major design problem which integrates the various components of the curriculum.

Teaching and Design Laboratories

Biomedical Engineering students have open access to several teaching laboratories which are used for the laboratory courses and design

projects. The laboratory equipment and instructional modules are geared towards instruction in the areas of tissue mechanics, instrumentation, measurements, biomedical optics, physiological signals, tissue engineering, among others. In particular, the Department houses a scanning electron microscope and a state-of-the-art 3D printer that are used by students in their design projects.

Undergraduate Research and Internships

Biomedical Engineering students are strongly encouraged to gain research or professional experience through internships. Many undergraduate students conduct research in laboratories at the Department of Biomedical Engineering and at the School of Medicine, or are hired as interns by the local biomedical industry.

Degree Programs

The department offers one degree program with four concentrations: Electrical, Mechanical, Biomaterials and Tissue, and Premed. A list of the core science and engineering courses common to all four concentrations is provided below, followed by a tabular listing of the course requirements for the degree Bachelor of Science in Biomedical Engineering for each concentration.

Dual Major

The College of Engineering offers a dual major in Biomedical Engineering for students that are majoring in another engineering Department. In order to obtain the dual major in Biomedical Engineering, the student will have to obtain, in parallel, a major in one of the fundamental engineering programs, plus 24 credit hours of course work, including 19 credit hours of required course work and 5 credit hours of elective course work from the lists given below. Of this total of 24 credit hours, at least 12 have to be at the level of 400 and above.

The required courses for the dual major are:

BME 265	Medical Systems Physiology	3
BME 335	Biomaterials	3
BME 375	Fundamentals of Biomechanics	3
BME 440	Biomedical Measurements	4
BME 470	Biomedical Signal Analysis	3
BME 480	Biomedical Instrumentation	3
Total Credit Hours		19

The electives are to be chosen from the BME course list.

Departmental Honors

Upon request departmental honor is noted in a student's diploma and transcript upon fulfillment of the requirements specified in the College Bulletin.

Majors

Majors in Biomedical Engineering

- B.S. in Biomedical Engineering - Electrical Concentration (p. 233)
- B.S. in Biomedical Engineering - Mechanical Concentration (p. 234)
- B.S. in Biomedical Engineering - Biomaterials and Tissue Concentration (p. 232)
- B.S. in Biomedical Engineering - Premed Concentration (p. 236)

Joint

Joint Degrees in Biomedical Engineering

- B.S./M.S. in Biomedical Engineering - Electrical Concentration (p. 239)
- B.S./M.S. in Biomedical Engineering - Mechanical Concentration (p. 240)
- B.S./M.S. in Biomedical Engineering - Biomaterials and Tissue Concentration (p. 237)
- B.S./M.S. in Biomedical Engineering - Premed Concentration (p. 241)

B.S. in Biomedical Engineering - Biomaterials and Tissue Concentration

Technical Elective ⁴		3
Humanities and Arts Cognate (H&A Elective) ¹		3
Term Credit Hours:		13
Total Credit Hours:		133

¹ Students must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates (<http://www.miami.edu/index.php/registrar/cognates>). Each cognate should be a minimum of 3 courses (9 credit hours). Students in the Premed Concentration are highly encouraged to choose cognates that include PSY 110 and SOC 101.

² Advanced Bioscience Elective is to be chosen from BMB 260, BIL 250, BIL 255, BIL 268, CHM 202, or BMB 402. Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both.

³ Technical Lab Elective is selected from BME 506, BME 507, BME 566 or BME 395; Science Lab Elective is selected from a science lab complementing the Adv. Bioscience Elective (e.g., CHM or BIL lab).

⁴ Technical Electives are chosen from BME course offerings (300 level & above) with the approval of the advisor. Any other course selected need to be approved by the advisor and the department chairperson.

B.S./M.S. in Biomedical Engineering - Biomaterials and Tissue Concentration

- Juniors from any of the four BME Concentrations who have maintained at least a 3.0 CGPA have the option to apply for admission to the combined BS-MS in Biomedical Engineering program.
- Those who are accepted into this accelerated program must maintain at least a 3.0 CGPA and a minimum of a 3.0 GPA for the final 30 credit hours to meet the requirements of the Graduate School.
- The participants are excused from BME 402/BME 403, but are required to complete BME 705/BME 706.
- Up to 12 credit hours of Technical electives earned during the fourth year can be counted toward the 30 credit hours required for the MS degree.
- Students must be registered for a minimum of 12 undergraduate credit hours per semester in their senior year.
- Students can register for a maximum of 6 graduate credit hours per semester in their senior year.
- A typical curriculum of the BS/MS is shown below for the Biomaterials and Tissue Concentration.

- If a student needs to withdraw from the BS/MS BME program then all the requirements for the specific BS BME Concentration must be completed for graduation with the BS BME degree.

Civil, Architectural and Environmental Engineering

<http://www.cae.miami.edu>

Dept. Code: CAE

Mission Statement

The mission of the Department of Civil, Architectural, and Environmental Engineering is to:

- Provide high-quality undergraduate and graduate education in civil, architectural, and environmental engineering that will prepare graduates for professional careers and a lifetime of learning
- Conduct high-quality research that will advance the body of knowledge and improve the quality of human life
- Serve the engineering profession and society through active involvement in professional organizations and contribution of professional expertise

The department offers three undergraduate degrees:

- Bachelor of Science in Civil Engineering,
- Bachelor of Science in Architectural Engineering and
- Bachelor of Science in Environmental Engineering.

Civil Engineering

Civil engineers are leaders in the planning, design, construction, and operation of systems that are essential to modern life. These systems include: buildings, highways, airports, pipelines, bridges, dams, irrigation systems, drainage systems, water-supply and distribution systems, and wastewater collection and treatment works. Civil engineers are employed by government agencies, public utility companies, private consulting firms, construction companies, architectural firms, and universities.

Architectural Engineering

Architectural engineers are leaders in the planning, design, construction, and operation of engineered systems for commercial, industrial, and institutional buildings and other facilities. These engineered systems include electrical, communications and control, lighting, heating, ventilating, air conditioning, fire protection, plumbing, acoustic, and structural components. Architectural engineers are employed by consulting firms, construction companies, facility management companies, HVAC equipment manufacturers, architectural firms, government agencies, and universities.

Environmental Engineering

Environmental engineers are leaders in the application of engineering principles to improve and maintain the environment for the protection of human health, for the protection of nature's beneficial ecosystems, and for environment-related enhancement of the quality of human life. Environmental engineers are employed by government agencies, consulting firms, and universities.

Educational Objectives

The objectives of the Civil Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to civil engineering or
2. Pursuing a graduate or professional degree.

The objectives of the Architectural Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to architectural engineering or
2. Pursuing a graduate or professional degree.

The objectives of the Environmental Engineering Program are to have graduates who within the first several years following graduation are either

1. Working as a professional in an area closely related to the water environment or
2. Pursuing a graduate or professional degree.

Advanced Writing and Communication Skills

Civil, Architectural, and Environmental Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Civil, Architectural, and Environmental Engineering students acquire Advanced Writing and Communication skills in the following core courses:

- CAE 111 – Introduction to Engineering I
- CAE 212 – Structures Laboratory (Civil and Architectural Engineering)- 1 Credit
- CAE 345 – Environmental Laboratory (Environmental Engineering)- 3 Credits
- CAE 371 – Geotechnical Laboratory (Civil and Architectural Engineering) – 1 Credit

- CAE 402 – Professional Engineering Practice- 3 Credits

Majors

Majors in Civil, Architectural, and Environmental Engineering

- B.S. in Civil Engineering (p. 244)
- B.S. in Architectural Engineering (p. 245)
- B.S. in Environmental Engineering (p. 246)
- B.S./M.S. in Civil Engineering (p. 247)
- B.S./M.S. in Architectural Engineering (p. 247)
- B.S. in Environmental Engineering/M.S. in Civil Engineering (p. 248)
- B.S. in Architectural Engineering and Master of Architecture Dual Degree Program (p. 248)

Minors

Minor in Civil, Architectural, and Environmental Engineering

- Civil Engineering (p. 250)
- Architectural Engineering (p. 249)
- Environmental Engineering (p. 250)

B.S. in Civil Engineering

Civil Engineering Curriculum

The Civil Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and civil engineering design. The first two years of the Civil Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. During the next two years of the four-year program, the Civil Engineering curriculum integrates engineering sciences with design applications in the areas of structural, environmental, geotechnical, and water resources engineering. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of civil engineering.

Graduate study is offered leading to the degrees of Master of Science and Doctor of Philosophy in Civil Engineering (p. 504). For detailed information on graduate studies, see the Graduate Studies Bulletin.

A tabular listing of the course requirements for the degree of Bachelor of Science in Civil Engineering is shown below.

Term Credit Hours:	14
Total Credit Hours:	127

¹ Only offered once a year

² To be selected from lists of approved People and Society (PS)/ Humanities and Arts (HA) cognates, Technical, Design, and Basic Science electives. Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours)

³ CAE 520 or CAE 521

B.S. in Architectural Engineering

Architectural Engineering Curriculum

The Architectural Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and architectural engineering design. The Architectural Engineering program integrates design applications across the curriculum, beginning with building construction and architectural design in the sophomore year, and continuing with structural, building mechanical and electrical systems design, and construction management in the junior and senior years. The curriculum culminates with a major comprehensive design experience that includes applications from the major specialty areas of architectural engineering.

Graduate study is offered leading to the degree of Master of Science in Architectural Engineering (p. 504). For detailed information on graduate studies, see the Graduate Studies Bulletin.

A tabular listing of the course requirements for the degree of Bachelor of Science in Architectural Engineering is shown below.

Architectural Engineering

Freshman Year		
Fall		Credit Hours
CAE 111	Introduction to Engineering I	3

¹ Only offered once a year

² To be selected from lists of approved People and Society (PS)/ Humanities and Arts (HA) cognates and Technical electives. Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours). Students are advised to select the HA Cognate that includes the following courses: ARC 230; ARC 268 or ARC 476; and ARC 517 (Spring only) or ARC 594 (Fall only).

B.S. in Environmental Engineering

Environmental Engineering Curriculum

The Environmental Engineering curriculum provides an integrated educational experience in mathematics, basic sciences, humanities, social sciences, engineering sciences, and environmental engineering design. The first two years of the Environmental Engineering curriculum provide a strong foundation in mathematics, basic sciences, and engineering sciences. The next two years of the four-year program, integrate engineering sciences with design applications with particular emphasis in the areas of water and wastewater engineering .

Design courses emphasize an integrated approach that considers all environmental media in the prevention and control of environmental problems. The curriculum culminates with a major senior-level design project that includes design applications from the major specialty areas of environmental engineering. A tabular listing of the course requirements for the degree of Bachelor of Science in Environmental Engineering is shown below:

Freshman Year		
Fall		Credit Hours
CAE 111	Introduction to Engineering I ¹	3
ENG 105	English Composition I	3
MTH 151	Calculus I for Engineers	5
PHY 205	University Physics I	3
Term Credit Hours:		14
Spring

CAE 404	Senior Design Project II - Civil Architectural ¹	2
HA Cognate ²		3
PS Cognate ²		3
Term Credit Hours:		14
Total Credit Hours:		126

¹ Only offered once a year.

² To be selected from approved lists of People and Society (PS)/ Humanities and Arts (HA) cognates and Biology Electives. Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

³ Co-requisite CAE 212 not required for EnE majors.

⁴ CAE 540, CAE 533 and CAE 542 offered on a 3-semester rotation. Students **must** take these three courses.

Note: students must select the RSMAS course from the list of required (non-elective) courses in either the Ocean Engineering Track or the Marine Policy Track. A minor in Marine Science will be awarded for 15 credit hours of MSC, AMP or other RSMAS courses provided these include MSC 111, MSC 301 and at least 6 credit hours at the 300 level or higher. Required courses in the track count towards the 6 credit hours at the 300 level or higher.

RSMAS Track 1: Ocean Engineering

MSC 403	Marine Environmental Toxicology	3
AMP 509	Coastal Physics and Engineering	3
Select one elective from any MSC course or any RSMAS 500-level course		3
Total Credit Hours		9

RSMAS Track 2: Marine Policy ¹

MSC 340	Ocean Policy	3
MSC 313	Coastal Law	3
MSC 314	Ocean Law	3
Total Credit Hours		9

¹ These courses fulfill the requirements of People and Society electives for General Education.

B.S./M.S. in Civil Engineering

The Department also offers three 5-year programs leading to the B.S. and the M.S. degrees (BSCE-MSCE; BSAE-MSAE; and BSEnE-MSCE). These programs are open to students who are admitted to the graduate program at the end of their junior year. Students applying for this program must have a minimum grade point average of 3.0, and

score more than 310 on the Graduate Record Examination. The course requirements for any of the five-year BS/MS programs can be met as follows:

Senior Year	
First Semester	Credit Hours
Take PS or HA Cognate course in freshman semester	3
Graduate Level Course	3
CAE 703	Master's Design Project I
Do not Register for CAE 403, Register for CAE 703

Total Credit Hours:	33

B.S. in Architectural Engineering and Master of Architecture Dual Degree

A six-year dual degree program leading to a Bachelor of Science in Architectural Engineering and a Master of Science in Architecture is available. The program is open to exceptional students who are admitted to the graduate program at the end of their junior year. Upon completion

of this program, graduates are eligible for professional registration as both an engineer and an architect. The course requirements for the BSAE/MArch program are:

Bachelor of Science in Architectural Engineering and Master of Architecture

Year One		
First Semester		Credit Hours
CAE 111 Introduction to Engineering I		3
ENG 105 English Composition I		3
MTH 151 Calculus I for Engineers		5
PHY 205 University Physics I		3
ARC 121 Architecture and Culture		1
Term Credit Hours:		15
Second Semester		
CAE 112 Introduction to Engineering II		2
CAE 210 Mechanics of Solids I		3
ENG 107 English Composition II: Science and Technology		3
MTH 162 Calculus II		4
PHY 206 University Physics II		3
PHY 208 University Physics II Lab		1
Term Credit Hours:		16
Year Two		
First Semester		
CAE 211 Mechanics of Solids II		3
CAE 212 Structural Laboratory		1
HA Cognate ¹		3
ARC 294 Introduction to the Development of Architecture		3
PHY 207 University Physics III		3
PHY 209 University Physics Iii Lab		1
IEN 311 Applied Probability And Statistics		3
Term Credit Hours:		17
Second Semester		
CAE 310 Structural Analysis		3
CHM 151 Chemistry for Engineers		3
CHM 153 Chemistry Laboratory for Engineers		1
MTH 311 Introduction to Ordinary Differential Equations		3
MAE 303 Thermodynamics I		3
MTH 211 Calculus III		3
Term Credit Hours:		16
Year Three		
First Semester		
CAE 320 Concrete Structures (ARC 533)		3
CAE 330 Fluid Mechanics		3
PS Cognate ¹		3
ARC 511 Drawing		3

ARC 501	Architecture Design and Theory I (ARC 292)	6
Term Credit Hours:		18
Second Semester		
CAE 321	Steel Structures (ARC 532)	3
CAE 380	Electrical and Illumination Systems for Buildings (ARC 563)	3
CAE 381	Building Mechanical Systems I: Hvac Fundamentals (ARC 562)	3
ARC 513	Computing	3
ARC 502	Architecture Design and Theory II (ARC 293)	6
Term Credit Hours:		18
Summer (Required 10-week semester)		
ARC 503	Architectural Design and Theory III	6
Term Credit Hours:		6
Year Four		
First Semester		
CAE 480	Plumbing and Life Safety For Buildings	3
HA Cognate ¹		3
ARC 504	Architecture Design and Theory I (Comprehensive)	6
Technical Elective ¹		3
ARC 517	Construction Documents	3
Term Credit Hours:		18
Second Semester		
CAE 370	Geotechnical Engineering I	3
CAE 371	Geotechnical Laboratory	1
CAE 402	Professional Engineering Practice	3
CAE 460	Construction Management (Arch Elective)	3
ARC 531	Building Technology II: Structural Systems	3
ARC 568	History of Architecture II: Baroque through Contemporary	3
Term Credit Hours:		16
Year Five		
First Semester		
CAE 403	Senior Design Project I - Civil Architectural	1
CAE 470	Foundations and Earth Retaining Systems	3
CAE 480	Plumbing and Life Safety For Buildings	3
CAE 481	Building Mechanical Systems II: HVAC Systems	3
ARC 620	Architecture Theory	3
ARC 608	Architecture Design	6
Term Credit Hours:		19
Second Semester		

CAE 404	Senior Design Project II - Civil Architectural	2
HA Cognate ¹		3
Architecture Elective		3
ARC 609	Architecture Design	6
PS Cognate ¹		3
Term Credit Hours:		17
Year Six		
First Semester		
ARC 652	Management of Professional Practice, Environmental Building Systems I	3
ARC 699	Directed Research	6
Architecture Elective		3
PS Cognate ¹		3
Term Credit Hours:		15
Second Semester		
CAE 581	Energy-Efficient Building Design	3
Architecture Elective		3
ARC 610	Architecture Design Degree Project	6
Term Credit Hours:		12
Total Credit Hours:		203

¹ To be selected from lists of approved People and Society (PS)/ Humanities and Arts (HA) cognates and Technical electives. Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours). Students are advised to select the HA Cognate that includes the following courses: ARC 230 or ARC 630; ARC 268 or ARC 476; and ARC 594.

Minor in Architectural Engineering

(For students in the College of Arts and Sciences and the School of Architecture)

A Minor in Civil, Architectural, or Environmental Engineering requires 15 credit hours passed with a grade of C or higher. Students are required to satisfy the prerequisites for all courses, and are required to complete the core course, CAE 210, plus an additional 12 or 13 credit hours within an area of specialization. The additional credits required for minors in civil, architectural, and environmental engineering are as follows:

Structural Track

CAE 210	Mechanics of Solids I	3
CAE 211	Mechanics of Solids II	3
CAE 310	Structural Analysis	3
CAE 320	Concrete Structures	3
CAE 321	Steel Structures	3
Total Credit Hours		15

Mechanical/Electrical Systems Track

CAE 210	Mechanics of Solids I	3
CAE 330	Fluid Mechanics	3

CAE 380	Electrical and Illumination Systems for Buildings	3
CAE 381	Building Mechanical Systems I: Hvac Fundamentals	3
CAE 480	Plumbing and Life Safety For Buildings	3
Total Credit Hours		15

Minor in Civil Engineering

(for students in the College of Arts and Sciences and the School of Architecture)

A Minor in Civil, Architectural, or Environmental Engineering requires 15 credit hours passed with a grade of C or higher. Students are required to satisfy the prerequisites for all courses, and are required to complete the core course, CAE 210, plus an additional 12 or 13 credit hours within an area of specialization. The additional credit hours required for minors in civil, architectural, and environmental engineering are as follows:

Geotechnical Track

CAE 210	Mechanics of Solids I	3
CAE 211	Mechanics of Solids II	3
CAE 330	Fluid Mechanics	3
CAE 370	Geotechnical Engineering I	3
CAE 470	Foundations and Earth Retaining Systems	3
Total Credit Hours		15

Structural Track

CAE 210	Mechanics of Solids I	3
CAE 211	Mechanics of Solids II	3
CAE 310	Structural Analysis	3
Select two of the following:		6
CAE 320	Concrete Structures	
CAE 321	Steel Structures	
CAE 520	Advanced Design of Concrete Structures	
CAE 521	Advanced Design of Steel Structures	
Total Credit Hours		15

Minor in Environmental Engineering

(For students in the College of Arts and Sciences and the School of Architecture)

A Minor in Civil, Architectural, or Environmental Engineering requires 15 credit hours passed with a grade of C or higher. Students are required to satisfy the prerequisites for all courses, and are required to complete the core course, CAE 210, plus an additional 12 or 13 credit hours within an area of specialization. The additional credit hours required for minors in civil, architectural, and environmental engineering are as follows:

CAE 210	Mechanics of Solids I	3
CAE 330	Fluid Mechanics	3
CAE 340	Introduction to Environmental Engineering	3
CAE 430	Water-Resources Engineering I	3

CAE 440	Water Quality Control Systems	3
Total Credit Hours		15

Electrical and Computer Engineering

<http://www.ece.miami.edu>

Dept. Code: ECE

Mission Statement

The mission of the Department of Electrical and Computer Engineering is to achieve and maintain, through a continuous improvement process, excellence in undergraduate and graduate education, research, and service to the community and the nation. We endeavor to accomplish this by providing high-quality education and research programs which will impart the requisite knowledge and skills to our students enabling them to assume leadership roles in contributing to the advancement of the underlying electrical and computer engineering technologies which sustain the current world economy, to promote a strong commitment to life-long learning, to prepare them for a variety of alternative career paths and to participate as responsible citizens in a rapidly changing and shrinking global community.

Introduction

Electrical and Computer Engineering are complementary disciplines that are at the forefront of the continuing development and evolution of our modern technological society. Electrical and computer engineers have initiated and contributed to the development of such important and diverse areas as integrated electronics and photonics, telecommunication systems and computer networks, computer hardware and software, image processing and computer vision, automation and robotics, electrical power generating and transmission systems, as well as participated in the development of significant applications to biotechnology. These technologies have significantly transformed how our evolving society will live, learn, work, communicate and do business in the 21st century and are critical to the development of a sustainable world economy. It is an exciting and challenging discipline offering a variety of rewarding career paths. The Department of Electrical and Computer Engineering offers a number of innovative academic and research programs to help prepare students to achieve a variety of career goals.

The Department offers two undergraduate degree programs:

1. Bachelor of Science in Electrical Engineering degree program (B.S.E.E.)
2. Bachelor of Science in Computer Engineering degree program (B.S.Cp.E.)

The Electrical Engineering and the Computer Engineering degree programs are accredited by the Engineering Accreditation Commission (EAC) of the Accreditation Board for Engineering and Technology (ABET).

In addition, the Department offers graduate courses leading to the:

- Degree of Master of Science in Electrical and Computer Engineering (M.S.E.C.E.), and the
- Doctor of Philosophy degree (Ph.D.).

For further information see the Bulletin of the Graduate School (p. 360).

Bachelor of Science in Electrical Engineering (B.S.E.E.)

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern electrical engineering, along with the necessary skills and experiences to apply standard practices, methodologies and available tools for solving electrical engineering problems. The major areas of Electrical Engineering include electronics, analog and digital circuits, microprocessors, communications and control systems. The design sequence is spread throughout the educational experience curricula, culminating in the two-semester senior design project. Graduates are expected to keep pace with this rapidly evolving discipline. To this end, the faculty stresses the importance of continued education and life-long professional development by trying to instill in their students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

Educational Objectives

We expect that our alumni will exhibit the following:

1. Successful careers in dynamic and multidisciplinary technical fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including but not limited to the admission to and completion of professional or graduate studies of the highest standard.

Degree Program

The Electrical Engineering degree program has three options:

1. Electrical Engineering Option;
2. Audio Engineering Option;
3. Electrical Engineering Pre-Med Option

These options require specialized courses as well as the 49 Engineering Credit Hours required in the accredited Electrical Engineering degree program.

Electrical Engineering Major - Electrical Engineering Option

Electrical Engineering is concerned with the design, analysis and implementation of a variety of systems, components and devices, primarily of an electrical or electronic nature, which form the cornerstone of our complex and technologically oriented society. For example, this ranges from small-scale integrated electronics and photonics systems and devices, the technological drivers of the information technology revolution, to large-scale electrical power systems and power generators, which supply the nation's energy needs and form the basis for sustained economic growth. Furthermore, Electrical engineering also involves the design of micro and nano devices, integrated circuits, hardware, and large-scale systems for telecommunications and networking that engender our increasingly networked life. Therefore, electrical engineering is a vast and rich discipline involved in the design of systems, components, and devices for a variety of applications and areas such as portable electronics (e.g., cell phones), communications and networks, biomedical sensing and medical systems, energy harvesting,

next generation displays, lasers, optical and wireless transmission, audio/video compression and recognition, radar and tracking/guidance systems, and remote sensing systems. The University of Miami's electrical engineering curriculum is focused on the fundamentals of the discipline, in the first two years building a firm foundation in mathematics, basic science, and basic engineering principles such as basic circuits, electronics, software and programming, computer hardware, and signal and system analysis. The students build upon this foundation through more advanced courses and focused specialization, culminating in a capstone major design experience. We continually update our curriculum and laboratories to incorporate new scientific and technological developments, and industry practices. Our graduates have gone on to successful careers in industry, or to graduate school in science and engineering, as well as law school, business school, and medical school.

Electrical Engineering Major - Audio Engineering Option

Audio Engineering offers students, who have a deep interest in sound and music, the opportunity to combine a rigorous electrical engineering education with additional specialized courses offered both by the UM ECE department as well as the Frost School of Music. In particular, the Audio Engineering option combines traditional electrical engineering studies with audio studies in areas such as acoustics, speech and audio signal processing, digital audio, transducers, speech and audio coding and transmission systems, post-production, noise cancellation, architectural acoustics, and recording, thereby providing a multi-disciplinary education. Our Audio Engineering graduates are highly sought by industry and have been pursuing successful careers in music/entertainment, multimedia, telecommunications, analog and digital electronics, and in the hearing aid/medical instrumentation industries, or have chosen graduate study. Students enrolled in Audio Engineering have access to a variety of well-equipped laboratories, both in the UM ECE Department, as well as in the Frost School of Music. For example, students have access to the Gusman Concert Hall, which houses a professional recording studio with automated console and multi-track recording. There, students can record live concerts ranging from small jazz groups to a symphony orchestra. In addition, Audio Engineering students use the Weeks Center for Recording and Performance, which also features a fully professional recording studio, analog and digital signal processing equipment and audio test equipment.

Electrical Engineering Major - Pre-Med Option

Our Department offers a pre-medical option that allows motivated students to obtain the rigorous education of a bachelors degree in electrical engineering while simultaneously completing the basic science requirements necessary for applying to medical or dental school. Much of the excitement in engineering involves applications of electrical and computer engineering to problems in health, such as the development of nano-scale biosensors, or the signal processing analysis of DNA sequences. The pre-med option allows students to learn the fundamentals of Electrical and Computer Engineering while preparing them for entry into either medical school, advanced graduate study, or industry.

Double Degree Program - B.S.E.E. & B.S.B.E.

A BME student who satisfies the requirement of the B.S.B.E. degree with electrical orientation as described in this Bulletin may also qualify for the B.S.E.E. degree by taking the following additional courses:

ECE 218	Data Structures	3
ECE 301	Electromagnetic Field Theory	3
ECE 306	Electronics II	3
ECE 311	Electronics Laboratory	1
ECE 312	Processors: Hardware, Software, And Interfacing	4
ECE 316	Structured Digital Design	1
ECE 336	Discrete-Time Signals And Systems	3
Select one ECE Design Elective		3
Select two EE Core Electives		6
Select three ECE Electives		9
Senior Project (ECE Faculty as co-sponsor)		
Total Credit Hours		36

The Five-Year B.S.E.E. -M.S.E.C.E. Dual Degree Program

This is a structured and integrated program of 152/154 credit hours (depending on the undergraduate option). Students may pursue this program from either of the undergraduate option available for Electrical Engineering Majors. It includes two required courses, ECE 715 and ECE 716 as well as the selection of advanced technical electives.

Note that:

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be in courses open to graduate students only (700 level).
- Interested ECE Juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.E.E. degree after completing all its requirements, including the senior design project.
- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.E.E. and the M.S.E.C.E degrees after the requirements for both degrees are satisfied.

Bachelor of Science in Computer Engineering (B.S.Cp.E.)

Computer engineering is a rapidly changing and evolving discipline driven by new technology developments and marketplace conditions. To adequately train students to meet the challenges of the future and to assume leadership roles in the practice of computer engineering, the department offers an up-to-date curriculum that reflects new technology developments that have the potential for significantly impacting professional practice in the industry. The curriculum is constantly updated to incorporate new technological, scientific and economic developments.

Alternatively, students can earn a Bachelor of Science in Computer Engineering under the Software Engineering option, which is primarily focused on the systematic and disciplined development of software systems. This option focuses on the application of computer engineering and computer science principles and practices to the creation, operation, and maintenance of software applications and systems.

Educational Objectives

We expect that our alumni will exhibit the following:

1. Successful careers in dynamic and multidisciplinary technical fields with the ability to apply engineering practices within societal, global, and environmental contexts in an ethical manner.
2. Continuous professional improvement through life-long learning including but not limited to the admission to and completion of professional or graduate studies of the highest standard.

Degree Program

This degree program endeavors to achieve its objectives by imparting to its students the fundamental principles underlying modern computer engineering, along with the necessary skills and experiences to apply standard practices, methodologies and modern tools for solving computer engineering problems.

The computer engineering design sequence is spread throughout the curriculum, culminating in a two semester senior design project.

Graduates are expected to keep pace with this rapidly-evolving discipline. To this end, the faculty stress the importance of continued education and life-long professional development, by trying to instill in the students a sense of excitement for the prospects of this evolving technology, tempered by a strong sense of responsibility and concern for its potential impacts on society.

The Computer Engineering degree program has two options:

1. Computer Engineering Option
2. Software Engineering Option

These options require a common engineering core, which is followed by specialized courses in each area along with elective courses.

Computer Engineering Major - Computer Engineering Option

Computer engineering is concerned with the characterization, design, analysis and implementation of hardware, software and the overall architecture of computers and computer systems, and with the development of applications enabled by such configurations. This ranges from embedded microprocessors and associated software supporting a variety of familiar devices, to large-scale distributed computer systems interconnected by high-speed telecommunication networks controlled by sophisticated communication protocols. Since modern electronic computing systems are digital in nature, the program provides in-depth coverage of a range of topics dealing with digital information processing systems. Among the topics covered are digital system design, computer organization and architecture, operating systems, software engineering, programming, data structures, algorithms, database systems,, microprocessor-based systems, and embedded systems.

The department also offers electives in digital communications, computer networks, wireless and mobile networks, very large scale integration (VLSI), microelectronics, nanotechnology, application specific integrated circuits (ASIC), microelectromechanical systems (MEMS), image processing and computer vision, artificial intelligence, machine learning, data mining, and agent technology.

Computer Engineering Major - Software Engineering Option

Software Engineering is concerned primarily with the systematic and disciplined approach to developing software systems. It requires the application of both computer engineering and computer science principles and practices to the creation, operation, and maintenance of software systems and applications. The Software Engineering Option of the Bachelor of Science in Computer Engineering degree at the University of Miami is a unique interdisciplinary program developed and administered collaboratively by the Department of Electrical and Computer Engineering and the Department of Computer Science. This Option prepares students for successful careers in software engineering. Software systems are becoming increasingly complex, and emerging technologies are pushing the boundaries of reusable components and software quality assurance. To prepare students to meet these challenges, this Option establishes a solid foundation of software system fundamentals, coupled with strong hands-on experience and an understanding of professional practice and conduct. In addition to the core curriculum in software engineering, students are introduced to the paradigms of real-time, adaptive, and collaborative software systems, through a wide range of technical elective courses in the departments of Electrical and Computer Engineering, Computer Science, and other departments in the University of Miami. The technical electives allow students to apply the knowledge they have gained to different application areas. This provides valuable hands-on experience in contemporary application areas, which enhances the students' potential career development opportunities.

Students pursuing the Software Engineering Option of the Bachelor of Science in Computer Engineering degree must earn at least 15 credit hours in Computer Science as part of their degree requirements.

The Five-Year B.S.Cp.E.-M.S.E.C.E. Dual Degree Program

This is a structured and integrated program of 154/156 credit hours (depending on the undergraduate option). Students may pursue this program from either of the undergraduate option available for Computer Engineering Majors. It includes two required courses, ECE 715 and ECE 716 as well as the selection of advanced technical electives.

- At least 30 credit hours must be at the graduate (600 or 700) level. Of these, at least 12 credit hours must be in courses open to graduate students only (700 level).
- Interested Computer Engineering juniors with cumulative GPA above 3.0 may declare their intent to participate by submitting an official application to the Departmental Graduate Committee for admission into the M.S.E.C.E. portion of the program.
- A student wishing to drop out of the five-year program without the M.S.E.C.E. degree could receive the B.S.Cp.E. degree after completing all its requirements, including the senior design project.

- All students must take the Graduate Record Examination (G.R.E.) before beginning their fifth-year courses.
- To qualify for the M.S.E.C.E. degree, students must meet all the pertinent Graduate School requirements, including an acceptable GRE score and a minimum of 3.0 GPA in the 30 credit hours applied towards the M.S.E.C.E. degree.
- The student is awarded both the B.S.Cp.E. and the M.S.E.C.E. degrees after the requirements for both degrees are satisfied.

Dual Majors

Computer Engineering or Electrical Engineering students who want to do additional majors or minors must meet with their academic advisor to plan out their course work.

Computer Engineering students wanting to do Computer Science as a second major must

1. have an additional 6 advisor-approved technical credit hours beyond that required for the CE major, and
2. take PHI 115.

Departmental Laboratories

The Department maintains a variety of well-equipped laboratories and computers adequate for undergraduate instruction and graduate research. The laboratories and computer facilities include:

- Computer Vision and Image Processing Laboratory
- Digital Audio and Speech Processing Laboratory
- Digital Signal Processing Laboratory
- Digital Systems Design Laboratory
- Electronics Laboratory
- Electro-Optics and Micro-Devices Laboratory
- Embedded Systems Laboratory
- Fortinet Cyber Security Laboratory
- Information Technology Laboratory
- Microprocessor Laboratory
- Multimedia Laboratory (Arnold Center for Confluent Media Studies)
- Networks Laboratory
- Optics and Fiber Communications Laboratory
- Underwater Imaging Laboratory

Departmental Electives

Humanities and Arts/People and Society Cognates		
Humanities and Arts (HA) Cognates, and People and Society (PS) Cognates can be selected from the appropriate University list, the link of which can be found in the Engineering section		
EE Core Electives		
ECE 308	Linear Control Systems	3
ECE 404	Communication Systems	3
ECE 405	Solid-State Electronics	3
ECE 436	Digital Signal Processing	3
ECE Electives		
Select from all ECE elective classes at the 300 level or above		

Technical Electives

Select from all ECE or any 200 level or above CoE courses, as well as courses from Math, Physics, Chemistry, Biology, Computer Science, selected in consultation with, and with the approval of, the academic advisor

EE Design Elective

Select one of the following:

ECE 417	Embedded Microprocessor System Design	3
ECE 454	Digital System Design and Testing	2
ECE 505	Semiconductor Photonic Devices	3
ECE 532	VLSI Systems	3

or any ECE course approved by the Academic Advisor

Basic Science (/Lab) Electives

Basic Science (/Lab) Electives are selected in consultation with the Academic Advisor from courses in Biology, Chemistry, Environmental Science, Geological Science, Marine Science, or Physics.

Computer Engineering (CE) Technical Electives

Select from all ECE at any 300 level or above in consultation with, and with the approval of, the academic advisor.

Additionally, one elective course may be selected from the following computer science courses:

CSC 317	Data Structures And Algorithm Analysis	3
CSC 427	Theory Of Computing	3
CSC 518	Interpreters and Compiler Theory	3
CSC 529	Introduction to Computer Graphics	3
CSC 540	Algorithm Design and Analysis	3
CSC 555	Multimedia Systems	3

Software Engineering (SE) Technical Electives

Select from all ECE at any 300 level or above in consultation with, and with the approval of, the academic advisor.

Additionally, one elective course may be selected from the following computer science courses:

CSC 329	Introduction to Game Programming	3
CSC 424	Computer Networks	3
CSC 427	Theory Of Computing	3
CSC 507	Data Security and Cryptography	3
CSC 529	Introduction to Computer Graphics	3
CSC 540	Algorithm Design and Analysis	3
CSC 545	Introduction to Artificial Intelligence	3
CSC 547	Computational Geometry	3
CSC 555	Multimedia Systems	3

Advanced Writing and Communication Skills

Electrical and Computer Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom, laboratory, and design procedures where they learn effective oral, graphical and technical writing skills. Electrical and Computer Engineering students acquire Advanced Writing and Communication skills in the following core courses: ECE 312, ECE 415, and ECE 418.

Internship Program

The Department of Electrical and Computer Engineering encourages its students to take advantage of the College of Engineering Internship Cooperative Program with Industry.

Students could do that either on a part-time or a full-time arrangement. Students who wish to intern full-time for one semester or for twelve weeks in the summer may apply to earn as much as 3 credit hours that could be applied to their degree requirement as a Technical Elective. Students interested in such a possibility need to submit a proposal to the ECE Department describing the type of work they expect to accomplish approved by the industrial supervisor. If the proposal is approved the student will be assigned a Faculty Supervisor and will be able to register under ECE 499. At the end of the Internship Program, the student is expected to submit to the ECE Department a technical report with comments from the student industrial supervisor. The Faculty advisor will review the report and submit the appropriate grade for ECE 499.

NOTE 1: An ECE course for which another ECE course is a prerequisite may not be taken unless the student has completed the ECE prerequisite course with a grade of C- or better.

NOTE 2: All ECE courses at the 300 level or above must be taken at UM.

Departmental Honors

See College of Engineering (p. 225) section.

Majors**Majors in Electrical and Computer Engineering**

- B.S.C.p.E. in Computer Engineering - Computer Engineering Option (p. 255)
- B.S.C.p.E. in Computer Engineering - Software Engineering Option (p. 256)
- B.S.E.E. in Electrical Engineering - Audio Engineering Option (p. 257)
- B.S.E.E. in Electrical Engineering - Electrical Engineering Option (p. 258)
- B.S.E.E. in Electrical Engineering - Electrical Engineering Pre-Med Option (p. 259)

Minors**Minors in Electrical and Computer Engineering**

- Electrical Engineering (p. 265)
- Computer Engineering (p. 265)

Joint**Joint Degrees in Electrical and Computer Engineering**

- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree Program - Audio Engineering Option (p. 263)
- Five-Year B.S.E.E.-M.S.E.C.E. Dual Degree Program - Electrical Engineering Option (p. 264)
- Five-Year B.S.C.p.E.-M.S.E.C.E. Dual Degree Program - Computer Engineering Option (p. 261)

- Five-Year B.S.C.p.E.-M.S.E.C.E. Dual Degree Program - Software Engineering Option (p. 262)

B.S.C.p.E. in Computer Engineering - Computer Engineering Option

¹ See description of electives under the Departmental Electives Section.

² Offered only in the Fall semester.

B.S.E.E. in Electrical Engineering - Electrical Engineering Pre-Med Option

Common Engineering Requirements		
ECE 111	Introduction to Engineering I	3
ECE 112	Introduction to Engineering II	2
ECE 118	Introduction to Programming	3
ECE 201	Electrical Circuit Theory	3
ECE 204	Electrical Circuits Laboratory	1
ECE 218	Data Structures	3
ECE 304	Logic Design	3
ECE 305	Electronics I	3
ECE 306	Electronics II	3
ECE 307	Circuits, Signals And Systems	3
ECE 311	Electronics Laboratory	1
ECE 312	Processors: Hardware, Software, And Interfacing	4
ECE 315	Digital Design Laboratory	1
ECE 316	Structured Digital Design	1
ECE 336	Discrete-Time Signals And Systems	3
ECE 415	Senior Project I	1
ECE 416	Senior Project II	2
EE Core Electives		6
ECE Design Elective		3
Engineering and Technical Electives		
ECE Elective		3
Technical Elective		3

Other Courses	
Math & Basic Science Credit Hours	33
Biology and Chemistry Credit Hours	25
General Education Credit Hours	24
Total Credit Hours	137

Freshman Year		
Fall	Credit Hours	
ECE 111	Introduction to Engineering I	3
ENG 105	English Composition I	3
MTH 151	Calculus I for Engineers	5
PHY 205	University Physics I	3
HA Cognate (Humanities and Arts Elective) ⁴		3

700 Level Technical Elective ^{1,3}	3
Term Credit Hours:	9
Total Credit Hours:	152

¹ See description of electives under the Departmental Electives Section.

² Offered only in the Fall semester.

³ Should be taken as Graduate (G) courses.

Minor in Computer Engineering

Students wishing to minor in Computer Engineering must satisfy the following requirements:

Core Courses		
ECE 118	Introduction to Programming	3
ECE 218	Data Structures	3
ECE 304	Logic Design	3
ECE 312	Processors: Hardware, Software, And Interfacing	4
Select a minimum of 5 credit hours of computer engineering electives of the following:		5
ECE 315	Digital Design Laboratory	
ECE 316	Structured Digital Design	
ECE 318	Algorithms	
ECE 322	Systems Programming	
ECE 414	Computer Organization and Design	
ECE 454 & ECE 455	Digital System Design and Testing and Design-for-Testability Laboratory	
ECE 511	Computability, Complexity, And Algorithms	
ECE 512	Software Engineering and Architecture	
ECE 513	Software Design and Verification	
ECE 519	Design of Computing Languages	
ECE 521	Computer Operating Systems	
ECE 534	Communication Networks	
ECE 537	Principles of Artificial Intelligence	
ECE 548	Machine Learning	
ECE 567	Database Design and Management	
Total Credit Hours		18

1. Students with a major in Electrical Engineering wishing to add a minor in Computer Engineering must take 6 Computer Engineering course credit hours in addition to those needed to satisfy their degree requirements.

2. A minimum grade point average of 2.0 in all ECE courses taken.

Minor in Electrical Engineering

Students wishing to minor in Electrical Engineering should satisfy a 15 credit hour requirement specified as follows:

1. A core of 7 credit hours consisting of ECE 201, ECE 204, and ECE 305.
2. At least 8 credit hours of Electrical Engineering Electives at the 300 level or above and subject to approval of an academic advisor.

3. Students with a major in Computer Engineering wishing to add a minor in Electrical Engineering must take 6 Electrical Engineering course credit hours in addition to those needed to satisfy their degree requirements.

4. A 2.0 grade point average in all ECE courses taken.

Engineering Science

Introduction

The curricula in the engineering sciences have been designed to prepare a student to fill the gap between the pure and applied sciences. The programs have been planned to enable the graduate to meet, work, and communicate with scientists and engineers at all levels of research and development, design and production, sales and distribution and to participate in the rapid and efficient translation of the latest scientific discoveries into technological achievements.

The general curriculum outlined below has been developed to give the student a firm foundation in the engineering sciences supported by a thorough grounding and facility in mathematics, physics and chemistry. In addition, each student will choose an area of specialization in at least one of the Engineering fields of architectural, civil, biomedical, electrical, industrial, or mechanical, and mathematics, chemistry or physics. By being well grounded in both the basic and applied sciences, the student, upon graduation, will be well prepared to assume responsibilities in his/her field of specialization or continue his/her professional development through graduate studies.

The engineering science program is intended primarily for students who expect to pursue graduate studies, and it will not satisfy the licensure requirements for professional engineering registration.

Premedical Studies: When BIL 150 and BIL 160 are added to the course sequence for engineering science, basic premedical requirements are satisfied. Additional specific courses, such as genetics or biochemistry, may be required for admission to certain medical schools. For optimum timing and course selection students who combine premedical studies and engineering science should consult the faculty advisor for engineering science and the Coordinator, Committee on Premedical Studies.

Because of the nature of the curriculum and its goals, the student must maintain a B average. The degree of Bachelor of Science Engineering Science is awarded upon successful completion of the program.

The required curriculum for the degree of Bachelor of Science in Engineering Science (General Concentration) is shown below as is a typical premed curriculum. A Professional Chemistry Concentration in the Engineering Science Program is available (the Professional Chemistry Program, approved by the American Chemical Society, is also available in the College of Arts and Sciences).

Mission Statement

The mission of the Engineering Science program is to provide excellent undergraduate and graduate education in engineering that will prepare graduates to meet Societies changing needs and aspirations.

Educational Objectives

The objectives of the Engineering Science program are to educate engineers who:

- have a sound background in the fundamentals of engineering science grounded in mathematics, physics and chemistry
- have abilities and knowledge expected by graduate programs
- are prepared to enter graduate programs with a strong background in pure science

Majors

Degree Programs in Engineering Science

- Engineering Science Curriculum - General Concentration (p. 266)
- Engineering Science Curriculum - Premed Concentration (p. 267)

BMB 401 or CHM 360	Biochemistry For The Biomedical Sciences or Physical Chemistry I (Lecture)	3
HA Cognate (Adv. HA Elective) ¹		3
Term Credit Hours:		15
Total Credit Hours:		123

¹ You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).

² Electives are advanced courses selected in coordination with the Faculty Advisor and require his/her approval.

Industrial Engineering

<http://www.ie.miami.edu>

Dept. Code: IEN

Mission Statement

The Department of Industrial Engineering's mission is to provide contemporary and relevant industrial and systems engineering education and research; impart knowledge and skills necessary to design and to improve a variety of manufacturing and service processes; promote life-long learning; and contribute to emerging societal needs.

Overview

Industrial Engineering combines science and technical knowledge with human sciences to design, plan, and analyze systems that involve people, materials, money, energy, equipment, and other resources. Industrial engineers work with personnel in research and development, accounting, engineers in other disciplines, maintenance, human resources, and production to increase organizational productivity, improve quality, reduce health care costs, conserve energy, develop public transportation systems, and improve industrial safety conditions. Industrial engineering distinguishes itself from other engineering professions because it has applications in manufacturing, service, commercial, and governmental

activities. It is the major branch of engineering concerned not only with technology, but with people, making industrial engineers a prime source of management talent.

Through consultation with his/her academic advisor, a student is assisted in choosing electives which will prepare him/her for a degree of specialization compatible with his/her future goals. The available concentrations are Engineering Management and Manufacturing. Specific courses required in each concentration are described in Degree Programs Section.

The Department of Industrial Engineering offers graduate programs leading to the:

- Master of Science in Industrial Engineering
- Master of Science in Environmental Health and Safety
- MSIE/MBA Weekend Executive Program (in conjunction with the School of Business)
- Master of Science in Management of Technology (in conjunction with the School of Business)

The Department also offers:

- a Ph.D. program in Ergonomics and Human Factors
- a Ph.D. in Industrial Engineering.

For further information, see the Bulletin of the Graduate School (p. 510).

Bachelor of Science in Industrial Engineering Industrial Engineering Program Educational Objectives

The major goal of the Industrial Engineering program at the University of Miami is to prepare graduates to contribute to the economy by virtue of employment in a variety of industries: manufacturing (heavy and light, traditional and high technology) and service (health care, retail, transportation, logistics, government, consulting, banking, and insurance). In striving to achieve this goal, the objective of the faculty is to provide all graduates with the mathematical, scientific, and design tools required to formulate problems accurately, generate alternative solutions, evaluate those alternatives, and present the best solutions to clients or decision makers in a fashion that facilitates decision-making processes. In addition, superior students are prepared for graduate studies and research. Within the first several years following graduation from the Industrial Engineering program, graduates are expected to be:

1. Working as professionals by adding value in any one of the following sectors:
 - Service
 - Government
 - Consulting
 - Retail
 - Manufacturing
2. Pursuing or holding a graduate degree and/or developing professionally through continuing education, licensure, certification and seminars in a new area or their chosen areas of expertise.

The curriculum includes required courses in mathematics and the physical sciences that ensure a firm scientific background while advanced departmental courses provide specialization. Required courses

in the people and society - humanities and arts give students the social, ethical and ecological awareness needed in their profession. The courses are designed with the prerequisite structure in mind so that students have to draw from previously acquired knowledge to successfully complete upper level course requirements.

The engineering design experience is interwoven in the curriculum throughout the students' four years of study.

- Starting with IEN 111 **Introduction to Engineering I** and IEN 112 **Introduction to Engineering II**, an introduction to Engineering graphics, Auto CAD, MATLAB, C++, advanced Excel and Access are given.
- The students then move on to take IEN 201 **Methods Analysis and Work Measurement** where they perform work measurement projects in industry, write reports, and make oral presentations to management. In the Spring of their Junior year, the students take IEN 363 **Project Management for Engineers** and they are exposed to techniques and tools in project management such as use of network flow and MS Project.
- Students take IEN 361 **Industrial Cost Analysis** and IEN 380 **Engineering Economy** where they become aware of the impact of productivity on the economic and social well-being of industry and countries. The students are also introduced to basic models of decision making such as the formulation and evaluation of an economic strategy.
- IEN 406 **Computer-Aided Manufacturing** introduces the students to product design in manufacturing and modern concepts of CAD/CAM/Automation.
- IEN 441 **Deterministic Models in Operations Research** focuses on the formulation of linear programming problems and solutions by the simplex method. Related topics include sensitivity analysis, duality theory and network programming. Engineering applications are emphasized.
- IEN 442 **Stochastic Models in Operations Research** focuses on basic concepts and techniques of random processes that are used to develop models for a variety of engineering and managerial problems. Topics include the Poisson Process, Markov chains, renewal theory, queuing models, and reliability.
- IEN 465 **Production and Inventory Control** provides a thorough treatment of modern production and inventory management policies, and their ramifications on supply chain management.
- Theory and applications of decision support systems in industrial engineering are covered in IEN 524 **Decision Support Systems in IE**. The topics include the study of model-based data-based, knowledge-based, and communication-based decision support systems.
- In IEN 557 **Ergonomics and Human Factors Engineering** both laboratory projects and real-world projects are designed, discussed, and conducted.
- Industry based projects are embedded into several other courses such as IEN 512 **Statistical Quality Control and Quality Management**, IEN 547 **Computer Simulation Systems**, and IEN 568 **Materials Handling and Facilities Planning**.
- IEN 494 **Senior Project** is a capstone project course where the students pool all of their knowledge and previous design experience into one major project integrating all components of the curriculum together. These projects are usually industry-based. Students prepare written and oral presentations. These presentations are made before

top management or engineers of the organization where the projects were conducted in the presence of the faculty representatives from the department.

Real world projects are an integral part of most junior and senior level courses. In these courses, communication is emphasized through requirements for oral presentation and written technical reports. This experience provides the graduates with valuable industrial experience and communications skills while studying at the University of Miami.

The teaching laboratories meet current program needs and are constantly being improved. Equipment and experiments are geared to provide instruction in the areas of production system design, work methods and measurement, human factors engineering, manufacturing processes, computer applications in industrial engineering and operations research.

Advanced Writing and Communication Skills: Industrial Engineering students satisfy the University’s Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Industrial Engineering students acquire Advanced Writing and Communication skills in the following core courses:

- IEN 111 Introduction to Engineering I
- IEN 201 Methods Analysis and Work Measurement
- IEN 351 Industrial Safety Engineering
- IEN 363 Project Management for Engineers
- IEN 380 Engineering Economy
- IEN 494 Senior Project
- IEN 512 Statistical Quality Control and Quality Management
- IEN 547 Computer Simulation Systems
- IEN 557 Ergonomics And Human Factors Engineering
- IEN 568 Materials Handling and Facilities Planning

Industrial Engineering Concentrations

- Engineering Management Concentration
- Manufacturing Engineering Concentration
- Pre-Medical Concentration

Five-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering (Five-Year BSIE/MSIE Program)

This program is specifically designed for those students who want to pursue their graduate study as soon as they complete their undergraduate study in Industrial Engineering. The special conditions for this Five-Year BSIE/MSIE Program are as follows:

1. The student must declare his/her intent to participate before the end of the Junior year by submitting an official application to the department graduate committee for admission into the MSIE portion of the program. Exceptions to this rule must be approved by the department faculty.
2. A student wishing to withdraw from the Five-Year Program without the MSIE degree must complete all the requirements for the BSIE program, including the IEN 494 Senior Project in order to get his/her BSIE degree.

3. To qualify for the MSIE degree, the student must meet all the pertinent Graduate School requirements, including an acceptable score on the GRE (Graduate Record Examination) and a minimum of 3.0 GPA.
4. The student is awarded both the BSIE and MSIE degrees at the end of the fifth year when all undergraduate and graduate requirements are satisfied.

Majors

Majors in Industrial Engineering

- B.S.I.E. in Industrial Engineering (p. 269)
- B.S.I.E. in Industrial Engineering - Engineering Management Concentration (p. 270)
- B.S.I.E. in Industrial Engineering - Manufacturing Concentration (p. 272)
- B.S.I.E. in Industrial Engineering - Pre-Med Concentration (p. 273)
- Five-Year Bachelor of Science in Industrial Engineering and Master of Science in Industrial Engineering B.S.I.E./M.S.I.E. (p. 275)
- Five-Year Bachelor of Science in Industrial Engineering (Engineering Management Concentration) and Master of Science in Industrial Engineering B.S.I.E./M.S.I.E. (p. 274)

Total Credit Hours:		138

¹ To be selected from lists of approved People and Society (PS)/ Humanities and Arts (HA) (or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

² Advanced Bioscience Elective is to be chosen from BIL 250, BIL 255, BIL 268, MIC 301, CHM 202, or BMB 402. **Students should verify admission requirements of their medical school of interest to verify Adv. Bioscience requirements, e.g. organic chemistry II, biochemistry, or both.**

³ Technical or Science Elective Lab is selected from a science lab complementing the Adv Bioscience Elective (e.g., CHM or BIL lab).

Five-Year Bachelor of Science in Industrial Engineering (Engineering Management Concentration) and Master of Science in Industrial Engineering B.S.I.E./M.S.I.E.

Freshman Year

¹ To be selected from lists of approved People and Society (PS)/ Humanities and Arts (HA) (or applicable cognates). Students take a minimum of 3 courses (9 credit hours) in HA cognate and 3 courses in PS Cognate (9 credit hours).

² The Technical Elective is selected from courses at the 300 level or above, offered by one of the following departments: MTH, BME (except BME 320), CAE, ECO, EEN, IEN, MEN, ACC, FIN, MGT(Except MGT 303), MAS, MKT.

³ IEN Electives are selected from courses at the 300 level or above, offered by the Department of Industrial Engineering.

⁴ IEN Electives are selected from courses at the 600 or 700 level, offered by the Department of Industrial Engineering.

Minor in Industrial Engineering

A student majoring in another discipline who chooses to take a minor in Industrial Engineering must complete 15 credit hours of coursework consisting of:

IEN 201	Methods Analysis and Work Measurement	3
IEN 310	Introduction to Engineering Probability	3
or IEN 311	Applied Probability And Statistics	
Select three from the following courses:		9
IEN 351	Industrial Safety Engineering	
IEN 361	Industrial Cost Analysis	
IEN 363	Project Management for Engineers	
IEN 380	Engineering Economy	
IEN 557	Ergonomics And Human Factors Engineering	
IEN 570	Engineering Management	
IEN 571	Engineering Entrepreneurship	
IEN 572	Management of Technological Innovation	
Total Credit Hours		15

Substitutions may be accepted with the permission of the Department Chairman.

Mechanical and Aerospace Engineering

<http://www.mae.miami.edu>

Dept. Code: MAE

Introduction

Engineering is the art of applying the knowledge of science for the benefit of humanity. Mechanical Engineering is the most broadly based area of engineering. It is concerned with the analysis, design,

development and application of equipment for such diverse fields as energy conversion, transportation, production machinery, consumer goods, and environmental control. Today's advanced technology is largely a result of the skill of mechanical engineers who are heavily represented in most fields of modern industry.

Because of the varied careers and opportunities which are available to the Mechanical Engineering graduates, the curriculum emphasizes education in the fundamentals of the physical, mathematical, and engineering sciences, including materials science, solid mechanics, fluid mechanics and thermodynamics. These basic subjects are followed by courses in their application to the design and analysis of engineering devices and systems. Computers are utilized for analysis and design throughout the curriculum.

Aerospace Engineering is concerned with the analysis, design and development of a wide variety of aircraft and space vehicles and systems. The undergraduate aerospace engineering program is designed to provide a broad based foundation in aeronautics and astronautics, including topics such as aerodynamics, propulsion, aerospace structures and materials, flight dynamics, control and performance.

In the junior and senior years, the student is assisted in choosing technical electives in preparation for a degree of professional specialization or for further study in engineering, law, business or medicine. With the aid of an advisor and the concurrence of the department chairman, the student may select courses compatible with a variety of career goals.

The department offers two undergraduate degrees:

- Bachelor of Science in Mechanical Engineering and
- Bachelor of Science in Aerospace Engineering.

Within the Bachelor of Science in Mechanical Engineering program, sequences of courses are available to provide advanced knowledge in such traditional areas as electromechanical design, heat transfer, solid mechanics, fluid mechanics, and materials science. There are concentrations in:

- Aerospace Engineering and
- Internal Combustion Engines.

Mission Statements

Mission of Mechanical and Aerospace Engineering Department

The mission of the Department of Mechanical and Aerospace Engineering is to provide excellent undergraduate education in aerospace engineering and undergraduate and graduate education in mechanical engineering that will prepare graduates to meet Society's changing needs and aspirations.

Mission of the Mechanical Engineering Program

The mission of the Mechanical Engineering program is to provide excellent undergraduate education in Mechanical Engineering that will prepare graduates to meet society's changing needs and aspirations.

Mission of the Aerospace Engineering Program

The mission of the Aerospace Engineering program is to provide excellent undergraduate education in Aerospace Engineering that will prepare graduates to meet society's changing needs and aspirations.

Educational Objectives

The educational objectives of the undergraduate Aerospace Engineering (B.S.A.S.E.) Program are to prepare graduates, within the first four to six years after graduation, to be:

- working as a professional or as an entrepreneur in an area closely related to aerospace engineering, and/or
- exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.

The educational objectives of the undergraduate Mechanical Engineering (B.S.M.E.) Program are to prepare graduates, within the first four to six years after graduation, to be:

- working as a professional or as an entrepreneur in an area closely related to mechanical engineering, and/or
- exhibiting lifelong learning by pursuing or having completed a graduate or professional degree and/or demonstrated professional development.

Advanced Writing and Communication Skills

Mechanical & Aerospace Engineering students satisfy the University's Advanced Writing and Communication Skills requirement by completing a set of classroom courses, laboratory courses and design courses where they learn effective oral, graphical and technical writing skills. Mechanical & Aerospace Engineering students acquire Advanced Writing and Communication skills in the following core courses:

MAE 111	Introduction to Engineering I	3
MAE 112	Introduction to Engineering II	2
MAE 241	Measurements Laboratory	3
MAE 351	Mechanics Laboratory	2
MAE 404	Experimental Engineering Laboratory	2
MAE 442	Capstone Design Project-I	1
or MAE 444	Capstone Aerospace Design Project-I	
MAE 443	Capstone Design Project-II	2
or MAE 445	Capstone Aerospace Design Project-II	

Graduate Studies

Graduate programs leading to the degrees of Master of Science and Doctor of Philosophy are offered by the Department with options in various engineering and interdisciplinary fields. Detailed information is available in the Bulletin of the Graduate School (p. 514).

Majors

Majors in Mechanical and Aerospace Engineering

- B.S. in Mechanical Engineering (p. 280)
- B.S. in Mechanical Engineering - Aerospace Engineering Concentration (p. 281)

- B.S. in Mechanical Engineering - Internal Combustion Engines Concentration (p. 282)
- B.S. in Aerospace Engineering (p. 279)
- B.S. in Aerospace Engineering and B.S. in Mechanical Engineering Dual Degree (p. 279)
- B.S. and M.S. in Mechanical Engineering (p. 278)

Minors

Minor in Mechanical and Aerospace Engineering

- Mechanical Engineering (p. 282)

B.S. and M.S. in Mechanical Engineering

The five-year BS/MS program leads to both the B.S. degree and the M.S. degree in Mechanical Engineering in five years. The program is intended for exceptional students who are admitted to the graduate program in their junior year. Students applying for this program must have a grade point average of at least 3.0 and must attain a score of more than 1000 on the Graduate Record Examination (taken before the fifth year). The curriculum requirements for this program are as follows:

Freshman Year		
Fall		Credit Hours
MAE 111	Introduction to Engineering I	3
ENG 105	English Composition I	3

B.S. in Mechanical Engineering - Aerospace Engineering Concentration

The mission of the aerospace engineer is to design and manufacture payload carrying vehicles to travel distances at the lowest cost in the shortest period of time. The training of the aerospace engineer is by demand multidisciplinary and by spirit pioneering. It includes aerodynamics, propulsion, advanced materials, structures, controls, robotics, electronics and computer usage.

An option has been developed to allow students at the University of Miami to have a concentration of courses in Aerospace Engineering. This concentration in aerospace is built on the existing accredited degree program in Mechanical Engineering.

See Aerospace Engineering Concentration Curriculum (p. 279).

MAE 310	Heat Transfer	3
MAE 342	Mechanical Design II	3
MAE 351	Mechanics Laboratory	2
MAE 371	Aerodynamics	3
MAE 362	Computer Analysis of Mechanical and Aerospace Engineering Problems	3
Term Credit Hours:		17
Senior Year		
Fall		
MAE 404	Experimental Engineering Laboratory	2
MAE 412	System Dynamics	3
MAE 441	Design of Fluid and Thermal Systems	3
MAE 471	Flight Dynamics	3
MAE 570	Aero Propulsion	3
PS Cognate (PS Elective) ¹		3

MAE 442	Capstone Design Project-I	1
Term Credit Hours:		18
Spring		
MAE 443	Capstone Design Project-II	2
MAE 415	Automatic Control	3
MAE 470	Introduction to Aerospace Structures	3
HA Cognate (HA Elective) ¹		3
PS Cognate (Adv. PS- Elective) ¹		3
HA Cognate (Adv. HA Elective) ¹		3
Term Credit Hours:		17
Total Credit Hours:		129

¹ You must complete a minimum of 1 PS cognate and 1 HA cognate to be selected from the list of available cognates. Each cognate should be a minimum of three courses (9 credit hours).

B.S. in Mechanical Engineering - Internal Combustion Engines Concentration

This program is designed to acquaint the mechanical engineering student with the fundamental science and engineering underlying the design of both conventional and high performance internal combustion engines and the fundamentals of emission formation in combustion systems, automobile mechanisms and structures including vibrations and noise. Included are studies of conventional fuels and synthetic fuels of the future such as hydrogen and methanol.

Technical Electives are:

MAE 503	Internal Combustion Engines	3
MAE 514	Advanced Internal Combustion Engines Experimental Studies	3
MAE 521	Exhaust Emission Control	3

Minor in Mechanical Engineering

A student in the College of Arts and Sciences choosing the general field of mechanical engineering as a minor must complete 15 credit hours consisting of the following:

Core Courses		
CAE 210	Mechanics of Solids I	3
MAE 111	Introduction to Engineering I	3
Elective Courses		
Select 9 credit hours from one of the following areas of specialization:		9
Energy Engineering:		
MAE 303	Thermodynamics I	
MAE 420	Applied Thermodynamics	
MAE 503	Internal Combustion Engines	
MAE 506	Nuclear Engineering	
MAE 510	Fundamentals of Solar Energy Utilization	
Environmental Engineering:		
MAE 303	Thermodynamics I	

MAE 309	Fluid Mechanics
MAE 408	Heating, Ventilating, and Air Conditioning
MAE 510	Fundamentals of Solar Energy Utilization
MAE 521	Exhaust Emission Control
Materials Engineering:	
MAE 207	Mechanics of Solids II
MAE 301	Engineering Materials Science
MAE 302	Mechanical Behavior Of Materials
MAE 507	Advanced Mechanics of Solids
Thermal Engineering:	
MAE 303	Thermodynamics I
MAE 310	Heat Transfer
MAE 408	Heating, Ventilating, and Air Conditioning
MAE 420	Applied Thermodynamics
MAE 441	Design of Fluid and Thermal Systems
MAE 503	Internal Combustion Engines
MAE 508	Intermediate Heat Transfer
MAE 510	Fundamentals of Solar Energy Utilization
Total Credit Hours	15

Marine and Atmospheric Science

<http://www.rsmas.miami.edu/academics/undergraduate>

Introduction

The Rosenstiel School of Marine and Atmospheric Science was established in 1943 as the Marine Laboratory of the University of Miami. It has grown from its modest beginnings in a boathouse to be one of the nation's leading institutions for oceanographic and atmospheric research and education.

Originally a tropical marine biological facility, the Marine Laboratory initiated a program of studies leading to the Master of Science degree in 1949. In 1953, laboratory and classroom buildings were constructed on the School's present campus on Virginia Key, and in the late fifties, the Marine Laboratory expanded its staff and developed its oceanographic capabilities in response to the increased interest in scientific research in the United States. It became the Institute of Marine Science in 1961. Ocean-going research vessels were acquired and additional buildings were constructed to accommodate new wide-ranging projects. In 1969, the Institute, now a School, was named for Dorothy H. and Lewis Rosenstiel in recognition of a major contribution, made through the Rosenstiel Foundation, to encourage progress in the marine and atmospheric sciences at the University of Miami. In 1977, the Rosenstiel School and College of Arts and Sciences joined together to establish an undergraduate Marine and Atmospheric Science program based on the Coral Gables campus. The degree granting authority for this program was formally transferred to the Rosenstiel School in 2008.

Today the Rosenstiel School has a faculty of over 80 who conduct sponsored research while offering studies leading to the Bachelor of Science, Bachelor of Arts, Master of Arts, Master of Science, Master of Professional Science and Doctor of Philosophy degrees.

Government agencies and private organizations support basic and applied research at the Rosenstiel School. Graduate and undergraduate students are an integral part of the research effort, and research programs, many multidisciplinary in nature, provide the environment within which professors and students interact.

The Rosenstiel School has modern laboratory facilities and a state-of-the-art catamaran, named the F. G. WALTON SMITH, in honor of the founder of the Rosenstiel School.

Mission

The Rosenstiel School strives to be in the forefront of basic and applied research as it applies to the ocean, atmosphere and global environment, with particular emphasis on subjects of societal significance. Our goal is to provide excellence in graduate and undergraduate education and research training, and to be a strong force towards improved environmental understanding and management.

Academic Policies

Admission

Applications for incoming freshmen are processed and reviewed by the Office of Admission. Enrollment in the Undergraduate Marine Science and Atmospheric Science Programs is selective and highly competitive.

Admission decisions are based on the secondary school record, SAT/ACT score, counselor's evaluation and the applicant's essay.

Student Responsibilities

Students of the Rosenstiel School are responsible for planning their own programs and for meeting degree requirements. It is the student's responsibility to understand and fully comply with all the provisions set forth in this Bulletin and written changes to their program of study.

Academic Progress

The Rosenstiel School will review each student's record at the end of each semester. All students in the Undergraduate Marine Science and Atmospheric Science Programs must maintain a cumulative grade point average of 2.5 or better in order to remain in the program. Only those courses passed with a grade of C- or better may be applied to the major or minor.

Honors

Honors in the Marine and Atmospheric Science Program may be earned by students who have a 3.5 GPA and have completed 4 credit hours of independent research and a senior thesis.

Degree Programs

The Rosenstiel School of Marine and Atmospheric Science offers degree programs on both the undergraduate and graduate levels for students interested in marine science and/or atmospheric science as a career.

Undergraduate Degree Programs

The Atmospheric Science program offers a Bachelor of Science in Marine and Atmospheric Science degree in Meteorology, with a curriculum conforming to the recommendations of the American Meteorological Society. The BS in Meteorology is a single major program, with a minor in Mathematics. Students may combine Meteorology with a second major in Mathematics, Marine Science, Physics, or Broadcast Journalism.

A five-year course of study culminating in the Master of Professional Science is also available.

The Rosenstiel School Marine Science program offers two undergraduate degree options, a Bachelor of Science in Marine and Atmospheric Science and a Bachelor of Arts in Marine Affairs. The Bachelor of Science degree program is meant for students planning to continue with graduate studies in marine science, or for those who will pursue a technical career in this area in government or private industry.

The Bachelor of Arts degree is designed for students planning either non-technical careers with government agencies or private industries directly or indirectly concerned with the ocean, or graduate studies in such areas as business, law, economics, political science, education, or communication.

In cooperation with the graduate program in Marine Affairs and Policy, a five-year BA/MPS program in Marine Affairs is available. This program enables qualified students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Affairs with only one additional year.

Graduate Degree Programs

Graduate courses in the marine and atmospheric sciences are offered through the Graduate School and the Rosenstiel School of Marine and

Atmospheric Science and are listed under the Rosenstiel School graduate program entries in the Bulletin.

Courses at the 500-level may be taken for undergraduate credit hour with junior standing and departmental consent. These courses are listed in the course section of the undergraduate bulletin.

Requirements for Graduation

In addition to satisfying the course requirements for graduation with majors in Marine Science, Meteorology and Marine Affairs (specified above under "Undergraduate Majors (p. 284)"), students are expected to satisfy the School's General Education Requirements. General Education Requirements stress breadth of knowledge and the cultivation of intellectual abilities essential for the acquisition of knowledge. Courses taken for the major, the minor, and the writing requirement may also be used to satisfy the General Education Requirements.

Areas of Proficiency

A) English Composition: Students must complete ENG 105 and either ENG 106 or ENG 107, or their approved equivalents, typically in the first year of residence. Students with an appropriate score on the Advanced Placement [AP] language or literature examinations, or with an appropriate score on the International Baccalaureate [IB] higher level English examination, may earn 6 credits in English 105 and English 106. Those with an appropriate score on the SAT/V or ACT/E exams may be exempted from English 105.

B) Communication across the Curriculum: Students in the Rosenstiel School will, as part of their major curriculum, take courses designed to provide students with the skills required for effective communication, both written and oral, within the discipline.

C) Mathematics

Bachelor of Arts in Marine Affairs:

Select one of the following:	3-4
MTH 108 Precalculus Mathematics II	
MTH 113 Finite Mathematics	
MTH 130 Introductory Calculus	
MTH 140 Calculus Concepts with Foundations A	
MTH 141 Calculus Concepts with Foundations B	
MTH 161 Calculus I	
Select an approved course in statistics or computer science of the following or an approved alternative:	3-4
MSC 204 Environmental Statistics	
BIL 311 Biostatistics	
IEN 311 Applied Probability And Statistics	
MTH 224 Introduction to Probability and Statistics	
PSY 291 Introduction To Biobehavioral Statistics	
CSC 120 Computer Programming I	
CSC 210 Computing for Scientists	

Bachelor of Science in Marine and Atmospheric Science:

Complete two semesters of Calculus:	8
MTH 161 Calculus I	

MTH 162 Calculus II	
Select an approved course in statistics or computer science of the following or an approved alternative:	3-4
MSC 204 Environmental Statistics	
BIL 311 Biostatistics	
IEN 311 Applied Probability And Statistics	
MTH 224 Introduction to Probability and Statistics	
PSY 291 Introduction To Biobehavioral Statistics	
CSC 120 Computer Programming I	
CSC 210 Computing for Scientists	

Areas of Knowledge

As described under the section General Education Requirements (p. 19) under *General University Information*, students must complete one cognate in each of three the Areas of Knowledge:

1. Arts and Humanities,
2. People and Society (Social Sciences) and
3. Science, Technology, Engineering and Mathematics (STEM).

All undergraduate students in the Rosenstiel School will fulfill their STEM cognate requirement through their major requirements. Students in Marine Affairs will fulfill their People and Society cognate requirement through their minor. Students in Marine Science may elect to fulfill the People and Society cognate requirement with a Marine Policy cognate. Students in Meteorology may elect to fulfill the People and Society cognate requirement with a Broadcast Meteorology cognate. Cognates integrating Study Abroad courses are also available. See program advisors for details.

Atmospheric Science - Meteorology

Dept. Code: ATM

Meteorology

Meteorology is the study of the atmosphere, including climate and climate variability, weather forecasting, cloud and precipitation physics, tropical dynamics, severe weather and hurricanes. Atmospheric scientists use computer models and sophisticated observing systems to describe and understand the atmosphere. The curriculum emphasizes math and physics basics, providing a strong foundation for an intensive study of meteorology. The curriculum, conforming to the recommendations of the American Meteorological Society, prepares students for graduate school and for jobs in industry and government.

The Rosenstiel School offers a Bachelor of Science in Marine and Atmospheric Science with a major in Meteorology.

Although Meteorology is a single major program, students often combine Meteorology with a second major in such diverse fields as mathematics, marine science or broadcast journalism.

Majors

Majors in Atmospheric Science - Meteorology

- B.S. in Meteorology (p. 287)
- B.S. Double Major in Meteorology and Mathematics (p. 286)

- B.S. Double Major in Meteorology and Marine Science (p. 286)

Minors

Minors in Atmospheric Science - Meteorology

- Meteorology (p. 288)
- Climate Science and Policy (p. 287)

B.S. Double Major in Meteorology and Marine Science

A double major in Meteorology and Marine Science is well suited for students with interests in the physical aspects of climate, as well as the interaction of the ocean and the atmosphere. It provides an excellent foundation for students who want to pursue graduate degrees in these fields. In addition to those courses that satisfy General Education Requirements, the double major curriculum is as follows:

Atmospheric Science		
ATM 103	Survey of Modern Meteorology	3
ATM 118	Current Weather Topics	2
ATM 243	Weather Forecasting	3
ATM 303	Atmospheric Observation	3
ATM 305	Atmospheric Thermodynamics	3
ATM 405	Atmospheric Dynamics I	3
ATM 406	Atmospheric Dynamics II	3
ATM 407	Weather Analysis	4
ATM 409	Cloud Physics And Radiation	3
ATM 220	Climate And Global Change	3
or ATM 307	Introduction To The Physics Of Climate	
Marine Science		
MSC 111	Introduction to Marine Science	3
MSC 215	Chemical Oceanography	3
MSC 230	Introduction to Marine Biology	3
MSC 301	Introduction to Physical Oceanography	3
MSC 302	Introduction To Physical Oceanography Lab	1
MSC 216	Chemical Oceanography Laboratory	1
or MSC 232	Introduction to Marine Biology Laboratory	
Select 9 credit hours of MSC electives, of which at least 6 must be at the 300-level or higher		9
Biology		
Select one of the following:		5
BIL 150	General Biology	
& BIL 151	and General Biology Laboratory	
BIL 160	Evolution and Biodiversity	
& BIL 161	and Evolution and Biodiversity Laboratory	
Chemistry		
CHM 111	Principles of Chemistry I	3
CHM 112	Principles of Chemistry II	3
CHM 113	Chemistry Laboratory I	1
CHM 114	Chemistry Laboratory II	1
Computer Science		
CSC 120	Computer Programming I	4

Geological Sciences

GSC 111	Earth System History	4-5
or GSC 110	The Earth System	
& GSC 114	and Earth Processes Lab	

Mathematics

MTH 161	Calculus I	4
MTH 162	Calculus II	4
MTH 210	Introduction to Linear Algebra	3
MTH 310	Multivariable Calculus	3
or MTH 211	Calculus III	
MTH 311	Introduction to Ordinary Differential Equations	3

Physics

PHY 205	University Physics I	3
PHY 206	University Physics II	3
PHY 207	University Physics III	3
PHY 208	University Physics II Lab	1

Statistics

MSC 204	Environmental Statistics	3
or MTH 224	Introduction to Probability and Statistics	

Total Credit Hours **104-105**

B.S. Double Major in Meteorology and Mathematics

A double major in Meteorology and Mathematics provides an excellent foundation for students who want to pursue graduate degrees in meteorology and related fields. Tracks in Applied Analysis and Probability and Statistics are available. In addition to those courses that satisfy General Education Requirements, the double major curriculum is as follows:

Atmospheric Science		
ATM 103	Survey of Modern Meteorology	3
ATM 118	Current Weather Topics	2
ATM 243	Weather Forecasting	3
ATM 303	Atmospheric Observation	3
ATM 305	Atmospheric Thermodynamics	3
ATM 405	Atmospheric Dynamics I	3
ATM 406	Atmospheric Dynamics II	3
ATM 407	Weather Analysis	4
ATM 409	Cloud Physics And Radiation	3
ATM 220	Climate And Global Change	3
or ATM 307	Introduction To The Physics Of Climate	
Mathematics Core		
Select one of the following:		4
MTH 161	Calculus I	
& MTH 162	and Calculus II	
MTH 171	Calculus I	
& MTH 172	and Calculus II	
MTH 210	Introduction to Linear Algebra	3
MTH 224	Introduction to Probability and Statistics	3
MTH 230	Introduction to Abstract Mathematics	3

MTH 310	Multivariable Calculus	3
MTH 311	Introduction to Ordinary Differential Equations	3
MTH 433	Advanced Calculus	3
or MTH 533	Introduction to Real Analysis I	
Physics		
PHY 205	University Physics I	3
PHY 206	University Physics II	3
PHY 207	University Physics III	3
PHY 208	University Physics II Lab	1
Chemistry		
ATM 265	Atmospheric Chemistry	3-4
or CHM 111	Principles of Chemistry I	
& CHM 113	and Chemistry Laboratory I	
Computer Science		
CSC 120	Computer Programming I	4
Elective		
Select 6 credit hours of upper level elective, to be approved by advisor		6
Tracks		
Select one of the following Tracks:		12
Applied Analysis:		
MTH 512	Elementary Complex Analysis	
MTH 542	Statistical Analysis	
Select one of the following Sequences:		
MTH 513	Partial Differential Equations I & MTH 514 and Partial Differential Equations II	
MTH 515	Ordinary Differential Equations & MTH 516 and Dynamics and Bifurcations	
Probability and Statistics:		
MTH 513	Partial Differential Equations I	
MTH 524	Introduction to Probability Theory	
MTH 525	Introduction to Mathematical Statistics	
MTH 542	Statistical Analysis	
Total Credit Hours		87-88

B.S. in Meteorology

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Meteorology are:

Atmospheric Science		
ATM 103	Survey of Modern Meteorology	3
MSC 111	Introduction to Marine Science	3
ATM 118	Current Weather Topics	2
ATM 243	Weather Forecasting	3
ATM 303	Atmospheric Observation	3
ATM 305	Atmospheric Thermodynamics	3
ATM 405	Atmospheric Dynamics I	3
ATM 406	Atmospheric Dynamics II	3
ATM 407	Weather Analysis	4
ATM 409	Cloud Physics And Radiation	3

ATM 220	Climate And Global Change	3
or ATM 307	Introduction To The Physics Of Climate	
Mathematics ¹		
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MTH 210	Introduction to Linear Algebra	3
MTH 224	Introduction to Probability and Statistics	3
MTH 211	Calculus III	3
or MTH 310	Multivariable Calculus	
MTH 311	Introduction to Ordinary Differential Equations	3
or MTH 320	Introduction to Numerical Analysis	
Physics		
PHY 205	University Physics I	3
PHY 206	University Physics II	3
PHY 207	University Physics III	3
PHY 208	University Physics II Lab	1
Chemistry		
ATM 265	Atmospheric Chemistry	3-4
or CHM 111	Principles of Chemistry I	
& CHM 113	and Chemistry Laboratory I	
Computer Science		
CSC 120	Computer Programming I	4
Electives		
Select one free elective in Atmospheric Science, Mathematics or Science		3
Select 6 credit hours of upper level elective, to be approved by advisor ²		6
Recommended courses include:		
ATM 306	Advanced Principles In Broadcasting Meteorology	
ATM 307	Introduction To The Physics Of Climate	
ATM 321	Scientific Programming In The Atmospheric Sciences	
MSC 301	Introduction to Physical Oceanography	
Total Credit Hours		79-80

¹ Broadcast meteorology majors must take either MTH 224 or MTH 311/MTH 320, but are not required to take both.

² Both ATM 220 and ATM 307 may be taken for full credit.

500-level courses are open to undergraduates but typically offered on the RSMAS campus. For Broadcast Meteorology double-majors and minors, the electives may be taken from the School of Communications.

Minor in Climate Science and Policy

A minor in Climate Science and Policy requires 15 credits which must include:

MSC 346	Climate Science and Policy	3
Select three of the following (List A):		
ATM 102	Introduction To Weather And Climate	3
or ATM 103	Survey of Modern Meteorology	
ATM 220	Climate And Global Change	3

or MSC 220 Climate and Global Change	
MSC 222 Earth'S Climate: Past And Future	
ATM 307 Introduction To The Physics Of Climate	
GSC 462 Earth's Ancient Atmospheres, Climates, And Sea Levels	
Select one of the following (List B):	3
MSC 313 Coastal Law	
MSC 314 Ocean Law	
MSC 340 Ocean Policy	
MSC 342 Decision Making And The Environment	
RSM 520 Climate and Society	
Total Credit Hours	15

Students with a Meteorology major should replace ATM 102/ATM 103 from List A with an additional course from list B. Students from a program without a statistics requirement must also take an approved course in statistics increasing this to an 18 credit hour minor. Approved statistics courses include the statistics courses offered throughout all of UM programs, including:

MTH 224 Introduction to Probability and Statistics	3
MSC 204 Environmental Statistics	3
BIL 311 Biostatistics	3
ECS 204 Environmental Statistics	3
EPS 351 Introduction to Statistics and Research Design	3
GSC 204 Environmental Statistics	3
IEN 311 Applied Probability And Statistics	3
MAS 201 Introduction to Business Statistics	3
MAS 311 Applied Probability and Statistics	3
NUR 202 Introductory Statistics in Health Care	3
PSY 291 Introduction To Biobehavioral Statistics	3
PSY 292 Introduction To Biobehavioral Statistics For Non-Majors	3

The minor satisfies either the STEM Area of Knowledge cognate requirement, or the People and Society Area of Knowledge cognate requirement. Only those courses passed with a grade of "C-" or higher may be applied to the minor.

Minor in Meteorology

A minor in Meteorology requires 15 credit hours which must include:

ATM 103 Survey of Modern Meteorology	3
Select 12 credit hours of the following:	12
ATM 118 Current Weather Topics	
ATM 220 Climate And Global Change	
ATM 243 Weather Forecasting	
ATM 265 Atmospheric Chemistry	
ATM 303 Atmospheric Observation	
ATM 306 Advanced Principles In Broadcasting Meteorology	
Total Credit Hours	15

Only those courses passed with a grade of "C-" or higher may be applied to the minor.

Marine Affairs

The ocean is acquiring an ever-increasing significance as an avenue of worldwide commerce and communication and as a source of food, energy, minerals and fuels. As nations and private concerns become more involved in the ocean, the need increases for qualified professionals to deal with the commercial and legal complexities of marine affairs. In order to meet this need, the Rosenstiel School offers a Bachelor of Arts degree with a major in Marine Affairs combined with a required minor or additional major in Anthropology, Economics, Ecosystem Science and Policy, Geography, International Studies, Latin American Studies, Political Science, or an approved field within the School of Business Administration. Students in the School of Communication may include Marine Affairs as a second major. This program is designed for students who wish to prepare themselves for graduate studies and careers in ocean related areas of business, policy, management, law, and communication.

5 Year BA/MPS Program in Marine Affairs

The Rosenstiel School offers a 5 year BA/Master of Professional Science (MPS) Program in Marine Affairs. This program enables qualified Marine Affairs students to earn a Bachelor of Arts in Marine Affairs in four years with the opportunity to earn a Master of Professional Science in Marine Affairs in one additional year. Conditional acceptance to the graduate Marine Affairs and Policy program is based on the student's GPA at the end of the sophomore year. Students must then apply for acceptance to the graduate program at the Rosenstiel School during their junior year.

Majors

Majors in Marine Affairs

- B.A. in Marine Affairs (p. 288)

Minors

Minor in Marine Affairs

- Marine Policy (p. 289)
- Climate Science and Policy (p. 289)

B.A. in Marine Affairs

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Affairs are:

Marine Affairs		
MSC 111 Introduction to Marine Science		3
MSC 215 Chemical Oceanography		3
MSC 230 Introduction to Marine Biology		3
MSC 313 Coastal Law		3
or MSC 314 Ocean Law		
MSC 310 Living Resources of the Ocean		3
or MSC 340 Ocean Policy		
MSC 345 Economics of Natural Resources and the Environment		3

MSC 460	Spatial Applications in Marine Science	3
Select 9 credit hours of approved electives in Marine Affairs		9
Other Required Courses		
GSC 110	The Earth System	3-4
or GSC 111	Earth System History	
ECO 211	Economic Principles and Problems	3
Select 6 credit hours of upper level elective, to be approved by advisor.		6
Biology		
BIL 150	General Biology	4
BIL 160	Evolution and Biodiversity	4
Chemistry		
CHM 111	Principles of Chemistry I	3
CHM 112	Principles of Chemistry II	3
Mathematics		
Completion of 3 credit hours of Mathematics above MTH107		3-4
Select one approved course in Computer Programming or Statistics		3
Total Credit Hours		62-64

500-level courses offered through the graduate Marine Affairs and Policy or Marine Ecosystems and Society programs at the Rosenstiel School may be taken by Junior or Senior students with permission.

Minor in Climate Science and Policy

See under **Atmospheric Science** (p. 285)

Minor in Marine Policy

A minor in Marine Policy requires 15 credits which must include:

Required Courses		
MSC 111	Introduction to Marine Science	3
Electives		
Select 12 credit hours of the following:		12
MSC 310	Living Resources of the Ocean	
MSC 313	Coastal Law	
MSC 314	Ocean Law	
MSC 340	Ocean Policy	
MSC 342	Decision Making And The Environment	
MSC 345	Economics of Natural Resources and the Environment	
MSC 346	Climate Science and Policy	
MSC 410	Marine Conservation Science	
MSC 415	Coral Reef Science and Management	
MSC 420	Political Ecology of the Galapagos	
MAF 501	Political Ecology of Marine Management	
MAF 504	Fieldwork in Coastal Management	
MAF 510	Environmental Planning and the Environmental Impact Statement	
MAF 512	Aquaculture Management	
MAF 518	Coastal Zone Management	

MAF 530	Port Operations and Policy	
Total Credit Hours		15

Students majoring in the School of Marine and Atmospheric Science should replace MSC 111 with an additional elective, and all electives must be above and beyond those used for the major. The Marine Policy minor fulfills the requirements of a People and Society cognate.

Marine Science

Dept. Code: MSC

Marine Science is an interdisciplinary program dealing with the study of the world's oceans, their physical and biological constituents, the influence of oceanic resources on human society, and the conservation and future development of these resources.

The Bachelor of Science double major in Marine Science prepares students for admission to graduate programs and for careers in teaching and research as well as for technical careers in government and private industries concerned with the oceans. The Bachelor of Science in Marine Science is a full double major program that requires a major in Marine Science through the Rosenstiel School and a second major in one of the sciences through the College of Arts and Sciences, RSMAS or the College of Engineering. Common second majors are biology, chemistry, geological sciences, physics, biochemistry, computer science, meteorology and microbiology & immunology. Required courses for these combinations are listed below. Second majors in Applied Physics, Engineering (all disciplines), and Mathematics may be taken. Each of the areas of concentration constitutes a rigorous program requiring 120-130 credit hours for graduation.

Majors

Second Major		
Complete all requirements of the second major		
Total Credit Hours		70-72

¹ Required for Biochemistry double majors.

² Required for Engineering, Mathematics and Applied Physics double major.

³ At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

⁴ University Physics is recommended.

B.S. in Marine Science/Biology

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Science/Biology are:

Marine Science		
MSC 111	Introduction to Marine Science	3
MSC 215	Chemical Oceanography	3
MSC 230	Introduction to Marine Biology	3
MSC 232	Introduction to Marine Biology Laboratory	1
MSC 301	Introduction to Physical Oceanography	3
MSC 216	Chemical Oceanography Laboratory	1
or MSC 302	Introduction To Physical Oceanography Lab	
Select 12 credit hours of electives in Marine Science ¹		12
Biology		
BIL 150	General Biology	4
BIL 151	General Biology Laboratory	1
BIL 160	Evolution and Biodiversity	4
BIL 161	Evolution and Biodiversity Laboratory	1
BIL 250	Genetics	3
BIL 255	Cellular and Molecular Biology	3
BIL 330	Ecology	3
BIL 360	Comparative Physiology	3
Select 12 credit hours of electives as described for Biology majors ²		12
Chemistry		
CHM 111	Principles of Chemistry I	3
CHM 112	Principles of Chemistry II	3
CHM 113	Chemistry Laboratory I	1
CHM 114	Chemistry Laboratory II	1
CHM 201	Organic Chemistry I (Lecture)	3
CHM 202	Organic Chemistry II (Lecture) ³	3
CHM 205	Organic Chemistry Laboratory I	1
CHM 206	Organic Chemistry Laboratory II ³	1
Geological Sciences		
Select one of the following:		4-5
GSC 110	The Earth System	
& GSC 114	and Earth Processes Lab	
GSC 111	Earth System History	
Mathematics		
MTH 161	Calculus I	4
MTH 162	Calculus II	4
Select one semester of a computer or statistics course of the following approved classes:		3-4
MSC 204	Environmental Statistics	

BIL 311	Biostatistics	
CSC 120	Computer Programming I	
MTH 224	Introduction to Probability and Statistics	
PSY 291	Introduction To Biobehavioral Statistics	
Physics		
Select one of the following Options: ⁴		10
Option 1:		
PHY 205	University Physics I	
PHY 206	University Physics II	
PHY 207	University Physics III	
PHY 208	University Physics II Lab	
or PHY 209 University Physics Iii Lab		
Option 2:		
PHY 101	College Physics I	
PHY 102	College Physics II	
PHY 106	College Physics Laboratory I	
PHY 108	College Physics Laboratory II	
Electives		
Select 6 credit hours of electives ⁵		6
Total Credit Hours		107-109

¹ At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

² The electives must include at least one lab or field based course. MSC 230 and one advanced biology course may fulfill requirements in both Biology and Marine Science.

³ CHM 202 and CHM 206 may be substituted by courses leading to a major or minor in an approved science or math discipline (BCH, CHM, CSC, GSC, MIC, MTH, PHY).

⁴ University Physics is recommended.

⁵ Including 3 at the upper level, to be approved by advisor.

B.S. in Marine Science/Chemistry

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Science/Chemistry are:

Marine Science		
MSC 111	Introduction to Marine Science	3
MSC 215	Chemical Oceanography	3
MSC 216	Chemical Oceanography Laboratory	1
MSC 230	Introduction to Marine Biology	3
MSC 301	Introduction to Physical Oceanography	3
MSC 232	Introduction to Marine Biology Laboratory	1
or MSC 302 Introduction To Physical Oceanography Lab		
Select 12 credit hours of electives in Marine Science ¹		12
Biochemistry and Molecular Biology		
BMB 401	Biochemistry For The Biomedical Sciences	3
Biology		
Select one of the following:		5

BIL 150	General Biology	
& BIL 151	and General Biology Laboratory	
BIL 160	Evolution and Biodiversity	
& BIL 161	and Evolution and Biodiversity Laboratory	
Chemistry		
CHM 111	Principles of Chemistry I	3
CHM 112	Principles of Chemistry II	3
CHM 113	Chemistry Laboratory I	1
CHM 114	Chemistry Laboratory II	1
CHM 201	Organic Chemistry I (Lecture)	3
CHM 202	Organic Chemistry II (Lecture) ³	3
CHM 205	Organic Chemistry Laboratory I	1
CHM 206	Organic Chemistry Laboratory II ³	1
CHM 304	Structural Identification of Organic Compounds	3
CHM 316	Instrumental Analytical Chemistry	3
CHM 320	Instrumental Methods in Chemistry and Biochemistry	2
CHM 360	Physical Chemistry I (Lecture)	3
CHM 364	Physical Chemistry (Laboratory I)	1
CHM 365	Physical Chemistry II (Lecture)	3
CHM 441	Inorganic Chemistry (Lecture)	3
Select one of the following:		3
CHM 317	The Chemistry of Food and Taste.	
CHM 401	Environmental Chemistry ²	
Any 500-level Chemistry course as described for Chemistry BS majors		
Geological Sciences		
Select one of the following:		4-5
GSC 110	The Earth System	
& GSC 114	and Earth Processes Lab	
GSC 111	Earth System History	
Mathematics		
MTH 161	Calculus I	4
MTH 162	Calculus II	4
Select one semester of a computer or statistics course of the following approved classes:		3-4
MSC 204	Environmental Statistics	
MTH 224	Introduction to Probability and Statistics	
CSC 120	Computer Programming I	
CSC 210	Computing for Scientists	
Physics		
PHY 205	University Physics I	3
PHY 206	University Physics II	3
PHY 207	University Physics III	3
PHY 208	University Physics II Lab	1
or PHY 209 University Physics Iii Lab		
Electives		
Select 3 credit hours of electives ³		3
Total Credit Hours		99-101

¹ At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

² CHM 401 also fills an MSC elective requirement.

³ to be approved by advisor.

B.S. in Marine Science/Computer Science

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Science/Computer Science are:

Marine Science		
MSC 111	Introduction to Marine Science	3
MSC 215	Chemical Oceanography	3
MSC 230	Introduction to Marine Biology	3
MSC 301	Introduction to Physical Oceanography	3
MSC 302	Introduction To Physical Oceanography Lab	1
MSC 321	Scientific Programming in the Atmospheric Sciences	3
MSC 216	Chemical Oceanography Laboratory	1
or MSC 232	Introduction to Marine Biology Laboratory	
Select 9 credit hours of electives in Marine Science ¹		9
Biology		
Select one of the following:		5
BIL 150	General Biology	
& BIL 151	and General Biology Laboratory	
BIL 160	Evolution and Biodiversity	
& BIL 161	and Evolution and Biodiversity Laboratory	
Chemistry		
CHM 111	Principles of Chemistry I	3
CHM 112	Principles of Chemistry II	3
CHM 113	Chemistry Laboratory I	1
CHM 114	Chemistry Laboratory II	1
Computer Science		
CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 322	System Programming	3
CSC 431	Introduction To Software Engineering	3
Select 6 credit hours of approved electives, as described for Computer Science majors		6
Geological Sciences		
Select one of the following:		4-5
GSC 110	The Earth System	
& GSC 114	and Earth Processes Lab	
GSC 111	Earth System History	
Mathematics		
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MTH 210	Introduction to Linear Algebra	3
MTH 309	Discrete Mathematics I	3
MTH 311	Introduction to Ordinary Differential Equations	3

Select one approved statistics course		3
Physics		
PHY 205	University Physics I	3
PHY 206	University Physics II	3
PHY 207	University Physics III	3
PHY 208	University Physics II Lab	1
or PHY 209	University Physics Iii Lab	
Electives		
Select 6 credit hours of electives ²		6
Total Credit Hours		102-103

¹ At least 6 of which must be at the 300-level or higher.

² Including 3 at the upper level, to be approved by advisor.

B.S. in Marine Science/Geological Sciences

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Science/Geological Sciences are:

Marine Science		
MSC 111	Introduction to Marine Science	3
MSC 215	Chemical Oceanography	3
MSC 230	Introduction to Marine Biology	3
MSC 301	Introduction to Physical Oceanography	3
Select two of the following:		2
MSC 216	Chemical Oceanography Laboratory	
MSC 232	Introduction to Marine Biology Laboratory	
MSC 302	Introduction To Physical Oceanography Lab	
Select 12 credit hours of electives in Marine Science ¹		12
Biology		
Select one of the following:		5
BIL 150	General Biology	
& BIL 151	and General Biology Laboratory	
BIL 160	Evolution and Biodiversity	
& BIL 161	and Evolution and Biodiversity Laboratory	
Chemistry		
CHM 111	Principles of Chemistry I	3
CHM 112	Principles of Chemistry II	3
CHM 113	Chemistry Laboratory I	1
CHM 114	Chemistry Laboratory II	1
Geological Sciences ²		
GSC 110	The Earth System	3
GSC 111	Earth System History	4
GSC 114	Earth Processes Lab	2
GSC 260	Earth Materials	4
GSC 360	Depositional and Diagenetic Systems	4
GSC 380	Paleontology and Stratigraphy	4
GSC 410	Environmental Geochemistry	3
or GSC 420	Geophysics	
GSC 440	Igneous and Metamorphic Petrology	4

GSC 480	Structural Geology	4
GSC 482	Field Methods	2
GSC 561	Colloquium - Current Topics in the Geosciences	1
GSC 580	Summer Field Geology	4
Mathematics		
MTH 161	Calculus I	4
MTH 162	Calculus II	4
Select one semester of a computer or statistics course of the following approved classes:		3-4
MSC 204	Environmental Statistics	
MTH 224	Introduction to Probability and Statistics	
GSC 204	Environmental Statistics	
CSC 120	Computer Programming I	
CSC 210	Computing for Scientists	
Physics		
Select one of the following Options: ³		10
Option 1:		
PHY 205	University Physics I	
PHY 206	University Physics II	
PHY 207	University Physics III	
PHY 208	University Physics II Lab	
or PHY 209 University Physics Iii Lab		
Option 2:		
PHY 101	College Physics I	
PHY 102	College Physics II	
PHY 106	College Physics Laboratory I	
PHY 108	College Physics Laboratory II	
Electives		
Select 6 credit hours of electives ⁴		6
Total Credit Hours		105-106

¹ At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

² One course in Geological Sciences may fulfill requirements in both Marine Science and Geology.

³ University Physics is recommended.

⁴ Including 3 at the upper level, to be approved by advisor.

B.S. in Marine Science/Meteorology

See under **Meteorology/Marine Science** (p. 285)

B.S. in Marine Science/Microbiology and Immunology

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Science/Microbiology and Immunology are:

Marine Science		
MSC 111	Introduction to Marine Science	3
MSC 215	Chemical Oceanography	3

MSC 230	Introduction to Marine Biology	3
MSC 232	Introduction to Marine Biology Laboratory	1
MSC 301	Introduction to Physical Oceanography	3
MSC 216	Chemical Oceanography Laboratory	1
or MSC 302	Introduction To Physical Oceanography Lab	
Select 12 credit hours of electives in Marine Science ¹		12
Microbiology and Immunology		
Select one of the following:		5
MIC 301	Introduction to Microbiology and Immunology	
MIC 303	Part 1 of 2: Introductory Microbiology and & MIC 304 Immunology (Lecture)	
	and Part 2 of 2: Introductory Microbiology and Immunology (Lab)	
Other Required Courses		
MIC 319	Innate Immunity	3
MIC 321	Immunobiology	3
Select 13 credit hours in Microbiology and Immunology electives from the approved classes		13
MIC 201	Modern Plagues and Society	
MIC 322	Medical Parasitology	
MIC 323	Principles of Microbial Pathogenesis	
MIC 436	Fundamental and Medical Virology	
MIC 441	Microbiology and Immunology Colloquium	
MIC 451	Special Projects in Immunobiology	
Only 6 credit hours of Research in MIC may be applied toward the 13 MIC elective hours		
MIC 452	Special Projects in Parasitology	
MIC 453	Special Projects in Pathogenic Bacteriology	
MIC 454	Special Projects in Microbial Genetics	
MIC 455	Special Projects in Immunogenetics	
MIC 456	Special Projects in Virology	
Maximum of 3 courses from outside electives can count towards the 13 MIC elective hours		
BIL 255	Cellular and Molecular Biology	
BIL 352	Techniques in Scanning Electron Microscopy	
or BIL 554	Electron Microscopy	
GSC 310	Microbes and the Environment	
or MSC 465	Marine Comparative Immunology	
Biology		
BIL 150	General Biology	4
BIL 151	General Biology Laboratory	1
BIL 160	Evolution and Biodiversity	4
BIL 161	Evolution and Biodiversity Laboratory	1
Biochemistry and Molecular Biology		
BMB 401	Biochemistry For The Biomedical Sciences	3
Chemistry		
CHM 111	Principles of Chemistry I	3
CHM 113	Chemistry Laboratory I	1
CHM 112	Principles of Chemistry II	3
CHM 114	Chemistry Laboratory II	1
CHM 201	Organic Chemistry I (Lecture)	3

CHM 205	Organic Chemistry Laboratory I	1
CHM 202	Organic Chemistry II (Lecture)	3
CHM 206	Organic Chemistry Laboratory II	1
Geological Science		
Select one of the following:		4-5
GSC 110	The Earth System & GSC 114 and Earth Processes Lab	
GSC 111	Earth System History	
Mathematics		
MTH 161	Calculus I	4
MTH 162	Calculus II	4
Select one semester of a computer or statistics course of the following approved classes		3-4
MSC 204	Environmental Statistics	
MTH 224	Introduction to Probability and Statistics	
CSC 120	Computer Programming I	
CSC 210	Computing for Scientists	
Physics		
Select one of the following Options:		10-11
Option 1:		
PHY 205	University Physics I	
PHY 206	University Physics II & PHY 208 and University Physics II Lab	
PHY 207	University Physics III & PHY 209 and University Physics Iii Lab	
Option 2:		
PHY 101	College Physics I & PHY 106 and College Physics Laboratory I	
PHY 102	College Physics II & PHY 108 and College Physics Laboratory II	
Electives		
Select 3 credit hours of electives to be approved by advisor		3
Total Credit Hours		107-110

¹ At least 6 of which must be at the 300-level or higher.

² MSC 465 may count as both MSC and MIC upper electives.

B.S. in Marine Science/Physics

In addition to those courses that satisfy General Education Requirements, the required courses for the undergraduate major in Marine Science/Physics are:

Marine Science		
MSC 111	Introduction to Marine Science	3
MSC 215	Chemical Oceanography	3
MSC 230	Introduction to Marine Biology	3
MSC 301	Introduction to Physical Oceanography	3
MSC 302	Introduction To Physical Oceanography Lab	1
MSC 216	Chemical Oceanography Laboratory	1
or MSC 232	Introduction to Marine Biology Laboratory	
Select 12 credit hours of electives in Marine Science ¹		12
Biology		

Select one of the following:		5
BIL 150	General Biology & BIL 151 and General Biology Laboratory	
BIL 160	Evolution and Biodiversity & BIL 161 and Evolution and Biodiversity Laboratory	
Chemistry		
CHM 111	Principles of Chemistry I	3
CHM 112	Principles of Chemistry II	3
CHM 113	Chemistry Laboratory I	1
CHM 114	Chemistry Laboratory II	1
Geological Sciences		
Select one of the following:		4-5
GSC 110	The Earth System & GSC 114 and Earth Processes Lab	
GSC 111	Earth System History	
Mathematics		
MTH 161	Calculus I	4
MTH 162	Calculus II	4
MTH 210	Introduction to Linear Algebra	3
MTH 211	Calculus III	3
or MTH 310	Multivariable Calculus	
MTH 311	Introduction to Ordinary Differential Equations	3
Select one semester of an approved computer or statistics course		3-4
Physics		
PHY 205	University Physics I	3
PHY 206	University Physics II	3
PHY 207	University Physics III	3
PHY 208	University Physics II Lab	1
PHY 209	University Physics Iii Lab	1
PHY 321	Thermodynamics and Kinetic Theory	3
PHY 340	Classical Mechanics I	3
PHY 350	Intermediate Electricity and Magnetism	3
PHY 351	Intermediate Electricity and Magnetism II	3
PHY 360	Introduction to Modern Physics	3
PHY 362	Modern Physics Honors Seminar	1
PHY 540	Classical Mechanics II	3
PHY 560	Quantum Mechanics and Modern Physics I	3
Electives		
Select 6 credit hours of electives ²		6
Total Credit Hours		102-104

¹ At least 6 of which must be at the 300-level or higher. MSC 204 does not satisfy the MSC elective requirement but does satisfy the Statistics requirement.

² Including 3 at the upper level, to be approved by advisor.

Minor in Marine Science

A minor in Marine Science requires 15 credits which must include:

MSC 111	Introduction to Marine Science	3
Select 12 credit hours of electives in Marine Science: ¹		12

MSC 210	The Dynamic Oceans
MSC 215	Chemical Oceanography
MSC 216	Chemical Oceanography Laboratory
MSC 220	Climate and Global Change
MSC 230	Introduction to Marine Biology
MSC 232	Introduction to Marine Biology Laboratory
MSC 240	Introduction To Marine Geology
MSC 264	Tropical Coastal Ecosystems
MSC 301	Introduction to Physical Oceanography
MSC 302	Introduction To Physical Oceanography Lab
MSC 307	Introduction to the physics of climate
MSC 310	Living Resources of the Ocean
MSC 316	Global Primary Production
MSC 321	Scientific Programming in the Atmospheric Sciences
MSC 323	Invertebrate Zoology
MSC 324	The Biology of Fishes
MSC 326	Marine Genomics
MSC 327	Marine Animal Neurophysiology and Behavior
MSC 333	Ocean Human Health
MSC 346	Climate Science and Policy
MSC 350	Survey of Marine Mammals
MSC 351	Physical-Biological Interaction In Ocean Ecosystems I
MSC 352	Physical-Biological Interaction In Ocean Ecosystems li
MSC 364	Life in Moving Fluids
MSC 371	Readings in Marine Science
MSC 403	Marine Environmental Toxicology
MSC 410	Marine Conservation Science
MSC 462	Marine Biomedicine
MSC 464	Marine Comparative Immunology Lab
MSC 465	Marine Comparative Immunology
MSC 466	Environmental Physiology: Oxygen, Water And Ionoregulatory Stress
Approved 500-level classes offered by the Rosenstiel School	

¹ At least 6 of which must be at the 300-level or higher.

Students majoring in the School of Marine and Atmospheric Science should replace MSC 111 with an additional elective, and all electives must be above and beyond those used for the major. The Marine Science minor fulfills the requirements of a STEM cognate. Only those courses passed with a grade of "C-" or higher may be applied to the major or minor.

Music

<http://www.music.miami.edu>

Phillip and Patricia Frost School of Music Introduction

The University of Miami Frost School of Music awards three undergraduate degrees with major programs in twelve areas.

- Bachelor of Music
 - Instrumental Performance
 - Keyboard Performance
 - Vocal Performance
 - Studio Jazz Instrumental
 - Studio Jazz Vocal
 - Music Education with a minor in Education
 - Music Therapy with a minor in Psychology
 - Theory and Composition
 - Media Writing and Production
 - Music Business and Entertainment Industries with a minor in Business or Communication
- Bachelor of Science
 - Music Engineering
- Bachelor of Arts
 - Music

Mission

The Frost School of Music seeks to transform lives through the study and performance of music, and to enhance music's future as the result of the most innovative and relevant curricula in higher education. The Frost School of Music is devoted to excellence and a culture of collegiality, in which a diversity of people, musical styles, and careers are valued. The Frost School of Music is a community of musicians committed to advanced musicianship for all Frost students across a broad array of majors and programs. The Frost School of Music seeks to elevate the community through intensive, sustained outreach to underserved populations. The Frost School of music strives to enhance the cultural richness of the University of Miami, South Florida and throughout the world as the result of world class performance, scholarship and research.

Accreditation

The Frost School of Music has been a member of the National Association of Schools of Music since 1939. The requirements for entrance and for graduation as set forth in this bulletin are in accordance with the principles of this association.

Goals

The primary goals are:

1. to provide music majors with a high quality education,
2. to provide opportunities for other university students to increase their musical skill, understanding, and appreciation,
3. to provide the music faculty with opportunities for creative activity and scholarly inquiry, and

4. to serve as an educational and cultural resource for the university, South Florida, and global communities.

Performing Ensembles

Ensembles provide music learning and performing experience for all students on the University of Miami campus through rehearsals and public concerts. Membership in each of these performing ensembles is based on auditions. Not all ensembles meet degree requirements. Follow ensemble policies as indicated in the Frost School of Music student handbook. Please refer to the course catalog for a complete list of all ensembles.

Instrumental Ensembles

- Accompanying
- American Music Ensemble (Songwriters)
- Avant Garde Ensemble
- "Band of the Hour" Marching Band
- Bluegrass Ensemble
- Blues Ensemble
- Brass Chamber Music
- Brass Choir
- Clarinet Choir
- Classical Guitar Ensemble
- Concert Jazz Band
- Contemporary Music Ensemble
- E.C.M. Ensemble
- Electronic Music Ensemble
- Flute Choir
- Funk/Fusion Ensemble
- Horace Silver Ensemble
- Jazz Band III
- Jazz Bass Ensemble
- Jazz Guitar Ensemble
- Jazz Keyboard Ensemble
- Jazz Saxophone Ensemble
- Laptop Ensemble
- Mallet Ensemble
- Monk/Mingus Ensemble
- Percussion Chamber Music
- Rock Ensemble
- Salsa Ensemble
- Saxophone Ensemble
- Small Jazz Ensembles
- String-Keyboard Chamber Music
- Studio Jazz Band
- Studio Rhythm Section
- Symphonic Winds
- Symphony Orchestra
- Synthesizer Ensemble
- The Other Music Ensemble
- Trombone Choir
- Tuba Ensemble

- University Band
- Wind Ensemble
- Woodwind Chamber Music

Vocal Ensembles

- Chamber Singers
- Jazz Vocal I-III
- Men's Chorale - Maelstrom
- Musical Theatre Workshop
- Opera Theater
- Symphonic Choir
- University Chorale
- Women's Chorale - Cantilena

Music for Non-Music Degree Students

Select music courses are available to students not enrolled in a music degree program. Pre-college students, matriculating University of Miami students, and interested community adults may enroll in these courses. Students who are not currently enrolled at the University of Miami but who wish to pursue courses will need to apply as a special student through the Frost School of Music Office of Admission. A list of courses is available at <http://www.miami.edu/frost/index.php/frost/students/>.

Non-music majors who wish to enroll in lessons are required to audition and may, with the permission of the appropriate faculty member and the undergraduate or graduate dean, register for one or two credit hours a semester upon payment of tuition and an applied music fee of \$300.00 per credit hour. Lessons by non-music majors are subject to teacher availability.

Academic Policies

Requirements for Admission to the Frost School of Music

Students admitted to the Frost School of Music must successfully complete a dual admission process. In addition to the general requirements for admission to the University, the undergraduate student must meet the following requirements of the Frost School of Music:

1. Submit a Frost School of Music Application to the Frost School of Music Admission Office.
2. Submit an Application for Undergraduate Study to the University Office of Undergraduate Admission.
3. Demonstrate performance proficiency by auditioning on campus, at designated regional audition centers, or by recording. Appropriate faculty committees will evaluate the audition.
4. After being admitted to the university each student will be required to participate in placement auditions and exams in theory and music performance. These examinations will be given immediately prior to the fall semester.
5. Transfer students who are admitted to the university will receive a tentative evaluation of their previous work from the office of Admission. Validation of credit hours in music will be based on the results of auditions and placement examinations discussed above. The Associate Dean for Undergraduate Studies of the Frost School

of Music determines which transferred courses will meet specific requirements for graduation.

6. Admission is granted in Fall semesters only.

Students who are admitted to the Frost School of Music must begin a program of specialized requirements in music during their first semester.

Admission to the University (Undergraduate Students)

Application forms and bulletins for undergraduate students may be secured from the University of Miami web site at www.miami.edu. The University Office of Admission receives and processes all undergraduate applications, evaluates credentials, and mails letters of acceptance to applicants who qualify for entrance. Because of the university's selective admissions policy and limited enrollment only those applicants are accepted who present evidence of intellectual promise, unusual talent and potential, and strong personal qualifications. Admission as a transfer student requires a 3.0 grade point average from the previous institution. The University Office of Admission and the Frost School of Music determine admission to the university. Prospective students should make formal application for admission in the fall of the senior year in high school. The Frost School of Music participates in the Early Action and Regular Decision programs.

Placement Tests

Upon entering the Frost School of Music, students must demonstrate, through placement auditions, college-level performance on their instrument and in music theory. Results of placement tests will enable music advisors to assist students in selecting the appropriate program and level of study.

Audit

Students are not permitted to audit music courses.

Lessons

The study of a musical instrument or voice, in private lessons or group lessons, requires an audition. Frost School of Music students are classified as "majors" or "principals." A performance "major" aspires to a professional career in music performance. A "principal" aspires to develop their music performance skills to the fullest extent possible in a music degree other than performance.

There are five levels of undergraduate and graduate lessons.

- Level 1 - undergraduate freshman and sophomore, typically four semesters
- Level 3 - undergraduate junior and senior, typically four semesters
- Level 5 - graduate artist's diploma
- Level 6 - graduate masters
- Level 7 - graduate doctoral

Transfer students enroll in Level 1 for the first semester and are placed at an appropriate classification level of study based on the results of the jury at the end of each semester.

Credit for Lessons

The number of credit hours awarded for lessons is determined by the student's curriculum. Students enrolled for 2 credit hours of lessons are required to perform a jury at the end of each semester.

Jury

The purpose of the jury is to evaluate student musicianship and technical progress. Students enrolled for 2 credit hours of lessons are required to play a jury before a panel of performance faculty at the end of each semester. Juries are held during Reading Days. Students perform technical requirements and repertoire as assigned by their lesson teacher.

The lesson teacher prepares a jury sheet that lists the repertoire covered during the semester and the studio grade for each student. The grade is recorded on the jury sheet and placed in the student's file. The final grade may be determined in part by studio class participation, recital attendance, or other requirements specific to the student's program of study.

Lessons: Warning, Probation and Dismissal

The following applies to all majors and programs in the Frost School of Music:

Students earning a grade of "C+" or lower in lessons will be placed on probation for one semester. Following probation, an additional grade of C+ or lower in lessons will result in dismissal from the Frost School of Music. Courses may not be dropped during the second enrollment.

Students Who Fail to Successfully Complete a Music Course

Students who fail to successfully complete any music course, including zero credit forums, after the second enrollment will be dismissed from the Frost School. Courses may not be dropped during the second enrollment.

Forums

Students must successfully complete a program forum each semester in residence. Program forums (which are zero credit) are degree requirements. Students must successfully complete the required number of program forums to graduate.

Summer Lessons

During each of the five-week summer sessions, students may register for one credit hour and receive a one-hour lesson per week. Summer lessons do not fulfill degree requirements.

Special Fees

Students studying a secondary instrument beyond the required four semesters of secondary piano will be assessed a per-credit hour fee and must have the approval of the undergraduate dean and program director or department chair. Students who require an accompanist may be assessed an accompanying fee.

Non Music or Free Electives

Non-music or free electives may be chosen from any courses offered by the university except ESS courses numbered below 140.

Dual Degrees

Dual degrees have more stringent requirements than "double majors." The only courses that may count for both degrees are the general education requirements (ENG 105 and ENG 106, Math, People and Society cognate, and STEM cognate). For each degree a student must have a different major and minor, if a minor is required. The major for one degree may not be a minor for the other degree.

Graduation Requirements

The general requirements for graduation from the University of Miami are described in the General Information (p. 13) section of the Academic Bulletin. These general requirements are included in the list of requirements for majors in the Frost School of Music. The student should consult regularly with his/her advisor and review the Degree Progress Report available in CaneLink under Academic Requirements. The Degree Progress Report is a tool to help evaluate if academic requirements are being met. The Dean must approve changes or deviations from the printed requirements in writing. Students must satisfy all degree requirements in order to graduate. Degree requirements may be satisfied by successfully completing a course, an approved substitution for the course, an approved transfer course, or waiver from the course as a result of demonstrating the required competency through testing.

Degree Programs

- Bachelor of Music
 - Instrumental Performance (MIP) (p. 301)
 - Keyboard Performance (MKP) (p. 304)
 - Vocal Performance (MVP) (p. 336)
 - Studio Jazz Instrumental (MSJI) (p. 325)
 - Studio Jazz Vocal (MSJV) (p. 325)
 - Music Education with a minor in Education (MED) (p. 310)
 - Music Therapy with a minor in Psychology (MTY) (p. 310)
 - Theory and Composition (MTC) (p. 320)
 - Media Writing and Production (MWP) (p. 320)
 - Music Business and Entertainment Industries (MBEI) (p. 306)
- Bachelor of Science
 - Music Engineering (MUE) (p. 317)
- Bachelor of Arts
 - Music (MUS) (p. 298)

Bachelor of Arts in Music (MUS)

Dept. Code: MCY

Undergraduate students who are interested in musicology, music history or ethnomusicology are encouraged to enroll in the Bachelor of Arts in Music degree, through which they can pursue these and related subjects within a liberal arts music curriculum. There is no undergraduate degree in musicology.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in

evaluated and revised writing, speaking, stage presence, and audience engagement.

All BA in Music students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MCY or MTC 300+ Elective, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MCY or MTC 300+ Elective, required by your major which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.A.M. Bachelor of Arts in Music

Introduction

The Bachelor of Arts in Music degree is a non-professional degree designed for talented musicians who wish to pursue a broad liberal arts education. Curriculum flexibility affords students the opportunity for a variety of pre-professional studies, including premedical and pre-legal. A minor outside the Frost School of Music is required. Students in the BA in Music program must earn a minimum 2.5 GPA each semester to remain in the program.

The mission of the Bachelor of Arts in Music is to provide students with the highest quality education possible in music, a broad education in the liberal arts, and in-depth study in an academic area outside of the Frost School of Music.

Please see below for additional goals and degree requirements.

¹ EMC core courses require a grade of "C" or higher.

Educational Objectives

- Students will acquire a thorough knowledge of music theory and music history, and develop advanced competence in musical performance.
- They will develop the ability to think, speak, and write clearly with the capacity to explain and defend their views effectively and rationally based on substantive knowledge of the liberal arts.
- The student will acquire competency in a selected non-music academic area that includes a broad understanding of the area and contemporary thought within the area.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All BA in Music students will successfully complete:

1. MCY 341, which will include substantial evaluated and revised writing components.
2. MCY or MTC 300+, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MCY or MTC 300+, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Instrumental Performance (MIP)

Dept. Code: MIP

The Department of Instrumental Performance offers a bachelor of music performance degree in 17 traditional instruments: flute, oboe, clarinet, saxophone, bassoon, horn, trumpet, trombone, euphonium, tuba, percussion, violin, viola, violoncello, double bass, guitar, and harp.

Bachelor of Music: Instrumental Performance (MIP)

The purpose of the Bachelor of Music in Performance Degree is to

1. Provide the highest quality of education possible in the areas of musicianship that will lead toward a professional performance career or graduate study as a classical artist.
2. To provide performance opportunities that integrate the skills learned in music and other classes and to foster creativity and research.
3. To provide audition skills and repertoire as well as the skills for building and managing the non-performance aspects of a professional career.

Educational Objectives

- Students will develop musicianship skills and technique that will lead toward a professional career as a solo classical performer or graduate study.
- Students will be able to sight-read and prepare musical performances without assistance.
- Students will develop musicianship skills and technique for working within an ensemble leading towards a professional career or graduate study as a classical performer. Ensemble requirements will vary by applied area.
- Students will develop skills for fostering a professional career or graduate study as a classical performer.
- Students will have a broad knowledge of music literature in their applied area as well as an understanding of stylistic and theoretical principles of the various musical and historical periods.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All instrumental performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. , MIP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MIP 541-549 Pedagogy and Repertoire, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

¹ EMC core courses require a grade of "C" or higher.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All keyboard performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MKP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MKP 547 Keyboard Pedagogy, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Music Business Entertainment Industries (MBEI)

Dept. Code: MMI

The Department of Music Media and Industry includes two programs:

- Music Engineering Technology
- Music Business Entertainment Industries

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. a Senior recital or culminating project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue. MBEI take MMI 537 Recorded Music Operations, MUE take MMI 410 Music Engineering Capstone Project.
3. one required course in their major which will include discipline specific communication skills. MBEI take ENG 230 Advanced Business Communication or COS 333 Business Communication, or ENG 331 Legal Writing. MUE take MMI 401 Audio Electronics.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Music Business Entertainment Industries with a Required Minor in Business, Communications, or Entertainment

Introduction

The Bachelor of Music in Music Business and Entertainment Industries is a professional degree program designed to prepare qualified musicians for careers in the business management, financial, legal, and artistic areas of the music industry. Music, business, and music business courses are combined in an interdisciplinary curriculum, which includes a minor in Marketing, Legal Studies, Business Administration, Management, Finance, Computer Information Systems, Public Relations, or other approved business-related area.

Students must maintain a minimum GPA of 2.70 to remain in the MBEI Program.

Please see below for additional goals and degree requirements.

¹ EMC core courses require a grade of "C" or higher.

Educational Objectives

- Students will have a conceptual understanding of the structures and inter-relationships of the music and entertainment industries.
- Students will acquire knowledge and understanding of the vocabulary and terminology associated with the music and entertainment industries.
- Students will be able to comprehend and apply basic music publishing procedures including copyright administration, mechanical licensing and royalties distribution.
- Students will know how to promote and sell a music industry product.
- Students will have an understanding of the performing artist as a major economic factor in the marketplace.

- Students will develop a set of skills applicable to the music industry including: financial and project management, create and enact marketing and promotional plans, the ability to write basic agreements and licenses, and copyright management and administration.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MMI 537 Recorded Music Operations, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. ENG 230 Advanced Business Communications, COS 333 Business Communication, or ENG 331 Legal Writing which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Music Education and Music Therapy (MED) & (MTY)

Dept. Code: MED

The Department of Music Education and Music Therapy offers two degree programs,

- music education (MED) and
- music therapy (MTY).

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. a required musicology course, which will include substantial evaluated and revised writing components. MED take MCY 341 Music of the Medieval, Renaissance, and Baroque Periods. MTY take MCY 141 Musical Trends and Traditions.
2. a Senior recital or culminating project, which will include evaluated communication skills in attracting an audience, engaging an audience

during performance, and preparing program notes or similar media as appropriate to the medium/venue. MED take MED 471 Internship in Music Education & MED 473 (6 credits ea.) or MED 475 Internship in Music Education (12 credits).

3. one required course in their major which will include discipline specific communication skills. MED take MED 542 Teaching General Music. MTY take MED 551 Music Therapy Research Methods.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Music Education with Minor in Education

Introduction

A basic premise of the Music Education program is that music teachers must be both musicians and teachers; thus, competency as a musician is equally as important as having a strong theoretical and practical foundation in music education. The instructional program prepares students for teaching all areas of the instructional specialization (e.g. choral, general, instrumental music) while allowing them to develop a specialization in a given area of music teaching through and emphasis area and internship. The theoretical and practical foundations in our series of music education techniques and methods courses incorporate ideas drawn from theory, research, and the practical experiences of the faculty and other successful practitioners.

Please see below for additional program goals and academic requirements.

Total credits for courses in the major = 61		
Total Credit Hours		127

¹ MED and TAL courses require a grade of "C" or higher.

² MED 475 Internship in Music Education (12 credits) can be substituted for MED 471 & MED 473

Program Goals

- Help students develop the musical and teaching competencies necessary to enable them to demonstrate the generic and subject area competencies and the Florida Educational Accomplished Practices (FEAP) for becoming successful music teachers.
- Enable students to apply the musical and instructional skills developed in the program (and reinforced during field experience and student teaching) to teach music in a wide array of contexts.
- Help students to develop the skills and desire to continue music-making as a lifetime endeavor both personally and professionally.
- Help students develop skills in integrating information from the diverse professional literature into their teaching.

Educational Objectives

- Students must demonstrate generic competencies required by the university in general education courses.
- Students must demonstrate competencies related to the core Professional Education courses required by the State of Florida in Teaching and Learning (TAL) courses.
- Students must demonstrate musical competencies related to the requirements of the Bachelor of Music degree, including 66 credit hours in music.
- Students must demonstrate teaching competencies related to the core courses in the music education specialization, including a minimum of 32 credit hours in Music Education.

The Music Education curriculum is designed to prepare students to teach music in a wide array of contexts, including (K-12) public & private schools. All Music Education majors must perform at a high level either vocally or on an instrument. Students must successfully complete the

Florida General Knowledge Examination (FGKE) to be admitted to teacher candidacy and to graduate.

All students must develop knowledge of and performance ability on wind, string, and percussion instruments as well as, vocal skills to assure effective use of the voice in teaching.

Admission to and/or retention in the music education curriculum leading to Florida Teacher Certification requires that students be formally screened with respect to specific criteria. Following are the Requirements for Admission to Teacher Candidacy and for Admission to Associate Teaching:

Admission to Teacher Candidacy

1. Acceptance as a major in the music education program.
2. Satisfactory performance on the Florida General Knowledge Exam (FGKE).
3. Completion of 55 credit hours. (Transfer students must have at least 12 credit hours earned at the University of Miami.)
4. No grade less than a C in TAL & MED courses.
5. Required Background Check completed.

Admission to Student Teaching

1. Approval of MED faculty members.
2. Completion of 90 credit hours.
3. Completion of at least three-fourths of the courses in the teaching major, verified by advisor.
4. Completion of a C or better in all MED & TAL courses
5. Completion of pre-internship field experiences with above-average evaluations.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Education students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods, which will include substantial evaluated and revised writing components.
2. MED 471 & MED 473 Internship in Music Education (Elementary & Secondary) or MED 475 Internship in Music Education, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 542 Teaching General Music, one required course in their major which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Music Therapy with Minor in Psychology

Introduction

The music therapy program provides students with the opportunity to develop comprehensive musicianship as well as clinical knowledge and skills within a rich musical, scholarly and communicative environment. Music therapy majors must demonstrate musical proficiency, either vocally or instrumentally, and must acquire musical competency on guitar, piano, voice and percussion.

Graduates of this program are prepared for careers as professional music therapists in a variety of health care and educational settings. Furthermore, graduates are eligible to take the Board Certification Exam in music therapy, leading to the credential, Music Therapist Board Certified (MT-BC). The music therapy curriculum is approved by the American Music Therapy Association, and is based on the clinical and research paradigm known as Neurologic Music Therapy.

To remain in the Music Therapy program, students must earn a minimum 2.5 GPA each semester. Additionally, music therapy core courses must be completed with a grade of C or higher. All internship applications must include a written letter of recommendation from a music therapy faculty member.

Please see below for additional goals and degree requirements.

¹ *MED courses require a grade of "C" or higher.*

Educational Objectives

The music therapy program is designed to address three primary objectives:

- Comprehensive musicianship: through intensive music study and performance experiences, students will articulate knowledge of music structure and style, produce aesthetically pleasing musical performances, and modify music for specific contexts.
- Knowledge of human behavior: by studying both theory and scientific evidence, students will develop an in-depth understanding of the systems of the human body, the intricacies of human behavior, as well as developmental norms and deviations in each domain of functioning.

Knowledge of Music Therapy

Students will engage in rigorous exploration of the theories and scientific evidence that support the use of music in a therapeutic context.

Following the neurologic music therapy approach, all techniques learned in this program are based on scientific evidence regarding music perception and behavior. Furthermore, students have ample opportunity to establish and refine their therapeutic skills through five semesters of clinical practica in addition to a six-month, full-time clinical internship. Internship applications must include a written letter of recommendation from music therapy faculty member.

The Music Therapy Equivalency Program

The equivalency program is designed for the individual who has already completed a bachelor's degree in a related discipline, including the following courses:

Music Theory I, II, III and IV; Music History I and II; Conducting, Arranging, Applied Lessons (6 semesters), Performing Ensembles (8 semesters), Piano Competency (4 semesters of either lessons or group piano) and Introduction to Psychology.

Beyond these courses, the program consists of 50 credit hours that can be completed in two years, followed by a six-month clinical internship. All internship applications must include a written letter of recommendation from a music therapy faculty member. Please contact the Music Therapy Program Director for a listing of the 50 credit hours.

If any of the prerequisite courses have not yet been completed, they can be taken at the University of Miami. Taking these additional courses, however, may lengthen the amount of time required to complete the equivalency program. In certain situations, alternate courses from other universities can substitute for the required courses. Depending on the nature of the course, this decision will be made by the undergraduate dean, in consultation with the Music Therapy Program Director.

In order to determine exactly how many credits are required to complete the equivalency program, the student should obtain official transcripts for their previous degree and meet with the music therapy program director. Following completion of the course and internship, students are then eligible to sit for the music therapy board certification exam and can become professional members of the American Music Therapy Association (AMTA). For students wishing to pursue graduate studies

in music therapy, the equivalency program can be combined with the master's degree in music therapy.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Therapy students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MED 363 Senior Practicum, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MED 551 Music Therapy Research Methods, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Music Engineering Technology (MUE)

B.S. Music Engineering Technology with Required Minor in Electrical Engineering or Computer Engineering

Music Engineering Technology Introduction

The mission of the Music Engineering Technology program is to:

1. Provide the highest quality education in the field of music engineering.
2. Promote advancements in the fidelity and creativity of music recording, production and reproduction.
3. Promote advancements in the invention, design and implementation of audio hardware and software.

The goals of the Music Engineering Technology program are to:

1. Further enhance the program's national and international stature.
2. Obtain teaching infrastructure and resources needed to provide contemporary education in the field of music engineering technology.
3. Ensure that curricular offerings are current and able to educate students in new and future theory and practice.
4. To help graduates find professional career positions.

Educational Objectives

- Understanding the theoretical basis of sound recording, processing and reproduction.

- Understanding the practice techniques used in sound recording, processing and reproduction.
- Designing and implementing original audio hardware and/or software.
- Understanding the principles of computer science (Bachelor of Music) or electrical engineering (Bachelor of Science).

The Music Engineering Technology curriculum is designed for musicians interested in pursuing a career in music recording, audio hardware and software design, and related professions in the audio, audio-video, multimedia, and internet industries. The program is interdisciplinary in nature; it includes courses in music, music engineering, computer science, electrical engineering, and mathematics. This program includes a minor in Electrical Engineering or a double major in Computer Science. Freshman students are expected to enroll in calculus, which carries a prerequisite of Trigonometry and Analytical Geometry. Prospective students are expected to have a strong background in music performance and in mathematics.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Engineering students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MMI 410 Music Engineering Capstone Project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MMI 401 Audio Electronics, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Majors

Major in Music Engineering Technology

- B.S. in Music Engineering with Required Minor in Electrical Engineering or Computer Engineering (p. 319)

¹ EMC core courses require a grade of "C" or higher.

- The electrical engineering minor requires ECE 306.
- The computer engineering minor requires ECE 318 or ECE 322.

A dual minor in electrical engineering and computer engineering requires ECE 306 and ECE 318 or ECE 322.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
- MMI 410 Music Engineering Capstone Project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
- MMI 401 Audio Electronics, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Music Theory Comp. (MTC) & Media Writing & Prod. (MWP)

Dept. Code: MTC

The Department of Music Theory-Composition includes two programs,

- Music Theory-Composition (MTC) and
- Media Writing and Production (MWP).

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Music Theory and Composition students will successfully complete:

1. a required musicology course, which will include substantial evaluated and revised writing components. MTC take MCY 341 Music of the

Medieval, Renaissance, and Baroque Periods. MWP take MCY 141 Musical Trends and Traditions.

2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.

3. MTC 311 which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Media Writing and Production

The Commercial Music & Production degree program is designed to prepare undergraduate students for the many issues facing today's commercial music writers and producers. In this specialized program, successful students complete diverse compositional assignments, develop technical and practical skills in the recording studio, and acquire an understanding of the music industry. Prospective students should furnish evidence of outstanding compositional ability as well as basic sequencing and music notation skills.

Please see below for additional goals and degree requirements.

¹ EMC core courses require a grade of "C" or higher.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in

evaluated and revised writing, speaking, stage presence, and audience engagement.

All Media Writing and Production students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MTC 402 Composition VIII, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MTC 311 Analysis and Experience, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Music Theory and Composition

Introduction

The Bachelor of Music in Composition is designed to:

1. Provide students with a learning environment conducive to the pursuit, fostering, development, and exchange of ideas and information, particularly as it pertains to music composition, production, and performance.
2. To provide student access varied composition communities.
3. To continue to build upon the Frost School of Music's reputation as an innovative, forward-thinking, and first-rate center for advanced study.
4. To maintain the highest educational, professional, and ethical standards.

Goals of the program are:

1. To provide students with training to be fluent in basic compositional skills.
2. To help students understand various directions that available to composers in the 21st century.
3. To help students perform, produce, or realize their music.

The curriculum in Composition is designed for those students intending to pursue a career as a composer and/or to pursue graduate degrees in Theory or Composition. Prospective students are expected to furnish evidence of compositional ability.

Please see below for additional goals and degree requirements.

Total Credit Hours		15

Studio Music and Jazz (MSJI) & (MSJV)

Dept. Code: MSJ

The Department of Studio Music and Jazz includes two programs, instrumental and vocal.

Introduction

The mission of the Studio Music and Jazz Performance Program is to:

- Prepare jazz instrumentalists to enter the music profession or graduate school.
- Identify, recruit, and retain high quality students who seek to pursue studio/jazz performance as a career.
- Foster faculty creativity and performance which serves as a role model for students.
- Develop, and revise courses in jazz improvisation, jazz arranging/ composition and provide on and off campus performance opportunities.
- Produce in our on campus facility, recordings for the Down Beat Student Music Awards, compact disks, radio and Internet broadcast.
- Provide a platform of learning that includes performance, composition/arranging, technology, conducting, scholarship and production.

Educational Objectives

- Students will develop musical performance skills necessary to make them competitive in the jazz world.
- Students will develop performance skills in a variety of large and small ensembles that allow a student to participate in the professional jazz world.
- Students will develop the skills necessary to play in a chamber setting emphasizing spontaneous interaction and improvisation.
- Students will develop the skills necessary to play in large jazz ensembles emphasizing the development of ensemble skills necessary in a reading situation.
- Students will perform a senior recital of sixty-minute duration that demonstrates their capabilities in the jazz idiom.
- Students will develop the skills necessary to arrange and compose in a variety of styles appropriate to the jazz and contemporary music field.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Music and Jazz students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MSJ XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MSJ 371 Jazz Improvisation I, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Majors

Majors in Studio Music and Jazz

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Studio Jazz Instrumental students will successfully complete:

1. MCY 141 Musical Trends and Traditions, which will include substantial evaluated and revised writing components.
2. MSJ XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MSJ 371 Jazz Improvisation I, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

B.M. in Studio Music and Jazz Voice

The vocal curriculum in Studio Music and Jazz is designed for interested and qualified vocalists who desire to continue to develop to the highest degree their backgrounds and skills in the performance of studio music (recording), jazz, and contemporary pop music. Admission to this major pre-supposes music training in jazz.

Please see below for additional goals and degree requirements.

Minor in Studio Music and Jazz Instrumental (Music Majors Only)

A 12 credit hour minor is available for students enrolled in the Frost School of Music whose principal performance medium is a jazz instrument. Permission of the studio teacher is required. The following courses must be taken to fulfill the requirement of this minor:

MSJ 113	Analysis and Evolution of Jazz Styles I	3
MSJ 124	Introduction to Jazz Improvisation	3
MSJ 371	Jazz Improvisation I	3
MSJ 519	Advanced Modern Arranging I	3
Total Credit Hours		12

The Bruce Hornsby Creative American Music Program

The Bruce Hornsby Creative American Music Program is designed to develop the creative skills of talented performing songwriters by

immersing them in the diverse traditions that form the foundation of modern American songwriting. This rigorous approach will require students to become intimate, both in understanding and practice, with the vast and varied legacy that is American music. The CAM Program is open to all Frost School of Music students by audition. Those who successfully complete the program will earn a Minor in Creative American Music. A minor in Creative American Music requires 17 credit hours.

The Contemporary Performance Principal

The Contemporary Performance Principal accommodates talented songwriters, singers, and instrumentalists who are not classical or jazz musicians. Contemporary instruments include Guitar (Electric and Acoustic), Voice, Electric Bass, Keyboard, Media (Alternate Controllers/Electronic Producers), Strings (Fiddle, Electric Violin, etc.) and Percussion (incl. Drums). Songwriters will also apply to the Creative American Music Program. The Contemporary Performance Principal is available to students in the following majors: Music Business and Entertainment Industries, Music Engineering Technology, Media Writing and Production, Music Education, Music Theory/Composition, Music Therapy, and the Bachelor of Arts in Music. Pre-screening and audition are required.

Majors

Vocal Performance (MVP)

Dept. Code: MVP

The Department of Vocal Performance offers a bachelor of music degree in vocal performance.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Vocal Performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods which will include substantial evaluated and revised writing components.
2. MVP XXX Private Lesson Level 3 Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MVP 538 Vocal Pedagogy, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Majors

Major in Vocal Performance

- B.M. in Vocal Performance (p. 338)

Plan of Study

If a discrepancy exists between the Academic Bulletin course list and the Plan of Study, the Academic Bulletin course list takes precedence.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Writing and Communication Skills (AWC) courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All Vocal Performance students will successfully complete:

1. MCY 341 Music of the Medieval, Renaissance, and Baroque Periods which will include substantial evaluated and revised writing components.
2. MVP VO3 Private Lesson (Level 3) Senior Recital, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. MVP 538 Vocal Pedagogy, which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Experiential Music Curriculum Core Courses

The EMC Core courses are common to all Frost School of Music students regardless of degree program. The EMC core courses empower students to become internal musicians as they develop deep knowledge in music and a high level of musical skills. As a community of musicians, all students interact with their peers whose diverse interest strengthen their music making abilities.

Additional courses for Principal Instrument Lesson & Studio Class and Ensembles may be required for the major.

All EMC core courses must be successfully completed with a grade of "C" or higher.

Advanced Writing and Communication Skills

Courses

All students are required to successfully complete 3 Advanced Communications and Writing courses. Student degree requirements will include courses that meet the desired communication outcomes in evaluated and revised writing, speaking, stage presence, and audience engagement.

All music students will successfully complete:

1. a required musicology course, which will include substantial evaluated and revised writing components.
2. a Senior recital or culminating project, which will include evaluated communication skills in attracting an audience, engaging an audience during performance, and preparing program notes or similar media as appropriate to the medium/venue.
3. one required course in their major which will include discipline specific communication skills.

Assessment

There will be at least 2 specific assessments in each Advanced Communications Skills course for communications or writing equivalent to 4000 words, evaluated and revised.

Areas of Knowledge

Arts and Humanities Cognates

All Frost School of Music students satisfy the Arts and Humanities cognate upon successful completion of the BM, BS, or BA music degree requirements.

People and Society Cognates

Students enrolled in the following degree programs: MIP, MKP, MVP, MSJI, MSJV, MTC, MWP, and MUE must complete a People and Society cognate. For the current listing of cognates, visit <http://www.miami.edu>/cognates.

The following degree programs satisfy the People and Society cognate upon successful completion of the required minor:

- MED Music Education required minor in Education
- MTY Music Therapy required minor in Psychology
- MBEI Music Business and Entertainment Industries required minor in Business, Communications or Entertainment, if the minor is designated as People and Society

- MUS Bachelor of Arts in Music required minor outside of music **may** fulfill this requirement if the minor is in the People and Society area of knowledge
- A minor in Music Business and Entertainment Industries satisfies the People and Society cognate.

Science, Technology, Engineering, and Math (STEM) Cognate

Students enrolled in the following degree programs: MIP, MKP, MVP, MSJI, MSJV, MED, MTY, MTC, MWP, and MBEI must complete a STEM cognate. For the current listing of cognates, visit <http://www.miami.edu/cognates>.

The following degree programs satisfy the STEM cognate upon successful completion of the required minor:

- MUE Music Engineering required minor in Electrical Engineering or Computer Engineering
- MBEI Music Business and Entertainment Industries required minor in Business, Communications or Entertainment, if the minor is designated as STEM
- MUS Bachelor of Arts in Music required minor outside of music **may** fulfill this requirement if the minor is in the STEM area of knowledge

Minors

Music Minor

(Audition Required)

Any student wishing to declare a minor in music must audition on an instrument and be approved by the Frost School of Music as a minor. The approval form is available at <http://www.miami.edu/frost/index.php/frost/students/> or in the Undergraduate Dean's Office. A fee is assessed for private instruction. The fee is currently \$300 per semester and must be paid prior to enrolling. Please note that private lessons may not be available on all instruments. Studio space varies from year to year. A music minor requires 15 credit hours, 12 of which must be earned at the University of Miami.

Complete exactly 2 courses from the following:	6
MTC 109 Music Theory Skills I	
MTC 110 Music Theory Skills II	
Complete exactly 1 course from the following:	3
MCY 124 The Evolution of Jazz	
MCY 127 Evolution of Rock	
MCY 131 Understanding Music	
Complete at least 6 credit hours from the following:	6
Private Lessons* (maximum of 4 semesters)	
Ensembles (entrance by audition)	
Music Electives	
Total Credit Hours	15

Minor in Music Business and Entertainment Industries (MBEI)

(No Audition Required)

A minor in Music Business and Entertainment Industries requires 12 credit hours.

MMI 274 Introduction to Music Copyright Law	3
Complete exactly 1 course from the following:	3
MMI 173 Multinational Recorded Music Industry	
MMI 310 Music Business and Entrepreneurship (music majors only)	
Complete exactly 2 courses from the following:	6
MMI 273 Artist Development and the Live Entertainment Industry	
MMI 378 Entertainment Industry Contract Basics.	
MMI 537 Recorded Music Operations	
MMI 530 Entrepreneurship for Musicians	
Total Credit Hours	12

Minor in Creative American Music (CAM)

(Audition Required, Music majors only)

The Bruce Hornsby Creative American Music Program

The Bruce Hornsby Creative American Music Program is designed to develop the creative skills of talented performing songwriters by immersing them in the diverse traditions that form the foundation of modern American songwriting. This rigorous approach will require students to become intimate, both in understanding and practice, with the vast and varied legacy that is American music. The CAM Program is open to all Frost School of Music students by audition. Those who successfully complete the program will earn a minor in Creative American Music. A minor in Creative American Music requires 17 credit hours.

MCY 221 Anglo-American Song Traditions	4
& MMI 207 and Skills Lab III: American Song Traditions	
MCY 222 African-American Song Traditions	4
& MMI 208 and Skills Lab IV: American Song Traditions	
MCY 311 Modern American Pop Music	3
MMI 307 Skills Lab V: American Pop	1
MMI 308 Skills Lab VI: American Pop	1
MMI 320 Contemporary Lyric Writing	3
MMI 445 Senior Project/Portfolio	1
Total Credit Hours	17

Minor in Music Composition

(Audition Required, Music majors only)

A minor in music composition is intended for students in the Frost School of Music who are pursuing majors in other fields within the Frost School. The curriculum in composition is designed for those students intending to pursue a career as a composer and/or to pursue graduate degrees in Theory or Composition. Students interested in this minor are required to submit a compositional portfolio to the chairman of the department for approval before declaring the minor. A minor in music composition requires 15 credit hours.

MTC 101 Composition I	2
MTC 102 Composition II	2
MTC 201 Composition III	2

MTC 202	Composition IV	2
MTC 182	Composition Workshop (4 semesters of 1 credit hour)	4
Complete exactly 1 course from the following:		3
MTC 312	20th And 21st Century Techniques	
MTC 416	Orchestration	
MTC 516	Advanced Orchestration	
Total Credit Hours		15

DAN 285	Creative Dance For Children	
DAN 286	Teaching Dance To Children	
DAN 290	Introduction To Dance-Movement Therapy	
DAN 380	Dance Composition Level 3	
Total Credit Hours		15

Minor in Studio Music and Jazz Instrument

(Audition Required, Music majors only)

A minor in Studio Music and Jazz Instrumental is available for students enrolled in the Frost School of Music whose principal performance medium is a jazz instrument. Permission of the studio teacher is required. A minor in Studio Music and Jazz Instrumental requires 12 credit hours.

MSJ 113	Analysis & Evolution of Jazz Styles I or MSJ 213 Analysis & Evolution of Jazz Styles II	3
MSJ 124	Introduction to Jazz Improvisation	3
MSJ 371	Jazz Improvisation I	3
MSJ 519	Advanced Modern Arranging I	3
Total Credit Hours		12

Minor in Dance

(Audition Required)

There is no undergraduate degree for dance.

A minor in dance is intended for students interested in developing their performance and choreographic skills as well as basics for teaching K-12.

Prospective students interested in this minor are required to audition for acceptance as well as maintain a grade point average of 3.0 in dance courses. Dance courses are open to all university students with the approval of their advisor. A minor in Dance requires 15 credit hours.

DAN 130	Orientation To Dance (prerequisite for all students interested in the Dance minor)	2
Complete exactly 1 course from - Advanced Studio Technique:		3
DAN 211	Modern Dance, Level Two	
DAN 311	Modern Dance, Level Three	
DAN 411	Modern Dance; Level Four	
Complete exactly 1 course from - Dance Education:		3

DAN 190	Improvisation	
DAN 240	Cultural Dance Forms	
DAN 280	Dance Composition Level 2	

Nursing and Health Studies

<http://www.miami.edu/nur>

Please consult your 2015 - 2016 Undergraduate Student Handbooks and the School of Nursing and Health Studies website for the applicable curriculum and program policies. Please note that courses and policies are subject to change throughout the academic year. Check with an advisor in the Office of Student Services at the School of Nursing and Health Studies for current information.

The School of Nursing and Health Studies is committed to academic excellence, the advancement of healthcare, and service to society. Opportunities are also available for students to study and earn course credit hours in a variety of international settings.

Mission

The mission of the School of Nursing and Health Studies is to educate students and support faculty committed to excellence in nursing and health science. Through research, education and practice, the school will create and disseminate health knowledge and prepare culturally competent leaders to provide safe service to our community, the nation and the world.

Student Responsibilities

Students in the School of Nursing and Health Studies are responsible for meeting the degree requirements. The student is responsible to comply with all the provisions of the *Bulletin*. Changes to academic requirements and policies are updated in the School of Nursing and Health Studies Undergraduate Handbooks and website.

The general requirements for graduation from the University of Miami are further described in the General University Information (p. 13) section of the Bulletin.

Students with Disability Accommodation Policy

The policy of the University of Miami School of Nursing and Health Studies is to adhere to Standards of the Americans with Disabilities Act. Any student needing special accommodations should go to the Office of Disability Services (ODS). This office is the primary source responsible for the coordination of services for students with disabilities. The student is responsible for adhering to the Office of Disability Services requirements.

Financial Assistance

Students interested in obtaining financial aid in the form of student loans and grants should contact the Office of Financial Assistance Services. Limited, small scholarships are available through the School of Nursing and Health Studies. The qualifications for these scholarships vary; further information is available from the Office of Financial Assistance Services, and on the SONHS website (www.miami.edu/sonhs (<http://www.miami.edu/nursing>)).

Facilities

The School of Nursing and Health Studies is located on the Coral Gables Campus. The four-story Jerusalem-stone and stucco Schwartz Nursing Center features classrooms and clinical practice labs, conference rooms, one computer lab, and a simulation academy, all equipped with the latest technology. The spacious 53,000-square-foot facility supports

the work of more than 40 nurse scientists and clinical educators and our approximately 850 undergraduate and graduate students enrolled in the school's nursing and health science studies programs annually. The building opened in fall 2006. Library resources for nursing students are at the Otto G. Richter Library on the Coral Gables Campus and the Calder Medical Library on the Medical Center Campus. Clinical experiences are offered in a variety of hospitals and health related agencies in the community.

Foote Fellows

The Foote Fellows Honors Program recognizes the most educationally accomplished incoming students at the University of Miami. Foote Fellows have distinguished themselves both in and out of the classroom at their previous schools, are self-motivated, and think independently. Admission to the Foote Fellows Honors Program is by invitation.

Foote Fellows are exempt from the Cognates Program of General Education requirements. Within the curricular framework of their school or college, Foote Fellows enjoy unmatched freedom and flexibility to explore a multitude of educational resources. Many Foote Fellows leverage this opportunity to take additional majors and/or minors and to study abroad.

At each of the nine undergraduate schools at the University of Miami, a dedicated advisor helps Foote Fellows chart their academic path and attain access to distinctive learning opportunities at the University, such as special school-based seminars, faculty-mentored research, networking opportunities, and off-campus internships.

Foote Fellows also will be invited to join advanced, interdisciplinary Foote Fellow seminars taught by leading faculty members from across the University. An example is Books That Matter, a rigorous seminar in non-fiction reading that is offered in sessions for first-year and for upper-class students. Freshman Foote Fellows benefit from early move-in to the residential colleges. Further, Foote Fellows receive focused advising on post-baccalaureate distinguished fellowships and awards.

The Foote Fellows Honors Program reflects the educational vision of former University of Miami President Edward T. Foote, who retired in 2000 after serving the University for twenty years.

Health Science

Health Science

Please consult your 2015-2016 Student Handbook for the applicable curriculum and program policies. Please note that courses and policies are subject to change throughout the academic year. Check with the Office of Student Services at the School of Nursing and Health Studies for current materials.

The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Health Science. Baccalaureate education provides the foundation for further education in specialized health professional fields. Pre-professional tracks include:

- Pre-physical Therapy,
- Pre-pharmacy,
- Health Science/Health Management and Policy, and

- Health Science General.

Academic Policies

Admission

In accepting students into the Health Science program, the University does not in any way assure admittance into any professional graduate programs. Admission to any of these programs is dependent upon academic performance in the undergraduate course-work and is determined independently by the school or program to which the student applies.

Entering freshmen in the 75th percentile have mid-range SAT and ACT scores of 1410 and/or 32 respectively. Entering freshmen have an average weighted GPA of 4.2. Transfer students have a mean cumulative GPA of 3.33.

Requirements for Admitted Students

Required courses for the Health Science degree include courses in biology, chemistry, physics and mathematics, (where required by the track) and health science with a minimum grade of C- in each course. Students must satisfy both the general education requirements listed below and the requirements of a specific track, to be awarded the Bachelor of Science in Health Science degree. Students must maintain at least a 2.8 GPA in the courses listed under the track requirements with no grade below a C-.

Academic Programs

The School of Nursing and Health Studies will award a Bachelor of Science in Health Science once a student has completed the requirements listed below.

The Health Science Program offers curricula that are designed to prepare students for health professional or graduate education programs. Programs of study can be tailored for students wishing a variety of health professional options. Students are encouraged to contact graduate programs directly to ascertain if there are specific course requirements that might differ from health science track requirements. Any course requirements may be added to a student’s undergraduate curriculum track.

No minor or second major is offered in Health Science. Health Science students may not minor in biology.

General Education Requirements

Areas of Proficiency

The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively. Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT

verbal examination may earn a student exemption from, but not credit hour for, ENG 105.

Students will be able to:

- Gather information, synthesize data, compare various points of view, and present results in writing.
- Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
- Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks.

Advanced Writing and Communication Skills: Health Studies Pertinent Educational Outcomes:

1. Effectively communicate information related to public health in both speech and in writing, using appropriate information sources, presentation formats, and technologies.
2. Demonstrate the necessary written and verbal communication skills to effectively carry out a career in healthcare.

Healthcare Studies Assignments that Require Formal Student Writing or Presentation

Course	Writing Assignment	Student Presentations
ENG 105, ENG 106	Prerequisite courses	Prerequisite courses
BPH 206	Final written project	Final student presentation
BPH 317	Five journal entries	Group presentation
BPH 490	Five journal entries, final paper	Final student presentation
BPH 202	Final written project	
BPH 465	Final written project, small written summaries	
BPH 310	Four reflective papers	Final student presentation
BPH 309	Three reflective papers	Final student presentation
BPH 305	Three reflective papers	Final student presentation
BPH 419	Seven reflective papers	Five research show and tell presentations
BPH 321	Five reflective papers	Student presentations throughout class
BPH 487	Daily journal, written health assessment	Final student presentation
BPH 306	Dietary Assessment paper	

Assessment Measures

- Student performance on written assignments and presentations:

In order to graduate from the Health Sciences program students must successfully pass two courses in English Composition (English 105 & 106) as well as 5 writing intensive courses with a grade greater than or equal to 70%. The majority of required courses for the B.S. in Public Health program include written assignments and student presentations as part of the course grade. Grading of student written assignments and oral presentations are based on defined rubrics. A number of elective courses in the health studies curriculum also require students to submit

significant written assignments and give oral presentations throughout the semester. Throughout the Health Studies curriculum student must demonstrate their ability to write and communicate accurately and with clarity in order to successfully complete their courses.

- Graduating Senior Survey responses for questions related to written and verbal communication:

Indicate the extent to which each capacity was enhanced by your undergraduate experiences	Mean 2010 (n=28)	Mean 2011 (n=23)	Mean 2012 (n=28)	Mean 2013 (n=37)	Mean 2014 (n=50)
Write effectively	3.3	3.0	3.5	3.1	3.3
Improve presentation skills	3.1	3.4	3.3	3.3	3.3
Communicate well orally	3.2	3.2	3.5	3.3	3.4
Relate well to people of different races, nations and religions	3.5	3.3	3.7	3.4	3.6
COMPOSITE SCORE	3.3	3.2	3.5	3.3	3.4

- Based on the results from the GSS (2010–2014) students believe their undergraduate coursework in the Health Studies significantly enhanced their written, oral and formal presentation skills which in turn allowed them to more effectively interact with various individuals and groups.

Mathematics/Statistics/Computer science

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems.

The course requirements for mathematics emphasize the manipulation, interpretation, and application of quantitative data. Students fulfill this requirement by completing *an approved course in statistics, calculus 1, and a CSC or CIS course*. Exemption from the mathematics requirement or placement in prerequisite courses is based on any of the following tests: AP, IB, or a placement examination administered by the Department of Mathematics.

Students will be able to:

- Select quantitative tools appropriate for solving problems.
- Use quantitative tools appropriate for solving problems.

- Interpret quantitative data in an appropriate manner for solving problems.

Areas of Knowledge

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

COGNATES:

Students fulfill the Areas of Knowledge requirement by completing three *cognates*, one from each of the three areas of the university curriculum:

- Arts & Humanities;
- People & Society; and
- Science, Technology, Engineering & Mathematics.

A cognate is a group of at least three courses for at least nine credits, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate.[1] (p.) While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students' transcripts, thus certifying their depth of knowledge in those areas.

The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. (Some majors and minors, depending on the courses selected, can fulfill alternative Areas of Knowledge.) All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate's RAU.

[1] (p.) The University's cognate approval process ensures that all Arts & Humanities cognates require students to complete at least one course that goes beyond skill development, i.e., beyond the basic composition, oral communication, and introductory foreign language courses.

¹ The University's cognate approval process ensures that all Arts & Humanities cognates require students to complete at least one course that goes beyond skill development, i.e., beyond the basic composition, oral communication, and introductory foreign language courses.

Arts & Humanities (9 credits)

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students

to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

- Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.
- Understand the creation and performance of art.

People & Society (9 credits)

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Students will be able to:

- Analyze the organization of society.
- Analyze patterns of social change.

Science, Technology, Engineering & Mathematics (stem) Fulfilled by BSHS Degree

Science, Technology, Engineering & Mathematics cognates develop students' abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Students will be able to:

- Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
- Interpret quantitative data and draw useful conclusions.

The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge, but may be used to fulfill the cognate requirement in only one of those areas. A course may be used in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates, by application to the cognate's RAU. Transfer courses, Advanced Placement, International Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course credit hour, can be used in cognates.

Majors

Major in Health Science

- B.S. in Health Science - General Track (p. 345)
- B.S. in Health Science - Pre-Physical Therapy Track (p. 347)
- B.S. in Health Science - Pre-Pharmacy Track (p. 347)
- B.S. in Health Science - Health Science/Health Management and Policy Track (p. 346)

B.S. in Health Science - General Track

General Education Requirement		
ENG 105 & ENG 106	English Composition I and English Composition II	6
HCS 202	Introductory Statistics in Health Care ¹	3
CIS/CSC Computer Course		
MTH 141	Calculus Concepts with Foundations B	4
9 credit hours of Arts/Humanities Cognate		
9 credit hours of People & Society Cognate		
Core Health Science Requirements		
BIL 150 & BIL 151	General Biology and General Biology Laboratory	5
BIL 160 & BIL 161	Evolution and Biodiversity and Evolution and Biodiversity Laboratory	5
BIL 250	Genetics	3
BIL 255	Cellular and Molecular Biology	3
HCS 212	Human Anatomy	3
HCS 213	Human Anatomy Laboratory	1
HCS 215	Principles of Systemic Physiology	3
BPH 306	Principles Of Nutrition	3
CHM 103 & CHM 105	Chemistry for Life Sciences I (Lecture) and Chemistry for Life Sciences I (Laboratory) ²	4
Select one of the following: ²		
CHM 104 Chemistry for Life Sciences II (Lecture) & CHM 106 and Chemistry for Life Sciences II (Laboratory)		
CHM 111 Principles of Chemistry I & CHM 113 and Chemistry Laboratory I		
CHM 112 & CHM 114	Principles of Chemistry II and Chemistry Laboratory II ²	4
CHM 201 & CHM 205	Organic Chemistry I (Lecture) and Organic Chemistry Laboratory I ²	4
CHM 202 & CHM 206	Organic Chemistry II (Lecture) and Organic Chemistry Laboratory II ²	4
Physics - two semesters with lab		

¹ MAS 201 for Health Management and Policy Track

² Constitutes a Chemistry Minor

NOTE: Please add 9 credits of People & Society on the above table (after 9 credits of Art & Humanities Cognate)

Health Sciences General Track

3 credit hours of electives in biology or Public Health above the 200 level	3
A minor in a discipline accepted by the School of Nursing and Health Studies	

Sample Plan of Study

Freshman Year		
Fall		Credit Hours
ENG 105	English Composition I (or 107)	3

PSY 230 or PSY 240	Child And Adolescent Development Abnormal Psychology	3
A minor in a discipline accepted by the School of Nursing and Health Studies		

Nursing

Nursing Accreditation

The nursing baccalaureate program is approved by the Florida Board of Nursing and accredited by the:

Commission of Collegiate Nursing Education (CCNE)
One DuPont Circle NW, Suite 530
Washington, DC 20036
202-887-6791

The University of Miami School of Nursing and Health Studies (SONHS) offers courses leading to the degrees of:

- Bachelor of Science in Nursing (BSN),
- Master of Science in Nursing (MSN),
- Doctor of Nursing Practice (DNP) and
- Doctor of Philosophy (PhD).

Baccalaureate education is the primary foundation for professional nursing, as well as for graduate education; students who successfully complete the baccalaureate program are eligible to apply for the licensure examination to practice professional nursing. Graduates of diploma and Associate's nursing degree programs may apply as transfer students to obtain the BSN degree. Students holding a baccalaureate degree in a field

other than nursing who would like to pursue the BSN may apply to the Accelerated Option BSN Program.

Academic Policies

Admission

Admission as a freshman or sophomore to the BSN Program is open to applicants who have met the requirements for admission to the University of Miami. Requests for admission should be directed to the Office of Admissions on the Coral Gables Campus.

Transfer students to the Traditional BSN Program, from accredited universities, colleges, or junior colleges may be admitted with advanced standing as space allows provided they have completed courses comparable to those required by the University of Miami. Transfer students are advised to contact the Office of Student Services at the School of Nursing and Health Studies concerning prerequisites.

Transfer students to the Accelerated Option Program must have a Baccalaureate degree from an accredited university or college and must have met all the nursing prerequisites required by the University of Miami. Students are recommended to contact an advisor in the Office of Student Services at the School of Nursing and Health Studies.

An RN transition option is offered to RN's with an Associate's degree or diploma to earn the BSN. Academic transcripts are evaluated to determine if the 60 credits of transferable course work, including pre-requisites have been successfully completed.

Technical Standards

Nursing education requires that the accumulation of scientific knowledge be accompanied by the simultaneous acquisition of skills and professional attitudes and behaviors. The nursing degrees awarded by the University of Miami School of Nursing and Health Studies at the completion of the educational process certifies that the individual has acquired a base of knowledge and skills required for the practice of nursing at the respective undergraduate or graduate level. To this end, all courses in the curriculum must be completed successfully. In order to acquire the knowledge and skills to function in a variety of clinical situations and to render a wide spectrum of patient care, candidates for the undergraduate and graduate degrees in nursing must have abilities and skills in five areas:

- Observation
- Communication
- Motor
- Conceptual-Integrative
- Behavioral-Social

Technological compensation can be made for some disabilities in certain of these areas, but a candidate should be able to perform in a reasonably independent manner and exercise independent judgment.

Observation

The candidate must be able to observe demonstrations and participate in didactic courses and simulated learning opportunities. A candidate must be able to observe a patient accurately at a distance and close at hand. Observation requires the use of common sense, as well as the functional use of the senses of vision, audition, olfaction, and palpation.

Communication

Candidates must communicate effectively using English in clinical and classroom settings. A candidate must be able to elicit information from patients, describe changes in mood, activity and posture, and perceive nonverbal communications. A candidate must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes.

Motor

Candidates should have sufficient motor function to elicit information from patients by palpation, auscultation, percussion and other assessment techniques. A candidate should be able to perform nursing skills requiring the use of gross and fine motor skills (e.g. IV insertion, venous blood draw, urinary catheter insertion). A candidate should be able to execute motor movements reasonably required to provide nursing care and emergency response to patients. Examples of emergency responses reasonably required of nurses are cardiopulmonary resuscitation, medication administration, and application of pressure to stop bleeding. Candidates must perform actions which require the use of both gross and fine muscular movements, equilibrium, and functional use of the senses of touch and vision. Candidates should also be able to assist and/or participate in various lifting activities.

Conceptual-Integrative

These abilities include measurement, calculation, reasoning, analysis, synthesis, and retention of complex information. Critical thinking requires all of these intellectual abilities in order to provide optimal nursing care. In addition, the candidate should be able to comprehend three-dimensional relationships and to understand the spatial relationships of structures.

Behavioral-Social

Candidates must possess the emotional health required for the full use of their intellectual abilities, the exercise of good judgment, the prompt completion of all responsibilities attendant to the care of patients, and the development of mature, sensitive and effective relationships with patients. Candidates must be able to tolerate physically taxing workloads and to function effectively under stress in the classroom and clinical area. They must be able to adapt to changing environments, display flexibility and learn to function in the face of uncertainties inherent in the clinical environment. Compassion, integrity, concern for others, interpersonal skills, interest and motivation are all personal qualities that are assessed during the admissions and educational process.

Reasonable accommodations will be considered on a case by case basis for individuals who meet eligibility under applicable statutes. Any person expecting to need accommodations should request them prior to beginning the program, as some accommodations may not be considered reasonable and may impact an applicant's ability to complete all components of the program.

Requirements for Enrollment into Upper Division and Clinical Courses

- Traditional BSN students at the University of Miami of Miami must achieve junior standing with a minimum UM GPA of 3.0 and a UM prerequisite GPA of 2.75.
- Transfer students must have a minimum cumulative GPA of 3.5 and a prerequisite GPA of 3.3.

- Accelerated Option BSN students must have a minimum GPA of 3.0 with a 3.0 for prerequisite courses.
- To be considered for progression or admission to clinical coursework, students are allowed to repeat only 1 failed prerequisite course. Failure of a second course, regardless of a passing retake on the first failed course disqualifies the student for progression or admission to the clinical course work.
- Students are required to have a health examination prior to enrollment in clinical nursing courses. All students must provide evidence of a current TB screening test, hepatitis B, MMR, tetanus, varicella and influenza vaccinations, and certification in Basic Life Support. Students must submit to drug screening and background checks. See the School of Nursing and Health Studies 2015-16 Student Handbooks for further information.

Requirements for Enrollment into Upper Division Nursing Courses

Traditional BSN

CHM 103 & CHM 105	Chemistry for Life Sciences I (Lecture) and Chemistry for Life Sciences I (Laboratory)	4
HCS 212 & HCS 213	Human Anatomy and Human Anatomy Laboratory	4

NUR 306	Principles of Nutrition	3
NUR 317	Theories in Growth and Development	3
FL RN License		
Total Credit Hours		34

Academic Progress

To be assured of uninterrupted progression through the BSN program, students must maintain a grade point average of 2.0 or better.

Student records are reviewed at the close of each semester, and those students with a cumulative average of less than 2.0 are subject to being placed on academic probation according to the University of Miami Policy on Academic Probation and Dismissal. A grade of C- is not a passing grade in any nursing course within the BSN program.

When a clinical nursing course is repeated, both theoretical and clinical components must be repeated. When a course must be repeated, progression in the nursing program will be altered in order for prerequisites to be met. Such alteration will lengthen the time required to complete the BSN program. Students are required to fulfill the requirements that are in effect at the time of the current program. No special courses will be created for students who are repeating the same course.

Failure of two nursing courses with a grade of C- or below or failure of the same nursing course twice with a grade of C- or below constitutes failure of two nursing courses and the student will be dismissed from the program. A student who fails only one nursing course, retakes the failed nursing course and receives a passing grade on the second attempt at a failed nursing course, may progress through the program but the original failure is still counted as a failed course. If the student should fail another nursing course later in the program of study, then the student will not be allowed to retake the second failed course and the student will be dismissed from the program.

Registered Nurse Licensure

Graduates of the BSN program are eligible to apply for the National Council Licensure Examination (NCLEX-RN) for registered nursing after a student passes all the courses, completes the credit hours, and completes the requirements for the RN Exit HESI exam.

Requirements for Graduation

Traditional BSN

General Education Requirements

Philosophy

The University of Miami's General Education Requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. The General Education Requirements provide students with the opportunity to study methodologies and

achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The General Education Requirements allow students to create an integrative map for their academic careers, providing a context for more focused studies.

Areas of Proficiency

The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively. Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour for, ENG 105.

Students will be able to:

- Gather information, synthesize data, compare various points of view, and present results in writing.
- Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
- Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks

Advanced Writing and Communication Skill Requirements

Summary of Communication Skills Required of Students in the Bachelor of Science in Nursing (BSN) Program

Students must communicate effectively using English in clinical and classroom settings. A student must be able to elicit information from patients, describe changes in mood, activity, and posture, and perceive nonverbal communications. A student must be able to communicate effectively and sensitively with patients. Communication includes not only speech, but reading and writing. The candidate must be able to communicate effectively and efficiently with all members of the health care team in both immediate and recorded modes. Throughout the curriculum students are expected to achieve skills in the following communication domains:

Therapeutic Communication

Therapeutic communication between the nurse and patient is a cornerstone of effective nursing care. This communication style is goal-oriented and focused on learning and promoting growth.

Example content: principles of therapeutic use of self; therapeutic communication techniques; health education/teaching; reflective journals.

Technical Communication

Technical communication encompasses the specific methods used by the nursing profession to communicate information necessary for nursing practice.

Example content: use of clinical information systems (e.g., electronic health record, physician order entry); application of standardized health care terminology; use of data and data systems

Inter- and Intra-Professional Communication

Effective communication among all members of the healthcare team is essential for delivering high quality, safe patient care.

Example content: teamwork/cooperative learning; scopes of practice; conflict resolution; group dynamics and evaluation.

Scholarly Written Communication

Scholarly writing is a formal means of communication in which the writer communicates synthesized knowledge about a topic while also demonstrating original thought and unique perspectives.

Example content: scholarly papers; research critiques; application of APA publication style.

Scholarly Verbal Communication

Scholarly verbal communication is a formal way of speaking with the intended audience to provide and/or elicit information in a systematic manner. Primary methods of scholarly verbal communication involve verbal presentations/lectures and formal data gathering processes such as interviews.

Example content: scholarly presentations; key informant interviews

Minimal Writing Proficiency Standards

Writing proficiency is evaluated throughout the BSN program plan of study. Three primary categories of writing are required:

1. scholarly papers (NUR 400/NUR 401, NUR 440, NUR 453);
2. patient care documentation (NUR 304, NUR 308, NUR 318, NUR 320, NUR 411, NUR 448, NUR 453); and
3. reflective journals (NUR 306, NUR 453). Each writing component is evaluated as part of the grading rubric for the associated course, with feedback and revisions required.

Plan for Assessment of the BSN Program Advanced Writing and Communication Skills Requirement

Content to meet the required communication skills and minimal writing proficiency standards is provided across the curriculum. The table below outlines the specific communication domains and content covered in each course as well as assessment/outcome criteria for each. In addition to demonstrating skills across these five communication domains, students are also required to complete ENG 105 and ENG 106 (or equivalent) as prerequisite course to provide the foundation for the development of more advanced writing and communication skills.

*Bold course numbers are courses in the accelerated BSN plan of study

Author Comment: Table with specific communication domains and content should go here (needs to be created by courseleaf)

Course	Communication Domain	Assessment/Outcome (exemplars)
ENG 105, ENG 106 (or equivalent)	(Pre-requisite)	(Pre-requisite)
HCS 212/HCS 213	Technical Communication	Examinations
HSC 215/HSC 216	Technical Communication	Examinations
NUR 306	Technical Communication	Dietary journals
	Therapeutic Communication	Dietary Analysis System

	Inter- and Intra-Professional Communication	Clinical Evaluations
	Scholarly Written Communication	Reflective Journals
		Scholarly Paper Simulation
HCS/NUR XXX Nursing Elective	Varies	Varies

Mathematics/Statistics

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems. The course requirements for mathematics emphasize the manipulation, interpretation, and application of quantitative data. Students fulfill this requirement by completing a statistics course beyond MTH101

Students will be able to:

- Select quantitative tools appropriate for solving problems.
- Use quantitative tools appropriate for solving problems.
- Interpret quantitative data in an appropriate manner for solving problems.

SOCIAL SCIENCE

- Introduction to Psychology (PSY 110)
- A Social Science Course

AREAS OF KNOWLEDGE

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

COGNATES

Students fulfill the Areas of Knowledge requirement by completing three cognates, one from each of the three areas of the university curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a group of at least three courses for at least nine credits, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate (1). While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students' transcripts, thus certifying their depth of knowledge in those areas.

The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. (Some majors and minors, depending on the courses selected, can fulfill alternative Areas of Knowledge.) All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate's RAU.

Arts & Humanities

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

- Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.

Understand the creation and performance of art.

People & Society

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Students will be able to:

- Analyze the organization of society.
- Analyze patterns of social change.

Science, Technology, Engineering & Mathematics (Fulfilled Through BSN Degree)

Science, Technology, Engineering & Mathematics cognates develop students' abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Students will be able to:

- Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
- Interpret quantitative data and draw useful conclusions.
- The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge, but may be used to fulfill the cognate requirement in only one of those areas. A course may

be used in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates, by application to the cognate's RAU. Transfer courses, Advanced Placement, International Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course credit, can be used in cognates.

¹ The University's cognate approval process ensures that all Arts & Humanities cognates require students to complete at least one course that goes beyond skill development, i.e., beyond the basic composition, oral communication, and introductory foreign language courses.

**Tracks in BSN Programs
Majors in Nursing**

- Traditional BSN (p. 354)
- Accelerated BSN (p. 353)

Public Health

The University of Miami School of Nursing and Health Studies offers courses leading to the degree of Bachelor of Science in Public Health. Baccalaureate education provides the foundation for further education in Public Health and/or other specialized health professional fields.

Academic Policies

Admission

Entering freshmen in the 75th percentile have mid-range SAT and ACT scores of 1410 and/or 32 respectively. Entering freshmen have an average weighted GPA of 4.2. Transfer students have a mean cumulative GPA of 3.3.

Requirements for Admitted Students

The course work for the BSPH Program is based on recommendations made by the Association for Prevention Teaching and Research (2008)

for undergraduate course work in Public Health. Students are required to complete:

- 33 credit hours of Public Health coursework, including:
- 27 credit hours of core required courses and
- 6 credit hours of approved Public Health electives.

Academic Programs

The School of Nursing and Health Studies will award a Bachelor of Science in Public Health, once a student has completed the requirements listed below.

The Public Health Program offers curricula that are designed to prepare students for public health practice or graduate education in health related fields. Programs of study can be tailored for students wishing to combine Public Health education with a variety of other health related fields (e.g., pre-med, pre-physical therapy).

No minor is required within the Public Health program. However, students have room within their plan of study to pursue a minor if desired.

General Education Requirements

Philosophy

The University of Miami's General Education Requirements ensure that graduates have acquired essential intellectual skills and have engaged a range of academic disciplines. The General Education Requirements provide students with the opportunity to study methodologies and achievements in all areas of human inquiry and creative endeavor, and to cultivate abilities essential for the acquisition of knowledge. The General Education Requirements allow students to create an integrative map for their academic careers, providing a context for more focused studies.

Areas of Proficiency

The Areas of Proficiency requirements ensure that students either already possess, or develop at the University, the ability to express themselves effectively, to use mathematics with facility, and to reason cogently.

English Composition

Good writing facilitates clear thinking, and clear thinking is the foundation of effective communication. The expectation is that students become adept at using the English language as an effective communication tool. Effective writing skills are representative of an educated person because they are instruments to advance ideas efficiently and persuasively. Students fulfill this requirement by satisfactorily completing ENG 105 and ENG 106, or the equivalent. Appropriate Advanced Placement (AP) or International Baccalaureate (IB) scores in English composition may be used to satisfy this requirement. An appropriate score on the SAT or ACT verbal examination may earn a student exemption from, but not credit hour for, ENG 105.

Students will be able to:

- Gather information, synthesize data, compare various points of view, and present results in writing.
- Develop the ability to read texts critically and to use textual evidence to support a sophisticated written argument.
- Consider audience, tone, organization, and standard conventions in relationship to specific rhetorical tasks.

Mathematics/Statistics/Computer Science:

In a world increasingly influenced by science and technology, it is important for students to acquire the capacity to use and understand essential mathematical applications. The mathematics requirement helps students learn to use quantitative methods to solve problems. The course requirements for mathematics emphasize the manipulation, interpretation, and application of quantitative data. Students fulfill this requirement by completing an approved course in statistics. Exemption from the mathematics requirement or placement in prerequisite courses is based on any of the following tests: AP, IB, or a placement examination administered by the Department of Mathematics.

Students will be able to:

- Select quantitative tools appropriate for solving problems.
- Use quantitative tools appropriate for solving problems.
- Interpret quantitative data in an appropriate manner for solving problems.

Social Science

Introduction to Psychology (PSY 110)

An additional Social Science course

Areas of Knowledge

The Areas of Knowledge requirement is designed to help students understand and appreciate intellectual achievements in major areas of human inquiry and creative endeavor. The courses offered in the areas of knowledge provide a broad array of intellectual and cultural exploration. In satisfying these requirements students examine creative expression in the arts, literature, and philosophy; study human development and behavior; and explore the mathematical, scientific, and technological world.

Cognates

Students fulfill the Areas of Knowledge requirement by completing three *cognates*, one from each of the three areas of the university curriculum:

- Arts & Humanities;
- People & Society; and
- Science, Technology, Engineering & Mathematics.

A cognate is a group of at least three courses for at least 9 credit hours, related in a topical, thematic, interdisciplinary, sequential, or other fashion, so that completion of a cognate provides coherent depth of knowledge. Each cognate has course options that allow students to complete the cognate in a manner that meets their interests, while staying within the coherent focus of the cognate.¹ While students are required to take three cognates to fulfill the Areas of Knowledge requirement, there is no limit to the number of additional cognates students may complete. All cognates completed by students are listed on the students' transcripts, thus certifying their depth of knowledge in those areas.

The university offers a large number and range of cognates. Additionally, each major and minor fulfills the cognate requirement in one Area of Knowledge. (Some majors and minors, depending on the courses selected, can fulfill alternative Areas of Knowledge.) All approved cognates are visible in a cognate search engine (at www.miami.edu/cognates) that allows students to search for cognates based on cognate features, cognate courses, and

keywords. Each cognate is administered by a department or program that is designated as the Responsible Academic Unit (RAU) for the cognate. Inquiries regarding a cognate should be directed to the cognate's RAU.

¹ The University's cognate approval process ensures that all Arts & Humanities cognates require students to complete at least one course that goes beyond skill development, i.e., beyond the basic composition, oral communication, and introductory foreign language courses.

Arts & Humanities (9 credits)

Arts & Humanities cognates engage students in the study of the most enduring and influential works of art, imagination, and culture. Through study, creation, and performance, courses in this area enable students to understand the works of artists, musicians, novelists, philosophers, playwrights, poets, historians, and theologians. These courses cultivate the ability to interpret, critically evaluate, and experience the creative products of human culture and expression.

Students will be able to:

- Critically evaluate and interpret the creative products of humanistic and artistic expression, applying appropriate vocabulary and concepts for their description and analysis.
- Understand the creation and performance of art.

People & Society (Fulfilled by BSPH Degree)

People & Society cognates help students understand and analyze the organization of society and the patterns of social change, in the past and in the contemporary world.

Students will be able to:

- Analyze the organization of society.
- Analyze patterns of social change.

Science, Technology, Engineering & Mathematics (STEM - 9 credits)

Science, Technology, Engineering & Mathematics cognates develop students' abilities to think critically about mathematical, scientific, and technological issues, through an understanding of processes and methods of scientific inquiry involving experimentation, observation, and quantitative analysis. The cognates nurture literacies that enable students to make informed decisions in an increasingly complex world.

Students will be able to:

- Understand the use of quantitative tools, experimentation, and observation to analyze and solve mathematical, scientific, environmental, and technological problems.
- Interpret quantitative data and draw useful conclusions.

The three cognates taken to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors) must have different RAUs. No more than two Areas of Knowledge may be fulfilled by cognates whose RAUs are in the same school or college, except for the College of Arts and Sciences. Majors and minors may cover more than one Area of Knowledge, but may be used to fulfill the cognate requirement in only one of those areas. A course may be used in only one cognate used to fulfill the Areas of Knowledge requirement (including cognates fulfilled by majors and minors). Students may petition for individual course substitutions in cognates, by application to the cognate's RAU. Transfer courses, Advanced Placement, International

Baccalaureate, CLEP, dual enrollment, etc., that are transferred in with specific UM course credit hour, can be used in cognates.

Bachelor of Science in Public Health (BSPH) to Master of Public Health (MPH)/M.S. in Public Health (MSPH) 4+1 Program

The School of Nursing and Health Studies (SONHS) and the Graduate Programs in Public Health at the University of Miami Miller School of Medicine have developed a Bachelor of Science in Public Health (BSPH) to a Master's in Public Health (MPH) or M.S. in Public Health (MSPH) 4 + 1 program.

Program Highlights

- Undergraduate students enrolled in the BSPH program in the SONHS who qualify academically may apply to the MPH or MSPH program in the spring of their junior year.
- Accepted students are then able to take 12 credit hours of Master's level Public Health courses in their senior year. These Master's level credit hours would count toward their MPH or MSPH degree.
- By completing 3-6 credit hours of Master's level MPH or MSPH coursework in the summer following completion of their BSPH degree, students could complete their MPH or MSPH degree in only one additional academic year.
- Students accepted to the 4 + 1 program will continue to pay undergraduate tuition for the senior year.
- Upon graduation with the BSPH, accepted students will then matriculate into the MPH or MSPH program and complete the remaining 33 credit hours of MPH or MSPH coursework at UM graduate school tuition rates.

Admissions Criteria

- BSPH students must have an overall undergraduate GPA of at least a 3.0 at the time of application to be considered. Accepted students who do not maintain a GPA of 3.0 for the remainder of their undergraduate coursework are subject to re-evaluation.
- GRE scores are not required for University of Miami undergraduates who apply to the 5 year BSPH + MPH program.
- Admissions decisions to the graduate program will be made solely by the admissions committee for the Graduate Programs in Public Health at the Miller School of Medicine.
- BSPH students taking master's level public health courses in their senior year must obtain a grade of B or better in these courses in order for them to count towards the graduate degree.

Minor in Health Communication

Minor in Health Communication

A joint minor in Health Communication is offered in conjunction with the School of Communication. The Minor in Health Communication consists of 15 credits:

COS 324	Health Communication	3
BPH 206	Introduction To Public Health	3
Select two Communication Studies Electives		6
COS 325	Communication In Health Organization	
COS 426	Patient-Provider Communication	
COS 427	Health Behavior And Risk	
COS 472	Persuasion	
Select one Public Health Elective		3
BPH 305	Issues In Health Disparities	
BPH 310	Global Health	
BPH 321	Health Promotion And Disease Prevention	
BPH 322	Introduction To Health Policy	
Total Credit Hours		15

A grade of C or higher is required in all courses (a grade of C- or lower is not acceptable for minor).

Minimum UM GPA of 2.0 required to declare minor.

For further information, please contact the Office of Student Services at 305-284-4325 or via email at <http://www.miami.edu/sonhs/index.php/sonhs/>

Minor in Public Health

MINOR IN PUBLIC HEALTH:

The School of Nursing & Health Studies (SONHS) offers a minor in Public Health (12 credits). The Public Health minor consists of two required courses, Introduction to Public Health and Introduction to Epidemiology, and two elective courses chosen from a list of approved Public Health electives (see below):

BPH 206	Introduction To Public Health	3
BPH 208	Introductory Epidemiology	3
Elective Courses (Must complete two from the list below):		6
BPH 301	Human Sexuality And Vulnerable Populations	
BPH 303	Hiv/Aids And Health Maintenance For Health Care Providers	

BPH 305	Issues In Health Disparities	
BPH 309	Health & Environ.	
BPH 310	Global Health	
BPH 317	Theories In Growth And Development	
BPH 319	Contemporary Issues In Bioethics For Health Care	
BPH 321	Health Promotion And Disease Prevention	
BPH 322	Introduction To Health Policy	
BPH 352	Biological Principles Of Public Health	
BPH 355	Global Nutrition	
BPH 419	Contemporary Health Issues In South Florida	
BPH 465	Public Health Statistics And Data Management	
BPH 487	Global Health Practicum	
APY 205	Medicine, Health Care In Society, Medicine, Health Care in Society	
Total Credit Hours		12

GRADUATE ACADEMIC PROGRAMS

Mission

The mission of the Graduate School is to promote graduate education, scholarship, and research; to support individuals, departments, and programs in the pursuit of excellence; to foster innovative, multidisciplinary, and interdisciplinary activities; and to maintain high ethical and academic standards in graduate studies.

The standards of study and conduct in the Graduate School are high. They are not set and maintained by the Graduate School but rather by the faculty who determine the standards for their individual program. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School delegates responsibility to the student and his/her program. Within this broad responsibility the recommendation for the degree rests with the Committee.

Graduate School

<http://www.miami.edu/grad>

All graduate work (except for the Master's Degree in Law, J.D. in Law and M.D. degree) at the University of Miami is under the direction of the Dean of the Graduate School and the Graduate Council.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various programs in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements in the time specified.

Admission requirements are described in the *Bulletin* of the Graduate School, and may be obtained from the individual department or program. Information is also available at www.miami.edu/grad (<http://www.miami.edu/grad>).

Applications to the Graduate School are processed through the various Schools and Colleges. See http://www.miami.edu/gs/index.php/graduate_school/apply/ for a listing of online applications by program.

Prospective students should note that "graduate study" means an integrated program of advanced, specialized study, based on an undergraduate major and/or adequate background, presupposing academic and personal maturity, and making much more than average demand upon the industry, initiative, and scholarship of the student. The term must be distinguished from "post-graduation study" which means merely that courses, not necessarily of graduate level, are taken after the student has received a bachelor's degree.

To preserve its ideals of scholarship, conduct, and character the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

Academic Policies

Time to Completion

Time to completion starts when a student begins any program in the Graduate School, whether it be a master's or doctoral program. All work must be completed within six years of the time of admission to graduate work, for those studying for the various master's degrees; and within eight years for those studying for doctoral degrees. For those admitted directly into a Ph.D. program without a master's degree in field, work must be completed within eight years. Individual programs may set a shorter time period. Exceptions may be granted by the Dean of the Graduate School at the request of the Graduate Program Director.

Recency/Validation for Over-Aged Credit Hours

Graduate credit hours transferred from another university may not be applied toward a graduate degree at the University of Miami if their age at the time of acceptance into the University of Miami program exceeds six years. On an individual basis, students may be permitted to validate over-aged credit hours by examination, with program approval.

Continuous Enrollment

To maintain status as a graduate student, registration in each fall and spring semester is required. Otherwise, admission lapses and readmission must be granted. Doctoral students for whom course work is no longer appropriate should consult their program for registration guidance.

Registration

Graduate students can register on the first day of registration and through the registration period. For more information on registration, students should contact their respective School or College. See academic calendar for dates of registration periods at <http://www.miami.edu/index.php/registrar/calendar/>.

Full-Time Study

The categories of full-time students include:

1. Graduate students taking 18 or more graduate credit hours during the calendar year (9 credit hours in a regular semester or 6 credit hours in a summer semester).
2. Graduate teaching and research assistants taking 16 or more graduate credit hours during the calendar year (8 credit hours in regular semester or 6 credit hours in a summer semester).
3. Graduate students enrolled in any course numbered 800 or above, i.e., any 800-level course required for the completion of the degree.
4. All MBA for Executive and Professional students and Master of Science in Professional Management students are considered full-time.

In all cases, determination as to whether or not a student is in full-time study is the privilege of the Dean of the Graduate School.

The maximum number of credit hours allowed for full-time study is 12 for each semester and six for each summer semester. Exception to this policy can only be made by the Dean of the Graduate School or his/her designee and requires a signed recommendation from the Program Director.

For thesis and dissertation students, full-time registration is required during the semester or summer session in which a candidate defends the thesis or dissertation. Students who wish to have this requirement waived must have a written request provided to the Graduate School by the Dean of their respective College or School, or the dean's designee.

No full-time faculty member may be a full-time student, whether or not working toward a degree. Nor may a full-time student be a full-time faculty member.

No full-time student will be a principal investigator in any grant or contract, whether in name or fact. And no principal investigator will be a full-time student.

Exceptions to these rules may be made in cases in which students are encouraged to apply individually for small research grants that are consistent with and contribute to their field of study and their dissertation work, and, in certain programs, in which students in a terminal degree status are obliged, as a part of their degree program, to teach as *de facto* faculty members. (Note: Faculty from School of Nursing and Health Sciences and from the Physical Therapy program are permitted to pursue Doctoral degrees in their home program/school.

Withdrawals

Withdrawals, either from individual courses or from a graduate program, should be processed through the office of the Dean of the School of the student's program. Students who wish to officially withdraw from joint or dual degree programs should consult the office of the Dean of the School or College for both disciplines. The date of withdrawal is that on which the student notifies the office of the Dean or the date of receipt of a letter requesting withdrawal. No withdrawal from the University is official until the student has consulted with the Dean of his/her school and has completed the necessary forms.

Students wishing to officially withdraw from the University of Miami must provide the Office of the Registrar notification of their intent to withdraw. Initial notification may be made in person, in writing, by fax, or by telephone. This notification will be recorded and used for notification purposes for the Federal Government. Repayment of any federal funds will be based on the date of notification.

Students must also follow the required process as set forth by their school/college for withdrawing from courses. This process often requires that a signature from a dean or the dean's representative be obtained on a Change of Course form. In some cases, students can complete the Change of Course form (hard copy or through the CaneLink system) without an approving signature. Change of Course forms must be submitted to the Office of the Registrar for final processing/review.

In addition to the completion of the Change of Course form, students will be asked to complete a Withdrawal Checklist and a Withdrawing Student Survey. The Withdrawal Checklist provides students with a series of offices that need to be notified concerning their withdrawal.

To officially withdraw from the MBA Program or Master of Science in Professional Management program, students must inform the Office of Graduate Business Programs in writing prior to the beginning of a course/term. Tuition will be refunded on a prorated basis based on the number of class meetings attended. No tuition refund will be granted when class attendance has exceeded 50% of class meetings. For

further information contact: Office of Graduate Business Programs, 305-284-4643, email: mba@miami.edu.

Military Withdrawal

Tuition refunds of 100% are granted to students who withdraw due to military service, provided they do not receive credit hour for the course (see below under "Credit Hour for Courses After the 12th Week of the Semester").

If you receive federal financial aid and withdraw before you complete 60% of the semester, a pro rate calculation will determine the amount of financial aid you have earned. It is based on the amount of time you were enrolled. This calculation is independent of any charges incurred at the university.

Credit Hour for Courses After the 12th Week of the Semester

The following statement of policy was adopted by action of the Academic Deans' Council April 14, 1967:

1. On recommendation of the Dean of the school, students who withdraw after the 12th week of the semester because of official orders to active duty with the Armed Forces of the United States may be awarded credit hour in any course in which they have achieved a C or better up to the time of withdrawal. Instructors must certify that the student had achieved satisfactory accomplishment on the basis of previous work in the course by awarding an appropriate grade. Accomplishment of less than C should be entered on the permanent record as a withdrawal without prejudice (W).
2. Credit hour granted for a course under this policy should count toward graduation.
3. There should be no refund of tuition for courses for which credit hour has been granted. Refunds of courses not awarded credit hour should be on the same basis as complete withdrawals for military service.
4. The above recommendations are procedures for determining the awarding of credit hour and do not release the student from the usual withdrawal procedures.

Veterans and children of deceased or totally disabled veterans attending the University as students under the government's educational benefits bills must also clear their withdrawal with the main campus Veterans Affairs Officials in the Office of the Registrar who can be contacted at:

Phone: 305-284-2294 or
Email: registrar@miami.edu

Additional Information on Military Withdrawal is available at:

<https://www6.miami.edu/registrar/MilitaryWithdrawalInfo.pdf>

Leave of Absence

Leave may be obtained by petition of the Program Director followed by the approval of the Dean of the Graduate School. Leave of Absence officially stops the time to completion clock. The Petition for Leave of Absence form may be found at http://www.miami.edu/gs/index.php/graduate_school/forms/.

Grades and Credit Hours

The same letter grades are used for graduate and undergraduate students, but with somewhat different meaning.

A	Excellent accomplishment
B	Good accomplishment
C	Fair, but below that expected of graduate students (C- is the lowest passing grade. Some programs may require higher standards.).
S	Symbol used for acceptable (U-unacceptable) thesis, dissertation, practicum, and internship credit hour. It may be used for regular courses under special circumstances with the prior approval of the instructor, department chairman, and the Dean of the Graduate School. The Graduate School considers a grade of "S" to indicate a minimum of a 3.0 GPA in a graduate course if a student has taken no prior coursework on the graduate level. A grade of "S" reflects that a student is in good academic standing.
D	Poor (not acceptable for credit hour toward the advanced degree).
F	Failure
W	Course dropped prior to the last day for withdrawing from classes as published in the official calendar of the university. Courses dropped after last date must have approval of Dean of graduate school. Credit hour can be earned only by successful repetition of the course.
I	Incomplete work in passing status with the instructor's permission to complete the course. (Not to be used for thesis or dissertation credit hours). The "I" should be changed to a letter grade within one (1) calendar year after it is given, unless the Academic Dean of the student's primary school or college and the Dean of the Graduate School approve the delay. If the "I" is not changed within one year, credit hour can be earned only by successful repetition of the course. (Note: Fellowships and financial aid may be withdrawn if there is an excess accumulation of "I"s on a student's transcript).
IP	Denotes in progress grade given by instructor for any course (600, 700, or 800 level) in which a student has made expected or clearly satisfactory progress during the semester, but has yet fully to complete requirements for the course. "IP" is to be given for 800-level internships, research, thesis, and dissertation courses that have not been completed. Upon satisfaction of all Graduate School requirements, the Assistant Director, Programs of the Graduate School will issue final credit hour for all master's thesis and doctoral dissertation courses (e.g., 810, 820, 830, 835, 840 and 850). Zero-credit hour courses (e.g., 820 and 850) will be changed to "S." Please note that all "IP"s must be converted to "S", letter grade, or "I" at graduation. "IP" will also be converted to "I" upon any departure from the University for a period in excess of one year.
NG	Symbol assigned by Enrollment Services indicating that the instructor has not yet reported the student's grade. For a student to receive credit hour for the course, the instructor must report a passing grade prior to the student's graduation. ¹

¹ Faculty Senate Legislation #85005(B)

An average of B (3.0) is required for a graduate degree, and no "D" credit hour may be counted toward the degree. All work leading to the graduate degree and taken as a graduate student will be counted in computing the quality point average, including courses graded "D".

No transferred credit hours are calculated into the University of Miami G.P.A.

Award of Academic Merit

Students who obtain a 3.8 G.P.A. or better will receive an Award of Academic Merit from the Graduate School. The Award is posted on the transcript.

Quality points are awarded as follows:

A+	4.00
A	4.00
A-	3.70
B+	3.30
B	3.00
B-	2.70
C+	2.30
C	2.00
C-	1.70
D+	0.00
D	0.00
F	0.00

The quality point average is then determined by dividing the total of quality points earned by the total of credit hours attempted. The symbols "S", "W", and "I" are not counted as credit hour attempted.

Repeat Rule

A student may repeat a course *in which a failing grade was earned*, but the repetition of the course will not eliminate the previous grade from the record. A course may be repeated only once unless written authorization is provided by the Dean of the Graduate School. All grades are included in the computation of the quality point average. If a course in which an unsatisfactory grade (as determined by the program advisor) was earned is repeated and the repeat grade is a "C-" or higher, the number of credit hours required for graduation will be increased by the number of credit hours repeated.

Registrations which involve repeating a course in which a grade of "A" or "B" has already been earned may not earn quality points or credit hours, nor count as credit hours attempted.

Levels of Graduate Study

Graduate study implies the need for a minimum of formal courses and a maximum of independent work under faculty supervision. Coursework, in itself, is not necessarily a determinant of graduate progress and achievement. The appropriate determinants are the ability of the qualified student to master the various qualifying and comprehensive examinations that a program requires of the student. All work taken by a graduate student in the major area or area of concentration shall be at the graduate level (600 or above). With the permission of the program

of major concentration a student may take elective credit hours (not prerequisite to the major) at any level provided the following limits are observed:

Total Graduate Course Credit Hours	Maximum Course Credit Hours Below 500 Level
30	3
31 or above	6

Approval for undergraduate credit hours as part of the graduate degree program can be made only after a minimum of 12 credit hours is completed. Award may not be made retroactively, nor are credit hours accepted from another institution.

RA, TA, GA Hourly Guidelines

To receive a stipend an RA, TA, GA must be a full-time student.

Graduate students with appointments as RAs, TAs or GAs will be expected to work 20 hours per week with the exception of efforts directly required for dissertation research.

International students may work on campus provided the student is maintaining F1 status and does not work more than a total of 20 hours per week (including any off campus work the student may have been authorized to perform) while school is in session. Questions regarding work for international students should be directed to International Student and Scholar Services: <http://www.miami.edu/iss>.

Graduate students with Assistantships and Fellowships will be classified with the following designations. *(FE) Fellows, *(RA) Research Assistant, *(TA) Teaching Assistant, *(GA) Graduate Assistant, *(TR) Trainee. *Please contact the Graduate School for specific codes.

Definitions

FE (Fellow)

Responsibilities do not include the provision of direct services to the University and require internal/external fellowship support.

RA (Research Assistant)

Responsibilities are mainly conducting research and/or assisting with research projects.

TA (Teaching Assistant)

Responsibilities are mainly teaching and/or assisting in the area of teaching.

GA (Graduate Assistant)

Responsibilities are mainly in professional support of University operations and programs. Graduate students should not be hired to perform clerical duties.

TR (Trainee)

Designated as such by specific federal guidelines which indicate a complex process wherein the trainee takes on an increasingly independent role in the selection, conceptualization, and execution of research projects under the supervision of an experienced mentor.

In definitions where the word "mainly" is used, "mainly" is defined as greater than 50%.

Requirements for Teaching Assistants

1. Graduate teaching assistants who are the instructors of record and responsible for assigning grades in a course must have a master's in the teaching discipline or 18 graduate credit hours in the discipline.
2. Graduate teaching assistants must be directly supervised by a faculty member in the teaching discipline, must attend regular in-service training provided by the Instructional Advancement Center (in coordination with the Graduate School or provided by the specific graduate program), and must be reviewed by the supervising faculty member once a semester.
3. Graduate Teaching Assistants who have previous teaching experience and indication of competency may be exempted from TA Training by the Dean of the Graduate School in consultation with the Graduate Program Director in the discipline. A request for waiver must be submitted to the Dean of the Graduate School by the Graduate Program Director.

Policy on Outside Employment for RA/TA/GA

A graduate student must have prior approval from the chair or advisor to work outside the department, since such activities might impede progress toward his/her degree. Any question or concern should be discussed with the Dean of the Graduate School.

1. A graduate student is allowed to supplement his/her stipend by tutoring undergraduate students in courses in which he/she has no direct responsibility at the time.
2. A graduate student who is teaching a class or lab of a multi-section course using a common syllabus and common exams may not tutor any student in any section of that course.
3. A graduate student, like any other member of the teaching faculty, may offer review sessions for his or her students to which he or she may invite students from other sections of the same course. The graduate student arranging such sessions may not under any circumstances take money from the students in attendance.
4. A graduate student may use his or her office for tutoring or may ask departmental permission to use a classroom or other appropriate university facility.
5. The graduate advisor or department chair may require a graduate student to limit his or her outside employment or tutoring activity if, in the view of the department, such activity is impeding the graduate student's academic progress or keeping him or her from fulfilling responsibilities within the department.
6. International students should clear their work instructions with International Student and Scholar Services. Questions regarding work for international students should be directed to International Student and Scholar Services, 305-284-2928, email: iss@miami.edu or visit: <http://www.miami.edu/iss>.

Graduation

It is the responsibility of the student to apply for graduation through CaneLink during the student's final semester before the date indicated on the Graduate School calendar and the Schedule of Classes. These dates are published at <http://www.miami.edu/index.php/registrar/calendar/>. Students who previously applied for a diploma but did not receive the degree must repeat the application procedure. Deadlines for the commencement program are firm. Students may walk in the graduation ceremony, but the program will indicate "in progress" if information is

missing. Students will be degree candidates until they have been cleared by the Graduate School.

Graduation ceremonies are held in May and December only. Those completing degree requirements during the fall, spring or summer sessions may, if they wish, participate in the graduation ceremonies of the previous or following May or December. Students receiving Ph.D., D.M.A., D.N.P, D.P.T, or Ed.D. degrees who are participating in the hooding ceremony and all masters marching in the graduation ceremony must have the approval of the graduate advisor, director, or appropriate person in the program to participate in the ceremonies.

Participation in graduation for students in all graduate programs is contingent upon the following:

1. The student must have met the requirements for their program.
2. The student must have a minimum of 3.00 cumulative grade point average; all students receiving master's degrees must have completed a minimum of 30 credit hours; all Ph.D. D.M.A. and Ed.D. students must have completed a minimum of 60 credit hours.
3. The student (Ph.D. D.M.A. and Ed.D. candidates) must be admitted to candidacy one semester prior to graduation.
4. The student may not have any outstanding debt including, but not limited to, tuition, fines, and fees. Tuition for the last semester of study must be paid in full by the beginning of the final semester.
5. The student must complete an electronic thesis or dissertation (ETD) according to the Graduate School's requirements and submit all paperwork, online surveys, and agreements (if required) by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the ETD process early in the semester by discussing with their advisors a suitable timetable for completing the defense of their thesis or dissertation. Students should check the academic calendar for the defense deadline date set for the semester they wish to graduate. The Graduate School also encourages students to familiarize themselves with the ETD process at www.miami.edu/etd (<http://www.miami.edu/etd>) or contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process. (See dissertation section of the Ph.D. description.)

Clearance for Degree Conferral

For the Graduate School to clear a student for graduation:

1. All original documents (transcripts from previous degrees, GRE scores, etc.) must be on record in the Graduate School (except for MBA students).
2. The Admission to Candidacy form must have been completed by the program at least one semester before graduation. The Graduate School does not require application to candidacy for master's, D.P.T., nor D.N.P. degrees.
3. The student must defend his/her thesis or dissertation no later than two weeks before the last day of class in the semester he/she wishes to graduate.
4. The student must submit his/her final, Dissertation Editor-approved thesis or dissertation with all corrections completed and final paperwork turned in to the Graduate School by the last day of exams

in the semester he/she wishes to graduate for their clearance to be processed in time.

Class Attendance and Absences

Regular and punctual class attendance is expected of all graduate students. It is the student's responsibility to know the instructor's policies regarding examinations, penalties for absences, and late or missed work.

V.A. students will be provided a grade report at the end of each semester period. A copy of the report will be placed in the student's permanent file maintained by the Veteran Affairs Office. Because of the far-reaching effects of these revisions in the V.A. educational benefits program, it is suggested that you exercise care and judgment in your program planning and in the selection of your courses.

Student Responsibility

Standards of study and conduct in the Graduate School are set and maintained, not by fiat of the Graduate School, but rather by the faculty who determine the standards. The Graduate School through its Council sets no course requirements for a degree. It does set certain general residence, grade and examination standards. Fundamentally the Graduate School devolves responsibility upon the student and the appointed committee. Within this broad responsibility the recommendation for the degree rests with the committee.

All graduate students at the University of Miami are subject to the general standards and requirements of the University and its various departments in regard to attendance, examinations, payment of fees, and conduct, as well as to the specific requirements of the Graduate School. The graduate student is expected to assume the initiative in completing all requirements at the time specified.

To preserve its ideals of scholarship, conduct, and character, the Graduate School reserves the right and the student by his/her registration concedes the right to require the withdrawal of any student for any reason deemed sufficient by the Graduate School at any time.

It is the responsibility of the student to be informed concerning all regulations and procedures required. In no case will a regulation be waived or an exception granted because a student pleads ignorance of the regulation or asserts that he/she was not informed of it by an advisor or other authority. The student should become familiar with the Bulletin, including

1. The section presenting the requirements for the degree to be undertaken;
2. The offerings and requirements of the major department;
3. The Graduate Student Honor Code.

After the applicant has been admitted to the Graduate School but before the first registration, the student should consult the school or college and program in which the major work will be done concerning course requirements, deficiencies, if any, the planning of a program or special regulations. Programs may have additional degree requirements that are not listed in this Bulletin. All registrations require the signature of the dean of the school or college (or his/her representative) in which the degree is to be awarded.

Only the Council of the Graduate School may waive requirements stated in this Bulletin.

Graduate Student Code of Ethics

Graduate students agree to abide by the Graduate Student Honor Code.

The University of Miami expects all graduate students to adhere to the highest standards of ethics and academic integrity. All forms of academic fraud are strictly prohibited. These include, but are not limited to, plagiarism, cheating, collusion, falsification, violation of professional ethics or misrepresentation of research data. Students certify that all work (whether an examination, dissertation, thesis, research paper, research project, form of creative expression, experimental data, or any other academic undertaking) submitted for evaluation, presentation, or publication meets these standards. Additionally, graduate students are expected to respect and appreciate the diversity of the community and to respect the rights of others, be they property, privacy, opinion, or expression. Students found to be in violation of these standards are subject to disciplinary actions by the students program and/or the Graduate School through the process described in the Graduate Student Honor Code. All graduate students are bound by the rules and regulations of the University of Miami that apply to them. The Honor Code can be reviewed at http://www6.miami.edu/dean-students/pdf/graduate_honorcode.pdf.

Graduate School Grievance Guidelines

Introduction

These University of Miami Graduate Grievance Procedures provides an opportunity for the resolution of disputes involving graduate students in a fair and collegial manner. These Graduate Student Grievance Procedures supersede all prior such procedures in effect or formerly utilized at the graduate level. They do not supplant UM Students Rights & Responsibilities or any other published policy or procedure relating to graduate students.

Purview of the Guidelines

The formal grievance process described herein is intended for cases not involving grades or matters covered by the Honor Code, which have not been resolved at the department or program level, and it is available only after a final determination within the relevant School or College has been reached. Students are encouraged to seek assistance from the University Ombudsperson for possible resolution before initiating the formal graduate grievance process. The procedures set forth here are applicable to any of the following types of grievances by graduate students who are enrolled in any graduate program at the University of Miami, except exclusively in the MD and JD programs:

1. grievances alleging improper dismissal or suspension from a graduate program;
2. grievances alleging the improper withholding or termination of financial support of any kind;
3. grievances alleging any other improper treatment, either substantive or procedural, of a graduate student by a faculty member, department or program, or university agency or administrator except:
 - a. allegations of improper evaluation of the quality and/or quantity of academic work (see UM Student Rights & Responsibilities);
 - b. allegations of unfair recommendation for employment or further graduate study;

- c. allegations of discriminatory treatment arising from the student complainant's age, race, gender, sexual preference, handicap, national origin, or religion. (Such allegations ordinarily are handled by the Office of Equality Administration).

Constitution of the Committee and Grievance Panel

The Graduate Council Grievance Committee (GCGC) is a standing committee comprised of the Schools' and Colleges' alternate representatives to the Graduate Council. Grievances as understood herein shall be heard by *ad hoc* appeals panels, constituted from time to time by the Dean of the Graduate School to review individual graduate grievances. The grievance review panel (GRP) shall consist of five disinterested members: four faculty members of the GCGC and one graduate student appointed by the executive board of the Graduate Students' Association. Notice of the constitution of the GRP shall be given by the Office of the Graduate Dean in writing to all parties to the grievance within ten (10) days after the grievance review request is properly filed.

Any party to the grievance may challenge the disinterestedness of a GRP member in writing to the Dean of the Graduate School within five (5) days after notification of the appointment. The challenge must specify reasons that would prevent the committee member or graduate student from making an unbiased recommendation with respect to the grievance. If such a challenge is determined to be valid by the Graduate Dean, a substitute appointment shall be made and the process will resume accordingly.

Procedure and Time Limits for Filing a Grievance

After a final determination has been made in the relevant School or College (or by the head of the relevant administrative office in the event of a grievance against a university agency), a student who believes he or she has grounds for appeal within the purview of these guidelines may file a written grievance review request with the Office of the Dean of the Graduate School. The request shall describe the student's allegations in a clear and concise fashion and shall clearly identify the individual(s), program(s), department, School or College, and/or University agency or administrator against whom the grievance is brought. The student's written grievance review request shall be filed within thirty (30) days of the final determination. No grievance review request nor any other appeal of any kind will be granted after this time limit has expired unless a written extension of time is granted by the Dean of the Graduate School based on a written request from the grievant stating good cause.

Definitions and Assumptions

Burden of Persuasion

The burden of persuasion is on the grievant.

Final Determination

This grievance process is available only after a final determination within the relevant School or College has been reached. This provision is intended to require the grievant to exhaust the remedies available within the relevant School or College before appealing to the Graduate Dean. In the case of a student in an interdisciplinary program who does not yet have a chair and/or committee assembled, the Dean of the Graduate School shall make a final determination in the student's case subject thereafter to the appeal contemplated by this policy. Appeal from the Graduate School Dean's decision follows this same procedure, except

that the GRP shall be constituted by the Office of the Provost from the pool of GCGC members. Written notice of the constitution of the GRP in the case of a student in an interdisciplinary program without a chair or committee, shall be given by the Office of the Provost to all parties to the grievance within ten (10) days after the grievance review request is properly filed. All other deadlines, requirements, procedures, and the hearing format remain the same.

Originals

Wherever possible, the party in possession of an original document in support of or rebuttal to or at issue in the grievance shall provide it to the GRP within the time frames set out in the Hearing Materials and Preparation Deadlines. If a party has only a copy of a document not received by him, her, or it, the copy shall serve as an original. Digital documents or email messages in contention shall be printed and may then serve as originals.

Party

A party is the student grievant or the individual, program, department, School or College, or University agency or administrator against whom the student brings his or her grievance.

Time Limits

All time limits shall be calculated based on working days of the Fall and Spring Semesters, excluding reading and exam periods and University holidays. Grievances originally filed after the end of the Spring semester will be heard at the beginning of the following Fall Semester. Any stated time limit herein may be extended with the written consent of the grievant and the Dean of the Graduate School.

Written

Any document to which these guidelines refer as written signifies paper (hard) copy. Email messages and digital or other electronic versions do not meet the requirement that a form or notice be provided in writing. However, a party may transmit a digital version of any written document by email in addition to providing it in paper form.

Deadlines for Hearing Materials, Preparation, and Witness Identification

All materials to be considered for review by the members of the GRP must be submitted in writing to the Office of the Dean of the Graduate School at least fourteen (14) days before the scheduled date of the hearing, at which time such materials will be distributed to all parties to the grievance and to the members of the GRP. Thereafter, to the extent that any of the parties wishes to have additional materials considered by the GRP, such materials must be received by the Graduate School no later than seven (7) days before the scheduled date of the hearing, at which time all such additional written materials will be distributed to the parties as well as to the members of the GRP. Any party submitting written materials for consideration shall submit the original(s) and five (5) copies thereof to the Office of the Graduate Dean at his, her, or its own expense.

The name of any witness to be called by any party at the hearing shall be provided in writing to the Office of the Graduate Dean no less than five (5) days before the scheduled date of the hearing.

Hearing

The grievance review hearing is chaired by a designated member of the GRP. The hearing is staffed by the non-voting Administrative Assistant of the Dean of the Graduate School, who will record it for archival purposes only. The hearing will proceed as follows:

1. GRP chair's introduction, summary of issues, and process overview.
2. Student's presentation of issues (15 minutes maximum).
3. University representative's presentation of issues (15 minutes maximum).
4. Optional: Presentation(s) by witnesses (limited to 3 per side and a maximum of 15 minutes total per side).
5. Questions by members of the GRP.
6. All presenters and witnesses are excused.
7. Deliberation by GRP.

Presentation of the issues should be concise and relevant. Undoubtedly the dispute is somewhat complex or it would not have reached this stage. Points of dispute or ambiguity may be summarized or illustrated by anecdote at the hearing. Experience suggests, however, that the best approach is to minimize formal presentations and allow the GRP members maximum time for questions.

GRP Decision and Authority

No additional substantive information may be submitted by any party following the hearing, unless requested by the grievance review panel. The GRP may but need not seek additional information from other sources during its deliberations, which will be conducted in closed session. Following its deliberations, and within ten (10) days of the date of the grievance review hearing, the GRP will make its confidential advisory recommendation to the Dean of the Graduate School [Office of the Provost in the event of a student in an interdisciplinary program who does not yet have a chair or committee]. The subsequent decision by the Dean of the Graduate School [Office of the Provost], which shall be rendered within ten (10) days of the GRP's recommendation, is final.

Note: The above guidelines pertain only to matters which do not involve representation by an attorney. If an attorney is involved in the grievance, the Office of Legal Counsel at the University should be contacted.

Modifications

These procedures may be modified or withdrawn with or without notice.

Admission

Eligibility for Admission

In addition to holding the baccalaureate degree from an institution accredited by SACS or another regional accrediting body, the applicant for admission to the Graduate School should have the prerequisite coursework required by the program to which he/she is applying. In general, those applying for graduate admission should have achieved an overall average grade of "B" or better (3.0 G.P.A. on a 4.0 scale). International students will be required to give evidence of adequate knowledge of English through a TOEFL or IELTS test score. University of Miami faculty members above the rank of instructor are not eligible to apply for the doctorate at the University of Miami. (Note: Faculty from the School of Nursing and Health Sciences and from the Physical

Therapy program are permitted to pursue doctoral degrees in their home program/school.)

For specific admission requirements see also statements of the various programs.

Admission of a student to the University of Miami for any semester does not imply that such student will be re-enrolled in any succeeding academic semesters.

All those wishing to take courses for graduate credit hour, whether or not they wish to become candidates for a degree, must make application for admission directly to the program of interest prior to registration.

Requirements for Admission Application

1. The completed online application form
2. Official transcripts of *all* college work, both undergraduate and graduate
3. The official score report of the appropriate entrance examination

GRE	All applicants must submit recent (within five years) Graduate Record Examination (GRE) scores which include 1) the aptitude portion (verbal & quantitative); 2) the most relevant advanced test in the major field if required by the program. GRE scores are valid for 5 years after the test date.
GMAT	Applicants for the Master or Ph.D. of Business Administration, the Master of Professional Accounting, the Master of Science in Management Science (Operations Research/ Applied Statistics), or Taxation must submit the Graduate Management Admissions Test (GMAT) scores. GMAT scores are valid for 5 years after the test date.
TOEFL/IELTS	International applicants whose native language is not English must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) and the Graduate Record Examination. The TOEFL and IELTS scores are valid for 2 years after the test date.

4. Letters of recommendation sent directly to the graduate program director of the academic program.
5. Other requirements may be required/requested by individual programs. Contact the specific program to which you are applying for their requirements, or for exemptions from the entrance examination.
6. Application fee of \$65.

7. All materials and the fee should be sent directly to the program as indicated on the application.

Materials submitted in support of an application cannot be released for other purposes nor returned to the applicant.

Categories of Admission

1. *Regular* admission with or without specified deficiencies. Under circumstances in which it is difficult to evaluate the academic background of intellectually qualified applicants, they may be admitted with specified deficiencies based on evaluative criteria established and maintained by the school or college. Such status is often appropriate for international students or students with extensive professional experience relevant to the desired discipline. The Graduate School allows only one semester in deficiency status. Graduate Council notification is required for programs requesting deficiency status beyond one semester. For all regular admissions with deficiencies, students must receive a list of documented requirements to remove the deficiency and specific milestones. Students who fail to qualify at the end of that time will be requested to withdraw from the Graduate School.
2. *Post Baccalaureate*. This category provides an opportunity for graduate study for
 - a. qualified applicants who, for good reason, do not wish to work toward an advanced degree. This would be appropriate for those students who have special objectives for professional study or scholarly work;
 - b. students enrolled in a graduate program elsewhere but desiring to earn graduate credit hour at the University of Miami for the purpose of transferring it to the other institution;
 - c. students already holding the master's degree or doctorate but who desire additional coursework in their field. Those admitted to a post-baccalaureate status should realize that their future admission to regular status is improbable unless they achieve the qualifications originally appropriate to admission to those categories. This is to say that the mere accumulation of graduate course credit hours is not sufficient to permit entrance into another graduate category. No more than a total of 12 credit hours may be taken while in post-baccalaureate status. Transient students described in (b) above should have sent to the Graduate School a letter from the Dean of the School of the student's program they expect to earn a degree, stating that they are in good standing there and have permission to transfer credit hour. If possible, this letter should indicate specific courses to be taken. The students described in (c) above should have a transcript showing their most recent graduate work and graduate degree [to be sent directly by the issuing institution to the Graduate School].
3. *Certification/Professional Goals*. This category provides an opportunity for graduate study for qualified teachers or professionals who do not wish to work toward an advanced degree but who for professional reasons need to continue to take graduate courses and have already taken 12 credit hours in Post-Baccalaureate Status. No credit taken in this status can be applied toward a graduate degree at the University. A letter explaining the need for the course work by the student's employer must accompany the application.

Every applicant for admission can be assured that all credentials will be carefully studied in an effort to select appropriately qualified students. Each application for admission is examined by the members of the faculty responsible for the graduate program. The program informs each applicant of the results.

It is expected that most applicants for admission will be candidates for an advanced degree. Except under unusual circumstances those who already hold an advanced degree are not admitted to candidacy for the same degree. Graduate programs vary as to whether students who do not hold the Master's degree are required to initiate graduate studies at that level.

Applicants should note the following:

1. M.B.A. applicants should send applications and all documents to:
The Office of Graduate Business Programs
School of Business Administration
P.O. Box 248505
Coral Gables, FL 33124.
For further information you may contact mba@miami.edu
2. all other correspondence, applications and documents should be sent directly to the academic department;
3. no action is taken until a file is complete and all documents are available;
4. application files should be complete at least one month before registration, much earlier for some applications, as specified elsewhere in this *Bulletin*;
5. admission to graduate status does not imply admission to candidacy for a degree;
6. some programs close admissions early because of limited capacity;
7. *materials submitted in support of an application are not released for other purposes and cannot be returned to the applicant.*

International Students Admissions

All international students who have been admitted to a program of full-time study at the University of Miami need to enter the U.S. on a student visa. To apply for an F-1 visa, you must provide the U.S. Embassy or Consulate with a Form I-20 or DS-2019, passport, statement of funds, and other documents as required by the U.S. Embassy or Consulate.

Please visit the International Student and Scholar Services (ISSS) website at www.miami.edu/issss (<http://www.miami.edu/issss>) for further information regarding visas, travel, pre-arrival information, etc. The Form I-20 or DS-2019 can only be issued after you have been admitted and have submitted proof of adequate financial support for your studies and living expenses. For questions regarding issuance of the Form I-20 or DS-2019, please contact your individual department.

Readmission

Unless a leave of absence has been requested and approved, students who have not been continuously enrolled must request readmission. Contact the appropriate program office well in advance of registration. If additional college work has been completed elsewhere since the last enrollment at the University of Miami, an official transcript of this will be required. Recency of credit hour rules will apply. The application for readmission to the Graduate School may be found at: https://umshare.miami.edu/web/wda/grad/forms/_web/readmission_to_grad_school.pdf If you are an applicant for readmission

and also an international student, please contact the Office of International Admission at issss@miami.edu and 305-284-2928.

Dual Degree and Accelerated Degree Programs

The University offers unique combined degree programs that culminate with students receiving both the undergraduate and graduate degrees concurrently or an accelerated program of study in which they receive an undergraduate degree and then a graduate degree the following year.

These programs are intended for exceptional students to acquire both undergraduate and graduate degrees, in five years rather than the 4 plus 2 years (approximately) that is traditionally expected.

Please note: Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Requirements

Students must have undergraduate student status and a cumulative G.P.A. of at least 3.0 at the time of application. Students should discuss the program and possibility of entering the program with an academic advisor. The program may require application at the time of matriculation to the undergraduate degree or prior to the beginning of final exams in the junior year.

Undergraduate students must take the GRE Examination before the end of their classification as a senior and attain a combined score of more than 297 on the verbal and quantitative portions.

Once admitted into a dual degree or accelerated program:

In their senior year, students may take a maximum of 12 graduate credit hours, with a maximum of 6 credit hours per semester. While in senior status, to register, students must complete and submit the Graduate School's Application for Undergraduates to Take Graduate Coursework form which is available at www.miami.edu/gs/index.php/graduate_school/forms/ (http://www.miami.edu/gs/index.php/graduate_school/forms/). This form must accompany the Add/Drop and/or Course Request form to ensure that students are registered with the correct registration status. Add/Drop and/or Course Request forms without this approval form will not be processed. Undergraduate students must register for courses with graduate status in the Office of the Registrar. This process cannot be facilitated via online registration.

Financial Implications

Many financial aid programs, including those offered by the University and the federal and state governments are restricted to coursework required to complete an undergraduate degree.

Students are eligible for undergraduate aid only as long as they are undergraduates. Students enrolled in combined or accelerated degree programs are permitted undergraduate federal and University aid for a maximum of four academic years or to the point at which the number of graduate credit hours in a term exceeds the number of undergraduate credit hours, whichever comes first. During that time frame the student's undergraduate enrollment status will be determined using only undergraduate level courses in which the student enrolls. Graduate level courses in which the student enrolls during such semesters will not be used to determine the student's undergraduate enrollment status. Once a

student is registered at the graduate level for financial assistance his/her status is considered graduate for all subsequent semesters.

Once registered as a graduate student, a student cannot revert to undergraduate status.

For further information, contact the Office of Financial Assistance at ofas@miami.edu, call 305-284-5212, or visit the office at Rhodes House (Building 37). Office hours are 8:30 a.m. to 5:00 p.m., Monday through Friday.

Graduation Clearance Requirements

For dual degree programs, the student must apply for undergraduate and graduate graduation at the same time. Degrees from dual degree programs are conferred at the same time.

For accelerated degree programs, the student must apply for undergraduate graduation in one semester, and for graduate graduation in a subsequent semester.

The student must meet the requirements of the Graduate School specified in the Bulletin for the awarding of the graduate degree.

Students enrolled in a dual degree or accelerated program can take a **maximum of 6 graduate credit hours per semester in their senior year for a maximum of 12 graduate credit hours** without incurring additional costs **if they are full-time undergraduate students** during this period.

Students should register for courses towards their graduate degree as "G" credit hours and not as "U" credit hours. These registrations must be completed prior to taking courses. Retroactive add/drops will not be processed.

Summary of Guidelines for Dual Degree and Accelerated Programs

- Take at least 12 undergraduate credit hours per semester. This qualifies you for the opportunity to take up to 6 graduate credit hours per semester at no additional cost.
- Graduate credit hours can be taken only in the senior year in a dual degree or accelerated program (based on the number of credit hours earned towards the undergraduate degree).
- The maximum number of graduate credit hours allowed per semester is 6.
- The maximum number of graduate credit hours the undergraduate student can take at no additional cost is 12.
- The Application for Undergraduates to take Graduate Coursework form should be completed and all signatures must be obtained before registering for graduate credit hours.
- The student can change his/her status to "graduate", or their status might be determined to be "graduate" for financial aid purposes during or at the completion of the senior year. This will make the student eligible for graduate financial aid (for US citizens or permanent residents).
- The student cannot be a full-time undergraduate (taking 12 or more undergraduate credit hours) and a full-time graduate (taking 9 or more graduate credit hours) at the same time.
- Once a student's status changes to graduate (or after they have taken a full load of graduate credit hours) their status cannot revert to undergraduate status.

- In a dual degree or accelerated program, an undergraduate student cannot take graduate credit hours in any other year except in the senior year.
- The student should avoid taking any undergraduate credit hours after the student's status has changed to graduate.

For University of Miami Undergraduates

Undergraduates Taking Graduate Coursework. University of Miami undergraduates within 30 credit hours of meeting the requirements for the Baccalaureate Degree may be considered for concurrent admission to graduate study in non-degree graduate status, and in this status may take and receive credit hour for graduate courses, while completing the requirement for the baccalaureate. The application may be found at <https://www6.miami.edu/grad/forms/ApplicationforUndergraduatestoTakeaGraduateCourse.pdf>.

Admission to Graduate Status requires:

1. Must have a minimum of 3.000 G.P.A.
2. The submission of an Undergraduates to Take a Graduate Course form (which can be obtained at the Graduate School) which will not require the application fee;
3. The written approval of the Chairman of the Department, the Dean of the Undergraduate School or College, and of the Graduate Dean **prior to registration** on the form.

Admission to Graduate status does not automatically admit the student, upon graduation, to status as an applicant for a graduate degree at the University of Miami.

The graduate credit hours earned may NOT be used to meet undergraduate graduation requirements or be used to meet the 120 credit hour requirements at the University of Miami.

No more than 6 credit hours may be taken in one semester, and no more than a total of 12 credit hours may be taken while in Graduate Status. Students may take no more than 15 credit hours of combined undergraduate and graduate courses per semester.

Students electing Graduate status must register and be processed centrally at the Office of the Registrar, 305-284-2294.

Degree Programs

The University of Miami offers majors leading to graduate degrees as follows:

- **MASTER OF ARCHITECTURE (M. Arch.)**
- **MASTER OF ARCHITECTURE IN URBAN DESIGN (MUD)**
- **MASTER OF ARCHITECTURE IN REAL ESTATE AND URBANISM (MRED&U)**
- **MASTER OF ARTS (M.A.) with concentrations in the following:**
 - Applied Marine Physics
 - Art History
 - Art Presenting
 - Communication
 - Communication Studies
 - Film Studies
 - Television Broadcast

- Print Journalism
 - Public Relations
 - Spanish Print in Journalism
- Economics
- English
- Geography and Regional Studies
- History
- International Administration
- International Studies
- Journalism
- Latin American Studies
- Marine Affairs and Policy
- Marine Biology and Fisheries
- Marine Geology and Geophysics
- Marine and Atmospheric Chemistry
- Mathematics
- Meteorology and Physical Oceanography
- Philosophy
- Public Relations/Media Management
- Sociology
- **MASTER OF ARTS IN LIBERAL STUDIES (M.A.L.S.)**
- **MASTER IN ACCOUNTING (M.P.Acc.)**
- **MASTER OF BUSINESS ADMINISTRATION (MBA)**
- **MASTER OF BUSINESS ADMINISTRATION EXECUTIVE TRACKS**
 - **Gables, Nassau, Orlando, DelRay, Tampa 1&2, Health Administration, Stragglers, International Business, Working Professionals, Puerto Rico**
- **MASTER OF SCIENCE IN EDUCATION (M.S.Ed.)** with concentrations in the following:
 - Advanced Professional Studies
 - Community and Social Change
 - Counseling and Research
 - Early Childhood Special Education
 - Education
 - Education and Social Change
 - Elementary Education
 - Exercise Physiology
 - Higher Education/Enrollment Management
 - Higher Education/Student Life & Development
 - Marriage and Family Therapy
 - Counseling Mental Health
 - Reading
 - Research, Measurement and Evaluation
 - Special Education
 - Sport Administration (Focus athletics or recreational sports)
 - Sports Medicine
 - STEM Education
- **MASTER OF FINE ARTS (M.F.A.)** with concentrations in the following:
 - Art (Studio Work)
 - Digital Imaging
 - Painting
 - Sculpture
 - Graphic Design / Multimedia
 - Ceramics / Glass
 - Photography/Digital Imaging
 - Printmaking
- Creative Writing
- Motion Pictures
 - Production
 - Producing
 - Screenwriting
- Printmaking
- **MASTER OF MUSIC (M.M.)** with concentrations in the following:
 - Accompanying and Chamber Music
 - Art Presenting
 - Choral Conducting (A.D.)
 - Collaborative Piano
 - Composition
 - Electronic Music
 - Instrumental Conducting (A.D.)
 - Instrumental Performance (A.D.)
 - Jazz Pedagogy
 - Jazz Performance
 - Keyboard Performance and Pedagogy
 - Media Writing and Production
 - Multiple Woodwinds
 - Music Business and Entertainment Industries
 - Piano Performance (A.D.)
 - Music Education/String Pedagogy
 - Music Theory
 - Music Therapy
 - Musicology
 - Studio Jazz Writing
 - Vocal Performance (A.D.)
- **MASTER OF SCIENCE (M.S.)** with concentrations in the following:
 - Applied Marine Physics
 - Biology
 - Biostatistics
 - Chemistry
 - Computer Information Systems
 - Computer Science
 - Engineering
 - Environmental Health and Safety
 - Information Technology
 - Management Science
 - Management of Technology
 - Marine Affairs and Policy
 - Marine Biology and Fisheries
 - Marine Geology and Geophysics
 - Marine and Atmospheric Chemistry
 - Mathematics

- Meteorology and Physical Oceanography
- Occupational Ergonomics and Safety
- Physics
- Professional Management
- Psychology
- Public Health
- Statistics
- Taxation
- **MASTER OF SCIENCE IN ARCHITECTURAL ENGINEERING (M.S.A.E.)**
- **MASTER OF SCIENCE IN BIOMEDICAL ENGINEERING (M.S.B.E.)**
- **MASTER OF SCIENCE IN CIVIL ENGINEERING (M.S.C.E.)**
- **MASTER OF SCIENCE IN ELECTRICAL AND COMPUTER ENGINEERING (M.S.E.C.E.)**
- **MASTER OF SCIENCE IN INDUSTRIAL ENGINEERING (M.S.I.E.)**
- **MASTER OF SCIENCE IN MECHANICAL ENGINEERING (M.S.M.E.)**
- **MASTER OF SCIENCE IN MUSIC ENGINEERING TECHNOLOGY (M.S.M.E.T.)**
- **MASTER OF SCIENCE IN NURSING (M.S.N.)**
- **MASTER OF SCIENCE IN TAXATION (M.S.Tax.)**
- **MASTER OF PUBLIC ADMINISTRATION (M.P.A.)**
- **MASTER OF PUBLIC HEALTH (M.P.H.)**
- **SPECIALIST IN EDUCATION (Ed.S.)** with concentrations in the following:
 - Advanced Professional Studies
 - Early Childhood Special Education
 - Education
 - Higher Education Leadership
 - Music Education
 - Reading
 - Special Education
 - STEM Education
- **SPECIALIST IN MUSIC EDUCATION (SPEC.M.)**
- **DOCTOR OF MUSICAL ARTS (D.M.A.)** with concentrations in the following:
 - Accompanying and Chamber Music
 - Choral Conducting
 - Collaborative Piano
 - Composition
 - Instrumental Conducting
 - Instrumental Performance
 - Jazz Composition
 - Keyboard Performance and Pedagogy
 - Multiple Woodwinds
 - Performance (Applied Music)
 - Piano Performance
 - Jazz Performance
 - Vocal Pedagogy
 - Vocal Performance
- **DOCTOR OF NURSING PRACTICE (D.N.P.)**
- **DOCTOR OF PHYSICAL THERAPY (D.P.T.)**
- **Higher Education Leadership (Ed.D.)**
- **DOCTOR OF PHILOSOPHY (Ph.D.)** with concentrations in the following:
 - Applied Marine Physics
 - Biochemistry and Molecular
 - Biology
 - Biomedical Engineering
 - Biostatistics
 - Business Administration
 - Cancer Biology
 - Chemistry
 - Civil Engineering
 - Communication (Communication, Film)
 - Computer Science
 - Counseling Psychology
 - Economics
 - Electrical and Computer Engineering
 - English
 - Epidemiology and Public Health
 - Environmental Science and Policy
 - Ergonomics
 - Exercise Physiology
 - History
 - Human Genomics and Genetics
 - Industrial Engineering
 - International Studies
 - Marine and Atmospheric Chemistry
 - Marine Biology and Fisheries
 - Marine Geology and Geophysics
 - Mathematics
 - Mechanical Engineering
 - Meteorology and Physical Oceanography
 - Microbiology and Immunology
 - Molecular and Cellular Pharmacology
 - Molecular Cell and Developmental Biology
 - Music Education
 - Music Education with Music Therapy
 - Neuroscience
 - Nursing
 - Philosophy
 - Physical Therapy
 - Physics
 - Physiology and Biophysics
 - Psychology
 - Romance Studies
 - Research and Evaluation/Exercise
 - Romance Languages
 - French
 - Spanish
 - Sociology
 - Teaching and Learning

- Language and Literacy Learning in Multilingual settings
- Mathematics and Science Education
- Special Education

Interdisciplinary Graduate Studies

Dept. Code: IDS

The Graduate School is no longer accepting applications for the IDS program. This will not affect current IDS students.

Environmental Science and Policy

Dept. Code: ECSD

Through the Graduate School, The Abess Center for Ecosystem Science and Policy offers an interdisciplinary course of study leading to a Ph.D. Details regarding areas of specialization can be found at the Abess Center website at <http://www.cesp.miami.edu/>. In most cases, doctoral students are supported by research assistantships which include tuition remission and a monthly stipend. All students are also required to serve satisfactorily for one term as teaching assistants in the Abess Center undergraduate program.

Prerequisite

Students admitted to the program must have earned a Bachelor's or Master's degree and should display a strong interest in the interdisciplinary study of ecosystem science and policy.

Ph.D. Degree Requirements

Completion of the Ph.D. will take approximately five years. All students are also required to:

- Complete a minimum of 60 credit hours, of which at least 26 must be for coursework taken while in residence at the University of Miami. (Students entering the program with a Master's degree in a related field may be given credit hour for up to 24 course credit hours.)
- Complete 12 credit hours worth of coursework in the following core courses:

ECS 601	Interdisciplinary Environmental Theory	3
ECS 603	Interdisciplinary Environmental Methods	3
ECS 605	Interdisciplinary Environmental Law & Policy	3
ECS 607	Interdisciplinary Environmental Decision Analysis	3
Total Credit Hours		12

- Submit, by the end of their second semester, a proposed group of additional courses, totaling at least 18 credit hours, related to their research interest and intended dissertation research area. This group of courses requires approval of both the student's advisor and the Director of Graduate Studies.
- Accrue at least 13 credit hours worth of dissertation research.
- Pass written and oral comprehensive examinations following the conclusion of the core series of courses, usually at the end of the first year. A majority of the examination committee must be members of the Graduate Faculty of the University. In the event of failing to pass an examination, students are required to retake and pass the examination within one calendar year. By the end of the second year,

students must present and defend a research proposal. Following successful completion of the comprehensive examination and research proposal defense, the student may apply to candidacy for the degree. Any student who fails to be admitted to candidacy for the degree within this two-year period can be dismissed from the program.

- Convene a 4-member dissertation committee by the end of the first year.
- Write and defend a dissertation research proposal by the end of the second year. Students may proceed with the dissertation after the dissertation committee has been appointed and the Director of Graduate Studies and the Graduate School have accepted the dissertation proposal. The dissertation must be an investigation of a substantial scholarly topic and bridge both scientific and policy aspects of the topic area.
- Successfully complete an oral defense of the dissertation.

Office of Study Abroad

Dept. Code: SAP

Opportunities for study abroad may be available for some graduate degree programs during the summer, fall, spring and intersession terms.

Students may participate in programs led by faculty members or may participate in semester exchange program options offered by the MAIA program.

For further information contact:

Office of Study Abroad
PO Box 248263
Coral Gables, FL 33124-1610
305-284-3434
e-mail: ieep@miami.edu

In some programs it is possible to earn graduate credit hours for study taken abroad. The curriculum must be worked out by the student in conjunction with an advisor.

Master's Degree

The minimum residence requirement is two semesters in full-time study or the equivalent in part-time work. In practice, most students need at least three semesters, or two semesters plus summer work, to complete degree requirements.

Foreign Language

The requirements in a foreign language or languages are established by the student's program. In those cases where the program deems it necessary that the student have competency in a foreign language, the student will be required to demonstrate such competence by examination in one or more languages. The choice of language or languages required will be by the program.

Thesis

Decision as to the thesis subject must be approved by the program. The thesis committee will consist of not less than three members. The committee chair must be Regular Faculty from the student's program or department of concentration (this includes secondary appointments).

In addition to the chair, one of the remaining members must also be Regular Faculty or have Graduate Faculty status in the student's program or department of concentration; the third member must be an outside member. "Regular Faculty" are faculty having tenured or tenure-earning appointments of a program or department. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the chair of the department and Dean of the Graduate School. A program may require additional members.

The committee is nominated by the Graduate Program Director of the program concerned. The duties of the thesis committee are similar to those of the dissertation committee. The student who presents a thesis must enroll for at least 6 credit hours of thesis. Ordinarily no more than 6 credit hours may be granted.

The Dissertation Editor will provide information on the guidelines and deadlines that will become critical in the final months of the degree process or information can be downloaded from www.miami.edu/etd (<http://www.miami.edu/etd>). The Graduate School office telephone number is 305-284-4154, the email address is grad.dissertation@miami.edu.

Master's degree students who are required to write a thesis must defend their thesis by the date specified in the academic calendar and upload one Dissertation Editor-approved PDF to the ETD database and submit final paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found at www.miami.edu/etd (<http://www.miami.edu/etd>). The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

One Dissertation Editor-approved PDF conforming in style to the formatting standards set by the Graduate School must be uploaded to the ETD database and final paperwork handed in to the Office of the Graduate School on or before the last day of exams in the semester the student wishes to graduate. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. Each thesis must be accompanied by one certificate of approval of oral defense of thesis signed by all members of the Committee, one Signature page from the thesis document signed by all members of the committee, and one ETD Availability Agreement form signed by the student and Committee Chair. The forms can be downloaded from www.miami.edu/etd (<http://www.miami.edu/etd>).

Electronic Theses and Dissertation (ETD) Embargo Policy

Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami's Scholarly Repository, <http://scholarlyrepository.miami.edu/>. The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university's Scholarly Repository after the Dissertation

Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student's information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form posted at www.miami.edu/etd (<http://www.miami.edu/etd>) to ensure they fully understand the terms of access for their embargoed work.

Final Examination

A final public oral defense of the thesis is required. However, none but the members of the thesis committee may interrogate the candidate. In addition there may be required, if desired by the program, a final written integration examination to test the candidate's ability to integrate the whole graduate program and the thesis in relation to it. These examinations must be held at least two weeks prior to commencement.

Research in Residence

Once a student has completed all course and required research credit hours, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. (See Recency of Credit and Time to Completion (p. 33) sections of the Bulletin.) Research in Residence students, while not required, may purchase or receive any perquisites that are normally available to graduate students.

Comprehensive Examination

In most programs a comprehensive examination, either written, oral or both, is a requirement. When the thesis is not a part of the program, an examining board, at least one of whose members must be a regular member of the Graduate Faculty, will be appointed by the program.

A student failing the comprehensive may be allowed one opportunity to retake it if the students committee so advises. The re-examination may not be taken during the same semester or summer session, and must be taken within one calendar year.

Transfer of Credit Hour

Upon recommendation of the major program and the approval of the Graduate School, a maximum of 6 credit hours of graduate credit hour, with grades of B or above, may be transferred from another accredited graduate institution, in partial satisfaction of a master's degree requiring less than 36 credit hours. 9 credit hours of graduate credit hour may be approved for transfer to a degree program requiring 36 credit hours or more. Work taken more than six years prior to transfer will not be accepted. Work taken by extension, correspondence or online is not acceptable. All work transferred is subject to examination by the program. In no case will credit hour be transferred until the student has completed acceptably an equivalent number of credit hours at the University of Miami. Any student wishing to transfer credit hour must be enrolled at the University of Miami during the time of transfer. The satisfaction of the requirements of another university does not relieve

the student from the University of Miami's requirements. An official transcript of work to be transferred must be on file in the Graduate Office. Credit hours that pertain to or have been counted toward another degree cannot be transferred. Students enrolled in the Master of Business Administration program are not eligible for credit hour transfers.

Exceptions must be approved by the Dean of the Graduate School.

No transferred credit hours are calculated into the University of Miami G.P.A.

A Second Master's Degree

A student enrolled in a University of Miami master's degree program or holding a University of Miami master's degree may earn a second master's degree in a related area at the University by completing a minimum of 21 credit hours in residence toward the second degree, as long as all program and admission requirements for the degree are met. Each degree must have a separate thesis if two thesis options are elected. The second program decides if the areas are related enough to qualify for the reduced number of credit hours. The student must contact the second program during the application process for the second program to determine if the areas are related enough to qualify for the reduced number of credit hours.

Doctoral Degree

(For Ph.D., D.M.A., and Ed.D. candidates only)

General

The Graduate School does not specify course requirements for the Ph.D. However, the Graduate School will not, ordinarily, approve the taking of the qualifying examination until the student has had a minimum of one continuous academic year of graduate work in courses, seminars, and directed or tutorial study. 60 credit hours beyond the baccalaureate degree are the minimum requirement for the Ph.D., and not less than half of the total credit hours must be in work open only to graduate students. At least 24 must have been taken in residence at the University of Miami. A minimum of 12 dissertation credit hours must be taken. Graduate students studying for the Ph.D. who have received their master's degree in the same field must take at least twenty-four (24) hours in residence at the University of Miami in doctoral status.

The specific course requirements for the Ph.D. are established by the major department or program which may require such additional graduate credit hour as it deems necessary. Such requirements will be found in that part of the Bulletin which lists course offerings.

Dissertation

A student must take a minimum of 12 credit hours of dissertation research except where otherwise stated. Not more than 12 credit hours of research may be taken in a regular semester, nor more than 6 in a summer session.

Ph.D., D.M.A., Ed.D., or Lecture Recital degree students must defend their dissertation, doctoral essay, or lecture recital essay by the deadline specified in the academic calendar and upload one Dissertation Editor-approved PDF to the ETD database and submit final paperwork to the Graduate School by the last day of exams in the semester the student wishes to graduate. It is recommended that students begin the process early in the semester by discussing with their advisors a suitable

timetable for meeting these deadlines. All information pertaining to the formatting and electronic guidelines for electronic thesis and dissertation submission can be found at www.miami.edu/etd (<http://www.miami.edu/etd>). The Graduate School also encourages students to contact the Dissertation Editor early in the semester at grad.dissertation@miami.edu if they have questions regarding any aspect of the ETD process.

One Dissertation Editor-approved PDF conforming in style to the standards set by the Graduate School, must be uploaded to the ETD database and final paperwork handed in to the Office of the Graduate School on or before the last day of exams in the semester the student wishes to graduate. It is the duty of the student to acquire a copy of the guidelines for preparing theses and dissertations and to conform to the requirements therein. Each dissertation must be accompanied by one certificate of approval of oral defense of thesis signed by all members of the Committee, one Signature page from the dissertation document signed by all committee members, and one ETD Availability Agreement form signed by the student and Committee Chair. The forms can be downloaded from www.miami.edu/etd (<http://www.miami.edu/etd>).

Electronic Theses and Dissertation (ETD) Embargo Policy

Graduate students can elect to withhold their electronic thesis or dissertation for up to two years before the work is available for download from the University of Miami's Scholarly Repository, <http://scholarlyrepository.miami.edu/>. The metadata for all theses and dissertations regardless of the availability option elected (i.e., open access, UM campus only, or embargo) will be immediately available for viewing in the university's Scholarly Repository after the Dissertation Editor has approved and released the thesis or dissertation to the repository. If embargo is elected by the student, the existence of the student's information page will appear in the Scholarly Repository right away displaying title, defense date, abstract, committee, keywords, etc., but the PDF of the electronic thesis or dissertation will not be downloadable until the term of embargo elected has expired. After the elected embargo period has expired the electronic thesis or dissertation will be released for open access in the Scholarly Repository. Students requesting embargo should carefully review the details of embargo election described in the ETD Availability Agreement form posted at www.miami.edu/etd (<http://www.miami.edu/etd>) to ensure they fully understand the terms of access for their embargoed work.

Research in Residence

Once a student has completed all course and required research credit hours, he or she must enroll in Research in Residence status until the degree has been granted. Research in Residence status is considered full-time enrollment. Time restrictions on obtaining degrees will be strictly enforced and can be waived only by the Dean of the Graduate School. Research in Residence students, while not required, may purchase or receive any perquisites that are normally available to graduate students. (See **Recency of Credit** section.)

Residence

The student must spend at least two consecutive semesters beyond the first year's graduate work, wherever taken, in full-time study at the University of Miami. With program approval,

1. one summer of full-time study in two sessions can be substituted for one semester of residence, or

2. full-time study for two successive summers can be substituted for two regular semesters.

Residence requirements may be altered only by the Dean of the Graduate School. (At least 24 credit hours must be taken in residence.)

The Supervisory and Dissertation Committees

A supervisory committee is usually appointed when a student is formally admitted to a doctoral program. For the dissertation/doctoral essay/lecture recital essay committee a student needs no less than four members. The committee chair must be Regular Faculty from the student's program of concentration (this includes secondary appointments). In addition to the chair, two members must be Regular Faculty or have Graduate Faculty status in the student's program of concentration. The fourth member must be an outside member. "Regular Faculty" are faculty having tenured or tenure-earning appointments of a program or department. A thesis or dissertation committee cannot be chaired by a person unless they hold a higher or equivalent degree as the candidate for the graduate degree. Exceptions to the committee composition may be approved by the Program Director (or Chair of the department) and Dean of the Graduate School. A department, program, or school / college may require additional members.

This committee is nominated by the chairperson of the program concerned. It is appropriate for the chairperson to consult with the student regarding the membership of the committee. The supervisory committee is empowered to plan the course of study for the student; to determine deficiencies, if any; to set language and other requirements; to request applicable transfer of credit hour where appropriate and to make up and administer the qualifying examination.

When the student is admitted to candidacy, a dissertation committee is formed. This may be the supervisory committee, but it may also be a committee formed anew to undertake the duties of advising and passing upon the dissertation. The dissertation committee is nominated by the department or program concerned, and appointed by the Graduate Program Director and approved by department chair. As with the supervisory committee, it must be comprised of at least four members; this includes the committee chair, who shall be a member of the program or department of concentration, as well as a permanent member of the Graduate Faculty. Of the remaining members, it is also required that two shall be members of the program or department of concentration, as well as permanent members of the Graduate Faculty (http://www.miami.edu/gs/index.php/graduate_school/current_students/graduate_faculty_list_by_department) and one from outside the program or department of concentration. A program may require additional members. The duties of the Dissertation Committee are:

1. To consult with and to advise students on their research;
2. To meet, at regular intervals, to review progress and expected results;
3. To read and comment upon the draft dissertation;
4. To meet, when the dissertation is completed, to conduct the final oral examination and to satisfy itself that the dissertation is a contribution to knowledge and that it is written in lucid and correct English and submitted in approved form.

The candidate is well advised to have a final, acceptable typescript of the dissertation in the hands of each member of his/her committee at a time

reasonably in advance of the final defense of the work a minimum of two weeks prior to the defense.

The dissertation may be written in a language other than English at the recommendation of the dissertation committee and with the approval of the program and the Graduate School. Graduate School approval will be determined on a case-by-case basis. The Dissertation Chair will submit a memorandum from the Department Chair to the Dissertation Editor together with the student's application for admission to candidacy explaining why it is both *relevant* and *appropriate* for the dissertation research to be written in a language other than English. Acceptable "relevant and appropriate" reasons for writing the dissertation in a language other than English include, but are not limited to: relevancy to research where presentation in a non-English language expands knowledge of that language; relevancy where the loss or weakening of the research's meaning and impact if primary data, e.g., interviews, are translated into English; or appropriateness where the majority of the bibliographic sources, references, and potential outlets for future publication are anticipated to be in that language other than English. Both the memorandum and the application for admission to candidacy form must be submitted to the Graduate School at the same time. In some cases upon review of the memorandum, the Graduate School may determine that the student will also be required to submit an English translation of the non-English dissertation. For all approved cases, an abstract in English should be included in the final dissertation.

One Dissertation Editor-approved PDF must be uploaded to the ETD database and final paperwork handed in to the Graduate School on or before the date specified in the academic calendar published each session, accompanied by one certificate of approval of doctoral dissertation defense and one ETD Availability Agreement form. It is the duty of the student to acquire a copy of the guidelines for preparing dissertations from the Graduate School or www.miami.edu/etd (<http://www.miami.edu/etd>) and to conform to the requirements therein. All dissertations are also published by ProQuest/University Microfilms, Inc.

No student gains the right to be recommended for the degree simply by fulfilling requirements. This right is reserved to the student's committee. Changes of committee members must be approved by Graduate Program Director, and sent to the Graduate School.

Qualifying Examinations

A written qualifying examination is to be taken by each doctoral degree (Ph.D., D.M.A., D.N.P., D.P.T., Ed.D.) candidate at the time that the student and the Supervisory Committee deem appropriate. The major program may specify that its students must take an oral examination as well. In those cases, normally, the student shall pass the written examination before the oral examination is conducted. Upon completion of the examination process, the supervisory committee shall notify the Graduate School and the instructional school or program that the student has passed or failed the examination. A student who fails the examination will be given one opportunity to retake it with the permission of the supervisory committee. After a comprehensive exam is failed for a second time, the student is terminated from the program. Some programs do not administer qualifying examinations during the summer months. Check with the Graduate Program Director for specific program requirements.

Admission to Candidacy

When the student has met all requirements and passed the qualifying examinations, admission to candidacy for the degree is approved.

No student may receive the degree in the same semester or summer session in which he or she is admitted to candidacy. The student must be admitted to candidacy before the defense of dissertation is scheduled.

Final Examination

A final public oral defense of the dissertation is required. Refer to the academic calendar for the deadline regarding dissertation defense for each graduation. Graduate programs set the specific requirements and format of the defense. Please contact your Graduate Program Director for details.

Transfer of Credit Hour

Transfer of graduate credit hour from another institution will not be made until the student has completed a like amount of credit hour at the University of Miami, and the transfer has been approved by the supervisory committee and the Dean of the Graduate School. Credit hour transferred is subject to the same recency rules as all other credit hour counted toward the degree, and is also subject to examination by the program. An official transcript of work to be transferred must be on file in the Graduate School. Credit hours that pertain to or have been counted toward another degree cannot be transferred.

Florida International University and University of Miami Agreement

Effective as of Fall 2007, students may take up to 6 credit hours at the host institution as long as the following requirements are met:

1. Must be Ph.D. student or Master's student in Latin American Studies.
2. Approval from both home and host institution;
3. Approval of Graduate School Deans;
4. Space at the host institution is available.
5. Approval of the Faculty member teaching the course.

Tuition and fees are to be paid at the home institution. Performance level is set at host institution. Contact the Graduate School (p. 360) for more information. The application form can be found at http://www.miami.edu/gs/index.php/graduate_school/current_students/umfiu_doctoral_exchange_program/.

Architecture

<http://www.arc.miami.edu>

Introduction

The School of Architecture at the University of Miami offers a professional Master of Architecture degree, as well as, Master degrees in Urban Design, Real Estate Development & Urbanism, and Architecture Research.

The School of Architecture's location in Coral Gables within the Miami metropolitan area provides an outstanding laboratory for research and advanced study; the challenges of conservation and development are intense in one of the nation's fastest growing urban areas. These challenges result in an increasing demand for skilled professionals.

Students have the opportunity to work with the faculty in the exploration of theoretical issues as well as in the resolution of practical problems. The School of Architecture values and sustains a creative, open and supportive environment, emphasizing personalized instruction in small classes and studio courses.

Accreditation

The school is a member of the Association of Collegiate Schools of Architecture and the Association of Collegiate Schools of Planning, and is fully accredited by the National Architectural Accreditation Board, who asks each school to include the following paragraph on professional degrees in all literature:

In the United States, most state registration boards require a degree from an accredited professional degree program as a prerequisite for licensure. The National Architectural Accrediting Board (NAAB), which is the sole agency authorized to accredit U.S. professional degree programs in architecture, recognizes three types of degrees: the Bachelor of Architecture, the Master of Architecture, and the Doctor of Architecture. A program may be granted a 6-year, 3-year, or 2-year term of accreditation, depending on the extent of its conformance with established educational standards. Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education.

Doctor of Architecture and Master of Architecture degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree that, when earned sequentially, constitute an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Admission Requirements

Applications are for the fall semester only. Applications completed by February 1st will be given the highest priority. Admission to the graduate program is subject to the rules, regulations and procedures of the Graduate School as stipulated in the University Graduate Bulletin (p. 360). It is the responsibility of each student to understand these requirements and to ensure that they are met.

The minimum requirements for application to the Master of Architecture Degree program are:

1. 3.0 cumulative grade point average.

2. 300 cumulative Graduate Record Examination score on verbal and quantitative sections
3. *International applicants* and/or those whose native language is not English the TOEFL should have been taken within 2 years prior to application for admission; a minimum score of 550 (paper-based), 80 (internet-based) is required. Visit the TOEFL website, www.toefl.org (<http://www.ets.org/portal/site/ets/menuitem.fab2360b1645a1de9b3a0779f1751509/?vgnnextoid=69c0197a484f4010VgnVCM10000022f95190RCRD>), for more information.
4. For: Master of Architecture (Advanced Standing), Urban Design, and Master of Architecture: Research - a Professional Degree in Architecture (Bachelor of Architecture or Master of Architecture) is required.

Resources

The school's resources, including a state-of-the-art computer and digital fabrication laboratories, are enhanced by the interdisciplinary opportunities offered by the other schools and colleges of the University of Miami. A distinguished faculty is joined each semester by internationally renowned visiting scholars and designers.

Other programs that offer academic opportunities for graduate architecture students include:

- Historic Preservation Certificate
- Classical Architecture Certificate
- Bachelor of Science in Architectural Engineering (BSAE)/Master of Architecture (MARCH)
- Bachelor of Architecture (BARCH)/Master of Business Administration (MBA)

Master of Architecture: Professional Degree

The Master of Architecture is designed for college graduates seeking a first professional degree in architecture. It consists of the following two tracks:

- 3-year Track: A 3-year program for students holding undergraduate degrees in non-design fields. Completion of 105 credit hours required.
- Advanced Standing 2-Year Track: A program for students holding a previous non-professional degree in architecture or a closely related field. Completion of 51-60 credit hours required.

Master's degree programs may consist of a pre-professional undergraduate degree and a professional graduate degree, which, when earned sequentially, comprise an accredited professional education. However, the pre-professional degree is not, by itself, recognized as an accredited degree.

Master of Urban Design

This concentration consists of three semesters of directed study to explore in-depth the existing state of suburbs and cities, study precedents and propose design solutions. The faculty is dedicated to seeking alternatives to modern patterns of urban growth.

The Miami metropolitan area provides a laboratory for the identification of urban problems and for the exploration of design solutions. Each semester is comprised of a design studio and a seminar in parallel, studying both the real and ideal solutions for three aspects of town

planning: new town design, housing and the redesign of existing situations. The School of Architecture faculty teaches the curriculum with field condition input from visiting faculty and other experts such as developers, marketing experts and bankers.

Master in Real Estate Development and Urbanism

An intensive one-year graduate program for students with degrees and experience in business, architecture and related fields blending the fundamentals of real estate development (finance, law, market analysis, development process) with the School's strengths in livable community design.

Master of Science in Architecture

The Master of Science in Architecture (M.S.Arch) degree programs is structured across a 36-credit system of advanced study, typically beyond a first professional degree in architecture, engineering or closely allied profession. It is flexible to enable a student to take a core group of courses within a specialized track, as well as electives. The program may be initiated during the final semesters of the first professional degree in architecture and engineering. After foundational core coursework and electives, each student develops an individually focused thesis or a capstone project on a topic of their interest, with a faculty adviser. The M.S.Arch. program is designed to provide a skills and knowledge base for professional application as well as future advanced doctoral study.

Awards and Scholarships

All students admitted full time to the Master of Architecture program may be eligible for partial tuition scholarships and/or graduate Assistantships, based on academic record.

Scholarships may vary in amounts and are intended to assist the recipient pursue studies as required by the program. Scholarships will be awarded on a competitive basis. Graduate Assistantships require service in the form of teaching, research assistance, or other appropriate educational activities as designated by the director of the graduate program.

American Institute of Architects Henry Adams Medal awarded by the American Institute of Architects to the highest ranking graduating student for scholarship and excellence in architecture. American Institute of Architects Henry Adams Certificate awarded to the second highest ranking graduating student for scholarship and excellence in architecture.

Other honors, distinctions, and awards are presented annually for excellent student performance.

Masters

Masters Degrees in Architecture

- M.Arch. Professional Degree (p. 378)
- M.S in Architecture (Post Professional) (p. 379)
- M.U.D. Master of Urban Design (p. 383)
- Master in Real Estate Development and Urbanism (p. 383)

M.Arch Professional Degree

3-Year Track - For students with Prior Non-Architecture Degrees

Fall Semester I		Credit Hours
ARC 604	Architecture Design and Theory I	6
ARC 611	Drawing	3
ARC 630	Building Technology: Materials Methods	3
ARC 667	History of Architecture I: Ancient, Medieval and Renaissance	3
Term Credit Hours:		15
Spring Semester II		
ARC 605	Architecture Design and Theory II	6
ARC 613	Computing	3
ARC 631	Building Technology II: Structural Systems	3
ARC 668	History of Architecture II: Baroque through Contemporary	3
Term Credit Hours:		15
Summer Semester III		
ARC 606	Architectural Design and Theory III	6
ARC 632	Building Structures I	3
ARC 662	Environmental Building Systems I	3
Term Credit Hours:		12
Fall Semester IV		
ARC 607	Architecture Design. (Comprehensive)	6
ARC 633	Building Structures II	3
ARC 663	Environmental Building Systems II	3
ARC 620	Architecture Theory	3
Term Credit Hours:		15
Spring Semester V		
ARC 608	Architecture Design (Rome or Miami)	6
Electives		6
History of Architecture Elective		3
Term Credit Hours:		15
Fall Semester VI		
ARC 609	Architecture Design	6
ARC 699	Directed Research	3
ARC 652	Management of Professional Practice, Environmental Building Systems I	3
Elective		3
Term Credit Hours:		15
Spring Semester VII		
ARC 610	Architecture Design Degree Project	6
Professional Elective		3

Electives	9
Term Credit Hours:	18
Total Credit Hours:	105

NOTE: 3 credit hours must be taken at the student’s preference during Intersession, Spring Break, or Summer II

Curriculum notes: this program assumes that the student has completed college level mathematics and physics.

Advanced Standing 2-Year Track - For Students with Non-Professional Degrees in Architecture

Fall Semester I		Credit Hours
ARC 607	Architecture Design. (Comprehensive)	6
ARC 620	Architecture Theory	3
Elective		6
Term Credit Hours:		15
Spring Semester II		
ARC 608	Architecture Design (Rome or Miami)	6
	History of Architecture Elective	3
Elective		6
Term Credit Hours:		15
Fall Semester IV		
ARC 609	Architecture Design	6
ARC 699	Directed Research	3
ARC 652	Management of Professional Practice, Environmental Building Systems I	3
Elective		3
Term Credit Hours:		15
Spring Semester V		
ARC 610	Architecture Design Degree Project	6
Elective		9
Term Credit Hours:		15
Total Credit Hours:		60

Architecture and professional courses completed in a pre-professional bachelor’s degree program will be evaluated to identify courses that may be waived in the Master of Architecture Professional Degree Program.

A maximum of 54 credit hours, including three design studios, may be waived; generally architecture and professional courses with a grade of B- or higher will be accepted.

Requirements/Recommendations for additional coursework will be contingent on the evaluation of the student’s prior work at the time of admission.

M.S. Architecture Post Professional Degree

The Master of Science in Architecture (M.S.Arch) degree programs is structured across a 36-credit system of advanced study, typically beyond

a first professional degree in architecture, engineering or closely allied profession. It is flexible to enable a student to take a core group of courses within a specialized track, as well as electives. The program may be initiated during the final semesters of the first professional degree in architecture and engineering. After foundational core coursework and electives, each student develops an individually focused thesis or a capstone project on a topic of their interest, with a faculty adviser. The M.S.Arch. program is designed to provide a skills and knowledge base for professional application as well as future advanced doctoral study.

There are five tracks of concentration possible within the Master of Science in Architecture degree program:

- **Classical and Traditional Architecture**
- **Computational and Embedded Technology;**
- **Healthcare Design**
- **Historical Preservation**
- **Resilient Sustainable Building Technology**

1. Classical and Traditional Architecture

The Master of Science in Architecture: Classical and Traditional Architecture program consists of five courses (21 credits), and five electives (15 credits). The program focuses on the theory and practice of Classical and Traditional Architecture with an emphasis on contemporary vernacular trends in the building arts, emerging urbanisms, the economies of preservation of built patrimonies and sustainable practices of classical and traditional architecture worldwide.

The program includes an option of a semester in Rome as well as a summer option. The program explores the Western Classical Architecture tradition, its sources in ancient Egypt, Greece and Rome, and development through Medieval, Renaissance and Enlightenment periods, as well as the Elements and Principles of Classical Architecture, History of Rome, Urban Elements and Principles, Architectural Treatises, Italian Classicism, and Architectural History of Rome.

2. Computation and Embedded Technology

The Master of Science in Architecture: Computation and Embedded Technology program consist of five courses (21 credits), and five elective courses (15 credits) from School of Architecture and other schools/ departments by arrangement and approval of the coordinator of the track. The program is dedicated to the research and education of digital design thinking in architecture focusing on computational design and digital fabrication.

The program focuses on training innovative professionals rather than on innovative technology. The goals are to integrate analytical approaches and creative problem-defining processes to solve challenging issues in design with applications in art, architecture, education, business and healthcare. Making is at the center of the program’s pedagogy and the iterative and incremental developments of design and fabrication enable students to internalize and personalize these concepts. The research areas for making include, but are not limited to, parametric and algorithmic design, physical computing (sensors and actuators), bio-mimicry, robotic fabrication, machine learning, and computer-vision.

Fall Semester I		Credit Hours
ARC 686	Special Problems	1-3
ARC 663	Environmental Building Systems II	3
Elective (Theory of Computation)		3
Elective (Computational Design)		3
Term Credit Hours:		10-12
Spring Semester II		
ARC 608	Architecture Design	6
ARC 629	Research in Design-Methods and Procedures	3
Elective (Research Methodology)		3
Term Credit Hours:		12
Summer Semester III		
ARC 610	Architecture Design Degree Project	6
Elective (Database)		3
Elective (Adv. Comp. Algorithms and Applications)		3
Term Credit Hours:		12
Total Credit Hours:		34-36

Electives List

Theory and Computation Electives

CSC120 - Computer Programming I (4 credits) History of computing. Fundamental programming constructs. Algorithms and problem solving. Object-oriented programming. Recursion. Lecture 3 hours, laboratory 2 hours. *Prerequisites: Corequisite: MTH108 or MTH140 or MAS110*

CSC540 - Algorithm Design and Analysis (3 credits) Design techniques, including divide-and-conquer, greedy method, dynamic programming, backtracking. Time and space complexity. Sorting and searching. Combinatorial and graph algorithms. *Prerequisites: CSC317* (<http://www.cs.miami.edu/courses/course-formal-pages/csc317>) or *CSC517*

CEM Intro to Systems: Designing Interactivity (3 credits) In this course you will learn to apply systems thinking to the design of interactive systems ranging from physical games to screen-based applications. Designers must understand how to create interactivity through meaningful choice and how to design interfaces that visually communicate desired human interaction as part of an integrated system. Students will learn design principles for creating interactive systems as well as techniques for conducting design research, rapidly prototyping and evaluating multiple design solutions. The first half of the semester will be dedicated to looking at systems thinking through the lens of games. Students will first play games and then design and test their own games in small groups as a method for understanding interactivity and choice. The second half of the semester, students will address interactivity through the design of a screen-based application and/or real-life intervention.

CEM Programming for Designers (3 credits) This course will teach students the basics of programming using Processing. Processing is a language created by Ben Fry and Casey Reas of MIT. It was created to make computer programming accessible to people who

might imagine it but do not always have the skills to execute it, thus making it an excellent tool to teach programming concepts to designers. Processing gives students immediate results allowing them to easily create beautiful, interactive graphics. Read about processing at: <http://processing.org/about/> (<http://processing.org/about>)

ARC Computer Programming 1 - C & C++ (3 credits) This course provides a fast-paced introduction to the C and C++ programming languages, the basis of building energy analysis and modeling. Students will learn the required background knowledge, including memory management, pointers, preprocessor macros, object-oriented programming, and how to find bugs when you inevitably use any of those incorrectly. Moreover, students will learn how to apply the C and C++ in building technology and sustainable design via exercises each week. It is a fundamental class that will provide a basis for the in-depth modeling classes in the second semester.

ARC Computer Programming II - Python (3 credits) This course will provide a gentle introduction to programming using Python for highly motivated students with little or no prior experience in programming computers. The course will focus on planning and organizing programs, as well as the grammar of the Python programming language. The focuses and exercises of the class will be on how to model the building energy performance and visualize the building and its relationship with surrounding environment using Python. Moreover, to prepare students a strong foundation to use BIM software such as Revit or ArchiCAD.

Research Method Electives

EPS670 Introduction to Research Methods (3 credits) The nature of disciplined inquiry in behavioral and social sciences. Includes philosophy of science, quantitative and qualitative research, basic concepts in sampling and measurement, and systematic searches of the research literature. Students are required to complete literature search on a topic of their interest and submit a report of their findings.

EPS351 Introduction to Statistics and Research Design (3 credits) The course will cover basic statistics relevant to the social sciences (e.g., central tendency, variation, t-tests, correlations), with emphasis on real world applications employing commonly used research designs. Students will acquire the tools necessary to interpret elementary statistical analyses and a foundation in the basic analytic methods used in conducting quantitative research in the behavioral sciences.

EPS675 Qualitative Research Methods I (3 credits) An overview of the history, nature, characteristics, strategies, and ethics of qualitative research methods. Critical analysis and evaluation of various types of qualitative studies, including design, sampling, processes of data collection and analysis, and reporting results.

Advanced Algorithm and Application Electives

CSC220 - Computer Programming II (4 credits) Common APIs including list, priority queue, set, and map, and their efficient implementations in an object-oriented language using fundamental data structures. Sorting and other applications of recursion. Combining asymptotic analysis and experiments to extrapolate

running times. Using APIs in a software project. Lecture 3 hours, laboratory 2 hours. *Prerequisites:* CSC120 (<http://www.cs.miami.edu/courses/course-formal-pages/csc120>), MTH108 or MTH140 or MAS110

CSC317 - Data Structures and Algorithm Analysis (3 credits) Basic algorithmic analysis. Algorithmic strategies. Fundamental computing algorithms. Distributed algorithms. Cryptographic algorithms. Geometric algorithms. *Prerequisites:* CSC220 (<http://www.cs.miami.edu/courses/course-formal-pages/csc220>) or EEN318, MTH309

CSC547 - Computational Geometry (3 credits) Algorithms for solving geometric problems arising from application domains including graphics, robotics, and GIS. *Prerequisites:* CSC317 (<http://www.cs.miami.edu/courses/course-formal-pages/csc317>) or CSC517

CSC548 - Bioinformatics Algorithms (3 credits) The complexity of bioinformatics computations. Introduction to perl and bioperl. Pattern matching and sequence homology. Genome assembly. Transcription Factor Binding Site recognition and motif finding. Gene prediction. Phylogeny. Microarray analysis. RNA folding. Gene design and synthesis. *Prerequisites:* CSC120 (<http://www.cs.miami.edu/courses/course-formal-pages/csc120>) or CSC210 (<http://www.cs.miami.edu/courses/course-formal-pages/csc210>), BIL104 or BIL150 or BIL352 or BIL552 or CSC552

CEM Mobile Application Development (3 credits) The rapid global growth and evolution of smart phones, tablets, mobile computing and applications are impacting virtually all aspects of societies, economies and the media, requiring new leadership and expertise in these areas. This introductory course gives communication students valuable understanding and experience designing, developing and distributing a mobile application of their choosing as their course end product. Students can target any mobile platform and distribution system, including Apple's iOS and App Store, or Android Apps on Google Play, for example. No programming experience is required. Student will learn by example and collaboration to use Apple's Xcode or Appcelerator Titanium Studio, for example, among others that may help students to more easily and effectively complete their mobile application for smart phones, tablets, or both.

CEM Dynamic Data (3 credits) This course focuses on speaking through computer programming and data. Students will learn to build stories using numerical data or databases as a primary material and explore data as content. For this course students will be required to build custom software solutions through web programming languages that utilize third party APIs to interpret, analyze and manipulate data.

CEM Information Graphics and Visualization (3 credits) Humans are a visual species. Therefore, designing charts, graphs, maps, diagrams, and explanatory illustrations is a key skill to communicate ideas and improve public understanding of relevant issues. In this course you will learn the conceptual basics of information graphics and visualization, how to transform raw data

into functional and beautiful displays that will not only attract users' attention, but that will also enlighten them.

CEM Web Applications (3 credits) With the evolution of technology there has been an exponential adoption of cloud computing technologies and an increasing number of applications are being pushed on the Web. Software will be consumed through the browser and the implications for software development are significant. In this course students will learn the concept of interoperability of applications: server-side scripting, web server configuration, caching servers, and data stores.

ARC Digital Simulation - Space Syntax (3 credits) In this course students will learn how to analyze and generate spatial configurations with advanced computational methods. In a series of theory lectures we explore how designing and planning of a site, neighborhood or city could become evidence based by using scientific methods. Various exercises will provide training for your skills in working with state-of-the-art yet office proven design tools (Depthmap, Ecotect, and Rhino/Grasshopper).

LAW785 Health Rights Clinic (3 credits, Departmental Approval Required) The Health Rights Clinic is a medical legal partnership operated in collaboration with the UM Miller School of Medicine. Students participating in the Health Rights Clinic represent multiple clients in different legal matters related to health. Under the guidance of Director JoNel Newman (<http://law.miami.edu/faculty-administration/jonel-newman.php?op=1>) and Associate Director Melissa Swain (<http://law.miami.edu/faculty-administration/melissa-gibson-swain.php?op=1>), clinic students spend the academic year representing low income patients of the South Florida AIDS Network, Jackson Hospital and other medical partners.

MDR550 CMC Introduction to the Medical Profession (3 credits) This course provides the foundation of the MD/MPH curriculum areas of emphasis. The course covers the role and responsibilities of physicians, concepts of population medicine and professionalism. Along with didactic sessions, the course utilizes communication skills laboratories designed to equip students for the community physician practice settings. CMC stands for Continuity Medicine Curriculum.

MDR616 Intro. Dermatology and Ophthalmology (2 credits) The Dermatology and Ophthalmology module is an introductory course that covers the basic pathophysiology and clinical aspects of dermatology and ophthalmology that are essential for a general physician. The module covers the normal structure and function of skin, and eye. Common disease diseases of the skin and eye are discussed.

MDR630 Intro. To Epidemiology (2 credits) The principles of epidemiology including the distribution, determinants of disease frequency and their investigation. There is a review of biostatistics to help with the evaluation of scientific investigations

NUR314 Health Assessment (3 credits) Introduction to health assessment using a lifespan approach. Emphasis is on the development of data collection and basic decision-making using health assessment findings.

3. HealthCare Design

The Master of Science in Architecture: Healthcare Design program consist of five courses (21 credits), and five electives (15 credits). Students may plan a course of study within one of three topics:

People— Built Environment and Health Impacts focuses on the understanding of the interrelationships of health and the built environment with the potential for a research-based practice. The program draws on faculty engaged in research through the University of Miami’s Built Environment Behavior and Health Team, which includes faculty in Architecture and the Miller School of Medicine Department of Public Health Sciences.

Places—Healthcare Campuses & Buildings focuses on healthcare buildings and site planning through active engagement with evidence-based design, working with healthcare providers in specific locations. The students will engage in research, participatory planning processes, and the development of design proposals based on research-validated strategies significant to health and well-being.

Potentials—Healthcare and the Internet of Things (IoT) ecosystem explores the capabilities and potential of the IoT to transform healthcare systems and delivery. The student will engage in discovery and design to create new elements of care as well as the design of supportive environments.

4. Historical Preservation

The Master of Science in Architecture: Historic Preservation emphasizes planning and the stewardship of cultural heritage. The program consists of five core courses (21 credits), three elective courses (9 credits), concluding with a 6-credit thesis.

The program builds upon the classic tenets of professional knowledge in preservation while fostering a critical assessment of that body of thought to address the challenges that face natural and cultural conservation. The program draws upon the expertise of University faculty to foster cross-disciplinary dialogs in the service of stewardship. The teaching consists of lectures, seminars, field and lab work, travel study, design studios and the aula magna of Miami, a diverse and emergent 21st Century city that provides the instructional settings and experiences of the program. The pedagogy advances the position that: addressing climate-change; promoting a balanced micro-macro cultural currency; housing global urban population growth; and championing the social-ethical dimension of heritage, represent forces integral to planning and indispensable to stewardship of the natural and cultural environment.

5. Resilient Sustainable Building Technology

The Master of Science in Architecture: Resilient Sustainable Building Technology program consists of six core courses (18 credits), and four elective courses (12 credits) selected from the Department of Architectural Engineering, School of Education and School of Architecture, concluding with a 6-credit thesis.

The program focuses on the challenges of a low-carbon economy, climate change, sustainability and resiliency. The courses will address

the ways new and renewable energy can be harnessed in buildings, develop skills in simulation and modeling essential for performance analysis, and the ability to contribute effectively within a multidisciplinary design team.

First Semester		Credit Hours
ARC 694	Geographic Information Systems in Urban Design	3
ARC 699	Directed Research	3
ARC 696	Advanced Topics	3
ARC 683	Special Problems	3
Term Credit Hours:		12
Second Semester		Credit Hours
ARC 629	Research in Design-Methods and Procedures	3
ARC 683	Special Problems	3
Sustainable Design in Context		3
Building Energy Modeling		3
Elective		3
Term Credit Hours:		15
Third Semester		Credit Hours
ARC 610 or 810	Architecture Design Degree Project or Master's Thesis	6
Elective (Optional)		3
Term Credit Hours:		9
Total Credit Hours:		36

Elective List		
CAE 681	Energy-Efficient Building Design	3
CAE 680	Hospital and Health Care Facility Design	3
ARC 663	Environmental Building Systems II	3
ECE 602	Engineering Acoustics	3
MAF 510	Environmental Planning and the Environmental Impact Statement	3
CAE 560	Sustainable Construction	3
ARC 684	Special Problems (RAD LAB-UM)	3
ECS 310	Sustainable Living	3
MAE 303	Thermodynamics I	3
Natural Ventilation in Buildings		3
Digital Fabrication		3
Teaching Seminar		

M.S.Arch. Thesis Preparation and Thesis Schedule

Faculty advisers work with students to select a thesis or capstone project Advisory Committee that is directed by a School of Architecture faculty member. The Committee may include professionals as well as a faculty member from another institution.

M.U.D. Master of Urban Design Post-Professional Degree

Fall I		Credit Hours
ARC 601	Urban Design I: Urban Form and Types/Form-Based Codes	6
ARC 621	History-Theory II: Housing, Transportation and Infrastructure.	3
ARC 690	History of Cities	3
ARC 615	Visualization Techniques	1
RED 601	Introduction to Real Estate Development and Urbanism.	2
Term Credit Hours:		15
Spring I		
ARC 602	Urban Design II: General Urban to Urban Core.	6
ARC 622	History-Theory III: Urban Design Theory.	3
ARC 616	Architectural Watercolor Renderings	1
ARC 617	Construction Documents	1
Elective		3
Term Credit Hours:		14
Summer I		
ARC 603	Urban Design III: Regional/Informal Urbanism.	6
ARC 623	Public Participation Methods - Charrette with MRED+U Program.	3
Term Credit Hours:		9
Fall II		
ARC 604	Architecture Design and Theory I (Optional Thesis Track)	6
Term Credit Hours:		6
Summer (Rome - Miami 2nd Summer Session)		
Semester 1		
ARC 601	Urban Design I: Urban Form and Types/Form-Based Codes	6
ARC 615	Visualization Techniques	1
Term Credit Hours:		7
Fall		
Semester 2		
ARC 602	Urban Design II: General Urban to Urban Core.	6
ARC 590	History of Cities	3
ARC 621	History-Theory II: Housing, Transportation and Infrastructure.	3

RED 601	Introduction to Real Estate Development and Urbanism.	3
Term Credit Hours:		15
Spring		
Semester 2		
ARC 603	Urban Design III: Regional/Informal Urbanism.	6
ARC 541	Seminar on Town Design	3
ARC 622	History-Theory III: Urban Design Theory.	3
ARC 623	Public Participation Methods - Charrette with MRED+U Program.	2
Term Credit Hours:		14
Total Credit Hours:		80

NOTES: The 6 credit hour Urban Design I Studio takes place at the University of Miami Rome Center. Travel electives can be taken during Intersession or Spring Break.

Master in Real Estate Development and Urbanism

Master in Real Estate Development and Urbanism

Fall		Credit Hours
RED 601	Introduction to Real Estate Development and Urbanism.	3
RED 610	Financing Urban Real Estate Development	3
BSL 694	Real Estate Law	2
RED 630	Market Analysis for Urban Markets	3
ARC 690	History of Cities	3
Term Credit Hours:		14
Spring		
RED 650	Complex Urban Real Estate Transactions	3
RED 660	Urban infill, Preservation Mixed Use Development.	3
RED 670	construction and Project Management	3
RED 680	Entrepreneurship: Building A Real Estate Development Company	3
Elective		3
Term Credit Hours:		15
Winter Session I		
RED 640	National Charrette Institute (NCI)	1
Term Credit Hours:		1
Summer Session I		
RED 690	Integrated Real Estate Development Case Studies Practicum	3

RED 699	Capstone: Real Estate Development and Urbanism Charrette	3
	Term Credit Hours:	6
	Total Credit Hours:	36

Arts and Sciences

Departments

- Anthropology
- Art and Art History
- Biology
- Chemistry
- Computer Science
- Creative Writing
- English
- Geography and Regional Studies
- Geological Sciences (Master's degree available from RSMAS)
- History
- International Administration
- International Studies
- Latin American Studies
- Liberal Studies
- Mathematics
- Modern Languages and Literatures
- Philosophy
- Physics
- Political Science
- Psychology
- Sociology

Admission Requirements

Please consult the general section of the Graduate Bulletin (p. 360) for the Graduate School admission requirements, and the specific program description for additional, department specific admission requirements.

Degree Programs

- Master of Arts
- Master of Fine Arts
- Master of Public Administration
- Master of Science
- Doctor of Philosophy

Degree Requirements

Please consult the specific department section for information related to degree requirements in addition to general degree requirements for the various degrees as listed by the Graduate School.

Other

The Max and Peggy Kriloff Fund is a fund that provides travel support for students earning degrees from the College of Arts and Sciences. The fund provides support for students to present papers, or posters at professional conferences worldwide. Students will need to fill out an application form available at the following link; <http://www.as.miami.edu/academics/graduate-studies/> and submit it, along with the necessary supporting documentation to the Office of Graduate and Administrative Services.

Anthropology

The University of Miami offers a Professional Practice in Anthropology. The program will provide an academic foundation of best practices, current theory, grantsmanship, government regulations, and ethical standards of working with living peoples, dynamic cultural systems, forensics, and cultural heritage materials within the U.S. and abroad. It is designed to prepare graduates for careers in the private sector, government and nongovernmental organizations, nonprofit organizations, and education, including medical and research settings.

Students in these programs are expected to design their mandatory field/research experience in concert with a faculty advisor and external site supervisor as a means of acquiring practical experience in workplace setting. These students will present a professional paper, submit a grant proposal, and/or produce a manuscript for publication as part of the requirements for graduation. They may elect to pursue a degree with or without a written thesis. A total of 36 semester credit hours of graduate coursework (600-level or above) is required to complete the degree.

Masters

- Master of Arts in Anthropology (p. 385)

M.A. in Anthropology

The Department of Anthropology offers a Master of Arts degree in the Professional Practice of Anthropology. The program offers students the opportunity to specialize in three concentrations, 1- Applied Archaeology; 2- Applied Forensic and Biological anthropology; and 3- Applied Cultural Anthropology.

Track 1: Applied archaeology – cultural heritage management (cultural resource management), including museum management for archaeological collections, graduates will be in compliance with regulations and requirements from the U.S. Secretary of the Interior;

Track 2: Applied forensic and biological anthropology – recovery, analysis and identification of human remains, legal interpretation thereof, and museum management of human skeletal/dental remains; applied primatology;

Track 3: Applied cultural anthropology – medical anthropology, anthropology in public health and allied fields, and applied ethnography for industrial/private/government sectors.

Graduate students have two degree options– Option 1 with no written thesis, and Option 2 with a written master's thesis. The aim of the curriculum is to give graduates the skill sets needed to design, conduct, and analyze anthropological fieldwork for their employers or as a component of independent research-driven careers.

Option 1. The nonthesis option is designed for applicants whose ultimate career will be in employment for which practical application of bench skills and a master's degree are the gold standard. Nonthesis students require a minimum of 36 credits beyond the baccalaureate degree with a minimum of 18 months in residency.

This option is designed to prepare students to compete successfully for employment in mid-level careers immediately upon graduation.

We have designed this degree program so that it can be completed in two years.

Option 2. The thesis option requires a minimum of 36 credits beyond the baccalaureate degree and a written thesis with an open defense guided by a thesis advisor and thesis committee of the student's choice. The committee for the thesis must include at least three faculty members, including one from outside anthropology. Additional credits for thesis research and writing may be added to the minimum of 36 if the student wishes. A minimum of 18 months in residency is also required for this option.

This option is designed for individuals who wish to pursue career employment with increased potential for professional advancement based an emphasis on advanced analytical and writing skills used in management. With the thesis track, graduates would have the option of eventually pursuing admission to a doctoral program.

The thesis option may require an additional year in the program to accommodate thesis research and writing. The thesis research and writing credits may serve as part of the residency requirement if the student is in residence during the course.

ADMISSION REQUIREMENTS

Applicants for the program will be selected for admission based on submission of the following materials and standards:

1. Official copy of undergraduate transcripts showing the date the bachelor's degree was awarded. Transcripts must show a 3.0 GPA in anthropology and no less than 3.0 for the overall GPA. Students with lower averages may be admitted provisionally with higher than minimum GRE scores and supporting materials from referees on a case-by-case basis.

2. A personal statement of intent in which the applicant details reasons for pursuing the degree and for pursuing the degree in our program specifically. A cogent written statement will be used in evaluating the applicants' ability for written expression, as well as their fit with our strengths and offerings.

3. A GRE score of 1100 (or combined 297 on the revised General Test). Applicants with lower scores may be considered for admission with supporting documentation from referees of active and successful involvement in research and/or transcripts showing an established record of scholarly achievement as an undergraduate.

We will also consider the admission of part time students, especially in the case of returning students or practicing professional anthropologists who are seeking continuing education to better their skill set while enhancing their opportunities for advancement in the field. Nondegree-seeking students and/or part time students will be considered by the Admissions Committee on a case-by-case basis.

Basic Coursework Requirements

1. Seminars in two of the four core graduate seminars in professional practice and theoretical foundations (see below) (3 credits; total of 6 credits);
2. One course or seminar in analytical skills for qualitative and/or quantitative data (3 credits); and

3. One course or seminar in professional writing (e.g., scientific writing for publication, federal compliance reporting, grants writing) (3 credits).

Additional Requirements for the Degree

1. One semester of hands-on field work or internship (usually over the summer), with the option of a second as thesis research; and
2. One paper for presentation at professional organization or one paper for publication in a journal/proceedings/book chapter or other professional venue. The presentation may be poster, podium or multimedia.

The Professional Practice Core Courses

The MA in Anthropology consists of the following courses.

APY 601	Advanced Seminar in Archaeology, Theory and Practice	3
APY 602	Advanced Seminar in Cultural Anthropology	3
APY 603	Advanced Seminar in Biological Anthropology	3
APY 604	Advanced Seminar in Linguistic Anthropology	3
APY 612	Advanced Medical Anthropology	3
APY 690	Teaching Practicum In Anthropology	3
APY 805	Graduate Internship: Professional Practice of Anthropology	1-9
APY 810	Master's Degree Thesis Preparation and Writing	1-9
Total Credit Hours		20-36

APY 611 – Methods of Anthropological Research (3-6 credits), may be offered as a seminar or independent study.

APY 702 – Field Studies in Anthropology (3-6 credits), may be offered as a seminar or independent study.

APY 615 – Museum Internship (3 credits), may be offered as a seminar or independent study.

APY 616 – Workshop in Anthropology (3-6 credits), may be offered as a seminar or independent study.

APY 622 – Advanced Medical Anthropology (3 credits), may be offered as a seminar or independent study.

APY 628 – Advanced Seminar in Anthropology (3 credits), may be offered as a seminar or independent study.

Other Competencies Required for the M.A.

Foreign language (mandatory) – demonstrated competency in the language of the country in which the applicant will work is expected.

The language requirement may be met by analysis and translation of historical documents in a language other than English, or translation into English of three scientific articles from peer-reviewed journals pertaining to the professional practice of anthropology published originally in a foreign language.

Nine graduate-level credits outside of Anthropology (mandatory) – These may be from a suggested list of electives and/or may be designed as a graduate cognate by the student with guidance from the advisor.

Professional Certification of Competency

Certificates of Proficiency (optional) – These may be gained in professional competency courses offered in conjunction with institutions in the student's area of professional specialization. Credit hours may be earned if the student completes the certification as an independent study, part of an internship program, or fieldwork course.

Thesis Option

Written Master's Thesis (optional) - The thesis option will require the production of a written document as part of the minimum requirements in this track. The thesis research and writing credits may serve as part of the residency requirement if the student is in residence during the course.

Thesis requirements will conform to the University of Miami's standards and format.

ACADEMIC STANDING

Graduate students are expected to maintain an overall GPA of 3.0 in all coursework. Should the average fall below that mark in a semester, the student will be notified and work with his/her advisor to rectify the performance problems. If the student has a second consecutive semester with an average GPA below the 3.0 standard, he/she will be placed on academic probation. Three semesters of below average performance may result in suspension from the program at the discretion of the Chair and in discussion with the student and his/her departmental advisor in accordance with guidelines for the University's Graduate College.

For additional program information, please visit <http://www.as.miami.edu/anthropology/>.

Art and Art History

<http://www.as.miami.edu/art>

Degree Programs

One program serves the needs of graduate students in Art and Art History.

- Master of Fine Arts program in the studio areas of
 - Painting
 - Sculpture
 - Ceramics/Glass
 - Printmaking
 - Photography/Digital Imaging

Master of Fine Arts

The Master of Fine Arts degree is the terminal degree for students interested in the creation of art who plan to pursue careers as practicing artists/teachers.

The students will take a minimum requirement of 60 credit hours in approved graduate courses (at the 600 level or above).

Teaching assistants should take 10 credit hours each semester.

A Supervisory Committee will be assigned when the student is formally admitted to the program.

- It will be comprised of at least four members.
- The Supervisory Committee chair will be from the student's area of concentration and be a tenure track faculty member.
- The head of the Supervisory Committee will select the membership of the Committee after conferring with the student.
- The Supervisory Committee will formally review the student's progress; the student may be put on probation at the end of any semester, and given one semester to improve or be removed from the program.

Application for candidacy may be made any time after the completion of 30 credit hours, but must be attained prior to registration for the final semester.

- The Supervisory Committee will determine whether the student should be admitted to candidacy.
- When the student is admitted to candidacy, a Thesis Committee is formed with at least four members, who need not be the same as the Supervisory Committee.
- The Chair should be from the student's area of concentration and be a tenure track faculty member .
- Two others should be department faculty, and the fourth person must be from outside the studio faculty.
- This committee will consult with and advise the student on his or her work, meet twice a semester to review progress, read and comment on the thesis document, and conduct a final oral exam during the thesis exhibition.
- The thesis exhibition will be scheduled after the successful completion of ART 699; the show will be installed after the candidate has submitted an accepted written document. All incompletes must be cleared before the exhibition can be scheduled.
- No student gains the right to be recommended for the degree simply by completing the course requirements. This right is reserved to the students Thesis Committee in coordination with the Graduate Program Director.

Applicants for admission to the Master of Fine Arts program are responsible for the submission of the following materials to the Graduate Secretary in Art and Art History:

1. All transcripts of college-level academic work
2. 20 images of studio work; Instructions for submitting the portfolio are on the department website www.miami.edu/art (<http://www.miami.edu/art>)
3. Three letters of recommendation
4. Application form
5. A letter of intent
6. The GRE test is not required for being considered for admission to the MFA program or for a teaching assistantship; however there are other possible fellowships offered by the University that might require the GRE. For more information contact the department or the Graduate School.
7. Applicants for MFA degrees are considered in the Spring for the upcoming Fall semester. February 15 is the deadline for receipt

of applications. The deadline for international applications for the upcoming Fall semester is January 15.

Masters

Masters Program in Art and Art History

Biology

<http://www.bio.miami.edu>

Dept. Code: BIL

Degree Programs

Application for Admission

Applications are due December 1.

In applying for admission, applicants must select either the *Master's* or the *Ph.D.* track.

Students with an appropriate B.S. degree may seek direct entry to either the M.S. track or the Ph.D. track.

Applicants who were admitted on the Master's track, but wish to change to a Ph.D. track without completing the Master's may apply for admission to the Ph.D. program before the end of their second semester. Letters of support from three UM Biology faculty, including a major advisor, should be added to the applicant's file. The file must be current. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants to the Ph.D. track who were admitted on the Master's track and wish to complete the M.S. degree, should follow the same procedures as all other applicants, but they must include letters of support from three UM Biology faculty. Such applicants will be judged by the same criteria that are applied to other Ph.D. applicants.

Applicants must:

1. Apply online (<https://www.applyweb.com/miamigrd>) at the UM Graduate School. Application fee of \$65.
2. Send hardcopies of the following to the Coordinator of Graduate Studies in Biology, Department of Biology, 1301 Memorial Drive, Coral Gables, FL 33146 USA.
 - a. Originals of all undergraduate and graduate official transcripts (photocopies are not accepted)

- b. Official scores from recent Graduate Record Examinations (within five years), including the aptitude portion; the Biology subject matter test also is recommended (photocopies of scores are not accepted)
 - c. International applicants whose native language is not English must additionally submit the TOEFL (Test of English as a Foreign Language) and the TSE (Test of Spoken English) official scores (photocopies of scores are not accepted)
3. Send digital copies of the following to the Coordinator of Graduate Studies in Biology (gradcoord@bio.miami.edu)
 - a. A cover letter that identifies interests, suggests possible research projects, states career goals and identifies a UM Biology faculty sponsor
 - b. Copies of any research papers (e.g., publications, manuscripts, senior reports, etc.)
 4. Letters of recommendation from **three** science instructors/supervisors that address: nature and duration of relationship to applicant; motivation; ability to conceptualize and deal quantitatively with biological problems, and research potential should be sent by email to the Coordinator of Graduate Studies in Biology at gradcoord@bio.miami.edu
 5. Request UM Biology faculty sponsor submit a memo of support by email to the Coordinator of Graduate Studies in Biology (gradcoord@bio.miami.edu). Applicants **MUST** secure the sponsorship of a faculty member as a condition for admission; the research interests of the applicant and the faculty sponsor should be well-matched; the sponsor will be the major advisor

A limited number of applicants to the Ph.D. program may be invited to interview at departmental expense in early January of the year of admission.

Materials submitted in support of an application cannot be released for other purposes or returned to the applicant.

Degree Requirements

All students are required to satisfy the **general requirements** for the appropriate degree that are listed in the **Graduate Studies Bulletin**, whether or not they are listed among the Biology requirements.

Implementation

All Graduate students will be reviewed each spring semester by GAAC.

1. The advisor will review the student's progress to date.
2. The student will provide updates for a student progress database every February.
3. The student will provide written evidence that the advisor and committee have reviewed her/his progress and plans.
4. Each student will receive a letter summarizing the results of the discussion concerning his/her progress.
5. All graduate students shall have the right to respond to GAAC, and, if necessary, the graduate faculty in matters pertaining to the review.
6. Possible outcomes of the review:
 - a. Student making satisfactory progress
 - b. Student not making satisfactory progress; recommendations for improvement

- c. Student not making satisfactory progress; his/her tenure terminated.

Financial Support

1. The Department intends to support all doctoral students in good standing for up to 10 semesters. Support beyond 10 semesters is contingent upon GAAC approval.
2. Master's degree students usually are not eligible for departmental stipends or tuition remission.
3. Students who do not provide annual updates for the student progress database will not be eligible for continued funding. Students who will be off-campus are still responsible for making sure that GAAC receives the data. Students who choose not to present at the annual departmental graduate student symposium may be considered as not in good standing.
4. Students holding full fellowships or research assistantships will not normally be given teaching assignments, nor will students be permitted to hold fellowships and research assistantships simultaneously. Exceptions require GAAC approval.

Masters

Masters Programs in Biology

- M.S. in Biology with Thesis (Three Year Program) (p. 389)
- M.S. in Biology without Thesis (Two Year Program) (p. 390)

Doctoral

Doctoral Program in Biology

- Ph.D. in Biology (p. 391)

M.S. in Biology with Thesis (Three Year Program)

1. Credit hours: a total of 30 credit hours are required:
 - 24 course credit hours, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area; they are encouraged to select courses and independent studies that will prepare them for research, as listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 24 course credit hours.:

BIL 675	Advanced Study in Plant or Animal Sciences	1-6
BIL 678	Current Topics in Biological Research	1

At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.

- 6 research credit hours (BIL 810); no more than 6 M.S. research credit hours are allowed.
 - The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."
2. Research Proposal: public presentation and successful defense to the committee of a written research proposal. The public presentation must be given during regular sessions of the Fall or Spring semesters,

not during summer sessions, intersessions, reading days or finals weeks.

3. Admission to candidacy is made by recommendation of the committee.
4. Thesis: A well-written and successfully defended thesis of publishable quality; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation.
5. Other requirements described under "The Master's Degree," including but not limited to:
 - a total of at least 30 credit hours (course credit hours plus research credit hours). The Graduate School and the Department concur in requiring at least 24 course credit hours and exactly 6 research credit hours (BIL 810) for a thesis M.S.
 - once a student has completed all required credit hours, she/he must enroll in "Research in Residence" (BIL 820) status until the degree is granted. This course carries 0 credit hours, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit hour normally applies to this course.
6. About the committee:
 - A single committee will combine the responsibilities of the supervisory and thesis committees.
 - The supervisory committee will be determined by the student in consultation with his or her advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
 - The thesis committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
 - The thesis committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
 - Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should consult with the committee about major changes in research goals and about problems. Memos summarizing each meeting should be in the student's file and emailed to the Graduate Director (graddirector@bio.miami.edu).
7. About the time table:
 - A **written thesis proposal** is due no later than the **middle of the second semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.**
 - **Admission to candidacy** normally occurs after completion of one year or 12 credit hours of graduate work and successful defense of the thesis proposal.

- Analysis of data and a **polished draft of the thesis** should be completed and in the hands of the committee by the **middle of the sixth semester. Please take note of this deadline. The scope of the M.S. thesis should be in line with the timetable.**
 - **Defense of the thesis and its submission to the Graduate School** must meet or precede the deadline for graduation immediately **following the sixth semester** unless an extension has been approved by the Graduate Admissions and Advisement Committee (GAAC) upon recommendation of the thesis committee. Notice of the defense must be submitted on a special form to the graduate school in advance of the defense and must be posted publicly in the department.
 - The oral defense of the thesis **must** be given during regular sessions of the Fall or Spring semesters, not during summer sessions, intersessions, reading days or finals weeks.
 - **No student may receive the degree in the same semester in which she/he is admitted to candidacy.**
 - The indicated dates form **firm deadlines**. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.**
 - Proposals to change the schedule for any reason should be preceded by a study of the **graduate bulletin** sections on **leaves of absence, full time student status** and **recency of credit hour** and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the **proposed financial support**.
8. Completed SACS evaluation forms are required at two points during the course of study. One following the research proposal defense and the final following defense of the thesis. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

M.S. in Biology without Thesis (Two Year Program)

1. Credit hours:

- A total of 36 course credit hours are required by the Biology Department, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. Students are encouraged to take courses from more than one conceptual area, listed under the Ph.D. requirements. No more than 9 credit hours from the independent study series may be used to fulfill the 36 course credit hours.:

BIL 675	Advanced Study in Plant or Animal Sciences	1-6
BIL 678	Current Topics in Biological Research	1

At times these course numbers are used by professors to teach a new course or a special topics course, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.

- The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."

2. Admission to candidacy is made by recommendation of the committee.
3. Passing a written comprehensive exam given by the committee.
4. About the committee:
 - A single committee will combine the responsibilities of the initial supervisory and the comprehensive examination committees. The committee will be determined by the student in consultation with her/his advisor. The committee will consist of a minimum of three faculty, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
 - The examination committee is formed officially when the student is admitted to candidacy. It may comprise the same individuals as the supervisory committee, or it may be formed anew. The student in consultation with the advisor suggests the membership of the committee to the graduate school. The committee will consist of a minimum of three faculty including the student's advisor, one of whom must be from outside the department, and one of whom must be a member of the graduate faculty. There is no sub-disciplinary representation requirement.
 - The examination committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
 - Committee meetings are required at least once a year (recommended at least once a semester); the student is responsible for arranging meetings; the student should keep the committee advised of major changes in the graduate program plan; memos summarizing each meeting should be in the student's file.
5. Other requirements described under "The Master's Degree."
 - Note that although the Graduate School requires only 30 credit hours for an M.S. degree, the Department requires 36 course credit hours for a non-thesis M.S.
6. About the time table:
 - **Admission to candidacy** normally occurs after completion of one year or 12 credit hours of graduate work.
 - The **comprehensive exam** must be passed by the **end of the fourth semester**.
 - **No student may receive the degree in the same semester in which she/he is admitted to candidacy.**
 - The indicated dates form **firm deadlines**. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.**
 - Proposals to change the schedule for any reason should be preceded by a study of the **graduate bulletin** sections on **leaves of absence, full time student status** and **recency of credit hour** and explicitly address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the **proposed financial support**.
7. Completed SACS evaluation forms are required following the comprehensive exam. The student is responsible for providing blank forms to the committee. The graduate advisor is responsible for

forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

Ph.D. in Biology

1. Credit hours: a total of 60 credit hours (including both course and research credit hours) beyond the Bachelor's degree are required:

- At least 18 course credit hours that are not from the independent study series, including the two semester departmental core courses for graduate students and at least one graduate course in statistics. The independent study series is:

BIL 675	Advanced Study in Plant or Animal Sciences	1-6
BIL 678	Current Topics in Biological Research	1

At times these course numbers are used by professors to teach a new course or a special topics course, however, in which case the corresponding credit hours can be counted as a non-independent study credit hour. Course selection requires committee approval.

- At least 12 research credit hours (BIL 830 and/or BIL 840). Once the overall number of required credit hours (see below #8) has been reached, there is no need to take additional research credit hours.
- An additional 30 credit hours from any combination of graduate courses (600 level regular courses and independent study courses) and research credit hours (800 level) to bring the total number of credit hours beyond the Bachelor's Degree to 60 credit hours. (One example: 18 required course credit hours + 12 required research credit hours + 15 **additional** course credit hours + 15 **additional** research credit hours = 60 total; another example would be 18 **additional** course credit hours and only 12 **additional** dissertation credit hours, etc.)
- Students who already have a Master's Degree in the same field may not need as many course credit hours (consult Graduate School rules on transfer credit hours), but at least 24 credit hours must be taken in residence at UM.
- The committee may decide that students with previous graduate level courses may be exempt from some of the course requirements.
- The minimum acceptable grade average in all coursework towards the degree is a "B (3.0)" and no grade may be below a "C."
- CONCEPTUAL AREAS:** Students are encouraged to take courses and independent studies from at least 3 main conceptual areas, and are urged to take courses and independent studies that will prepare them for research and for the comprehensive qualifying exam. Students also are encouraged to participate in seminars and study groups and to take special courses in other departments of UM, at our Coalition for Excellence in Tropical Biology partner institutions, from the Organization for Tropical Studies, or other special interdisciplinary courses. Such courses should be appropriate to their course of study and research area as determined by their committee. Conceptual areas offered in our department include: EVOLUTION (graduate level evolution courses are in the 620's series); ECOLOGY (graduate level ecology courses are in the 630's series), BEHAVIOR (graduate level behavior courses are in the 640's series); GENETICS AND MOLECULAR BIOLOGY (graduate level genetics and molecular biology courses are in the 650's series); and PHYSIOLOGY AND

CELL BIOLOGY (graduate level physiology courses are in the 660's series). Special concentrations in our department and/or in collaboration with other departments include: Tropical Biology, Mathematical Ecology, Neuroscience, and Behavior.

2. Comprehensive qualifying exam should be passed by the end of the third semester.

- A single committee (see number 9 below about committee membership) will advise the student on both comprehensive and research training. To fulfill the **comprehensive function**, the committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above).
- To establish intellectual communication between the committee members and students early on, the committee will begin to work with the student in the **first semester**. Faculty will suggest reading lists, courses and/or independent study, as needed, to prepare the student with sufficient background for the comprehensive examination which will include 3 areas, one of which is the research area. The committee and student will interactively define the scope of comprehensive training and thus of the comprehensive examination in these 3 areas.
- The comprehensive examination will be held in the third semester. The committee will designate a chair to administer the examination. The chair of the comprehensive examination will not be the graduate advisor. The written part of the exam will not be open book and it will be administered on campus for a discrete period of time (up to 4 hours within each of two consecutive days) by the examination chair. All members of the committee will grade all the questions. With committee approval, an alternative is to present to the committee a first-authored, publishable, full-length article manuscript concerning research conducted since matriculation at UM. Before the end of the third semester, the manuscript must be submitted to a journal approved by the committee (refer to the Department of Biology Graduate Student Handbook for additional details concerning the alternative qualifying exam). After the committee has read the written answers or manuscript, about one week later there will be an oral exam for the purpose of further exploring the student's grasp of the subject matter.
- Each committee member will decide on a pass/fail grade based on the total performance (written plus oral). For the student to pass the examination, 3 of the 4 examiners must vote a grade of pass. An oral and written summary of the committee's evaluation must be prepared by the chair of the **examination committee** and given to the student and to GAAC. If the student does not pass the examination, there will be a chance to retake it the following semester. In the case of failure a second time, he/she will be terminated from the program.
- At time of completion of the oral examination the examination committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

3. Research proposal: public presentation of a research proposal and defense of a written research proposal to the **complete research committee** (see below) should be completed by the middle of the fourth semester. Students are encouraged to follow the format of a grant proposal to a major funding agency. At the proposal defense, the student will receive either a pass or a fail. A grade of pass will

be recorded if no more than one member of the **complete research committee** (see below) votes to fail the student. If the student fails the proposal defense, she/he will be given a **second chance** to defend no later than the **sixth week of the fifth semester**. If the defense is failed a second time, the student will be terminated from the program.

At time of completion of the proposal defense the complete research committee must provide the Graduate Director with a completed SACS evaluation form, the student is responsible for ensuring the Graduate Director receives this form.

4. Admission to candidacy: (application is made on a form available in the grad school and in the department). This normally will occur at the end of the fourth semester. Requirements are to pass the comprehensive examination and to successfully defend a written research proposal and to have complete SACS evaluation forms from both the qualifying exam and the proposal defense on file.
5. Teaching: All students on the Ph.D. track in Biology are required to serve satisfactorily at least one semester as a teaching assistant in one of the courses offered as part of the Department's training program.
6. Grants: Submission of a grant proposal to a major funding agency (e.g., NSF, NIH, National Geographic, World Wildlife Fund, etc.) is required. All students are required to seek outside funding for their research. This must be a research project proposal. Application for an NSF pre-doctoral fellowship does not meet this requirement, but application for an NSF dissertation improvement grant does qualify.
7. Ph.D. Dissertation: A well-written and successfully defended dissertation containing an original contribution to the field and of quality appropriate for publication in a scientific journal; a defense is successful if all members of the committee sign the grad school form and the signature page of the dissertation. A public dissertation seminar also is presented at the time of the defense. Following the defense the committee is required to provide the Graduate Director with a completed SACS evaluation form.
8. Other requirements described under "Doctor of Philosophy," including but not limited to:
 - a total of at least 60 credit hours (course credit hours plus research credit hours).
 - once a student has completed all required credit hours, she/he must enroll in "Research in Residence" (BIL 850) status until the degree is granted. This course carries 0 credit hours, but is considered full-time enrollment. Even though no credit is earned, a tuition charge equivalent to 1 course credit hours normally applies to this course.
9. A single committee will advise the student on both comprehensive and research training. The committee will be responsible for ensuring breadth, significant background and depth in at least 3 conceptual areas (examples include but are not limited to the areas listed above). The research function of the committee is to advise the student on research, including preparation, training, project choice, project design, implementation and evaluation of the research. The committee will go through several phases and its membership will be determined by the advisor and student together, contingent upon approval of GAAC and/or the Graduate School, as appropriate at each phase:
 - The **initial committee** will consist of at least **4 faculty**, 2 appointed to ensure breadth of training (from two areas outside the research area) and 2 from the research area. It will be formed to help the student choose courses during the first few weeks of

the first semester. This committee will decide whether students having a M.S. in biology (botany, zoology, etc.) from another institution can substitute a graduate level course taken elsewhere for a departmental course requirement; it also will decide which additional courses should be taken for both research and breadth. The choice of areas briefly will be outlined in a memo to GAAC.

- The **initial committee of at least 4 faculty** will be responsible for preparing and administering the comprehensive examination.
 - The **complete committee of at least 4 faculty** including one from outside the department, should be formed by the end of the third semester; all four members should participate in the proposal evaluation which will take place in the fourth semester. The committee will consist of a minimum of four faculty, which includes the committee chair, who must be a member of the Graduate Faculty. Of the remaining members, it is also required that two shall be from the Graduate Faculty.
 - The **dissertation committee (of four)** is formed officially when the student is admitted to candidacy. It usually will comprise the same individuals as the complete research committee, or it may be formed anew. The student and advisor consult on the membership of the committee, and the department nominates the committee to the graduate school. The committee will consist of a minimum of four faculty, which includes the committee chair who is the advisor, who must be a member of the Graduate Faculty. Of the remaining members, it also is required that two shall be from the Graduate Faculty and one from outside the department of concentration. The dissertation committee is nominated by the department, but it must be approved and appointed by the Dean of the Graduate School. There is a special form that must be filed with the graduate school.
 - Committee meetings are **required at least once a year** (recommended at least once a semester in the early phases). The student is responsible for arranging meetings; the student should consult with the committee about any major changes in research goals and any problems; memos summarizing each meeting should be in the student's file.
10. About the time table:
 - The written **comprehensive qualifying examination** must be passed by the **end of the third semester**.
 - A **polished, written dissertation proposal** must be **defended to the committee in the fourth semester** together with a **public presentation of the proposal**. This must take place by mid-April of the spring semester or mid-November of the fall semester.
 - **Admission to candidacy** normally occurs **after the comprehensive qualifying exam and proposal defense are passed upon the recommendation of the committee and the approval of the Graduate School**. Application for admission to candidacy is made to the graduate school on a special form.
 - Analysis of data and a **polished draft of the dissertation** should be completed and in the hands of the dissertation committee **no later than the middle of the tenth semester**.
 - **Defense of the dissertation and its submission to the Graduate School** must meet or precede the deadline for graduation immediately following **the tenth semester** unless an extension has been approved by GAAC upon recommendation of the dissertation committee. Notice of the defense and of the public seminar must be submitted on a special form to the graduate

school in advance of the defense and must be posted publicly in the department.

- The oral **defense of the dissertation** must be given during **regular sessions** of the Fall or Spring semesters, **not during** summer sessions, intersessions, reading days or finals weeks.
- **No student may receive the degree in the same semester in which she/he is admitted to candidacy.**
- The indicated dates form **firm deadlines**. A student's committee, however, may submit a written petition to GAAC for an extension of time detailing reasons for the request. **An extension will be granted only under extraordinary circumstances and will be effective upon written approval by GAAC.**
- Proposals to change the schedule for any reason should be preceded by a study of the **graduate bulletin** sections on **leaves of absence, full time student status and recency of credit hour**, and explicitly should address how the proposed change of schedule relates to these matters. The memo requesting the change also should address the **proposed financial support** of the student beyond the 10 semesters of normal departmental support.

11. **Public presentations must be during regular semesters.** The public presentation associated with the defense of the proposal and the public seminar associated with the defense of the dissertation must be given during regular sessions of Fall or Spring semesters, not during summer sessions, inter-sessions, reading days, or finals weeks.
12. Completed SACS evaluation forms are required at three points during the course of study. One following the qualifying exam, one following the proposal defense and the final following defense of the dissertation. The student is responsible for providing blank forms to the committee at each milestone. The graduate advisor is responsible for forwarding completed forms to the Graduate Director. The student is responsible for ensuring the Graduate Director receives these forms.

Chemistry

<http://www.as.miami.edu/chemistry>

Dept. Code: CHM

Degree Programs

Prospective graduate students are expected to have completed, during their undergraduate training:

The candidate must hold a B.S./B.A. degree from an accredited institution. Consideration is given to applicants who have successfully completed general chemistry (two semesters), organic chemistry (two semesters), physical chemistry (two semesters), and the related laboratories. A course in advanced inorganic chemistry is strongly recommended, and remedial work in this area may be required of students who have not taken such a course. The mathematics and physics courses that are normally included in a B.S. program in chemistry are also required.

Undergraduate deficiencies are treated as such and must be overcome during the first year of graduate study.

Masters

Masters Program in Chemistry

- M.S. in Chemistry (p. 393)

Doctoral

Doctoral Program in Chemistry

- Ph.D. in Chemistry (p. 393)

M.S. in Chemistry

The *MS degree* requires a minimum of 30 credit hours.

Formal Lecture Courses	18
Chemistry Seminar (Total of 2 credits required for CHM 779)	1
CHM 779 Chemistry Seminar	1
CHM 785 Introduction to Research	2
Master's Thesis (Total of 8 credits required for CHM 810)	7
CHM 810 Master's Thesis	1
Total Credit Hours	30

Students must take 18 credits of formal lecture courses by the end of the spring semester of their first year. Of the 18 credit hours, 4 core courses totaling 12 credit hours should be taken by all graduate students.

- The required number of credit hours in the *chemistry seminars* (CHM 779) and *Introduction to Research* (CHM 785) must be taken in the first and second year.
- The required number of credit hours in *research* (CHM 810) must be taken in the second year.
- A *dissertation* based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the second year.

The M.S. degree may be earned with or without a thesis.

In order to complete a MS degree without thesis, an advanced comprehensive exam must be passed.

The exam is administered at the end of the second year in the program.

Ph.D. in Chemistry

The general requirements for the **doctorate** in Chemistry are set forth in this *Bulletin* under the heading Doctor of Philosophy. The Department of Chemistry has the following specific requirements:

The PhD degree requires a minimum of 60 credit hours. The department will cover tuition costs up to 60 credit hours for students on assistantships and fellowships.

Formal Lecture Courses	18
Chemistry Seminar (Total of 4 credits required for CHM 779)	3
CHM 779 Chemistry Seminar	1
Chemistry Seminar (Total of 2 credits required for CHM 780)	1
CHM 780 Chemistry Seminar	1
CHM 785 Introduction to Research	2
CHM 788 Problems in Research Planning	2
Pre-candidacy (Total of 26 credits required for CHM 830)	25
CHM 830 Doctoral Dissertation	1

CHM 840	Post-candidacy Dissertation	6
Total Credit Hours		60

Students must take 18 credits of formal lecture courses by the end of the spring semester of their first year. Of the 18 credit hours, 4 core courses totaling 12 credit hours should be taken by all graduate students.

- The required number of credit hours in the *chemistry seminar* (CHM 779) must be taken in the first and second year.
- The required number of credit hours in Introduction to Research (CHM 785) must be taken in the first year.
- The required number of credit hours in the *chemistry seminar* (CHM 780) must be taken in the fall semester of the third year.
- The required number of credit hours in *Pre-candidacy Doctoral Dissertation* (CHM 830) must be taken in the first, second, third and fourth year.
- The required number of credit hours edits in *Post-candidacy Doctoral Dissertation* (CHM 840) must be taken in the fourth year.
- An *Oral Comprehensive Exam* must be passed before the end of the spring semester of the second year.
- An original *research proposal in Problems in Research Planning* (CHM 788) must be presented and defended before the end of the spring semester of the third year.
- A *Doctoral Dissertation* (CHM 780) based on research of a quality acceptable for publication in a recognized scientific journal must be completed before the end of the fifth year.

Computer Science

<http://www.cs.miami.edu>

Dept. Code: CSC

Degree Programs

The department of Computer Science offers a Master of Science in Computer Science and a Doctor of Philosophy in Computer Science.

Note

All Computer Science graduate TAs and RAs must complete RCR training during their first semester in the department. All other Computer Science graduate students must complete Responsible Conduct of Research (RCR) training before starting research work. Information about RCR training can be found from UM ethics programs: <http://www.miami.edu/index.php/ethics/projects/rcr/>.

Masters

Masters Programs in Computer Science

- M.S. in Computer Science (p. 395)
- Five-Year B.S. and M.S. in Computer Science (p. 394)

Doctoral

Doctoral Program in Computer Science

- Ph.D. in Computer Science (p. 395)

Five-Year B.S. and M.S. in Computer Science

This program is open only to currently enrolled Computer Science undergraduates.

The 5-year Bachelor of Science + Master of Science program in Computer Science provides research training for students who wish to work in a computing research lab, or possibly continue to PhD studies.

Students must complete the requirements for a Bachelor of Science in Computer Science (p. 82), and the requirements for a 30 credit hour Master of Science in Computer Science with thesis (p. 395). No credits may be counted towards both requirements.

Students enter the "MS-phase" of the program when they have met the following requirements:

- They have achieved senior status, i.e., earned 89 credit hours towards their Bachelor of Science in Computer Science.
- Within the requirements for a Bachelor of Science in Computer Science, they have completed the prerequisites for entry into the regular Master of Science program, i.e.:

CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures And Algorithm Analysis	3
CSC 427	Theory Of Computing	3
MTH 161	Calculus I	4
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3
Total Credit Hours		27

- They have completed 3 credit hours of CSC 410/CSC 411 in a research-oriented project.
- They have a GPA of at least 3.0 in the CSC courses taken towards their BS in Computer Science.
- They have advised the Director of Graduate Studies of their eligibility for the MS-phase.
- Students in the MS-phase must complete 3 further credit hours of CSC 410/CSC 411 in a research-oriented project, as part of their Bachelor of Science in Computer Science (this project will normally be the starting point for the Master of Science research). Students in the MS-phase may take 600/700 level courses that count towards completing the requirements for the Master of Science in Computer Science. When students have completed the requirements for a Bachelor of Science in Computer Science they will be awarded that degree, and when they have completed the requirements for the Master of Science in Computer Science they will be awarded that degree. Students in the MS-phase must submit their GRE scores before they are admitted to graduate student status.
- Incoming students can be admitted to the program if their mathematics placement is MTH 108 or higher. Existing Bachelor of Science in Computer Science students can switch into the program when they have met the requirements for entering the MS-phase of the program. Students can be removed from the program if they have not met the prerequisites for admission to the MS-phase by the time

they have achieved senior status. If a student is removed or decides to withdraw from the program, any 600 level courses taken may be used to fulfill the requirements for a Bachelor of Science in Computer Science.

M.S. in Computer Science

The Master of Science program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Prerequisites for Admission

Completion of the following courses, or their equivalents, is prerequisite to entry into the program:

CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures And Algorithm Analysis	3
CSC 427	Theory Of Computing	3
MTH 161	Calculus I	4
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3
Total Credit Hours		27

Students may be admitted with deficiencies; these must be completed in addition to the degree requirements.

Requirements for Graduation

Students must complete the Graduate School requirements, and the Departmental requirements described here.

Select either the Thesis Option or the Coursework Option ¹	30-36
Thesis Option	
CSC 810 Master’s Thesis	1-6
Select a minimum of 9 credit hours from approved CSC7XX courses	
Select 15 credit hours of approved courses	
Coursework Option	
Select a minimum of 18 credit hours from approved 700 level courses	
Select 18 credit hours from approved courses	
Total Credit Hours	31-42

¹ For both options, at least 18 credit hours must be from CSC 6XX and CSC 7XX courses, and may not include more than 6 credit hours from CSC 670.

Each program must include both theoretical and experimental topics. By graduation students will have knowledge in the areas of Programming Languages, Algorithm Design and Analysis, Theory of Computing, Operating Systems, Computer Networks, and Software Engineering. Each program is approved by the CSGC and the Department Chairman or designate. Programs may be individually tailored to meet varied backgrounds and objectives. It is recognized that there are individuals

with undergraduate degrees in other fields wishing to pursue graduate work in Computer Science, and individuals with work experience in the field wishing to advance their formal training in Computer Science.

Ph.D. in Computer Science

The Doctor of Philosophy program in Computer Science is overseen by the Computer Science Graduate Committee (CSGC). The basic guidelines for approval of a student’s program are recommendations appearing in the Communications of the Association for Computing Machinery (ACM), the professional society in Computer Science.

Prerequisites for Admission

Completion of the following courses, or their equivalents, is prerequisite to entry into the program:

CSC 120	Computer Programming I	4
CSC 220	Computer Programming II	4
CSC 314	Computer Organization and Architecture	3
CSC 317	Data Structures And Algorithm Analysis	3
CSC 427	Theory Of Computing	3
MTH 161	Calculus I	4
MTH 224	Introduction to Probability and Statistics	3
MTH 309	Discrete Mathematics I	3
Total Credit Hours		27

Students may be admitted with deficiencies; these must be completed in addition to the degree requirements.

Requirements for Graduation

Students must complete the Graduate School requirements, and the Departmental requirements described here.

Written Qualifying Exam

The student must pass a three-hour written exam of general knowledge of Computer Science at the end of the first year. Upon failure, the student may petition the CSGC to allow a second attempt at the end of the second year. The exam will be administered once a year in the early weeks of the summer session. It will cover expected knowledge of all first-year graduate students. Included in this material are a fundamental understanding of algorithm analysis and design, advanced skills in programming, basic knowledge of computer architecture, and a general understanding of computer systems.

Classroom Courses

In the first two years, the student must take eight CSGC-approved classroom courses, for a total of 24 credit hours. At least four of these courses (12 credit hours) must be CSC 7XX courses. The eight courses must include two courses from each of the areas of Analysis, Applications, and Systems. The student must work with the Director of Graduate Studies to select a cohesive set of courses as approved by the CSGC. The CSGC will have sole authority in designating the areas to which each course belongs. In the case that a course is designated in more than one area, a student may apply the course to only one area. The designation of current CSGC-approved courses appears at the end of this description.

Selecting an Advisor

By the end of the second semester, the student must find a research supervisor. By the end of the third semester, the student must have made significant progress on a research project under the supervision of a faculty member. The student must write a detailed progress report that will become a public document and shall be kept on file by the Department. The student must present the report to a quorum of the CSGC at a time to be approved by the chairman of the Department. The supervisor and CSGC must approve the project as applicable toward candidacy for a Ph.D.

Annual Presentations

After passing the written comprehensive exam, the student must make a public oral presentation to the Department at least once per year. These presentations include the thesis proposal and the thesis defense. The goals are to develop the student's oral and presentation skills, to provide a means for the Department to check the research and progress of the student, and to present the opportunity for feedback to improve the student's research.

Teaching Experience

Each student must teach a lab-based course for a minimum of one semester. Lab-based courses typically require the student to present material in a relaxed lecture format, re-emphasizing material learned in the general lecture as well as introducing new material to the students.

Approved Courses for Doctor of Philosophy

Creative Writing

<http://www.as.miami.edu/english>

Degree Programs

The Department of English offers a two-year program in fiction- or poetry-writing leading to the Master of Fine Arts degree. The program provides an opportunity for students of superior ability in imaginative writing to develop their skills and critical judgment through the practice of writing and the study of literature.

The Creative Writing Program is a member of the Associated Writing Programs.

For further information, please consult the description of the M.F.A. in English, which may be found on the English Department Web site under Creative Writing.

English

<http://www.as.miami.edu/english>

Dept. Code: ENG

Degree Programs

The Ph.D. program in English (p. 397) is an innovative scholarly course of study offering substantial work in all areas of English, American, and Transnational literature, including Anglo-Irish literature, with some opportunities for advanced work in comparative literature.

Doctoral

Doctoral Program in English

- Ph.D. in English (p. 397)

Ph.D. in English

<http://www.as.miami.edu/english>

1. Courses

Ph.D. students must complete 54 credit hours (if entering with a B.A.) or 36 credit hours (if entering with an M.A.) of 600-level courses in literature and literary theory.

2. Language Requirements

A basic reading knowledge of two foreign languages or an advanced reading knowledge of one foreign language is required.

3. Qualifying Examination

All Ph.D. students are required to pass a qualifying examination. Students may not take the qualifying examination until they have:

- completed the required Ph.D. coursework,
- satisfied the foreign language requirement
- enrolled for ENG 697.

4. Dissertation

Students may proceed with the dissertation after the dissertation committee has been appointed and the dissertation proposal has been accepted by the committee and approved by the department.

The dissertation itself must be an investigation of a substantial critical or scholarly topic. A final oral defense of the dissertation is required.

Further information on the department's graduate programs is contained in the Guide to Graduate Study available from the Department of English and posted on the department Web site in the Graduate section.

Students must complete their work within one year of the schedule set out in the Guide to Graduate Study.

Geography and Regional Studies

<http://www.as.miami.edu/geography>

Dept. Code: GEG

Introduction

Geography is the science of place and space. Geographers ask where things are located on the surface of the earth, why they are located where they are, how places differ from one another, and how people interact with the environment. There are two main branches of geography: human geography and physical geography. Human geography is concerned with the spatial aspects of human existence. Physical geographers study patterns of climates, land forms, vegetation, soils, and water. Thus, Geography links the social sciences and natural sciences.

Geographers use many tools and techniques in their work, and geographic technologies are increasingly among the most important emerging fields for understanding our complex world. They include Geographic Information Systems (GIS), Remote Sensing, Global Positioning Systems (GPS), online mapping such as Google Earth, statistics, and others.

Geographers work in many different areas, such as environmental management, education, disaster response, city and county planning, community development, and more. Geography is an interdisciplinary field that offers diverse career opportunities.

The relevance and prestige of Geography as a discipline was helped enormously during the past 20 years by four key developments:

1. the emergence of "globalization" as a phenomenon requiring analysis and explanation;
2. the increasing recognition of space and place in cognate social and physical sciences;
3. deepening concern for nature-society interactions and issues of environmental sustainability and development; and,
4. the development of geographic information systems (GIS and GIScience) and remote sensing technologies and their widespread adoption by organizations in both the public and private sectors.

In recognition of the importance of these developments, UM Geography emphasizes three major orientations in its M.A. program:

1. environmental analysis,
2. globalization and urban change, and
3. developmental studies

This program provides students with an understanding of the main streams of geographical thought and familiarizes them with research design issues, including quantitative and qualitative research

methodologies, survey research, remote sensing, and computer mapping and GIScience. Students also are provided with a range of Geography courses at the 500 and 600 levels, and are able to take two courses, if they so choose, in cognate disciplines outside Geography

Educational Objectives

The MA Program in Geography offers specializations in areas such as:

- Geographic Information Systems and Remote Sensing
- Global Health and Medical Geography
- Urban Geography and International urbanization
- Environmental Studies
- International and Regional Development

Geography offers courses on the Middle East, Africa, South America and other areas

Geography offers courses that provide training in indispensable skills for everyone entering the present-day labor market:

- Research Methodology
- Statistics
- Computer Cartography
- Geographic Information Systems (GIS)
- Remote Sensing of the Environment

Degree Programs

The Department of Geography offers a Master's program and a Graduate Certificate in Geospatial Technology. For more information on the M.A. program, please contact Dr. Richard Grant at rgrant@miami.edu or visit the Geography Department's web page at www.as.miami.edu/geography (<http://www.as.miami.edu/geography>). For more information on the Certificate Program, please contact terghazar@miami.edu.

Other

Internship Credit Hour

Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center. Upon approval, 3 to 4 credit hours may be earned with an internship. These credit hours will be included in the fulfillment of major requirements (GEG 535).

Certificates

Certificate in Geography and Regional Studies

- Graduate Certificate in Geospatial Technology (p. 398)

Graduate Certificate in Geospatial Technology

This Certificate Program is designed to benefit students who seek to enhance their skills in geospatial technologies, especially Geographic Information Systems (GIS) and satellite remote sensing. Students will be exposed to standard software tools used in the industry, as well as satellite image data. Students who earn the Certificate will enhance their employment prospects and/or advance their careers in geospatial technology, particularly in job settings that stress the use of satellite remote sensing and vector-based GIS.

The Certificate requires a minimum of 15 credit hours, including three core courses and two or more electives completed with at least a C grade in each course. Students may also receive up to 6 credit hours toward the certificate for past course work completed at UM or other accredited colleges and universities within the past 3 years.

GIS Certificate Program Core Courses		
GEG 691	Introduction to GIS (Geographic Information Systems) for graduate students	3.00
GEG 692	Advanced Environmental Remote Sensing	3
GIS Certificate Program Electives		
Select 6 credit hours of the following:		6
GEG 280	Introduction to Cartography and Computer Mapping	
GEG 301	Topics in Geography (when offered as a GIS topic)	
GEG 491	GIS and Environmental Modeling	
GEG 680	Introductory Quantitative Methods for Geographical Analysis.	3
GEG 635	Internship in Geography	1-4
GEG 625	Advance independent study in geography I	1-6
GEG 645	Advanced Independent Study in Geography II	1-6
GEG 685	Advanced Cartography	3
GEG 695	Web Gis	3
GEG 681	Advanced Spatial Statistics	
Total Credit Hours		24-37

Note that all courses from the Certificate Program can be double counted toward the MA degree.

Students are encouraged to find a suitable internship experience with the Career Planning and Placement Center or with the GIS Program Director. Upon approval by the GIS Program Director, 3 to 4 credit hours may be earned with an internship (GEG 635).

For more information e-mail terghazar@miami.edu to make an appointment.

Geological Sciences

<http://www.as.miami.edu/geology>

Dept. Code: GSC

Degree Programs

A 5-year B.S./M.S. degree allows qualified entering freshmen to complete a B.S. in Geological Science and a M.S. in Marine Geology and Geophysics within 5 years.

The B.S. degree in Geological Sciences is offered through the Department of Geological Sciences in the College of Arts and Sciences.

The Master of Science (M.S.) degree in Marine Geology and Geophysics is offered through the Division of Marine Geology and Geophysics in the Rosenstiel School of Marine and Atmospheric Science (RSMAS).

Undergraduate requirements are listed under the B.S. degree.

By the spring of their Junior year students should have obtained a graduate faculty advisor, selected an approved topic for research, and begun work on their senior thesis as preparation for the M.S. In the senior year, students will increase their focus on graduate courses and work closely with their graduate faculty advisor.

Contact Dr. Harold Wanless at the departmental office (305-284-4253) for more information.

History

<http://www.as.miami.edu/history>

Dept. Code: HIS

Degree Programs

Requirements for the M.A. Degree in History

Admissions

We are looking for applicants with a record of outstanding achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master's degree from an accredited institution may apply for admission to the doctoral program. Students with a bachelor's degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from applicant's former professors.
4. Recent Graduate Record Examination scores on the General Test.
5. TOEFL scores (for international students).
6. Official transcripts.
7. A detailed statement from the student indicating:
 - a. the student's background and education;
 - b. the student's interests (field, topic, etc.);
 - c. why the student wants to pursue a graduate degree in history at the University of Miami;
 - d. what the student plans to do with the degree upon completion. This statement constitutes a very important part of the application review process and should indicate the student's understanding of the professional nature of the training that the student is about to begin.
8. A representative writing sample.

Deadlines

January 5: Applications for admission and aid for Fall semester.

Committee

Upon admission to the master's program in history, the student is assigned a provisional major advisor. An advisory committee of three, including the major advisor and a faculty member representing the student's secondary field, must be formed no later than the student's second semester in the program. There are then two options for completing the masters. One requires 27 credit hours of coursework and an exam. The other requires 21 credit hours of coursework, a master's thesis (6 thesis credit hours), and an exam. In the case of both options, one member of the committee may be from a cognate discipline, but this is not required. It is the responsibility of the student and the advisor to form the committee and to notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student's course of study and progress in the program. The advisory committee also administers the oral comprehensive exam that is given in the case of either option. In the case of the second (thesis) option, the advisory committee and the thesis committee are usually, but not necessarily, composed of the same faculty members.

Requirements

- 27 credit hours at the 600 level or above, of which at least 18 must be at the 700 level or above.
- Passage of an oral exam in two fields.
- Completion of HIS 721 (Historiography). This course is normally given in the fall semester. All students are required to take the Historiography course in their first year.
- Students may, if they wish, write an M.A. thesis. Students who elect this option should consult with their advisor. Any student writing a thesis should register for 6 credit hours of HIS 810, which count toward the 27 required credit hours.
- Language Requirements: Students must demonstrate a reading knowledge in at least one foreign language. Reading knowledge in additional languages may be required by the major advisor. See under Ph.D. requirements for more information on fulfilling language requirements.
- The student must apply for graduation in his or her penultimate semester (i.e. fall semester for spring semester).
- The comprehensive examination for the M.A. degree in history is an oral examination in two fields that will normally not exceed two hours. Though the exam is in two fields, all members of the advisory committee will participate. Students selecting the thesis examination should expect questioning on the thesis as well as their fields during the examination. For such students the comprehensive will also act as a thesis defense.

Fields

See Requirements for the Ph.D.

Doctoral

Doctoral Program in History

- Ph.D. in History (p. 399)

Ph.D. in History

Admissions

We are looking for applicants with a record of outstanding academic achievement and evidence of potential success in graduate studies, attributes which can be measured in various ways such as grades, recommendations, written work, and test scores. Students with a master's

from an accredited institution may apply for admission to the doctoral program. Students with a bachelor's degree only and with very strong credentials may be admitted into the doctoral program. Applicants must meet the admissions requirements set by both the graduate school, which are listed in its materials, and the department of history.

Because one of the strengths of our program is a close working relationship between faculty members and students, we cannot always accept qualified applicants when no one in the department can provide the guidance they need in their area of interest. Applicants should explore the listing of faculty on our website and contact the DGS or relevant faculty members if they have any questions.

The complete application contains:

1. A completed application form.
2. A completed financial aid application, if seeking aid.
3. Three letters of recommendation, preferably from the applicant's former professors.
4. Recent Graduate Record Examination scores.
5. For international students, TOEFL scores.
6. Official transcripts.
7. A detailed statement from the student indicating:
 - a. the student's background and education;
 - b. the student's interests (field, topic, etc.);
 - c. why the student wants to pursue a graduate degree in history at the University of Miami; and
 - d. what the student plans to do with the degree upon completion. This statement constitutes a very important part of the application review process and should indicate the student's understanding of the professional nature of the training that the student is about to begin.
8. A representative writing sample.

Admission from M.A. to Ph.D. Status

Students admitted at the master's level who are performing well in their studies are encouraged to proceed to Ph.D. status. Advisors who believe that a student should be admitted to the Ph.D. program, and have the consent of the student, inform the DGS of this desire early in the spring semester and at least before the annual departmental meeting reviewing graduate students' progress. The request is then reviewed by the department at its annual meeting for recommendation to the graduate committee. Students who move from the M.A. to the Ph.D. program are eligible for the same number of years' aid as students entering the Ph.D. program directly from the B.A., minus the years of aid they have already received. For course requirements, see below.

Deadlines

January 5: Applications for admissions and aid for Fall semester.

Committee

Upon admission to the program, the student is assigned a provisional major advisor. As noted above, students should then concur or select a different advisor by the beginning of the second semester in the program. An advisory committee of four or five, including the major advisor and faculty members representing the second and third fields, must be formed no later than the student's third semester in the program. It is the

responsibility of the student and the advisor to form this committee and notify the DGS of its composition. The major advisor chairs the advisory committee and oversees the student's course of study and progress in the program. The advisory committee will also administer the oral and written comprehensive examinations. Students may change advisor and other committee members throughout the program provided that the faculty member(s) selected agree(s).

Requirements

1. Requirements:
 - a. For students entering the Ph.D. program with a B.A., 45 credit hours (5 semesters) of graduate coursework at the university of Miami.
 - b. For students entering the Ph.D. program with a masters from another university, at least 27 credit hours (3 semesters) of graduate coursework at the University of Miami.
 - c. For students entering the Ph.D. program with a Masters from another program at the University of Miami, at least 27 additional credit hours (3 semesters) of graduate coursework at the University of Miami.
 - d. For students entering the Ph.D. program with a Masters from the History department at the University of Miami, 24 additional credit hours of graduate coursework (to conform to a Graduate School requirement) at the University of Miami.
 - e. All doctoral students are expected to take their comprehensive exams no later than their 6th semester in the History Graduate Program at the University of Miami.
2. Completion of HIS 721, included in the above number of credit hours. All students are required to take the Historiography course in their first year.
3. Completion of HIS 701 and HIS 702(the two-semester Research Seminar), included in the above number of credit, at least once. Typically, students take HIS 701 and HIS 702 in their 2nd and 3rd semesters in the program.
4. Passage:
 - a. Passage of a major field in written and oral exams.
 - b. Passage of a 2nd field in written and oral exams.
 - c. Passage of a 3rd field in written and oral exams.
5. Following completion of course credit hours, students will need to take sufficient dissertation research credit (HIS 830 if before the comprehensives have passed; HIS 840 after the comprehensives have been passed) to reach a total of 60 credit hours beyond the B.A. in order to receive the doctorate. Graduate School rules require that students take a minimum of 12 dissertation credit hours. Students who enter the Ph.D. program with an M.A. from another university or from another program at the U. of M. receive 30 credit hours towards the 60 credit hour requirement.

The required credit hours of coursework are only the formal minimum. Although course work is necessary preparation for the comprehensive examination, students are examined on the mastery of fields of knowledge rather than courses. The number of courses taken depends on the student's background, choice of fields, nature of related work, language skills, etc. Courses should be selected only after consultation with the Major Advisor.

Incompletes

All incompletes from the fall semester must be made up by the official end of the following spring semester. All incompletes from the spring semester must be made up before the official start of the subsequent fall semester. No student will be allowed to proceed to exams until all incompletes have been made up.

Languages Requirement

Reading knowledge of at least one foreign language is required. More than one foreign language may be required if the major advisor deems it necessary. The Modern Languages and Literatures Department administers examinations in the languages that it teaches and offers preparation courses in a handful of languages. Students may contact the DGS for the various options for taking courses in foreign languages. Students must, in conjunction with their advisor, prepare a plan that specifies how they will demonstrate language proficiency. The language requirement must be completed before a student can take the comprehensive examinations (see below).

Comprehensive Examinations

It is the responsibility of the student and major advisor to organize the comprehensive examinations. Students may take them at any time of the year that classes are in session. Arrangements for the exams, including selection of their dates and a final list of committee members, should be made by the end of the first month of the semester in question, with notification to the Department Chair and DGS.

The student takes the written part of the examinations in three history fields, which are normally administered over a period of two successive weeks. The portion for each field is four hours in duration. Only after the advisory committee deems that the student has successfully passed the written portions for each field is the student permitted to take the oral part of the examination.

The oral section covers the three history fields and is approximately two hours in duration. The prospectus may form part of the discussion, but the examination will focus on coverage of the fields. The committee consists of at least three faculty members.

The student advances to candidate status after passing the comprehensive examinations and submitting an acceptable dissertation prospectus.

Students who have not already received a master's degree from the University of Miami will be awarded an M.A. upon successful completion of their doctoral comprehensive exams.

Dissertation

After passing the examinations, students form a dissertation committee. This may be the original advisory committee, but it may also be revised to meet the needs of the dissertation work. The students, in consultation with the Major Advisor, put forward the names of individuals suggested to serve on the dissertation committee. The committee must be comprised of at least three members within the department and one outside the department. The committee is then approved and appointed by the dean of the graduate school.

The dissertation must make a significant contribution to the candidate's field of specialization. It must meet the highest standards of research,

substance, and form, and demonstrate an ability to conduct and report independent and original scholarly investigation.

The student must apply for graduation in his or her penultimate semester (i.e. fall for spring semester).

Upon completion of the dissertation and its tentative approval by the dissertation committee, the student takes a final oral examination that is a "defense" of the dissertation and that lasts for approximately two hours. It is open to the university community. Following the defense of the dissertation, the dissertation committee will render its decision to accept or reject the dissertation. Approval of the dissertation must be indicated by the signature of all members of the dissertation committee.

Fields

Chronological/Geographical fields:

- Medieval Europe
- Early Modern Europe
- Modern Europe
- Early American History
- Modern U.S. History
- Colonial Latin America
- Modern Latin America
- East Asia
- Russia
- Africa
- Caribbean

Topical Fields. These must cover either two of the geographic or two of the temporal fields listed above.:

- African Diaspora
- Race and Ethnicity
- Gender and Sexuality
- History of Religion
- History of Science and Medicine
- History of Crime and Law
- Political History
- Diplomatic History
- Urban and Environmental History
- Economic History
- Business History
- Labor History
- History of Sport
- Military History
- Cultural and Intellectual History
- Public History
- Atlantic World

Customized Fields:

Students may create their own fields in consultation with their advisory committee. The student opting for this approach must file a plan of study listing relevant courses, the faculty member(s) involved, and the rationale.

To pursue the individualized concentration, the student must obtain written approval of the plan by the major advisor, DGS, and the Department Chair.

The plan and signed approvals are placed in the student's file. With rare exceptions, a customized field may not be the major field of study.

International Administration

<http://www.miami.edu/maia>

The Master of Arts in International Administration (MAIA) program offers a comprehensive graduate degree designed to prepare students for careers in the administration of International public and private organizations. Career options include government, multinational corporations (MNCs), non-governmental organizations (NGOs), as well as the for-profit sector. Unlike conventional "international affairs" programs, MAIA equips graduates with both operational skills and a solid conceptual background to produce theoretically capable practitioners. The degree is awarded by the College of Arts and Sciences.

MAIA is an interdisciplinary program which collaborates with faculty members from twelve (12) University departments. Drawing from the best academic resources of the University of Miami and from highly skilled professionals, students receive instruction in areas such as diplomacy, geopolitics, economics, finance, religion, communication, political science, management, public health, and international studies. The program allows students to select an area of specialization to complement their professional goals. Concentration options include International Business, Public Health, Strategic Communications, Geographical Information Systems, Security Management, and a General Track. Together with a thorough co-curricular professional development itinerary and an internship component students emerge with the expertise needed to further their career in a vast array of exciting fields.

For additional program information and a complete list of MAIA faculty and staff, please visit us at www.miami.edu/maia (<http://www.miami.edu/maia>).

Dual Degree Program: MAIA/MPH

The Master of Arts in International Administration/Master of Public Health (M.A.I.A./M.P.H.) degree is offered jointly by the University of Miami College of Arts and Sciences and University of Miami Miller School of Medicine's Department of Public Health Sciences. The MAIA degree with a second master's degree in public health is designed for students who seek an in-depth knowledge of public health with a broader emphasis in globalization and health, international health, international health policy and international development. Students enrolled in this joint program can expect to complete both degree requirements within two and a half (2.5) years.

Masters

Masters Program in International Administration

- M.A. in International Administration (p. 402)

M.A. in International Administration

Core Requirements

- Six (6) core courses are required of all MAIA students.
- Students then complete the degree with three (3) graduate-level electives/nine (9) credit hours, which may be chosen from among other UM graduate offerings.
- Finally, all MAIA students must enroll in and complete a practicum, details of which are described below.

The core courses are taught in an integrated fashion, designed to give students the maximum learning experience.

In the core courses, students will

1. **develop skills in writing, speaking, and numerical and historical analysis**
2. **learn how to collect, interpret and report social, political, and economic data**
3. **increase skills in methods of research and communications**
4. **master strategic and tactical thinking and negotiation**
5. **build practical and theoretical knowledge in international relations, international economics, intercultural communication, and administration in an international context**

Core Courses		
IGS 612	International Administration	3
IGS 614	World Affairs	3
IGS 613	World Cultures, Religions and Communications	3
IGS 616	Administration of Organizations	3
IGS 615	International Economics for MAIA	3
IGS 611	International Organizations	3
IGS 617	Practicum in International Administration ¹	3
Total Credit Hours		21

¹ The purpose of the practicum is to give students the opportunity to apply academic theory and acquired skills in international administration under real world conditions. Students are expected to complete the practicum with a minimum time commitment of at least two-hundred (200) hours. Participation in the spring clinics with topics ranging from public speaking to human resources are an integral component of the course. A final report/case study analysis is required as part of successful completion of the practicum. A fuller guide to the practicum and the requirements for the practicum is provided to students by the MAIA Office.

Other Requirements for Graduation

In addition to completing thirty (30) credit hours at the graduate level, which must include the six (6) required core courses, the practicum course and nine (9) elective credit hours, students must satisfy the following additional program requirements.:

- Co-curricular Seminars in information technology (IT) which includes training in the statistical software SPSS as an introduction to program evaluation/assessment methodology, as well as seminars in diplomatic protocol, media relations, budgeting for non-profits, public speaking, and public policy analysis.

- The accounting and taxation seminars are a two (2) day, non-credit hour workshop that covers key subjects essential to successful budgeting and financial control for nongovernmental organizations and other not-for-profit companies. It is taught by a professional financial manager and is offered once a year.
- MAIA students must demonstrate proficiency in a second language prior to graduation. They are tested by staff and faculty with the Intensive Language Institute of the Division of Continuing and International Education. If students need additional language training after the testing result, they will be recommended to enroll in non-credit hour language courses to attain the necessary proficiency.

All MAIA students must complete their degree with three (3) graduate level elective courses or nine (9) elective credit hours. Electives must be approved by MAIA directors and students are encouraged to use the electives to create a specialization in either a function or regional area.

International Studies

<http://www.as.miami.edu/international-studies/>

Dept. Code: INS

Degree Programs

The Department of International Studies offers interdisciplinary social science programs leading to the Ph.D. and MA degrees. Ph.D. and MA programs offer advanced students the opportunity to study issues such as globalization, democratic governance, comparative and international political economy, post-Cold War conflicts and security threats, and new forms of civil society mobilization in world politics. To organize the study of these debates in the social sciences, the Department offers three fields of specialization:

- **International Relations:** international relations theory; globalization; social movements beyond the nation-state; security studies; peace and conflict studies; international law and organization; international political economy; foreign policy analysis, global public health, and related fields.
- **Comparative Politics:** theory and methods of comparative analysis; authoritarian and democratic political regimes; democratic governance and citizenship, comparative political economy; contentious politics and social movements; civil-military relations; and appropriate courses on selected regions, such as the European Union, Latin America, or the Post-Soviet countries.
- **International and Comparative Political Economy:** the politics and institutions regulating the global trade, investment, and financial regimes; comparative international development; the politics and economics of international environmental regimes; democracy, partisan politics, and global governance, the domestic and international distributive impacts of globalization; and international economic theory.

Masters

Masters Program in International Studies

- M.A. in International Studies (p. 403)

Doctoral

Doctoral Program in International Studies

- Ph.D. in International Studies (p. 403)

M.A. in International Studies

The Department's MA program prepares students for careers in international diplomacy, business, trade and finance, for service in government and non-governmental organizations and international institutions, and with the necessary degree and academic training to enter a doctoral program. The requirements include:

- Complete ten semester courses (30 credit hours).
- Complete two graduate courses on social science methodology.
- Complete one core seminar in one of the Program's fields of study, including:
 - International Relations;
 - Comparative Politics;
 - International and Comparative Political Economy.
- Pass a foreign language examination.
- Thesis and Non-thesis options: MA candidates with a cumulative grade point average of at least 3.5 may opt to write a thesis; all students have the option of completing the degree by writing two research papers in lieu of the thesis.

See the *INS Graduate Student Handbook* for a complete description of the requirements for the MA degree.

Ph.D. in International Studies

The Department's Ph.D. program's primary objective is to prepare a select group of highly qualified doctoral students for careers in academic teaching and research. The requirements include:

- Complete a total of 66 degree credit hours (12 semester courses) to obtain the Ph.D. degree (i.e., 36 credit hours at the doctoral level beyond the MA degree).
- Complete one seminar on quantitative methods and one seminar on qualitative methods in the social sciences.
- Complete a sequence of two core seminars in two of the Program's three major fields of study:
 - International Relations;
 - Comparative Politics; and
 - International and Comparative Political Economy.
- Pass
 - a. written MA exam in one of the Program's three fields of study and
 - b. written and oral examinations in two of the Program's three fields of study.
- Complete at least one of the basic core seminars in the third (non-examination) field.
- Complete the Doctoral Workshop.
- Successfully defend a dissertation proposal/prospectus.
- Pass a foreign language examination.
- Complete 12 dissertation credit hours.
- Research, write and orally defend a dissertation that makes an original contribution to knowledge.

See the *INS Graduate Student Handbook* (<http://www.as.miami.edu/international-studies/the-academic-program/graduate/doctorate-phd/#d.en.30372>) for a complete description of the requirements for the Ph.D. degree.

Latin American Studies

<http://www.as.miami.edu/las/graduate/master-of-arts-program/>

Dept. Code: LAS

MA in Latin American Studies

- The Master of Arts in Latin American Studies is a 30 credit hour interdisciplinary degree characterized by a high degree of flexibility in allowing students to create a course of study focused on Latin American and the Caribbean that serves the interests of the student. Combining core courses offered by the program with a large variety of courses combined with departments, programs, and units throughout the University of Miami, the program offers tremendous diversity in courses available for credit hour towards this degree. This encourages students to combine course offerings from around the university into a cohesive course of study that enables specialization in an area, topic, country, theme, or issue of their choosing and thus to tap into the many resources available at the University of Miami for students with a passion for Latin America and the Caribbean.
- The program consists of two core Latin American and Caribbean seminars, two regional fundamentals, and a minimum of three additional seminars to be taken as electives. Students will also be required to take one research methods course at the 600-level.

LAS 601	Interdisciplinary In Latin American And Caribbean	3
LAS 602	Research Design in Latin American Studies	3
Two Regional Fundamentals courses		6
Three electives from the list of LAS designated or combined courses (600-level or above)		9
One research methods course in the discipline of the student's specialization		3
LAS 810	Pre-candidacy thesis credits ((students must enroll in two semesters of this 3-credit course))	6
Total Credit Hours		30

- Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida) rather than a specific country focus.
- Electives may be taken from any pre-approved combined or core LAS courses at the 600-level or above, or from other courses approved by the academic director.
- A Research Methods course may be chosen from any available and accessible Research Methods courses available at the University of Miami, but must be appropriate to the course of study chosen by the student and requires approval of the academic director. Under special circumstances, the research methods requirement may be waived with the prior approval of the academic director.
- Students are required to write a master's thesis, create an equivalent capstone project, or pass a comprehensive exam. The latter two options require the approval of the academic director. For each of

these options, a committee consisting of at least three members is required. Students who opt for the comprehensive exam will take one more elective in the place of the Research Methods course and enroll in 6 credit hours of LAS 697, rather than LAS 810.

- **Students must demonstrate advanced language competence in Spanish, Portuguese, Haitian Creole, or French by passing a course taught in the target language at the 600-level or above, or by passing a language competency exam.**
- With approval from the academic director, students may also take their elective credit hours with Latin Americanists in other Schools such as Communication, Law, Business, or Marine Sciences.
- Students who are simultaneously enrolled in a certificate program (other than GIS) at the University of Miami may double-count courses between the certificate program and the Master of Arts in Latin American Studies, with approval of the academic director. In select cases (such as methods courses), seminars and courses at the 600-level that do not specifically target Latin America or the Caribbean, but for which the final project or paper produced by the student is focused on Latin America may be counted towards the Master of Arts in Latin American Studies, subject to the approval of the academic director.

- M.A./M.P.H Dual Degree in Latin American Studies and Public Health (p. 406)

B.A./ M.A. in Latin American Studies

FILAS (Fellows in Latin American Studies)

In this highly selective Honors Program, students follow a rigorous, accelerated curriculum to complete a dual degree (B.A./M.A.) in Latin American and Caribbean Studies in five years. The program provides exciting collaborative research, travel, and work opportunities.

Working with UM's world-class faculty in various academic disciplines, *FILAS* participants design individualized curricula. In addition to the regular general education course requirements of the College of Arts and Sciences, *FILAS* students choose one focus track for their most advanced courses: Social Sciences, Literature & Culture, Communication,

Environmental Studies, Public Health, or History. For broad-based, multi-disciplinary preparation, students choose courses that focus on Latin America and the Caribbean from the following categories (at least ten of these courses must be taken at the Master’s level):

CAS GENERAL EDUCATION REQUIREMENTS		
English Composition ¹		6
ENG 105	English Composition I	
ENG 106	English Composition II	
Mathematics, Computing & Statistics ²		3
Second Language ³		
Writing Across the Curriculum ⁴		
Cognates ⁵		9
Advanced Language Proficiency in Spanish, French, Portuguese, or Haitian Creole		3
Select one of the following:		
FRE 203	Advanced French	
HAI 201	Intermediate Haitian Creole I	
POR 202	Intermediate Portuguese II	
SPA 203	Advanced Spanish	
Secondary Language Competence in another Latin American or Caribbean Language		3
Select one of the following:		
FRE 105	Accelerated Elementary French	
HAI 102	Elementary Haitian Creole II ((or equivalent))	
POR 105	Beginning Portuguese for Spanish Speakers	
SPA 105	Accelerated Elementary Spanish	
FILAS Specific Requirements		
Select one gateway seminar in Latin American Studies		3
Select two History courses		6
Select two International Studies courses		6
Select two Economics courses		6
Select two advanced Languages and Literatures courses (SPA, POR, FRE, or HAI)		6
Select seven courses in Study Abroad		21
Select one course as Internship in Latin America		3
Select five courses above the 300-level (third-year) in a range of disciplines		15
Select ten courses in one focus track		30
MA Phase Requirements		
GRE Exam in Semester 7 or 8		
LAS 601	Interdisciplinary In Latin American And Caribbean	3
LAS 602	Research Design in Latin American Studies	3
Select two Regional Fundamentals courses		6
Select four electives from approved LAS or combined courses		12
LAS 810	Pre-candidacy thesis credits (students must enroll in two semesters of this 3-credit course to fulfill this requirement.)	6
Total Credit Hours		150

- ¹ Certain AP/IB scores may be used to fulfill the Composition requirement as credit. If Transfer students transfer one of the two above, but not both, they may take ENG 208 to complete the requirement. ENG 105 must be taken unless exempted by SAT/V or ACT/V scores (does not include credits).
- ² MTH 108 or higher. Unless exempted by AP/IB, or UM placement test. UM placement test does not include credits. Prerequisites must be met before enrolling in MTH courses.
- ³ Students must take at least three credits in a language other than English at the 200-level or higher. Prerequisites may be required. Courses taken in order to meet this requirement, including necessary prerequisite courses to the 200 level courses, cannot be used in cognates seen below. **FILAS students already fulfill this requirement when completing the language requirements cited below.**
- ⁴ Degree candidates must complete at least four writing courses, and at least one such course must be in the student’s major discipline.
- ⁵ Typically, students must complete a minimum of three cognates, one from each of the three areas of the University curriculum: Arts & Humanities; People & Society; and Science, Technology, Engineering & Mathematics. A cognate is a minimum of 9 credit hours, however it can be more. Each major/minor fulfills the cognate requirement in one Area of Knowledge. **However, FILAS students must complete only the STEM Cognate as the FILAS program fulfills the Arts & Humanities and People & Society cognates. To avoid additional course credits, please select a STEM Cognate that includes a Natural Science course to concurrently fulfill this CAS general education requirement. According to the Collage of Arts & Sciences, "three credits must be earned from one of the following departments: Biology, Chemistry, Ecosystem Science & Policy (only ECS 111, 112, or 202), Geological Sciences, Marine Science (except MSC 313 and 314), Physical Science, or Physics. APY 203 and GEG 120 may also count. These credits may double count with any other requirement, e.g., courses in the STEM cognate."**

FILAS students also write a Master’s Thesis based on an original research project. In addition, they must defend the thesis and present their findings at the LAS Annual Student Symposium.

FILAS Admission Requirements

- SAT1 composite score of 1360 or ACT 31.
- Top 10% of high school graduating class.
- Regular Application for Admission to the University of Miami. We recommend students submit their applications by November 15.
- Recommendations from three high school teachers.
- Statement of interest in *FILAS*, emphasizing prior language or area study
- To continue through the graduate level (MA Phase), students must maintain at least a 3.4 GPA and take the GRE Exam.

M.A. Dual Degree in Latin American Studies and Journalism

<http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/journalism/>

Offered in the multicultural setting of Miami, a focal point for Caribbean Basin economic, political, immigration and communication flows,

the School of Communication and College of Arts and Sciences have designed this joint degree program focusing on cross-cultural and international journalism. Students leave the university after four semesters and a summer with two M.A. degrees in hand, one in Journalism and the other in Latin American and Caribbean Studies. This specialized course of study is for students who wish to enter careers in journalism and communication specializing on the issues, economies, and peoples of Latin America and the Caribbean region. Sustainable economic development, immigration, social justice and human rights, the environment, international business, and U.S.-Latin American relations are just some of the areas in which students may specialize in an individually tailored course of study anchored by a core of fundamentals. Because this is a joint offering, 18 credit hours are shared between the two M.A. programs.

MA in Journalism Required Courses

First Year		Credit Hours
Fall		
Select one of the following (based on availability)		3
JMM 611	Newswriting and Reporting Seminar	
JMM 615	Writing and Reporting Across Platforms	
LAS 601	Interdisciplinary In Latin American And Caribbean	3
LAS 603	Program Seminar in Latin American Studies and Caribbean Studies	3
JMM 610	Comparative Media Systems	3
Term Credit Hours:		12
Spring		
JMM 625	Advanced Newsgathering and Writing Seminar	3
JMM 699	Advanced Projects and Directed Research	1-6
LAS 602	Research Design in Latin American Studies	3
LAS 604	Interdisciplinary Topics in Latin American and Caribbean Studies - Travel Course.	3
Term Credit Hours:		10-15
Summer		
LAS 605	Internship in Latin American and Caribbean Studies	5
Term Credit Hours:		5
Second Year		
Fall		
COM 601	Theories of Communication	3
COS 645	Intercultural Communication: International Perspectives	3
LAS 640	Special Topics in Latin American and Caribbean Media and Communication	3
JMM 654	Writing for Publication	1-3
LAS 810	Pre-candidacy thesis credits	3
Term Credit Hours:		13-15
Spring		

JMM 614	Media Law and Ethics Seminar	3
JMM 654	Writing for Publication	1-3
LAS 603	Program Seminar in Latin American Studies and Caribbean Studies	3
LAS 810	Pre-candidacy thesis credits	3
Term Credit Hours:		10-12
Total Credit Hours:		50-59

M.A. Dual Degree in Latin American Studies and Public Health

<http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/medicine-and-public-health/>

Miami is the gateway to Latin America. As such we recognize an urgent need for public health professionals with the training and expertise needed to meet the growing public health challenges both in Latin America and the Caribbean. This program is designed to train students for a career in public health with a focus on social policy, health management and health care in Latin America and the Caribbean, as well as expatriate communities in the United States.

Average Program Duration: 2 years, 5 semesters
Number of required credits: 54 (+6 for non-native speakers)

The Curriculum

The total requirements for the MPH/MALAS program are 60 credits. These requirements include 30 MPH credits, 12 MA in LAS credits, 6 elective credits, 6 culminating/capstone credits and 6 language credits (for non-native speakers):

Language Requirements (6 credits)

Students must demonstrate advanced language competency in Spanish, French, Portuguese, or Haitian Creole. Students may establish proficiency by passing two courses taught in the target language at the 500-level or above, or by passing a language competency exam. A major indigenous language of Latin America may be substituted for either Spanish or Portuguese. Students may petition for a waiver of examination if they have gained language competency in another manner (i.e. native speaker, upper division coursework in target language, Peace Corps service, IB credits or Defense Language Proficiency Test).

MPH Core Courses (18 credits)

EPH 600	Introduction to Public Health	3
EPH 601	Medical Biostatistics I	3
EPH 620	Health Education and Behavior	3
EPH 621	Fundamentals of Epidemiology	3
EPH 631	Public Health Administration	3
EPH 641	Integrated Aspects of Environmental Health	3

MPH Electives (12 credits)

Select 4 from the following:		
EPH 612	Global Health	3
EPH 614	Global Outbreak	3

EPH 639	Ecology and Control of Vector-Borne Diseases	3
EPH 640	Urban Environment and Public Health	3
EPH 644	Fundamentals of Program Evaluation	3
EPH 647	Community-based Participatory Research	3
EPH 650	Health Economics for Evaluation and Policy	3
EPH 671	Maternal and Child Health	3
EPH 651	Research Methods	3

LAS Core Courses (12 credits)

LAS 601	Interdisciplinary In Latin American And Caribbean	3
LAS 602	Research Design in Latin American Studies	3
Select two other LAS courses in consultation with the Academic Director.		6

Regional Fundamentals in Latin America Electives (6 credits)

Six credits worth of Regional Fundamentals in Latin America must be taken. These electives may be chosen from appropriate offerings in LAS, INS, POL, HIS, APY, or GEG. Regional Fundamentals are those courses that have a clear regional or sub-regional focus (e.g. Andean Region; the Caribbean; South America; Central America; Southern Cone; Brazil; South Florida) rather than a specific country focus. For this joint degree, we will require that the six credits of electives in POL, LAS, INS, APY, GEG, or HIS be used to meet this requirement. The LAS Academic Director may approve courses from other departments.

Culminating Experience (6 credits)

EPH 680	Practical Field Experience	3
LAS 810	Pre-candidacy thesis credits	3
OR		
LAS 697	Readings for the Comprehensive Exam	3

M.A. in Latin American Studies with GIS Certificate

<http://www.as.miami.edu/las/graduate/joint-master-of-arts-programs/gis/>

- The Master of Arts in Latin American Studies with GIS certificate is a 30 credit hours interdisciplinary degree characterized by a high degree of flexibility in allowing students to create course of study focused on Latin American and the Caribbean that serves the interests of the student, while allowing students to focus on obtaining specific skills in geographic Information Systems (GIS). Combining core courses offered by the program with a large variety of combined courses offered by departments, programs, and units throughout the University of Miami, the program offers a tremendous diversity in courses available for credit hour towards this degree. This enables students to combine course offerings from around the university into a cohesive course of study that allows specialization in an area, topic, country, theme, or issue of their choosing and thus to tap into the many resources available at the University of Miami for students with a passion for Latin America and the Caribbean.

- The GIS option allows students to work towards a graduate certificate in GIS through the department of Geographic and Regional Studies while working towards their Master of Arts in Latin American Studies.

- Required courses for this program are:

LAS 601	Interdisciplinary In Latin American And Caribbean	3
LAS 602	Research Design in Latin American Studies	3
GEG 691	Introduction to GIS (Geographic Information Systems) for graduate students	3.00
GEG 692	Advanced Environmental Remote Sensing	3
GEG 693	Intermediate GIS	3.00
Select three electives in LAS		9
LAS 810	Pre-candidacy thesis credits ((Students must enroll in two semester of this 3-credit course))	6
Total Credit Hours		30

- The 6 credit hours in LAS 810 will consist of a GIS capstone project with a focus on Latin America, the Caribbean, or South Florida. Students will require a three-member committee to oversee the capstone project. A group project may be allowed with approval of the academic director.

Liberal Studies

<http://www.as.miami.edu/mals>

Dept. Code: MLS

Degree Programs

The Liberal Studies program is founded on an interdisciplinary approach to issues and questions central to the history and development of human culture. It is designed to provide a broad understanding of these issues and questions through a focused and systematic program of study drawing upon faculty from various disciplines in the humanities, the social sciences, and the basic sciences.

For further information regarding this program, please write to:

Master of Arts in Liberal Studies Program
125-G Memorial Classroom Building
Coral Gables, FL 33124-2302
Call 305-284-6731 and/or email mals@miami.edu

Masters

Masters Program in Liberal Studies

- M.A. in Liberal Studies (p. 407)

M.A. in Liberal Studies

The Master of Arts in Liberal Studies degree requires 24 credit hours, plus a 6 credit hour thesis **OR** an additional 6 credit hours of coursework and a representative portfolio. In addition all students are required to participate in the MALS Writing Seminar. The curriculum is drawn from three core courses as well as additional courses designed for MALS students. Students may select from other graduate level courses with the approval of the director.

For the program with a thesis, a candidate must complete a minimum of 30 credit hours on the graduate level which includes:

- Three 3 credit hour core courses.
- 15 approved graduate credit hours.
- 6 credit hours for thesis.

For the program without a thesis, a candidate must complete a minimum of 30 credit hours on the graduate level which includes:

- Three 3 credit hour core courses.
- 21 approved graduate credit hours.
- A portfolio representative of works completed.

Mathematics

<http://www.math.miami.edu>

Dept. Code: MTH

Degree Programs

The Mathematics Department offers graduate degree programs leading to the:

- Master of Arts (p. 408)
- Master of Science (p. 408)
- Doctor of Philosophy (p. 408)

Prerequisites and requirements for these degrees are described on the program pages:

Masters

Masters Programs in Mathematics

- M.A. in Mathematics (p. 408)
- M.S. in Mathematics (p. 408)

Doctoral

Doctoral Program in Mathematics

- Ph.D. in Mathematics (p. 408)

M.A. in Mathematics

<http://www.math.miami.edu/>

1. Prerequisite:

- A minimum of 9 credit hours in mathematics courses numbered 200 and above is required.

2. Requirements:

- A total of 30 credit hours must be earned; at least 18 credit hours of which are in mathematical courses numbered 600 or above. These courses must include at least one of the following year-long sequences:

MTH 613 & MTH 614	Partial Differential Equations I and Partial Differential Equations II	6
MTH 615 & MTH 616	Ordinary Differential Equations and Dynamics and Bifurcations	6

MTH 624 & MTH 625	Introduction to Probability Theory and Introduction to Mathematical Statistics	6
MTH 631 & MTH 632	Topology I and Topology II	6
MTH 633 & MTH 634	Introduction to Real Analysis I and Introduction to Real Analysis II	6
MTH 661 & MTH 662	Abstract Algebra I and Abstract Algebra II	6

All courses from other departments must be numbered 700 or above, be pertinent to the teaching of secondary school mathematics, and be approved by the graduate committee.

- A three-hour written examination covering the material in one of the year-long sequences listed above.

M.S. in Mathematics

<http://www.math.miami.edu/>

1. Prerequisite:

- A minimum of 15 credit hours in mathematics courses numbered 200 and above is required.

2. Requirements:

- A total of 30, 33, or 36 credit hours in approved courses must be earned, depending on whether at least 15, 12-14, or 9-11 credit hours, respectively, are in mathematics courses numbered 700 and above.
- A minimum of 24 credit hours must be earned in mathematics courses.
- At least two of the following basic sequences are required.:

MTH 631 & MTH 632	Topology I and Topology II	6
MTH 633 & MTH 634	Introduction to Real Analysis I and Introduction to Real Analysis II	6
MTH 661 & MTH 662	Abstract Algebra I and Abstract Algebra II	6

- Three written exams, at least two of which are on the basic sequences of the above list, must be passed.

Ph.D. in Mathematics

<http://www.math.miami.edu/>

The following requirements are in addition to the general requirements for the Doctor of Philosophy Degree as described by the Graduate School (see section on Doctor of Philosophy elsewhere in this Bulletin).

- A minimum of 36 credit hours must be earned in mathematics courses numbered 700 and above.
- All four basic sequences or their equivalents are required.:

MTH 733 & MTH 734	Real Variables and Real Variables	6
MTH 735 & MTH 736	Complex Variables and Complex Variables	6
MTH 741 & MTH 742	Algebraic Topology and Algebraic Topology	6

MTH 761 Abstract Algebra & MTH 762 and Abstract Algebra	6
Total Credit Hours	24

3. Preliminary and three written qualifying exams must be passed. Of these written exams, two must be from the above basic sequences; the other may be another from the basic sequences or in the candidate's area of specialty.
4. A proficiency in one of the languages French, German, or Russian must be demonstrated.

Modern Languages and Literatures

<http://www.as.miami.edu/ml>

Dept. Codes: ARB, CHI, FRE, GER, ITA, MLL, POR, SPA

Degree Programs

The Ph.D. in Romance Studies offers concentrations in French (<http://www.as.miami.edu/ml/graduate/french-graduate-studies>) and Spanish (<http://www.as.miami.edu/ml/graduate/spanish-graduate-studies>) with emphases on literary and cultural production, and the critical study of language. The program is designed primarily to prepare students for careers as university professors and research scholars. Students develop advanced language, teaching, and research skills that lend themselves to other professions, as well. A variety of geographic, temporal, and theoretical concentrations allow students to carry out innovative and interdisciplinary research projects, often with a transnational focus.

While developing professional competency in their major research fields through an intensive study of canonical works in French and/or Spanish, students also engage in comparative Africana Studies, Arabic Studies, Brazilian Studies, Caribbean Studies, Francophone Studies, German Studies, Iberian Studies, Italian Studies, Latin American Studies, and combinations thereof.

The program's strong theoretical component grounds student research in a range of areas, including: aesthetics, bilingualism, digital humanities, early modern studies, film studies, gender studies, (im)migration studies, indigenous studies, performance studies, postcolonial studies, queer studies, subaltern studies, sociolinguistics, theatre studies, and women's studies.

Students are required to develop competency in a cognate field related to their intellectual pursuits, leading to the dissertation topic. Recent examples of cognate specialization include anthropology, communication studies, film studies, history, philosophy, musicology, and sociology.

The department offers two graduate certificates to prepare students beyond their specialization, which may be fulfilled with course electives:

- Graduate Certificate in Second Language Acquisition and Teaching (<http://www.as.miami.edu/ml/graduate/pedagogical-training>)
- Early Modern Studies Concentration (<http://www.as.miami.edu/media/college-of-arts-and-sciences/content-assets/modern-languages/documents/EarlyModernStudiesConcentration.pdf>), an interdisciplinary certificate offered in conjunction with English and History

For additional information on teaching and research opportunities, faculty, program policies and application requirements, visit <http://www.as.miami.edu/ml/graduate/>.

Admission Requirements

The Department of Modern Languages and Literatures accepts applications to the Ph.D. program for Fall admission only from students holding (or completing at the time of application) B.A. or M.A. degrees in a related discipline. Please note that the Department does not admit students who seek terminal M.A. degrees.

The deadline to apply for the 2016-17 academic year is December 15, 2015. All applicants will be considered for Departmental TAs and University-wide fellowships.

Applications must include the following materials:

1. A completed application form, including a detailed statement of purpose. (Applications are only accepted through this link: http://www.miami.edu/gs/index.php/graduate_school/apply/apply_online/).
2. A Graduate Assistantship application.
3. Three **substantial** letters of recommendation (typically, 1-2 pages). Be sure to provide each recommender with this PDF cover sheet: <http://www.as.miami.edu/media/college-of-arts-and-sciences/style-assets/images/ml/RecommFormGradAdmission.pdf>. Alternatively, applicants may use the CollegeNet interface to have recommenders submit their letters online.
4. GRE scores mailed directly from ETS testing agency to the Department of Modern Languages and Literatures at the address below (optional if you hold an M.A. degree and **do not wish** to be considered for fellowships. We strongly recommend that you submit GRE scores. Domestic and international students can send GRE and TOEFL scores to our Department with these codes:
 - a) 5815 (University of Miami);
 - b) 2603 (Department of Modern Languages and Literatures/French);
 - c) 2608 (Department of Modern Languages and Literatures/Spanish).
5. International students without BA or MA degrees from a U.S. Institution should have TOEFL (<http://www.toefl.org>) scores mailed directly from the testing agency to the Department of Modern Languages.
6. Official transcripts from all colleges/universities attended and listed in the application. Transcripts from international institutions should be accompanied by an official translation to English.
7. A research paper (typically 15-20 pages) in English.
8. A research paper (typically 15-20 pages) in the proposed language of study.
9. Application fee of \$65.00.

Printed materials should be sent to:

Graduate Program Admissions
Department of Modern Languages & Literatures
University of Miami
P. O. Box 248093
Coral Gables, Florida 33124-4650
FAX: 305-284-2068

For questions, consult the Graduate Program website (<http://www.as.miami.edu/ml/graduate/>) or contact the Department at: grad.mll@mail.as.miami.edu.

MLL encourages African American and Hispanic applicants to pursue McKnight Doctoral Fellowships, which are supplemented by the UM College of Arts and Sciences to match the Departmental stipend amount. (Applicants must be U.S. citizens). Applications are due on 15 January of each year and are available online at: www.fefonline.org (<http://www.fefonline.org>). In case of any difficulty submitting the online application, applicants should contact the FEF webmaster at webmaster@fefonline.org or call 813-943-7578 for assistance. For additional information, please contact the Florida Education Fund at (813) 272-2772.

Doctoral

Doctoral Program in Modern Languages and Literatures

- Ph.D. in Romance Studies (p. 410)

Ph.D. in Romance Studies

Basic Program Requirements:

The requirements set out below for the Ph.D. in Romance Studies are minimum requirements. The Graduate Studies Committee, Director of Graduate Studies, and individual advisors may set additional requirements.

- The requirements:
 - for students entering on the "five - year plan" (with a B.A. or M.A., see below), passing satisfactorily a minimum of 45 credit hours in approved courses;
 - for students entering on the "four - year plan" (with an M.A., see below) passing satisfactorily a minimum of 36 credit hours in approved courses;
- Passing MLL 611, MLL 601, and a minimum of 3 graded credit hours in each of the following areas:

French
Middle Ages and/or 16th Century
17th and/or 18th Century
19th and/or 20 - 21st Century
Francophone Studies
Spanish
Middle Ages and/or Golden Age
18th-19th-Century Spain and/or 20 - 21 st Century Spain
Colonial Latin America
19th-Century Latin America
20th and 21st -Century Latin America

For students whose focus in the program is on critical sociolinguistics, a minimum of nine graded credit hours in courses focused on topics of language analysis, and 9 graded credit hours from any of the areas of literature indicated above, all chosen in consultation with the faculty advisor (18 credit hours total).

Note: Ordinarily, students will take **at least** two graduate courses in the department each semester.

- In addition to proficiency in English and the major language of study, demonstrating the following:
 - reading knowledge of two other languages, or
 - holistic knowledge of one other language (for example, by passing the equivalent of a course at the 300-level;

Note: Appropriate languages of study will be determined in collaboration with the student's advisors (e.g. Latin American literature students may be encouraged to study Portuguese; students of Early Modern literature may be encouraged to study Italian, etc.)
 - if areas of specialization include Medieval Early Modern and/or Colonial Latin America. students must demonstrate reading knowledge of Latin.
- Passing a breadth exam. Depending on the student's interests, the exam shall consist of three parts, according to one of the following configurations:
 - one geographic region over three periods;
 - two geographic regions over two or three periods;
 - two geographic regions over one or two periods AND one area of critical sociolinguistics;
 - two areas of critical sociolinguistics AND one geographic region over one period.
- Passing a qualifying exam, on an approved topic. The exam includes three general approaches that focus on literature, or sociolinguistics, theory, and a cognate discipline (e.g. history, sociology, art, film, etc.).
- Successfully defending a dissertation prospectus.
- Completing and defending satisfactorily a dissertation.
- Satisfying the requirements of the Graduate School as stated in the *Bulletin*.

Philosophy

<http://www.as.miami.edu/phi>

The Department offers a program of graduate study leading to the Doctor of Philosophy (Ph.D.) degree. Students who enter without an M.A. and who fulfill the relevant requirements are awarded the M.A. degree as they work towards the Ph.D., but we have no stand-alone M.A. program. The Ph.D. program is specifically designed to prepare students for careers as professional teachers and researchers in philosophy, not only by way of coursework and research supervision, but also through professional mentoring and opportunities for philosophical development both inside and outside the classroom. Further information about the program and how to apply can be found on our web page.

Each entering student is assigned a mentor from among the faculty, and faculty members lead professional development seminars on such topics as teaching, preparing work for publication, and preparing for the job market. A dedicated placement director work with each student to maximize their success at securing good post-graduation employment.

The Department prides itself on providing an inclusive, friendly and congenial atmosphere for doing philosophy, with many opportunities for informal interaction among students and faculty including workshops, conferences, colloquia and post-colloquium dinners and the Miami Forum. (These are described in detail under "Departmental life".)

Masters

Masters Degree in Philosophy

- M.A. in Philosophy (p. 411)

Doctoral

Doctoral Program in Philosophy

- Ph.D. in Philosophy (p. 411)

M.A. in Philosophy

1. Course requirements

Satisfactory completion of a minimum of 45 course credit hours in philosophy, at least 21 of which must be at the 700 level (not including the Proseminar). Students are required to pass the following courses:

Proseminar	
PHI 701	Proseminar (First Semester)
PHI 702	Proseminar (Second Semester)
Logic Requirement	
PHI 611	Formal Logic
Ethics Requirement	
Select one of the following:	
PHI 631	Ethical Theory
PHI 634	Political Philosophy
Epistemology and Metaphysics	
Select one of the following:	
PHI 642	Epistemology
PHI 646	Evidence and Knowledge in Medicine
PHI 647	Mind and Language
PHI 648	Induction, Probability, and Scientific Method
PHI 649	Metaphysics
History	
Select one of the following:	
PHI 660	History of Logic
PHI 662	History of Ethics
PHI 670	Presocratics and Plato
PHI 672	Aristotle and Hellenistic Philosophy
PHI 673	Medieval Philosophy
PHI 674	Early Modern Philosophy
PHI 677	Kant
PHI 681	Pragmatism
PHI 683	The Phenomenological Tradition

In some cases certain course requirements may (with the approval of the director of graduate studies) be waived for students who have completed equivalent work as part of a prior M.A. degree in philosophy.

2. Qualifying examination

A comprehensive qualifying exam must be taken. Exams are given the grade of 0, 1 or 2. A grade of 1 or 2 is sufficient for the student to be awarded the MA. The student is provided with a reading list in their intended area of specialization. The student studies the material on the reading list, writes a paper of 7,000–10,000 words on a topic

central to this material, and participates in an oral defense of the paper as it relates to the reading list.

- Satisfying the requirements of the Graduate School as stated in this Bulletin.

Ph.D. in Philosophy

1. Course requirements

Satisfactory completion of a minimum of 45 course credit hours in philosophy, at least 21 of which must be at the 700 level (not including Proseminar). Students are required to pass the following courses:

Proseminar	
PHI 701	Proseminar (First Semester)
PHI 702	Proseminar (Second Semester)
Logic Requirement	
PHI 611	Formal Logic
Ethics Requirement	
Select one of the following:	
PHI 631	Ethical Theory
PHI 634	Political Philosophy
Epistemology and Metaphysics	
Select one of the following:	
PHI 642	Epistemology
PHI 646	Evidence and Knowledge in Medicine
PHI 647	Mind and Language
PHI 648	Induction, Probability, and Scientific Method
PHI 649	Metaphysics
History	
Select one of the following:	
PHI 660	History of Logic
PHI 662	History of Ethics
PHI 670	Presocratics and Plato
PHI 672	Aristotle and Hellenistic Philosophy
PHI 673	Medieval Philosophy
PHI 674	Early Modern Philosophy
PHI 677	Kant
PHI 681	Pragmatism
PHI 683	The Phenomenological Tradition

In some cases certain course requirements may (with the approval of the director of graduate studies) be waived for students who have completed equivalent work as part of a prior M.A. degree in philosophy.

Research Requirement: In addition, students are required to enroll in and complete 15 credit hours of PHI 830.

2. Qualifying examination

A comprehensive qualifying exam must be taken. Exams are given the grade of 0, 1 or 2. A grade of 0 or 1 is considered a failing grade with respect to qualifying to continue in the PhD program. A student must receive a grade of 2 in order to proceed to the dissertation stage. The student is provided with a reading list in their intended area of specialization. The student studies the material on the reading list, writes a paper of 7,000–10,000 words on a topic central

to this material, and participates in an oral defense of the paper as it relates to the reading list.

Students can apply for Ph.D. candidacy after they have completed their coursework, received a mark of high pass on the qualifying examination and had their dissertation proposal approved.

3. The language requirement

A student who submits a dissertation proposal must possess the linguistic proficiency required by the proposed dissertation topic. This is determined by the dissertation proposal committee on the basis of examinations or coursework.

4. Ph.D. dissertation

Presentation and oral defense of an acceptable dissertation.

5. The requirements of the Graduate School as stated in this Bulletin

Physics

<http://www.physics.miami.edu>

Dept. Code: PHY

Degree Programs

All graduate students in physics must plan their entire program with the advice and approval of a departmental advisor.

The program of graduate studies in physics emphasizes research work, but also includes teaching experience as an essential element. Research and thesis opportunities are at present available in the fields of astrophysics and cosmology, atmospheric and ocean optics, biological physics, complexity, condensed matter physics, elementary particle theory, plasma physics.

Doctoral

Doctoral Program in Physics

- Ph.D. in Physics (p. 412)

Ph.D. in Physics

In addition to the general requirements for graduate degrees, the Physics Department makes the following specific requirements.

1. Submission of scores on the Graduate Record Examination (Aptitude Test and Advanced Test in Physics) with the application for admission.
2. A minimum of 24 physics course credit hours at the 500-600 level are required for the PhD.
3. The following specific courses, or their equivalent, are required for the PhD degree:

PHY 640	Classical Mechanics II	3
PHY 660	Quantum Mechanics and Modern Physics I	3
PHY 661	Quantum Mechanics and Modern Physics II	3
PHY 723	Statistical Mechanics I	3
PHY 752	Electromagnetic Theory I	3
PHY 753	Electromagnetic Theory II	3
PHY 770	Quantum Theory I	3
PHY 771	Quantum Theory II	3

Select three additional physics lecture courses at the 600 or 700 level	9
Total Credit Hours	33

4. For the M.S. degree no more than 3 credit hours for reading courses may be counted, and no more than 2 credit hours of seminars. Up to 6 credit hours may be earned in thesis work for this degree.
5. The physics department offers a comprehensive graduate examination each year. A passing grade at an appropriate level is required for either the M.S. or the Ph.D. A student is required to take the exam each year and is allowed two attempts toward a passing grade.
6. Courses taken outside the department should be relevant to the students' program and approved by the graduate advisor.
7. Students are required to participate in research at the earliest opportunity. Specifically, upon passing the written graduate examination and before the end of the following semester, the student is required to select a faculty member who consents to serve as the student's Ph.D. thesis advisor. Student and thesis advisor are to form, in a timely fashion, a dissertation committee to review an oral presentation of the student's initial research activities and future plans. Should a student need to select a new thesis advisor, this selection must be made without delay, and the review process must be repeated.
8. Renewal of financial support from the department is contingent, each semester, upon satisfactory performance of teaching duties and research activities, and upon timely progress towards completion of all requirements for the Ph.D. degree.

Political Science

<http://www.as.miami.edu/mpa>

The MPA program is designed to prepare students for a career of public service. Students will be exposed to the essential components of public service professionalism—excellence in technique, ethics and leadership—to help meet the challenges in the years ahead. Our award-winning, student-oriented faculty is dedicated to helping you achieve this “professional edge” in small, stimulating seminars, convenient evening courses, super-modern facilities and we have an excellent record in placing graduates.

Masters

Masters Program in Political Science

- M.P.A. Masters in Public Administration (p. 413)
- M.P.A./M.P.H. Second Master's Degree in Public Health (p. 413)

Joint

Joint Program in Political Science

- J.D./M.P.A. Joint Degree Program (p. 412)
- MPH/MPA Joint Program (<http://www.as.miami.edu/mpa/about-the-program/dual-mpamph-program>)

J.D./M.P.A. Joint Degree Program

The joint program allows students to obtain both JD and MPA degrees in four years. The program is designed to prepare law school students for

government, political and nonprofit legal positions. The first year is spent in the Law School and years two through four are spent taking both Law and MPA courses.

To be admitted to this program, students must apply separately to both programs. Students may apply to the MPA program prior to beginning law school or anytime during the first or second year of law school. Students may begin the MPA program in the fall, spring or summer semesters. For further information contact the Department of Political Science at 305-284-2401 or the Law School at 305-284-5535.

M.P.A. Masters in Public Administration

The requirements for the Masters in Public Administration degree are:

1. 36 to 48 credit hours at the graduate level, depending on government management experience and academic preparation.
2. Completion of core and specialized track course requirements as specified by the POL Department in consultation with the student's career goals and interests.
3. An option exists for those students who wish to complete in five years their Bachelor's degree and a Master of Public Administration. Contact POL Department for details.
4. All other requirements as stated in sections Requirements for the Master of Arts Degree and General Information.

M.P.A./M.P.H. Second Master's Degree in Public Health

The Master of Public Administration/Master of Public Health combines programs from the College of Arts and Sciences and the School of Medicine and is designed for students who seek an in-depth knowledge of management and public policy administration with training in public health.

It is possible for full-time students to complete the requirements for both degrees requirements within two and one-half years.

Interested students must apply and be accepted by both Departments. For further information, contact the Department of Political Science at 305-284-2401 or the Department of Epidemiology and Public Health at 305-243-6759.

Online M.P.A

Information on the Online M.P.A. degree program and the admission requirements can be obtained at <http://info-online.miami.edu> or by calling 1 888 988-5983.

Psychology

<http://www.psy.miami.edu>

Dept. Code: PSY

Complete details about the Psychology Graduate Program, including description of our three graduate divisions (Adult, Child, and Health), faculty research interests, and admission requirements, can be found at our website listed above.

Doctoral

Doctoral Program in Psychology

- Ph.D. in Psychology (p. 413)

Ph.D. in Psychology

1. The principal goal of the graduate program in Psychology is that of preparing the student for a career contributing to the growth of scientific knowledge in psychology.
2. Applicants for admission to graduate status in psychology shall have
 - a. a minimum average of B over-all
 - b. at least 18 credit hours of psychology that must include courses in Introductory Psychology, Statistics, and Experimental Psychology or Research Methods.
 - c. Students lacking the necessary preparation must ordinarily make up deficiencies prior to admission to the Graduate School.
3. All applicants must present the Graduate Record Examination (Aptitude Tests; Advanced Test in Psychology preferred). In all cases admission to graduate degree programs in Psychology is competitive, since available resources do not permit admission of all qualified applicants.
4. The Ph.D. programs are categorized into three Divisions: > *Health Psychology* (including Health Clinical Psychology, Behavioral Medicine and Behavioral Neurosciences) *Child Psychology* (including Clinical Child Psychology, Pediatric Health Psychology Applied Developmental Psychology) *Adult Psychology* (including Adult Clinical Psychology) All Ph.D. programs in Psychology require a minimum of 72 credit hours, including thesis and dissertation credit hours.
5. PSY 680 and PSY 681 will not be counted toward the 72 credit hour minimum.
6. A Master of Science in Psychology based upon 24 credit hours of course work and 6 credit hours of Master's thesis research is required in all programs.
7. In cases in which a student has a prior graduate degree, the number of credit hours required for the Ph.D. may be reduced at the discretion of the Department.
8. All programs in Clinical Psychology require an internship.

- All students must successfully complete:

Foundation Courses		
PSY 604	Cognition and Emotion	3
PSY 605	Cognitive Neuroscience	3
PSY 614	Diversity issues in psychology	3
PSY 620	Developmental Psychology	3
PSY 625	Social Psychology	3
PSY 640	Adult Psychopathology	3
or PSY 641	Child and Adolescent Psychopathology	
Methodological Courses		
PSY 631	Psychological Statistics, Research Methods, and Design	3
PSY 632	Multiple Regression and Multivariate Statistics	3
Select one of the following:		3
PSY 633	structural equation modeling	
PSY 634	Hierarchical Linear Evaluation	

PSY 698 Seminar in Quantitative Psychology	
Total Credit Hours	27

- A minimum grade average of B is required for all students.
- All students seeking an advanced degree in Psychology must participate substantially in the teaching of course offerings in the Psychology Department as an essential part of their education.

Sociology

<http://www.as.miami.edu/sociology>

Dept. Code: SOC

Graduate Program Overview

The Graduate Program in Sociology at the University of Miami is designed to equip students with the theoretical, methodological, and analytical tools required for research and teaching. The Graduate Program in Sociology is designed for students seeking the Doctor of Philosophy (Ph.D.) in Sociology. The Master of Arts (M.A.) degree is earned during the first portion of the program. At the doctoral level, graduate students are encouraged to choose two concentrations from three substantive areas:

- Criminology,
- Race & Ethnic Relations, and
- Medical Sociology.

Although the strengths of the department lie within these major programmatic fields, students may also develop a course of study that meets unique research interests and career objectives. Assistantships and Fellowships are awarded each academic year to cover tuition and living expenses.

For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department (www.as.miami.edu/sociology/ (<http://www.as.miami.edu/sociology/>)).

Masters

Masters Program in Sociology

- M.A. in Sociology (p. 414)

Doctoral

Doctoral Program in Sociology

- Ph.D. in Sociology (p. 414)

M.A. in Sociology

A M.A. in **SOCIOLOGY** requires:

- A minimum of 31 credit hours at the graduate level 600 of which 6 must be taken in thesis work.
- A maximum of 6 credit hours can be transferred from acceptable graduate institutions.
- 3 credit hours of course work may be earned in a related discipline. Such course selections must have prior departmental approval.
- Submission and successful defense of a thesis in accordance with current Graduate School policy.

- The completion of all other requirements stated in sections of the Bulletin that specify Requirements for the Master's Degree and General Information.
- For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department www.as.miami.edu/sociology/ (<http://www.as.miami.edu/sociology/>)
- Course work must include:

SOC 601	Classical Sociological Theory	3
SOC 604	Proseminar in Sociology	1
SOC 609	SOCIAL STATISTICS	3
SOC 610	Advanced Research Methods	3
or SOC 613	Qualitative Research Methods	
SOC 611	Advanced Sociological Statistical Analysis I	3
Select one of the following:		
SOC 615	Class Structure and Social Stratification	3
or SOC 616	Social Psychology: Sociological Perspectives	
Three additional courses ¹		9
SOC 810	Master's Thesis	6
Total Credit Hours		31

¹ These electives should include anticipated Ph.D. courses.

Ph.D. in Sociology

A Ph.D. in **SOCIOLOGY** requires:

- An M.A. or M.S. degree is required.
- A minimum of 42 credit hours beyond the M.A. or M.S. degree
- Passing two written substantive area examinations.
- The completion of a publishable-quality paper.
- Admission to candidacy.
- Written presentation and oral defense of an acceptable dissertation.
- The satisfactory completion of the requirements of the Graduate School as stated in this Bulletin.

For more details, consult the Guide to Graduate Study in Sociology available through the Sociology Department www.as.miami.edu/sociology/ (<http://www.as.miami.edu/sociology/>)

Course requirements for students **WITH** a M.A. in Sociology from UM:

SOC 602	Contemporary Sociological Theory	3
SOC 612	Sociological Statistics II	3
SOC 610	Advanced Research Methods ^{or}	3
SOC 613	Qualitative Research Methods ¹	
SOC 615	Class Structure and Social Stratification ^{or}	3
SOC 616	Social Psychology: Sociological Perspectives ¹	
SOC 622	Teaching Seminar in Sociology	3
Three courses toward a substantive area of concentration.		9
Three courses toward a second substantive area of concentration		9
Dissertation Work:		12
SOC 830	Pre-Candidacy Doctoral Dissertation ²	

SOC 840 Post-Candidacy Doctoral Dissertation	
Total Credit Hours	45

- ¹ The course taken for the Ph.D. must be different from the course taken for the M.A. degree.
- ² A maximum of 6 Pre-Candidacy Doctoral Dissertation credit hours may be taken.
- ³ In reference of the 45 total credits hours, it is anticipated that three credit hours will have been taken as electives at the M.A. level.
- ⁴ Students with an **MA** or **MS** from another institution are required to complete additional core courses as part of their program.

Research Institutes

Institute for the Study of Quality in Manufacturing and Service

The University of Miami Institute for the Study of Quality in Manufacturing and Service (UMISQ) exists to advance the theory and practice of Quality Science. Its mission is to promote the improvement and innovation of quality on local, national, and international levels through the acquisition, dissemination, and application of knowledge in the areas of science, technology, and management as related to Quality Science in general, and Lean Six Sigma Management specifically.

Objectives

1. To conduct research in Quality Science and to publish its results through appropriate professional and academic outlets.
2. To educate and train management, labor, UM students, and others in the theories and practices of Quality Science in general, and Lean Six Sigma Management specifically.
3. To create internships for M.B.A. students in which they can solve real world problems using Quality Science theory and practice in general, and Lean Six Sigma management theory and practice in particular.
4. To provide a vehicle for Lean Six Sigma certifications.

The Institute pursues its objectives through involvement of faculty, students, and client organizations in all sectors of the economy.

Intelligent Computer Systems Research Institute

The Intelligent Computer Systems Research Institute is a center for research and information dissemination within the field of information business technology. The institute focuses on multi-disciplinary topics such as Big Data, Analytics, Cloud Computing, Artificial Intelligence, Machine Learning, Agent technology, 'The Internet of Things', Health and Legal Informatics, Business Intelligence, and embedded systems.

Objectives

1. To encourage partnerships between academia and industry. Corporate partners can provide data, field studies, test environments, and other resources through which leading theoretical work can be developed tested in an applied environment.
2. To conduct research for publication in leading academic and industry related journals, as well as working papers.
3. To encourage industry partners to work with students through the creation of internship positions. These internships provide students

the opportunity to act as a link between the teaching and research of the institute's members and the field based applied environment.

The Graduate Business Student Association

The Graduate Business Student Association (GBSA) is a professional and social student-run organization. All graduate business students become members once enrolled in a business master's program and are encouraged to attend meetings and events. The GBSA organizes activities and events aimed at strengthening networking within the graduate business student body and the business community and enriching the academic and social experience of its members. The GBSA is governed by a committee that consists of a president, vice president, speaker of senate, treasurer/executive secretary, director of community service, social director, and director of athletics.

Financial Assistance

Graduate Business Scholarships and Fellowships

There are a limited number of merit-based graduate business scholarships which are awarded at the time of admission to qualified full-time MBA students entering in the fall semester only. A graduate business scholarship covers a portion of tuition for the MBA degree. Graduate business scholarships are not automatically renewed.

In addition to graduate business scholarships, there are a limited number of Emery Means Findley, Jr. Fellowships and scholarships which are awarded by Graduate Business Programs to applicants with outstanding academic credentials. Any applicant who wishes to be considered for a graduate business scholarship or a fellowship, must indicate this in the space provided on the application. Awards are available to both domestic and international students.

There may be a limited number of merit/need-based scholarships which are awarded following admission to Professional and Executive programs. Details on how to apply for these scholarships are provided at the time of admission.

Donor Scholarships

Several endowed scholarships are made available to incoming graduate business students through the generosity of alumni and friends of the University of Miami School of Business Administration. These donor scholarships are for the purpose of recruiting students of high academic merit. The total number and amount of scholarship awards vary from year to year.

Scholarships will be awarded based on the recommendations of the Faculty Admissions Committee on a first come, first served basis. Since the number of scholarships is limited, students who meet the minimum criteria are not guaranteed a donor scholarship award.

We regret that a student may be ineligible for financial awards if he/she receives tuition benefits from the University of Miami or accepts any assistantship, scholarship, grant or fellowship from the University of Miami, in addition to our offer. This includes employees, their spouses, and dependents.

BANK OF AMERICA - ENDOWED BUSINESS SCHOLARSHIPS¹

Criteria: A graduate business school student based on a combination of scholarship and financial need, who will preferably specialize in Finance, Accounting, or Management.

JACK R. BORSTING - GRADUATE SCHOLARSHIP ENDOWMENT
Criteria: Outstanding candidate for a master's level business degree.

RYDER/PATRICK J. CESARANO – ENDOWED SCHOLARSHIP¹
Criteria: MBA student with a concentration in finance or management science/operations research. Based on academic excellence and financial need.

PAT & LON WORTH CROW - SCHOLARSHIP ENDOWMENT¹
Criteria: Graduate business student specializing in Finance, who possesses several years of work experience, preferably with an expressed interest in a career in banking or a banking-related field. U.S. citizen, preferably resident in South Florida community.

EMERY MEANS FINDLEY, JR. – ENDOWED GRADUATE FELLOWSHIPS IN BUSINESS
Criteria: Outstanding candidates for Graduate Business Programs.

DEAN M. FOGEL BUSINESS ENDOWED SCHOLARSHIP
Criteria: Graduate business student with financial need and priority is for a United States veteran.

ALBERT AND ESTHER GREEN ENDOWED SCHOLARSHIP
Criteria: Graduate business student with a health challenge, or student studying or working in Health Administration.

ALLAN M. HERBERT & PATRICIA M. HERBERT – ENDOWED GRADUATE BUSINESS SCHOLARSHIP¹
Criteria: Outstanding graduate business student, well-rounded, willing to finance his/her own education, and who appreciates the value of work and strives to combine study, work and extra-curricular activities.

JAMES W. McLAMORE – GRADUATE BUSINESS FELLOWSHIPS
Criteria: To recruit and retain outstanding graduate business students.

E. BRUCE MCLAUGHLIN & CYNTHIA M. SWOL - ENDOWED SCHOLARSHIP IN MARKETING¹
Criteria: Graduate business student with concentration in Marketing, who has significant work experience prior to entering the MBA program. U. S. citizen, with preference given to female students with unmet financial need.

MERRILL LYNCH & CO. FOUNDATION, INC. – FELLOWSHIPS IN INTERNATIONAL FINANCE
Criteria: Graduate business student preparing for a career in International Finance.

SOUTHEAST BANKING CORPORATION FOUNDATION – ENDOWED SCHOLARSHIPS¹
Criteria: Graduate student in the MBA program who is a Florida resident. Based on academic excellence and financial need.

SOUVIRON FAMILY SCHOLARSHIP - Annual MBA Scholarship
Criteria: The annual scholarship is for a MBA student with financial need with a preference for an Eagle Scout, if someone meets that criteria. If not, a qualified MBA student with need.

¹ Essay Required: In 300 words or less, please explain why you need financial assistance to complete your MBA degree. The essay must be included with your application.

Various other donor scholarships are available based upon need, merit, or other specified criteria.

Ziff Graduate Career Services Center

The Ziff Graduate Career Services Center's mission is to provide top quality resources and career guidance to School of Business graduate students and build strong partner relationships with the corporate community.

The Ziff Career Services Team is committed to providing each student with a personalized program and the resources and skills needed to be competitive in the marketplace.

The Ziff Career Services Team is the student's frontline resource to securing employment upon graduation. Students who engage with the Ziff Graduate Career Services Center will utilize the staff to assist them in developing an effective career strategy and personal branding effort that will prepare them for a successful job search at all levels of their career. The personal branding effort will equip the student with a strategic resume, improve their interview skills, generate contacts, develop networking opportunities, and prepare them for a successful career transition.

The Ziff Graduate Career Services Center is located in the School of Business complex on the first floor of the Jenkins Building.

A. Online Resources

The center's online portal where students find access to many of Ziff's career resources, access to all current job postings and upcoming events. Documents such as résumés and cover letters will be held in the student's site. Links on the portal include, among others:

1. **CareerLeader** – An assessment tool specifically developed for MBA students that provide expert analysis of a student's unique pattern of business relevant interests, values and abilities.
2. **Vault's Career Insider**- Provides inside information and advice on industries, companies, the job search and industry interview prep.
3. **GoingGlobal**- The leading provider of both country-specific and USA city-specific career and employment information. Features 30 Country Career Guides, 41 USA City Career guides, corporate profiles and more than 500,000 internship and job listings within the USA and around the world.

B. Registration

1. Graduate business students that are seeking employment post-graduation are required to register with the Ziff Graduate Career Center to commence their Career Management Plan
2. The registration process begins with the Pre-MBA OnBoarding Program. Students are required to complete key assignments prior to Orientation to have full access to the Ziff Career Center resources.

C. On Campus Interviews/Corporate Recruiting

1. The recruiting program begins in the fall semester from mid-September through mid-December and continues from mid-January through May
2. Ziff Graduate Center has established recruiting relationships with many local and national companies to increase exposure

for University of Miami School of Business Administration MBA graduates.

- MBA students must utilize the Ziff Graduate Services Center's Internet Employment system, www.ziffcareercenter.com, to sign up for on-campus interviews, monitor corporate presentation schedules, upload résumés and cover letters, and stay abreast of job opportunities offered by companies that are recruiting on campus.
- The Ziff Graduate Career Center regularly receives the career opportunities that are made available through www.ziffcareercenter.com (<https://sba-miami-csm.symplicity.com/students>) to students and alumni alike so they can review career opportunities listed with the center.

D. Internships

- The School of Business Administration encourages students to augment their classroom experience through participation in a summer internship. Internships in the Fall and Spring semesters are also encouraged if the student can accommodate one in their schedule.
- The internship is a key positioning element for the post MBA-career. The internship search should be the student's main focus from the start of the first of the year.

E. Networking Contacts

- Cane Connections is an online University of Miami database that allows students to access alumni throughout the United States about their work experiences and gather other career related information. The database is a valuable network of contacts in a variety of fields. It is accessible through www.miamialumni.net.
- Students are invited to join the School of Business MBA groups on LinkedIn and Facebook, an easy way to reach out to more contacts and build their network.

F. Student Responsibility

- Ultimately, success in securing a job is defined by the student. Together with the Ziff Graduate Career Center as a partner, the student can create a successful personal branding effort that will connect him/her to a network of contacts and networking opportunities leading to interviews and job offers.
- Students are to register online with the Ziff Graduate Career Center during the Pre-MBA OnBoarding cycle. Students need to complete all pre-MBA assignments prior to Orientation in order to utilize the Ziff Center Services. Students who do not complete the Pre-MBA assignments will be opted out of the Center's resources.
- Students are to meet with a career advisor in Term One to discuss their career goals and develop a personalized career action plan/personal branding effort that will lay out the strategy and timing sequence of their goals. The career action plan and strategy will be built through numerous advising appointments and workshop events.
- Students must regularly update and revisit their résumés in an ongoing résumé review process. A new résumé must be uploaded after a summer internship is completed.
- Students will participate in mock interviews and follow through with the suggestions for improvement.
- Students are expected to visit the Ziff Graduate Career Center regularly and access www.ziffcareercenter.com to identify and attend

on-campus recruiting activities, corporate presentations, relevant workshops and MBA club sponsored events.

- Students MUST complete the exit survey and report their employment information as soon as they secure a job or internship.

The Mentor Program

- The School of Business Mentor Program is designed to enhance the classroom experience by matching students with local professionals who have experience and expertise in the students' area of career interest, or are versed in areas of professional development.
- Through personal interaction with experienced business professionals, students gain an understanding of corporate culture, career directions, and networking. Students also have the opportunity to interact with other mentors by attending regularly scheduled roundtables, hosted by the School.
- Graduate business students are encouraged to participate.
- Applications are available on our website (<http://www.bus.miami.edu/alumni/get-involved/mentor-program>).

- Master of International Business (p. 424)
- Master of Science in Management Studies (p. 430)
- Master of Science in Taxation (p. 430)

Non-Degree

- Certificate Programs:
 - Certificate in Business Administration (p. 434)
 - Certificate in Corporate Finance (online) (p. 434)
 - Certificate in Financial Decision Making Program (online) (p. 435)
 - Certificate in Accounting Practice (online) (p. 434)
- Executive Education Programs (p. 435)

Doctoral

Doctoral

The doctoral program at the University of Miami School of Business Administration links world-class faculty with accomplished PhD candidates to prepare them for careers in academic research and teaching. The PhD in Business and PhD of Philosophy in Economics programs, combine interdisciplinary study and research with one-on-one mentoring from faculty experts in your area of interest.

Doctorate of Philosophy in Business

Doctor of Philosophy in Business

The PhD in Business program combines interdisciplinary study and research. It is designed to prepare students for careers in academic research and teaching. Students follow specialized programs of study under the guidance of faculty experts. In addition, they have the opportunity to participate in cross-disciplinary training. The curriculum will also equip students with the skills and experience necessary for academic placement in the world's top research universities.

A minimum of 60 credit hours are required to earn the PhD in Business degree. The program requires year-round, full-time study in order to maximize interaction between faculty and students. Students are expected to interact and begin research projects with the faculty upon entering the program.

The requirements for the PhD in Business degree are the same as those listed in the general section (p. 374).

Students may choose to concentrate their study in:

- **Accounting**
- **Finance**
- **Management Science**
- **Marketing**
- **Operations Management**
- **Organizational Behavior**
- **Strategy/International Business**

Required "Prerequisite" Courses

(These must be completed prior to admission or in the summer prior to commencing doctoral studies.)

- one year of college
- one course in linear algebra
- one introductory statistics course

Required "Core" Courses

(These courses can be waived by consent of the appropriate department; waiver is granted by issuing transfer credit hours for similar courses taken at the advanced graduate level at accredited institutions.)

There are two streams of "core" courses for students, each comprising of five courses.

Stream I

(Accounting, Finance, Management Science, Marketing-Quantitative, and Operations Management)

ECO 533	Advanced Microeconomic Theory	3
ECO 521	Graduate Macroeconomic Theory	3
ECO 520	Econometrics	3
ECO 620	Advanced Econometrics	3
ECO 512	Mathematical Economics (II)	3
Total Credit Hours		15

Stream II

(Marketing-Consumer Behavior, Organizational Behavior, Strategy/International Business)

PSY 631	Psychological Statistics, Research Methods, and Design	3
PSY 632	Multiple Regression and Multivariate Statistics	3
SOC 610	Advanced Research Methods	3
PSY 625	Social Psychology	3
SOC 616	Social Psychology: Sociological Perspectives	3
or ECO 533	Advanced Microeconomic Theory	
Total Credit Hours		15

Area of Concentration Courses

(These are to be decided by the student and faculty.)

In total, a minimum of 33 credit hours in concentration courses are to be taken, up to 15 of which may be satisfied by transfer-credit hours. Some Departments may require students to complete a minor field. If so, their major field must consist of a minimum of 24 credit hours (with at least 15 credit hours completed in doctoral program residence at the University of Miami). The minor field would then consist of 9-12 credit hours in an area outside of the major concentration (with a minimum of 9 credit hours taken in doctoral program residency at the University of Miami).

Dissertation Research

12 credit hours are to be taken at a minimum—two semesters of 6-9 credit hours each. No transfer credit is given for dissertation or prior research.

Total Credit Hour Requirements

In total, a minimum of 60 credit hours are required for receiving the Ph.D. degree in Business:

"Core" courses	15
"Concentration" courses	33
Dissertation research	12
Total Credit Hours	60

To this total must be added any prerequisite courses (as outlined above), with transfer- credit hours being subtracted.

Admissions Requirements

- Application Form
- Application Fee of \$65.00
- GPA of B+ or better in undergraduate and graduate (if any) coursework
- Official Transcripts, Copies of Diplomas and/or Certificates
- Strong quantitative skills, as demonstrated through GMAT/GRE scores and prior coursework
- Potential to conduct and publish high-quality original research
- Official TOEFL Score Report (international students only)
- Three Letters of Recommendation
- Statement of Purpose
- Resume

A master’s degree is not required; but an undergraduate degree (in any discipline) is required.

A stipend and tuition-waiver package will be available to qualified PhD applicants.

Doctorate of Philosophy in Economics

Doctorate of Philosophy in Economics

The Ph.D. program in Economics prepares the recipient for a variety of research-oriented career opportunities, including university research/teaching, government employment, and a host of employment opportunities in the private sector.

All Ph.D. students are required to complete 60 credit hours.

2 courses in one Major field	6
A field is comprised of either two related courses in one of the Major economic disciplines, e.g. international trade, or two courses in related disciplines, e.g. health economics and labor economics.	
1 course in a Minor field	3
1 Field/Elective course	3
Dissertation	12
Total Credit Hours	60

Applicants for admission to graduate study in Economics should have an extensive background in Economic Theory and Quantitative methods.

All Doctor of Philosophy students must take:

Core Courses		
ECO 512	Mathematical Economics (II)	3
ECO 521	Graduate Macroeconomic Theory	3
ECO 533	Advanced Microeconomic Theory	3
ECO 520	Econometrics	3
ECO 620	Advanced Econometrics	3
ECO 625	Applied Econometrics	3
MTH 533	Introduction to Real Analysis I	3
ECO 633	Advanced Micro Analysis	3
ECO 634	Advanced Micro Analysis II	3
ECO 621	Advanced Macro Analysis	3
ECO 603	Monetary Theory and Policy	3
Fields of Specialization		
Select two of the following Areas of Concentration:		6
Macroeconomics:		
ECO 603	Monetary Theory and Policy	
ECO 604	Topics in Applied Macroeconomics	
Financial Economics:		
ECO 604	Topics in Applied Macroeconomics	
ECO 625	Applied Econometrics	
Human Resource Economics:		
ECO 511	Labor Economics (II)	
ECO 611	Labor Economics (III)	
Environmental Economics:		
ECO 625	Applied Econometrics	
ECO 645	Regulations Economics	
Cognate Areas with Departmental Approval		
Electives		
Select one Elective from the graduate offerings of the Mathematics, Computer Information Systems, Management Science, and Finance departments		
Additional Requirements		
Comprehensive Examinations covering the core and the one field of specialization		
Doctoral Dissertation		12
Total Credit Hours		51

To be considered for admission, all applicants must:

1. score a minimum of 158 on the quantitative section of the Graduate Record Examination,
2. hold a baccalaureate degree from an institution of recognized standing,
3. have a GPA of B or better in undergraduate or graduate (if any) coursework,
4. submit two copies of all official undergraduate and graduate (if any) transcripts,
5. have demonstrated, by their undergraduate record, capability of completing a Ph.D. program,
6. In addition, foreign students are required to score a minimum of 94 on the internet based Test of English as a Foreign Language (TOEFL).

Required Admissions Materials

- Application Form
- Application Fee of \$65.00
- Official Transcripts, Copies of Diplomas and/or Certificates
- Official GRE scores report
- Official TOEFL Score Report (International Students only)
- Three Letters of Recommendation
- Statement of Purpose
- Resume/CV (optional)

A master's degree is not required for admissions.

Assistantships are available to qualified PhD applicants. The minimum additional requirements for consideration for an assistantship are a minimum of 150 on the verbal section and 158 on the quantitative section of the GRE and the equivalent of a cumulative "B+" GPA. The program only rarely admits students without an assistantship.

Master of Business Administration (MBA)

Full-Time MBA Programs

The University of Miami delivers full-time MBA programs that are innovative, flexible and career focused. They are designed for those who either have an undergraduate background in business, or are from other industry areas interested in a career in business. The curriculum not only prepares students for leadership in business, it adds a valuable dimension to other professions. Students become better negotiators, strategic thinkers, and more effective team players in a variety of business related situations. Programs include:

- Full-Time Two-Year MBA
- Accelerated One-Year MBA
- Accelerated MBA in Real Estate
- JD/MBA (Joint Degree)
- MD/MBA (Joint Degree)
- JD/LLM/MBA
- BArch/MBA (Joint Degree)

Accelerated MBA in Real Estate

Accelerated MBA in Real Estate

The University of Miami, School of Business Administration offers an accelerated MBA program with a concentration in real estate highlighted by two internship opportunities. Bringing together the School's strengths in management education with the strengths of the UM School of Architecture in new urbanism, the program prepares students to succeed in commercial real estate market careers. This program is designed to meet the needs of the student with an undergraduate degree in business. Applicants must demonstrate successful completion of the core business courses: Financial and Managerial Accounting, Microeconomics, Macroeconomics, Statistics, Calculus, Organizational Behavior, Operations Management, Marketing, and Finance.

To obtain detailed program curricula please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (http://bus.miami.edu/graduate-programs/full-time-mba/real-estate/index.html?utm_source=undefined&utm_medium=undefined&utm_campaign=undefined&utm_te)

BArch/MBA

The Bachelor of Architecture/Master of Business Administration is an exciting joint venture with the University's School of Business Administration, which will allow students to earn a Bachelor of Architecture as well as a Master of Business Administration. The joint degree offers students the unique opportunity to complete the two degrees in six years, saving an entire year by combining the programs.

Students will begin taking Saturday graduate level business courses during the fourth year of their architecture program. Both degrees are fully accredited by their respective accrediting bodies — the NCARB and AACSB International.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://arc.miami.edu/programs/barch-mba>).

Full Time MBA

Full-Time 2-Year MBA Program

The full-time two-year MBA Program is innovative and career focused. It is designed to meet the needs of undergraduate students who have studied in any discipline. In addition to preparing business leaders of the future, the curriculum adds a valuable dimension to those seeking to build their business acumen for a wide variety of future career opportunities.

UM's full-time MBA program is a 56 credit hour, lock-step program that is completed in less than two calendar years. Students typically enroll in elective courses during the second year of the program. Students may be able to complete a concentration based on completion of appropriate electives. In addition, students may enroll in a foreign language class, with no additional charge.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting

the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/full-time-mba/two-year-mba>).

JD/LLM/MBA

JD/LLM/MBA

Triple Degree Program: A Specialized Option for Business Majors

The University of Miami School of Law and the School of Business have created a triple degree program - a JD, an LLM in Tax or Real Property Development, and an MBA- which can be completed in just four years and two summers.

This program offers a combination of legal and business degrees to students who were undergraduate business majors. These credentials are ideal for anyone with a long-term goal of servicing top corporate clients or becoming a senior executive at a bank, real estate company, or financial institution. They also serve as significant assets in today's competitive marketplace to any attorney starting out in tax or real estate law.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/full-time-mba/jd-llm-mba>).

JD/MBA

Juris Doctor /Master of Business Administration

The University of Miami School of Law and the School of Business Administration offer a joint degree program in law and business. Upon completion of this program, a student earns the Juris Doctor degree from the School of Law and a Master of Business Administration degree from the School of Business Administration.

For students interested in this powerful, dual degree, Miami offers both a top Law School and an excellent Business School. In fact, UM's School of Business Administration not only has the world's foremost international business scholar according International Business Review, but the study also ranks the School of Business No. 20 in the world for international research, ahead of such elite institutions as Harvard University and the London Business School.

Students who apply for the joint J.D./M.B.A. program must apply to both the School of Law and the School of Business Administration. The applicant must achieve a qualifying score on the Law School Admissions Test (LSAT) and the Graduate Management Admissions Test (GMAT) for admission to the respective schools. The applicant must notify both schools that he or she is applying for the joint J.D./M.B.A. program, and in order to remain in the joint program, the student must meet minimum standards of both the School of Law and the School of Business Administration.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/>

MD/MBA

MD/MBA

The University of Miami School of Business offers a joint MD/MBA degree program in partnership with the University's Miller School of Medicine (<http://www.med.miami.edu>). The business curriculum prepares future physicians for the business complexities related to running a private medical practice or heading a group practice, and prepares medical students for careers in health sector management, leadership and policy.

The MD/MBA program adds an additional year to the four-year medical school curriculum. The MBA coursework ranges from financial reporting and corporate strategy to the legal aspects of health administration.

MD/MBA candidates have the option of choosing a Research Track (project based which provides practical hands on experience) or an Elective Track (provides business electives). Please refer to the curriculum for details.

MD students are eligible to apply to the MD/MBA program during their 3rd year of Medical School and will be required to submit a Full-Time MBA online application and the GMAT (www.mba.com (<http://www.mba.com>)) to be considered for the program.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/full-time-mba/md-mba>).

One Year MBA

Full-Time Accelerated 1-Year MBA Program

Applicants must demonstrate successful completion of the core business courses: Financial and Managerial Accounting, Microeconomics, Macroeconomics, Statistics, Calculus, Organizational Behavior, Operations Management, Marketing, and Finance. The curriculum prepares business leaders of the future, adding a valuable dimension to their education. Students beginning the program in January obtain a cross-functional MBA in lieu of a concentration.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/full-time-mba/one-year-mba>).

Executive and Professional MBA

Executive MBA and Professional MBA Programs

The University of Miami offers Executive and Professional MBA programs that are designed for accomplished professionals who are ready to take their career to the next level without interrupting their career. Participants gain insight and understanding into the business environment by gaining a more global outlook and are better equipped to meet the challenges of today's business world. They become better negotiators, strategic

thinkers, and more effective team players in a variety of business related situations. Programs include:

- Professional MBA
- Executive MBA in Health Sector Management and Policy
- Global Executive MBA in Spanish
- The Miami Executive MBA for the Americas
- The Miami Executive MBA for Artists and Athletes

Executive MBA in Health Sector Management and Policy

Executive MBA in Health Sector Management and Policy

The University of Miami Executive MBA in Health Sector Management and Policy Program prepares graduates for positions of leadership in health care and health-related organizations. The program focuses on the post-graduate educational needs of professionals already fully employed in the health care industry, as well as those aspiring to careers in the field. Combining its strengths in graduate business education and its close relationships with the South Florida health care community, the program teaches practical administrative skills as well as broad strategic and theoretical perspectives to students who wish to expand their knowledge of management and administration as applied to the health care industry.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://www.bus.miami.edu/graduate-programs/executive-mba/health-management>).

Global Executive MBA (in Spanish)

Global Executive MBA

The University of Miami's Global Executive MBA program is designed for highly experienced Spanish-speaking executives, entrepreneurs and other professionals in Latin America. The Global Executive MBA in Spanish enables participants to broaden their business knowledge, improve their management skills and strategic decision-making abilities, and expand their professional network through close interaction with a select group of business leaders from across Latin America. The UM Global Executive MBA is taught in seven, two-week sessions offering a total of 15 courses of which 13 take place on campus in Coral Gables and two abroad during a Residential Session Abroad. The courses are given in sequence; the same group of students advances together throughout the entire program. A two-week residential session abroad provides MBA students with the opportunity to gain international business perspectives, first-hand. As part of this program, students may receive lectures on pressing international business matters, meet prominent local business leaders, tour companies and manufacturing operations, and immerse themselves in a country's cultural, social, and business environment. All classes are taught entirely in Spanish, with some reading materials in English, so reading-level knowledge of English is required.

To obtain detailed program admission curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our

website (<http://www.bus.miami.edu/graduate-programs/executive-mba/global-emba>).

Professional MBA

Professional MBA

The University of Miami's Professional MBA Program is designed for professionals with three to seven years of work experience who aspire to pursue a career in business or would like to strengthen their knowledge and skills in the fundamental disciplines of business to make them successful in today's competitive environment. An international perspective is integrated into a comprehensive business curriculum exposing students to global strategic thinking and analysis. The Professional MBA Program provides professionals the opportunity to earn an MBA by attending class on Monday evenings and Saturday mornings.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bulletin.miami.edu/graduate-academic-programs/business/executive-professional-mba/professional-mba/%20http://www.bus.miami.edu/graduate-programs/professional-mba>).

The Miami Executive MBA for Artists and Athletes (hybrid)

The Miami Executive MBA for Artists and Athletes (hybrid)

The Miami Executive MBA for Artists and Athletes is an accredited track of our existing Executive MBA program which combines classroom courses and online distance learning to allow both active and retired NFL players, as well as other athletes and artists the ability to take courses while tending to their regular daily activities or business commitments. This is a very important population, many of whom are already executives familiar with branding, marketing, media and public relations. The participants in this Program would have demonstrated working in collaborative environments. They also possess a highly disciplined work ethic and perseverance to succeed. The EMBA for Artists and Athletes track builds on these daily features of life and provides a framework for participants to capitalize on their experiences and become successful managers and business leaders during and/or after their professional sports and entertainment days. These individuals have to learn to transition their playing skills into practical leadership and business skills. This EMBA track provides participants with the industry exposure and extensive network base, both key for elevating their careers and leveraging their personal brands. Similar to our other EMBA tracks, the EMBA for Artists & Athletes is lock-step in nature. Participants progress together through a sequential pattern of courses. They will obtain their MBA from UM after a successful completion of 42 credits over an 18 month period. The course curriculum is adapted from the EMBA and Professional MBA programs with some adaptations. The program structure is similar to our Global MBA Program. The EMBA track consists of 6 residencies in an 18 month period (33 credits) and the online distance learning module (9 credits) during the NFL season, for a total of 42 credits.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://www.bus.miami.edu/graduate-programs/executive-mba/emba-artists-athletes>).

The Miami Executive MBA for the Americas (hybrid)

The Miami Executive MBA for the Americas

The Miami Executive MBA for the Americas program is aimed at senior executives, primarily from Florida and Latin America, who want to further their business acumen and enhance their understanding of conducting business in the Americas. The format flexibility and length of the program will permit students to earn their MBA. The 17-month program blends face-to-face on-campus modules, which include executive presentations, case studies and group projects, with distance learning. It covers four focus areas (Global Strategy and Execution; Managing Global Operations and Decision Making; Global Multi-Cultural Leadership; and Entrepreneurship, Innovation and Technology) through eleven courses or modules, as well as an Integrated Project carried out in nine on-campus residencies and eight Inter-Residencies (distance-learning). Like our other EMBA programs, the EMBA for the Americas is lock-step in nature. Students will progress together through a sequential pattern of courses. The students will obtain their MBA after the successful completion of 45 credit hours over an 17 month period.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://www.bus.miami.edu/graduate-programs/executive-mba/emba-americas>).

Specialized Master Degrees

Specialized Master Degrees

The School of Business offers a premier catalog of master's degree programs geared toward specific career paths. Each of these full-time programs can be completed in less than one year. Students will focus on in-depth business analysis, delve into research in economics, as well as enhance their proficiency in topics like accounting, finance, and organizational leadership. A new skill-set in a specialized area will make students more valuable to their organizations and more competitive in the marketplace.

- Master of Accounting
- Master of Accounting - Accelerated
- Master of Science in Business Analytics
- Master of Arts in Economics
- Master of Science in Finance
- Master in International Business Studies
- Master of Science in Management Studies
- Master of Science in Taxation

Master in International Business

Master in International Business Studies

The University of Miami Master in International Business Studies program includes experiential learning components with a classroom curriculum focused on international business models, which expose students to the region's rich multicultural business community. The program is further distinguished by its focus on developing regional competency in each student's area of interest and the opportunity for students to participate in experiential learning activities in Miami and other locations worldwide.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/international>).

Master of Accounting

MASTER OF ACCOUNTING (MAcc) and MASTER OF SCIENCE IN TAXATION (MST)

While the programs are similar in that they offer an opportunity to concentrate in accounting, the Master of Accounting (MAcc) and the Master of Science in Taxation (MST) differ in degree of specialization and career path orientation. The MAcc offers two separate tracks in assurance and corporate accounting while the MST is designed for students interested in careers in taxation. In addition to the traditional one year of full-time study beyond the Bachelor's level, the MAcc and the MST programs are offered as accelerated programs for University of Miami undergraduates.

For admission to either the MAcc or MST, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant's undergraduate grade point average, GMAT score, grades in specific accounting courses, the rigor of the undergraduate program, and other factors such as work experience. Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami's Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score. Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting

courses. Alternatively, foreign students may attend the University of Miami's Accounting Summer Intensive Program to fulfill this requirement.

SCHOLARSHIPS

University of Miami School of Business - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

MASTER OF ACCOUNTING (MACC)

The MAcc program offers two tracks: Assurance (MAcc-Assurance) for students planning to go into public accounting and Corporate Accounting (MAcc-Corporate) for students planning careers as controllers, CFOs or financial analysts. The MAcc is designed for the student who has taken the accounting and related courses required for an undergraduate major in accounting or other undergraduate business majors who have successfully completed the Accounting Summer Intensive Program. These students should be able to complete the MAcc in a year or less provided they enroll as full time students.

Undergraduate Course Requirements

The courses listed below are undergraduate prerequisites that, unless already completed, must be fulfilled in order to be admitted for graduate study. For most graduate tax classes including ACC 648: Financial Reporting Implications of Income Taxes, the equivalent of ACC 404: Advanced Taxation (Corporate and Partnership Income Taxation) is also required. Students can satisfy this prerequisite by taking ACC 639: Income Taxation and Business Entities which is offered in a 9-day intersession format in August before the start of the fall semester. If a candidate does not have an undergraduate business degree, additional business prerequisites (economics, marketing, management, finance and others) will also be required.

ACC 211	Principles of Financial Accounting	3
ACC 212	Managerial Accounting	3
ACC 311	Intermediate Accounting I	3
ACC 312	Intermediate Accounting II	3
ACC 301	Cost Accounting	3
ACC 402	Auditing	3
ACC 403	Fundamentals of Taxation	3
ACC 404	Advanced Taxation	3
ACC 406	Accounting Systems	3

Master of Accounting—Assurance Track (MAcc-Assurance)

The program requires 30 semester hours consisting of nine required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MAcc degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

Required courses:

ACC 603	Studies in Financial Reporting Issues	2
ACC 606	Internal Auditing	2
ACC 610	Financial Reporting Research	2
ACC 611	Auditing Seminar	2
ACC 622/522	Advanced Issues in Auditing	3
ACC 630/530	International Financial Reporting Standards	1
ACC 648	Financial Reporting Implications of Income Taxes.	2
ACC 672/572	Advanced Financial Analysis	2
ACC 677	Forensic Accounting	2

In addition to the required courses, a student must take at least four of the following accounting courses.

ACC 604	Seminar in Cost Accounting	2
ACC 624/524	Accounting for Governmental and Not-for-Profit Entities	3
ACC 620	Accounting Controls in Information Technology	2
ACC 623	International Accounting and Taxation	2
ACC 640	Corporate Taxation I	2
ACC 641	Corporate Taxation II	2
ACC 664	Global Mergers and Acquisitions: Accounting and Related Issues	2
ACC 675	Compensation, Incentives and Strategic Control	2
BSL 675	Advanced Business Law	2
BSL 691	The Public Corporation: Legal Perspectives	2

Students may select their other electives from the remaining courses above or the following courses:

ACC 642	Seminar in Taxation	2
ACC 643	Tax Research	2
ACC 645	Partnership Taxation	2
ACC 647	Estates and Gift Taxes	2
ACC 649	Issues in Tax Policy	2
ACC 662	Taxation of Multinational Corporations	2
BUS 602	Critical Thinking and Effective Writing	1
BUS 603	Critical Thinking and Effective Speaking	1

BSL 692	Legal Implications of International Business Transactions	2
BSL 694	Real Estate Law	2
BTE 612	Enterprise Technologies	2
BTE 613	Business Intelligence Technologies	2
BTE 617	Information Technology Project Management	2
BTE 689	Topics in Computer Information Systems	1-3
FIN 650	Financial Investment	2
FIN 651	Advanced Topics in Investments	2
FIN 660	International Finance	2
FIN 670	Corporate Finance	2
FIN 671	Advanced Topics in Corporate Finance	2

FIN 674	Financial Analysis of Mergers and Acquisitions	2
---------	--	---

Any other electives must be selected in consultation with the Program Director.

Master of Accounting—Corporate Accounting Track (MAcc-Corporate)

The program requires 30 semester hours consisting of eight required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution. In addition to the eight required courses, students must select five courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MAcc degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

Required courses:

ACC 603	Studies in Financial Reporting Issues	2
ACC 604	Seminar in Cost Accounting	2
ACC 606	Internal Auditing	2
ACC 610	Financial Reporting Research	2
ACC 630/530	International Financial Reporting Standards	1
ACC 648	Financial Reporting Implications of Income Taxes.	2
ACC 672/572	Advanced Financial Analysis	2
FIN 670	Corporate Finance	2

In addition to the required courses, a student must take *at least five* courses from the following:

ACC 611	Auditing Seminar	2
ACC 620	Accounting Controls in Information Technology	2
ACC 622/522	Advanced Issues in Auditing	3
ACC 623	International Accounting and Taxation	2
ACC 624/524	Accounting for Governmental and Not-for-Profit Entities	3
ACC 640	Corporate Taxation I	2
ACC 641	Corporate Taxation II	2
ACC 664	Global Mergers and Acquisitions: Accounting and Related Issues	2
ACC 675	Compensation, Incentives and Strategic Control	2
ACC 677	Forensic Accounting	2
BSL 675	Advanced Business Law	2
BSL 691	The Public Corporation: Legal Perspectives	2
FIN 650	Financial Investment	2
FIN 651	Advanced Topics in Investments	2
FIN 660	International Finance	2
FIN 671	Advanced Topics in Corporate Finance	2
FIN 674	Financial Analysis of Mergers and Acquisitions	2

Students may select their other electives from courses above or the following courses:

ACC 642	Seminar in Taxation	2
ACC 643	Tax Research	2
ACC 645	Partnership Taxation	2
ACC 649	Issues in Tax Policy	2
ACC 662	Taxation of Multinational Corporations	2
BUS 602	Critical Thinking and Effective Writing	1
BUS 603	Critical Thinking and Effective Speaking	1
BSL 624	Negotiation: Theory & Practice	2
BSL 692	Legal Implications of International Business Transactions	2
BSL 694	Real Estate Law	2
BTE 612	Enterprise Technologies	2
BTE 613	Business Intelligence Technologies	2
BTE 617	Information Technology Project Management	2
BTE 689	Topics in Computer Information Systems	1-3

Any other electives must be selected in consultation with the Program Director.

ACCELERATED MASTER'S PROGRAMS

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor's level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors.

The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor's and Master's degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

Accelerated Program Timeline

1. Internship in summer after junior year.
2. Twelve credits of work in senior year will count towards the MAcc or MST degree (only students in the accelerated program are eligible to take these classes during their senior year).
3. In summer after senior year take one graduate course, CPA review course, and the CPA exam.
4. Complete remaining credits of graduate work in fall semester after senior year.

Prerequisites

The following must be completed before students begin their senior year:

- A minimum of 102 credit hours
- The following Accounting major requirements: ACC 311, ACC 312, ACC 402 ACC 403, BSL 401 and either ACC 301 or ACC404.

- All undergraduate degree requirements except for those that can be completed in the senior year. Note that MGT 401 must be taken in the final semester of the undergraduate program.
- Students that select the MAcc-Corporate track must take FIN 303 before or during their senior year.

Senior Year Curriculum

Aside from the remaining undergraduate Accounting program requirements, the program-specific curriculum for the senior year is the same for all tracks (except that students selecting the MAcc-Corporate track must complete FIN 303 in order to take the graduate finance courses required for the track) and consists of the following courses:

ACC 506	Internal Auditing	2
or ACC 572	Advanced Financial Analysis	
ACC 522	Advanced Issues in Auditing	3
ACC 530	International Financial Reporting Standards	1
ACC 648	Financial Reporting Implications of Income Taxes.	2
BSL 691	The Public Corporation: Legal Perspectives	2
BUS 602	Critical Thinking and Effective Writing	1
BUS 603	Critical Thinking and Effective Speaking	1

Students must select their track (MAcc-Assurance, MAcc-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

Summer after Senior Year

Students must take one accounting graduate course in the summer following their senior year. Accounting courses are offered based on demand and could include ACC 620, Accounting Controls in IT (offered every summer) or ACC 649, Issues in Tax Policy.

Students are also **REQUIRED** to take an approved CPA review course during the summer following their senior year. Students who do not take a CPA review course must complete an additional six graduate credits which will likely delay graduation to May instead of graduating in December.

Students are also expected to pass part, if not all, of the CPA exam during this summer.

Final Fall Semester

In the final fall semester students will complete the remaining 15 or 16 graduate credits including the requirements for their track and electives selected in consultation with the Program Director.

Admission to the Accelerated Programs

Incoming Freshmen

- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have an overall and accounting GPA of 3.3 or higher by their junior year in college. Students must then maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher to remain in the program. Students who do

not maintain the expected GPA may be placed on probation or transferred out of the program.

- Students will need to have completed 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 30 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.
- Students will need to have completed 102 credit hours by the start of their senior year including ACC 311, ACC 312, ACC 402, ACC 403, BSL 401 and either ACC 301 or ACC404.

ACCOUNTING SUMMER INTENSIVE PROGRAM

The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

Non-Accounting Majors

Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Accounting (MAcc) or Master of Science in Taxation (MST) and Summer Intensive Program. Applicants to the MAcc or MST program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate degree is not in accounting. Summer Intensive students entering the MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

Foreign Students

The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems and one semester of tax at a U.S. university accredited by the AACSB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign applicants to the MAcc program will automatically also be considered applicants to the Accounting Summer Intensive Program.

Program Schedule

The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week

program begins each year about July 1 and continues through mid-August and consists of two 3½-week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

Program Prerequisite Accounting Courses

Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

Summer Intensive Program Course Offerings

The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

ACC 632	Intermediate Accounting I	2
ACC 633	Intermediate Accounting II	2
ACC 634	Cost Accounting	2
ACC 636	Accounting Systems	2
ACC 673	Taxation for Business and Investment Decisions	2
ACC 635	Auditing	2

Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC 404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

Entering the MAcc or MST Program

Upon successful completion of the intensive program, students immediately enter the MAcc or MST program in the fall semester. To graduate with their MAcc or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

CPA LICENSURE REQUIREMENTS

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed at: <http://www.myfloridalicense.com/dbpr/cpa/licensure.html>

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam: To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods: January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor's degree in order to sit for the CPA exam.

Requirements for Licensure: In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor's degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida's 2008 legislative change also allows experience obtained in industry and academia. This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exception) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State: If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more

than two years before applying you must provide evidence of meeting continuing professional education requirements.

CPA Accreditation Requirements

The Florida State Board of Accountancy accepts degrees from schools accredited by the following associations : Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)

Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

Duplicate Courses

No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

Master of Arts in Economics

Master of Arts in Economics

The Master of Arts in Economics program provides students with the essential analytical tools and rigorous training they need to apply economic analysis to help both global corporations and government institutions achieve success. The program introduces students to several applied areas of economics and provides the required problem-solving skills to analyze economic problems.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/economics>).

Master of Professional Accounting (online)

Master of Professional Accounting (online)

The Master of Professional Accounting provides focused, accounting education meant to prepare students for a career in accounting departments of businesses/corporations. The program consists of 32 credits that will be taken over a 16-month period with start dates in August, January and May. The coursework will consist of 16 credits in basic accounting, taxation and information systems, followed by 16 credits in advanced topics including auditing and financial statement analysis and firm valuation. The courses offered in the MPrA are already taught at both the undergraduate and graduate level in accounting at the School of Business Administration. All of these courses have been taught as two-credit or three-credit courses, but will be modified, combined and packaged into four credit modules.

To obtain detailed program admission and curricula information please visit the website. (<http://www.miami.edu/online/online-degrees/masters-professional-accounting>)

Master of Science in Business Analytics

Master of Science in Business Analytics

The Master of Science in Business Analytics program is an intensive experience that develops well-trained business analysts armed with the skills necessary to understand, manage and make use of big data in a business context. Over the course of 10 months, students learn how to turn abstract data into meaningful information with which to predict consumer behavior and forecast revenue and expenses for virtually any business model and any industry sector.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/analytics>).

Master of Science in Finance

Master of Science in Finance

The Master of Science in Finance program prepares students for successful careers in corporate finance, international finance and investments, and other financial sectors. The program immerses student in a narrow course of study over the course of only 10 months. Throughout the program, students are challenged to approach real-world problems with a practical lens. When they graduate, they possess the knowledge base and sophistication to make critical financial decisions for any organization.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/finance>).

Master of Science in Finance (online)

Master of Science in Finance (online)

The Master of Science in Finance provides focused, graduate level education meant to prepare students for a professional career in finance. The program consists of 32 credits taken over a sixteen-month period beginning in August, January or May. The program includes 4 credits of fundamental coursework in accounting, finance, microeconomics and quantitative methods, 8 credits covering general business education including business analytics, operational excellence, business planning, and communications, 8 credits in more advanced finance topics, and 12 credits in the area of specialization. Currently the specializations are in Corporate Finance, including courses in financial decision making, applied corporate finance, derivatives, and financial modeling. The proposed 32-credit online curriculum waives the following 3 courses from the on-campus version of the MS in Finance, as it is geared for Working Professionals who are already expected to possess the skills covered in these courses: BUS 600/ BUS 602 Critical Thinking and Effective Writing (1 credit); BUS 603 Critical Thinking and Effective Speaking (1 credit); BUS 604 Career Development and Enrichment (1 credit). Students in the program will earn both the Certificate in Financial Decision Making and the Certificate in Corporate Finance along the way to earning their degree.

To obtain detailed program admission and curricula information, please visit the website (<http://online.miami.edu/online-degrees/masters-finance>).

Master of Science in Management Studies

Master of Science in Management Studies

The Master of Science in Management Studies program shapes students into competent, versatile and dynamic leaders ready to navigate the complex workplace of the 21st century. The program helps participants develop the interpersonal skills they need to influence others and lead effectively in today's challenging work environment. Not only does the program include coursework to provide students with a foundation of basic management skills, it includes a set of courses that focus on the skills needed to achieve performance at the highest levels possible.

To obtain detailed program admission and curricula information please reference the program brochure which can be requested by contacting the Office of Recruiting and Admissions at 305-284-2510 or visit our website (<http://bus.miami.edu/graduate-programs/specialized-masters/leadership>).

Master of Science in Taxation

MASTER OF ACCOUNTING (MAcc) and MASTER OF SCIENCE IN TAXATION (MST)

While the programs are similar in that they offer an opportunity to concentrate in accounting, they differ in degree of specialization and career path orientation. The MAcc offers two separate tracks in assurance and corporate accounting while the MST is designed for students interested in careers in taxation.

In addition to the traditional one year of full-time study beyond the Bachelor's level, the MAcc and the MST programs are offered as

accelerated programs for University of Miami undergraduates. For admission to either the MAcc or MST, based on an undergraduate degree from an accredited U.S. institution, we consider the applicant's undergraduate grade point average, GMAT score, grades in specific accounting courses, the rigor of the undergraduate program, and other factors such as work experience. Admission decisions are made on a competitive basis from the applicant pool. Undergraduate students from the University of Miami that have a grade point average of 3.4 or higher do not have to take the GMAT exam. In addition individuals who have demonstrated their ability to do graduate work in accounting by becoming a CPA or who have earned a graduate degree from a business school accredited by the AACSB are also waved from the requirement to take the GMAT exam.

Students without an undergraduate degree in accounting will be required to take certain prerequisite courses to secure admission. These prerequisites will depend upon the undergraduate major and previous accounting courses taken. Necessary prerequisite accounting courses can be taken in the University of Miami's Accounting Summer Intensive Program, which is a seven-week program beginning in early July.

Foreign students must provide evidence of proficiency in English by supplying a TOEFL score. Additionally, foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting systems and one semester of tax at a U.S. university accredited by the AACSB before enrolling in graduate accounting courses. Alternatively, foreign students may attend the University of Miami's Accounting Summer Intensive Program to fulfill this requirement.

SCHOLARSHIPS

University of Miami School of Business - Alumni Association Endowed Accounting Scholarships are available for students pursuing Graduate Studies in Accounting. Various other scholarships and assistantships may be available.

MASTER OF SCIENCE IN TAXATION (MST)

This program affords the accounting major or equivalent the opportunity to specialize in the area of taxation. Through electives, students are able to expand their areas of expertise, so that they may adequately prepare themselves for careers requiring a high degree of specialized tax knowledge in public accounting, private industry, and government. The program requires 30 semester hours consisting of six required courses and the balance of approved elective courses provided the student has an undergraduate degree in Accounting, or its equivalent, from an accredited institution and has completed ACC403: Fundamentals of Taxation and ACC404: Advanced Taxation, or their equivalents. Students who have taken only one tax course should plan to take an advanced taxation course (such as ACC 639: Income Taxation and Business Entities which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester).

In addition to the nine required courses, students must select four courses from the designated course list. Other courses can be selected from the list of approved electives or in consultation with the program director. Courses with a 600-level designation are designed for graduate students. Courses with a 500-level designation are open to upper-level undergraduate students and do not count toward the MST degree. Unless otherwise noted, courses in the program are two semester hours (two credits).

Required courses:

ACC 610	Financial Reporting Research	2
ACC 630/530	International Financial Reporting Standards	1
ACC 640	Corporate Taxation I	2
ACC 641	Corporate Taxation II	2
ACC 643	Tax Research	2
ACC 645	Partnership Taxation	2
ACC 648	Financial Reporting Implications of Income Taxes.	2
ACC 672/572	Advanced Financial Analysis	2
ACC 623	International Accounting and Taxation	2
or ACC 662	Taxation of Multinational Corporations	2

In addition to the required courses, a student must take *at least four* courses from the following:

ACC 603	Studies in Financial Reporting Issues	2
ACC 604	Seminar in Cost Accounting	2
ACC 606	Internal Auditing	2
ACC 611	Auditing Seminar	2
ACC 620	Accounting Controls in Information Technology	2
ACC 622/522	Advanced Issues in Auditing	3
ACC 624/524	Accounting for Governmental and Not-for-Profit Entities	3
ACC 642	Seminar in Taxation	2
ACC 649	Issues in Tax Policy	2
ACC 664	Global Mergers and Acquisitions: Accounting and Related Issues	2
ACC 675	Compensation, Incentives and Strategic Control	2
ACC 677	Forensic Accounting	2
BSL 675	Advanced Business Law	2
BSL 691	The Public Corporation: Legal Perspectives	2

Students may select their other electives from courses above or the following courses:

BUS 602	Critical Thinking and Effective Writing	1
BUS 603	Critical Thinking and Effective Speaking	1
BSL 624	Negotiation: Theory & Practice	2
BSL 692	Legal Implications of International Business Transactions	2
BSL 694	Real Estate Law	2
BTE 612	Enterprise Technologies	2
BTE 613	Business Intelligence Technologies	2
BTE 617	Information Technology Project Management	2
BTE 689	Topics in Computer Information Systems	1-3
FIN 650	Financial Investment	2
FIN 651	Advanced Topics in Investments	2
FIN 660	International Finance	2
FIN 670	Corporate Finance	2
FIN 671	Advanced Topics in Corporate Finance	2

FIN 674	Financial Analysis of Mergers and Acquisitions	2
---------	--	---

Any other electives must be selected in consultation with the Program Director.

ACCELERATED MASTER'S PROGRAMS

In addition to offering the Master of Accounting (MAcc) and Master of Science in Taxation (MST) on the usual time frame involving one year of full-time study beyond the Bachelor's level, the MAcc-Assurance Track, MAcc-Corporate Track, and MST are offered as accelerated programs. These programs permit high achieving accounting students who have accelerated their education by taking advanced courses in high school, testing out of classes, taking increased class loads, or going to summer school, to start their graduate work while seniors.

The accelerated programs are available only to students who are undergraduate students at the University of Miami. The programs are designed in such a way that students can expect to complete both their Bachelor's and Master's degrees and make significant progress on the CPA exam (if not complete it entirely) within 4½ years. In addition, these programs are extremely price competitive.

Accelerated Program Timeline

1. Internship in summer after junior year.
2. Twelve credits of work in senior year will count towards the MAcc or MST degree (only students in the accelerated programs are eligible to take these classes during their senior year).
3. In summer after senior year take one graduate course, CPA review course, and the CPA exam.
4. Complete remaining credits of graduate work in fall semester after senior year.

Prerequisites

The following must be completed before students begin their senior year:

- A minimum of 102 credit hours
- The following Accounting major requirements: ACC 311, ACC 312, ACC 402 ACC 403, BSL 401 and either ACC 301 or ACC 404.
- All undergraduate degree requirements except for those that can be completed in the senior year. Note that MGT 401 must be taken in the final semester of the undergraduate program..
- Students that select the MAcc-Corporate track must take FIN 303 before or during their senior year.

Senior Year Curriculum

Aside from the remaining undergraduate Accounting program requirements, the program-specific curriculum for the senior year is the same for all tracks (except that students selecting the MAcc-Corporate track must complete FIN 303 in order to take the graduate finance courses required for the track) and consists of the following courses:

ACC 506	Internal Auditing	2
or ACC 572	Advanced Financial Analysis	2
ACC 522	Advanced Issues in Auditing	3
ACC 530	International Financial Reporting Standards	1
ACC 648	Financial Reporting Implications of Income Taxes.	2

BSL 691	The Public Corporation: Legal Perspectives	2
BUS 602	Critical Thinking and Effective Writing	1
BUS 603	Critical Thinking and Effective Speaking	1

Students must select their track (MAcc-Assurance, MAcc-Corporate, or MST) by the spring semester of their senior year before registering for their final fall graduate classes.

Summer after Senior Year

Students must take one accounting graduate course in the summer following their senior year. Accounting courses are offered based on demand and could include ACC 620, Accounting Controls in IT (offered every summer) or ACC 649, Issues in Tax Policy.

Students are also **REQUIRED** to take an approved CPA review course during the summer following their senior year. Students who do not take a CPA review course must complete an additional six graduate credits which will likely delay graduation to May instead of graduating in December.

Students are also expected to pass part, if not all, of the CPA exam during this summer.

Final Fall Semester

In the final fall semester students will complete the remaining 15 or 16 graduate credits including the requirements for their track and electives selected in consultation with the Program Director.

Admission to the Accelerated Programs

Incoming Freshmen

- Prospective students apply to the accelerated program when they apply for admission to the University of Miami.
- SAT scores should meet or exceed 1400; high school unweighted GPA should meet or exceed 3.75.
- Students are required to have an overall and accounting GPA of 3.3 or higher by their junior year in college. Students must then maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher to remain in the program. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program
- Students will need to have completed 102 credit hours by the start of their senior year.

Current University of Miami Undergraduate Accounting Majors

- Students should apply to the accelerated program by September 30 of their junior year.
- Admission to the program will be based on GPA, letters of recommendation, and performance in upper division (300-level or above) accounting courses in progress or completed. It is expected that the students admitted to the program will have GPAs exceeding 3.3, but students with these scores are not guaranteed admission. The decision will depend on the quality and size of the applicant pool and will be made by senior school administrators and faculty.
- After admission, to remain in the program, students must maintain an overall GPA of 3.3 or higher and an accounting GPA of 3.3 or higher. Students who do not maintain the expected GPA may be placed on probation or transferred out of the program.

- Students will need to have completed 102 credit hours by the start of their senior year including ACC 311, ACC 312, ACC 402, ACC 403, BSL 401 and either ACC 301 or ACC404.

ACCOUNTING SUMMER INTENSIVE PROGRAM

The Accounting Summer Intensive Program is designed for students who hold at least an undergraduate business degree in a field other than accounting from an accredited college or university and for foreign students.

Non-Accounting Majors

Students that have a non-accounting degree, preferably in business, can apply for admission to our Master of Accounting (MAcc) or Master of Science in Taxation (MST) and Summer Intensive Program. Applicants to the MAcc or MST program will automatically be considered applicants to the Accounting Summer Intensive Program if their undergraduate degree is not in accounting. Summer Intensive students entering the MST program must also take an advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

Foreign Students

The Accounting Summer Intensive Program is also designed to meet the needs of foreign students. Foreign students must have successfully completed two semesters of intermediate accounting, one semester of cost accounting, one semester of auditing, one semester of accounting information systems and one semester of tax at a U.S. university accredited by the AACSB or alternatively, must attend the Summer Intensive Program before enrolling in graduate accounting courses. Foreign applicants to the MAcc program will automatically also be considered applicants to the Accounting Summer Intensive Program.

Program Schedule

The Accounting Summer Intensive Program is fast-paced and requires full-time attention. As its name implies, the program is intensive and not designed for students that are working even part-time. The 7-week program begins each year about July 1 and continues through mid-August and consists of two 3½ -week modules. Three 2-credit courses are included in each module. Students who want to take any additional graduate tax classes should also plan to take the advanced taxation course (ACC 639) which is offered following the Summer Intensive Program in a 9-day intersession format in August before the start of the fall semester.

Program Prerequisite Accounting Courses

Students entering the program are required to have previously completed introduction to financial accounting and management accounting at a US or foreign university.

Summer Intensive Program Course Offerings

The Summer Intensive Program includes the following six 2-credit upper division accounting courses that are prerequisites for graduate study.

ACC 632	Intermediate Accounting I	2
ACC 633	Intermediate Accounting II	2
ACC 634	Cost Accounting	2
ACC 636	Accounting Systems	2

ACC 673	Taxation for Business and Investment Decisions	2
ACC 635	Auditing	2

Note that the Summer Intensive Program does not include an advanced taxation course (the equivalent of ACC404) which is a required prerequisite for most tax courses in the MST program. Accordingly, in addition to the six summer intensive courses, students entering the MST program must complete ACC 639 which is offered following the Summer Intensive Program in an intersession format in August before the start of the fall semester.

Entering the MAcc or MST Program

Upon successful completion of the intensive program, students immediately enter the MAcc or MST program in the fall semester. To graduate with their MAcc or MST degree, students must complete 30 credits beyond the 12-credit intensive program and may graduate in as little as two semesters, assuming they are full-time students.

CPA LICENSURE REQUIREMENTS

Most of our students intend to become qualified as Certified Public Accountants (CPA). While the CPA exam is a national exam administered by the American Institute of Certified Public Accountants, its execution and CPA licensing practices are governed by state law. For example, some states require a certain number of credit hours in particular subjects and have overall accounting and business credit hour requirements. As such, you should check with the state in which you intend to practice to determine what the specific course requirements are for that state. Our department is unable to make a determination of your eligibility to sit for the CPA exam. This can only be done by the appropriate state board. The licensure requirements for the State of Florida can be viewed at: <http://www.myfloridalicense.com/dbpr/cpa/licensure.html>

For your convenience, the Florida rules that apply to most individuals are summarized here. Please check the State of Florida Web site noted above for updates and rules which may apply in particular circumstances.

As of July 1, 2008 the Florida State Board of Accountancy (BOA) separated the requirements to become a Certified Public Accountant (CPA) into two parts: (1) the requirements to be eligible to take the CPA exam and (2) the requirements for licensure to practice as a CPA in Florida.

Requirements to Sit for the CPA Exam: To be eligible to take the CPA exam, applicants must have completed 120 semester hours including 24 semester hours of upper division (300-level or above) accounting to include auditing, cost and managerial accounting, financial accounting, accounting information systems, and taxation. Applicants must also complete 24 semester hours of upper division general business courses with some exceptions in that one microeconomics, one macroeconomics, one statistics, one business law, and one introduction to computers course may be lower division (freshman or sophomore level). As part of the general business hours, applicants are required to have a total of six semester hours of business law courses, which must cover contracts, torts, and the Uniform Commercial Code. Note that excess upper division accounting courses may be used to meet the general business requirement; however, elementary accounting classes are never

acceptable for credit nor are courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting.

The exam is offered in the following time periods; January – February, April – May, July – August and October – November. Note that applicants are not required to have a bachelor's degree in order to sit for the CPA exam.

Requirements for Licensure: In addition to passing all four parts of the CPA exam with at least a 75% within 18 month rolling period, the Florida State Board of Accountancy requires that applicants have completed a bachelor's degree plus an additional 30 hours for a total of 150 semester hours before you can become licensed as a CPA. One year of work experience under the supervision of a licensed CPA is now also required to become licensed. In addition to experience obtained in public accounting and government, Florida's 2008 legislative change also allows experience obtained in industry and academia. This experience may be obtained before or after sitting for the exam, however, all requirements to sit for the exam must be met before the work experience commences. If you fail to apply for licensure within three years of receiving the licensure package, (sent after you pass all four parts) the CPA grades expire and you have to retake the examination.

The 150 semester hours must include a minimum of 36 semester hours of upper division accounting courses and at least 39 semester hours of upper division (with some exception) general business courses. Excess upper division accounting courses may be used to meet the general business requirement. Courses for non-accounting majors and any MBA courses that are equivalent to elementary accounting are not accepted for this requirement.

Licensed in Another State: If you are licensed in a state other than Florida you can obtain a license in Florida by a process called endorsement. You must provide evidence of meeting all of the requirements in effect at the time of your application. In addition if you passed the exam more than two years before applying you must provide evidence of meeting continuing professional education requirements.

CPA Accreditation Requirements

The Florida State Board of Accountancy accepts degrees from schools accredited by the following associations : Middle States Association, New England Association, North Central Association, Northwest Association, Southern Association of Colleges and Schools, Western Association of Schools and Colleges, Association of Independent Schools and Colleges who have been approved by the Florida State Board of Independent Colleges and Universities, and Canadian Schools who have been approved by their provincial educational bodies. If you have graduated from a school or college which is not accredited by the above mentioned means, then you must use the provisions of F.A.C. 61H1-27.001 (5) (see below).

Applicants Who Have Graduated from Non-Accredited Schools (61H1-27.001) (5)

Applicants who have graduated from a non-accredited school may still qualify to sit for the CPA examination. The candidate must take 15 semester hours of graduate classes. Those must consist of at least nine hours of graduate level accounting courses including a minimum of three semester hours of graduate tax. THESE HOURS MUST BE TAKEN AFTER ADMISSION TO GRADUATE SCHOOL. If the courses are taken

before admission to a graduate program, the classes will not be accepted, even if the school includes them as part of the graduate program. These courses cannot duplicate other courses which the applicant has taken and they cannot be used to accredit the non-accredited degree and satisfy the educational requirements. The applicant must complete the graduate school courses to validate the non-accredited degree. The applicant must also meet all other requirements for endorsement or transfer of credit. An evaluation of foreign transcripts must be completed by an evaluation service which has been approved by the Board (see Board Approval Evaluation Services).

Duplicate Courses

No credit will be given for courses which duplicate another course for which the applicant has received credit. CPA review courses are considered as duplicates.

For the CPA requirements in other states, you should consult the State Board of Accountancy for your state.

Non-Degree

School of Business Administration Graduate Non Degree Programs

The University of Miami School of Business offers executive education programs that empower individuals and organizations to succeed on the global stage.

The School's customized training and development program are designed to enhance the professional knowledge and management skills of key managers and senior executives. Each custom executive education program is crafted by the School's world-class faculty, ranked No. 26 in the world by the Financial Times, working in partnership with the organization's leadership so that the program best meets the unique needs of that particular organization.

The School also offers open enrollment certificate programs in general business which enable professionals to add basic business courses to their portfolios. Several of these programs are taught in Spanish including certificate programs in Administration and Business, Logistics and Transportation, and Innovation and Competiveness Management.

To obtain program information please visit our website (<http://www.bus.miami.edu/executive-education>).

Certificate in Accounting Practice (online)

Certificate in Accounting Practice

Intended for candidates with no prior accounting credits, this online accounting certificate will provide you with the fundamental knowledge of financial and managerial accounting, as well as taxation and accounting information systems. Completion of the certificate will equip you for entry-level jobs in corporate accounting.

If you choose to complete the master's in professional accounting program as well, you will be exposed to more advanced topics in financial and managerial accounting, which will prepare you for mid-level corporate accounting and taxation positions.

To obtain detailed program admission and curricula information please visit website (<http://www.miami.edu/online/online-degrees/masters-professional-accounting>).

Certificate in Business Administration

Certificate in Business Administration (CBA)

The Certificate of Business Administration (CBA) program provides professional and graduate students an opportunity to obtain valuable, fundamental business education and enhance their analytical skills, as well as soft skills. The program consists of four courses in business covering all fundamental functions central to any business operation. Students can take one or more courses for credit, but must satisfactorily complete all four courses to be awarded the certificate. One or more of these courses may also serve as part of the specialized master's degrees. The Graduate Admissions Committee welcomes applications from individuals whose undergraduate degrees are from accredited colleges or universities. The GMAT and GRE are not required except from students seeking admission to the specialized master's programs.

To obtain detailed program admission and curricula information please contact the Office of Recruiting and Admissions at 305-284-2510 or visit our website. (<http://www.bus.miami.edu/graduate-programs/business-certificate>)

Certificate in Corporate Finance (online)

Certificate in Corporate Finance

This certificate is designed for students who are seeking a career change to corporate finance, or students wishing to advance in the corporate Treasurer's office or similar structure. The certificate begins with a common core of financial tools. The core classes include an integrated foundation of finance, economics and accounting, as well as an integrated course on domestic and international corporate valuation, covering both financial and accounting problems. The certificate finishes with a course in applied corporate finance, which focuses on financial decision making from a corporation's perspective. Issues addressed include management of corporate liabilities, leasing and other asset-based financing techniques, short-term and long-term financing, capital budgeting decisions (CAPEX), corporate valuation, hedging with options and futures, dividend policy and share repurchases, corporate financial strategy, and other current issues in corporate finance.

Students completing the Master in Finance have the option of earning a certificate in either Corporate Finance or Financial Decision-Making to supplement their degree. Additionally, an individual certificate in each track can be earned online for those students who do not wish to complete the full degree at this time. The combined Certificate in Finance Decisions and Corporate Finance requires 20 credits, while the Certificate in Corporate Finance requires 16 credits consisting of the following courses:

BUS 640	Quantitative And Analytical Fundamentals For Finance	1-4
FIN 613	Intermediate Corporate Finance and InvestmentS	4
FIN 614	International Finance, Valuation, & Financial Statement Analysis	4

To obtain more information please visit the website (<http://www.miami.edu/online/online-degrees/masters-finance>).

Certificate in Financial Decision Making (online)

Certificate in Financial Decision Making (online)

This certificate is designed for students who wish to either become financial managers or who wish to advance their financial careers. The certificate begins with a common core of financial tools and finishes with a course in financial decision-making. The core classes include an integrated foundation of finance, economics and accounting, as well as an integrated course on domestic and international corporate valuation, covering both finance and accounting problems. The financial decision making course, and the certificate will help managers use decision-making theory to better understand why investors, money managers, and corporate managers often make sub optimal economic and financial decisions. The course includes basic techniques and models that a manager or an investor should know. The certificate will provide students with a template for thinking through a variety of financial issues.

Students completing the master's in finance have the option of earning a certificate in either Corporate Finance or Financial Decision Making to supplement their degree. Additionally, an individual certificate in each track can be earned online for those students who do not wish to complete the full degree at this time. The combined Certificate in Finance Decisions and Corporate Finance requires 20 credits, while the Certificate in Financial Decision Making requires 16 credits consisting of the following courses:

BUS 640	Quantitative And Analytical Fundamentals For Finance	1-4
FIN 613	Intermediate Corporate Finance and InvestmentS	4
FIN 614	International Finance, Valuation, & Financial Statement Analysis	4
FIN 615	Financial Decision Making	4

To obtain detailed program admission and curricula information please visit the website (<http://www.miami.edu/online/online-degrees/masters-finance>).

Certificate in Leadership

Certificate in Leadership

The Certificate in Leadership program is designed to help participants develop the interpersonal skills needed to influence others and lead effectively in today's challenging work environment. The program consists of four 2 credit hour courses that generally meet in the late afternoon and/or early evening Monday-Thursday. Students must have an undergraduate degree to be eligible for this certificate.

Executive Education Programs

University of Miami Executive Education

Accelerate Your Growth and Make an Impact

The University of Miami School of Business offers executive education programs that empower individuals and organizations to succeed on the global stage.

The School's customized training and development programs (<http://www.bus.miami.edu/executive-education/custom-programs>) are designed to enhance the professional knowledge and management skills of key managers and senior executives. Each custom executive education program is crafted by the School's world-class faculty, ranked No. 26 in the world by the Financial Times, working in partnership with the organization's leadership so that the program best meets the unique needs of that particular organization.

The School also offers open enrollment certificate programs (<http://www.bus.miami.edu/executive-education/open-enrollment>) in general business which enable professionals to add basic business courses to their portfolios. Several of these programs are taught in Spanish including certificate programs in Administration & Business, Logistics & Transportation, and Innovation and Competiveness Management.

Courses

Graduate and Doctorate Business Courses

Graduate Business Courses (numbered from 600 to 699) and Doctorate Business Courses (numbered 700 and above) are arranged according to the following:

- ACC - offered by the Accounting department
- BUS - general business or interdepartmental courses
- BSL - courses offered by the Business Law department
- BTE - courses offered by the Business Technologies department (formerly CIS - Computer Informations Systems)
- ECO - courses offered by the Economics department
- FIN - courses offered by the Finance department
- MAS - courses offered by the Management Science department
- MGT - courses offered by the Management department
- MKT - courses offered by the Marketing department

Accounting Courses

ACC 506. Internal Auditing. 2 Credit Hours.

Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.

Prerequisite: ACC 402. Requisite: Senior Status.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 572. Advanced Financial Analysis. 2 Credit Hours.

This course builds on the analytical techniques developed in the prerequisite financial accounting courses to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The view point is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.

Prerequisite: ACC 312. Requisite: Accepted into the Accounting Accelerated Program.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 600. Accounting for Decision-Making and Control. 3 Credit Hours.

The course focuses on the use and understanding of basic financial and managerial accounting reports. The course is oriented to the user of financial data rather than the preparer of the data. Coverage of basic accounting assumptions and current issues affecting accounting processes and reporting are included, but detailed accounting procedures are not emphasized. Completion of the course should permit students to understand accounting information and to communicate with professional accountants. Does not satisfy any accounting requirements needed to sit for the CPA exam in Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 601. Trends in Present Day Accounting. 2 Credit Hours.

Recent developments in accounting thought and advanced accounting theory. The analysis of trends as disclosed by recent releases of the Securities and Exchange Commission, the American Institute of Certified Public Accountants, and the Financial Accounting Standards Board are discussed. Other topics include terminology, current trends in the measurement, presentation of third financial data to meet the needs of third parties, and surveys accounting literature.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 602. Analysis of Financial Statements. 1-3 Credit Hours.

Course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis (including ratio analysis) and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 603. Studies in Financial Reporting Issues. 2 Credit Hours.

An exploration of complex financial reporting issues using the case method.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 604. Seminar in Cost Accounting. 2 Credit Hours.

Course covers four major segments. First, it reviews the basic concepts and tools associated with management control systems. Second, it underscores the importance of decentralization and the impact it has on decision making. Third, it examines the strategic place for cost management. Examples include the adoption of the balanced score card, quality control, productivity, and environmental cost management. Fourth, the course brings costing and control tools into the discussion of decision making.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 606. Internal Auditing. 2 Credit Hours.

Course explores the unique issues associated with the internal audit function. Additionally, the ethical code applicable to internal auditors is discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 607. Financial Accounting & Reporting. 3 Credit Hours.

Basic concepts of accounting designed to increase understanding of the function of accounting statements and their limitations. The generally accepted principles governing the preparation of financial reports and the use of accounting information in investment and credit decisions. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ACC 608. Managerial Accounting. 3 Credit Hours.

Current managerial accounting techniques and theories. Topics include the use of accounting data in making decisions and planning and control systems for implementation of decisions. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida. Limited to Executive MBA students only.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 610. Financial Reporting Research. 2 Credit Hours.

The objective of the course is to familiarize students with researching financial information of publicly traded companies and to provide an introduction to accounting research related to the content and presentation in SEC filings. The course will emphasize searching and accessing as well as understanding and interpretation of financial information presented in SEC filings (e.g., 10-K, 10-Q, Proxy Statements). Accounting topics covered will include accounting information and the capital markets, earnings management, earnings quality, effect of recognition vs. disclosure in accounting reports and the role of the SEC in regulating financial reporting.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 611. Auditing Seminar. 2 Credit Hours.

Practical applications of auditing and research into audit matters. Emphasis of the course is placed on cases involving audit failures, appropriate auditing procedures, reporting, and exercise of audit judgment.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 616. CPA Review I. 3 Credit Hours.

The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA exam (Regulation and Financial Accounting and Reporting). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 617. CPA Review II. 3 Credit Hours.

The CPA Review is an essential ingredient of the accounting accelerated accounting track. Students must provide proof of satisfactory completion of an approved course of study for two parts of the CPA Exam (Business Environment and Concepts, and Auditing and Attestation). This course cannot be used to meet the State of Florida's educational requirements for taking the CPA exam.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 620. Accounting Controls in Information Technology. 2 Credit Hours.

Course develops students' understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting systems elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 622. Advanced Issues in Auditing. 3 Credit Hours.

Course covers advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact in audit practice. Not open to students with credit in ACC 522.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 623. International Accounting and Taxation. 2 Credit Hours.

Course covers tax accounting and business considerations in the global business environment. U.S. tax issues involved in international transactions, working across national borders, the Foreign Corrupt Practices Act, money laundering and uses of accounting information in managing an international business. Not open to students with credit for ACC 523.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Summer.

ACC 624. Accounting for Governmental and Not-for-Profit Entities. 3 Credit Hours.

The course introduces accounting within the environment of modern government and not-for-profit organizations. Emphasis is placed on financial accounting and reporting, current accounting issues, and managerial activities. Not open to students with credit for ACC 524.

Components: LEC.

Grading: GRD.

Typically Offered: Spring & Summer.

ACC 630. International Financial Reporting Standards. 1 Credit Hour.

This course provides an overview of International Financial Reporting Standards (IFRS). The course will begin with a study of IFRS Framework and will then examine a number of the major topics covered in the Intermediate Accounting courses. The perspective will be a comparison between IFRS and U.S. generally accepted accounting principles (U.S. GAAP).

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 631. Advanced Financial Accounting Topics. 2 Credit Hours.

Coverage of the Generally Accepted Accounting Principles governing business combinations, the preparation of consolidated financial statement including local and foreign subsidiaries, and other financial reporting topics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 632. Intermediate Accounting I. 2 Credit Hours.

The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 633. Intermediate Accounting II. 2 Credit Hours.

The accounting principles which shape the financial reporting practices followed by entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. Course also includes the determination of income components and balance sheet elements with brief coverage of the statement of cash flows. Does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 634. Cost Accounting. 2 Credit Hours.

Topics include basic cost concepts, product costing techniques including job-order and process costing, in-depth studies of techniques and issues surrounding cost allocation methods, basic approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, activity-based costing concepts and methodology are introduced. This course does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 635. Auditing. 2 Credit Hours.

Course provides an introduction to the field of auditing. It concentrates on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This course does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 636. Accounting Systems. 2 Credit Hours.

Contemporary accounting systems are computer based. Course covers the nature, design, implementation, and controls in computerized systems as well as manual systems. Micro computers are used as a learning tool. This course does not count towards the credits needed to graduate.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 639. Income Taxation and Business Entities. 2 Credit Hours.

This course is designed to be the second tax course students who are interested in the business applications of federal income tax laws, as they affect corporations, partnerships, and their owners. Emphasis is placed on tax planning aspects of formation, operation, liquidation, and distributions of corporations and partnerships. Not open to students with credit in ACC 404 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 640. Corporate Taxation 1. 2 Credit Hours.

Course covers treatment of the corporate form of organization, its related opportunities, and problem areas, including formation, tax formula, non-liquidating and liquidating distributions, capital structure, redemptions, alternative minimum tax.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 641. Corporate Taxation II. 2 Credit Hours.

An in-depth study of taxable and nontaxable corporate reorganizations. An introduction to affiliated corporations, requirements for consolidated returns, and their associated problems and opportunities are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 642. Seminar in Taxation. 2 Credit Hours.

Investigation of current topical areas in taxation.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 643. Tax Research. 2 Credit Hours.

Study of the tax practice environment including the Treasury Department, the Courts, and the legislative history of the Internal Revenue Code. Ethics in tax practice are also examined. Course includes training in the use of tax services such as RIA Checkpoint and LEXIS, in performing tax research. A research methodology for solving tax problem cases is studied and cases to be researched are assigned.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 645. Partnership Taxation. 2 Credit Hours.

Taxation of partners and other flow-through entities. Partnership formation, termination, distribution, liquidation, and sales of partnership interests are covered. Limited partnerships in conjunction with their use as tax shelters are discussed as well as family partnerships, limited liability companies, and LLPs.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 647. Estates and Gift Taxes. 2 Credit Hours.

Estate and gift planning for shifting wealth from one individual to another by death, gift, or by the use of trusts. Property included in the decedent's gross estate valuation methods, gifts in contemplation of death, jointly held property, life insurance, transfers with retained life estates, bequests, revocable transfers, the marital deduction, powers of appointment, gifts of present and future interest, and gifts to minors are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 648. Financial Reporting Implications of Income Taxes.. 2 Credit Hours.

This course is designed to provide the foundation necessary to understand the financial accounting and reporting of book-tax differences. The course will cover the preparation of the income tax provision and related financial statement disclosures in conformity with U.S. GAAP (FASB ASC 740)

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 649. Issues in Tax Policy. 2 Credit Hours.

This course looks at the process through which our tax laws are created and the important policy issues inherent in individual and corporate income taxes, consumption taxes, and wealth transfer taxes. Topics in this course are not limited to U.S. taxation and include an examination of systems used in other countries (such as the VAT) as possible alternatives to our current tax.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

ACC 650. Accounting Internship. 1-3 Credit Hours.

Student is individually assigned to operating business firm or other organization to gain insight into management practice in area of career interest. Periodic reports and conferences required.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 660. Managerial Accounting in Healthcare Organizational. 3 Credit Hours.

This course covers Managerial Accounting concepts applied to healthcare organizations. Topics include cost allocation and management control systems.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 662. Taxation of Multinational Corporations. 2 Credit Hours.

This course introduces the fundamental tax concepts underlying U.S. taxation of international transactions. Topics include the taxation of U.S. corporations with income from foreign sources, intercompany pricing, anti-tax avoidance provisions, and tax treaties.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 664. Global Mergers and Acquisitions: Accounting and Related Issues. 2 Credit Hours.

This course focuses on the financial, cultural, and strategic aspects of international mergers and acquisitions (M&A) activity and has a global, cross-cultural perspective. It presents a strategic view of the M&A process, examining managerial decision making in the planning, execution, and post-merger phases.

Prerequisite: ACC 402 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 670. Financial Reporting and Analysis. 2 Credit Hours.

The course focuses on the analysis and use of financial accounting information in the evaluation of corporate performance. The course initially demonstrates the accounting process and resulting generation of financial statements. Building on these core accounting concepts, the course emphasizes the understanding of financial statements prepared under U.S. and International Accounting Standards and the analysis of these financial statements including common size analysis, ratio analysis, the impact of taxes, and credit analysis. Completion of the course enhances the student's ability to read, interpret, and analyze financial statements for making investment, credit, acquisition, and other evaluation decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirements needed to sit for the CPA Exam in Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 671. Accounting for Decision Making. 2 Credit Hours.

The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, break-even analysis and pricing, including the impact of taxes. Completion of the course will enhance the student's ability to understand managerial accounting reports and use this information in making business decisions. Limited to MBA students and Executive MBA students. Does not satisfy any accounting requirement needed to sit for the CPA Exam in Florida.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 672. Advanced Financial Analysis. 2 Credit Hours.

Advanced Financial Analysis and Valuation builds on the analytical techniques developed in the basic financial statement analysis course, Accounting 670: Financial Reporting and Analysis, to augment your understanding of more complex financial reporting issues and to introduce you to the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business. We discuss each financial reporting issue in terms of its effect on assessments of a firm's profitability and risk. This course is designed primarily for students who expect to be intensive users of financial statements as part of their professional responsibilities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 673. Taxation for Business and Investment Decisions. 2 Credit Hours.

This course is designed to be the first tax course for students who are interested in acquiring the basic knowledge that all executives and investors should have about our federal income tax system. It studies basic concepts of federal income taxation applicable to all taxpayers. The basic income tax formula is studied including income exclusions, inclusions, statutory deductions, exemptions, and credits as well as property transactions. Completion of this course will enhance the students' appreciation of the role of taxation in making investment, employment-related, and business decisions. Not open to students with credit in ACC 403 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 675. Compensation, Incentives and Strategic Control. 2 Credit Hours.

Internal control is the process by which owners influence manager's of organization to implement the organization's strategies. They key idea is that different organizations typically have different strategies which in turn require different control systems for effective implementation. Internal control involves both formal systems and informal processes. Accounting 675 will begin by describing the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation. We will then explore the economic and financial reporting consequences (perhaps unintended) of various performance measurement mechanisms. In particular, we will focus on issues of short-termism, earnings, management, and attendant control failures that plague Corporate America today . Finally, we will discuss some of the regulatory changes brought about in recent times (e.g., Sarbanes Oxley) to address the apparent widespread control system failures.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 677. Forensic Accounting. 2 Credit Hours.

This course provides an overview of fraud perpetrated against an organization, including employee theft, vendor fraud, customer fraud, and management fraud. You will learn how to investigate and quantify fraud, and how it can be detected and prevented as well as the accountants' role in litigation, such as acting as expert witness.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

ACC 681. Introduction to Financial and Managerial Accounting. 4 Credit Hours.

The first half of the course explores the role of accounting in providing financial information about an enterprise to decision-makers. Emphasis is placed on understanding financial accounting from both a preparer as well as user perspective. Course covers the reporting of financial position including coverage of assets, liabilities, equity accounts, the results of operations, and cash flows. Topics covered in the second half include various product costing techniques, analysis of cost behavior patterns, budgeting, and the use of accounting information in decision making from a managerial perspective.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 682. Intermediate Accounting. 4 Credit Hours.

The accounting principles guiding the financial reporting practices of entities that prepare financial statements in accordance with generally accepted accounting principles are discussed. The course begins with a detailed discussion of the components of the income statement as well as the balance sheet followed by more complex accounting applications such as leases, post retirement benefits, accounting for income taxes, and other topics. Additionally, the course includes coverage of the statement of cash flows.

Prerequisite: ACC 681.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 683. Taxation. 4 Credit Hours.

The course begins with a discussion of basic concepts of federal income taxation applicable to all taxpayers. The principles of individual income taxation, the tax consequences of property transactions, and an introduction to the impact of income taxes on corporations and partnerships are discussed. Emphasis is placed on study of the basic income tax formula including income exclusions, inclusions, statutory deductions, exemptions, and credits. This is followed by a study of Federal income tax laws and regulations as they affect corporations, partnerships, their owners, and employees. Emphasis is placed on tax planning aspects of formation, operation, distribution, and liquidation of corporations and partnerships.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 684. Accounting Information Systems. 4 Credit Hours.

Course covers the nature, design, and implementation of accounting information systems. The objective of the course is to develop students' understanding of the theory and practice of relational database management systems in the accounting view of enterprise-wide databases. With a focus on controls, students build accounting system elements related to main accounting transaction cycles, the revenue cycle, and the purchase cycle.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 685. Financial Statement Analysis and Valuation. 4 Credit Hours.

This course emphasizes the fundamental techniques of financial statement analysis. Building upon core accounting and investment concepts, the course covers the analysis and interpretation of financial accounting information including the balance sheet, income statement, and statement of cash flows. The course also examines the use of accounting information in investment and credit decisions including the valuation of equity investments. The viewpoint is that of the user of financial statements, particularly from the standpoint of an equity investor or purchaser of a business.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 686. Auditing. 4 Credit Hours.

Course focuses on conducting an audit of financial statements in accordance with generally accepted auditing standards. Course covers accounting information systems, audit planning, audit risk and materiality assessments, evaluation of internal control, audit evidence, documentation, and audit reports. This is followed by discussion of advanced issues which arise in audit practice including audit reporting issues, fraud detection and reporting, attestation engagements, special reporting issues, compilation and review engagements, scope of services issues, and other new issues which have a significant impact on audit practice.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 687. Advanced Cost Accounting. 4 Credit Hours.

The course focuses on the use of accounting information in reporting managerial performance and making business decisions. The course covers the preparation and use of managerial accounting information for use in planning, budgeting, control, pricing, and in making other business decisions. Topics include in-depth studies of techniques and issues surrounding cost allocation methods, approaches to solving complex accounting problems, standard cost systems and variance analysis, and variable costing. Additionally, the formal aspects of management control such as the design of responsibility centers, budgets and standards, performance reports and management compensation will be discussed. Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 688. Advance Accounting and Financial Reporting. 4 Credit Hours.

The primary focus of the course is on business combinations and preparing consolidated financial statements. Additionally, the accounting principles and practices applied to foreign operations and partnerships will be discussed along with foreign currency translation issues. This will be followed by an exploration of complex financial reporting issues of contemporaneous interest.

Prerequisite: ACC 682.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ACC 698. Selected Topics. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ACC 699. Directed Readings. 1-3 Credit Hours.

Individually supervised research projects in selected fields. Approval of supervising professor as to topic and evaluation of project required at time of registration.

Components: THI.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

ACC 701. Empirical Accounting Research. 3.00 Credit Hours.

This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.

Components: THI.

Grading: GRD.

Typically Offered: Fall.

ACC 702. Empirical Accounting Research II. 3.00 Credit Hours.

This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, and empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies. PREREQUISITE: ACC 701 TOPICS IN EMPIRICAL ACCOUNTING RESEARCH I, OR PERMISSION FROM THE INSTRUCTOR.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ACC 823. Topics in Empirical Accounting Research I. 3 Credit Hours.

This is the first course in Empirical Accounting Research for Ph.D. students. The course introduces students to the data sources; current techniques for accessing and analyzing accounting data; research methods employed in hypothesis testing; and the literature on positive accounting theory, accounting anomalies, institutional accounting, and disclosure. The emphasis will be on current research with a historical perspective.

Components: SEM.

Grading: GRD.

Typically Offered: Fall.

ACC 824. Topics in Empirical Accounting Research II. 3 Credit Hours.

This is the second course in Empirical Accounting Research for Ph.D. students. In this course, students will explore research on analyst estimates and stock recommendations, industry research in accounting, an empirical research on compensation. The course will critically evaluate the theory, research design, and methodology employed in these studies.

Components: SEM.

Grading: GRD.

Typically Offered: Spring.

ACC 830. Doctoral Dissertation. 1-12 Credit Hours.

Required of all candidates for the PhD. The student will enroll for credit as determined by their advisor, but not for less than a total of 24. Not more than 12 hours of ACC 730 may be taken in a regular semester, nor more than six in a summer session. Where a student has passed their qualifying examinations they may take the maximum allowable credit stated above.

Components: THI.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

Business Courses

BUS 600. Fundamentals of Critical Thinking and Effective Writing. 1 Credit Hour.

Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical issues, developing reasoned positions, and making compelling written arguments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BUS 601. Mba Math Module. 3.00 Credit Hours.

This course provides the student with the necessary mathematical skills to progress toward an MBA degree. The course begins with a review of algebra and continues with the fundamentals of differential and integral calculus. The focus is on applying these concepts in solving business problems.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 602. Critical Thinking and Effective Writing. 1 Credit Hour.

Critical thinking skills are developed by studying questions that transcend any single business discipline. Utilizing a variety of written formats, students hone analytic and persuasive skills, with emphasis on identifying critical questions, developing reasoned positions, and making compelling written arguments.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BUS 603. Critical Thinking and Effective Speaking. 1 Credit Hour.

Builds on critical thinking and writing skills acquired in BUS 602. Topics include oral persuasion, prepared and impromptu speeches and dealing with the media, defending one's view before adversarial audiences, display of data, and effective use of visual aids.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 604. Career Development and Enrichment. 1.00 Credit Hour.

This course will expose students to a variety of academic and industry career lectures, events, and workshops to enhance their MBA experience. The focus is to establish added-value to an MBA student through real world and relevant access to information and resources beyond the traditional curriculum.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

BUS 605. Residential Session Abroad. 1-6 Credit Hours.

One two-week session of the Global Executive MBA program is held abroad. During this corporate and international experience students attend lectures and institutional visits. This experience exposes students to other cultures and different perspectives on business issues, and widens international networking opportunities.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

BUS 620. Exchange Program- IE Business School-Madrid Spain. 1-16 Credit Hours.

Course enrollment will vary based on student selection.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

BUS 622. Global Business Project (GBP) - CIBER. 1-6 Credit Hours.

The Global Business Project (GBP) is a collaborative course offered by participating CIBER schools to their MBAs and other interested graduate students. Students in related disciplines work in teams both virtually and in person on real business issues with multinational and local businesses and not-for-profits. Project supervision and final grade provided by Country Lead Professor CIBER.

Components: THI.

Grading: SUS.

Typically Offered: Fall & Spring.

BUS 624. Asian/Pacific Business Environment- International Trip. 1-4 Credit Hours.

Course content, dates and location will vary from semester to semester at selected universities.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 625. Latin America Business Environment - International Trip. 1-4 Credit Hours.

Course content, dates and location will vary from semester to semester at selected universities.

Components: LEC.

Grading: SUS.

BUS 627. Exchange Program - IESE Business School - Barcelona Spain. 1-16 Credit Hours.

Course enrollment will vary based on student selection.

Components: LEC.

Grading: SUS.

Typically Offered: Fall.

BUS 628. Multidisciplinary Action Projects. 2-4 Credit Hours.

The Multidisciplinary Action Projects core course (MAP) places students with organizations throughout the world to address pressing organizational challenges. Students work in teams with guidance from faculty advisors to develop actionable and valuable recommendations for sponsors. For students, MAP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. MAP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges. For sponsoring organizations, MAP offers access to a high-caliber team of 4-6 students, the latest business concepts and tools, an external viewpoint, and rapid turnaround. The ultimate deliverable to the sponsor from a MAP project is a set of actionable, data-driven recommendations. MAP projects are based on sponsor needs and address a wide range of business issues – from identifying new processes and improving existing operations to launching new products and targeting new growth opportunities. Sponsors come from many different industries – from alternative energy to business process outsourcing to consumer products to financial services to healthcare to real estate to telecom. Sponsoring organizations may be large corporations, small entrepreneurial start-ups, or non-profit organizations. While each MAP project is different in context, all have essential features in common. All confront students with a real business challenge of significant importance and no existing solution. All require applying concepts and tools from multiple disciplines to successfully complete. All require dynamic sense-making, fact-based decisions, and high-performance teamwork. All unfold in unpredictable ways. All conclude with teams presenting actionable recommendations to project sponsors and faculty advisors.

Components: EXP.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 630. Fundamentals Of Economics, Accounting And Finance. 4 Credit Hours.

This course provides an overview of business economics, accounting, and finance. Economic themes primarily focus on microeconomic topics such as demand, supply, elasticity, and forms of competition. Accounting concepts include corporate financial statements, cost-volume-profit analysis, and traditional and activity-based cost accounting. Finance topics include time value of money, capital budgeting basics, foreign exchange, risk and return, modern portfolio theory, and financial markets. The course includes an integration of many of these concepts through an exposure to business plan development.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 631. Business Analytics And Operational Excellence. 4 Credit Hours.

This course combines three disciplines that form the basis of a modern analytical approach to business management: statistics, optimization, and operations management. Many of the concepts covered are cross-disciplinary and can be applied to a variety of business functions and situations. Although specific examples will be used during the course to illustrate each concept, instruction will focus on the general applicability of the material. Topics to be covered include: numerical and categorical data, population/sample, parameter/statistic, introduction to excel, frequency distributions, histograms, pie charts, measures of variability, pivot tables, measures of association, random variables and distributions, sampling, types of hypothesis and of statistical errors, linear programming, network models, sensitivity analysis, integer and goal programming, forecasting, inventory management and location analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 632. Introduction To Strategy, Market And Management. 4 Credit Hours.

This integrated course focuses on the external environment in which business firms operate and on the management techniques through which managers organize and motivate human resources to support strategic initiatives. It emphasizes in particular three critical sets of actors: customers, competitors, and employees. The purpose of the course is to introduce the student to basic conceptual frameworks and analytic models that managers use to a) identify and understand the customer segments that make up a marketplace, b) formulate strategies that achieve a competitive advantage within that marketplace, and c) lead and motivate employees in the execution of competitive strategies.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 633. Business Plan Fundamentals And Communications. 4 Credit Hours.

This course provides students with the fundamentals in the development and preparation of a business plan, as well as of oral and written business communications. Students, after exploring new venture opportunities, will develop a comprehensive business plan, including its functional components (marketing, finance, operational, human and intellectual capital plans), the support with which to secure the needed financial and human resources, and the organization to manage the new venture. Students will also enhance their communication skills with which to identify critical issues, develop reasoned positions, display data, use visual aids effectively, state persuasive and compelling arguments for written documents as well as prepared and impromptu speeches, and deal with the media.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BUS 634. Research Project. 1-6 Credit Hours.

Individually supervised research project in selected field. Scope of work must be approved by supervision instructor prior to registration. Total enrollment may not exceed six credits.

Components: LEC.

Grading: SUS.

Typically Offered: Fall, Spring, & Summer.

BUS 635. Research Project. 1-6 Credit Hours.**Components:** LEC.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**BUS 640. Quantitative And Analytical Fundamentals For Finance. 1-4 Credit Hours.**

This four-credit course provides graduate students with an intensive review of the fundamentals of financial accounting and finance, and as well as microeconomic concepts and quantitative skills, needed as appropriate foundation to pursue the Master of Science in Finance degree or other master degrees that entail taking an elective course in finance. Topics include: Math concept review (functions, exponents, notation, weighted average, derivatives as applied to maximization/minimization); Measures of central location, variability, and association; Supply and demand curves, elasticity; Profit maximization; Markets: perfect competition, monopoly, oligopoly; Economic role of Government (monetary and fiscal policy, regulation, taxation); Basic financial statements (income statement, balance sheet, statement of cash flow, statement of changes in shareholders' equity); Working capital, noncurrent liabilities and owners' equity, investments and long-lived assets; Common size and ratio analysis; Principles in finance; Time value of money; Valuation (including bonds and stocks); Fixed income securities; Term structure of interest rates; Interest rate risk and duration; Capital markets, how securities trade, intermediaries; Capital market efficiency, arbitrage; Risk and return, portfolio math; Diversifiable vs. non-diversifiable risk; Asset Pricing Models (CAPM, beta, Fama-French); Capital structure; Capital budgeting; Cost of capital; Foreign exchange and global investing; Introduction to derivatives. The course will be taught over a two-week period, primarily in lecture, homework, and test format.

Components: DIL.**Grading:** GRD.**Typically Offered:** Summer.**BUS 641. Business Analytics Capstone Project. 2 Credit Hours.**

including data collection and analysis. The description of the problem in question, the approach used to address it, and the findings obtained by the group are to be described in formal written reports. The reports will be evaluated both on their quantitative value and on the quality of the writing.

Prerequisites: MAS 631, MAS 632, MAS 637, MAS 639 or equivalent.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall & Spring.**BUS 650. Introduction To The Miami Emba For The Americas. 1 Credit Hour.**

This course provides incoming Executive MBA students an orientation to program tools and resources central to program success. Students will receive training in Blackboard, learn to access e-materials and navigate the business fundamental virtual modules, and increase their knowledge of business networking and influence. Students will also be introduced to business information resources and research strategies that they will use throughout the program. They will partake in Case Study preparation and receive an overview of the Integrated Project from Global Management, Global Enterprise, and Global Strategic Marketing perspectives. Students will also receive guidance on operating in teams both virtually and during the residency components of the program. Students will also participate in a corporate visit. This orientation also helps build a sense of affiliation among students and with the University.

Components: LEC.**Grading:** SUS.**Typically Offered:** Fall.**BUS 651. Global Strategic Marketing. 4 Credit Hours.**

The purpose of this course is to acquaint the student with the theories and practice of strategic marketing management in the Americas. This course will enable the student to understand markets, develop strategies to capture value, and develop marketing plans based on the nature of national as well as international markets. Specifically, the issues of strategic marketing in the context of firm level strategy will be addressed, as well as issues of value capture and delivery, customer life-time value, pricing, distribution, branding and communication in markets.

Components: LEC.**Grading:** GRD.**Typically Offered:** Fall, Spring, & Summer.**BUS 652. Global Strategy. 2 Credit Hours.**

The purpose of this course is to change how the strategic environment is viewed, how students think about their own organizations and other others, and how strategy and its execution is viewed. This course will help the student: understand organizations as complex systems embedded in a set of evolving cooperative and competitive economic relationships; identify the distinct resources and capabilities that form the foundation of an organization's competitive advantage; formulate business strategies that anticipate imitation and competitor response; evaluate the relationship between a firm's competitive advantage and its growth opportunities; understand the role of the corporate center in supporting and enhancing the competitive success of operating divisions; and see the interplay of organizational structures, systems, networks, and influence centers that form the basis of effective strategy implementation.

Components: LEC.**Grading:** SUS.**Typically Offered:** Fall, Spring, & Summer.

BUS 653. Global Institutions Infrastructure And Environment. 4 Credit Hours.

This course considers how a country's legal and economic institutional arrangements influence managerial strategy involving goods, services and financial flows across nations. The course addresses how economic problems are dealt with by institutional arrangements in different ways around the world. Discussions will emphasize the influence that these institutional arrangements have on managerial project strategy when firms operate across borders. Specific emphasis will be placed on legal, economic and financial institutions in the Americas.

Components: LEC.

Grading: GRD.

Typically Offered: Fall, Spring, & Summer.

BUS 654. Corporate Financing And Investing. 4 Credit Hours.

This course considers financing and investing within the corporation. As such, it will consider the theoretical structure of the problem, the boundaries that management faces and how these decisions are made by management. The inter-residency portion will focus on the theoretical development and computational aspects of solving the problems. The residency portion will emphasize case discussion and simulation to demonstrate the practical implementation as well as integrating these concepts into the overall management picture. The objective of the course is to develop your understanding of the principles that define financial decision making in the firm. These topics are an important component of the strategic planning and top-level management of the firm. The course will guide you through the theory and computational aspects applying the theory, then through application to situations that will enhance and cement your understanding. Finance theory is universal and therefore does not apply to any given country or system. All of the applications will be international, multinational, or global in context. A central theme of the course is decision making. Specifically we will focus on the financial aspects of major strategic decisions. We will build on previous courses to understand how institutions, accounting, legal structures and more, affect these decisions.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 655. Public Policy and Health. 3 Credit Hours.

Development of public policy at the federal, state and local level. Policy process, models of policy analysis, policy development in several government service areas, and plans for policy change. Special emphasis on health policy formulation, implementation and the use of epidemiological tools in health policy analysis.

Components: LEC.

Grading: GRD.

Typically Offered: Summer.

BUS 656. Integrated Business Project. 1-6 Credit Hours.

The Integrated Project course (IP) requires students to formulate, develop and implement three business projects that address pressing organizational challenge, over the 17-month duration of the EMBA for the Americas. Students may work in teams or individually to develop actionable and valuable recommendations for their chosen organization and present project outcomes to faculty advisors during the February, June and October residencies. For students, IP provides an opportunity to augment and integrate knowledge of fundamental business concepts and tools learned in classroom settings. IP also offers opportunities to develop and test both critical thinking and leadership skills through practical experience with real business challenges.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 657. Optimizing Human Capital. 4 Credit Hours.

The 21st century workplace has often been characterized as the "Age of Intellectual Capital," a time in which competitive advantage is linked intricately to optimizing human resources in distinctive ways. In this dynamic, global marketplace, Darwin rules. To survive, organizations must provide the best products, the best services with the best labor or risk extinction. Contextual factors including changing demographics; global social, economic, and regulatory issues; and technological innovations have created major challenges for organizational sustainability. In a recent publication based on survey results from 94 countries, talent acquisition, retention, management, and engagement were viewed as "urgent" global trends for the 21st century. Utilizing a variety of pedagogical approaches, this course will focus on the ways in which human capital can be leveraged to create sustainability as well as work environments that engage the minds and hearts of participants to achieve strategic initiatives.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BUS 658. Business Analytics. 4 Credit Hours.

One of the strengths of Business Analytics is its broad applicability. The skills learned in this module can be used in virtually any context of business, including but not limited to: finance, marketing, strategy, operations, logistics, transportation, health care, real estate, sports, manufacturing, etc. For that reason, rather than focusing on a single central theme, as do other modules in the MEMBAA program, the Business Analytics module touches on a variety of themes that illustrate its potential.

Components: LEC.

Grading: SUS.

Typically Offered: Fall & Spring.

BUS 660. High Performance Leadership. 4 Credit Hours.

The High Performance Leadership course was developed to help executives build a high-performance work environment and effectively operate in the multi-cultural environment of the Americas and the World. The course is divided into two parts. The first part, the inter-residency will concentrate on the facets of high-performance leadership. It will explore the fundamentals of leadership; investigate the major leadership theoretical concepts; explore a wide-range of leadership research; convey practical leadership implications; and share lessons in conquering self-leadership. This section will be taught online through readings, discussion boards, and case and leader analyses. The emphasis will be on building a sound grasp of good practice, and on developing the ability to apply such knowledge to actual business problems. The theories will be applied to specific situations. The second part of the course, the residency concentrates on the cross-cultural environment of the Americas (and global markets) and addresses four main topics. The first session focuses on Cross-Cultural Communication in Business and allows executives to understand culturally-specific communication patterns, negotiation styles, expectations, cues, and norms. The second session addresses Leadership Issues in Organizational Control and participants will explore ethical and moral dilemmas, and external communications by senior executives. The third session focusses on Cross Cultural Issues in Leadership and examines effective leadership across cultures. The final session addresses Guanxi and Doing Business in China. China is currently or will soon become the world's largest economy (PPP basis) and is increasingly becoming important to the Americas. This session addresses critical thinking, cultural understanding, solutions to problems, and evaluating different options when doing business with China.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 661. Enhancing Global Operations. 4 Credit Hours.

This course focusses on how to manage more complicated global networks; how to optimize service and quality levels of performance; and, how to minimize risks yet maintain required capacities. Operational transformation requires commitment and expertise in strategy and execution to achieve lasting improvements. This course draws on research and real world issues confronting manufacturing and service companies today, providing strategic frameworks to enable executives to make smart choices so that their firms can deliver the products and services they are committed to providing their customers.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 662. Decision Making in Global Environment. 4 Credit Hours.

This course provides students with a systematic way to carefully think about decisions to arrive at more informed choices while doing business globally and specifically in the Americas. The course covers structuring decisions, creating alternatives, making tradeoffs among conflicting objectives, accounting for uncertainties and risk tolerance, and analyzing and evaluating alternatives. The course is intended to make participants aware of decision making issues surrounding global business, the dynamic issues surrounding their context, and how these affect managerial strategy. An objective of the course is to increase participants' competence in managerial decision making related to globalization, institutions, incentives, corporate governance, regulation, business law, international finance and accounting, organizations and management (including culture), and international trade.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 663. Entrepreneurship & Innovation. 4 Credit Hours.

This course considers entrepreneurship and innovation within the Americas, together with a special emphasis on the Latin American context. The course covers the building blocks of the entrepreneurial process and pays special attention to the family business model where ownership is closely held. The objective of the course is to develop an understanding of the venture formulation process within the Americas and the processes that surround this. The topics of innovation; venture capital; venture formulation; human capital; market dynamics; technological readiness; role of government, regulation, and culture will be assessed. An objective of the course is to consider new models for venture design such as the agile model of development and the creation of the business canvases, a lean version of the traditional business plan.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 698. Selected Topics. 1-6 Credit Hours.

Topics in selected areas of business.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BUS 700. Introduction To Commercial Real Estate: Analysis And Field Experience. 3 Credit Hours.

Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a one-week, four module, on-campus class followed by a full-time internship at a local Commercial Real Estate Institution during the first summer of the program. Module I: Students are introduced to the complexities of commercial construction techniques used in South Florida and the important links between architectural plans and economic value to owners and tenants. Module II: Students are introduced to the terminology and financial analysis of commercial real estate. Module III: Students are introduced to the application of real estate finance and valuation principles using ARGUS Valuation – DCF. Module IV: Students participate in a required internship at a local Commercial Real Estate Institution. Regarded as a full-time student.

Components: EXP.

Grading: SUS.

Typically Offered: Summer.

BUS 701. Commercial Real Estate Field Experience. 3 Credit Hours.

Students enrolled in the Accelerated MBA in Real Estate program are required to participate in a full-time internship at a local Commercial Real Estate Institution during the first fall semester of the program. This internship is subsequent to their previous summer internship (BUS 700). Regarded as a full-time student.

Components: EXP.

Grading: SUS.

Typically Offered: Fall.

Business Law Courses

BSL 612. Legal Aspects of International Business. 3 Credit Hours.

International legal framework, transactional legal issues in finance, marketing, management, distribution, and a review of theory and practice of negotiations. Case studies on such topics as legal implications of GATT, European Competition, C.I.S.G., and Export Import Rules are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 624. Negotiation: Theory & Practice. 2 Credit Hours.

This experiential course is designed to introduce graduate business students to the theory and practice of negotiation. The lectures and readings will discuss negotiation theory, equipping students with the concepts and terminology to prepare and execute value-creating, interest-based negotiations. Negotiation exercises will provide the student with an opportunity to apply the theoretical elements of the course in live, simulated negotiations. Extensive review of these simulated negotiations through classroom discussion and film analysis will assist students in cementing their understanding of the use of negotiation theory in practice. Although negotiation theory is applicable to a wide variety of academic contexts, this course focuses on negotiations in the practice of law and business.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 675. Advanced Business Law. 2 Credit Hours.

Advanced Business Law focuses on the following substantive subject areas commonly encountered by Certified Public Accountants and tested on the Uniform Certified Public Accountancy Examination: business ethics, contracts (including formation, performance, breach, and remedies), commercial transactions under UCC Article 2, commercial paper, agency principles, and secured transactions. Special attention is given to the areas tested on Regulation section of the Uniform CPA Exam.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BSL 685. Legal Aspects of Health Administration. 3 Credit Hours.

Derivation of rule of law governing health providers, vicarious liability of administrative and medical personnel, informed consent, and other related problems are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 690. Legal and Ethical Implications of Business Decision Making. 2 Credit Hours.

The course provides an introduction to our legal and governmental regulatory system, as well as a review of constitutional considerations for businesses. Morality and ethics are defined and distinguished. Applied philosophy is then introduced, to give the student a foundation upon which to analyze the ethical dimensions of common business questions. The relationship between the letter and the spirit of the law is examined. Specific business topics and their legal and ethical aspects are then addressed. This includes, but is not limited to, discussion of the following areas: consumer relationships; business organizations; the balancing of corporate vs. individual power (employee rights and responsibilities, employment discrimination); and the emerging ethic of a global economy.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BSL 691. The Public Corporation: Legal Perspectives. 2 Credit Hours.

The Public Corporation: Legal Perspectives reviews the laws governing the formation, operation, regulation, and governance of the public corporation with the objective of providing the graduate business student a sophisticated examination of the legal and social aspects of managing the money of others. Further, the course examines the rules and regulations governing the raising of capital from the public through the sale of securities for the development of and investment in a private enterprise.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 692. Legal Implications of International Business Transactions. 2 Credit Hours.

International legal framework, transactional legal issues in finance, marketing, management, and distribution. Case studies in substantive international legal topics such as international sales contracts, international documentary sale, international terms of trade, legal implications and substantive rules governing international finance, collections, payments, and letter of credit, the resolution of international disputes with a particular emphasis and examination upon the management of litigation, enforcement of foreign judgments, and alternative dispute resolution are also included.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 694. Real Estate Law. 2 Credit Hours.

Real Estate Law focuses on the U.S. legal system as it relates to the buying, selling, and financing of real property. In addition to traditional text material, the analysis of U.S. court cases is used to detail the legal factors of ownership rights and liabilities, specific interests in real property, contracting issues related to the purchase and sale of real property, as well as financing and closing the real estate transaction. The course provides a problem-solving experience, which is intended to develop graduate students' critical thinking process as well as their skills in oral and written communication.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BSL 695. Legal Implications in Executive Decision Making. 3 Credit Hours.

Law and legal process are examined as they mix with the politics and ethics of business, including the weight given to legal implications in the executive decision-making process.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 696. Legal and Ethical Implications in Executive Decision Making. 3 Credit Hours.

Business and public administration cases requiring identification of the legal, ethical, and social elements as well as the determination of the weight such elements should have in setting policy are discussed. Integration of law and ethics with public and business administration is also included.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BSL 698. Selected Topics. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Business Technology Courses

BTE 610. Foundations of Management Information Systems. 2 Credit Hours.

Course is designed to provide the foundations in management information systems information systems required to understand and effectively use an enterprise wide information system. Topics include the role of the CIO, managing Information Technology (IT) as a strategic resource, business process reengineering, IT planning, IT governance and communication, the Internet, and eBusiness.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 612. Enterprise Technologies. 2 Credit Hours.

Course addresses the needs of business students who wish to expand their understanding of information technology fundamentals. Focusing upon their use in today's enterprises, the course aims to provide students with knowledge of a variety of technological concepts commonly used in the IT Organization's systems development initiatives and enables students to understand the implications of deploying such technologies within the enterprise.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 613. Business Intelligence Technologies. 2 Credit Hours.

Course facilitates business decision makers in their understanding of data analysis tools that operate over data warehouses and 'data marts' more commonly referred to as Business Intelligence. Course focuses upon using technologies to drive effective data driven decision making through effective mining of corporate data warehouses, thus improving operational efficiency and ultimately increasing profitability. Students are exposed to the concepts, analysis techniques, data cubes, and manipulation of information extracted from a data warehouse that enables the formulation and execution of business strategies. Data analysis case studies are used to reinforce students' understanding and strategic use of results to accomplish business objectives.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 617. Information Technology Project Management. 2 Credit Hours.

Course covers the identification and development of information technology plans for projects supporting the organization's business objectives and all activities required in the initiating, planning, executing, controlling, and closing phases of the project's lifecycle. Course is intended to provide the body of knowledge and best practices necessary for a new Consultant, Business Analyst or Project Manager to successfully perform his/her responsibilities on a wide variety of IT enterprise projects.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 621. Management Information Systems. 3 Credit Hours.

Course is designed to give prospective managers a foundation in MIS sufficient to understand and effectively use information systems. Topics include types of information systems, role of MIS in organizations, CIO issues, ERP systems, and electronic commerce.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 623. Database Management Systems. 3 Credit Hours.

Course covers the fundamental concepts of database management systems using the Oracle DBMS. Topics include database theory and terminology, logical modeling, normalization, SQL language, database design and implementation, database administration, data security, database transaction/concurrency, and data backup.

Components: LEC.

Grading: GRD.

Typically Offered: Fall & Spring.

BTE 624. Mobile Apps Development. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 630. Fundamentals of Local and Wide Area Networks. 3 Credit Hours.

Course provides the graduate student the necessary knowledge to understand the design, integration, technologies, and services of local and wide area networks (LANs and WANs) in the business environment. Topics include signal transmission and propagation, standards and protocols, data communications media and devices, layered/encapsulated communications based on the hybrid TCP/IP-OSI standards, small and large-site PC LANs, Frame Relay, ATM, Virtual Private Networking (VPN), Telephony, Internet technologies, and network security.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 631. Computer and Network Security. 3 Credit Hours.

Protection of computers and networks against unauthorized access, access control, encryption, firewalls, proxy, digital certificates, and software security are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 635. COMP COMMUN SECURITY. 3 Credit Hours.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 640. Data Communications and Networking. 3 Credit Hours.

Course addresses advanced topics in computer networks from the perspective of a business decision-maker. The course begins with a focus on signal propagation, media characteristics, and digital and analog encoding techniques. It continues with a study of datalink, network, and transport layer functions as defined by the OSI and TCP/IP models. The architecture of the Internet is explored and routing algorithms for wired, wireless, and peer-to-peer networks are introduced. Course concludes with a high-level overview of the top OSI layers. After taking the class the students should be able to critically evaluate network solutions based on the capabilities and limitations of the equipment.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 646. IT Planning and Project Management. 3 Credit Hours.

Course covers the development of information technology strategic and tactical plans for projects supporting the organization's business objectives and project management as applied to planning, implementing, controlling networking, information systems and e-commerce projects. Course is intended to provide a body of knowledge necessary for a new Consultant or Project Manager to successfully initiate, plan, manage, control, and report on a variety of project types. People skills required in the areas of team selection, structure, conflict resolution, and leadership is also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 650. Introduction to Health Informatics. 3 Credit Hours.

The course develops an understanding of the role of information systems and technology within a healthcare organization. It examines the business and technical issues associated with the selection, deployment and use of health informatics, both in the clinical and back office areas. Health informatics, for the purpose of the course, is defined as the convergence of information technology, information management, and health care, at various levels, ranging from simple data gathering, to the design and implementation of new health care information systems.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

BTE 660. Computer Information Systems Graduate Internship. 1-3 Credit Hours.

Student is individually assigned to an operating business firm or other organization to gain insight and experience in information technology practice in area of career interest. Periodic reports and conferences are required. This course can only be taken as "satisfactory/unsatisfactory."

Components: THI.

Grading: SUS.

Typically Offered: Offered by Announcement Only.

BTE 665. Applied Software Project Development. 3 Credit Hours.

Advanced concepts and techniques in application project development. Topics include project management, program testing, documentation, application installation, and application maintenance. Students will work on a group project to sharpen their implementation skills. Prerequisite: CIS 223 or 226 or equivalent.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

BTE 680. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 682. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 684. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 685. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 686. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 687. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 688. Topics in Computer Information Systems. 3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 689. Topics in Computer Information Systems. 1-3 Credit Hours.

Topics in selected areas of specialization.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 690. Directed Study in Computer Information Systems. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: THI.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 691. Directed Study in Computer Information Systems. 1-3 Credit Hours.

Investigation and research in special areas of interest. Offered by special arrangement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

BTE 699. Directed Study. 1-3 Credit Hours.

Offered by special arrangement.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

Economics Courses

ECO 600. Econometrics. 3 Credit Hours.

Statistical methods for estimating and testing mathematical models of economic relationships.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 601. Graduate Macroeconomic Theory. 3 Credit Hours.

The primary objective of this course is to introduce the student to the mathematical presentation of the major Classical, Neo-classical, Keynesian, and Neo-Keynesian macroeconomic models.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 602. Advanced Microeconomic Theory. 3 Credit Hours.

An introduction to the mathematical approach to microeconomic theory. Topics include consumer/household behavior, the theory of the firm, resource allocation, welfare economics, and uncertainty theory.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 603. Monetary Theory and Policy. 3 Credit Hours.

Current monetary theory and its use and application in fiscal and monetary policymaking. Topics include the rational expectations hypothesis, time inconsistency, and the role of the government budget constraint.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 604. Topics in Applied Macroeconomics. 3 Credit Hours.

Course acquaints students with current substantive issues in macroeconomics. Topics include consumption determination, savings behavior, bequest behavior, fiscal policy effects on interest rates, consumption, real exchange rates, trade balances, and inflation.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 610. Mathematical Economics And Applications. 3 Credit Hours.

The course will focus on specific applications of microeconomic theory, which may vary each semester. Topics may include choice under uncertainty, game-theoretic models of insurance markets, principal-agents problems, and basic auction theory. The discussion of each application will be preceded by a discussion of the mathematical tools required. The mathematics topics covered may include basic theory of sets and functions, concave / convex functions and their role in optimization, expectations, conditional probability, Bayes rule, and order statistics.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 611. Labor Economics (III). 3 Credit Hours.

The formulation and testing of models of labor markets. The application of the tools of microeconomics and econometrics to the analysis of labor markets. Leading contributions in the areas of dynamic analysis of labor markets, human capital investment, the determinants of the wage structure, time allocation and search models, dual and internal labor market models, and analysis of government policy are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 612. Economic Strategies for Firms and the Industry. 3 Credit Hours.

This course shows how modern economic techniques can be used to identify optimal managerial decisions and industrial developments. Diverse real-world applications are examined.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 620. Advanced Econometrics. 3 Credit Hours.

Advanced econometric methods including advanced techniques in multiple regression, Bayesian methods, maximum likelihood estimators, distributed lag models, spectral analysis, and Monte Carlo studies are discussed.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 621. Advanced Macro Analysis. 3 Credit Hours.

Theory of the determination of national income, employment, and price levels. Course emphasizes mathematical solutions of Classical, Keynesian, and other economic models.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 625. Applied Econometrics. 3 Credit Hours.

Practical applications of econometrics are surveyed. Computer packages are used to examine economic data. Topics include the series analysis, limited dependent variable models, pooling cross section and time series data, model selection, and rational expectations models.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 633. Advanced Micro Analysis. 3 Credit Hours.

Theory of the behavior of firms and households and the determination of prices and resource allocation in a decentralized economy.

Components: LEC.

Grading: GRD.

Typically Offered: Spring.

ECO 634. Advanced Micro Analysis II. 3 Credit Hours.

Continuation of ECO 633. Advanced analysis of theory of the household and firm emphasizing recent approaches. Analysis of decisions over time, duality relationships, advanced demand theory, risk and uncertainty, behavioral theories of the firm, and technological change are covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 645. Regulations Economics. 3 Credit Hours.

This course examines public policies for dealing with problems arising in markets in which competitive forces are weak. The focus is on monopolies, oligopolies, cartels, and other environments where market mechanisms are unlikely to produce outcomes that benefit consumers more than the alternatives involving costly government intervention.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 675. Latin America And The Global Economy. 3 Credit Hours.

Analysis of the economic, political, and social forces at work in the changing economies in Latin America.

Components: LEC.

Grading: GRD.

Typically Offered: Offered by Announcement Only.

ECO 680. Essentials of Economics. 2 Credit Hours.

This course provides an introduction to the core concepts of economics. Topics include allocation of scarce resources by the laws of supply and demand, use of the market place as the principle organizing and distribution tool of the economy, externalities, and market failure. Pollution of the environment is treated as a needed correction to be done by public regulation through taxation and legislation. The principal forms of firm organization and dissolution are also discussed. Applications of the laws of supply and demand are made to forecasting demand and analyzing cost structure. The entry and exit of firms and the valuation of the firm is also covered.

Components: LEC.

Grading: GRD.

Typically Offered: Fall.

ECO 685. Managerial Decisions in a Global Economy. 2 Credit Hours.

Modern techniques of economic analysis and decision science are applied to the management of the firm in a global environment. Business planning and the determinants of supply and demand are an integral part of the course. The principal forms of business organization and dissolution are reviewed. The major issues confronted by the firm: Principal-agent problem (or how to motivate managers to act in the best interest of the owners, the shareholders), moral hazard, discounting of free cash flow and terminal value, economies of scale and scope, and strategic management decision making are covered.

Components: LEC.

Grading: GRD.
